FEDERAL REGISTER

Vol. 89 Tuesday,

No. 79 April 23, 2024

Pages 30257–31064

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Presidential Documents

Title 3—

The President

Proclamation 10728 of April 18, 2024

Education and Sharing Day, USA, 2024

By the President of the United States of America

A Proclamation

This Education and Sharing Day, USA, we remember the life and legacy of the Lubavitcher Rebbe, Rabbi Menachem Mendel Schneerson, as the leader of the Chabad-Lubavitch movement and recommit to our shared values of honesty, dignity, and equal justice that he long championed and that have made America strong.

Forced to flee Nazi-occupied Europe during one of history's darkest moments, the Rebbe found a new home and purpose in America. In the wake of the Holocaust, he led hundreds of thousands to deepen their faith. As a prolific scholar and teacher, his calls for new schools and community centers inspired people to build them in all 50 States and across the globe, and they moved generations to embrace education not only as a means of self-improvement but as an essential path to a more just society. Here in America, he also offered counsel to some of my predecessors as President, always advocating for our Nation's role as a beacon of hope in the world.

We honor the Rebbe's birthday every year, but we know this year is different. Violence and cruelty have reminded us that hate never goes away—it only hides. Silence is complicity, and America will not be silent. As Americans, we reject terrorism and will keep working unequivocally to combat anti-semitism at every turn. My Administration remains dedicated to Israel's security, and here at home, we have been implementing America's first-ever National Strategy to Counter Antisemitism. We will give hate no safe harbor.

The Rebbe knew that education is fundamental to cultivating understanding and acceptance. It opens us up to one another, and it builds not just knowledge but character, as well as an awareness of something bigger than ourselves. The Rebbe's beliefs are reflected in the American creed that every person is created equal and deserves to be treated equally throughout their lives, starting with access to a quality education—a mission my Administration shares.

As we approach the 30th anniversary of the Rebbe's passing, we honor his work by celebrating our common faith in our Nation and by working to ensure that every American has a chance to learn, grow, and thrive—in the classroom and as caring and courageous people.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim April 19, 2024, as Education and Sharing Day, USA. I call upon government officials, educators, volunteers, and all the people of the United States to observe this day with appropriate programs, ceremonies, and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this eighteenth day of April, in the year of our Lord two thousand twenty-four, and of the Independence of the United States of America the two hundred and forty-eighth.

CONSUMER FINANCIAL PROTECTION BUREAU

12 CFR Part 1091

[Docket No. CFPB–2024–0006]

Procedures for Supervisory Designation Proceedings

AGENCY: Consumer Financial Protection Bureau.

ACTION: Final rule; request for public comment.

SUMMARY: The Consumer Financial Protection Bureau (CFPB or Bureau) is updating the CFPB's procedures for designating nonbank covered persons for supervision, to conform to a recent organizational change and to further ensure that proceedings are fair, effective, and efficient for all parties.

DATES: This rule is effective on April 23, 2024. Comments must be received on or before May 23, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CFPB–2024–0006, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. A brief summary of this document will be available at *https://www.regulations.gov/docket/CFPB-2024-0006.*
- *Email: 2024-SupervisoryDesignationProceedings@cfpb.gov.* Include Docket No. CFPB–2024–0006 in the subject line of the message.
- *Mail/Hand Delivery/Courier:* Comment Intake—Procedures for Supervisory Designation Proceedings, c/o Legal Division Docket Manager, Consumer Financial Protection Bureau, 1700 G Street NW, Washington, DC 20552.

Instructions: The CFPB encourages the early submission of comments. All submissions should include the agency name and docket number for this rule. Commenters are encouraged to submit comments electronically. In general, all comments received will be posted without change to *https://www.regulations.gov.*

All submissions, including attachments and other supporting materials, will become part of the public record and subject to public disclosure. Proprietary information or sensitive personal information, such as account numbers or Social Security numbers, or names of other individuals, should not be included. Submissions will not be edited to remove any identifying or contact information.

FOR FURTHER INFORMATION CONTACT: George Karithanom, Regulatory Implementation & Guidance Program Analyst, Office of Regulations, at 202–435–7700 or *https://reginquiries.consumerfinance.gov/.* If you require this document in an alternative electronic format, please contact *CFPB_Accessibility@cfpb.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Consumer Financial Protection Act of 2010 (CFPA) establishes the CFPB as an independent bureau in the Federal Reserve System and assigns the CFPB a range of rulemaking, enforcement, supervision, and other authorities.[1]

One of the supervisory authorities under the CFPA is section 1024(a)(1)(C). It authorizes the CFPB to supervise a nonbank covered person that the CFPB ''has reasonable cause to determine, by order, after notice to the covered person and a reasonable opportunity for such covered person to respond . . . is engaging, or has engaged, in conduct that poses risks to consumers with regard to the offering or provision of consumer financial products or services.'' [2] In 2013, the CFPB issued procedures to govern these supervisory designation proceedings (2013 rule).[3] However, the authority was largely unused for a number of years.[4] In 2022, the CFPB announced that it would begin to make active use of the supervisory designation authority, and it made a limited amendment to the procedures to establish a specific process for public release of final decisions and orders (2022 rule).[5]

The CFPB has initiated a number of supervisory designation proceedings since the 2022 rule. On February 23, 2024, the CFPB publicly released the first decision and order in a contested proceeding, which discusses the CFPB's view of the section 1024(a)(1)(C) authority.[6] Other institutions have consented to CFPB supervision, in some cases without a proceeding and in other cases during a proceeding. The CFPB looks forward to a productive supervisory relationship with all the institutions that are now within its supervisory authority.

In late February 2024, the CFPB began a transition to a new organizational structure for its supervision and enforcement work. The functions of the Associate Director of the Division of Supervision, Enforcement, and Fair Lending are being transferred to the Supervision Director as head of a Division of Supervision and the Enforcement Director as head of a Division of Enforcement. This rule is in part intended to implement that change in the context of supervisory designation proceedings.

Legal Authority

Section 1024(b)(7) of the CFPA authorizes the CFPB to ''prescribe rules to facilitate supervision'' of the nonbank covered persons described in section 1024(a), as well as to facilitate ''assessment and detection of risks to consumers.'' [7] Additionally, section 1022(b)(1) provides, in relevant part, that the CFPB Director ''may prescribe rules . . . as may be necessary or appropriate to enable the Bureau to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof.'' [8] The CFPB issues this rule based on its authority under section 1024(b)(7) and section 1022(b)(1).

Discussion

Subpart A—General

1091.101 Definitions.

The rule makes technical changes to definitions.

Subpart B—Determination and Voluntary Consent Procedures

1091.201 Voluntary consent to supervisory authority.[9]

The initiating official and respondents have resolved the large majority of proceedings by consent. Under the 2013 rule, there were two provisions that established separate procedural avenues for entering into a consent agreements. One provision (former § 1091.103(b)) required the initiating official to enclose a proposed consent agreement with the Notice of Reasonable Cause (Notice), and the other provision (former § 1091.110) authorized consent agreements to be agreed at any time. There were small differences between the two provisions.

Under this rule, a proposed consent agreement will continue to be enclosed with the Notice, and consent agreements can also be agreed at any other time. However, the Bureau is combining the two previous provisions into one provision (§ 1091.201) and harmonizing their differences, in order to reduce complexity and risk of confusion. One of the two previous provisions stated that the consent agreement does not constitute an admission by the respondent, while the other did not address that point expressly; new § 1091.201 clarifies that a consent agreement does not constitute an admission. One of the two previous provisions contemplated a two-year period for supervision while the other allowed duration to be addressed on a case-by-case basis; new § 1091.201 takes the latter course. All consent agreements under both previous provisions were for two years, and the CFPB anticipates that will continue to be the typical duration. But addressing duration on a case-by-case basis rather than by rule will provide flexibility if a longer or shorter period were hypothetically warranted.

1091.202 Notice of Reasonable Cause.[10]

The Supervision Director as initiating official commences a contested proceeding by serving the respondent with a Notice of Reasonable Cause (Notice). The Notice is the ordinary means by which the CFPB provides notice under section 1024(a)(1)(C) of the CFPA, although there may sometimes be proceedings in which additional notice is provided at later points in the proceeding, for example through supplemental briefing.

Paragraph (c) simplifies certain general background information about the section 1024(a)(1)(C) process that was included in the Notice under the 2013 rule.

Paragraph (d) includes an update to the method for serving the Notice. The 2013 rule included methods of service that were patterned on how a notice of charges is served under the Rules of Practice for Adjudication Proceedings.[11] In order to provide an additional measure of flexibility, this rule also permits other methods that are ''reasonably calculated to give notice.''

Paragraph (e) codifies that the initiating official may withdraw a Notice. The 2013 rule did not expressly address this subject.

1091.203 Response.[12]

This provision governs the response, which is the respondent's opportunity to respond to the Notice. The rule makes minor technical changes to the provision.

1091.204 Reply by initiating official.

This new provision provides the initiating official with the option of filing a written reply to the response. Under the 2013 rule, there was no such reply. Because of the initiating official's role in formulating the Notice, the initiating official will likely have observations that are useful to the Director in considering the response.

1091.205 Supplemental oral response.[13]

This provision governs a supplemental oral response before the Director, which a respondent can request in its response under § 1091.203. Under the 2013 rule, a respondent presented the supplemental oral response to the Associate Director for Supervision, Enforcement, and Fair Lending. However, as discussed in connection with § 1091.206 below, in light of the elimination of the Associate Director position, the rule merges the Associate Director's and Director's adjudicative roles.[14] The rule also gives the Director more flexibility regarding whether a supplemental oral response is in person at the Bureau's headquarters, by telephone, or by video conference, consistent with ongoing changes to working practices and possible future public health needs.[15]

1091.206 Determination by the Director.[16]

After the Notice, response, reply (if any), and supplemental oral response (if any), the rule provides for the Director to make a final determination in a proceeding.

Under the 2013 rule, the Associate Director of the Division of Supervision, Enforcement, and Fair Lending submitted a recommended determination to the Director, and then the Director issued a final determination. But as noted above, the role of Associate Director will no longer exist under the new organizational structure. The Associate Director's supervision-related functions are being transferred to the Supervision Director, who serves as initiating official in the context of supervisory designation proceedings. Accordingly, this rule merges the adjudicative roles of the Associate Director and Director in these proceedings. This change, in addition to aligning with the new organizational structure, will make proceedings more efficient. The former two-stage process resulted in a more complex and resource-intensive process and a longer timeline for resolving proceedings. Merging the adjudicative roles of Associate Director and Director does not diminish any of the respondent's opportunities to express its views to the Bureau, but merely streamlines the Bureau's internal decision-making process after those views are expressed.

Paragraph (b) codifies the fact that the Director may sometimes request supplemental briefing before making a final determination, which is consistent with the 2013 rule but was not expressly discussed in the 2013 rule.

Paragraph (d) requires a separation of functions between Bureau employees who advise the Director in the Director's adjudicative role on the one hand and Bureau employees who advise the initiating official on the other. This separation is not required by the Administrative Procedure Act, but the Bureau maintains it as a matter of policy. The 2013 rule included a similar separation of functions at the Director level, although at the Associate Director level it did not mandate a separation between the Associate Director's advisers and initiating official's advisers.

[9] Formerly §§ 1091.103(b) and 1091.110.

[10] Formerly §§ 1091.102 to 1091.104.

[11] *See* 12 CFR 1081.113(d)(1).

[12] Formerly § 1091.105.

[13] Formerly § 1091.106.

[14] Because the existing definition of the term Director under § 1091.101 includes a designee of the Director, there might be circumstances where the Director delegates the responsibility for being present at a supplemental oral response to a designee.

[15] *See also* § 1091.203(b)(3).

[16] Formerly § 1091.109.

Subpart C—Post-Determination Procedures

1091.301 Petition for termination of order.[17]

This provision governs petitions by respondents to terminate an existing order. The rule makes technical changes to conform to changes elsewhere in the procedures. It also codifies the fact that the Director might sometimes request supplemental briefing, similar to § 1091.206(b).

Subpart D—Miscellaneous Provisions

1091.401 Methods of filing and serving documents.[18]

The rule clarifies the method of filing and serving documents, which will generally be by email. The service of the Notice at the start of a proceeding, when a respondent's email address may not be known, is governed by a specific rule under § 1091.202(d).

1091.402 Time limits.[19]

The rule simplifies the former method for calculating time limits under the 2013 rule, which varied by delivery channel to allow additional time for mail or delivery services to arrive. This complexity has generated confusion for some respondents and is no longer warranted because email is generally instantaneous.

1091.403 Word limits.

The rule introduces a word limit for the Notice, response, and certain other key filings, based on Federal Rules of Appellate Procedure 32(a)(7)(B) and 32(f). Relatedly, it introduces a certification of word count based on Federal Rule of Appellate Procedure 32(g). In past proceedings, some parties' outside counsel submitted very lengthy filings in the absence of any page or word limit. Like any word limit, the CFPB intends the new limit to help focus arguments and mitigate expense for all participants.

1091.404 Changes to methods of filing and service, time limits, and word limits.[20]

This provision governs changes to the methods set out in §§ 1091.401 to 1091.403. In the case of changes to time limits or word limits, the provision notes that they are disfavored. Under the provision, a change can be approved in one of three ways: by consent of the initiating official and the respondent, with notice to the Director; by written request to the Director; or upon the Director's own motion. The possibility of changes by consent is intended to avoid the need for the Director to become involved in minor issues that are not controversial between the initiating official and the respondent. However, the provision states that the Director can direct otherwise. There may also be circumstances where the initiating official believes that a potential change warrants a decision by the Director through a written request and so withholds consent, even if the initiating official does not oppose the change.

1091.405 Confidentiality of proceedings.[21]

The 2022 rule created a process for the CFPB to publicly release final decisions and orders. This rule maintains the 2022 rule's approach, although it clarifies that consent agreements entered into by the initiating official and respondent under § 1091.201 are not subject to the public release process. These agreements are generally short formal documents without reasoning that is significant or could form the basis for precedent. Relatedly, the CFPB notes that an order entered as provided in § 1091.206(a)(1), because a respondent has failed to file a response and so has defaulted under § 1091.203(c), would typically not have content that warrants public release. However, such orders are subject to the process under § 1091.405 for considering public release, because of the possibility that some may include reasoning that warrants public release.

1091.406 Multiple respondents.

The rule clarifies that multiple respondents might be named in a Notice, as well as clarifying the process for adding an additional respondent or respondents to a pending proceeding. Including multiple respondents in one proceeding—for example, business partners—may, in appropriate cases, avoid the delay and inefficiency of serial proceedings and also would allow the Bureau to consider related issues at once.[22]

1091.408 Issue exhaustion.[23]

The Supreme Court has explained that: ''Administrative review schemes commonly require parties to give the agency an opportunity to address an issue before seeking judicial review of that question.'' [24] New § 1091.408 is an express issue exhaustion provision that parallels § 1081.408 of the Rules of Practice for Adjudication Proceedings. The CFPB is adopting it for the same reasons that the CFPB explained in the context of the Rules of Practice.[25] The new issue exhaustion provision is generally similar to former § 1091.105(d), which was titled ''Waiver,'' together with principles of administrative law that would apply in the absence of an express issue exhaustion provision.

Effective Date and Transitional Arrangements

This rule is effective upon **Federal Register** publication. It applies to proceedings initiated on or after the effective date. It also applies to proceedings that are pending on the effective date, except to the extent the Director determines that is not just or practicable.[26]

Section 1022(b)(2) Analysis

In developing this rule, the Bureau has considered its benefits, costs, and impacts in a manner consistent with section 1022(b)(2)(A) of the CFPA.[27] In addition, the Bureau has consulted with the prudential regulators and the Federal Trade Commission, including regarding consistency of the rule with any prudential, market, or systemic objectives administered by those agencies, in a manner consistent with section 1022(b)(2)(B) of the CFPA.[28]

Among other sources of supervisory authority, the Bureau can supervise a nonbank covered person that the Bureau ''has a reasonable cause to determine, by order, after notice to the covered person and a reasonable opportunity for such covered person to respond . . . is engaging, or has engaged, in conduct that poses risks to consumers with regard to the offering or provision of consumer financial products or services.'' [29] The Bureau established a rule to implement a procedure to fulfil this statutory authority in 2013 (2013 rule) and amended this rule in 2022 (2022 rule). The Bureau is issuing this

[17] Formerly § 1091.113.

[18] Formerly § 1091.107.

[19] Formerly § 1091.114.

[20] Formerly § 1091.115(a) and (b).

[21] Formerly § 1091.115(c).

[22] Because additional respondents might be added to a proceeding at any stage, the provision gives the Director flexibility to decide what process is appropriate in order to provide the additional respondents a reasonable opportunity to respond to the supplemental Notice.

[23] Formerly § 1091.105(d).

[24] *Carr* v. *Saul,* 141 S. Ct. 1352, 1358 (2021).

[25] *See* 88 FR 18382, 18387–88 (Mar. 29, 2023) (discussing 12 CFR 1081.408).

[26] The CFPB notes the Supreme Court commonly applies rule changes, ''insofar as just and practicable,'' to pending proceedings in Federal courts. *E.g.,* 344 FRD. 850, 851 (U.S. 2023); 340 FRD. 810, 811 (U.S. 2022); 337 FRD. 813, 814 (U.S. 2021). The CFPB also notes that the above transitional arrangements, although not codified, form an operative part of the rule.

[27] 12 U.S.C. 5512(b)(2)(A).

[28] 12 U.S.C. 5512(b)(2)(B). Whether section 1022(b)(2)(A) and section 1022(b)(2)(B) are applicable to this rule is unclear, but in order to inform the rulemaking more fully the Bureau performed the described analysis and consultations.

[29] 12 U.S.C. 5514(a)(1)(C). The Bureau must base such reasonable-cause determinations on complaints collected by the Bureau under 12 U.S.C. 5493(b)(3), or on information collected from other sources. *Id.*

final rule to amend the procedures governing the CFPB's supervisory designation proceedings.

A. Data Limitations and Quantification of Benefits, Costs, and Impacts

The data are generally limited with which to quantify potential costs, benefits, and impacts of the rule's provisions. The CFPB has conducted a limited number of supervisory designation proceedings under the prior 2013 and 2022 rules, but the CFPB does not have quantitative data regarding the costs to respondents or other impacts of those proceedings. The CFPB also does not have quantitative data to predict the impacts of the changes made by this rule relative to the prior legal and procedural framework, which is the comparison that is relevant for this analysis.

In light of these data limitations, the analysis below generally provides a qualitative discussion of the benefits, costs and impacts of the rule. General economic principles and the Bureau's experience and expertise in consumer financial markets, together with the limited data that are available, provide insight into these benefits, costs, and impacts.

B. Baseline for Analysis

In evaluating the rule's benefits, costs, and impacts of the rule, the CFPB considers the impacts against a baseline that includes the legal and procedural framework regarding supervisory designation proceedings for nonbank covered persons that existed before the issuance of the rule. Therefore, the baseline for the analysis of the rule includes separate adjudicative roles for the Director and the Associate Director for Supervision, Enforcement, and Fair Lending—that is, the statutory baseline implemented by the 2013 rule as amended by the 2022 rule.

C. Potential Benefits and Costs to Consumers and Covered Persons

The rule would apply to covered persons as defined in the CFPA, which are generally persons that engage in offering or providing a consumer financial product or service.[30] Relative to the statutory baseline, this rule implements several changes that the Bureau believes streamlines and improves transparency in the decision-making process, and clarifies the rights of nonbank covered entities subject to this rule. Notably, this rule eliminates the role of the Associate Director in filing a recommendation prior to the Director's final determination and instead assigns the Director to receive responses, including optional supplementary oral responses, in order to make a final determination. Furthermore, it clarifies the process by which persons may enter consent agreements with the Bureau, among other procedural changes. Overall, the Bureau believes these changes will not diminish the rights of respondents to reply to a Notice of Reasonable Cause, do not impose significant costs relative to the statutory baseline, increase transparency in the decision-making process, and clarify the processes by which covered persons may either respond or enter into a consent agreement with the Bureau.

The rule eliminates the role of the Associate Director in making a recommendation to the Director. This reflects a broader organizational structural change at the CFPB that eliminates the position of Associate Director of Supervision, Enforcement, and Fair Lending. Relative to the baseline, the rule makes no changes to the rights to respond by nonbank covered entities, maintains separation of roles between the initiating official and decisional employees in the determination process, maintains the requirement that the Director include the basis for their decision in their final determination, and should reduce the amount of time on net between service of the Notice and the final determination.[31] The rule also codifies the ability for the Director to request additional briefing from the respondent, the initiating official, or both. Because there is no reduction in the ability of nonbank covered entities to respond to the Notice and access information constituting the basis for the Director's determination, there are no additional costs imposed on nonbank covered entities. Furthermore, the Bureau believes the reduction in time and general streamlining of the decisional process will benefit nonbank covered entities by improving the efficiency of this rule's application.

The rule allows for the initiating official to reply to the respondent's response to the Notice. The Bureau believes this may benefit respondents by allowing for more transparency in the determination process. The 2013 rule did not allow for the initiating official to respond to the written reply but did allow for the initiating official to participate in the optional supplementary oral response. Moreover, the 2013 rule did not preclude the initiating official from advising the Associate Director in drafting their recommendation. By allowing for a reply by the initiating official to the respondent's written response, the Bureau believes respondents could gain more insight into the decisional process which could then be incorporated into an optional supplementary oral response.

The rule also sets out changes in the process by which a person may voluntarily consent to the Bureau's supervisory authority. Specifically, the rule consolidates two previous provisions regarding consent agreements. Under one provision of the 2013 rule, a respondent could respond to a Notice by signing an enclosed consent agreement that led to the respondent being supervised for two years. Under a separate provision, the respondent and the Bureau could enter into a consent agreement at any time, with a duration to be determined by case-by-case negotiation. Under the new rule, a proposed consent agreement will continue to be enclosed with the Notice and an agreement can also be reached at any other time, but the rule will no longer mandate a two-year period in the former case.

Relative to the baseline, the removal of the default option of a two-year consent agreement, to be replaced with the option for a consent agreement with a negotiated length of time, may impose additional costs on covered entities subject to this rule. However, the Bureau believes several factors limit the expected realized costs of this change. First, as mentioned above, the Bureau has conducted a limited number of supervisory designation proceedings under this authority. The Bureau anticipates it will continue to conduct a limited number of proceedings relative to the size of the market of covered entities subject to this rule. Second, based on prior experience and expertise, the Bureau anticipates that the majority of consent agreements will continue to last for a period of two years. Third, in a case where the complexity or severity of potential consumer risks merits a supervisory relationship longer than two years in the initiating official's assessment, there are other features of the rule that limit any additional realized costs relative to baseline on the covered entity, notably the option to contest the Notice and the ability for the Bureau to issue a new Notice at the end

[30] For the full scope of the term ''covered person,'' *see* 12 U.S.C. 5481(6).

[31] The length of time that the Director has to make a final determination is increased relative to baseline; however, the elimination of the role of the Associate Director and streamlining of the decisional process reduces the total amount of time between Notice and determination.

of the initial two-year order under the baseline.[32]

There is a large population of firms potentially subject to this rule.[33] The Bureau does not currently have access to comprehensive data on the number of nonbank covered persons subject to supervisory authority. To establish an estimate of the population of nonbank covered entities potentially subject to this rule, the Bureau uses the latest Economic Census publicly available data and North American Industry Classification System (NAICS) industry codes that align with financial services.[34] The Bureau estimates there are approximately 154,430 entities in these covered industries. It should also be noted that this estimate does not include other nonbank covered entities not categorized in one of the enumerated industries, *e.g.,* if consumer financial services are not their primary business activity. To date, the Bureau has exercised its supervisory authority under the 2013 and 2022 rules on fewer than a dozen covered entities and in any given year, and the Bureau anticipates exercising authority under this rule on the same number of entities. Hence, the Bureau believes the impact of this rule will be relatively limited, mitigating the realization of any potential costs associated with changes relative to baseline.

The majority of cases initiated under the 2013 rule have been settled by consent agreement and all past consent agreements have been for two years. The Bureau expects similar outcomes under this rule. However, the initiating official may assess that a longer period of time is necessary to maintain an effective supervisory relationship if a particular case is complex or poses severe risks to consumers.[35] In this case, a covered entity undergoing a supervisory proceeding under this rule may receive Notice with a proposed consent agreement lasting longer than two years.[36]

An order lasting longer than two years may pose additional costs relative to the baseline for the covered entity via additional supervisory activity. The Bureau has previously estimated the cost of compliance with supervisory activity based on reported average exam length and labor costs incurred by firms to participate in supervisory exams.[37] This calculation results in an estimate of approximately $27,000 in labor costs to comply with a supervisory examination. The Bureau recognizes that this estimate reflects national average labor costs and are thus subject to variability with respect to specific firms' realized costs. Furthermore, the Bureau recognizes that the staffing estimates are assessments for an average firm's needs and may also be subject to variability with respect to specific firms' requirements. The Bureau is open to public comments that provide additional data on estimates of staffing requirements and costs for compliance with supervisory activities.[38]

The Bureau anticipates that the majority of consent agreements under this rule will continue to be for two years, posing no significant additional costs on covered entities. The Bureau recognizes that for some entities undergoing supervisory activity under this rule, the complexity of the entity or the severity of consumer risk may result in a consent agreement lasting longer than two years, with each additional year imposing additional costs relative to baseline of approximately $27,000. In principle, it is possible that entities undergoing supervisory activity under this rule may enter into a consent agreement longer than three years; however, the Bureau anticipates this to be unlikely.

Finally, the Bureau notes that there are features of this rule and the statutory baseline that further limit any expected realized costs posed by the proposed rule. First, by their nature, consent agreements necessitate both parties' agreement to the order. A respondent may negotiate with the initiating official over the parameters of a consent agreement or may enter contested proceedings.[39] In general, entering into contested proceedings represents a cost on the respondent; however, insofar as there have been no substantive changes in the costs associated with entering contested proceedings relative to the baseline, the difference between these costs and the costs associated with the 2013 rule's provision to accept a two-year consent agreement represents an upper limit on the additional costs represented by this final rule relative to baseline.[40] Second, in cases where the

[32] As noted elsewhere in this analysis, the substantive costs associated with contested proceedings have not changed appreciably between the statutory baseline and the proposed rule. Hence, a covered entity issued Notice has the option to accept a negotiated consent agreement with potentially different costs relative to baseline or undergo contested proceedings with similar costs relative to baseline.

[33] The procedures established in the 2013 rule and this rule are only to assess whether a nonbank covered person will be made subject to the Bureau's supervisory authority based on a reasonable-cause determination. In general, there is no reason to make a determination under the 2013 rule or this rule with respect to a nonbank covered entity subject to the Bureau's supervisory authority under some other provision of section 1024(a) of the CFPA, 12 U.S.C. 5514(a). However, as discussed in the 2013 rule this is possible. Therefore, the Bureau does not exclude from coverage of the 2013 rule or this final rule nonbank covered entities that may be subject to supervision under a separate provision of section 1024(a).

[34] The relevant NAICS codes examined are 5222 (Nondepository credit intermediation); 5223 (Activities related to credit intermediation); 523920 (Portfolio management); 523930 (Investment advice); 532112 (Passenger car leasing); 532120 (Truck, utility trailer, and recreational vehicle rental and leasing); 5313 (Activities related to real estate); 561450 (Consumer reporting); and 561440 (Debt collection).

[35] In principle, an initiating official may assess that a shorter period of time is sufficient for a supervisory relationship. While the Bureau anticipates that this would be a rare occurrence given the Bureau's experience and expertise suggest that the minimum period of time to allow for an examination and follow-up is generally two years, this would likely lessen the costs associated with application of this rule on a nonbank covered entity.

[36] The respondent may otherwise understand that the Bureau and initiating official propose a consent agreement lasting longer than two years, *e.g.,* via other communications with the Bureau and initiating official.

[37] For an estimate of the length of examination, *see* Office of the Inspector General of the Board of Governors of the Federal Reserve System and the CFPB, ''The Bureau Can Improve Its Risk Assessment Framework for Prioritizing and Scheduling Examination Activities'' (Mar. 25, 2019) at 13, available at *https://oig.federalreserve.gov/reports/bureau-risk-assessment-framework-mar2019.pdf.*

[38] The Bureau has previously estimated the cost of compliance with supervisory activity based on reported average exam lengths, which would average one supervisory examination per year and require one-tenth of a full-time equivalent attorney and one full-time compliance officer. Furthermore, the Bureau estimates that supervisory examinations would last for 8 weeks on average, with an additional two weeks of preparation (supra note 38). Using the national average hourly labor cost of $84.84 for attorneys and $38.55 for compliance officers, the Bureau estimates that the direct labor costs for a supervisory examination would total approximately $19,000 (*See* U.S. Bureau of Labor Statistics, National Occupational Employment and Wage Estimates United States, May 2023, *https://www.bls.gov/oes/current/oes-nat.htm*). Assuming that wages represent approximately 70.4% of the total labor costs using the estimate of total compensation for private employees (See U.S. Bureau of Labor Statistics, Employer Costs for Employee Compensation: Private Industry Database, March 2024, *https://www.bls.gov/web/ecec/ecec-private-dataset.xlsx*), this results in an estimate of approximately $27,000 in labor costs to comply with a supervisory examination.

[39] Under the 2013 rule, there have been substantive communications between respondents and the Bureau prior to entering into any consent agreement, regardless under which provision of the 2013 rule the consent agreement was made. The Bureau anticipates that substantive communications will continue under this final rule and does not assess there to be significant changes in costs associated with these communications relative to baseline.

[40] A hypothetical firm that would contest the Notice under the 2013 rule would presumably continue to contest under this proposed final rule and incur no additional costs relative to baseline. A firm that would accept a two-year consent agreement under the 2013 rule but opt for contested proceedings under this rule would incur additional costs relative to baseline equivalent to the difference in costs between a contested proceeding and the two-year consent agreement. Hence, their

Continued

initiating official assesses that there is substantial complexity or severe consumer risks that merit supervisory activity beyond two years, under the statutory baseline a nonbank covered entity subject to application of the rule could opt for a two-year consent agreement; however, the Bureau could reissue a Notice at the end of this period, leading to additional costs associated with receipt, consideration, and reply to a fresh Notice. Under this final rule, the initiating official could propose a longer consent agreement that, subject to negotiation and acceptance of this consent agreement by the respondent, could avoid the potential need for another designation after two years and costs associated with receipt, consideration, and reply to a fresh Notice.

In summary, while the elimination of the two-year default option for consent agreement, to be replaced with the option for a consent agreement with negotiated length of time, may impose additional costs relative to baseline, the Bureau assesses these additional costs to be negligible. First, that the Bureau would be authorized to undertake supervisory activities with respect to a nonbank under this rule would not necessarily mean that the Bureau would in fact undertake such activities regarding that covered person in the near future. Rather, the supervision of any particular covered person as a result of this rule would be probabilistic in nature. Second, for a covered person undergoing supervisory activity under this rule, the Bureau anticipates the majority of cases will be settled by consent agreements lasting two years, imposing no additional costs. Third, for those entities where supervisory activity results in a proposed consent agreements lasting longer than two years, these potential realized costs are further mitigated by other features of the rule.[41]

The rule also makes certain other procedural changes to the processes for making and terminating designations, including: codifying the Director's authority to request supplemental briefing; imposing a word limit on key filings; clarifying procedures for filing and serving documents, with documents being generally filed and served by email; clarifying applicable procedures when there are multiple respondents; and codifying an issue exhaustion requirement that is generally similar to existing law. The rule further clarifies that the process for publicly releasing decisions and orders does not apply to consent agreements, because they lack sufficient content to serve as a precedent for future proceedings. The Bureau does not believe these changes impose significant additional costs onto nonbank covered persons relative to the baseline.

The rule will not have an impact on insured depository institutions or insured credit unions with $10 billion or less in assets as described in section 1026(a) of the CFPA.[42] Nor will the proposed rule have a unique impact on rural consumers.

Regulatory Matters

As a rule of agency organization, procedure, or practice, this rule is exempt from the notice-and-comment rulemaking requirements of the Administrative Procedure Act.[43] However, the Bureau is accepting comments on the rule.

Because no notice of proposed rulemaking is required, the Regulatory Flexibility Act does not require an initial or final regulatory flexibility analysis.[44] Moreover, the Bureau's Director certifies that this rule will not have a significant economic impact on a substantial number of small entities. Therefore, an analysis is also not required on that basis.[45] This is for two independent reasons. First, the costs associated with the changes made by this rule relative to the baseline of the existing procedures are limited, as discussed above. Second, the number of entities that will be subject to the procedures is small, and within that group the number that would be small entities is likely to be either none or in the single digits each year, representing a very small fraction of small entities in the relevant consumer finance markets.

The Bureau has also determined that this rule does not impose any new or revise any existing recordkeeping, reporting, or disclosure requirements on covered entities or members of the public that would be collections of information requiring approval by the Office of Management and Budget under the Paperwork Reduction Act.[46]

Severability

If any provision of part 1091, or any application of a provision, is stayed or determined to be invalid, the remaining provisions or applications are severable and shall continue in effect.

List of Subjects in 12 CFR Part 1091

Administrative practice and procedure, Consumer protection, Credit, Trade practices.

Authority and Issuance

■ For the reasons set forth above, the Bureau revises 12 CFR part 1091 as set forth below:

Sec.

realized costs would be this difference. Similarly, a firm that would accept a two-year consent agreement under the 2013 rule and a possibly longer consent agreement under this final rule would incur additional costs relative to baseline equivalent to the difference between the costs associated with the consent agreement under this rule and those associated with the consent agreement under the 2013 rule. Moreover, the costs associated with a possibly longer consent agreement would be necessarily less than the costs of contested proceedings.

[41] The Bureau acknowledges that there are limitations in the estimates associated with relevant costs; however, with the estimates presented here, the Bureau believes the additional costs imposed on nonbank covered entities subject to this rule relative to baseline would be negligible (based on the limited number of supervisory activities the Bureau anticipates each year under this rule, the probabilistic nature that any particular entity would undergo supervisory activities under this rule, and the likelihood any supervisory activities would result in a consent agreement longer than two years).

PART 1091—PROCEDURES FOR SUPERVISORY DESIGNATION PROCEEDINGS

Authority: 12 U.S.C. 5512(b)(1), 5514(a)(1)(C), 5514(b)(7).

Subpart A—General

§ 1091.100 Scope and purpose.

This part sets forth procedures to implement section 1024(a)(1)(C) of the Consumer Financial Protection Act of 2010 (12 U.S.C. 5514(a)(1)(C)) and establishes rules to facilitate the Bureau's supervisory authority over certain nonbank covered persons pursuant to section 1024(b)(7) of the Act (12 U.S.C. 5514(b)(7)).

§ 1091.101 Definitions.

For the purposes of this part, the following definitions apply:

Bureau, consumer, consumer financial product or service, and covered person have the definitions in 12 U.S.C. 5481.

Decisional employee means an employee of the Bureau who has not engaged in assisting the initiating official in either determining whether to issue a Notice of Reasonable Cause, or presenting the initiating official's position in support of a Notice of Reasonable Cause, either in writing or in a supplemental oral response, to the Director.

Director means the Director of the Bureau or his or her designee. If there is no Director, the term means a person authorized to perform the functions of the Director under this part, or his or her designee. For purposes of when the Director receives, files, or serves documents, the Director includes an employee acting on behalf of the Director.

Initiating official means the Supervision Director or another Bureau employee designated by the Director. For purposes of receiving, filing, and serving documents or participating in a supplemental oral response, the initiating official includes an employee acting on behalf of the initiating official.

Nonbank covered person means a covered person, except for persons described in 12 U.S.C. 5515(a) and 5516(a).

Notice of Reasonable Cause and *Notice* mean a Notice issued under § 1091.202.

Person has the definition in 12 U.S.C. 5481.

Respondent means a person who has been issued a Notice of Reasonable Cause under § 1091.202 or who has entered into a consent agreement under § 1091.201.

State has the definition in 12 U.S.C. 5481.

Subpart B—Determination and Voluntary Consent Procedures

§ 1091.201 Voluntary consent to supervisory authority.

(a) At any time, a person and the initiating official may enter into a consent agreement by which the person voluntarily consents to the Bureau's supervisory authority under 12 U.S.C. 5514. The consent agreement shall constitute an order authorized by 12 U.S.C. 5514(a)(1)(C).

(b) A consent agreement under this section does not constitute an admission that a person is a nonbank covered person that is engaging, or has engaged, in conduct that poses risks to consumers with regard to the offering or provision of consumer financial products or services.

(c) A consent agreement may specify a period of time that the person will be subject to the Bureau's authority under 12 U.S.C. 5514. If the consent agreement specifies a period of time, it shall not be eligible for a petition for termination pursuant to § 1091.301. If the consent agreement does not specify a period of time, the consent agreement will continue until terminated pursuant to § 1091.301.

(d) A consent agreement under this section shall state that the person waives any right to judicial review of the consent agreement.

(e) The initiating official encloses a proposed consent agreement with the Notice of Reasonable Cause in accordance with § 1091.202(c)(6).

§ 1091.202 Notice of Reasonable Cause.

(a) *Generally.* The initiating official is authorized to issue a Notice of Reasonable Cause to a person stating that the Bureau may have reasonable cause to determine that the respondent is a nonbank covered person that is engaging, or has engaged, in conduct that poses risks to consumers with regard to the offering or provision of consumer financial products or services.

(b) *Basis of Notice.* A Notice of Reasonable Cause shall be based on:

(1) Complaints collected through the system under 12 U.S.C. 5493(b)(3); and/or

(2) Information from other sources.

(c) *Contents of Notice.* A Notice of Reasonable Cause is subject to the word limit in § 1091.403 and shall contain the following:

(1) A description of the basis for the assertion that the Bureau may have reasonable cause to determine that a respondent is a nonbank covered person that is engaging, or has engaged, in conduct that poses risks to consumers with regard to the offering or provision of consumer financial products or services, including a summary of the documents, records, or other items relied on by the initiating official to issue a Notice. Such summary will be consistent with the protection of sensitive information, including compliance with Federal privacy law and whistleblower protections;

(2) A statement that this proceeding is governed by 12 U.S.C. 5514(a)(1)(C) and 12 CFR part 1091;

(3) A statement that failure to respond within 30 days, in the manner specified by § 1091.203, will constitute a waiver of the right to respond and may result in a default determination by the Director;

(4) Instructions for filing documents with the Director;

(5) Instructions for serving documents on the initiating official; and

(6) In an appendix, a proposed consent agreement under § 1091.201.

(d) *Service of Notice.* A Notice of Reasonable Cause shall be served on a respondent by any means that are reasonably calculated to give notice. This includes, but is not limited to, the methods available under 12 CFR 1081.113(d)(1). The initiating official shall promptly file a copy of the Notice and a record of service with the Director.

(e) *Withdrawal of Notice.* The initiating official may withdraw the Notice at any time. Such a withdrawal shall not prevent the initiation of another proceeding under this part.

§ 1091.203 Response.

(a) *Timing and word limit.* Within 30 days of service of a Notice, a respondent shall file any response with the Director and serve it on the initiating official, according to the instructions set forth in the Notice. The response is subject to the word limit in § 1091.403.

(b) *Content of the response.* (1) If the respondent disputes that it is a nonbank covered person that is engaging, or has engaged, in conduct that poses risks to consumers with regard to the offering or provision of consumer financial products or services, the response shall set forth the basis for the respondent's position.

(2) The response shall be accompanied by appendices that include (and are limited to) all documents, records, or other evidence a respondent wishes to use to support the arguments or assertions set forth in the response.

(3) If the respondent wishes to present a supplemental oral response, the

response must include that request. The respondent may also include, for the Director's consideration, the respondent's preference for the supplemental oral response to be by telephone, by video conference, or in person at the Bureau's headquarters in Washington, DC. A respondent's failure to request to present a supplemental oral response shall constitute a waiver of the opportunity to present a supplemental oral response.

(4) The response shall include an email address for serving documents on the respondent, which may be its attorney's email address.

(5) The response shall be accompanied, as an appendix, by an affidavit or declaration, made by the individual respondent if a natural person, or, if a corporate or other entity that is not a natural person, by an officer, managing or general member, or partner authorized to represent the respondent, affirming that the response is true and accurate and does not contain any omissions that would cause the response to be materially misleading.

(c) *Default.* If a respondent does not file a response within the time period set forth in paragraph (a) of this section, it shall constitute a waiver of the respondent's right to respond. At the initiating official's request, the Director may issue a decision and order as provided in § 1091.206(a)(1)).

(d) *No Discovery.* There shall be no discovery in connection with a response.

§ 1091.204 Reply by initiating official.

If the respondent files and serves a response, within 21 days the initiating official may file a reply with the Director and serve it on the respondent. The reply is subject to the word limit in § 1091.403.

§ 1091.205 Supplemental oral response.

(a) If the respondent makes a timely request in a response under § 1091.203 for the opportunity to present a supplemental oral response, the Director shall issue an order setting forth the date, time, and general information relating to the conduct of a supplemental oral response.

(b) There shall be no discovery permitted or witnesses called in connection with a supplemental oral response.

(c) If a respondent is a corporate or other entity, and not a natural person, the respondent shall be represented in any supplemental oral response by:

(1) An officer, managing or general member, or partner authorized to represent the respondent; or

(2) An attorney in good standing of the bar of the highest court of any State.

(d) If a respondent is a natural person, the respondent shall be represented in any supplemental oral response by:

(1) The respondent personally; or

(2) An attorney in good standing of the bar of the highest court of any State.

(e) The Director shall cause an audio recording of a supplemental oral response to be made by a court reporter or other designated person. A respondent may purchase a copy or transcript of the recording at the respondent's own expense.

(f) The initiating official may participate in any supplemental oral response conducted under this section.

(g) A respondent's failure to participate in a supplemental oral response scheduled by the Director shall constitute the respondent's waiver of the opportunity to present a supplemental oral response.

§ 1091.206 Determination by the Director.

(a) Within 60 days after the supplemental oral response, or, if there is no supplemental oral response, the deadline for the reply, the Director shall issue either:

(1) A decision and order subjecting the respondent to the Bureau's supervisory authority pursuant to 12 U.S.C. 5514(a)(1)(C); or

(2) A notification that the Director is terminating the proceeding. Such notification shall have no precedential effect and shall not prevent the initiation of another proceeding under this part.

(b) The Director may, on the Director's own motion at any time before making a determination under paragraph (a) of this section, request that the respondent, initiating official, or both provide any supplemental briefing that Director considers appropriate.

(c) Any decision and order issued by the Director pursuant to paragraph (a)(1) of this section shall include the basis for the decision and an effective date for the order.

(d) Only decisional employees may advise and assist the Director in the consideration and disposition of a proceeding under this part.

(e) A decision and order issued pursuant to paragraph (a)(1) of this section shall constitute final agency action under 5 U.S.C. 704.

Subpart C—Post-Determination Procedures

§ 1091.301 Petition for termination of order.

(a) Any person subject to an order under 1091.206(a)(1) may, no sooner than two years after issuance of such an order and no more frequently than annually thereafter, petition for termination of the order. The same applies to an order under § 1091.201, subject to the limitations in § 1091.201(c).

(b) A petition for termination submitted pursuant to paragraph (a) of this section shall set forth the reasons supporting termination of the order, including any actions taken by a respondent since issuance of the order to address the conduct that led to issuance of the order, and may include any supporting information or evidence that the petitioner believes is relevant to the Director's determination of the matter. A petition for termination must be filed with the Director and served on the initiating official and is subject to the word limit in § 1091.403.

(c) The initiating official shall, within 30 days of receipt of a petition for termination, file a recommendation with the Director and serve it on the respondent. The initiating official's recommendation shall state whether the initiating official recommends that the order be terminated, or modified, or that the petition for termination be denied and the basis for such recommendation. The recommendation is subject to the word limit in § 1091.403.

(d) Not later than 90 days after submission of a petition under paragraph (a) of this section, the Director shall issue a written decision either terminating or modifying the order, or denying the petition. If the Director modifies the order or denies the petition, the Director shall explain the basis for his or her decision with respect to the petition. At any time before issuing a decision, the Director may, on the Director's own motion, request that the respondent and initiating official provide any supplemental briefing that Director considers appropriate.

(e) The decision of the Director made pursuant to paragraph (d) of this section shall constitute final agency action under 5 U.S.C. 704.

Subpart D—Miscellaneous Provisions

§ 1091.401 Methods of filing and serving documents.

(a) *By the respondent.* The respondent files documents with the Director, and serves documents on the initiating official, in accordance with the instructions in the Notice.

(b) *By the initiating official.* The initiating official serves documents on the respondent at the email address specified in the Response (except for service of the Notice, which is governed by § 1091.202(d)). The initiating official

files documents with the Director by any appropriate method.

(c) *By the Director.* The Director serves documents on the respondent at the email address specified in the Response. The Director serves documents on the initiating official by any appropriate method.

(d) *Changes.* Changes to the methods of filing and serving documents are addressed in § 1091.404.

§ 1091.402 Time limits.

In computing any period of time prescribed by this part, or by order of the Director, the date of the act or event that commences the designated period of time is not included. The last day so computed is included unless it is a Saturday, Sunday, or Federal holiday as set forth in 5 U.S.C. 6103(a). When the last day is a Saturday, Sunday, or Federal holiday, the period runs until the end of the next day that is not a Saturday, Sunday, or Federal holiday. Intermediate Saturdays, Sundays, and Federal holidays are included in the computation of time, except when the time period within which an act is to be performed is ten days or less. Changes to time limits are addressed in § 1091.404.

§ 1091.403 Word limits.

(a) *Calculation of word limits.* A Notice, response, reply, petition for termination, or recommendation on a petition for termination must contains no more than 13,000 words. This word limit does not apply to any cover page, table of contents, table of citations, signature block, or appendices. Changes to word limits are addressed in § 1091.404.

(b) *Certification of word count.* A document referenced in paragraph (a) of this section must be accompanied by an appendix stating the number of words in the document, not including any cover page, table of contents, table of citations, signature block, or appendices. It must be signed by counsel for the party filing the document, or by another representative if that party does not have counsel.

§ 1091.404 Changes to methods of filing and service, time limits, and word limits.

(a) *Generally.* This section governs a change to a method of filing or service, to a time limit, or to a word limit, whether prescribed by this part or by the Director. Changes to time limits or word limits are disfavored.

(b) *Change upon consent.* The initiating official and respondent may agree in writing to a change, unless the Director specifies otherwise. The initiating official shall file notice of the change with the Director.

(c) *Change upon written request to Director.* The initiating official or the respondent may file a written request to the Director for a change, for good cause shown. The mere filing of a written request for a change does not alleviate the obligation to meet an applicable requirement, absent written confirmation that the request has been granted.

(c) *Change upon Director's own motion.* The Director may make a change on the Director's own motion.

(e) *No conferral of rights.* Deadlines for action by the Bureau established in this part do not confer any rights on respondents.

§ 1091.405 Confidentiality of proceedings.

(a) *General rule.* In connection with a proceeding under this part, including a petition for termination under § 1091.301, all documents, records or other items submitted by a respondent to the Bureau, all documents prepared by, or on behalf of, or for the use of the Bureau, and any communications between the Bureau and a person, shall be deemed confidential supervisory information under 12 CFR 1070.2(i)(1). However, this paragraph does not apply to the version of a document that is released on the Bureau's website under paragraph (b) of this section.

(b) *Publication of final decisions and orders by the Director.* The Director will make a determination regarding whether a decision or order under § 1091.206(a)(1) or § 1091.301(d) will be publicly released on the Bureau's website, in whole or in part. The respondent may file a submission regarding that issue, within ten days after service of the decision or order. The Director will not release information in a decision or order to the extent it would be exempt from disclosure under 5 U.S.C. 552(b)(4) or (b)(6) or the Director determines there is other good cause. The Director may also decide that any determination regarding public release will itself be released on the website, in whole or in part. Section 1091.206(d) is not applicable to determinations under this paragraph.

§ 1091.406 Multiple respondents.

(a) *Notice issued to multiple respondents.* The initiating official may issue and serve a Notice with respect to multiple respondents. The respondents may elect to make either joint or separate responses to such a Notice under § 1091.203 and be jointly or separately represented at a supplemental oral response under § 1091.205.

(b) *Supplemental Notice to add respondents.* The initiating official may issue a supplemental Notice in a pending proceeding to add one or more respondents. The Director will adopt such procedural steps as may be appropriate to ensure that the added respondents have a reasonable opportunity to respond to the supplemental Notice.

§ 1091.407 Adjudication proceedings otherwise brought by the Bureau.

(a) The Bureau may, in its discretion, provide the notice and opportunity to respond required by 12 U.S.C. 5514(a)(1)(C) in a notice of charges otherwise brought by the Bureau pursuant to 12 CFR 1081.200 and the adjudication proceedings pursuant to part 1081. Also, a person may agree to submit to the Bureau's supervisory authority under 12 U.S.C. 5514(a)(1)(C) as part of a consent order entered into in connection with an adjudication proceeding or civil action.

(b) If the Bureau chooses to proceed in the manner described in paragraph (a) of this section, it shall so indicate in the notice of charges, and any order of the Director resulting from the notice of charges shall constitute the order referred to in 12 U.S.C. 5514(a)(1)(C).

(c) If the Bureau proceeds pursuant to paragraph (a) of this section, the provisions of §§ 1091.201 to 1091.206 and 1091.401 to 1091.406 will be inapplicable to such proceeding.

§ 1091.408 Issue exhaustion.

(a) *Scope.* This section applies to any argument to support a respondent's position, including any argument that could be a basis for setting aside Bureau action under 5 U.S.C. 706 or any other source of law.

(b) *Duties to raise arguments.* A respondent must raise an argument in its written response, or else it is not preserved for judicial review of a proceeding under subpart B. A respondent must raise an argument in its petition for termination, or else it is not preserved for judicial review of a proceeding under subpart C. If the Director requests supplemental briefing, and if a given argument is within the scope of the supplemental briefing requested, the respondent must raise the argument in the supplemental briefing or else it is not preserved for judicial review of a proceeding under subpart B or subpart C, as applicable.

(c) *Manner of raising arguments.* An argument must be raised in a manner that complies with this part and that provides a fair opportunity to consider the argument.

(d) *Discretion to consider unpreserved arguments.* The Director has discretion to consider an unpreserved argument,

including by considering it in the alternative. If the Director considers an unpreserved argument in the alternative, the argument remains unpreserved.

§ 1091.409 No limitation on relief sought in civil action or administrative adjudication.

Nothing in this part shall be construed to limit the relief the Bureau may seek in any civil action or administrative adjudication, including but not limited to, seeking an order to have a person deemed subject to the Bureau's supervisory authority under 12 U.S.C. 5514, including for the reasons set forth in 12 U.S.C. 5514(a)(1)(C).

Rohit Chopra,

Director, Consumer Financial Protection Bureau.

BILLING CODE 4810–AM–P

DEPARTMENT OF STATE

22 CFR Part 62

[Public Notice: 12342]

RIN 1400–AC36

Exchange Visitor Program—General Provisions

AGENCY: U.S. Department of State.

ACTION: Final rule.

SUMMARY: On March 28, 2023, the U.S. Department of State (Department of State) published in the **Federal Register** an interim final rule with request for comment (2023 Interim Final Rule) for the Exchange Visitor Program regulations that apply to sponsors the Department of State designates to conduct international educational and cultural exchange programs. In this final rule, the Department of State responds to public comments submitted in response to the 2023 Interim Final Rule and makes minor revisions to the regulations.

DATES: This rule is effective on May 23, 2024.

FOR FURTHER INFORMATION CONTACT: Rebecca Pasini, Deputy Assistant Secretary of the Office of Private Sector Exchange at SA–5, 2200 C Street NW, Washington, DC 20522 or via email at *JExchanges@state.gov* or phone at (202) 632–9327.

SUPPLEMENTARY INFORMATION: The 2023 Interim Final Rule, effective April 27, 2023 (88 FR 18249), allows sponsors to sign Forms DS–2019 using digital signatures and to transmit Forms DS–2019 electronically to a specified list of recipients. In this final rule, the Department of State addresses the comments that parties submitted in response to the 2023 Interim Final Rule and makes minor revisions to the regulatory language. Most of the 64 commenting parties addressed two topics: sponsor preference for electronic signatures rather than digital signatures, and the need for sponsors to electronically transmit Forms DS–2019 directly to third parties acting on their behalf. After consideration, the Department of State has retained the requirement for digital signatures for signing Forms DS–2019, and it makes no changes to the list of entities to which sponsors may transmit Forms DS–2019 electronically. However, this rule will modify the regulations at 22 CFR 62.12(c)(3) to allow third parties to retrieve Forms DS–2019 directly from sponsors' password-protected computer network systems and/or databases. This modification allows third parties to retrieve copies of digital Forms DS–2019 directly from sponsors that wish to give them such access.

The Department of State also continues to permit sponsors to wet sign and physically mail Forms DS–2019 to exchange visitors and/or third parties. Sponsors that find the functionality of digital signatures too burdensome or costly or wish to continue to send Forms DS–2019 in bulk to third parties are not required to adopt the new procedures.

In addition to commenting on the proposed regulations, many parties submitted questions and/or requests for clarification. To the extent such inquiries relate to this rulemaking, the Department of State will address them herein. Otherwise, the Department of State recommends that interested parties refer to *J1visa.state.gov* for more detailed guidance and/or direct specific queries to the *jexchanges@state.gov* or to one of the category-specific email accounts.

Digital Versus Electronic Signatures

22 CFR 62.12(b)(2)(iii)

Seventeen of the parties submitting comments on the 2023 Interim Final Rule addressed the Department of State's decision to allow Responsible Officers and Alternate Responsible Officers (collectively, Officers) to sign Forms DS–2019 with ''digital'' signature software as opposed to the broader category of ''electronic'' signature software, of which digital is a subset. These parties offered the following reasons in support of their requests that the Department of State allow electronic signatures: (1) the definition of ''digital software'' in the 2023 Interim Final Rule is too vague for sponsors to know whether their software selections meet regulatory requirements; (2) the cryptographical requirements of digital software increase costs and burdens; (3) the vetting of Officers and their limited access to the Student and Exchange Visitor Information System (SEVIS) already provide a high level of security; (4) wet-signed, printed, scanned, and converted-to-portable document format (pdf) Forms DS–2019 are no more or less secure than those signed with electronic signature software and electronically transmitted; (5) it is cumbersome and costly for sponsors with J and F programs to have two operating procedures; (6) the Department of State already accepts electronic signatures on the U.S. Department of Homeland Security's (DHS's) Forms I–20 (Certificate of Eligibility for Nonimmigrant Student Status); and (7) the variety of printed Forms DS–2019 (given different signature, printing, and paper options) may confuse U.S. Government authorities who grant J visas, determine admissibility and entry into the United States, or otherwise review Forms DS–2019. The Department of State considered many of these factors when it originally decided to require the higher level of security that digital signatures offer, and it continues to believe that the benefits of such security overcome the concerns of commenting parties. It addresses each issue individually as follows:

Definition of digital signature. Seven commenting parties expressed confusion over the Department of State's definition of ''digital signature.'' Sponsors can utilize any digital signature software that is an application of technology for cryptographically derived signatures that is supported by a process such as a public key infrastructure and that ensures meaningful authentication of the identity of the signer and integrity of the document. Two examples are DocuSign® and Adobe Acrobat® Sign, and there are numerous other examples of digital signature technologies with which the public may be familiar. In response to questions from commenting parties, the Department of State identifies some examples of signatures that are *not* considered digital for purposes of regulatory compliance: copied and pasted signatures, signatures drawn via computer mouse, and typed signatures. The Department of State continues to believe that sponsors may consult either internal or external information technology experts who can

readily confirm whether a particular software package offers the degree of security necessary to differentiate digital signatures from other types of electronic signatures, thereby meeting the new regulatory requirements.

Increased costs and burdens. Nine commenting parties opined that the implementation of digital signature software would be costly and burdensome. The cost and complexity of implementing digital signature capability varies within the sponsor community, based on many factors. Some sponsors may find that it is not cost effective to implement digital signature capability, and they may opt instead to continue with business as usual (using wet signatures). Other sponsors may have already implemented such capacity, allowing them to benefit from reduced costs and burdens. By retaining the current methodologies while introducing new options, the Department of State allows those sponsors that do not wish to incur different costs or new burdens to maintain their current operating procedures.

SEVIS access vetting provides sufficient security. One commenting party stated that digital signatures were unnecessary since sufficient security was provided by vetting Officers and requiring passwords to access SEVIS. However, the process of signing and transmitting Forms DS–2019 occurs outside of SEVIS, making credentialed access to SEVIS an insufficient protection for these two functions.

Comparability of Electronic Signatures and Wet-Signed and Scanned Signatures. Four commenting parties opined that wet-signed, printed, scanned, and converted-to-pdf Forms DS–2019 offer similar security as electronically signed and transmitted Forms DS–2019s. The Department of State respectfully disagrees. If a fraud investigation involved a Form DS–2019, the form would likely be returned to the sponsor to determine whether a signature was legitimate. At the very least, wet-signed documents—whether transmitted electronically or via mail—bear signatures that are exclusive to a limited group of authorized and vetted signatories. Although wet-signed signatures may be copied, Officers can attest to the authenticity of their signatures and/or whether they recall processing and signing forms that others may suspect are fraudulent.

Visual review of forms signed with most electronic software, however, would not offer any clues as to their legitimacy since most electronic signatures lack both the personalization of wet signatures and the encrypted traceability of digital signatures. For example, electronic signatures may be typed names, typed names in italics, or a signature made with a computer mouse, representations that are difficult to verify as to their source. Further, the volume of forms some Officers process would reduce the likelihood that they could recognize a form as one that they, a coworker, or former employee signed electronically.

Different treatment of Forms DS–2019 and Forms I–20 increases burden and cost. Nine commenting parties expressed concern that having to process Forms DS–2019 differently than Forms I–20 would increase their burden and cost. Sponsors that processed both Forms DS–2019 and Forms I–20 prior to publication of the 2023 Interim Final Rule already followed two separate processes. Since sponsors may continue to print and wet-sign Forms DS–2019, implementation of digital signature software does not disrupt the status quo. That is, sponsors can continue to conduct two processes, and they are not required to adopt a potentially more costly alternative. Moreover, those sponsors that wish to continue wet-signing Forms DS–2019 may now avail themselves of the cost- and time-saving electronic transmission of such forms.

Department of State already accepts electronically signed Forms I–20. Eight commenting parties stated that there was no reason for the Department of State to use a different signing process than DHS requires for Forms I–20. The Department of State and DHS have always independently assessed the risks associated with their respective international exchange programs, and whether electronic signatures offer sufficient security for the Student and Exchange Visitor Program (SEVP) has no bearing on the security requirements for Forms DS–2019. The Department of State has promulgated specific regulations for the Exchange Visitor Program based on its assessment of the risks associated with the Program that may not apply to all SEVP activities.

In their comments, many sponsors sought the capability to transmit Forms DS–2019 electronically to third parties acting on their behalf, citing the important role third parties play in their exchange programs. Although the Department of State continues to prohibit this activity, it has modified the regulations at 22 CFR 62.12(c)(3) to allow sponsors to permit third parties to retrieve copies of digital Forms DS–2019 directly from sponsors' password-protected computer networks and databases, at the sponsors' discretion. It is the Department of State's understanding that the SEVP model does not similarly engage foreign third parties, thereby significantly reducing the need to ensure protection and authenticity of their forms.

Another difference between SEVP activities (for F or M visa classifications) and the Exchange Visitor Program involves the locations at which students and exchange visitors are placed. For example, except for F–1 students placed off-campus, *e.g.,* to obtain practical work experience, participants entering the United States on F-visas are placed exclusively at SEVP-certified academic institutions. However, sponsors in the Private Sector categories of the Exchange Visitor Program (with approximately 200,000 exchange visitors starting new programs each year) for the most part do not similarly place their exchange visitors at their own locations. Non-academic sponsors place exchange visitors at tens of thousands of different private businesses or other organizations that the Department of State does not vet. The sheer number, variety, and location of such placements present greater opportunities for fraud than do placements at a finite number of certified academic institutions. These different levels of risk justify different levels of security.

Different signatures and looks of Forms DS–2019 may confuse authorities. Four commenting parties expressed concern that the variety of physical forms and signature types could confuse U.S. Customs and Border agents, Social Security Administration officials, or even consular officers at U.S. embassies or consulates. Prior to publishing the 2023 Interim Final Rule, the Department of State alerted those entities that routinely process or review Forms DS–2019 of the upcoming regulatory changes. Moreover, in recent consultation with the Department of State's Bureau of Consular Affairs, the Office of Private Sector Exchange confirmed that confusion has been minimal. Going forward, the Department of State is prepared to address any instances of confusion (*e.g.,* turnarounds at ports of entry) should they materialize.

The Department of State has promulgated specific regulations for the Exchange Visitor Program based on its assessment of the risks associated with the Program that may not apply to SEVP activities. For example, after the implementation of SEVIS in 2002, the Department of State required Officers to wet-sign Forms DS–2019 in blue ink to differentiate original documents from forgers. The Department of State, therefore, confirms its decision to permit the more secure digital software,

but not generic electronic signature software.

Transmission of Forms DS–2019

The second most frequently raised concern with the 2023 Interim Final Rule is the limitation on the third parties to which sponsors may electronically transmit Forms DS–2019. Ten parties objected to the exclusion of third parties (as defined in 22 CFR 62.2) of sponsors from the enumerated list of authorized recipients of electronically transmitted forms. Parties generally indicated that the visa interview process is facilitated by providing Forms DS–2019 directly to foreign third parties who perform the critical functions of checking forms for accuracy, helping schedule group interviews, and forwarding batches of Forms DS–2019 to consular sections at posts.

First, the Department of State clarifies that only individuals who are employees of a sponsor are considered ''staff'' for purposes of 22 CFR 62.12(c)(1). Staff at institutions that are designated sponsors are not third parties, and third parties are not considered sponsor staff. Two parties also questioned whether they could copy third parties when they transmit Forms DS–2019 electronically to members of the Department of State's list of acceptable recipients. Since parties receive electronic transmissions regardless of whether they are listed in the ''to'' line or the ''cc'' line of an email message, sponsors may not copy any entities that are not enumerated in 22 CFR 62.12(c)(1).

Five commenting parties asked whether sponsors could provide third parties with password-protected access to their computer network systems and/or databases to allow them to log on to access electronic Forms DS–2019. The Department of State believes that such credentialed access provides a degree of security not available through emailing electronic Forms DS–2019. There are millions of email accounts world-wide as opposed to the small number of third parties to which sponsors would opt to grant network access. The risk of someone gaining inappropriate access to Forms DS–2019 is significantly minimized by restricting access in this way. Accordingly, the Department of State has modified the regulations at 22 CFR 62.12(c)(3) to permit this functionality. As a point of clarification, it notes that for purposes of these regulations, electronic transmission is limited to sponsor-initiated sending of files to individuals or entities, including exchange visitors. Prior to making Forms DS–2019 available for third parties to retrieve, sponsors must either wet sign and convert forms to electronic files or sign the forms with digital signatures since 22 CFR 62.12(b)(2)(i) continues to allow only Officers present in the United States or a U.S. territory to sign Forms DS–2019. The Department of State further reminds sponsors that even in a digital environment, there is only one ''original'' Form DS–2019. If sponsors allow third parties to retrieve Forms DS–2019 from sponsor network systems and/or databases, they must not also mail or electronically transmit the same forms to individuals or entities listed in § 62.12(c)(1). The Department of State has added regulatory language at 22 CFR 62.12(c)(4) to prohibit sponsors from issuing multiple copies of original Forms DS–2019.

For those sponsors that lack the capacity to give third parties password-protected access to their computer network systems and/or databases or do not wish to provide such access, the Department of State reminds them that they may continue to wet-sign Forms DS–2019 and send paper forms to third parties pursuant to 22 CFR 62.12(c)(2).

Other parties expressed concern that Exchange Visitor Program applicants may not have access to email and/or printing facilities. For applicants without email access, sponsors may continue to mail paper forms to applicants and/or to third parties. For applicants without printers at home, the Department of State notes that schools, libraries, and businesses often have printing capabilities that third parties may access for a minimal fee. Nothing in the regulations prohibits exchange visitors from, *e.g.,* emailing Forms DS–2019 to other places, such as offices or friends' homes, for printing. The Department of State believes that these alternatives are sufficient so as not to disrupt the role that third parties play in assisting sponsors and exchange visitors with the visa interview process.

Miscellaneous Comments

Five parties asked for clarification on how the 2023 Interim Final Rule changes the process of providing travel signatures on Forms DS–2019. The new regulations provide flexibility for signing and transmitting Forms DS–2019 to approve travel. First, sponsors may either reprint Forms DS–2019, sign the travel signature space with any color of ink, and send them to exchange visitors using a delivery service; or convert Forms DS–2019 to electronic files and transmit them electronically. Alternatively, Officers may sign the travel signature space of Forms DS–2019 using a digital signature and either transmit them electronically or print them and send them via delivery service. Sponsors that approve travel should advise exchange visitors to carry both Forms DS–2019 when they leave the United States, *i.e.,* the original paper forms and the subsequently issued forms with the travel authorization signature. Parties also questioned whether they should sign reprinted Forms DS–2019 or have exchange visitors send their original Forms DS–2019 or electronic versions of the forms back to their sponsors for processing. The Department of State clarifies that all these options are available to sponsors.

Several parties asked how the new regulations impact use of the ''reprint'' function in SEVIS, noting that sponsors cannot prohibit exchange visitors from reprinting the Forms DS–2019 their sponsors provide. Although the Department of State agrees that sponsors cannot effectively monitor whether exchange visitors reprint or copy Forms DS–2019, the Department of State urges sponsors to advise exchange visitors whose Forms DS–2019 are lost, stolen, or damaged to contact their sponsors and ask for new forms. Sponsors must not electronically transmit or print previously issued Forms DS–2019, but rather, they must use the reprint function in SEVIS and send the new forms (electronically or via mail) to the exchange visitor and/or their accompanying spouse or dependents, if any. On a related matter, two sponsors sought clarification on what sponsors should do if former exchange visitors request copies of their Forms DS–2019 after their programs are over. Since the reprint function is available only for SEVIS records in ''initial'' and ''active'' status, sponsors should inform current exchange visitors of this limitation and encourage them to safeguard their original paperwork.

In the supplemental section of the 2023 Interim Final Rule, the Department of State indicated that it would eliminate the phrase ''or a change in actual and current U.S. address'' from 22 CFR 62.12(a)(3)(vii) because this example was not a valid reason to issue Forms DS–2019. In response to one party's comment that the Department of State did not make this change in the regulatory text, the Department of State now corrects this oversight by deleting the phrase in this final rule.

The 2023 Interim Final Rule eliminated the requirement that Officers who wish to continue to wet-sign paper Forms DS–2019 use only blue ink. In response to one commenting party's request for clarification, the Department of State confirms that it has eliminated the requirement that Officers sign Forms DS–2019 in any specific color of ink.

The introduction of electronic Forms DS–2019 and the potential for the varying physical appearance of printed forms raised questions about exchange visitor signature requirements and signature requirements on other official Department of State forms. Four parties questioned whether the 2023 Interim Final Rule had any impact on signature requirements for, *e.g.,* Forms DS–7002 (Training/Internship Placement Plan). The Department of State clarifies that the Exchange Visitor Program regulations have never required other forms to be signed in a particular color of ink and then distributed via mail delivery service. The requirements set forth in the final rule apply only to Forms DS–2019. One commenting party asked whether exchange visitors were required to sign Forms DS–2019 in ink and another noted that the regulations were silent on whether exchange visitors could transmit Forms DS–2019 electronically. The Department of State notes that this final rule regulates actions of designated sponsors, not exchange visitors.

The addition of electronic Forms DS–2019 has raised other similar issues. Four parties sought clarification with respect to whether the requirement at 22 CFR 62.10(g) that sponsors retain copies of records related to their exchange visitor programs for three years referred to paper or electronic files. Regulations governing the retention of records do not specify the format in which sponsors are required to retain records, leaving it up to sponsors to determine whether they wish to retain paper, electronic, or both paper and electronic records. Electronic records should reflect any changes during the program and be consistent with the information in SEVIS, *e.g.,* exchange visitors' program dates or visa status.

Regulatory Analysis and Notices

Administrative Procedure Act

This final rule responds to public comments received on the 2023 Interim Final Rule and makes minor revisions to the provisions on the control of DS–2019 forms in 22 CFR 62.12. For the reasons set forth in the 2023 Interim Final Rule, the Department of State does not believe 5 U.S.C. 553(b) or (c) apply to this rulemaking.

Congressional Review Act

This regulation is not a major rule as defined by 5 U.S.C. 804. This rule will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based companies to compete with U.S.-based companies in domestic and export markets.

Unfunded Mandates Reform Act of 1995

This regulation will not result in the expenditure by State, local or Tribal governments, in the aggregate, or by the private sector, of $100 million in any year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1501 *et seq.*).

Executive Order 13175—Consultation and Coordination With Indian Tribal Governments

The Department of State has determined that this regulation will not have Tribal implications; will not impose substantial direct compliance costs on Indian Tribal governments; and will not preempt Tribal law. Accordingly, the requirements of Executive Order 13175 do not apply to this rulemaking.

Regulatory Flexibility Act: Small Business Impacts

Since this rule is exempt from section 553 (Rulemaking) and section 554 (Adjudications) of the Administrative Procedure Act, this rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.* (1980)).

Executive Orders 12866, 13563, and 14094

The Department of State has reviewed this rule to ensure its consistency with the regulatory philosophy and principles set forth in Executive Order 12866, as amended by Executive Order 14094, and Executive Order 13563, and affirms that this regulation is consistent with the guidance therein. The Office of Management and Budget (OMB) has designated this rule as not significant under E.O. 12866.

Executive Order 12988

The Department of State has reviewed this rulemaking considering sections 3(a) and 3(b)(2) of Executive Order 12988 to eliminate ambiguity, minimize litigation, establish clear legal standards, and reduce burdens.

Executive Orders 12372 and 13132—Federalism

The Department of State finds that this regulation does not have sufficient federalism implications to require consultations or warrant the preparation of a federalism summary impact statement.

Paperwork Reduction Act

This rulemaking relates to OMB Control No. 1405–0119, Certificate of Eligibility for Exchange Visitor Status (J-Nonimmigrant). The Department of State does not anticipate a reportable change in burden for this information collection as a result of this rulemaking.

List of Subjects in 22 CFR Part 62

Cultural exchange programs, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, the Department of State amends 22 CFR part 62 as follows:

PART 62—EXCHANGE VISITOR PROGRAM

■ 1. The authority citation to part 62 continues to read as follows:

Authority: 8 U.S.C. 1101(a)(15)(J), 1182, 1184, 1258; 22 U.S.C. 1431 *et seq.;* 22 U.S.C. 2451 *et seq.;* 22 U.S.C. 2651a; 22 U.S.C. 6531–6553; Reorganization Plan No. 2 of 1977, 42 FR 62461, 3 CFR 1977 Comp. p. 200; E.O. 12048, 43 FR 13361, 3 CFR, 1978 Comp., p. 168; 8 U.S.C. 1372; section 416 of Pub. L. 107–56, 115 Stat. 354 (8 U.S.C. 1372 note); and 8 U.S.C. 1761–1762.

■ 2. Revise § 62.12 to read as follows:

§ 62.12 Control of Forms DS–2019.

(a) *Issuance of Forms DS–2019.* Sponsors must:

(1) Grant access to SEVIS only to Responsible Officers and Alternate Responsible Officers and ensure that they have access to and use SEVIS to update required information;

(2) Ensure that Responsible Officers and Alternate Responsible Officers input into SEVIS accurate, current, and updated information in accordance with these regulations; and

(3) Issue Forms DS–2019 only for the following purposes if permitted by the regulations and, as necessary, authorized by the Department of State:

(i) To facilitate the initial entry of exchange visitors and accompanying spouses and dependents, if any, into the United States;

(ii) To extend the duration of participation of exchange visitors;

(iii) To facilitate program transfers;

(iv) To replace lost, stolen, or damaged Forms DS–2019;

(v) To facilitate the re-entry into the United States of exchange visitors and accompanying spouses and dependents, if any, who travel outside the United States during exchange visitors' programs;

(vi) To facilitate changes of category;

(vii) To update information when significant changes take place in regard to exchange visitors' programs (*e.g.,*

substantial changes in funding or changes in primary sites of activity);

(viii) To facilitate the correction of minor or technical infractions; and

(ix) To facilitate a reinstatement or reinstatement update SEVIS status.

(b) *Verification.* (1) Prior to issuing Forms DS–2019, sponsors must verify that prospective exchange visitors:

(i) Are eligible for, qualified for, and accepted into the programs in which they will participate;

(ii) Possess adequate financial resources to participate in and complete their exchange visitor programs; and

(iii) Possess adequate financial resources to support accompanying spouses and dependents, if any.

(2) Sponsors must ensure that:

(i) Only Responsible Officers or Alternate Responsible Officers who are physically present in the United States or in a U.S. territory may sign Forms DS–2019 or print original Forms DS–2019;

(ii) Only Responsible Officers or Alternate Responsible Officers whose names are printed on Forms DS–2019 are permitted to sign the forms; and

(iii) Responsible Officers or Alternate Responsible Officers sign paper Forms DS–2019 in ink or sign Forms DS–2019 using digital signature software.

(c) *Transmission of Forms DS–2019.* (1) Sponsors may transmit Forms DS–2019 either electronically (*e.g.,* via email) or by mailing them (*e.g.,* via postal or delivery service) to only the following individuals or entities: exchange visitors; accompanying spouses and dependents, if any; legal guardians of minor exchange visitors; sponsor staff; Fulbright Commissions and their staff; and Federal, State, or local government agencies or departments.

(2) Sponsors may mail signed paper Forms DS–2019 via postal or delivery service to third parties acting on their behalf for distribution to prospective exchange visitors.

(3) Sponsors may provide third parties acting on their behalf with password-protected access to the sponsors' computer network systems and/or databases to retrieve Forms DS–2019.

(4) Sponsors that allow third parties to retrieve Forms DS–2019 from their computer networks and/or databases may not electronically transmit or physically mail the same Forms DS–2019 to individuals or entities identified in paragraph (c)(1) of this section.

(d) *Allotment requests.* (1) *Annual Form DS–2019 allotment.* Sponsors must submit an electronic request via SEVIS to the Department of State for an annual allotment of Forms DS–2019 based on the annual reporting cycle (*e.g.,* academic, calendar, or fiscal year) stated in their letter of designation or redesignation. The Department of State has sole discretion to determine the number of Forms DS–2019 it will issue to sponsors.

(2) *Expansion of program.* Requests for program expansion must include information such as, but not limited to, the justification for and source of program growth, staff increases, confirmation of adequately trained employees, noted programmatic successes, current financial information, additional overseas affiliates, additional third-party entities, explanations of how the sponsor will accommodate the anticipated program growth, and any other information the Department of State may request. The Department of State will take into consideration the current size of a sponsor's programs and the projected expansion of their programs in the next 12 months and may consult with the Responsible Officer and/or Alternate Responsible Officers prior to determining the number of Forms DS–2019 it will issue.

(e) *Safeguards and controls.*

(1) Responsible Officers and Alternate Responsible Officers must always secure their SEVIS User Names and passwords (*i.e.,* not share User Names and passwords with any other person or not permit access to and use of SEVIS by any person).

(2) Sponsors may transmit Forms DS–2019 only to the parties listed in paragraph (c) of this section. However, sponsors must transmit Forms DS–2019 to the Department of State or the Department of Homeland Security upon request.

(3) Sponsors must use the reprint function in SEVIS when exchange visitors' Forms DS–2019 are lost, stolen, or damaged, regardless of whether they are transmitting forms electronically or mailing them.

(4) Sponsors must destroy any damaged and/or unusable Forms DS–2019 (*e.g.,* forms with errors or forms damaged by a printer).

Rebecca Pasini,

Deputy Assistant Secretary, Office of Private Sector Exchange, Bureau of Educational and Cultural Affairs, U.S. Department of State.

BILLING CODE 4710–05–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Parts 5 and 202

[Docket No. FR–6291–F–02]

RIN 2502–AJ60

Revision of Investing Lenders and Investing Mortgagees Requirements and Expansion of Government-Sponsored Enterprises Definition

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development (HUD).

ACTION: Final rule.

SUMMARY: This rule amends the requirements for investing lenders and investing mortgagees to gain or maintain their status as a Federal Housing Administration (FHA) approved lender or mortgagee. This revision makes FHA's approval requirements consistent with investing mortgagees' and investing lenders' risk, reduces barriers to FHA approval for new investing mortgagees and investing lenders, and increases access to capital for all FHA-approved mortgagees and lenders. HUD is clarifying that the general annual certification requirement for lenders and mortgagees is applicable to investing lenders and investing mortgagees. HUD is also defining Government-Sponsored Enterprises (GSEs) separately from other governmental-type entities to ensure that FHA requirements specific to loan origination do not apply to GSEs. Finally, HUD is eliminating obsolete language related to lender and mortgagee net worth requirements. This final rule adopts HUD's July 18, 2023, proposed rule with minor revisions.

DATES: *Effective:* May 23, 2024.

FOR FURTHER INFORMATION CONTACT: Volky Garcia, Division Director, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410, telephone 202–402–8229 (this is not a toll-free number), email *Volky.a.garcia@hud.gov.* HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as from individuals with speech or communication disabilities. SUPPLEMENTARY INFORMATION:

I. Background

Current HUD regulations at 24 CFR part 202, subpart A, establish minimum standards and requirements for the

Secretary to approve lenders and mortgagees to participate in FHA's Title I and Title II programs. Subpart B identifies the classes of lenders and mortgagees eligible to participate in FHA's Title I and Title II programs and outlines additional specific requirements for participation in the programs.

In 2010, HUD amended 24 CFR part 202, subpart A, to include investing lenders and investing mortgagees as a class of lenders and mortgagees subject to HUD's net worth requirements currently found at § 202.5(n). At the time the investing lender and investing mortgagee net worth requirement change was made in 2010, HUD also incorporated new financial reporting, audit, and quality control plan requirements for investing lenders and investing mortgagees into various HUD handbooks; however, no corresponding updates were made to 24 CFR part 202, subpart B, to reflect the investing lender and investing mortgagee requirements. Additionally, FHA increased the minimum net worth requirements applicable to certain classes of lenders and mortgagees in 24 CFR part 202 in 2010. These new net worth requirements were phased in over a period of three years, beginning on May 20, 2010, and becoming fully phased in by May 20, 2013. The net worth requirements during that three-year transition period are now obsolete, but the phased-in net worth requirements language remains in HUD's regulations.

Current HUD regulations at § 202.10 also define the classes of lenders and mortgagees that qualify as governmental institutions, Government-Sponsored Enterprises, public housing agencies, and State housing agencies. Currently, various GSEs [1] are included in the § 202.10(a) definition along with Federal, State, or municipal governmental agencies and Federal Reserve Banks at § 202.10(a). For several years, certain GSEs have contended that they do not have the infrastructure that other lenders and mortgagees listed in § 202.10 have to ensure compliance with FHA requirements related to loan and mortgage origination because they cannot and do not originate loans or mortgages. FHA has reviewed the mission and structure of the GSEs and determined that they should not be subject to FHA requirements specific to loan and mortgage origination because the GSEs do not originate loans or mortgages.

[1] The GSEs are the Federal Home Loan Banks, the Federal Home Loan Mortgage Corporation (commonly known as Freddie Mac), and the Federal National Mortgage Association (commonly known as Fannie Mae).

II. The Proposed Rule

On July 18, 2023, HUD published for public comment a proposed rule (88 FR 45863) to amend 24 CFR parts 5 and 202, which govern numerous administrative requirements for investing lenders and investing mortgagees. The proposed rule sought to add investing lenders and investing mortgagees to the list of entities that must comply with the uniform financial reporting standards found in 24 CFR 5.801(a)(5). The rule proposed to adjust audit and certification requirements for investing lenders and investing mortgagees, as well as to delete obsolete language regarding phased-in net worth requirements currently found at § 202.5(n)(2). In addition, the proposed rule aimed to clarify that investing lenders and investing mortgagees without servicing authority do not have to implement a written quality control plan under § 202.5(h).

III. This Final Rule

The final rule adopts the proposed rule with three changes. First, it makes a clarifying edit to the language of § 202.5(h). In the proposed rule, HUD sought to clarify existing regulatory language and exempt investing lenders and investing mortgagees from the § 202.5(h) requirement that they implement a quality control plan. Public comments stated that the proposed language was unclear. In response, HUD is amending the proposed text of § 202.5(h) to clarify the exception for investing lenders and investing mortgagees.

The second change adds the word ''investing'' before the phrase ''lender or mortgagee'' throughout § 202.9(b)(4) to ensure uniformity in § 202.9(b). This change is not substantive because the section is limited to investing lenders and investing mortgagees by the existing regulatory text and does not change any auditing, compliance, or reporting requirements. In addition, this change will serve to clarify who must submit audit reports under § 202.9(b)(4).

The third change is a non-substantive change that revises the first sentence of § 202.9(a) to clarify the definition of investing lender or investing mortgagee. Specifically, the change adds specific cross-references that more clearly identify when an organization is not an investing lender or investing mortgagee.

IV. Public Comments

The public comment period closed on September 18, 2023, and HUD received four distinct comments related to the proposed rule. The comments were from Housing Finance Authorities (HFAs), a nonprofit that works with HFAs, and an interested individual. A detailed breakdown of the comments and HUD responses is provided below.

Support for the proposed annual certification requirement language in § 202.5(m).

Two commenters supported the proposed amendment to § 202.5(m), which would require investing lenders and investing mortgagees to certify that they have not been refused a license and have not been sanctioned by any State(s) in which it will purchase, hold, sell, or service FHA-approved loans or mortgages.

HUD Response: HUD appreciates the stakeholder feedback in support of the proposed amendment to § 202.5(m).

No concerns with the proposed net worth requirements in § 202.5(n).

One commenter stated that they have no concerns with the proposed capital standards that would require investing lenders and investing mortgagees to maintain a certain net worth based on the size of their portfolios, as detailed by the proposed language for § 202.5(n).

HUD Response: HUD appreciates the stakeholder feedback; however, there is no change to the net worth requirement. Investing lenders and investing mortgagees are already required to comply with the general approval requirements in § 202.5, including the net worth requirements in § 202.5(n). The rule deletes the phased-in net worth requirements for years 2010 and 2011 currently found at § 202.5(n)(2) because the requirements are fully phased-in.

The proposed rule could negatively impact the availability of FHA-approved mortgages.

One commenter stated that the proposed rule would reduce the incentives for investing lenders and investing mortgagees to originate or purchase FHA-insured mortgages because GSEs or other entities that are eligible to purchase or securitize FHA-insured mortgages would face ''lower requirements and fees'' compared to investing lenders and investing mortgagees. The commenter stated that the decrease in demand by investing lenders and investing mortgagees could hurt the viability of FHA's programs and increase the financial risk to FHA's portfolio by centralizing lower quality loans within one institution. The commenter suggested that HUD monitor the impact of the rule on the availability of FHA-supported mortgages or loans after implementation and enact adjustments as needed.

HUD Response: HUD appreciates the commenter's concerns but believes the

impact on availability will be minimal given the provisions of the rule are mostly clarifying in nature with limited changes. This impact is minimal, in part, because investing lenders and investing mortgagees are not authorized to originate Title I loans or Title II mortgages as described in § 202.9(a). In § 202.9, HUD further clarifies the definition of an investing lender and investing mortgagee and updates and clarifies the existing financial statement and audit requirements. With respect to revising the GSE definition, the regulatory text now aligns with the mission and structure of the GSEs. HUD will continue to monitor the availability of FHA-insured mortgages after this rule becomes effective.

Increased risk to FHA's portfolio and the stability of the secondary market.

One commenter stated that the investing requirements and redefinition of the GSEs under the proposed rule, when taken together, could shift many of the loans and mortgages under Title I and Title II to GSEs like Fannie Mae and Freddie Mac. According to the commenter, this centralization could increase the risk to FHA's portfolio as well as reduce the stability and liquidity in the secondary housing market. The commenter recommended that HUD analyze and more thoroughly consider the impact of the proposed rule on the stability and resilience of the secondary mortgage market, as well as on consumer protection.

HUD Response: The rule makes clarifying edits and limited updates to §§ 202.5, 202.9, and 202.10 with respect to the definition of an investing lender and investing mortgagee, investing lender and investing mortgagee financial statement and audit requirements, annual certification language, and the GSE definition. Given that the rule is limited to clarifying edits and minimal updates, HUD does not foresee that the rule will lead to investing lenders or investing mortgagees exiting the secondary market. Accordingly, HUD does not anticipate that the rule will lead to a shift of loans and mortgages to GSEs. In addition, the rule removes obsolete language that is no longer applicable and updates current regulatory citations. HUD will continue to monitor for any secondary market impacts after this rule becomes effective.

The proposed audit requirements are burdensome and unnecessary.

The commenter said the proposed rule would lead to HFAs, that are approved as investing lenders and investing mortgagees, drawing from resources dedicated to substantive projects to ensure compliance with the proposed audit requirement. According to the commenter, this would occur because many programs that HFAs administer do not provide administrative funds while others provide insufficient administrative funds or only enough to barely cover the costs of administering the programs. The commenter also said that these requirements are unnecessary because HFAs, as well as other State and local programs, are subject to substantial public oversight by State auditors, State executives, and State legislatures. The commenter stated that this oversight renders the information sought by HUD duplicative of existing, publicly available information.

HUD Response: The Federal regulations found at § 202.5 exempt HFAs from the auditing requirements, which make it unnecessary for HFAs to draw from resources dedicated to substantive projects to complete these requirements. In addition, HFAs are approved as government mortgagees subject to the requirements of §§ 202.5 and 202.10, and the government mortgagee requirements in the HUD OIG's HUD Consolidated Audit Guide and the FHA Single Family Housing Policy Handbook 4000.1.

HFAs with small portfolios should be exempt from § 202.9(b)(4)(i).

One commenter requested that HUD consider excluding from some or all of the proposed rules HFAs which may technically own FHA mortgages but have a diminishing portfolio that is serviced by an FHA approved mortgagee. The commenter stated the proposed § 202.9(b)(4)(i) requirement that investing lenders and investing mortgagees provide an analysis of escrow funds would be difficult because HFAs do not have access to the required knowledge or information, which is a problem that is amplified when the portfolio is small. The commenter stated that the information is instead possessed by the original or underlying FHA-approved mortgage and should be provided to HUD under current regulations.

HUD Response: The § 202.9(b)(4)(i) requirement pertaining to an analysis of escrow funds is only applicable to investing lenders and investing mortgagees. This section does not apply to HFAs, which are classified as government mortgagees. An HFA, as a government mortgagee, must only comply with the applicable requirements in § 202.5, § 202.10, the HUD Consolidated Audit Guide, and the FHA Single Family Housing Policy Handbook 4000.1. This final rule adds language to the definition of investing lender or investing mortgagee in to § 202.9(a) to more clearly identify organizations that are not investing lenders or investing mortgagees.

The proposed quality control plan language is unclear in § 202.5(h).

Two commenters stated support for exempting investing lenders and investing mortgagees from the requirement that they implement a quality control plan to ensure compliance with the regulation. However, both commenters said the proposed language was ''difficult to parse'' because the clause containing the phrase ''unless approved under § 202.9 without servicing authority'' does not clearly identify that investing lenders and investing mortgagees are exempt from the quality control plan requirement. The commenters suggested the lack of clarity could be addressed by moving the phrase ''without servicing authority'' from its original clause and placing it after the opening phrase of ''lenders or mortgagees.'' One commenter provided a second solution, stating the proposed rule could implement the ''eminently clear'' language from the preamble.

HUD Response: HUD appreciates the commenters' suggested language revisions to § 202.5(h) and has amended the final rule to address the commenters' suggestions. Specifically, HUD has moved the phrase ''unless approved under § 202.9 without servicing authority'' to the end of the sentence. In addition, the sentence has minor clarifying edits.

Lack of clarity on whether entities would be regulated under a single GSE definition and if so, how it would be done.

A commenter said that the proposed rule would expand the definition of GSEs to include any entity that is chartered by Congress to provide secondary market liquidity regardless of whether it is owned or controlled by the Federal Government. Specifically, the commenter stated that the proposed expansion to the definition of GSEs ''could include entities such as Ginnie Mae or Farmer Mac'' that currently have different levels of Federal support than Fannie Mae and Freddie Mac. The commenter also stated that ''the proposed rule does not specify how these entities would be regulated under a single definition of GSEs, or whether there would be a single regulator for all of them.'' The commenter said that this is a problem because the rule does not specify how these entities would be regulated by HUD in a uniform manner or whether there would be a single regulator for all of them. According to the commenter, these issues might create confusion or inconsistency in the

oversight and regulation of these entities.

HUD Response: The final rule aims to distinguish GSEs from all other governmental institutions and does not change which entities fall under the GSE definition. HUD moved the definition of GSE into § 202.10(b) without changing the list of entities meeting the definition. HUD's definition of GSE, which is located at § 202.10(a), includes the Federal Home Loan Banks, Federal Home Loan Mortgage Corporation, and Federal National Mortgage Association. The GSE definition does not include the Governmental National Mortgage Association (Ginnie Mae) or The Federal Agricultural Mortgage Corporation (Farmer Mac). The rule will not change how these entities are regulated but does make clear that GSEs have limited authorizations and are not subject to the FHA requirements that are specific to loan or mortgage origination.

The proposed GSE definition could affect the accountability and transparency of entities like Ginnie Mae and Farmer Mac.

A commenter stated that the proposed definition of GSEs could reduce the accountability and transparency of Ginnie Mae and Farmer Mac, as well as their access to Federal subsidies and support. The commenter said that this could happen because ''Ginnie Mae has an explicit guarantee from the Federal Government that its securities will be paid, while Farmer Mac has no explicit guarantee from the Federal Government but has some tax exemptions and borrowing privileges.'' This concern led the commenter to suggest that HUD ensure that these entities are subject to adequate oversight, supervision, and disclosure by their regulators, Congress, and the public.

HUD Response: Current regulation combines governmental institutions and GSEs in its definition, requiring GSEs to follow policy specific to loan origination even though they do not originate FHA loans. The final rule defines GSEs separate and apart from all other governmental institutions and reduces the administrative burden of having to adhere to compliance requirements that are not related to the functions they are performing. The final rule makes clear that GSEs have limited authorizations and are not subject to the FHA requirements that are specific to loan or mortgage origination. Also, the GSE definition does not include Ginnie Mae and Farmer Mac. This exclusion means that changes to the GSE definition will not lead to transparency issues with Ginnie Mae and Farmer Mac. HUD does not foresee an impact on the secondary housing market but will continue to monitor this after the rule becomes effective.

The proposed GSE definition could impact Fannie Mae's and Freddie Mac's conservatorship reform.

One commenter stated that the proposed rule would affect the role and function of Fannie Mae and Freddie Mac in the housing finance system, which is currently undergoing a major reform process. The commenter said the reform process aims to end the conservatorship of Fannie Mae and Freddie Mac, which has been in place since 2008, and to establish a more competitive and efficient secondary mortgage market. The commenter warned the proposed rule could have implications for the timing and outcome of the reform process, as well as for the future structure and governance of Fannie Mae and Freddie Mac.'' The commenter suggested that HUD coordinate with other Federal agencies to ensure consistency and alignment of policies and standards related to housing finance reform.

HUD Response: Certain GSEs, unlike many other lenders or mortgagees, do not have the infrastructure available to ensure compliance with FHA requirements. The final rule relieves GSEs of these requirements by defining GSEs separate and apart from all other governmental institutions. This definition makes clear that GSEs have limited authorizations and does not amend the programs or services provided by Fannie Mae and Freddie Mac. Given that the final rule only changes compliance requirements to ensure appropriateness with the limited nature of authorizations for GSEs, HUD does not believe the change will impact the role and function of Fannie Mae and Freddie Mac in the housing finance system or the Federal Housing Finance Agency's oversight of Fannie Mae and Freddie Mac.

GSE exclusion based on origination authority should apply to similarly situated HFAs.

One commenter stated that the reasoning provided in the proposed rule for excluding GSEs from FHA requirements specific to loan or mortgage origination, which is that GSEs cannot originate loans, is applicable to many HFAs. The commenter recommended that these similarly situated HFAs be treated like GSEs and be exempted from the loan or mortgage origination requirements as appropriate.

HUD Response: HUD notes that all HFAs that currently participate in FHA's Title I and Title II programs are approved as government mortgagees authorized to perform activities associated with loan or mortgage origination. While FHA understands from the commenters that not all HFAs currently originate, or are authorized to originate, HFA lending activities and authorizations can change over time. HUD also lacks the information needed to make an informed and reasoned judgment on whether it is appropriate to depart from the existing requirements for HFAs, as well as how such a change would be implemented, at this time. Accordingly, FHA is maintaining the current framework in § 202.10(a) for HFAs.

V. Findings and Certifications

Regulatory Review—Executive Orders 12866, 13563, and 14094

Pursuant to Executive Order 12866 (Regulatory Planning and Review), a determination must be made whether a regulatory action is significant and therefore, subject to review by the Office of Management and Budget (OMB) in accordance with the requirements of the order. Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. The order also directs executive agencies to analyze regulations that are ''outmoded, ineffective, insufficient, or excessively burdensome, and to modify, streamline, expand, or repeal them in accordance with what has been learned.'' Executive Order 13563 further directs that, where relevant, feasible, and consistent with regulatory objectives, and to the extent permitted by law, agencies are to identify and consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public. Executive Order 14094 entitled ''Modernizing Regulatory Review'' (hereinafter referred to as the ''Modernizing E.O.'') amends section 3(f) of Executive Order 12866, among other things.

As discussed above, this rule defines GSEs under a separate definition within § 202.10. It clarifies the audit, financial statement, and certification requirements of investing lenders and investing mortgagees. It eliminates obsolete net worth requirements for investing lenders and investing mortgagees. This rule was determined not to be a ''significant regulatory action'' as defined in section 3(f) of Executive Order 12866 as amended by Executive Order 14094.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. The changes in this rule are limited to defining GSEs under a separate definition within § 202.10; clarifying the audit, financial statement, and certification requirements of investing lenders and investing mortgagees; and eliminating obsolete language within 24 CFR part 202 regarding lenders and mortgagees net worth requirements. The minor nature of changes led HUD to conclude that the proposed rule was non-significant, a finding later affirmed by OMB. HUD solicited comments from the public at the proposed rule stage and received no comments suggesting that it would impose a significant economic impact on a substantial number of small entities. In addition, HUD is only making a minor clarifying edit to the final rule in response to public comments. Accordingly, the undersigned certifies that the rule will not have a significant economic impact on a substantial number of small entities.

Environmental Impact

This rule is categorically excluded from environmental review under the National Environmental Policy Act of 1969 under 24 CFR 50.19(c)(1) because it does not direct, provide for assistance or loan and mortgage insurance for, or otherwise govern or regulate, real property acquisition, disposition, rehabilitation, alteration, demolition, or new construction, or establish, revise or provide for standards for construction or construction materials, manufactured housing, or occupancy.

Executive Order 13132, Federalism

Executive Order 13132 (Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either: (i) imposes substantial direct compliance costs on State and local governments and is not required by statute, or (ii) preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. This rule does not have federalism implications and does not impose substantial direct compliance costs on State and local governments or preempt State law within the meaning of the Executive order.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) (UMRA) establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and Tribal governments, and on the private sector. This rule does not impose any Federal mandates on any State, local, or Tribal governments, or on the private sector, within the meaning of the UMRA.

List of Subjects

24 CFR Part 5

Administrative practice and procedure, Aged, Claims, Crime, Government contracts, Grant programs—housing and community development, Individuals with disabilities, Intergovernmental relations, Loan programs—housing and community development, Low and moderate income housing, Mortgage insurance, Penalties, Pets, Public housing, Rent subsidies, Reporting and recordkeeping requirements, Social security, Unemployment compensation, Wages.

24 CFR Part 202

Administrative practice and procedure, Home improvement, Manufactured homes, Mortgage insurance, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, HUD amends 24 CFR parts 5 and 202 as follows:

PART 5—GENERAL HUD PROGRAM REQUIREMENTS; WAIVERS

■ 1. The authority citation for part 5 continues to read as follows:

Authority: 12 U.S.C. 1701x; 42 U.S.C. 1437a, 1437c, 1437f, 1437n, 3535(d); 42 U.S.C. 2000bb *et seq.;* 34 U.S.C. 12471 *et seq.;* Sec. 327, Pub. L. 109–115, 119 Stat. 2396; E.O. 13279, 67 FR 77141, 3 CFR, 2002 Comp., p. 258; E.O. 13559, 75 FR 71319, 3 CFR, 2010 Comp., p. 273; E.O. 14015, 86 FR 10007, 3 CFR, 2021 Comp., p. 517.

■ 2. In § 5.801, revise paragraph (a)(5) to read as follows:

§ 5.801 Uniform financial reporting standards.

(a) * * *

(5) HUD-approved Title I and Title II supervised, nonsupervised, and investing lenders and investing mortgagees.

* * * * *

PART 202—APPROVAL OF LENDING INSTITUTIONS AND MORTGAGEES

■ 3. The authority citation for part 202 continues to read as follows:

Authority: 12 U.S.C. 1703, 1709, and 1715b; 42 U.S.C. 3535(d).

■ 4. In § 202.5, revise paragraph (h), (m) introductory text, and (n)(1) and (2), and remove paragraph (n)(3) to read as follows:

§ 202.5 General approval standards.

* * * * *

(h) *Quality control plan.* Lenders or mortgagees shall implement a written quality control plan, acceptable to the Secretary, that assures compliance with the regulations of this chapter and other issuances of the Secretary regarding loan or mortgage origination and servicing unless the lenders or mortgagees were approved under § 202.9 without servicing authority.

* * * * *

(m) *Reports.* Each lender and mortgagee must submit an annual certification on a form prescribed by the Secretary. Upon application for approval and with each annual recertification, each lender and mortgagee must submit a certification that it has not been refused a license and has not been sanctioned by any State or States in which it will originate, purchase, hold, sell, or service insured mortgages or Title I loans. In addition, each mortgagee shall file the following:

* * * * *

(n) * * *

(1) *Applicability.* The requirements of paragraph (n) of this section apply to approved supervised and nonsupervised lenders and mortgagees under §§ 202.6 and 202.7, and approved investing lenders and investing mortgagees under § 202.9. For ease of reference, these institutions are referred to as ''approved lenders or mortgagees'' for purposes of paragraph (n) of this section. These requirements also apply to applicants for FHA approval under §§ 202.6, 202.7, and 202.9. For ease of reference, these institutions are referred to as ''applicants'' for purposes of paragraph (n) of this section.

(2) *Requirements*—(i) *Single family net worth requirements.* Irrespective of size, each applicant and each approved lender or mortgagee for participation solely under the FHA single family programs shall have a net worth of not less than $1 million, plus an additional net worth of one percent of the total volume, in excess of $25 million, of FHA single family insured mortgages originated, underwritten, purchased, or serviced during the prior fiscal year, up to a maximum required net worth of $2.5 million. No less than 20 percent of the applicant's or approved lender's or mortgagee's required net worth must be liquid assets consisting of cash or its equivalent acceptable to the Secretary.

(ii) *Multifamily net worth requirements.* Irrespective of size, each applicant for approval and each approved lender or mortgagee for participation solely under the FHA multifamily programs shall have a net worth of not less than $1 million. For those multifamily approved lenders or mortgagees that also engage in mortgage servicing, an additional net worth of one percent of the total volume, in excess of $25 million, of FHA multifamily mortgages originated, purchased, or serviced during the prior fiscal year, up to a maximum required net worth of $2.5 million. For multifamily approved lenders or mortgagees that do not perform mortgage servicing, an additional net worth of one half of one percent of the total volume, in excess of $25 million, of FHA multifamily mortgages originated during the prior fiscal year, up to a maximum required net worth of $2.5 million. No less than 20 percent of the applicant's or approved lender's or mortgagee's required net worth must be liquid assets consisting of cash or its equivalent acceptable to the Secretary.

(iii) *Dual participation net worth requirements.* Irrespective of size, each applicant for approval and each approved lender or mortgagee that is a participant in both FHA single family and multifamily programs must meet the net worth requirements as set forth in paragraph (n)(2)(i) of this section.

* * * * *

■ 6. In § 202.9:

■ a. Revise the section heading and paragraph (a);

■ b. In paragraphs (b) introductory text and (b)(1) and (2), remove the words ''investing lender or mortgagee'' and add, in their place, the words ''investing lender or investing mortgagee''; and

■ c. Revise paragraph (b)(3) and add paragraph (b)(4).

The revisions and addition read as follows:

§ 202.9 Investing lenders and investing mortgagees.

(a) *Definition.* An investing lender or investing mortgagee is an organization that is not approved as a supervised lender or mortgagee under § 202.6, a nonsupervised lender or mortgagee under § 202.7, or a governmental or similar institution under § 202.10. An investing lender or investing mortgagee may purchase, hold, or sell Title I loans or Title II mortgages, respectively, but may not originate Title I loans or Title II mortgages in its own name or submit applications for the insurance of mortgages. An investing lender or investing mortgagee may not service Title I loans or Title II mortgages without prior approval of the Secretary.

(b) * * *

(3) *Fidelity bond.* An investing lender or investing mortgagee shall maintain fidelity bond coverage and errors and omissions insurance acceptable to the Secretary and in an amount required by the Secretary, or alternative insurance coverage approved by the Secretary, that assures the faithful performance of the responsibilities of the mortgagee.

(4) *Audit report.* An investing lender or mortgagee must comply with the financial reporting requirements in24 CFR part 5, subpart H. Audit reports shall be based on audits performed by a certified public accountant, or by an independent public accountant licensed by a regulatory authority of a State or other political subdivision of the United States on or before December 31, 1970. Audit reports shall include:

(i) A financial statement in a form acceptable to the Secretary, including a balance sheet and a statement of operations and retained earnings, a statement of cash flows, an analysis of the investing lender's or mortgagee's net worth adjusted to reflect only assets acceptable to the Secretary, and an analysis of escrow funds; and

(ii) Such other financial information as the Secretary may require to determine the accuracy and validity of the audit report.

■ 7. In § 202.10:

■ a. Revise paragraph (a);

■ b. Remove paragraph (c);

■ c. Redesignate paragraph (b) as paragraph (c); and

■ d. Add new paragraphs (b) and (d).

The revision and additions read as follows:

§ 202.10 Governmental institutions, Government-Sponsored Enterprises, public housing agencies and State housing agencies.

(a) *Federal, state, and municipal governmental agencies and Federal Reserve Banks.* A Federal, State, or municipal government agency or a Federal Reserve Bank may be an approved lender or mortgagee. A mortgagee approved under this paragraph (a) may submit applications for Title II mortgage insurance. A lender or mortgagee approved under this paragraph (a) may originate, purchase, service, or sell Title I loans and insured mortgages, respectively. A mortgagee or lender approved under this paragraph (a) is not required to meet a net worth requirement. A lender or mortgagee shall maintain fidelity bond coverage and errors and omissions insurance acceptable to the Secretary and in an amount required by the Secretary, or alternative insurance coverage approved by the Secretary, that assures the faithful performance of the responsibilities of the mortgagee. There are no additional requirements beyond the general approval requirements in § 202.5 or as provided under paragraph (c) of this section.

(b) *Government-Sponsored Enterprises.* The Government-Sponsored Enterprises are the Federal Home Loan Banks, Federal Home Loan Mortgage Corporation, and Federal National Mortgage Association. A Government-Sponsored Enterprise may be an approved lender or mortgagee. A lender or mortgagee approved under this paragraph (b) may purchase, service, or sell Title I loans and insured mortgages, respectively. A mortgagee or lender approved under this paragraph (b) is not required to meet a net worth requirement. There are no additional requirements beyond the general approval requirements in § 202.5.

* * * * *

(d) *Audit requirements.* The insuring of loans and mortgages under the Act constitutes ''Federal financial assistance'' (as defined in 2 CFR 200.1) for purposes of audit requirements set out in 2 CFR part 200, subpart F. Non-Federal entities (as defined in 2 CFR 200.1) that receive insurance as lenders and mortgagees shall conduct audits in accordance with 2 CFR part 200, subpart F.

Julia R. Gordon,

Assistant Secretary for Housing—Federal Housing Commissioner.

[FR Doc. 2024–08648 Filed 4–22–24; 8:45 am]

BILLING CODE 4210–67–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2023–0077; FRL–11855–01–OCSPP]

Cyclaniliprole; Pesticide Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes a tolerance for residues of cyclaniliprole in or on Vegetable, cucurbit, group 9. Interregional Research Project Number 4 (IR–4) requested this tolerance under the Federal Food, Drug, and Cosmetic Act (FFDCA).

DATES: This regulation is effective April 23, 2024. Objections and requests for hearings must be received on or before June 24, 2024, and must be filed in

accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2023–0077, is available at *https://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room and the OPP Docket is (202) 566–1744. Please review the visitor instructions and additional information about the docket available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Charles Smith, Director, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; main telephone number: (202) 566–1030; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Office of the Federal Register's e-CFR site at *https://www.ecfr.gov/current/title-40.*

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a(g), any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2023–0077 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing and must be received by the Hearing Clerk on or before June 24, 2024. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2023–0077, by one of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *https://www.epa.gov/dockets/where-send-comments-epa-dockets.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

II. Summary of Petitioned-For Tolerance

In the **Federal Register** of February 9, 2024 (89 FR 9103) (FRL–10579–12–OCSPP), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 2E9037) by IR–4, North Carolina State University, 1730 Varsity Drive, Venture IV, Suite 210, Raleigh, NC 27606. The petition requested to establish a tolerance for residues of the insecticide cyclaniliprole, 3-bromo-*N*-[2-bromo-4-chloro-6-[[(1-cyclopropylethyl)amino carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1*H*-pyrazole-5-carboxamide, including its metabolites and degradates, in or on the raw agricultural commodity Vegetable, cucurbit, group 9 at 0.3 parts per million (ppm). Upon the establishment of the tolerance specified above, IR–4 requested to remove the established tolerance for Vegetable, cucurbit, group 9 at 0.15 ppm. The document referenced a summary of the petition, which is available in the docket at *https://www.regulations.gov.* There were no comments received in response to the notice of filing.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is ''safe.'' Section 408(b)(2)(A)(ii) of FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .''

Consistent with FFDCA section 408(b)(2)(D), and the factors specified therein, EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for cyclaniliprole, including exposure resulting from the tolerance established by this action. EPA's assessment of exposures and risks associated with cyclaniliprole follows.

No single or repeated dose study performed by any route of exposure produced an adverse effect following cyclaniliprole exposure at dose levels below, at, or above the limit dose (1,000 milligrams/kilogram/day (mg/kg/day)). Although the oral toxicity studies in dogs were conducted at approximately a third of the limit dose, no adverse effects were seen. While adaptive liver effects were seen in these studies, it is unlikely that cyclaniliprole would produce adverse liver effects if tested at higher doses in dogs as a structurally related chemical, chlorantraniliprole,

was tested up to the limit dose in dogs and did not demonstrate adverse liver effects. There is no evidence that cyclaniliprole produces increased susceptibility with prenatal or postnatal exposures. Cyclaniliprole is considered not likely to be carcinogenic based on no increase in treatment-related tumor incidence in carcinogenicity studies in rats and mice and no genotoxicity.

Specific information on the studies received for cyclaniliprole as well as the no-observed-adverse-effect-level (NOAEL) from the toxicity studies can be found at *https://www.regulations.gov* in document, ''Cyclaniliprole: Human Health Risk Assessment for New Greenhouse Uses on Lettuce and Cucumber and Amendment of Permanent Tolerances on Cucurbit Vegetables Crop Group 9'', in docket ID number EPA–HQ–OPP–2023–0077.

Based on the review of the available cyclaniliprole toxicological studies, no toxicity endpoints or points of departure were selected for risk assessment. Based on the toxicological profile of cyclaniliprole, EPA has concluded that the FFDCA requirements to retain an additional safety factor for protection of infants and children and to consider cumulative effects do not apply. Section 408(b)(2)(C) requires an additional tenfold margin of safety in the case of threshold risks, which cyclaniliprole does not present. Section 408(b)(2)(D)(v) requires consideration of information concerning cumulative effects of substances that have a common mechanism of toxicity. Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, EPA has not made a common mechanism of toxicity finding as to cyclaniliprole and any other substances, and cyclaniliprole does not appear to produce a toxic metabolite produced by other substances. For the purposes of this action, therefore, EPA has not assumed that cyclaniliprole has a common mechanism of toxicity with other substances.

Cyclaniliprole has been grouped with the pyridyl pyrazoles. As part of the ongoing process to review registered pesticides, the Agency intends to apply this framework to determine if the available toxicological data for cyclaniliprole suggests a candidate common mechanism group (CMG) may be established with other pesticides. If a CMG is established, a screening-level toxicology and exposure analysis may be conducted to provide an initial screen for multiple pesticide exposure.

There is a potential for exposure to cyclaniliprole residues via food and drinking water based on existing uses and the proposed uses for cyclaniliprole application directly to growing crops. These applications can also result in cyclaniliprole reaching surface and ground water, both of which can serve as sources of drinking water. There are no proposed uses in residential settings and therefore no anticipated residential exposures, although exposures resulting from spray drift from agricultural applications onto residential areas may occur. However, no quantitative risk assessment was conducted because no toxicity endpoints or points of departure were selected for risk assessment.

Determination of safety. Based on the available data indicating a lack of adverse effects from exposure to cyclaniliprole, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children, from aggregate exposure to cyclaniliprole residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

Adequate enforcement methodology (liquid chromatography with tandem mass spectrometry (LC–MS/MS)) is available to enforce the tolerance expression for plant and livestock commodities. The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Mead, MD 20755–5350; telephone number: (410) 305–2905; email address: *residuemethods@epa.gov.*

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4).

There are Codex MRLs established for residues of cyclaniliprole on cucumber and squash (summer) at 0.05 ppm; and melons, pumpkin, squash (winter) at 0.1 ppm which are different than the U.S. tolerance for the cucurbit vegetable group 9 established in this action (0.3 ppm). For cucurbit vegetable group 9, no harmonization is possible for these commodities because decreasing the tolerance level to harmonize with the Codex MRL could put U.S. growers at risk of violative residues despite legal use of cyclaniliprole.

V. Conclusion

Although the lack of toxicity supports a safety finding for an exemption from the requirement of tolerance for all crops, EPA is revising the tolerance for residues resulting from direct applications to the cucurbit vegetable group 9 because the petitioner requested it for international trade purposes. Therefore, the tolerance for residues of cyclaniliprole in or on Vegetable, cucurbit, group 9 is revised from 0.15 ppm to 0.3 ppm.

VI. Statutory and Executive Order Reviews

This action establishes a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001), or to Executive Order 13045, entitled ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled ''Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations'' (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or Tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or Tribal Governments, on the relationship between the National Government and the States or Tribal Governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian

Tribes. Thus, the Agency has determined that Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled ''Consultation and Coordination with Indian Tribal Governments'' (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides, and pests, Reporting and recordkeeping requirements.

Dated: April 11, 2024.

Charles Smith,

Director, Registration Division, Office of Pesticide Programs.

Therefore, for the reasons stated in the preamble, EPA is amending 40 CFR chapter 1 as follows:

PART 180—TOLERANCES AND EXEMPTIONS FOR PESTICIDE CHEMICAL RESIDUES IN FOOD

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.694, amend Table 1 to Paragraph (a) by revising the entry for ''Vegetable, cucurbit, group 9'' to read as follows:

§ 180.694 Cyclaniliprole; tolerances for residues.

* * * * *

TABLE 1 TO PARAGRAPH (a)

Commodity	Parts per million
* * * * * * *	
Vegetable, cucurbit, group 9	0.3
* * * * * * *

BILLING CODE 6560–50–P

Proposed Rules

Federal Register
Vol. 89, No. 79
Tuesday, April 23, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2024–1007; Project Identifier MCAI–2023–01249–T]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2022–13–11, which applies to all Airbus SAS Model A350–941 and –1041 airplanes. AD 2022–13–11 requires revising the existing airplane flight manual (AFM) for airplanes equipped with affected flight control units (FCUs) and replacing any affected FCU with a serviceable FCU. Since the FAA issued AD 2022–13–11, the FAA has determined that it is necessary to expand the applicability of the AFM revision requirement to all Model A350–941 and –1041 airplanes, including those equipped with serviceable FCUs. This proposed AD would continue to require certain actions in AD 2022–13–11, including replacing any affected FCU with a serviceable FCU, expand the requirement to revise the existing AFM for all airplanes, and prohibit the installation of affected parts, as specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by June 7, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–1007; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For material, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.* It is also available at *regulations.gov* under Docket No. FAA–2024–1007.
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 562–627–5357; email: *dat.v.le@faa.gov*.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2024–1007; Project Identifier MCAI–2023–01249–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 562–627–5357; email: *dat.v.le@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2022–13–11, Amendment 39–22097 (87 FR 39741, July 5, 2022) (AD 2022–13–11), for all Airbus SAS Model A350–941 and –1041 airplanes. AD 2022–13–11 was prompted by an MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued AD 2021–0260, dated November 18, 2021, to correct an unsafe condition.

AD 2022–13–11 requires revising the existing AFM to include a procedure on the use of the AFS control panel ALT knob. AD 2022–13–11 also requires replacing any affected FCU with a serviceable FCU, which would terminate the AFM revision following that replacement. The FAA issued AD

2022–13–11 to address erroneous target altitude during descent, climb, or go-around, which could result in an unexpected vertical trajectory deviation and loss of correct situational awareness that could potentially result in uncontrolled impact with the ground.

Actions Since AD 2022–13–11 Was Issued

Since the FAA issued AD 2022–13–11, EASA superseded 2021–0260 and issued EASA AD 2023–0215, dated December 11, 2023; corrected December 13, 2023 (EASA AD 2023–0215) (also referred to as the MCAI), to correct an unsafe condition for all Airbus SAS Model A350–941 and –1041 airplanes. EASA AD 2023–0215 states that since EASA AD 2021–0260 was issued, several operators reported uncommanded altitude changes on airplanes equipped with serviceable FCUs. Airbus is investigating the cause of these reported events and, as a precautionary measure, expanded the applicability of the AFM Temporary Revision (TR) 121, issue 1.0, to all airplanes, including those equipped with serviceable FCUs. For the reasons described above, EASA AD 2023–0215 partially retains the requirements of the EASA AD 2021–0260, which is superseded, and requires amendment of the applicable AFM by incorporating the AFM TR 121, issue 1.0, for airplanes equipped with serviceable FCUs. EASA AD 2023–0215 is still considered to be an interim action, and further EASA AD action may follow.

The FAA is proposing this AD to address erroneous target altitude during descent, climb, or go-around, which could result in an unexpected vertical trajectory deviation and loss of correct situational awareness that could potentially result in uncontrolled impact with the ground. You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2024–1007.

Explanation of Retained Requirements

Although this proposed AD does not explicitly restate the requirements of AD 2022–13–11, this proposed AD would retain certain requirements of AD 2022–13–11. Those requirements are referenced in EASA AD 2023–0215, which, in turn, is referenced in paragraph (g) of this proposed AD.

Related Service Information Under 1 CFR Part 51

EASA AD 2023–0215 specifies procedures for revising the existing AFM to include a procedure on the use of the AFS control panel ALT knob for all Airbus SAS Model A350–941 and –1041 airplanes, including the airplanes equipped with serviceable FCUs part number (P/N) C31006AD01; and replacing any affected FCU having P/N C31006AC01 or C31006AB01 with a serviceable FCU having P/N C31006AD01. EASA AD 2023–0215 also prohibits the installation of affected parts. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain certain requirements of AD 2022–13–11. This proposed AD would require accomplishing the actions specified in EASA AD 2023–0215 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Compliance With AFM Revisions

EASA AD 2023–0215 requires operators to ''inform all flight crews'' of revisions to the AFM, and thereafter to ''operate the aeroplane accordingly.'' However, this proposed AD would not specifically require those actions as those actions are already required by FAA regulations. FAA regulations require operators furnish to pilots any changes to the AFM (for example, 14 CFR 121.137), and to ensure the pilots are familiar with the AFM (for example, 14 CFR 91.505). As with any other flightcrew training requirement, training on the updated AFM content is tracked by the operators and recorded in each pilot's training record, which is available for the FAA to review. FAA regulations also require pilots to follow the procedures in the existing AFM including all updates. 14 CFR 91.9 requires that any person operating a civil aircraft must comply with the operating limitations specified in the AFM. Therefore, including a requirement in this proposed AD to operate the airplane according to the revised AFM would be redundant and unnecessary.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2023–0215 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2023–0215 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2023–0215 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2023–0215. Service information required by EASA AD 2023–0215 for compliance will be available at *regulations.gov* under Docket No. FAA–2024–1007 after the FAA final rule is published.

Interim Action

The FAA considers that this proposed AD would be an interim action. The FAA anticipates that further AD action will follow.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 27 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Up to 6 work-hours × $85 per hour = $510	$27,000	Up to $27,510	Up to $742,770.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–13–11, Amendment 39–22097 (87 FR 39741, July 5, 2022); and

■ b. Adding the following new AD:

Airbus SAS: Docket No. FAA–2024–1007; Project Identifier MCAI–2023–01249–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by June 7, 2024.

(b) Affected ADs

This AD replaces AD 2022–13–11, Amendment 39–22097 (87 FR 39741, July 5, 2022) (AD 2022–13–11).

(c) Applicability

This AD applies to all Airbus SAS Model A350–941 and –1041 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 22, Auto Flight.

(e) Unsafe Condition

This AD was prompted by a report of inadvertent auto flight system (AFS) altitude changes on the flight control unit (FCU); an investigation revealed that, depending on the ring selection, failure of the ALT knob on the FCU could change the target altitude. The FAA is issuing this AD to address erroneous target altitude during descent, climb, or go-around, which could result in an unexpected vertical trajectory deviation and loss of correct situational awareness that could potentially result in uncontrolled impact with the ground.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2023–0215, dated December 11, 2023; corrected December 13, 2023 (EASA AD 2023–0215).

(h) Exceptions to EASA AD 2023–0215

(1) Where EASA AD 2023–0215 refers to ''02 December 2021 [the effective date of EASA AD 2021–0260],'' this AD requires using August 9, 2022 (the effective date of AD 2022–13–11).

(2) Where EASA AD 2023–0215 refers to its effective date, this AD requires using the effective date of this AD.

(3) Where paragraphs (1) and (2) of EASA AD 2023–0215 specify to ''inform all flight crews, and thereafter, operate the aeroplane accordingly,'' this AD does not require those actions as those actions are already required by existing FAA operating regulations.

(4) The ''Remarks'' section of EASA AD 2023–0215 does not apply to this AD.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (j) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.*

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(j) Additional Information

For more information about this AD, contact Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 562–627–5357; email: *dat.v.le@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2023–0215, dated December 11, 2023; corrected dated December 13, 2023.

(ii) [Reserved]

(3) For EASA AD 2021–0260 and EASA AD 2023–0215, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu*. You may find these EASA ADs on the EASA website at *ad.easa.europa.eu.*

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations,* or email *fr.inspection@nara.gov.*

Issued on April 17, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain The Boeing Company Model 767–300 series airplanes. This proposed AD was prompted by a report that some Model 767–300 series airplanes that had been converted into a freighter configuration are missing an electrical bracket for a wire bundle in the main equipment center. This proposed AD would require installing an electrical support bracket and re-installing wire bundles. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by June 7, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–1005; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For service information identified in this NPRM, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd, MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com*.
- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St, Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* under Docket No. FAA–2024–1005.

FOR FURTHER INFORMATION CONTACT: Samuel Dorsey, Aviation Safety Engineer, FAA, 2200 South 216th St, Des Moines, WA 98198; phone: 206–231–3415; email: *samuel.j.dorsey@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2024–1005; Project Identifier AD–2022–00996–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Samuel Dorsey, Aviation Safety Engineer, FAA, 2200 South 216th St, Des Moines, WA 98198; phone: 206–231–3415; email: *samuel.j.dorsey@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA has received a report that certain Model 767–300 series airplanes that have been modified to operate in a freighter configuration by the manufacturer (also referred to as a ''767–300 Boeing Converted Freighter'' or ''767–300BCF'') do not have the correct airplane configuration necessary to comply with the requirements of AD 2020–18–16, Amendment 39–21237 (85 FR 62993, October 6, 2020) (AD 2020–18–16). Specifically, these Model 767–300 series airplanes are missing an electrical support bracket in the main equipment center, leading to inadequate separation of a wire bundle that includes fuel quantity indicating system (FQIS) wiring.

During the design of the replacement cargo floor beams for the freighter conversion, although the bracket and attached wire support clamps were a required design feature to protect the FQIS wiring, the bracket and clamps were omitted from the design of the cargo floor beams. When the passenger configuration floor beams were replaced with the cargo configuration floor beams during modification, the bracket was therefore removed but not replaced. In addition, on some airplanes, clamps were installed around the relevant wire bundles but were not attached to the missing bracket.

In either case, the wire bundles that were previously attached to the bracket were left unsecured, affecting the wire separation configuration requirements for the FQIS wiring as defined in the airworthiness limitations (Critical

Design Configuration Control Limitation 28–AWL–09).

This condition, if not addressed, could result in an electrical fault condition in the FQIS wiring, possibly creating an ignition source in the center wing fuel tank. A failure to prevent possible ignition sources in the fuel tank, in combination with flammable fuel vapors, could result in an explosion and consequent loss of the airplane.

AD 2020–18–16 applies to certain Model 767–200, –300, –300F, and –400ER series airplanes and requires modification of the FQIS to prevent ignition sources inside the center fuel tank. Paragraph (h) of AD 2020–18–16 contains optional alternative requirements for cargo airplanes. The electrical support bracket required by this proposed AD is needed for some Model 767–300 cargo airplanes to accomplish the service bulletin required by the alternative actions in paragraph (h)(2)(ii) of AD 2020–18–16. This proposed AD would restore the airplane to a configuration where paragraph (h)(2)(ii) of AD 2020–18–16 may be accomplished.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Boeing Alert Service Bulletin 767–24A0261, Revision 1, dated August 17, 2022. This service information specifies procedures for installing an electrical support bracket in the main equipment center and re-installing wire bundles. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions identified as ''RC'' (required for compliance) in the Accomplishment Instructions of Boeing Alert Service Bulletin 767–24A0261, Revision 1, dated August 17, 2022, already described, except for any differences identified as exceptions in the regulatory text of this proposed AD. For information on the procedures and compliance times, see this service information at *regulations.gov* under Docket No. FAA–2024–1005.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 18 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Installation of bracket	3 work-hours × $85 per hour = $255	$93	$348	$6,264

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

The Boeing Company: Docket No. FAA–2024–1005; Project Identifier AD–2022–00996–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by June 7, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 767–300 series airplanes, certificated in any category, as identified in Boeing Alert Service Bulletin 767–24A0261, Revision 1, dated August 17, 2022.

(d) Subject

Air Transport Association (ATA) of America Code 24, Electrical Power.

(e) Unsafe Condition

This AD was prompted by a report that some Model 767–300 series airplanes that have been modified to operate in a freighter configuration are missing an electrical bracket for a wire bundle in the main equipment center, which affects wire separation configuration requirements for fuel quantity indicating system wiring and could result in an electrical fault condition. The FAA is issuing this AD to prevent possible ignition sources in the fuel tank due to an electrical fault, which, in combination with flammable fuel vapors, could result in a fuel tank explosion and consequent loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraph (h) of this AD: At the applicable times specified in the ''Compliance'' paragraph of Boeing Alert Service Bulletin 767–24A0261, Revision 1, dated August 17, 2022, do all applicable actions identified as ''RC'' (required for compliance) in, and in accordance with, the Accomplishment Instructions of Boeing Alert Service Bulletin 767–24A0261, Revision 1, dated August 17, 2022.

(h) Exceptions to Service Information Specifications

Where the ''Compliance'' paragraph of Boeing Alert Service Bulletin 767–24A0261, Revision 1, dated August 17, 2022, refers to the Revision 1 date of this service bulletin, this AD requires using the effective date of this AD.

(i) Credit for Previous Actions

This paragraph provides credit for the actions specified in paragraph (g) of this AD, if those actions were performed before the effective date of this AD using Boeing Service Bulletin 767–24–0261, dated May 19, 2021.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (k)(1) of this AD. Information may be emailed to: *9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR–520, Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) Except as specified by paragraph (h) of this AD: For service information that contains steps that are labeled as Required for Compliance (RC), the provisions of paragraphs (j)(4)(i) and (ii) of this AD apply.

(i) The steps labeled as RC, including substeps under an RC step and any figures identified in an RC step, must be done to comply with the AD. If a step or substep is labeled ''RC Exempt,'' then the RC requirement is removed from that step or substep. An AMOC is required for any deviations to RC steps, including substeps and identified figures.

(ii) Steps not labeled as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the RC steps, including substeps and identified figures, can still be done as specified, and the airplane can be put back in an airworthy condition.

(k) Related Information

(1) For more information about this AD, contact Samuel Dorsey, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3415; email: *samuel.j.dorsey@faa.gov.*

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (l)(3) and (4) of this AD.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Service Bulletin 767–24A0261, Revision 1, dated August 17, 2022.

(ii) [Reserved]

(3) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com.*

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on April 17, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; MHI RJ Aviation ULC (Type Certificate Previously Held by Bombardier, Inc.) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain MHI RJ Aviation ULC Model CL–600–2D15 (Regional Jet Series 705) and CL–600–2D24 (Regional Jet Series 900) airplanes. This proposed AD was prompted by a notice from a supplier reporting that torque wrenches used to install the air driven generator (ADG) downlock cam nut were out of calibration, which resulted in a higher torque level setting than required during the initial production installation of the affected cam nut. This proposed AD would require replacement of the affected ADG locking cam screw and cam nut, as specified in a Transport Canada AD, which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by June 7, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–1006; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and

other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

• For Transport Canada material that is proposed for IBR in this AD, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca.* You may find this material on the Transport Canada website at *tc.canada.ca/en/aviation.* It is also available at *regulations.gov* under Docket No. FAA–2024–1006.

• You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2024–1006; Project Identifier MCAI–2023–01222–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Fatin Saumik, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email *Fatin.R.Saumik@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

Transport Canada, which is the aviation authority for Canada, has issued Transport Canada AD CF–2023–76, dated November 28, 2023 (Transport Canada AD CF–2023–76) (also referred to as the MCAI), to correct an unsafe condition for certain MHI RJ Aviation ULC Model CL–600–2D15 (Regional Jet Series 705) and CL–600–2D24 (Regional Jet Series 900) airplanes. The MCAI states MHI RJ Aviation received a supplier quality escape notice, reporting that torque wrenches used to install the ADG downlock cam nut were out of calibration, which resulted in a higher torque level setting than required during the initial production installation of the affected cam nut. This over-torque condition could cause the screw and cam to fail, which, if not corrected, could result in the loss of the ADG downlock mechanism functionality upon airplane touchdown which eliminates a critical power source for the aircraft, leaving the flight crew with the minimum flightdeck displays and difficulty controlling the aircraft.

The FAA is proposing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2024–1006.

Related Service Information Under 1 CFR Part 51

Transport Canada AD CF–2023–76 specifies procedures for replacing the affected ADG locking cam screw and cam nut. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

FAA's Determination

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in Transport Canada AD CF–2023–76 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate Transport Canada AD CF–2023–76 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with Transport Canada AD CF–2023–76 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Service information required by Transport Canada AD CF–2023–76 for compliance will be available at *regulations.gov* under Docket No. FAA–2024–1006 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 24 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Up to 2 work-hours × $85 per hour = $170	$285	Up to $455	Up to $10,920.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, part A, subpart III, section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

MHI RJ Aviation ULC (Type Certificate Previously Held by Bombardier, Inc.): Docket No. FAA–2024–1006; Project Identifier MCAI–2023–01222–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by June 7, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to MHI RJ Aviation ULC (Type Certificate previously held by Bombardier, Inc.) Model CL–600–2D15 (Regional Jet Series 705) and Model CL–600–2D24 (Regional Jet Series 900) airplanes, certificated in any category, as identified in Transport Canada AD CF–2023–76, dated November 28, 2023 (Transport Canada AD CF–2023–76).

(d) Subject

Air Transport Association (ATA) of America Code 24, Electrical power.

(e) Unsafe Condition

This AD was prompted by a notice from a supplier reporting that torque wrenches used to install the air driven generator (ADG) downlock cam nut were out of calibration, which resulted in a higher torque level setting than required during the initial production installation of the affected cam nut. The FAA is issuing this AD to address this over-torque condition that could cause the screw and cam to fail. The unsafe condition, if not addressed, could result in the loss of the ADG downlock mechanism functionality on aircraft touchdown which eliminates a critical power source for the aircraft, leaving the flight crew with the minimum flightdeck displays and difficulty controlling the aircraft.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, Transport Canada AD CF–2023–76.

(h) Exception to Transport Canada AD CF–2023–76

(1) Where Transport Canada AD CF–2023–76 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where Transport Canada AD CF–2023–76 refers to hours air time, this AD requires using flight hours.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (j) of this AD. Information may be emailed to: *9-AVS-NYACO-COS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; Transport Canada; or MHI RJ Aviation ULC's Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(j) Additional Information

For more information about this AD, contact Fatin Saumik, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email *Fatin.R.Saumik@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Transport Canada AD CF–2023–76, dated November 28, 2023.

(ii) [Reserved]

(3) For Transport Canada AD CF–2023–76, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *TC.AirworthinessDirectives-*

Consignesdenavigabilite.TC@tc.gc.ca. You may find this Transport Canada AD on the Transport Canada website at *tc.canada.ca/en/aviation.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations,* or email *fr.inspection@nara.gov.*

Issued on April 17, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket No. FAA–2024–1008; Project Identifier MCAI–2024–00080–T]

RIN 2120–AA64

Airworthiness Directives; Dassault Aviation Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2023–02–13, which applies to certain Dassault Aviation Model FALCON 900EX airplanes. AD 2023–02–13 requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. Since the FAA issued AD 2023–02–13, the FAA has determined that new or more restrictive airworthiness limitations are necessary. This proposed AD would continue to require certain actions in AD 2023–02–13 and would require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by June 7, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–1008; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For material, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu*. You may find this material on the EASA website at *ad.easa.europa.eu.*
- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th Street, Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* under Docket No. FAA–2024–1008.

FOR FURTHER INFORMATION CONTACT: Tom Rodriguez, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone: 206–231–3226; email: *tom.rodriguez@faa.gov*.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2024–1008; Project Identifier MCAI–2024–00080–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Tom Rodriguez, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone: 206–231–3226; email: *tom.rodriguez@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2023–02–13, Amendment 39–22320 (88 FR 8740, February 10, 2023) (AD 2023–02–13), for certain Dassault Aviation Model FALCON 900EX airplanes. AD 2023–02–13 was prompted by an MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued AD 2022–0144, dated July 11, 2022 (EASA AD 2022–0144) (which corresponds to FAA AD 2023–02–13), to correct an unsafe condition.

AD 2023–02–13 requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. The FAA issued AD 2023–02–13 to address reduced structural integrity of the airplane.

Actions Since AD 2023–02–13 Was Issued

Since the FAA issued AD 2023–02–13, EASA superseded AD 2022–0144

and issued EASA AD 2024–0035, dated January 31, 2024 (EASA AD 2024–0035) (referred to after this as the MCAI), for certain Dassault Aviation Model FALCON 900EX airplanes. The MCAI states that new or more restrictive airworthiness limitations have been developed.

The FAA is proposing this AD to address reduced structural integrity of the airplane. You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2024–1008.

Related Service Information Under 1 CFR Part 51

The FAA reviewed EASA AD 2024–0035, which specifies new or more restrictive airworthiness limitations for airplane structures and safe life limits.

This proposed AD would also require EASA AD 2022–0144, which the Director of the Federal Register approved for incorporation by reference as of March 17, 2023 (88 FR 8740, February 10, 2023).

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

FAA's Determination

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain certain requirements of AD 2023–02–13. This proposed AD would also require revising the existing maintenance or inspection program, as applicable, to incorporate additional new or more restrictive airworthiness limitations, which are specified in EASA AD 2024–0035 already described, as proposed for incorporation by reference. Any differences with EASA AD 2024–0035 are identified as exceptions in the regulatory text of this AD.

This proposed AD would require revisions to certain operator maintenance documents to include new actions (*e.g.,* inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this proposed AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance (AMOC) according to paragraph (m)(1) of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to retain the IBR of EASA AD 2022–0144 and incorporate EASA AD 2024–0035 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2022–0144 and EASA AD 2024–0035 through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2022–0144 or EASA AD 2024–0035 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2022–0144 or EASA AD 2024–0035. Service information required by EASA AD2022–0144 and EASA AD 2024–0035 for compliance will be available at *regulations.gov* by searching for and locating Docket No. FAA–2024–1008 after the FAA final rule is published.

Airworthiness Limitation ADs Using the New Process

The FAA's process of incorporating by reference MCAI ADs as the primary source of information for compliance with corresponding FAA ADs has been limited to certain MCAI ADs (primarily those with service bulletins as the primary source of information for accomplishing the actions required by the FAA AD). However, the FAA is now expanding the process to include MCAI ADs that require a change to airworthiness limitation documents, such as airworthiness limitation sections.

For these ADs that incorporate by reference an MCAI AD that changes airworthiness limitations, the FAA requirements are unchanged. Operators must revise the existing maintenance or inspection program, as applicable, to incorporate the information specified in the new airworthiness limitation document. The airworthiness limitations must be followed according to 14 CFR 91.403(c) and 91.409(e).

The previous format of the airworthiness limitation ADs included a paragraph that specified that no alternative actions (*e.g.,* inspections) or intervals may be used unless the actions and intervals are approved as an AMOC in accordance with the procedures specified in the AMOCs paragraph under ''Additional AD Provisions.'' This new format includes a ''New Provisions for Alternative Actions and Intervals'' paragraph that does not specifically refer to AMOCs, but operators may still request an AMOC to use an alternative action or interval.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 88 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

The FAA estimates the total cost per operator for the retained actions from AD 2023–02–13 to be $7,650 (90 work-hours × $85 per work-hour).

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate.

The FAA estimates the total cost per operator for the new proposed actions to be $7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and

procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing airworthiness directive 2023–02–13, Amendment 39–22320 (88 FR 8740, February 10, 2023); and

■ b. Adding the following new airworthiness directive:

Dassault Aviation: Docket No. FAA–2024–1008; Project Identifier MCAI–2024–00080–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by June 7, 2024.

(b) Affected ADs

This AD replaces AD 2023–02–13, Amendment 39–22320 (88 FR 8740, February 10, 2023) (AD 2023–02–13).

(c) Applicability

This AD applies to Dassault Aviation Model FALCON 900EX airplanes, certificated in any category, as identified in European Union Aviation Safety Agency (EASA) AD 2024–0035, dated January 31, 2024 (EASA AD 2024–0035).

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Unsafe Condition

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Revision of the Existing Maintenance or Inspection Program, With a New Terminating Action

This paragraph restates the requirements of paragraph (j) of AD 2023–02–13, with a new terminating action. Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2022–0144, dated July 11, 2022 (EASA AD 2022–0144). Accomplishing the revision of the existing maintenance or inspection program required by paragraph (j) of this AD terminates the requirements of this paragraph.

(h) Retained Exceptions to EASA 2022–0144, With No Changes

This paragraph restates the exceptions specified in paragraph (k) of AD 2023–02–13, with no changes.

(1) The requirements specified in paragraphs (1) and (2) of EASA AD 2022–0144 do not apply to this AD.

(2) Paragraph (3) of EASA AD 2022–0144 specifies revising ''the approved AMP'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, to incorporate the ''limitations, tasks and associated thresholds and intervals'' specified in paragraph (3) of EASA AD 2022–0144 within 90 days after March 17, 2023 (the effective date of AD 2023–02–13).

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2022–0144 is at the applicable ''associated thresholds'' specified in paragraph (3) of EASA AD 2022–0144, or within 90 days after March 17, 2023 (the effective date of AD 2023–02–13), whichever occurs later.

(4) The provisions specified in paragraphs (4) and (5) of EASA AD 2022–0144 do not apply to this AD.

(5) The ''Remarks'' section of EASA AD 2020–0144 does not apply to this AD.

(i) Retained Restrictions on Alternative Actions and Intervals, With a New Exception

This paragraph restates the requirements of paragraph (l) of AD 2023–02–13, with a new exception. Except as required by paragraph (j) of this AD, after the maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2022–0144.

(j) New Revision of the Existing Maintenance or Inspection Program

Except as specified in paragraph (k) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2024–0035. Accomplishing the revision of the existing maintenance or inspection program required by this paragraph terminates the requirements of paragraph (g) of this AD.

(k) Exceptions to EASA AD 2024–0035

(1) This AD does not adopt the requirements specified in paragraphs (1) and (2) of EASA AD 2024–0035.

(2) Paragraph (3) of EASA AD 2024–0035 specifies revising ''the approved AMP,'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2024–0035 is at the applicable ''limitations'' and ''associated thresholds'' as incorporated by the requirements of paragraph (3) of EASA AD 2024–0035, or within 90 days after the effective date of this AD, whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraphs (4) and (5) of EASA AD 2024–0035.

(5) This AD does not adopt the ''Remarks'' section of EASA AD 2024–0035.

(l) New Provisions for Alternative Actions and Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (j) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2024–0035.

(m) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (n) of this AD. Information may be

emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Dassault Aviation's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(n) Additional Information

For more information about this AD, contact Tom Rodriguez, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone: 206–231–3226; email: *tom.rodriguez@faa.gov.*

(o) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on [DATE 35 DAYS AFTER PUBLICATION OF THE FINAL RULE].

(i) European Union Aviation Safety Agency (EASA) AD 2024–0035, dated January 31, 2024.

(ii) [Reserved]

(4) The following service information was approved for IBR on March 17, 2023 (88 FR 8740, February 10, 2023).

(i) European Union Aviation Safety Agency (EASA) AD 2022–0144, dated July 11, 2022.

(ii) [Reserved]

(5) For EASA AD 2024–0035 and EASA AD 2022–0144, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu.* You may find these EASA ADs on the EASA website at *ad.easa.europa.eu.*

(6) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th Street, Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(7) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations,* or email *fr.inspection@nara.gov.*

Issued on April 17, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2024–0948; Airspace Docket No. 24–ASW–9]

RIN 2120–AA66

Amendment of Class E Airspace; Dallas-Fort Worth, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend the Class E airspace at Dallas-Fort Worth, TX. The FAA is proposing this action as the result of an airspace review conducted due to the amendment of the instrument procedures at Bourland Field, Fort Worth, TX—contained within the Dallas-Fort Worth, TX, Class E airspace legal description. This action will bring the airspace into compliance with FAA orders to support instrument flight rule (IFR) procedures.

DATES: Comments must be received on or before June 7, 2024.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–0948 and Airspace Docket No. 24–ASW–9 using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instruction for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11H, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/.* You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Jeffrey Claypool, Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222–5711.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the Class E airspace extending upward from 700 feet above the surface at Bourland Field, Fort Worth, TX—contained within the Dallas-Fort Worth, TX, airspace legal description—to support IFR operations at these airports.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA

will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov* as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at *www.dot.gov/privacy.*

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by modifying the Class E airspace extending upward from 700 feet above the surface to within a 6.9-mile (increased from a 6.5-mile) radius of Bourland Field, Fort Worth, TX.

This action is the result of an airspace review conducted due to the amendment of the instrument procedures at Bourland Field to supports the IFR operations at this airport.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

BILLING CODE 4910–13–P

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Parts 1112, 1130, and 1242

[Docket No. CPSC–2023–0037]

Notice of Availability and Request for Comments: Data Regarding Incidents Associated With Nursing Pillows

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule; availability of supplemental information; request for comment.

SUMMARY: The U.S. Consumer Product Safety Commission (Commission or CPSC) published a notice of proposed rulemaking (NPR) in September 2023 to address the risk of death and injury associated with infant suffocations, entrapments, falls, and other hazards associated with nursing pillows. CPSC is announcing the availability of, and seeking comment on, details about incident data relevant to the rulemaking that are associated with infants and the use of nursing pillows. The Commission is also seeking comments on how a final rule should address nursing pillow covers.

DATES: Submit comments by May 23, 2024.

ADDRESSES: Submit comments, identified by Docket No. CPSC–2023–0037, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: *https://www.regulations.gov.* Follow the instructions for submitting comments. CPSC does not accept comments submitted by email, except as described below. CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal.

Mail/Hand Delivery/Courier Written Submissions: Submit comments by mail/hand delivery/courier to: Office of the Secretary, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone: (301) 504–7479. If you wish to submit confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public, you may submit such comments by mail, hand delivery, or courier, or you may email them to: *cpsc-os@cpsc.gov.*

Instructions: All submissions must include the agency name and docket number for this notice. CPSC may post all comments without change, including any personal identifiers, contact information, or other personal information provided, to: *https://www.regulations.gov.* Do not submit electronically: confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. If you wish to submit such information, please submit it according to the instructions for mail/hand delivery/courier written submissions.

Docket: To read background documents or comments regarding this proposed rulemaking, go to: *https://www.regulations.gov,* insert Docket No. CPSC–2023–0037 in the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Timothy Smith, Project Manager, Directorate for Engineering Sciences, U.S. Consumer Product Safety Commission, 5 Research Place, Rockville, MD 20850; email: *tsmith@cpsc.gov;* telephone: (301) 987–2557.

SUPPLEMENTARY INFORMATION: Section 104 of the Consumer Product Safety Improvement Act of 2008 (CPSIA) requires the Commission to promulgate consumer product safety standards for durable infant or toddler products. Under this statutory direction, in September 2023, the Commission published an NPR, Safety Standard for Nursing Pillows, to reduce the risk of death and injury associated with nursing pillows. 88 FR 65865 (Sept. 26, 2023).

A nursing pillow is any product intended, marketed, or designed to position and support an infant close to a caregiver's body while breastfeeding or bottle feeding. These products rest upon, wrap around, or are worn by a caregiver in a seated or reclined position. The Commission is considering how slipcovers (*i.e.,* removable nursing pillow covers) should be regulated as part of nursing pillows. For instance, should the definition of ''nursing pillow'' specifically state that a slipcover sold as part of the nursing pillow is included within definition of a nursing pillow? Additionally, slipcovers sold with the nursing pillows can consist of those that are only intended to fit over the nursing pillow to change its look, or it can contain buckles or straps needed to attach or wear the nursing pillow. Should the Commission distinguish between slipcovers that do or do not contain functional attachments such as buckles and straps? Manufacturers of nursing pillows often sell replacement slipcovers. Should these replacement slipcovers, sold by the original manufacturer of the nursing pillow, be included within the definition of ''nursing pillow''? The Commission invites public comments answering these questions and discussing how slipcovers should be regulated in the final rule.

In addition, the Commission is now making available incident reports underlying the data discussed in the NPR.[1] These reports have been redacted to protect personal information, confidential medical information, and other information protected from disclosure by section 6 of the CPSA. 15 U.S.C. 2055.

The NPR contains information about incidents from two databases: the Consumer Product Safety Risk Management System (CPSRMS)[2] and the National Electronic Injury Surveillance System (NEISS).[3] Staff

[1] The Commission voted 5–0 on April 16, 2024, to publish this document. Commissioners Feldman and Dziak voted to take other action to change the comment period from 30 to 60 days, if a majority supported the change, and if a majority did not support the change, to approve a 30-day comment period. No other Commissioner voted to change the 30-day comment period, so the comment period remains 30 days.

[2] CPSRMS includes data primarily from three groups of sources: incident reports, death certificates, and in-depth follow-up investigation reports. A large portion of CPSRMS data consists of incident reports from consumer complaints, media reports, medical examiner or coroner reports, retailer or manufacturer reports (incident reports received from a retailer or manufacturer involving a product they sell or make), safety advocacy groups, law firms, and federal, state, or local authorities, among others. It also contains death certificates that CPSC purchases from all 50 states, based on selected external cause of death codes (ICD–10). The third major component of CPSRMS is the collection of in-depth follow-up investigation reports. Based on the incident reports, death certificates, or NEISS injury reports, CPSC field staff conduct IDIs (on-site, via telephone, or online) of incidents, deaths, and injuries, which are then stored in CPSRMS.

[3] NEISS is the source of the injury estimates; it is a statistically valid injury surveillance system.

searched these databases for fatalities and incidents associated with nursing pillows and involving infants up to 12 months old (where the age was known), reported to have occurred between January 1, 2010, and December 31, 2022. For this timeframe, staff identified 154 fatal and 34 nonfatal incidents reported to CPSC. The NPR included information about the hazard patterns of fatal and nonfatal incidents, such as infants' ages, hazard scenarios, nursing pillow/infant placement, and product-specific concerns.

Relevant data from CPSRMS include incident reports from medical examiners, consumers, death certificates, and manufacturers. Some of the incident data are obtained from 124 in-depth investigations (IDIs) conducted by CPSC. Among these IDIs, 122 involved fatal incidents, and two involved nonfatal incidents. Other incident data was reported by firms to CPSC under section 15(b) of the CPSA, 15 U.S.C. 2064(b), which included 13 non-fatal incidents. CPSC also relied on incidents received from the public and state and local government agencies as well as medical examiner/coroner reports, which included 24 fatal incidents and one nonfatal incident. In addition, the data includes information obtained from eight death certificates.

Data from NEISS contain incidents and injuries treated in U.S. hospital emergency departments. CPSC staff performed multiple searches consisting of a combination of product codes and narrative keyword searches to find nursing pillow incidents in NEISS. The first data search included all reports with the product code that includes nursing pillows (code 4050 Pillows excl. water pillows). The second data search looked for specific keywords [4] in the narrative field across all product codes. Subsequent searches included several infant-related product codes [5] and searches in the narrative field for keywords related to known manufacturer names.[6] Staff then analyzed the results and determined that an event was in-scope if the product involved was identified as a nursing pillow that played a contributing role in the incident. Staff also included events as in-scope only if the infant was up to 12 months of age, or age was unknown but the incident likely involved an infant based on the description of the incident. The data were extracted in January 2023. The Commission relied on 18 records of nonfatal incidents from NEISS, associated with nursing pillows, all involving injuries resulting from falls.

The Commission invites comments on the incident data and analysis of this data in the NPR. CPSC is making available for review and comment the incident reports relied upon and discussed in the NPR, to the extent allowed by applicable law, along with the associated IDIs. To obtain access to the data, submit a request to: *https://forms.office.com/g/jrUSbYnWGx.* You will then receive a website link to access the data for this rulemaking at the email address you provide. Information on how to submit comments and contact information for CPSC's Office of the Secretary are in the **ADDRESSES** section of this notice.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

[FR Doc. 2024–08606 Filed 4–22–24; 8:45 am]

BILLING CODE 6355–01–P

NEISS injury data are gathered from emergency departments of about 100 hospitals, with 24-hour emergency departments and at least six beds, selected as a probability sample of all U.S. hospitals. The surveillance data gathered from the sample hospitals enable CPSC to make timely national estimates of the number of injuries associated with specific consumer products.

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Parts 1112, 1130, and 1243

[Docket No. CPSC–2023–0047]

Notice of Availability and Request for Comment: Data Regarding Incidents Associated With Infant Support Cushions

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule; availability of supplemental information; request for comment.

SUMMARY: The U.S. Consumer Product Safety Commission (Commission or CPSC) published a notice of proposed rulemaking (NPR) in January 2024 regarding a rulemaking to address suffocation, entrapment, fall, and other hazards associated with infant support cushions. CPSC is announcing the availability of, and seeking comment on, details about incident data relevant to the rulemaking that are associated with infants and the use of infant support cushions.

DATES: Submit comments by May 23, 2024.

ADDRESSES: Submit comments, identified by Docket No. CPSC–2023–0047, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: *https://www.regulations.gov.* Follow the instructions for submitting comments. CPSC does not accept comments submitted by email, except as described below. CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal.

Mail/Hand Delivery/Courier Written Submissions: Submit comments by mail/hand delivery/courier to: Office of the Secretary, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone: (301) 504–7479. If you wish to submit confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public, you may submit such comments by mail, hand delivery, or courier, or you may email them to *cpsc-os@cpsc.gov.*

Instructions: All submissions must include the agency name and docket number for this notice. CPSC may post all comments without change, including any personal identifiers, contact information, or other personal information provided, to: *https://www.regulations.gov.* Do not submit electronically: confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. If you wish to submit such information, please submit it according to the instructions for mail/hand delivery/courier written submissions.

Docket: To read background documents or comments regarding this proposed rulemaking, go to: *https://www.regulations.gov,* insert Docket No. CPSC–2023–0047 in the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Ashley Johnson, Project Manager, Directorate for Health Sciences, U.S.

Consumer Product Safety Commission, 5 Research Place, Rockville, MD 20850; telephone: (301) 504–7872 email: *aajohnson@cpsc.gov.*

SUPPLEMENTARY INFORMATION: Section 104 of the Consumer Product Safety Improvement Act of 2008 (CPSIA) requires the Commission to promulgate consumer product safety standards for durable infant or toddler products. Under this statutory direction, in January 2024 the Commission published an NPR, Safety Standard for Infant Support Cushions, to reduce the risk of death and injury associated with infant support cushions. 89 FR 2530 (Jan. 16, 2024).

An infant support cushion is defined in the NPR as ''an infant product that is filled with or comprised of resilient material such as foam, fibrous batting, or granular material or with a gel, liquid, or gas, and which is marketed, designed, or intended to support an infant's weight or any portion of an infant while reclining or in a supine, prone, or recumbent position.'' 89 FR 2544. This definition includes infant pillows, infant loungers, nursing pillows with a lounging function, infant props or cushions used to support an infant for activities such as ''tummy time,'' and other similar products. 89 FR 2530.

The Commission is now making available incident reports underlying the data discussed in the NPR, as described below.[1] These reports have been redacted to protect personal information, confidential medical information, and other information protected from disclosure by section 6 of the Consumer Product Safety Act. 15 U.S.C. 2055.

The NPR discussed information about incidents from two databases: the Consumer Product Safety Risk Management System (CPSRMS) [2] and the National Electronic Injury Surveillance System (NEISS).[3] CPSC staff searched these databases for fatalities, incidents, and concerns associated with infant support cushions and involving infants up to 12 months old, reported to have occurred between January 1, 2010, and December 31, 2022. The data for this timeframe pertained to at least 79 fatal and 124 nonfatal incidents reported to CPSC.[4] The NPR included information about the hazard patterns of fatal and nonfatal incidents such as infants' ages, hazard scenarios, infant support cushion/infant placement, and product-specific concerns. 89 FR 2532–34.

Relevant data from CPSRMS include incident reports from medical examiners, consumers, death certificates, and manufacturers. Some of the incident data relied on for the rulemaking were obtained from 83 in-depth investigations (IDIs) conducted by CPSC. Among these IDIs, 73 were fatal incidents and 10 were nonfatal incidents. The Commission also obtained information from reports submitted by consumers, medical examiners, and the Food and Drug Administration concerning five other fatal incidents and 58 nonfatal incidents involving falls (29 incidents), threatened asphyxiation (26 incidents), and one incident report each of limb entrapment, choking and near strangulation. 89 FR 2533.[5] Incident data has been redacted for personally identifiable information or confidential information, as required by law and any applicable confidentiality agreements.

The Commission also relied on data from NEISS that contains incidents and injuries treated in U.S. hospital emergency departments. One of these incidents resulted in a fatality. The Commission relied on 26 NEISS records associated with infant support cushions, as summarized in a spreadsheet of these NEISS incidents.

The Commission invites comments on the incident data and analysis of this data in the NPR. CPSC is making available for review and comment the incident reports relied upon and discussed in the NPR, to the extent allowed by applicable law, along with the associated IDIs. To obtain access to the data, submit a request to: *https://forms.office.com/g/AJ1JCDNuKD.* You will then receive a website link to access the data for this rulemaking at the email address you provide. Information on how to submit comments and contact information for CPSC's Office of the Secretary are in the **ADDRESSES** section of this notice.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

[FR Doc. 2024–08605 Filed 4–22–24; 8:45 am]

BILLING CODE 6355–01–P

[1] The Commission voted 5–0 on April 16, 2024, to publish this document. Commissioners Feldman and Dziak voted to take other action to change the comment period from 30 to 60 days, if a majority supported the change, and if a majority did not support the change, to approve a 30-day comment period. No other Commissioner voted to change the 30-day comment period, so the comment period remains 30 days.

[2] CPSRMS includes data primarily from three groups of sources: incident reports, death certificates, and in-depth follow-up investigation reports. A large portion of CPSRMS data consists of incident reports from consumer complaints, media reports, medical examiner or coroner reports, retailer or manufacturer reports (incident reports received from a retailer or manufacturer involving a product they sell or make), safety advocacy groups, law firms, and federal, state, or local authorities, among others. It also contains death certificates that CPSC purchases from all 50 states, based on selected external cause of death codes (ICD–10). The third major component of CPSRMS is the collection of in-depth follow-up investigation reports. Based on the incident reports, death certificates, or NEISS injury reports, CPSC Field staff conduct IDIs (on-site, via telephone, or online) of incidents, deaths, and injuries, which are then stored in CPSRMS.

[3] NEISS is the source of the injury estimates; it is a statistically valid injury surveillance system. NEISS injury data are gathered from emergency departments of about 100 hospitals, with 24-hour emergency departments and at least six beds, selected as a probability sample of all U.S. hospitals. The surveillance data gathered from the sample hospitals enable CPSC staff to make timely national estimates of the number of injuries associated with specific consumer products.

[4] The NPR listed 125 nonfatal incidents, but one of those incidents was a duplicate.

[5] As stated above, one incident reported in the NPR (a threatened asphyxiation) has been removed as a duplicate.

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 246

[Docket ID: DOD–2023–OS–0058]

RIN 0790–AL63

Stars and Stripes Media Organization

AGENCY: Assistant to the Secretary of Defense for Public Affairs, Department of Defense (DoD).

ACTION: Proposed rule.

SUMMARY: This rulemaking proposes to update authorities and responsibilities for the Stars and Stripes Media Organization (often abbreviated as Stripes) to reaffirm its editorial independence in providing media products not only to military service members and DoD civilian employees, but to U.S. veterans, families of veterans and current service members, and contractor personnel, particularly those serving overseas, based on changes in the consumption of news and information in a digital age. It additionally proposes to remove internal operational procedures of the Stars and Stripes Media Organization that do not require rulemaking under the Administrative Procedure Act.

DATES: Comments must be received by June 24, 2024.

ADDRESSES: You may submit comments, identified by docket number and/or Regulation Identifier Number (RIN) number and title, by any of the following methods:

- *Federal Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

• *Mail:* Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, 4800 Mark Center Drive, Mailbox #24, Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name and docket number or RIN for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Kyle Combs, 703–695–6290.

SUPPLEMENTARY INFORMATION:

I. Background

A. Statement of Need for This Rulemaking

This rulemaking update will clarify and reaffirm Stripes' authorities and responsibilities as the only DoD-authorized organization to provide First Amendment-type reporting and editorially independent media products for the benefit of the U.S. military community, including veterans, families of veterans and current service members, and contractor personnel, as well as current service members and DoD civilian employees, and remove those elements from the CFR that do not require rulemaking because they constitute internal management procedures. This update will also reflect the shift of Stripes from a print-first to digital-first media organization, as consumption of information has evolved in a digital age and media competition has increased. Stripes provides a reliable source of commercially available U.S. and world news and original news stories developed through first-hand reporting by Stripes staff from bases around the world that is accurate, fair, impartial, credible, and editorially independent of the military chain of command and military public affairs activities. By keeping its audience informed, Stripes provides news of interest to the U.S. military community that enables them to exercise their responsibilities of citizenship.

This rulemaking reaffirms Stripes operating as a nonappropriated fund instrumentality, a government entity established for military morale, welfare, and recreation of the U.S. military community that may both generate revenue and receive appropriated fund support consistent with its mission and applicable policy. Stripes is to be funded to the maximum extent possible through the sale and distribution of the newspapers, other products, authorized advertising, and other sources of revenue, as approved by the DoD and the Congress.

This rulemaking also reaffirms the Stripes Ombudsman position and purpose, in accordance with the Fiscal Years 1990–91 National Defense Authorization Act House Committee on Armed Services Report, which requested the establishment of the Ombudsman position and that the Ombudsman report to the DoD and annually to the House Armed Services Committee on the state of the free flow of information to the Armed Forces via Stripes. The ombudsman position defends the independence of Stripes on behalf of its readers by ensuring that the Stripes newsroom is free from command interference or censorship. The position ensures that the newsroom upholds accuracy, fairness, and independence.

B. Legal Authority

Section 113 of Title 10, U.S.C., provides the Secretary of Defense, subject to the direction of the President, authority, direction, and control over the DoD. 10 U.S.C. 191 and 192 provide authority to the Secretary of Defense to establish Defense Agencies and Field Activities to provide common services to the Military Departments and provide for their supervision when such action would be more effective, economical, or efficient. The Defense Media Activity is presently the Defense Field Activity to which Stripes belongs. Stripes is a DoD organization providing First Amendment-type reporting that allows for a free flow of news information so that service members in all Military Departments and Services may stay informed of current events and issues to support exercise of their responsibilities of citizenship, especially where commercial news sources have limited incentives to report or distribute. Funded partly with appropriated funds and partly with nonappropriated funds, Stripes operates as a nonappropriated fund instrumentality and supports the morale, welfare, and readiness of the U.S. military community by providing a reliable source of accurate, fair impartial, and credible news to its audience, consistent with 10 U.S.C. 136, Under Secretary of Defense for Personnel and Readiness, and DoD Instructions 1015.08, ''DoD Civilian Employee Morale, Welfare, and Recreation (MWR) Activities and Supporting Nonappropriated Fund Instrumentalities (NAFI)'' (available at *https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodi/101508p.pdf*); 1015.10, ''Military Morale, Welfare, and Recreation (MWR) Programs'' (available at *https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodi/101510p.pdf?ver=2019-04-08-125319-650*), and 1015.15, ''Establishment, Management, and Control of Nonappropriated Fund Instrumentalities and Financial Management of Supporting Resources'' (available at *https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodi/101515p.pdf?ver=2019-04-08-125317-820*).

C. Regulatory History

This regulation, 32 CFR part 246, was previously published in the **Federal Register** (59 FR 19137) on April 22, 1994, and included DoD policy and internal procedures concerning the Stars and Stripes newspapers and business operations at the time. Since 1994, the regulation has had minor administrative updates, but does not presently reflect the changes in consumption of news and information in a digital age.

DoD is now proposing revising this regulation to reflect current policies concerning those portions of the Stripes mission discussed in this preamble. This revision also removes information that is not necessary for inclusion in the CFR, consistent with the Administrative Procedure Act. Internal policies and procedures will remain in DoD Directive (DoDD) 5122.11, ''Stars and Stripes (S&S) Newspapers and Business Operations (available at *https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodd/512211p.pdf*).

II. Impact of This Regulation

The updates to this rule are administrative in nature with no requirements of the public; therefore, the costs are nominal. Stripes content is to be provided at reasonable cost to the U.S. military community, comparable to the retail sales price of similar commercial newspapers throughout the United States, to ensure greatest access for its audience. Some advertiser-supported information is distributed to all readers at no cost. Stripes partially funds its mission in support of DoD through revenue-generating activities as a nonappropriated fund instrumentality. Stripes is also authorized appropriated funding, but Stripes is to be funded to the maximum extent possible through the sale and distribution of the newspapers, other products, authorized advertising, and other sources of revenue, as approved by the DoD and the Congress.

III. Regulatory Compliance Analysis

A. Executive Order 12866, ''Regulatory Planning and Review'' and Executive Order 13563, ''Improving Regulation and Regulatory Review''

These Executive Orders direct agencies to assess all costs, benefits and available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, safety effects, distributive impacts, and equity). These Executive Orders emphasize the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been designated not significant, under section 3(f) of Executive Order 12866, as amended by Executive Order 14094. This rule revision highlights areas of public interest regarding Stripes' editorial independence, but it removes internal procedures that do not have external burden or implications. This rule does not have direct economic, environmental, public health, safety, distributive, or equity impacts.

B. Congressional Review Act (5 U.S.C. 801 et seq.)

Pursuant to the Congressional Review Act, this rule has not been designated a major rule, as defined by 5 U.S.C. 804(2). This rule does not have an annual effect on the economy of $100,000,000 or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export market.

C. Public Law 96–354, ''Regulatory Flexibility Act'' (5 U.S.C. 601 et seq.)

The Assistant to the Secretary of Defense for Public Affairs certified that this rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because the rule only addresses the operations of Stripes, and it would not, if promulgated, have a significant economic impact on a substantial number of small entities. Therefore, the Regulatory Flexibility Act, as amended, does not require us to prepare a regulatory flexibility analysis.

D. Sec. 202, Public Law 104–4, ''Unfunded Mandates Reform Act''

Section 202 of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1532) requires agencies to assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. This rule will not mandate any requirements for state, local, or tribal governments, and will not affect private sector costs.

E. Public Law 96–511, ''Paperwork Reduction Act'' (44 U.S.C. Chapter 35)

It has been determined that this rule does not impose reporting or recordkeeping requirements under the Paperwork Reduction Act of 1995.

F. Executive Order 13132, ''Federalism''

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a rule that has Federalism implications, imposes substantial direct requirement costs on State and local governments, and is not required by statute, or has Federalism implications and preempts State law. This rule will not have a substantial effect on State and local governments.

G. Executive Order 13175, ''Consultation and Coordination With Indian Tribal Governments''

Executive Order 13175 establishes certain requirements that an agency must meet when it promulgates a proposed rule that imposes substantial direct compliance costs on one or more Indian tribes, preempts tribal law, or affects the distribution of power and responsibilities between the Federal government and Indian tribes. This rule will not have a substantial effect on Indian tribal governments.

List of Subjects in 32 CFR Part 246, Government publications, Newspapers, and magazines.

■ Accordingly, 32 CFR part 246 is proposed to be revised to read as follows:

PART 246—STARS AND STRIPES MEDIA ORGANIZATION

Sec.

Authority: 10 U.S.C. 113, 136, 191–192.

§ 246.1 Purpose.

This part clarifies and reaffirms the Stars and Stripes (Stripes) Media Organization authorities and responsibilities to provide editorially independent media products and services.

§ 246.2 Definitions.

These terms and their definitions are for the purposes of this part.

(a) *Stars and Stripes Media Organization.* Stripes Media Organization is a DoD-authorized, multi-platform, global source of independent news and information organization serving the U.S. military community, especially overseas. It provides a reliable source of commercially available U.S. and world news and original news stories developed through first-hand reporting by Stripes' staff from bases around the world that is objective, credible, and editorially independent of the military chain of command and military public affairs activities. Stripes also covers news of local or host-country conditions relevant to the U.S. military community and other content of interest to their readership that generally receives only limited coverage, if any, from commercial sources.

(b) *Stripes media products and services.* Stripes media products and services are unofficial DoD multimedia products and services that provide current U.S. and world news, opinion, and other content of general interest to members of the U.S. military community. Products and services are provided to enhance morale, military readiness, and awareness of matters of particular interest to them as members of the U.S. military community, maintain their connection to American society, and assist them in continued exercise of their rights and obligations of citizenship.

(c) *Stripes Ombudsman.* The Stripes Ombudsman is a highly qualified independent news media professional hired from outside of the DoD to serve a three-year term. The Stripes Ombudsman independently advises the Stripes Publisher and senior editorial leaders, DoD leadership and congressional oversight authorities on matters relating to audience interests, journalistic practices, editorial interference, news management, or censorship.

(d) *Stripes Publisher.* The senior position in the Stripes Media Organization. This civilian government employee is a highly qualified independent news media professional who manages and controls the day-to-day business and financial, operational, and administrative activities, and provides editorial oversight of Stripes.

§ 246.3 Policy.

It is DoD policy that:

(a) The Stars and Stripes Media Organization publishes accurate, fair, impartial, and credible news and

information for the benefit and specific interest to the U.S. military community, especially those serving overseas, including DoD civilian and military personnel, contractor personnel, veterans, and their families.

(b) Stripes' content is to be provided at reasonable cost to the U.S. military community, comparable to the retail sales price of similar commercial news and information content throughout the United States, to ensure the greatest access for its audience.

(c) Stripes' editorial operations are independent of the military chain of command, military public affairs activities, or other external influences, and without censorship, inappropriate news management, or propaganda, but they fully comply with the policies and procedures that prevent the disclosure of information that is classified national security information or controlled unclassified information, would adversely affect national security, or clearly endanger the lives of U.S. personnel in accordance with the DoD authorities in paragraphs (a) through (e) of appendix A of this part and applicable laws, regulations, and Government-wide policies.

(d) Stripes' editorial policies and practices will be in keeping with journalistic standards of U.S. commercial news organizations of the highest quality, such as the Code of Ethics of the Society of Professional Journalists (available at *http://www.spj.org/ethicscode.asp*).

(e) Stripes' products and services may not advance a specific editorial position, point of view or particular interest, but will present a wide range of news and views, including coverage of U.S. political campaigns in an impartial, objective, and nonpartisan manner that does not imply endorsement of any candidate or political party.

(f) Stripes' products and services are unofficial and do not reflect the official views of, or endorsement by, the U.S. Government, the DoD, or subordinate command authorities.

(g) Stripes' reporters and editorial staff are DoD personnel authorized to gather and report news, good and bad, about the DoD and the U.S. military community. They may ask questions of DoD officials, gain help, have access, and attend gatherings or events available to reporters from the commercial media. Stripes reporters with access to DoD installations (because of their status as DoD personnel) may cover events or activities open to those with installation access even though commercial media may not have the same unescorted access; information published about or resulting from such events or activities is still subject to the requirements of paragraph (c) of this section.

(h) Although newsgathering is investigative by nature, Stripes is not an authorized investigative agency, such as a military criminal investigative organization, other DoD investigative body, or an office of Inspector General, and does not conduct official investigations on behalf of DoD. It may, however, report on such official DoD investigations, as well as investigations by outside organizations or commercial media in the public domain (*i.e.,* engage in investigative reporting).

(i) As DoD employees, the Stripes' news staff members must adhere to the DoD personnel policies that may not usually apply to journalists employed by commercial newspapers, including 5 CFR parts 2635 and 3601 and paragraphs (f) and (g) of appendix A of this part, as applicable, and all other applicable DoD policies and Federal laws and regulations as well as any applicable Status of Forces Agreements.

(j) Stripes partially funds its mission in support of DoD through revenue-generating activities as a nonappropriated fund instrumentality, a government entity established for morale, welfare, and recreation that may generate revenue and minimize the need for congressionally appropriated fund support. Stripes is to be funded to the maximum extent possible through the sale and distribution of news and information products, authorized advertising, printing services, and other sources of revenue, as approved by the DoD or Congress. While Stripes is authorized nonappropriated and appropriated funding, appropriated fund support is to be kept to a minimum level consistent with its mission but at levels provided for in paragraph (h) of appendix A of this part. Stripes also may be authorized appropriated funding for news and information production and free distribution to support members of the U.S military community deployed during armed conflict, exercises, or in contingency environments.

Appendix A to Part 246—Related Policies

The Stars and Stripes Media Organization is supported by the following policies:

(a) DoD Instruction 5200.01, ''DoD Information Security Program and Protection of Sensitive Compartmented Information (SCI)'' (available at *https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodi/520001p.PDF*).

(b) DoD Instruction 5200.48, ''Controlled Unclassified Information (CUI)'' (available at *https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodi/520048p.PDF*).

(c) DoD Manual 5200.01, Volume 1, ''DoD Information Security Program: Overview, Classification, and Declassification'' (available at *https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodm/520001m_vol1.pdf*).

(d) DoD Manual 5200.01, Volume 2, ''DoD Information Security Program: Marking of Information'' (available at *https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodm/520001m_vol2.pdf*).

(e) DoD Manual 5200.01, Volume 3, ''DoD Information Security Program: Protection of Classified Information'' (available at *https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodm/520001m_vol3.pdf*).

(f) DoD Directive 5500.07, ''Standards of Conduct'' (available at *https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodd/550007p.pdf*).

Coast Guard

33 CFR Part 110

[Docket Number USCG–2023–0868]

RIN 1625–AA01

Anchorage Regulations; Los Angeles and Long Beach Harbors, California

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to amend the regulations for Los Angeles and Long Beach Harbors. This action would amend Anchorages F and G, and update anchorage usage and communication requirements. The purpose of this proposed rule is to improve navigation safety by modifying Anchorage F and G to accommodate an increased volume of vessel traffic and larger vessels calling on the Ports of Los Angeles and Long Beach and alleviate vessels anchoring near a subsea pipeline. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before July 22, 2024.

ADDRESSES: You may submit comments identified by docket number USCG–2023–0868 using the Federal Decision Making Portal at *https://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments. This notice of proposed rulemaking with its plain-language, 100-word-or-less proposed rule summary will be available in this same docket.

FOR FURTHER INFORMATION CONTACT: For information about this document call or email Rubymar Sebastian-Echevarria at D11 Waterways, Coast Guard; telephone (571) 613–2930 or (206) 820–5620, email *D11-DG-D11-Waterways@uscg.mil.*

SUPPLEMENTARY INFORMATION:

Table of Contents for Preamble

I. Public Participation and Request for Comments

The Coast Guard views public participation as essential to effective rulemaking and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments through the Federal Decision Making Portal at *https://www.regulations.gov.* To do so, go to *https://www.regulations.gov,* type USCG–2023–0868 in the search box and click ''Search.'' Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If you cannot submit your material by using *https://www.regulations.gov,* call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this proposed rule for alternate instructions.

Viewing material in docket. To view documents mentioned in this proposed rule as being available in the docket, find the docket as described in the previous paragraph, and then select ''Supporting & Related Material'' in the Document Type column. Public comments will also be placed in our online docket and can be viewed by following instructions on the *https://www.regulations.gov* Frequently Asked Questions web page. That FAQ page also explains how to subscribe for email alerts that will notify you when comments are posted or if a final rule is published. We review all comments received, but we will only post comments that address the topic of the proposed rule. We may choose not to post off-topic, inappropriate, or duplicate comments that we receive.

Personal information. We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the docket in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

Public meeting. We do not plan to hold a public meeting but we will consider doing so if we determine from public comments that a meeting would be helpful. We would issue a separate **Federal Register** notice to announce the date, time, and location of such a meeting.

§ Section
U.S.C. United States Code

III. Background, Purpose, and Legal Basis

The Coast Guard proposes to amend Anchorages F and G in Los Angeles and Long Beach Harbors to improve navigation safety and update anchorage usage and communication requirements. The legal basis and authorities for this notice of proposed rulemaking are found in 46 U.S.C. 70006, 33 CFR 109.05, 33 CFR 1.05–1, and DHS Delegation No. 00170.1 Revision 01.3, which collectively authorize the Coast Guard to propose, establish, and define regulatory anchorage grounds. Under Title 33 of the Code of Federal Regulation (CFR) § 109.05, U.S. Coast Guard District Commanders are delegated the authority to establish anchorage grounds by the Commandant of the U.S. Coast Guard. The Coast Guard established Anchorage Grounds under Title 33 CFR CGFR 67–46, 32 FR 17728, Dec. 12, 1967, as amended by CGD11–04–005, 71 FR 15036, Mar. 27, 2006.

IV. Discussion of Proposed Rule

The Coast Guard proposes to amend the boundaries and anchorage requirements for Anchorages F and G in Los Angeles and Long Beach Harbors. Changes in global demand patterns and supply chain disruptions have contributed to port congestion and increased usage of Anchorages F and G. Due to economies of scale, vessels calling on the Ports of Los Angeles and Long Beach have increased in size and require more surface area for anchoring and maneuvering. Additionally, a subsea pipeline is located approximately less than one nautical mile from the anchorages. For these reasons, the Coast Guard proposes expanding the distance between anchorages and requiring vessels greater than 1600 gross tons to place their propulsion plants in standby and have a second anchor ready to let go when forecasted and/or observed wind speeds and gusts are 35 knots or greater. This proposed requirement is needed to prevent vessels from dragging anchor and to prevent harm to vessels, the port, and the environment. The proposed regulation would update port, pilot, and communication information to maintain proactive anchorage management.

The specific anchorage boundaries and amendments are described in detail in the proposed regulatory text at the end of the document.

V. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. A summary of our analyses based on these statutes or Executive orders follows.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This NPRM has not been designated a ''significant regulatory action'' under section 3(f) of Executive Order 12866, as amended by Executive Order 14094 (Modernizing Regulatory Review). Accordingly, the NPRM has not been

reviewed by the Office of Management and Budget (OMB).

This proposed regulatory action determination is based on the need to maintain navigation safety within the port by amending the boundaries of Anchorages F and G and updating anchorage usage and communication requirements. The proposed action would not negatively impact navigation. Vessels would still be able to maneuver in, around and through anchorages.

B. Small Entities

Under the Regulatory Flexibility Act, 5 U.S.C. 601–612, we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. While some owners or operators of vessels intending to transit the anchorage grounds may be small entities, for the reasons stated in section V.A. above, this proposed rule would not have a significant economic impact on any vessel owner or operator.

Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment to the docket at the address listed in the **ADDRESSES** section of this preamble. In your comment, explain why you think it qualifies and how and to what degree this proposed rule would economically affect it.

C. Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501–3520.

D. Federalism

A rule has implications for federalism under Executive Order 13132 (Federalism) if it has a substantial direct effect on States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under Executive Order 13132 and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132. Our analysis follows.

The legal basis and authorities for this notice of proposed rulemaking are found in 46 U.S.C. 70006, 33 CFR 109.05, 33 CFR 1.05–1, and DHS Delegation No. 00170.1, which collectively authorize the Coast Guard to propose, establish, and define regulatory anchorage grounds. Therefore, this proposed rule is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

E. Unfunded Mandates

The Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1531–1538, requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100 million (adjusted for inflation) or more in any one year. Although this proposed rule would not result in such an expenditure, we do discuss the potential effects of this proposed rule elsewhere in this preamble.

F. Taking of Private Property

This proposed rule would not cause a taking of private property or otherwise have taking implications under Executive Order 12630 (Governmental Actions and Interference with Constitutionally Protected Property Rights).

G. Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, (Civil Justice Reform), to minimize litigation, eliminate ambiguity, and reduce burden.

H. Protection of Children

We have analyzed this proposed rule under Executive Order 13045 (Protection of Children from Environmental Health Risks and Safety Risks). This proposed rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

I. Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments), because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for Indian Tribes, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

J. Energy Effects

We have analyzed this proposed rule under Executive Order 13211 (Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use). We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

K. Technical Standards

The National Technology Transfer and Advancement Act, codified as a note to 15 U.S.C. 272, directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through OMB, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (for example, specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

L. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves the amendment of anchorages. This proposed rule would be categorically excluded under paragraph L59(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A preliminary Record of Environmental Consideration

supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

M. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

List of Subjects in 33 CFR Part 110 Anchorage Grounds.

For the reasons discussed in the preamble, the Coast Guard is proposing to amend 33 CFR part 110 as follows:

PART 110—Anchorage Regulations

■ 1. The authority citation for part 110 is revised to read as follows:

Authority: 33 U.S.C. 2071, 46 U.S.C. 70006, 70034; 33 CFR 1.05–1; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Amend § 110.214, by revising and republishing paragraphs (a)(1)(i), (ii), (a)(2)(i)(B), (a)(3), (b)(6), (7), and (c)(2) to read as follows:

§ 110.214 Los Angeles and Long Beach harbors, California.

(a) * * *

(1) * * *

(i) Unless otherwise directed by the Captain of the Port Los Angeles—Long Beach, the Long Beach Port Pilots will assign all anchorages inside the federal breakwater. All anchorages outside (seaward) of the federal breakwater will be assigned by Vessel Traffic Service Los Angeles-Long Beach (VTS LA–LB). The master, pilot, or person in charge of a vessel must notify the Long Beach Pilots (for anchorages inside the federal breakwater) or VTS LA–LB (for anchorages outside the federal breakwater) of their intention to anchor, upon anchoring, and at least fifteen minutes prior to departing an anchorage. All anchorage assignments will be made as described in this part unless modified by the Captain of the Port.

(ii) Radio communications for port entities governing anchorages are as follows: VTS LA–LB, call sign ''San Pedro Traffic'', Channel 14 VHF–FM; Long Beach Port Pilots, call sign ''Long Beach Pilots'', Channel 12 VHF–FM.

* * * * *

(2) * * *

(i) * * *

(B) No vessel may anchor anywhere else within Los Angeles or Long Beach harbors (inside the federal breakwater) for more than 10 consecutive days unless extended anchorage permission is obtained from the Captain of the Port. In determining whether extended anchorage permission will be granted, consideration will be given, but not necessarily limited to: The current and anticipated demands for anchorage space within the harbor, the requested duration, the condition of the vessel, and the reason for the request.

* * * * *

(3) Other General Requirements.

(i) When at anchor, all commercial vessels greater than 1600 gross tons shall, at all times, have a licensed or credentialed deck officer on watch and maintain a continuous radio listening watch unless subject to one of the exemptions in this paragraph. The radio watch must be on CH–12 VHF–FM when anchored inside the federal breakwater, and on CH–14 VHF–FM when anchored outside the federal breakwater, except for unmanned barges; vessels which have less than 100 gallons of oil or fuel onboard regardless of how the fuel is carried; and other vessels receiving advance approval from the Captain of the Port.

(ii) When winds are forecasted and/or observed at 35 knots or greater (including wind gusts) vessels shall ensure their propulsion plant is placed in immediate standby and a second anchor, if installed, is made ready to let go. Vessels unable to comply with this requirement must immediately notify the Captain of the Port. In such case, the Captain of the Port may require additional precautionary measures, including but not limited to one or more tugs standing by to render immediate assistance.

* * * * *

(b) * * *

(6) Commercial Anchorage F (outside of Long Beach Breakwater). The waters southeast of the Long Beach Breakwater bounded by a line connecting the following coordinates:

	Latitude	Longitude
Beginning Point	33–43′ 6″ N	118–8′ 6″ W
Thence west to	33–43′ 6″ N	118–10′ 30″ W
Thence south/southeast to	33–42′ 12″ N	118–9′ 54″ W
Thence south/southeast to	33–40′ 54″ N	118–9′ 30″ W
Thence south/southeast to	33–38′ 36″ N	118–7′ 42″ W
Thence north/northeast to	33–40′ 42″ N	118–6′ 54″ W

And thence north/northwest to the beginning point.

(7) Commercial Anchorage G (outside of the Middle Breakwater). The waters south of the Middle Breakwater bounded by a line connecting the following coordinates:

	Latitude	Longitude
Beginning Point	33–43′ 6″ N	118–11′ 18″ W
Thence west to	33–43′ 6″ N	118–12′ 18″ W
Thence south/southwest to	33–42′ 24″ N	118–14′ 18″ W
Thence southeast to	33–40′ 48″ N	118–13′ 0″ W
Thence northeast	33–41′ 0″ N	118–12′ 18″ W
Thence east/northeast to	33–42′ 12″ N	118–11′ 36″ W

And thence north/northeast to the beginning point.

* * * * *

(c) * * *

(2) The geographic boundaries of each anchorage are contained in paragraph (b) of this section.

TABLE 110.214(c)

Anchorage	General location	Purpose	Specific regulations
A	Los Angeles Harbor	Commercial	Note a.
B	Long Beach Harbor	.....do	.....Do.
C	.....do	.....do	Notes a, g.
D	.....do	Commercial & Naval	Notes a, b, g.
E	.....do	Commercial	Note c.
F	Outside Breakwater	.....do	Notes c, d, g.
G	.....do	.....do	Notes c, d.
N	Los Angeles Harbor	Small Craft	Note e.
P	Long Beach Harbor	.....do	Note f.
Q	.....do	.....do	Notes c, g.

Notes:

a. Bunkering and lightering are permitted.

b. West of 118°–09′–48″ W priority for use of the anchorage will be given to commercial vessels over 244 meters (approximately 800 feet). East of 118°–09′–48″ W priority for use of the anchorage will be given to Naval and Public vessels, vessels under Department of Defense charter, and vessels requiring use of the explosives anchorage.

c. Bunkering and lightering are prohibited.

d. This anchorage is within a Regulated Navigation Area and additional requirements apply as set forth in 33 CFR 165.1109(E).

e. This anchorage is controlled by the Los Angeles Port Police. Anchoring, mooring and recreational boating activities conforming to applicable City of Los Angeles ordinances and regulations are allowed in this anchorage.

f. This anchorage is controlled by the Long Beach Harbor Master. Anchoring, mooring and recreational boating activities conforming to applicable City of Long Beach ordinances and regulations are allowed in this anchorage.

g. When the explosives anchorage is activated portions of this anchorage lie within the explosives anchorage and the requirements of *paragraph (d)* of this section apply.

* * * * *

Dated: April 16, 2024.

Andrew M. Sugimoto,

Rear Admiral, U.S. Coast Guard, Commander, Eleventh Coast Guard District.

[FR Doc. 2024–08636 Filed 4–22–24; 8:45 am]

BILLING CODE 9110–04–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[WC Docket No. 22–238; FCC 24–38; FR ID 214900]

Supporting Survivors of Domestic and Sexual Violence

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission (''Commission'') seeks comment on additional action it can take to help survivors of domestic violence access safe and affordable connectivity, particularly in the context of connected car services which may be used to stalk, harass, and revictimize survivors of domestic violence.

DATES: Interested parties may file comments on or before May 23, 2024, and reply comments on or before June 24, 2024. Written comments on the Paperwork Reduction Act proposed information collection requirements must be submitted by the public, the Office of Management and Budget (OMB), and other interested parties on or before June 24, 2024. Written comments on the Initial Regulatory Flexibility Analysis (IRFA) in this document must have a separate and distinct heading designating them as responses to the IRFA and must be submitted by the public on or before May 23, 2024.

ADDRESSES: You may submit comments, identified by WC Docket No. 22–238, by any of the following methods:

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: *https://www.fcc.gov/ecfs/.*
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing.

Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.
- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.
- Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. *See FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Filing,* Public Notice, 35 FCC Rcd 2788 (2020), *https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy*

People with Disabilities: To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), please send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530.

FOR FURTHER INFORMATION CONTACT: For further information on this proceeding, contact Thomas Hastings, *Thomas.Hastings@fcc.gov,* of the Wireless Telecommunications Bureau, Competition & Infrastructure Policy Division, (202) 418–1343. For additional information concerning the Paperwork Reduction Act proposed information requirements contained in this document, send an email to *PRA@fcc.gov* or contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Further Notice of Proposed Rulemaking (*FNPRM*), in WC Docket No. 22–238; FCC 24–38, adopted April 3, 2024, and released on April 8, 2024. The full text of the document is available for download at *https://docs.fcc.gov/public/attachments/FCC-24-38A1.pdf.*

Regulatory Flexibility Act: The Regulatory Flexibility Act of 1980, as amended (RFA), requires that an agency prepare a regulatory flexibility analysis for notice-and-comment rulemakings, unless the agency certifies that ''the rule will not, if promulgated, have a

significant economic impact on a substantial number of small entities.'' Accordingly, the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) concerning the possible impact of the rule and policy changes contained in this Notice of Proposed Rulemaking. Written public comments are requested on the IRFA. Comments must be by the deadlines for comments on this Notice of Proposed Rulemaking indicated in the **DATES** section of this document and must have a separate and distinct heading designating them as responses to the IRFA and must be filed in WC Docket No. 22–238.

Paperwork Reduction Act: This document contains proposed modified information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget (OMB) to comment on the information collection requirements contained in this document, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. If the Commission adopts any new or revised information collection requirements, the Commission will publish a notice in the **Federal Register** inviting the general public and the Office of Management and Budget to comment on the information collection requirements. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4), the Commission seeks specific comment on how it might further reduce the information collection burden for small business concerns with fewer than 25 employees.

Ex Parte Rules: This proceeding shall be treated as a ''permit-but-disclose'' proceeding in accordance with the Commission's *ex parte* rules. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda, or other filings in the proceeding, then the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with 47 CFR 1.1206(b). In proceedings governed by 47 CFR 1.49(f), or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding and must be filed in their native format (*e.g.,* .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

Providing Accountability Through Transparency Act: The Providing Accountability Through Transparency Act, Public Law 118–9, requires each agency, in providing notice of a rulemaking, to post online a brief plain-language summary of the proposed rule. The required summary of this Notice of Proposed Rulemaking is available at *https://www.fcc.gov/proposed-rulemakings.*

Synopsis

I. Introduction

1. In this *FNPRM,* the Commission seeks comment on additional action we can take to help survivors of domestic violence access safe and affordable connectivity, particularly in the context of connected car services. Modern vehicles are frequently equipped with a suite of connectivity tools and features, such as hands-free communication, real-time location, and other connectivity services. While these services provide benefits to drivers and passengers when used as intended, news reports suggest that these services have also been used to stalk, harass, and revictimize survivors of domestic violence.

2. We seek comment on solutions to help ensure that domestic violence survivors need not choose between access to personal transportation or exposing themselves to threatening, stalking, or other harmful behavior by those who can access the car's data and connectivity. We seek comment on the types, as well as the frequency of use, of connected car services in the marketplace today. In addition, we ask whether changes to the Commission's rules implementing the Safe Connections Act (SCA) are needed to address the impact of connected car services on domestic violence survivors. Safe Connections Act of 2022, Public Law 117–223, 116 Stat. 2280 (Safe Connections Act or SCA). In November 2023, the Commission adopted a Report and Order implementing the Safe Connections Act. Supporting Survivors of Domestic and Sexual Violence et al., WC Docket No. 22–238, Report and Order, FCC 23–96 (Nov. 16, 2023) (*SCA Report and Order*). We also ask more broadly what steps connected car service providers can proactively take to protect survivors from being stalked, harassed, intimidated, or otherwise revictimized through the misuse of connected car services.

II. Background

3. Domestic violence and abusive relationships are a significant safety and public health issue that result in individual harm and societal costs that extend beyond the survivor. Domestic violence affects more than 12 million people every year, and an average of 24 people per minute are subject to physical violence or stalking by an intimate partner. Almost half of all women and men in the United States have experienced psychological aggression by an intimate partner in their lifetime (48.4% and 48.8%, respectively). The effects of domestic violence disproportionately impact women. In addition, domestic violence disproportionately impacts people of color, LGBTQ+ individuals, and other individuals who identify with historically marginalized demographics. Estimates of economic costs due to domestic violence are vast and encompass disruptions to education and work, among other aspects.

4. *Safe Connections Act.* In recognition of the harmful and lasting impact that domestic violence and related crimes have on survivors, Congress passed the SCA in November of 2022. In particular, Congress recognized the reality that survivors seeking to escape their abusers are often tethered to their abusers by technology—such as shared mobile service—and that these lingering connections present unique challenges for survivors seeking to maintain essential connectivity while distancing themselves from their abusers. In the SCA, Congress found that ''perpetrators of violence and abuse . . . increasingly use technological and communications tools to exercise control over, monitor, and abuse their victims,'' and that ''[c]ommunications law can play a public interest role in the promotion of

safety, life, and property'' with respect to these types of violence and abuse. The SCA further found that ''[s]afeguards within communications services can serve a role in preventing abuse and narrowing the digital divide experienced by survivors of abuse.'' Congress, through the SCA, sought to ensure that survivors can separate from abusers without losing independent access to their mobile service plans. To further that objective, Congress directed the Commission to adopt rules to implement the protections established in the SCA for survivors of domestic violence.

5. *SCA Report and Order.* In November 2023, the Commission adopted the *SCA Report and Order* implementing the Commission's obligations under the SCA to help survivors of domestic violence and related crimes to separate service lines from accounts shared with their abusers, protect the privacy of calls made by survivors to domestic-violence hotlines, and support survivors suffering from financial hardship. The Commission defined key terms in the SCA, such as what constitutes a ''covered provider'' subject to the Commission's new rules. As noted in the *SCA Report and Order,* multi-line shared mobile service contracts present challenges for survivors of domestic violence who seek to maintain essential connectivity while also distancing themselves from their abuser, because the abuser may be an account holder and thus able to monitor the survivor's calls, text messages, and device location. In adopting rules implementing the SCA, the Commission recognized that it can be difficult for the survivor to separate their mobile service line from their abuser when the plan is shared with and controlled by the abuser.

6. *Concerns of Misuse of Connected Car Applications by Abusers.* Connected cars bring a myriad of benefits that can improve conditions for drivers, pedestrians, and motorists in general. These benefits include helping to locate a vehicle in a parking lot and connecting promptly with first responders in an emergency without a phone. These features typically require the car to have wireless connectivity and to create and share location data. However, when these data and connectivity are in the wrong hands, they may be used to harm a survivor in—or attempting to leave—an abusive relationship. Indeed, recent reports suggest that connected cars can be ''weaponized'' against survivors, especially when survivors co-own or share a car with an abuser. For instance, connected cars co-owned or leased by both the abuser and survivor may allow the abuser to track the survivor using the car's location-based services. One news report suggests that survivors may have only limited ability to remove an abuser from their vehicle's data services and that connected car manufacturers may hesitate to act or abstain from acting altogether when the abuser has an ownership interest in the connected car with the survivor.

7. *FCC Letters and Responses.* In response to this public policy concern and Congress' directive in the SCA, in January 2024, Chairwoman Rosenworcel sent a series of letters to wireless service providers and to auto manufacturers to seek information and ask for their help in protecting domestic violence survivors. The letters to the wireless providers asked about existing connected car services, treatment of geolocation data from these services, current compliance with the SCA, and whether (and if so, how) the companies provide connected car services to consumers who are not subscribers to the company's wireless services. The letters to the auto manufacturers asked the companies for details about the connected car services they offer, any existing plans to support survivors' efforts to disconnect from abusers, and how the manufacturers handle consumers' geolocation data.

8. In their responses, as discussed further below, the wireless service providers noted their shared concerns about safeguarding survivors of domestic violence and affirmed that they are taking steps to implement the SCA. The auto manufacturers provided an overview of the functions and privacy features of their connected car services.

III. Discussion

9. We seek comment generally on the ways that connected car services are used and steps the Commission can take to help protect survivors of domestic violence from misuse of such services. First, based on the responses to the information requests sent by the Chairwoman, we describe and seek comment on our understanding of wireless service providers' and auto manufacturers' connected car service offerings. We also seek additional information on any other connected car services that are available. Next, we seek comment on whether changes to the Commission's rules implementing the SCA are necessary to address the impact of connected car services on domestic violence survivors. Finally, we seek comment on other actions we can take to help protect survivors using connected car services. In that regard, we seek comment on other potential sources of authority for Commission action and on how to encourage connected car service providers to take proactive steps to protect survivors against misuse of these services.

10. *The Connected Car Services Available Today.* The responses to Chairwoman Rosenworcel's information requests show that wireless service providers and auto manufacturers currently provide a range of connected car services in the marketplace. We seek additional information about how these services are offered to consumers.

11. One method for offering connected car services is through a wireless service provider. The wireless service providers' responses to the Chairwoman's information requests suggest that their offerings generally consist either of (1) services offered directly to consumers or (2) wholesale connectivity services offered to auto manufacturers or to the manufacturer's contracted third-party telematics service provider. For services offered directly to consumers, wireless service providers may enter into an agreement with a subscriber to add a line with an associated phone number to their wireless service contract for the connected car service. Subscribers typically access these services using an app and, in some cases, a separate device that plugs into their vehicle's control panel. The direct-to-subscriber services offer a range of features such as roadside assistance, navigation, and notification of required vehicle maintenance. Wireless service provider responses to the information requests suggest that some of these services also include the ability to track the vehicle's location remotely. Some wireless service providers also offer in-vehicle Wi-Fi services to consumers. When wireless service providers offer wholesale connectivity services, the providers may not have a direct contractual relationship with individual vehicle owners or lessees. Rather, they may contract directly with auto manufacturers via wholesale agreements or with other third parties to provide connectivity for a fleet of vehicles. We seek comment on our understanding of the connected car services offered by wireless service providers, and we seek additional information on any other features and capabilities not covered in this paragraph.

12. With respect to auto manufacturers' connected car services, the responses suggest that, when purchasing service from an auto manufacturer, the owner or lessee of a car typically enters into a service agreement with the auto manufacturer

for connected car services. A car owner typically accesses connected services on their mobile device through a manufacturer-provided app. Many auto manufacturers obtain the network connectivity to power these services by entering into contracts to access the wireless networks of wireless service providers or other third parties. The connected car services provided by auto manufacturers include a range of features such as the ability to start the vehicle or control the vehicle's climate control system remotely. Some services also include the ability to track the vehicle's location remotely. We seek comment on our understanding of the connected car services offered by auto manufacturers, and we seek additional information on any other features and capabilities not covered in this paragraph.

13. It appears that consumers—including domestic violence survivors—have varying levels of control of the data that connected car services generate, including remote vehicle location data. Responses to the information requests suggest that while some of the wireless service providers and auto manufacturers enable a survivor to turn off remote location tracking if the survivor becomes aware of being tracked by an abuser, not all companies currently provide that ability. For some connected car services, it appears that only a vehicle owner or lessee may disable tracking features on the connected car app absent a court order or other legal process. Some of the responses to the information requests indicate that the provider's connected car service gives notice to a driver that the car's location is being tracked. Other responses do not indicate whether the service offers this function. The responses to the information requests further indicate that information collected through connected car services may be shared with third parties in accordance with connected car service agreements. We seek further information on whether and how users, including both owners or lessees and nonowners or lessees, control access to their data for connected car services that are available today and on what information users receive about the tracking features of these services. To what extent do auto manufacturers and wireless service providers enable—or plan to enable—access controls for data associated with connected car services for owners and lessees and other vehicle users?

14. *Application of the SCA and the FCC's Implementing Rules to Connected Car Services.* We seek comment on what, if any, changes to our rules implementing the SCA could help to address the impact of connected car services on domestic violence survivors. A ''shared mobile service contract'' is defined under the SCA rules to mean ''a mobile service contract for an account that includes not less than two lines of service and does not include enterprise services offered by a covered provider. ''Lines of service,'' under the SCA rules, are those ''associated with a telephone number'' and include ''all of the mobile services associated with that line under the shared mobile service contract, regardless of classification, including voice, text, and data services.'' The SCA Report and Order makes clear that a ''line'' can apply to devices, ''such as tablets with no mobile capability, which only nominally have a line associated with a customer account,'' noting, for example, that ''a survivor may want to separate a line for a device in order to protect his or her location information from an abuser with access to the shared mobile account information.''

15. Line separation requirements apply, under the SCA rules, to ''covered providers.'' ''Covered providers'' are defined as providers of ''a private mobile service or commercial mobile service, as those terms are defined in 47 U.S.C. 332(d).'' ''Covered provider'' includes providers of mobile broadband-only or mobile text service that do not also offer mobile voice service, if such provider assigns a telephone number to a device. ''Covered provider'' also includes facilities-based mobile network operators and resellers/mobile virtual network operators (MVNOs).

16. Where the defined elements in the Commission's SCA rules are present, the obligations associated with line separations apply. The FCC's rules implementing the SCA thus could apply to connected car services that involve a ''shared mobile service contract'' offered by a ''covered provider'' as defined under the rules and would require a provider to respond to a valid request for a line separation. We seek comment on this position and the extent to which the FCC's existing SCA rules do not fully address concerns regarding the impact of connected car services on domestic violence survivors and whether changes to these rules would enable the Commission to better address these concerns.

17. As stated above, the definition of ''covered provider'' under the SCA rules includes providers both of commercial mobile service and private mobile service and also includes facilities-based mobile network operators and resellers/MVNOs. In the context of connected cars, wireless providers offer services directly to consumers and may enter into an agreement with a subscriber to add a line to their mobile service contract for the connected car service. Wireless providers also provide wholesale service to auto manufacturers, which in turn provide connectivity for consumers as a value-added service. Auto manufacturers enter into service agreements with owners and lessees of vehicles to provide them connected car services using, in many cases, the connectivity from the networks of wireless service providers. We view the broad scope of the ''covered provider'' definition as potentially including the connected car services that wireless service providers offer directly to consumers, and we highlight this view to assist efforts to implement the Commission's recently adopted rules under the SCA. Does the definition also include the service that auto manufacturers purchase wholesale and in turn offer to consumers? Does the definition of ''covered provider'' in the SCA rules need to be modified to account for additional use cases in order to better protect survivors, and if so, what revisions do commenters recommend? Would doing so be consistent with the policy objectives and authority of the SCA?

18. To what extent are auto manufacturers reselling mobile connectivity when providing connected car services? In clarifying that the SCA rules extend to MVNOs, the Commission noted in the SCA Report and Order that, for some MVNOs, ''the underlying facilities-based provider may have control over some parts of, or all of, the systems and infrastructure necessary to effectuate line separations.'' The Commission clarified that, in those cases, ''the MVNO should fulfill its obligations under the SCA and our rules through its contractual relationship with the underlying facilities-based provider, and may satisfy its obligations by utilizing the same procedures and processes the facilities-based provider makes available to its own customers.'' To the extent an MVNO controls any facilities or systems, such as customer care or billing, the Commission found that ''the obligations imposed by the SCA fall entirely upon the MVNO and not the underlying facilities-based provider.'' We seek comment on how these findings may apply in the context of connected car services offered by auto manufacturers. Do auto manufacturers have control over any systems or infrastructure necessary to effectuate a line separation under the SCA rules? Are these systems entirely controlled by the wireless service providers who

provide the connectivity for the services? Are they controlled or operated jointly?

19. Under the SCA, ''shared mobile service contract'' is defined to mean ''a mobile service contract for an account that includes not less than 2 consumers.'' The rules implementing the SCA provide that a ''shared mobile service contract'' means ''a mobile service contract for an account that includes not less than two lines of service'' and define ''lines of service'' to mean those lines associated with a telephone number. Connected car services generally involve a ''shared mobile service contract'' when the service is offered by a wireless service provider as an add-on to an existing wireless service agreement. Do connected car services offered by auto manufacturers also involve multiple lines of service? For example, if someone owns multiple cars from the same manufacturer and each of those cars has connected car service, would there be a ''shared mobile service contract'' for those services? Do connected car services use ''lines of service'' as contemplated under the SCA framework? The responses to the information requests suggest that some connected car services associate phone numbers with specific vehicles. Is that association typical for the majority of connected car services? If there are some connected car services that do not involve ''shared mobile service contracts'' and ''lines of service'' as currently defined by the Commission, are there ways that the Commission can revise these definitions, consistent with our authority under the SCA, to expand their scope and apply to connected car services? Would doing so be consistent with the policy objectives of and authority granted by the SCA? For example, to the extent connected car services are not currently encompassed in the Commission's definition of ''shared mobile service contract'' under our rules, does the language in the SCA definition that refers to ''an account that includes not less than 2 consumers'' suggest that we could extend the definition to a shared account (*e.g.,* co-owners or co-lessees of a vehicle) for connected car services?

20. To the extent that connected car services are—or could be—covered by the SCA, how would line separation requirements apply? Are there operational or technical issues that would affect implementation, including any unique challenges for small entities? For example, how would vehicle ownership affect implementation? Are vehicles typically owned on a shared basis by both members of a couple? We expect that, if a vehicle is under the sole ownership of an abuser, but is used by a survivor, the SCA rules would require separation of the connected car service line that is associated with that vehicle through the abuser's account. In these cases, what evidence and standards of proof would be needed from a survivor to separate the connected car service line? Currently, under the Commission's SCA rules, survivors seeking a line separation are required to submit documentation that verifies that an individual who uses a line under the shared mobile service contract has committed or allegedly committed a covered act against the survivor or an individual in the survivor's care. Would there be any reason to modify these evidentiary requirements for connected car services?

21. *Other Actions to Protect Survivors Using Connected Car Services.* Outside of the SCA, we seek comment on other authority the Commission could use and other steps the Commission could take to help prevent the misuse of connected car services. To the extent that connected car services are not covered by the SCA and Commission rules, are there other sources of authority the Commission could use to help address the misuse of these services? For example, could the Commission use its authority under other Title III provisions to adopt requirements that apply to the connected car services offered by wireless service providers and/or auto manufacturers?

22. Outside of formal Commission action, what steps can providers of connected car services take to prevent the misuse of connected car services in domestic violence situations? How can the Commission encourage providers to take such steps? What changes to the design and functionality of these services are needed to help protect survivors of domestic violence? In particular, we seek comment on what steps providers of connected car services could take to make it easier for survivors to turn off remote location tracking and other services that might enable abusers to track, control, or revictimize survivors. For example, for some connected car services it appears that only a vehicle owner or lessee may disable tracking features on the connected car app absent a court order. Should manufacturers permit their apps to allow multiple account holders so that survivors using a co-owned vehicle may access the app to turn off tracking features? How could companies change their policies to better respond to domestic violence situations? What other users or sets of users should be permitted to disable such features? Are there any risks that would arise if companies were to allow users other than the owner or lessee to disable any connected car services?

23. What are companies' policies, and how can they best ensure that survivors are protected in instances when survivors request, and companies make, changes to location tracking or other connected services? Where companies do permit survivors who are not the primary account holder to request changes (such as turning off location data for a connected car service), do companies automatically send notices to primary account holders? If so, do companies need to notify a primary account holder (who may be an abuser) about such changes? Should companies set a uniform waiting period between when the company receives a request from a survivor and when the company notifies a primary account holder? Could companies delay notice to primary account holders until the company has approved and processed such requests, or do the companies need to communicate with primary account holders prior to making changes?

24. Are there other ways to allow vehicle tracking for legitimate safety reasons (*e.g.,* driver safety or vehicle theft recovery) without making the tracking features accessible by abusers? Are there changes that automakers could make to alert unsuspecting survivors about tracking services that may be active in their vehicles? What other steps should auto manufacturers and wireless service providers consider to prevent the misuse of connected car services? Should they provide consumers with more information about the connectivity features, privacy controls, and other settings available in connected car services and apps? Should they develop more specific policies to address the misuse of connected car services in domestic violence situations? How can the Commission encourage auto manufacturers and wireless service providers to collaborate proactively with stakeholders to protect against misuse of connected car services?

25. *Promoting Digital Equity and Inclusion.* As noted earlier, the effects of domestic violence disproportionately impact women as well as people of color, LGBTQ+ individuals, and other individuals who identify with historically marginalized demographics. The Commission, as part of its continuing effort to advance digital equity for all, including people of color, persons with disabilities, persons who live in rural or Tribal areas, women, LGBTQ+ persons, and others who are or

have been historically underserved, marginalized, or adversely affected by persistent poverty or inequality, invites comment on any equity-related considerations and benefits (if any) that may be associated with the proposals and issues discussed herein. Specifically, we seek comment on how our proposals may promote or inhibit advances in diversity, equity, inclusion, and accessibility, as well the scope of the Commission's relevant legal authority.

IV. Initial Regulatory Flexibility Analysis

26. As required by the Regulatory Flexibility Act of 1980, as amended, (RFA), the Federal Communications Commission (Commission) has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in the Further Notice of Proposed Rulemaking (*FNPRM*). The Commission requests written public comments on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments provided on the first page of the *FNPRM.* The Commission will send a copy of the *Notice,* including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the *FNPRM* and IRFA (or summaries thereof) will be published in the **Federal Register**.

A. Need for, and Objectives of, the Proposed Rules

27. Connectivity services in modern vehicles such as hands-free communication or find-your-car are intended to function as convenient tools for passengers and drivers. However, in the hands of an abuser, those same services can be used to stalk, harass, and intimidate survivors of domestic violence. In the *FNPRM,* the Commission seeks comment generally from small and other entities on the ways that connected car services are used and what further action the Commission can take to help protect domestic violence survivors from misuse of these services. First, based on the responses the Commission received to the information requests sent by the Chairwoman, the *FNPRM* describes and seeks comment on the Commission's understanding of wireless-service providers' and auto manufacturers' connected car service offerings. The *FNPRM* also seeks additional information on any other connected car services that are available in today's marketplace. Next, the *FNPRM* seeks comment on whether changes to the Commission's rules implementing the Safe Connections Act (SCA) are necessary to address the impact of connected car services on domestic violence survivors. Finally, the *FNPRM* seeks comment on other actions the Commission can take to help protect survivors using connected car services, other potential sources of authority for Commission action, and how best to encourage connected car service providers to take proactive steps to protect survivors against abuse of these services.

B. Legal Basis

28. The proposed action is authorized pursuant to sections 1, 4(i), 4(j), 254, 345, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 154(i), 154(j), 254, 345, and 403; section 5(b) of the Safe Connections Act of 2022, Public Law 117–223, 136 Stat 2280; and section 904 of Division N, Title IX of the Consolidated Appropriations Act, 2021, Public Law 116–260, 134 Stat. 1182, as amended by the Infrastructure Investment and Jobs Act, Public Law 117–58, 135 Stat. 429.

C. Description and Estimate of the Number of Small Entities to Which the Proposed Rules Would Apply

29. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. A ''small business concern'' is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

30. *Small Businesses, Small Organizations, Small Governmental Jurisdictions.* Our actions, over time, may affect small entities that are not easily categorized at present. We therefore describe, at the outset, three broad groups of small entities that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the Small Business Administration's (SBA) Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States, which translates to 33.2 million businesses.

31. Next, the type of small entity described as a ''small organization'' is generally ''any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.'' The Internal Revenue Service (IRS) uses a revenue benchmark of $50,000 or less to delineate its annual electronic filing requirements for small exempt organizations. Nationwide, for tax year 2020, there were approximately 447,689 small exempt organizations in the U.S. reporting revenues of $50,000 or less according to the registration and tax data for exempt organizations available from the IRS.

32. Finally, the small entity described as a ''small governmental jurisdiction'' is defined generally as ''governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.'' U.S. Census Bureau data from the 2017 Census of Governments indicate there were 90,075 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number, there were 36,931 general purpose governments (county, municipal, and town or township) with populations of less than 50,000 and 12,040 special purpose governments—independent school districts with enrollment populations of less than 50,000. Accordingly, based on the 2017 U.S. Census of Governments data, we estimate that at least 48,971 entities fall into the category of ''small governmental jurisdictions.''

33. *Wireless Telecommunications Carriers (except Satellite).* This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular services, paging services, wireless internet access, and wireless video services. The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 594 providers that reported they were engaged in the provision of wireless services. Of these providers, the

Commission estimates that 511 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

34. *Satellite Telecommunications.* This industry comprises firms ''primarily engaged in providing telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications.'' Satellite telecommunications service providers include satellite and earth station operators. The SBA small business size standard for this industry classifies a business with $38.5 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 275 firms in this industry operated for the entire year. Of this number, 242 firms had revenue of less than $25 million. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 65 providers that reported they were engaged in the provision of satellite telecommunications services. Of these providers, the Commission estimates that approximately 42 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, a little more than half of these providers can be considered small entities.

35. *Wireless Broadband Internet Access Service Providers (Wireless ISPs or WISPs).* Providers of wireless broadband internet access service include fixed and mobile wireless providers. The Commission defines a WISP as ''[a] company that provides end-users with wireless access to the internet[.]'' Wireless service that terminates at an end user location or mobile device and enables the end user to receive information from and/or send information to the internet at information transfer rates exceeding 200 kilobits per second (kbps) in at least one direction is classified as a broadband connection under the Commission's rules. Neither the SBA nor the Commission have developed a size standard specifically applicable to Wireless Broadband Internet Access Service Providers. The closest applicable industry with an SBA small business size standard is Wireless Telecommunications Carriers (except Satellite). The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of that number, 2,837 firms employed fewer than 250 employees.

36. Additionally, according to Commission data on internet access services as of June 30, 2019, nationwide there were approximately 1,237 fixed wireless and 70 mobile wireless providers of connections over 200 kbps in at least one direction. The Commission does not collect data on the number of employees for providers of these services, therefore, at this time we are not able to estimate the number of providers that would qualify as small under the SBA's small business size standard. However, based on data in the Commission's *2022 Communications Marketplace Report* on the small number of large mobile wireless nationwide and regional facilities-based providers, the dozens of small regional facilities-based providers and the number of wireless mobile virtual network providers in general, as well as on terrestrial fixed wireless broadband providers in general, we believe that the majority of wireless internet access service providers can be considered small entities.

37. *Local Resellers.* Neither the Commission nor the SBA have developed a small business size standard specifically for Local Resellers. Telecommunications Resellers is the closest industry with a SBA small business size standard. The Telecommunications Resellers industry comprises establishments engaged in purchasing access and network capacity from owners and operators of telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Establishments in this industry resell telecommunications; they do not operate transmission facilities and infrastructure. Mobile virtual network operators (MVNOs) are included in this industry. The SBA small business size standard for Telecommunications Resellers classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that 1,386 firms in this industry provided resale services for the entire year. Of that number, 1,375 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 207 providers that reported they were engaged in the provision of local resale services. Of these providers, the Commission estimates that 202 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

38. *Toll Resellers.* Neither the Commission nor the SBA have developed a small business size standard specifically for Toll Resellers. Telecommunications Resellers is the closest industry with a SBA small business size standard. The Telecommunications Resellers industry comprises establishments engaged in purchasing access and network capacity from owners and operators of telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Establishments in this industry resell telecommunications; they do not operate transmission facilities and infrastructure. Mobile virtual network operators (MVNOs) are included in this industry. The SBA small business size standard for Telecommunications Resellers classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that 1,386 firms in this industry provided resale services for the entire year. Of that number, 1,375 firms operated with fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 457 providers that reported they were engaged in the provision of toll services. Of these providers, the Commission estimates that 438 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

39. *All Other Telecommunications.* This industry is comprised of establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Providers of internet services (*e.g.,* dial-up ISPs) or Voice over Internet Protocol (VoIP) services, via client-supplied telecommunications connections are also included in this industry. The SBA small business size standard for this industry classifies firms with annual receipts of $35 million or less as small. U.S. Census Bureau data for 2017 show that there were 1,079 firms in this industry that

operated for the entire year. Of those firms, 1,039 had revenue of less than $25 million. Based on this data, the Commission estimates that the majority of ''All Other Telecommunications'' firms can be considered small.

40. *Automobile Manufacturing.* This U.S. industry comprises establishments primarily engaged in (1) manufacturing complete automobiles (*i.e.,* body and chassis or unibody) or (2) manufacturing automobile chassis only. The SBA small business size standard for this industry classifies firms having 1,500 employees or less as small. 2017 U.S. Census Bureau data indicate that 157 firms operated in this industry for the entire year. Of this number, 145 firms employed fewer than 100 employees. Therefore, the Commission estimates that the majority of manufacturers in this industry are small entities.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

41. The *FNPRM* seeks comment on the ways that connected car services are used and steps the Commission can take to help protect survivors of domestic violence from misuse of these services. The Commission states that the FCC's rules implementing the SCA apply to connected car services that involve a ''shared mobile service contract'' offered by a ''covered provider'' as defined under the rules and would require a provider to respond to a valid request for a line separation. The *FNPRM* seeks comment on the extent to which the FCC's existing SCA rules do not fully address concerns regarding the impact of connected car services on domestic violence survivors and whether changes to these rules would enable the Commission to better address these concerns. Outside of the SCA, the *FNPRM* seeks comment on other sources of authority the Commission can use to help address the misuse of connected car services.

42. While the *FNPRM* does not specifically propose new rules, the Commission does discuss application of the existing SCA rules in a new context and to potentially additional entities. The Commission seeks comment from small and other entities on whether any changes to the SCA rules are necessary. If the Commission ultimately decides to make any changes to the SCA rules in the connected car context, this could potentially result in additional costs, new or modified recordkeeping, reporting, or other compliance requirements for small and other providers. For example, the existing SCA rules require covered providers, within two business days of receiving a completed request from a survivor, to (1) separate the line of the survivor, and the line of any individual in the care of the survivor, from a shared mobile service contract, or (2) separate the line of the abuser from a shared mobile service contract. We seek comment on the impact to compliance for small and other entities as a result of rules reflecting a broader application of the SCA.

43. At present, the record does not include a detailed cost/benefit analysis that would allow us to quantify the costs of compliance for small entities, including whether it will be necessary for small entities to hire professionals to comply with any rules that may be adopted. Small and other entities are encouraged to quantify the costs and benefits of any reporting, recordkeeping, or compliance requirement that may be established in this proceeding. The Commission expects the comments it receives on its proposals, and the matters discussed in the *FNPRM* to include information addressing costs, benefits, and other matters of concern for small entities, which should help the Commission identify and better evaluate compliance costs and relevant issues for small entities before adopting final rules.

E. Steps Taken To Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered

44. The RFA requires an agency to describe any significant, specifically small business, alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rules for such small entities; (3) the use of performance rather than design standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities.

45. The *FNPRM* considers alternative approaches for addressing the misuse of connected car services. It discusses application of the existing SCA rules in the connected car services context and seeks comment on whether any changes to the SCA rules are necessary to address these services. To the extent that connected car services are or could be covered by the SCA, the *FNPRM* seeks comment on how line separation requirements would apply. The *FNPRM* also asks whether there are operational or technical issues that would affect implementation, including for small entity providers. The *FNPRM* also seeks comment on an alternative, non-regulatory approach that would minimize potential burden and provide additional flexibility for connected car providers, including any small entity providers. The *FNPRM* seeks comment on how the Commission can encourage connected car service providers to voluntarily take steps to prevent the misuse of connected car services in domestic violence situations. In particular, the *FNPRM* seeks comment on what steps providers of connected car services could take to make it easier for survivors to turn off remote location tracking and other services that might enable abusers to track, control, or revictimize domestic violence survivors.

46. Additionally, to assist with the Commission's evaluation of the economic impact on small entities that may result from the actions and alternatives that have been proposed in this proceeding, the *FNPRM* seeks alternative proposals and requests information on the potential costs of such alternatives. The Commission expects to consider more fully the economic impact on small entities following its review of comments filed in response to the *FNPRM,* including costs and benefits information. Alternative proposals and approaches from commenters could help the Commission further minimize the economic impact on small entities. The Commission's evaluation of the comments filed in this proceeding will shape the final conclusions it reaches, the final alternatives it considers, and the actions it ultimately takes in this proceeding to minimize any significant economic impact that may occur on small entities from the final rules that are ultimately adopted.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

47. None.

V. Ordering Clauses

48. Accordingly, *it is ordered*, pursuant to the authority contained in sections 1, 4(i), 4(j), 254, 345, and 403 of the Communications Act of 1934, as amended; 47 U.S.C. §§ 151, 154(i), 154(j), 254, 345, and 403; section 5(b) of the Safe Connections Act of 2022, Public Law 117–223, 136 Stat 2280; and section 904 of Division N, Title IX of the Consolidated Appropriations Act, 2021, Public Law 116–260, 134 Stat. 1182, as amended by the Infrastructure Investment and Jobs Act, Public Law

117–58, 135 Stat. 429; that this *FNPRM* of Proposed Rulemaking *is adopted*.

49. *It is further ordered* that, pursuant to applicable procedures set forth in sections 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415, 1.419, interested parties may file comments on the *FNPRM* of Proposed Rulemaking on or before 30 days after publication in the **Federal Register**, and reply comments on or before 60 days after publication in the **Federal Register**.

50. *It is further ordered* that the Commission's Office of the Secretary *shall send* a copy of this *FNPRM* of Proposed Rulemaking, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

[FR Doc. 2024–08642 Filed 4–22–24; 8:45 am]

BILLING CODE 6712–01–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

[Docket No. FWS–R3–ES–2024–0022; FXES11110900000–245–FF09E21000]

Endangered and Threatened Wildlife and Plants; 12-Month Finding for Lake Sturgeon

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notification of petition finding.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce a 12-month finding on a petition to list the lake sturgeon (*Acipenser fulvescens*) as an endangered or threatened species under the Endangered Species Act of 1973, as amended (Act). After a thorough review of the best available scientific and commercial information, we find that listing the lake sturgeon as an endangered or threatened species is not warranted at this time. However, we ask the public to submit to us at any time any new information relevant to the status of the lake sturgeon or its habitat.

DATES: The finding in this document was made April 23, 2024.

ADDRESSES: A detailed description of the basis for this finding is available on the internet at *https://www.regulations.gov* under Docket No. FWS–R3–ES–2024–0022. Supporting information used to prepare this finding is available by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**. Please submit any new information, materials, comments, or questions concerning this finding to the person listed under **FOR FURTHER INFORMATION CONTACT**.

FOR FURTHER INFORMATION CONTACT: Barbara Hosler, Regional Listing Coordinator, Midwest Regional Office, 517–351–6326, *barbara_hosler@fws.gov*. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

Background

Under section 4(b)(3)(B) of the Act (16 U.S.C. 1531 *et seq.*), we are required to make a finding on whether or not a petitioned action is warranted within 12 months after receiving any petition that we have determined contains substantial scientific or commercial information indicating that the petitioned action may be warranted (''12-month finding''). We must make a finding that the petitioned action is: (1) Not warranted; (2) warranted; or (3) warranted, but precluded by other listing activity. We must publish a notification of the 12-month finding in the **Federal Register**.

Summary of Information Pertaining to the Five Factors

Section 4 of the Act (16 U.S.C. 1533) and the implementing regulations at part 424 of title 50 of the Code of Federal Regulations (50 CFR part 424) set forth procedures for adding species to, removing species from, or reclassifying species on the Lists of Endangered and Threatened Wildlife and Plants (Lists). The Act defines ''species'' as including any subspecies of fish or wildlife or plants, and any distinct population segment of any species of vertebrate fish or wildlife which interbreeds when mature. The Act defines ''endangered species'' as any species that is in danger of extinction throughout all or a significant portion of its range (16 U.S.C. 1532(6)), and ''threatened species'' as any species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range (16 U.S.C. 1532(20)). Under section 4(a)(1) of the Act, a species may be determined to be an endangered species or a threatened species because of any of the following five factors:

(A) The present or threatened destruction, modification, or curtailment of its habitat or range;

(B) Overutilization for commercial, recreational, scientific, or educational purposes;

(C) Disease or predation;

(D) The inadequacy of existing regulatory mechanisms; or

(E) Other natural or manmade factors affecting its continued existence.

These factors represent broad categories of natural or human-caused actions or conditions that could have an effect on a species' continued existence. In evaluating these actions and conditions, we look for those that may have a negative effect on individuals of the species, as well as other actions or conditions that may ameliorate any negative effects or may have positive effects.

We use the term ''threat'' to refer in general to actions or conditions that are known to or are reasonably likely to negatively affect individuals of a species. The term ''threat'' includes actions or conditions that have a direct impact on individuals (direct impacts), as well as those that affect individuals through alteration of their habitat or required resources (stressors). The term ''threat'' may encompass—either together or separately—the source of the action or condition or the action or condition itself. However, the mere identification of any threat(s) does not necessarily mean that the species meets the statutory definition of an ''endangered species'' or a ''threatened species.'' In determining whether a species meets either definition, we must evaluate all identified threats by considering the expected response by the species, and the effects of the threats—in light of those actions and conditions that will ameliorate the threats—on an individual, population, and species level. We evaluate each threat and its expected effects on the species, then analyze the cumulative effect of all of the threats on the species as a whole. We also consider the cumulative effect of the threats in light of those actions and conditions that will have positive effects on the species, such as any existing regulatory mechanisms or conservation efforts. The Secretary of the Interior determines whether the species meets the Act's definition of an ''endangered species'' or a ''threatened species'' only after conducting this cumulative analysis and describing the expected effect on the species now and in the foreseeable future.

The Act does not define the term ''foreseeable future,'' which appears in the statutory definition of ''threatened species.'' Our implementing regulations at 50 CFR 424.11(d) set forth a framework for evaluating the foreseeable future on a case-by-case basis. The term ''foreseeable future'' extends only so far into the future as the Service can reasonably determine that both the future threats and the species' responses to those threats are likely. In other words, the foreseeable future is the period of time in which we can make reliable predictions. ''Reliable'' does not mean ''certain;'' it means sufficient to provide a reasonable degree of confidence in the prediction. Thus, a prediction is reliable if it is reasonable to depend on it when making decisions.

It is not always possible or necessary to define foreseeable future as a particular number of years. Analysis of the foreseeable future uses the best scientific and commercial data available and should consider the timeframes applicable to the relevant threats and to the species' likely responses to those threats in view of its life-history characteristics. Data that are typically relevant to assessing the species' biological response include species-specific factors such as lifespan, reproductive rates or productivity, certain behaviors, and other demographic factors.

In conducting our evaluation of the five factors provided in section 4(a)(1) of the Act to determine whether lake sturgeon meets the Act's definition of an ''endangered species'' or ''threatened species,'' we considered and thoroughly evaluated the best scientific and commercial information available regarding the past, present, and future stressors and threats. We reviewed the petition, information available in our files, and other available published and unpublished information for the species. Our evaluation may include information from recognized experts; Federal, State, and Tribal governments; academic institutions; foreign governments; private entities; and other members of the public.

The species assessment form for the lake sturgeon contains more detailed biological information, a thorough analysis of the listing factors, a list of literature cited, and an explanation of why we determined that the species does not meet the Act's definition of an ''endangered species'' or a ''threatened species.'' To inform our status reviews, we completed a species status assessment (SSA) report for the lake sturgeon. The SSA report contains a thorough review of the taxonomy, life history, ecology, current status, and projected future status for the lake sturgeon. This supporting information can be found on the internet at *https://www.regulations.gov* under the Docket No. FWS–R3–ES–2024–0022.

Our analysis for this decision applied our current regulations, portions of which were last revised in 2019. Given that we proposed further revisions to these regulations on June 22, 2023 (88 FR 40764), we have also analyzed whether the decision would be different if we were to apply those proposed revisions. We concluded that the decision would have been the same if we had applied the proposed 2023 regulations. The analyses under both the regulations currently in effect and the regulations after incorporating the June 22, 2023, proposed revisions are included in our decision file for this action.

Previous Federal Actions

On May 23, 2018, we received a petition from the Center for Biological Diversity requesting that the lake sturgeon (*Acipenser fulvescens*) be listed as an endangered or threatened species rangewide, or in nine petitioned distinct population segments, and critical habitat be designated for this species under the Act. On August 15, 2019, we published a 90-day finding (84 FR 41691) that the petition contained substantial information indicating listing may be warranted for the species. A complaint was filed on February 20, 2020, by the Center for Biological Diversity, Fishable Indiana Streams for Hoosiers, Hoosier Environmental Council, and Prairie Rivers Network alleging that we failed to make a 12-month finding on the May 23, 2018, petition to list the lake sturgeon. As a result of the litigation, we have a court-ordered date of June 30, 2024, to deliver a 12-month finding to the **Federal Register**. This document constitutes our 12-month finding on the May 23, 2018, petition to list the lake sturgeon under the Act.

The petition also included nine potential distinct population segments (DPSs): Lake Superior, western Lake Michigan, Red River, Rainy Lake/Rainy River/Lake of the Woods, upper Mississippi River, Missouri River, Ohio River, Arkansas-White River, and the lower Mississippi River. After evaluating these populations under our 1996 Policy Regarding the Recognition of Distinct Vertebrate Population Segments Under the Endangered Species Act (DPS policy; 61 FR 4722, February 7, 1996), we found that each population is not discrete because it is not markedly separated from other populations of lake sturgeon, with evidence of migration and movement between each petitioned DPS and a population of lake sturgeon outside of the petitioned DPS. In addition, the Red River and Rainy Lake/Rainy River/Lake of the Woods petitioned DPSs are not discrete because they do not have significant differences in the control of exploitation, management of habitat, conservation status, or regulatory mechanisms from the connected lake sturgeon populations in Canada. For a more detailed discussion of our DPS analysis, please see the species assessment form.

Using the best available information, we determined that none of the petitioned DPSs meets the criteria for discreteness in our DPS policy. Because we did not find any of the petitioned DPSs to be discrete, we did not evaluate significance under the DPS policy. Therefore, we proceed with determining whether the lake sturgeon meets the Act's definition of an endangered or threatened species throughout all or a significant portion of its range.

Summary of Finding

Historically, lake sturgeon were widely distributed across the eastern and central United States and Canada. In Canada, the species was found within the Hudson Bay and Great Lakes watersheds and in rivers and lakes in Alberta, Saskatchewan, Manitoba, Ontario, and Quebec. In U.S. waters, they were distributed throughout the Great Lakes and their tributaries, the Mississippi River basin, as well as an isolated population in the Mobile River Basin in Alabama and Georgia. Although lake sturgeon occupy a reduced area today, they remain distributed in the four major North American drainages they occupied historically, including the Mississippi River basin, the Great Lakes, Hudson Bay, and the Mobile River Basin.

Sturgeon have a prehistoric appearance because of their large size, shark-like tails, and bony plate-armored covering. Lake sturgeon possess a torpedo-shaped body that is protected by five lateral rows of scutes (bony, diamond-shaped scales). Lake sturgeon are a long-lived fish, living to 150 years of age, and are late maturing, with males taking 12–20 years to mature and females taking 15–30 years. Two key habitat needs for lake sturgeon are access to suitable spawning and nursery habitat, and connectivity between all habitat types (Service 2023, pp. 12–13). Lake sturgeon travel from lakes and large rivers (foraging habitat) to tributaries (spawning habitat) to spawn, then the resulting lake sturgeon larvae will drift downstream to the mouth of

rivers (nursery habitat) until they are large enough to move to larger bodies of water. Spawning habitat generally consists of coarser substrate with interstitial spacing, water temperatures ranging from about 8–23.3 degrees Celsius (°C) (47–72 degrees Fahrenheit (°F)), and sufficient water flow in riverine habitat. Nursery habitat is similar, defined by riverine habitat with both fine sediment and coarser substrates, sufficient water flow, appropriate water temperatures, and food availability. To complete its life cycle, lake sturgeon need spawning, nursery, and adult foraging habitat to be connected and accessible. These habitat needs are also essential to supporting natural recruitment and adult abundance of life sturgeon. Generally, if spawning and nursery habitat are accessible, then natural recruitment will occur, which in turn will increase adult abundance.

For lake sturgeon populations to be resilient, they need a healthy demography (*i.e.,* stable or positive growth rates), habitat that provides connectivity to allow for gene flow among subpopulations, and sufficient habitat quality and quantity to support healthy individuals. For a lake sturgeon population to be considered demographically healthy, it needs a minimum of 750 total spawning adults and successful spawning and recruitment that occurs in most years. Lake sturgeon need widespread, naturally recruiting, abundant populations for redundancy. Additionally, lake sturgeon need genetic, behavioral, and ecological diversity across their range to have sufficient representation to adapt to future environmental change.

We have carefully assessed the best scientific and commercial information available regarding the past, present, and future threats to lake sturgeon, and we evaluated all relevant factors under the five listing factors, including any regulatory mechanisms and conservation measures addressing these threats. The primary threats affecting the lake sturgeon's biological status are dams, barriers, and climate change (Service 2023, pp. 14–15, 17–22). Dams and barriers occur across the lake sturgeon's range and can block access to spawning and nursery habitat, stopping lake sturgeon from completing their life cycle, thus making this the most significant threat to the species.

We focused on the potential effects that warming water temperatures, as a result of climate change, could have on the lake sturgeon (Service 2023, pp. 24–25, 121–125). Warming water temperatures could have negative effects on the species by changing the timing of spawning runs and decreasing available habitat if waters get too warm. Warming water temperatures could also have a positive effect by increasing growth rate and creating habitat out of areas that were previously too cold. Other threats we considered in our analysis, but did not find to rise to a major species-level impact, include water quality degredation and pollution, disease and predation, recreational fishing, illegal harvest, effects of lamprey control, invasive species, loss of genetic diversity, and genetic risks from stocking. For more information on our analysis of these threats, see the SSA report (Service 2023, pp. 13–44).

The primary conservation measure for the lake sturgeon is stocking of captive-reared lake sturgeon. Stocking efforts occur across much of the lake sturgeon's range and have brought areas back from extirpation and bolstered the resiliency of existing populations (Service 2023, pp. 44–110). Other conservation measures we considered in our analysis include restoring connectivity of habitat through dam removal, creation of fish passages, habitat restoration, and invasive and non-native species eradication and control programs. Restoration of connectivity and habitat can have significant positive effects on lake sturgeon, but these benefits are more localized or benefit certain populations.

During the late 1800s and early 1900s, commercial harvest severely reduced the abundance of lake sturgeon while the construction of dams and channelization and dredging reduced the amount and accessibility of spawning and nursery habitat. By the late 1900s, lake sturgeon harvest was, and remains, heavily regulated and monitored by State agencies, effectively removing the threat of overharvest (Service 2023, pp. 30–42). While the threat dams pose to the species remains across the species' range, reducing access to spawning and nursery habitat, there have been significant efforts to recover the lake sturgeon. Stocking programs have helped to reintroduce or supplement populations of the lake sturgeon across much of its range, including six of eight representation units in the United States and three of four designatable units in Canada, providing increased resiliency for populations that are stocked (Service 2023, pp. 44–110). Along with stocking, restoration of connectivity has improved the ability of populations to recover naturally, such as in the Red River of the North (Service 2023, pp. 79–84). Due to the significant ongoing conservation and management efforts across the range of the species, areas that are being managed are trending positively and have increased resiliency compared to past decades (Service 2023, pp. 44–110). In addition, although abundance has been drastically reduced, highly and moderately resilient populations are still widely distributed, providing sufficient redundancy for the species rangewide (Service 2023, pp. 110–113).

Overall, lake sturgeon representation has been reduced from historical levels, but the species still maintains a moderate to high level of representation in multiple ways (Service 2023, pp. 113–116). While genetic diversity has been lost in the southernmost part of the range due to extirpations, the species has generally maintained a high level of genetic diversity. In addition, lake sturgeon may have some inherent phenotypic plasticity to respond to stressors. Lake sturgeon may have the ability to adapt to warming climates and can thrive in many different ecological settings. The primary reason representation has been reduced from historical levels is because the widescale construction of dams has reduced the ability of lake sturgeon to move up tributaries to spawn. However, lake sturgeon have a high level of adaptability to local changes and environmental conditions. Therefore, although dams have reduced representation from historical levels, the lake sturgeon currently has a sufficient level of representation to adapt to environmental changes (Service 2023, pp. 113–116).

In summary, the lake sturgeon has many highly and moderately resilient populations distributed throughout its range that provide sufficient redundancy for the species and the adaptive capacity to withstand near-term and long-term changes to the environment. Thus, after assessing the best available information, we conclude that the lake sturgeon is not in danger of extinction throughout all of its range.

Therefore, we proceed with determining whether the lake sturgeon is likely to become endangered within the foreseeable future throughout all of its range. We carried three major influences into our future condition analysis: dams, stocking, and climate change. We considered other influences and conservation efforts described in the SSA report, but we identified these three influences as having the highest likelihood of a potentially significant, species-wide impact into the future.

We do not anticipate the number of dams to change significantly across the range of the species in the future, meaning the effects of dams on the lake

sturgeon at the species level will likely remain similar to the current level of effects (Service 2023, pp. 117–118). While we expect dams and barriers to continue to have a significant negative effect on the lake sturgeon, we expect the stocking programs occurring in six of eight representation units in the United States and three of four designatable units in Canada to continue until management objectives are met; see the species assessment form and SSA report for management objectives (Service 2023, pp. 121–122). These representation and designatable units are generally trending upwards, largely because of conservation efforts. Due to a strong, long-term commitment to reestablishment and supplementation efforts by States and Tribes, we expect these efforts to continue until such time that they are no longer necessary. Overall, we expect lake sturgeon populations that are currently trending upward to continue to trend upward in the future, improving resiliency and redundancy for the species. The species current condition and positive trends from ongoing conservation efforts support species' viability in the face of environmental stochasticity and potential catastrophic events.

There is much uncertainty regarding how the lake sturgeon will respond to changes in habitat due to climate change. However, because of the species' relatively wide thermal tolerance, ability to move, and ability to adjust spawning phenology, the lake sturgeon shows a high degree of adaptability to climate change, although that adaptability will likely be limited by its ability to access suitable habitats. Overall, we expect representation in the future to remain similar to the current condition and remain sufficient to adapt to environmental changes.

In summary, the lake sturgeon is projected to have: (1) increased resiliency in populations with ongoing conservation efforts, (2) highly and moderately resilient populations distributed throughout its range that provide sufficient redundancy for the species, and (3) the adaptive capacity to withstand near-term and long-term changes to the environment. After assessing the best available information, we conclude that the lake sturgeon is not likely to become endangered within the foreseeable future throughout all of its range.

We also evaluated whether the lake sturgeon is endangered or threatened in a significant portion of its range. We evaluated four portions (*i.e.,* all analysis units that are currently functionally extirpated or have low overall resiliency and designatable units in a remnant status, the Hudson Bay drainage, the Atlantic drainage, and the Gulf of Mexico drainage) and did not find them to be significant because they are not large geographic areas relative to the range of the species as a whole and they do not constitute habitat of high quality or unique value relative to the remaining portions of the range of lake sturgeon. Because we did not find any portion to be significant, we did not evaluate whether any portion is in danger of extinction either now or within the foreseeable future. Therefore, we did not find any portions of the lake sturgeon's range for which both (1) the portion is significant; and (2) the species is in danger of extinction in that portion, either now or within the foreseeable future. Thus, after assessing the best available information, we conclude that the lake sturgeon is not in danger of extinction in a significant portion of its range now, or within the foreseeable future.

After assessing the best available information, we concluded that the lake sturgeon is not in danger of extinction or likely to become in danger of extinction within the foreseeable future throughout all of its range or in any significant portion of its range. Therefore, we find that listing the lake sturgeon as an endangered species or threatened species under the Act is not warranted. A detailed discussion of the basis for this finding can be found in the lake sturgeon species assessment form and other supporting documents on *https://www.regulations.gov* under Docket No. FWS–R3–ES–2024–0022 (see **ADDRESSES**, above).

Peer Review

In accordance with our July 1, 1994, peer review policy (59 FR 34270; July 1, 1994) and the Service's August 22, 2016, Director's Memo on the Peer Review Process, we solicited independent scientific reviews of the information contained in the lake sturgeon SSA report. The Service sent the SSA report to nine independent peer reviewers and received three responses. Results of this structured peer review process can be found at *https://www.regulations.gov* under Docket No. FWS–R3–ES–2024–0022. We incorporated the results of these reviews, as appropriate, into the SSA report, which is the foundation for this finding.

New Information

We request that you submit any new information concerning the taxonomy of, biology of, ecology of, status of, or stressors to the lake sturgeon to the person listed above under **FOR FURTHER INFORMATION CONTACT**, whenever it becomes available. New information will help us monitor this species and make appropriate decisions about its conservation and status. We encourage local agencies and stakeholders to continue cooperative monitoring and conservation efforts.

[Docket No. 240410–0104]

RIN 0648–BM68

Fisheries Off West Coast States; West Coast Salmon Fisheries; Measures To Keep Fishery Impacts Within the Conservation Objective for the California Coastal Chinook Salmon

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: This proposed rule would implement a set of management measures recommended by the Pacific Fishery Management Council (Council) to ensure fishery impacts on California Coastal (CC) Chinook salmon, which are listed as threatened under the Endangered Species Act, remain within the conservation objective in the Council's Pacific Coast Salmon Fishery Management Plan (Salmon FMP). Under the proposed rule, management tools (*e.g.,* trip limits (also known as landing and possession limits) and inseason management) consistent with the provisions of the Salmon FMP would be used to provide greater certainty in avoiding exceedances of the conservation objectives for CC Chinook salmon.

DATES: Comments on this proposed rule must be received on or before May 23, 2024.

ADDRESSES: A plain language summary of this proposed rule is available at *https://www.regulations.gov/docket/NOAA-NMFS-2024-0009.* You may submit comments on this document, identified by NOAA–NMFS–2024–0009, by the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov* and type NOAA–NMFS–2024–0009 in the Search box (note: copying and pasting the FDMS Docket Number directly from this document may not yield search results). Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *https://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, *etc.*), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

SUPPLEMENTARY INFORMATION:

Background

The ocean salmon fisheries in the exclusive economic zone (EEZ) (3–200 nautical miles; 5.6–370.4 kilometers) off Washington, Oregon, and California are managed under the Salmon FMP. The Salmon FMP and implementing regulations govern the development at the spring (March and April) Council meetings each year of annual management measures. Management measures for the salmon fisheries are developed annually because the abundance of the salmon stocks in the fishery can fluctuate significantly from one year to the next and information about annual stock abundance does not become available until early in each year (January–early March).

The commercial and recreational salmon fisheries off northern California and southern Oregon target healthy or abundant stocks of Chinook and coho salmon, but may incidentally encounter Endangered Species Act (ESA)-listed CC Chinook salmon and other ESA-listed species. The Salmon FMP includes harvest controls that are used to manage salmon stocks sustainably. The Salmon FMP also requires that the Council manage fisheries consistent with ''consultation standards'' for stocks listed as endangered or threatened under the ESA for which NMFS has issued biological opinions. NMFS has issued biological opinions for every ESA-listed salmon species impacted by the fisheries governed by the Salmon FMP and reminds the Council of requirements (*i.e.,* consultation standards) to maintain consistency with those opinions in its annual guidance letter to the Council regarding development of the annual ocean salmon management measures. To limit the effects of CC Chinook salmon, ocean salmon fisheries are managed to avoid exceeding a conservation objective for that stock.

The CC Chinook salmon Evolutionarily Significant Unit (ESU) has been listed as threatened under the ESA since 1999. The conservation objective for CC Chinook salmon is described in the Salmon FMP. Management of the fishery that avoids exceedance of the conservation objective has been analyzed in a series of biological opinions (most recently, an opinion issued in 2023), and has been determined to avoid jeopardizing the ESU (NMFS 2000; McInnis 2005; NMFS 2023; NMFS 2024). As described in these consultations, the data are insufficient for developing an ESU-specific conservation objective for CC Chinook salmon. Thus, NMFS has relied on a surrogate, Klamath River fall-run Chinook Salmon (KRFC), to evaluate and limit impacts on CC Chinook salmon in ocean salmon fisheries. The conservation objective is an ocean harvest rate (HR) on age-4 KRFC of 0.16. In its 2024 biological opinion, NMFS confirmed that managing fisheries to avoid exceeding this conservation objective would avoid jeopardy to CC Chinook.

From 2018 to 2022, the fishery HR on age-4 KRFC significantly exceeded 0.16 with an average of 0.28. Actions (*e.g.,* adjustments to ocean management models to account for these high catch rates and managing to a lower rate than the conservation objective) proved insufficient to avoid exceedance and the fisheries continued to exceed the conservation objective for CC Chinook salmon as well as impact limits on other California Chinook salmon stocks. The recent increases in the post-season KRFC age-4 ocean HR from 2018 through 2021 suggests that the level of impacts on CC Chinook salmon have likely increased.

For 2023, the Council considered additional measures to avoid another exceedance of the CC Chinook conservation objective. However, in response to record low forecasts for KRFC and Sacramento fall-run Chinook salmon, the Council ultimately recommended the closure of commercial and recreational salmon fisheries off the coast of California for 2023, and NMFS approved this closure. The management measures for the 2023–2024 ocean salmon fishing season include the potential use of landing and possession limits in the commercial salmon troll fishery and bag limits in the recreational salmon fishery for the March and April 2024 fisheries, should salmon abundance forecasts for 2024 and Council discussion support use of those measures. The projected KRFC age-4 ocean HR of 0.003 for the 2023–24 management measures, with the fishery closures off California, resulted from a low number of encounters of KRFC salmon in fisheries north of California.

The Council continued to explore measures that could be taken to manage the commercial salmon troll fishery to address the source of the high catch rates of KRFC and stay within the conservation objective, thereby not exceeding the conservation objective for CC Chinook salmon. At the November 2023 Council meeting, the Council adopted a set of management measures to ensure that the CC Chinook salmon conservation objective is not exceeded. The management measures are intended to ensure the fishery does not exceed the conservation objective for CC

Chinook by implementing management tools (*e.g.,* landing and possession limits, an overall allowable harvest level, inseason management) consistent with the provisions of the Salmon FMP.

Measures To Achieve Conservation Objectives for California Stocks of Chinook Salmon

The proposed fishery management measures are designed to ensure that the post-season ocean HR for age-4 KRFC does not exceed the conservation objective of 0.16. These measures would apply to the ocean salmon fisheries between the Oregon/California border and Pigeon Point, California.

The management measures included in this rule are focused on the ocean salmon fisheries off the coast of California (*i.e.,* California Klamath Management Zone, Fort Bragg, San Francisco, and Monterey management areas) for the following reasons:

1. The majority of the KRFC harvest (and assumed impacts on CC Chinook salmon) in the ocean occurs in this area;
2. The age-4 ocean HR for KRFC in this area has consistently exceeded pre-season projections in recent years;
3. Contact-rate-per-unit-effort in this area has exceeded projections in recent years;
4. The fisheries in this area have been managed primarily through season controls such as time and area restrictions (as opposed to use of landing and possession limits and/or quota management);
5. Time and area restrictions in this area have not been effective in controlling harvest of KRFC (and assumed impacts on CC Chinook salmon) in recent years; and,
6. Ocean fisheries in other areas that impact KRFC routinely implement the same or similar management measures as described in these measures for a similar purpose.

The rule would require implementation of measures used in salmon fisheries elsewhere on the West Coast to ensure fisheries in the affected area do not exceed the conservation objective for CC Chinook salmon. Historically, fisheries in the area described above have been managed by setting seasons and bag limits. In addition, for this fishery there was no overall limit on harvest or inseason management. The Salmon FMP contemplates that the Council and NMFS will use a range of management tools to ensure the fisheries are managed to avoid exceeding all limits for stocks caught in the various management areas along the West Coast (FMP Chapter 6). These management tools (*e.g.,* management boundaries, seasons, quotas, minimum harvest lengths, fishing gear restrictions, and recreational day bag limits) are available to manage ocean fisheries each season, once the allowable ocean harvests and the basis for allocation among user groups have been determined. New information on the fisheries and salmon stocks also may require other adjustments to the management measures.

Under the proposed set of management measures, annual management measures for the fisheries in the area described above will both be designed pre-season and managed inseason to stay within the objective. NMFS may apply, and the Council may recommend, a buffer to the conservation objective to account for management error and reduce the potential for exceeding the conservation objective, this buffer would be developed based on the percent error of the pre-season projected HR (as compared to the post-season HR) occurring over the most recent 5 years and other relevant factors. Fishery managers will compute an allowable harvest level of Chinook salmon for the year consistent with the conservation objective (including the buffer described above, if applicable). Using the allowable harvest level and projected effort, managers will determine landing and possession limits pre-season to ensure that the fishery does not exceed the allowable harvest level. The fishery will be monitored inseason and actions will be taken as needed to prevent the fisheries from exceeding the annual harvest level. We expect that this multilayered conservative approach (*i.e.,* a buffer, fishery output control, and inseason actions) will ensure that the fisheries remain within the pre-season projection and adhere to the CC Chinook salmon conservation objective.

This proposed rule will also update regulations to 50 CFR 660.405 and 660.410. In § 660.405, the term ''possess'' was added to provide consistency to other prohibitions throughout the regulations. With the new regulation requiring submission of fish tickets within 24 hours of landing, the addition of the term ''possess'' will ensure that fishers are not confused about the requirements related to the timing of catch and retention, possession, or landings. Also, in addition to the new management measures at § 660.410, this proposed rule would revise paragraph (c) by adding the abbreviation KRFC to address several new occurrences of KRFC that did not exist before.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this proposed rule is consistent with the Salmon FMP, other provisions of the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

There are no relevant Federal rules that may duplicate, overlap, or conflict with this action.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Council for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant adverse economic impact on a substantial number of small entities.

For purposes of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) only, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial fishing (see 50 CFR 220.2). A business primarily engaged in commercial fishing is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $11 million for all its affiliated operations worldwide. This standard applies to all businesses classified under North American Industry Classification System (NAICS) code 11411 for commercial fishing, including all businesses classified as commercial finfish fishing (NAICS 11411), commercial shellfish fishing (NAICS 114112), and other commercial marine fishing (NAICS 114119) businesses (50 CFR 200.2; 13 CFR 121.201).

This proposed rule would directly affect the West Coast commercial troll salmon fishery. Using the Socioeconomic Assessment of the 2022 Ocean Salmon Fisheries (chapter IV) of the Review of 2022 Ocean Salmon Fisheries Stock Assessment and Fishery Evaluation Document for the Pacific Coast Salmon FMP the most recent year of complete fishing data (2022), had 563 distinct commercial vessels land fish caught in Washington, Oregon, and California. The total coastwide ex-vessel value was $22.2 million with California achieving $17.1 million, Oregon $3.2 million, and Washington $1.8 million. No vessel met the threshold to be considered a large entity as defined above. The preliminary number of vessel-based ocean salmon recreational

angler trips taken on the West Coast in 2022 was 264,200. All of those charter businesses that are impacted are small entities. Because all of the affected entities are small, the management measures in this proposed rule are not expected to place small entities at a significant disadvantage to large entities.

Because businesses have been harvesting over the conservation objective for over 5 years (table 1), this regulation which is intended to bring catch levels back down to the conservation objective (0.16 HR on age-4 KRFC), is expected to impose negative economic effects on small businesses relative to the last 5 years. The proposed action does not change the management objectives for CC Chinook, it is designed to ensure that the fisheries do not exceed the objective using management and tools that are allowed under the Salmon FMP. The effects are not quantifiable with available resources on the timeline needed to implement this rule to achieve conservation objectives. However, NMFS invites comments on this proposed rule with information about costs to small entities.

TABLE 1—ESTIMATES OF OCEAN HARVEST RATES OF AGE-4 KRFC SALMON PRE- AND POSTSEASON IN RECENT YEARS

Year	Preseason age-4 harvest rate forecast	Post-season age-4 harvest rate estimate	Pre/post for years >16%
2017	0.03	0.04	0.75
2018	0.12	0.24	0.05
2019	0.16	0.36	0.44
2020	0.09	0.23	0.39
2021	0.11	0.28	0.39
2022	0.10	0.38	0.26

NMFS believes that this proposed rule would not have a significant adverse economic impact on a substantial number of small entities. As a result, an initial regulatory flexibility analysis is not required and none has been prepared. This proposed rule contains revisions to a collection-of-information requirement subject to review and approval by the Office of Management and Budget under the Paperwork Reduction Act. This rule revises the existing requirements for the collection of information 0648–0433 by adding a requirement for submission of fish tickets within 24 hours of landing. Public reporting burden for fish ticket submission is estimated to average 0 hours because the submission will already be required by the California Code of Regulations.

A formal section 7 consultation under the ESA was initiated for the Salmon FMP. In a biological opinion dated February 29, 2024, NMFS determined that fishing activities conducted under the Salmon FMP and its implementing regulations are not likely to jeopardize the continued existence of any endangered or threatened species under the jurisdiction of NMFS or result in the destruction or adverse modification of critical habitat.

This proposed rule was developed after meaningful consultation and collaboration with the tribal representative on the Council.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 15, 2024.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

List of Subjects in 50 CFR Part 660

Fisheries, Fishing, Indians—lands, Recreation and recreation areas, Reporting and recordkeeping requirements, Treaties.

For the reasons set out in the preamble, NMFS proposes to amend 50 CFR part 660 as follows:

PART 660—FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.,* 16 U.S.C. 773 *et seq.,* and 16 U.S.C. 7001 *et seq.*

■ 2. In § 660.405, revise paragraphs (a)(1) and (a)(2) to read as follows:

§ 660.405 Prohibitions.

(a) * * *

(1) Take and retain, or possess, or land salmon caught with a net in the fishery management area, except that a hand-held net may be used to bring hooked salmon on board a vessel.

(2) Fish for, or take and retain, or possess, any species of salmon:

(i) During closed seasons or in closed areas;

(ii) While possessing on board any species not allowed to be taken in the area at the time;

(iii) Once any catch limit is attained;

(iv) By means of gear or methods other than recreational fishing gear or troll fishing gear, or gear authorized under § 660.408(k) for treaty Indian fishing;

(v) In violation of any action issued under this subpart; or,

(vi) In violation of any applicable area, season, species, zone, gear, daily bag limit, or length restriction.

* * * * *

■ 3. In § 660.410, revise paragraph (c) and add paragraph (d) to read as follows:

§ 660.410 Conservation objectives, ACLs, and de minimis control rules.

* * * * *

(c) *De minimis control rules.* Klamath River fall Chinook (KRFC) and Sacramento River fall Chinook salmon have the same form of *de minimis* control rule described in the FMP, which allows for limited fishing impacts when abundance falls below S_{MSY}. The control rule describes maximum allowable exploitation rates at any given level of abundance. The annual management measures may provide for lower exploitation rates as needed to address uncertainties or other year-specific circumstances. The *de minimis* exploitation rate in a given year must also be determined in consideration of the following factors:

(1) The potential for critically low natural spawner abundance, including considerations for substocks that may fall below crucial genetic thresholds;

(2) Spawner abundance levels in recent years;

(3) The status of co-mingled stocks;

(4) Indicators of marine and freshwater environmental conditions;

(5) Minimal needs for tribal fisheries;

(6) Whether the stock is currently in an approaching overfished condition;

(7) Whether the stock is currently overfished;

(8) Other considerations, as appropriate; and

(9) Exploitation rates, including *de minimis* exploitation rates, must not jeopardize the long-term capacity of the stock to produce maximum sustained yield on a continuing basis. NMFS expects that the control rule and associated criteria will result in decreasing harvest opportunity as abundance declines and little or no opportunity for harvest at abundance levels less than half of MSST.

(d) *Salmon Fisheries Affecting California Coastal Chinook.* Salmon fisheries affecting this ESA-listed stock are managed to meet the conservation objective described in FMP table 3–1.

(1) The annual specifications and management measures will include an allowable harvest level expressed in numbers of fish for these fisheries that is projected, using the Klamath Ocean Harvest Model and Sacramento Harvest Model, to ensure fisheries do not exceed the conservation objective. To determine the allowable harvest level, the Council and NMFS may use a harvest rate that is lower than the conservation objective (*i.e.,* harvest rate of 0.16) in order to address the potential for exceeding the objective in a particular year. The lower harvest rate will be determined in two steps.

(i) In the first step, NMFS and the Council will calculate the average percent error for the previous 5 years, and apply the average percent error to the conservation objective. Only positive percent error will be applied because the intent is to keep the post-season harvest rate below 0.16.

(ii) In the second step, other relevant factors affecting the preseason assessment of the age-4 KRFC harvest rate will be considered, such as revisions to the fishery management models used to estimate the preseason Chinook catch, environmental indicators relevant to the status of KRFC, constraints on fisheries under consideration for the areas and months with greatest impacts to KRFC Chinook, and the lower harvest rate may be modified based on these factors.

(2) The annual specifications and management measures will include the following management measures to ensure fisheries affecting California Coastal Chinook do not exceed the allowable harvest level.

(i) Landing and possession limits will be used in the commercial troll fisheries to keep fishery catch within the allowable harvest level. Landing and possession limits will be set for periods not to exceed 1 week. Landing and possession limits may vary from one calendar month to the next but will be the same for periods within the same calendar month.

(ii) A percentage of the allowable harvest level (*i.e.,* trigger) that will require consideration of inseason action to ensure that the allowable harvest level is not exceeded will be set through the annual management measures.

(iii) For the first 2 years after the promulgation of this rule in which salmon fishery occur in the EEZ off the California coast, inseason actions will only be used to further restrict harvest (*i.e.,* reduce landing limits, reduce time/area, and close the fishery when the allowable harvest level is projected to have been met).

(3) Electronic fish tickets must be submitted within 24 hours of landing to the California Department of Fish and Wildlife. Fish tickets must be submitted in accordance with the requirements of the applicable state regulations.

(4) NMFS will implement inseason actions as described in § 660.409, following processes described in that section, as needed to ensure catch in the fishery does not exceed the allowable harvest level and will close areas and seasons upon reaching the allowable harvest limit.

[FR Doc. 2024–08368 Filed 4–22–24; 8:45 am]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[RTID 0648–XD632]

Fisheries of the Exclusive Economic Zone Off Alaska; Essential Fish Habitat Amendments

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of availability of fishery management plan amendments; request for comments.

SUMMARY: The North Pacific Fishery Management Council (Council) submitted amendment 127 to the Fishery Management Plan (FMP) for Groundfish of the Bering Sea and Aleutian Islands Management Area (BSAI), amendment 115 to the FMP for Groundfish of the Gulf of Alaska (GOA), amendment 56 to the FMP for BSAI King and Tanner Crabs, amendment 17 to the FMP for the Salmon Fisheries in the exclusive economic zone (EEZ) Off Alaska, and amendment 3 to the FMP for Fish Resources of the Arctic Management Area (amendments) to the Secretary of Commerce for review. If approved, these amendments would revise the FMPs by updating the description and identification of essential fish habitat (EFH) and updating information on adverse impacts to EFH based on the best scientific information available. These amendments are intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the FMPs, and other applicable laws.

DATES: Comments on the amendments must be received no later than June 24, 2024.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2023–0160, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov* and enter [NOAA–NMFS–2023–0160] in the Search box (note: copying and pasting the FDMS Docket Number directly from this document may not yield search results). Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to Gretchen Harrington, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS, Attn: Records Office. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.
- *Instructions:* Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *https://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Electronic copies of the amendments, maps of the EFH areas, and the Environmental Assessment (the analysis) prepared for this action may be obtained from *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Megan Mackey, 907–586–7228.

SUPPLEMENTARY INFORMATION: The Magnuson-Stevens Act requires that each regional fishery management council submit any FMP amendment it

prepares to NMFS for review and approval, disapproval, or partial approval by the Secretary of Commerce (Secretary). The Magnuson-Stevens Act also requires that NMFS, upon receiving an FMP amendment, immediately publish a notice in the **Federal Register** announcing that the amendment is available for public review and comment. The Council has submitted these amendments to the Secretary for review. This notice announces that proposed amendment 127 to the FMP for Groundfish of the BSAI (BSAI Groundfish FMP); proposed amendment 115 to the FMP for Groundfish of the GOA (GOA Groundfish FMP); proposed amendment 56 to the FMP for BSAI King and Tanner Crabs (Crab FMP); proposed amendment 17 to the FMP for the Salmon Fisheries in the EEZ Off Alaska (Salmon FMP); and proposed amendment 3 to the FMP for Fish Resources of the Arctic Management Area (Arctic FMP) are available for public review and comment.

The Council prepared the FMPs under the authority of the Magnuson-Stevens Act. Regulations governing U.S. fisheries and implementing the FMPs appear at 50 CFR parts 600, 679, and 680. Section 303(a)(7) of the Magnuson-Stevens Act requires that each FMP describe and identify EFH, minimize to the extent practicable the adverse effects of fishing on EFH, and identify other measures to encourage the conservation and enhancement of EFH. Section 3(10) of the Magnuson-Stevens Act defines EFH as ''those waters and substrate necessary to fish for spawning, breeding, feeding, or growth to maturity.'' Implementing regulations at 50 CFR 600.815 list the EFH contents required in each FMP and direct councils to conduct a complete review of all EFH information at least once every 5 years (referred to here as ''the 5-year review'').

The Council developed the amendments as a result of new scientific information made available through the 5-year review that began in 2019 (2023 5-year review) and adopted the amendments in December 2023. The 2023 5-year review is the Council's fourth review of EFH in the FMPs. Prior 5-year reviews were completed in 2005, 2012, and 2018. The Council recommended amendments to the description and identification of EFH in the FMPs with new information and improved mapping as described in the draft EFH 5-year Summary Report for the 2023 5-year review. The Council also recommended updates to EFH information based on the best available information in the Summary Report. The Council recommended updates to EFH for all FMPs except for the Scallop FMP because no new information is available to update EFH descriptions for scallops.

The amendments would make the following changes to the FMPs:

- *BSAI Groundfish FMP, GOA Groundfish FMP, Crab FMP, and Arctic FMP:* update EFH descriptions and maps, including up to EFH Level 3 information on habitat-related vital rates (see 50 CFR 600.815(a)(1)(iii)(A)). Add or revise the EFH text descriptions and add or replace the maps for—
  - 41 species or complexes in the BSAI Groundfish FMP;
  - 46 species or complexes in the GOA Groundfish FMP;
  - all five species in the Crab FMP; and
  - all three species in the Arctic FMP.
- *Salmon FMP:* replace the distribution maps for all five species with the EFH maps.
- *BSAI Groundfish FMP, GOA Groundfish FMP, and Crab FMP:* changes based on the updated information for fishing effects (FE) to reflect updates to the FE model, analysis, and evaluation.
- *BSAI Groundfish FMP, GOA Groundfish FMP, Crab FMP, and Arctic FMP:* revise the EFH appendices where conservation recommendations for non-fishing activities are described.
- *BSAI Groundfish FMP, GOA Groundfish FMP, and Crab FMP:* revise prey species descriptions for two species of BSAI sharks, BSAI pollock, GOA Pacific cod, and BSAI red king crab.
- *BSAI Groundfish FMP, GOA Groundfish FMP, Crab FMP, and Arctic FMP:* revise EFH appendices with updated research and information needs.

NMFS is soliciting public comments on the proposed amendments through the end of the comment period (see **DATES**). All relevant written comments received by the end of the applicable comment period will be considered by NMFS in the approval/partial approval/disapproval decision for the amendments and addressed in the response to comments in the final decision. Comments received after end of the applicable comment period will not be considered in the approval/partial approval/disapproval decision on the amendments. To be considered, comments must be received, not just postmarked or otherwise transmitted, by the last day of the comment period (see **DATES**).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 18, 2024.

Everett Wayne Baxter,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. FSIS–2024–0006]

Notice of Request To Renew an Approved Information Collection: Requirements To Notify FSIS of Adulterated or Misbranded Product, Prepare and Maintain Written Recall Procedures, and Document Certain HACCP Plan Reassessments

AGENCY: Food Safety and Inspection Service (FSIS), U.S. Department of Agriculture (USDA).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 and Office of Management and Budget (OMB) regulations, FSIS is announcing its intention to renew an approved information collection regarding requirements for official establishments to notify FSIS of adulterated or misbranded product, prepare and maintain written recall procedures, and document certain Hazard Analysis and Critical Control Point (HACCP) plan reassessments. There are no changes to the existing information collection. The approval for this information collection will expire on September 30, 2024.

DATES: Submit comments on or before June 24, 2024.

ADDRESSES: FSIS invites interested persons to submit comments on this **Federal Register** notice. Comments may be submitted by one of the following methods:

- *Federal eRulemaking Portal:* This website provides commenters the ability to type short comments directly into the comment field on the web page or to attach a file for lengthier comments. Go to *https://www.regulations.gov.* Follow the on-line instructions at that site for submitting comments.
- *Mail:* Send to Docket Clerk, U.S. Department of Agriculture, Food Safety and Inspection Service, 1400 Independence Avenue SW, Mailstop 3758, Washington, DC 20250–3700.
- Hand- or courier-delivered submittals: Deliver to 1400 Independence Avenue SW, Jamie L. Whitten Building, Room 350–E, Washington, DC 20250–3700.

Instructions: All items submitted by mail or electronic mail must include the Agency name and docket number FSIS–2024–0006. Comments received in response to this docket will be made available for public inspection and posted without change, including any personal information, to *https://www.regulations.gov.*

Docket: For access to background documents or comments received, call 202–720–5046 to schedule a time to visit the FSIS Docket Room at 1400 Independence Avenue SW, Washington, DC 20250–3700.

FOR FURTHER INFORMATION CONTACT: Gina Kouba, Office of Policy and Program Development, Food Safety and Inspection Service, USDA, 1400 Independence Avenue SW, Mailstop 3758, South Building, Washington, DC 20250–3700; 202–720–5046.

SUPPLEMENTARY INFORMATION:

Title: Requirements To Notify FSIS of Adulterated or Misbranded Product, Prepare and Maintain Written Recall Procedures, and Document Certain HACCP Plan Reassessments.

OMB Number: 0583–0144.

Type of Request: Renewal of an approved information collection.

Abstract: FSIS has been delegated the authority to exercise the functions of the Secretary (7 CFR 2.18, 2.53), as specified in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601, *et seq.*), the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, *et seq.*), and the Egg Products Inspection Act (EPIA) (21 U.S.C. 1031, *et seq.*). These statutes mandate that FSIS protect the public by verifying that meat, poultry, and egg products are safe, wholesome, unadulterated, and properly labeled.

FSIS is requesting renewal of an approved information collection regarding requirements for official establishments to notify FSIS of adulterated or misbranded product, prepare and maintain written recall procedures, and document certain HACCP plan reassessments. There are no changes to the existing information collection. The approval for this information collection will expire on September 30, 2024.

The regulations at 9 CFR 418.2, 418.3 and 417.4(a)(3) require establishments to notify FSIS that they have shipped or received adulterated or misbranded product in commerce, prepare and maintain written recall procedures, and document HACCP plan reassessments. Accordingly, FSIS requires three information collection activities under these regulations.

First, FSIS requires that official establishments notify the appropriate District Office that an adulterated or misbranded product received by or originating from the establishment has entered commerce, if the establishment believes or has reason to believe that this has happened. Industry representatives of official establishments may notify the District Office directly, notify local FSIS inspection personnel in receiving establishments, or may use FSIS Form 5720–16, *Industry Report of Adulteration,* to notify FSIS that an adulterated or misbranded meat, meat food, poultry, or poultry product was received from or shipped into commerce by the official establishment. The form is available as a paper form and digitally in the Public Health Information System (PHIS).

Second, FSIS requires that establishments prepare and maintain written procedures for the recall of meat and poultry products produced and shipped by the establishment for use should it become necessary for the establishment to remove product from commerce. These written recall procedures have to specify how the establishment will decide whether to conduct a product recall, and how the establishment will affect the recall should it decide that one is necessary.

Finally, FSIS requires that establishments document each reassessment of the establishment's HACCP plans. FSIS requires establishments to reassess their HACCP plans annually and whenever any changes occur that could affect the hazard analysis or alter the HACCP plan. For annual reassessments, if the establishment determines that no changes are necessary, documentation of this determination is not necessary.

FSIS has made the following estimates as part of an information collection assessment.

Estimate of burden: The public reporting burden for this collection of information is estimated to average .232 hours per response.

Respondents: Official meat and poultry products establishments.

Estimated annual number of respondents: 6,300.

Estimated average number of responses per respondent: 6.8.

Estimated annual number of responses: 42,900.

Estimated total annual burden on respondents: 9,960.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record. Copies of this information collection assessment can be obtained from Gina Kouba, Office of Policy and Program Development, Food Safety and Inspection Service, USDA, 1400 Independence Avenue SW, Mailstop 3758, South Building, Washington, DC 20250–3700; 202–720–5046.

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of FSIS' functions, including whether the information will have practical utility; (b) the accuracy of FSIS' estimate of the burden of the proposed collection of information, including the validity of the method and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques, or other forms of information technology. Comments may be sent to both FSIS, at the addresses provided above, and the Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Washington, DC 20253.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS web page located at: *https://www.fsis.usda.gov/federal-register.*

FSIS will also announce and provide a link to this **Federal Register** publication through the FSIS *Constituent Update,* which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The *Constituent Update* is available on the FSIS web page. Through the web page, FSIS can provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: *https://www.fsis.usda.gov/subscribe.* Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves and have the option to password protect their accounts.

USDA Non-Discrimination Statement

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (*e.g.,* Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; the USDA TARGET Center at (202) 720–2600 (voice and TTY); or the Federal Relay Service at (800) 877–8339.

To file a program discrimination complaint, a complainant should complete a Form AD–3027, *USDA Program Discrimination Complaint Form,* which can be obtained online at *https://www.usda.gov/forms/electronic-forms,* from any USDA office, by calling (866) 632–9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD–3027 form or letter must be submitted to USDA by:

(1) *Mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410;

(2) *Fax:* (833) 256–1665 or (202) 690–7442; or

(3) *Email: program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Paul Kiecker,

Administrator.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–65–2023]

Foreign-Trade Zone (FTZ) 125; Authorization of Production Activity; Grand Design RV, LLC; (Motor Homes); Middlebury, Indiana

On December 19, 2023, Grand Design RV, LLC submitted a notification of proposed production activity to the FTZ Board for its facility within Subzone 125H in Middlebury, Indiana.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (88 FR 90164, December 29, 2023). On April 17, 2024, the applicant was notified of the FTZ Board's decision that no further review of the activity is warranted at this time. The production activity described in the notification was authorized, subject to the FTZ Act and the FTZ Board's regulations, including section 400.14.

Dated: April 17, 2024.

Elizabeth Whiteman,

Executive Secretary.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD888]

Western Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The Western Pacific Fishery Management Council (Council) will

hold its Main Hawaiian Islands (MHI) Deep 7 Bottomfish (BF) Risk of Overfishing (P*) Working Group (WG), MHI Social, Economic, Ecological, and Management WG to discuss and make recommendations on fishery management issues in the Western Pacific Region.

DATES: The meetings will be held on May 7, 2024. For specific times and agendas, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The Western Pacific Fishery Management Council (Council) will hold its Main Hawaiian Islands (MHI) Deep 7 Bottomfish (BF) Risk of Overfishing (P*) Working Group (WG), MHI Social, Economic, Ecological, and Management (SEEM) WG meetings will be held in a hybrid format with in-person and remote participation (Google Meets) options available for the members and the public. In person attendance for members and public will be hosted at the Council office, 1164 Bishop Street, Suite 1400, Honolulu, HI 96813. Instructions for connecting to the web conference and providing oral public comments will be posted on the Council website at *www.wpcouncil.org.* For assistance with the web conference connection, contact the Council office at (808) 522–8220.

Council address: Western Pacific Fishery Management Council, 1164 Bishop Street, Suite 1400, Honolulu, HI 96813.

FOR FURTHER INFORMATION CONTACT: Contact Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council; phone: (808) 522–8220.

SUPPLEMENTARY INFORMATION: The MHI Deep 7 P* WG will meet on Tuesday, May 7, from 9 a.m. to 12 p.m., MHI Deep 7 SEEM WG will meet on Tuesday, from 1 p.m. to 4 p.m. All times listed in HST.

Public Comment periods will be provided in the agendas. The order in which agenda items are addressed may change. The meetings will run as late as necessary to complete scheduled business.

Schedule and Agenda for the MHI Deep 7 Bottomfish P* Working Group

Tuesday, May 7, 2024, 9 a.m.–12 p.m. (Hawaii Standard Time)

1. Welcome and Introductions
2. Recommendations from previous Council meetings
3. Overview of the P* process
4. Report on 2023 Benchmark Stock Assessment for the MHI Deep 7
5. Working group scoring session
   a. Assessment information
   b. Uncertainty characterization
   c. Stock status
   d. Productivity and susceptibility
6. General Discussion
7. Public Comment
8. Summary of scores and P* Recommendations

Schedule and Agenda for the MHI Deep 7 Bottomfish SEEM Working Group

Tuesday, May 7, 2024, 1 p.m.–4 p.m. (Hawaii Standard Time)

1. Introductions
2. Overview of the SEEM process
3. Scoring of the SEEM Dimensions and Criteria Scores
   a. Social
   b. Economic
   c. Ecological
   d. Monitoring
   e. Management Uncertainty
4. Finalizing the SEEM scores
5. Public Comment
6. Summary of scores and SEEM Recommendations

Special Accommodations

These meetings are accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds, (808) 522–8220 (voice) or (808) 522–8226 (fax), at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 18, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[RTID 0648–XD891]

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The MAFMC will hold a public meeting (webinar) of its Spiny Dogfish Advisory Panel. See **SUPPLEMENTARY INFORMATION** for agenda details.

DATES: The meeting will be held on Thursday, May 9, 2024, from 5 p.m. to 7:30 p.m.

ADDRESSES: Webinar connection information will be posted to the calendar prior to the meeting at *www.mafmc.org.*

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; *www.mafmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The main purpose of the meeting is for the Advisory Panel (AP) to create a Fishery Performance Report that includes advisor input on specifications and management measures for spiny dogfish. While a management track assessment was used in 2023 to set 2024–2026 specifications, multi-year specifications are reviewed each year. The MAFMC will consider the Fishery Performance Report later in 2024 when 2025 spiny dogfish specifications are reviewed. Public comments will also be taken.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to Shelley Spedden, (302) 526–5251, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 18, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the Port of Nome Modification Project in Nome, Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of incidental harassment authorization.

SUMMARY: NMFS has received a request from the U.S. Army Corps of Engineers (USACE) for the reissuance of a previously issued incidental harassment authorization (IHA) with the only

change being effective dates. The initial IHA authorized take of 10 species of marine mammals, by Level B harassment only, incidental to construction activities associated with the Port of Nome Modification Project in Nome, Alaska. The project has been delayed by 1 year and none of the work covered in the initial IHA has been conducted. The initial IHA was effective from May 1, 2024 through April 30, 2025. USACE has requested reissuance with new effective dates of May 1, 2025 through April 30, 2026. The scope of the activities and anticipated effects remain the same, authorized take numbers are not changed, and the required mitigation, monitoring, and reporting remains the same as included in the initial IHA. NMFS is, therefore, issuing a second identical IHA to cover the incidental take analyzed and authorized in the initial IHA.

DATES: This authorization is effective from May 1, 2025 through April 30, 2026.

ADDRESSES: An electronic copy of the final 2023 IHA previously issued to USACE, the USACE's application, and the **Federal Register** notices proposing and issuing the initial IHA may be obtained by visiting *https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-construction-activities.* In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Leah Davis, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the Marine Mammal Protection Act (MMPA; 16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

NMFS has defined ''negligible impact'' in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

The MMPA states that the term ''take'' means to harass, hunt, capture, kill or attempt to harass, hunt, capture, or kill any marine mammal.

Except with respect to certain activities not pertinent here, the MMPA defines ''harassment'' as any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

Summary of Request

On September 7, 2023, NMFS published final notice of our issuance of an IHA authorizing take of marine mammals incidental to the Port of Nome Modification Project in Nome, Alaska (88 FR 61806). The effective dates of that IHA were May 1, 2024 through April 30, 2025. On March 4, 2024, USACE informed NMFS that the project would be delayed by one year. None of the work identified in the initial IHA (*e.g.,* pile driving and removal) has occurred. USACE subsequently submitted a request on March 18, 2024 for NMFS to reissue an identical IHA that would be effective from May 1, 2025 through April 30, 2026, in order to conduct the construction work that was analyzed and authorized through the previously issued IHA. Therefore, reissuance of the IHA is appropriate.

Summary of Specified Activity and Anticipated Impacts

The planned activities (including mitigation, monitoring, and reporting), authorized incidental take, and anticipated impacts on the affected stocks are the same as those analyzed and authorized through the previously issued IHA.

The City of Nome and USACE are proposing to expand the Port of Nome to provide much-needed additional capacity to serve the Arctic as well as to alleviate congestion at the existing port facilities. This IHA would authorize take associated with Year 1 of Phase 1 of the project only. The location, timing, and nature of the activities, including the types of equipment planned for use, are identical to those described in the initial IHA. The mitigation and monitoring are also as prescribed in the initial IHA.

Species that are expected to be taken by the planned activity include bowhead whale (*Balaena mysticetus*), minke whale (*Balaenoptera acutorostrata*), gray whale (*Eschrichtius robustus*), killer whale (*Orcinus orca*), harbor porpoise (*Phocoena phocoena*), beluga whale (*Delphinapterus leucas*), Steller sea lion (*Eumetopias jubatus*), spotted seal (*Phoca largha*), ringed seal (*Pusa hispida*), ribbon seal (*Histriophoca fasciata*), bearded seal (*Erignathus barbatus*). A description of the methods and inputs used to estimate take anticipated to occur and, ultimately, the take that was authorized is found in the previous documents referenced above. The data inputs and methods of estimating take are identical to those used in the initial IHA. NMFS has reviewed recent Stock Assessment Reports (SAR), information on relevant Unusual Mortality Events, and recent scientific literature. While the bowhead whale (Western Arctic stock) stock assessment information was updated in the draft 2023 SAR, NMFS determined that no new information affects our original analysis of impacts or take estimate under the initial IHA.

We refer to the documents related to the previously issued IHA, which include the **Federal Register** notice of the issuance of the initial 2023 IHA for the USACE's construction work (88 FR 61806, September 7, 2023), USACE's application, the **Federal Register** notice of the proposed IHA (88 FR 27464, May 2, 2023), and all associated references and documents.

Determinations

The USACE will conduct activities as analyzed in the initial 2023 IHA. As described above, the number of authorized takes of the same species and stocks of marine mammals are identical to the numbers that were found to meet the negligible impact small numbers standards and authorized under the initial IHA and no new information has emerged that would change those findings. The reissued 2024 IHA includes identical required mitigation, monitoring, and reporting measures as the initial IHA, and there is no new information suggesting that our analysis or findings should change.

Based on the information contained here and in the referenced documents, NMFS has determined the following: (1) the required mitigation measures will

effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small numbers of marine mammals relative to the affected stock abundances; and (4) USACE's activities will not have an unmitigable adverse impact on taking for subsistence purposes.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216–6A, NMFS must review our proposed action with respect to environmental consequences on the human environment.

Accordingly, NMFS determined that the issuance of the initial IHA qualified to be categorically excluded from further NEPA review. NMFS has determined that the application of this categorical exclusion remains appropriate for this reissued IHA.

Endangered Species Act (ESA)

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA: 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally, in this case with the Alaska Regional Office, whenever we propose to authorize take for endangered or threatened species.

The effects of this proposed Federal action were adequately analyzed in NMFS' Biological Opinion for the Port of Nome Modification Project, dated July 27, 2023, which concluded that the take NMFS proposed to authorize through this IHA would not jeopardize the continued existence of any endangered or threatened species or destroy or adversely modify any designated critical habitat.

Authorization

NMFS has issued an IHA to the USACE for in-water construction activities associated with the specified activity from May 1, 2025 through April 30, 2026. All previously described mitigation, monitoring, and reporting requirements from the initial 2021 IHA are incorporated.

Dated: April 17, 2024.

Kimberly Damon-Randall,

Director, Office of Protected Resources, National Marine Fisheries Service.

Mid-Atlantic Fishery Management Council (MAFMC); Public Meetings and Request for Comments

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meetings and request for comments.

SUMMARY: The Mid-Atlantic Fishery Management Council (Council) will hold three public hearings (one as a webinar) and accept written comments regarding an action intended to revise the species separation requirements in the Atlantic surfclam and ocean quahog fisheries.

DATES: The hearings will be held between May 9, 2024 and May 16, 2024. Written comments must be received by May 30, 2024. See **SUPPLEMENTARY INFORMATION** for details, including the dates and times for all hearings.

ADDRESSES: See **SUPPLEMENTARY INFORMATION** for hearing details.

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; *www.mafmc.org.*

Written comments may be submitted to:

- *Email to: jcoakley@mafmc.org* (use subject ''SCOQ Species Separation'').
- *Via webform at: https://www.mafmc.org/comments/scoq-species-separation.*
- *Mail to:* Chris Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, 800 North State Street, Suite 201, Dover, DE 19901. Mark the outside of the envelope ''SCOQ Species Separation.''

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The Council will hold three public hearings and accept written comments regarding an action intended to modify the current species separation requirements in the Atlantic surfclam and ocean quahog fisheries. Additional details, including the public hearing document can be found at: *https://www.mafmc.org/actions/scoq-species-separation.*

Hearing 1—Webinar. Thursday, May 9, 2024. 6 p.m.–9 p.m., Connection details can be found at the Council's website calendar or *https://www.mafmc.org/actions/scoq-species-separation.*

Hearing 2—Philadelphia, Pennsylvania. Tuesday May 14, 2024. 6:30 p.m.–9:30 p.m., Embassy Suites Philadelphia Airport. 9000 Bartram Avenue, Philadelphia, PA 19153; phone: (215) 365–4500.

Hearing 3—Braintree, Massachusetts. Thursday, May 16, 2024. 6:30 p.m.–9:30 p.m., Hyatt Place Boston/Braintree 50 Forbes Rd, Braintree, MA 02184; phone: (781) 848–0600.

Written comments are accepted at the hearings or via the submission methods described above, from May 1, 2024–May 30, 2024.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to Shelley Spedden, (302) 526–5251, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 18, 2024.

Patent and Trademark Office

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Fastener Quality Act Insignia Recordal Process

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Notice of information collection; request for comment.

SUMMARY: The United States Patent and Trademark Office (USPTO), as required by the Paperwork Reduction Act of 1995, invites comments on the extension and revision of an existing information collection: 0651–0028 Fastener Quality Act Insignia Recordal

Process. The purpose of this notice is to allow 60 days for public comment preceding submission of the information collection to OMB.

DATES: To ensure consideration, comments regarding this information collection must be received on or before June 24, 2024.

ADDRESSES: Interested persons are invited to submit written comments by any of the following methods. Do not submit Confidential Business Information or otherwise sensitive or protected information.

- *Email: InformationCollection@uspto.gov.* Include ''0651–0028 comment'' in the subject line of the message.
- *Federal eRulemaking Portal: http://www.regulations.gov.*
- *Mail:* Justin Isaac, Office of the Chief Administrative Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Catherine Cain, Attorney Advisor, Office of the Commissioner for Trademarks, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450; by telephone at 571–272–8946; or by email at *Catherine.Cain@uspto.gov* with ''0651–0028 comment'' in the subject line. Additional information about this information collection is also available at *http://www.reginfo.gov* under ''Information Collection Review.''

SUPPLEMENTARY INFORMATION:

I. Abstract

Under section 5 of the Fastener Quality Act (FQA) of 1999,[1] 15 U.S.C. 5401 *et seq.,* certain industrial fasteners must bear an insignia identifying the manufacturer. It is also mandatory for manufacturers of fasteners covered by the FQA to submit an application to the USPTO for recordal of the insignia on the Fastener Insignia Register.

The procedures for the recordal of fastener insignia under the FQA are set forth in 15 CFR 280.300 *et seq.* The purpose of requiring both the insignia and the recordation is to ensure that certain fasteners can be traced to their manufacturers and to protect against the sale of mismarked, misrepresented, or counterfeit fasteners.

The insignia may be a unique alphanumeric designation that the USPTO will issue upon request or a trademark that is registered at the USPTO or is the subject of an application to obtain a registration. After a manufacturer submits a complete application for recordal, the USPTO issues a Certificate of Recordal. These certificates remain active for five years. Applications to renew the certificates must be filed within six months of the expiration date or, upon payment of an additional surcharge, within six months following the expiration date.

If a recorded alphanumeric designation is assigned by the manufacturer to a new owner, the designation becomes ''inactive'' and the new owner must submit an application to reactivate the designation within six months of the date of assignment. If the recordal is based on a trademark application or registration and the registration is assigned to a new owner, the recordal becomes ''inactive'' and cannot be reassigned. Instead, the new owner of the trademark application or registration must apply for a new recordal. Manufacturers who record insignia must notify the USPTO of any changes of address.

This information collection includes one form, the Application for Recordal of Insignia or Renewal/Reactivation of Recordal Under the Fastener Quality Act (PTO–1611), which provides manufacturers with a convenient way to submit a request for the recordal of a fastener insignia or to renew or reactivate an existing Certificate of Renewal.

The public uses this information collection to comply with the insignia recordal provisions of the FQA. The USPTO uses the information in this collection to record or renew insignias under the FQA and to maintain the Fastener Insignia Register, which is open for public inspection and is updated quarterly. The public may download the Fastener Insignia Register from the USPTO website.[2]

II. Method of Collection

The items in this information collection can be submitted by mail, email, or hand delivery to the USPTO.

III. Data

OMB Control Number: 0651–0028.

Forms:

- PTO–1611 (Application for Recordal of Insignia or Renewal/Reactivation of Recordal Under the Fastener Quality Act).

Type of Review: Extension and revision of a currently approved information collection.

Affected Public: Private sector.

Respondent's Obligation: Required to obtain or retain benefits.

Estimated Number of Annual Respondents: 90 respondents.

Estimated Number of Annual Responses: 90 responses.

Frequency: On occasion.

Estimated Time per Response: The USPTO estimates that the responses in this information collection will take the public approximately 30 minutes (0.50 hours) to complete. This includes the time to gather the necessary information, prepare the form, and submit the completed request to the USPTO.

Estimated Total Annual Respondent Burden Hours: 45 hours.

Estimated Total Annual Respondent Hourly Cost Burden: $20,115.

TABLE 1—TOTAL BURDEN HOURS AND HOURLY COSTS TO PRIVATE SECTOR RESPONDENTS

Item No.	Item	Estimated annual respondents (a)	Responses per respondent (b)	Estimated annual responses (a) × (b) = (c)	Estimated time for response (hours) (d)	Estimated burden (hour/year) (c) × (d) = (e)	Rate[3] ($/hour) (f)	Estimated annual respondent cost burden (e) × (f) = (g)
1	Applications for Recordal of Insignia or Renewal/Reactivation of Recordal Under the Fastener Quality Act.	90	1	90	0.50	45	$447	$20,115
	Totals	90	.....	90	.....	45	.....	20,115

[1] *https://www.govinfo.gov/content/pkg/PLAW-106publ34/pdf/PLAW-106publ34.pdf.*

[2] *https://www.uspto.gov/trademarks/laws/fastener-quality-act-fqa/fastener-quality-act-fqa.*

[3] 2023 Report of the Economic Survey, published by the Committee on Economics of Legal Practice of the American Intellectual Property Law Association (AIPLA); pg. F–41. The USPTO uses the average billing rate for intellectual property work in all firms which is $447 per hour (*https://www.aipla.org/home/news-publications/economic-survey*).

Estimated Total Annual Respondent Non-hourly Cost Burden: $2,413. There are no capital start-up, maintenance costs, or recordkeeping costs associated with this information collection. However, the USPTO estimates that the total annual (non-hour) cost burden for this information collection, in the form of filing fees and postage is $2,413.

Filing Fees

The application in this information collection has two associated filing fees, resulting in $2,240 in annual non-hourly cost burden.

Item No.	Fee code	Item	Estimated annual responses (a)	Filing fee ($) (b)	Non-hourly cost burden (a) × (b) = (c)
1	6991 6992	Filing an application for recordal of insignia or renewal/reactivation of recordal.	90	$20	$1,800
1	6993 6994	Surcharge for filing six months after the expiration date—Filing an application for recordal of insignia or renewal/reactivation of recordal.	22	20	440
	Totals		112		2,240

Postage Costs

Although the USPTO prefers that the items in this information collection be submitted via email, responses may be submitted by mail through the United States Postal Service (USPS). The USPTO estimates that 17 items will be submitted in the mail. The USPTO estimates that the average postage cost for a mailed submission, using a Priority Mail legal flat rate envelope, will be $10.15. Therefore, the USPTO estimates the total mailing costs for this information collection at $173.

IV. Request for Comments

The USPTO is soliciting public comments to:

(a) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected; and

(d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

All comments submitted in response to this notice are a matter of public record. The USPTO will include or summarize each comment in the request to OMB to approve this information collection. Before including an address, phone number, email address, or other personally identifiable information (PII) in a comment, be aware that the entire comment—including PII—may be made publicly available at any time. While you may ask in your comment to withhold PII from public view, the USPTO cannot guarantee that it will be able to do so.

Justin Isaac,

Information Collections Officer, Office of the Chief Administrative Officer, United States Patent and Trademark Office.

BILLING CODE 3510–16–P

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. CPSC–2023–0032]

Notice of Availability: Supplemental Guidance for CPSC Chronic Hazard Guidelines

AGENCY: U.S. Consumer Product Safety Commission.

ACTION: Notice of availability.

SUMMARY: The Consumer Product Safety Commission (Commission or CPSC) is announcing the availability of final supplemental guidance for its Chronic Hazard Guidelines. This supplemental guidance contains two guidance documents, one for the use of benchmark dose methodology in risk assessment and the other for the analysis of uncertainty and variability in risk assessment.

ADDRESSES: *Docket:* For access to the docket to read background documents or comments received, go to *www.regulations.gov* and insert the docket number, CPSC–2023–0032, in the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Eric Hooker, Directorate for Health Sciences, U.S. Consumer Product Safety Commission, 5 Research Place, Rockville, MD 20850; telephone: (301) 987–2516; email: *ehooker@cpsc.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In 1992, the Commission issued guidelines for assessing chronic hazards (Chronic Hazard Guidelines or Guidelines) under the Federal Hazardous Substances Act (FHSA), 15 U.S.C. 1261–78, including carcinogenicity, neurotoxicity, reproductive/developmental toxicity, exposure, bioavailability, risk assessment, and acceptable risk. 57 FR 46626. In August 2023, the Commission issued a Notice of Availability containing Proposed Supplemental Guidance for CPSC Chronic Hazard Guidelines and asked for comments on the proposed guidance. 88 FR 57947. After reviewing those comments, the Commission is now issuing the final supplemental guidance contained below in sections III and IV.[1]

Determining whether a product is or contains a hazardous substance involves scientific analysis, legal interpretation, and the application of policy judgment. The Guidelines are intended to assist firms in identifying products that present chronic hazards, to meet their labeling obligations under the FHSA and the Labeling of Hazardous Art Materials Act (LHAMA). 15 U.S.C. 1277. They are not binding on industry or the Commission. Indeed, chronic toxicity may be established in various ways. The Commission may determine that a product is a hazardous substance due to a chronic hazard based on any evidence that is relevant and material to such a determination.

[1] On April 12, 2024, the Commission voted 5–0 to approve publication of this notice. Commissioners Feldman and Dziak submitted a joint statement, available at *https://www.cpsc.gov/About-CPSC/Commissioner/Douglas-Dziak-Peter-A-Feldman/Statement/Statement-of-Commissioners-Peter-A-Feldman-and-Douglas-Dziak-on-CPSC-Chronic-Hazard-Guidelines.* Commissioner Trumka submitted a statement, available at *https://www.cpsc.gov/About-CPSC/Commissioner/Richard-Trumka/Statement/CPSC-Revamps-Chronic-Hazards-Guidelines-Making-It-Easier-to-Protect-You-From-Toxic-Chemicals-in-Your-Home.*

For example, peer-reviewed scientific studies by third parties and toxicity assessments from CPSC's peer agencies may be relevant and material evidence to establish chronic toxicity and that a substance is a ''hazardous substance'' under the FHSA. Likewise, evidence from third parties may be useful to determine chronic toxicity. For instance, third party studies may indicate that chronic adverse health effects are associated with foreseeable levels of consumer exposure, allowing the Commission to conclude that the FHSA's criteria for a ''hazardous substance'' are satisfied. Other cases, however, may require original research to fill gaps in knowledge.

In addition, while the Guidelines describe certain toxic endpoints, they do not limit the toxic endpoints the Commission may consider. The Commission may consider all forms of personal injury or illness as potential toxic endpoints.

The Chronic Hazard Guidelines, which should be understood as a set of best practices, are not mandatory for the Commission or for stakeholders. The guidelines describe methods that CPSC staff may use to assess chronic hazards under the FHSA. Furthermore, the guidelines are intended to be sufficiently flexible to incorporate the latest scientific information, such as advances in risk assessment methodology. Risk assessors may deviate from the default assumptions described in the guidelines, provided that their methods and assumptions are documented, scientifically defensible, and supported by appropriate data as indicated in section VI.A.2 of the preamble of the guidelines. 57 FR 46633. However, given that the guidelines represent an available set of best practices, risk assessors are encouraged to use the information and approaches outlined therein where appropriate.

In the years since the guidelines were issued, there have been numerous advances in the basic science underlying the guidelines, such as the use of transgenic animals to elucidate mechanisms of carcinogenicity and toxicity. There also have been several changes in the practice of risk assessment, including wider acceptance and use of risk assessment methods such as the benchmark dose approach and probabilistic exposure assessment. Therefore, CPSC is finalizing two guidance documents to supplement the 1992 guidelines.

The first supplement provides guidance for the application of benchmark dose methodology (BMD) to risk assessment. This supplement discusses an alternative to the traditional approach described in the original guidelines for estimating acceptable daily intakes (ADIs) for carcinogenic and other hazards, such as neurotoxicological or reproductive/developmental hazards. The second supplement is guidance for the analysis of uncertainty and variability, including use of probabilistic risk assessment methodology, which is most relevant to exposure assessment.

Like the 1992 guidelines, the supplemental guidance documents are not mandatory. Rather, they describe methods that CPSC staff and manufacturers may use to evaluate chronic hazards. The guidelines are intended to assist manufacturers in complying with the requirements of the FHSA and to facilitate the use of reliable risk assessment methodologies by both manufacturers and CPSC staff.

II. Response to Comments

In response to the Commission's August 2023 Notice of Availability of the proposed supplemental guidance, the Commission received two comments. The commenters were the National Center for Health Research (NCHR) and one individual, Albert Donnay. They had questions about the timing of the release of the guidance, technical details of benchmark dose modeling, how to determine risk assessment approaches in the context of the guidance, and the citation of references after the 2008 peer review of the supplemental guidance.

Comment 1: NCHR noted that time has passed since a draft of the Supplemental Guidance was peer reviewed in 2008.

Response 1: Although the Supplemental Guidance might have been finalized earlier, the methods and approaches described in the Chronic Hazard Guidelines and the Supplemental Guidance are neither mandatory nor proscriptive. Publication of the Supplemental Guidance does not change the Commission's substantive policies. As before, risk assessors are encouraged to use modern and applicable approaches to identify and quantify consumer product chemical hazards and risks, provided that methods and assumptions are documented, scientifically defensible, and supported by appropriate data.

Comment 2: NCHR questioned whether it is appropriate to recommend using linear modeling of benchmark dose assessment for all carcinogens and non-carcinogens.

Response 2: Linear dose-response modeling describes a constant proportional increase in a biological response (*e.g.,* toxicity) as the dose or exposure level increases and is often used for low dose cancer risk assessments. Contrary to this comment, the supplemental guidance does not recommend linear modeling for *all* carcinogens and noncarcinogens. For non-cancer endpoints, the supplemental guidance specifically states that ''a non-linear dose response is generally presumed. . . .'' On the other hand, for cancer risk, the Commission prefers linear extrapolation to the background level from the BMD as a point of departure (PoD). However, the guidance also describes that a non-linear dose response with use of uncertainty factors may be used if there is convincing evidence that the dose response is non-linear at low doses. The preference for the linear assumption is based on theoretical considerations of carcinogenicity, as well as modeling considerations, which are described in detail in the Chronic Hazard Guidelines and the Supplemental Guidance. The supplemental guidance also states that risk assessors may use methods other than those described in the guidelines, provided that their methods and assumptions are documented, scientifically defensible, and supported by appropriate data.

Comment 3: NCHR requested more specific guidance as to the conditions under which it would be acceptable to deviate from the assessment methodology outlined in the guidance.

Response 3: CPSC's reference to the use of professional judgment is based on its expectation that the risk assessor has the training, expertise, and experience to analyze datasets using the tools and approaches that are most appropriate and relevant to meet the needs and requirements for each assessment. The Commission understands that a variety of tools, models, and methods currently exist, and anticipates further advancements in this science. Thus, the supplemental guidance reiterates that expertise and professional judgment are required when applying the guidelines and emphasizes that the guidelines cannot be applied mechanically.

Comment 4: Albert Donnay asked when these supplements were most recently revised, what contractor(s) contributed to the latest revisions if they were not done solely by staff, and how many independent scientists with expertise in either BMD or PRA reviewed the post-2008 revisions before they were published in the FR.

Response 4: After the peer review of the supplements conducted in 2008, CPSC staff revised and updated the proposed supplements to incorporate discussion of more recently released

tools, such as benchmark dose software packages and supporting guidance documents from the U.S. Environmental Protection Agency (EPA) and the Dutch National Institute for Public Health and the Environment (RIVM). In addition, CPSC staff updated the references in the draft supplemental guidance to include literature published after 2008 and assessed that the more recent literature did not indicate a need for revision of the draft supplemental guidance or for additional independent review. These updates were performed by CPSC staff without participation of contractors.

Having considered the comments, the Commission is finalizing the guidance as proposed, without changes. The Final Supplemental Guidance for the Use of Benchmark Dose Methodology in Risk Assessment and Final Supplemental Guidance for the Analysis of Uncertainty and Variability in Risk Assessment are stated in sections III and IV.

III. Final Supplemental Guidance for the Use of Benchmark Dose Methodology in Risk Assessment

A. Background

In 1992, the U.S. Consumer Product Safety Commission (CPSC) issued guidelines for assessing chronic hazards under the Federal Hazardous Substances Act (FHSA) and the Labeling of Hazardous Art Materials Act (LHAMA), including carcinogenicity, neurotoxicity, reproductive/developmental toxicity, exposure, bioavailability, risk assessment, and acceptable risk (CPSC 1992). 57 FR 46626. The chronic hazard guidelines, which are not mandatory for CPSC or stakeholders, are intended as an aid to manufacturers in making their determination of whether a product is a hazardous substance due to chronic toxicity, and thus would require labeling under the FHSA. The guidelines describe methods that CPSC staff use to assess chronic hazards under the FHSA. Furthermore, the guidelines are intended to be sufficiently flexible to incorporate the latest scientific information, such as advances in risk assessment methodology. Risk assessors may deviate from the default assumptions described in the guidelines, provided that their methods and assumptions are documented, scientifically defensible, and supported by appropriate data. However, given that the guidelines represent an available set of best practices, risk assessors are encouraged to use the information and approaches outlined therein where appropriate, and other methods will be reviewed by staff to determine acceptability.

In the years since the guidelines were issued, there have been numerous advances in the basic science underlying the guidelines, such as the use of alternative methods to elucidate mechanisms of carcinogenicity and toxicity. There also have been several changes in the practice of risk assessment, such as in the assessment of risks to children, as well as wider acceptance and use of risk assessment methods such as the benchmark dose approach and probabilistic exposure assessment. Therefore, CPSC staff-initiated reviews of the existing chronic hazard guidelines and is recommending additions or changes, as appropriate. The purpose of this document is to describe supplemental guidance for the application of the benchmark dose approach in risk assessment.

The current scientific knowledge regarding the risk assessment of chronic hazards is such that the guidelines cannot be applied mechanically (CPSC 1992, section VI.A.2, page 46633). Rather, considerable expertise and professional judgment are required to apply the guidelines properly. Furthermore, the volume of scientific literature on chronic hazard risk assessment, in general, and the benchmark dose, in particular, is extensive. Therefore, the discussion and guidance described below are not intended to explain how to perform chronic hazard risk assessments using the methods described. The guidelines assume that the reader has the necessary expertise. In addition, the discussion presented here is necessarily brief. The risk assessor is referred to the literature on benchmark dose, only a portion of which is cited here.

B. Discussion

The benchmark dose (BMD) approach (Crump 1984a; Crump et al. 1995) is an alternative to the traditional method of deriving acceptable daily intake (ADI) [2] levels by using no observed adverse effect levels (NOAELs) [3] and lowest observed adverse effect levels (LOAELs). The BMD may be used for both cancer and non-cancer endpoints, quantal or continuous data, and animal or human data. The BMD is an estimate of the dose level for a particular response. For example, the BMD_{10} is the best estimate of the dose at an excess risk (risk over background) of 10%, and the $BMDL_{10}$ is the lower confidence limit (LCL) of the BMD_{10}. The benchmark response (BMR) level is the response level selected for deriving an ADI level or cancer unit risk (slope factor).[4] The BMR is within or near the observable range of the bioassay used to derive the ADI or unit risk. Typically, selected BMR's range from 1% to 10% excess risk. To derive an ADI for non-cancer endpoints, the BMD is divided by the same uncertainty (safety) factors that are normally applied to the NOAEL. For cancer risk, the BMD is used as a ''point of departure'' (PoD) for linear extrapolation to the background level (EPA 2005). However, uncertainty factors may be applied for cancer risk if there is convincing evidence for a non-linear dose response at low doses.

1. Advantages of the BMD Approach

The advantages of the BMD approach have been described in detail elsewhere (Barnes et al. 1995; Crump 1984a; Crump et al. 1995; Gaylor et al. 1998; EPA, 2012; Filipsson et al. 2003). For example, the NOAEL and LOAEL are limited to the doses tested in the bioassay. In contrast, the BMD is not limited to the doses tested in the bioassay. Thus, the BMD provides a more consistent basis for comparisons between studies that did not use the same dose levels.

The true (parametric) value of the BMD is independent of the study design, such as the number of animals per dose group, *n.* However, the NOAEL is sensitive to *n.* The NOAEL is not a threshold, although it is frequently regarded as such. Rather, it is more appropriate to regard the NOAEL as a limit of detection. The incidence of adverse effects may be as high as 20% at the NOAEL. A given dose level may be a NOAEL in a study with small *n* if the incidence is not significantly different from background. However, the same dose in a larger study may be a LOAEL due to the increased sensitivity resulting from a larger *n.* The traditional NOAEL approach ''rewards'' studies with small *n,* by resulting in higher (*i.e.,* less protective) NOAELs. Conversely, the traditional approach ''penalizes'' studies with larger *n,* by resulting in lower (more protective) NOAELs. Thus, the traditional method is a disincentive to performing better, larger studies. In contrast, the BMD is essentially independent of *n* and,

[2] The ADI is an estimate of the amount of a chemical a person can be exposed to on a daily basis over an extended period of time (up to a lifetime) with a negligible risk of suffering deleterious effects. The ADI is roughly equivalent to a ''reference dose'' or ''tolerable daily intake.''

[3] In the chronic hazard guidelines, ''NOEL'' is used synonymously with ''NOAEL,'' because only adverse effects are relevant under the FHSA.

[4] The term ''unit risk'' is used synonymously with ''slope factor'' (CPSC 1992).

therefore, does not penalize studies with a larger *n*.

The BMD approach may account for variability in the bioassay. If the BMDL is used, larger studies tend to have smaller confidence intervals. Thus, larger studies are generally rewarded, because a smaller confidence interval leads to a higher BMDL. In contrast, poorly designed studies with inadequate sample size are penalized by having larger confidence intervals, leading to a lower BMDL.

The BMD accounts for the slope and shape of the dose response curve and uses all of the dose response data from the study. In contrast, the NOAEL or LOAEL relies on the response at only one dose level. Thus, information on the slope and shape of the dose response curve is ignored.

With the BMD approach, the methodology is the same regardless of whether a NOAEL is established. An additional uncertainty factor that is generally applied when using the LOAEL is not required in a BMD analysis, because the BMD can still be estimated even if a NOAEL has not been established.

While there are several advantages to the BMD approach, the principal disadvantage is the added complexity of the methodology. BMD methods require expertise in statistics, as well as toxicology. The additional steps involved in the analysis also increases the number of decision points, such as the choice of BMD and mathematical model, which require professional judgment. This, in turn, increases the number and possibly the range of possible ADI values from a given data set and may lead to areas of disagreement among risk assessors.

2. BMD Methodology

While the overall BMD approach is straightforward, there are many factors that must be considered in applying BMD methods in risk assessment, including the selection of the most appropriate endpoint and data set, dose response model, statistical methods, and selection of the BMD. Each of these factors requires knowledge of toxicology and risk assessment, as well as professional judgment.

a. Selection of the Endpoint and Data Set to Model

Initially, the selection of the critical study and endpoint to model is similar to the traditional approach. The study should be well-designed and executed, with an adequate number of animals and doses, and a statistically significant effect (CPSC 1992, sections VI.C.3.a, p. 46639; VIC.3.b, p. 46640; VI.D.2.a, p. 46642; and VI.D.3.b, p. 46643). There should be a dose where there are no observed adverse effects, *i.e.,* at or near the NOAEL. The selection of the critical endpoint is based, in part, on the judgment of the toxicologist or pathologist regarding the biological significance of the endpoint. When multiple studies, multiple endpoints, or multiple species are available, generally the most sensitive dose response is used (CPSC 1992, section F.4.b.ii, p. 46656).

It should be noted that the study with the lowest NOAEL will not necessarily lead to the lowest BMD, because the BMD also depends on the slope of the dose-response curve. Therefore, all relevant endpoints and studies should be modeled (Filipsson et al. 2005) to ensure that the lowest BMD is identified.

Additionally, the data set must be amenable to modeling. That is, there should be a steadily increasing dose response that is not saturated at the high doses. If none of the available dose response models can adequately fit the data (see below), the BMD approach cannot be used.

b. Selection of the Dose Response Model

The BMD approach is essentially a curve-fitting exercise. The choice of the dose-response model does not require any knowledge of the mode of action. Thus, the form of the model is not necessarily prescribed or dictated by any specific information about the studied activity, provided that it adequately describes the data. In some instances, however, mechanistic information may suggest a particular model, such as the Hill model when cooperative binding is observed.

A variety of dose-response models have been used to estimate the BMD (Crump 1984a; Crump et al. 1995; EPA 2022; Filipsson et al. 2003; Gaylor et al. 1998). The BMD approach may be applied to either quantal (dichotomous) or continuous data. Incidence data, such as the number of animals with a certain adverse effect, are quantal. Serum enzyme or hormone levels are examples of continuous data. Generally, quantal and continuous data require different, though related, dose response models. Nested quantal models may be used with developmental studies to evaluate effects within and between litters.

Dose response models for quantal data include linear (one-hit), quadratic, gamma multi-hit, Weibull, polynomial (multistage), logistic, log-logistic, probit, and log-probit models. These are slightly modified versions of the dose response models that have been used for cancer risk assessment (compare Crump 1984b; Zeise et al. 1987). The linear, quadratic, and Weibull models are essentially subsets of the polynomial model. Therefore, some or all of these models may yield similar results for certain data sets, such as when the dose response is linear. Dose response models for continuous data include linear, quadratic, linear-quadratic, polynomial, power, and Hill models. In addition, nested models are available for developmental studies. The mathematical forms of the models are described in detail elsewhere (Crump 1984a; Crump et al. 1995; EPA 2022; Filipsson et al. 2003; Gaylor et al. 1998).

In applying the BMD approach to non-cancer endpoints, the dose response models are not used for low-dose extrapolation. Thus, in contrast to cancer risk assessment, there is no need to consider the shape of the curve at low doses. Therefore, the choice of dose response model depends, in large part, on the goodness of fit. That is, the model (or models) selected must adequately describe the data. A model is generally rejected if the probability based on chi-square is less than 0.05. In other words, if the probability that the deviation of the data from the model is due to random variability is less than 0.05, the model does not adequately describe the data. Depending on the data set, multiple models may provide a similar global fit to the data. In this case, the local fit in the low-dose range, that is, the doses nearest the BMR, may be considered. In practice, different models often result in roughly similar BMDs, provided that they adequately describe the data. In any case, the results from different models and the choice of model should be discussed.

In some cases, it may be necessary to exclude high dose data from the model fitting procedure, to improve the goodness of fit. Data at the highest doses of a multiple dose bioassay may be considered to be less informative for the purpose of low dose extrapolation, especially in cases where the responses plateau at the high doses. Therefore, high dose groups may be systematically eliminated until the fit is acceptable (Anderson 1983).

In other cases, such as when a non-monotonic dose response is observed, none of the dose response models may be able to fit the data adequately. When this occurs, the BMD approach should not be used. While the NOAEL/LOAEL approach could still be applied, the quality of the study should be given careful consideration. It may not be appropriate to derive an ADI by any method from such a data set.

The steps for estimating the BMD may be summarized as follows:

- Select the bioassay(s) and endpoint(s) to model.
- Determine whether the data are quantal or continuous.
- Fit the bioassay data set(s) to several dose response models and determine the goodness of fit. Calculate multiple BMDs, including maximum likelihood estimates (MLEs) of risk and confidence limits. Graph the results.
- Select which model to use for determining the ADI. Generally, the model giving the best fit is used. If multiple models fit the data well, the local fit near the BMR may be considered. In some cases, the choice of model may be based on mechanistic considerations. If no model fits the data adequately, the BMD approach should not be used.
- If multiple endpoints or bioassays are modeled, select which to use for determining the ADI. The most sensitive dose response is generally used (CPSC 1992, section F.4.b.ii, page 46656). Other factors, such as severity of the effect may also be considered.
- Select which BMD (BMR) to use for deriving the ADI.
- Discuss and explain all of the decision points in the preceding steps.

c. Statistical Methods

Various types of software may be used to estimate the BMD/BMDL. The U.S. Environmental Protection Agency (EPA) has developed Benchmark Dose Software (BMDS) specifically for this purpose (EPA 2022). The BMDS and associated documentation are in the public domain and may be downloaded from the EPA website. Software is also available from the Netherlands Ministry of the Environment (RIVM 2021) and Shao and Shapiro (2018). Various other statistical software packages (*e.g.,* SAS, and R) may also be used. Likelihood methods are generally preferred for estimating the BMD and confidence limits (Crump 1984a; Crump and Howe 1985; Crump et al. 1995; Gaylor et al. 1998; EPA 2001). Goodness of fit is typically based on the chi-square distribution.

As with cancer risk assessment, CPSC staff prefers to use extra risk, rather than additional risk, as a measure of the risk over background. Extra risk applies Abbott's correction, so that animals which already have a given lesion from background processes are not considered at risk for an exposure-induced lesion of the same type. The numerical difference between extra risk and additional risk is small, provided that the background risk is sufficiently low (<0.25). Extra risk (Crump and Howe 1985) is defined by:

$$P_E = \frac{P_D - P_0}{1 - P_0}$$

where:

P_E is the extra risk, P_D is the risk at dose D, and P_0 is the background dose.

Additional risk is defined by:

$$P_A = P_D - P_0 \qquad (2)$$

where:

P_A is the additional risk.

d. Selection of the Benchmark Dose (BMD)—Quantal Data

The ADI is the dose at which the risk of an adverse effect is considered negligible. Because such risks cannot be directly measured, this requires assumptions about the shape of the dose response curve in the low dose region. For cancer, there are theoretical reasons for assuming a linear response at low dose, such as the probability that a given chemical will interact with background processes or other chemicals (CPSC 1992, VI.F.3.b.ii, page 46654). For non-cancer endpoints, a non-linear dose response is generally presumed, although the shape and slope of this curve outside of the observable range is unknown.

The selection of the BMD has been based on the following considerations: (i) The BMD should be within or near the observable range of the bioassay. (ii) It is roughly the dose at which a statistically significant effect may be observed in the bioassay (Crump et al. 1995). Thus, BMD's of 5% to 10% over background are typically used for quantal data, assuming that there is an adequate number of animals and the background level is not exceptionally high. (iii) The BMD approach is an alternative to deriving the ADI from a NOAEL. The BMD has generally been selected to approximate the NOAEL (Crump et al. 1995). Thus, the study selected for estimating the BMD should include a dose at or near the NOAEL. Other factors, such as the shape of the dose response curve or the study design (*e.g.,* CPSC 2001, 2002), may be considered on a case-by-case basis. For example, it may be desirable to select a BMD that is reflective of nonlinearity or an inflection point in the dose response curve (Murrell et al. 1998).

It is important to keep in mind that the selection of a BMD is part of the overall risk assessment process, which includes the selection of the critical endpoint and uncertainty factors, among other things. The overall process is equally as important as the individual steps. For example, the risk assessor might consider applying different uncertainty factors, depending on the BMD selected. That is, consideration could be given to larger or additional uncertainty factors if the BMD is higher than is typical, or to smaller uncertainty factors if the BMD is exceptionally low.

Numerous authors (Barnes et al. 1995; Crump 1984a; Filipsson et al. 2003) and the EPA (EPA 2005) generally recommend using the 95% lower confidence limit (LCL) of the benchmark, typically the $BMDL_{05}$ or $BMDL_{10}$. This generally satisfies the criteria listed above. In a typical bioassay, the LCL is within or near the observable range, it is near the lowest detectable response, and it is roughly equivalent to the NOAEL. Using the LCL takes into account the uncertainty in the bioassay and tends to reward larger or better studies, which generally have narrower confidence intervals. On the other hand, it has been argued that using the LCL rather than the best estimate (maximum likelihood estimate or MLE) leads to a BMD that may depend more on experimental uncertainty than on the dose response itself (Murrell et al. 1998). Thus, using the LCL tends to defeat one of the principal advantages of the BMD approach, which is to make use of the

shape and slope of the dose-response curve in the analysis.

While the choice of the BMD should be made on a case-by-case basis, it is desirable to have a default value for the purpose of consistency across different chemicals, endpoints, and risk assessors. However, even if the default value is used, the risk assessor must evaluate whether the default is appropriate in a given case, using the criteria described above. Risk assessors have most frequently used $BMDL_{05}$ or $BMDL_{10}$ to derive ADIs (or RfDs) (see above). The Chronic Hazard Advisory Panel (CHAP) convened by CPSC (CPSC 2001) and CPSC staff (CPSC 2002) used the BMD_{05} to set an ADI level for diisononyl phthalate. Health Canada also uses the BMD_{05} to set tolerable intake levels. One advantage of using the MLE is that it is more reflective of the shape of the dose response than the LCL (Murrell et al. 1998).

For cancer risk assessment, CPSC prefers to use the MLE risk (see below). However, as currently applied, the ADI is not regarded as a numerical estimate of risk, as is the case for cancer risk. Rather, it is regarded as a regulatory threshold, that is, a ''negligible risk level'' or ''virtually safe dose.'' Therefore, the reasons for using the MLE to estimate cancer risk do not necessarily apply to ADIs. This conclusion may change in the future, if true risk-based approaches are applied to non-cancer endpoints.

At the present time it seems reasonable to use the BMD_{05} (*i.e.,* the MLE) rather than the $BMDL_{05}$ (*i.e.,* the LCL) as a default value, subject to the limitations discussed above. This is consistent with the CPSC approach to estimating cancer risk and with previous CPSC applications of the BMD approach. In addition, the MLE better reflects the shape of the dose response, as compared to the LCL.

e. Selection of the Benchmark Dose (BMD)—Continuous Data

For continuous data, the BMD value is generally a level that is considered ''adverse.'' This is a matter of professional judgment by health scientists, such as toxicologists and pathologists, and must be determined on a case-by-case basis. As discussed in the previous section on ''Selection of the Benchmark Dose (BMD)—Quantal Data,'', the MLE value is preferred for risk assessment. In instances where there is no consensus on what constitutes an adverse effect, some risk assessors have used a relative change in the endpoint, such as a change of one standard deviation.

3. Cancer Risk Assessment

The multistage model (Crump 1984b) has been preferred by most federal agencies for cancer risk assessment. The multistage model is defined by:

$$P_D = 1 - e^{-[q_0 + q_1 D + q_2 D^2 \ldots q_9 D^9]} \quad (3)$$

where:

D, dose; P_D, cancer risk at dose D; and $q_0 \ldots q_9$, parameters to be fitted by the model.

The EPA has preferred to use the upper confidence limit (UCL) of the estimated risk, while CPSC staff uses the MLE risk, unless the linear term (q_1) is zero. When q_1 is zero, the UCL risk is used to ensure linearity at low doses (CPSC 1992, VI.F.3.b.ii, page 46654).

EPA began to use the BMD approach for cancer risk assessment in place of the multistage model in 2005 (EPA 2005). BMD is the preferred method for dose response assessment at EPA and other agencies (Allen et al. 2011). The default procedure is to use the BMR as a point of departure (PoD) for linear extrapolation to the background level. Uncertainty factors may be applied if there is sufficient reason to rule out a linear dose response at low doses. This procedure is analogous to the Mantel-Bryan procedure (Mantel & Bryan 1961; see also Gaylor & Kodell 1980) that was commonly used before the multistage model became available.

The BMD approach described by EPA is consistent with the default procedures used by CPSC staff under the guidelines. The primary concern of CPSC staff is that linear extrapolation should remain the default procedure for guidelines purposes. The results from using the BMD methodology and the multistage model are not substantially different when linear extrapolation is assumed. In general, a non-linear dose response with use of uncertainty factors should be used only if there is convincing evidence that the dose response is non-linear at low doses. In addition, the BMD approach offers certain advantages over the multistage model as applied by CPSC staff. While staff prefers to use the MLE estimate of cancer risk, it is necessary to use the UCL risk in cases where the linear term (q_1) is zero. By using the BMD approach, the MLE risk can be used in all cases. Thus, the process is simplified. In addition, staff use the BMD approach for non-cancer endpoints, BMD methods are used by EPA and other agencies for both cancer and non-cancer risk assessment, and the software is widely available.

The practice of the CPSC Directorate for Health Sciences (HS) is to present the best estimate of risk, rather than the upper bound, to risk managers. Thus, HS prefers the MLE of risk in cancer risk assessments (CPSC 1992, section VI.F.3.b.iii). Presenting the best estimate of risk depends on a number of considerations: (i) CPSC does not routinely define ''safe'' levels, as is frequently done by other agencies such as the Food and Drug Administration (FDA) and EPA. Rather, the need for CPSC actions based on unsafe levels are typically determined on a case-by-case basis. (ii) For typical cancer bioassays in animals, the difference between the MLE and 95% upper confidence limit (UCL) [5] is generally small, about 2- to 3-fold. (iii) The overall risk assessment process is designed to include assumptions that tend to err on the side of safety when data are lacking for a particular part of the assessment. Thus, there is always a possibility of compounding safety assumptions which could result in some cases in unrealistic estimates. Therefore, the use of the MLE rather than the UCL generally has a small effect on numerical estimates.

Therefore, the BMD approach with linear extrapolation and based on the MLE risk generally will be the default procedure for cancer risk assessments performed by CPSC staff. To further simplify the process, the multistage (polynomial) model generally will be the default model for cancer risk. However, other models that adequately describe the data may be used, as described above for non-cancer endpoints. While the choice of a PoD is not critical, the default will be the BMD_{05} (see above). Although the BMD approach will be the default procedure, the multistage model, as described above, can still be used. Risk assessors may deviate from the default assumptions described in the guidelines, provided that their methods and assumptions are documented, scientifically defensible, and supported by appropriate data (CPSC 1992, section VI.A.2).

[5] The UCL risk corresponds to the LCL dose.

The following practices are recommended when applying benchmark dose methodology:

- The BMD approach is generally the preferred method for setting ADI levels for non-cancer endpoints, provided that adequate dose response data are available.
- Appropriate dose response models and statistical methods have been described in detail elsewhere (Crump 1984a; Crump et al. 1995). Public domain software is available from EPA (EPA 2022).
- The BMD response level (BMR) used to calculate the ADI will be determined on a case-by-case basis. A range of BMR's, including best estimates and lower confidence limits, should be considered.
- As a default, CPSC staff will use the maximum likelihood estimate of the dose at which the extra risk is 5% (BMD_{05}). The same uncertainty factors currently applied to the NOAEL will be applied to the BMD.
- Several dose response models should be considered. Generally, the model that best describes the observed dose response data will be selected to derive the ADI. In addition, the ADI will generally be based on the combination of dose response model, endpoint, and study that lead to the lowest ADI.
- Risk assessors may deviate from the default assumptions described in the guidelines, provided that their methods and assumptions are documented, scientifically defensible, and supported by appropriate data (CPSC 1992, section VI.A.2). While the BMD approach is typically preferred, the traditional method based on NOAELs/LOAELs may still be used.

In addition, the BMD approach with linear extrapolation and based on the MLE risk will be the default procedure for cancer risk assessments performed by CPSC staff. The multistage (polynomial) model will be the default model for cancer risk. However, other models that adequately describe the data may be used, as described above for non-cancer endpoints. While the choice of a PoD is not critical, the default will be the BMD_{05}. Linear extrapolation from the PoD generally will be used unless there is convincing evidence that the dose response will be non-linear at low doses (CPSC 1992, VI.F.3.b.ii, page 46654). In cases where a non-linear dose response is justified, uncertainty factors may be applied as described for non-cancer endpoints. Although the BMD approach will be the preferred procedure, the multistage model, as traditionally applied by CPSC, can still be used.

C. Summary

1. Estimation of the Acceptable Daily Intake for Non-Cancer Endpoints

The following supplements the guidance on estimating acceptable daily intakes (ADIs) in the CPSC Chronic Hazard Guidelines at 57 FR 46656 (Oct. 9, 1992) in section VI.F.4.b.1.ii. This does not supersede the 1992 guidance; rather, it provides guidance on the use of newer methods for estimating ADIs.

Traditionally, CPSC staff derived acceptable daily intake (ADI) levels for non-cancer endpoints by applying safety factors (uncertainty factors) to the no-observed-effect level (NOAEL) or lowest-observed-effect-level (LOAEL). However, the benchmark dose (BMD) approach is now generally preferred over the traditional method. The benchmark dose is an estimate of the dose at a certain risk level. The BMD is estimated from a dose-response model. The advantages of the BMD approach and methods for estimating the BMD are described elsewhere (Barnes et al. 1995; Crump 1984; Crump et al. 1995; EPA 2012; Filipsson et al. 2003; Gaylor et al. 1998). Software for estimating the BMD is available from the U.S. EPA (EPA 2022) and other sources. In estimating the BMD, the risk assessor should consider the following points: (a) The dose-response model must provide an adequate fit to the data; the BMD approach may not be appropriate for all data sets. (b) Alternative dose response models should be considered, and the choice of model to derive the ADI explained. (c) Alternative endpoints and studies should also be considered, as appropriate. (d) A range of BMD response levels, including best estimates and confidence intervals should be evaluated. (e) Generally, different methods are required for dichotomous and continuous data.

The BMD selected to derive the ADI (BMD response level) is determined on a case-by-case basis. The BMD response level (BMR) must be within or near the range of experimental dose levels. As a default, for dichotomous (*i.e.,* incidence) data, the BMR will be the maximum likelihood estimate of the dose associated with an extra risk (risk over background) of 5% (BMD_{05}). For continuous data, (*e.g.,* enzyme or hormone levels), the BMD is generally based on the level considered to be an adverse effect. The default safety (uncertainty) factors described above (10-fold for human data and 100-fold for animal data) are applied to the BMD CPSC 1992, section VI.F.4.b.1.ii; Haber et al. 2018). Thus, the ADI is generally 100-fold lower than a BMD based on animal data. An additional uncertainty factor for ADIs based on a LOEL is not needed. While the BMD approach is preferred, the traditional method of applying safety factors to the NOAEL or LOAEL may still be used.

2. Estimation of Cancer Risk

The following is a supplement to the CPSC Chronic Hazard Guidelines at 57 FR 46654 (Oct. 9, 1992), section VI.F.3.b.ii.

Traditionally, CPSC staff estimated cancer unit risks (slope factors) using the multistage model (Global83). The maximum likelihood estimate (MLE) of risk was used unless the linear term (q_1) was equal to zero; in this case, the upper confidence limit of risk was used. However, the benchmark dose (BMD) approach with linear extrapolation based on the MLE risk is now generally preferred over the traditional method. The multistage (polynomial) model will be the default model for cancer risk. However, other models that adequately describe the data may be used, as described above for non-cancer endpoints. The choice of a BMD response level (BMR) or point-of-departure (PoD) will be made on a case-by-case basis. In general, the default PoD will be the MLE estimate of the dose associated with an extra risk (risk over background) of 5% (BMD_{05}). Linear extrapolation from the PoD will be used unless there is convincing evidence that the dose response will be non-linear at low doses. In cases where a non-linear dose response is justified, uncertainty factors may be applied as described for non-cancer endpoints. Although the BMD approach generally is preferred under the guidelines, the traditional CPSC approach based on the multistage model may still be used.

IV. Final Supplemental Guidance for the Analysis of Uncertainty and Variability in Risk Assessment

A. Background

In 1992, the U.S. Consumer Product Safety Commission (CPSC) issued guidelines for assessing chronic hazards under the Federal Hazardous Substances Act (FHSA), including carcinogenicity, neurotoxicity, reproductive/developmental toxicity, exposure, bioavailability, risk assessment, and acceptable risk. The guidelines are detailed in a **Federal Register** notice. 57 FR 46626 (Oct. 9, 1992).

The chronic hazard guidelines are intended as an aid to manufacturers in making their determination of whether a product is a hazardous substance due to chronic toxicity, and thus would require labeling under the FHSA. The guidelines are not mandatory. The guidelines describe standard methods CPSC staff may use to assess chronic hazards under the FHSA. The guidelines are intended to be sufficiently flexible to incorporate the latest scientific information, such as advances in risk assessment methodology. Therefore, CPSC staff initiated reviews of the existing guidelines and is recommending additions or changes, as appropriate. The purpose of this document is to describe supplemental guidance for the analysis of uncertainty and variability in risk assessment, including the use of probabilistic techniques.

B. Discussion

In toxicological risk assessment, uncertainty is the term used to describe the lack of knowledge in the underlying science, such as when few measurements of the particular subject have been made. Uncertainty may also be associated with the choice of mathematical model used to estimate exposure or risk. Variability refers to inherent differences due to heterogeneity or diversity in the population or exposure variable, such as body weight of people in the exposed population. Variability is generally not reducible by improved measurement or further study (EPA 1997, 2014).

The theory and techniques of exposure assessment have been discussed in detail elsewhere (CPSC 1992; EPA 2014, 2019; Paustenbach 2002). Exposure may be measured directly, but, in general, an exposure assessment is often based on a mathematical model that combines several variables describing the factors that influence exposure. For example, an assessment of exposure to a chemical released into the air during use of a product will include information about the emission rate into the air, the resulting concentration of the chemical in the air, the amount of time a person using the product or spent living, working, or playing in the area, and the amount of air a person breathes during the exposure. For a given exposure scenario, the output of an exposure assessment is typically an estimate of the amount of chemical that comes into contact with the body, usually expressed per unit of body weight per day during a defined period of time or over a lifetime, although exposure may be defined in other terms.

For carcinogens, ''risk'' is the product of the exposure estimate and the dose-response value, *i.e.,* the numerical representation of cancer risk per unit of daily exposure. For non-carcinogens, the exposure estimate is compared with the ''acceptable daily intake'' (ADI), which is the level of exposure at which we expect humans not to experience harmful health effects. Although there is no numerical estimate of ''risk'' in this latter case, one may calculate the hazard index (HI), which is the ratio of the estimated exposure to the ADI (HI greater than one means that the exposure may be hazardous; HI less than one represents negligible risk).

There is no single, correct way to conduct an exposure or risk assessment for purposes of evaluating chronic hazards under the Federal Hazardous Substances Act (FHSA) or the Labeling of Hazardous Art Materials Act

(LHAMA). There are, however, important issues and concerns that are commonly encountered in risk assessment that should be considered regardless of the specific risk assessment approach. Because risk assessment is a rapidly advancing field, the discussions here should be supplemented with other information from the scientific literature, texts, and government agency guidance, as scientifically appropriate.

In most cases, the risk assessor will consider uncertainty and variability in the assessment and, at a minimum, include a discussion of the effect of uncertainty and variability on the final risk estimates. The discussion may be qualitative or it may include quantitative estimates of uncertainty and variability. Variability and uncertainty are distinct issues and should be considered separately in each analysis using appropriate statistical techniques, such as two-dimensional probabilistic analyses (Cullen and Frey 1999). In practice, however, increasingly complex analyses may not be warranted for every situation, as discussed below. In addition, the available data may not be sufficient to distinguish between variability and uncertainty or to allow statistical consideration of both issues.

Risk assessors may take one of two general approaches to conduct risk assessments: deterministic or probabilistic (stochastic) modeling. Of these, probabilistic techniques explicitly include quantification of uncertainty and variability.

Risk analyses have long been grounded on deterministic approaches. Probabilistic risk assessments have been used for many years in predicting accidents and systems failures, and in weather forecasting. Over time, probabilistic approaches have been applied to ecological and human health risk assessments (Kendall et al., 2001).

Deterministic and probabilistic modeling are both valid mathematical approaches for estimating risk. The key difference between these approaches is that deterministic modeling enters point estimates (*i.e.,* single values) for the model's inputs while probabilistic modeling uses probability distributions for some or all inputs in conjunction with statistical techniques such as Monte Carlo analysis. Consequently, the output of a deterministic assessment is a point estimate of the exposure or risk for the exposed individual or population. A probabilistic approach results in a distribution of exposure or risk estimates, which may provide additional information about the variability in the exposure of interest and the uncertainty in the analysis or of the true, but unknown risk.

Exposure and risk assessments are conducted for many different reasons, such as to answer specific questions about exposure scenarios, inform decision-making, and explore options. The ultimate application of the assessment will help determine the methodological approaches and techniques to be used. The choice of approach may be based on considerations of the available scientific information, institutional policies, time and resources available, or social implications.

Risk assessments may be iterative, *e.g.,* subject to collection of new data or refinement of existing data. Assessments may be conducted in a tiered approach, in which each analysis is based on the knowledge and resources available to the risk assessor and the needs of decision-makers and stakeholders. In general, risk analysts will work from the simple to the complex until, for example, the problem has been sufficiently characterized so that risk managers may proceed with decision-making and initiate any actions required to manage the hazard. An initial analysis may be conducted to determine whether a given exposure scenario is associated with relatively high or relatively low risk. For example, protective assumptions are sometimes used initially to characterize the level of risk. If such an assessment indicates a relatively high risk, the analyst may choose to collect more data or conduct a more complex assessment in order to verify the result before actions are taken. An initial analysis may also be used to identify insignificant exposure pathways that do not require further consideration.

In many cases, deterministic techniques may be more desirable than probabilistic methods, particularly for such early analyses that are often under time and resource constraints, because probabilistic methods can be more complex, time-consuming, and costly. On the other hand, risk managers may find that more sophisticated techniques, including probabilistic methods, are valuable in providing certain detailed information about the risks in the exposed population, to explore the uncertainty in the true, but unknown risk to an individual, or for systematically analyzing variability, uncertainty, pathways of exposure, or alternative models. The risk assessor and risk manager must consider the utility of the risk assessment result and determine the value added by each assessment choice that increases the time, cost, and complexity of the assessment.

Ultimately, a risk assessment is conducted to gain insight into the exposures and risks associated with a given scenario. See section VI.F. of the guidelines (CPSC 1992). Each assessment should be approached on a case-by-case basis, consistent with the requirements of the risk assessor and risk manager. Regardless of the risk analysis approach, the quality of the assessment depends on the quality and availability of relevant data.

In general, for a given body of knowledge, a deterministic assessment that is based predominantly on central tendency values for each of the input variables (*e.g.,* a best estimate of the available data, such as a mean or median), may provide results similar to a probabilistic assessment that is based on the same underlying information. However, risk analysts must be aware of the effects of decisions regarding the use of the available data and assumptions. For example, a deterministic analysis that uses multiple protective values rather than central values may lead to unintentionally precautious results, *i.e.,* compounding safety factors. In addition, for a distribution of data that is skewed to the right, the mean will be represented by a value in the right tail and could be considerably larger than the median. In such a case, the mean could also be considered a protective value.

The primary advantage of a probabilistic approach is the generation of information on the distribution of exposure and risk in a population, in addition to estimates of the average exposure and risk. This provides information on the range of exposures, including highly exposed individuals. However, the risk analyst must consider that sparse data or a poorly fitting distribution to the data for one or more model inputs could lead to inappropriate conclusions about the resulting distribution, particularly at the tails of the distribution, which may be most sensitive to deficiencies in the data. Further, a probabilistic model may be sensitive to correlations between input variables (*e.g.,* body weight and body surface area). Discussion of the presence of correlations and dependence among variables and their effects on the output should be included in the assessment.

Another advantage of probabilistic techniques is the ability to derive confidence intervals for exposure estimates. Thus, in addition to estimating the mean, median, and 95th percentiles of exposure, one may also estimate confidence intervals for these

estimates, expressed as X ± Y, which provides a measure of uncertainty in the estimated exposure. It also gives the risk assessor and risk manager information on the reliability of exposure estimates. Typically, the confidence intervals will be larger in the tails of the distribution, *i.e.,* confidence intervals for the 95th or 99th percentile of the distribution may be larger than the confidence interval about the mean. Therefore, whenever possible, methodology that permits the estimation of confidence intervals should be applied.

Currently, probabilistic techniques are used primarily in estimating exposure, while single point estimates are derived to describe the dose-response (*i.e.,* unit risk for carcinogens; ADI for non-carcinogens). The application of probabilistic methods to deriving unit risks and ADIs is not presently in widespread use, although this has been encouraged by the National Research Council (NRC 2009).

A distinct issue, but related to analysis of uncertainty, is sensitivity analysis. Sensitivity analysis is used to identify variables that have the largest effect on the assessment output, and general approaches and statistical techniques have been developed for both deterministic and probabilistic analyses. It is often useful to know if small changes in the values for some variables result in relatively large changes in the output. For example, such an analysis may be used to identify areas of research that could improve future risk assessments. Sensitivity analysis may also be used to focus on specific subpopulations or exposure scenarios or to identify the most important routes of exposure.

Such techniques also are useful for providing additional information in a deterministic assessment. That is, a separate sensitivity analysis can be used in conjunction with a deterministic approach to characterize the range of the most likely estimates of exposure and risk (*e.g.,* one technique is to vary key input variables, one at a time, throughout their reasonable range of values, while holding other inputs constant).

Recent exposure and risk assessments conducted by CPSC staff have used both deterministic and probabilistic methods based on the factors discussed above. For example, staff used probabilistic techniques to estimate the exposure and risk from oral intake of diisononyl phthalate by children from mouthing soft plastic toys and other objects, based on the strength of the available data (Babich 2002; Babich et al. 2004; Babich et al. 2020; Greene 2002). Yet staff used a deterministic approach with a separate uncertainty analysis to assess children's exposure to arsenic from wooden playground equipment treated with chromated copper arsenate (Hatlelid 2003), because staff concluded that the data for several key input variables were insufficient to support a probabilistic analysis. In this case, mainly central tendency values were used to estimate the exposure, and a separate uncertainty analysis provided additional information about the likely range of exposure.

Section VI.F.4.b.i. of the guidelines (CPSC 1992) states that a carcinogenic risk of one per million or less is the appropriate level for defining acceptable risk; *i.e.,* when exposure to an agent occurs, the exposed individual has an estimated excess risk of one chance in a million of developing cancer during his/her lifetime. In a deterministic analysis, one per million is compared directly with the risk value that results from the analysis. Section VI.F.1.d. of the guidelines also states that in most cases the best estimate of exposure, rather than a protective estimate, is acceptable.

Probabilistic analyses, however, result in distributions of exposure and risk. While there are no generally accepted guidelines for interpretation of results from probabilistic analyses for carcinogens, this topic has received attention (Burmaster 1996; Thompson 2002; NRC 2009). Thompson cautioned against setting ''bright-line'' criteria for use in any context, and Burmaster also argued that the risk manager must consider all the characteristics of the distribution resulting from the probabilistic assessment and not just a single point or summary statistic. As an example of how one might evaluate probabilistic results, Burmaster suggested that one might consider the skewness of the resulting risk distribution; whether the median of the distribution exceeds the one per million acceptable risk level; whether the mean exceeds one per one hundred thousand; and whether the 95th percentile exceeds one per ten thousand.

CPSC staff agrees that it generally is appropriate to consider all of the characteristics of the risk distribution (*e.g.,* the mean, median, and upper bounds values and the shape of the distribution) in judging whether or not the results represent an acceptable risk. Because of the complexity of probabilistic analyses and the diversity of possible probabilistic risk assessment results, staff assesses that it would be difficult to impose a rigid procedure for interpreting the results of probabilistic assessments. Staff recommends, however, that the one per million acceptable risk level for carcinogens currently defined in the guidelines generally should also serve as a guide for interpreting probabilistic risk assessment results. Because staff generally uses best estimates for exposure rather than upper bounds, staff assesses that interpretation of probabilistic results should be based in part on the relationship of the central tendency estimate of the resulting distribution to the one per million acceptable risk level. However, upper bound estimates of exposure (*e.g.,* 95th percentile) may provide useful information for highly exposed individuals.

Section VI.F.4.b.ii. (CPSC 1992) specifies a process for evaluating the acceptable daily intake (ADI) for neurotoxicological and developmental/reproductive agents. Staff uses these guidelines for other non-cancer effects, as well. The use of the ADI in a deterministic assessment is straightforward—the estimated exposure is compared with the ADI. As is the case with cancer risk assessment, there are no standard guidelines for interpretation of results from probabilistic analyses of non-cancer effects. Following the reasoning for cancer assessments given above, staff recommends that interpretation of probabilistic results for non-cancer effects should be based in part on comparing the central tendency estimate of the outcome to the acceptable daily intake, similar to the case for deterministic assessments. However, upper bound estimates of exposure (*e.g.,* 95th percentile) may provide useful information for highly exposed individuals.

Because the guidelines are not binding rules, they are meant to be flexible and amenable to expert judgment, as well as continuing scientific advances. The guidance for interpretation of both cancer and non-cancer exposure and risk are intended to facilitate the assessment process, but in practice, risk assessors and risk managers will consider the specific information in each case in defining acceptable exposure and risk.

C. Summary

The following supplements the guidance on exposure assessment in the CPSC Chronic Hazard Guidelines at 57 FR 46644 (Oct. 9, 1992) in section VI.F.1. It does not supersede the 1992 guidance; rather, it provides guidance on the use of probabilistic methods as an alternative method for exposure assessment.

Risk assessments may incorporate uncertainty (the lack of knowledge in the underlying science or in the choice

of mathematical model) and variability (inherent differences due to heterogeneity or diversity in the population or exposure variable). The discussion may be qualitative or include quantitative estimates of uncertainty and variability. While variability and uncertainty are distinct issues and should be considered separately in each analysis, in practice, the available data may not be sufficient to distinguish between them.

Risk assessments may be based on deterministic or probabilistic modeling. Probabilistic modeling uses probability distributions for some or all inputs in conjunction with statistical techniques such as Monte Carlo analysis, and results in a distribution of exposure or risk estimates, providing quantification of uncertainty and variability. Deterministic modeling enters point estimates for the model's inputs and results in a point estimate of the exposure or risk. Separate uncertainty analysis may be used with a deterministic approach to characterize the range of the most likely exposure and risk.

Because exposure and risk assessments are conducted for different reasons, the ultimate use of the assessment results will help determine the methodological approaches and techniques to be used. The choice of approach may be based on considerations of the available scientific information, institutional policies, available time and resources, and limitations of the methods. For example, deterministic techniques may be appropriate for initial analyses that are often under time and resource constraints; however, the use of multiple protective values in a deterministic analysis may lead to unintentionally protective results, *i.e.,* compounding safety factors. A probabilistic assessment may be used to generate information on the distribution of exposure and risk in a population or to explore the uncertainty in the true, but unknown risk to an individual, but the risk assessor must consider that sparse data or poorly fitting distributions to the data for one or more model inputs could lead to inappropriate conclusions about the results, particularly at the tails of the distribution, which may be most sensitive to deficiencies in the data. A probabilistic model may be sensitive to correlations between input variables; the presence of correlations and dependence among variables and their effects on the output should be considered.

A carcinogenic risk of one per million or less is the guidelines' default level for defining acceptable risk (16 CFR 1500.135(d)(4)(i)). In a deterministic analysis, one per million is compared directly with the risk value that results from the analysis. Interpretation of probabilistic results should be based in part on the relationship of the central tendency estimate (*e.g.,* mean or median, as appropriate for the specific distribution) to the one per million acceptable risk level, but all characteristics of the resulting distribution should be considered.

For assessment of non-carcinogens in a deterministic assessment, the exposure estimate is compared directly with the ADI, or the hazard index (HI) is calculated as the ratio of the estimated exposure to the ADI (HI greater than one means that the exposure may be hazardous; HI less than one represents negligible risk). Probabilistic results should be interpreted in part by comparing the central tendency estimate to the acceptable daily intake, but all characteristics of the resulting distribution should be considered.

The guidance for interpretation of both cancer and non-cancer exposure and risk are intended to facilitate the assessment process, but in practice, risk assessors and risk managers will consider the specific information in each case in defining acceptable exposure and risk.

BILLING CODE 6355–01–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Business Board; Notice of Federal Advisory Committee Meeting

AGENCY: Office of the Deputy Secretary of Defense, Department of Defense (DoD).

ACTION: Notice of Federal advisory committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal advisory committee meeting of the Defense Business Board (''the Board'') will take place.

DATES: Closed to the public May 7, 2024 from 9:00 a.m. to 7:05 p.m. and closed to the public May 8, 2024 from 8:30 a.m. to 11:50 a.m. All Eastern time.

ADDRESSES: The closed meeting will be held in room B7 of the Pentagon Library Conference Center, Room 4D728 in the Pentagon, and the U.S. Naval Research Laboratory, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ms. Cara Allison Marshall, Designated Federal Officer (DFO) of the Board in writing at Defense Business Board, 1155 Defense Pentagon, Room 5B1088A, Washington, DC 20301–1155; or by email at *cara.l.allisonmarshall.civ@mail.mil;* or by phone at 703–614–1834.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of chapter 10 of title 5, United States Code (U.S.C.) (commonly known as the ''Federal Advisory Committee Act'' or ''FACA''), section 552b of title 5, U.S.C. (commonly known as the ''Government in the Sunshine Act''), and 41 Code of Federal Regulations (CFR) section 102–3.140 and 102–3.150.

Purpose of Meeting: The mission of the Board is to examine and advise the Secretary and Deputy Secretary of Defense on overall DoD management and governance. The Board provides independent, strategic-level, private sector and academic advice and counsel on enterprise-wide business management approaches and best practices for business operations and achieving National Defense goals.

Agenda: The Board will begin in closed session on May 7 from 9:00 a.m. to 7:05 p.m. The DFO will begin the closed session followed by a welcome by Board Chair, Hon. Deborah James. The Board will receive a classified discussion on Implementing Emerging Technologies to Create Operational Strategic Effects from Mr. Jay Dryer, Director, Strategic Capabilities Office. This discussion will focus on using existing DoD tools and processes to adapt developing technology to key operational challenges in the National Defense Strategy (NDS). Next, the Board will receive a classified discussion on Current Affairs from Hon. Lloyd Austin, Secretary of Defense. This session is expected to focus on the state of the current global security environment and its implications for current and future business operations. The Board will receive a classified briefing on Naval Research Lab (NRL) Operations at the U.S. NRL, followed by a classified tour. This tour and discussion will explore management constructs unique to NRL's mission and personnel, to include developing and managing talent and communicating across a diverse workforce. This portion of the meeting will cover how NRL partners with industry to fulfill their mandate and demonstrates capabilities made possible by NRL's organizational constructs and authorities. The Board Chair, Hon Deborah James and Deputy Secretary, Hon. Kathleen Hicks will provide remarks, followed by a classified update on Industry Partnerships with the Director of Information Systems Agency (DISA), Lt Gen Robert J. Skinner, Director of DISA and the Commander of the Joint Force Headquarters-DoD Information Network. The Director will offer an overview of DISA's partnerships with various stakeholders to bolster warfighter capabilities, including how DISA is developing global situational awareness and assessing the threat against DISA operations and assets. He will discuss unique challenges of managing a DoD Agency and Field Activity, as well as provide insights on recommendations from the February 2023 DBB IT User Experience Study. The DFO will adjourn the closed session. The Board will reconvene in closed session May 8 from 8:30 a.m. to 11:50 a.m. in room B7 of the Pentagon Library Conference Center. The DFO will begin the closed session followed by a welcome by the Board Chair. The Board will receive a classified discussion on Growing Production Capacity for Crises from Dr. Erin Simpson, Director, Joint Production Accelerator Cell, Office of the Under Secretary of Defense for Acquisition & Sustainment. The conversation is expected to delve into actions the DoD is taking to prioritize resources and to create a modern, resilient defense industrial ecosystem designed to deter United States adversaries and meet the production demands posed by evolving threats.

Dr. Simpson will elaborate on the obstacles confronting the DoD in building resilient supply chains. Next, the Board will receive a classified discussion on Emerging Global Threats, including the Supply Chain, and their Potential Implications for the NDS from MG Joseph ''JP'' McGee, U.S. Army, Director for Strategy, Plans & Policy, J5. This discussion will focus on strategic proactiveness to ensure adaptability, resilience, and continued effectiveness in an ever-evolving security landscape and on how the DoD can partner with industry before and during crises. After a short break, the Board will receive their final classified discussion on Making DoD Work Attractive to Non-Traditional Companies from Hon. Kathleen Hicks. The Deputy Secretary will share successes the DoD has realized in becoming a better partner for non-traditional defense companies, along with how combinations of traditional and non-traditional companies are working together to accelerate capability development and delivery. The DFO will adjourn the closed session. The latest version of the agenda will be available on the Board's website at: *https://dbb.dod.afpims.mil/Meetings/Meeting-May-7-8-2024/*.

Meeting Accessibility: In accordance with 5 U.S.C. 1009(d) and 41 CFR 102–3.155, it is hereby determined that the May 7–8 meeting of the Board will include classified information and other matters covered by 5 U.S.C. 552b(c)(1) and that, accordingly, the meeting will be closed to the public. This determination is based on the consideration that it is expected that discussions throughout the meeting will involve classified matters of national security. Such classified material is so intertwined with the unclassified material that it cannot reasonably be segregated into separate discussions without defeating the effectiveness and meaning of the meeting. To permit the meeting to be open to the public would preclude discussion of such matters and would greatly diminish the ultimate utility of the Board's findings and recommendations to the Secretary of Defense and the Deputy Secretary of Defense.

Written Comments and Statements: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and 5 U.S.C. 1009(a)(3), the public or interested organizations may submit written comments or statements to the Board in response to the stated agenda of the meeting or regarding the Board's mission in general. Written comments or statements should be submitted to

Ms. Cara Allison Marshall, the DFO, via electronic mail (the preferred mode of submission) at the address listed in the **FOR FURTHER INFORMATION CONTACT** section. Each page of the comment or statement must include the author's name, title or affiliation, address, and daytime phone number. The DFO must receive written comments or statements submitted in response to the agenda set forth in this notice by close of business Friday, May 3, 2024, to be considered by the Board. The DFO will review all timely submitted written comments or statements with the Board Chair and ensure the comments are provided to all members of the Board before the meeting. Written comments or statements received after this date may not be provided to the Board until its next scheduled meeting. Please note that all submitted comments and

statements will be treated as public documents and will be made available for public inspection, including, but not limited to, being posted on the Board's website.

Dated: April 17, 2024.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2024–08589 Filed 4–22–24; 8:45 am]

BILLING CODE 6001–FR–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Comprehensive Literacy State Development

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for new awards for fiscal year (FY) 2024 for the Comprehensive Literacy State Development (CLSD) program, Assistance Listing Number 84.371C. This notice relates to the approved information collection under OMB control number 1894–0006.

DATES:

Applications Available: April 23, 2024.

Deadline for Notice of Intent to Apply: May 13, 2024.

Deadline for Transmittal of Applications: June 24, 2024.

Deadline for Intergovernmental Review: August 21, 2024.

Pre-Application Webinar Information: The Department will hold a pre-application meeting via webinar for prospective applicants. For information about the pre-application webinar, visit the CLSD website at: *https://oese.ed.gov/offices/office-of-discretionary-grants-support-services/well-rounded-education-programs/striving-readers-comprehensive-literacy-srcl-formula-grants-84-371a-for-state-literacy-teams/.*

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045), and available at *https://www.federalregister.gov/documents/2022/12/07/2022-26554/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs.*

FOR FURTHER INFORMATION CONTACT: Michael Berry, U.S. Department of Education, 400 Maryland Avenue SW, Room 4C128, Washington, DC 20202–6450. Telephone: (202) 453–7088. Email: *michael.berry@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The CLSD program awards competitive grants to advance literacy skills through the use of evidence-based (as defined in this notice) practices, activities, and interventions, including pre-literacy skills, reading, and writing, for children from birth through grade 12, with an emphasis on disadvantaged children, including children living in poverty, English learners (as defined in this notice), and children with disabilities (as defined in this notice).

Background: The Department's ''Raise the Bar: Lead the World'' initiative is a call to action to transform preschool through grade 12 education and beyond, and to unite education leaders at all levels around evidence-based strategies that advance educational equity and excellence for all students.[1] Raising the bar in education focuses on building the skills that all students need to thrive inside and outside of school, and supporting students to excel in the classroom, in their careers, and in their communities.

Specifically, the Department is focused on improving student achievement, including in math and reading, as highlighted across Administration and Department efforts for the past several years. Building on the Administration's previous efforts, in January 2024, the Administration announced its Improving Student Achievement Agenda,[2] which aims to drive proven strategies that will support academic success for every child in school. The strategies and evidence discussed in the Improving Student Achievement Agenda focus on (1) increasing student attendance; (2) providing high-dosage tutoring; and (3) increasing summer learning and extended or afterschool learning time. These strategies and the broader Improving Student Achievement Agenda, including a focus on core academic instruction, are well aligned with the CLSD program purpose of improving literacy outcomes, and the new funding to be released through the FY 2024 CLSD competition will help accelerate and scale up sustainable adoption of evidence-based strategies that we expect will improve student literacy outcomes in the school years ahead.

Through the FY 2024 CLSD competition, the Department encourages State educational agencies (SEAs) to focus on evidence-based activities that provide explicit intervention and support in reading and writing for children from birth to grade 12, including activities that have been implemented in response to identified literacy gaps and that have positive outcome data. SEAs should take into consideration the resources of the What Works Clearinghouse,[3] including the literacy-focused Practice Guides and Intervention Reports on the most effective strategies for supporting student literacy and that are appropriate for the grade, age, and developmental level of the student. Highly effective, evidence-based literacy strategies covered in the Practice Guides, for example, include developing awareness of the segments of sounds in speech and how they link to letters; teaching students to decode words, analyze word parts, and write and recognize words; building students' comprehension and decoding skills so they can read complex multisyllabic words; and providing purposeful fluency-building activities to help students read effortlessly. The What Works Clearinghouse Intervention Reports provide a summary of the highest quality research to help SEA and school district personnel identify the literacy interventions with the strongest evidence bases. The Department encourages SEAs to consult these Intervention Reports to inform their proposals and the technical assistance they provide to school districts. Another resource the Department encourages SEAs to use is the Comprehensive Literacy State Development (CLSD) National Literacy Center,[4] which has a

[3] The Department provides several resources related to evidence-based practices and interventions in literacy. For example, the Institute of Education Sciences' What Works Clearinghouse (*https://whatworks.ed.gov*) has ten practice guides that offer evidence-based recommendations on literacy and/or writing that are applicable to preschool, elementary, and secondary school settings. Additionally, WWC Intervention Reports review the strength of evidence for branded interventions supporting literacy (and other) outcomes. Other Department resources, including those related to the Best Practices Clearinghouse (*https://bestpraacticesclearinghouse.gov*) and Raise the Bar (*https://ed.gov/raisethebar/academic-success*), may also be of interest to some applicants.

[4] *https://literacycenter.ed.gov/.*

website that offers information and resources to support States in creating or revising State literacy plans and to identify opportunities and strategies for providing evidence-based literacy coaching for teachers.

This competition includes four competitive preference priorities that highlight key policies on which States may focus their proposed projects. First, the Department gives competitive preference to projects that incorporate SEA partnerships with institutions of higher education (IHEs). Strong partnerships with IHEs strengthen educator (as defined in this notice) preparation programs and high-quality professional development (as defined in this notice) for educators, resulting in more effective comprehensive State literacy programs. Second, the Department gives competitive preference to applications that propose projects that are designed to address the impacts of the COVID–19 pandemic using evidence-based instructional approaches and supports to successfully meet challenging academic content standards without contributing to tracking or remedial courses.

Third, the Department gives competitive preference to applications that propose projects designed to promote education equity and adequacy in resources and opportunity for underserved students (as defined in this notice). In responding to this priority, SEAs are encouraged to consider how projects can assess the literacy needs of underserved students, including multilingual learners, to support the screening and identification of reading disabilities (*e.g.,* dyslexia), and evidence-based instructional approaches tailored to students' specific needs. Fourth, the Department gives competitive preference to applications that propose projects that support students and their families at key transitional stages in their education by ensuring coordinated, high-quality professional development for educators in these transitional stages. The Department is interested in projects that include high-quality, evidence-based professional development focused on alignment between early childhood and elementary settings as well as older students who are reading significantly below grade level. Effective comprehensive literacy programs include strong collaboration between early childhood, elementary, and secondary school educators.

Through an invitational priority, the Department encourages projects that support effective transition practices, continuity of services and supports, and aligned instruction for students as they transition from preschool and other early childhood settings into kindergarten and from kindergarten into the early grades, which includes supporting efforts that promote strong foundational literacy skills that undergird early literacy and early math success. The Department also encourages projects that support acceleration strategies for improving literacy for secondary school students who are reading at least 1–2 years below grade level. Additionally, the Department would like to highlight practices that have yielded positive results so that they may be shared with the wider literacy field.

Priorities: This notice contains four competitive preference priorities and one invitational priority. Competitive Preference Priority 1 is from section 2222(f)(2) of the ESEA. Competitive Preference Priorities 2, 3, and 4 are from the Secretary's Supplemental Priorities and Definitions for Discretionary Grant Programs, published in the **Federal Register** on December 10, 2021 (86 FR 70612) (Supplemental Priorities).

Competitive Preference Priorities: For FY 2024 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are competitive preference priorities. Under 34 CFR 75.105(c)(2)(i), we award an additional 2 points to an application that meets subpart (a) of Competitive Preference Priority 1 and an additional 2 points to an application that meets subpart (b) of Competitive Preference Priority 1; we award up to an additional 2 points to an application, depending on how well the application addresses Competitive Preference Priority 2; we award up to an additional 2 points to an application, depending on how well the application addresses Competitive Preference Priority 3; and we award up to an additional 2 points to an application, depending on how well the application addresses Competitive Preference Priority 4. An application may receive a total of up to 10 additional points under these competitive preference priorities.

These priorities are:

Competitive Preference Priority 1—Coordination with Institutions of Higher Education. (0, 2, or 4 points)

Under this priority, an applicant must demonstrate how it will use the State-level reservation under section 2222(f)(2) of the ESEA to carry out one or more of the following activities:

(a) Coordinate with IHEs in the State to provide recommendations to strengthen and enhance pre-service courses for students preparing to teach children from birth through grade 12 in explicit, systematic, and intensive instruction in evidence-based literacy methods. (2 points)

(b) Review and update, in collaboration with teachers and IHEs, State licensure or certification standards in the area of literacy instruction in early education through grade 12. (2 points)

Competitive Preference Priority 2—Addressing the Impact of COVID–19 on Students, Educators, and Faculty. (0 to 2 points).

Projects that are designed to address the impacts of the COVID–19 pandemic, including impacts that extend beyond the duration of the pandemic itself, on the students most impacted by the pandemic, with a focus on underserved students and the educators who serve them, through using evidence-based instructional approaches and supports, such as professional development, coaching, ongoing support for educators, high-quality tutoring, expanded access to rigorous coursework and content across K–12, and expanded learning time to accelerate learning for students in ways that ensure all students have the opportunity to successfully meet challenging academic content standards without contributing to tracking or remedial courses.

Competitive Preference Priority 3—Promoting Equity in Student Access to Educational Resources and Opportunities. (0 to 2 points)

Projects that are designed to promote educational equity and adequacy in resources and opportunity for underserved students—

(1) In one or more of the following educational settings:

(i) Early learning programs.

(ii) Elementary school.

(iii) Middle school.

(iv) High school.

(v) Out-of-school-time settings.

(vi) Alternative schools and programs.

(vii) Juvenile justice system or correctional facilities.

(viii) Adult learning.[5]

(2) That examines the sources of inequity and inadequacy and implement responses, and that may include one or more of the following:

(i) Establishing, expanding, or improving learning environments for multilingual learners, and increasing public awareness about the benefits of fluency in more than one language and

[5] CLSD grantees must subgrant 95 percent of their funds to serve the following age/grade bands: 15 percent for birth through kindergarten entry; 40 percent for kindergarten through grade 5; and 40 percent for grades 6 through 12. CLSD funds may be used for adult learning in settings where the adult learners are earning their high school diplomas.

how the coordination of language development in the school and the home improves student outcomes for multilingual learners.

(ii) Expanding access to high-quality early learning, including in school-based and community-based settings, by removing barriers through implementation of programs that are inclusive with regard to race, ethnicity, culture, language, and disability status.

Competitive Preference Priority 4—Supporting a Diverse Educator Workforce and Professional Growth To Strengthen Student Learning. (0 to 2 points)

Projects that are designed to increase the proportion of well-prepared, diverse, and effective educators serving students, with a focus on underserved students, through supporting effective instruction and building educator capacity by providing high-quality job-embedded professional development opportunities focused on supporting students and their families at key transitional stages in their education as they enter into one or more of the following:

(a) Early learning programs.

(b) Elementary school.

(c) Middle school.

(d) High school.

Invitational Priority: For FY 2024 and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is an invitational priority. Under 34 CFR 75.105(c)(1) we do not give an application that meets this invitational priority a competitive or absolute preference over other applications.

This priority is:

Supporting Effective Transition Practices, Continuity of Services and Supports, and Aligned Instruction, Including for Students from Preschool and Other Early Childhood Settings into Kindergarten; from Kindergarten into the Early Grades; and in Elementary and Secondary Education.

Projects that—

(a) Include developmentally appropriate practices that support cross-sector collaboration and family engagement across early learning and early elementary grades to support continuity of relationships and services from preschool through grade three, including practices that promote strong foundational literacy skills that undergird early literacy and early math success;

(b) Increase and improve educational opportunities for students and promote academic recovery through aligning the instruction between preschool and grade three and supporting educators and school leaders; and

(c) Increase and improve educational opportunities and outcomes for secondary school students who are reading below or significantly below grade level and promote their increased literacy through developmentally appropriate practices, including practices that support accelerated growth in literacy skills.

Application Requirements: For FY 2024 and any subsequent year in which we make awards from the list of unfunded applications from this competition, applicants must submit an application that meets the following application requirements from section 2222 of the ESEA (20 U.S.C. 6642):

(a) *State Needs Assessment.*

An SEA must include a needs assessment that analyzes literacy needs across the State and in high-need schools (as defined in this notice) and LEAs that serve high-need schools, including identifying the most significant gaps in literacy proficiency and inequities in student access to effective teachers of literacy, considering each of the subgroups of students, as defined in section 1111(c)(2) of the ESEA.

(b) *State Comprehensive Literacy Plan.*

An SEA must include a description of how, in collaboration with its State literacy team, if applicable, it will develop a State comprehensive literacy instruction (as defined in this notice) plan or will revise and update an already existing State comprehensive literacy instruction plan.

(c) *State Implementation Plan.*

An SEA must include an implementation plan that includes a description of how it will carry out the State activities described in section 2222(f) of the ESEA.

(d) *State Agency Early Childhood Program Collaboration.*

An SEA must collaborate with the State agency responsible for administering early childhood education programs and the State agency responsible for administering child-care programs in the State in writing and implementing the early childhood education portion of the grant application submitted for the CLSD program.

(e) *Assurances.*

An SEA must include in its application the following assurances:

(1) *State Funding Allocations.*

(a) An SEA must assure that it will subgrant not less than 95 percent of grant funds to eligible entities (as defined in this notice), based on their needs assessment and a competitive application process, for comprehensive literacy instruction programs according to the funding allocations in Program Requirement (a).

(b) An SEA must assure it will use grant funds described in section 2222(f)(1) for comprehensive literacy instruction programs as follows:

(i) Not less than 15 percent of such grant funds must be used for State and local programs and activities pertaining to children from birth through kindergarten entry.

(ii) Not less than 40 percent of such grant funds must be used for State and local programs and activities, allocated equitably among the grades of kindergarten through grade 5.

(iii) Not less than 40 percent of such grant funds must be used for State and local programs and activities, allocated equitably among grades 6 through 12.

(2) *Serving Low-Income and High-Need Students.*

An SEA must assure that it will give priority in awarding subgrants to eligible entities that—

(i) Serve children from birth through age 5 who are from families with income levels at or below 200 percent of the Federal poverty line (as defined in this notice); or

(ii) Are LEAs serving a high number or percentage of high-need schools.

(3) *Geographic Diversity.*

An SEA must assure that it will provide subgrants to eligible entities serving a diversity of geographic areas, giving priority to entities serving greater numbers or percentages of children from low-income families.

Program Requirements: For FY 2024 and any subsequent year in which we make awards from the list of unfunded applications from this competition, the following program requirements apply. These program requirements are from sections 2222–2225 and 2301 of the ESEA.

(a) *State Funding Allocations.*

(1) Grantees must use not less than 95 percent of grant funds to award subgrants to eligible entities, based on their needs assessment and a competitive application process;

(2) Grantees must subgrant funds as follows:

(i) Not less than 15 percent of the funds awarded to subgrantees must be used for State and local programs and activities pertaining to children from birth through kindergarten entry;

(ii) Not less than 40 percent of the funds awarded to subgrantees must be used for State and local programs and activities, allocated equitably among the grades of kindergarten through grade 5; and

(iii) Not less than 40 percent of the funds awarded to subgrantees must be

used for State and local programs and activities, allocated equitably among grades 6 through 12.

(b) *State-Level Activities.*

(1) A grantee may reserve not more than 5 percent of the CLSD funds it receives for activities identified through the needs assessment and comprehensive literacy plan, including, at a minimum, the following activities:

(i) Providing technical assistance, or engaging qualified providers to provide technical assistance, to eligible entities to enable the eligible entities to design and implement literacy programs.

(ii) Coordinating with IHEs in the State to provide recommendations to strengthen and enhance pre-service courses for students preparing to teach children from birth through grade 12 in explicit, systematic, and intensive instruction in evidence-based literacy methods.

(iii) Reviewing and updating, in collaboration with teachers and IHEs, State licensure or certification standards in the area of literacy instruction in early education through grade 12.

(iv) Making publicly available, including on the SEA's website, information on promising instructional practices to improve child literacy achievement.

(v) Administering and monitoring the implementation of subgrants by eligible entities.

(2) After making awards to subgrantees and carrying out the State-level activities described in this notice, an SEA may use any remaining amount to carry out one or more of the following activities:

(i) Developing literacy coach training programs and training literacy coaches.

(ii) Administration and evaluation of CLSD activities.

(3) Collaboration requirement.

A grantee must collaborate with the State agency responsible for administering early childhood education programs, the State agency responsible for administering child care programs, and, if applicable, the State Advisory Council on Early Childhood Education and Care designated or established pursuant to section 642(b(1)(A)(i) of the Head Start Act, in making and implementing subgrants under the early childhood education portion of the CLSD program, described in section 2222(d)(2)(D)(i).

Note: Section 2222(d)(1) of the ESEA specifically references childcare and early childhood programs within a State. Since the CLSD service population encompasses children from birth and includes pre-literacy services, applicants may collaborate with the State agencies administering the Part C program for infants and toddlers under the Individuals with Disabilities Education Act (IDEA) in their program planning, as some children being served under Part C would likely benefit from CLSD services.

(c) *Requirements That Apply to Subgrants to Eligible Entities in Support of Birth through Kindergarten Entry Literacy.*

(1) Subgrantee application requirements.

An eligible entity desiring to receive a subgrant under CLSD must submit an application to the SEA, at such time, in such manner, and containing such information as the SEA may require. Such application must include a description of—

(i) How the CLSD funds will be used to enhance the language and literacy development and school readiness of children, from birth through kindergarten entry, in early childhood education programs, which must include an analysis of data that support the proposed use of CLSD funds;

(ii) How the CLSD funds will be used to prepare and provide ongoing assistance to staff in the programs, including through high-quality professional development;

(iii) How the activities assisted with the CLSD funds will be coordinated with comprehensive literacy instruction at the kindergarten through grade 12 levels; and

(iv) How the CLSD funds will be used to evaluate the success of the activities assisted under the subgrant in enhancing the early language and literacy development of children from birth through kindergarten entry.

(2) Priority.

In awarding subgrants to eligible entities in support of birth through kindergarten entry, sections 2222(d)(2)(E) and 2223(c) of the ESEA require that an SEA must provide an assurance that it will—

(i) Give priority to an eligible entity that will use CLSD funds to implement evidence-based activities;

(ii) Give priority to an eligible entity that will use CLSD funds to serve children from birth through age 5 who are from families with income levels at or below 200 percent of the Federal poverty line or is a local educational agency (LEA) serving a high number or percentage of high-need schools.

(3) Duration.

The term of a subgrant must be determined by the grantee and must not exceed five years.

(4) Sufficient size and scope.

Each subgrant must be of sufficient size and scope to allow the eligible entity to carry out high-quality early literacy initiatives for children from birth through kindergarten entry.

(5) Local uses of funds.

An eligible entity that receives a subgrant from the SEA must use the CLSD funds, consistent with the entity's approved application, to—

(i) Carry out high-quality professional development opportunities for early childhood educators, teachers, principals, other school leaders (as defined in this notice), paraprofessionals, specialized instructional support personnel, and instructional leaders;

(ii) Train providers and personnel to develop and administer evidence-based early childhood education literacy initiatives; and

(iii) Coordinate the involvement of families, early childhood education program staff, principals, other school leaders, specialized instructional support personnel (as appropriate), and teachers in literacy development of children served under CLSD.

(d) *Requirements That Apply to Subgrants to Eligible Entities in Support of Kindergarten through Grade 12 Literacy.*

(1) Subgrantee application requirements.

An eligible entity desiring to receive a subgrant from the SEA under the CLSD program must submit an application to the SEA at such time, in such manner, and containing such information as the SEA may require. Such application must include, for each school that the eligible entity identifies as participating in a CLSD program, the following information:

(i) A description of the eligible entity's needs assessment conducted to identify how CLSD funds will be used to inform and improve comprehensive literacy instruction at the school.

(ii) How the school, the LEA, or a provider of high-quality professional development will provide ongoing high-quality professional development to all teachers, principals, other school leaders, specialized instructional support personnel (as appropriate), and other instructional leaders served by the school.

(iii) How the school will identify children in need of literacy interventions or other support services.

(iv) An explanation of how the school will integrate comprehensive literacy instruction into a well-rounded education (as defined in this notice).

(v) A description of how the school will coordinate comprehensive literacy instruction with early childhood education programs and activities and after-school programs and activities in the area served by the LEA.

(2) Priority.

In awarding subgrants to eligible entities, sections 2222(d)(2)(E) and 2223(c) of the ESEA require that an SEA must provide an assurance that it will—

(i) Give priority to an LEA that will use CLSD funds to implement evidence-based activities; and

(ii) Give priority to an LEA serving a high number or percentage of high-need schools.

(3) Duration.

The term of a subgrant must be determined by the grantee and must not exceed five years.

(4) Sufficient size and scope.

Each subgrant must be of sufficient size and scope to allow the eligible entity to carry out high-quality comprehensive literacy instruction in each grade level for which the CLSD funds are provided.

(5) Local uses of funds for kindergarten through grade 5.

An eligible entity that receives a subgrant from the SEA under the CLSD program must use the CLSD funds to carry out the following activities pertaining to children in kindergarten through grade 5:

(i) Developing and implementing a comprehensive literacy instruction plan across content areas for such children that—

(A) Serves the needs of all children, including children with disabilities and English learners, especially children who are reading or writing below grade level;

(B) Provides intensive, supplemental, accelerated, and explicit intervention and support in reading and writing for children whose literacy skills are below grade level; and

(C) Supports activities that are provided primarily during the regular school day but that may be augmented by after-school and out-of-school time instruction.

(ii) Providing high-quality professional development opportunities for teachers, literacy coaches, literacy specialists, English as a second language specialists (as appropriate), principals, other school leaders, specialized instructional support personnel, school librarians, paraprofessionals, and other program staff.

(iii) Training principals, specialized instructional support personnel, and other LEA personnel to support, develop, administer, and evaluate high-quality kindergarten through grade 5 literacy initiatives.

(iv) Coordinating the involvement of early childhood education program staff, principals, other instructional leaders, teachers, teacher literacy teams, English as a second language specialists (as appropriate), special educators, school personnel, and specialized instructional support personnel (as appropriate) in the literacy development of children served.

(v) Engaging families and encouraging family literacy experiences and practices to support literacy development.

(6) Local uses of funds for grades 6 through 12.

An eligible entity that receives a subgrant from the SEA under CLSD must use CLSD funds to carry out the following activities pertaining to children in grades 6 through 12:

(i) Developing and implementing a comprehensive literacy instruction plan across content areas for such children that—

(A) Serves the needs of all children, including children with disabilities and English learners, especially children who are reading or writing below grade level;

(B) Provides intensive, supplemental, accelerated, and explicit intervention and support in reading and writing for children whose literacy skills are below grade level; and

(C) Supports activities that are provided primarily during the regular school day but that may be augmented by after-school and out-of-school time instruction.

(ii) Training principals, specialized instructional support personnel, school librarians, and other LEA personnel to support, develop, administer, and evaluate high-quality comprehensive literacy instruction initiatives for grades 6 through 12.

(iii) Assessing the quality of adolescent comprehensive literacy instruction as part of a well-rounded education.

(iv) Providing time for teachers to meet to plan evidence-based adolescent comprehensive literacy instruction to be delivered as part of a well-rounded education.

(v) Coordinating the involvement of principals, other instructional leaders, teachers, teacher literacy teams, English as a second language specialists (as appropriate), paraprofessionals, special educators, specialized instructional support personnel (as appropriate), and school personnel in the literacy development of children served.

(7) Additional local allowable uses of funds for kindergarten through grade 12.

An eligible entity that receives a subgrant from an SEA under CLSD may, in addition to carrying out the activities described in paragraphs 5 and 6 of this requirement, use subgrant funds to carry out the following activities pertaining to children in kindergarten through grade 12:

(i) Recruiting, placing, training, and compensating literacy coaches.

(ii) Connecting out-of-school learning opportunities to in-school learning in order to improve children's literacy achievement.

(iii) Training families and caregivers to support the improvement of adolescent literacy.

(iv) Providing for a multi-tier system of supports (as defined in this notice) for literacy services.

(v) Forming a school literacy leadership team to help implement, assess, and identify necessary changes to the literacy initiatives in 1 or more schools to ensure success.

(vi) Providing time for teachers (and other literacy staff, as appropriate, such as school librarians or specialized instructional support personnel) to meet to plan comprehensive literacy instruction.

(e) *Supplement not Supplant.*

Grantees must use CLSD funds to supplement, and not supplant, non-Federal funds that would otherwise be used for activities authorized under the CLSD program.

(f) *Cooperation with National Evaluation.*

Grantees must cooperate with a national evaluation of the CLSD program (34 CFR 75.591). The evaluation will include high-quality research that applies rigorous and systematic procedures to obtain valid knowledge relevant to the implementation and effect of the CLSD program. The evaluation will directly coordinate with individual State evaluations of the CLSD program implementation.

Definitions: The definitions of ''comprehensive literacy instruction,'' ''eligible entity,'' and ''high-need school'' are from section 2221 of the ESEA. Except as otherwise specified, the definitions of ''child with a disability,'' ''English learner,'' ''evidence-based,'' ''multi-tier system of supports,'' ''poverty line,'' ''professional development,'' ''school leader,'' and ''well-rounded education'' are from section 8101 of the ESEA. The definitions of ''disconnected youth,'' ''early learning,'' ''educator,'' ''military- or veteran-connected student,'' and ''underserved student'' are from, and apply to, the Supplemental Priorities.

Child with a disability has the meaning given to the term in section 602 of the Individuals with Disabilities Education Act.

Comprehensive literacy instruction means instruction that-–

(a) Includes developmentally appropriate, contextually explicit, and systematic instruction, and frequent practice, in reading and writing across content areas;

(b) Includes age-appropriate, explicit, systematic, and intentional instruction in phonological awareness, phonic decoding, vocabulary, language structure, reading fluency, and reading comprehension;

(c) Includes age-appropriate, explicit instruction in writing, including opportunities for children to write with clear purposes, with critical reasoning appropriate to the topic and purpose, and with specific instruction and feedback from instructional staff;

(d) Makes available and uses diverse, high-quality print materials that reflect the reading and development levels, and interests, of children;

(e) Uses differentiated instructional approaches, including individual and small group instruction and discussion;

(f) Provides opportunities for children to use language with peers and adults in order to develop language skills, including developing vocabulary;

(g) Includes frequent practice of reading and writing strategies;

(h) Uses age-appropriate, valid, and reliable screening assessments, diagnostic assessments, formative assessment processes, and summative assessments to identify a child's learning needs, to inform instruction, and to monitor the child's progress and the effects of instruction;

(i) Uses strategies to enhance children's motivation to read and write and children's engagement in self-directed learning;

(j) Incorporates the principles of universal design for learning;

(k) Depends on teachers' collaboration in planning, instruction, and assessing a child's progress and on continuous professional learning; and

(l) Links literacy instruction to the challenging State academic standards, including the ability to navigate, understand, and write about complex print and digital subject matter.

Disconnected youth means an individual, between the ages 14 and 24,[6] who may be from a low-income background, experiences homelessness, is in foster care, is involved in the justice system, or is not working or not enrolled in (or at risk of dropping out of) an educational institution.

Early learning means any (a) State-licensed or State-regulated program or provider, regardless of setting or funding source, that provides early care and education for children from birth to kindergarten entry, including, but not limited to, any program operated by a child care center or in a family child care home; (b) program funded by the Federal Government or State or local educational agencies (including any IDEA-funded program); (c) Early Head Start and Head Start program; (d) non-relative child care provider who is not otherwise regulated by the State and who regularly cares for two or more unrelated children for a fee in a provider setting; and (e) other program that may deliver early learning and development services in a child's home, such as the Maternal, Infant, and Early Childhood Home Visiting Program; Early Head Start; and Part C of IDEA.

Educator means an individual who is an early learning educator, teacher, principal or other school leader, specialized instructional support personnel (*e.g.,* school psychologist, counselor, school social worker, early intervention service personnel), paraprofessional, or faculty.

Eligible entity means an entity that consists of—

(a) One or more LEAs that serve a high percentage of high-need schools and—

(1) Have the highest number or proportion of children who are counted under section 1124(c) of the ESEA, in comparison to other LEAs in the State;

(2) Are among the LEAs in the State with the highest number or percentages of children reading or writing below grade level, based on the most currently available State academic assessment data under section 1111(b)(2) of the ESEA; or

(3) Serve a significant number or percentage of schools that are implementing comprehensive support and improvement activities and targeted support and improvement activities under section 1111(d) of the ESEA;

(b) One or more early childhood education programs serving low-income or otherwise disadvantaged children, which may include home-based literacy programs for pre-school-aged children, that have a demonstrated record of providing comprehensive literacy instruction for the age group such program proposes to serve; or

(c) An LEA, described in paragraph (a), or consortium of such LEAs, or an early childhood education program, which may include home-based literacy programs for preschool-aged children, acting in partnership with one or more public or private nonprofit organizations or agencies (which may include early childhood education programs) that have a demonstrated record of effectiveness in—

(1) Improving literacy achievement of children, consistent with the purposes of participation under the CLSD program, from birth through grade 12; and

(2) Providing professional development in comprehensive literacy instruction.

English learner means an individual—

(a) Who is aged 3 through 21;

(b) Who is enrolled or preparing to enroll in an elementary school or secondary school;

(c)(i) Who was not born in the United States or whose native language is a language other than English;

(ii)(I) Who is a Native American or Alaska Native, or a native resident of the outlying areas; and (II) Who comes from an environment where a language other than English has had a significant impact on the individual's level of English language proficiency; or

(iii) Who is migratory, whose native language is a language other than English, and who comes from an environment where a language other than English is dominant; and

(d) Whose difficulties in speaking, reading, writing, or understanding the English language may be sufficient to deny the individual—

(i) The ability to meet the challenging State academic standards;

(ii) The ability to successfully achieve in classrooms where the language of instruction is English; or

(iii) The opportunity to participate fully in society.

Evidence-based, when used with respect to a State, LEA, or school activity, means an activity, strategy, or intervention that demonstrates a statistically significant effect on improving student outcomes or other relevant outcomes based on—

(a) Strong evidence from at least one well designed and well-implemented experimental study;

(b) Moderate evidence from at least one well-designed and well-implemented quasi-experimental study; or

(c) Promising evidence from at least one well-designed and well-implemented correlational study with statistical controls for selection bias.

High-need school means—

(a)(i) An elementary school or middle school in which not less than 50 percent of the enrolled students are children from low-income families; or

(ii) A high school in which not less than 40 percent of the enrolled students are children from low-income families, which may be calculated using comparable data from the schools that feed into the high school.

[6] CLSD serves youth from birth to grade 12. To the extent that State laws include youth up to age 24 in grade 12, those students may be served.

(b) For the purposes of paragraph (a) of this definition, the term ''low-income family'' means a family—

(i) In which the children are eligible for a free or reduced-price lunch under the Richard B. Russell National School Lunch Act (42 U.S.C. 1751 *et seq.*);

(ii) Receiving assistance under the program of block grants to States for temporary assistance for needy families established under part A of title IV of the Social Security Act (42 U.S.C. 601 *et seq.*); or

(iii) In which the children are eligible to receive medical assistance under the Medicaid program under title XIX of the Social Security Act (42 U.S.C. 1396 *et seq.*).

Military- or veteran-connected student means one or more of the following:

(a) A child participating in an early learning program, a student enrolled in preschool through grade 12, or a student enrolled in career and technical education or postsecondary education who has a parent or guardian who is a member of the uniformed services (as defined by 37 U.S.C. 101), in the Army, Navy, Air Force, Marine Corps, Coast Guard, Space Force, National Guard, Reserves, National Oceanic and Atmospheric Administration, or Public Health Service or is a veteran of the uniformed services with an honorable discharge (as defined by 38 U.S.C. 3311).

(b) A student who is a member of the uniformed services, a veteran of the uniformed services, or the spouse of a service member or veteran.

(c) A child participating in an early learning program, a student enrolled in preschool through grade 12, or a student enrolled in career and technical education or postsecondary education who has a parent or guardian who is a veteran of the uniformed services (as defined by 37 U.S.C. 101).

Multi-tier system of supports means a comprehensive continuum of evidence-based, systemic practices to support a rapid response to students' needs, with regular observation to facilitate data-based instructional decisionmaking.

Poverty line means the poverty line (as defined by the Office of Management and Budget and revised annually in accordance with section 673(2) of the Community Services Block Grant Act) applicable to a family of the size involved.

Professional development means activities that—

(a) Are an integral part of school and LEA strategies for providing educators (including teachers, principals, other school leaders, specialized instructional support personnel, paraprofessionals, and as applicable, early childhood educators) with the knowledge and skills necessary to enable students to succeed in a well-rounded education and to meet the challenging State academic standards; and

(b) Are sustained (not stand-alone, one-day, or short-term workshops), intensive, collaborative, job-embedded, data-driven, and classroom-focused, and may include activities that—

(1) Improve and increase teachers'—

(i) Knowledge of the academic subjects the teachers teach;

(ii) Understanding of how students learn; and

(iii) Ability to analyze student work and achievement from multiple sources, including how to adjust instructional strategies, assessments, and materials based on such analysis;

(2) Are an integral part of broad schoolwide and districtwide educational improvement plans;

(3) Allow personalized plans for each educator to address the educator's specific needs identified in observation or other feedback;

(4) Improve classroom management skills;

(5) Support the recruitment, hiring, and training of effective teachers, including teachers who became certified through State and local alternative routes to certification;

(6) Advance teacher understanding of—

(i) Effective instructional strategies that are evidence-based; and

(ii) Strategies for improving student academic achievement or substantially increasing the knowledge and teaching skills of teachers;

(7) Are aligned with, and directly related to, academic goals of the school or LEA;

(8) Are developed with extensive participation of teachers, principals, other school leaders, parents, representatives of Indian tribes (as applicable), and administrators of schools to be served under this program;

(9) Are designed to give teachers of English learners, and other teachers and instructional staff, the knowledge and skills to provide instruction and appropriate language and academic support services to those children, including the appropriate use of curricula and assessments;

(10) To the extent appropriate, provide training for teachers, principals, and other school and community-based early childhood program leaders in the use of technology (including education about the harms of copyright piracy), so that technology and technology applications are effectively used in the classroom to improve teaching and learning in the curricula and academic subjects in which the teachers teach;

(11) As a whole, are regularly evaluated for their impact on teacher effectiveness and student academic achievement, with the findings of the evaluations used to improve the quality of professional development;

(12) Are designed to give teachers of children with disabilities or children with developmental delays, and other teachers and instructional staff, the knowledge and skills to provide instruction and academic support services to those children, including positive behavioral interventions and supports, multi-tier system of supports, and use of accommodations;

(13) Include instruction in the use of data and assessments to inform classroom practice;

(14) Include instruction in ways that teachers, principals, other school leaders, specialized instructional support personnel, and school administrators may work more effectively with parents and families;

(15) Involve the forming of partnerships with institutions of higher education, including, as applicable, Tribal Colleges and Universities as defined in section 316(b) of the Higher Education Act of 1965, as amended (HEA) (20 U.S.C. 1059c(b)), to establish school-based teacher, principal, and other school leader training programs that provide prospective teachers, novice teachers, principals, and other school leaders with an opportunity to work under the guidance of experienced teachers, principals, other school leaders, and faculty of such institutions;

(16) Create programs to enable paraprofessionals (assisting teachers employed by an LEA receiving assistance under part A of title I of the ESEA) to obtain the education necessary for those paraprofessionals to become certified and licensed teachers;

(17) Provide follow-up training to teachers who have participated in activities described in this paragraph that are designed to ensure that the knowledge and skills learned by the teachers are implemented in the classroom; and

(18) Where practicable, provide jointly for school staff and other early childhood education program providers, to address the transition to elementary school, including issues related to school readiness.

School leader means a principal, assistant principal, or other individual who is—

(a) An employee or officer of an elementary school or secondary school, LEA, or other entity operating an elementary school or secondary school; and

(b) Responsible for the daily instructional leadership and managerial operations in the elementary school or secondary school building.

Underserved student means a student (which may include children in early learning environments and students in K–12 programs, as appropriate) in one or more of the following subgroups:

(a) A student who is living in poverty or is served by schools with high concentrations of students living in poverty.

(b) A student of color.

(c) A student who is a member of a federally recognized Indian Tribe.

(d) An English learner.

(e) A child or student with a disability.

(f) A disconnected youth.

(g) A migrant student.

(h) A student experiencing homelessness or housing insecurity.

(i) A student who is in foster care.

(j) A student without documentation of immigration status.

(k) A pregnant, parenting, or caregiving student.

(l) A student impacted by the justice system, including a formerly incarcerated student.

(m) A student performing significantly below grade level.

(n) A military- or veteran- connected student. For the purpose of this definition only—

Children or students with disabilities means children with disabilities as defined in section 602(3) of the Individuals with Disabilities Education Act (IDEA) (20 U.S.C. 1401(3)) and 34 CFR 300.8, or students with disabilities, as defined in the Rehabilitation Act of 1973 (29 U.S.C. 705(37), 705(202)(B)).

English learner means an individual who is an English learner as defined in section 8101(20) of the Elementary and Secondary Education Act of 1965, as amended, or an individual who is an English language learner as defined in section 203(7) of the Workforce Innovation and Opportunity Act.

Well-rounded education means courses, activities, and programming in subjects such as English, reading or language arts, writing, science, technology, engineering, mathematics, foreign languages, civics and government, economics, arts, history, geography, computer science, music, career and technical education, health, physical education, and any other subject, as determined by the State or LEA, with the purpose of providing all students access to an enriched curriculum and educational experience.

Program Authority: Sections 2221–2225 and 2301 of the ESEA.

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in the Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The Supplemental Priorities.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian Tribes.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: $185,000,000.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in FY 2025 from the list of unfunded applications from this competition.

Estimated Range of Awards (Annual): $9,500,000–$12,000,000.

Estimated Average Size of Awards (Annual): $11,000,000.

Estimated Number of Awards: 15–20.

Note: The Department is not bound by any estimates in this notice.

Project Period: 60 months. The Secretary may renew a grant for an additional two-year period upon the termination of the initial grant period if the grant recipient demonstrates to the satisfaction of the Secretary that (1) the State has made adequate progress; and (2) renewing the grant for an additional two-year period is necessary to carry out the objectives of the grant detailed in section 2222(d) of the ESEA.

III. Eligibility Information

1. *Eligible Applicants:* SEAs of the 50 States, the District of Columbia, and Puerto Rico (also referred to in this notice as States).

2. a. *Cost Sharing or Matching:* This competition does not require cost sharing or matching.

b. *Supplement-Not-Supplant:* This competition involves supplement-not-supplant funding requirements. Section 2301 of the ESEA provides that funds made available under this program must be used to supplement, and not supplant, non-Federal funds that would otherwise be used for CLSD program activities by grantees and subgrantees.

c. *Indirect Cost Rate Information:* This program uses a restricted indirect cost rate. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *www2.ed.gov/about/offices/list/ocfo/intro.html.*

d. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

3. *Subgrantees:* Under 34 CFR 75.708(b) and (c), a grantee under this competition may award subgrants—to directly carry out project activities described in its application—to eligible entities.

The grantee must award subgrants to entities it selects through a competition under procedures established by the grantee and consistent with sections 2222–2224 of the ESEA.

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045) and available at *https://www.federalregister.gov/documents/2022/12/07/2022-26554/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs,* which contain requirements and information on how to submit an application.

2. *Submission of Proprietary Information:* Given the types of projects that may be proposed in applications for the CLSD program, your application may include business information that you consider proprietary. In 34 CFR 5.11 we define ''business information'' and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended).

Because we plan to make successful applications available to the public, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you believe is exempt from disclosure under Exemption 4. In the appropriate Appendix section of your application,

under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. *Intergovernmental Review:* This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

4. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

5. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to no more than 50 pages and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double-space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; or the one-page abstract, resumes, bibliography, logic model, or letters of support. However, the recommended page limit does apply to all of the application narrative.

6. *Notice of Intent to Apply:* The Department will be able to review grant applications more efficiently if we know the approximate number of applicants that intend to apply. Therefore, we strongly encourage each potential applicant to notify us of their intent to submit an application. To do so, please email the program contact person listed under **FOR FURTHER INFORMATION CONTACT** with the subject line ''Intent to Apply,'' and include the applicant's name and a contact person's name and email address. Applicants that do not submit a notice of intent to apply may still apply for funding; applicants that do submit a notice of intent to apply are not bound to apply or bound by the information provided.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210. The maximum possible score for addressing all criteria is 100 points. The maximum possible score for addressing each criterion is indicated in parentheses. The selection criteria for this competition are as follows:

(a) *Need for project* (0 to 5 points).

The Secretary considers the need for the proposed project. In determining the need for the proposed project, the Secretary considers the extent to which specific gaps or weaknesses in services, infrastructure, or opportunities have been identified and will be addressed by the proposed project, including the nature and magnitude of those gaps or weaknesses.

(b) *Quality of the project design* (0 to 30 points).

The Secretary considers the quality of the design of the proposed project. In determining the quality of the design of the proposed project, the Secretary considers:

(1) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified and measurable. (10 points)

(2) The extent to which the design of the proposed project includes a thorough, high-quality review of the relevant literature, a high-quality plan for project implementation, and the use of appropriate methodological tools to ensure successful achievement of project objectives. (10 points).

(3) The extent to which the proposed project is supported by promising evidence (as defined in 34 CFR 77.1(c)). (10 points).

(c) *Quality of management plan* (0 to 40 points).

The Secretary considers the quality of the management plan for the proposed project. In determining the quality of the management plan for the proposed project, the Secretary considers:

(1) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks. (10 points).

(2) The adequacy of procedures for ensuring feedback and continuous improvement in the operation of the proposed project. (10 points).

(3) The extent to which the time commitments of the project director and principal investigator and other key project personnel are appropriate and adequate to meet the objectives of the proposed project. (10 points).

(4) The adequacy of mechanisms for ensuring high-quality products and services from the proposed project. *Note:* Applicants may consider subrecipient monitoring as an example of a mechanism in addressing this sub-criterion. (10 points).

(d) *Quality of project services* (0 to 15 points).

The Secretary considers the quality of the project services to be provided by the proposed project. In determining the quality of project services to be provided by the proposed project, the Secretary considers the quality and sufficiency of strategies for ensuring equal access and treatment for eligible project participants who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability. In addition, the Secretary considers:

(1) The likely impact of the services to be provided by the proposed project on the intended recipients of those services; (5 points) and

(2) The extent to which the training or professional development services to be provided by the proposed project are of sufficient quality, intensity, and duration to lead to improvements in practice among the recipients of those services. (5 points).

(3) The extent to which the services to be provided by the proposed project reflect up-to-date knowledge from research and effective practice. (5 points).

(e) *Quality of project evaluation* (0 to 10 points).

The Secretary considers the quality of the evaluation to be conducted of the proposed project. In determining the quality of the evaluation, the Secretary considers:

(1) The extent to which the methods of evaluation are thorough, feasible, and appropriate to the goals, objectives, and outcomes of the proposed project. (5 points).

(2) The extent to which the methods of evaluation will provide performance feedback and permit periodic assessment of progress toward achieving intended outcomes. (5 points).

2. *Review and Selection Process:* We remind potential applicants that, in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.206, before awarding grants under this program the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

5. *In General:* In accordance with the Office of Management and Budget's guidance located at 2 CFR part 200, all applicable Federal laws, and relevant Executive guidance, the Department will review and consider applications for funding pursuant to this notice inviting applications in accordance with—

(a) Selecting recipients most likely to be successful in delivering results based on the program objectives through an objective process of evaluating Federal award applications (2 CFR 200.205);

(b) Prohibiting the purchase of certain telecommunication and video surveillance services or equipment in alignment with section 889 of the National Defense Authorization Act of 2019 (Pub. L. 115–232) (2 CFR 200.216);

(c) Providing a preference, to the extent permitted by law, to maximize use of goods, products, and materials produced in the United States (2 CFR 200.322); and

(d) Terminating agreements in whole or in part to the greatest extent authorized by law if an award no longer effectuates the program goals or agency priorities (2 CFR 200.340).

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We also may notify you informally.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

5. *Performance Measures:* For purposes of Department reporting under 34 CFR 75.110, the Department has established the following performance measures for the CLSD program:

(1) The percentage of participating four-year-old children who achieve significant gains in oral language skills, as determined by a State-approved measure.

(2) The percentage of participating fifth-grade students who meet or exceed proficiency on State reading/language arts assessments under section 1111(b)(2)(B)(v)(I) of the ESEA.

(3) The percentage of participating eighth-grade students who meet or exceed proficiency on State reading/language arts assessments under section 1111(b)(2)(B)(v)(I) of the ESEA.

(4) The percentage of participating high school students who meet or exceed proficiency on State reading/language arts assessments under section 1111(b)(2)(B)(v)(I) of the ESEA.

All grantees will be expected to submit an annual performance report that includes data addressing these performance measures to the extent that they apply to the grantee's project. Performance targets will be established by each grantee and must be made for each year of the performance period, not to exceed five years.

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project;

whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, whether the grantee has made substantial progress in achieving the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

7. *Annual Project Directors' Meetings:* Applicants approved for funding under this competition must attend a meeting for project directors at a location to be determined in the continental United States during each year of the project. Applicants may include, if applicable, the cost of attending this meeting in their proposed budgets as allowable administrative costs.

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Adam Schott,

Principal Deputy Assistant Secretary, Delegated the Authority to Perform the Functions and Duties of the Assistant Secretary, Office of Elementary and Secondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2024–SCC–0060]

Agency Information Collection Activities; Comment Request; Regional Educational Laboratory (REL) Southwest Effective Advising Framework Evaluation

AGENCY: Institute of Education Sciences (IES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a new information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before June 24, 2024.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2024–SCC–0060. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the *regulations.gov* site is not available to the public for any reason, the Department will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. Please note that comments submitted after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Manager of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave SW, LBJ, Room 6W203, Washington, DC 20202–8240.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Anousheh Shayestehpour, (202)–987–1148.

SUPPLEMENTARY INFORMATION: The Department, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Department is soliciting comments on the proposed information collection request (ICR) that is described below. The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Regional Educational Laboratory (REL) Southwest Effective Advising Framework Evaluation.

OMB Control Number: 1850–NEW.

Type of Review: New ICR.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 2,153.

Total Estimated Number of Annual Burden Hours: 611.

Abstract: By 2030, the Texas Higher Education Coordinating Board expects that 60 percent or more of all new jobs in Texas will require some postsecondary education. However, in 2019, less than half of the Texas population ages 25–34 years (44.3 percent) had some type of postsecondary credential. To close this gap and support districts in meeting the state statute that requires schools to fully develop each student's academic, career, personal, and social abilities, the Counseling, Advising, and Student Supports team (under the Division of College, Career, and Military Preparation) at the Texas Education Agency established the Effective Advising Framework. This framework expands access to effective college and career advising by streamlining and modernizing advising offerings and

services for secondary and postsecondary students. The initiative aims to support students in making informed decisions about postsecondary education and careers and to offer professional development to educators and guidance counselors on advising services.

This proposed study will examine the implementation of the Effective Advising Framework across school districts participating in the pilot program. Because it is expected that districts are applying the framework in a variety of ways, the study will examine the variation in implementation across districts, including an analysis of the factors that support or hinder implementation. To do this, the research team will collect data from public education staff at the school, district, and regional levels. Surveys will be administered to gather information on how and what is being implemented at each level and what factors may act as barriers to successful implementation. One-on-one interviews and focus group interviews will be conducted with a subsample of respondents from each level to gather more in-depth information on the successes and challenges they faced in applying the framework. The results of this study will inform the continued development of the framework and the associated resources and supports that will be provided to districts and schools when the initiative is implemented statewide.

Dated: April 17, 2024.

Juliana Pearson,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

[GDO Docket No. EA–348–D]

Application for Renewal of Authorization To Export Electric Energy; NextEra Energy Marketing, LLC

AGENCY: Grid Deployment Office, Department of Energy.

ACTION: Notice of application.

SUMMARY: NextEra Energy Marketing, LLC (Applicant or NEM) has applied for renewed authorization to transmit electric energy from the United States to Canada pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before May 23, 2024.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed by electronic mail to *Electricity.Exports@hq.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Janessa Zucchetto, (240) 474–8226, *Electricity.Exports@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: The United States Department of Energy (DOE) regulates electricity exports from the United States to foreign countries in accordance with section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)) and regulations thereunder (10 CFR 205.300 *et seq.*). Sections 301(b) and 402(f) of the DOE Organization Act (42 U.S.C. 7151(b) and 7172(f)) transferred this regulatory authority, previously exercised by the now-defunct Federal Power Commission, to DOE.

Section 202(e) of the FPA provides that an entity which seeks to export electricity must obtain an order from DOE authorizing that export (16 U.S.C. 824a(e)). On April 10, 2023, the authority to issue such orders was delegated to the DOE's Grid Deployment Office (GDO) by Delegation Order No. S1–DEL–S3–2023 and Redelegation Order No. S3–DEL–GD1–2023.

On February 11, 2009, DOE issued Order No. EA–348 to FPL Energy Power Marketing, Inc. to transmit electric energy from the United States to Canada as a power marketer for a period of five years. This authority was amended in March 2009 to effectuate a name change to NextEra Energy Power Marketing, LLC (Order No. EA–348–A). This authority was renewed in 2014 (Order No. EA–348–B) and 2019 (Order No. EA–348–C). On March 21, 2024, NEM filed an application with DOE (Application or App.) for renewal of its export authority for a five-year term. App. at 1.

According to the Application, NEM is a Delaware corporation that is a wholly owned direct subsidiary of NextEra Energy Resources, LLC. App. at 1–2. NEM states it does not own any transmission facilities. *Id.* at 2. NEM further states that its affiliate, NextBridge Infrastructure LP, owns and operates the East-West Tie transmission project in Ontario, Canada, including 280 miles of double-circuit 230 kV line. *Id.* at 2–3. The Applicant represents that the electricity it proposes to export will be purchased from others voluntarily and will, therefore, be surplus to the needs of the selling entities. *Id.* at 3. NEM also states it will comply with applicable reliability standards, export limits, and general conditions set by DOE. *Id.* at 4. NEM asserts its proposed exports will not impair or impede sufficient electric supplies in the United States or the regional coordination of electric utility planning or operations. *Id.* at 3.

The existing international transmission facilities to be utilized by the Applicant have been previously authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties. *See* App. at Exhibit C.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the Application at *Electricity.Exports@hq.doe.gov.* Protests should be filed in accordance with Rule 211 of FERC's Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at *Electricity.Exports@hq.doe.gov* in accordance with FERC Rule 214 (18 CFR 385.214).

Comments and other filings concerning NEM's Application should be clearly marked with GDO Docket No. EA–348–D. Additional copies are to be provided directly to William Lavarco, NextEra Energy Resources, LLC, 801 Pennsylvania Ave. NW, Suite 220, Washington, DC 20004, *william.lavarco@nee.com.*

A final decision will be made on the requested authorization after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE evaluates whether the proposed action will have an adverse impact on the sufficiency of supply or reliability of the United States electric power supply system.

Copies of this Application will be made available, upon request, by accessing the program website at *https://www.energy.gov/gdo/pending-applications-0* or by emailing *Electricity.Exports@hq.doe.gov.*

Signing Authority: This document of the Department of Energy was signed on April 16, 2024, by Maria Robinson, Director, Grid Deployment Office, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for

publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on April 17, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Paducah

AGENCY: Office of Environmental Management, Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Paducah. The Federal Advisory Committee Act requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Thursday, May 16, 2024; 5:30–7:00 p.m. CDT.

ADDRESSES: West Kentucky Community and Technical College, Emerging Technology Center, Room 215, 5100 Alben Barkley Drive, Paducah, Kentucky 42001.

FOR FURTHER INFORMATION CONTACT: Robert ''Buz'' Smith, Federal Coordinator, by Phone: (270) 441–6821 or Email: *Robert.Smith@pppo.gov.*

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to provide advice and recommendations concerning the following EM site-specific issues: clean-up activities and environmental restoration; waste and nuclear materials management and disposition; excess facilities; future land use and long-term stewardship. The Board may also be asked to provide advice and recommendations on any EM program components.

Tentative Agenda:

- Administrative Activities.
- Public Comment Period.

Public Participation: The meeting is open to the public. The EM SSAB, Paducah will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Robert ''Buz'' Smith in advance of the meeting. The EM SSAB, Paducah will hear oral public comments during the meeting. Written statements may be filed either before or after the meeting. Written comments received by no later than 5 p.m. CDT on Monday, May 13, 2024, will be read aloud during the meeting. Written comments submitted by 5 p.m. CDT on Friday, May 24, 2024, will be included in the minutes. Please submit written comments to Robert ''Buz'' Smith with ''Public Comment'' in the subject line. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes: Minutes will be available by writing or calling Eric Roberts, Board Support Manager, Emerging Technology Center, Room 221, 4810 Alben Barkley Drive, Paducah, KY 42001; Phone: (270) 554–3004. Minutes will also be available at the following website: *https://www.energy.gov/pppo/pgdp-cab/listings/meeting-materials.*

Signing Authority: This document of the Department of Energy was signed on April 18, 2024, by David Borak, Deputy Committee Management Officer, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on April 18, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

[GDO Docket No. EA–312–C]

Application for Renewal of Authorization To Export Electric Energy; Emera Energy U.S. Subsidiary No. 2, Inc.

AGENCY: Grid Deployment Office, Department of Energy.

ACTION: Notice of application.

SUMMARY: Emera Energy U.S. Subsidiary No. 2, Inc. (the Applicant or EE US No. 2) has applied for renewed authorization to transmit electric energy from the United States to Canada pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before May 23, 2024.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed by electronic mail to *Electricity.Exports@hq.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Janessa Zucchetto, (240) 474–8226, *electricity.exports@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: The United States Department of Energy (DOE) regulates electricity exports from the United States to foreign countries in accordance with section 202(e) of the Federal Power Act (FPA) (16 U.S.C. 824a(e)) and regulations thereunder (10 CFR 205.300 *et seq.*). Sections 301(b) and 402(f) of the DOE Organization Act (42 U.S.C. 7151(b) and 7172(f)) transferred this regulatory authority, previously exercised by the now-defunct Federal Power Commission, to DOE.

Section 202(e) of the FPA provides that an entity which seeks to export electricity must obtain an order from DOE authorizing that export (16 U.S.C. 824a(e)). On April 10, 2023, the authority to issue such orders was delegated to the DOE's Grid Deployment Office (GDO) under Delegation Order No. S1–DEL–S3–2023 and Redelegation Order No. S3–DEL–GD1–2023.

On May 17, 2006, DOE issued Order No. EA–312, authorizing EE US No. 2 to transmit electric energy from the United States to Canada as a power marketer. This authority was renewed in 2014 (Order No. EA–312–A), and 2019 (Order No. EA–312–B). On March 22, 2024, EE US No. 2 filed an application with DOE (Application or App) for renewal of its export authority for an additional five-year term. App at 1.

In its Application, EE US No. 2 states it is a Delaware corporation with its principal place of business in Kittery, Maine, and a wholly-owned subsidiary of Emera Incorporated. App. at 1. The Applicant states that it ''does not own or control any electric power generation or transmission facilities and does not have a franchised electric power service area. EE US No. 2 operates as a marketing company involved in, among other things, the purchase and sale of electricity in the United States as a power marketer.'' *Id.* at 6. EE US No. 2 represents that it ''will purchase surplus electric energy from electric utilities and other suppliers within the United States and will export this energy to Canada over the international electric transmission facilities.'' *Id.* at 7. Therefore, the Applicant contends that ''[b]ecause this electric energy will be

purchased from others voluntarily, it will be surplus to the needs of the selling entities. EE US No. 2's export of power will not impair the sufficiency of electric power supply in the U.S.'' *Id.* Further, the Applicant asserts its exports will comply with all applicable requirements and export limits imposed by DOE and therefore ''will not impede or tend to impede the coordinated use of transmission facilities within the meaning of Section 202(e) of the FPA.'' *Id.* at 8.

The existing international transmission facilities to be utilized by the Applicant have been previously authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties. *See* App at Exhibit C.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the Application at the email address provided previously. Protests should be filed in accordance with Rule 211 of FERC's Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at the previously provided email address in accordance with FERC Rule 214 (18 CFR 385.214).

Comments and other filings concerning EE US No. 2's Application should be clearly marked with GDO Docket No. EA–312–C. Additional copies are to be provided directly to Keith Sutherland, Emera Energy Inc., 5151 Terminal Road, Halifax, NS B3J 1A1 Canada, *keith.sutherland@emeraenergy.com,* Jeffery M. Jakubiak, Vinson & Elkins LLP, 1114 Avenue of the Americas, 32nd Floor, New York, NY 10036, *JJakubiak@velaw.com,* and Jennifer C. Mansh, Vinson & Elkins LLP, 2200 Pennsylvania Ave, NW, Suite 500 West, Washington, DC 20037, *Jmansh@velaw.com.*

A final decision will be made on the requested authorization after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE evaluates whether the proposed action will have an adverse impact on the sufficiency of supply or reliability of the United States electric power supply system.

Copies of this Application will be made available, upon request, by accessing the program website at *https://www.energy.gov/gdo/pending-applications-0* or by emailing *Electricity.Exports@hq.doe.gov.*

Signing Authority: This document of the Department of Energy was signed on April 16, 2024, by Maria Robinson, Director, Grid Deployment Office, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC on April 17, 2024.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER24–1770–000]

AMA QSE, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of AMA QSE, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is May 7, 2024.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: April 17, 2024.

Federal Energy Regulatory Commission

[Docket No. IC24–7–000]

Commission Information Collection Activities (FERC–512) Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection, FERC–512 (Preliminary Permit). The 60-day notice comment period ends on April 8, 2024, no comments were received.

DATES: Comments on the collection of information are due May 23, 2024.

ADDRESSES: Send written comments on FERC–512 to OMB through *www.reginfo.gov/public/do/PRAMain.* Attention: Federal Energy Regulatory

Commission Desk Officer. Please identify the OMB Control Number (1902–0073) in the subject line of your comments. Comments should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.*

Please submit copies of your comments to the Commission. You may submit copies of your comments (identified by Docket No. IC24–07–000) by one of the following methods:

Electronic filing through *https://www.ferc.gov,* is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.
- For those unable to file electronically, comments may be filed by USPS mail or by other delivery methods:

○ *Mail via U.S. Postal Service Only:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

○ *All other delivery methods:* Federal Energy Regulatory Commission, Secretary of the Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Instructions: OMB submissions must be formatted and filed in accordance with submission guidelines at *www.reginfo.gov/public/do/PRAMain.* Using the search function under the ''Currently Under Review'' field, select Federal Energy Regulatory Commission; click ''submit,'' and select ''comment'' to the right of the subject collection.

FERC submissions must be formatted and filed in accordance with submission guidelines at: *https://www.ferc.gov/ferc-online/overview.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *https://www.ferc.gov/ferc-online/overview.*

FOR FURTHER INFORMATION CONTACT: Jean Sonneman may be reached by email at *DataClearance@FERC.gov,* telephone at (202) 502–6362.

SUPPLEMENTARY INFORMATION:

Title: FERC–512, Preliminary Permit.

OMB Control No.: 1902–0073.

Type of Request: Three-year approval of the FERC–512 information collection requirements, with no changes to the current reporting requirements.

Abstract: Sections 4(f) and 5(b) of the Federal Power Act authorize the Commission to issue a preliminary permit for a term of up to four years, extend a permit term once for not more than four additional years, and issue an additional permit after the end of an extension period.[1] The FERC–512 is an application for a preliminary permit or to extend a preliminary permit term. The purpose of obtaining a preliminary permit is to maintain priority status for an application for a license while the applicant conducts site examinations and surveys to inform a decision on whether to pursue a license for the project, and if so, prepare a license application. A preliminary permit neither authorizes construction of any facilities, nor provides the use of eminent domain to acquire lands for the project. No application for a preliminary permit or license submitted by another party can be accepted during the permit term.

Commission staff review preliminary permit applications to assess the scope of the proposed project, the technology to be used, and jurisdictional aspects of the project. The staff assessment includes a review of the proposed hydro development for conflicts with other current permits or licensed projects, and issuance of public notice of the permit application to solicit public and agency comments. An application for a preliminary permit includes the applicant's name and contact information, a description of the proposed project, the requested term of the permit, names and addresses of the affected political jurisdictions, a verification of the application's facts, and three exhibits, per 18 CFR 4.81.

Type of Respondents: Business or other for-profit and not-for-profit entities.

Estimate of Annual Burden[2] *and Cost:*[3] The Commission estimates as shown below in the table:

FERC–512: (PRELIMINARY PERMIT)

	Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden hours & cost per response	Total annual burden hours & total annual cost	Average annual cost per respondent
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
Annual Reporting and Recordkeeping	65	1	65	24 hrs.; $2,400	1,560 hrs.; $156,000	$2,400
TOTAL FERC–512	65	1	65	24 hrs.; $2,400	1,560 hrs.; $156,000	2,400

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: April 17, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

[FR Doc. 2024–08626 Filed 4–22–24; 8:45 am]

BILLING CODE 6717–01–P

[1] 16 U.S.C. 802 and 16 U.S.C. 798(b)(1).

[2] Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR 1320.3.

[3] Commission staff estimates that the industry's skill set and cost (for wages and benefits) for FERC–512 are approximately the same as the Commission's average cost. The FERC 2024 average salary plus benefits for one FERC full-time equivalent (FTE) is $207,787/year (or $100/hour).

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Sunshine Act Meetings

The following notice of meeting is published pursuant to section 3(a) of the government in the Sunshine Act (Pub. L. 94–409), 5 U.S.C. 552b:

AGENCY HOLDING MEETING: Federal Energy Regulatory Commission.

TIME AND DATE: April 25, 2024, 10:00 a.m.

PLACE: Room 2C, 888 First Street NE, Washington, DC 20426.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED: Agenda.

* Note: Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: Debbie-Anne A. Reese, Acting Secretary, Telephone (202) 502–8400.

For a recorded message listing items stricken from or added to the meeting, call (202) 502–8627.

This is a list of matters to be considered by the Commission. It does not include a listing of all documents relevant to the items on the agenda. All public documents, however, may be viewed online at the Commission's website at *https://elibrary.ferc.gov/eLibrary/search* using the eLibrary link.

1112TH—MEETING

[Open meeting—April 25, 2024, 10:00 a.m.]

Item No.	Docket No.	Company
	Administrative	
A-1	AD24–1–000	Agency Administrative Matters.
A-2	AD24–2–000	Customer Matters, Reliability, Security and Market Operations.
A–3	AD24–8–000	FERC, NERC, and Regional Entity Presentation into the January 2024 Arctic Storms.
	Electric	
E-1	ER24–340–001	Midcontinent Independent System Operator, Inc.
E–2	ER24–1225–000	California Independent System Operator Corporation.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 1390–069]

Southern California Edison Company; Notice of Intent To File License Application, Filing of Pre-Application Document (PAD), Commencement of Pre-Filing Process, and Scoping; Request for Comments on the PAD and Scoping Document, and Identification of Issues and Associated Study Requests

a. *Type of Filing:* Notice of Intent to File License Application for a New License and Commencing Pre-filing Process.

b. *Project No.:* 1390–069.

c. *Dated Filed:* February 23, 2024.

d. *Submitted By:* Southern California Edison Company (SCE).

e. *Name of Project:* Lundy Hydroelectric Project (Lundy Project).

f. *Location:* The Lundy Project is located on Mill Creek, on the eastern slope of the Sierra Nevada, approximately 8 miles northwest of Lee Vining in Mono County, California. The existing FERC project boundary occupies Federal lands within the Inyo National Forest (Inyo NF), managed by the U.S. Forest Service (FS), and partly on Federal land managed by the Bureau of Land Management (BLM), Bishop Field Office. The remaining Lundy Project lands are owned by SCE except for a small parcel of land near the powerhouse owned by Mono County.

g. *Filed Pursuant to:* 18 CFR part 5 of the Commission's Regulations.

h. *Applicant Contact:* Matthew Woodhall Relicensing Project Lead, Southern California Edison Company, 2244 Walnut Grove Avenue, Rosemead, CA 91770; (602) 302–9596; *matthew.woodhall@sce.com*.

i. *FERC Contact:* Jessica Fefer at (202) 502–6631 or email at *jessica.fefer@ferc.gov.*

j. *Cooperating agencies:* Federal, State, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests described in item o below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. *With this notice, we are initiating informal consultation with:* (a) the U.S. Fish and Wildlife Service and/or the National Oceanic and Atmospheric Administration Fisheries under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR, Part 402 and (b) the State Historic Preservation Office, as required by section 106, National Historic Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating SCE as the Commission's non-Federal representative for carrying out informal consultation, pursuant to section 7 of the Endangered Species Act and section 106 of the National Historic Preservation Act.

m. SCE filed with the Commission a Pre-Application Document (PAD), including a proposed process plan and schedule, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD may be viewed on the Commission's website (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (866) 208–3676 or TYY, (202) 502–8659.

You may register online at *https://ferconline.ferc.gov/FERCOnline.aspx* to be notified via email of new filings and issuances related to these or other pending projects. For assistance, contact FERC Online Support.

o. With this notice, we are soliciting comments on the PAD and Commission staff's Scoping Document 1 (SD1), as well as study requests. All comments on the PAD and SD1, and study requests should be sent to the address above in paragraph h. In addition, all comments on the PAD and SD1, study requests, requests for cooperating agency status, and all communications to and from staff related to the merits of the potential application must be filed with the Commission.

The Commission strongly encourages electronic filing. Please file all documents using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Support at *FERCOnlineSupport@ferc.gov.* In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket number P–1390–069.

All filings with the Commission must bear the appropriate heading: ''Comments on Pre-Application Document,'' ''Study Requests,'' ''Comments on Scoping Document 1,'' ''Request for Cooperating Agency Status,'' or ''Communications to and from Commission Staff.'' Any individual or entity interested in submitting study requests, commenting on the PAD or SD1, and any agency requesting cooperating status must do so by June 24, 2024.[1]

p. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

q. The Commission's scoping process will help determine the required level of analysis and satisfy the National Environmental Policy Act (NEPA) scoping requirements, irrespective of whether the Commission prepares an environmental assessment or environmental impact statement.

Scoping Meetings

Commission staff will hold two scoping meetings for the project to receive input on the scope of the NEPA document. An evening meeting will be held at 6:00 p.m. on May 14, 2024, at the Lee Vining Community Center in Lee Vining, California, and will focus on receiving input from the public. A daytime meeting will be held at 2:00 p.m. on May 15, 2024, at the same location, and will focus on the concerns of resource agencies, non-governmental organizations (NGOs), and Indian Tribes. We invite all interested agencies, Indian Tribes, non-governmental organizations, and individuals to attend one or both meetings. The times and locations of these meetings are as follows:

Evening Scoping Meeting

Date: Tuesday, May 14, 2024
Time: 6:00 p.m. (PST)
Place: Lee Vining Community Center
Address: 296 Mattly Ave., Lee Vining, CA 93541
Phone: (760) 647–6009

Daytime Scoping Meeting

Date: Wednesday, May 15, 2024
Time: 2:00 p.m. (PST)
Place: Lee Vining Community Center
Address: 296 Mattly Ave., Lee Vining, CA 93541
Phone: (760) 647–6009

SD1, which outlines the subject areas to be addressed in the environmental document, was mailed to the individuals and entities on the Commission's mailing list and SCE's distribution list. Copies of SD1 may be viewed on the web at *http://www.ferc.gov,* using the ''eLibrary'' link. Follow the directions for accessing information in paragraph n. Based on all oral and written comments, a Scoping Document 2 (SD2) may be issued. SD2 may include a revised process plan and schedule, as well as a list of issues, identified through the scoping process.

Environmental Site Review

The applicant and Commission staff will conduct an environmental site review of the project. All interested individuals, agencies, Tribes, and NGOs are invited to attend. All participants are responsible for their own transportation to/from the project and during the site visit. Participants must wear sturdy, closed-toe shoes, or boots. Please RSVP via email to *Matthew.Woodhall@sce.com* or notify Matthew Woodhall at (626) 302–9596 *on or before May 8, 2024,* if you plan to attend the environmental site review. The time and location of the environmental site review is as follows:

Lundy Project

Date: Wednesday, May 15, 2024
Time: 9:00 a.m. (PST)
Place: Lee Vining Community Center
Address: 296 Mattly Ave., Lee Vining, CA 93541

Participants must meet at the Lee Vining Community Center parking lot to begin promptly at 9:00 a.m. where participants will drive in personal vehicles together to the project. At the project, participants will see recreation site(s), Lundy Dam and the Lundy Powerhouse.

Meeting Objectives

At the scoping meetings, Commission staff will: (1) initiate scoping of the issues; (2) review and discuss existing conditions; (3) review and discuss existing information and identify preliminary information and study needs; (4) review and discuss the process plan and schedule for pre-filing activity that incorporates the time frames provided for in part 5 of the Commission's regulations and, to the extent possible, maximizes coordination of Federal, State, and Tribal permitting and certification processes; and (5) discuss the potential of any Federal or State agency or Indian Tribe to act as a cooperating agency for development of an environmental document.

[1] The Commission's Rules of Practice and Procedure provide that if a filing deadline falls on a Saturday, Sunday, holiday, or other day when the Commission is closed for business, the filing deadline does not end until the close of business on the next business day. 18 CFR 385.2007(a)(2) (2022). Because the filing deadline falls on a Saturday (*i.e.,* June 22, 2024), the filing deadline is extended until the close of business on Monday, June 24, 2024.

Meeting participants should come prepared to discuss their issues and/or concerns. Please review the PAD in preparation for the scoping meetings. Directions on how to obtain a copy of the PAD and SD1 are included in item n of this document.

Meeting Procedures

Commission staff are moderating the scoping meetings. The meetings are recorded by an independent stenographer and become part of the formal record of the Commission proceeding on the project. Individuals, NGOs, Indian Tribes, and agencies with environmental expertise and concerns are encouraged to attend the meeting and to assist the staff in defining and clarifying the issues to be addressed in the NEPA document.

Dated: April 17, 2024.

Debbie-Anne Reese,

Acting Secretary.

[FR Doc. 2024–08625 Filed 4–22–24; 8:45 am]

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPPT–2020–0413; FRL–11604–01–OCSPP]

Agency Information Collection Activities; Proposed Renewal of an Existing ICR Collection and Request for Comment; Toxic Substances Control Act (TSCA) Section 8(b) Reporting and Requirements for TSCA Inventory Notifications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA), this document announces the availability of and solicits public comment on the following Information Collection Request (ICR) that EPA is planning to submit to the Office of Management and Budget (OMB): ''TSCA Section 8(b) Reporting Requirements for TSCA Inventory Notifications,'' identified by EPA ICR No. 2565.04 and OMB Control No. 2070–0201. This ICR represents a renewal of an existing ICR that is currently approved through January 31, 2025. Before submitting the ICR to OMB for review and approval under the PRA, EPA is soliciting comments on specific aspects of the information collection that is summarized in this document. The ICR and accompanying material are available in the docket for public review and comment.

DATES: Comments must be received on or before June 24, 2024.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2020–0413, through the Federal eRulemaking Portal at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Katherine Sleasman, Mission Support Division (7602M), Office of Program Support, Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–1206; email address: *sleasman.katherine@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. What information is EPA particularly interested in?

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

3. Enhance the quality, utility, and clarity of the information to be collected.

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What Information Collection Activity or ICR does this action apply to?

Title: TSCA Section 8(b) Reporting Requirements for TSCA Inventory Notifications.

EPA ICR No.: 2565.04.

OMB Control No.: 2070–0201.

ICR status: This ICR is currently approved through January 31, 2025. Under the PRA, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR addresses the reporting and recordkeeping requirements under TSCA section 8(b) that are associated with the TSCA Chemical Substance Inventory (TSCA Inventory), as codified in 40 CFR part 710. TSCA section 8(b) specifically requires that EPA compile and keep current a list of chemical substances manufactured or processed for commercial purposes in the United States. That mandate was amended in 2016 and TSCA section 8(b)(4) requires EPA to designate chemical substances on the TSCA Chemical Substance Inventory as either ''active'' or ''inactive'' in U.S. commerce. The first TSCA Inventory with all chemical substances designated as ''active'' or ''inactive'' published in February 2019.

This ICR addresses the activities and burdens associated with the ongoing reporting (EPA Form No. 9600–06; Notice of Activity Form B), including the substantiation of CBI and related recordkeeping requirements in 40 CFR part 710, and accounts for estimates from the ICR titled ''Final Rule; Procedures for Review of CBI Claims for the Identity of Chemicals on the TSCA Inventory (Notice of Activity Form As)'' (OMB Control No. 2070–0210; EPA ICR No. 2594.03). EPA finalized the requirements for regulated entities to substantiate certain CBI claims made under the TSCA to protect the specific chemical identities of chemical substances on the confidential portion of the TSCA Inventory, and the Agency's plan for reviewing certain CBI claims for specific chemical identities in

a final rule titled ''Procedures for Review of CBI Claims for the Identity of Chemicals in the TSCA Inventory'' (85 FR 13062, March 6, 2020 (FRL–10005–48)). The substantiation requirements describe the applicable procedures and provide instructions for regulated entities. The Agency's plan set out the review criteria and related procedures that EPA will use to complete the reviews within the five-year timeframe set in TSCA, and the ongoing reporting and recordkeeping activities are incorporated into this ICR.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 147 hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/affected entities: Entities potentially affected are those that manufacture (defined by statute to include import) or process chemical substances that are regulated under TSCA. The following North American Industrial Classification System (NAICS) codes have been provided to assist in determining whether this action might apply to certain entities:

- NAICS Code 325 Chemical Manufacturers; and
- NACIS Code 324 Petroleum and Coal Products.

Respondent's obligation to respond: Mandatory, per 40 CFR part 710 and TSCA section 8.

Frequency of response: On occasion.

Total estimated number of potential respondents: 57.

Total estimated average number of responses for each respondent: 1.5.

Total estimated annual respondent burden hours: 143.6 hours.

Total estimated annual respondent costs: $19,956.68, which includes $0 for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There is a decrease of 90 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects a reduction in the estimated number of chemicals reported in each submission, *i.e.,* from 18 to an average one chemical. This change is an adjustment.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Authority: 44 U.S.C. 3501 *et seq.*

Dated: April 18, 2024.

Michal Freedhoff,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OGC–2024–0180; FRL–11893–01–OGC]

Proposed Settlement Agreement, Clean Air Act Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement agreement; request for public comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act, as amended (''CAA'' or ''the Act''), the Environmental Protection Agency (''EPA'' or ''the Agency'') is providing notice of a proposed settlement agreement in *United States Steel Corp.* v. *EPA,* Case Nos. 13–3595, 16–2668, and 18–1249 (8th Cir.). Petitioner United States Steel Corporation (''U.S. Steel'') has filed petitions for review in the United States District Court of Appeals for the Eighth Circuit, challenging final rules promulgated by EPA under the CAA related to regional haze best available retrofit technology determinations for taconite facilities owned and operated by U.S. Steel in Minnesota. The proposed settlement agreement would establish deadlines for EPA to take certain, specified actions.

DATES: Written comments on the proposed settlement agreement must be received by May 23, 2024.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2024–0180 online at *https://www.regulations.gov* (EPA's preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. Comments received may be posted without change to *https://www.regulations.gov/,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Additional Information about Commenting on the Proposed Settlement Agreement'' heading under the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Christopher Grubb, Office of Regional Counsel, U.S. Environmental Protection Agency Region 5; telephone (312) 886–7187; email address *grubb.christopher@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining a Copy of the Proposed Settlement Agreement

The official public docket for this action (identified by Docket ID No. EPA–HQ–OGC–2024–0180) contains a copy of the proposed settlement agreement. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OEI Docket is (202) 566–1752.

The electronic version of the public docket for this action contains a copy of the proposed settlement agreement, and is available through *https://www.regulations.gov.* You may use *https://www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search.''

II. Additional Information About the Proposed Settlement Agreement

In 2013, EPA issued a Regional Haze (RH) Federal Implementation Plan (FIP) that established nitrogen oxide (NO_X) and sulfur dioxide (SO_2) best available retrofit technology emission limits for U.S. Steel's Minntac and Keetac facilities. Approval and Promulgation of Air Quality Implementation Plans;

States of Minnesota and Michigan; Regional Haze State Implementation Plan; Federal Implementation Plan for Regional Haze. 78 FR 8706 (February 6, 2013) (Original FIP Rule). EPA has taken several subsequent actions to revise the Original FIP Rule and to address administrative petitions related to EPA's actions. U.S. Steel has filed multiple challenges in response to EPA's actions. U.S. Steel brought these challenges pursuant to sections 110, 169A, and 307 of the CAA, 42 U.S.C. 7410, 7491, and 7607. EPA reached a settlement with U.S. Steel for the Minntac facility in 2018.

The proposed settlement agreement (the ''Second Settlement Agreement'') relates to U.S. Steel's Keetac facility. The Second Settlement Agreement, if finalized, provides a process for resolving U.S. Steel's challenges in *United States Steel Corp.* v. *EPA,* Case Nos. 13–3595, 16–2668, and 18–1249 (8th Cir.). Under the Second Settlement Agreement, no later than twelve months after publication of notice of this settlement in the **Federal Register**, EPA would sign a proposed rulemaking proposing changes to the Original FIP Rule that is substantially consistent with, and contains numeric emission limits and time frames identical to those set forth in, Attachment A to the Second Settlement Agreement. If EPA timely signs a final rule that includes changes that are substantially consistent with, and includes numeric emission limits and time frames identical to those set forth in, Attachment A to the Second Settlement Agreement, and if no petition for review of the final rule has been filed in the U.S. Court of Appeals for the Eighth Circuit within sixty days, U.S. Steel will promptly file an appropriate pleading for the dismissal with prejudice of Case Nos. 13–3595, 16–2668, and 18–1249, which will resolve the litigation.

The proposed Second Settlement Agreement also includes standard language regarding resolution of costs and attorneys' fees, stipulation of extensions, lapses in appropriations, disputes in implementation, preservation of Agency discretion, and the CAA section 113(g) process.

In accordance with section 113(g) of the CAA, for a period of thirty (30) days following the date of publication of this document, the Agency will accept written comments relating to the proposed settlement agreement. EPA or the Department of Justice may withdraw or withhold consent to the proposed settlement agreement if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

III. Additional Information About Commenting on the Proposed Settlement Agreement

Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2024–0180, via *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from this docket. EPA may publish any comment received to its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file-sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* For additional information about submitting information identified as CBI, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this document. Note that written comments containing CBI and submitted by mail may be delayed and deliveries or couriers will be received by scheduled appointment only.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *https://www.regulations.gov* website to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment.

Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

Gautam Srinivasan,

Associate General Counsel.

Agency Information Collection Activities; Proposed Renewal of an Existing ICR Collection and Request for Comment; Reporting and Recordkeeping for Asbestos Abatement Worker Protection

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA), this document announces the availability of and solicits public comment on the following Information Collection Request (ICR) that EPA is planning to submit to the Office of Management and Budget (OMB): ''Reporting and Recordkeeping for Asbestos Abatement Worker Protection,'' identified by EPA ICR No. 1246.15 and OMB Control No. 2070–0072. This ICR represents a renewal of an existing ICR that is currently approved through January 31, 2025. Before submitting the ICR to OMB for review and approval under the PRA, EPA is soliciting comments on specific aspects of the information collection that is summarized in this document. The ICR and accompanying material are available in the docket for public review and comment.

DATES: Comments must be received on or before June 24, 2024.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2020–0262, through *http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information

whose disclosure is restricted by statute. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Katherine Sleasman, Mission Support Divison (7602M), Office of Program Support, Office of Chemical Safety and Pollution Prevention, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–1206; email address: *sleasman.katherine@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. What information is EPA particularly interested in?

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

3. Enhance the quality, utility, and clarity of the information to be collected.

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What Information Collection Activity or ICR does this action apply to?

Title: Reporting and Recordkeeping for Asbestos Abatement Worker Protection.

EPA ICR No.: 1246.15.

OMB Control No.: 2070–0072.

ICR status: This ICR is currently approved through January 31. 2025. Under the PRA, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR covers reporting and recordkeeping requirements associated with EPA's workplace standards for the protection of state and local government employees who work with asbestos and who are not covered by a state plan approved by the Occupational Safety and Health Administration (OSHA). Currently, state and local government employees in 23 states, the District of Columbia (DC), and three additional U.S. territories (DC and the territories are counted as one ''state equivalent'') who perform construction work, including building construction, renovation, demolition, and maintenance activities, and employees who perform brake and clutch repair work, are covered by these requirements. EPA's asbestos worker protection regulations incorporate, by reference, the OSHA Construction Industry Standard for Asbestos (29 CFR 1926.1101) and the General Industry Standard for Asbestos (29 CFR 1910.1001). EPA requires state and local government employers to use engineering controls and appropriate work practices to control the release of asbestos fibers. Covered employers must also monitor employee exposure to asbestos and provide employees with personal protective equipment, training, and medical surveillance to reduce the risk of asbestos exposure. Exposure monitoring records must be maintained for 30 years, medical surveillance records for the duration of employment of the affected employees plus 30 years, and training records for the duration of employment plus one year. Employers must also establish written respiratory protection programs and maintain procedures and records of respirator fit tests for one year.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.32 hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/affected entities: Respondents for this information collection include states and local government employers in the 23 states, DC, and the U.S. territories that have employees engaged in asbestos-related construction, custodial, and brake and clutch repair activities without OSHA-approved state plans. The following North American Industrial Classification System (NAICS) codes have been provided to assist in determining whether this action might apply to certain entities:

- Public Administration (NAICS Code 92), and
- Educational Services (NAICS Code 61.

Respondent's obligation to respond: Mandatory. 40 CFR 763.

Frequency of response: Occasional.

Total estimated number of potential respondents: 34,138.

Total estimated average number of responses for each respondent: 33.

Total estimated annual burden hours: 358,049 hours.

Total estimated annual costs: $19,960,188, which includes an estimated $0 for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There is an increase in total burden costs of $3.066 million compared with that identified in the ICR currently approved by OMB, which reflects an increase of $10.45, or 23%, to the weighted average wage rate, and an increase of 10,701 in total respondents (state and local entities), reflecting updated numbers of governments from the Census of Governments. These increases are partially offset by a decrease of 46,824 in the total number of responses due to a decrease in the number of states subject to the rule compared with that identified in the ICR currently approved by OMB. There is a decrease in burden hours by 14,920 due to a decrease in estimated number of responses. These changes qualify as adjustments.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional

comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Authority: 44 U.S.C. 3501 *et seq.*

Dated: April 18, 2024.

Michal Freedhoff,

Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OGC–2024–0179; FRL–11892–01–OGC]

Proposed Settlement Agreement, Clean Air Act Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement agreement; request for public comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act, as amended (''CAA'' or ''the Act''), the Environmental Protection Agency (''EPA'' or ''the Agency'') is providing notice of a proposed settlement agreement in *Cleveland-Cliffs, Inc.* v. *Environmental Protection Agency,* Case No. 16–2643 (8th Cir.) (and consolidated cases). Petitioners Cleveland-Cliffs, Inc. (Cliffs) and Cleveland-Cliffs Steel, LLC (Cliffs Steel) filed petitions for review in the United States Court of Appeals for the Eighth Circuit, challenging final rules promulgated by EPA under the CAA related to regional haze best available retrofit technology determinations for taconite facilities in Michigan and Minnesota. The proposed settlement agreement would establish deadlines for EPA to take certain, specified actions.

DATES: Written comments on the proposed settlement agreement must be received by May 23, 2024.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2024–0179 online at *https://www.regulations.gov* (EPA's preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. Comments received may be posted without change to *https://www.regulations.gov/,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Additional Information about Commenting on the Proposed Settlement Agreement'' heading under the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Christopher Grubb, Office of Regional Counsel, U.S. Environmental Protection Agency Region 5; telephone (312) 886–7187; email address *grubb.christopher@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining a Copy of the Proposed Settlement Agreement

The official public docket for this action (identified by Docket ID No. EPA–HQ–OGC–2024–0179) contains a copy of the proposed settlement agreement. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OEI Docket is (202) 566–1752.

The electronic version of the public docket for this action contains a copy of the proposed settlement agreement, and is available through *https://www.regulations.gov.* You may use *https://www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search.''

II. Additional Information About the Proposed Settlement Agreement

In February 2013, EPA issued a Regional Haze (RH) Federal Implementation Plan (FIP) that established nitrogen oxide (NO_x) and sulfur dioxide (SO_2) best available retrofit technology emission limits for taconite facilities in Minnesota and Michigan, entitled ''Approval and Promulgation of Air Quality Implementation Plans; States of Minnesota and Michigan; Regional Haze State Implementation Plan; Federal Implementation Plan for Regional Haze'' at 78 FR. 8706 (February 6, 2013) (the ''Original FIP Rule''). In September 2013, EPA issued partial disapprovals of Minnesota's and Michigan's regional haze SIPs for failure to require BART for the taconite furnaces, entitled ''Approval and Promulgation of Air Quality Implementation Plans; States of Michigan and Minnesota; Regional Haze,'' at 78 FR 59825 (September 30, 2013) (the ''SIP Rule''). Petitioners Cliffs and Cliffs Steel each filed a petition for review challenging the SIP Rule, and those petitions for review have been consolidated in the United States Court of Appeals for the Eighth Circuit under lead Case No. 13–3573. In 2016, EPA revised the Original FIP Rule to address administrative petitions related to EPA's actions, entitled ''Air Plan Approval; Minnesota and Michigan; Revision to 2013 Taconite Federal Implementation Plan Establishing BART for Taconite Plants; Final Rule,'' at 81 FR 21672 (April 12, 2016) (the ''Revised FIP Rule''). Petitioners Cliffs and Cliffs Steel each filed a petition for review challenging the Revised FIP Rule, and those petitions for review have been consolidated in the United States Court of Appeals for the Eighth Circuit under lead Case No. 16–2643.

The proposed settlement agreement, if finalized, provides a process for resolving all of Cliffs' and Cliffs Steel's challenges to the SIP Rule and the Revised FIP Rule. Under the proposed settlement agreement, no later than November 22, 2024, EPA would sign a proposed rulemaking proposing changes to the Revised FIP Rule that is substantially consistent with, and includes equations identical to those set forth in, Attachment A to the Settlement Agreement. If EPA timely signs a final rule that includes changes that are substantially consistent with, and includes equations identical to those set forth in, Attachment A to the Settlement Agreement, after the final rule has been published in the **Federal Register**, Cliffs and Cliffs Steel would promptly file an appropriate pleading for the dismissal with prejudice of Case Nos. 16–2643, 16–2653, 16–3446, 13–3573, 13–3575, and 14–1712, which will resolve the litigation.

The proposed Settlement Agreement also includes standard language regarding resolution of costs and attorneys' fees, stipulation of extensions, lapses in appropriations, disputes in implementation, preservation of Agency discretion, and the CAA section 113(g) process.

In accordance with section 113(g) of the CAA, for a period of thirty (30) days following the date of publication of this document, the Agency will accept written comments relating to the proposed settlement agreement. EPA or the Department of Justice may withdraw or withhold consent to the proposed settlement agreement if the comments disclose facts or considerations that indicate that such consent is

inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

III. Additional Information About Commenting on the Proposed Settlement Agreement

Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2024–0179, via *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from this docket. EPA may publish any comment received to its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file-sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* For additional information about submitting information identified as CBI, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this document. Note that written comments containing CBI and submitted by mail may be delayed and deliveries or couriers will be received by scheduled appointment only.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *https://www.regulations.gov* website to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment.

Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

Gautam Srinivasan,

Associate General Counsel.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–11901–01–OA]

Local Government Advisory Committee (LGAC) and Small Communities Advisory Subcommittee (SCAS) Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification of public meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (FACA), EPA herby provides notice of a meeting for the Local Government Advisory Committee (LGAC) and its Small Communities Advisory Subcommittee (SCAS) on the date and time described below. This meeting will be open to the public. For information on public attendance and participation, please see the registration information under **SUPPLEMENTARY INFORMATION**.

DATES: The SCAS will have a hybrid meeting prior to the LGAC on May 21st, 2024, from 8 a.m. to 9:30 a.m. eastern daylight time and the LGAC will have a hybrid meeting from 9:30 a.m. to 5 p.m. eastern daylight time.

FOR FURTHER INFORMATION CONTACT: Paige Lieberman, Designated Federal Officer (DFO), at *LGAC@epa.gov* or 202–564–9957.

Information on Accessibility: For information on access or services for individuals requiring accessibility accommodations, please contact Paige Lieberman by email at *LGAC@epa.gov.* To request accommodation, please do so five (5) business days prior to the meeting, to give EPA as much time as possible to process your request.

SUPPLEMENTARY INFORMATION:

Content

The LGAC will discuss several priority issues at EPA, including climate communication, environmental justice, and EPA's efforts to address cumulative impacts, and the reduction of plastic pollution. The SCAS will discuss a series of topics, including improving federal funding to smaller communities, and cyber security for small water systems. Agenda and meeting materials will be posted online (link below) one week prior to the meeting.

Registration

The meeting will be held virtually as well as in person. Members of the public who wish to participate should register by contacting the Designated Federal Officer (DFO) at *LGAC@epa.gov* by May 17, 2024.

Online participation will be via Microsoft Teams. In person participation will be Courtyard Marriott Hotel, 140 L St. SE, Washington, DC, 20003.

Once available, the agenda and other supportive meeting materials will be available online at *https://www.epa.gov/ocir/local-government-advisory-committee-lgac* and will be emailed to all registered. In the event of cancellation for unforeseen circumstances, please contact the DFO or check the website above for reschedule information.

Edlynzia Barnes,

Designated Federal Officer, Office of Congressional and Intergovernmental Relations.

Proposed Consent Decree, Clean Air Act Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; request for public comment.

SUMMARY: In accordance with the Clean Air Act, as amended (CAA or the Act), notice is given of a proposed consent decree in *Our Children's Earth Foundation* v. *Michael Regan,* No. 1:23–cv–2848 (D.D.C.). On September 26, 2023, Plaintiff Our Children's Earth Foundation filed a complaint in the United States District Court for the District of Columbia. Plaintiff alleged that the Environmental Protection

Agency (EPA or the Agency) failed to perform certain non-discretionary duties in accordance with the Act to timely respond to numerous state implementation plan (SIP) submissions from the States of Alabama, Florida, Georgia, Louisiana, South Carolina, and Texas. The proposed consent decree would establish deadlines for EPA to act on certain submissions.

DATES: Written comments on the proposed consent decree must be received by May 23, 2024.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2024–0182, online at *https://www.regulations.gov* (EPA's preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. Comments received may be posted without change to *https://www.regulations.gov,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Additional Information about Commenting on the Proposed Consent Decree'' heading under the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Kyle Durch, Air and Radiation Law Office, Office of General Counsel, U.S. Environmental Protection Agency; telephone (202) 564–1809; email address *durch.kyle@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining a Copy of the Proposed Consent Decree

The official public docket for this action (identified by Docket ID No. EPA–HQ–OGC–2024–0182) contains a copy of the proposed consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744 and the telephone number for the OEI Docket is (202) 566–1752.

The electronic version of the public docket for this action contains a copy of the proposed consent decree and is available through *https://www.regulations.gov.* You may use *https://www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search.''

II. Additional Information About the Proposed Consent Decree

The proposed consent decree would establish deadlines for EPA to take action pursuant to CAA section 110(k) on certain SIP submissions by the States of Louisiana, South Carolina, and Texas. First, by June 30, 2025, EPA would sign a final rule to approve, conditionally approve, or disapprove, in whole or in part, five SIP revisions related to minor New Source Review permitting regulations which South Carolina submitted to EPA between October 2007 and July 2016.[1]

Second, EPA would sign a final rule to approve, conditionally approve, disapprove, in whole or in part, the following SIP submissions from Louisiana and Texas by September 30, 2025: LA 2010 SO_2 NAAQS transport prongs 1 and 2, submitted on or about June 7, 2013; TX Transport prongs 1 and 2 portion of the 2010 SO_2 Infrastructure & Transport SIP, submitted on or about May 9, 2013; six SIP revisions related to the 2008 Ozone Serious Area National Ambient Air Quality Standards for the Dallas-Fort Worth and Houston-Galveston-Brazoria nonattainment areas, including the Attainment Demonstrations, RACT Analyses, and RACT NO_X and VOC Rules for the Dallas-Fort Worth area, submitted on or about May 13, 2020; TX 30 TAC 101.118a2 and 101.118b from the Houston 1-hour ozone section 185 fee alternative program, submitted on or about November 30, 2018; and Revisions to Texas Chapter 116—Project Emissions Accounting, submitted on or about July 9, 2021.

Third, EPA would sign a final rule to approve, conditionally approve, disapprove, in whole or in part, TX 5-Year Regional Haze Progress Report SIP Revision, Texas Project 2013–013–SIP–NR, submitted March 20, 2014, submitted on or about March 24, 2014, no later than December 15, 2026.

In accordance with section 113(g) of the CAA, for a period of thirty (30) days following the date of publication of this document, the Agency will accept written comments relating to the proposed consent decree. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

III. Additional Information About Commenting on the Proposed Consent Decree

Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2024–0182, via *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from this docket. EPA may publish any comment received to its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* For additional information about submitting information identified as CBI, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this document. Note that written comments containing CBI and submitted by mail may be delayed and deliveries or couriers will be received by scheduled appointment only.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket and made available in EPA's electronic public docket. If EPA cannot read your

[1] The submissions identified from the States of Alabama, Florida, and Georgia, as well as certain submissions from the State of Texas, were acted upon by EPA, are part of other litigation, or withdrawn during the pendency of the suit and are thus no longer at issue. The remainder of this notice will focus only on the remaining submissions from the States of Louisiana, South Carolina, and Texas.

comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *https://www.regulations.gov* website to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment.

Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

Gautam Srinivasan,

Associate General Counsel.

[FR Doc. 2024–08614 Filed 4–22–24; 8:45 am]

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1126; FR ID 214934]

Information Collection Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before May 23, 2024.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Nicole Ongele, FCC, via email to *PRA@fcc.gov* and to *Nicole.Ongele@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Nicole Ongele at (202) 418–2991. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–1126.

Title: Testing and Logging Requirements for Wireless Emergency Alerts (WEA).

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit; Not-for-profit institutions; State, Local or Tribal Government.

Number of Respondents and Responses: 76 respondents, 429,020 responses.

Estimated Time per Response: 3.375 hours.

Frequency of Response: Monthly and on occasion reporting and record keeping requirements.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection is contained in 47 U.S.C. 151, 152, 154, 301, 303, 307, 309, 316, 403, 554, 606, 1201, 1202, 1203, 1204, and 1206 of the Communications Act of 1934.

Total Annual Burden: 119,121 hours.

Total Annual Cost: No Cost.

Needs and Uses: The Commission adopted requirements for Participating CMS Providers to log the basic attributes of alerts they receive at their Alert Gateway, to maintain those logs for at least 12 months, to make those logs available upon request to the Commission and FEMA, and to emergency management agencies that offer confidentiality protection at least equal to that provided by federal FOIA. The Commission also requires Participating CMS Providers to disclose information regarding their capabilities for geo-targeting Alert Messages initiated by that emergency management agency, and information regarding the results of WEA Performance and Public Awareness Testing. These recordkeeping and reporting requirements have potential to increase emergency managers' confidence that WEA will work as intended when needed. This increased confidence in system availability encourages emergency management agencies that do not currently use WEA to become authorized. These reporting and recordkeeping requirements also help to ensure a fundamental component of system integrity against which future iterations of WEA can be evaluated. Without records that can be used to describe the quality of system integrity, and the most common causes of message transmission failure it would be difficult to evaluate how any changes to WEA may effect system integrity.

Federal Communications Commission.

Marlene Dortch,

Secretary. Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)).

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than May 23, 2024.

A. Federal Reserve Bank of Kansas City (Jeffrey Imgarten, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198–0001. Comments can also be sent electronically to *KCApplicationComments@kc.frb.org:*

1. *Four States Bancshares, Inc., Carthage, Missouri;* to become a bank holding company by acquiring Four States Bank, Carthage, Missouri.

Board of Governors of the Federal Reserve System.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

[FR Doc. 2024–08645 Filed 4–22–24; 8:45 am]

BILLING CODE P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the applications are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than May 8, 2024.

A. Federal Reserve Bank of Philadelphia (William Spaniel, Senior Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105–1521. Comments can also be sent electronically to *comments.applications@phil.frb.org:*

1. *Castle Creek Capital Partners VIII, LP; Castle Creek Capital VIII LLC; Castle Creek Advisors VIII LLC; Castle Creek Special Situations II, LP; Castle Creek Special Situations II GP, LLC; Castle Creek Advisors IV LLC; JME Advisory Corp.; Scavuzzo Advisory Corp.; Volk Advisory Corp.; and Rana Advisory Corp., all of San Diego, California; John Eggemeyer, Rancho Santa Fe, California; Anthony Scavuzzo, Dallas, Texas; David Volk, San Diego, California; and Sundeep Rana, Dallas, Texas;* a group acting in concert, to acquire additional voting shares of Blue Ridge Bankshares, Inc., Richmond, Virginia, and thereby indirectly acquire additional voting shares of Blue Ridge Bank, National Association, Martinsville, Virginia.

Board of Governors of the Federal Reserve System.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–24–24EP; Docket No. CDC–2024–0028]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled REACH: Rural Re-Engagement and Care using Community Health Workers (CHWs) for Persons with HIV. This project is designed to collect standardized program evaluation data from health departments and HIV clinic partners who receive Federal funds for these activities.

DATES: CDC must receive written comments on or before June 24, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0028 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) *or by U.S. mail to the address listed above.*

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7118; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

REACH: Rural Re-Engagement and Care using CHWs for Persons with HIV—New—National Center for HIV, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

In rural communities, people with HIV (PWH) may face challenges in accessing consistent HIV care services. In these communities, PWH may also experience health care provider shortages and have fewer providers with expertise in treating HIV. Transportation challenges, where some patients have to travel long distances for care, may also exist. Previous studies have shown community-based or home-based delivery of care is an effective approach to re-engage PWH back into HIV clinical care. This strategy was studied primarily internationally with results showing that community-based delivery of anti-retroviral treatment (ART) significantly increased viral suppression. However, in the US, this model, which may include home visits, has not been implemented as part of routine treatment and care services. Community health workers (CHWs) are frontline public health workers who are trusted members of the community and have a uniquely close understanding of the community served. This trusting relationship enables the CHW to serve as a liaison between health/social services and the community. A CHW approach was assessed as part of the EHE pilot jumpstart initiative which found that CHWs were successful in East Baton Rouge, LA, by facilitating access to HIV treatment for priority populations. Additionally, the use of CHWs has been successful and cost-effective for certain chronic health conditions, particularly when working with low-income persons; people who are medically underserved, and racial/ethnic minority communities to promote disease management in these populations. This demonstration project will provide quantitative and qualitative data on the effectiveness and implementation of a CHW home-based approach to facilitate re-engagement in care and outreach to PWH. The approach aims to improve retention in care and sustained viral load suppression among PWH living in rural communities, to benefit both individual health and reduce community-level HIV transmission. In this demonstration project, recipients are funded to collaborate with HIV care providers to identify PWH in rural communities not in care or not virally suppressed and to implement a CHW-mediated model of re-engagement to care and outreach services for PWH in rural communities. CHWs facilitate re-engagement of PWH who are not in care and outreach to those who are not virally suppressed to provide services that may include ART delivery, sample collection for standard HIV laboratory testing, transfer of self-collected specimens, as well as provide transportation services, arranging and scheduling telehealth visits and/or in person visits with an HIV medical provider and other providers (mental health, primary care) and offer evidence-based medication adherence support.

This collection of deidentified data will allow CDC to assist health departments and their partner HIV clinics in monitoring and evaluating their programs and to identify best practices for provision of implementation of CHW-mediated services for re-engagement to care and outreach for PWH in rural communities. Longitudinal person-level data collection will occur through the clinic's electronic health record (EHR) and a database shared between clinic and the health department, and additional program evaluation data will be collected through client surveys. CDC requests approval for 295 annual burden hours for the recipients to collect, enter or upload, and report client demographic and behavioral characteristics, client data from the EHR, and client and provider surveys. There are no other costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (in hrs.)
REACH Recipient Data Manager	Electronic Health Record Data Form	5	2	8	80
REACH Recipient Data Manager	Client Info Form	5	2	2	20
REACH Clients	Client Info Form	500	1	6/60	50

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–2024–24EO; Docket No. CDC–2024–0027]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Evaluation of HIV Self-Testing and Clinical Testing Guidelines Implementation. This project is designed to collect data from HIV healthcare providers, working in various settings, on the awareness and uptake of HIV-related guidelines.

DATES: CDC must receive written comments on or before June 24, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0027 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

Evaluation of HIV Self-Testing and Clinical Testing Guidelines Implementation—New—National Centers for HIV, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

It takes several years and a significant number of staff and resources to develop and disseminate guidelines. The Division of HIV Prevention (DHP) has been a leader in informing providers and program staff when it comes to HIV prevention through respective guidelines. Yet, DHP's understanding of the awareness and use of HIV-related guidelines has been limited. There have been few efforts and resources dedicated to assessing and evaluating guideline implementation. With DHP's impending completion and publication of the HIV self-testing and updated HIV testing guidelines in 2024, this project proposes a mixed methods approach to evaluate the awareness and uptake of these guidelines by providers using quantitative and qualitative methods. These providers include those who

work in health departments, community health centers, clinics, or community-based organizations.

The purpose of this data collection is to: (a) assess the awareness and use of the HIV self-testing and HIV testing guidelines by healthcare providers working in different health settings; (b) understand the barriers and facilitators to uptake of guidelines; and (c) inform CDC efforts to support guideline implementation through training, promotion, or technical assistance. The new HIV self-testing guideline and updated HIV testing guideline are yet to be published. This project is the first attempt to evaluate these guidelines and as such, no other Federal agency systematically collects this type of information from healthcare providers that supply HIV testing services. This data collection will allow DHP to understand how guidelines are being implemented in the early days of release and inform efforts including resource allocation for guideline development, translation, and implementation efforts.

CDC requests approval for a three-year information collection. Data are collected through surveys and virtual or phone interviews conducted with healthcare providers. There is no monetary compensation or incentives provided for participation in the interview or survey. These data may inform prevention program development and monitoring, resource allocation, and technical assistance needs at both the local and national levels. CDC estimates that this data collection will involve, 1100 surveys and 120 interviews in specific settings (community health centers, health departments, private clinics, public clinics, hospitals, and community-based organizations) over the course of three years. CDC requests OMB approval for an estimated 610 annual burden hours. Participation of respondents is voluntary and there is no cost to the respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Eligible Providers	Survey	1,100	1	30/60	550
Eligible Providers	Interview Questionnaire	120	1	30/60	60
Total					610

Jeffrey M. Zirger,

Lead, Information Collection Review Office, Office of Public Health Ethics and Regulations, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–24–0666; Docket No. CDC–2024–0030]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled National Healthcare Safety Network (NHSN). NHSN provides facilities, States, regions, and the nation with data necessary to identify problem areas, measure the progress of prevention efforts, and ultimately eliminate healthcare-associated infections (HAIs) nationwide.

DATES: CDC must receive written comments on or before June 24, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0030 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected;

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

National Healthcare Safety Network (NHSN) (OMB Control No. 0920–0666, Exp. 12/31/2026)—Revision—National Center for Emerging and Zoonotic Infection Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Division of Healthcare Quality Promotion (DHQP), National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC) collects data from healthcare facilities in the National Healthcare Safety Network (NHSN) under OMB Control Number 0920–0666. NHSN provides facilities, States, regions, and the nation with data necessary to identify problem areas, measure the progress of prevention efforts, and ultimately eliminate healthcare-associated infections (HAIs) nationwide. NHSN allows healthcare facilities to track blood safety errors and various healthcare-associated infection prevention practice methods such as healthcare personnel influenza vaccine status and corresponding infection control adherence rates. NHSN currently has eight components: Patient Safety (PS), Healthcare Personnel Safety (HPS), Biovigilance (BV), Long-Term Care Facility (LTCF), Outpatient Procedure (OPC), Dialysis, Neonatal, and Medication Safety Component.

Data reported under the Patient Safety Component are used to determine the magnitude of the healthcare-associated adverse events and trends in the rates of the events, in the distribution of pathogens, and in the adherence to prevention practices. Data will help detect changes in the epidemiology of adverse events resulting from new medical therapies and changing patient risks. Additionally, reported data is being used to describe the epidemiology of antimicrobial use and resistance and to better understand the relationship of antimicrobial therapy to this rising problem. Under the Healthcare Personnel Safety Component, protocols and data on events—both positive and adverse—are used to determine: (1) the magnitude of adverse events in healthcare personnel; and (2) compliance with immunization and sharps injuries safety guidelines. Under the Biovigilance Component, data on adverse reactions and incidents associated with blood transfusions are reported and analyzed to provide national estimates of adverse reactions and incidents. Under the Long-Term Care Facility Component, data is captured from skilled nursing facilities. Reporting methods under the LTCF component have been created by using forms from the PS Component as a model with modifications to specifically address the specific characteristics of LTCF residents and the unique data needs of these facilities reporting into NHSN. The Respiratory Tract Infection Form (RTI)—will not to be used by NHSN users, but as part of an EIP project with four EIP sites. The Form is titled Denominators for Healthcare Associated Infections (HAIs): Respiratory Tract Infections. The purpose of this form is to allow testing prior to introducing a new module and forms to NHSN users. The CDC's Epidemiology Research & Innovations Branch (ERIB) team will use the form to perform field testing of variables to explore the utilization, applicability, and data collection burden associated with these variables. This process will inform areas of improvement prior to incorporating the new module, including protocol, forms, and instructions into NHSN. The Dialysis Component offers a simplified user interface for dialysis users to streamline their data entry and analysis processes as well as provide options for expanding in the future to include dialysis surveillance in settings other than outpatient facilities. The Outpatient Procedure Component (OPC) gathers data on the impact of infections and outcomes related to operative procedures performed in Ambulatory Surgery Centers (ASCs). The OPC is used to monitor two event types: Same Day Outcome Measures and Surgical Site Infections (SSIs). The Neonatal Component focuses on premature neonates and the healthcare associated events that occur because of their prematurity. This component currently has one module, which includes Late Onset-Sepsis and Meningitis. The Medication Safety Component tracks medication safety and adverse drug events that are among the most common causes of iatrogenic harm in U.S. hospitals.

NHSN has increasingly served as the operating system for HAI reporting compliance through legislation established by the States. As of July 2023, 37 States, the District of Columbia and the City of Philadelphia, Pennsylvania have opted to use NHSN as their primary system for mandated reporting. Reporting compliance is completed by healthcare facilities in their respective jurisdictions, with emphasis on those States and municipalities acquiring varying consequences for failure to use NHSN. Additionally, healthcare facilities in five U.S. territories (Puerto Rico, American Samoa, the U.S. Virgin Islands, Guam, and the Northern Mariana Islands) are voluntarily reporting to NHSN. Additional territories are projected to follow with similar use of NHSN for reporting purposes. NHSN's data is used to aid in the tracking of HAIs and guide infection prevention activities/practices that protect patients. The Centers for Medicare and Medicaid Services (CMS) and other payers use these data to determine incentives for performance at healthcare facilities across the U.S. and surrounding territories, and members of the public may use some protected data to inform their selection among available providers. Each of these parties is dependent on the completeness and accuracy of the data. CDC and CMS work closely and are fully committed to ensuring complete and accurate reporting, which are critical for protecting patients and guiding national, State, and local prevention priorities. CMS collects some HAI data and healthcare personnel influenza vaccination summary data, which is done on a voluntary basis as part of its Fee-for-Service Medicare quality reporting programs, while others may report data required by a Federal mandate. Facilities that fail to report quality measure data are subject to partial payment reduction in the applicable Medicare Fee-for-Service payment system. CMS links their quality reporting to payment for Medicare-eligible acute care hospitals, inpatient rehabilitation facilities, long-term acute care facilities, oncology hospitals, inpatient psychiatric facilities, dialysis facilities, and ambulatory surgery centers. Facilities report HAI data and healthcare personnel influenza vaccination summary data to CMS via NHSN as part of CMS's quality reporting programs to receive full payment. Still, many healthcare facilities, even in States without HAI reporting legislation, submit limited HAI data to NHSN voluntarily. NHSN's data collection updates continue to support the incentive programs managed by CMS. For example, survey questions support requirements for CMS' quality reporting programs. Additionally, CDC has collaborated with CMS on a voluntary

National Nursing Home Quality Collaborative, which focuses on recruiting nursing homes to report HAI data to NHSN and to retain their continued participation.

The ICR was previously approved in March 2024 for 2,433,165 burden hours. The proposed changes in this new ICR include revisions to 80 existing data collection forms and three new forms. In this Revision, CDC requests OMB approval for an estimated annual burden 3,635,534 hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Form number & name	Number of respondents	Number of responses per respondent	Avg. burden per response (min./hour 60)	Total burden (hours)
57.100 NHSN Registration Form	2,000	1	5/60	167
57.101 Facility Contact Information	2,000	1	10/60	333
57.103 Patient Safety Component—Annual Hospital Survey	5,400	1	137/60	12,330
57.104 NHSN Facility Administrator Change Request Form	800	1	5/60	67
57.105 Group Contact Information	1,000	1	5/60	83

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled ''Global Public Health Data Innovation Performance Monitoring'' to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on February 9, 2024 to obtain comments from the public and affected agencies. CDC received two comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Global Public Health Data Innovation Performance Monitoring (OMB Control Number pending)—New—Global Health Center (GHC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Global Public Health Data Innovation (GPHDI) initiative, led by the U.S. Centers for Disease Control and Prevention (CDC), aims to equip government decision makers with timely, accurate, and comprehensive public health data to effectively prevent, detect, and respond to public health threats. Challenges, such as limited data access, non-standardization, workforce limitations, and gaps in data systems and governance, often hinder the optimal use of data in public health response efforts. To overcome these challenges, GPHDI focuses on strengthening global outbreak response, pandemic preparedness, and surveillance through improved data availability and utilization. This is achieved by modernizing data systems and processes at all levels.

GPHDI is made possible by the American Rescue Plan Act passed by the U.S. Congress in 2021 and is rooted in key strategic pillars within CDC, namely the Data Modernization Initiative (DMI) and the Global Digital Health Strategy (GDHS). DMI is an agency-wide initiative aimed at improving data systems infrastructure within the United States, offering valuable insights and artifacts that can be adapted and leveraged for the global context of the GPHDI initiative. The goal of DMI is to get better, faster, actionable insights for decision making at all levels of public health. Complementing this, the GDHS incorporates inputs from a multi-partner engagement process, enhancing the strategic approach of the initiative.

GPHDI is currently a three-year investment that builds on an existing foundation laid by various country governments, donor agencies, and multilateral organizations. This investment is specifically allocated to advance the initiative in 10 selected countries, including Kenya, Sierra Leone, Uganda, and Zambia in Africa; Colombia and Paraguay in the South American Region; Georgia and Ukraine in Eastern Europe; Thailand in the Central Asia Region; and Honduras in the Central American Region.

This data collection is aimed at monitoring and assessing the contributions of current GPHDI investments in data modernization and digital public health infrastructure towards improving data availability to prevent, detect, and respond to public health threats in the selected countries. The indicators to be collected as shown in the data collection instrument include both structured response-type questions (Yes-No answers, coded answers) and narrative response-type questions. CDC contractors, RTI International (RTI) will conduct the interviews and CDC-funded implementing partners (IPs) monitoring and evaluation (M&E) point of contacts will provide responses to the indicators based on their funded activities. RTI will document the responses from the interviews using an instance of CDC RedCap. Interviews will be conducted in a live one-on-one session between RTI and identified M&E point of contacts at the funded IPs. No patient-level or individual level or identifiable data will be collected for this project.

CDC requests OMB approval for an estimated 64 annual burden hours. There are no costs to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Implementing partners (Monitoring and evaluation point of contacts).	Monitoring question guide	32	1	2

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–24–24ER; Docket No. CDC–2024–0029]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Direct Reading Methodologies, Sensors, and Robotics Technology Assessment in Lab/Simulator-based Settings. The proposed data collection will allow NIOSH to assess the safety and health considerations of these rapidly changing direct reading methods, sensor, and robotics technologies.

DATES: CDC must receive written comments on or before June 24, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2024–0029 by either of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *www.regulations.gov.*

Please note: Submit all comments through the Federal eRulemaking portal (*www.regulations.gov*) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21–8, Atlanta, Georgia 30329; Telephone: 404–639–7570; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses; and
5. Assess information collection costs.

Proposed Project

Direct Reading, Sensor, and Robotics Technology Assessment in Lab/Simulator-based Settings—New—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC), National Institute for Occupational Safety and Health (NIOSH), is requesting approval of a new Generic information collection for a period of three years under the project titled, Direct Reading Methodologies, Sensor Technologies, and Robotics Technology Assessment in Lab/Simulator-based Settings. NIOSH is a Federal institute that operates within the CDC specifically dedicated to generating new knowledge in the field of occupational safety and health and responsible for transferring that knowledge into practice for the betterment of workers. Given NIOSH's mission to develop new knowledge, the Institute is uniquely positioned to evaluate potential benefits and risks relative to occupational safety and health issues of the 21st century workplace, work, and workforce—also discussed as the Future of Work (FOW). Areas requiring detailed attention and advancement include research and development in artificial intelligence, robotics, and sensor technologies. NIOSH has established alliances and partnerships with other Federal agencies and external partners to collaborate and share technical knowledge to improve awareness around workplace hazards and appropriate safeguards as it relates to technology. Consequently, NIOSH created two Centers charged with leading and coordinating these FOW efforts, with a focus on technology assessment and integration in the workplace that revolves around emerging recommendations and standards in advancing automation.

First, in 2014, the NIOSH Center for Direct Reading and Sensor Technologies (CDRST) was established to research and develop recommendations on the use of 21st century technologies in occupational safety and health. Both direct-reading methodologies and sensors are used to detect and monitor hazardous conditions, to assess and document intervention strategies, and especially to immediately trigger alarms in the event of unsafe conditions. Examples of direct reading and sensor technologies include real-time personal monitoring, wearable monitors, and exoskeletons including wearable robots.

Second, in 2017, NIOSH established the Center for Occupational Robotics Research (CORR) to study the nature of robots in the workplace, conduct workplace interventions to prevent robot-related worker injuries, and develop guidance for safe interactions between humans and robots. There are several common types of robots used in occupational environments—traditional industrial robots; professional or service robots; collaborative robots; and mobile

robots (*e.g.,* drones and powered exoskeletons). In most cases, NIOSH laboratories including virtual reality (VR) facilities, are used to conduct this research in a safe and controlled environment. Within these studies, human factors, safety engineering, and test strategies are utilized to provide feedback about the utility of various robotics technology in the workplace to inform design, as well as possible standards.

Direct reading methodologies, sensor technologies, and robotics technology play important roles in advancing automation to keep many workers within various industries safe while performing their professional duties but rapidly evolve and change in scope and use. NIOSH requests a Generic information collection package for assessing the safety and health considerations of these rapidly changing direct reading methods, sensor, and robotics technologies.

Different types of data will be collected around these technologies including: (1) body function assessments to identify the validity and reliability of direct reading, sensor, and robotic technologies; (2) physiological assessments to identify the impact of direct reading, sensor, and robotic technologies on worker outputs; (3) perceived knowledge, attitudes, skills, and other personal attributes to assess risks associated with the use and integration of direct reading, sensor, and robotics technologies among workers; and (4) barriers that workers face while using or interacting with direct reading methodologies, sensor technologies, and robotic technologies to prevent unintended safety and health consequences—including adoption and maintenance challenges. Collectively, this information will be used to inform research, development, and integration recommendations to advance the nation's FOW needs. These data collection efforts will most often occur in controlled laboratory space, including virtual reality space that simulates these technologies. In some cases (*e.g.,* survey or follow-up interview administration) data collection may occur electronically.

Respondents are expected to be reflective of the full spectrum of the U.S. workforce and from industries that rely heavily on direct reading methodologies, sensor technologies, and robotics technologies to protect workers (*e.g.,* public safety and emergency response, manufacturing, retail and trade, construction, mining, and oil and gas). Expected respondents include any worker who has experience with, is required to use, or willing to use and provide feedback on any sort of direct reading method, sensor, or robotics technology in the workplace—these could be wearable or non-wearable. Common job roles that wear or interact with such technology include construction workers, manufacturing workers, oil gas and extraction workers, mineworkers, retail workers, maintenance workers, manufacturing workers, fire chiefs/firefighters, law enforcement officers, and any industrial hygiene or occupational safety and health professional who oversees the integration and use of new technologies in the workplace. Recruitment for laboratory studies includes individuals from the general working population that represent high-hazard industries (*e.g.,* construction, manufacturing). These individuals are also all adults between the ages of 18 and 65 years.

CDC requests OMB approval for an estimated 205,002 total burden hours with an estimated annual burden of 68,334 hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Members of the general public who represent a variety of industrial sectors [1].	Informed Consent	4,000	1	5/60	334
	Pre-Screening Health Questionnaire: Standardized form with decision logic allowing some questions to be omitted.	4,000	2	15/60	2,000
	Demographics Questionnaire: Standardized form with decision logic allowing some questions to be omitted.	4,000	1	15/60	1,000
	Job Survey: Occupational tasks, postures used, duration of exposure, etc.	4,000	1	15/60	1,000
	Pre- and Post-Assessments: Determine changes in knowledge, skills, and abilities as it related to efficacy, confidence, and perceived competence in technology assessment/intervention (this could be strictly quantitative or semi-structured).	4,000	2	15/60	2,000
	Anthropometric Measurements: Calipers/digital measuring of facial and body dimensions with and without gear (*e.g.,* chest depth; foot breadth with and without proper personal protective equipment) to assess functional integration of wearables and other sensors.	4,000	12	5/60	4,000

ESTIMATED ANNUALIZED BURDEN HOURS—Continued

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
	Physiological Measurements: Measurements recorded using chest worn heart rate monitor strap, blood pressure cuff/strap, COSMED Kb5 or similar, SQ2020–1F8 temperature logger, TOSCA 500 pulse oximeter, Koken breathing waveform recording mask, MOXY muscle oxygenation strap sensor, neurophysiological measures including Electroencephalography (EEG), and Functional near-infrared spectroscopy (fNIRS), etc.	4,000	4	60/60	16,000
	Perceived Rate of Exertion: using validated perceived exertion scales (*e.g.,* Borg Ratings).	3,000	12	5/60	3,000
	Body Function Assessments: Measurements taken (e.g., on the low back, neck, shoulder, arm, etc.) to conduct strength testing, range of motion testing, reference or maximum voluntary exertions, endurance testing with different direct reading, wearable sensor, and robotics technologies.	3,000	6	30/60	9,000
	Motion Measurement Cameras: Camera with motion amplification technology (*e.g.,* Iris M, Moasure One, etc.) that can measure deflection, displacement, movement, and vibration not visible to the human eye using biomechanical markers for motion capture.	2,000	12	15/60	6,000
	Perceived Usability Assessments: Close- and open-ended questions to determine system usability including usability scales, mental workload, body part discomfort, and contact stress experiences of new direct reading, sensor, and robotics technologies (lab- and virtual reality-based).	4,000	6	10/60	4,000
	Self-Perception Surveys and other Structured Questions: Perceived comfort level with technology, perceived safety and trust level with technology, perceived fatigue while interacting with technology, etc.	4,000	6	10/60	4,000
	Biomechanics measurements: Force plate, strain gauges, stopwatch, accelerometers (including dataloggers), electromyography sensors human/equipment interaction forces, whole-body motion, Electromyography (EMG) for muscle activity, Near-infrared spectroscopy (NIRS) for muscle oxygenation, etc.	2,000	4	30/60	4,000
	Task Performance Measures: Measures recorded using various virtual reality systems (*e.g.,* Vive, Meta quest) and components (*e.g.,* controllers) that quantify the subjects' performance such as time to complete, errors, movement path, and omissions.	2,000	12	15/60	6,000
	Eye Tracking Measures: Recorded using various virtual reality glasses (*e.g.,* Ergoneers) to assess eyes-off-task time and recognition in response to simulated environments designed to assess integration of new robotic technologies and design set-up.	2,000	12	15/60	6,000

[30Day–24–24EZ]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request (ICR) titled ''Workplan Templates for Ten Regional Centers to Enhance Public Health Preparedness and Response'' to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on May 19, 2023 to obtain comments from the public and affected agencies. CDC received one comment related to the previous notice. This notice serves to allow 30 days for public and affected agency comments on new and updated information collection instruments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Workplan Templates for Ten Regional Centers to Enhance Public Health Preparedness and Response—New—Office of Readiness and Response (ORR), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Since 2001, CDC supported development implementation, evaluation, translation and dissemination of research findings, strategies, and interventions to improve public health preparedness and response systems, infrastructures, processes, and practices. This includes the long-standing PHEP cooperative agreement, CDC's Public Health Crisis Response Funding, and support for applied research and evaluation, metrics, measures, tools, and training development. In 2021, with contract support, CDC's Office of Applied Research (OAR) initiated 12 scoping reviews, six landscape analyses, and one systematic review to conduct deeper dives into topics such as trust in public health preparedness and response, emergency communications strategies with people with limited English proficiency, public health emergency preparedness and response (PHEPR) practice in rural and tribal communities, and use of health equity coordinators in incident management. The results of these reviews show great breadth in the PHEPR field as it relates to knowledge available to support current practice and highlights the need to expand knowledge to address specific gaps. These needs and gaps may differ across geographical regions and within those regions at the state or local level. To address needs to increase the uptake of evidence-based interventions, in December 2022, through section 2231 of the federal appropriations for fiscal year 2023, CDC was directed to support not fewer than 10 Centers for Public Health Emergency Preparedness and Response that are equally distributed among the geographical regions of the U.S. (referred to as the ''network of centers'').

This project aims to establish up to 10 centers across the designated Health and Human Services (HHS) regions for public health preparedness and response (PHPR). The goal is to improve PHPR practices by increasing the uptake of evidence-based strategies and interventions (EBSIs) that align with the needs of the communities involved. This will be achieved through: (1) the development of a five-year workplan that covers known strategies or interventions, plans to implement each strategy or intervention, or the development and evaluation of new approaches in PHPR; (2) the use of a Cooperative Agreement Work Plan Template to monitor performance of activities throughout the funding period; and (3) the use of an Evaluation Work Plan Template to support evaluation of implemented work plan activities.

The Five-Year Regional Work Plan addresses: (1) focus areas and objectives across State, Tribal, Local, and Territorial (STLT) and relevant partners that would benefit from use of new or enhanced PHPR EBSIs; (2) activities to meet objectives; (3) prioritized EBSIs to implement; (4) capability and capacity of STLT health departments and relevant partners to implement and evaluate activities; and (5) regional sustainability for implementation of evidence-based practice beyond the five-year period. Contractors will collect information from the 10 HHS regional Strategic Coordinators to develop focus areas, objectives, or activities for individualized workplans to advance the implementation of EBSIs for PHPR activities.

This proposed project also includes two additional instruments including: (1) an Evaluation Work Plan Template that provides background information needed to understand approaches in evaluating selected strategies or intervention activities; and (2) a Cooperative Agreement Work Plan Template that serves as a performance monitoring instrument that supports tracking of project activities throughout the performance period.

OMB approval is sought for three years. The estimated annualized burden for this information collection is 150 hours. There is no cost to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
HHS Regional Strategic Coordinators	Office of Readiness and Response—Regional Centers for Public Health Preparedness and Response: Five-Year Regional Workplan Template FY2024–2030.	10	1	5
HHS Regional Strategic Coordinators	Office of Readiness and Response—Evaluation Work Plan Template.	10	1	8
HHS Regional Strategic Coordinators	Office of Readiness and Response—Cooperative Agreement Work Plan.	10	1	2

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled ''Diabetes Prevention Recognition Program (DPRP)'' to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on 12/15/2023 to obtain comments from the public and affected agencies. CDC received 19 comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the attention of: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of the notice of publication.

Proposed Project

CDC Diabetes Prevention Recognition Program (DPRP) (OMB Control No. 0920–0909, Exp. 04/30/2024)—Revision—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

CDC's Division of Diabetes Translation (DDT) established and administers the National DPP's Diabetes Prevention Recognition Program (DPRP), which recognizes organizations that deliver a diabetes prevention program according to evidence-based requirements set forth in the Centers for Disease Control and Prevention's Diabetes Prevention Recognition Program Standards and Operating Procedures (DPRP Standards). Additionally, the Centers for Medicare & Medicaid Services (CMS) Medicare Diabetes Prevention Program (MDPP) expansion of CDC's National DPP was announced in early 2016, when the Secretary of Health and Human Services (HHS) determined that the Diabetes Prevention Program met the statutory criteria for inclusion in Medicare's expanded list of health care services for beneficiaries (*https://cmmi.my.site.com/mdpp/*). This was the first time a preventive service model from the CMS Innovation Center was expanded into Medicare. After extensive testing of this model in 17 sites across the U.S. in 2014–2016, CMS proposed the MDPP in sections 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh sec. 424.59), authorizing CDC-recognized organizations to prepare for enrollment as MDPP suppliers beginning in January 2018 in order to bill CMS for these services. Only organizations in good standing with the CDC DPRP are eligible as MDPP suppliers. CDC continues to work with CMS to support the MDPP.

CDC requests an additional three years of OMB approval to continue collecting the information needed to administer the DPRP and provide information needed by CMS to support the MDPP benefit. Based on experience with the DPRP from 2011–2023, including data analysis and feedback from applicant organizations and internal and external partners, CDC plans to revise the DPRP Standards and the associated information collection.

Key changes are a direct result of DPRP data analyses, recent literature reviews, and discussion with national DPP stakeholders, including those serving socially vulnerable populations. Key changes to the evaluation data collection instrument allow for the collection of participant zip codes (for

aggregate reporting only; not to be reported for each individual participant); an OMB-recommended six-point disability variable (not tied to CDC recognition and with a variable option of 'Participant chose not to respond'); a health equity-related social determinants of health (SDOH) variable set (to assess whether there was a social needs assessment conducted; key SDOH issues identified; and whether any action was taken; not tied to CDC recognition); a Middle Eastern or North African write-in option within the current race/ethnicity variable; and two new options for the current payersource variable.

Key changes to the application data collection instrument allow for a yes/no drop-down question asking if an organization's zip code is in an area of high social vulnerability based on the Social Vulnerability Index, which would permit an in-person organization to be fast-tracked to Preliminary recognition status to allow the organization to apply to CMS to become an MDPP supplier; revisions to the combination delivery mode to include an option for in-person delivery with a distance learning component; and collection of a projected program start-date.

During the period of this Revision, CDC estimates receipt of approximately 200 DPRP application forms per year from new organizations. The estimated burden per one-time application response is one hour (annualized to 200 hours). In addition, CDC estimates receipt of semi-annual evaluation data submissions from the same 200 additional organizations per year, estimated at two hours per response. The total estimated average annualized evaluation burden for new respondents is 2,400 hours. This includes an estimate of the time needed to extract and compile the required data records and fields from an existing electronic database, review the data, and enter the data via the DPRP Data Portal. CDC also has 1,500 currently recognized organizations that will continue to submit semi-annual evaluation data. These organizations are reflected in Supporting Statement B within this OMB revision.

The estimated burden per response is moderate, since the information requested for CDC recognition is routinely collected by most organizations that deliver the National DPP lifestyle change program for their own internal evaluation and possible insurance reimbursement purposes, including the MDPP benefit. Participation in the DPRP is voluntary, data are de-identified, no personally identifiable information (PII) is collected by CDC, and there are no costs to respondents other than their time. CDC is requesting a three-year approval. The total estimated annualized burden is 7,800 hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Avg. burden per response (in hours)
Public sector organizations that deliver the National DPP lifestyle change program.	DPRP Application Form	80	1	1
	DPRP Evaluation Data	740	2	2
Private sector organizations that deliver the National DPP lifestyle change program.	DPRP Application Form	120	1	1
	DPRP Evaluation Data	1,160	2	2

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10434]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services.

ACTION: Notice.

SUMMARY: On May 28, 2010, the Office of Management and Budget (OMB) issued Paperwork Reduction Act (PRA) guidance related to the ''generic'' clearance process. Generally, this is an expedited clearance process by which agencies may obtain OMB's approval of collection of information requests that are ''usually voluntary, low-burden, and uncontroversial,'' do not raise any substantive or policy issues, and do not require policy or methodological review. The process requires the submission of an overarching plan that defines the scope of the individual collections that may be submitted under that umbrella. This notice is intended to advise the public of our intent to extend OMB's approval of our MACPro (Medicaid and CHIP Program) umbrella and all of the individual generic collection of information requests that fall under that umbrella. This notice also provides the public with general instructions for obtaining documents that are associated with such collections and for submitting comments.

DATES: Comments must be received by May 23, 2024.

ADDRESSES:

Submitting Comments: When commenting, please reference the applicable collection's CMS ID number and/or the OMB control number (both numbers are listed below under the **SUPPLEMENTARY INFORMATION** caption). To be assured consideration, comments and recommendations must be submitted in any one of the following ways and by the applicable due date:

1. *Electronically.* We encourage you to submit comments through the Federal eRulemaking portal at the applicable web address listed below under the **SUPPLEMENTARY INFORMATION** caption under ''Docket Information.'' If needed, instructions for submitting such comments can be found on that website.

2. *By regular mail.* Alternatively, you can submit written comments to the following address:

CMS, Office of Strategic Operations and Regulatory Affairs (OSORA), Division of Regulations Development, Attention: CMS–10434/OMB 0938–1188, Room C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

Obtaining Documents: To obtain copies of supporting statements and any related forms and supporting documents for the collections listed in this notice, please refer to the following instructions:

1. We encourage you to access the Federal eRulemaking portal at the applicable web address listed below under the **SUPPLEMENTARY INFORMATION** caption under ''Docket Information.'' If needed, follow the online instructions

for accessing the applicable docket and the documents contained therein.

FOR FURTHER INFORMATION CONTACT: For general information contact William N. Parham at 410–786–4669. For policy related questions, contact the individual listed below under the **SUPPLEMENTARY INFORMATION** caption under ''Docket Information.''

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from OMB for each collection of information that they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c). Generally, it applies to voluntary and mandatory requirements that are related to any one or more of the following activities: the collection of information, the reporting of information, the disclose of information to a third-party, and/or recordkeeping.

While there are some exceptions (such as collections having non-substantive changes and collections requesting emergency approval) section 3506(c)(2)(A) of the PRA requires Federal agencies to publish 60- and 30-day notices in the **Federal Register** and solicit comment on each of its proposed collections of information, including: new collections, extensions of existing collections, revisions of existing collections, and reinstatements of previously approved collections before submitting such collections to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Interested parties are invited to submit comments regarding our burden estimates or any other aspect of the collection, including: the necessity and utility of the proposed information collection for the proper performance of our agency's functions; the accuracy of burden estimates; ways to enhance the quality, utility, and clarity of the information to be collected; and the use of automated collection techniques or other forms of information technology to minimize the information collection burden. See **DATES** and **ADDRESSES** for instructions for submitting comments.

While we will review all comments received, we may choose not to post off-topic or inappropriate comments. Otherwise, all comments will be posted without edit under the applicable docket number, including any personal information that the commenter provides. Our response to such comments will be posted at reginfo.gov under the applicable OMB control number.

Medicaid and CHIP Program (MACPro)

At this time, MACPro is made up of the main umbrella (see collection number 1 in the following list) and nine individual generic collections of information (see collection numbers 2 through 10 in the following list). Details such as the collection's requirements and burden estimates can be found in the collection's supporting statement and associated materials (see **ADDRESSES** for instructions for obtaining such documents).

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Community Services Block Grant (CSBG) Model Tribal Plan and Application (New Collection)

AGENCY: Office of Community Services, Administration for Children and Families, U.S. Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Office of Community Services (OCS), Administration for Children and Families (ACF), requests an approval of the Community Services Block Grant (CSBG) Model Tribal Plan.

DATES: *Comments due within 60 days of publication.* In compliance with the requirements of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described above.

ADDRESSES: You can obtain copies of the proposed collection of information and submit comments by emailing *infocollection@acf.hhs.gov.* Identify all requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: Section 677 of the CSBG Act requires Indian tribes or tribal organizations to submit an application and plan (CSBG Model Tribal Plan). The CSBG Model Tribal Plan must meet statutory requirements prior to OCS awarding CSBG tribal grant recipients with CSBG funds. Tribal grant recipients have the option to submit a detailed plan annually or biannually. Tribal grant recipients that submit a biannual plan must provide an abbreviated plan the following year if substantial changes to the initial plan will occur. The CSBG Model Tribal Plan has been used in previous years without OMB approval. To come into compliance with the PRA, ACF is submitting the CSBG Model Tribal Plan as a new request to OMB.

Respondents: Tribal grant recipients (*tribes and tribal organizations)*

ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Annual number of responses per respondent	Average burden hours per response	Annual burden hours
CSBG Model Tribal Plan	66	1	10	660

Comments: The Department specifically requests comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Authority: Sec. 677, Pub. L. 105–285, 112 Stat. 2742 (42 U.S.C. 9911)

Mary C. Jones,

ACF/OPRE Certifying Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–1786]

PAI Holdings, LLC DBA Pharmaceutical Associates, Inc., et al.; Withdrawal of Approval of 23 New Drug Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is withdrawing approval of 23 new drug applications (NDAs) from multiple applicants. The applicants notified the Agency in writing that the drug products were no longer marketed and requested that the approval of the applications be withdrawn.

DATES: Approval is withdrawn as of May 23, 2024.

FOR FURTHER INFORMATION CONTACT: Kimberly Lehrfeld, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6226, Silver Spring, MD 20993–0002, 301–796–3137, *Kimberly.Lehrfeld@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: The applicants listed in the table have informed FDA that these drug products are no longer marketed and have requested that FDA withdraw approval of the applications under the process in § 314.150(c) (21 CFR 314.150(c)). The applicants have also, by their requests, waived their opportunity for a hearing. Withdrawal of approval of an application or abbreviated application under § 314.150(c) is without prejudice to refiling.

NDA 019425	Trandate (labetalol HCl) Injection, 5 mg/mL	Sebela Ireland Limited, c/o Sebela Pharmaceuticals Inc., 645 Hembree Pkwy., Suite 1, Roswell, GA 30076.
NDA 020142	Cataflam (diclofenac potassium) Tablets, 25 mg and 50 mg ..	Novartis Pharmaceuticals Corp.
NDA 020254	Voltaren XR (diclofenac sodium) Extended-Release Tablets, 100 mg.	Do.
NDA 020631	Morphine Sulfate Injection, 1 mg/mL and 2 mg/mL	SpecGx LLC.
NDA 020768	Zomig (zolmitriptan) Tablets, 2.5 mg and 5 mg	iPR Pharmaceuticals, Inc., c/o AstraZeneca Pharmaceuticals LP, 1800 Concord Pike, Wilmington, DE 19803.
NDA 020897	Ditropan XL (oxybutynin chloride) Extended-Release Tablets, 5 mg, 10 mg, and 15 mg.	Janssen Pharmaceuticals, Inc.
NDA 020945	Norvir (ritonavir) Capsules, 100 mg	AbbVie Inc., 1 N. Waukegan Rd., North Chicago, IL 60064.
NDA 021226	Kaletra (lopinavir/ritonavir) Capsules, 133.3 mg/33.3 mg	Do.
NDA 021231	Zomig-ZMT (zolmitriptan) Orally Disintegrating Tablets, 2.5 mg and 5 mg.	iPR Pharmaceuticals, Inc., c/o AstraZeneca Pharmaceuticals LP.
NDA 021360	Sustiva (efavirenz) Tablets, 300 mg and 600 mg	Bristol-Myers Squibb Company, P.O. Box 4000, Princeton, NJ 08543–4000.
NDA 022484	Onmel (itraconazole) Tablets, 200 mg	Sebela Ireland Limited, c/o Sebela Pharmaceuticals Inc.
NDA 050679	Maxipime (cefepime HCl) for Injection, EQ 500 mg base/vial, EQ 1 gram base/vial, and EQ 2 gram base/vial.	Hospira Inc, 275 North Field Dr., Bldg. H1–3S, Lake Forest, IL 60045.
NDA 203696	Lupaneta Pack (leuprolide acetate injection and norethindrone acetate Tablets), 3.75 mg/vial;5 mg and 11.25 mg/vial;5 mg.	AbbVie Endocrinology Inc., 1 N Waukegan Rd., North Chicago, IL 60064.
NDA 206302	Byvalson (nebivolol HCl/valsartan) Tablets, EQ 5 mg base/80 mg.	AbbVie Inc.
NDA 208042	Cassipa (buprenorphine HCl/naloxone HCl) Sublingual Film, EQ 16 mg base/EQ 4 mg base.	Teva Pharmaceuticals USA, Inc., 577 Chipeta Way, Salt Lake City, UT 84108.
NDA 208437	Lonhala Magnair Kit (glycopyrrolate) Inhalation Solution, 25 microgram/mL.	Sumitomo Pharma America, Inc., 84 Waterford Dr., Marlborough, MA 01752.

Therefore, approval of the applications listed in the table, and all amendments and supplements thereto, is hereby withdrawn as of May 23, 2024. Approval of each entire application is withdrawn, including any strengths and dosage forms included in the application but inadvertently missing from the table. Introduction or delivery for introduction into interstate commerce of products listed in the table without an approved NDA violates sections 505(a) and 301(d) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(a) and 331(d)). Drug products that are listed in the table that are in inventory on May 23, 2024, may continue to be dispensed until the inventories have been depleted or the drug products have reached their expiration dates or otherwise become violative, whichever occurs first.

Dated: April 18, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–0946]

Report on the Performance of Drug and Biologics Firms in Conducting Postmarketing Requirements and Commitments; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of the Agency's annual report entitled ''Report on the Performance of Drug and Biologics Firms in Conducting Postmarketing Requirements and Commitments.'' Under the Federal Food, Drug, and Cosmetic Act (FD&C Act), FDA is required to report annually on the status of postmarketing requirements (PMRs) and postmarketing commitments (PMCs) required of, or agreed upon by, application holders of approved drug and biological products. The report on the status of the studies and clinical trials that applicants are required to, or have agreed to, conduct is on the FDA's website entitled ''Postmarketing Requirements and Commitments: Reports'' (*https://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/PostmarketingPhaseIVCommitments/ucm064436.htm*).

FOR FURTHER INFORMATION CONTACT: Kathy Weil, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 5367, Silver Spring, MD 20993–0002, 301–796–0700; or James Myers, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

Section 506B(c) of the FD&C Act (21 U.S.C. 356b(c)) requires FDA to publish an annual report on the status of postmarketing studies that applicants are required to, or have committed to, conduct and for which annual status reports have been submitted. Under §§ 314.81(b)(2)(vii) and 601.70 (21 CFR 314.81(b)(2)(vii) and 601.70), applicants of approved drug products and licensed biological products are required to submit annually a report on the status of each clinical safety, clinical efficacy, clinical pharmacology, and nonclinical toxicology study or clinical trial either required by FDA (PMRs) or that they have committed to conduct (PMCs), either at the time of approval or after approval of their new drug application, abbreviated new drug application, or biologics license application, as applicable. The status of PMCs concerning chemistry, manufacturing, and production controls and the status of other studies or clinical trials conducted on an applicant's own initiative are not required to be reported under §§ 314.81(b)(2)(vii) and 601.70 and are not addressed in this report. Furthermore, section 505(o)(3)(E) of the FD&C Act (21 U.S.C. 355(o)(3)(E)) requires that applicants report periodically on the status of each required study or clinical trial and each study or clinical trial ''otherwise undertaken . . . to investigate a safety issue . . .''

An applicant must report on the progress of the PMR/PMC on the anniversary of the drug product's approval [1] until the PMR/PMC is completed or terminated and FDA determines that the PMR/PMC has been fulfilled or that the PMR/PMC is either no longer feasible or would no longer provide useful information.

II. Fiscal Year 2022 Report

With this notice, FDA is announcing the availability of the Agency's annual report entitled ''Report on the Performance of Drug and Biologics Firms in Conducting Postmarketing Requirements and Commitments.'' Information in this report covers any PMR/PMC that was established, in writing, at the time of approval or after approval of an application or a supplement to an application and summarizes the status of PMRs/PMCs in fiscal year 2022 (*i.e.,* as of September 30, 2022). Information summarized in the report reflects combined data from the Center for Drug Evaluation and Research and the Center for Biologics Evaluation and Research and includes the following: (1) the number of applicants with open PMRs/PMCs; (2) the number of open PMRs/PMCs; (3) the timeliness of applicant submission of the annual status reports (ASRs); (4) FDA-verified status of open PMRs/PMCs reported in § 314.81(b)(2)(vii) or § 601.70 ASRs; (5) the status of closed PMRs/PMCs; and (6) the distribution of the status by fiscal year (FY) of establishment [2] (FY2016 to FY2022) for PMRs and PMCs open at the end of FY2022, or those closed within FY2022. Additional information about PMRs/PMCs is provided on FDA's website at *https://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Post-marketingPhaseIVCommitments/default.html.*

Dated: April 18, 2024.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–1055]

Agency Information Collection Activities; Proposed Collection; Comment Request; Data To Support Social and Behavioral Research as Used by the Food and Drug Administration

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on a generic clearance to collect information to support social and behavioral research used by FDA about drug products.

DATES: Either electronic or written comments on the collection of information must be submitted by June 24, 2024.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of June 24, 2024. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

[1] An applicant must submit an annual status report on the progress of each open PMR/PMC within 60 days of the anniversary date of U.S. approval of the original application or on an alternate reporting date that was granted by FDA in writing. Some applicants have requested and been granted by FDA alternate annual reporting dates to facilitate harmonized reporting across multiple applications.

[2] The establishment date is the date of the formal FDA communication to the applicant that included the final FDA-required (PMR) or requested (PMC) postmarketing study or clinical trial.

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include Docket No. FDA–2024–N–1055 for ''Agency Information Collection Activities; Proposed Collection; Comment Request; Data To Support Social and Behavioral Research as Used by the Food and Drug Administration.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: JonnaLynn Capezzuto, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–3794, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Data To Support Social and Behavioral Research as Used by the Food and Drug Administration

OMB Control Number 0910–0847—Extension

This information collection is intended to support FDA-conducted research. Understanding patients, consumers, and healthcare professionals' perceptions and behaviors plays an important role in improving FDA's regulatory decision-making processes and communications that affect various stakeholders. FDA uses the following methodology to achieve these goals: (1) creation and validation of survey instruments; (2) use of techniques to evaluate sampling and recruitment methods; (3) evaluation of the validity and reliability of survey instruments; (4) individual in-depth interviews, (5) general public focus group interviews, (6) intercept interviews, (7) self-administered surveys, (8) gatekeeper surveys, and (9) focus group interviews. These methods serve the narrowly defined need for direct and informal opinion on a specific topic and serve as a qualitative and quantitative research tool having two major purposes:

• Obtaining useful, valid, and reliable information for the development of variables and measures for formulating the basic objectives of social and behavioral research and

• Successfully communicating and addressing behavioral changes with intended audiences to assess the potential effectiveness of FDA communications, behavioral interventions, and other materials.

While FDA will use these methods to test and refine its ideas and help develop communication and behavioral strategies research, the Agency will generally conduct further research before making important decisions (such as adopting new policies and allocating or redirecting significant resources to support these policies).

FDA's Center for Drug Evaluation and Research, Center for Biologics Evaluation and Research, Office of the Commissioner, and any other Centers will use this mechanism to test communications and social and behavioral methods about regulated drug products on a variety of subjects related to consumer, patient, or healthcare professional perceptions, beliefs, attitudes, behaviors, and use of drug and biological products and related materials. These subjects include social and behavioral research, decision-making processes, and communication and behavioral change strategies.

Further, in addition to overseeing the safety of drug products when used according to approved drug labeling or as directed by a healthcare provider, the Center for Drug Evaluation and Research (CDER) conducts studies on topics related to the safe and effective use of drug products, and emerging safety issues in areas such as nonmedical use of approved drug products, use of unapproved and falsified (*i.e.,* counterfeit, fake) drug products, use of botanical substances (*e.g.,* cannabis derived products), controlled substance prescribing decisions, bystander response to drug overdoses, and potentially false or misleading information about drug products. Reliable data on these and related topics are a critical first step to understanding whether further studies or action is needed to protect public health.

Because often data on these topics are not collected as part of routine healthcare delivery or via established Federal surveys, FDA requires the development and validation of novel instruments (*i.e.,* interview and focus group guides, questionnaires) and approaches to gathering data on emerging safety issues the methods used to create and validate these instruments may include interviews, focus groups, small group discussions, pilot and test/re-test survey launches, and external validation against benchmark surveys. In conducting research in these areas, FDA will need to employ the following validation methodology: (1) research to assess knowledge, perceptions, and experiences related to topics in the above-mentioned areas with specific target populations; (2) techniques to evaluate sampling and recruitment methods; and (3) evaluations of the validity and reliability of survey questionnaires in target populations.

Annually, FDA projects about 25 social and behavioral studies using the variety of test methods listed in this document. FDA is revising this burden to account for the number of studies we have received in the last 3 years and to better reflect the scope of the information collection.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Interviews and Surveys	126,770	1	126,770	0.25 (15 minutes)	31,693

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Based on a review of the information collection since our last request for OMB approval, our burden estimate for this information collection reflects an overall increase of 17,300 responses with a corresponding increase of 4,325 hours. We attribute this adjustment to the need to validate information in specific areas.

Dated: April 18, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

[FR Doc. 2024–08655 Filed 4–22–24; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–0008]

Molecular and Clinical Genetics Panel of the Medical Devices Advisory Committee; Notice of Meeting—Guardant Shield Blood Collection Kit

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) announces a forthcoming public advisory committee meeting of the Molecular and Clinical Genetics Panel of the Medical Devices Advisory Committee. The general function of the committee is to provide advice and recommendations to the Agency on FDA's regulatory issues. The meeting will be open to the public.

DATES: The meeting will take place virtually on May 23, 2024, from 9:30 a.m. to 5:30 p.m. Eastern Time.

ADDRESSES: All meeting participants will be heard, viewed, captioned, and recorded for this advisory committee meeting via an online teleconferencing and/or video conferencing platform. Answers to commonly asked questions about FDA advisory committee meetings, including information regarding special accommodations due to a disability may be accessed at: *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm.*

FOR FURTHER INFORMATION CONTACT: Jarrod Collier, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5214, Silver Spring, MD 20993–0002, *Jarrod.Collier@fda.hhs.gov,* 240–672–5763, or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area). A notice in the **Federal Register** about last-minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the Agency's website at *https://www.fda.gov/AdvisoryCommittees/default.*htm and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before the meeting.

SUPPLEMENTARY INFORMATION:

Agenda: The meeting presentations will be heard, viewed, captioned, and recorded through an online teleconferencing platform. On May 23, 2024, the committee will discuss, make recommendations, and vote on information regarding the premarket approval application for the Shield test by Guardant Health, Inc. The proposed indication for use statement is as follows: The Shield test is a qualitative in vitro diagnostic test intended to detect colorectal cancer derived alterations in cell-free DNA from blood collected in the Guardant Blood Collection Kit. Shield is intended for colorectal cancer screening in individuals at average risk of the disease, age 45 years or older. Patients with an ''Abnormal Signal Detected'' may have colorectal cancer or advanced adenomas and should be referred for colonoscopy evaluation. Shield is not a replacement for diagnostic colonoscopy or for surveillance colonoscopy in high-risk individuals. The test is performed at Guardant Health, Inc.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its website prior to the meeting, the background material will

be made publicly available on FDA's website at the time of the advisory committee meeting, and the background material will be posted on FDA's website after the meeting. Background material and the link to the online teleconference meeting room will be available at *https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm.* Scroll down and select the appropriate advisory committee meeting link. The meeting will include slide presentations with audio components to allow the presentation of materials in a manner that most closely resembles an in-person advisory committee meeting.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person on or before May 10, 2024. Oral presentations from the public will be scheduled on May 23, 2024, between approximately 1:45 p.m. and 2:45 p.m. Eastern Time. Those individuals interested in making formal oral presentations should notify the contact person (see **FOR FURTHER INFORMATION CONTACT**). The notification should include a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before May 7, 2024. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by May 8, 2024.

For press inquiries, please contact the Office of Media Affairs at *fdaoma@fda.hhs.gov* or 301–796–4540.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact Artair Mallett at *Artair.Mallett@fda.hhs.gov* or 301–796–9638 at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our website at *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm* for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. 1001 *et seq.*). This meeting notice also serves as notice that, pursuant to 21 CFR 10.19, the requirements in 21 CFR 14.22(b), (f), and (g) relating to the location of advisory committee meetings are hereby waived to allow for this meeting to take place using an online meeting platform. This waiver is in the interest of allowing greater transparency and opportunities for public participation, in addition to convenience for advisory committee members, speakers, and guest speakers. The conditions for issuance of a waiver under 21 CFR 10.19 are met.

Dated: April 18, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

[FR Doc. 2024–08656 Filed 4–22–24; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request; Information Collection Request Title: Ryan White HIV/AIDS Program Client-Level Data Reporting System, OMB No. 0906–0039—Revision

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects of the Paperwork Reduction Act of 1995, HRSA announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this ICR should be received no later than June 24, 2024.

ADDRESSES: Submit your comments to *paperwork@hrsa.gov* or mail the HRSA Information Collection Clearance Officer, Room 14N39, 5600 Fishers Lane, Rockville, Maryland, 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email *paperwork@hrsa.gov* or call Joella Roland, the HRSA Information Collection Clearance Officer, at (301) 443–3983.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the ICR title for reference.

Information Collection Request Title: Ryan White HIV/AIDS Program Client-Level Data Reporting System, OMB No. 0906–0039—Revision.

Abstract: The Ryan White HIV/AIDS Program (RWHAP), authorized under Title XXVI of the Public Health Service Act, is administered by the HIV/AIDS Bureau within HRSA. HRSA awards funding to recipients in areas of the greatest need to respond effectively to the HIV epidemic, with an emphasis on providing life-saving and life-extending medical care, treatment, and support services for people with HIV in the United States.

The RWHAP reporting requirements include the annual submission of client-level data in the Ryan White HIV/AIDS Program Services Report (RSR). The RSR is designed to collect information from grant recipients and their subawarded service providers, funded under Parts A, B, C, and D of the RWHAP statute.

HRSA is requesting a revision of the current RSR with one proposed update:

Current Questions

- Within your organization/agency, identify the number of physicians, nurse practitioners, or physician assistants who obtained a Drug Addiction Treatment Act of 2000 waiver to treat opioid use disorder with medication assisted treatment (MAT), [*e.g.,* buprenorphine, naltrexone] specifically approved by the U.S. Food and Drug Administration.
- How many of the above physicians, nurse practitioners, or physician assistants prescribed MAT (*e.g.,* buprenorphine, naltrexone) for opioid use disorders in the reporting period?

Proposed Change to Question in 2024 RSR Form

- How many physicians, nurse practitioners, or physician assistants in your organization prescribed medications for opioid use disorder (MOUD) [*e.g.,* buprenorphine, naltrexone] for opioid use disorders during the reporting period?

Need and Proposed Use of the Information: The RWHAP statute specifies HRSA's responsibilities in administering grant funds, allocating funding, assessing HIV care outcomes (*e.g.,* viral suppression), and serving particular populations. The RSR collects data on the characteristics of RWHAP-funded recipients, their contracted service providers, and the patients or clients served. The RSR system consists

of two primary components, the Recipient Report, and the Provider Report, and a data file containing de-identified client-level data elements. Data are submitted annually. The RWHAP statute specifies the importance of recipient accountability and linking performance to budget. The RSR is used to ensure recipient compliance with the law, including evaluating the effectiveness of programs, monitoring recipient and provider performance, and informing annual reports to Congress. Information collected through the RSR is critical for HRSA, state and local grant recipients, and individual providers to assess the status of existing HIV-related service delivery systems, monitor trends in service utilization, evaluate the impact of data reporting, and identify areas of greatest need.

Likely Respondents: RWHAP grant recipients, as well as their subawarded service providers, funded under RWHAP Parts A, B, C, and D.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

Total Estimated Annualized Burden Hours:

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Recipient Report	595	1	595	11	6,545
Provider Report	2,063	1	2,063	13	26,819
Client Report	1,532	1	1,532	113	173,116
Total	4,190		4,190		206,480

HRSA specifically requests comments on: (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0008]

Agency Information Collection Activities; Revision of a Currently Approved Collection: Biographic Information (for Deferred Action)

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration (USCIS) invites the general public and other Federal agencies to comment upon this proposed extension of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until June 24, 2024.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0008 in the body of the letter, the agency name and Docket ID USCIS–2005–0024. Comments must be submitted in English, or an English translation must be provided. Submit comments via the Federal eRulemaking Portal website at *http://www.regulations.gov* under e-Docket ID number USCIS–2005–0024.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, telephone number (240) 721–3000 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *https://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2005–0024 in the search box. Comments must be submitted in English, or an English translation must be provided. All submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Biographic Information (for Deferred Action).

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* G–325A; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. USCIS uses Form G–325A to collect biographic information from individuals requesting either military deferred action or non-military deferred action (other than deferred action based on DACA, Violence Against Women Act, A–3, G–5, and T and V nonimmigrant visas).

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection G–325A is 1,550 and the estimated hour burden per response is 2.15 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 3,875 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $38,750.

Dated: April 17, 2024.

Samantha L Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111–97–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6451–N–02]

Announcement of the Housing Counseling Federal Advisory Committee; Notice of Public Meeting

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development (HUD).

ACTION: Notice of Housing Counseling Federal Advisory Committee public meeting.

SUMMARY: This gives notice of a Housing Counseling Federal Advisory Committee (HCFAC) meeting and sets forth the proposed agenda. The HCFAC meeting will be held on Thursday, June 13, 2024. The meeting is open to the public and is accessible to individuals with disabilities.

DATES: The virtual meeting will be held on Thursday, June 13, 2024, starting at 1:00 p.m. Eastern Daylight Time (EDT), via ZOOM.

FOR FURTHER INFORMATION CONTACT: Virginia F. Holman, Housing Program Technical Specialist, Office of Housing

Counseling, U.S. Department of Housing and Urban Development, 600 East Broad Street, Richmond, VA 23219; telephone number 540–894–7790 (this is not a toll-free number); email *virginia.f.holman@hud.gov.*

HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech and communication disabilities. To learn more about how to make an accessible telephone call, please visit: *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.* Individuals may also email *HCFACCommittee@hud.gov.*

SUPPLEMENTARY INFORMATION: HUD is convening the virtual meeting of the HCFAC on Thursday June 13, 2024, from 1:00 p.m. to 4:30 p.m. EDT. The meeting will be held via ZOOM. This meeting notice is provided in accordance with the Federal Advisory Committee Act, 5 U.S.C. 1009(a)(2).

Draft Agenda—Housing Counseling Federal Advisory Committee Meeting

Thursday, June 13, 2024

The Housing Counselors' Role in Educating Consumers About Real Estate Commissions & Augmenting the Delivery of Housing Counseling in Tribal Communities.

I. Welcome
II. Presentations and HCFAC Member Discussion
III. Public Comment
IV. Next Steps
V. Adjourn

Registration

The public is invited to attend this half-day (3.5 hours) virtual meeting, using ZOOM. Advance registration is required to attend. To register, please visit *https://us06web.zoom.us/webinar/register/WN_9PkLZ88JRa2wcTgyXjeRcA#/registration* to complete your registration. If you have any questions about registration, please email *HCFACCommittee@ajantaconsulting.com.* After submitting the registration form, you will receive registration confirmation with the meeting link and passcode needed to attend. Closed captioning will be available during the ZOOM meeting.

Comments

Members of the public will have an opportunity to provide oral and written comments relative to agenda topics for the HCFAC's consideration. Your registration confirmation will also explain the process for speaking. Available time for public comments will be limited to ensure pertinent HCFAC business is completed. The amount of time allotted to each person will be limited to two minutes and will be allocated on a first-come first-served basis by HUD. Written comments can be provided on the registration form no later than June 12, 2024. Please note, written comments submitted will not be read during the meeting. The HCFAC will not respond to individual written or oral statements during the meeting; but it will take all public comments into account in its deliberations.

Meeting Records

Records and documents discussed during the meeting as well as other information about the work of the HCFAC, will be available for public viewing as they become available on hud.gov at: *https://www.hud.gov/program_offices/housing/sfh/hcc/housing_counseling;* and at *https://www.facadatabase.gov/FACA/s/login/?ec=302&inst=3d&startURL=%2FFACA%2Fapex%2FFACAPublicCommittee%3Fid%3Da10t0000001gzvQAAQ.*

Information on the Committee is also available on HUD Exchange at *https://www.hudexchange.info/programs/housing-counseling/federal-advisory-committee.*

Julia R. Gordon,

Assistant Secretary for Housing, FHA Commissioner.

Indian Gaming; Approval of Tribal-State Class III Gaming Compact Amendment Between the Suquamish Indian Tribe of the Port Madison Reservation and the State of Washington

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice publishes the approval of the Seventh Amendment to the Tribal-State Compact for Class III Gaming between the Suquamish Indian Tribe of the Port Madison Reservation and the State of Washington, titled Memorandum of Incorporation of Most Favored Nation Amendments to the Tribal State Compact for Class III Gaming between the Suquamish Tribe and the State of Washington.

DATES: The Amendment takes effect on April 23, 2024.

FOR FURTHER INFORMATION CONTACT: Ms. Paula L. Hart, Director, Office of Indian Gaming, Office of the Assistant Secretary—Indian Affairs, Washington, DC 20240, *IndianGaming@bia.gov;* (202) 219–4066.

SUPPLEMENTARY INFORMATION: Under section 11 of the Indian Gaming Regulatory Act (IGRA), Public Law 100–497, 25 U.S.C. 2701 *et seq.,* the Secretary of the Interior shall publish in the **Federal Register** notice of approved Tribal-State compacts for the purpose of engaging in Class III gaming activities on Indian lands. As required by 25 CFR 293.4, all compacts and amendments are subject to review and approval by the Secretary. The Amendment authorizes the Tribe to offer Sports Pools in accordance with State Law and specific procedures outlined in the Amendment.

The Amendment is approved.

Bryan Newland,

Assistant Secretary—Indian Affairs.

National Park Service

[NPS–WASO–NRNHL–DTS#–37814; PPWOCRADI0, PCU00RP14.R50000]

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting electronic comments on the significance of properties nominated before April 13, 2024, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted electronically by May 8, 2024.

ADDRESSES: Comments are encouraged to be submitted electronically to *National_Register_Submissions@nps.gov* with the subject line ''Public Comment on <property or proposed district name, (County) State>.'' If you have no access to email, you may send them via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C Street NW, MS 7228, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Sherry A. Frear, Chief, National Register of Historic Places/National Historic Landmarks Program, 1849 C Street NW,

MS 7228, Washington, DC 20240, *sherry_frear@nps.gov,* 202–913–3763.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before April 12, 2024. Pursuant to section 60.13 of 36 CFR part 60, comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

BILLING CODE 4312–52–P

INTERNATIONAL TRADE COMMISSION

Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has received a complaint *Certain High-Strength Aluminum or Aluminum Alloy-Coated Steel, and Automotive Products and Automobiles Containing Same,* DN 3738*;* the Commission is soliciting comments on any public interest issues raised by the complaint or complainant's filing pursuant to the Commission's Rules of Practice and Procedure.

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Secretary to the Commission, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2000. The public version of the complaint can be accessed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.*

General information concerning the Commission may also be obtained by accessing its internet server at United States International Trade Commission (USITC) at *https://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint and a submission pursuant to § 210.8(b) of the Commission's Rules of Practice and Procedure filed on behalf of ArcelorMittal on April 17, 2024. The complaint alleges violations of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain high-strength aluminum or aluminum alloy-coated steel, and automotive products and automobiles containing same. The complaint names as respondents: VinFast Auto Ltd. of Vietnam; VinFast Auto, LLC of Los Angeles, CA; VinFast USA Distribution, LLC of Los Angeles, CA; Vingroup USA, LLC of Los Angeles, CA; and VinFast Trading and Production JSC of Vietnam. The complainant requests that the Commission issue a limited exclusion order, cease and desist orders, and impose a bond upon respondent alleged infringing articles during the 60-day Presidential review period pursuant to 19 U.S.C. 1337(j).

Proposed respondents, other interested parties, and members of the public are invited to file comments on any public interest issues raised by the complaint or § 210.8(b) filing. Comments should address whether issuance of the relief specifically requested by the complainant in this

investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) explain how the articles potentially subject to the requested remedial orders are used in the United States;

(ii) identify any public health, safety, or welfare concerns in the United States relating to the requested remedial orders;

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the requested exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) explain how the requested remedial orders would impact United States consumers.

Written submissions on the public interest must be filed no later than by close of business, eight calendar days after the date of publication of this notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation. Any written submissions on other issues must also be filed by no later than the close of business, eight calendar days after publication of this notice in the **Federal Register**. Complainant may file replies to any written submissions no later than three calendar days after the date on which any initial submissions were due, notwithstanding § 201.14(a) of the Commission's Rules of Practice and Procedure. No other submissions will be accepted, unless requested by the Commission. Any submissions and replies filed in response to this Notice are limited to five (5) pages in length, inclusive of attachments.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. Submissions should refer to the docket number (''Docket No. 3738'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, Electronic Filing Procedures).[1]

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov.*) No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice. Persons with questions regarding filing should contact the Secretary at *EDIS3Help@usitc.gov.*

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. Government employees and contract personnel,[2] solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.[3]

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of §§ 201.10 and 210.8(c) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.8(c)).

By order of the Commission.

Issued: April 18, 2024.

Lisa Barton,

Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1265 (Enforcement)]

Certain Fitness Devices, Streaming Components Thereof, and Systems Containing Same; Notice of Commission Determination Not To Review an Initial Determination Terminating the Enforcement Proceeding Based on Settlement; Termination of the Proceeding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (''ID'') (Order No. 11) of the presiding Chief Administrative Law Judge (''CALJ'') terminating the enforcement proceeding based on settlement. The enforcement proceeding is terminated.

FOR FURTHER INFORMATION CONTACT: Ronald A. Traud, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3427. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: On May 19, 2021, the Commission instituted the underlying investigation based on a complaint filed on behalf of complainants DISH DBS Corporation of Englewood, Colorado; DISH Technologies L.L.C. of Englewood, Colorado; and Sling TV L.L.C. of Englewood, Colorado (collectively, ''DISH''). 86 FR 27106, 27106–07 (May 19, 2021). The complaint alleged violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain fitness devices, streaming components thereof, and systems containing the same by reason of infringement of certain claims of U.S. Patent Nos. 9,407,564 (''the '564

patent''); 10,469,554 (''the '554 patent''); 10,469,555 (''the '555 patent''); 10,757,156 (''the '156 patent''); and 10,951,680 (''the '680 patent''). *Id.* The complaint further alleged that a domestic industry exists. *Id.* The Commission's notice of investigation named as respondents iFIT Inc., f/k/a ICON Health & Fitness, Inc. of Logan, Utah; FreeMotion Fitness, Inc. of Logan, Utah; NordicTrack, Inc. of Logan, Utah (together with iFIT Inc. and FreeMotion Fitness, Inc., ''iFit''); Peloton Interactive, Inc. of New York, New York (''Peloton''); lululemon athletica inc. of Vancouver, Canada; and Curiouser Products Inc. d/b/a MIRROR of New York, New York (together with lululemon athletica inc., ''MIRROR,'' and together with the other respondents, ''Respondents''). *Id.;* Order No. 14 (Nov. 4, 2021), *unreviewed by* Comm'n Notice (Dec. 6, 2021), 86 FR 70532 (Dec. 10, 2021). The Office of Unfair Import Investigations (''OUII'') participated in the investigation. 86 FR at 27106–07.

On March 8, 2023, the Commission issued its final determination, finding respondents Peloton and iFit in violation of section 337 as to the asserted claims of the '156, '554, and '555 patents, but not as to the asserted claims of the '564 patent. *See* 88 FR 15736 (Mar. 14, 2023). The investigation had terminated as to the asserted claims of the '680 patent prior to the issuance of the final initial determination, Order No. 21 (Mar. 3, 2022), *unreviewed by* Comm'n Notice (Mar. 23, 2022), and the final determination granted an unopposed motion to terminate as to MIRROR. *See* 88 FR at 15736. As a remedy, the Commission issued a limited exclusion order and cease and desist orders directed to Peloton and iFit. *Id.*

On May 5, 2023, the Commission modified the remedial orders in certain respects. *See* 88 FR 30158 (May 10, 2023). On June 1, 2023, the Commission rescinded the remedial orders directed to Peloton. *See* 88 FR 37274 (June 7, 2023).

On October 17, 2023, the Commission instituted an enforcement proceeding under Commission Rule 210.75 (19 CFR 210.75) to investigate alleged violations of the remedial orders by iFit. 88 FR 71603 (Oct. 17, 2023). In addition to DISH and iFit, OUII was also named as a party to the enforcement proceeding. *See id.*

On March 8, 2024, DISH and iFIT filed a joint motion requesting termination of the enforcement proceeding based on a settlement agreement. On March 18, 2024, OUII filed a response supporting the motion. No other responses were received in response to the motion. Separately, DISH filed a petition with the Commission requesting that the Commission rescind the remedial orders issued in the underlying investigation based on the settlement.

On March 19, 2024, the CALJ issued the subject ID (Order No. 11) granting the motion. The ID found that the joint motion complies with Commission Rule 210.21(b)(1), 19 CFR 210.21(b)(1). Furthermore, in accordance with Commission Rule 210.50(b)(2), 19 CFR 210.50(b)(2), the ID found ''no evidence that terminating this enforcement proceeding on the basis of settlement would adversely affect'' the public interest. *See* Order No. 11 at 3.

No petitions for review of the subject ID were filed.

The Commission has determined not to review the subject ID. The enforcement proceeding in this investigation is hereby terminated in its entirety.

The Commission vote for this determination took place on April 18, 2024.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: April 18, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

[CPCLO Order No. 001–2024]

Privacy Act of 1974; Systems of Records

AGENCY: Environment and Natural Resources Division, United States Department of Justice.

ACTION: Notice of a modified system of records.

SUMMARY: Pursuant to the Privacy Act of 1974 and Office of Management and Budget (OMB) Circular No. A–108, notice is hereby given that the Environment and Natural Resources Division (hereinafter ''ENRD'' or ''Division''), a component within the United States Department of Justice (DOJ or Department), proposes to modify a system of records last published in full on February 23, 2000, titled ''Environment and Natural Resources Division Case and Related Files System,'' (JUSTICE/ENRD–003).

DATES: In accordance with 5 U.S.C. 552a(e)(4) and (11), this notice is applicable upon publication, subject to a 30-day period in which to comment on the routine uses, described below. Please submit any comments by May 23, 2024.

ADDRESSES: The public, OMB, and Congress are invited to submit any comments by mail to the United States Department of Justice, Office of Privacy and Civil Liberties, ATTN: Privacy Analyst, 145 N St. NW, Suite 8W.300, Washington, DC 20530; by facsimile at 202–307–0693; or by email at *privacy.compliance@usdoj.gov.* To ensure proper handling, please reference the above CPCLO Order No. on your correspondence.

FOR FURTHER INFORMATION CONTACT: Charles Smiroldo, FOIA Coordinator and Public Liaison, Department of Justice, Environment and Natural Resources Division Law and Policy Section, 950 Pennsylvania Avenue NW, Washington, DC 20530–0001 Telephone: (202) 514–0424.

SUPPLEMENTARY INFORMATION: Pursuant to updated OMB Guidance, ENRD has made administrative edits to the order and titles of sections in the notice. The Division also proposes these modifications to incorporate substantial developments made to the ENRD Justice Consolidated Office Network (ENRD JCON) information system, where the Division's ''Case and Related Files System'' is maintained, in addition to various applications which maintain additional categories of information subject to the Privacy Act. Specifically, the Division will modify the system of records by renaming it, ''Environment and Natural Resources Division Administrative and Case Related Files'' (JUSTICE/ENRD–003); updating the ''System Manager(s)'' and ''Addresses'' section to reflect administrative changes; revising the categories of records covered by adding additional information maintained by applications housed on ENRD JCON; adding new routine uses for the new categories of records maintained on ENRD JCON (primarily relating to the electronic management and handling of case files during investigation and litigation, human capital, transit subsidy and financial reporting information, and public access to the records pursuant to Federal statutes or regulations); deleting and revising routine uses to provide clarity and additional specificity; revising the categories of records and purpose sections to reflect changes made to the system of records that

enable Division attorneys, managers and support personnel with the ability to collect, organize, analyze and disseminate information more efficiently. Because of the number of changes made and for public convenience, the modified system of records notice has been printed below in full, replacing the previous notice in its entirety.

ENRD continues to assert the same Privacy Act (j) and (k) exemptions as previously published in 28 CFR 16.92.

As stated above, the purpose of the modified notice is to incorporate the changes and developments to the ENRD JCON information system, a standalone major system residing on the DOJ Justice Consolidated Office Network (JCON) general support system platform, which includes hybrid cloud and on-premises hosting environments. The system interconnects with various applications designed to facilitate ENRD litigation support, and to manage administrative processes. The purpose for modifying the Privacy Act System of Records Notice is to assist with the facilitation of ENRD's litigation mission, and the Division's need to collect and maintain information pertaining to civil and criminal enforcement investigations, actions, and defensive work on behalf of the United States Government. Specifically, collecting and maintaining the records will support ENRD in reviewing documents for relevance and privilege claims, tracking use of documentary evidence in litigation, preparing witness kits/binders for depositions and hearings, determining and organizing the facts about the case, and selecting exhibits for trial. The records will also be used to support ENRD's administrative functions.

Additional modifications to the system of records have been made to incorporate OMB guidance, technological advancements, and update existing routine uses and propose new routine uses. Pursuant to OMB Circular No. A–108, various sections were rearranged, and various section titles were edited. ENRD moves the System Manager(s) section in the system of records notice, as well as edited Policies and Practices for Storing, Retrieving, Accessing, Retaining, and Disposing of Records in the System: Storage, Retrievability, Safeguards, and Retention and Disposal to the following section titles: Policies and Practices for Storage of Records; Policies and Practices for Retrieval of Records; Policies and Practices for Retrieval of Records; Policies and Practices for Retention and Disposal of Records; and Administrative, Technical, and Physical Safeguards. Technological advancements, such as the ability to store records in the cloud and creation of stronger authentication methods, and institutional changes led the ENRD to modify and update the Policies and Practices for Storage of Records, Policies and Practices for Retrieval of Records, Administrative, Technical, and Physical Safeguards, System Location, and System Manager(s), and Addresses sections.

Previously routine uses have been consolidated and updated with language consistent with other Department routine uses. ENRD also has included new routine uses, including model routine uses that are included in all DOJ SORNs. The model routine uses permit disclosure to: to a former employee of the Department for purposes of responding to an official inquiry by a Federal, State, or local government entity or professional licensing authority, in accordance with applicable Department regulations; facilitating communications with a former employee that may be necessary for personnel-related or other official purposes where the Department requires information and/or consultation assistance from the former employee regarding a matter within that person's former area of responsibility; communication with licensing agencies or associations which require information concerning the suitability or eligibility of an individual for a license or permit; communication with contractors, grantees, experts, consultants, students, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for the Federal Government, when necessary to accomplish an agency function related to this system of records; communication with designated officers and employees of State, local, territorial, or Tribal law enforcement or detention agencies in connection with the hiring or continued employment of an employee or contractor, where the employee or contractor would occupy or occupies a position of public trust as a law enforcement officer or detention officer having direct contact with the public or with prisoners or detainees, to the extent that the information is relevant and necessary to the recipient agency's decision; communication with any agency, organization, or individual for the purpose of performing authorized audit or oversight operations of ENRD and meeting related reporting requirements; and communication with any entities or individuals under such circumstances and procedures as are mandated by Federal statute or treaty. ENRD also proposes two new routine uses (x) and (y) to permit disclosure of information related to caring for a live animal or plant that has been seized as a result of an investigation, and to the public, where required, for purposes of publishing proposed consent decrees, settlements, or comments, respectively.

In accordance with 5 U.S.C. 552a(r), the Department has provided a report to OMB and Congress on this new system of records.

Dated: March 28, 2024.

Peter A. Winn,

Acting Privacy and Civil Liberties Officer, United States Department of Justice.

JUSTICE/ENRD–003

SYSTEM NAME AND NUMBER:

''Environment and Natural Resources Division Administrative and Case Related Files,'' (JUSTICE/ENRD–003).

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Records are located in hybrid cloud and on-premise hosting environments, and may be retained in the Central Office, Field Offices/Locations, Offsite Storage Facilities, or Federal Records Center. Primary contact information may be found on the ENRD's website at *https://www.justice.gov/enrd.*

SYSTEM MANAGER(S):

The System Manager is the Assistant Director, Office of Information Technology, in coordination with the Office of Administrative Services' Records Management Unit.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Authority to establish and maintain this system is contained in 5 U.S.C. 301 and 44 U.S.C. 3101, which authorize the Attorney General to create and maintain Federal records of agency activities, in addition to 28 U.S.C. 514–19; 42 U.S.C. 7413(g); 5 U.S.C. 552; 42 U.S.C. 6973(d); 42 U.S.C. 9622(d)(2); 42 U.S.C. 9622(i); 28 CFR Part O, subpart L; 28 CFR 50.7; and 28 CFR 16.41.

PURPOSE(S) OF THE SYSTEM:

Case records are maintained to litigate or otherwise resolve civil or criminal cases or matters handled by ENRD. The automated case tracking is maintained to manage and evaluate the Division's litigation and related activities, which includes reviewing documents for relevance and privilege claims, tracking use of documentary evidence in litigation, preparing witness kits/binders for depositions and hearings, determining and organizing the facts about the case, and selecting exhibits for

trial. Internal case management, financial reporting, FOIA request tracking, and the Division's personnel records are also maintained in order to fulfill ENRD's legal and administrative functions.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The categories of individuals covered by this system include: (a) individuals being investigated in anticipation of civil or criminal suits; (b) individuals involved in civil or criminal suits; (c) defense or plaintiff's counsel(s); (d) information sources; (e) individuals relevant to the development of civil or criminal suits, including expert and other witnesses; (f) individual plaintiffs or defendants; (g) members of the public who contact the Division; and (h) attorneys, paralegals, and other employees of the Division directly involved in these cases or personnel related matters.

CATEGORIES OF RECORDS IN THE SYSTEM:

The categories of records in this system include information relating to: (1) litigation and related activities by the Division, including, but not limited to, the protection, use and development of natural resources and public lands, wildlife protection, Indian rights and claims, cleanup of hazardous waste sites, acquisition of private property for Federal use, prosecution of environmental crimes, enforcement of environmental laws, and defense of environmental challenges to government programs and activities. The case files contain court records (such as briefs, motions, and orders), inter-agency and intra-agency correspondence, legal research, and other related documents. These records may include civil investigatory and/or criminal law enforcement information and information classified pursuant to Executive order to protect national security interests. (2) Summary information of these cases or matters (such as names of principal parties or subjects, court docket numbers, status, and attorney assignments) is maintained in an automated Case Management and Time Reporting software application. (3) A timekeeping function for attorneys, paralegals, and other employees of the Division provides data used in: civil and criminal enforcement investigations, actions and litigation; documentary evidence including relevance and privilege claims; witness kits/binders for depositions and hearings; trial exhibits and other litigation support documentation; financial reporting documentation; ENRD personnel records; correspondence, comments, and requests for members of the public; and internal case management records.

RECORD SOURCE CATEGORIES:

Sources of information contained in this system include, but are not limited to: investigative reports of client agencies of the Department of Justice; discovery materials; non-Department of Justice forensic reports; statements of witnesses and parties; verbatim transcripts of depositions and court proceedings; data, public reports, memoranda and reports from the court and agencies thereof; and Division Attorneys, Department of Justice attorneys, investigators, staff, and legal assistants.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b), all or a portion of the records or information contained in this system of records may be disclosed as a routine use pursuant to 5 U.S.C. 552a(b)(3) under the circumstances or for the purposes described below, to the extent such disclosures are compatible with the purposes for which the information was collected:

(a) Where a record, either alone or in conjunction with other information, indicates a violation or potential violation of law—criminal, civil, or regulatory in nature—the relevant records may be referred to the appropriate Federal, State, local, territorial, Tribal, or foreign law enforcement authority or other appropriate entity charged with the responsibility for investigating or prosecuting such violation or charged with enforcing or implementing such law;

(b) To any person or entity that the ENRD has reason to believe possesses information regarding a matter within the jurisdiction of the ENRD, to the extent deemed to be necessary by the ENRD in order to elicit such information or cooperation from the recipient for use in the performance of an authorized activity;

(c) A record relating to a case or matter may be disseminated in a Federal, State, local, or Tribal administrative or regulatory proceeding or hearing in accordance with the procedures governing such proceeding or hearing;

(d) To an actual or potential party to litigation or the party's authorized representative, or to a third party neutral, for the purpose of negotiation or discussion of such matters as settlement, plea bargaining, or formal or informal discovery proceedings;

(e) A record relating to a case or matter that has been referred by an agency for investigation, civil or criminal action, enforcement or defense, or that involves a case or matter within the jurisdiction of an agency, may be disseminated to such agency to notify it of the status of the case or matter, or of any decision or determination that has been made, or to make such other inquiries and reports as are necessary during the processing of the case or matter;

(f) A record relating to a case or matter may be disseminated to a foreign country, through the United States Department of State or directly to the representative of such country, pursuant to an international treaty or convention entered into and ratified by the United States or pursuant to an executive agreement;

(g) A record may be disseminated to a foreign country, through the Department of Justice Civil Division, United States Department of State, or directly to the representative of such country, to the extent necessary to assist such country in general crime prevention, the pursuit of civil or criminal judicial actions or general civil regulatory or administrative actions, or to provide investigative leads to such country, or assist in the location and/or returning of witnesses and other evidence;

(h) In an appropriate proceeding before a court, grand jury, or administrative or adjudicative body, when the Department of Justice determines that the records are arguably relevant to the proceeding; or in an appropriate proceeding before an administrative or adjudicative body when the adjudicator determines the records to be relevant to the proceeding;

(i) To the news media and the public, including disclosures pursuant to 28 CFR 50.2, unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy;

(j) To appropriate officials and employees of a Federal agency or entity that requires information relevant to a decision concerning the hiring, appointment, or retention of an employee; the assignment, detail, or deployment of an employee; the issuance, renewal, suspension, or revocation of a security clearance; the execution of a security or suitability investigation; the letting of a contract, or the issuance of a grant or benefit;

(k) Pursuant to subsection b(12) of the Privacy Act, records relating to an individual who owes an overdue debt to the United States may be disseminated

to a Federal agency which employs the individual; a consumer reporting agency; a Federal, State, local or foreign agency; or the Internal Revenue Service (IRS);

(l) To a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of, and at the request of, the individual who is the subject of the record;

(m) To the National Archives and Records Administration for purposes of records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906;

(n) To complainants and/or victims to the extent necessary to provide such persons with information and explanations concerning the progress and/or results of the investigation or case arising from the matters of which they complained and/or of which they were a victim;

(o) Timekeeping records may be disclosed to opposing parties and to courts in litigation regarding litigation costs;

(p) To a former employee of the Department for purposes of: responding to an official inquiry by a Federal, State, or local government entity or professional licensing authority, in accordance with applicable Department regulations; or facilitating communications with a former employee that may be necessary for personnel-related or other official purposes where the Department requires information and/or consultation assistance from the former employee regarding a matter within that person's former area of responsibility;

(q) To appropriate agencies, entities, and persons when (1) the Department suspects or has confirmed that there has been a breach of the system of records; (2) the Department has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the Department (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Department's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm;

(r) To another Federal agency or Federal entity, when the Department determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach, or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach;

(s) To Federal, State, local, territorial, Tribal, foreign, or international licensing agencies or associations which require information concerning the suitability or eligibility of an individual for a license or permit;

(t) To contractors, grantees, experts, consultants, students, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for the Federal Government, when necessary to accomplish an agency function related to this system of records;

(u) To designated officers and employees of state, local, territorial, or tribal law enforcement or detention agencies in connection with the hiring or continued employment of an employee or contractor, where the employee or contractor would occupy or occupies a position of public trust as a law enforcement officer or detention officer having direct contact with the public or with prisoners or detainees, to the extent that the information is relevant and necessary to the recipient agency's decision;

(v) To any agency, organization, or individual for the purpose of performing authorized audit or oversight operations of ENRD and meeting related reporting requirements;

(w) To such recipients and under such circumstances and procedures as are mandated by Federal statute or treaty;

(x) In a matter under investigation or in litigation, a record, or facts derived from it, may be disclosed to an organization or person who is taking a live animal or plant into their care for the purpose of preventing harm to that animal or plant.

(y) To the public, for the purposes of publishing proposed consent decrees, settlements, or comments thereon, as may be required by statute, regulation, or Department policy.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

All information, except that specified in this paragraph, is recorded on computer files or basic paper/cardboard material that is stored in file folders, file cabinets, shelves, or safes. Some material is recorded and stored on other data processing storage forms located in file rooms and offsite facilities.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records in this system are retrieved by the name of the individual, employee identification number, tax identification number, case number, case name, complainant/court docket number, and in limited circumstances Social Security number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

In accordance with the Federal Records Act, DOJ's Office of Records Management Policy (ORMP), and consistent with NARA standards, ENRD ensures that all applications hosted on the ENRD JCON system are in compliance with appropriate retention schedules to manage the use, maintenance, retention and disposition of all DOJ records created and captured. Records are maintained in paper and electronic format, and retentions periods for these records, which include case files, range from approximately 2 years to 100 years after the case closure date. Temporary records are destroyed at the end of the retention period, and permanent records are transferred to the custody of NARA.

To ensure NARA and OMB electronic records compliance, ENRD is modernizing its information intake efforts. As part of this process, legacy hard copy records are in the process of being converted to electronic files for storage/use.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Records maintained in the ENRD JCON system are both confidential and non-confidential and located in file cabinets, safes and file rooms as well as hybrid cloud and on-premises hosting environments, and may be retained in the Central Office, Field Offices/ Locations, Offsite Storage Facilities, or Federal Records Center. Records are also located in litigation support contract document centers and offsite storage locations. Confidential records are in locked file drawers, safes, and secured file rooms. Offices are secured by either Federal Protective Service or private building guards. Electronic records retrievable by Division personnel trained to access existing ENRD software applications or successor applications, within various ENRD offices, are password protected and require access privileges to ENRD JCON.

RECORD ACCESS PROCEDURES:

All requests for access to records must be in writing and should be addressed to the Department of Justice, Environmental and Natural Resources Division, Law and Policy Section, 950 Pennsylvania Avenue NW, Washington, DC 20530 ATTN: FOIA/Privacy Act Coordinator. The envelope and letter

should be clearly marked ''Privacy Act Access Request.'' The request must describe the records sought in sufficient detail to enable Department personnel to locate them with a reasonable amount of effort. The request must include a general description of the records sought and must include the requester's full name, current address, and date and place of birth. The request must be signed and either notarized or submitted under penalty of perjury. Some information may be exempt from the access provisions as described in the ''EXEMPTIONS PROMULGATED FOR THE SYSTEM'' paragraph, below. An individual who is the subject of a record in this system of records may access those records that are not exempt from access. A determination whether a record may be accessed will be made at the time a request is received.

Although no specific form is required, you may obtain forms for this purpose from the FOIA/Privacy Act Mail Referral Unit, United States Department of Justice, 950 Pennsylvania Avenue NW, Washington, DC 20530, or on the Department of Justice website at *https://www.justice.gov/oip/submit-and-track-request-or-appeal.*

More information regarding the Department's procedures for accessing records in accordance with the Privacy Act can be found at 28 CFR part 16 Subpart D, ''Protection of Privacy and Access to Individual Records Under the Privacy Act of 1974.''

CONTESTING RECORD PROCEDURES:

Individuals seeking to contest or amend records maintained in this system of records must direct their requests to the address indicated in the ''RECORD ACCESS PROCEDURES'' paragraph, above. All requests to contest or amend records must be in writing and the envelope and letter should be clearly marked ''Privacy Act Amendment Request.'' All requests must state clearly and concisely what record is being contested, the reasons for contesting it, and the proposed amendment to the record. Some information may be exempt from the amendment provisions as described in the ''EXEMPTIONS PROMULGATED FOR THE SYSTEM'' paragraph, below. An individual who is the subject of a record in this system of records may contest or amend those records that are not exempt. A determination of whether a record is exempt from the amendment provisions will be made after a request is received.

More information regarding the Department's procedures for amending or contesting records in accordance with the Privacy Act can be found at 28 CFR 16.46, ''Requests for Amendment or Correction of Records.''

NOTIFICATION PROCEDURES:

Individuals may be notified if a record in this system of records pertains to them when the individuals request information utilizing the same procedures as those identified in the ''RECORD ACCESS PROCEDURES'' paragraph, above.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

The Attorney General has promulgated rules to exempt those records in this system that pertain to the enforcement of criminal laws, that are investigatory materials compiled for law enforcement purposes, or that are classified secret by an Executive Order, from the following Privacy Act requirements: (1) The requirement under (c)(3) to make available to the individual named in the record an accounting of the circumstances under which records about the individual were disclosed; (2) the requirement under (e)(1) to maintain only such information about an individual that is relevant and necessary to accomplish a purpose of the agency; and (3) the requirement under (f) to establish agency procedures to respond to an individual's request for information about himself. The Attorney General also has promulgated a rule to exempt records in this system compiled for criminal enforcement purposes from these additional requirements: (1) The requirement under (c)(4) to inform any party or agency that received an individual's records about any subsequent corrections made to the record; (2) the requirement under (e)(2) to collect information to the greatest extent practicable directly from the individual when the information may result in adverse determinations about an individual's rights, benefits and privileges under Federal programs; (3) the requirement under (e)(3) to inform each individual from whom information is collected of the authority for the information the principal purposes for the information, the routine uses, and the effects, if any, of not providing the information; (4) the requirement under (e)(5) to maintain all records with such accuracy, relevance, timeliness and completeness as is reasonably necessary to assure fairness to the individual, (5) the requirement under (e)(8) to make reasonable efforts to serve notice on an individual when any record on the individual is made available to any person under compulsory legal process when that process becomes a matter of public record; and (6) the authority under (g) providing that individuals may bring a civil action against the agency for violations of the Privacy Act.

These rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c) and (e), and have been published in the **Federal Register**.

BILLING CODE 4410–15–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2019–0009]

DEKRA Certification Inc.: Grant of Expansion of Recognition and Modification to the NRTL Program's List of Appropriate Test Standards

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the final decision to expand the scope of recognition of DEKRA Certification Inc., (DEKRA) as a Nationally Recognized Testing Laboratory (NRTL). Additionally, OSHA announces the final decision to add one test standard to the NRTL List of Appropriate Test Standards.

DATES: The expansion of the scope of recognition becomes effective on April 23, 2024.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor; telephone (202) 693–1999 or email *meilinger.francis2@dol.gov.*

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor; telephone (202) 693–1911 or email *robinson.kevin@dol.gov.*

SUPPLEMENTARY INFORMATION:

I. Notice of the Final Decision

OSHA hereby gives notice of the expansion of the scope of recognition of DEKRA Certification Inc., (DEKRA) as a

NRTL. DEKRA's expansion covers the addition of three test standards to the NRTL scope of recognition.

OSHA recognition of a NRTL signifies that the organization meets the requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within the scope of recognition. Each NRTL's scope of recognition includes (1) the type of products the NRTL may test, with each type specified by the applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes applications by NRTLs or applicant organizations for initial recognition, as well as for expansion or renewal of recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding. In the second notice, the agency provides the final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including DEKRA, which details that NRTL's scope of recognition. These pages are available from the OSHA website at *https://www.osha.gov/dts/otpca/nrtl/index.html.*

DEKRA submitted an application on December 24, 2021 (OSHA–2019–0009–0004), which requested the addition of twenty-two standards to the scope of recognition. DEKRA submitted an amended application, dated June 21, 2023 (OSHA–2019–0009–0003), which requested that OSHA consider three of the twenty-two standards separately. OSHA then moved forward with consideration only of the three standards requested in the June 21, 2023, amended application; it is still evaluating the initial application and will announce the preliminary decision on the remaining nineteen standards in a separate notice. OSHA staff performed a detailed analysis of the application packet for the three standards covered by the June 21, 2023, amended application, and other pertinent information. OSHA staff performed an on-site assessment of DEKRA's Netherlands facility on June 5–7, 2023, in which OSHA assessors found some nonconformances with the requirements of 29 CFR 1910.7. DEKRA has addressed these issues sufficiently, and OSHA staff preliminarily determined that OSHA should grant the June 21, 2023, amended application.

OSHA published the preliminary notice announcing DEKRA's expansion application in the **Federal Register** on March 1, 2024 (89 FR 15223). The agency requested comments by March 18, 2024, but it received no comments in response to this notice.

To obtain or review copies of all public documents pertaining to the DEKRA application, go to *http://www.regulations.gov* or contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor. Docket No. OSHA–2019–0009 contains all materials in the record concerning DEKRA's recognition. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

II. Final Decision and Order

OSHA staff examined DEKRA's expansion application, its capability to meet the requirements of the test standards, and other pertinent information. Based on its review of this evidence, OSHA finds that DEKRA meets the requirements of 29 CFR 1910.7 for expansion of its recognition, subject to the limitations and conditions listed in this notice. OSHA, therefore, is proceeding with this final notice to grant DEKRA's expanded scope of recognition. OSHA limits the expansion of DEKRA's recognition to testing and certification of products for demonstration of conformance to the test standards listed below in table 1.

TABLE 1—TEST STANDARDS FOR INCLUSION IN DEKRA'S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
UL 2202	DC Charging Equipment for Electric Vehicles.
UL 2251*	Plugs, Receptacles, and Couplers for Electric Vehicles.
UL 2594	Electric Vehicle Supply Equipment.

* Represents the standard that OSHA will add to the NRTL Program's List of Appropriate Test Standards.

In this notice, OSHA also announces the final decision to add one new test standard to the NRTL Program's List of Appropriate Test Standards. Table 2 below lists the standard that is new to the NRTL Program. OSHA has determined that this test standard is an appropriate test standard and will add it to the NRTL Program's List of Appropriate Test Standards.

TABLE 2—STANDARD OSHA WILL ADD TO THE NRTL PROGRAM'S LIST OF APPROPRIATE TEST STANDARDS

Test standard	Test standard title
UL 2251	Plugs, Receptacles, and Couplers for Electric Vehicles.

The American National Standards Institute (ANSI) may approve the test standards listed above as American National Standards. However, for convenience, we may use the designation of the standards-developing organization for the standard as opposed to the ANSI designation. Under the NRTL Program's policy (see OSHA Instruction CPL 01–00–004, Chapter 2, Section VIII), any NRTL recognized for a particular test standard may use either the proprietary version of the test standard or the ANSI version of that standard. Contact ANSI to determine whether a test standard is currently ANSI-approved.

A. Conditions

In addition to those conditions already required by 29 CFR 1910.7,

DEKRA must abide by the following conditions of the recognition:

1. DEKRA must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major change in its operations as a NRTL, and provide details of the change(s);

2. DEKRA must meet all the terms of its recognition and comply with all OSHA policies pertaining to this recognition; and

3. DEKRA must continue to meet the requirements for recognition, including all previously published conditions on DEKRA's scope of recognition, in all areas for which it has recognition.

Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the scope of recognition of DEKRA as a NRTL, subject to the limitations and conditions specified above. OSHA also adds one test standard to the NRTL Program's List of Appropriate Test Standards.

III. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8–2020 (85 FR 58393, Sept. 18, 2020), and 29 CFR 1910.7.

Signed at Washington, DC, on April 16, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99984; File No. SR–PEARL–2024–19]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Make Minor, Non-Substantive Edits to Rule 531, Reports and Market Data Products

April 17, 2024.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 9, 2024, MIAX PEARL, LLC (''MIAX Pearl'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend (1) make a non-substantive, clarifying change to a footnote in prior rule filings submitted to the U.S. Securities and Exchange Commission (''Commission'') for immediate effectiveness pursuant to Section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f)(6) [4] to adopt the Liquidity Taker Event Report and Liquidity Taker Event Report—Resting Simple Orders; [5] and (2) make a non-substantive clarifying change to Exchange Rule 531, Reports and Market Data Products.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-equities/pearl-equities/rule-filings,* at MIAX Pearl's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to: (1) make a non-substantive, clarifying change to a footnote in prior rule filings submitted to the Commission for immediate effectiveness pursuant to Section 19(b)(3)(A) of the Act [6] and Rule 19b–4(f)(6) [7] thereunder to adopt the Liquidity Taker Event Report and Liquidity Taker Event Report—Resting Simple Orders; and (2) make a non-substantive clarifying change to Exchange Rule 531, Reports and Market Data Products.

The Exchange offers two versions of the Liquidity Taker Event Report: (1) Liquidity Taker Event Report (referred to herein as the ''Simple Order Report''); and (2) Liquidity Taker Event Report—Resting Simple Orders (referred to herein as the ''Resting Simple Order Report'').[8] Each of the Reports are available for purchase by Exchange Members [9] on a voluntary basis. The Exchange's prior rule filings to adopt each Liquidity Taker Event Report were submitted to the Commission for immediate effectiveness pursuant to Section 19(b)(3)(A) of the Act [10] and Rule 19b–4(f)(6) thereunder.[11] Each Liquidity Taker Event Report is described under Exchange Rules 531(a) and (c).[12]

In general, each Liquidity Taker Event Report is a daily report that provides a Member (''Recipient Member'') with its liquidity response time details for executions and contra-side responses of

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6).

[5] The Exchange notes that its affiliate, MIAX Emerald, LLC (''MIAX Emerald''), submitted the first filing to adopt the Liquidity Taker Event Report—Simple Orders, pursuant to Section 19(b)(2) of the Act. 15 U.S.C. 78s(b)(2). *See* Securities Exchange Act Release Nos. 91356 (March 18, 2021), 86 FR 15759 (March 24, 2021) (SR–EMERALD–2021–09) (Notice of Filing of a Proposed Rule Change To Adopt Exchange Rule 531, Reports, To Provide for the New ''Liquidity Taker Event Report''); *and* 91787 (May 6, 2021), 86 FR 26111 (May 12, 2021) (SR–EMERALD–2021–09) (Order Approving Proposed Rule Change To Adopt Exchange Rule 531(a), Reports, To Provide for a New ''Liquidity Taker Event Report'').

[6] 15 U.S.C. 78s(b)(3)(A).

[7] 17 CFR 240.19b–4(f)(6).

[8] The Simple Order Report and Resting Simple Order Report are collectively referred to herein as the ''Reports.''

[9] The term ''Member'' means an individual or organization that is registered with the Exchange pursuant to Chapter II of the Exchange's Rules for purposes of trading on the Exchange as an ''Electronic Exchange Member'' or ''Market Maker.'' Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

[10] 15 U.S.C. 78s(b)(3)(A).

[11] 17 CFR 240.19b–4(f)(6).

[12] *See* Exchange Rules 531(a) and (c); *see also* Securities Exchange Act Release Nos. 92082 (June 1, 2021), 86 FR 30337 (June 7, 2021) (SR–PEARL–2021–25) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Rule 531, Reports and Market Data Products, To Adopt the Liquidity Taker Event Report for Options Trading); *and* 96837 (February 8, 2023), 88 FR 9543 (February 14, 2023) (SR–PEARL–2023–01) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 531, Reports and Market Data Products, To Provide for the New ''Liquidity Taker Event Report— Resting Simple Orders'').

an order resting on the Book,[13] where that Recipient Member attempted to execute against such resting order [14] within a certain timeframe.[15] The content of each of the Reports is specific to the Recipient Member and each Liquidity Taker Event Report does not include any information related to any Member other than the Recipient Member.

Proposal To Amend a Footnote in Each of the Filings To Adopt the Reports (SR–PEARL–2021–25 and SR–PEARL–2023–01)

The Exchange proposes to make a clarifying change to one of the footnotes in each of the filings to adopt each Liquidity Taker Event Report. Each of the filings to adopt each Liquidity Taker Event Report contains a section that describes information in each report that corresponds to the Recipient Member. Each of the prior filings states that the ''following information would be included in the [Simple Order Report or Resting Simple Order Report] regarding response(s) sent by the Recipient Member: (A) Recipient Member identifier; (B) the time difference between the time the first response that executes against the resting order was received by the Exchange and the time of each response sent by the Recipient Member, regardless of whether it executed or not; (C) size and type of each response submitted by Recipient Member; and (D) response reference number, which is a unique reference number attached to the response by the Recipient Member.[16] Further, each of the filings includes a footnote at the end of romanette ''(B)'' in the paragraph described above, which states as follows:

For purposes of calculating this duration of time, the Exchange will use the time the resting order and the Recipient Member's response(s) is received by the Exchange's network, both of which would be before the order and response(s) would be received by the System. This time difference would be provided in nanoseconds.[17]

The Exchange proposes to clarify the above footnote. Specifically, the Exchange proposes to replace ''the resting order'' with ''the first response that executes against the resting order.'' Accordingly, with the proposed change, the referenced footnotes in each of the filings to adopt the Reports would read as follows:

For purposes of calculating this duration of time, the Exchange will use the time the first response that executes against the resting order and the Recipient Member's response(s) is received by the Exchange's network, both of which would be before the order and response(s) would be received by the System. This time difference would be provided in nanoseconds.

The purpose of the proposed change is to correct a non-substantive error in a footnote of each rule filing to adopt the Reports. The Exchange notes that the rule text in Exchange Rule 531 that describes each of the Reports was correctly adopted and does not require any change; only the footnote described above needs to be clarified. This change does not impact or alter the information provided to any Recipient Member.

Cleanup to Exchange Rule 531(c)

The Exchange proposes to make a non-substantive clarifying change to Exchange Rule 531, Reports and Market Data Products. Currently, Exchange Rule 531(c) provides the rule text for the Resting Simple Order Report. In particular, Exchange Rule 531(c) provides that ''[t]he Liquidity Taker Event Report-Resting Simple Orders is a daily report that provides a Member ('Recipient Member') with its liquidity response time details for executions against an order resting on the Simple Order Book, where that Recipient Member attempted to execute against such resting order within the timeframe specified under paragraph (2) below.'' The Exchange proposes to delete the words ''Simple Order'' when referring to the Book. The purpose of this proposed change is to provide consistency and clarity within the Rulebook as the defined term, the ''Book,'' refers to the Exchange's electronic book of buy and sell orders and quotes maintained by the System.[18]

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[19] in general, and furthers the objectives of Section 6(b)(5),[20] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest.

The Exchange believes that the proposed change to each of the footnotes described above for each Liquidity Taker Event Report protects investors and the public interest, as well as removes impediments to and perfects the mechanism of a free and open market and a national market system because the change is designed solely to correct non-substantive errors in prior filings, and none which have any impact on the Exchange's actual rule text for each of the Reports. This proposed change does not impact or alter the operation of Exchange Rule 531 regarding the Reports.

Similarly, the Exchange believes that the proposed change to delete the words ''Simple Order'' when referring to the Book in Exchange Rule 531(c) removes impediments to and perfects the mechanism of a free and open market and a national market system because the change is designed to provide consistency and clarity within the Rulebook as the defined term, the ''Book,'' refers to the Exchange's electronic book of buy and sell orders and quotes maintained by the System. This proposed change does not impact or alter the operation of Exchange Rule 531(c).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act, as amended.

The non-substantive corrections to the footnotes in prior filings to adopt each Liquidity Taker Event Report would not impact competition because such changes would not enhance or alter the Exchange's ability to compete, but rather, clarify a prior error which would reduce the potential for inadvertent investor confusion. Similarly, the proposed change to delete the words ''Simple Order'' when referring to the Book in Exchange Rule 531(c) would not impact competition because such change would not enhance or alter the Exchange's ability to compete, but rather, provide consistency and clarity within the Rulebook.

[13] The ''Book'' is the Exchange's electronic book of buy and sell orders and quotes maintained by the System. *See* Exchange Rule 100.

[14] Only displayed orders are included in the Reports. The Exchange notes that it does not currently offer any non-displayed orders on its options trading platform.

[15] A complete description of each of the Reports can be found in the prior rule filings to adopt the Reports. *See supra* note 12.

[16] *See supra* note 12. For the Simple Order Report, *see* Exchange Rule 531(a)(1)(iii); for the Resting Simple Order Report, *see* Exchange Rule 531(c)(1)(iii).

[17] *See supra* note 12, 86 FR 30337, at 30339, footnote 20; *and* 88 FR 9543, at 9545, footnote 21.

[18] *See* Exchange Rule 100.

[19] 15 U.S.C. 78f(b).

[20] 15 U.S.C. 78f(b)(5).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [21] and Rule 19b–4(f)(6) thereunder.[22]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act [23] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii) [24] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange stated that the proposed changes to the footnotes in the filings to adopt each of the Reports would correct non-substantive errors in prior filings. The Exchange also stated that the proposed non-substantive, clarifying change to Exchange Rule 531 deleting the words ''Simple Order'' when referring to the Book would provide consistency and clarity within the Rulebook. For these reasons, and because the proposal raises no novel legal or regulatory issues, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.[25]

[21] 15 U.S.C. 78s(b)(3)(A).

[22] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[23] 15 U.S.C. 78s(b)(3)(A).

[24] 17 CFR 240.19b–4(f)(6)(iii).

[25] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–PEARL–2024–19 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–PEARL–2024–19. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–PEARL–2024–19 and should be submitted on or before May 14, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[26]

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35172; File No. 813–00410]

Hines Investment Management Holdings Limited Partnership and Hines Employee Access I LP

April 17, 2024.

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice.

Notice of application for an order (''Order'') under sections 6(b) and 6(e) of the Investment Company Act of 1940 (the ''Act'') granting an exemption from all provisions of the Act, except sections 9, 17, 30, and 36 through 53, and the rules and regulations under the Act (the ''Rules and Regulations''). With respect to sections 17(a), (d), (e), (f), (g), and (j) of the Act, sections 30(a), (b), (e), and (h) of the Act and the Rules and Regulations and rule 38a–1 under the Act, applicants request a limited exemption as set forth in the application.

SUMMARY OF APPLICATION: Applicants request an order to exempt certain limited partnerships, limited liability companies, business trusts or other entities (''Funds'') formed for the benefit of eligible employees of Hines Investment Management Holdings Limited Partnership and its affiliates from certain provisions of the Act. Each Fund, and each series thereof with segregated assets and liabilities, will be an ''employees' securities company'' within the meaning of section 2(a)(13) of the Act.

APPLICANTS: Hines Investment Management Holdings Limited Partnership and Hines Employee Access Partners I LP.

FILING DATES: The application was filed on August 17, 2022 and amended on March 14, 2023, November 1, 2023, February 16, 2024 and April 1, 2024.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on May 13, 2024, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary at *Secretarys-Office@sec.gov.*

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: Christopher Clark, LeRonica Hill, Richard Heaton at *corporate.counsel@hines.com.*

FOR FURTHER INFORMATION CONTACT: Matthew Cook, Senior Counsel, or Marc Mehrespand, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' fourth amended and restated application, dated April 1, 2024, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field, on the SEC's EDGAR system.

The SEC's EDGAR system may be searched at, at *http://www.sec.gov/edgar/searchedgar/legacy/companysearch.html.* You may also call the SEC's Public Reference Room at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Vanessa A. Countryman,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99975; File No. SR–BOX–2024–11]

Self-Regulatory Organizations; BOX Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Permit the Listing and Trading of Options Series With Tuesday and Thursday Expirations for Options on iShares Russell 2000 ETF (IWM)

April 17, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 12, 2024, BOX Exchange LLC (''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend BOX Rule 5050 (Series of Options Contracts Open for Trading) to permit the listing and trading of options series with Tuesday and Thursday expirations for options on iShares Russell 2000 ETF (IWM), specifically permitting two expiration dates for the proposed Tuesday and Thursday expirations in IWM. The text of the proposed rule change is available from the principal office of the Exchange, at the Commission's Public Reference Room and also on the Exchange's internet website at *https://rules.boxexchange.com/rulefilings.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend BOX Rule 5050 (Series of Options Contracts Open for Trading) to permit the listing and trading of options series with Tuesday and Thursday expirations for options on iShares Russell 2000 ETF (IWM), specifically permitting two expiration dates for the proposed Tuesday and Thursday expirations in IWM. This is a competitive filing that is based on a proposal submitted by NASDAQ ISE, LLC (''ISE'') and approved by the Commission.[5]

Currently, Table 1 in IM–5050–6 specifies each symbol that qualifies as a Short Term Option Daily Expiration.[6] Today, Table 1 permits the listing and trading of Monday Short Term Option Daily Expirations and Wednesday Short Term Option Daily Expirations for IWM. At this time, the Exchange proposes to expand the Short Term Option Series Program to permit the listing and trading of no more than a total of two IWM Short Term Option Daily Expirations beyond the current week for each of Monday, Tuesday, Wednesday, and Thursday expirations at one time.[7] The listing and trading of Tuesday and

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

[5] *See* Securities Exchange Act Release No. 99946 (April 11, 2024) (Order Approving SR–ISE–2024–06).

[6] The Exchange may open for trading on any Thursday or Friday that is a business day series of options on that class that expire at the close of business on each of the next five Fridays that are business days and are not Fridays in which standard expiration options series, Monthly Options Series, or Quarterly Options Series. Of these series of options, the Exchange may have no more than a total of five Short Term Option Expiration Dates. In addition, the Exchange may open for trading series of options on certain symbols that expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Short Term Option Daily Expirations''). *See* BOX IM–5050–6.

[7] The Exchange would amend the Tuesday and Thursday expirations for IWM in Table 1 in IM–5050–6 from ''0'' to ''2'' to permit Tuesday and Thursday expirations for options on IWM listed pursuant to the Short Term Option Series Program. The Exchange notes that Cboe Exchange, Inc. (''Cboe'') began listing Tuesday and Thursday expirations in the Russell 2000 Index Weeklys® (''RUTW'') and Mini-Russell 2000 Index Weeklys® (''MRUT'') on January 8, 2024.

Thursday Short Term Option Daily Expirations would be subject to IM–5050–6.

Today, Tuesday Short Term Option Daily Expirations in SPDR S&P 500 ETF Trust (SPY) and the INVESCO QQQ Trust℠, Series 1 (QQQ) may open for trading on any Monday or Tuesday that is a business day series of options on the symbols provided in Table 1 that expire at the close of business on each of the next two Tuesdays that are business days and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Tuesday Short Term Option Expiration Date'').[8] Also, today, Thursday Short Term Option Daily Expirations in SPY and QQQ may open for trading on any Tuesday or Wednesday that is a business day series of options on the symbols provided in Table 1 that expire at the close of business on each of the next two Wednesdays that are business days and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Wednesday Short Term Option Expiration Date''). In the event that options on IWM expire on a Tuesday or Thursday and that Tuesday or Thursday is a business day in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire, the Exchange would skip that week's listing and instead list the following week; the two weeks would therefore not be consecutive. With this proposal, the Exchange would be able to open for trading series of options on IWM that expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire.[9] The interval between strike prices for the proposed Tuesday and Thursday IWM Short Term Option Daily Expirations will be the same as those for Tuesday and Thursday IWM Short Term Option Daily Expirations in SPY and QQQ, applicable to the Short Term Option Series Program.[10] IM–5050–1(b) provides that, notwithstanding any other provision regarding the interval of strike prices of series of options on Exchange-Traded Fund Shares in BOX Rule 5050, the interval of strike prices on options on IWM will be $1 or greater.[11] Further, IM–5050–6(b)(5) provides that the interval between strike prices on Short Term Option Series may be (i) $0.50 or greater where the strike price is less than $100, and $1 or greater where the strike price is between $100 and $150 for all option classes that participate in the Short Term Options Series Program; (ii) $0.50 for option classes that trade in one dollar increments in Related non-short Term Options and are in the Short Term Option Series Program; or (iii) $2.50 or greater where the strike price is above $150. Specifically, the Tuesday and Thursday IWM Short Term Option Daily Expirations will have a $0.50 strike interval minimum. As is the case with other equity options series listed pursuant to the Short Term Option Series Program, the Tuesday and Thursday IWM Short Term Option Daily Expiration series will be P.M.-settled.

Pursuant to BOX Rule 100(a)(66),[12] with respect to the Short Term Option Series Program, a Tuesday or Thursday expiration series shall expire on the first business day immediately prior to that Tuesday or Thursday, *e.g.,* Monday or Wednesday of that week, respectively, if the Tuesday or Thursday is not a business day.

Currently, for each option class eligible for participation in the Short Term Option Series Program, the Exchange is limited to opening thirty (30) series for each expiration date for the specific class.[13] The thirty (30) series restriction does not include series that are open by other securities exchanges under their respective weekly rules; the Exchange may list these additional series that are listed by other options exchanges.[14] This thirty (30) series restriction would apply to Tuesday and Thursday IWM Short Term Option Daily Expiration series as well.

With this proposal, Tuesday and Thursday IWM Expirations would be treated the same as Tuesday and Thursday Expirations in SPY and QQQ. With respect to standard option series, Short Term Option Daily Expirations may expire in the same week in which standard option series on the same class expire.[15] Further, as is the case today with other Tuesday and Thursday Short Term Option Daily Expirations, the Exchange would not permit Tuesday and Thursday Short Term Option Daily Expirations to expire on the same day in which standard expiration options series, Monthly Options Series, or Quarterly Options Series on the same class expire.[16] Therefore, all Short Term Option Daily Expirations would expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire.

The Exchange does not believe that any market disruptions will be encountered with the introduction of P.M.-settled Tuesday and Thursday IWM Short Term Option Daily Expirations. The Exchange has the necessary capacity and surveillance programs in place to support and properly monitor trading in the proposed Tuesday and Thursday Short Term Option Daily Expirations. The Exchange currently trades P.M.-settled Short Term Option Series that expire Tuesday and Thursday for SPY and QQQ and has not experienced any market disruptions nor issues with capacity. Today, the Exchange has surveillance programs in place to support and properly monitor trading in Short Term Option Series that expire Tuesday and Thursday for SPY and QQQ.

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Securities Exchange Act of 1934 (the ''Act''),[17] in general, and Section 6(b)(5) of the Act,[18] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and

[8] *See* BOX IM–5050–6.

[9] Today, IWM may trade on Mondays and Wednesdays, in addition to Fridays, as is the case for all options series.

[10] See BOX IM–5050–6(b)(5).

[11] Options on SPY, iShares Core S&P 500 ETF (''IVV''), QQQ, IWM, and the SPDR Dow Jones Industrial Average ETF (''DIA'') are also subject to IM–5050–1(b) strike intervals.

[12] BOX Rule 100(a)(66) provides, ''The term 'Short Term Option Series' means a series in an option class that is approved for listing and trading on BOX in which the series is opened for trading on any Monday, Tuesday, Wednesday, Thursday or Friday that is a business day and that expires on the Monday, Tuesday, Wednesday, Thursday, or Friday of the next business week, or, in the case of a series that is listed on a Friday and expires on a Monday, is listed one business week and one business day prior to that expiration. If a Tuesday, Wednesday, Thursday or Friday is not a business day, the series may be opened (or shall expire) on the first business day immediately prior to that Tuesday, Wednesday, Thursday or Friday, respectively. For a series listed pursuant to this section for Monday expiration, if a Monday is not a business day, the series shall expire on the first business day immediately following that Monday.''

[13] See BOX IM–5050–6(b)(3) and (4).

[14] See BOX IM–5050–6(b)(1).

[15] See BOX IM–5050–6(b)(2).

[16] Id.

[17] 15 U.S.C. 78f(b).

[18] 15 U.S.C. 78f(b)(5).

coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. In particular, the Exchange believes that IWM Tuesday and Thursday Short Term Option Daily Expirations will allow market participants to purchase IWM options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively. Further, the proposal to permit Tuesday and Thursday Short Term Option Daily Expirations for options on IWM listed pursuant to the Short Term Option Series Program, subject to the proposed limitation of two nearest expirations, would protect investors and the public interest by providing the investing public and other market participants more flexibility to closely tailor their investment and hedging decisions in IWM options, thus allowing them to better manage their risk exposure. In particular, the Exchange believes the Short Term Option Series Program has been successful to date and that Tuesday and Thursday IWM Short Term Daily Expirations should simply expand the ability of investors to hedge risk against market movements stemming from economic releases or market events that occur throughout the month in the same way that the Short Term Option Series Program has expanded the landscape of hedging. Similarly, the Exchange believes Tuesday and Thursday IWM Short Term Option Daily Expirations should create greater trading and hedging opportunities and provide customers the flexibility to tailor their investment objectives more effectively. BOX currently lists SPY and QQQ Tuesday and Thursday Short Term Option Daily Expirations.[19]

With this proposal, Tuesday and Thursday IWM Expirations would be treated similarly to existing Tuesday and Thursday SPY and QQQ Expirations and would expire in the same week that standard monthly options expire on Fridays.[20] Further, today, Tuesday and Thursday Short Term Option Daily Expirations do not expire on the same day in which standard expiration options series, Monthly Options Series or Quarterly Options Series expire.[21] Today, all Short Term Option Daily Expirations expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days and are not business days in which standard expiration options series, Monthly Options Series or Quarterly Options Series expire. There are no material differences in the treatment of Tuesday and Thursday SPY and QQQ Short Term Option Daily Expirations as compared to the proposed Tuesday and Thursday IWM Short Term Option Daily Expirations.

Finally, the Exchange represents that it has an adequate surveillance program in place to detect manipulative trading in the proposed Tuesday and Thursday IWM Short Term Option Daily Expirations, in the same way that it monitors trading in the current Short Term Option Series and trading in Tuesday and Thursday SPY and QQQ Expirations. The Exchange also represents that it has the necessary systems capacity to support the new options series. Finally, the Exchange does not believe that any market disruptions will be encountered with the introduction of Tuesday and Thursday IWM Short Term Option Daily Expirations.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In this regard and as indicated above, the Exchange notes that the rule change is being proposed as a competitive response to a filing submitted by ISE that was recently approved by the Commission.[22] Similar to SPY and QQQ Tuesday and Thursday Expirations, the introduction of IWM Tuesday and Thursday Short Term Option Daily Expirations does not impose an undue burden on competition. The Exchange believes that it will, among other things, expand hedging tools available to market participants and continue the reduction of the premium cost of buying protection. The Exchange believes that IWM Tuesday and Thursday Short Term Option Daily Expirations will allow market participants to purchase IWM options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively. The Exchange notes that Cboe began listing Tuesday and Thursday expirations in RUTW and MRUT on January 8, 2024.

The Exchange does not believe the proposal will impose any burden on inter-market competition, as nothing prevents other options exchanges from proposing similar rules to list and trade Short Term Option Series with Tuesday and Thursday Short Term Option Daily Expirations. The Exchange notes that having Tuesday and Thursday IWM expirations is not a novel proposal, as SPY and QQQ Tuesday and Thursday Expirations are currently listed on BOX.[23]

Further, the Exchange does not believe the proposal will impose any burden on intramarket competition, as all market participants will be treated in the same manner under this proposal.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[24] and Rule 19b–4(f)(6) thereunder.[25] Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[26] and subparagraph (f)(6) of Rule 19b–4 thereunder.[27]

A proposed rule change filed under Rule 19b–4(f)(6)[28] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[29] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. According to the Exchange, the proposed rule change is a competitive

[19] *See* BOX IM–5050–6(a).

[20] *See* BOX IM–5050–6(b)(2).

[21] *Id.*

[22] *See supra,* note 3.

[23] *See* BOX IM–5050–6(a).

[24] 15 U.S.C. 78s(b)(3)(A)(iii).

[25] 17 CFR 240.19b–4(f)(6).

[26] 15 U.S.C. 78s(b)(3)(A)(iii).

[27] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[28] 17 CFR 240.19b–4(f)(6).

[29] 17 CFR 240.19b–4(f)(6)(iii).

response to a filing submitted by Nasdaq ISE that was recently approved by the Commission.[30] The Exchange has stated that waiver of the 30-day operative delay would permit the Exchange to implement the proposal at the same time as its competitor exchanges, thus creating competition among Short Term Option Series. The Commission believes that the proposed rule change presents no novel issues and that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[31]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–BOX–2024–11 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–BOX–2024–11. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–BOX–2024–11 and should be submitted on or before May 14, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[32]

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99979; File No. SR–CboeBZX–2024–029]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Short Term Options Series Program in Rule 19.6, Interpretation and Policy .05

April 17, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 15, 2024, Cboe BZX Exchange, Inc. (''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') proposes to amend the Short Term Options Series Program in Rule 19.6, Interpretation and Policy .05. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Short Term Option Series Program in Rule 19.6, Interpretation and Policy .05 (Series of Options Contracts Open for Trading). Specifically, the Exchange proposes to expand the Short Term Option Series program to permit the listing and trading of options series with Tuesday and Thursday expirations for options on iShares Russell 2000 ETF (''IWM''), specifically permitting two expiration dates for the proposed Tuesday and Thursday expirations in IWM.

Currently, Table 1 in Rule 19.6, Interpretation and Policy .05(h), specifies each symbol that qualifies as a Short Term Option Daily Expiration.[5]

[5] The Exchange may open for trading on any Thursday or Friday that is a business day series of

Today, Table 1 permits the listing and trading of Monday Short Term Option Daily Expirations and Wednesday Short Term Option Daily Expirations for IWM. At this time, the Exchange proposes to expand the Short Term Option Series Program to permit the listing and trading of no more than a total of two IWM Short Term Option Daily Expirations beyond the current week for each of Monday, Tuesday, Wednesday, and Thursday expirations at one time.[6] The listing and trading of Tuesday and Thursday Short Term Option Daily Expirations would be subject to Rule 19.6, Interpretation and Policy .05.

Today, Tuesday Short Term Option Daily Expirations in SPDR S&P 500 ETF Trust (''SPY'') and the INVESCO QQQ TrustSM, Series 1 (''QQQ'') may open for trading on any Monday or Tuesday that is a business day series of options on the symbols provided in Table 1 that expire at the close of business on each of the next two Tuesdays that are business days and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Tuesday Short Term Option Expiration Date'').[7] Also, today, Thursday Short Term Option Daily Expirations in SPY and QQQ may open for trading on any Tuesday or Wednesday that is a business day series of options on the symbols provided in Table 1 that expire at the close of business on each of the next two Wednesdays that are business days and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Wednesday Short Term Option Expiration Date'').[8]

In the event that options on IWM expire on a Tuesday or Thursday and that Tuesday or Thursday is a business day in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire, the Exchange would skip that week's listing and instead list the following week; the two weeks would therefore not be consecutive. With this proposal, the Exchange would be able to open for trading series of options on IWM that expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire.[9]

The interval between strike prices for the proposed Tuesday and Thursday IWM Short Term Option Daily Expirations will be the same as those for Tuesday and Thursday IWM Short Term Option Daily Expirations in SPY and QQQ, applicable to the Short Term Option Series Program.[10] Specifically, the Tuesday and Thursday IWM Short Term Option Daily Expirations will have a $0.50 strike interval minimum. As is the case with other equity options series listed pursuant to the Short Term Option Series Program, the Tuesday and Thursday IWM Short Term Option Daily Expiration series will be P.M.-settled.

Pursuant to Rule 19.6, Interpretation and Policy .05(h), with respect to the Short Term Option Series Program, a Tuesday or Thursday expiration series shall expire on the first business day immediately prior to that Tuesday or Thursday, *e.g.,* Monday or Wednesday of that week, respectively, if the Tuesday or Thursday is not a business day.

Currently, for each option class eligible for participation in the Short Term Option Series Program, the Exchange is limited to opening thirty (30) series for each expiration date for the specific class.[11] The thirty (30) series restriction does not include series that are open by other securities exchanges under their respective weekly rules; the Exchange may list these additional series that are listed by other options exchanges.[12] This thirty (30) series restriction would apply to Tuesday and Thursday IWM Short Term Option Daily Expiration series as well. With this proposal, Tuesday and Thursday IWM Expirations would be treated the same as Tuesday and Thursday Expirations in SPY and QQQ. With respect to monthly option series, Short Term Option Daily Expirations expire in the same week in which monthly option series on the same class expire.[13] Further, as is the case today with other Tuesday and Thursday Short Term Option Daily Expirations, the Exchange would not permit Tuesday and Thursday Short Term Option Daily Expirations to expire on a business day in which monthly options series or Quarterly Options Series expire.[14] Therefore, all Short Term Option Daily Expirations would expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire. The Exchange does not believe that any market disruptions will be encountered with the introduction of P.M.-settled Tuesday and Thursday IWM Short Term Option Daily Expirations. The Exchange has the necessary capacity and surveillance programs in place to support and properly monitor trading in the proposed Tuesday and Thursday Short Term Option Daily Expirations. The Exchange currently trades P.M.-settled Short Term Option Series that expire Tuesday and Thursday for SPY and QQQ and has not experienced any market disruptions nor issues with capacity. Today, the Exchange has surveillance programs in place to support and properly monitor trading in Short Term Option Series that expire Tuesday and Thursday for SPY and QQQ.

Impact of Proposal

The Exchange notes that listings in the Short Term Option Series Program comprise a significant part of the standard listing in options markets. The below table sets forth the percentage of weekly listings as compared to monthly, quarterly, and Long-Term Option Series in 2023 in the options industry.[15] The Exchange notes that during this time period all options exchanges mitigated weekly strike intervals.

options on that class that expire at the close of business on each of the next five Fridays that are business days and are not Fridays in which standard expiration options series, Monthly Options Series, or Quarterly Options Series. Of these series of options, the Exchange may have no more than a total of five Short Term Option Expiration Dates. In addition, the Exchange may open for trading series of options on certain symbols that expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Short Term Option Daily Expirations''). See Rule 19.6, Interpretation and Policy .05.

[6] The Exchange would amend the Tuesday and Thursday expirations for IWM in Table 1 Rule 19.6, Interpretation and Policy .05(h) from ''0'' to ''2'' to permit Tuesday and Thursday expirations for options on IWM listed pursuant to the Short Term Option Series.

[7] *See* Rule 19.6, Interpretation and Policy .05(h).

[8] *Id.*

[9] Today, IWM may trade on Mondays and Wednesdays, in addition to Fridays, as is the case for all options series.

[15] Per Nasdaq ISE, LLC (''Nasdaq ISE''), this information was sourced from The Options Clearing Corporation (''OCC''). The information includes time averaged data for all 17 options markets through December 8, 2023. *See* Securities Exchange Act Release No. 99604 (February 26, 2024), 89 FR 15235 (March 1, 2024) (SR–ISE–2024–06).

NUMBER OF STRIKES—2023

Expiration	Percent of total series (percent)
Monthly	62.82
Weekly	17.22
LEAP	17.77
Quarterly	2.20

Similar to SPY and QQQ, the Exchange would limit the number of Short Term Option Daily Expirations for IWM to two expirations for Tuesday and Thursday expirations while expanding the Short Term Option Series Program to permit Tuesday, and Thursday expirations for IWM. Expanding the Short Term Option Series Program to permit the listing of Tuesday and Thursday expirations in IWM will account for the addition of 6.77% of strikes for IWM.[16] With respect to the impact to the Short Term Option Series Program on IWM overall, the impact would be a 20% increase in strikes.[17] With respect to the impact to the Short Term Options Series Program overall, the impact would be a 0.1% increase in strikes.[18] Members will continue to be able to expand hedging tools because all days of the week would be available to permit Members to tailor their investment and hedging needs more effectively in IWM.

NUMBER OF STRIKES—2023

Expiration	Percent of total series (percent)
Monthly	35.13
Weekly	48.30
LEAP	12.87
Quarterly	3.70

Weeklies comprise 48.30% of the total volume of options contracts.[19] The Exchange believes that inner weeklies (first two weeks) represent high volume as compared to outer weeklies (the last three weeks) and would be more attractive to market participants. The introduction of IWM Tuesday and Thursday expirations will, among other things, expand hedging tools available to market participants and continue the reduction of the premium cost of buying protection. The Exchange believes that IWM Tuesday and Thursday expirations will allow market participants to purchase IWM options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[20] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [21] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [22] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that IWM Tuesday and Thursday Short Term Daily Expirations will allow market participants to purchase IWM options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively. Further, the proposal to permit Tuesday and Thursday Short Term Daily Expirations for options on IWM listed pursuant to the Short Term Option Series Program, subject to the proposed limitation of two nearest expirations, would protect investors and the public interest by providing the investing public and other market participants more flexibility to closely tailor their investment and hedging decisions in IWM options, thus allowing them to better manage their risk exposure. In particular, the Exchange believes the Short Term Option Series Program has been successful to date and that Tuesday and Thursday IWM Short Term Daily Expirations should simply expand the ability of investors to hedge risk against market movements stemming from economic releases or market events that occur throughout the month in the same way that the Short Term Option Series Program has expanded the landscape of hedging. Similarly, the Exchange believes Tuesday and Thursday IWM Short Term Daily Expirations should create greater trading and hedging opportunities and provide customers the flexibility to tailor their investment objectives more effectively. The Exchange currently lists SPY and QQQ Tuesday and Thursday Short Term Daily Expirations.[23]

With this proposal, Tuesday and Thursday IWM Expirations would be treated similar to existing Tuesday and Thursday SPY and QQQ Expirations and would expire in the same week that standard monthly options expire on Fridays.[24] Further, today, Tuesday and Thursday Short Term Option Daily Expirations do not expire on a business day in which monthly options series or Quarterly Options Series expire.[25] Today, all Short Term Option Daily Expirations expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days and are not business days in which monthly options series or Quarterly Options Series expire. There are no material differences in the treatment of Tuesday and Thursday SPY and QQQ Short Term Daily Expirations as compared to the proposed Tuesday and Thursday IWM Short Term Daily Expirations.

Finally, the Exchange represents that it has an adequate surveillance program in place to detect manipulative trading in the proposed Tuesday and Thursday IWM Short Term Daily Expirations, in the same way that it monitors trading in the current Short Term Option Series and trading in Tuesday and Thursday SPY and QQQ Expirations. The Exchange also represents that it has the necessary systems capacity to support the new options series. Finally, the Exchange does not believe that any market disruptions will be encountered with the introduction of Tuesday and Thursday IWM Short Term Daily Expirations.

Finally, the Exchange notes the proposed rule change is substantively

the same as a rule change proposed by ISE, which the Commission recently approved.[26]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Similar to SPY and QQQ Tuesday and Thursday Expirations, the introduction of IWM Tuesday and Thursday Short Term Daily Expirations does not impose an undue burden on competition. The Exchange believes that it will, among other things, expand hedging tools available to market participants and continue the reduction of the premium cost of buying protection. The Exchange believes that IWM Tuesday and Thursday Short Term Daily Expirations will allow market participants to purchase IWM options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively.

The Exchange does not believe the proposal will impose any burden on inter-market competition, as nothing prevents other options exchanges from proposing similar rules to list and trade Short-Term Option Series with Tuesday and Thursday Short Term Daily Expirations. The Exchange notes that having Tuesday and Thursday IWM expirations is not a novel proposal, as SPY and QQQ Tuesday and Thursday Expirations are currently listed on the Exchange.[27] Additionally, as noted above, the Commission recently approved a substantively identical proposal of another exchange.[28] Further, the Exchange does not believe the proposal will impose any burden on intramarket competition, as all market participants will be treated in the same manner under this proposal.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[29] and Rule 19b–4(f)(6) thereunder.[30] Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[31] and subparagraph (f)(6) of Rule 19b–4 thereunder.[32]

A proposed rule change filed under Rule 19b–4(f)(6)[33] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[34] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. According to the Exchange, the proposed rule change is a competitive response to a filing submitted by Nasdaq ISE that was recently approved by the Commission.[35] The Exchange has stated that waiver of the 30-day operative delay would permit the Exchange to implement the proposal at the same time as its competitor exchanges, thus creating competition among Short Term Option Series. The Commission believes that the proposed rule change presents no novel issues and that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[36]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeBZX–2024–029 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeBZX–2024–029. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99982; File No. SR–PEARL–2024–18]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the MIAX Pearl Equities Fee Schedule

April 17, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 4, 2024, MIAX PEARL, LLC (''MIAX Pearl'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the fee schedule (the ''Fee Schedule'') applicable to MIAX Pearl Equities, an equities trading facility of the Exchange.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-equities/pearl-equities/rule-filings,* at MIAX Pearl's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule to: (1) modify certain rebates and volume thresholds for the NBBO Setter Plus Program (referred to in this filing as the ''NBBO Program''); [3] (2) modify the NBBO Setter Additive Rebate under the NBBO Program; (3) establish a new NBBO First Joiner Additive Rebate under the NBBO Program; and (4) establish a new Step-Up Rebate. The Exchange initially filed proposal on March 28, 2024 (SR–PEARL–2024–16). On April 4, 2024, the Exchange withdrew SR–PEARL–2024–16 and refiled this proposal.

Background of the NBBO Program

In general, the NBBO Program provides enhanced rebates for Equity Members [4] that add displayed liquidity (''Added Displayed Volume'') in securities priced at or above $1.00 per share in all Tapes based on increasing volume thresholds and increasing market quality levels (described below), and provides an additive rebate [5] applied to orders that set the NBB or NBO [6] upon entry.[7] The NBBO Program was implemented beginning September 1, 2023 and subsequently amended when the Exchange adopted two additional tiers of rebates, effective January 1, 2024.[8] The NBBO Program was further amended when the Exchange adopted an alternative method for Equity Members to achieve the enhanced rebate for Tier 5, Level C, effective March 1, 2024 (described below).[9]

Pursuant to the NBBO Setter Plus Table in Section 1)c) of the Fee Schedule, the NBBO Program provides six volume tiers enhanced by three market quality levels to provide increasing rebates in this segment. The six volume tiers are achievable by greater volume from the best of three alternative methods. The three market quality levels are achievable by greater NBBO participation in a minimum number of specific securities (described below).

MIAX Pearl Equities first determines the applicable NBBO Program tier based on three different volume calculation methods. The three volume-based methods to determine the Equity Member's tier for purposes of the NBBO Program are calculated in parallel in each month, and each Equity Member receives the highest tier achieved from any of the three methods each month. All three volume calculation methods are based on an Equity Member's respective ADAV,[10] NBBO Set Volume, or ADV, each as a percent of industry TCV [11] as the denominator.

Under volume calculation Method 1, the Exchange provides tiered rebates based on an Equity Member's ADAV as a percentage of TCV. An Equity Member qualifies for the base rebates in Tier 1 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADAV of at least 0.00% and less than 0.035% of TCV. An Equity Member qualifies for the enhanced rebates in Tier 2 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADAV of at least 0.035% and less than 0.05% of TCV. An Equity Member qualifies for the enhanced

[37] 17 CFR 200.30–3(a)(12), (59).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See, generally,* Fee Schedule, Section 1)c).

[4] The term ''Equity Member'' is a Member authorized by the Exchange to transact business on MIAX Pearl Equities. *See* Exchange Rule 1901.

[5] *See* Fee Schedule, Section 1)c), NBBO Setter Additive Rebate.

[6] With respect to the trading of equity securities, the term ''NBB'' shall mean the national best bid, the term ''NBO'' shall mean the national best offer, and the term ''NBBO'' shall mean the national best bid and offer. *See* Exchange Rule 1901.

[7] *See supra* note 3.

[8] *See* Securities Exchange Act Release Nos. 98472 (September 21, 2023), 88 FR 66533 (September 27, 2023) (SR–PEARL–2023–45) *and* 99318 (January 11, 2024), 89 FR 3488 (January 18, 2024) (SR–PEARL–2023–73).

[9] *See* Securities Exchange Act Release No. 99695 (March 8, 2024), 89 FR 18694 (March, 14, 2024) (SR–PEARL–2024–11).

[10] ''ADAV'' means average daily added volume calculated as the number of shares added per day and ''ADV'' means average daily volume calculated as the number of shares added or removed, combined, per day. ADAV and ADV are calculated on a monthly basis. ''NBBO Set Volume'' means the ADAV in all securities of an Equity Member that sets the NBB or NBO on MIAX Pearl Equities. The Exchange excludes from its calculation of ADAV, ADV, and NBBO Set Volume shares added or removed on any day that the Exchange's system experiences a disruption that lasts for more than 60 minutes during regular trading hours, on any day with a scheduled early market close, and on the ''Russell Reconstitution Day'' (typically the last Friday in June). Routed shares are not included in the ADAV or ADV calculation. *See* the Definitions section of the Fee Schedule.

[11] ''TCV'' means total consolidated volume calculated as the volume in shares reported by all exchanges and reporting facilities to a consolidated transaction reporting plan for the month for which the fees apply. The Exchange excludes from its calculation of TCV volume on any given day that the Exchange's system experiences a disruption that lasts for more than 60 minutes during Regular Trading Hours, on any day with a scheduled early market close, and on the ''Russell Reconstitution Day'' (typically the last Friday in June). *See id.*

rebates in Tier 3 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADAV of at least 0.05% and less than 0.08% of TCV. An Equity Member qualifies for the enhanced rebates in Tier 4 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADAV of at least 0.08% and less than 0.25% of TCV. An Equity Member qualifies for the enhanced rebates in Tier 5 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADAV of at least 0.25% and less than 0.40% of TCV. Finally, an Equity Member qualifies for the enhanced rebates in Tier 6 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADAV of at least 0.40% of TCV.

Under volume calculation Method 2, the Exchange provides tiered rebates based on an Equity Member's NBBO Set Volume as a percentage of TCV. Under volume calculation Method 2, an Equity Member qualifies for the base rebates in Tier 1 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an NBBO Set Volume of at least 0.00% and less than 0.01% of TCV. An Equity Member qualifies for the enhanced rebates in Tier 2 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an NBBO Set Volume of at least 0.01% and less than 0.015% of TCV. An Equity Member qualifies for the enhanced rebates in Tier 3 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an NBBO Set Volume of at least 0.015% and less than 0.02% of TCV. An Equity Member qualifies for the enhanced rebates in Tier 4 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an NBBO Set Volume of at least 0.02% and less than 0.03% of TCV. An Equity Member qualifies for the enhanced rebates in Tier 5 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an NBBO Set Volume of at least 0.03% and less than 0.08% of TCV. Finally, an Equity Member qualifies for the enhanced rebates in Tier 6 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an NBBO Set Volume of at least 0.08% of TCV.

Under volume calculation Method 3, the Exchange provides tiered rebates based on an Equity Member's ADV as a percentage of TCV. An Equity Member qualifies for the base rebates in Tier 1 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADV of at least 0.00% and less than 0.15% of TCV. An Equity Member qualifies for the enhanced rebates in Tier 2 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADV of at least 0.15% and less than 0.18% of TCV. An Equity Member qualifies for the enhanced rebates in Tier 3 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADV of at least 0.18% and less than 0.20% of TCV. An Equity Member qualifies for the enhanced rebates in Tier 4 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADV of at least 0.20% and less than 0.60% of TCV. An Equity Member qualifies for the enhanced rebates in Tier 5 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADV of at least 0.60% and less than 1.00% of TCV. Finally, an Equity Member qualifies for the enhanced rebates in Tier 6 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADV of at least 1.00% of TCV.

After the volume calculation is performed to determine highest tier achieved by the Equity Member, the applicable rebate is calculated based on two different measurements based on the Equity Member's participation at the NBBO on the Exchange in certain securities (referenced below).

The Exchange provides one column of base rebates (referred to in the NBBO Setter Plus Table as ''Level A'') and two columns of enhanced rebates (referred to in the NBBO Setter Plus Table as ''Level B'' and ''Level C''),[12] depending on the Equity Member's Percent Time at NBBO [13] on MIAX Pearl Equities in a certain amount of specified securities (''Market Quality Securities'' or ''MQ Securities'').[14] The NBBO Setter Plus Table specifies the percentage of time that the Equity Member must be at the NBB or NBO on MIAX Pearl Equities in at least 200 symbols out of the full list of 1,000 MQ Securities (which symbols may vary from time to time based on market conditions). The list of MQ Securities is generally based on the top multi-listed 1,000 symbols by ADV across all U.S. securities exchanges. The list of MQ Securities is updated monthly by the Exchange and published on the Exchange's website.[15]

The base rebates (''Level A'') are as follows: ($0.00240) [16] per share in Tier 1; ($0.00290) per share in Tier 2; ($0.00300) per share in Tier 3; ($0.00310) per share in Tier 4; ($0.00345) per share in Tier 5; and ($0.00350) per share in Tier 6. Under Level B, the Exchange provides enhanced rebates for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes if the Equity Member's Percent Time at NBBO is at least 25% and less than 50% in at least 200 MQ Securities per trading day during the month. The Level B rebates are as follows: ($0.00250) per share in Tier 1; ($0.00295) per share in Tier 2; ($0.00305) per share in Tier 3; ($0.00315) per share in Tier 4; ($0.00350) per share in Tier 5; and ($0.00355) per share in Tier 6. Under Level C, the Exchange provides enhanced rebates for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes if the Equity Member's Percent Time at NBBO is at least 50% in at least 200 MQ Securities per trading day during the month. The Level C rebates are as follows:

[12] For the purpose of determining qualification for the rebates described in Level B and Level C of the Market Quality Tier columns in the NBBO Setter Plus Program, the Exchange will exclude from its calculation: (1) any trading day that the Exchange's system experiences a disruption that lasts for more than 60 minutes during regular trading hours; (2) any day with a scheduled early market close; and (3) the ''Russell Reconstitution Day'' (typically the last Friday in June). *See* the Definitions section of the Fee Schedule.

[13] ''Percent Time at NBBO'' means the aggregate of the percentage of time during regular trading hours where a Member has a displayed order of at least one round lot at the national best bid (''NBB'') or national best offer (''NBO''). *See id.*

[14] ''Market Quality Securities'' or ''MQ Securities'' shall mean a list of securities designated as such, that are used for the purposes of qualifying for the rebates described in Level B and Level C of the Market Quality Tier columns in the NBBO Setter Plus Program. The universe of these securities will be determined by the Exchange and published on the Exchange's website. *See id.*

[15] *See e.g,* MIAX Pearl Equities Exchange—Market Quality Securities (MQ Securities) List, effective April 1 through April 30, 2024, *available at https://www.miaxglobal.com/markets/us-equities/pearl-equities/fees* (last visited April 4, 2024).

[16] Rebates are indicated by parentheses. *See* the General Notes section of the Fee Schedule.

($0.00260) per share in Tier 1; ($0.00300) per share in Tier 2; ($0.00310) per share in Tier 3; ($0.00320) per share in Tier 4; ($0.00355) per share in Tier 5; and ($0.00360) per share in Tier 6. As referenced above, Equity Members may also qualify for the Tier 5, Level C enhanced rebate via an alternative method by satisfying the following three requirements in the relevant month: (1) Midpoint ADAV [17] of at least 2,500,000 shares; (2) Displayed ADAV of at least 10,000,000 shares; and (3) Percent Time at the NBB or NBO of at least 50% in 200 or more symbols from the list of MQ Securities.[18]

The Exchange also offers an NBBO Setter Additive Rebate, which is an additive rebate of ($0.0003) per share for executions of orders in securities priced at or above $1.00 per share that set the NBB or NBO on MIAX Pearl Equities with a minimum size of a round lot.[19]

Proposal To Amend Certain Volume Thresholds and Rebates for the NBBO Program

The Exchange proposes to amend the NBBO Setter Plus Table in Section 1)c) of the Fee Schedule to: (1) amend the volume threshold requirements for Tiers 4 and 5 of volume calculation Method 1 of the NBBO Program; and (2) decrease the rebates applicable to Tier 1, Tier 5 and Tier 6 for all rebate Levels of the NBBO Program.

First, the Exchange proposes to reduce the minimum volume threshold by 0.05% for Tier 5 of volume calculation Method 1 and make the corresponding change to reduce the maximum volume threshold by 0.05% for Tier 4 of volume calculation Method 1 of the NBBO Program. Accordingly, with the proposed changes to volume calculation Method 1, an Equity Member will qualify for the enhanced rebates in Tier 4 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADAV of at least 0.08% and less than 0.20% of TCV. Further, an Equity Member will qualify for the enhanced rebates in Tier 5 for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume across all Tapes by achieving an ADAV of at least 0.20% and less than 0.40% of TCV. The Exchange does not propose to change any other volume calculation thresholds for the NBBO Program.

Next, the Exchange proposes to slightly decrease the rebates applicable to Tier 1, Tier 5 and Tier 6 for all rebate Levels of the NBBO Program. With the proposed changes, the Level A rebates will be as follows for Tiers 1, 5 and 6: ($0.00220) per share in Tier 1; ($0.00335) per share in Tier 5; and ($0.00340) per share in Tier 6. The Exchange does not propose to amend the rebate amounts applicable to Level A, Tiers 2, 3 and 4. With the proposed changes, the Level B rebates will be as follows for Tiers 1, 5 and 6: ($0.00225) per share in Tier 1; ($0.00340) per share in Tier 5; and ($0.00345) per share in Tier 6. The Exchange does not propose to amend the rebate amounts applicable to Level B, Tiers 2, 3 and 4. With the proposed changes, the Level C rebates will be as follows for Tiers 1, 5 and 6: ($0.00230) per share in Tier 1; ($0.00345) per share in Tier 5; and ($0.00350) per share in Tier 6. The Exchange does not propose to amend the rebate amounts applicable to Level C, Tiers 2, 3 and 4.

The purpose of these changes is for business and competitive reasons in light of recent volume growth on the Exchange. The Exchange notes that, even with the proposed changes, the base rebates, enhanced rebates and volume requirements of the NBBO Program remain competitive with, or better than, the rebates and volume requirements provided by other exchanges for executions of orders in securities priced at or above $1.00 per share that add displayed liquidity to those exchanges.[20]

Corresponding Changes to the Standard Rates Table and Liquidity Indicator Codes and Associated Fees Table

In connection with the proposed changes to the Level A, Tier 1 (Base) rebate of the NBBO Program described above, the Exchange proposes to amend the Standard Rates table in Section 1)a) of the Fee Schedule for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume in all Tapes and the Liquidity Indicator Codes and Associated Fees table in Section 1)b) of the Fee Schedule. In particular, the Exchange proposes to amend the Standard Rates table in Section 1)a) of the Fee Schedule to show the reduced standard rebate from ($0.0024) to now be ($0.0022) per share for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume in all Tapes. Further, the Exchange proposes to amend the Liquidity Indicator Codes and Associated Fees table in Section 1)b) of the Fee Schedule to amend Liquidity Indicator Codes ''AA,'' ''AB,'' and ''AC'' to show the reduced standard from ($0.0024) to now be ($0.0022) per share for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume in all Tapes. The purpose of these corresponding changes is to ensure the Fee Schedule is accurate and clear in light of the change to the base rebate amount in Level A, Tier 1 of the NBBO Setter Plus Table. The Exchange notes that despite the modest base rebate reduction proposed herein for executions of securities priced at or above $1.00 per share for Added Displayed Volume in all Tapes, the proposed standard rebate—($0.0022) per share—remains higher than, and competitive with, the standard rebates provided by other exchanges for executions of orders in securities priced at or above $1.00 per share that add displayed liquidity.[21]

Proposal To Amend the NBBO Setter Additive Rebate

The Exchange proposes to amend the NBBO Setter Additive Rebate in the

[17] Midpoint ADAV means the ADAV for the current month consisting of Midpoint Peg Orders in securities priced at or above $1.00 per share that execute at the midpoint of the Protected NBBO and add liquidity to the Exchange. A Midpoint Peg Order is a non-displayed Limit Order that is assigned a working price pegged to the midpoint of the PBBO. A Midpoint Peg Order receives a new timestamp each time its working price changes in response to changes in the midpoint of the PBBO. *See* Exchange Rule 2614(a)(3). With respect to the trading of equity securities, the term ''the term ''Protected NBB'' or ''PBB'' shall mean the national best bid that is a Protected Quotation, the term ''Protected NBO'' or ''PBO'' shall mean the national best offer that is a Protected Quotation, and the term ''Protected NBBO'' or ''PBBO'' shall mean the national best bid and offer that is a Protected Quotation. *See* Exchange Rule 1901.

[18] *See* Fee Schedule, Section 1)c), Notes to NBBO Setter Plus Table, note 4.

[19] *See* Fee Schedule, Section 1)c).

[20] *See* Cboe BZX Equities Fee Schedule, Add/Remove Volume Tiers section, *available at https://www.cboe.com/us/equities/membership/fee_schedule/bzx/* (providing an enhanced rebate in Tier 4 of ($0.0028) per share for executions of added displayed volume in securities priced at or above $1.00 per share, so long as the member meets all requirements, including minimum NBBO Time and NBBO Size requirements from a list of specified securities and minimum requirement of ADAV as a percentage of TCV); *see also* NYSE Arca Equities Fee Schedule, *available at https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf* (providing standard rebates of ($0.0020) per share (Tapes A and C) and ($0.0016) per share (Tape B) for adding displayed liquidity in securities priced at or above $1.00 per share).

[21] *See e.g.,* MEMX LLC (''MEMX'') Equities Fee Schedule, Transaction Fees section, *available at https://info.memxtrading.com/equities-trading-resources/us-equities-fee-schedule/* (providing a standard rebate $0.0015 per share for added displayed volume in securities priced at or above $1.00 per share); *see also* Cboe EDGX Exchange, Inc. (''Cboe EDGX'') Equities Fee Schedule, Standard Rates section, *available at https://www.cboe.com/us/equities/membership/fee_schedule/edgx/* (providing a standard rebate of $0.0016 per share for added displayed volume in securities priced at or above $1.00 per share).

NBBO Setter Plus Table in Section 1)c) of the Fee Schedule. Currently, the Exchange provides an NBBO Setter Additive Rebate of ($0.0003) per share, which applies only to executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume (other than Retail Orders [22]) that set the NBB or NBO on MIAX Pearl Equities with a minimum size of a round lot. The Exchange now proposes to increase the NBBO Setter Additive Rebate from ($0.0003) to ($0.0004) per share for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume (other than Retail Orders) [23] that set the NBB or NBO on MIAX Pearl Equities with a minimum size of a round lot. The purpose of the proposed increase to the NBBO Setter Additive Rebate is to continue to provide an additional incentive for Equity Members to contribute Added Displayed Volume in securities priced at or above $1.00 per share that sets the NBB or NBO on MIAX Pearl Equities, which should benefit all Equity Members by providing greater execution opportunities on the Exchange and contribute to a deeper, more liquid market, to the benefit of all investors and market participants.

Proposal To Establish NBBO First Joiner Additive Rebate

The Exchange proposes to amend the NBBO Setter Plus Table in Section 1)c) of the Fee Schedule to establish the new ''NBBO First Joiner Additive Rebate.'' In particular, the Exchange proposes that the NBBO First Joiner Additive Rebate will be an additive rebate of ($0.0002) per share for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume (other than Retail Orders) [24] for the *first* Equity Member that brings MIAX Pearl Equities to the established NBB or NBO with a minimum size of a round lot. The Exchange notes the NBBO First Joiner Additive Rebate will not apply to executions of orders in securities priced at or above $1.00 per share that join the NBB or NBO on MIAX Pearl Equities with a minimum size of a round lot *after* the first Equity Member's order that brings MIAX Pearl Equities to the established NBB or NBO with a minimum size of a round lot.

The purpose of adopting the NBBO First Joiner Additive Rebate is to further attract aggressively priced displayed liquidity to the Exchange. The Exchange believes that such change will encourage the submission of orders that join the established NBB or NBO on the Exchange that matches the NBB or NBO first established on an away market, in order to receive the additive rebate on such executions and the Exchange believes that the resulting increased submission of such aggressively priced displayed liquidity would enhance market quality by increasing execution opportunities, tightening spreads, encouraging depth, and promoting price discovery on the Exchange. The Exchange notes that NBBO First Joiner Additive Rebate is comparable to other volume-based incentives and discounts, which have been widely adopted by exchanges, and that the Exchange's proposal to provide an additive rebate for an Equity Member's transaction that brings MIAX Pearl Equities to the established NBB or NBO with a minimum size of a round lot is similar in construct to pricing incentives that have been adopted by other exchanges.[25]

Proposal To Establish the Step-Up Rebate

The Exchange proposes to amend the NBBO Setter Plus Table in Section 1)c) of the Fee Schedule to establish a new ''Step-Up Rebate,'' which will be labelled as Note 4 in the Notes section of the NBBO Setter Plus Table.[26] In particular, the Exchange proposes that the Step-Up Rebate will provide an additional rebate of ($0.0001) per share for executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume (other than Retail Orders) [27] for Equity Members that satisfy the following requirements in the relevant month: (1) minimum Displayed ADAV of 0.35% of TCV; and (2) increase in the percentage of Displayed ADAV of at least 0.05% of TCV as compared to the Equity Member's February 2024 [28] Displayed ADAV percentage.[29] The Exchange proposes that the Step-Up Rebate will expire no later than August 31, 2024 (referred to herein as the ''sunset period''),[30] which will be stated in the Fee Schedule. The Exchange will issue an alert to market participants should the Exchange determine that the Step-Up Rebate will expire earlier than August 31, 2024 or if the Exchange determines to amend the criteria or rate applicable to the Step-Up Rebate prior to the end of the sunset period. The Exchange notes other competing equities exchanges offer an enhanced or additive rebate utilizing a volume comparison of the current month to a prior baseline month with a similar ''sunset period.'' [31]

The purpose of this proposed change is to provide an incentive for Equity Members to strive for higher ADAV on the Exchange (above their ADAV in the baseline month of February 2024) to receive the additive Step-Up Rebate for

[22] A ''Retail Order'' is an agency or riskless principal order that meets the criteria of FINRA Rule 5320.03 that originates from a natural person and is submitted to the Exchange by a Retail Member Organization, provided that no change is made to the terms of the order with respect to price or side of market and the order does not originate from a trading algorithm or any other computerized methodology. *See* Exchange Rule 2626(a)(2).

[23] The Exchange excludes Retail Orders from participating in the NBBO Setter Additive Rebate because executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume in Retail Orders already receive an enhanced rebate of ($0.0037) per share. *See* Fee Schedule, Section 1)b), Liquidity Indicator Code ''AR''.

[24] The Exchange proposes to exclude Retail Orders from participating in the NBBO First Joiner Additive Rebate because executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume in Retail Orders already receive an enhanced rebate of ($0.0037) per share. *See* Fee Schedule, Section 1)b), Liquidity Indicator Code ''AR''.

[25] *See, e.g.,* Securities Exchange Act Release No. 96471 (December 9, 2022), 87 FR 76648 (December 15, 2022) (SR–MEMX–2022–33) (establishing NBBO Setter/Joiner Tiers with an additive rebate for member's orders that establish the NBBO or establish a new best bid or offer on MEMX that matched the NBBO first established on an away market).

[26] In connection with this change and numbering the proposed Step-Up Rebate as Note 4, the Exchange proposes to renumber Notes 3 and 4 as currently provided for in the Notes section of the NBBO Setter Plus Table, as described further below in this filing.

[27] The Exchange proposes to exclude Retail Orders from participating in the Step-Up Rebate because executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume in Retail Orders already receive an enhanced rebate of ($0.0037) per share. *See* Fee Schedule, Section 1)b), Liquidity Indicator Code ''AR''.

[28] The Exchange will use a baseline ADAV of 0.00% of TCV for firms that become Equity Members of the Exchange after February 2024 for the purpose of the Step-Up Rebate calculation.

[29] The Exchange notes that the proposed Step-Up Rebate will not apply to executions of orders in securities priced below $1.00 per share or executions of orders that constitute added non-displayed liquidity.

[30] The Exchange notes that at the end of the sunset period, the Step-Up Rebate will no longer apply unless the Exchange files a rule filing pursuant to Rule 19b–4 of the Exchange Act with the Commission to amend the criteria terms or update the baseline month to a more recent month.

[31] *See* MEMX Equities Fee Schedule, Liquidity Provision Tiers, Tier 2, *available at https://info.memxtrading.com/equities-trading-resources/us-equities-fee-schedule/* (providing enhanced rebate of ($0.0032) per share if the equity member meets a minimum displayed ADAV requirement in the current month compared to its displayed ADAV of the TCV from September 2023 with a sunset period of March 31, 2024); *see also* Cboe BZX Equities Fee Schedule, Step-Up Tiers section, *available at https://www.cboe.com/us/equities/membership/fee_schedule/bzx/* (providing enhanced rebate of ($0.0032) per share if the equity member meets certain added displayed volume requirements in Tiers 2 or 3 in the current month compared its added displayed volume from May 2019 or January 2022).

qualifying executions of Added Displayed Volume in securities priced at or above $1.00 per share in all Tapes. The Exchange believes that the proposed Step-Up Rebate will encourage the submission of additional Added Displayed Volume to the Exchange, thereby promoting price discovery and contributing to a deeper and more liquid market, which benefits all market participants and enhances the attractiveness of the Exchange as a trading venue. The purpose of including the proposed sunset period in the Fee Schedule is to provide clarity to Equity Members that, unless the Exchange determines to amend or otherwise modify the Step-Up Rebate, the Step-Up Rebate will expire at the end of the sunset period.

Proposed Changes to Notes Section of NBBO Setter Plus Table

The Exchange proposes to make several changes to the notes section of the NBBO Setter Plus Table in Section 1)c) of the Fee Schedule in light of the proposed changes described above. Note 3 currently provides that ''Retail Orders are not eligible for the NBBO Setter Additive Rebate as it applies only to Liquidity Indicator Codes AA, AB and AC.'' The Exchange proposes to move Note 3 to the end of the notes section, renumber it as new ''Note 5,'' and add text that in addition to the NBBO Setter Additive Rebate, Retail Orders will also not be eligible for the proposed NBBO First Joiner Additive Rebate and the Step-Up Rebate. Accordingly, new Note 5 will provide as follows: ''Retail Orders are not eligible for the NBBO Setter Additive Rebate, the NBBO First Joiner Additive Rebate, or the Step-Up Rebate as these rebates only apply to Liquidity Indicator Codes AA, AB and AC.''

Next, in connection with the proposed change to establish the Step-Up Rebate as Note 4 (described above), the Exchange proposes to renumber current Note 4 to now be numbered as Note 3. The Exchange does not propose to amend any of the text of current Note 4 (proposed renumbered Note 3). The purpose of all of these changes is to provide clarity within the Fee Schedule in connection with all of the changes proposed herein.

Implementation

The proposed changes are immediately effective.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act [32] in general, and furthers the objectives of Section 6(b)(4) of the Act [33] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among its Equity Members and issuers and other persons using its facilities. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [34] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers or dealers.

The Exchange operates in a highly fragmented and competitive market in which market participants can readily direct their order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. More specifically, the Exchange is only one of sixteen registered equities exchanges, and there are a number of alternative trading systems and other off-exchange venues, to which market participants may direct their order flow. Based on publicly available information, no single registered equities exchange had more than approximately 15–16% of the total market share of executed volume of equities trading for the month of February 2024.[35] Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow, and the Exchange represented approximately 1.73% of the overall market share for the month of February 2024. The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and also recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [36]

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow or discontinue or reduce use of certain categories of products, in response to new or different pricing structures being introduced into the market. Accordingly, competitive forces constrain the Exchange's transaction fees and rebates, and market participants can readily trade on competing venues if they deem pricing levels at those other venues to be more favorable. The Exchange believes the proposal reflects a reasonable and competitive pricing structure designed to incentivize market participants to direct their order flow to the Exchange, which the Exchange believes would enhance liquidity and market quality in both a broad manner and in a targeted manner with respect to the NBBO Program, in particular, and Added Displayed Volume in securities priced at or above $1.00 per share, in general.

Proposal To Amend Certain Volume Thresholds and Rebates for the NBBO Program

The Exchange believes its proposal to reduce the volume threshold requirement for Tier 5 (and adjacently Tier 4) of volume calculation Method 1 and decrease the rebates applicable to Tier 1, Tier 5 and Tier 6 for all rebate Levels of the NBBO Program provides a reasonable means to continue to encourage Equity Members to not only increase their order flow to the Exchange but also to contribute to price discovery and market quality on the Exchange by submitting aggressively priced displayed liquidity in securities priced at or above $1.00 per share. The Exchange believes that the NBBO Program, as modified with this proposal, continues to be equitable and not unfairly discriminatory because it is open to all Equity Members on an equal basis and provides enhanced rebates that are reasonably related to the value of the Exchange's market quality associated with greater order flow by Equity Members that set the NBB or NBO, and the introduction of higher volumes of orders into the price and volume discovery process. The Exchange believes the proposal is equitable and not unfairly discriminatory because it is designed to incentivize the entry of aggressively priced displayed liquidity that will create tighter spreads, thereby promoting price discovery and market quality on the Exchange to the benefit of all Equity Members and public investors.

In addition, the Exchange believes its proposal to reduce the volume threshold requirement for Tier 5 (and adjacently Tier 4) of volume calculation Method 1 and decrease the rebates applicable to Tier 1, Tier 5 and Tier 6 for all rebate Levels of the NBBO Program is reasonable because, even with the proposed changes, the base rebates,

[32] 15 U.S.C. 78f(b).

[33] 15 U.S.C. 78f(b)(4).

[34] 15 U.S.C. 78f(b)(5).

[35] *See* the ''Market Share'' section of the Exchange's website, *available at https://www.miaxglobal.com/* (last visited March 26, 2024).

[36] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37499 (June 29, 2005).

enhanced rebates and volume requirements of the NBBO Program remain competitive with, or better than, the rebates and volume requirements provided by other exchanges for executions of orders in securities priced at or above $1.00 per share that add displayed liquidity to those exchanges.[37]

Corresponding Changes to the Standard Rates Table and Liquidity Indicator Codes and Associated Fees Table

The Exchange believes its proposal to amend the Standard Rates table and Liquidity Indicator Codes and Associated Fees table to show the reduced standard rebate of ($0.0022) per share for Added Displayed Volume in securities priced at or above $1.00 per share in all Tapes is reasonable because these corresponding changes are to ensure the Fee Schedule is accurate and clear in light of the change to the base rebate amount in Level A, Tier 1 of the NBBO Setter Plus Table. The Exchange believes that even with the proposed reduced standard rebate for Added Displayed Volume in securities priced at or above $1.00 per share in all Tapes, the proposal is reasonable, equitably allocated and not unfairly discriminatory because the proposed standard rebate—($0.0022) per share—remains higher than, and competitive with, the standard rebates provided by other exchanges for executions of orders in securities priced at or above $1.00 per share that add displayed liquidity.[38]

Proposal To Amend the NBBO Setter Additive Rebate

The Exchange believes its proposal to increase the NBBO Setter Additive Rebate to ($0.0004) per share for Added Displayed Volume (other than Retail Orders) for executions of orders in securities priced at or above $1.00 per share that set the NBB or NBO on MIAX Pearl Equities with a minimum size of a round lot is reasonable, equitably allocated and not unfairly discriminatory because the Exchange believes it will continue to provide an additional incentive for Equity Members to contribute Added Displayed Volume in securities priced at or above $1.00 per share that sets the NBB or NBO on MIAX Pearl Equities. In turn, this should benefit all Equity Members by providing greater execution opportunities on the Exchange and contribute to a deeper, more liquid market, to the benefit of all investors and market participants. Further, the NBBO Setter Additive Rebate is available to all Equity Members of the Exchange that transact in securities priced at or above $1.00 per share in all Tapes. The Exchange believes it is reasonable and not unfairly discriminatory to continue to exclude Retail Orders from participating in the NBBO Setter Additive Rebate because executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume in Retail Orders already receive an enhanced rebate of ($0.0037) per share.[39]

Proposal To Establish the NBBO First Joiner Additive Rebate

The Exchange believes its proposal to establish the NBBO First Joiner Additive Rebate is reasonable because it should attract aggressively priced displayed liquidity to the Exchange, which will encourage the submission of orders that join the established NBB or NBO on the Exchange. This should result in increased orders of aggressively priced displayed liquidity, which would enhance the Exchange's market quality by increasing execution opportunities, tightening spreads, and promoting price discovery on the Exchange to the benefit of all market participants. The Exchange believes its proposal to establish the NBBO First Joiner Additive Rebate is equitably allocated and not unfairly discriminatory because it will be available to all Equity Members and is comparable to other volume-based incentives and discounts, which have been widely adopted by exchanges.[40] The Exchange believes it is reasonable and not unfairly discriminatory to exclude Retail Orders from participating in the NBBO First Joiner Additive Rebate because executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume in Retail Orders already receive an enhanced rebate of ($0.0037) per share.[41]

Proposal To Establish the Step-Up Rebate

The Exchange believes that the proposed Step-Up Rebate is comparable to other incentives currently offered by other exchanges,[42] and is reasonable, equitable and not unfairly discriminatory for these same reasons, as it provides Equity Members with an additional incentive to achieve a certain volume threshold on the Exchange. Further, the proposed Step-Up Rebate will be available to all Equity Members and is designed to encourage Equity Members to increase their orders of Added Displayed Volume in order to qualify for the additive rebate for qualifying executions, which, in turn, the Exchange believes would encourage the submission of additional Added Displayed Volume to the Exchange, thereby promoting price discovery and contributing to a deeper and more liquid market to the benefit of all market participants. The Exchange believes it is reasonable and not unfairly discriminatory to continue to exclude Retail Orders from participating in the Step-Up Rebate because executions of orders in securities priced at or above $1.00 per share for Added Displayed Volume in Retail Orders already receive an enhanced rebate of ($0.0037) per share.[43]

Proposed Changes to Notes Section of NBBO Setter Plus Table

The Exchange believes its proposal to renumber and amend the Notes section of the NBBO Setter Plus Table is reasonable because it will provide additional clarity within the Fee Schedule. In particular, the Exchange believes it is reasonable to set forth in new Note 5 that Retail Orders will note be eligible for the NBBO Setter Additive Rebate, the NBBO First Joiner Additive Rebate, or the Step-Up Rebate as these rebates only apply to Liquidity Indicator Codes AA, AB and AC, which will provide clarity to Equity Members about the applicability of such rebates.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intra-Market Competition

The Exchange does not believe that the proposal will impose any burden on intra-market competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes its proposed changes to the NBBO Program, increase to the NBBO Setter Additive Rebate, adoption of the NBBO First Joiner Additive Rebate, and adoption of the Step-Up Rebate would incentivize Equity Members to submit additional orders that add liquidity to the Exchange, thereby contributing to a deeper and more liquid market and promoting price discovery and market quality on the Exchange to the benefit of all market participants and enhancing

[37] *See supra* note 20.

[38] *See supra* note 21.

[42] *See supra* note 31.

[43] *See* Fee Schedule, Section 1)b), Liquidity Indicator Code ''AR''.

the attractiveness of the Exchange as a trading venue, which the Exchange believes, in turn, would continue to encourage market participants to direct additional order flow to the Exchange. Greater liquidity benefits all Members by providing more trading opportunities and encourages Equity Members to send additional orders to the Exchange, thereby contributing to robust levels of liquidity, which benefits all market participants. As described above, the opportunity to qualify for the proposed new NBBO First Joiner Additive Rebate, Step-Up Rebate, or increased NBBO Setter Additive Rebate, and thus receive the proposed rebates or additive rebates for qualifying executions of Added Displayed Volume, would be available to all Equity Members that meet the associated requirements, and the Exchange believes the proposed changes provide such incentives is reasonably related to the enhanced market quality that they are designed to promote. As such the Exchange does not believe the proposed changes would impose any burden on intra-market competition that is not necessary or appropriate in furtherance of the purpose of the Act.

Intermarket Competition

The Exchange believes the proposed changes will benefit competition, and the Exchange notes that it operates in a highly competitive market. Equity Members have numerous alternative venues they may participate on and direct their order flow to, including fifteen other equities exchanges and numerous alternative trading systems and other off-exchange venues. As noted above, no single registered equities exchange currently had more than 15–16% of the total market share of executed volume of equities trading for the month of February 2024.[44] Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow. Moreover, the Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow in response to new or different pricing structures being introduced to the market. Accordingly, competitive forces constrain the Exchange's transaction fees and rebates generally, including with respect to executions of Added Displayed Volume, and market participants can readily choose to send their orders to other exchanges and off-exchange venues if they deem fee levels at those other venues to be more favorable. As described above, the proposed changes are competitive proposals through which the Exchange seeks to encourage certain order flow to the Exchange and to promote market quality through pricing incentives that are similar in structure and purpose to pricing programs at other Exchanges, including the incentives with a sunset period such as the Step-Up Rebate.[45] Accordingly, the Exchange believes the proposal would not burden, but rather promote, intermarket competition by enabling it to better compete with other exchanges that offer similar incentives to market participants that enhance market quality.

Additionally, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and self-regulatory organization (''SRO'') revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [46] The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition* v. *Securities and Exchange Commission*, the D.C. circuit stated: ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possess a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers' . . .''.[47] Accordingly, the Exchange does not believe its proposed pricing changes impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[48] and Rule 19b–4(f)(2) [49] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–PEARL–2024–18 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–PEARL–2024–18. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the

[48] 15 U.S.C. 78s(b)(3)(A)(ii).

[49] 17 CFR 240.19b–4(f)(2).

proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–PEARL–2024–18 and should be submitted on or before May 14, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[50]

Vanessa A. Countryman,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99974; File No. SR–NYSE–2024–22]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 123D

April 17, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on April 11, 2024, New York Stock Exchange LLC (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 123D (Halts in Trading) to set forth specific requirements for halting and resuming trading in a security that is subject to a reverse stock split. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

In conjunction with the increase in overall reverse stock splits in recent years, the Exchange proposes to amend Rule 123D (Halts in Trading) to set forth specific requirements for halting and resuming trading in a security that is subject to a reverse stock split.

Background

The Commission recently approved a proposal filed by The Nasdaq Stock Exchange (''Nasdaq'') providing for a regulatory halt at the end of trading on the day immediately before the market effective date of a reverse stock split and a delayed opening of the security on the market effective date of the reverse stock split.[4] In its filing, Nasdaq noted that it had observed a recent increase in reverse stock split activity in the current market environment.

The Exchange has not itself experienced the increase in the number of reverse stock splits that Nasdaq described in its filings. Nevertheless, the Exchange proposes to adopt similar changes at the request of market participants who say that they would benefit from a consistent approach across exchanges with respect to regulatory halt rules around reverse stock splits. The Exchange believes that harmonizing its rules with Nasdaq's in this area would enhance investor protection and maintain fair and orderly markets by minimizing the chance that market participants might make erroneous trades in a security because they were unaware that it had undergone a reverse stock split.

Accordingly, the Exchange proposes to adopt amendments to its trading halt rules to require the Exchange to declare a regulatory halt in trading before the end of after-hours trading on the day immediately before the market effective date of a reverse stock split, and to open the security on the market effective date of a reverse stock split with a Trading Halt Auction[5] starting at 9:30 a.m., at the start of the Exchange's Core Trading Session.[6] This proposed change is modeled on the recently-approved Nasdaq rule.

This change would help reduce the potential for market participants' misunderstanding of the impact on the value of the issuer' securities resulting from investors' lack of advance knowledge of the reverse stock split, as well as errors resulting in a material effect on the market resulting from market participants' processing of the reverse stock split, including incorrect adjustment or entry of orders.

Proposed Amendment to Rule 123D

The Exchange currently processes reverse stock splits overnight, with the security available for trading on other markets at 4:00 a.m.[7] on a split-adjusted basis. Market participants have recently expressed concerns with allowing trading on an adjusted basis during those early trading sessions, noting that it is not optimal because system errors or problems with orders may go unnoticed for a period of time when a security that has undergone a reverse stock split opens for trading with the other thousands of securities. These errors have the potential to adversely affect investors, market participants, and the issuer. For example, problems

[50] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Securities Exchange Act Release No. 98878 (November 7, 2023) (SR–NASDAQ–2023–036) (approving halt provisions with respect to reverse stock splits).

[5] The term ''Trading Halt Auction'' is defined in Rule 7.35(a)(1)(B) as an auction ''that reopens trading following a trading halt or pause.'' The Trading Halt Auction would be effectuated by the security's designated market maker (''DMM'') pursuant to Rule 7.35A (DMM-Facilitated Core Open and Trading Halt Auctions). An Exchange-listed security that opens trading for the day with a Trading Halt Auction would not undergo a Core Open Auction (defined in Rule 7.35(a)(1)(A)).

[6] The term ''Core Trading Session'' is defined in Rule 7.34(a)(2).

[7] All times referred to in this filing are Eastern Time.

in connection with the processing of a reverse stock split could result in a broker executing trades selling more shares than customers held in their accounts, resulting in a temporary short position.

As such, the Exchange believes it is appropriate to impose a regulatory halt, which would prohibit pre-market trading immediately after a reverse stock split, and to re-open trading in such securities using a Trading Halt Auction. These changes would allow the Exchange and market participants to better detect any errors or problems with orders for the security resulting from the reverse stock split before trading in the security begins and thereby avoid any material effect on the market.

The Exchange proposes to add new subparagraph (f) to Rule 123D, which would provide that the Exchange will halt trading in a security for which the Exchange is the Primary Listing Market [8] before the end of post-market trading on other markets on the day immediately before the market effective date of a reverse stock split. Such a trading halt due to a reverse stock split would be mandatory pursuant to proposed Rule 123D(f). In general, the Exchange expects to initiate the halt at 7:50 p.m., prior to the end of post-market trading on other markets at 8:00 p.m. on the day immediately before the split is effective.[9]

Proposed Rule 123D(f) would further provide that trading in the security will resume with a Trading Halt Auction starting at 9:30 a.m.[10] on the day the reverse stock split is effective.[11] The Exchange believes that this halt and delayed opening [12] would give sufficient time for investors to review their orders and the quotes for the security and allow market participants to ensure that their systems have properly adjusted for the reverse stock split.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[13] in general, and furthers the objectives of Section 6(b)(5) of the Act,[14] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposal removes impediments to and perfects the mechanism of a free and open market and a national market system and protects investors and the public interest. The Exchange is proposing these changes at the request of market participants who say that they would benefit from a consistent approach across exchanges with respect to regulatory halt rules around reverse stock splits. As such, the Exchange believes that harmonizing its rules with Nasdaq's in this area would enhance investor protection and maintain fair and orderly markets by minimizing the chance that market participants might make erroneous trades in a security because they were unaware that it had undergone a reverse stock split.

The Exchange believes that its proposed rule change establishing a reverse stock split trading halt rule would protect investors by giving the Exchange non-discretionary authority to act in situations where it is necessary to maintain fair and orderly markets, such as when a security is subject to a reverse stock split and companies have not updated their systems to account for the new stock price. It would also ensure that the process for resuming trading following a reverse stock split halt is consistent with other types of halts initiated by the Exchange. Currently, none of the Exchange's rules provide authority to pre-emptively halt the trading in a security undergoing a significant corporate action that could lead to investor or market confusion.

The Exchange believes that the proposed amendments would provide greater transparency and clarity with respect to the manner in which trading would be halted due to a reverse stock split, and the process through which that halt would be implemented and terminated. Particularly, the Exchange would not have discretion in determining whether to declare a trading halt in a security following the declaration of a reverse stock split. Rather, following the reverse stock split of a security for which the Exchange is the Primary Listing Market, trading in the security would halt prior to the close of the post-market trading session on other markets on the day immediately before the market effective date of the reverse stock split. The Exchange also believes it is appropriate

[8] The term ''Primary Listing Market'' is defined in Section XI(a)(i)(H) of the CTA Plan as ''the national securities exchange on which an Eligible Security is listed. If an Eligible Security is listed on more than one national securities exchanges, Primary Listing Market means the exchange on which the security has been listed the longest.''

[9] It is the Exchange's policy not to halt a security after 4:00 p.m. in advance of a material news disclosure by a listed company, but the Exchange does implement regulatory halts after 4:00 p.m. when necessary for other reasons. In the case of a security undergoing a reverse stock split, initiating the halt at approximately 7:50 p.m. would provide the Exchange with a limited buffer to ensure that trading in a security that is undergoing a reverse stock split would not continue after the end of post-market trading. While the Exchange does not anticipate halting a security that undergoes a reverse stock split sooner than 7:50 p.m., the Exchange may halt trading earlier than 7:50 p.m. for other reasons as described elsewhere in Rule 123D or Rule 7.18. The Exchange would provide notice of the halt through the SIP and on the Exchange's trading halt web page at *https://www.nyse.com/trade-halt.*

[10] The Exchange's affiliates NYSE American LLC (''NYSE American'') and NYSE Arca, Inc. (''NYSE Arca'') have each filed similar rule changes proposing to re-open a security subject to a reverse stock split trading halt with a Trading Halt Auction that would take place at 9:00 a.m., thirty minutes before the Core Trading Session would start. *See* SR–NYSEAMER–2024–24 and SR–NYSEARCA–2024–29. Both NYSE American and NYSE Arca have Early Trading Sessions, and thus the 9:00 a.m. Trading Halt Auction would take place while trading on those exchanges is already in progress. *See* NYSE American Rule 7.34E(a)(1) and NYSE Arca Rule 7.34–E(a)(1) (defining ''Early Trading Session''). Because the Exchange does not have an early trading session for securities for which it is the Primary Listing Market, the Exchange instead proposes that a security subject to a reverse stock split trading halt would re-open with a Trading Halt Auction starting at 9:30 a.m., at the start of the Exchange's Core Trading Session. The Exchange believes that re-opening the security with a Trading Halt Auction starting at 9:30 a.m. would promote fair and orderly trading because it would provide market participants and the Exchange ample opportunity to notice errors or problems with orders for the security due to the reverse stock split. In addition, the Exchange believes that re-opening the security with a Trading Halt Auction starting at 9:30 a.m. (instead of at 9:00 a.m. as on NYSE American and NYSE Arca) would promote fair and orderly trading because it would follow the Exchange's usual opening process for securities that are re-opening at the start of the Core Trading Session after a regulatory halt. The Exchange believes that this approach is preferable to creating an entirely new trading session commencing at 9:00 a.m. solely for the re-opening of securities listed on the Exchange subject to a regulatory halt in advance of a reverse stock split, which the Exchange believes would cause confusion among market participants.

[11] The Exchange may change the resumption time if, for example, there was ''Extraordinary Market Activity,'' as defined in the CTA Plan, that could interfere with a fair and orderly resumption at the start of Core Trading Hours. The Exchange will provide notice of the re-opening of the security through the SIP and on the Exchange's trading halt web page at *https://www.nyse.com/trade-halt.*

[12] Trading in a security that has undergone a reverse stock split would have a delayed opening because following the reverse stock split, the security would not be available for early-session trading at 4:00 a.m. on away markets, but would instead re-open with a Trading Halt Auction at the start of the Core Trading Session. Orders that have been entered for execution prior to the Trading Halt Auction and not canceled would be eligible to execute in the Trading Halt Auction.

[13] 15 U.S.C. 78f(b).

[14] 15 U.S.C. 78f(b)(5).

to re-open the security with a Trading Halt Auction on the effective date of the reverse stock split because doing so would give the Exchange and market participants an opportunity to identify any orders in a security that has undergone a reverse stock split that have not correctly adjusted to the security's new stock price. The proposed changes seek to achieve consistency with respect to the initiation and termination of a trading halt with respect to securities that have undergone a reverse stock split, while maintaining a fair and orderly market, protecting investors, and protecting the public interest.

Additionally, the Exchange believes that establishing a mandatory trading halt for securities that have undergone a reverse stock split and resuming trading thereafter promotes fair and orderly markets and the protection of investors because it allows the Exchange to protect the broader interests of the national market system and addresses potential concerns that system errors may affect immediate trading in those securities. The Exchange believes that given the increase in companies effecting reverse stock splits, the proposal would help the Exchange reduce the potential for errors resulting in a material effect on the market resulting from market participants' processing of the reverse stock split, including incorrect adjustment or entry of orders.

The Exchange further believes that re-opening a security subject to a reverse stock split with a Trading Halt Auction starting at 9:30 a.m. would promote fair and orderly trading because it would provide market participants and the Exchange ample opportunity to notice errors or problems with orders for the security due to the reverse stock split. In addition, the Exchange believes that re-opening the security with a Trading Halt Auction starting at 9:30 a.m. (instead of at 9:00 a.m. as on NYSE American and NYSE Arca) [15] would promote fair and orderly trading because it would follow the Exchange's usual opening process for securities that are re-opening at the start of the Core Trading Session after a regulatory halt. The Exchange believes that this approach is preferable to creating an entirely new trading session commencing at 9:00 a.m. solely for the re-opening of securities listed on the Exchange subject to a regulatory halt in advance of a reverse stock split, which the Exchange believes would cause confusion among market participants.

Based on the foregoing, the Exchange believes that the proposal is consistent with the Act because it would promote just and equitable principles of trade and would remove any impediments to a free and open market and a national market system by allowing sufficient time for investors to review their orders and the quotes for a security that has undergone a reverse stock split, and allow market participants to ensure that their systems have properly accounted for the reverse stock split. As discussed previously, the Exchange believes that the proposed amendments establishing the authority and process for reverse stock split trading halts and the resumption of trading is consistent with the Act, which itself imposes obligations on exchanges with respect to issuers that are listed.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposal will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of Section 6(b)(8) of the Act.[16]

The Exchange believes that the proposal will not impose a burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed rule change is designed to protect investors and facilitate a fair and orderly market, which are both important purposes of the Act. To the extent that there is any impact on intermarket competition, it is incidental to these objectives. In addition, at least one other exchange (Nasdaq) has already adopted a substantially similar rule. The Exchange believes that harmonizing its rules with Nasdaq's in this area would minimize the chance that market participants might make erroneous trades in a security because they were unaware that it had undergone a reverse stock split.

The Exchange does not believe that the proposed rule change imposes a burden on intra-market competition because the provisions apply to all market participants and issuers on the Exchange equally. In addition, information regarding the timing of reverse stock splits and the halting and resumption of trading in connection with the effecting of reverse splits would be disseminated using several freely-accessible sources to ensure the broad availability of this information.

In addition, the proposal includes provisions related to the declaration and timing of trading halts and the resumption of trading that are designed to prevent any advantage to those who can react more quickly than other market participants.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [17] and Rule 19b–4(f)(6) thereunder.[18] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[19]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [20] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[15] *See supra* note 10.

[16] 15 U.S.C. 78f(b)(8).

[17] 15 U.S.C. 78s(b)(3)(A)(iii).

[18] 17 CFR 240.19b–4(f)(6).

[19] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSE–2024–22 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSE–2024–22. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSE–2024–22 and should be submitted on or before May 14, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99983; File No. SR–CboeEDGA–2024–014]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fees Schedule Regarding Dedicated Cores

April 17, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 12, 2024, Cboe EDGA Exchange, Inc. (the ''Exchange'' or ''EDGA'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGA Exchange, Inc. (the ''Exchange'' or ''EDGA Equities'') proposes to amend its Fees Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/edga/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule to amend the fees and increase the maximum cap for Dedicated Cores.[3]

By way of background, the Exchange recently began to allow Users [4] to assign a Single Binary Order Entry (''BOE'') logical order entry port [5] to a single dedicated Central Processing Unit (CPU Core) (''Dedicated Core''). Historically, CPU Cores had been shared by logical order entry ports (*i.e.,* multiple logical ports from multiple firms may connect to a single CPU Core). Use of Dedicated Cores however, can provide reduced latency, enhanced throughput, and improved performance since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core instead of sharing that power with other firms. This offering is completely voluntary and is available to all Users that wish to purchase Dedicated Cores. Users may utilize BOE logical order entry ports on shared CPU Cores, either in lieu of, or in addition to, their use of Dedicated Core(s). As such, Users are able to operate across a mix of shared and dedicated CPU Cores which the Exchange believes provides additional risk and capacity management. Further, Dedicated Cores are not required nor necessary to participate on the Exchange and as such Users may opt not to use Dedicated Cores at all.

The Exchange currently assesses the following monthly fees for those Users that wish to use Dedicated Cores: $650 per Dedicated Core for the first 3 Dedicated Cores; $1,050 per Dedicated Core for the 4th–6th Dedicated Cores; and $1,450 per Dedicated Core for 7 or more Dedicated Cores. The proposed fees are progressive and are assessed and applied in their entirety and are not

[3] The Exchange initially filed the proposed rule change on April 1, 2024 (SR–CboeEDGA–2024–012). On April 12, 2024, the Exchange withdrew that filing and submitted this filing.

[4] A User may be either a Member or Sponsored Participant. The term ''Member'' shall mean any registered broker or dealer that has been admitted to membership in the Exchange, limited liability company or other organization which is a registered broker or dealer pursuant to Section 15 of the Act, and which has been approved by the Exchange. A Sponsored Participant may be a Member or non-Member of the Exchange whose direct electronic access to the Exchange is authorized by a Sponsoring Member subject to certain conditions. See Exchange Rule 11.3.

[5] Users may currently connect to the Exchange using a logical port available through an application programming interface (''API''), such as the Binary Order Entry (''BOE'') protocol. A BOE logical order entry port is used for order entry.

prorated. The monthly Dedicated Core fees are in addition to the standard per port fee assessed to Users for the BOE Logical Port(s) ports assigned to the Dedicated Core(s).[6] The Exchange notes the current standard fees assessed for BOE Logical Ports, whether used with Dedicated or shared CPU cores, are applicable and unchanged.[7]

Since the Exchange currently has finite amount of space in its data centers in which its servers (and therefore corresponding CPU Cores) are located, the Exchange has also prescribed a maximum limit on the number of Dedicated Cores that Users may purchase each month. Particularly, the Exchange currently provides that Members are limited to a maximum number of 10 Dedicated Cores and Sponsoring Members are limited to a maximum number of 4 Dedicated Cores for each of their Sponsored Access relationships.[8] The purpose of establishing these limits is to manage the allotment of Dedicated Cores in a fair manner and to prevent the Exchange from being required to expend large amounts of resources in order to provide an unlimited number of Dedicated Cores.

The Exchange now proposes to amend these fees and maximum limits. First the Exchange proposes to provide up to two Dedicated Cores to all Users who wish to use Dedicated Cores, at no additional cost. The Exchange also proposes to amend the Fees such that it proposes to charge: $650 per Dedicated Core for 3–10 Dedicated Cores; $850 per Dedicated Core for 11–15 Dedicated Cores; and $1,050 per Dedicated Core for 16 or more Dedicated Cores. The Exchange notes the proposed fees will continue to be progressive and the Exchange proposes to update the current example in the fees schedule to maintain clarity as to how they are applied.[9]

The Exchange also proposes to increase the current maximum number of Dedicated Cores that Users may purchase. In particular, the Exchange continually monitors market participant demand and resource availability and endeavors to adjust the limit if and when the Exchange is able to accommodate additional CPU Cores (including Dedicated Cores). In response to market participant demand and the ability to now accommodate additional Dedicated Cores, the Exchange is proposing to double the current maximum of Dedicated Cores that Users may purchase. Particularly, the Exchange proposes to provide that Members will be limited to a maximum number of 20 Dedicated Cores [10] and Sponsoring Members will be limited to a maximum number of 8 Dedicated Cores for each of their Sponsored Access relationships.[11] The Exchange notes that it will continue monitoring Dedicated Core interest by all Users and allotment availability with the goal of increasing these limits to meet Users' needs.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[12] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [13] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [14] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4) [15] of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities.

The Exchange believes the proposed changes are reasonable because they provide any Users who wishes to utilize Dedicated Cores up to two Dedicated Cores at no additional cost. Additionally, the proposed changes generally result in reduced fees for Users. For example, only the first three Dedicated Cores are currently assessed the lower $650 per Dedicated Core rate and Dedicated Core quantities above 3 are assessed a higher rate of either $1,050 or $1,450, depending on how many Dedicated Cores a User purchased. As proposed, Users not only get the first two Dedicated Cores for free, but up to 8 additional Dedicated Cores at the lower $650 rate. The Exchange also proposes to reduce the fee rates for the next two tiers as well (*i.e.,* $850 per Dedicated Cores for 11–15 Dedicated Cores and $1,050 for 16–20 Dedicated Cores).

The Exchange also believes the proposed fees are reasonable as Dedicated Cores provide a valuable service that can provide reduced latency, enhanced throughput, and improved performance compared to use of a shared CPU Core since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core. Dedicated Cores continue to not be necessary for trading and as noted above, are entirely optional. Indeed, Users can continue to access the Exchange through shared CPU Cores at no additional cost. Depending on a firm's specific business needs, the proposal enables Users to choose to use Dedicated Cores in lieu of, or in addition to, shared CPU Cores (or as noted, not use Dedicated Cores at all). The Exchange believes the proposal to operate across a mix of shared and dedicated CPU Cores may further provide additional risk and capacity management. If a User finds little benefit in having Dedicated Cores however, or determines Dedicated Cores

[6] The Exchange currently assesses $550 per port per month. *See* Cboe EDGA Equities Fee Schedule.

[7] *See* Cboe U.S. Equities Fees Schedules, EDGA Equities, Logical Port Fees.

[8] The Exchange announced the initial limit via Exchange Notice which was issued on January 29, 2024. *https://cdn.cboe.com/resources/release_notes/2024/Cboe-Global-Markets-to-Introduce-Cboe-Dedicated-Cores-for-EDGA-Equities.pdf.*

[9] Particularly, the Exchange will provide that if a User were to purchase 11 Dedicated Cores, it will be charged a total of $6,050 per month ($0 * 2 + $650 * 8 + $850 * 1).

[10] The prescribed maximum quantity of Dedicated Cores for Members applies regardless of whether that Member purchases the Dedicated Cores directly from the Exchange and/or through a Service Bureau. In a Service Bureau relationship, a customer allows its MPID to be used on the ports of a technology provider, or Service Bureau. One MPID may be allowed on several different Service Bureaus.

[11] The fee tier(s) applicable to Sponsoring Members are determined on a per Sponsored Access relationship basis and not on the combined total of Dedicated Cores across Sponsored Users. For example, under the proposed changes, a Sponsoring Member that has two Sponsored Access relationships is entitled to a total of 16 Dedicated Cores for those 2 Sponsored Access relationships but would be assessed fees separately based on the 8 Dedicated Cores for each Sponsored User (instead of combined total of 16 Dedicated Core). For example, a Sponsoring Member with 2 Sponsored Access relationships would be provided 2 Dedicated Cores at no additional cost for each Sponsored User under Tier 1 (total of 4 Dedicated Cores at no additional cost) and provided an additional 6 Dedicated Cores for each Sponsored User under Tier 2 (total 12 Dedicated Cores) at $650 per month.

[15] 15 U.S.C. 78f(b)(4).

are not cost-efficient for its needs or does not provide sufficient value to the firm, such User may continue its use of the shared CPU Cores, unchanged or determine not to purchase additional Dedicated Cores. Indeed, the Exchange has no plans to eliminate shared CPU Cores nor to require Users to purchase Dedicated Cores.

The Exchange also believes that the proposed Dedicated Core fees are equitable and not unfairly discriminatory because they continue to be assessed uniformly to similarly situated users in that all Users who choose to purchase Dedicated Cores will be subject to the same proposed tiered fee schedule. Further all Users are entitled to up to 2 Dedicated Cores at no additional cost. The Exchange believes the proposed ascending fee structure is also reasonable, equitable and not unfairly discriminatory as it is designed so that firms that use a higher allotment of the Exchange's finite number of Dedicated Cores pay higher rates, rather than placing that burden on market participants that have more modest needs who will have the flexibility of obtaining Dedicated Cores at lower price points in the lower tiers. As such, the proposed fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the ascending fee structure reflects the resources consumed by the various needs of market participants—that is, the lowest Dedicated Core consuming Users pay the least, and highest Dedicated Core consuming Users pay the most. Other exchanges similarly assess higher fees to those that consume more Exchange resources.[16] It's also designed to encourage firms to manage their needs in a fair manner and to prevent the Exchange from being required to expend large amounts of resources in order to provide an additional number of Dedicated Cores.

The Exchange also believes it's reasonable, equitable and not unfairly discriminatory to increase the maximum number of Dedicated Cores permitted because Users will be able to avail themselves of additional Dedicated Cores should they so choose. As noted above, the Exchange continually monitors market participant demand and resource availability with the goal to increase the Dedicated Cores limits to meet Users' needs if and when the Exchange is able to do so. The Exchange proposes to increase the limits for Dedicated Cores based on recent market participant demand and the ability to accommodate additional Dedicated Cores as compared to when the Exchange first launched Dedicated Cores. The Exchange notes that it's reasonable to still maintain a maximum number of Dedicated Cores Users can purchase because the Exchange continues to have a finite amount of space in its data centers. The proposed limits also apply uniformly to similarly situated market participants (*i.e.* all Members are subject to the same Exchange-prescribed limit and all Sponsored Participants are subject to the same Exchange-prescribed limit, respectively). The Exchange believes it's not unfairly discriminatory to provide for different limits for different types of users. For example, the Exchange believes it's not unfairly discriminatory to provide for an initial lower limit to be allocated for Sponsored Participants because unlike Members, Sponsored Participants are able to access the Exchange without paying a Membership Fee. Members also have more regulatory obligations and risk that Sponsored Participants do not. For example, while Sponsored Participants must agree to comply with the Rules of the Exchange, it is the Sponsoring Member of that Sponsored Participant that remains ultimately responsible for all orders entered on or through the Exchange by that Sponsored Participant. The industry also has a history of applying fees differently to Members as compared to Sponsored Participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary in furtherance of the purposes of the Act because the proposed tiered fee structure will apply equally to all similarly situated Users that choose to use Dedicated Cores. As discussed above, Dedicated Cores are optional and Users may choose to utilize Dedicated Cores, or not, based on their views of the additional benefits and added value provided by utilizing a Dedicated Core. The Exchange believes the proposed fee will be assessed proportionately to the potential value or benefit received by Users with a greater number of Dedicated Cores and notes that Users may determine at any time to cease using Dedicated Cores. As discussed, Users can also continue to access the Exchange through shared CPU Cores at no additional cost. Finally, all Users will be entitled to two Dedicated Cores at no additional cost.

Next, the Exchange believes the proposed rule change does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market, including competition for exchange memberships. Market Participants have numerous alternative venues that they may participate on, including 15 other equities exchanges, as well as off-exchange venues, where competitive products are available for trading. Indeed, participants can readily choose to submit their order flow to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [17] The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition* v. *Securities and Exchange Commission*, the D.C. Circuit stated as follows: ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .''.[18] Accordingly, the Exchange does not believe its proposed change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

[16] See also Cboe U.S. Options Fees Schedule, BZX Options, Options Logical Port Fees, Ports with Bulk Quoting Capabilities.

[17] See Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005).

[18] *NetCoalition* v. *SEC*, 615 F.3d 525, 539 (D.C. Cir. 2010) (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSEArca–2006–21)).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [19] and paragraph (f) of Rule 19b–4 [20] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeEDGA–2024–014 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeEDGA–2024–014. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeEDGA–2024–014 and should be submitted on or before May 14, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99978; File No. SR–CBOE–2024–020]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Short Term Options Series Program in Rule 4.5(d)

April 17, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 15, 2024, Cboe Exchange, Inc. (''Exchange'' or ''Cboe Options'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') proposes to amend the Short Term Options Series Program in Rule 4.5(d). The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Short Term Option Series Program in Rule 4.5(d) (Series of Options Contracts Open for Trading). Specifically, the Exchange proposes to expand the Short Term Option Series program to permit the listing and trading of options series with Tuesday and Thursday expirations for options on iShares Russell 2000 ETF (''IWM''), specifically permitting two expiration dates for the proposed Tuesday and Thursday expirations in IWM.

Currently, Table 1 in Rule 4.5(d) specifies each symbol that qualifies as a Short Term Option Daily Expiration.[5] Today, Table 1 permits the listing and trading of Monday Short Term Option

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

[5] The Exchange may open for trading on any Thursday or Friday that is a business day series of options on that class that expire at the close of business on each of the next five Fridays that are business days and are not Fridays in which standard expiration options series, Monthly Options Series, or Quarterly Options Series. Of these series of options, the Exchange may have no more than a total of five Short Term Option Expiration Dates. In addition, the Exchange may open for trading series of options on certain symbols that expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Short Term Option Daily Expirations''). See Rule 4.5(d).

Daily Expirations and Wednesday Short Term Option Daily Expirations for IWM. At this time, the Exchange proposes to expand the Short Term Option Series Program to permit the listing and trading of no more than a total of two IWM Short Term Option Daily Expirations beyond the current week for each of Monday, Tuesday, Wednesday, and Thursday expirations at one time.[6] The listing and trading of Tuesday and Thursday Short Term Option Daily Expirations would be subject to Rule 4.5(d).

Today, Tuesday Short Term Option Daily Expirations in SPDR S&P 500 ETF Trust (''SPY'') and the INVESCO QQQ TrustSM, Series 1 (''QQQ'') may open for trading on any Monday or Tuesday that is a business day series of options on the symbols provided in Table 1 that expire at the close of business on each of the next two Tuesdays that are business days and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Tuesday Short Term Option Expiration Date'').[7] Also, today, Thursday Short Term Option Daily Expirations in SPY and QQQ may open for trading on any Tuesday or Wednesday that is a business day series of options on the symbols provided in Table 1 that expire at the close of business on each of the next two Wednesdays that are business days and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Wednesday Short Term Option Expiration Date'').[8]

In the event that options on IWM expire on a Tuesday or Thursday and that Tuesday or Thursday is a business day in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire, the Exchange would skip that week's listing and instead list the following week; the two weeks would therefore not be consecutive. With this proposal, the Exchange would be able to open for trading series of options on IWM that expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire.[9]

The interval between strike prices for the proposed Tuesday and Thursday IWM Short Term Option Daily Expirations will be the same as those for Tuesday and Thursday IWM Short Term Option Daily Expirations in SPY and QQQ, applicable to the Short Term Option Series Program.[10] Rule 4.5, Interpretation and Policy .07(b) provides that, notwithstanding any Rule 4.5, Interpretation and Policy .01 and Interpretation and Policy .07(a), the interval of strike prices on options on IWM will be $1 or greater.[11] Further, Rule 4.5, Interpretation and Policy .15 [sic] provides that, notwithstanding Rule 4.5, Interpretation and Policy .01, the Exchange may open for trading series at $0.50 or greater strike price intervals where the strike price is less than $75 and $1.00 [sic]. Specifically, the Tuesday and Thursday IWM Short Term Option Daily Expirations will have a $0.50 strike interval minimum. As is the case with other equity options series listed pursuant to the Short Term Option Series Program, the Tuesday and Thursday IWM Short Term Option Daily Expiration series will be P.M.-settled.

Pursuant to Rule 4.5(d), with respect to the Short Term Option Series Program, a Tuesday or Thursday expiration series shall expire on the first business day immediately prior to that Tuesday or Thursday, *e.g.,* Monday or Wednesday of that week, respectively, if the Tuesday or Thursday is not a business day.

Currently, for each option class eligible for participation in the Short Term Option Series Program, the Exchange is limited to opening thirty (30) series for each expiration date for the specific class.[12] The thirty (30) series restriction does not include series that are open by other securities exchanges under their respective weekly rules; the Exchange may list these additional series that are listed by other options exchanges.[13] This thirty (30) series restriction would apply to Tuesday and Thursday IWM Short Term Option Daily Expiration series as well. With this proposal, Tuesday and Thursday IWM Expirations would be treated the same as Tuesday and Thursday Expirations in SPY and QQQ. With respect to monthly option series, Short Term Option Daily Expirations expire in the same week in which monthly option series on the same class expire.[14] Further, as is the case today with other Tuesday and Thursday Short Term Option Daily Expirations, the Exchange would not permit Tuesday and Thursday Short Term Option Daily Expirations to expire on a business day in which monthly options series or Quarterly Options Series expire.[15] Therefore, all Short Term Option Daily Expirations would expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire. The Exchange does not believe that any market disruptions will be encountered with the introduction of P.M.-settled Tuesday and Thursday IWM Short Term Option Daily Expirations. The Exchange has the necessary capacity and surveillance programs in place to support and properly monitor trading in the proposed Tuesday and Thursday Short Term Option Daily Expirations. The Exchange currently trades P.M.-settled Short Term Option Series that expire Tuesday and Thursday for SPY and QQQ and has not experienced any market disruptions nor issues with capacity. Today, the Exchange has surveillance programs in place to support and properly monitor trading in Short Term Option Series that expire Tuesday and Thursday for SPY and QQQ.

Impact of Proposal

The Exchange notes that listings in the Short Term Option Series Program comprise a significant part of the standard listing in options markets. The below table sets forth the percentage of weekly listings as compared to monthly, quarterly, and Long-Term Option Series in 2023 in the options industry.[16] The Exchange notes that during this time period all options exchanges mitigated weekly strike intervals.

[6] The Exchange would amend the Tuesday and Thursday expirations for IWM in Table 1 in Rule 4.5(d) from ''0'' to ''2'' to permit Tuesday and Thursday expirations for options on IWM listed pursuant to the Short Term Option Series.

[7] *See* Rule 4.5(d).

[8] *Id.*

[9] Today, IWM may trade on Mondays and Wednesdays, in addition to Fridays, as is the case for all options series.

[10] *See* Rule 4.5(d)(5).

[11] Options on Units of the Standard & Poor's Depository Receipts Trust (''SPY''), iShares Core S&P 500 ETF (''IVV''), PowerShares QQQ Trust (''QQQ''), and the SPDR Dow Jones Industrial Average ETF (''DIA'') are also subject to Rule 4.5, Interpretation and Policy .07(b) strike intervals.

[12] *See* Rule 4.5(d)(1).

[13] *See* Rule 4.5(d)(1).

[14] *See* Rule 4.5(d)(2).

[15] *See* Rule 4.5(d).

[16] Per Nasdaq ISE, LLC (''Nasdaq ISE''), this information was sourced from The Options Clearing Corporation (''OCC''). The information includes time averaged data for all 17 options markets through December 8, 2023. *See* Securities Exchange Act Release No. 99604 (February 26, 2024), 89 FR 15235 (March 1, 2024) (SR–ISE–2024–06).

NUMBER OF STRIKES—2023

Expiration	Percent of total series (percent)
Monthly	62.82
Weekly	17.22
LEAP	17.77
Quarterly	2.20

Similar to SPY and QQQ, the Exchange would limit the number of Short Term Option Daily Expirations for IWM to two expirations for Tuesday and Thursday expirations while expanding the Short Term Option Series Program to permit Tuesday, and Thursday expirations for IWM. Expanding the Short Term Option Series Program to permit the listing of Tuesday and Thursday expirations in IWM will account for the addition of 6.77% of strikes for IWM.[17] With respect to the impact to the Short Term Option Series Program on IWM overall, the impact would be a 20% increase in strikes.[18] With respect to the impact to the Short Term Options Series Program overall, the impact would be a 0.1% increase in strikes.[19] Trading Permit Holders will continue to be able to expand hedging tools because all days of the week would be available to permit Trading Permit Holders to tailor their investment and hedging needs more effectively in IWM.

NUMBER OF STRIKES—2023

Expiration	Percent of total series (percent)
Monthly	35.13
Weekly	48.30
LEAP	12.87
Quarterly	3.70

Weeklies comprise 48.30% of the total volume of options contracts.[20] The Exchange believes that inner weeklies (first two weeks) represent high volume as compared to outer weeklies (the last three weeks) and would be more attractive to market participants. The introduction of IWM Tuesday and Thursday expirations will, among other things, expand hedging tools available to market participants and continue the reduction of the premium cost of buying protection. The Exchange believes that IWM Tuesday and Thursday expirations will allow market participants to purchase IWM options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[21] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[22] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[23] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that IWM Tuesday and Thursday Short Term Daily Expirations will allow market participants to purchase IWM options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively. Further, the proposal to permit Tuesday and Thursday Short Term Daily Expirations for options on IWM listed pursuant to the Short Term Option Series Program, subject to the proposed limitation of two nearest expirations, would protect investors and the public interest by providing the investing public and other market participants more flexibility to closely tailor their investment and hedging decisions in IWM options, thus allowing them to better manage their risk exposure. In particular, the Exchange believes the Short Term Option Series Program has been successful to date and that Tuesday and Thursday IWM Short Term Daily Expirations should simply expand the ability of investors to hedge risk against market movements stemming from economic releases or market events that occur throughout the month in the same way that the Short Term Option Series Program has expanded the landscape of hedging. Similarly, the Exchange believes Tuesday and Thursday IWM Short Term Daily Expirations should create greater trading and hedging opportunities and provide customers the flexibility to tailor their investment objectives more effectively. The Exchange currently lists SPY and QQQ Tuesday and Thursday Short Term Daily Expirations.[24]

With this proposal, Tuesday and Thursday IWM Expirations would be treated similar to existing Tuesday and Thursday SPY and QQQ Expirations and would expire in the same week that standard monthly options expire on Fridays.[25] Further, today, Tuesday and Thursday Short Term Option Daily Expirations do not expire on a business day in which monthly options series or Quarterly Options Series expire.[26] Today, all Short Term Option Daily Expirations expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days and are not business days in which monthly options series or Quarterly Options Series expire. There are no material differences in the treatment of Tuesday and Thursday SPY and QQQ Short Term Daily Expirations as compared to the proposed Tuesday and Thursday IWM Short Term Daily Expirations.

Finally, the Exchange represents that it has an adequate surveillance program in place to detect manipulative trading in the proposed Tuesday and Thursday IWM Short Term Daily Expirations, in the same way that it monitors trading in the current Short Term Option Series and trading in Tuesday and Thursday SPY and QQQ Expirations. The Exchange also represents that it has the necessary systems capacity to support the new options series. Finally, the Exchange does not believe that any market disruptions will be encountered with the introduction of Tuesday and Thursday IWM Short Term Daily Expirations.

[18] Nasdaq ISE sourced this information, which are estimates, from LiveVol®. The information includes data for all 17 options markets as of January 3, 2024. *See id.*

[19] Nasdaq ISE sourced this information, which are estimates, from LiveVol®. The information includes data for all 17 options markets as of January 3, 2024. *See id.*

[20] This table sets forth industry volume. Weeklies comprise 48.30% of volume while only comprising 17.22% of the strikes. Nasdaq ISE sourced this information from OCC. The information includes data for all 17 options markets through December 8, 2023. *See* Securities Exchange Act Release No. 99604 (February 26, 2024), 89 FR 15235 (March 1, 2024) (SR–ISE–2024–06).

[21] 15 U.S.C. 78f(b).

[22] 15 U.S.C. 78f(b)(5).

[23] *Id.*

[24] *See* Rule 4.5(d).

[25] *See* Rule 4.5(d)(2).

[26] *See* Rule 4.5(d).

Finally, the Exchange notes the proposed rule change is substantively the same as a rule change proposed by ISE, which the Commission recently approved.[27]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Similar to SPY and QQQ Tuesday and Thursday Expirations, the introduction of IWM Tuesday and Thursday Short Term Daily Expirations does not impose an undue burden on competition. The Exchange believes that it will, among other things, expand hedging tools available to market participants and continue the reduction of the premium cost of buying protection. The Exchange believes that IWM Tuesday and Thursday Short Term Daily Expirations will allow market participants to purchase IWM options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively.

The Exchange does not believe the proposal will impose any burden on inter-market competition, as nothing prevents other options exchanges from proposing similar rules to list and trade Short-Term Option Series with Tuesday and Thursday Short Term Daily Expirations. The Exchange notes that having Tuesday and Thursday IWM expirations is not a novel proposal, as SPY and QQQ Tuesday and Thursday Expirations are currently listed on the Exchange.[28] Additionally, as noted above, the Commission recently approved a substantively identical proposal of another exchange.[29] Further, the Exchange does not believe the proposal will impose any burden on intramarket competition, as all market participants will be treated in the same manner under this proposal.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

[27] *See* Securities Exchange Act Release No. 99946 (April 11, 2024) (SR–ISE–2024–06).

[28] *See* Rule 4.5(d).

[29] *See* Securities Exchange Act Release No. 99946 (April 11, 2024) (SR–ISE–2024–06).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[30] and Rule 19b–4(f)(6) thereunder.[31] Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[32] and subparagraph (f)(6) of Rule 19b–4 thereunder.[33]

A proposed rule change filed under Rule 19b–4(f)(6)[34] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[35] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. According to the Exchange, the proposed rule change is a competitive response to a filing submitted by Nasdaq ISE that was recently approved by the Commission.[36] The Exchange has stated that waiver of the 30-day operative delay would permit the Exchange to implement the proposal at the same time as its competitor exchanges, thus creating competition among Short Term Option Series. The Commission believes that the proposed rule change presents no novel issues and that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[37]

[30] 15 U.S.C. 78s(b)(3)(A)(iii).

[31] 17 CFR 240.19b–4(f)(6).

[32] 15 U.S.C. 78s(b)(3)(A)(iii).

[33] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[34] 17 CFR 240.19b–4(f)(6).

[35] 17 CFR 240.19b–4(f)(6)(iii).

[36] See supra note 27.

[37] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CBOE–2024–020 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CBOE–2024–020. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available

publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CBOE–2024–020 and should be submitted on or before May 14, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[38]

Vanessa A. Countryman,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–99981; File No. SR–CboeEDGX–2024–022]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Short Term Options Series Program in Rule 19.6, Interpretation and Policy .05

April 17, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 15, 2024, Cboe EDGX Exchange, Inc. (''Exchange'' or ''EDGX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. (the ''Exchange'' or ''EDGX'') proposes to amend the Short Term Options Series Program in Rule 19.6, Interpretation and Policy .05. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/options/regulation/rule_filings/edgx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Short Term Option Series Program in Rule 19.6, Interpretation and Policy .05 (Series of Options Contracts Open for Trading). Specifically, the Exchange proposes to expand the Short Term Option Series program to permit the listing and trading of options series with Tuesday and Thursday expirations for options on iShares Russell 2000 ETF (''IWM''), specifically permitting two expiration dates for the proposed Tuesday and Thursday expirations in IWM.

Currently, Table 1 in Rule 19.6, Interpretation and Policy .05(h), specifies each symbol that qualifies as a Short Term Option Daily Expiration.[5] Today, Table 1 permits the listing and trading of Monday Short Term Option Daily Expirations and Wednesday Short Term Option Daily Expirations for IWM. At this time, the Exchange proposes to expand the Short Term Option Series Program to permit the listing and trading of no more than a total of two IWM Short Term Option Daily Expirations beyond the current week for each of Monday, Tuesday, Wednesday, and Thursday expirations at one time.[6] The listing and trading of Tuesday and Thursday Short Term Option Daily Expirations would be subject to Rule 19.6, Interpretation and Policy .05.

Today, Tuesday Short Term Option Daily Expirations in SPDR S&P 500 ETF Trust (''SPY'') and the INVESCO QQQ TrustSM, Series 1 (''QQQ'') may open for trading on any Monday or Tuesday that is a business day series of options on the symbols provided in Table 1 that expire at the close of business on each of the next two Tuesdays that are business days and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Tuesday Short Term Option Expiration Date'').[7] Also, today, Thursday Short Term Option Daily Expirations in SPY and QQQ may open for trading on any Tuesday or Wednesday that is a business day series of options on the symbols provided in Table 1 that expire at the close of business on each of the next two Wednesdays that are business days and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Wednesday Short Term Option Expiration Date'').[8]

In the event that options on IWM expire on a Tuesday or Thursday and that Tuesday or Thursday is a business day in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire, the Exchange would skip that week's listing and instead list the following week; the two weeks would therefore not be consecutive. With this proposal, the Exchange would be able to open for trading series of options on IWM that expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire.[9]

The interval between strike prices for the proposed Tuesday and Thursday

[38] 17 CFR 200.30–3(a)(12), (59).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

[5] The Exchange may open for trading on any Thursday or Friday that is a business day series of options on that class that expire at the close of business on each of the next five Fridays that are business days and are not Fridays in which standard expiration options series, Monthly Options Series, or Quarterly Options Series. Of these series of options, the Exchange may have no more than a total of five Short Term Option Expiration Dates. In addition, the Exchange may open for trading series of options on certain symbols that expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire (''Short Term Option Daily Expirations''). See Rule 19.6, Interpretation and Policy .05.

[6] The Exchange would amend the Tuesday and Thursday expirations for IWM in Table 1 Rule 19.6, Interpretation and Policy .05(h) from ''0'' to ''2'' to permit Tuesday and Thursday expirations for options on IWM listed pursuant to the Short Term Option Series.

[7] *See* Rule 19.6, Interpretation and Policy .05(h).

[8] *Id.*

[9] Today, IWM may trade on Mondays and Wednesdays, in addition to Fridays, as is the case for all options series.

IWM Short Term Option Daily Expirations will be the same as those for Tuesday and Thursday IWM Short Term Option Daily Expirations in SPY and QQQ, applicable to the Short Term Option Series Program.[10] Specifically, the Tuesday and Thursday IWM Short Term Option Daily Expirations will have a $0.50 strike interval minimum. As is the case with other equity options series listed pursuant to the Short Term Option Series Program, the Tuesday and Thursday IWM Short Term Option Daily Expiration series will be P.M.-settled.

Pursuant to Rule 19.6, Interpretation and Policy .05(h), with respect to the Short Term Option Series Program, a Tuesday or Thursday expiration series shall expire on the first business day immediately prior to that Tuesday or Thursday, *e.g.,* Monday or Wednesday of that week, respectively, if the Tuesday or Thursday is not a business day.

Currently, for each option class eligible for participation in the Short Term Option Series Program, the Exchange is limited to opening thirty (30) series for each expiration date for the specific class.[11] The thirty (30) series restriction does not include series that are open by other securities exchanges under their respective weekly rules; the Exchange may list these additional series that are listed by other options exchanges.[12] This thirty (30) series restriction would apply to Tuesday and Thursday IWM Short Term Option Daily Expiration series as well. With this proposal, Tuesday and Thursday IWM Expirations would be treated the same as Tuesday and Thursday Expirations in SPY and QQQ. With respect to monthly option series, Short Term Option Daily Expirations expire in the same week in which monthly option series on the same class expire.[13] Further, as is the case today with other Tuesday and Thursday Short Term Option Daily Expirations, the Exchange would not permit Tuesday and Thursday Short Term Option Daily Expirations to expire on a business day in which monthly options series or Quarterly Options Series expire.[14] Therefore, all Short Term Option Daily Expirations would expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days in which standard expiration options series, Monthly Options Series, or Quarterly Options Series expire. The Exchange does not believe that any market disruptions will be encountered with the introduction of P.M.-settled Tuesday and Thursday IWM Short Term Option Daily Expirations. The Exchange has the necessary capacity and surveillance programs in place to support and properly monitor trading in the proposed Tuesday and Thursday Short Term Option Daily Expirations. The Exchange currently trades P.M.-settled Short Term Option Series that expire Tuesday and Thursday for SPY and QQQ and has not experienced any market disruptions nor issues with capacity. Today, the Exchange has surveillance programs in place to support and properly monitor trading in Short Term Option Series that expire Tuesday and Thursday for SPY and QQQ.

Impact of Proposal

The Exchange notes that listings in the Short Term Option Series Program comprise a significant part of the standard listing in options markets. The below table sets forth the percentage of weekly listings as compared to monthly, quarterly, and Long-Term Option Series in 2023 in the options industry.[15] The Exchange notes that during this time period all options exchanges mitigated weekly strike intervals.

NUMBER OF STRIKES—2023

Expiration	Percent of total series (percent)
Monthly	62.82
Weekly	17.22
LEAP	17.77
Quarterly	2.20

Similar to SPY and QQQ, the Exchange would limit the number of Short Term Option Daily Expirations for IWM to two expirations for Tuesday and Thursday expirations while expanding the Short Term Option Series Program to permit Tuesday, and Thursday expirations for IWM. Expanding the Short Term Option Series Program to permit the listing of Tuesday and Thursday expirations in IWM will account for the addition of 6.77% of strikes for IWM.[16] With respect to the impact to the Short Term Option Series Program on IWM overall, the impact would be a 20% increase in strikes.[17] With respect to the impact to the Short Term Options Series Program overall, the impact would be a 0.1% increase in strikes.[18] Members will continue to be able to expand hedging tools because all days of the week would be available to permit Members to tailor their investment and hedging needs more effectively in IWM.

NUMBER OF STRIKES—2023

Expiration	Percent of total series (percent)
Monthly	35.13
Weekly	48.30
LEAP	12.87
Quarterly	3.70

Weeklies comprise 48.30% of the total volume of options contracts.[19] The Exchange believes that inner weeklies (first two weeks) represent high volume as compared to outer weeklies (the last three weeks) and would be more attractive to market participants. The introduction of IWM Tuesday and Thursday expirations will, among other things, expand hedging tools available to market participants and continue the reduction of the premium cost of buying protection. The Exchange believes that IWM Tuesday and Thursday expirations will allow market participants to purchase IWM options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[20] Specifically, the Exchange believes the proposed rule

[19] This table sets forth industry volume. Weeklies comprise 48.30% of volume while only comprising 17.22% of the strikes. Nasdaq ISE sourced this information from OCC. The information includes data for all 17 options markets through December 8, 2023. *See* Securities Exchange Act Release No. 99604 (February 26, 2024), 89 FR 15235 (March 1, 2024) (SR–ISE–2024–06).

[20] 15 U.S.C. 78f(b).

change is consistent with the Section 6(b)(5)[21] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[22] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that IWM Tuesday and Thursday Short Term Daily Expirations will allow market participants to purchase IWM options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively. Further, the proposal to permit Tuesday and Thursday Short Term Daily Expirations for options on IWM listed pursuant to the Short Term Option Series Program, subject to the proposed limitation of two nearest expirations, would protect investors and the public interest by providing the investing public and other market participants more flexibility to closely tailor their investment and hedging decisions in IWM options, thus allowing them to better manage their risk exposure. In particular, the Exchange believes the Short Term Option Series Program has been successful to date and that Tuesday and Thursday IWM Short Term Daily Expirations should simply expand the ability of investors to hedge risk against market movements stemming from economic releases or market events that occur throughout the month in the same way that the Short Term Option Series Program has expanded the landscape of hedging. Similarly, the Exchange believes Tuesday and Thursday IWM Short Term Daily Expirations should create greater trading and hedging opportunities and provide customers the flexibility to tailor their investment objectives more effectively. The Exchange currently lists SPY and QQQ Tuesday and Thursday Short Term Daily Expirations.[23]

With this proposal, Tuesday and Thursday IWM Expirations would be treated similar to existing Tuesday and Thursday SPY and QQQ Expirations and would expire in the same week that standard monthly options expire on Fridays.[24] Further, today, Tuesday and Thursday Short Term Option Daily Expirations do not expire on a business day in which monthly options series or Quarterly Options Series expire.[25] Today, all Short Term Option Daily Expirations expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days and are not business days in which monthly options series or Quarterly Options Series expire. There are no material differences in the treatment of Tuesday and Thursday SPY and QQQ Short Term Daily Expirations as compared to the proposed Tuesday and Thursday IWM Short Term Daily Expirations.

Finally, the Exchange represents that it has an adequate surveillance program in place to detect manipulative trading in the proposed Tuesday and Thursday IWM Short Term Daily Expirations, in the same way that it monitors trading in the current Short Term Option Series and trading in Tuesday and Thursday SPY and QQQ Expirations. The Exchange also represents that it has the necessary systems capacity to support the new options series. Finally, the Exchange does not believe that any market disruptions will be encountered with the introduction of Tuesday and Thursday IWM Short Term Daily Expirations.

Finally, the Exchange notes the proposed rule change is substantively the same as a rule change proposed by ISE, which the Commission recently approved.[26]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Similar to SPY and QQQ Tuesday and Thursday Expirations, the introduction of IWM Tuesday and Thursday Short Term Daily Expirations does not impose an undue burden on competition. The Exchange believes that it will, among other things, expand hedging tools available to market participants and continue the reduction of the premium cost of buying protection. The Exchange believes that IWM Tuesday and Thursday Short Term Daily Expirations will allow market participants to purchase IWM options based on their timing as needed and allow them to tailor their investment and hedging needs more effectively.

The Exchange does not believe the proposal will impose any burden on inter-market competition, as nothing prevents other options exchanges from proposing similar rules to list and trade Short-Term Option Series with Tuesday and Thursday Short Term Daily Expirations. The Exchange notes that having Tuesday and Thursday IWM expirations is not a novel proposal, as SPY and QQQ Tuesday and Thursday Expirations are currently listed on the Exchange.[27] Additionally, as noted above, the Commission recently approved a substantively identical proposal of another exchange.[28] Further, the Exchange does not believe the proposal will impose any burden on intramarket competition, as all market participants will be treated in the same manner under this proposal.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[29] and Rule 19b–4(f)(6) thereunder.[30] Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[31] and subparagraph (f)(6) of Rule 19b–4 thereunder.[32]

[21] 15 U.S.C. 78f(b)(5).

[22] *Id.*

[23] *See* Rule 19.6, Interpretation and Policy .05(h).

[24] *See* Rule 19.6, Interpretation and Policy .05(b).

[25] *See* Rule 19.6, Interpretation and Policy .05(h).

[26] *See* Securities Exchange Act Release No. 99946 (April 11, 2024) (SR–ISE–2024–06).

[27] See Rule 19.6, Interpretation and Policy .05(h).

[28] See Securities Exchange Act Release No. 99946 (April 11, 2024) (SR–ISE–2024–06).

[29] 15 U.S.C. 78s(b)(3)(A)(iii).

[30] 17 CFR 240.19b–4(f)(6).

[31] 15 U.S.C. 78s(b)(3)(A)(iii).

[32] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

A proposed rule change filed under Rule 19b–4(f)(6) [33] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[34] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. According to the Exchange, the proposed rule change is a competitive response to a filing submitted by Nasdaq ISE that was recently approved by the Commission.[35] The Exchange has stated that waiver of the 30-day operative delay would permit the Exchange to implement the proposal at the same time as its competitor exchanges, thus creating competition among Short Term Option Series. The Commission believes that the proposed rule change presents no novel issues and that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[36]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeEDGX–2024–022 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeEDGX–2024–022. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeEDGX–2024–022 and should be submitted on or before May 14, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[37]

Vanessa A. Countryman,

Secretary.

BILLING CODE 8026–09–P

SOCIAL SECURITY ADMINISTRATION

[Docket No: SSA–2024–0011]

Agency Information Collection Activities: Proposed Request and Comment Request

The Social Security Administration (SSA) publishes a list of information collection packages requiring clearance by the Office of Management and Budget (OMB) in compliance with Public Law 104–13, the Paperwork Reduction Act of 1995, effective October 1, 1995. This notice includes revisions of OMB-approved information collections, and one new collection for OMB-approval.

SSA is soliciting comments on the accuracy of the agency's burden estimate; the need for the information; its practical utility; ways to enhance its quality, utility, and clarity; and ways to minimize burden on respondents, including the use of automated collection techniques or other forms of information technology. Mail, email, or fax your comments and recommendations on the information collection(s) to the OMB Desk Officer and SSA Reports Clearance Officer at the following addresses or fax numbers.

(OMB) Office of Management and Budget, Attn: Desk Officer for SSA, Fax: 202–395–6974

(SSA) Social Security Administration, OLCA, Attn: Reports Clearance Director, Mail Stop 3253 Altmeyer, 6401 Security Blvd., Baltimore, MD 21235, Fax: 833–410–1631, Email address: *OR.Reports.Clearance@ssa.gov*

Or you may submit your comments online through *https://www.reginfo.gov/public/do/PRAmain* by clicking on Currently under Review—Open for Public Comments and choosing to click on one of SSA's published items. Please reference Docket ID Number [SSA–2024–0011] in your submitted response.

I. The information collection below is pending at SSA. SSA will submit it to OMB within 60 days from the date of this notice. To be sure we consider your comments, we must receive them no later than June 24, 2024. Individuals can obtain copies of the collection instruments by writing to the above email address.

1. Partnership Questionnaire—20 CFR 404.1080–404.1082—0960–0025. SSA considers partnership income in determining entitlement to Social Security benefits. SSA uses information from Form SSA–7104 to determine several aspects of eligibility for benefits, including the accuracy of reported partnership earnings; the veracity of a retirement; and lag earnings where SSA needs this information to determine the status of the insured. The respondents are applicants for, and recipients of, Title II Social Security benefits who are reporting partnership earnings.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)	Average theoretical hourly cost amount (dollars) *	Average wait time in field office (minutes) **	Total annual opportunity cost (dollars) ***
SSA–7104 (mailed)	2,154	1	30	1.077	*31.48		***33,904
SSA–7104 (completed in or brought to a field office)	2,154	1	30	1,077	*31.48	**24	***61,040
Totals	4,308			2,154			***94,944

* We based this figure on average the U.S. citizen's hourly salary, as reported by Bureau of Labor Statistics data (*https://www.bls.gov/oes/current/oes_nat.htm).*
** We based this figure on the average FY 2024 wait times for field offices, based on SSA's current management information data.
*** This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. There is no actual charge to respondents to complete the application.

2. Medical Source Statement of Ability To Do Work Related Activities (Physical and Mental)—20 CFR 404.1512–404.1513, 416.912–416.913, 404.1517, and 416.917—0960–0662. When a claimant appeals a denied disability claim, SSA may ask the claimant to have a consultative examination at the agency's expense, if the claimant's medical sources cannot, or will not, give the agency sufficient evidence to determine whether the claimant has a disability. The medical providers who perform these consultative examinations provide a statement about the claimant's state of disability. Specifically, these medical source statements determine the work-related capabilities of these claimants. SSA collects the medical data on the HA–1151 and HA–1152 to assess the work-related physical and mental capabilities of claimants who appeal SSA's previous determination on their issue of disability. The respondents are medical sources who provide reports based either on existing medical evidence or on consultative examinations.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)	Average theoretical hourly cost amount (dollars) *	Total annual opportunity cost (dollars) **
HA–1151	5,000	30	15	37,500	*49.07	**1,840,125
HA–1152	5,000	30	15	37,500	*49.07	**1,840,125
Totals	10,000			75,000		**3,680,250

* We based this figure on average medical professionals' salaries, as reported by the U.S. Bureau of Labor Statistics (*https://www.bls.gov/oes/current/oes290000.htm*)
** This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. There is no actual charge to respondents to complete the application.

II. SSA submitted the information collections below to OMB for clearance. Your comments regarding these information collections would be most useful if OMB and SSA receive them 30 days from the date of this publication. To be sure we consider your comments, we must receive them no later than May 23, 2024. Individuals can obtain copies of these OMB clearance packages by writing to the *OR.Reports.Clearance@ssa.gov.*

1. Representative Availability Portal for Social Security Administration Hearings—20 CFR 404.929, 404.933, 404.1740, 416.1429, 416.1433, 416.1540, 418.1350, 422.203—0960–NEW. As part of the appeals process, claimants can request a hearing with an Administrative Law Judge (ALJ). Approximately 80 percent of claimants have appointed representatives at the hearing level. When the Social Security Administration (SSA) schedules hearings before an ALJ, it usually considers the availability of appointed representatives, if applicable. Appointed representatives may be members of large firms, appearing at hearings nationwide, or may be solo practitioners servicing a specific geographic location or hearing office. In both situations, it is typical for appointed representatives to represent more than one claimant at any given moment; some represent hundreds of claimants at once.

Historically, the process of seeking, tracking, and considering representative availability has been a manual and time-intensive activity. In the past, hearing offices sought representative availability information by contacting each representative individually. More recently, Office of Hearings Operations' Regional Offices representatives collected availability information. Representatives provided Regional Office staff with their hearing availability via telephone or email. However, the process for gathering and considering representative availability was not standardized and varied greatly amongst Regional Offices. The appointed representative community informed SSA they would appreciate a

consistent and standardized electronic process to submit their availability for hearing appearances.

In the Spring of 2023, SSA initiated the Enhanced Representative Availability Process (ERAP) to provide representatives with a more standardized and streamlined process to email their availability for hearings. In the interim, SSA obtained OMB approval to test a new Representative Availability Portal (Portal) to offer the representative community a web-based option to submit their monthly availability to SSA, as per 20 CFR 404.1740(b)(3)(iii) and 416.1540(b)(3)(iii) and in a manner consistent with ERAP. SSA tested the Portal among 11 appointed representative practice groups nationwide. We are currently seeking OMB approval for the national rollout of the Portal, which collects standardized information regarding appointed representative availability for the purpose of scheduling hearings.

SSA plans to roll the Portal out to all appointed representatives registered with the Registration, Appointment and Services for Representatives (RASR) application, other professional representatives who regularly conduct hearing business with SSA but are not registered with RASR, and delegated officials from appointed representative's Designated Scheduling Groups (DSG). A DSG is a representative-identified scheduling group which can include one representative, or multiple representatives. Respondents will need to have a *mySocial Security* account to use the Portal and be registered into the Portal by SSA systems. Respondents who wish to use the Portal, but who are not registered with RASR, or who do not have a Representative ID, must provide SSA systems with the necessary data, including name and SSN, to complete the Portal registration process.

Portal respondents, once registered, are authorized representatives and delegated officials from appointed representatives' DSG. SSA will use the Portal to track availability for hearings for the DSG. Representatives provide hearing availability for the DSG monthly (as described above), and SSA considers the DSG-provided availability when scheduling hearings.

SSA will announce the response window for the Portal each month via a reminder email, approximately ten days prior to the deadline for Portal submissions. Following the submission deadline, the Portal will ''lock,'' and respondents will not be able to submit availability through the Portal at that time. However, SSA has some discretion to approve a request for a late submission or modification and plans to have the capacity to unlock the Portal, when warranted. Portal response options will include DSG group, hearing region, availability during the period of submission, and respondent-preferred case maximums. The Portal will allow SSA to obtain the information we require to schedule hearings for attendees.

If the respondents choose not to submit their availability via the Portal, the option of submitting their availability through email submission (as is the current practice) will remain. If a representative elects not to timely submit any availability via the Portal or email, SSA will schedule their hearings without their input.

We expect use of the Portal will result in receiving consistent structured data from appointed representatives, which will allow for a more streamlined and effective hearing scheduling process. The Portal also meets a longstanding customer-experience request by the representative community, one of SSA's key stakeholders in the process.

The respondents are appointed representatives, and delegated officials from appointed representatives' DSGs who need to submit their availability to SSA for hearings.

Type of Request: Request for a new information collection.

Modality of completion	Number of respondents	Frequency of response	Number of responses	Average burden per response (minutes)	Estimated total annual burden (hours)	Average theoretical hourly cost amount (dollars) **	Total annual opportunity cost (dollars) ***
Representative Availability Portal for SSA Hearings	* 3,000	12	36,000	20	12,000	** 84.84	*** 1,018.080

* This figure represents the approximate number of individual representatives registered with RASR who regularly schedule hearings with the agency.

** We based this figure on the mean hourly wage for the average lawyer in the United States as reported by Bureau of Labor Statistics data (*https://www.bls.gov/oes/current/oes231011.htm*).

*** This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. There is no actual charge to respondents to complete the application.

2. Statement of Death by Funeral Director and State Death Match Collections—20 CFR 404.301, 404.310–404.311, 404.316, 404.330–404.341, 404.350–404.352, 404.371, 404.715, 404.720, and 416.912—0960–0142. The death of a beneficiary is an event that terminates the individual's entitlement to Social Security benefits. As regulated, states must furnish death information to SSA to compare to SSA's payment files. SSA employs two modalities for ensuring it efficiently receives accurate information regarding the deaths of SSA-insured workers and beneficiaries: (1) Form SSA–721, Statement of Death by Funeral Director; and (2) the Electronic Death Registration (EDR). SSA operates the State Death Match collections, which includes the EDR process for electronically reporting death records to SSA. The states furnish death certificate information to SSA via a manual registration process (the SSA–721), or via the EDR Registration Process. Both death match processes are automated electronic transfers between the states and SSA. This collection, via paper form SSA–721 or the EDR, allows for the funeral director or funeral home responsible for the individual's burial or cremation to report the death to SSA. SSA uses this information for three purposes: (1) to establish proof of death for the insured worker; (2) to determine if the insured individual was receiving any pre-death benefits SSA needs to terminate; and (3) to ascertain which surviving family member is eligible for the lump-sum death payment or for other death benefits. The respondents for this information collection are funeral directors who handled death arrangements for the insured individuals, and the states' bureaus of vital statistics.

Type of Request: Revision of an OMB-approved information collection.

EDR

Modality of completion	Number of respondents	Frequency of response	Average cost per record request	Estimated total annual burden hours (cost)	Average theoretical hourly cost amount (dollars) **	Total annual opportunity cost (dollars) ***
State Death Match—EDR *	54	3,164,477	$2.77	$473,342,469	** 23.00	*** 72,782,971
States Expected to Become—State Death Match-EDR Within the Next 3 Years *	1	1,247	3.73	4,651	** 23.00	*** 28,681
Totals:	55			473,347,120		*** 72,811,652

* Please note that both of these data matching processes are electronic, and nearly immediate. Therefore, there is only a cost burden, and no hourly burden for the respondent to provide this information.

We estimated the frequency of responses by taking the total number of actual records received for calendar year 2023 for each category and dividing by the number of respondents, per category.

We have 54 States and Jurisdictions currently using EDR. Guam recently showed interest in becoming an EDR site. Estimated sometime mid to late next year 2024.

** We based this figure on the average Records Clerk hourly wages as reported by Bureau of Labor Statistics data (*https://www.bls.gov/oes/current/oes434199.htm*).

*** This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. There is no actual charge to respondents to complete the application.

SSA–721

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)	Average theoretical hourly cost amount (dollars) **	Total annual opportunity cost (dollars) ***
SSA–721	437,449	1	4	29,163	$27.90 *	$813,648 **

* We based this figure on average funeral home manager's hourly salary in May 2024, as reported by Bureau of Labor Statistics data (*https://www.bls.gov/oes/current/oes394031.htm*).

** This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. There is no actual charge to respondents to complete the application.

3. *Retaining Employment and Talent After Injury/Illness Network (RETAIN)—0960–0821.* The SSA and the U.S. Department of Labor (DOL) are conducting the Retaining Employment and Talent After Injury/Illness Network (RETAIN) demonstration. The RETAIN demonstration tests the impact of early intervention strategies that improve stay-at-work/return-to-work (SAW/RTW) outcomes of individuals who experience work disability while employed. We define ''Work disability'' as an injury, illness, or medical condition that has the potential to inhibit or prevent continued employment or labor force participation. SAW/RTW programs succeed by returning injured or ill workers to productive work as soon as medically possible during their recovery process, and by providing interim part-time or light duty work and accommodations, as necessary. We loosely modeled the RETAIN Demonstration Projects after promising programs operating in Washington State, including the Centers of Occupational Health and Education (COHE), the Early Return to Work (ERTW), and the Stay at Work programs.

While these programs operate within the state's workers' compensation system, and are available only to people experiencing work-related injuries or illnesses, the RETAIN Demonstration Projects provide opportunities to improve SAW/RTW outcomes for both occupational and non-occupational injuries and illnesses of people who are employed, or at a minimum in the labor force, when their injury or illness occurs.

The primary goals of the RETAIN Demonstration Projects are:

1. To increase employment retention and labor force participation of individuals who acquire, and/or are at risk of developing, work disabilities; and

2. To reduce long-term work disability among RETAIN service users, including the need for Social Security Disability Insurance and Supplemental Security Income.

The Retain Demonstration aims to validate and expand evidence-based strategies to accomplish these goals. DOL funds intervention approaches and programmatic technical assistance, while SSA funds evaluation support, including technical assistance and the full evaluation for the demonstration. The demonstration consists of two Phases. The first involves the implementation and assessment of cooperative awards to eight states to conduct planning and start-up activities, including the launch of a small pilot demonstration. During Phase 1, SSA provided evaluation-related technical assistance and planning, and conducts evaluability assessments to assess which states' projects would allow for a rigorous evaluation if continued beyond the pilot phase. SSA completed Phase 1 on May 16, 2021. DOL selected a subset of states and continued to Phase 2 full implementation and evaluation on May 17, 2021, which will end in October 2025. During Phase 2, DOL funds the operations and program technical assistance activities for the recommended states, and SSA funds the full set of evaluation activities. The four components of this evaluation, completed during site visits, interviews with RETAIN service users, surveys of RETAIN enrollees, and surveys of RETAIN service providers, include:

- *The participation analysis:* Using RETAIN service user interviews and surveys, this analysis provides insights into which eligible workers choose to participate in the program, in what ways they participate, and how services received vary with participant characteristics. Similarly, it will assess the characteristics of, and if possible, reasons for non-enrollment of non-participants.
- *The process analysis:* Using staff interviews and logs, this analysis produces information about operational features that affect service provision; perceptions of the intervention design by service users, providers, administrators, and other stakeholders; relationships among the partner

organizations; each program's fidelity to the research design; and lessons for future programs with similar objectives.

- *The impact analysis:* This analysis produces estimates of the effects of the interventions on primary outcomes, including employment and Social Security disability applications, and secondary outcomes, such as health and service usage. SSA identifies evaluation designs for each state to generate impact estimates, which could include experimental or non-experimental designs.
- *The cost-benefit analysis:* This analysis assesses whether the benefits of RETAIN justify its costs, conducted from various perspectives, including participants, state and Federal governments, SSA, and society as a whole.

The purpose and proposed use of this information collection is to gather qualitative and quantitative data needed to conduct the analysis. These activities, include (1) surveys of RETAIN enrollees and (2) follow-up interviews with RETAIN service users. The qualitative data collection consists of: (1) semi-structured interviews with program staff and service users; and (2) staff activity logs. Program staff interviews focus on staff's perceptions of the successes and challenges of implementing each states program, while staff activity logs house information on staff's time to inform the benefit-cost analysis. Service user interviews inform SSA's understanding of users' experiences with program services. The quantitative data include SSA's program records and survey data. The survey data collection consists of: (1) two rounds of follow-up surveys, focusing on individual-level outcomes, with enrollees, all of whom who have experienced a disability onset; and (2) two rounds of surveys with RETAIN providers. Respondents learn of the RETAIN program data collection efforts through various outreach methods, including, but not limited to mailings, phone calls, and from other individuals. SSA is constantly reviewing our outreach strategies to ensure maximum exposure and accessibility to the materials. the respondents are staff members selected for staff interviews and staff activity logs, and RETAIN service users, enrollees, and providers.

Type of Request: Request for renewal of an information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)	Average theoretical hourly cost amount (dollars) *	Average wait time for teleservice centers (minutes) **	Total annual opportunity cost (dollars) ***

BILLING CODE 4191–02–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Petition for Authorization to Exceed Mach 1

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of decision to grant an authorization to exceed Mach 1.

SUMMARY: This notice summarizes the petition Boom Supersonic, Inc. submitted to the FAA requesting a special flight authorization as provided for in FAA regulations. The notice also provides for public awareness of FAA's decision to grant Boom Supersonic, Inc.'s request. The FAA is not requesting comments on the petition or the FAA's decision regarding the petition because a special flight authorization petition to exceed Mach 1 follows a separate regulatory process.

DATES: The grant of the special flight authorization to exceed Mach 1 is effective April 7, 2024.

FOR FURTHER INFORMATION CONTACT: Sandy Liu, Office of Environment and Energy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; 202–267–4748, *sandy.liu@faa.gov.*

SUPPLEMENTARY INFORMATION:

Petitioner: Boom Supersonic, Inc.

Applicable Sections of 14 CFR: Sections 91.817 and 91.818.

Description of Relief Sought: Boom Supersonic, Inc. seeks relief to allow certain flight tests to exceed Mach 1.

On March 24, 2023, Boom Supersonic, Inc., Centennial, CO, petitioned the FAA on behalf of Boom Technology, Inc. (''Boom'') to allow Boom to operate a civil aircraft that is expected to exceed Mach 1 speeds during flight testing. Specifically, Boom Supersonic Inc. requested to conduct developmental flight test operations of an experimental aircraft (XB–1) and a chase airplane over Edwards Air Force Base within pre-existing supersonic corridors, located in Los Angeles, Kern, and San Bernardino counties in California. The petitioner requested authorization for up to 20 supersonic test flights over one year. The proposed operations would occur at or above 30,000 ft Mean Sea Level.

On January 12, 2024, the FAA published a notice of availability in the **Federal Register** (89 FR 2471) of an Environmental Assessment (EA) prepared to satisfy National Environmental Policy Act requirements and address the environmental impact of the proposed supersonic operations. The FAA requested comments on the EA. The FAA finalized the EA and issued a Finding of No Significant Impact on February 29, 2024.

The FAA finds the request by the petitioner is well within the intent of 14 CFR 91.818. As such, the FAA has decided to grant this Special Flight Authorization to Exceed Mach 1. Authority to exceed Mach 1 during the testing of the Boom XB–1 experimental aircraft is limited to the conditions and limitations stated in the special flight authorization.

The FAA's decision to grant a special flight authorization in response to Boom Supersonic Inc.'s petition and the applicable environmental review documents are available on FAA's website. The FAA is posting special flight authorization applications, grants of special flight authorizations, and applicable environmental review documents. These documents may be found at: *https://www.faa.gov/about/office_org/headquarters_offices/apl/aee/env_policy/sfa_supersonic.*

Issued in Washington, DC, on April 17, 2024.

Sandy Liu,

Engineer, Noise Division, Office of Environment and Energy, Noise Division (AEE–100).

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD–2024–0054]

Coastwise Endorsement Eligibility Determination for a Foreign-Built Vessel: KREWE ZEN (MOTOR); Invitation for Public Comments

AGENCY: Maritime Administration, DOT.

ACTION: Notice.

SUMMARY: The Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to issue coastwise endorsement eligibility determinations for foreign-built vessels which will carry no more than twelve passengers for hire. A request for such a determination has been received by MARAD. By this notice, MARAD seeks comments from interested parties as to any effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. Information about the requestor's vessel, including a brief description of the proposed service, is listed below.

DATES: Submit comments on or before May 23, 2024.

ADDRESSES: You may submit comments identified by DOT Docket Number MARAD–2024–0054 by any one of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Search MARAD–2024–0054 and follow the instructions for submitting comments.
- *Mail or Hand Delivery:* Docket Management Facility is in the West Building, Ground Floor of the U.S. Department of Transportation. The Docket Management Facility location address is U.S. Department of Transportation, MARAD–2024–0054, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

Note: If you mail or hand-deliver your comments, we recommend that you include your name and a mailing address, an email address, or a telephone number in the body of your document so that we can contact you if we have questions regarding your submission.

Instructions: All submissions received must include the agency name and specific docket number. All comments received will be posted without change to the docket at *www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments, or to submit comments that are confidential in nature, see the section entitled Public Participation.

FOR FURTHER INFORMATION CONTACT: Patricia Hagerty, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE, Room W23–461, Washington, DC 20590. Telephone: (202) 366–0903. Email: *patricia.hagerty@dot.gov.*

SUPPLEMENTARY INFORMATION: As described in the application, the intended service of the vessel KREWE ZEN is:

Intended Commercial Use of Vessel: Requester intends to offer passenger charters.

Geographic Region Including Base of Operations: Texas, Louisiana, Mississippi, Alabama, Florida. Base of Operations: Galveston, Texas.

Vessel Length and Type: 59′ Sportfish.

The complete application is available for review identified in the DOT docket

as MARAD 2024–0054 at *https://www.regulations.gov.* Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the employment of the vessel in the coastwise trade to carry no more than 12 passengers will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, MARAD will not issue an approval of the vessel's coastwise endorsement eligibility. Comments should refer to the vessel name, state the commenter's interest in the application, and address the eligibility criteria given in section 388.4 of MARAD's regulations at 46 CFR part 388.

Public Participation

How do I submit comments?

Please submit your comments, including the attachments, following the instructions provided under the above heading entitled **ADDRESSES**. Be advised that it may take a few hours or even days for your comment to be reflected on the docket. In addition, your comments must be written in English. We encourage you to provide concise comments and you may attach additional documents as necessary. There is no limit on the length of the attachments.

Where do I go to read public comments, and find supporting information?

Go to the docket online at *https://www.regulations.gov,* keyword search MARAD–2024–0054 or visit the Docket Management Facility (see **ADDRESSES** for hours of operation). We recommend that you periodically check the Docket for new submissions and supporting material.

Will my comments be made available to the public?

Yes. Be aware that your entire comment, including your personal identifying information, will be made publicly available.

May I submit comments confidentially?

If you wish to submit comments under a claim of confidentiality, you should submit the information you claim to be confidential commercial information by email to *SmallVessels@dot.gov.* Include in the email subject heading ''Contains Confidential Commercial Information'' or ''Contains CCI'' and state in your submission, with specificity, the basis for any such confidential claim highlighting or denoting the CCI portions. If possible, please provide a summary of your submission that can be made available to the public.

In the event MARAD receives a Freedom of Information Act (FOIA) request for the information, procedures described in the Department's FOIA regulation at 49 CFR 7.29 will be followed. Only information that is ultimately determined to be confidential under those procedures will be exempt from disclosure under FOIA.

Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). For information on DOT's compliance with the Privacy Act, please visit *https://www.transportation.gov/privacy.*

BILLING CODE 4910–81–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Actions

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: See **SUPPLEMENTARY INFORMATION** section for applicable date(s).

FOR FURTHER INFORMATION CONTACT: OFAC: Bradley Smith, Director, tel.: 202–622–2490; Associate Director for Global Targeting, tel.: 202–622–2420; Assistant Director for Licensing, tel.: 202–622–2480; Assistant Director for Regulatory Affairs, tel.: 202–622–4855; or Assistant Director for Compliance, tel.: 202–622–2490.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website (*ofac.treasury.gov*).

Notice of OFAC Action(s)

On March 11, 2024, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authority listed below.

BILLING CODE 4810–AL–P

Individuals:

1. ABU SHANAB, William (Arabic: ويليام أبة شنب) (a.k.a. ABU SHANAB, William Mahmud), Sidon, Lebanon; DOB 1985; nationality Lebanon; Gender Male; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886 (individual) [SDGT] (Linked To: HAMAS).

   Designated pursuant to section 1(a)(iii)(A) of Executive Order 13224 of September 23, 2001, "Blocking Property and Prohibiting Transactions With Persons Who Commit, Threaten to Commit, or Support Terrorism," 66 FR 49079, as amended by Executive Order 13886 of September 9, 2019, "Modernizing Sanctions To Combat Terrorism," 84 FR 48041 (E.O. 13224, as amended), for having acted or purported to act for or on behalf of, directly or indirectly, HAMAS, a person whose property and interests in property are blocked pursuant to E.O. 13224.

2. AL-KAHLUT, Hudhayfa Samir 'Abdallah (Arabic: حذيفة سمير عبدالله الكحلوت) (a.k.a. AL-KAHLOUT, Hudayfa Samir Abdullah (Arabic: حوديفه سمير عبدالله الكحلوت); a.k.a. AL-KAHLUT, Hudifah Samir 'Abdallah), Gaza; DOB 11 Feb 1985; nationality Palestinian; Gender Male; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886; National ID No. 800894164 (Palestinian) (individual) [SDGT] (Linked To: HAMAS).

   Designated pursuant to section 1(a)(iii)(A) of E.O. 13224, as amended for having acted or purported to act for or on behalf of, directly or indirectly, HAMAS, a person whose property and interests in property are blocked pursuant to E.O. 13224.

3. 'AZZAM, Khalil Muhammad (a.k.a. AZAM, Khalil Mouhamad; a.k.a. AZZAM, Khalil Mohammed; a.k.a. 'AZZAM, Khalil Muhammad Khalil (Arabic: خليل محمد خليل عزام)), Tripoli, Lebanon; DOB 01 Jan 1968; nationality Palestinian; Gender Male; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886 (individual) [SDGT] (Linked To: HAMAS).

   Designated pursuant to section 1(a)(iii)(A) of (E.O. 13224, as amended for having acted or purported to act for or on behalf of, directly or indirectly, HAMAS, a person whose property and interests in property are blocked pursuant to E.O. 13224.

4. FARHAT, Bara'a Hasan (Arabic: براء حسن فرحات), Sidon, Lebanon; DOB 1988; nationality Palestinian; Gender Male; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886 (individual) [SDGT] (Linked To: HAMAS).

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Low Income Taxpayer Clinic Grant Program; Availability of 2025 Grant Application Package

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Solicitation of grant applications.

SUMMARY: This document contains a notice that the IRS has provided a grant opportunity in *www.grants.gov* for organizations interested in applying for a Low Income Taxpayer Clinic (LITC) matching grant. The IRS is authorized to award multi-year LITC grants not to exceed three years. (Organizations currently participating in the LITC grant program that are submitting a Non-Competing Continuation Request for continued funding for 2025 must do so electronically at *www.grantsolutions.gov*). Grants may be awarded for the development, expansion, or continuation of programs providing qualified services to eligible taxpayers. Grant funds may be awarded for start-up expenditures incurred by new clinics during 2025. The budget and the period of performance for the grant will be January 1, 2025–December 31, 2025. The application period runs from April 22, 2024, through June 12, 2024.

DATES: All applications and requests for continued funding for the 2025 grant year must be filed electronically by 11:59 p.m. (Eastern Time) on June 12, 2024. All organizations must use the funding number of TREAS–GRANTS–042025–001, and the Catalog of Federal Domestic Assistance program number is 21.008, see *www.sam.gov.* The IRS is scheduling two optional webinars, Session One on April 25, and Session Two on May 7, 2024, to cover the full application process. See *www.irs.gov/advocate/low-income-taxpayer-clinics* for complete details, including posted materials and any changes to the date and time.

FOR FURTHER INFORMATION CONTACT: Karen Tober at (202) 317–4700 (not a toll-free number) or by email at *karen.tober@irs.gov.* The IRS office that provides oversight of the LITC grant program is the LITC Program Office, located at: IRS, Taxpayer Advocate Service, LITC Grant Program Administration Office, TA:LITC, 1111 Constitution Avenue NW, Room 1034, Washington, DC 20224. Copies of the *2024 Grant Application Package and Guidelines,* IRS Publication 3319 (Rev. 5–2024), can be downloaded from the IRS internet site at *https://www.taxpayeradvocate.irs.gov/about-us/litc-grants/* or ordered by calling the IRS Distribution Center toll-free at 1–800–829–3676. See *https://youtu.be/6kRrjN-DNYQ* for a short video about the LITC Program. Note: To assist organizations in applying for funding, the ''Reminders and Tips for Completing Form 13424–M'' available at *https://www.taxpayeradvocate.irs.gov/about-us/litc-grants* will include instructions for which questions an organization should complete if requesting funding only for the English as a second language (ESL) Education Pilot Program described in this notice.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to 26 U.S.C. 7526, the IRS will annually award up to $6,000,000 (unless otherwise provided by specific Congressional appropriation) to qualified organizations, subject to the limitations in the statute. For FY 2024, Congress has provided overall LITC grant funding of $28 million and has authorized funding of up to $200,000 per clinic. The President's FY 2025 budget request proposes an overall LITC grant funding level of $26 million and a continuation of the $200,000 per-clinic funding cap. In light of the President's budget request and the uncertain timeline for final congressional action, the IRS will allow applicants to request up to $200,000 for the 2025 grant year. The IRS will also continue the ESL Education Pilot Program that was rolled out as part of the February 2023 supplemental funding opportunity. If for FY 2025 Congress significantly reduces the overall LITC grant funding level or reduces the per-clinic funding cap, the IRS will adjust each grant recipient's award to reflect any limitations in place at that time.

For an applicant proposing to provide tax controversy representation, at least 90 percent of the taxpayers represented by the clinic must have incomes which do not exceed 250 percent of the poverty level as determined under criteria established by the Director of the Office of Management and Budget. See 89 FR 2961–2963 (January 17, 2024). In addition, the amount in controversy for the tax year to which the controversy relates generally cannot exceed the amount specified in Internal Revenue Code (IRC) section 7463 ($50,000) for eligibility for special small tax case procedures in the United States Tax Court. IRC section 7526(c)(5) requires clinics to provide dollar-for-dollar matching funds, which may consist of funds from other sources or contributions of volunteer time. See IRS Pub. 3319 for additional details. An applicant who is planning to operate a program to inform ESL taxpayers about their taxpayer rights and responsibilities must have either a volunteer or a staff member designated as a Qualified Tax Expert, generally an attorney, enrolled agent or certified public accountant, to review and approve all educational material.

Mission Statement

Low Income Taxpayer Clinics ensure the fairness and integrity of the tax system for taxpayers who are low-income or ESL by providing *pro bono* representation on their behalf in tax disputes with the IRS; educating them about their rights and responsibilities as taxpayers; and identifying and advocating for issues that impact low-income and ESL taxpayers.

Expansion of the Type of Qualified Services an Organization Can Provide Through Implementation of ESL Education Pilot

IRC section 7526(b)(1)(A) authorizes the IRS to award grants to organizations that represent low-income taxpayers in controversies before the IRS or provide education to ESL taxpayers regarding their taxpayer rights and responsibilities.

To achieve maximum access to justice for low-income and ESL taxpayers, the IRS has expanded the eligibility criteria for a grant by removing the requirement for eligible organizations to provide direct controversy representation. Pursuant to the ESL Education Pilot Program started in 2023 and continued through 2025, a grant may be awarded to an organization to operate a program to inform ESL taxpayers about their taxpayer rights and responsibilities under the IRC without the requirement to also provide tax controversy representation to low-income taxpayers. See IRS Pub. 3319 for examples of what constitutes a ''clinic.'' Applicants

should note clearly on their applications their intent to apply for the Pilot Program and should carefully follow special instructions that will be supplied for completing the application for the Pilot Program.

Selection Consideration

Despite the IRS's efforts to foster parity in availability and accessibility in choosing organizations receiving LITC matching grants and the continued increase in clinic services nationwide, there remain communities that are underserved by clinics. The states of Hawaii, Kansas, Nevada, North Dakota, South Dakota, and West Virginia and the territory of Puerto Rico currently do not have an LITC. In addition, two states—Florida and Montana—have only partial coverage. The uncovered counties in Florida are Citrus, Hamilton, Hernando, Lafayette, Madison, Nassau, St. Johns, Sumter, Suwannee, Taylor, Brevard, Lake, Orange, Osceola, Seminole, and Volusia. The uncovered counties in Montana and are Blaine, Broadwater, Carbon, Carter, Custer, Daniels, Dawson, Deer Lodge, Fallon, Fergus, Flathead, Garfield, Golden Valley, Granite, Jefferson, Judith Basin, Lincoln, Madison, McCone, Mineral, Missoula, Musselshell, Petroleum, Phillips, Pondera, Powder River, Powell, Prairie, Richland, Sanders, Sheridan, Stillwater, Sweet Grass, Toole, Treasure, Valley, Wheatland, and Wibaux.

Although each application for the 2025 grant year will be given due consideration, the IRS is especially interested in receiving applications from organizations providing services in these underserved geographic areas. For organizations that intend to refer low-income taxpayers involved in controversies with the IRS to other qualified representatives rather than providing representation directly to low-income taxpayers, priority will be given to established organizations that can help provide coverage to underserved geographic areas. For the ESL Education Pilot Program, special consideration will be given to established organizations with existing community partnerships that can swiftly implement and deliver services to the target audiences.

As in prior years, the IRS will consider a variety of factors in determining whether to award a grant, including: (1) the number of taxpayers who will be assisted by the organization, including the number of ESL taxpayers in that geographic area; (2) the existence of other LITCs assisting the same population of low-income and ESL taxpayers; (3) the quality of the program offered by the organization, including the qualifications of its administrators and qualified representatives, and its record in providing services to low-income taxpayers; (4) the quality of the organization, including the reasonableness of the proposed budget; (5) the organization's compliance with all Federal tax obligations (filing and payment); (6) the organization's compliance with all Federal nontax monetary obligations (filing and payment); (7) whether debarment or suspension (31 CFR part 19) applies or whether the organization is otherwise excluded from or ineligible for a Federal award; and (8) alternative funding sources available to the organization, including amounts received from other grants and contributors and the endowment and resources of the institution sponsoring the organization.

For programs where all or the majority of cases will be placed with volunteers, we will also consider the following: (1) the quality of the representatives (attorneys, certified public accountants, or enrolled agents who have agreed to accept taxpayer referrals from an LITC and provide representation or consultation services free of charge); and (2) the ability of the organization to monitor referrals and ensure that the *pro bono* representatives are handling the cases properly, including taking timely case actions and ensuring services are offered for free or a nominal fee.

Applications and requests for continued funding that pass the eligibility screening process will then be subject to technical review. An organization submitting a request for continued funding for the second or third year of a multi-year grant will be required to submit an abbreviated Non-competing Continuation Request and will be subject to a streamlined screening process. Details regarding the scoring process can be found in Publication 3319. The final funding decisions are made by the National Taxpayer Advocate. The costs of preparing and applying are the responsibility of each applicant. Applications may be released in response to Freedom of Information Act requests after any necessary redactions are made. Therefore, applicants must not include any individual taxpayer information. The IRS will notify each applicant in writing once funding decisions have been made.

Erin M. Collins,

National Taxpayer Advocate.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Low Income Taxpayer Clinic Grant Program; Availability of 2025 Grant Application Package

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Solicitation of grant applications.

SUMMARY: This document contains a notice that the IRS has provided a grant opportunity in *www.grants.gov* for organizations interested in applying for a Low Income Taxpayer Clinic (LITC) matching grant. The IRS is authorized to award multi-year LITC grants not to exceed three years. (Organizations currently participating in the LITC grant program that are submitting a Non-Competing Continuation Request for continued funding for 2025 must do so electronically at *www.grantsolutions.gov*). Grants may be awarded for the development, expansion, or continuation of programs providing qualified services to eligible taxpayers. Grant funds may be awarded for start-up expenditures incurred by new clinics during 2025. The budget and the period of performance for the grant will be January 1, 2025–December 31, 2025. The application period runs from April 22, 2024, through June 12, 2024.

DATES: All applications and requests for continued funding for the 2025 grant year must be filed electronically by 11:59 p.m. (Eastern Time) on June 12, 2024. All organizations must use the funding number of TREAS–GRANTS–042025–001, and the Catalog of Federal Domestic Assistance program number is 21.008, see *www.sam.gov.* The IRS is scheduling two optional webinars, Session One on April 25, and Session Two on May 7, 2024, to cover the full application process. See *www.irs.gov/advocate/low-income-taxpayer-clinics* for complete details, including posted materials and any changes to the date and time.

FOR FURTHER INFORMATION CONTACT: Karen Tober at (202) 317–4700 (not a toll-free number) or by email at *karen.tober@irs.gov.* The IRS office that provides oversight of the LITC grant program is the LITC Program Office, located at: IRS, Taxpayer Advocate Service, LITC Grant Program Administration Office, TA:LITC, 1111 Constitution Avenue NW, Room 1034, Washington, DC 20224. Copies of the *2024 Grant Application Package and Guidelines,* IRS Publication 3319 (Rev. 5–2024), can be downloaded from the

IRS internet site at *https://www.taxpayeradvocate.irs.gov/about-us/litc-grants/* or ordered by calling the IRS Distribution Center toll-free at 1–800–829–3676. See *https://youtu.be/6kRrjN-DNYQ* for a short video about the LITC Program. Note: To assist organizations in applying for funding, the ''Reminders and Tips for Completing Form 13424–M'' available at *https://www.taxpayeradvocate.irs.gov/about-us/litc-grants* will include instructions for which questions an organization should complete if requesting funding only for the English as a second language (ESL) Education Pilot Program described in this notice.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to 26 U.S.C. 7526, the IRS will annually award up to $6,000,000 (unless otherwise provided by specific Congressional appropriation) to qualified organizations, subject to the limitations in the statute. For FY 2024, Congress has provided overall LITC grant funding of $28 million and has authorized funding of up to $200,000 per clinic. The President's FY 2025 budget request proposes an overall LITC grant funding level of $26 million and a continuation of the $200,000 per-clinic funding cap. In light of the President's budget request and the uncertain timeline for final congressional action, the IRS will allow applicants to request up to $200,000 for the 2025 grant year. The IRS will also continue the ESL Education Pilot Program that was rolled out as part of the February 2023 supplemental funding opportunity. If for FY 2025 Congress significantly reduces the overall LITC grant funding level or reduces the per-clinic funding cap, the IRS will adjust each grant recipient's award to reflect any limitations in place at that time.

For an applicant proposing to provide tax controversy representation, at least 90 percent of the taxpayers represented by the clinic must have incomes which do not exceed 250 percent of the poverty level as determined under criteria established by the Director of the Office of Management and Budget. See 89 FR 2961–2963 (January 17, 2024). In addition, the amount in controversy for the tax year to which the controversy relates generally cannot exceed the amount specified in Internal Revenue Code (IRC) section 7463 ($50,000) for eligibility for special small tax case procedures in the United States Tax Court. IRC section 7526(c)(5) requires clinics to provide dollar-for-dollar matching funds, which may consist of funds from other sources or contributions of volunteer time. See IRS Pub. 3319 for additional details. An applicant who is planning to operate a program to inform ESL taxpayers about their taxpayer rights and responsibilities must have either a volunteer or a staff member designated as a Qualified Tax Expert, generally an attorney, enrolled agent or certified public accountant, to review and approve all educational material.

Mission Statement

Low Income Taxpayer Clinics ensure the fairness and integrity of the tax system for taxpayers who are low-income or ESL by providing *pro bono* representation on their behalf in tax disputes with the IRS; educating them about their rights and responsibilities as taxpayers; and identifying and advocating for issues that impact low-income and ESL taxpayers.

Expansion of the Type of Qualified Services an Organization Can Provide Through Implementation of ESL Education Pilot

IRC section 7526(b)(1)(A) authorizes the IRS to award grants to organizations that represent low-income taxpayers in controversies before the IRS or provide education to ESL taxpayers regarding their taxpayer rights and responsibilities.

To achieve maximum access to justice for low-income and ESL taxpayers, the IRS has expanded the eligibility criteria for a grant by removing the requirement for eligible organizations to provide direct controversy representation. Pursuant to the ESL Education Pilot Program started in 2023 and continued through 2025, a grant may be awarded to an organization to operate a program to inform ESL taxpayers about their taxpayer rights and responsibilities under the IRC without the requirement to also provide tax controversy representation to low-income taxpayers. See IRS Pub. 3319 for examples of what constitutes a ''clinic.'' Applicants should note clearly on their applications their intent to apply for the Pilot Program and should carefully follow special instructions that will be supplied for completing the application for the Pilot Program.

Selection Consideration

Despite the IRS's efforts to foster parity in availability and accessibility in choosing organizations receiving LITC matching grants and the continued increase in clinic services nationwide, there remain communities that are underserved by clinics. The states of Hawaii, Kansas, Nevada, North Dakota, South Dakota, and West Virginia and the territory of Puerto Rico currently do not have an LITC. In addition, two states—Florida and Montana—have only partial coverage. The uncovered counties in Florida are Citrus, Hamilton, Hernando, Lafayette, Madison, Nassau, St. Johns, Sumter, Suwannee, Taylor, Brevard, Lake, Orange, Osceola, Seminole, and Volusia. The uncovered counties in Montana and are Blaine, Broadwater, Carbon, Carter, Custer, Daniels, Dawson, Deer Lodge, Fallon, Fergus, Flathead, Garfield, Golden Valley, Granite, Jefferson, Judith Basin, Lincoln, Madison, McCone, Mineral, Missoula, Musselshell, Petroleum, Phillips, Pondera, Powder River, Powell, Prairie, Richland, Sanders, Sheridan, Stillwater, Sweet Grass, Toole, Treasure, Valley, Wheatland, and Wibaux.

Although each application for the 2025 grant year will be given due consideration, the IRS is especially interested in receiving applications from organizations providing services in these underserved geographic areas. For organizations that intend to refer low-income taxpayers involved in controversies with the IRS to other qualified representatives rather than providing representation directly to low-income taxpayers, priority will be given to established organizations that can help provide coverage to underserved geographic areas. For the ESL Education Pilot Program, special consideration will be given to established organizations with existing community partnerships that can swiftly implement and deliver services to the target audiences.

As in prior years, the IRS will consider a variety of factors in determining whether to award a grant, including: (1) the number of taxpayers who will be assisted by the organization, including the number of ESL taxpayers in that geographic area; (2) the existence of other LITCs assisting the same population of low-income and ESL taxpayers; (3) the quality of the program offered by the organization, including the qualifications of its administrators and qualified representatives, and its record in providing services to low-income taxpayers; (4) the quality of the organization, including the reasonableness of the proposed budget; (5) the organization's compliance with all Federal tax obligations (filing and payment); (6) the organization's compliance with all Federal nontax monetary obligations (filing and payment); (7) whether debarment or suspension (31 CFR part 19) applies or whether the organization is otherwise

excluded from or ineligible for a Federal award; and (8) alternative funding sources available to the organization, including amounts received from other grants and contributors and the endowment and resources of the institution sponsoring the organization.

For programs where all or the majority of cases will be placed with volunteers, we will also consider the following: (1) the quality of the representatives (attorneys, certified public accountants, or enrolled agents who have agreed to accept taxpayer referrals from an LITC and provide representation or consultation services free of charge); and (2) the ability of the organization to monitor referrals and ensure that the *pro bono* representatives are handling the cases properly, including taking timely case actions and ensuring services are offered for free or a nominal fee.

Applications and requests for continued funding that pass the eligibility screening process will then be subject to technical review. An organization submitting a request for continued funding for the second or third year of a multi-year grant will be required to submit an abbreviated Non-competing Continuation Request and will be subject to a streamlined screening process. Details regarding the scoring process can be found in Publication 3319. The final funding decisions are made by the National Taxpayer Advocate. The costs of preparing and applying are the responsibility of each applicant. Applications may be released in response to Freedom of Information Act requests after any necessary redactions are made. Therefore, applicants must not include any individual taxpayer information. The IRS will notify each applicant in writing once funding decisions have been made.

Erin Collins,

National Taxpayer Advocate.

BILLING CODE P

DEPARTMENT OF VETERANS AFFAIRS

Notice of Meeting: Cooperative Studies Scientific Evaluation Committee

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. Ch. 10, that the Cooperative Studies Scientific Evaluation Committee (CSSEC) will hold its virtual meeting on May 23, 2024, via MS Teams from 10 a.m.–4 p.m. EST.

The Committee provides expert advice on VA cooperative studies, multi-site clinical research activities and policies related to conducting and managing these efforts. The session will be open to the public for the first 2 hours of the meeting (approximately) for the discussion of administrative matters and the general status of the program. The remaining portion of the meeting will be closed to the public for the Committee's review, discussion and evaluation of future research and development applications.

During the closed portion of the meeting, the Committee's discussions and recommendations will address the qualifications of the personnel conducting the studies, and staff and consultant critiques of research proposals and similar documents. Premature disclosure of this research information to the public could significantly obstruct implementation of approved research activities. As provided by Public Law 92–463 subsection 10(d), and amended by Public Law 94–409, closing the Committee meeting is in accordance with 5 U.S.C. 552b(c)(6) and (9)(B).

The Committee will accept oral comments from the public during a 30-minute public comment period in the open portion of the meeting. Individual stakeholders will be afforded up to 3 minutes to express their comments. Members of the public who wish to attend the open teleconference should call 872–701–0185, conference ID 481 139 269#. Those who plan to attend or would like additional information should contact David Burnaska, Program Manager, Cooperative Studies Program (14RD), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, at *David.Burnaska@va.gov.* Those wishing to submit written comments may send them to Mr. Burnaska at the same address and email.

Dated: April 17, 2024.

LaTonya L. Small,

Federal Advisory Committee Management Officer.

Medicare Program; Changes to the Medicare Advantage and the Medicare Prescription Drug Benefit Program for Contract Year 2024—Remaining Provisions and Contract Year 2025 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicare Cost Plan Program, and Programs of All-Inclusive Care for the Elderly (PACE)

AGENCY: Centers for Medicare & Medicaid Services (CMS), Office of the National Coordinator for Health Information Technology (ONC), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: This final rule will revise the Medicare Advantage (Part C), Medicare Prescription Drug Benefit (Part D), Medicare cost plan, and Programs of All-Inclusive Care for the Elderly (PACE) regulations to implement changes related to Star Ratings, marketing and communications, agent/broker compensation, health equity, dual eligible special needs plans (D–SNPs), utilization management, network adequacy, and other programmatic areas. This final rule also codifies existing sub-regulatory guidance in the Part C and Part D programs.

DATES: *Effective date:* These regulations are effective June 3, 2024.

Applicability dates: The provisions in this rule are applicable to coverage beginning January 1, 2025, except as otherwise noted. The updates to marketing and communication provisions at §§ 422.2267(e)(34), 422.2274, and 423.2274 are applicable for all contract year 2025 marketing and communications beginning October 1, 2024. The updated provisions at §§ 422.2267(e)(31)(ii) and 423.2267(e)(33)(ii) are applicable for all contract year 2026 marketing and communications beginning September 30, 2025, however, at plan option for contract year 2025 marketing and communications beginning September 30, 2024, the plan may use the model notice described in §§ 422.2267(e)(31)(ii) and 423.2267(e)(33)(ii) to satisfy the MLI requirements set forth in §§ 422.2267(e)(31)(i) and 423.2267(e)(33)(i).

Sections 422.111(l) and 423.530 are applicable beginning January 1, 2026. This final rule also includes revisions to existing regulations in the Risk Adjustment Data Validation (RADV) audit appeals process, the appeals process for quality bonus payment determination at § 422.260, weighting of new Part C and D Star Ratings measures at §§ 422.166(e)(2) and 423.186(e)(2), and the rule for Part C and D Star Ratings non-substantive measure updates at §§ 422.164(d) and 423.184(d) applicable 60 days after the date of publication. The use and release of risk adjustment data provisions at §§ 422.310(f)(1)(vi), 422.310(f)(1)(vii), and 422.310(f)(3)(v) are applicable 60 days after the date of publication.

PartCandDStarRatings@cms.hhs.gov—Parts C and D Star Ratings Issues.

SUPPLEMENTARY INFORMATION:

I. Executive Summary and Background

A. Executive Summary

1. Purpose

The primary purpose of this final rule is to amend the regulations for the Medicare Advantage (Part C) program, Medicare Prescription Drug Benefit (Part D) program, Medicare cost plan program, and Programs of All-Inclusive Care for the Elderly (PACE). This final rule includes a number of new policies that will improve these programs beginning with contract year 2025 and will codify existing Part C and Part D sub-regulatory guidance.

Additionally, this final rule will implement certain sections of the following Federal laws related to the Parts C and D programs:

- The Bipartisan Budget Act (BBA) of 2018.
- The Consolidated Appropriations Act (CAA), 2023.

2. Summary of the Major Provisions

a. Part D Medication Therapy Management (MTM) Program: Eligibility Criteria

Section 1860D–4(c)(2) of the Act requires all Part D sponsors to have an MTM program designed to assure, with respect to targeted beneficiaries, that covered Part D drugs are appropriately used to optimize therapeutic outcomes through improved medication use, and to reduce the risk of adverse events, including adverse drug interactions. Section 1860D–4(c)(2)(A)(ii) of the Act requires Part D sponsors to target those Part D enrollees who have multiple chronic diseases, are taking multiple Part D drugs, and are likely to meet a cost threshold for covered Part D drugs established by the Secretary. CMS codified the MTM targeting criteria at § 423.153(d)(2).

Through this final rule, CMS establishes improved targeting criteria for the Part D MTM program that will help ensure more consistent, equitable, and expanded access to MTM services. After consideration of the comments received, we are finalizing proposed changes to the MTM eligibility criteria with modifications that are effective for January 1, 2025, as follows:

We are finalizing the provision at § 423.153(d)(2)(iii) that Part D sponsors must include all core chronic diseases in their targeting criteria for identifying beneficiaries who have multiple chronic diseases, as provided under § 423.153(d)(2)(i)(A). As part of this provision at § 423.153(d)(2)(iii), we are codifying the nine core chronic diseases currently identified in guidance and adding HIV/AIDS, for a total of 10 core chronic diseases. The 10 core chronic diseases are: (1) Alzheimer's disease; (2) Bone disease-arthritis (including osteoporosis, osteoarthritis, and rheumatoid arthritis); (3) Chronic congestive heart failure (CHF); (4) Diabetes; (5) Dyslipidemia; (6) End-stage renal disease (ESRD); (7) Human immunodeficiency virus/acquired immunodeficiency syndrome (HIV/AIDS); (8) Hypertension; (9) Mental health (including depression, schizophrenia, bipolar disorder, and other chronic/disabling mental health conditions); and (10) Respiratory disease (including asthma, chronic obstructive pulmonary disease (COPD), and other chronic lung disorders). Sponsors retain the flexibility to target

additional chronic diseases beyond those codified as core chronic diseases.

We are not finalizing the proposal at § 423.153(d)(2)(i)(B) to decrease the maximum number of Part D drugs a sponsor may require from eight to five for Contract Year 2025. At this time, we are retaining the maximum number of drugs a plan sponsor may require for targeting beneficiaries taking multiple Part D drugs as eight at § 423.153(d)(2)(i)(B). Part D sponsors will maintain the flexibility to set a lower threshold (a number between two and eight Part D drugs) for targeting beneficiaries taking multiple Part D drugs. We may consider revisiting this or similar policies in future rulemaking.

We are finalizing the provision at § 423.153(d)(2)(iv) to require sponsors to include all Part D maintenance drugs in their targeting criteria with minor modifications to the regulatory text to clarify that sponsors must include all Part D maintenance drugs and to provide flexibility for sponsors to include all Part D drugs in their targeting criteria. However, sponsors will not be permitted to limit the Part D maintenance drugs included in MTM targeting criteria to specific Part D maintenance drugs or drug classes. We are also finalizing the requirement at § 423.153(d)(2)(iv) that, for the purpose of identifying Part D maintenance drugs, plans must rely on information in a widely accepted, commercially or publicly available drug information database.

We are finalizing the provision at § 423.153(d)(2)(i)(C) with modification to set the MTM cost threshold at the average cost of eight generic drugs, as defined at § 423.4. CMS will calculate the dollar amount of the MTM cost threshold based on the average daily cost of a generic drug using the PDE data specified at § 423.104(d)(2)(iv)(C).

We are also codifying longstanding guidance at § 423.153(d)(1)(vii)(B)(2) to provide that a beneficiary must be unable to accept the offer to participate in the CMR due to cognitive impairment. We are also finalizing other technical changes at § 423.153(d)(1)(vii)(B)(1)(i) to clarify that the CMR must include an interactive consultation that is conducted in person or via synchronous telehealth.

b. Improving Access to Behavioral Health Care Providers

We are finalizing regulatory changes that will improve access to behavioral health care by adding a new behavioral health provider specialty to our MA network adequacy standards. Specifically, we are finalizing requirements to add a new facility-specialty type to the existing list of facility-specialty types evaluated as part of network adequacy requirements and reviews. The new facility-specialty type, ''Outpatient Behavioral Health,'' will be included in network adequacy evaluations and can include providers of various types: Marriage and Family Therapists (MFTs), Mental Health Counselors (MHCs), Opioid Treatment Program (OTP) providers, Community Mental Health Centers or other behavioral health and addiction medicine specialists and facilities, including addiction medicine physicians, other providers. Other providers may include nurse practitioners (NPs), physician assistants (PAs) and Clinical Nurse Specialists (CNSs), who furnish addiction medicine and behavioral health counseling or therapy services and meet other specific criteria. Beginning January 1, 2024, MFTs and MHCs were eligible to enroll in Medicare and start billing for services due to the new statutory benefit category established by the Consolidated Appropriations Act (CAA) 2023. We aim to strengthen network adequacy requirements and improve beneficiary access to behavioral health services and providers by expanding our network adequacy evaluation requirements for MA organizations.

To address concerns that NPs, PAs, and CNSs might lack the necessary skills, training, or expertise to effectively address the behavioral health needs of enrollees and that the absence of criteria for incorporating these provider types could result in the creation of ''ghost networks'' (where providers may be listed in a provider directory without actively treating patients for behavioral health), we are also adopting specific criteria that MA organizations must use to determine when an NP, PA or CNS can be considered part of a network to meet the Outpatient Behavioral Health network adequacy standard. MA organizations must independently verify that the provider has furnished or will furnish such services to 20 patients within a recent 12-month period using reliable information about services furnished by the provider such as the MA organization's claims data, prescription drug claims data, electronic health records, or similar data.

c. Distribution of Personal Beneficiary Data by Third Party Marketing Organizations (TPMOs)

Third-Party Marketing Organizations (TPMOs) are selling and reselling beneficiary contact information to skirt existing CMS rules that prohibit cold calling so they can aggressively market MA and Part D Plans. Beneficiaries are unaware that by placing a call or clicking on a generic-looking web-link they are unwittingly agreeing and providing consent for their personal contact information to be collected and sold to other entities for future marketing activities. As a result, we are finalizing requirements to prohibit personal beneficiary data collected by TPMOs for marketing or enrolling a beneficiary into an MA or Part D plan to be shared with other TPMOs, unless prior express written consent is given by the beneficiary. Furthermore, we are finalizing a one-to-one consent structure where TPMOs must obtain prior express written consent through a clear and conspicuous disclosure for each TPMO that will be receiving the beneficiary's data. This provision is designed to address complaints we have received from beneficiaries and their advocates and caregivers about receiving harassing and unwanted phone and email solicitations from individuals attempting to enroll them in MA and Part D plans. This final rule protects beneficiaries against unwanted calls, texts, email solicitations, and other contacts, while still ensuring that beneficiaries have control over their personal data and can connect with the TPMOs they would like to speak with, creating a more transparent and safer environment for beneficiaries to find the plan that best fits their health needs.

d. Establish Guardrails for Agent and Broker Compensation

Section 1851(j) of the Act requires that CMS develop guidelines to ensure that the use of agent and broker compensation creates incentives to enroll individuals in the MA plan that is intended to best meet their health care needs. To that end, for many years CMS has set upper limits on the amount of compensation agents and brokers can receive for enrolling Medicare beneficiaries into MA and PDP plans. We have learned, however, that many MA and PDP plans, as well as third-party entities with which they contract (such as Field Marketing Organizations (FMOs)) have structured payments to agents and brokers that allow for separate payments for these agents and brokers and have the effect of circumventing compensation caps. We also note that that these separate payments appear to be increasing. In this rule, we are finalizing requirements that will generally prohibit contract terms between MA organizations and agents, brokers or other TPMOs that may interfere with the agent's or broker's ability to objectively assess and

recommend the plan that best fits a beneficiary's health care needs; set a single, increased compensation rate for all plans to be updated annually; revise the scope of items and services included within agent and broker compensation; and eliminate the regulatory framework which currently allows for separate payment to agents and brokers for administrative services. We are also making conforming edits to the Part D agent broker compensation rules at § 423.2274. Collectively, we believe the impact of these changes will better align with statutory requirements to ensure that the use of compensation creates incentives for agents and brokers to enroll individuals in the plan that best fits a beneficiary's health care needs. Further, such changes align with the Biden-Harris Administration's commitment to promoting fair, open, and competitive markets and ensuring beneficiaries can make fully informed choices among a robust set of health insurance options.

e. Special Supplemental Benefits for the Chronically Ill (SSBCI)

We are finalizing regulatory changes that will help ensure that SSBCI items and services offered by MA plans are appropriate and meet applicable statutory and regulatory standards, including that the SSBCI items and services are reasonably expected to improve or maintain the health or overall function of chronically ill enrollees. First, we are finalizing requirements that, by the date on which it submits its bid to CMS, an MA organization must establish a bibliography of relevant acceptable evidence that an item or service offered as SSBCI has a reasonable expectation of improving or maintaining the health or overall function of a chronically ill enrollee. Second, we are clarifying in the regulation that an MA plan must follow its written policies based on objective criteria for determining an enrollee's eligibility for an SSBCI when making such eligibility determinations. Third, we are requiring that the MA plan document both denials and approvals of SSBCI eligibility. Additionally, we are codifying CMS's authority to review and deny approval of an MA organization's bid if the MA organization has not demonstrated, through relevant acceptable evidence, that its proposed SSBCI has a reasonable expectation of improving or maintaining the health or overall function of the chronically ill enrollee. Finally, we are codifying CMS's authority to review SSBCI offerings annually for compliance, considering the evidence available at the time. We believe these revisions to § 422.102(f) will better ensure that the benefits offered as SSBCI are reasonably expected to improve or maintain the health or overall function of the chronically ill enrollee while also guarding against the use of MA rebate dollars for SSBCI that are not supported by acceptable evidence.

The new SSBCI requirements regarding creation of a bibliography and documentation of SSBCI eligibility for enrollees will apply to plans beginning with the CY2025 bid process. The codification of other SSBCI requirements regarding plans' obligation to follow written SSBCI eligibility policies, and our authority to decline to accept a bid if the MA organization has not demonstrated that its proposed SSBCI has a reasonable expectation of improving or maintaining the health or overall function of the chronically ill enrollee do not represent a change in policy and CMS will continue in practice during the CY2025 bid process and in subsequent years.

In addition, we are finalizing new policies to protect beneficiaries and improve transparency regarding SSBCI so that beneficiaries are aware that SSBCI are only available to enrollees who meet specific eligibility criteria. We are modifying and strengthening the current requirements for the SSBCI disclaimer that MA organizations offering SSBCI must use whenever SSBCI are mentioned. Specifically, we are requiring that the SSBCI disclaimer list the relevant chronic condition(s) the enrollee must have to be eligible for the SSBCI offered by the MA organization. The MA organization must convey in its SSBCI disclaimer that even if the enrollee has a listed chronic condition, the enrollee may not receive the benefit because other eligibility and coverage criteria also apply. We are also finalizing specific font and reading pace parameters for the SSBCI disclaimer in print, television, online, social media, radio, other voice-based ads, and outdoor advertising (including billboards). Finally, we are requiring that MA organizations include the SSBCI disclaimer in all marketing and communications materials that mention SSBCI. We believe that imposing these new SSBCI disclaimer requirements will help to ensure that the marketing of and communication about these benefits is not misleading or potentially confusing to enrollees who rely on these materials to make enrollment decisions.

f. Mid-Year Enrollee Notification of Available Supplemental Benefits

In addition, over the past several years, the number of MA plans offering supplemental benefits has increased. The benefits offered are broader in scope and variety and we are seeing an increasing amount of MA rebate dollars directed towards these benefits. At the same time, plans have reported that enrollee utilization of many of these benefits is low. To help ensure MA enrollees are fully aware of all available supplemental benefits and to promote equitable access to care, we will now require MA plans to notify enrollees mid-year of the unused supplemental benefits available to them. The notice will list any supplemental benefits not utilized by the enrollee during the first 6 months of the year (January 1 to June 30). Currently, MA plans are not required to send any communication specific to an enrollee's usage of supplemental benefits and CMS believes such a notice could be an important part of a plan's overall care coordination efforts. As finalized, this policy will educate enrollees on their access to supplemental benefits to encourage greater utilization of these benefits and ensure MA plans are better stewards of the rebate dollars directed towards these benefits.

g. Annual Health Equity Analysis of Utilization Management Policies and Procedures

We are finalizing regulatory changes to the composition and responsibilities of the Utilization Management (UM) committee. These policies will require that at least one member of the UM committee have expertise in health equity. These policies will also require that the UM committee conduct an annual health equity analysis of the use of prior authorization at the plan-level. The analysis will examine the impact of prior authorization on enrollees with one or more of the following social risk factors (SRFs): (i) receipt of the low-income subsidy or being dually eligible for Medicare and Medicaid (LIS/DE); or (ii) having a disability. To enable a more comprehensive understanding of the impact of prior authorization practices on enrollees with the specified SRFs at the plan level, the analysis must compare metrics related to the use of prior authorization for enrollees with the specified SRFs to enrollees without the specified SRFs. Finally, the policies will require MA organizations to make the results of the analysis publicly available on their plan's website in a manner that is easily accessible and without barriers.

h. Amendments to Part C and Part D Reporting Requirements

In this final rule, we are affirming our authority to collect detailed information from MA organizations and Part D plan

sponsors under current regulations, in keeping with the Biden-Harris administration's focus on improving transparency and data in MA and Part D. We are revising §§ 422.516(a)(2) and 423.514(a)(2) as proposed (with a minor clarification in § 422.516(a)) to be consistent with the broad scope of the reporting requirements. This will lay the groundwork for new program-wide data collections to be established through the Paperwork Reduction Act (PRA) process, which will provide advance notice to interested parties and be subject to public comment. An example of increased data collection could be service level data for all initial coverage decisions and plan level appeals, such as decision rationales for items, services, or diagnosis codes to have better line of sight on utilization management and prior authorization practices, among many other issues.

i. Enhance Enrollees' Right To Appeal an MA Plan's Decision To Terminate Coverage for Non-Hospital Provider Services

Beneficiaries enrolled in Traditional Medicare and MA plans have the right to a fast-track appeal by an Independent Review Entity (IRE) when their covered skilled nursing facility (SNF), home health, or comprehensive outpatient rehabilitation facility (CORF) services are being terminated. Currently, Quality Improvement Organizations (QIO) act as the IRE and conduct these reviews. Under current regulations, MA enrollees do not have the same access to QIO review of a fast-track appeal as Traditional Medicare beneficiaries in connection with terminations of these types of services. In this final rule, we are finalizing proposals to: (1) require the QIO, instead of the MA plan, to review untimely fast-track appeals of an MA plan's decision to terminate services in an HHA, CORF, or SNF; and (2) fully eliminate the current provision that requires the forfeiture of an enrollee's right to appeal a termination of services to the QIO when the enrollee leaves the CORF or SNF or ends HHA services. These will bring MA regulations in line with the parallel reviews available to beneficiaries in Traditional Medicare and expand the rights of MA beneficiaries to access the fast-track appeals process in connection with terminations of HHA, CORF, or SNF services.

j. Changes to an Approved Formulary—Including Substitutions of Biosimilar Biological Products

Current regulations permit Part D sponsors to immediately remove from their formularies a brand name drug and substitute its newly released generic equivalent. Part D sponsors meeting the requirements can provide notice of specific changes, including direct notice to affected beneficiaries, after they take place; do not need to provide a transition supply of the substituted drug; and can make these changes at any time including in advance of the plan year. Consistent with these requirements, we proposed in the proposed rule titled ''Medicare Program; Contract Year 2024 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicare Cost Plan Program, Medicare Parts A, B, C, and D Overpayment Provisions of the Affordable Care Act and Programs of All-Inclusive Care for the Elderly; Health Information Technology Standards and Implementation Specifications,'' which appeared in the December 27, 2022 **Federal Register** (hereinafter referred to as the December 2022 proposed rule), to permit Part D sponsors also to immediately substitute: (i) a new interchangeable biological product for its corresponding reference product; (ii) a new unbranded biological product for its corresponding brand name biological product; and (iii) a new authorized generic for its corresponding brand name equivalent.

Our proposed regulatory text in the December 2022 proposed rule did not specify how Part D sponsors could treat substitution of biosimilar biological products other than interchangeable biological products. Under current policy, Part D sponsors have to obtain explicit approval from CMS prior to making a midyear formulary change that removes a reference product and replaces it with a biosimilar biological product other than an interchangeable biological product. Further, if such a change is approved, the Part D sponsor may apply the change only to enrollees who begin therapy after the effective date of the change. In other words, enrollees currently taking the reference product are able to remain on the reference product until the end of the plan year without having to obtain an exception. In response to comments received on our initial proposal in the December 2022 proposed rule (discussed in section III.P. of this final rule), and to increase access to biosimilar biological products consistent with the Biden-Harris Administration's commitment to competition as outlined in Executive Order (E.O.) 14036: ''Promoting Competition in the American Economy,'' we proposed in the proposed rule titled ''Medicare Program; Contract Year 2025 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicare Cost Plan Program, and Programs of All-Inclusive Care for the Elderly; Health Information Technology Standards and Implementation Specifications,'' which appeared in the November 16, 2023 **Federal Register** (hereinafter referred to as the November 2023 proposed rule) to add substitutions of biosimilar biological products other than interchangeable biological products to the type of formulary changes that apply to all enrollees (including those already taking the reference product prior to the effective date of the change) following a 30-day notice.

Having now considered comments (discussed in section III.P. of this final rule) received on the proposals in both the December 2022 and November 2023 proposed rules, we are finalizing regulations to permit Part D sponsors that meet all requirements: (1) to immediately substitute an interchangeable biological product for its reference product, a new unbranded biological product for its corresponding brand name biological product, and a new authorized generic for its brand name equivalent; and (2) to substitute upon 30 days' notice any biosimilar biological product for its reference product.

k. Increasing the Percentage of Dually Eligible Managed Care Enrollees Who Receive Medicare and Medicaid Services From the Same Organization

We are finalizing, with some modifications, interconnected proposals to: (a) replace the current quarterly special enrollment period (SEP) with a one-time-per month SEP for dually eligible individuals and others enrolled in the Part D low-income subsidy program to elect a standalone PDP, (b) create a new integrated care SEP to allow dually eligible individuals to elect an integrated D–SNP on a monthly basis, (c) limit enrollment in certain D–SNPs to those individuals who are also enrolled in an affiliated Medicaid managed care organization (MCO), and (d) limit the number of D–SNP plan benefit packages an MA organization can offer for full-benefit dually eligible individuals in the same service area that it, its parent organization, or any entity that shares a parent organization with the MA organization offers an affiliated Medicaid MCO. This final rule will increase the percentage of full-benefit dually eligible MA enrollees who are in plans that—directly by the MA

organization or indirectly through the parent organization or a related entity—are also contracted to cover Medicaid benefits, thereby expanding access to integrated materials, unified appeal processes across Medicare and Medicaid, and continued Medicare services during an appeal. It will also reduce the number of MA plans overall that can enroll dually eligible individuals outside the annual coordinated election period, thereby reducing the number of plans deploying aggressive marketing tactics toward dually eligible individuals throughout the year.

l. For D–SNP PPOs, Limit Out-of-Network Cost Sharing

We are finalizing a limitation on out-of-network cost sharing for D–SNP preferred provider organizations (PPOs) for specific services. The final rule will reduce cost shifting to Medicaid, increase payments to safety net providers, expand dually eligible enrollees' access to providers, and protect dually eligible enrollees from unaffordable costs.

m. Contracting Standards for Dual Eligible Special Needs Plan Look-Alikes

Under existing regulations, CMS does not contract with and will not renew the contract of a D–SNP look-alike—that is, an MA plan that is not a SNP but in which dually eligible enrollees account for 80 percent or more of total enrollment. We are finalizing a reduction to the D–SNP look-alike threshold from 80 percent to 70 percent for plan year 2025 and 60 percent for plan year 2026 and subsequent years. This provision will help address the continued proliferation of MA plans that are serving high percentages of dually eligible individuals without meeting the requirements to be a D–SNP.

n. Standardize the Medicare Advantage (MA) Risk Adjustment Data Validation Appeals Process

We are finalizing regulatory language to address gaps and operational constraints included in existing RADV appeal regulations. Currently, if MA organizations appeal both medical record review determinations and payment error calculations resulting from RADV audits, both issues must be appealed and move through the appeals process concurrently, which we foresee could result in inconsistent appeal adjudications at different levels of appeal that impact recalculations of the payment error. This has the potential to cause burden, confuse MA organizations, and negatively impact the operations and efficiency of CMS's appeals processes. This final rule will standardize and simplify the RADV appeals process for CMS and MA organizations, as well as address operational concerns at all three levels of appeal. We are finalizing requirements that MA organizations must exhaust all three levels of appeal for medical record review determinations before beginning the payment error calculation appeals process. This will ensure adjudication of medical record review determinations are final before a recalculation of the payment error is completed and subject to appeal. We are also finalizing several other revisions to our regulatory appeals process to conform these changes to our procedures.

Finally, we are clarifying and emphasizing our intent that if any provision of this final rule is held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, or stayed pending further agency action, it shall be severable from this final rule and not affect the remainder thereof or the application of the provision to other persons not similarly situated or to other, dissimilar circumstances. Through this rule, we adopt provisions that are intended to and will operate independently of each other, even if each serves the same general purpose or policy goal. Where a provision is necessarily dependent on another, the context generally makes that clear (such as by a cross-reference to apply the same standards or requirements).

BILLING CODE P

3. Summary of Costs and Benefits

TABLE A1: SUMMARY OF COSTS, TRANSFERS, AND BENEFITS

Provision	Description	Financial Impact
1. Part D Medication Therapy Management (MTM) Program: Eligibility Criteria	We are finalizing changes to the MTM eligibility requirements to (1) codify the 9 core chronic diseases currently identified in sub-regulatory guidance and adding HIV/AIDS for a total of 10 core chronic diseases; (2) require Part D sponsors to include all core chronic diseases in their MTM targeting criteria, and to include all Part D maintenance drugs when determining the number of drugs an enrollee is taking; and (3) revise the methodology for the MTM cost threshold to calculate the dollar amount based on the average annual cost of 8 generic drugs.	The revisions to the MTM targeting criteria being finalized in this rule have an estimated annual administrative cost of $192.7 million. We are unable to score this provision largely due to challenges with estimating Part A/B savings.
2. Improving Access to Behavioral Health Care Providers	We are finalizing changes to add a new facility-specialty type called "Outpatient Behavioral Health" to the network adequacy standards under § 422.116(b)(2). For purposes of the network adequacy requirements, the new facility-specialty type will be evaluated using time and distance and minimum number standards adopted in this rule. The new facility type will include MFTs, MHCs, OTP or other behavioral health and addiction medicine specialists and facilities. Based on comments from stakeholders we are also finalizing how an organization will determine when certain providers (NP, PA, CNS) may be utilized to meet network adequacy.	The new provision adds requirements for a new facility specialty type, which include providers some of which we have data for and some which are new and for which we lack data. Therefore, we cannot quantify the effects of this provision though we expect it may increase access which may qualitatively increase utilization.
3. Distribution of Personal Beneficiary Data by Third Party Marketing Organizations (TPMOs)	We are codifying that personal beneficiary data collected by a TPMO for marketing or enrolling the beneficiary into an MA or Part D plan may only be shared with another TPMO when prior express written consent is given by the beneficiary. Further, we are codifying that prior express written consent from the beneficiary to share the data and be contacted for marketing or enrollment purposes must be obtained separately for each TPMO that receives the data through a clear and conspicuous disclosure.	We do not expect any cost impact to the Medicare Trust Fund.
4. Enhance Guardrails for Agent/Broker Compensation	We are modifying agent/broker compensation requirements to further ensure payment arrangements and structure are aligned with CMS's statutory obligation to set limits on compensation to ensure that the use of compensation creates incentives for agents and brokers to enroll prospective enrollees in plans that best fit their needs.	This provision has no costs because we are transferring funds the MA plans are already paying Marketing Agencies directly to the agents and brokers with some reductions due to some funds possibly being used inconsistent with the requirements of the regulation.

Provision	Description	Financial Impact
5. Special Supplemental Benefits for the Chronically Ill (SSBCI)	We are finalizing changes to require MA organizations to establish bibliographies for each SSBCI they include in their bid to demonstrate that an SSBCI has a reasonable expectation of improving or maintaining the health or overall function of a chronically ill enrollee. This will shift the burden from CMS to the MA organizations to demonstrate compliance with this standard and help ensure that SSBCI items and services are offered based on current, reliable evidence. In addition, we are finalizing new policies to protect beneficiaries and improve transparency regarding SSBCI so that beneficiaries are aware that SSBCI are only available to enrollees who meet specific eligibility and coverage criteria. We are modifying and strengthening the current requirements for the SSBCI disclaimer that MA organizations offering SSBCI must use whenever SSBCI are mentioned.	The requirements for SSBCI are not expected to have any economic impact on the Medicare Trust Fund.
6. Mid-Year Enrollee Notification of Available Supplemental Benefits	We are finalizing requirements for MA plans to issue notices to enrollees who, by June 30th of a given year, have not utilized supplemental benefits, to ensure enrollees are aware of the availability of such benefits and ensure appropriate utilization.	Although these changes may result in increased utilization and ultimately create a savings to the Medicare Trust Fund, we cannot currently quantify this provision because it is new, and we lack data. See the Regulatory Impact Analysis for further discussion. The provision has an administrative cost of $23.7 million.
7. Annual Health Equity Analysis of Utilization Management Policies and Procedures	We are finalizing changes to the composition and responsibilities for the Utilization Management committee, to require: a member of the UM committee have expertise in health equity; the UM committee conduct an annual health equity analysis of prior authorization used by the MA organization using specified metrics; and require MA organizations to make the results of the analysis publicly available on its website.	We do not expect any cost impact to the Medicare Trust Fund.
8. Amendments to Part C and Part D Reporting Requirements	We are affirming our authority to collect detailed data from MA organizations and Part D plan sponsors under the Part C and D reporting requirements and finalizing the proposed regulatory revisions to be consistent with the broad scope of the reporting requirements.	We do not expect any cost impact to the Medicare Trust Fund.
9. Enhance Enrollees' Right to Appeal an MA Plan's Decision to Terminate Coverage for Non-Hospital Provider Services	We are finalizing regulations to (1) require QIOs to review untimely fast-track appeals of an MA plan's decision to terminate services in an HHA, CORF, or SNF and (2) eliminate the provision requiring the forfeiture of an enrollee's right to appeal to the QIO a termination of services decision when they leave the facility.	The revisions to this provision have an estimated annual administrative cost of $683,910. This is a transfer from MA plans to QIOs; MA plans have a reduced cost while QIOs have a corresponding increased cost.

Provision	Description	Financial Impact
10. Changes to an Approved Formulary—Including Substitutions of Biosimilar Biological Products	We are finalizing regulations to permit Part D sponsors to immediately substitute authorized generics for corresponding brand name drug products, interchangeable biological products for their reference products, and unbranded biological products marketed for the brand name biological product marketed under the same biologics license application. We also are finalizing regulations to permit substitutions of all biosimilar biological products with 30 days advance notice.	We do not expect any cost impact to the Medicare Trust Fund.
11. Increasing the Percentage of Dually Eligible Managed Care Enrollees Who Receive Medicare and Medicaid Services from the Same Organization	We are finalizing, with some modifications, policies to (a) replace the current dual/LIS quarterly SEP, (b) create a new integrated care SEP for full-benefit dually eligible individuals, (c) limit enrollment in certain D-SNPs to those full-benefit dually eligible individuals who are also enrolled in an affiliated Medicaid MCO, and (d) limit the number of D-SNPs an MA organization, its parent organization, or an entity that shares a parent organization with the MA organization, can offer in the same service area as an affiliated Medicaid MCO.	Over a 10-year horizon, we estimate a $1.3 billion savings to the Trust Fund for Part D plans and an additional $1 billion savings to the Trust Fund for Part C plans.
12. For D-SNP PPOs, Limit Out-of-Network Cost Sharing	We are finalizing a limitation on D-SNP PPOs' out-of-network cost sharing for certain Part A and Part B benefits, on an individual service level.	We do not expect any cost impact to the Medicare Trust Fund.
13. Contracting Standards for Dual Eligible Special Needs Plan Look-Alikes	We are lowering the D-SNP look-alike threshold from 80 percent to 70 percent for plan year 2025 and 60 percent for plan year 2026 and subsequent years.	We estimate this provision will have an average annual impact of less than $1M for plan years 2025-2027 due to non-SNP MA plans meeting the lower D-SNP look-alike threshold transitioning enrollees into other plans. We also estimate this provision will have an average annual impact of less than $1M on MA plan enrollees for plan years 2025-2027 due to enrollees choosing a different plan. We expect cumulative annual costs to non-SNP MA plans and MA plan enrollees beyond plan year 2027 to also be less than $1M per year.

Provision	Description	Financial Impact
14. Standardize the Medicare Advantage (MA) Risk Adjustment Data Validation (RADV) Appeals Process	We are revising when a medical record review determination and a payment error calculation appeal can be requested and adjudicated because RADV payment error calculations are based upon the outcomes of medical record review determinations. We are also finalizing other revisions to our appeals process to conform with these proposed changes. The changes could reduce burden on some MA organizations that, absent these revisions, will have otherwise potentially submitted payment error calculation appeals that could have been rendered moot by certain types of medical record appeals decisions. The potential reduction in burden to MA organizations cannot be quantified prior to the implementation of the new appeals process and until appeals have been fully adjudicated. While the MA RADV appeals regulations have been in place for a period of years, CMS did not issue RADV overpayment findings to MA organizations as we worked to finalize a regulation on our long-term RADV methodology. Therefore, any impact of these policies on MA organization behavior is further unquantifiable. The proposed changes do not impose any new information collection requirements.	The potential reduction in burden to MA organizations cannot be quantified prior to the implementation and execution of the appeals process pursuant to these changes.

BILLING CODE C

B. Background and Summary of the Final Rule

In this final rule, CMS addresses many of the remaining proposals from the December 2022 proposed rule in addition to the proposals from the November 2023 proposed rule. There are several proposals from the December 2022 proposed rule that were not finalized. CMS may address these proposals in a future final rule.

We received 3,463 timely pieces of correspondence containing one or more comments on the November 2023 proposed rule. Some of the public comments were outside of the scope of the proposed rule. These out-of-scope public comments are not addressed in this final rule. Summaries of the public comments that are within the scope of the proposed rule and our responses to those public comments are set forth in the various sections of this final rule under the appropriate heading.

C. General Comments on the December 2022 Proposed Rule and the November 2023 Proposed Rule Proposed Rule

We received some overarching comments related to the December 2022 and the November 2023 proposed rules, which we summarize in the following paragraphs:

Comment: A commenter expressed concern that CMS had not provided sufficient time for plan sponsors to understand the impact of recently finalized regulations, and the changes they have implemented, before proposing more policies that build on these areas. They recommended that in future years CMS allows time to measure and observe the impact of policy changes on plan sponsors and their members prior to layering new proposals.

Response: We appreciate the commenter's concern regarding the plans having enough time to understand the impact of finalized regulations. We will take their recommendation into consideration for future rulemaking.

Comment: A commenter requested that CMS extend the comment period by 60 days, through March 5, 2024, so they could effectively use the extended period in planning and preparing a response.

Response: Section 1871(b) of the Act requires that we provide for notice of the proposed regulation in the **Federal Register** and a period of not less than 60 days for public comment thereon. The proposed rule was available for public inspection on *federalregister.gov* (the website for the Office of **Federal Register**) on November 3, 2023. We did not extend the comment period because we believe the required 60 days provided the public with adequate time to prepare and submit responses.

Comment: In response to CMS–4201–P, a commenter suggested that CMS had not allowed for a 60-day comment period for the proposed rule because the beginning of the comment period was calculated from the date the proposed rule was made available for public inspection on the **Federal Register** website rather than the date that it appeared in an issue of the **Federal Register**. The commenter recommended that CMS provide an additional 60-day comment period on the proposed rule.

Response: Section 1871(b) of the Act requires that we provide for notice of the proposed regulation in the **Federal Register** and a period of not less than 60 days for public comment thereon. The proposed rule was available for public inspection on *federalregister.gov* (the website for the Office of **Federal Register**) on December 14, 2022. We believe that beginning the comment period for the proposed rule on the date it became available for public inspection at the Office of the Federal Register fully complied with the statute and provided the required notice to the public and a meaningful opportunity for interested

parties to provide input on the provisions of the proposed rule.

D. Status of the Overpayment Proposal in the December 27, 2022, Proposed Rule

Under the governing statute, any Medicare Advantage Organization (MA organization) that ''has received an overpayment,'' 42 U.S.C. 1320a–7k(d)(1), must ''report and return the overpayment,'' 42 U.S.C. 1320a–7k(d)(1)(A), no later than ''60 days after the date on which the overpayment was identified'' 42 U.S.C. 1320a–7k(d)(2)(A). CMS implemented this statutory overpayment provision through a May 23, 2014, final rule titled ''Medicare Program; Contract Year 2015 Policy and Technical Changes to the Medicare Advantage and the Medicare Prescription Drug Benefit Programs''. See 79 FR 29844. A group of MA organizations challenged that rule's inclusion of instances where an MA organization ''should have determined through the exercise of reasonable diligence . . . that [it] has received an overpayment'' in the regulation's definition of ''identified,'' 42 CFR 422.326(c). The District Court for the District of Columbia held that this regulatory provision was impermissible under the statute. *See UnitedHealthcare Ins. Co.* v. *Azar,* 330 F. Supp. 3d 173, 191 (D.D.C. 2018), *rev'd in part on other grounds sub nom. UnitedHealthcare Ins. Co.* v. *Becerra,* 16 F.4th 867 (D.C. Cir. 2021), *cert. denied,* 142 S. Ct. 2851 (U.S. June 21, 2022) (No. 21–1140). CMS views the District Court's ruling as having invalidated the definition of ''identified'' set out in 42 CFR 422.326(c). However, MA organizations remain obligated to report and return all overpayments that they have identified within the meaning of the statute, 42 U.S.C. 1320a–7k(d)(2)(A). In the December 27, 2022 proposed rule titled ''Medicare Program; Contract Year 2024 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicare Cost Plan Program, Medicare Parts A, B, C, and D Overpayment Provisions of the Affordable Care Act and Programs of All-Inclusive Care for the Elderly; Health Information Technology Standards and Implementation Specifications'' (the December 2022 proposed rule), CMS proposed revisions to regulations primarily governing Medicare Advantage (MA or Part C) and the Medicare Prescription Drug Benefit (Part D) (87 FR 79452). CMS proposed in the December 2022 proposed rule to remove the existing definition of ''identified'' in the Parts C and D overpayment regulations at 42 CFR 422.326 and 423.360 (as well as the corresponding Parts A and B regulation) (*see* 87 FR 79559). Under the Parts C and D overpayment proposal, an MA organization or Part D sponsor would have identified an overpayment when it had actual knowledge of the existence of the overpayment or acted in ''reckless disregard'' or ''deliberate ignorance'' of the overpayment. CMS has received inquiries regarding this proposal and want to be clear that it remains under consideration and that CMS intends to issue a final rule to revise the definition of ''identified'' in the overpayment rules as soon as is reasonably possible.

E. Information on Cyber Resiliency

In light of recent cybersecurity events impacting health care operations nationally, we expect all payers to review and implement HHS's voluntary *HPH Cyber Performance Goals* (CPGs). These CPGs are part of *HHS' broader cybersecurity strategy* and designed to help health care organizations strengthen cyber preparedness, improve cyber resiliency, and ultimately protect patient health information and safety. We welcome input on our approach via email at *hhscyber@hhs.gov.*

II. Strengthening Current Medicare Advantage and Medicare Prescription Drug Benefit Program Policies

A. Definition of Network-Based Plan (§§ 422.2 and 422.114)

Private-fee-for-service (PFFS) plans were established by the Balanced Budget Act of 1997 (Pub. L. 105–33) and were originally not required to have networks. The Medicare Improvements for Patients and Providers Act of 2008 (Pub. L. 110–275) (MIPPA) revised the PFFS requirements to require that, beginning with contract year 2011, PFFS plans have a network when operating in the same service area as two or more network-based plans. For purposes of this requirement, section 1852(d)(5)(C) of the Act and § 422.114(a)(3)(ii) define network-based plans as a coordinated care plan (as described in section 1851(a)(2)(A) of the Act and § 422.4(a)(1)(iii)), a network-based MSA plan, and a section 1876 reasonable cost plan. The statutory and regulatory definitions both specifically exclude an MA regional plan that meets access requirements substantially through means other than written contracts, per § 422.112(a)(1)(ii).

When codifying this requirement in the final rule that appeared in the **Federal Register** September 18, 2008, titled ''Medicare Program; Revisions to the Medicare Advantage and Prescription Drug Benefit Programs,'' (73 FR 54226), we included the definition of network-based plan in the section of the regulations for PFFS plans, as the definition was integral to the new requirement for PFFS plans (73 FR 54249). A network-based plan, however, has meaning in contexts other than PFFS. To ensure that the definition is readily and more broadly accessible for those seeking requirements related to network-based plans, we proposed in the December 2022 proposed rule (87 FR 79569) to move the definition of a network-based plan from § 422.114(a)(3)(ii) to the definitions section in § 422.2. Further, we proposed that the PFFS provision at § 422.114(a)(3)(ii) will continue to include language specifying the network requirement.

This proposed change has no policy implications for other provisions in part 422 in which the definition or description of network plans plays a role, for example, the network adequacy provisions at § 422.116 and the plan contract crosswalk provisions at § 422.530. However, in specifying the network adequacy requirements for the various plan types, § 422.116(a)(1)(i) references the current definition of a network-based plan at § 422.2 even though the definition for network-based plan currently remains at § 422.114(a)(3)(ii) because CMS inadvertently finalized what was intended to be a conforming change to § 422.116(a)(1)(i) [1] before we finalized our proposal to move the definition of network-based plan to § 422.2. In this final rule, we are moving the definition to § 422.2, making the current cross reference at § 422.116(a)(1)(i) correct. With respect to the regulation at § 422.530(a)(5), that provision specifically addresses the types of plans to which it applies and when CMS considers a crosswalk to be to a plan of a different type and refers to network-based PFFS plans without citing a specific definition. Therefore, we do not believe any amendment to § 422.530 is necessary in connection with moving the definition of network-based plan to § 422.2.

We did not receive any public comments on our proposal to move the definition and are finalizing the proposal for the reasons outlined in the December 2022 proposed rule with slight modifications to reorganize the regulation text for additional clarity.

[1] Medicare Program; Contract Year 2024 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicare Cost Plan Program, and Program of All-Inclusive Care for the Elderly (88 FR 22120).

B. Past Performance

We established at §§ 422.502(b) and 423.503(b) that we may deny an application submitted by MA organizations and Part D sponsors that failed to comply with the requirements of a previous MA or Part D contract, which we refer to as ''past performance.'' We proposed several technical changes to the regulation text related to past performance. These changes are intended to clarify the basis for application denials due to past performance and to ensure that the factors adequately account for financial difficulties that should prevent an organization from receiving a new or expanded MA or Part D contract.

One factor we consider regarding the past performance of MA organizations and Part D sponsors is their record of imposition of intermediate sanctions, because intermediate sanctions represent significant non-compliance with MA or Part D contract requirements. To clarify the basis for application denials due to intermediate sanctions, at §§ 422.502(b)(1)(i)(A) and 423.503(b)(1)(i)(A) we proposed to change ''Was subject to the imposition of an intermediate sanction'' to ''Was under an intermediate sanction.'' We proposed this revision because MA organizations and Part D sponsors may have a sanction imposed in one 12-month past performance review period and effective for all or part of the subsequent 12-month review period. For instance, CMS could impose a sanction in December 2022 that remains in effect until September 2023. The sanction would be in effect for the past performance review period that runs from March 2022 through February 2023 (for Contract Year 2024 MA and Part D applications filed in February 2023) and for the past performance review period that runs from March 2023 through February 2024 (for Contract Year MA and Part D applications filled in February 2024). Our proposal reflects our stated intent to deny applications from MA organizations and Part D sponsors when an active sanction existed during the relevant 12-month review period when we previously codified that intermediate sanctions are a basis for denial of an application from an MA organization or Part D sponsor in ''Medicare and Medicaid Programs; Contract Year 2022 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicaid Program, Medicare Cost Plan Program, and Programs of All-Inclusive Care for the Elderly,'' which appeared in the **Federal Register** on January 19, 2021 (86 FR 5864) hereinafter referred to as the ''January 2021 final rule.'' When we codified this requirement, a commenter requested that sanctions lifted during the 12 months prior to the application denial be excluded from past performance. We responded that ''The applying organization will receive credit for resolving the non-compliance that warranted the sanction during the next past performance review period, when, presumably, the organization will not have an active sanction in place at any time during the applicable 12-month review period'' (86 FR 6000 through 6001). Since an intermediate sanction may be active during multiple consecutive review periods, our proposed language clarifies that an organization's application may be denied as long as the organization is under sanction, not just during the 12-month review period when the sanction was imposed.

An additional factor we consider regarding the past performance of MA organizations and Part D sponsors is involvement in bankruptcy proceedings. At §§422.502(b)(1)(i)(C) and 423.503(b)(1)(i)(C) we proposed to incorporate federal bankruptcy as a basis for application denials due to past performance and to conform the two paragraphs by changing the text to ''Filed for or is currently in federal or state bankruptcy proceedings'' from ''Filed for or is currently in State bankruptcy proceedings,'' at § 422.502(b)(1)(i)(C) and ''Filed for or is currently under state bankruptcy proceedings'' at § 423.503(b)(1)(i)(C). We codified state bankruptcy as a basis for an application denial for the past performance of an MA or Part D sponsor in ''Medicare Program; Contract Year 2023 Policy and Technical Changes to the Medicare Advantage and Medicare Prescription Drug Benefit Programs; Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency; Additional Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency,'' which appeared in the **Federal Register** on May 9, 2022 (87 FR 27704). We codified that requirement because bankruptcy may result in the closure of an organization's operations and entering into a new or expanded contract with such an organization is not in the best interest of the MA or Prescription Drug programs or the beneficiaries they serve. This concern is equally applicable to both federal and state bankruptcy, so we proposed to revise the regulation so that applications from MA organizations or Part D sponsors that have filed for or are in state or federal bankruptcy proceedings may be denied on the basis of past performance. In addition, we also proposed to correct two technical issues identified since the final rule was published in May 2022. At § 422.502(b)(1)(i)(B), we proposed to change the reference to the requirement to maintain fiscally sound operations from § 422.504(b)(14) to the correct reference at § 422.504(a)(14). We also proposed to remove the duplication of § 422.502(b)(1)(i)(*A*) and (*B*).

We invited public comment on this proposal and received several comments in support of this proposal. We received no comments opposing this proposal. Therefore, we are finalizing this proposal without modification.

III. Enhancements to the Medicare Advantage and Medicare Prescription Drug Benefit Programs

A. Effect of Change of Ownership Without Novation Agreement (§§ 422.550 and 423.551)

In accordance with standards under sections 1857 and 1860 of the Act, each Medicare Advantage (MA) organization and Part D sponsor is required to have a contract with CMS to offer an MA or prescription drug plan. Further, section 1857(e)(1) and 1860D–12(b)(3)(D) of the Act authorizes additional contract terms consistent with the statute and which the Secretary finds are necessary and appropriate. Pursuant to this authority and at the outset of the Part C and Part D programs, we implemented regulations at §§ 422.550 and 423.551, respectively. These regulations require the novation of an MA or Part D contract in the event of a change of ownership involving an MA organization or Part D sponsor (63 FR 35106 and 70 FR 4561).

Our current regulations at §§ 422.550 and 423.551, as well as our MA guidance under ''Chapter 12 of the Medicare Managed Care Manual—Effect of Change of Ownership'' [2] require that when a change of ownership occurs, as defined in the regulation, advance notice must be provided to CMS and the parties to the transaction must enter into a written novation agreement that meets CMS's requirements. If a change of ownership occurs and a novation agreement is not completed and the entities fail to provide advance notification to CMS, the current regulations at §§ 422.550(d) and 423.551(e) indicate that the existing contract is invalid. Furthermore, §§ 422.550(d) and 423.551(e) provide that if the contract is not transferred to

[2] *https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/downloads/mc86c12.pdf.*

the new owner through the novation agreement process, the new owner must enter into a new contract with CMS after submission of an MA or Part D application, if needed.

The current regulations do not fully address what happens when the contract becomes ''invalid'' due to a change of ownership without a novation agreement and/or advance notice to CMS, or in other words, what happens to the existing CMS contract that was held by the purchased entity. In that circumstance, CMS would still recognize the original entity as the owner, even if the contract is now held by a different entity. Therefore, we proposed to revise §§ 422.550(d) and 423.551(e) to make it clear that in such a circumstance, CMS may unilaterally terminate the affected contract in accordance with §§ 422.510(a)(4)(ix) and 423.509(a)(4)(ix), which establish that failure to comply with the regulatory requirements contained in part 422 or part 423 (if applicable) is a basis for CMS to unilaterally terminate an MA or Part D contract.

In addition, we are strengthening CMS's enforcement authority regarding this process through the proposed amendments to §§ 422.550(d) and 423.551(e). Pursuant to CMS's authority under sections 1857 and 1860 of the Act, we proposed to amend the regulations at §§ 422.550(d) and 423.551(e) to outline the enforcement process CMS will follow, which includes imposing applicable sanctions before terminating a contract that has a change in ownership without a novation agreement in accordance with CMS requirements.

In the interest of protecting and effectively managing the MA and Part D programs, CMS, through either the novation agreement or the application process, must ensure that MA organizations and Part D Sponsors—through their respective legal entities—are eligible to contract with CMS. If CMS has no chance to assess the qualifications of the new entity and a change in ownership from one legal entity to another occurs without CMS approval of a novation agreement, CMS's ability to ensure the integrity of the MA and Part D programs and ability to monitor a contract's activity under the new legal entity would be compromised, thereby putting enrollees at risk. Thus, any change in ownership from one legal entity to another requires CMS to determine whether the new entity meets the statutory and regulatory requirements for operating a contract under the MA or Part D programs.

We proposed to impose enrollment and marketing sanctions, as outlined in §§ 422.750(a)(1) and (a)(3) and 423.750(a)(1) and (a)(3) on the affected contract. Such sanctions will remain in place until CMS approves the change of ownership, (including execution of an approved novation agreement) or the contract is terminated. We also proposed to provide an opportunity for organizations to demonstrate that the legal entity assuming ownership by way of a change of ownership without a novation agreement meets the requirements set forth by our regulations. This may be completed in the following ways:

- If the new owner does not participate in the same service area as the affected contract, at the next available opportunity, it must apply for and be conditionally approved for participation in the MA or Part D program and, within 30 days of the conditional approval (if not sooner), submit the documentation required under §§ 422.550(c) or 423.551(d) for review and approval by CMS (note that organizations may submit both the application and the documentation for the change of ownership concurrently); or
- If the new owner currently participates in the MA or Part D program and operates in the same service area as the affected contract, it must, within 30 days of imposition of intermediate sanctions, submit the documentation required under §§ 422.550(c) or 423.551(d) for review and approval by CMS.
- If the new owner is not operating an MA or Part D contract in the same service area and fails to apply for an MA or Part D contract in the same service area at the next opportunity to apply, the existing contract will be subject to termination in accordance with §§ 422.510(a)(4)(ix) or 423.509(a)(4)(x). Or, if the new owner is operating in the same service area and fails to submit the required documentation within 30 days of imposition of intermediate sanctions, the existing contract will be subject to termination in accordance with §§ 422.510(a)(4)(ix) or 423.509(a)(4)(x).

Imposition of intermediate sanctions under §§ 422.750(a)(1) and (a)(3) and 423.750(a)(1) and (a)(3) triggers the past performance rules applicable under §§ 422.502(b)(1) or 423.503(b)(1). Imposition of intermediate sanctions is a factor considered under CMS's evaluation and determination of an organization's information from a current or prior contract during the MA and Part D application process.

We solicited comments on these proposals. We appreciate stakeholders' input on the proposed changes. We received the following comments and have provided responses.

Comment: A commenter suggested that CMS not terminate a contract when a change of ownership has occurred without notification to CMS, but rather suggested CMS apply a substantial penalty or fine to the new legal entity.

Response: In the interest of managing the MA and Part D programs and protecting all enrollees, CMS must ensure, through the application process, that MA organizations and Part D sponsors are eligible to contract with CMS. This is existing policy that is also consistent with statutory requirements under sections 1855 and 1857 and 1860D–12 of the Act. The option to terminate the contract is a critical tool for CMS to ensure that only qualified entities can contract with CMS to serve enrollees. Imposing a substantial penalty or fine on the new owner would not protect enrollees who are already in MA or Part D plans that cannot adequately serve them. Moreover, under §§ 422.550(d)(2) and 423.551(e)(2), entities can cure any deficiencies within 30 days of the imposition of intermediate sanctions. If an entity wishes to avoid termination, it will have the opportunity to do so.

Comment: A commenter indicated that the proposed approach should not apply to those changes of ownership that occur under the same parent organization.

Response: In order to ensure the integrity of the MA and Part D programs, CMS must review any change in ownership from one legal entity to another, regardless of the relationship to the parent organization, to confirm whether the new legal entity meets the regulatory requirements for operating a contract in a given service area. As previously indicated, our current regulations at §§ 422.550 and 423.551, as well as our MA guidance under ''Chapter 12 of the Medicare Managed Care Manual—Effect of Change of Ownership,'' [3] require that when a change of ownership occurs, as defined in the regulation, advance notice must be provided to CMS and the parties to the transaction must enter into a written novation agreement that meets CMS's requirements.

Comment: A commenter expressed concern that CMS's application timelines would negatively impact potential changes of ownership and suggested instead that CMS not impose the proposed sanctions or that CMS implement the sanctions for a period of

[3] *https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/downloads/mc86c12.pdf.*

time that is less time than the application cycle.

Response: As previously noted, CMS must determine whether the new legal entity involved in the change in ownership meets all CMS requirements for operating a MA contract. CMS must also have the opportunity to review and evaluate the new entity. When a change in ownership from one legal entity to another occurs without CMS approval, it compromises CMS's ability to ensure the integrity of the MA and Part D programs and hampers CMS's ability to monitor a contract's activity under the new legal entity, thereby putting enrollees at risk. The ability of CMS to ensure that MA and Part D plans are adequate to cover enrollees' health care needs outweighs concerns about potential timeline issues.

We believe that our process provides a sufficient opportunity for organizations to demonstrate, and CMS to determine, that they meet all CMS's requirements as set forth in our regulations.

Comment: A commenter asked CMS to clarify the types of sanctions that would be applicable when a change of ownership without novation agreement occurs.

Response: CMS would impose enrollment and marketing sanctions, which are outlined in our regulations at § 422.750(a)(1) and (a)(3) and § 423.750(a)(1) and (a)(3). These sanctions will remain in place until CMS approves the change of ownership (including execution of an approved novation agreement) or the contract is terminated.

After considering the comments received and for the reasons discussed in the proposed rule and our responses to comments, we are finalizing our proposal to amend the regulations at §§ 422.550(d) and 423.551(e) with technical corrections to the cross-references proposed in § 423.551(e). The cross-references in paragraphs (e)(1) and (e)(2) have been corrected to reflect the appropriate Part D sections in the final regulatory text in this final rule. In addition, we are finalizing minor grammatical and organizational revisions to the regulations to improve the readability and clarity of the text.

B. Part D Global and Targeted Reopenings (§§ 423.308 and 423.346)

1. Executive Summary

2. Provisions of the Proposed Regulation (Preamble)

Pursuant to the authority under section 1860D–15(f)(1)(B) of the Act, the Secretary has the right to inspect and audit any books and records of a Part D sponsor or MA organization that pertain to the information regarding costs provided to the Secretary. We stated in the January 2005 Part D final rule (70 FR 4194, 4316) that this right to inspect and audit would not be meaningful, if upon finding mistakes pursuant to such audits, the Secretary was not able to reopen final payment determinations. Therefore, we established that CMS may rectify any final payment determination issues in a reopening provision at § 423.346. In the January 2005 Part D final rule, we established that a reopening was at CMS' discretion and could occur within the following timeframes after the final payment determination was issued: (1) 12 months for any reason, (2) 4 years for good cause, or (3) at any time when there is fraud or similar fault. We operationalized this provision by conducting program-wide reopenings (that is, global reopenings) and, when necessary, reopenings targeted to specific sponsors' contracts (that is, targeted reopenings).

In our December 2022 proposed rule, we proposed to codify the definitions of ''global reopening'' and ''targeted reopening.'' We also proposed to modify the timeframe CMS may perform a reopening for good cause from within 4 years to within 6 years to align with the 6-year overpayment look-back period described at § 423.360(f) and to help ensure that payment issues, including overpayments, can be rectified. In addition, we proposed to codify the circumstances under which CMS will notify the sponsor(s) of our intention to perform a final payment determination reopening and the requirement for CMS to announce when it has completed a reopening. We are finalizing our proposed changes without modifications.

a. Summary of the Current Process

Under the current process and under § 423.346, CMS performs a reopening of a Part D payment reconciliation (that is, the initial payment determination) as a result of revisions of prescription drug event (PDE) data and/or direct and indirect remuneration (DIR) data due to plan corrections, CMS system error corrections, post reconciliation claims activity, and audit and other post reconciliation oversight activity. Based on our experience in the Part D program and the PDE and DIR data changes, we understood that this process would require CMS to perform an initial payment determination reopening every contract year.

By calendar year 2013, CMS had reopened the 2006, 2007, and 2008 Part D payment reconciliations and, approximately 4 years after those reopenings were completed, began subsequent Part D payment reconciliation reopenings (consistent with the timing described at § 423.346(a)(2)). These reopenings included all Part D contracts that met the following criteria: (1) were in effect during the contract year being reopened, and (2) were either in effect at the time CMS completed the reopening or, if nonrenewed or terminated pursuant to § 423.507 through § 423.510 (collectively referred to as ''terminated'' for the purposes of these reopening provisions), had not completed the final settlement process by the time CMS completed the reopening. CMS has referred to this type of program-wide reopening as a ''global reopening.'' See, for example, HPMS memorandum, ''Reopening of the 2006, 2007, and 2008 Part D Payment Reconciliations,'' April 2, 2012 (available at *https://www.hhs.gov/guidance/sites/default/files/hhs-guidance-documents/part%20dreopeningannoucement_199.pdf*).

In addition to ''global reopenings,'' CMS has performed reopenings as part of our process to correct certain issues. We would consider performing a reopening to correct issues such as those associated with CMS-identified problems with an internal CMS file that CMS used in a Part D payment reconciliation, a coverage gap discount program reconciliation, or a reopening; CMS corrections to a PDE edit that impacted a specific plan type (for example, EGWPs); fraud or similar fault of the Part D sponsor or any subcontractor of the Part D sponsor; or a Part D sponsor's successful appeal of a reconciliation result. See, for example, HPMS memorandum, ''Second reopening of the 2011 Final Part D Payment Reconciliation,'' July 7, 2017 (available at *https://www.hhs.gov/guidance/sites/default/files/hhs-guidance-documents/second%20reopening%20of%20the%202011%20part%20d%20reconciliation_final_403.pdf*) and HPMS memorandum, ''Reopening of the 2014 Final Part D Reconciliation for Employer Group Waiver Plans (EGWPs),'' January 11, 2017 (available at *https://www.hhs.gov/guidance/sites/default/files/hhs-guidance-documents/cy14%20egwp%20reopening%20announcement_01-11-17_404.pdf*). These reopenings are not program-wide, but rather are targeted to the Part D contracts that are impacted by the particular issue that needs to be addressed by CMS (that is, ''targeted reopenings''). The targeted reopenings

are not performed on a predictable schedule, and instead are utilized by CMS in the confines of the reopening timeframes described in the current regulation at § 423.346(a)(1) through (3).

Although CMS has in recent experience utilized targeted reopenings as part of our process to correct certain issues, under the current process, if a particular issue was program-wide, CMS would perform a global reopening to address that issue. This global reopening could be in addition to the scheduled global reopening that CMS has performed approximately 4 years after the Part D payment reconciliation for that year.

b. Aligning the Timing of Reopenings to the Overpayment Look-Back Period

Pursuant to the current § 423.346(a)(2), CMS may reopen and revise an initial or reconsidered final payment determination within 4 years after the date of the notice of the initial or reconsidered determination to the Part D sponsor, upon establishment of good cause for reopening. As already discussed, this paragraph (a)(2) has set up our current global reopening schedule. CMS performs the Part D payment reconciliation (that is, the initial payment determination) for a contract year, and then within 4 years of announcing the completion of that reconciliation, CMS performs a global reopening on that contract year.

This reopening process is used to recoup overpayments associated with PDE and DIR related overpayments. Pursuant to the current overpayment provision at § 423.360(f), there is a ''look-back period'' in which a Part D sponsor must report and return any overpayment identified within the 6 most recent completed payment years. As described at § 423.360, an overpayment occurs after the ''applicable reconciliation.'' The applicable reconciliation refers to the deadlines for submitting data for the Part D payment reconciliation.

The following example illustrates the timing of the look-back period. The deadlines for submitting data for the 2021 Part D payment reconciliation were in June 2022. Prior to the deadlines for submitting data for the 2021 Part D payment reconciliation, a PDE or DIR related overpayment could not exist for 2021, and the latest year for which an overpayment could occur was 2020. Therefore, prior to the deadlines for submitting data for the 2021 Part D payment reconciliation, the look-back period was 2015–2020.

This 6-year look-back period along with the 4-year reopening timeframe described at § 423.346(a)(2) results in overpayments being reported for a contract year after CMS has performed the global reopening for that contract year. Continuing the prior example, if a Part D sponsor identified a PDE or DIR related overpayment associated with contract year 2016 in May 2022 (that is, prior to the deadlines for submitting data for the 2021 Part D payment reconciliation), that overpayment falls within the 2015–2020 look-back period, and the sponsor would have reported the overpayment to CMS mid-2022. However, CMS completed the global reopening of the 2016 Part D payment reconciliation in January 2022. This discrepancy between the 4-year reopening timeframe and the 6-year overpayment look-back period results in operational challenges for CMS, as discussed subsequently in this section.

CMS had described a process for recouping PDE and DIR related overpayments after the global reopening for the contract year at issue had been completed. In the preamble to our final rule, ''Contract Year 2015 Policy and Technical Changes to the Medicare Advantage and the Medicare Prescription Drug Benefit Programs,'' 79 FR 29843 (May 23, 2014) and in subsequent subregulatory guidance, we stated that overpayments reported after the global reopening would be reported by the sponsor with an auditable estimate and that CMS would recoup the overpayment by either requesting a check or offsetting monthly prospective payments for the amount provided in the auditable estimate. See HPMS memorandum, ''Reopening Process and Updates to the PDE/DIR-related Overpayment Reporting,'' April 6, 2018 (available at *https://www.hhs.gov/guidance/sites/default/files/hhs-guidance-documents/hpms%2520memo_reopen%2520and%2520overpay_04-06-2018_205.pdf*). For PDE and DIR related overpayments, that approach presents challenges primarily because sponsors have also reported PDE and DIR related underpayments after the global reopening, which we do not have a method to process other than the reopening process.

We have contemplated doing targeted reopenings to reconcile the changes in PDE and DIR data, but that also presents operational challenges. Targeted reopenings are conducted using the same payment reconciliation system that conducts the Part D payment reconciliation, the coverage gap discount program reconciliation, and the scheduled global reopening. Given the volume of reporting after the scheduled global reopening, it would be challenging to find the time and resources to run multiple targeted reopenings.

Therefore, we proposed to modify § 423.346(a)(2) such that CMS may reopen and revise an initial or reconsidered final payment determination after the 12-month period (described at § 423.346(a)(1)), but within 6 years after the date of the notice of the initial or reconsidered determination to the Part D sponsor, upon an establishment of good cause for reopening. This change will allow CMS to process all changes to PDE data and DIR data after the overpayment look-back period for a contract year. Once a contract year falls outside of the look-back period, we would perform the global reopening for that contract year within the new 6-year timeframe, to recoup the PDE and DIR related overpayments reported by sponsors for that contract year (and process underpayments).

Prior to the new reopening timeframe going into effect, CMS will provide operational guidance, as has been done for past regularly scheduled global reopenings. The following example describes the timing for performing the scheduled global reopening. The data for the 2020 Part D payment reconciliation was due in June 2021. That reconciliation was completed in November 2021. Assuming a 4-year schedule, the DIR data for the contract year 2020 global reopening would be due to CMS by the end of July 2025, PDE data would be due in September 2025, and the 2020 global reopening would be completed the end of 2025 or early 2026. However, the 2020 contract year remains in the overpayment look-back period through June 2027. Under the 6-year timeframe, data for the 2020 global reopening would be due middle to late 2027, and the global reopening would be completed late 2027 or early 2028, after the 6-year look-back period.

Comment: We received a comment that supported our proposal and our efforts to align the look-back period with the reopening timeframe.

Response: We thank the commenter for the support.

Comment: A commenter stated that while they do not have a conceptual problem with expanding the timeframe for overpayments associated with PDE record data and DIR data, they were concerned that looking back more than 4 years would result in administrative costs that exceed the value of the overpayment recoupment and recommended that CMS withdraw the proposal unless an analysis demonstrates that the expanded timeframe would result in overpayment

recoupments that exceed increased administrative costs.

Response: We are not, as the commenter states, expanding the timeframe for overpayments. Under the existing requirements, described at § 423.360(f), sponsors are required to report and return any overpayment identified within the 6 most recently completed payment years. To clarify, we proposed to modify the reopening timeframe, described at § 423.346(a)(2), which does not have any impact on the existing timeframe for reporting and returning overpayments.

We decline the commenter's recommendation to withdraw the proposal unless an analysis demonstrates that the expanded timeframe would result in overpayment recoupments that exceed increased administrative costs. We do not believe that expanding the reopening timeframe from within 4 years to within 6 years will result in any additional burden. Additionally, the intent of the proposed change is not strictly focused on overpayment recoupment, but rather, is a remedy to operational challenges associated with the misalignment of the overpayment look-back period and the reopening timeframe.

Comment: A commenter expressed concerns that DIR fees collected from pharmacies challenge patient access and pharmacies' viability. The commenter was concerned that extending the timeframe at § 423.346(a)(2) from within 4 years to within 6 years without any guardrails or protections in place for community pharmacies could lead to instances in which sponsors take advantage of the process to further claw back payments from pharmacies. To address this concern, the commenter requested that CMS consider establishing protections to prevent sponsors from recouping pharmacy overpayments.

Response: The intent of the proposed change is to remedy operational challenges associated with the misalignment of the reopening timeframe, described at § 423.346(a)(2), and 6-year overpayment look-back period, described at § 423.360(f). The change in the reopening timeframe from within 4 years to within 6 years does not, in any way, change a sponsor's responsibility to report and return overpayments within the 6-year look-back period. The impact of DIR fees collected from pharmacies, pharmacy claw backs, and the recoupment of overpayments from pharmacies are outside of the scope of the proposed change.

After consideration of comments, we are finalizing the proposed requirements related to aligning the timing of reopenings to the overpayment look-back period without modification.

c. Standards for Performing Global and Targeted Reopenings

Consistent with the existing regulation at § 423.346(a) and (d), reopenings are at CMS's discretion. Under the current process, CMS has used its discretion to perform a scheduled global reopening on a Part D payment reconciliation within the timeframe specified at § 423.346(a)(2). Given the significant time and costs associated with conducting a reopening, it is expected that CMS will use its discretion to conduct a targeted reopening (or an additional global reopening for a program-wide issue) only under limited circumstances. We would contemplate using our discretion to perform a targeted reopening (or an additional global reopening) to correct or rectify a CMS file or CMS-created PDE edit-type issue, revise a payment determination that was based on PDE and/or DIR data that was submitted due to fraudulent activity of the sponsor or the sponsor's contractor, or pursuant to a successful appeal under § 423.350. CMS will not use its discretion to conduct a reopening to reconcile data that will be, or should have been, reconciled in the scheduled global reopening, which would include data from plan corrections, claims activity, and audits completed after the deadline to submit data for the scheduled global reopening. In addition, we are unlikely to conduct a reopening solely pursuant to a sponsor's request.

We proposed that in order to be included in a reopening, a contract must have been in effect (that is, receiving monthly prospective payments and submitting PDE data for service dates in that year) for the contract year being reopened. Intuitively, if a contract was not in the reconciliation for a particular contract year, it cannot be included in the reopening of that contract year's reconciliation. We also proposed that if CMS has sent a nonrenewed or terminated contract the ''Notice of final settlement,'' as described at § 423.521(a), by the time CMS completes the reopening, described at proposed § 423.346(f), CMS will exclude that contract from that reopening. We established the proposed exclusion based on the timing of the issuance of the ''Notice of final settlement'' and completion of the reopening, as opposed to the announcement of the reopening, due to the potentially lengthy reopening process and the likelihood that the ''Notice of final settlement'' will be issued prior to CMS completing the reopening process. For example, under the current timeframe for the scheduled global reopening, CMS has typically announced in the Spring and completed the reopening in December of that year or January of the next. During that timeframe, nonrenewed or terminated contracts will likely go through the final settlement process, and as a result, will not be able to complete the reopening process. This is because, pursuant to § 423.521, after the final settlement amount is calculated and the ''Notice of final settlement'' is issued to the Part D sponsor, CMS will no longer apply retroactive payment adjustments, and there will be no adjustments applied to amounts used in the calculation of the final settlement amount. We proposed to codify these inclusion criteria at § 423.346(g).

We also proposed at § 423.346(g)(2) that, specifically for targeted reopenings, CMS will identify which contracts or contract types are to be included in the reopening. This is because targeted Part D contract reopenings are impacted by the particular issue that CMS needs to address. Therefore, in order to be included in a targeted reopening, the Part D contract must have been impacted by the issue that causes CMS to perform a reopening. To date, most targeted reopenings have been performed because of a CMS-identified issue that most sponsors were not aware of prior to CMS completing the targeted reopening. Accordingly, sponsors would not be aware of this specific inclusion criteria unless CMS informed the sponsors of the CMS-identified issue and the sponsors' contracts were impacted. Therefore, we proposed that CMS notify sponsors of this specific inclusion criteria via the proposed reopening notification and/or the proposed reopening completion announcement.

We did not receive comments on this section of the proposal and are finalizing the proposed requirements related to the standards for performing global and targeted reopenings without modification.

c. Reopening Notification and Reopening Completion Announcement

We proposed to add new paragraphs (e) and (f) at § 423.346 to codify our existing policy regarding reopening notifications and reopening completion announcements, respectively. We proposed to codify at § 423.346(e) that CMS will notify the sponsor(s) that will be included in the global or targeted reopening of its intention to perform a global or a targeted reopening—that is, the sponsor would receive prior notice

of the reopening—only when it is necessary for the sponsor(s) to submit PDE data and/or DIR data prior to the reopening. In contrast, if it is not necessary for the sponsor(s) to submit data prior to a reopening, we proposed to notify the sponsor(s) only after CMS completes the reopening. For example, if CMS identifies an error in an internal CMS file that CMS used in the reconciliation or reopening, CMS may correct that file and reopen (holding all other data originally used constant), without the need for the sponsor(s) to submit PDE data or DIR data. See, for example, HPMS memorandum, ''Second reopening of the 2011 Final Part D Payment Reconciliation,'' July 7, 2017 (available at *https://www.hhs.gov/guidance/sites/default/files/hhs-guidance-documents/second%20reopening%20of%20the%202011%20part%20d%20reconciliation_final_403.pdf*).

We proposed at § 423.346(e)(1) that CMS will include in the notification the deadline for submitting PDE data and/or DIR data to be included in the reopening. We also proposed that the deadline to submit this data will be at least 90 calendar days after the date of the notice.

In addition, we proposed at § 423.346(e)(2) that the reopening notification will include inclusion criteria in the form of a description of the contract(s) (either specifically by contract number or generally by contract-type or contract status) that will be included in the reopening. This will put a sponsor on notice of whether its contracts are included in the reopening.

We proposed to codify at § 423.346(f) that CMS will announce when it has completed a reopening, including in cases where CMS issued a notice under proposed paragraph (e). This announcement is consistent with existing policy and past practice. At paragraph (f)(1), we proposed to specify that CMS will provide a description of the data used in the reopening. As in past reopenings, this data could include PDE data described by the processed date on the Prescription Drug Front-end System (PDFS) response report, DIR data described by the date received in the Health Plan Management System (HPMS), as well as any other relevant data used to perform the reopening.

At paragraph § 423.346(f)(2), we proposed to include in the announcement a statement of the contract(s) (either specifically by contract number or generally by contract-type or contract status) that were included in the reopening, consistent with proposed § 423.346(e)(2). We proposed to specify which contracts or contract types are included in the reopening in both the announcement of the completion of the reopening and the reopening notification because CMS' proposal would not require issuing a reopening notification when it is not necessary for the sponsor(s) to submit PDE data and/or DIR data prior to the reopening.

At paragraph § 423.346(f)(3), we proposed to include in the announcement of the completion of the reopening the date by which reports describing the reopening results will be available to the sponsor. In addition, at paragraph (f)(4), we proposed to include the date by which a sponsor must submit an appeal, pursuant to § 423.350, if the sponsor disagrees with the reopening results.

We did not receive comments on this section of the proposal and are finalizing the proposed requirements related to the reopening notification and the announcement of the completion of the reopening without modification.

d. Definitions of ''Global Reopening'' and ''Targeted Reopening''

We proposed to establish definitions of global reopening and targeted reopening at § 423.308. We proposed to define a global reopening as a reopening under § 423.346 in which CMS includes all Part D sponsor contracts that meet the inclusion criteria described at proposed § 423.346(g). We proposed to define a targeted reopening as a reopening under § 423.346 in which CMS includes one or more (but not all) Part D sponsor contracts that the meet the inclusion criteria described at proposed § 423.346(g). Finally, consistent with these proposed definitions, we proposed to include the terms ''global reopening'' and ''targeted reopening'' at the beginning of existing § 423.346(a) to clarify that the reopenings that CMS may perform under § 423.346(a) may be global or targeted, as defined in proposed § 423.308.

Comment: We received a comment supporting our proposal to codify the definitions of ''global reopening'' and ''targeted reopening.''

Response: We thank the commenter for the support.

We are finalizing the proposed definitions of ''global reopening'' and ''targeted reopening'' without modification.

The proposals described in this section of the final rule are consistent with our current guidance and requirements. None of the proposed changes would place additional requirements on Part D sponsors, nor do the proposed changes to §§ 423.308 and 423.346 place any additional burden on the Part D sponsors or their pharmacy benefit managers (PBMs). Our proposed rule does not change the extent to which Part D sponsors comply with the reopening process. Part D sponsors' compliance with this reopening process is evidenced by each Part D sponsor's signed attestation certifying the cost data (pursuant to § 423.505(k)(3) and (5)) that CMS uses in each of the reopenings. In addition, the burden associated with the submission of cost data is already approved under the OMB control numbers 0938–0982 (CMS–10174) and 0938–0964 (CMS–10141). Therefore, as our changes do not result in additional burden, we have not included a discussion a of this provision in the COI section of this rule. In addition, we are not scoring this provision in the Regulatory Impact Analysis section because industry is already complying with this process.

Based on the comments received and for the reasons outlined in the proposed rule and our responses to comments, we are finalizing the proposed changes to the reopening provision at § 423.346 and the related changes to § 423.308 without modification.

C. Medicare Final Settlement Process and Final Settlement Appeals Process for Organizations and Sponsors That Are Consolidating, Nonrenewing, or Otherwise Terminating a Contract (§§ 422.500(b), 422.528, 422.529, 423.501, 423.521, and 423.522)

In our December 2022 proposed rule, we proposed to amend 42 CFR part 422, subpart K, and part 423, subpart K, to codify in regulation our final settlement process for Medicare Advantage (MA) organizations and Part D sponsors whose contracts with CMS have been consolidated with another contract, nonrenewed, or otherwise terminated. As described subsequently in this section, we are finalizing our proposed changes.

Sections 1857(a) and 1860D–12(b)(1) of the Act require contracts between CMS and the legal entity that offers, respectively, one or more MA plans or Part D plans to beneficiaries. Sections 1857(e)(1) and 1860D–12(b)(3)(D)(i) of the Act provide that these contracts shall contain terms and conditions that the Secretary may find necessary and appropriate in addition to the applicable requirements and standards set forth in the statute and the terms of payment set by the statute. At Part 422, subpart K, and Part 423, subpart K, we have codified provisions relating to the contracts between CMS and MA

organizations and Part D sponsors, including a description of minimum terms that must be included in the contract; the duration of contracts; minimum enrollment, reporting, and prompt payment requirements; and provisions regarding the consolidation, nonrenewal, or termination of a contract. In addition, these contracts require compliance with the regulations governing the program, which are adopted as standards implementing and interpreting the statutory requirement and as new terms and conditions that are not inconsistent with, and necessary and appropriate for administration of, the MA and Part D programs. This final rule will add to those requirements.

CMS makes monthly payments to MA organizations and Part D sponsors for each beneficiary enrolled in a plan for that month. If there is an update to the payment amount that was paid for a month, CMS will make an adjustment to a month's payment for a beneficiary in a later month. For example, if a beneficiary's Medicaid eligibility for a month is changed, CMS will recalculate the payment for that month after receipt of the updated Medicaid eligibility status for a beneficiary and make a retroactive payment update to that month's payment in a later month. In addition, CMS reconciles a number of different payment amounts after specified periods of time to permit plan data submission for a payment year as described subsequently in this section. These reconciliations typically take place the year after a payment year and result in retroactive payment adjustments for the prior payment year.

Generally, MA organizations and Part D sponsors continue to offer plans to beneficiaries from one year to the next. From time to time, a contract between CMS and an MA organization or Part D sponsor may consolidate, nonrenew, or otherwise terminate as a result of a plan-initiated termination, mutual termination, or CMS-initiated termination. Once a contract has consolidated, nonrenewed, or otherwise terminated, the retroactive payment adjustments for a year that would have been made had the contract remained in effect are not paid to the MA organization or Part D sponsor but are held until after the reconciliations for the final payment year are calculated as described subsequently in this section. After such time, all retroactive adjustments to payment for the consolidated, nonrenewed, or otherwise terminated contract are totaled and either a net payment amount is made to the MA organization or Part D sponsor, or an amount is charged to the MA organization or Part D sponsor.[4]

The process used to determine the final net payments for an MA organization or Part D sponsor, provide notice of these amounts to the MA organization or Part D sponsor, adjudicate disputes, and receive or remit payment constitutes the *final settlement process* and begins at least 18 months following the end of the last contract year in which the contract was in effect.

Before CMS determines the final settlement amount owed to or from an MA organization or Part D sponsor whose contract has consolidated, nonrenewed, or otherwise terminated, CMS first completes a series of reconciliation activities and calculates the related payment adjustments for both consolidated, nonrenewed, or otherwise terminated contracts as well as ongoing contracts: (1) MA risk adjustment reconciliation (described in § 422.310(g)), (2) Part D annual reconciliation (described in §§ 423.336 and 423.343), (3) Coverage Gap Discount Program annual reconciliation (described in § 423.2320), and (4) medical loss ratio (MLR) report submission and remittance calculation (described in §§ 422.2460, 422.2470. 423.2460, and 423.2470). Each individual reconciliation process allows the MA organization or Part D sponsor to raise concerns about the calculation of that particular reconciliation amount. Once each reconciliation is complete and no errors have been identified, the MA organization or Part D sponsor is presumed to accept that reconciliation amount and it is not reconsidered during the final settlement process.

For a given consolidated, nonrenewed, or otherwise terminated contract, the *final settlement amount* is then calculated by summing the applicable reconciliation amounts from these 4 processes and any retroactive payment adjustments that accumulated after a contract has consolidated, nonrenewed, or otherwise terminated. Note that these reconciliation amounts represent all of the reconciliation amounts that could be included in the final settlement calculation. Whether each reconciliation amount will factor into the final settlement amount for a particular contract will depend on the specifics of that contract. For example, MA risk adjustment reconciliation would not be performed for a prescription drug plan contract.

The *final settlement adjustment period* is the period of time between when the contract consolidates, nonrenews, or otherwise terminates and the date the MA organization or Part D sponsor is issued a notice of the final settlement amount (also referred to herein as the *notice of final settlement*). The length of the final settlement period is determined by the time it takes for these reconciliations and related payment adjustments to be completed. During this time, CMS continues to calculate payment adjustments that reflect changes in beneficiary status.[5] CMS tracks all payment adjustments for a terminated contract for use in the final settlement for that contract.

The final settlement adjustment period ends on the date on the *notice of final settlement* that CMS issues to MA organizations and Part D sponsors. At the end of the final settlement adjustment period, CMS will no longer make adjustments to reconciliations for a contract that has consolidated, nonrenewed, or otherwise terminated, that would otherwise have been made for a continuing contract. Once the notice of final settlement has been issued, contracts that have been consolidated, nonrenewed, or otherwise terminated will also be excluded from reopenings, including program-wide reopenings, or reconciliations for prior payment years when the contract was in effect. For example, under § 423.346, CMS has the authority to reopen and revise an initial or reconsidered Part D final payment determination, including the Part D reconciliation amounts included in the final settlement amount, for a prior payment year. However, this reopening would not apply to consolidated, nonrenewed, or otherwise terminated contracts that have already received a notice of final settlement. This allows CMS to largely close out any outstanding financial responsibilities associated with consolidated, nonrenewed, or otherwise terminated contracts, either on the part of CMS or on the part of the MA organization or Part D sponsor.[6]

After determining the final settlement amount, CMS issues a notice of final settlement to the MA organization or Part D sponsor for each contract that has consolidated, nonrenewed, or otherwise

[4] In the case of a bankrupt or liquidated plan that owes CMS money, CMS still completes the reconciliations, final settlement process, and issues a notice of final settlement, but refers the plan to the Department of Justice to collect the money owed.

[5] A beneficiary profile status change reflects a change in a beneficiary's economic or health status, such as low-income status for Part D, Medicaid status, Hospice or ESRD status.

[6] Once a contract has completed final settlement, the MA organization or Part D sponsor may still have financial responsibilities under any other applicable statute or regulation.

terminated, even if the final settlement amount is $0. The notice of final settlement explains whether the MA organization or Part D sponsor will receive or owe a final settlement amount and provides the information needed to conduct the associated financial transaction. The notice of final settlement includes the information CMS used to calculate the final settlement amount, including the payment adjustments that are reported on all monthly membership reports created from the date the contract ended until the month the final settlement amount was calculated. It also includes information on the process and timeline for requesting a review concerning the accuracy of the final settlement amount calculation.

In our proposed rule, we proposed to codify longstanding and existing guidance pertaining to procedures for the final settlement process described in the previous paragraphs. In addition, we proposed to add a new appeals process for MA organizations or Part D sponsors that disagree with the final settlement amount. MA organizations or Part D sponsors may request an appeal of the final settlement amount within 15 calendar days of the date of issuance of the notice of final settlement. We believe that will provide organizations with sufficient time to request an appeal, as MA organizations and Part D sponsors will already be aware of the reconciliation amounts that factor into the final settlement amount at the time the notice of final settlement is issued, and requiring a request for appeal within this timeframe will help ensure accurate and timely payment of final settlement amounts. If an MA organization or Part D sponsor agrees with the final settlement amount, no response will be necessary or required. Failure to request appeal within 15 calendar days of the date of issuance of the notice of final settlement will indicate acceptance of the final settlement amount. We strongly encourage MA organizations and Part D sponsors to communicate their acceptance to CMS to facilitate prompt payment.

Finally, in addition to codifying our longstanding and existing review process under which MA organizations and Part D sponsors are able to request a reconsideration of CMS's final settlement amount calculation, we proposed to add two additional levels of appeal: (1) an informal hearing conducted by the CMS Office of Hearings to review CMS's initial determination, following a request for appeal of the reconsideration of CMS's initial determination, and (2) a review by the CMS Administrator of the hearing officer's determination if there is an appeal of the hearing officer's determination. We believe that these additional levels of appeal will afford MA organizations and Part D sponsors sufficient opportunities to present objections to the calculation of the final settlement amount. This additional process will only be available to appeal CMS's final settlement amount calculation and will not be used to review any prior payments or reconciliation amounts. MA organizations and Part D sponsors seeking review of prior payments or reconciliation amounts must do so during the appropriate reconciliation process. CMS believes that these additional levels of appeal will only be used in exceptional circumstances given the narrow, mathematical nature of the final settlement process. We anticipate that calculation errors will be rare, and, if they do occur, that they will be quickly corrected to the mutual satisfaction of both parties without a need for further review.

1. Process for MA Organizations and Part D Sponsors That Do Not Request an Appeal

If an MA organization or Part D sponsor that owes a final settlement amount to CMS does not request an appeal or provides an optional response acknowledging and confirming the amount owed to CMS within 15 calendar days of the date of the notice of final settlement, the MA organization or Part D sponsor will be required to remit full payment to CMS within 120 calendar days of receiving the notice of final settlement. If an MA organization or Part D sponsor is owed money and does not appeal the final settlement amount, CMS will remit payment to the MA organization or Part D sponsor within 60 calendar days of the date of issuance of the notice of final settlement. If an MA organization or Part D sponsor does not owe or is not owed a final settlement amount and does not request an appeal of the $0 final settlement amount within 15 calendar days of the date of issuance of the notice of final settlement, no further actions will occur. If an MA organization or Part D sponsor does not appeal the final settlement amount indicated in the notice of final settlement within 15 calendar days of the issuance of the notice of final settlement, no subsequent requests for appeal will be considered.

CMS did not receive comments on this section of the proposal.

2. Process for Appealing the Final Settlement Amount

In cases in which the MA organization or Part D sponsor submits a request for an appeal of the final settlement amount within 15 calendar days of the date of the notice of final settlement, the MA organization or Part D sponsor will have to specify the calculation with which they disagree and the reasons for their disagreement, as well as provide evidence supporting the assertion that CMS's calculation of the final settlement amount described in the notice of final settlement is incorrect. MA organizations and Part D sponsors will not be able to submit new reconciliation data or data that was submitted to CMS after the final settlement notice was issued. CMS will not consider information submitted for the purpose of retroactively adjusting a prior reconciliation.

CMS will not accept requests for appeal that are submitted more than 15 calendar days after the date of issuance of the notice of final settlement. As noted previously, if an MA organization or Part D sponsor does not reply within 15 calendar days, they will be deemed to accept the final settlement amount indicated in the notice of final settlement.

Once CMS has reconsidered the calculation of the final settlement amount in light of the evidence provided by the MA organization or Part D sponsor, CMS will provide written notice of the reconsideration decision to the MA organization or Part D sponsor.

If the MA organization or Part D sponsor does not agree with CMS's reconsideration decision, it will be able to request an informal hearing from a CMS hearing officer. The MA organization or Part D sponsor will have to submit a request for review within 15 calendar days of the date of CMS's reconsideration decision. The MA organization or Part D sponsor will be required to provide a copy of CMS's decision, the findings or issues with which it disagrees, and the reasons why it disagrees with CMS's decision. As the hearing officer's review will be limited to a review of the existing record, the MA organization or Part D sponsor will not be able to submit new evidence to support its assertion that CMS's calculation of the final settlement amount described in the notice of final settlement is incorrect in addition to the evidence submitted during CMS's reconsideration.

The CMS hearing officer will provide written notice of the time and place of the informal hearing at least 30 days before the scheduled date and the CMS

reconsideration official will provide a copy of the record that was before CMS when CMS made its reconsideration decision to the hearing officer. The CMS hearing officer will not receive new testimony or accept new evidence in addition to the evidence submitted by the MA organization or Part D sponsor during CMS's reconsideration to support its assertion that CMS's calculation of the final settlement amount is incorrect.

Once the hearing officer has reviewed the record, the hearing officer will send a written decision to the MA organization or Part D sponsor explaining the basis of the hearing officer's decision. The hearing officer's decision will be final and binding unless the decision is reversed or modified by the CMS Administrator.

If the MA organization or Part D sponsor does not agree with the hearing officer's decision, they will be able to request an additional, final review from the CMS Administrator. The MA organization or Part D sponsor will have to submit a request for review within 15 calendar days of the date of the issuance of CMS hearing officer's decision. The MA organization or Part D sponsor will be able to submit written arguments to the Administrator for review but will not be able to submit evidence in addition to the evidence submitted during CMS's reconsideration.

The CMS Administrator will have the discretion to elect to review the hearing officer's decision or decline to review the hearing officer's decision within 30 calendar days of receiving the request for review. If the Administrator declines to review the hearing officer's decision, the hearing officer's decision will be final and binding. If the Administrator elects to review the hearing officer's decision and any written argument submitted by the MA organization or Part D sponsor, the Administrator will review the information included in the record of the hearing officer's decision and any written argument submitted by the MA organization or Part D sponsor. Based on this review, the Administrator may uphold, reverse, or modify the hearing officer's decision. The Administrator's decision will be final and binding and no other requests for review will be considered.

If an MA organization or Part D sponsor requests an appeal of the final settlement amount, the financial transaction associated with the issuance or payment of the final settlement amount will be stayed until all appeals are exhausted. Once all levels of appeal are exhausted or the MA organization or Part D sponsor fails to request further review within the 15-day timeframe, CMS will communicate with the MA organization or Part D sponsor to complete the financial transaction associated with the issuance or payment of the final settlement amount, as appropriate.

At all levels of review, the MA organization or Part D sponsor's appeal will be limited to CMS's calculation of the final settlement amount. CMS will not consider information submitted for the purposes of retroactively adjusting a prior reconciliation. The MA organization or Part D sponsor will bear the burden of proof by providing evidence demonstrating that CMS's calculation of the final settlement amount is incorrect.

CMS did not receive comments on this section of the proposal.

3. Proposed Amendments to Regulations (§§ 422.500(b), 422.528, 422.529, 423.501, 423.521, and 423.522)

a. Definitions

We proposed to amend §§ 422.500(b) and 423.501 to add several definitions relevant for the codification of the final settlement process.

First, we proposed to add a definition for the term *final settlement amount,* which will be the final payment amount CMS calculates and ultimately pays to the MA organization or Part D sponsor or that an MA organization or Part D sponsor pays to CMS for a Medicare Advantage or Part D contract that has terminated through consolidation, nonrenewal, or other termination. The proposed definition provides that CMS will calculate the final settlement amount by summing retroactive payment adjustments for a contract that accumulate after that contract consolidates nonrenews, or otherwise terminates, but before the calculation of the final settlement amount, including the applicable reconciliation amounts that have been completed as of the date the notice of final settlement has been issued, without accounting for any data submitted after the data submission deadlines for calculating the reconciliation amounts. These reconciliation amounts used in this process are: (1) MA risk adjustment reconciliation (described in § 422.310), (2) Part D annual reconciliation (described in §§ 423.336 and 423.343), (3) Coverage Gap Discount Program annual reconciliation (described in § 423.2320), and (4) MLR report submission, including calculation of remittances (described in §§ 422.2470 and 423.2470).

We proposed to add a definition for the term *final settlement process* as the process by which CMS will calculate the final settlement amount for a Medicare Advantage or Part D contract that has been consolidated, nonrenewed, or otherwise terminated, issue the final settlement amount along with supporting documentation (described previously in section XXX) in the notice of final settlement to the MA organization or Part D sponsor, receive responses from MA organizations and Part D sponsors requesting an appeal of the final settlement amount, and take final actions to adjudicate an appeal (if requested) and make payments to or receive final payments from MA organizations or Part D sponsors. The proposed definition of *final settlement process* will specify that the final settlement process begins after all applicable reconciliations have been completed.

b. Final Settlement Process and Payment

We proposed to add §§ 422.528 (for MA) and 423.521 (for Part D) to our regulations to codify our process for notifying MA organizations and Part D sponsors of the final settlement amount and how payments to or from CMS will be made.

CMS will calculate and notify MA organizations and Part D sponsors of the final settlement amount. At paragraph (a) of proposed §§ 422.528 (for MA) and 423.521 (for Part D), we proposed to codify that CMS will send a notice of final settlement to MA organizations and Part D sponsors. Specifically, proposed paragraphs (a)(1), (a)(2), (a)(3), and (a)(4) specify that the notice will contain at least the following information: a final settlement amount; relevant banking and financial mailing instructions for MA organizations and Part D sponsors that owe CMS a final settlement amount; relevant CMS contact information; and a description of the steps for the MA organizations or Part D sponsor to request an appeal of the final settlement amount calculation.

At paragraph (b) of proposed §§ 422.528 and 423.521, we proposed to establish that MA organizations and Part D sponsors will have 15 calendar days from the date of issuance of the notice to request an appeal. We proposed at paragraphs (b)(1) and (b)(2) of these new regulation sections that, if an MA organization or Part D sponsor agrees with the final settlement amount, no response will be required, and that, if an MA organization or Part D sponsor does not request an appeal within 15 calendar days, CMS will not consider any subsequent requests for appeal of the final settlement amount.

At paragraph (c) of proposed §§ 422.528 and 423.521, we proposed to codify the actions that will take place if an MA organization or Part D sponsor does not appeal the final settlement amount. Specifically, at paragraph (c)(1), we proposed to specify that, if an MA organization or Part D sponsor owed a final settlement amount from CMS does not appeal, CMS will remit payment within 60 calendar days of the date of the issuance of the notice of final settlement. At proposed paragraph (c)(2), we proposed that an MA organization or Part D sponsor that owes money to CMS and does not appeal will have to remit payment in full to CMS within 120 calendar days from issuance of the notice of final settlement. We further specify that an MA organization or Part D sponsor that does not appeal and does not remit payment within 120 calendar days of issuance of the notice will be subject to having any debts owed to CMS referred to the Department of the Treasury for collection.[7]

At paragraph (d) of proposed §§ 422.529 (for MA) and 423.522 (for Part D), we proposed to establish the actions following submission of a request for an appeal that will be taken.

At paragraph (e) of proposed §§ 422.529 (for MA) and 423.522 (for Part D), we proposed that after the final settlement amount is calculated and the notice of final settlement is issued to the MA organization or Part D sponsor, CMS will no longer apply retroactive payment adjustments for the terminated contract and there will be no adjustments applied to the final settlement amount.

c. Requesting an Appeal of the Final Settlement Amount

We proposed to add §§ 422.529 (for MA) and 423.522 (for Part D) to our regulations to codify that an MA organization or Part D sponsor will be able to request an appeal of the calculation of the final settlement amount, and the process and requirements for making such a request.

At paragraph (a) of proposed §§ 422.529 and 423.522, we proposed to establish requirements that will apply to MA organizations' and Part D sponsors' requests for appeal of the final settlement amount calculation.

Specifically, at proposed paragraph (a)(1), we proposed to establish the process under which an MA organization or Part D sponsor may request reconsideration of the final settlement amount. We proposed to specify that the 15-calendar-day period for filing the request will begin on the date the notice of final settlement from CMS is issued. We also proposed that MA organizations and Part D sponsors will have to include in their request: (1) the calculation with which they disagree and (2) evidence supporting the assertion that the CMS calculation of the final settlement amount is incorrect. We further specify that CMS will not consider (for purposes of retroactively adjusting a prior reconciliation), and MA organizations and Part D sponsors should not submit, new reconciliation data or data that was submitted to CMS after the final settlement notice was issued.

At proposed paragraph (a)(1)(iii), we proposed to establish that the CMS reconsideration official will review the final settlement calculation and evidence timely submitted by the MA organization or Part D sponsor supporting the assertion that the CMS calculation of the final settlement amount is incorrect. We further proposed to establish that the CMS reconsideration official will inform the MA organization or Part D sponsor of their decision on the reconsideration in writing and that their decision will be final and binding unless the MA organization or Part D sponsor requests a hearing officer review.

At proposed paragraph (a)(2), we proposed to establish that MA organizations and Part D sponsors that disagree with CMS's reconsideration decision under paragraph (a)(1) of this section will be able to request an informal hearing by a CMS hearing officer.

Specifically, at paragraph (a)(2)(i), we establish that MA organizations and Part D sponsors will have to submit their requests for an informal hearing within 15 calendar days of the date of the reconsideration decision. At paragraph (a)(2)(ii), we proposed that MA organizations and Part D sponsors will have to include in their request a copy of CMS's decision, the specific findings or issues with which they disagree, and the reasons for which they disagree. At paragraph (a)(2)(iii), we proposed to establish the informal hearing procedures. Specifically, we proposed that the CMS hearing officer will provide written notice of the time and place of the informal hearing at least 30 calendar days before the scheduled date and the CMS reconsideration official will provide a copy of the record that was before CMS when CMS made its reconsideration decision to the hearing officer. We further proposed that the hearing will be conducted by a hearing officer who will neither receive testimony nor accept new evidence. We finally proposed that the hearing officer will be limited to the review of the record that CMS had when making its decision. At paragraph (a)(2)(iv), we proposed that the CMS hearing officer will send a written decision to the MA organization or Part D sponsor explaining the basis for the decision. At proposed paragraph (a)(2)(v), we proposed to establish that the hearing officer's decision is final and binding, unless the decision is reversed or modified by the CMS Administrator.

We further proposed to establish at paragraph (a)(3) that MA organizations and Part D sponsors that disagree with the hearing officer's decision will be able to request a review by the CMS Administrator.

At paragraph (a)(3)(i), we establish that MA organizations and Part D sponsors will have to submit their requests for a review by the Administrator within 15 calendar days of the date of the decision and may submit written arguments to the Administrator for review. At paragraph (a)(3)(ii), we proposed that the CMS Administrator will have the discretion to elect or decline to review the hearing officer's decision within 30 calendar days of receiving the request for review. We further proposed that if the Administrator declines to review the hearing officer's decision, the hearing officer's decision will be final and binding. We proposed at paragraph (a)(3)(iii) that, if the Administrator elects to review the hearing officer's decision, the Administrator will review the hearing officer's decision, as well as any information included in the record of the hearing officer's decision and any written arguments submitted by the MA organization or Part D sponsor, and determine whether to uphold, reverse, or modify the decision. At proposed paragraph (a)(3)(iv), we proposed that the Administrator's determination will be final and binding.

At proposed paragraph (b), we proposed to establish the matters subject to appeal and that an MA organization or Part D sponsor bears the burden of proof. At proposed paragraph (b)(1), we proposed to establish that the Part D sponsor's appeal will be limited to CMS's calculation of the final settlement amount. We further proposed that CMS will not consider information submitted for the purposes of retroactively adjusting a prior reconciliation. At proposed paragraph (b)(2), we proposed that the MA organization or Part D sponsor will bear the burden of proof by providing evidence demonstrating that

[7] In the case of a bankrupt or liquidated plan that owes CMS money, CMS still completes the reconciliations and the final settlement process and issues a notice of final settlement, but refers the plan to the Department of Justice to collect the money owed.

CMS's calculation of the final settlement amount is incorrect.

At proposed paragraph (c), we proposed that if an MA organization or Part D sponsor requests an appeal of the final settlement amount, the financial transaction associated with the issuance or payment of the final settlement amount will be stayed until all appeals are exhausted. Once all levels of appeal are exhausted or the MA organization or Part D sponsor fails to request further review within the 15-calendar-day timeframe, CMS will communicate with the MA organization or Part D sponsor to complete the financial transaction associated with the issuance or payment of the final settlement amount, as appropriate.

Proposed paragraph (d) clarifies that nothing in this section will limit an MA organization or Part D sponsor's responsibility to comply with any other applicable statute or regulation.

CMS did not receive comments on this section of the proposal.

Based on the lack of comments received, we are finalizing the additions to §§ 422.500(b), 422.528, 422.529, 423.501, 423.521, and 423.522 to codify the final settlement process as proposed.

D. Civil Money Penalty Methodology (§§ 422.760 and 423.760)

Sections 1857(g)(3)(A) and 1860D–12(b)(3)(E) of the Act provide CMS with the ability to impose Civil Money Penalties (CMPs) of up to $25,000 per determination (determinations are those which could otherwise support contract termination, pursuant to § 422.509 or § 423.510), as adjusted annually under 45 CFR part 102, when the deficiency on which the determination is based adversely affects or has the substantial likelihood of adversely affecting an individual covered under the organization's contract. Additionally, as specified in §§ 422.760(b)(2) and 423.760(b)(2), CMS is permitted to impose CMPs of up to $25,000, as adjusted annually under 45 CFR part 102, for each enrollee directly adversely affected or with a substantial likelihood of being adversely affected by a deficiency. CMS has the authority to issue a CMP up to the maximum amount permitted under regulation, as adjusted annually [8] for each affected enrollee or per determination, however CMS does not necessarily apply the maximum penalty amount authorized by the regulation in all instances because the penalty amounts under the current CMP calculation methodology are generally sufficient to encourage compliance with CMS rules.

On December 15, 2016, CMS released on its website, the first public CMP calculation methodology for calculating CMPs for MA organizations and Part D sponsors starting with referrals received in 2017. On March 15, 2019, CMS released for comment a proposed CMP calculation methodology on its website that revised some portions of the methodology released in December 2016. Subsequently, on June 21, 2019, CMS finalized the revised CMP calculation methodology document, made it available on its website, and applied it to CMPs issued starting with referrals received in contract year 2019 and beyond.[9]

On January 19, 2021, CMS published a final rule in the **Federal Register** titled ''Medicare and Medicaid Programs; Contract Year 2022 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicaid Program, Medicare Cost Plan Program, and Programs of All-Inclusive Care for the Elderly.'' (86 FR 5864. *https://www.federalregister.gov/documents/2021/01/19/2021-00538/medicare-and-medicaid-programs-contract-year-2022-policy-and-technical-changes-to-the-medicare.* Hereinafter referred to as the January 2019 final rule). In January 2019 final rule, CMS finalized a policy, effective beginning in CY 2022, to update the minimum CMP penalty amounts no more often than every three years. Under this policy, CMS updates the CMP penalty amounts by including the increases that would have applied if CMS had multiplied the minimum penalty amounts by the cost-of-living multiplier released by the Office of Management and Budget (OMB) [10] each year during the preceding three-year period. CMS also tracks the yearly accrual of the penalty amounts and announces them on an annual basis.

The intent of the minimum penalty increase policy was to establish the CMP calculation methodology document in regulation to ensure consistency and transparency with CMP penalty amounts. Although parts of the regulations at §§ 422.760(b)(3) and 423.760(b)(3) have set standards for CMP penalties, in hindsight, CMS believes that other parts of the regulations unnecessarily complicated CMS's approach to calculating CMPs, which has the effect of limiting CMS's ability to protect beneficiaries when CMS determines that an organization's non-compliance warrants a CMP amount that is higher than would normally be applied under the CMP methodology. In addition, although CMS always has had the authority to impose up to the maximum authorized under sections 1857(g)(3)(A) and 1860D–12(b)(3)(E) of the Act, parts of the minimum penalty increase policy may have inadvertently given the impression that CMS was limiting its ability to take up to the maximum amount permitted in statute and regulation. This was not the intent of the rule. For example, there may be instances where an organization's non-compliance has so substantially adversely impacted one or more enrollees that CMS determines it is necessary to impose the maximum CMP amount permitted under statute, or an amount that is higher than the amount set forth in the CMP methodology guidance, to adequately address the non-compliance. In order to clarify its ability to adequately protect beneficiaries and encourage compliance, CMS proposed to modify its rules pertaining to minimum penalty amounts.

Specifically, we proposed to remove §§ 422.760(b)(3)(i)(E) and 423.760(b)(3)(i)(E), respectively, which is the cost-of-living multiplier. We also proposed to remove §§ 422.760(b)(3)(ii)(A)–(C) and 423.760(b)(3)(ii)(A)–(C), which describes how CMS calculates and applies the minimum penalty amount increase. Lastly, we proposed to revise and add new provisions §§ 422.760(b)(3) and 423.760(b)(3), which explain that CMS will set standard minimum penalty amounts and aggravating factor amounts for per determination and per enrollee penalties in accordance with paragraphs (b)(1) and (b)(2) of paragraph (b) on an annual basis, and restates that CMS has the discretion to issue penalties up to the maximum amount under paragraphs (b)(1) and (2) when CMS determines that an organization's

[8] Per the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, which amended the Federal Civil Penalties Inflation Adjustment Act of 1990, the maximum monetary penalty amounts applicable to §§ 422.760(b), 423.760(b), and 460.46(a)(4) will be published annually in 45 CFR part 102. Pursuant to § 417.500(c), the amounts of civil money penalties that can be imposed for Medicare Cost Plans are governed by section 1876(i)(6)(B) and (C) of the Act, not by the provisions in part 422. Section 1876 of the Act solely references per determination calculations for Medicare Cost Plans. Therefore, the maximum monetary penalty amount applicable is the same as § 422.760(b)(1).

[9] CMS Civil Money Penalty Calculation Methodology, Revised. June 21, 2019. *https://www.cms.gov/Medicare/Compliance-and-Audits/Part-C-and-Part-D-Compliance-and-Audits/Downloads/2019CMPMethodology06212019.pdf.*

[10] Per OMB Memoranda M–19–04, Implementation of Penalty Inflation Adjustments for 2019, Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, published December 14, 2018, the cost-of-living adjustment multiplier for 2019 is 1.02522.

non-compliance warrants a penalty that is higher than would be applied under the minimum penalty amounts set by CMS.

Once finalized, CMS would continue to follow our existing CMP methodology and would only impose up to the maximum CMP amount in instances where we determine non-compliance warrants a higher penalty. This update will also be incorporated in forthcoming revised CMP calculation methodology guidance.

Comment: A commenter suggested that removing the minimum penalty amount increase policy would lead to inconsistencies, and a lack of parity, in the CMP amounts we impose.

Response: We disagree with this comment. First, as discussed above and in the proposed rule, CMS has always had the statutory authority to impose up to the maximum CMP amount authorized under sections 1857(g)(3)(A) and 1860D–12(b)(3)(E) of the Act. Second, CMS would continue to follow our existing CMP methodology, which allows for parity, fairness, and consistency in calculating CMP amounts. We would only impose up to the maximum CMP amount in instances where we determine non-compliance warrants a higher penalty to adequately address the non-compliance.

After consideration of the comments received, we are finalizing our changes to §§ 422.760(b)(3) and 423.760(b)(3) as proposed.

E. Part D Medication Therapy Management (MTM) Program (§ 423.153(d))

1. MTM Eligibility Criteria (§ 423.153(d)(2))

a. Background

Section 1860D–4(c)(2) of the Act requires all Part D sponsors to have an MTM program designed to assure, with respect to targeted beneficiaries, that covered Part D drugs are appropriately used to optimize therapeutic outcomes through improved medication use and to reduce the risk of adverse events, including adverse drug interactions. Section 1860D–4(c)(2)(A)(ii) of the Act requires Part D sponsors to target those Part D enrollees who have multiple chronic diseases, are taking multiple Part D drugs, and are likely to meet a cost threshold for covered Part D drugs established by the Secretary. Since January 1, 2022, Part D sponsors are also required by section 1860D–4(c)(2)(A)(ii)(II) of the Act to target all at-risk beneficiaries (ARBs) [11] in their Part D drug management program (DMP) for MTM. CMS has codified the MTM targeting criteria at § 423.153(d)(2).

As discussed in the December 2022 proposed rule (87 FR 79452), MTM eligibility rates have steadily declined over time to 8 percent in 2020. In conjunction with the decreasing eligibility rates, CMS has observed near-universal convergence among Part D sponsors to the most restrictive targeting criteria currently permitted under § 423.153(d)(2). When CMS finalized the current regulatory requirements for targeting criteria over 13 years ago, CMS elected to continue to give plan sponsors significant flexibility in establishing their MTM eligibility criteria. However, sponsors have used this flexibility to adopt increasingly restrictive criteria that we believe are limiting access to MTM for vulnerable, clinically high-risk beneficiaries.

We performed an extensive analysis to identify potential disparities in MTM program eligibility and access, as discussed in the December 2022 proposed rule, and we identified the high cost threshold and increasingly restrictive plan criteria (*e.g.,* targeting select core chronic diseases or specific drugs) as the main drivers of the eligibility gaps. The targeting criteria used by most plans now require three or more chronic diseases, require eight or more Part D drugs, and target a narrow and variable list of chronic diseases. And because of variation in plans' criteria for MTM enrollment, enrollees with equivalent patient profiles (for example, same chronic diseases, same number of chronic diseases, same number of Part D drugs, and similar estimated drug costs) may or may not be eligible for MTM depending on the criteria their plan requires. Under the current MTM cost threshold methodology at § 423.153(d)(2)(i)(C), the annual cost threshold for 2024 is $5,330, which also significantly limits the number of beneficiaries who are eligible to be targeted for MTM enrollment. In the December 2022 proposed rule, CMS proposed changes to the MTM program eligibility criteria to address these concerns and help ensure beneficiaries with more complex drug regimens who would benefit most from MTM services are eligible.

The proposed changes included:

- Requiring plan sponsors to target all core chronic diseases identified by CMS, codifying the current nine core chronic diseases in regulation,[12] and adding HIV/AIDS for a total of 10 core chronic diseases;
- Lowering the maximum number of covered Part D drugs a sponsor may require from eight to five drugs and requiring sponsors to include all Part D maintenance drugs in their targeting criteria; and
- Revising the methodology for calculating the cost threshold ($5,330 in 2024) to be commensurate with the average annual cost of five generic drugs ($1,004 in 2020).

CMS received many comments on these proposed changes, including the following general comments, and our responses follow.

Comment: Many commenters cited studies that demonstrated the value of MTM services and supported changes to the targeting criteria to optimize therapeutic outcomes, decrease adverse medication events, and avoid unnecessary costs. Commenters also acknowledged that studies show medication-related problems such as poor medication adherence and polypharmacy are widespread among individuals taking multiple prescription medications. These studies emphasized the value of MTM, including maintaining the wellbeing of Part D enrollees, resolving medication-related problems, improving health outcomes, empowering patients, and coordinating care. Some commenters cited a study that showed net cost savings (*i.e.,* a reduction in total annual health expenditures minus patient copayments, coinsurance, and deductible amounts) divided by the incremental cost of providing MTM services resulted in a return on investment of more than $12 in cost savings for each $1 spent on MTM. Commenters added that when patients better understand the goals of their medication therapy, medication adherence may increase, and hospital readmissions can be reduced. One commenter cited an analysis by a regional Medicare Advantage plan that found enrollees who received a comprehensive medication review (CMR) had an average savings of up to $4,000 in medical claims compared to members who did not receive a CMR. The commenter stated that the analysis also found that all enrollees who received a CMR had a 5 percent reduction in total cost of care compared to those who were eligible for but did not receive a CMR. Another commenter emphasized that access to pharmacists'

[11] Defined at § 423.100.

[12] The current core chronic diseases are: diabetes*, hypertension*, dyslipidemia*, chronic congestive heart failure*, Alzheimer's disease, end stage renal disease (ESRD), respiratory disease (including asthma*, chronic obstructive pulmonary disease (COPD), and other chronic lung disorders), bone disease-arthritis (osteoporosis, osteoarthritis, and rheumatoid arthritis), and mental health (including depression, schizophrenia, bipolar disorder, and other chronic/disabling mental health conditions). Enumerated in statute (*).

clinical skills and increased opportunities for patient-centric care through MTM could help offset shortages of physicians and nurses. Lastly, commenters pointed out that MTM fosters collaboration between clinicians, pharmacists, and patients who take multiple medications and/or have multiple chronic diseases.

Several commenters agreed that the proposed changes to the MTM eligibility criteria have the potential to significantly improve the effectiveness of the MTM program and achieve equity for underserved Medicare patients. One commenter noted studies highlighting that individuals with multiple comorbid chronic conditions tend to have the greatest disparities in accessing the care and treatments they need. The commenter also cited studies that noted that the current MTM eligibility criteria do not optimally target beneficiaries most at risk of underuse or poor adherence and that eligibility is limited to beneficiaries with high drug use and high spending, which systematically excludes beneficiaries who could benefit from these services. Another commenter suggested that rather than using MTM to improve outcomes and reduce health care costs for Part D enrollees with multiple chronic diseases, plan sponsors have instead used it as a cost control tool by focusing on enrollees who take high-cost drugs.

Response: We thank the commenters for their support of the proposed changes to the MTM eligibility criteria to better focus on beneficiaries with more complex drug regimens who would benefit most from MTM. We appreciate the citation of many studies reinforcing the value of MTM and the need for more equitable access. Almost all of the chronic diseases targeted for MTM identified at section 1860D–4(c)(2)(A)(ii)(I)(aa) of the Act and in the current CMS MTM guidance (See HPMS Memorandum Contract Year 2024 Part D Medication Therapy Management Program Guidance and Submission Instructions dated April 21, 2023) are more prevalent among minorities and lower income populations. As a result, we anticipate that these changes will increase eligibility rates among those populations by promoting more equitable access to MTM services and closing eligibility gaps.

Comment: Many commenters opposed the proposed eligibility criteria changes partially or in whole, and several expressed significant concerns about the costs and resource burden associated with implementing such a large-scale expansion of the MTM program. Some of these commenters opined that the proposed changes would increase Part D premiums and cost sharing for all enrollees. One commenter estimated that the proposed changes would more than double MTM administrative costs. Some commenters stated that the proposed MTM expansion would be cost-prohibitive without any documented benefit to enrollees. Another commenter suggested finalizing the proposed changes would result in a loss of rebate dollars that would otherwise be used to improve affordability or provide supplemental benefits that support enrollee well-being. Several commenters referenced competing priorities between the proposed MTM expansion and implementation of the Inflation Reduction Act of 2022 (IRA). A few commenters emphasized that many of the same resources needed to support IRA implementation for 2024 and beyond would also be needed to implement changes to the MTM program, and finalizing the MTM changes as proposed would put successful implementation of both the IRA and the MTM expansion at risk.

Response: We acknowledge the concerns raised regarding the cost and burden of the proposed expansion of MTM. In light of these comments, we are finalizing the proposed changes with modifications that will result in a more moderate program size increase and less burden and lower costs than initially estimated in our December 2022 proposed rule. We provide more details about the specific modifications in the responses to comments later in this section of the preamble.

Comment: Several commenters who were opposed to the proposed changes raised concerns about a decline in MTM program quality that could result from a significant increase in program size, which would dilute plans' ability to target MTM interventions to those beneficiaries who would most benefit from them. Other commenters were concerned that MTM providers may ''water down'' their approach due to the increased volume resulting in lower-value programs that satisfy the MTM requirements but are much less likely to improve health outcomes due to shorter consultations or fewer interventions. Another commenter stated that the pool of MTM vendors has decreased while costs have increased due to the loss of competition, hindering the ability of plan sponsors to administer quality MTM programs.

Response: We understand the commenters' concerns about the impact on the quality of the MTM programs and services delivered due to a large increase in program size as proposed. CMS is finalizing the proposed changes with modifications that will ensure a smaller increase in program size and promote the administration of high-value MTM programs. Currently, due to the increasing cost threshold and variations in the targeting criteria adopted by sponsors, Part D enrollees with more complex drug regimens who would benefit most from MTM services are often not eligible. In addition, enrollees with equivalent patient profiles (for example, with the same chronic diseases and taking the same Part D drugs) may or may not be eligible for MTM depending on the criteria their plan requires. The eligibility criteria changes we are finalizing in this rule aim to address the key drivers of the eligibility gaps, discussed in detail in the December 2022 proposed rule, while maintaining a reasonable program size and the ability of plans to administer effective MTM services.

MTM is a patient-centric and comprehensive approach to improve medication use, reduce the risk of adverse events, and improve medication adherence. To continue to provide quality MTM services to an expanded population and better manage resources, we remind sponsors that the delivery of MTM may be tailored to meet each enrollee's needs. For example, the length of the CMR consultation or number of follow-up interventions needed following targeted medication reviews (TMRs) may vary between MTM enrollees with more complex drug regimens and those who are stable on their medication regimens as long as the minimum level of MTM services is met as specified in § 423.153(d)(1)(vii). Sponsors may also leverage effective MTM programs to improve several measures in the Medicare Part D Star Ratings and display page such as medication adherence, polypharmacy, and gaps in therapy. Lastly, while we acknowledge commenters' concerns regarding the availability of MTM vendors, we note that Part D plan sponsors may use in-house resources, one or more external vendors, or a combination of both, to administer their MTM programs.

Comment: Some commenters stated that a large increase in the MTM enrollee population would require significant resources and that there would be limited time to hire and train additional staff, implement the necessary processes, and upgrade clinical and administrative infrastructures. Commenters estimated needing to double or triple their staffing to accommodate MTM enrollment increases of up to 60 percent in one year. A commenter stated that many plan sponsors that utilize local

community pharmacists to furnish MTM services would not be able to meet the higher demand in time, or that there would be pressure to use call centers, possibly employing customer service representatives without clinical training, which may lead to lower quality of care or member experience. Other commenters were concerned that rapid expansion of the MTM program size would exacerbate the existing pharmacist workforce shortage or would not be feasible given the expanded scope of pharmacy practice. One commenter also suggested that MTM vendors would drop smaller clients to service larger ones as a result of not being able to hire enough pharmacists to accommodate the increase in MTM enrollees.

Response: We are optimistic that the increase in demand for MTM services will incentivize plan sponsors to strengthen their hiring efforts. It is not clear what methodology the commenters used to estimate staffing needed to accommodate certain MTM program size increases. However, CMS plans to finalize our proposed changes to the MTM eligibility criteria with the modifications described later in this section of the preamble. CMS believes that this scaled back MTM expansion may alleviate a portion of the staffing concerns raised by commenters.

Comment: A few commenters, particularly commenters representing dual eligible special needs plans (D–SNPs), were concerned that due to the higher prevalence of chronic diseases in their enrollees, they will be disproportionately impacted by the changes in the MTM eligibility criteria and estimated that the majority of their plan enrollment would be eligible for the MTM program. They asserted that it would not be feasible to perform outreach or offer the MTM services to all their enrollees.

A few other commenters stated that when combined the proposed changes would result in MTM enrollment increases that exceeded the estimated program-wide size (23 percent of Part D enrollees) in the proposed rule (for example, increasing enrollment to 60 percent of their Medicare population, by five times, etc.), depending on the population or type of plan. Commenters asserted that such an increase in MTM enrollment would increase administrative costs, resulting in increased premiums, and could limit the offering of Part D plans.

Response: We acknowledge that some Part D contracts may have actual MTM enrollment rates above or below the average rate for the program as a whole because they have higher or lower enrollments of beneficiaries with the chronic diseases targeted for MTM under the changes to the MTM requirements we are finalizing in this rule. This is also true under the current MTM requirements, and there is no evidence that higher than average MTM enrollment has increased administrative costs and thus premiums to the point of limiting Part D plans' offerings, including MA–PDs that are D–SNPs. However, based in part on considerations about how the estimated program size under the proposals in the December 2022 proposed rule would impact MTM enrollment differently across contracts and increase the MTM enrollment volume to greater levels than some sponsors could feasibly handle, we are finalizing the proposed changes to the MTM eligibility criteria with modifications that we expect to decrease estimated program size relative to the proposed rule.

Comment: Some commenters expressed concerns that Part D MTM programs overlap with other programs such as disease management or care management (including post-discharge medication reconciliation; hypertension, diabetes, and dyslipidemia case management; and annual wellness visits) and may cause enrollee confusion, frustration, or complaints due to multiple outreach attempts, beneficiaries not answering calls from the plan sponsor, or beneficiaries requesting to be placed on the plan's do-not-call list. A commenter discussed that MTM-like interventions occur outside of the Part D MTM program and achieve improvements to health outcomes, and many MTM services, such as drug-drug interaction (DDI) analyses, could be automated (outside of CMRs) without beneficiary participation.

Response: We believe that Part D MTM programs complement efforts under other programs rather than overlap with them. MTM programs—which use a comprehensive approach to improve medication use, reduce the risk of adverse events, and improve medication adherence for beneficiaries at increased risk of medication-related problems due to having multiple chronic diseases and taking multiple Part D drugs—are distinct from disease-specific disease management programs. We acknowledge that recommendations arising from MTM services may result in referrals to other specialized, disease-specific programs that may not be a part of the Part D MTM program. To reduce the risk of beneficiary confusion and frustration, plan sponsors should be mindful of the timing and frequency of enrollee outreach for MTM relative to complementary disease management programs.

In addition, we remind Part D sponsors that while a CMR must be an interactive consultation with the beneficiary and the pharmacist or other qualified provider, other aspects of MTM may be automated as described in CMS MTM guidance (See HPMS Memorandum Correction to Contract Year 2024 Part D Medication Therapy Management Program Guidance and Submission Instructions dated April 21, 2023).[13] As described in this guidance, sponsors are required to perform TMRs for all beneficiaries enrolled in their MTM program with follow-up interventions when necessary. Part D sponsors must assess the findings of these reviews to determine if a follow-up intervention is necessary for the beneficiary and/or their prescriber. These assessments could be person-to-person or system generated.

Comment: Many commenters stated that the proposed eligibility criteria changes would result in a substantive update to the Part D Star Rating MTM Program CMR Completion Rate measure (MTM Star Rating Measure) due to the program size expansion and impacts to resources. Therefore, the commenters urged CMS to move the MTM Star Rating Measure to a display measure for at least 2 years to adjust to the new levels. A few commenters suggested specification changes to the MTM Star Rating Measure. Other commenters suggested that expanding the program size in such a short timeframe would incentivize plans to prioritize quantity over quality of care.

Response: Per §§ 422.164(d)(2) and 423.184(d)(2), substantively updated Star Ratings measures are moved to the display page for at least 2 years after the substantive update is adopted.[14] Refer to sections VII.B.2 and VII.D of this final rule, where we address the proposal to modify the Medication Therapy Management (MTM) Program Completion Rate for Comprehensive Medication Review (CMR) measure and discuss the weight of newly modified measures, respectively. The MTM Program Completion Rate for CMR measure is being updated in this rule to align with the revised targeting criteria finalized at § 423.153(d); the updated

[14] Information for measures on the display page are available online at: *https://www.cms.gov/medicare/health-drug-plans/part-c-d-performance-data*. Please download the zipped file ''2024 Display Measures'' for display measure scores, data and explanatory technical notes.

measure will move to the display page entirely for the 2025 and 2026 measurement years and will return as a new measure to the Star Ratings program no earlier than the 2027 measurement year for the 2029 Star Ratings. We will share the additional suggestions for specification changes with the Pharmacy Quality Alliance (PQA), the measure steward.

Comment: A few commenters suggested that MTM program expansion could be limited to those beneficiaries who are newly eligible for the Part D MTM program or have recently added, removed, or changed drugs. One commenter also asserted that the newly eligible would see the greatest benefit from MTM services, resulting in improved health outcomes and reduced overall costs. This commenter also stated that the value of the CMR declines for enrollees with no changes in health status and that broadening the targeted disease states would increase burden and administrative costs with diminishing benefits for both plan sponsors and enrollees. Another commenter suggested that enrollees who have had a CMR in the last 12 months should requalify for MTM only with the addition of a new drug to their drug regimen and/or a new disease state.

Response: Section 1860D–4(c)(2)(A)(ii) of the Act requires Part D sponsors to target those Part D enrollees who have multiple chronic diseases, are taking multiple Part D drugs, and are likely to meet a cost threshold for covered Part D drugs established by the Secretary. Since January 1, 2022, Part D sponsors are also required by section 1860D–4(c)(2)(A)(ii)(II) of the Act to target all at-risk beneficiaries (ARBs) in their Part D drug management program (DMP) for MTM. Furthermore, for 2013 and subsequent plan years, the Affordable Care Act (ACA) amended the Act by adding section 1860D–4(c)(2)(C)(i), which requires all Part D sponsors to offer all enrollees targeted for MTM an annual CMR. These requirements are codified in the regulations at § 423.153(d)(1) and (2).

We acknowledge that the needs and goals of newly eligible MTM enrollees may be different from those who have already received MTM services and continue to be eligible for MTM. However, for both populations of beneficiaries, annual CMRs may be an opportunity to understand new information about the beneficiary, including but not limited to if the beneficiary's goals have changed, if they have new or unresolved medication therapy problems, or if they have any social risk factors that may be affecting their medication use that can only be assessed through an interactive consultation.

Comment: A few commenters suggested that CMS should engage the industry to determine alternative options for better targeting or increased CMR participation rather than finalize the proposed modifications to the eligibility criteria. A commenter stated that many MTM enrollees choose not to participate, and to be more consistent with the Administration's health equity goals, CMS should engage those already eligible, who have the greatest need. Another commenter suggested changes to the Medicare Plan Finder (MPF) that would highlight the value added by specific plans' MTM programs and provide guidance to beneficiaries on why selecting plans based on MTM program specifics may be beneficial. The commenter cited recent precedent in 2019 to 2020 when CMS engaged plans, PBMs, developers, and patient groups on how to improve the MPF, resulting in major improvements supported by a wide range of interested parties. A few commenters also suggested that CMS could engage plans and PBMs to assess MTM and alternative programs to determine whether MTM eligibility criteria expansion is warranted, whether to include cancer as a core chronic condition, the effect of including any additional core chronic diseases on specialized MTM provider training and program size, and whether MTM services are an effective mechanism for management of certain diseases (for example, those with high use of Part B drugs or frequently changing medication regimens).

Response: Through this rulemaking, we have engaged numerous interested parties to solicit feedback on implementing MTM eligibility criteria changes. We have also engaged in our own analysis. As discussed in the December 2022 proposed rule, we conducted an extensive data analysis that identified several issues with the current MTM targeting criteria, and we proposed specific regulatory changes in an effort to increase MTM eligibility rates, reduce variability of MTM eligibility criteria across plans, and address disparities to ensure that those who would benefit the most from MTM services have access. Taken together, we believed that the proposed changes to the MTM program targeting criteria would balance eligibility and program size while allowing us to address specific problems identified in the Part D MTM program, including marked variability and inequitable beneficiary access to MTM services.

As discussed later in this preamble, we are finalizing the proposals with modifications in response to public comments we received. However, we are committed to addressing the main drivers of the inequities in MTM program eligibility discussed in the December 2022 proposed rule. Accordingly, we will continue to request input from interested parties on improving aspects of the MTM program in the future, including enhanced targeting and better engagement with MTM enrollees. We will also look for opportunities to improve the information available for beneficiaries on CMS' websites about Part D MTM programs.

Comment: A few commenters suggested that additional analyses are needed to assess the effectiveness of MTM programs, optimize current MTM programs, and review alternative medication management methods already being used by plan sponsors and their contracted providers. One commenter asserted that CMS would be unable to determine which part of the eligibility criteria expansion worked or failed as they believed the metrics for MTM success to be ill-defined. The commenter also asked if CMS has conducted any evaluation of the requirement to target DMP enrollees for MTM enrollment. Another commenter encouraged CMS to find a new approach to measuring MTM success in the future through metrics that assess the quality of MTM services provided and not just the overall volume of services provided. Another commenter noted the documented successes of MTM in a number of situations but recognized room for improvement in the program. The commenter stated that in many cases, MTM benefits patients directly and can decrease the burden of healthcare costs, but that results are not consistent across the board, suggesting a need to increase the overall quality of MTM evaluations. The commenter concurred with researchers in recommending that future studies should consider increasing study size and incorporating multiple sites to bolster the reliability of the results and suggested that CMS could use its authority to influence changes to MTM studies. Another commenter suggested that further study can help improve the MTM program due to limited evidence that MTM improves medication adherence and patient outcomes. The commenter recommended that CMS initiate a study including a large set of geographically diverse, Part D plans to better understand the overall effectiveness of the MTM program and

potential areas for improvement. The commenter also suggested that it would be particularly useful to understand the experience and impact of pharmacists' involvement in MTM programs.

Response: We routinely analyze CMS and plan-reported data to oversee the Part D MTM programs, including implementation of the new requirement to target DMP ARBs for MTM enrollment. However, we agree that additional analysis would be beneficial to assess MTM program effectiveness, and we will continue to explore ways of conducting such analysis. We appreciate the comments on potential research and analysis topics and agree that the high degree of variability between MTM program targeting criteria has made it difficult to evaluate MTM programs. We are hopeful that standardizing the criteria as finalized in this rule will allow more research to be done on MTM outcomes. We will also engage with industry to develop additional consensus-based measures to evaluate the quality of MTM programs which may be considered for the Star Ratings program in the future, and we are encouraged by recent efforts by the PQA to convene MTM leaders on evidence-based priorities for measurement.[15]

Comment: Another commenter urged CMS to increase transparency regarding the costs of the MTM program (that is, how much plans are saving versus how much they are allocating to pay pharmacists for the services) and whether Part D plans are incentivized to offer robust MTM services.

Response: We remind commenters that per § 423.153(d)(5)(ii), even though a Part D sponsor must disclose to CMS the amount of the management and dispensing fees and the portion paid for MTM services to pharmacists and others, reports of these amounts are protected under the provisions of section 1927(b)(3)(D) of the Act.

Comment: A commenter stated that CMS's proposals in the December 2022 proposed rule to add Part D measures to the Star Ratings, such as the focus on polypharmacy measures, may present an opportunity to improve MTM. The commenter felt that the proposed changes to the MTM program eligibility criteria would expand eligibility but do not address the issue of providing MTM to Medicare beneficiaries who could truly benefit from it.

Response: We thank the commenter for the feedback. We agree that MTM programs may present an opportunity to improve plan performance in Star Ratings measures such as polypharmacy and help with overall improvement of medication use among Part D beneficiaries. Refer to Section VII.B.3 for discussion about the Part D Polypharmacy Use of Multiple Central Nervous System Active Medications in Older Adults (Poly-CNS), Polypharmacy Use of Multiple Anticholinergic Medications in Older Adults (Poly-ACH), and Concurrent Use of Opioids and Benzodiazepines (COB) Measures.

Comment: Some commenters encouraged CMS to continue to examine policy options that expand access to MTM and improve patient outcomes and, in particular, to release the findings from the fifth and final year of the Part D Enhanced MTM model (Enhanced MTM model). Another commenter suggested that the Enhanced MTM model can address alarming trends of medication underuse and overuse. The commenters also encouraged CMS to collaborate with interested parties to leverage the findings from the Enhanced MTM model and identify best practices in MTM to scale nationally, as well as to guide future reforms before taking action to change MTM.

Response: CMS will continue to examine policy options within our authority that expand access to MTM and improve patient outcomes. In February 2023, CMS released the fifth and final evaluation report for the Enhanced MTM model available at: *https://www.cms.gov/priorities/innovation/innovation-models/enhancedmtm.* We will continue to review the results of the Enhanced MTM model and collaborate with interested parties to identify best practices and lessons learned that may help improve the traditional Part D MTM programs. We disagree that CMS should leverage model findings or run additional analyses before making changes to the Part D MTM programs, as our disparities analysis discussed in the December 2022 proposed rule identified specific eligibility gaps that need to be addressed. As such, we are moving forward with finalizing modifications to the MTM targeting criteria in this final rule.

Comment: A commenter urged CMS to require plan sponsors to report MTM enrollee data and analyze the data using demographic information to measure and address disparities among the enrollees.

Response: Plan sponsors are currently required to report MTM program beneficiary-level data to CMS through the Part D Reporting Requirements (OMB 0938–0992). We used these data and other program data, including demographic information, to perform the MTM disparities analysis. Furthermore, researchers may request access to a Part D MTM data file through ResDAC[16] which could be linked to encrypted beneficiary and demographic variables in the CCW.

Comment: Many commenters suggested that if CMS finalizes the combination of changes as proposed, the updated eligibility criteria should be implemented on a delayed or phased-in basis. Commenters stated that such an approach would provide plan sponsors with the additional time necessary to build up staffing, processes, and infrastructure over several years; to coordinate with other internal programs to manage medications for the core chronic diseases; and to ensure local networks can accommodate the increased volume. Commenters who suggested delays were concerned about implications for costs and the timing for bid submissions as well as the need for operational enhancements. Commenters who advocated for a phased-in approach suggested ways to finalize one or more of the proposed MTM criteria changes over time on an annual basis. Another commenter suggested that CMS take a stepwise approach by first finalizing the proposal to require plan sponsors to target all 10 core chronic diseases to evaluate how MTM engagement improves, and then allow some flexibility in how plans target within broad therapeutic categories.

Response: We appreciate the suggestions to implement the proposed changes using a delayed or phased-in approach. However, we do not agree that such an approach is necessary because CMS is finalizing the proposed changes with modification, and—as discussed later in this preamble—the resulting program size will be about 35 percent smaller than originally estimated in the December 2022 proposed rule. The reduced program size mitigates the need for a phased-in approach to accommodate the new MTM enrollees. Additionally, the changes will be effective in 2025 rather than 2024 as initially proposed, which will provide additional time for Part D plan sponsors to build up the necessary infrastructure to support the anticipated increase in MTM enrollment.

We now address comments on specific aspects of the proposed eligibility criteria changes and describe our rationale for finalizing the proposed changes with modifications.

b. Multiple Chronic Diseases

The regulation at § 423.153(d)(2)(i)(A) specifies that to be targeted for MTM, beneficiaries must have multiple chronic diseases, with three chronic diseases being the maximum number a Part D sponsor may require for targeted enrollment. In the current CMS MTM guidance (See HPMS Memorandum Correction to Contract Year 2024 Part D Medication Therapy Management Program Guidance and Submission Instructions dated April 21, 2023), CMS identifies nine core chronic diseases.

In the December 2022 proposed rule, we proposed to amend the regulations at § 423.153(d)(2) by adding a new paragraph (iii) to require all Part D sponsors to include all core chronic diseases when identifying enrollees who have multiple chronic diseases, as provided under § 423.153(d)(2)(i)(A). As part of the proposed new provision at § 423.153(d)(2)(iii), we also proposed to codify the nine core chronic diseases currently identified in guidance and to add HIV/AIDS, for a total of 10 core chronic diseases. We explained that the current flexibility afforded to plans to identify enrollees with multiple chronic diseases had led to variability across plans and was a main driver of eligibility gaps and inequitable beneficiary access to MTM services. Under our proposal to codify the 10 core chronic diseases, plan sponsors would maintain the flexibility to target beneficiaries with additional chronic diseases that are not identified as core chronic diseases, or to include all chronic diseases in their targeting criteria.

In the December 2022 proposed rule, CMS also solicited comment on whether we should consider including additional diseases in the core chronic diseases proposed at § 423.153(d)(2)(iii), including cancer to support the goals of the Cancer Moonshot.[17] We sought comments on broadly including cancer as a core chronic condition or alternatively including specific cancers that are likely to be treated with covered Part D drugs such as oral chemotherapies where MTM could be leveraged to improve medication adherence and support careful monitoring. We were interested in comments on the impact of including any additional core chronic diseases on specialized MTM provider training and on MTM program size. We also solicited comments on whether MTM services furnished under a Part D MTM program are an effective mechanism for management of certain diseases (for example, those with high use of Part B drugs or frequently changing medication regimens) given the statutory goals of the MTM program—specifically, reducing the risk of adverse events, including adverse drug interactions, and ensuring that covered Part D drugs prescribed to targeted beneficiaries are appropriately used to optimize therapeutic outcomes through improved medication use.

The comments we received on our proposed policies with respect to targeting of core chronic diseases are summarized below along with our responses.

Comment: Many commenters supported the proposal to add HIV/AIDS to the list of core chronic diseases. Several commenters applauded CMS for recognizing and attempting to address disparities within the HIV/AIDS community. Other commenters pointed out that antiretroviral medications are not only high cost but part of complex regimens that require frequent monitoring and re-evaluation. Supporters of this proposal also emphasized the importance of MTM services for HIV/AIDS patients with many comorbidities.

Response: CMS thanks the commenters for their support for the proposal to add HIV/AIDS as a core chronic disease. We agree that Part D enrollees with HIV/AIDS often have complex Part D drug regimens where medication adherence is critical, very high Part D drug costs, and multiple comorbidities. In addition, these individuals are more likely to be members of populations affected by health disparities. For these reasons and for the reasons discussed in the December 2022 proposed rule, we are finalizing the proposal to include HIV/AIDS in the core chronic diseases at § 423.153(d)(2)(iii).

Comment: Many commenters were opposed to including HIV/AIDS as a core chronic disease and expressed concerns regarding the potential of MTM programs disrupting therapy that is already being closely monitored by a specialized team. Other commenters were concerned that the pharmacists reviewing the drug regimen for individuals with HIV/AIDS may not have the specialized training needed. One commenter suggested additional qualifications to identify high-risk medication use among this population. Lastly, some commenters stated that the data needed for a successful CMR for this population, including lab values, are not always available.

Response: We acknowledge that Part D sponsors, especially PDPs, may not always have complete and up to date information at the time of a CMR, but the CMR may provide the opportunity to obtain additional information regarding an individual's current therapy. As discussed in CMS MTM guidance (See HPMS Memorandum Contract Year 2024 Part D Medication Therapy Management Program Guidance and Submission Instructions dated April 21, 2023), a CMR is a systematic process of collecting patient-specific information, assessing medication therapies to identify medication-related problems, developing a prioritized list of medication-related problems, and creating a plan to resolve them with the patient, caregiver, and/or prescriber. The CMR is designed to improve patients' knowledge of their prescriptions, over-the-counter (OTC) medications, herbal therapies and dietary supplements, identify and address problems or concerns that patients may have, and empower patients to self-manage their medications and their health conditions. MTM services should be complementary, not disruptive, to services furnished by the beneficiary's care team, and an MTM provider may make referrals or recommendations to the beneficiary's prescribers to resolve potential medication-related problems or optimize the beneficiary's medication use.

The CMS analysis presented in the December 2022 proposed rule found that, on average, Part D enrollees with HIV/AIDS have 4 core chronic diseases (including HIV/AIDS), take 12 Part D covered drugs (including eight maintenance drugs), and incur $40,490 in Part D annual drug spend. Because beneficiaries with HIV/AIDS are likely to have complex drug regimens and are at increased risk of medication-related problems, they could benefit from MTM to improve medication use. Despite having multiple chronic diseases, taking multiple Part D drugs, and incurring high Part D drug costs, many of these individuals were not eligible for MTM because their plan did not target HIV/AIDS or did not target enough of their other chronic diseases. However, we also found that HIV/AIDS was more likely to be targeted by plans (about 10 percent of plans in 2021) than any other non-core chronic disease, suggesting that these plans have already recognized the value of offering MTM services to this population.

Comment: Some commenters questioned whether data privacy policies and state laws would allow Part D sponsors to engage in data sharing with MTM vendors. Others voiced concern over the sensitive nature of an

[17] *https://www.whitehouse.gov/cancermoonshot/CE.*

HIV/AIDS diagnosis and that giving MTM providers access to enrollees' health information would increase the risk of a data breach or cause member concerns over privacy.

Response: CMS requires Part D sponsors to comply with all Federal and State laws regarding confidentiality and disclosure of medical records or other health and enrollment information per § 423.136. Those laws may require additional steps for Part D sponsors to share information with MTM providers, such as obtaining beneficiary consent. In establishing the requirement to include HIV/AIDS as a core chronic disease, we do not intend to change or modify any legal obligations that entities may have under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) Privacy Rule or any other law. Regarding the potential for data breaches, we expect plan sponsors and their MTM providers to have appropriate safeguards in place to protect personal health information for beneficiaries with HIV/AIDS just as they do for enrollees with other diseases or medication regimens.

Comment: Many commenters supported the proposal to require Part D sponsors to include all core chronic diseases when identifying enrollees who have multiple chronic diseases. Some of these commenters emphasized the importance of MTM services for beneficiaries with diseases such as ESRD and mental health conditions. We received suggestions to expand the inclusion of Alzheimer's disease on the list of core chronic diseases to include neurodegenerative diseases (including multiple sclerosis) and/or other dementias such as Lewy Body disease or frontotemporal lobar degeneration and pain as core chronic diseases.

Other commenters who supported the proposal suggested that requiring the 10 core chronic diseases should provide more consistency in MTM eligibility between plans and broaden beneficiaries' eligibility for MTM in each plan.

Response: We thank the commenters for their supportive comments regarding our proposal to require sponsors to include all core chronic diseases when identifying enrollees who have multiple chronic diseases. We are finalizing that proposal at § 423.153(d)(2)(iii). Plan sponsors will be required to target all 10 core chronic diseases beginning January 1, 2025. This change will address the concerns we discussed in the December 2022 proposed rule regarding increasingly restrictive criteria implemented by plan sponsors (for example, by targeting select core chronic diseases), which have been one of the main drivers of reduced eligibility rates for MTM. By reducing the variability in targeting criteria across plans, we will eliminate situations where enrollees meet the requirement in § 423.153(d)(2)(i)(A) of having three chronic diseases but are not targeted for MTM enrollment because their plan does not target their chronic diseases. This change will also ensure that plan sponsors are targeting all of the chronic diseases specified in the statute at section 1860D–4(c)(2)(A)(ii)(I)(aa) of the Act, along with certain other chronic diseases that we have identified as prevalent in the Part D population and commonly treated with Part D drugs. This reduced variability should also allow CMS to more accurately estimate program size when calculating burden and assessing impact.

We will continue to analyze chronic diseases that are highly prevalent in the Part D population, align with common targeting practices across sponsors, and are commonly treated with Part D drugs, where MTM services could most impact therapeutic clinical outcomes, including those suggested by the commenters, and may consider proposing additional core chronic diseases such as neurodegenerative diseases and/or other dementias in future rulemaking. Although we are not adding pain as a core chronic disease in this final rule, we remind sponsors that as of January 1, 2022, they are now required to target ARBs as defined at § 423.100 for MTM enrollment. We also note that plan sponsors retain the flexibility to target additional chronic diseases beyond those codified as core chronic diseases.

Comment: Many commenters opposed the proposal to require Part D sponsors to include all core chronic diseases to identify beneficiaries who meet the targeting criterion of having multiple chronic diseases. Some commenters suggested that CMS limit core diseases to those that do not require specialized training or requested extra time to hire specialized staff. Another commenter urged CMS to continue to allow plan sponsors to have flexibility to establish a targeted population within the 10 core chronic diseases. Other commenters wanted to limit the core chronic diseases to those that are easily identified using Part D claims only or to those associated with the Star Ratings medication adherence measures. A commenter noted that even though the core chronic diseases are not entirely new, the requirement for sponsors to include all of them will necessitate IT development for file transfer of medical claims data, adding complexity, as most plans utilize only prescription drug claims data to identify members. For example, the commenter mentioned that to target beneficiaries with many of the core chronic diseases, plans will need to submit diagnosis codes from medical claims to MTM vendors in order to identify such members. Another commenter was concerned that lab work or other relevant data points may not be easily accessible by the plan's MTM pharmacist. One commenter felt that MTM pharmacists are not in the best position to positively impact (and may detract from) a beneficiary's care with a CMR and routine TMR assessments for ESRD.

Response: Plan sponsors' flexibility to target select core chronic diseases was a main driver of inequitable access to MTM in the Part D program that we addressed in our proposed changes to the Part D MTM requirements in the December 2022 proposed rule. CMS strongly believes pharmacists or other qualified MTM providers with extensive knowledge and training of prescribed medications are in an excellent position to impact a beneficiary's medication use, regardless of the chronic diseases they have or the Part D drugs they take. For instance, beneficiaries with ESRD typically have multiple co-morbidities being treated with multiple Part D drugs which may benefit from a CMR and assessment for dose adjustments due to kidney function. If a beneficiary requires more specialized services or coordinated care, MTM may be a means to identify and refer the beneficiary to such services. We also remind commenters that the eligibility criteria, including core chronic diseases, help identify beneficiaries who may be at increased risk of medication-related problems. However, MTM services should not focus only on the core chronic diseases or drugs within classes used to treat those diseases. For example, the CMR should include a review of all of the MTM enrollee's prescription medications, OTC medications, herbal therapies, and dietary supplements. As they do today, plan sponsors should optimize their targeting algorithms and methods using data available to them to identify enrollees who are eligible for MTM. Some plan sponsors may need to update their IT systems or workflows to expand the use of data sources available to them to better optimize their targeting methods.

Comment: Some commenters requested clarification on whether all diseases included under the 10 core chronic disease categories must be targeted, or whether plans will have the flexibility to choose specific diseases within the core chronic diseases. A few

commenters were concerned that requiring targeting for all core chronic diseases removes sponsors' ability to customize their MTM program to target members they deem well-suited for MTM services.

Response: Plan sponsors must target all 10 core chronic diseases, including all conditions within each core chronic disease. As discussed in the proposed rule, our analysis found that a significant proportion of the Part D population that we identified as having three or more core chronic diseases and using eight or more drugs were not eligible to be targeted for MTM, and variation in plan-specific targeting criteria (for example, plans targeting fewer than all of the core chronic diseases) was a key driver of gaps in eligibility for MTM. By reducing the variability in targeting criteria across plans, we can significantly reduce situations where enrollees meet the requirement in § 423.153(d)(2)(i) of having three chronic diseases but are not targeted for MTM enrollment because their plan does not target their chronic diseases. The proposal to require plan sponsors to target all 10 core chronic diseases, which we are finalizing in this rule, aims to close this gap in access and better ensure that the beneficiaries who are most in need of MTM services are targeted for enrollment. Plan sponsors will still have the flexibility of targeting additional chronic diseases beyond the core diseases codified in this rule.

Comment: A commenter wanted CMS to provide greater specificity when codifying core diseases. For example, they asked that CMS clarify how ''other chronic lung disorders'' are defined under respiratory disease and how ''chronic/disabling mental health conditions'' are defined under mental health.

Response: CMS does not have guidance for plan sponsors to define or code core chronic diseases such as ''other chronic lung disorders'' or ''chronic/disabling mental health conditions.'' Sponsors should retain documentation supporting their eligibility criteria determinations.

Comment: In response to our request for information and feedback on including additional diseases, such as cancer, in the list of core chronic diseases, a couple of commenters supported including cancer as a core chronic disease. One commenter felt it would align well with some pharmacies' specialty pharmacy offerings and clinical services. We also received some comments opposed to adding cancer as a core chronic disease for MTM program eligibility. Some commenters indicated that complex cancer treatment needs timely, on-going monitoring by specialists with expertise across Part B and Part D medications (for which data sets may or may not be available) and may not be best managed by Part D MTM programs through annual CMRs or by pharmacists without specialized training. Other commenters noted that specialty pharmacies, which dispense the majority of oral cancer medications (including specialty pharmacies within oncology clinics), already provide monitoring or counseling for their oncology patients. A commenter was concerned that beneficiaries with cancer may find MTM outreach to be intrusive and unwanted, and another was concerned with patient sensitivity when in remission. Another commenter that opposed including cancer as a core chronic disease noted that beneficiaries who meet the current MTM eligibility criteria who are also taking oncology drug(s) would still benefit from the MTM review for side effects, safety, and potential drug-drug interactions.

Response: Equitable access to cancer screening and targeting the right treatments for cancer patients is a top priority under the goals of the Cancer Moonshot. However, while section 1860D–4(c)(2)(A)(ii)(I)(aa) of the Act provides us the authority to specify and include other chronic diseases, after consideration of the comments received in response to the RFI, we do not believe it would be appropriate to add cancer to the core chronic diseases specified in § 423.153(d)(2)(iii) in this final rule. We agree that including cancer may be potentially disruptive to the medication management that is already a part of standard clinical practice in oncology and specialty centers. Moreover, it is unclear that cancer patients' needs can be met through Part D MTM program annual CMRs centered on Part D medication use delivered by MTM pharmacists who typically lack the specialized training in oncology. Cancer treatment goals are often different than the goals for treatment of the other chronic diseases included in Part D MTM program (such as diabetes), where MTM may be used to review and stabilize drug regimens that are likely to be long term. In contrast, many cancers involve a high utilization of physician-administered Part B drugs and frequently changing medication regimens. Also, cancer is not currently commonly targeted by Part D plans as a chronic disease for their MTM program eligibility.

While we are not adding cancer as a core chronic disease at this time, we emphasize that some cancer patients may still be eligible for MTM based on meeting the eligibility criteria. We encourage Part D plans and MTM providers to seek opportunities to promote cancer screening where possible for MTM enrollees and to coordinate with specialty cancer programs to develop medication safety recommendations for cancer patients. In support of the Cancer Moonshot, CMS has initiated other activities, such as the Enhancing Oncology Model (EOM),[18] which is designed to test how best to place cancer patients at the center of high-value, equitable, evidence-based care. CMS has also adopted rules providing payment for principal illness navigation services to help patients and their families navigate cancer treatment and treatment for other serious illnesses.[19]

c. Multiple Part D Drugs

Section 1860D–4(c)(2)(A)(ii) of the Act requires that targeted beneficiaries be taking multiple covered Part D drugs. The current regulation at § 423.153(d)(2)(i)(B) specifies that eight is the maximum number of Part D drugs a Part D plan sponsor may require for targeted MTM enrollment. In accordance with the technical HPMS User Guide for the MTM Program submission module, sponsors are permitted to include all Part D drugs, all Part D maintenance drugs, or specific drug classes.

We proposed to revise § 423.153(d)(2)(i)(B) to decrease the maximum number of Part D drugs a sponsor may require for targeted enrollment from eight to five for plan years beginning on or after January 1, 2024. As discussed in the preamble to the December 2022 proposed rule, while there is no consensus definition of polypharmacy in terms of the use of a certain number of medications or medication classes concurrently, the proposed change would ensure the MTM program continues to focus on more individuals with complex drug regimens and increased risk of medication therapy problems. In addition, although we proposed changes to the targeting criteria with respect to the number of Part D drugs, we noted that the CMR described in § 423.153(d)(1)(vii)(B) should continue to include review of all prescription medications, OTC medications, herbal therapies, and dietary supplements.

We also proposed to add a new provision at § 423.153(d)(2)(iv) to

[18] *https://www.cms.gov/newsroom/press-releases/biden-administration-announces-new-model-improve-cancer-care-medicare-patients.*

[19] *https://www.cms.gov/newsroom/press-releases/cms-finalizes-physician-payment-rule-advances-health-equity?ref=upstract.com.*

require all sponsors to include all Part D maintenance drugs in their targeting criteria. Plans are currently able to include all maintenance drugs in their targeting criteria as an option in the MTM Submission Module in HPMS; however, CMS does not have guidance related to how maintenance drugs are identified for this purpose. To ensure consistency across the MTM program, we also proposed that, for the purpose of identifying maintenance drugs, plans would be required to rely on information contained within a widely accepted, commercially or publicly available drug information database commonly used for this purpose, such as Medi-Span or First Databank, but would have the discretion to determine which one they use. Under this proposal, sponsors would no longer be allowed to target only specific Part D drug classes but would be required to target all Part D maintenance drugs. However, plans would retain the option to expand their criteria by targeting all Part D drugs. CMS solicited public comment on our proposed parameters for defining maintenance drugs, including potential additional sources for making such determinations.

Below, we address comments on the proposed revisions to the maximum number of covered Part D drugs a plan sponsor may require and our proposal to require sponsors to include all Part D maintenance drugs in their targeting criteria. We also describe our rationale for finalizing the proposed changes with modifications.

Comment: Many commenters supported the proposal to lower the maximum number of covered Part D drugs a sponsor may require from eight to five drugs. These commenters supported overall expansion of the MTM program, which they believed would increase medication safety. A commenter who supported the proposal suggested additional targeting criteria, such as targeting individuals taking high-risk medications.

Response: We appreciate the support for this proposal. However, we remind commenters that section 1860D–4(c)(2)(A)(ii) of the Act requires plans to target beneficiaries taking multiple covered Part D drugs. We note, however, that plans retain the flexibility to enroll beneficiaries taking high-risk medications in their MTM programs through expanded eligibility, even if they do not meet the statutory criteria for targeted enrollment. In addition, high-risk medication use may be addressed through MTM interventions.

Comment: Many commenters opposed the proposal to lower the maximum number of covered Part D drugs a sponsor may require from eight to five drugs. Commenters were concerned that MTM would not be as useful for beneficiaries with less complex drug regimens and suggested that beneficiaries should qualify for MTM enrollment based on higher pill burdens and more complicated medication regimens. One commenter stated that a typical enrollee with three or more chronic diseases takes between seven and 10 medications and recommended retaining the current maximum number of drugs at eight. Another commenter suggested initially only decreasing this threshold from eight to five drugs for sponsors that use specific classes of drugs in their criteria, and then fully implementing the proposed change for all plan sponsors the following year.

Response: After consideration of these comments, and the general comments expressing concerns about increased burden and costs, current pharmacy and vendor shortages, and other resource challenges due to the combination of MA and Part D program policy changes plan sponsors must implement over the next several years, we are not finalizing our proposal to lower the maximum number of covered Part D drugs a sponsor may require from eight to five drugs at this time. We are retaining the maximum number of drugs a plan sponsor may require for targeting beneficiaries taking multiple Part D drugs at eight (see § 423.153(d)(2)(i)(B)). Plan sponsors will maintain the flexibility to set a lower threshold (between two and eight Part D drugs) for targeting. This will maintain the MTM program focus on beneficiaries with the most complex drug regimens and will result in a more moderate expansion of the MTM program size. Additionally, our decision not to finalize this aspect of our proposed modifications to the MTM eligibility criteria is supported by CMS' data analysis included in the December 2022 proposed rule (87 FR 79542–79546). We found that the beneficiaries identified as having 3 or more core chronic conditions and using 8 or more drugs who were not eligible for MTM took on average eight to nine Part D drugs, which suggests that the number of Part D drugs criterion is not a main driver of MTM eligibility disparities under our current policies. This change to our proposal allows us to respond to commenters' concerns regarding the potential impact of reducing the maximum number of Part D drugs from eight to five, while still addressing the barriers to eligibility posed by the increasingly restrictive plan criteria (for example, by targeting select core chronic diseases or drugs) and the high cost threshold, which were identified in our analysis as the main drivers of reduced eligibility rates for MTM. CMS will continue to monitor the impact of the number of Part D drugs criterion on MTM eligibility rates and consider whether to propose any changes in future rulemaking.

Comment: No commenters specifically supported or opposed the proposal to include all Part D maintenance drugs in the targeting criteria. One commenter requested clarification on whether specific Part D drug classes could still be targeted. A few commenters recommended either Medispan or First DataBank as sources for identifying maintenance drugs but wanted discretion to determine which one they use.

Response: We appreciate the comments. As we stated in the December 2022 proposed rule, under the proposed modifications to the MTM eligibility criteria, Part D sponsors would no longer be allowed to target only specific Part D drug classes but would be required to target all Part D maintenance drugs at a minimum. However, plans would retain the option to expand their criteria by targeting additional Part D drugs or all Part D drugs. While we proposed that plan sponsors would be required to identify Part D maintenance drugs using information contained within a widely accepted drug database, such as Medi-Span or First Databank, we expressly stated that Part D plans would retain discretion to determine which database to use.

We are finalizing the proposed provision at § 423.153(d)(2)(iv) with modification. Specifically, we are revising the regulation text to clarify that sponsors must include all Part D maintenance drugs and to expressly state that Part D sponsors retain the flexibility to include all Part D drugs in their targeting criteria. Additionally, we are finalizing the requirement that sponsors rely on information contained within a widely accepted, commercially or publicly available drug information database to identify Part D maintenance drugs. We are also updating the text of this provision to reflect that these requirements will apply beginning on January 1, 2025. We are not finalizing the proposal to lower the maximum number of covered Part D drugs a sponsor may require from eight to five drugs at this time.

d. Annual Cost Threshold

Section 1860D–4(c)(2)(A)(ii) of the Act specifies that beneficiaries targeted for MTM must be likely to incur annual costs for covered Part D drugs that

exceed a threshold determined by CMS. The regulation at § 423.153(d)(2)(i)(C) codifies the current cost threshold methodology, which was set at costs for covered Part D drugs greater than or equal to $3,000 for 2011, increased by the annual percentage specified in § 423.104(d)(5)(iv) for each subsequent year beginning in 2012. The annual cost threshold for 2024 is $5,330. The cost threshold has increased substantially since it was established in regulation, while the availability of lower cost generics and the generic utilization rates have also increased significantly since the Part D program began. Together, these factors have resulted in a cost threshold that is grossly misaligned with CMS' intent and inappropriately reduces MTM eligibility among Part D enrollees who have multiple chronic diseases and are taking multiple Part D drugs. The cost threshold has been identified as a significant barrier to MTM access, and, in the past, interested parties have recommended that it be lowered.

In the December 2022 proposed rule, we proposed to amend the regulation at § 423.153(d)(2)(i)(C) to set the MTM cost threshold at the average cost of five generic drugs, as defined at § 423.4, for plan years beginning on or after January 1, 2024. Under this proposal, CMS would calculate the dollar amount of the MTM cost threshold based on the average daily cost of a generic drug using the PDE data specified at § 423.104(d)(2)(iv)(C). As noted in the December 2022 proposed rule, based on 2020 data, the average annual cost of five generic drugs was $1,004. In the proposed rule, CMS indicated that for 2024, the calculation would use PDE data from 2022 to identify the average daily cost of a generic fill, multiplied by 365 days for an annual amount. The average daily cost for a drug would be based on the ingredient cost, dispensing fees, sales tax, and vaccine administration fees, if applicable, and would include both plan paid amounts and enrollee cost sharing. Based on 2022 PDE data analyzed after publication of the December 2022 proposed rule, the average annual cost of five generic drugs was $994. In the December 2022 proposed rule, we noted that in subsequent years, the MTM cost threshold would be published in the annual Part D Bidding Instructions memo.

Below, we address comments on the proposed revisions to the annual cost threshold and describe our rationale for finalizing a modified MTM cost threshold methodology at § 423.153(d)(2)(i)(C) based on the average annual cost of eight generic drugs, which will be applicable beginning January 1, 2025.

Comment: Many commenters opposed the proposal to set the MTM cost threshold at the average cost of five generic drugs. While many of these commenters agreed that the current MTM cost threshold is too high, they opposed our proposal to base the cost threshold on the average cost of five generic drugs due to the estimated impact on MTM program size. Instead, some commenters supported a less significant cost threshold reduction. A few commenters suggested that the cost threshold is irrelevant as the number of drugs, not their cost, is a key metric. A health plan commented that over 40 percent of its enrollees would have annual drug costs that meet the proposed MTM cost threshold and suggested that the overarching aim should instead be to continue targeting enrollees who are at risk for polypharmacy. This commenter cited a study suggesting the range of rates of ambulatory elderly patients who experience adverse drug reactions is 20 to 25 percent and that targeting a much larger percentage of Medicare Advantage membership to enroll in an MTM program may divert the focus from the population that would most benefit from program inclusion. Other commenters did not recommend decreasing the cost threshold to align with annual average generic drug costs because that would target beneficiaries who would not benefit from a CMR consultation regarding cost savings opportunities. Another commenter suggested that CMS consider increasing the annual cost threshold, instead of decreasing it, to better account for inflation in the prescription drug market and allow plans to have greater capacity to target MTM services to high need members.

Some commenters suggested alternative proposals for lowering the MTM cost threshold. One commenter suggested CMS seek insight from the industry, such as the PQA, on how best to adjust the cost threshold. A few commenters recommended alternative approaches to establish the cost threshold, such as commensurate with the average cost of eight generic drugs, a specific dollar amount, the cost of a mix of brand and generic drugs as many beneficiaries take at least one brand drug, or an incremental approach to decreasing the cost threshold, starting with the annual cost of six or seven drugs.

Response: After considering the comments and suggestions we received, we are persuaded to finalize a modified MTM cost threshold methodology at § 423.153(d)(2)(i)(C) based on the average annual cost of eight generic drugs beginning January 1, 2025. This revised cost threshold methodology aligns with our decision not to finalize our proposal to reduce the maximum number of covered Part D drugs a sponsor may require from eight to five drugs. Lowering the cost threshold removes a significant barrier to MTM enrollment, but setting the threshold at the cost of eight (instead of five) generic drugs yields a more moderate program size expansion, which will address commenters' concerns about cost and burden. Encouraging the use of generic or lower cost drugs when medically appropriate remains a pillar of the Part D program. Under our final policy, beneficiaries meeting the criteria of having multiple chronic diseases and taking multiple Part D drugs, but who are taking lower cost generic alternatives, may now be targeted for MTM enrollment. MTM enrollees, especially those with high drug costs, may continue to benefit from cost saving opportunities from CMRs. However, even if a CMR consultation does not result in cost savings, there are other benefits of CMRs beyond cost savings.

Comment: Many commenters requested clarification regarding the MTM cost threshold calculation, including which five generic drugs will be used to determine this new cost threshold; what methodology CMS will use to select the drugs; how authorized generics, biosimilars, or un-branded biologics factor into the determination; whether the proposed methodology would utilize the top five utilized generic drugs by prescription volume or the top five generic drugs by plan paid amount; whether the calculation includes or excludes generic specialty medications; whether there is a process to detect outlier national drug codes (NDCs) to ensure they are not included in the calculation; and whether the cost of five generic drugs is per 30-day supply of medication. A few commenters asked if the proposed cost threshold would be expected to increase or decrease annually. Another commenter suggested that CMS reevaluate cost data for generic drugs, as costs of many generic drugs have increased since 2020 due to global supply chain issues after the COVID–19 pandemic. One commenter asked if enrollees would be required to receive the generic drugs only.

Response: The average daily cost of one generic drug was calculated as total gross drug cost divided by total days supply for all Part D covered generic drugs utilized by all Part D enrollees during the plan year. The average daily

cost of one generic drug was then multiplied by eight drugs and 365 days to compute an average annual cost of eight generic drugs. The total gross drug cost used in this calculation is the sum of the ingredient cost, dispensing fees, sales tax, and vaccine administration fees, if applicable, during the relevant plan year and includes both plan paid amounts and enrollee cost sharing. This calculation does not include the cost of biologic products or authorized generics. Compound drug claims are also excluded.

Beginning January 1, 2025, CMS will calculate the dollar amount of the MTM cost threshold based on the average daily cost of a generic drug as determined using PDE data from the plan year that ended 12 months prior to the applicable plan year, which is the PDE data currently used to determine the specialty-tier cost threshold as specified in the provision at § 423.104(d)(2)(iv)(C). CMS will analyze the PDE data for all Part D covered generic drugs utilized by all Part D enrollees during the plan year to calculate the average daily cost of one generic fill and multiply the average daily cost of one generic fill by 365 days to determine an annual amount. Therefore, the cost threshold may change annually. Although average costs for all Part D covered generic drug fills will be used to calculate the MTM cost threshold, a beneficiary would not be required to only take generic drugs to meet the eligibility criteria for MTM, and beneficiary-specific drug costs may vary from the averages.

For example, based on 2022 PDE data, the average annual cost of eight generic drugs was $1,591. If the MTM threshold were set at this amount, plans would be required to target beneficiaries who are likely to incur annual covered Part D drug costs greater than or equal to $1,591 (across all Part D drugs they take, not just generic drugs) and meet the other MTM targeting criteria for having multiple chronic diseases and taking multiple Part D drugs for enrollment in their MTM program.

Based on analysis of 2023 PDE data, the MTM cost threshold will be $1,623 for 2025. The MTM cost threshold will be published in the annual Part D Bidding Instructions memo for future years.

Following consideration of the comments received on the cost threshold, as well as on the maximum number of Part D drugs plans may target, we are finalizing a modified MTM cost threshold methodology at § 423.153(d)(2)(i)(C) based on the average annual cost of eight generic drugs as defined at § 423.4. This new cost threshold methodology will be applicable beginning January 1, 2025.

e. Summary

After consideration of the comments received, we are finalizing proposed changes to the Part D MTM program eligibility requirements with the modifications discussed. The changes are effective January 1, 2025 and are summarized below.

- We are finalizing the provision at § 423.153(d)(2)(iii) that Part D sponsors must include all core chronic diseases in their targeting criteria for identifying beneficiaries who have multiple chronic diseases, as provided under § 423.153(d)(2)(i)(A). As part of this provision at § 423.153(d)(2)(iii), we are codifying the nine core chronic diseases currently identified in guidance and adding HIV/AIDS, for a total of 10 core chronic diseases. The 10 core chronic diseases are: (A) Alzheimer's disease; (B) Bone disease-arthritis (including osteoporosis, osteoarthritis, and rheumatoid arthritis); (C) Chronic congestive heart failure (CHF); (D) Diabetes; (E) Dyslipidemia; (F) End-stage renal disease (ESRD); (G) Human immunodeficiency virus/acquired immunodeficiency syndrome (HIV/AIDS); (H) Hypertension; (I) Mental health (including depression, schizophrenia, bipolar disorder, and other chronic/disabling mental health conditions); and (J) Respiratory disease (including asthma, chronic obstructive pulmonary disease (COPD), and other chronic lung disorders). Sponsors retain the flexibility to target additional chronic diseases beyond those codified as core chronic diseases.
- We are not finalizing the proposal at § 423.153(d)(2)(i)(B) to decrease the maximum number of Part D drugs a sponsor may require from eight to five at this time. We are retaining the maximum number of drugs a plan sponsor may require for targeting beneficiaries taking multiple Part D drugs as eight at § 423.153(d)(2)(i)(B). Part D sponsors will maintain the flexibility to set a lower threshold (a number between two and eight Part D drugs) for targeting beneficiaries taking multiple Part D drugs. We may revisit the maximum number of Part D drugs (eight) a sponsor may require in future rulemaking.
- We are finalizing the provision at § 423.153(d)(2)(iv) to require sponsors to include all Part D maintenance drugs in their targeting criteria with minor modifications to the regulatory text to clarify that sponsors must include all Part D maintenance drugs and to provide flexibility for sponsors to include all Part D drugs in their targeting criteria. However, sponsors will not be permitted to limit the Part D maintenance drugs included in MTM targeting criteria to specific Part D maintenance drugs or drug classes. We are also finalizing the requirement at § 423.153(d)(2)(iv) that, for the purpose of identifying Part D maintenance drugs, plans must rely on information in a widely accepted, commercially or publicly available drug information database.
- We are finalizing the provision at § 423.153(d)(2)(i)(C) with modification to set the MTM cost threshold at the average cost of eight generic drugs, as defined at § 423.4. CMS will calculate the dollar amount of the MTM cost threshold based on the average daily cost of a generic drug using the PDE data specified at § 423.104(d)(2)(iv)(C).

We believe these final policies will allow us to address specific gaps identified in MTM program eligibility by reducing marked variability across plans and ensuring more equitable access to MTM services; better align with Congressional intent while focusing on beneficiaries with complex drug regimens; and keep the program size manageable. The changes also take into consideration the burden a change in the MTM program size would have on sponsors, MTM vendors, and the health care workforce as a whole. With these changes, we estimate that the number and percent of Part D enrollees eligible for MTM will increase from 3.6 million (7 percent of Part D enrollees based on actual 2022 MTM enrollment data) to a total of 7.1 million (13 percent of Part D enrollees estimated using 2022 data), which is smaller than the estimated program size of 11 million beneficiaries in the December 2022 proposed rule. Burden estimates and impacts are discussed in sections X. and XI. of this proposed rule, respectively.

2. Define ''Unable To Accept an Offer To Participate'' in a Comprehensive Medication Review (CMR)

In guidance issued annually, CMS has consistently stated that we consider a beneficiary to be unable to accept an offer to participate in a CMR only when the beneficiary is cognitively impaired and cannot make decisions regarding their medical needs. In the December 2022 proposed rule, we proposed to codify this definition by amending the current regulation text at § 423.153(d)(1)(vii)(B)(2) to specify that in order for the CMR to be performed with an individual other than the beneficiary, the beneficiary must be unable to accept the offer to participate in the CMR due to cognitive impairment.

We received the following comments on this proposal, and our responses follow:

Comment: A commenter voiced their support for our proposal.

Response: CMS appreciates the commenter's support.

Comment: A few commenters opposed or voiced concerns about the proposal, stating that many beneficiaries who are not cognitively impaired request that their caregiver or a trusted family member participate in the CMR on their behalf. For example, one commenter mentioned hearing impairment as a barrier for the beneficiary receiving the CMR directly from the provider. Another commenter pointed out that many beneficiaries receive MTM services in long-term care facilities where nurses who manage their medications should be allowed to participate in the reviews on the beneficiary's behalf. They argued that caregivers should be allowed to participate in the CMR as long as HIPAA Privacy Rule policies are not violated, and proper documentation is maintained.

Response: Our proposal to codify the definition of ''unable to participate'' does not preclude beneficiaries from inviting other individuals to join them for the CMR. MTM enrollees may continue to include caregiver or family member participation during the MTM process, though we emphasize that MTM is a beneficiary-centric program. Instead, this rule codifies the definition of ''unable to participate,'' which is different from a beneficiary requesting a CMR to be completed with another individual. Generally, we expect the beneficiary being ''unable to participate'' due to cognitive impairment to be an uncommon designation that should be reported through the Part D Reporting Requirements (OMB 0938–0992). We will continue to monitor the percentages of beneficiaries who are unable to accept a CMR offer for outlier rates, and sponsors should retain documentation supporting any instance in which a beneficiary is designated as ''unable to participate'' in their reported data.

CMS would also like to remind plan sponsors that they are expected to put in place safeguards against discrimination based on the nature of their MTM interventions. Hearing impairment should not prevent a beneficiary from receiving MTM services. Relevant federal regulations for MTM programs may include Federal Communications Commission requirements for accessibility, as defined in 47 CFR part 64 Subpart F; Americans with Disabilities Act (ADA): Nondiscrimination on the Basis of Disability by Public Accommodations and in Commercial Facilities, 28 CFR part 36; Nondiscrimination on the Basis of Race, Color, National Origin, Sex, Age, or Disability in Health Programs or Activities Receiving Federal Financial Assistance and Programs or Activities Administered by the Department of Health and Human Services Under Title I of the Patient Protection and Affordable Care Act or by Entities Established Under Such Title, 45 CFR Part 92; Section 504 of the Rehabilitation Act, Nondiscrimination on the Basis of Handicap in Programs or Activities Receiving Federal Financial Assistance, 45 CFR part 84; and 21st Century Communications and Video Accessibility Act (CVAA). Part D sponsors should also refer to the standards for communications and marketing found at 42 CFR 423.2267(a).

After consideration of the comments received, we are finalizing the definition of a ''unable to accept an offer to participate'' in a CMR as proposed at § 423.153(d)(1)(vii)(B)(2) to provide that a beneficiary must be unable to accept the offer to participate in the CMR due to cognitive impairment.

3. Requirement for In Person or Synchronous Telehealth Consultation

As discussed in the December 2022 proposed rule, we proposed to amend the existing regulation text at § 423.153(d)(1)(vii)(B)(1)(i) to require that the CMR be performed either in person or via synchronous telehealth to clarify that the CMR must include an interactive consultation that is conducted in real-time, regardless of whether it is done in person or via telehealth. As discussed in the December 2022 proposed rule, while the consultation must be conducted in real-time, under this proposal, plans would continue to have the discretion to determine whether the CMR can be performed in person or using the telephone, video conferencing, or another real-time method.

We received the following comments on this proposal, and our responses follow:

Comment: Several commenters supported clarifying the regulatory language on the use of telehealth. A few commenters expressly stated that their support for the proposal was conditioned on ''telehealth'' including a telephone option. Another commenter expressed concern regarding lower levels of engagement due to fewer people wanting in-person interactions in a pharmacy setting and fewer people answering their phone, even when it is their local pharmacy calling.

Response: We thank these commenters for their feedback and confirm that telephonic communication meets the definition of synchronous telehealth. We believe updating the regulation to clarify that a CMR must include an interactive consultation that is conducted in real-time, regardless of whether it is done in person or via telehealth, will ensure that beneficiaries receiving a CMR via telehealth have the same opportunities to engage with their providers in real time as beneficiaries who receive a CMR in-person. Sponsors are encouraged to offer multiple methods of engagement since beneficiaries may prefer in-person or telehealth interactions.

After consideration of the comments received, we are finalizing the proposed revisions to § 423.153(d)(1)(vii)(B)(1)(i) without modification.

4. MTM Program Technical Changes

In the December 2022 proposed rule, we proposed several technical changes to the regulation text related to the Part D MTM program. At § 423.4, we proposed to add a definition for ''MTM program'' to clarify the meaning of this term as used in Part 423. In the heading for § 423.153(d), we proposed to remove the dash and replace it with a period to be consistent with other paragraph headings in Subpart D. We proposed to amend § 423.153(d) by striking ''or'' from the end of existing paragraph (d)(2)(i)(C)(2) to clarify that, consistent with section 1860D–4(c)(2)(A)(ii) of the Act, plan sponsors must target enrollees described in paragraph (d)(2)(i) and enrollees described in paragraph (d)(2)(ii). Throughout Part 423, Subpart D, we proposed to replace ''MTMP'' with ''MTM program'' to ensure that the terminology is used consistently.

We did not receive any comments regarding these changes and are finalizing these MTM program technical changes as proposed.

F. Part D Subcontractors May Terminate Only at the End of a Month (§ 423.505)

At § 423.505(i), we proposed to require Part D sponsors to include a provision in certain contracts with first tier, downstream, and related entities (FDRs) (as defined at § 423.501) that the FDR may terminate its contract only at the end of a calendar month after providing at least 60 days' prior notice. Specifically, we proposed that this prior notice be required in contracts with FDRs that perform critical functions on the sponsor's behalf, as described in the December 2022 proposed rule. We believe this change is necessary to protect beneficiaries from disruptions in receiving Part D benefits and to protect

the Part D program from incurring additional financial liability. We are finalizing this provision as proposed.

As discussed in the December 2022 proposed rule preamble, Part D sponsors contract with FDRs to perform many of the services critical to the operation of the Part D program. For example, FDRs administer formularies, process beneficiary enrollments into plans, contract with pharmacies, process Part D claims at the point of sale, and administer enrollee appeals and grievance processes. Many Part D sponsors do not have the internal capability to take over administration of these functions from their FDRs on short notice. If an FDR ceases operations under a contract, enrollees in an affected plan may therefore be left without access to their Part D benefits until the sponsor is able to make alternative arrangements. For these reasons, CMS has a critical interest in ensuring Part D sponsors' contracts with these FDRs protect beneficiaries and the program.

Occasionally, Part D sponsors face financial difficulties so severe that they may stop paying FDRs for services provided under their Part D contracts. Such difficulties may also cause sponsors to be placed into receivership or bankruptcy. In response to such developments, an FDR may terminate its contract with the Part D sponsor or, in the case of FDRs that administer claims at the point of sale, stop paying claims to prevent or minimize operating losses. Such actions may be prompted by overdue reimbursement from the sponsor or anticipated payment stoppages and can occur in the middle of a month, depending on the termination notice terms in the sponsor's contract with the FDR. Fortunately, such mid-month terminations are rare. However, when they occur, they can result in significant disruptions for enrollees, including a lack of access to needed prescriptions through their Part D plan. For instance, a PDP contract was terminated in the middle of March 2021 due, in part, to the PDP's PBM terminating its contract mid-month for nonpayment. This disrupted care for almost 40,000 beneficiaries and forced CMS to incur additional expense to ensure that all beneficiaries had continuous coverage for the month of March.

Mid-month terminations can also result in CMS incurring additional costs. CMS makes prospective monthly capitation payments to Part D sponsors, as provided in section 1860D–15(a)(1) of the Act and codified in § 423.315(b). When an FDR performing critical functions on a sponsor's behalf terminates a contract mid-month, CMS has already paid the sponsor for the services that the FDR was supposed to render for the remainder of that month. To protect beneficiaries from suffering further harm, CMS may find it necessary to terminate a sponsor's contract pursuant to § 423.509 or come to terms for a mutual termination pursuant to § 423.508. CMS reassigns affected beneficiaries to other Part D plans in the same service area when such terminations occur at any time other than the end of a contract year. When these reassignments occur mid-month, CMS makes a full prospective payment for that month to the plan into which enrollees are reassigned, so that CMS pays twice for the same month. For example, if contract 1 terminates effective May 15 and CMS reassigns enrollees to contract 2, CMS would pay contract 2 for the full month of May even though it already paid contract 1 for the month of May. CMS has authority under § 423.509(b)(2)(ii) to recover the prorated share of the capitation payments made to the Part D sponsors covering the period of the month following the contract termination, but as a practical matter, a contract terminated due to financial difficulties usually does not have the funds available to repay CMS. Nor is CMS able to make a prorated monthly payment to the contract into which enrollees are reassigned.

To protect beneficiaries and the Part D program from the consequences of mid-month terminations of certain FDR contracts, we proposed to establish at § 423.505(i)(6) a requirement that all Part D sponsors' contracts with FDRs that perform certain key Part D functions require a minimum of 60-days' prior notice of termination with an effective date that coincides with the end of a calendar month. We are adopting this change pursuant to our authority at section 1857(e) of the Act, made applicable to Part D through section 1860D–12(b)(3)(D), which authorizes the Secretary to adopt contract terms and conditions as necessary and appropriate and not inconsistent with the Part D statute. This policy is consistent with the existing requirement that FDRs must comply with Part D requirements and support the sponsor's performance of its Part D functions, including ensuring access to covered Part D drugs under § 423.120(a), as required at § 423.505(i)(3)(iii) and (iv). Because Part D sponsors are paid prospectively and in units of no less than one calendar month, they and their subcontractors should be able to negotiate arrangements for access to covered Part D drugs in no less than 1-month increments by, for example, requiring Part D sponsors to provide a surety bond to compensate the FDR in the event of the sponsors' fiscal insolvency. We do not believe that this will result in significant additional expense for Part D sponsors because mid-month terminations have been very rare to date.

The proposed provision at new paragraph (6) requires the contract between a Part D sponsor and an FDR providing certain functions to state that a contract termination could only occur after a 60-day notice period and have an effective date that coincides with the end of a calendar month. The functions for which this requirement would apply would be—

- Authorization, adjudication, and processing of prescription drug claims at the point of sale;
- Administration and tracking of enrollees' drug benefits in real time;
- Operation of an enrollee appeals and grievance process; and
- Contracting with or selection of prescription drug providers (including pharmacies and non-pharmacy providers) for inclusion in the Part D sponsor's network.

All of these functions are critical to beneficiaries maintaining access to Part D drugs and ensuring that they pay appropriate out of pocket costs. The disruption of any one of these functions could result in beneficiaries failing to receive necessary drugs or incurring unnecessary costs.

We received comments on this proposal, which are summarized below, and respond to them as follows.

Comment: One commenter requested clarification on whether the proposed rule was applicable to terminations initiated by Part D sponsors or limited to terminations initiated by FDRs.

Response: The proposed rule would only apply to terminations initiated by FDRs. Part D sponsors would remain free to terminate their FDRs mid-month or on less than 60 days' notice if their contracts with FDRs permit such terminations. CMS notes that any sponsor seeking to terminate an FDR mid-month or on short notice would remain accountable for ensuring that its enrollees continue to receive uninterrupted Part D benefits in compliance with the statute, regulation, and its contract with CMS.

Comment: A few commenters expressed support for the proposal but requested that CMS include an exemption for terminations initiated by Part D sponsors based on fraud or member harm.

Response: CMS appreciates commenters' support. We note that the proposed rule would not limit Part D sponsors' ability to terminate their FDRs for any reason. Therefore, sponsors' ability to terminate FDR contracts based on fraud or member harm would be unaffected by the proposed rule.

After considerations of the comments and for the reasons outlined in the proposed rule and our response to comments, we are finalizing the provision as proposed with one grammatical edit regarding capitalization.

G. Application of 2-Year Ban on Reentering the Part D Program Following Non-Renewal (§§ 423.507 and 423.508)

In the December 2022 proposed rule, we proposed to amend §§ 423.507(a)(3) and 423.508(e) to clarify that the prohibition on PDP sponsors that non-renew or mutually terminate a contract entering into a new PDP contract for 2 years applies at the PDP region level. That is, if a sponsor non-renews or mutually terminates a PDP contract, the two-year exclusion would only prohibit them from entering into a new or expanded PDP contract in the PDP region(s) they exited and would not prevent them from entering into a new or expanded contract in another region(s). We also proposed to clarify that the 2-year exclusion applies whenever a PDP sponsor terminates all of its plan benefit packages (PBPs) in a PDP region, commonly known as a ''service area reduction,'' even if they continue to serve other PDP regions under the contract.

Under current regulations at §§ 423.507(a)(3) and 423.508(e), Part D sponsors that non-renew or mutually terminate their contracts with CMS are ineligible to enter into a new Part D contract for two years following the non-renewal or mutual termination, absent circumstances that warrant special consideration. CMS adopted the two-year exclusion at the beginning of the Part D program in 2006 in order to implement the requirements of section 1857(c)(4) of the Act, made applicable to the Part D program by section 1860D–12(b)(3)(B) of the Act. The 2-year exclusion following contract non-renewal or mutual termination promotes stability in the Part D program, as the additional period of contracting ineligibility causes organizations to consider more than just the year-to-year fluctuations in the Part D market in deciding whether to discontinue their participation in the program.

As described in the proposed rule, the 2-year exclusion at the PDP region level would sufficiently promote the market-stabilizing purpose of the exclusion by prohibiting PDP sponsors from non-renewing all their plans in a region and returning to the same market after only one year of absence from the program. We believe the 2-year exclusion as applied at the regional level would prevent sponsors from undermining the nondiscrimination requirements at section 1860D–11(e)(2)(D)(i) of the Act by, for example, terminating PBPs in a region so they would no longer receive LIS auto-enrollment. If the two-year exclusion were not applied at the regional level, the effective penalty for the Part D sponsors choosing to stop serving LIS beneficiaries would be only one year's absence from offering plans in that region, rather than two. However, these same concerns do not apply across regions. A sponsor that non-renews a plan receiving LIS auto-enrollments in one region that wishes to enter a different region the next year would not simply be seeking to enroll more desirable beneficiaries who had declined to enroll in their previous plan; instead, they would be competing in a completely different market. Therefore, we see no reason to prohibit sponsors that non-renew their plans in one region from offering plans in a new region before the 2-year exclusion period elapses.

We proposed to modify §§ 423.507(a) as follows:

- Revising paragraph (3) to add regulatory text clarifying that the requirements in this paragraph pertain to PDP sponsors' ineligibility to enter into a contract for 2 years;
- Redesignating paragraph (a)(3) regarding the current regulatory requirement regarding a 2-year contracting ban following non-renewal of a PDP contract as new paragraph (a)(3)(i);
- Adding language to new paragraph (a)(3)(i) stating that CMS cannot enter into a new contract in the PDP region or regions served by the non-renewing contract;
- Adding new paragraph (a)(3)(ii) to authorize CMS to make organizations that non-renew all of their PBPs in a PDP region ineligible to have plan bids approved again in that region for 2 years; and
- Adding new paragraph (a)(3)(iii) exempting new EGWP PBPs from the 2-year ban.

Similarly, we proposed to apply our policy limiting the offering of plans at the PDP region level for 2 years to mutual terminations under § 423.508. We proposed to add a sentence to the existing regulatory text at paragraph (e) stating that a mutual termination of participation in a PDP region makes a PDP sponsor ineligible to apply for qualification to offer new plans in that region for 2 years. While we already require sponsors seeking a mutual termination to agree not to apply for a new contract for two years, we believe that the same concerns that support applying the 2-year exclusion for non-renewals at the regional level pertain to mutual terminations. Allowing a sponsor that mutually terminates a contract in one PDP region to apply for a new contract in another PDP region does not incentivize the market-destabilizing practice of entering and exiting the PDP market in rapid succession. Therefore, we believe our application of the 2-year exclusion should be consistent between non-renewals and mutual terminations.

We note that this proposed provision would not apply to a PDP sponsor's non-renewal of its EGWP plans since those plans do not affect the availability of plan choices to beneficiaries or the number of plans that qualify for automatic LIS enrollments. We are also not concerned that non-renewal of EGWP plans would be driven by a sponsor's attempt to engage in adverse selection because EGWP plans are subject to contract negotiation between employers and sponsors and are not open to enrollment to all beneficiaries in the service area.

We received a comment on this proposed provision.

Comment: The commenter was generally supportive of the proposal and of exempting EGWP plans from the 2-year ban following nonrenewal or mutual termination. The commenter requested that we also exempt PDP PBPs and contracts terminated as part of a consolidation of plans and contracts after an acquisition.

Response: We appreciate the commenter's support for our proposal. We understand the commenter's concern regarding the application of the 2-year ban following a PDP consolidation, but do not believe any modification of the proposal is necessary because the termination of a PDP contract as part of a consolidation would not trigger the 2-year ban so long as the surviving contract continued to offer PDP PBPs in the affected regions. A consolidation occurs when two or more PDP contracts operated by the same sponsor or by sponsors that are subsidiaries of the same parent organization combine into a single contract. Consolidations often occur after the acquisition of a sponsor by a parent organization that has subsidiaries that offer PDP PBPs in the same region as the acquired sponsor. CMS limits the

number of PDP PBPs that a sponsor (or subsidiaries of the same sponsor) can offer to three plans per region under § 423.265(b)(3) and consolidations are often required to comply with this requirement following an acquisition. So long as the contract into which the plans are consolidated continues to offer PDP PBPs in the affected region(s), the sponsor (or the sponsor's parent organization) is not exiting the region and therefore would not be subject to the 2-year ban on reentering the region.

After consideration of the comments received and for the reasons outlined in the proposed rule and our response to those comments, we are finalizing the provision as proposed with minor grammatical and formatting changes.

H. Crosswalk Requirements for Prescription Drug Plans (§ 423.530)

1. Overview and Summary

In the December 2022 proposed rule, we proposed to codify, with modifications, the current process and conditions under which PDP sponsors can transfer their enrollees into a different PDP's plan benefit packages (PBPs) from year to year when such enrollees have made no other election. This process is known as a ''plan crosswalk'' and does not apply to enrollees in employer group health or waiver plans. Our proposal defined plan crosswalks and crosswalk exceptions; codified the circumstances under which enrollees can be transferred into different PDP PBPs from year to year; established the circumstances under which enrollees can be transferred into PDP PBPs offering different types of prescription drug coverage (''basic'' or ''enhanced alternative'' coverage); established the circumstances under which enrollees can be transferred due to contract consolidations of PDPs held by subsidiaries of the same parent organization; and provided protections against excessive premium increases resulting from crosswalks. We also proposed to limit the ability of PDP sponsors to create new PDP PBPs to replace non-renewing PBPs under certain circumstances.

We requested comment on whether and under what circumstances we should permit crosswalks from PBPs offering basic prescription drug coverage to PBPs offering enhanced alternative prescription drug coverage, whether we should require sponsors that non-renew an enhanced alternative PBP while continuing to offer individual market coverage in the same PDP region to crosswalk affected beneficiaries into another PBP, and limitations we should place on premium and cost increases for enrollees who are crosswalked between different PBPs. We were particularly interested in how best to balance avoiding gaps in prescription drug coverage, preserving beneficiary choice and market stability, and preventing substantial increases in costs to beneficiaries resulting from crosswalks.

Finally, we proposed to codify the current procedures that a Part D sponsor must follow when submitting a crosswalk or crosswalk exception request.

2. Proposed General Rules for Plan Crosswalks (§ 423.530(a))

Section 1860D–1(b)(1)(B) of the Act requires the Secretary to use rules similar to and coordinated with the rules for enrollment, disenrollment, termination, and change of enrollment in MA–PD plans under certain provisions of section 1851 of the Act. Therefore, in codifying general rules for plan crosswalks, we seek both to maintain current policy and, to the extent possible, be consistent with the requirements for MA plan crosswalks codified at § 422.530 in the final rule published in the January 19, 2021 **Federal Register** (CMS–4192–F2) (86 FR 5864).

At § 423.530(a)(1), we proposed to define a plan crosswalk as the movement of enrollees from one PDP PBP to another PDP PBP. We noted that this definition is consistent with current policy and with the definition of crosswalks for MA plans, codified at § 422.530(a)(1).

We proposed at § 423.530(a)(2)(i) through (iii) to adopt the crosswalk prohibitions in current CMS subregulatory guidance, described in the ''Guidance for Prescription Drug Plan (PDP) Renewals and Nonrenewals'' (hereinafter referred to as the PDP Renewal and Nonrenewal Guidance), issued in April 2018 and posted to the CMS website at *https://www.cms.gov/Medicare/Prescription-Drug-Coverage/PrescriptionbDrugCovbContra/Downloads/Guidance-for-Prescription-Drug-Plan-PDP-Renewals-and-Non-Renewals-.pdf*. First, we proposed to prohibit crosswalks between PBPs in different PDP contracts unless the PDP contracts are held by the same Part D sponsor or by sponsors that are subsidiaries of the same parent organization. Second, we proposed to prohibit crosswalks that split enrollment of one PBP into multiple PBPs. Third, we proposed to prohibit crosswalks from PBPs offering basic coverage to PBPs offering enhanced alternative coverage.

In the preamble to the December 2022 proposed rule, we noted that, in the past, organizations have sought exceptions to the prohibition of basic-to-enhanced alternative crosswalks on the grounds that one of the available enhanced alternative PBPs is lower cost or otherwise a better alternative for enrollees in a non-renewing basic PBP than the available basic PBP. These requests come in the context of proposed contract consolidations crosswalks and, because CMS prohibits PDP contracts from offering more than one PBP offering basic coverage in a region under § 423.265(b)(2), there would only be one option for the enrollees in non-renewing basic PBP to be transferred into. PBPs offering basic prescription drug coverage can vary widely in premium and estimated out-of-pocket costs. Enhanced alternative PBPs sometimes offer lower premiums than basic PBPs under the same contract. However, as discussed previously in section IV.AD.2. of the December 2022 proposed rule, a portion of the premium for an enhanced alternative PBP is the ''supplemental'' premium and any LIS-eligible individuals transferred from a basic to an enhanced alternative PBP might therefore have to pay more than they would in the available basic PBP, even if the enhanced alternative PBP has a lower overall premium. 87 FR 79602. Therefore, we proposed to continue our current policy in order to protect LIS-eligible beneficiaries from unanticipated premium increases.

We solicited comments on whether and under what circumstances to allow crosswalks from PBPs offering basic prescription drug coverage to enhanced alternative coverage. CMS was particularly interested in how such crosswalks could be administered in a way that protects LIS-eligible beneficiaries from premium and other cost increases.

Plan crosswalks often occur in the context of contract renewals and non-renewals. We proposed at § 423.530(a)(3) to require sponsors seeking crosswalks to comply with rules in §§ 423.506 and 423.507 governing renewals and non-renewals, respectively. This requirement is consistent with the requirement for MA plan crosswalks codified at § 422.530(a)(3). We also proposed at § 423.530(a)(4) to make clear that only enrollees eligible for enrollment under § 423.30 can be crosswalked from one PBP to another. Finally, we proposed at § 423.530(a)(5) to continue to allow enrollees in employer group health or waiver PBPs to be transferred between PBPs in accordance with the usual

process for enrollment in employer group health or waiver plans, rather than in accordance with the proposed provisions of § 423.530. This proposal would ensure that the process for enrollment in employer group health or waiver plans is not disrupted by this proposed rule.

3. Mandatory Crosswalks (§ 423.530(b))

We proposed at § 423.530(b)(1) and (2) to require enrollees in PDP PBPs that are renewing to be transferred into the same PBP for the following contract year. This is consistent with the current process summarized for renewal plans in the PDP Renewal and Nonrenewal Guidance. As discussed in the December 2022 proposed rule preamble, this requirement would continue to apply to PBPs offering both enhanced alternative and basic coverage and would continue to facilitate evergreen enrollment as required by section 1851(c)(3)(B) of the Act. We also noted that the proposal was consistent with the requirements for MA renewal crosswalks codified at § 422.530(b)(1)(i).

4. Plan Crosswalk Exceptions (§ 423.530(c))

We proposed at § 423.530(c) to classify consolidated renewal and contract consolidation crosswalks as ''crosswalk exceptions.'' We proposed to define ''consolidated renewals'' and ''contract consolidations'' consistent with the current policy described previously in section IV.AD.2. of the December 2022 proposed rule. We proposed to codify our current policy for the two types of plan crosswalk exceptions with some modifications.

For consolidated renewals, we proposed to codify current policy at § 423.530(c)(1)(i) through (iv) with modifications that balance concerns for beneficiaries in non-renewing plans losing coverage with concerns about market stability and limiting unexpected premium increases. Specifically, we proposed that:

- The plan ID for the upcoming contract year PBP must be the same plan ID as one of the PBPs for the current contract year;
- The PBPs being consolidated must be under the same PDP contract;
- A PBP offering basic prescription drug coverage may not be discontinued if the PDP contract continues to offer plans (other than employer group waiver plans) in the service area of the PBP; and
- Enrollment from a PBP offering enhanced alternative coverage may be crosswalked either into a PBP offering either enhanced alternative or basic prescription drug coverage.

We also proposed four major modifications to current policy with respect to consolidated renewals:

- At § 423.530(c)(1) to allow, but not require, plan crosswalks in consolidated renewal scenarios. PDP sponsors could request a crosswalk of enrollment from a non-renewing PBP to another PBP under the same contract, provided it meets the other requirements of § 423.530;
- At § 423.530(c)(1)(v), to require enrollees from non-renewing PBPs offering enhanced alternative coverage to be crosswalked into the PBP that will result in the lowest premium increase;
- At § 423.530(c)(1)(vi), to prohibit plan crosswalks if the crosswalk would result in a premium increase greater than 100 percent, unless the dollar amount of the premium increase would be less than the base beneficiary premium, as described in § 423.286(c), compared to the current year premium for the non-renewing PBP; and
- At § 423.530(c)(1)(vii), to prohibit sponsors that fail to request and receive a plan crosswalk exception from offering a new enhanced alternative PBP in the same service area for the contract year after they non-renew an enhanced alternative PBP.

As discussed in the preamble to the December 2022 proposed rule, we recognize that premiums are not the only aspect of a PBP's structure that affect costs to beneficiaries or the beneficiary experience. The PBP's formulary and cost-sharing structure are also important elements affecting beneficiary costs. However, premiums for a PBP are the same for every enrollee and are therefore the most straightforward factor to use to protect enrollees from unexpected cost increases. We solicited comments on whether we should use other factors, such as differences in estimated out of pocket costs (OOPC) between the non-renewing and surviving PBPs, rather than simply the difference in plan premiums, to determine whether approving a plan crosswalk exception is the best option for enrollees in a non-renewing PBP. We also requested comments on whether to allow plan crosswalks to a higher premium plan if the difference between the higher premium plan and the lower premium plan is less than a certain dollar amount—for example, should CMS permit a crosswalk to a higher premium surviving PBP despite the availability of a lower premium surviving PBP if the difference between the premiums is less than a fixed dollar amount. Finally, we sought comment on alternatives to using the base beneficiary premium. Potential alternatives included a fixed dollar amount, the low-income premium subsidy amount, described in § 423.780(b), for the non-renewing PBP's region, or the national average monthly bid amount, described in § 423.279.

These four proposed changes represented a significant shift from current policy. As such, we solicited comments on alternative approaches. Possible alternatives included, but were not limited to: (1) requiring plan crosswalks when a sponsor non-renews an enhanced alternative PBP while continuing to offer individual market coverage under the same PDP contract, but prohibiting sponsors from creating a new PBP to replace the non-renewing PBP; (2) adopting the requirements as proposed, but prohibiting sponsors from creating new PBPs to replace non-renewing PBPs even if a plan crosswalk exception is requested and received; (3) using an alternative measure, such as OOPC, instead of or in addition to plan premiums to assess whether a plan crosswalk exception should be granted; or (4) adopting the current subregulatory policy without modification.

We also proposed requirements for contract consolidations that would reflect our current subregulatory policy, but with two significant differences that parallel the proposals with respect to consolidated renewals. We proposed at § 423.530(c)(2)(i)–(iv) to adopt the following requirements of current subregulatory policy:

- The non-renewing PDP contract and the surviving contract must be held by the same legal entity or by legal entities with the same parent organization;
- The approved service area of the surviving contract must include the service area of the non-renewing PBPs whose enrollment will be crosswalked into the surviving contract;
- Enrollment may be crosswalked between PBPs offering the same type of prescription drug coverage (basic or enhanced alternative); and
- Enrollment from a PBP offering enhanced alternative coverage may be crosswalked into a PBP offering basic prescription drug coverage.

We proposed the following significant changes to current policy with respect to contract consolidations:

- At § 423.530(c)(2)(v), require plan crosswalks from non-renewing PBPs offering enhanced alternative coverage into the PBP that would result in the lowest premium increase; and
- At § 423.530(c)(2)(vi), prohibit plan crosswalks that would result in a premium

increase greater than 100 percent, unless the dollar amount of the premium increase would be less than the base beneficiary premium, as

described in § 423.286(c), compared to the current year premium for the non-renewing PBP.

5. Procedures for Requesting Plan Crosswalks (§ 423.530(d))

We proposed to codify current procedures for submitting plan crosswalks and/or making plan crosswalk exception requests at § 423.530(d), as described in ''Bid Pricing Tool for Medicare Advantage Plans and Prescription Drug Plans'' CMS–10142, posted for final comment pursuant to the Paperwork Reduction Act of 1995 at 87 FR 2441 (February 14, 2022). We proposed that a Part D sponsor must submit all mandatory plan crosswalks in writing through the bid submission process in HPMS by the bid submission deadline. We further proposed that a Part D sponsor must submit all plan crosswalk exceptions by the plan crosswalk exception request deadline announced annually by CMS. Through the bid submission process, the Part D sponsor may indicate if a plan crosswalk exception is needed at that time; however, the Part D sponsor must also ultimately request a crosswalk exception through the crosswalk exception functionality in HPMS in accordance with the deadline announced annually. CMS would verify the exception request and notify the requesting Part D sponsor of the approval or denial of the request after the plan crosswalk exception request deadline. CMS would approve any plan crosswalk exception that met the requirements of the regulation. Because plan crosswalks are requested when a PBP is non-renewing, a denied crosswalk request would result in the PBP being non-renewed without enrollment being crosswalked. Part D sponsors would be required to submit these exception requests to ensure that PBP enrollment is allocated properly.

6. Response to Comments

We are finalizing crosswalk requirements for PDPs at § 423.530 without modification, as discussed in the responses to comments that follow.

Comment: Several commenters asked that we consider plan characteristics other than total premiums when determining which plan or plans beneficiaries could be crosswalked into. They noted that crosswalks can result in more changes than just a change in premium, including changes to cost sharing and formulary drugs. They suggested that CMS consider factors such as the beneficiary OOPC estimate in the plan bid and the formulary composition and structure, in addition to the plan premium, when assessing which PBP beneficiaries can be crosswalked into in consolidated renewal and contract consolidation scenarios.

Response: CMS acknowledges and shares the concerns that commenters expressed regarding the impact that changing PBPs can have on individual beneficiaries' costs and access to drugs. However, it is very difficult to predict which formulary will be best for the greatest number of beneficiaries. CMS reviews all formularies to ensure that they contain the required number of Part D drugs from each therapeutic category and class and an appropriate range of strengths and dosages of those drugs, that utilization management requirements (including prior authorization and step therapy requirements) are appropriate, and that the formularies otherwise meet all Part D requirements. While this ensures that all plans offer appropriate coverage of and access to Part D drugs, individual beneficiaries may find that certain formularies offer better coverage of, or pricing for, the drugs they utilize. CMS does not currently have a methodology to determine whether a particular approved formulary will be ''better'' for a group of beneficiaries than another approved formulary, given the variety of ways that an individual beneficiary may deem a certain formulary ''better'' and the diversity of needs from one beneficiary to the next. For instance, one beneficiary may find inclusion of utilization management to be off-putting whereas another values a low tier placement. Despite these hypotheticals, premiums have been shown to be a key factor in plan choice for beneficiaries.

Each plan does have an estimated OOPC value, which estimates the average monthly out-of-pocket costs for enrollees in a PBP. But while that is a useful bid review and actuarial tool, the actual costs incurred by beneficiaries are highly variable because they are based on characteristics—including but not limited to LIS status, health status, medications used, pharmacies chosen—that vary widely among beneficiaries. Premiums, on the other hand, are uniform for all beneficiaries. We believe that attempting to use other information, including OOPC and formulary composition and structure, to determine which plans beneficiaries may be crosswalked into is too complicated to be practical at this time.

CMS will continue to encourage beneficiaries to investigate the cost and benefits of available Part D plans during each Annual Election Period (AEP). Beneficiaries can use Medicare Plan Finder and other tools to assess which plans offer the combination of premiums, cost sharing, pharmacy networks, and formulary coverage that best meets their individual needs. Part D sponsors will continue to be required to send Annual Notices of Change (ANOCs), Evidences of Coverage (EOCs) and other materials as described in § 423.2267(e) to all beneficiaries enrolled in their plans before the AEP so that beneficiaries will have information such as formulary coverage, cost sharing, and prior authorization requirements to use when comparing plans.

Comment: A few commenters requested that CMS provide a special election period (SEP) to beneficiaries subject to consolidated renewal and contract consolidation crosswalks. These commenters believe that beneficiaries do not always realize how their Part D benefits are changing for the new year and that they may benefit from an SEP so they may select new plans after the new plan year begins.

Response: CMS acknowledges commenters' concerns. However, plan premiums, cost sharing, and formularies can significantly change year-to-year even when beneficiaries are not being crosswalked into a new PBP. CMS does not believe that beneficiaries subject to crosswalks, particularly with the safeguards we are finalizing in this rule, are any more vulnerable to not understanding the resulting changes to their Part D benefits than beneficiaries who are continuing in the same PBP without being crosswalked. Therefore, we do not believe an SEP is appropriate for crosswalked beneficiaries. Crosswalked beneficiaries will receive the same notice of changes—the ANOC—that all other beneficiaries in continuing Part D coverage will receive before the AEP. They will also receive all other required material, including the EOC and Summary of Benefits, which provide details about premiums, deductibles, and cost sharing for the new plan. CMS continues to encourage all beneficiaries to compare available coverage offerings during every AEP.

Comment: One commenter representing a Part D plan requested that CMS delay the effective date of the crosswalk provisions until after the premium stabilization protections in the Inflation Reduction Act of 2022 (''IRA'') go into effect.

Response: CMS notes that the premium stabilization provisions of the IRA, which provide a mechanism to limit the growth in the base beneficiary premium (used to calculate the plan-specific base premium) to a 6 percent increase compared to the previous year, went into effect for plan year 2024. There is therefore no need to further

delay implementation of the crosswalk provisions based on the concerns expressed by this commenter.

Comment: Some commenters opposed limiting consolidated renewal and contract consolidation crosswalks to those that would result in the lowest premium increase and barring such crosswalks when they would result in premium increases greater than 100 percent. These commenters believed plans needed greater flexibility in determining the appropriate plan into which to crosswalk members. Specifically, they wanted CMS to take formulary structure, cost sharing, and network composition into account. They also expressed concern over the effect that the implementation of various provisions of the IRA would have on plan premiums. They were concerned that the cost sharing limits for insulin and certain adult vaccines (which went into effect in 2023), ending beneficiary cost sharing for covered Part D drugs during the catastrophic phase of the benefit (effective in 2024), and the new beneficiary Part D out-of-pocket spending limit (effective in 2025), among other provisions, will create unanticipated volatility in Part D premiums. They requested that if CMS finalizes these requirements as proposed, we delay implementation of the provisions of the proposed crosswalk regulation that limit premium increases until at least 2026 to give the market time to adjust to the changes.

Response: As we noted in the preamble to the proposed rule, crosswalks have rarely resulted in premium increases greater than 100 percent. We therefore do not think it is necessary to preserve ''flexibility'' for plans to implement such crosswalks in the future. We also note that the proposed crosswalk requirements would grant plans more flexibility in some respects by allowing them to choose to non-renew an enhanced alternative plan without crosswalking enrollees into another plan. Earlier in this preamble, we also pointed out in response to a comment requesting that CMS consider factors other than premiums in assessing the appropriateness of a proposed crosswalk that taking formulary comparisons or anticipated out-of-pocket costs into account would not be practical at this time.

CMS understands the commenters' concerns about the unanticipated consequences of changes to the Part D program required by the IRA. As discussed earlier in this preamble in response to another comment, the IRA includes a mechanism to limit the growth in the base beneficiary premium (used to calculate the plan-specific base premium) for Part D plans starting on January 1, 2024. The 2024 Part D premiums reflect both the IRA's premium stabilization provisions and its provisions limiting cost sharing for covered insulin products and recommended adult vaccines and ending beneficiary cost sharing for covered Part D drugs during the catastrophic phase of the benefit. Rather than increasing, the average total monthly premium for Medicare Part D coverage was projected to decrease 1.8 percent from $56.49 in 2023 to $55.50 in 2024 for 2024.[20] We anticipate that premiums will continue to remain stable as the IRA is fully implemented.

While we do not believe it is necessary to suspend or delay these elements of the proposed rule, we will delay implementation of this proposal until January 1, 2026 to allow time for necessary system updates to be made to the CMS systems for the 2026 bid cycle that commences in June 2025. To the extent that commenters are concerned about the burden of implementing the new crosswalk requirements while adjusting to major changes under the IRA, this delay should allay their concerns.

Comment: A commenter recommended allowing LIS beneficiaries to be crosswalked from basic to enhanced alternative plans when the premium for the enhanced alternative plan is lower than for the available basic plan. The commenter believed that this would save the government money by reducing LIS payments. The commenter alternatively recommended allowing the creation of LIS-only plans to be offered by all sponsors to address the unique needs of LIS beneficiaries.

Response: We thank the commenter for their input. While we acknowledge that a lower premium enhanced alternative plan may indeed lower the LIS subsidy the government would pay for an LIS beneficiary enrolled in the plan, the commenter's recommendation does not address the primary reason we prohibit such crosswalks. As we discussed in the proposed rule, CMS can only provide the LIS for the portion of the monthly beneficiary premium attributable to basic coverage, pursuant to § 423.780(b)(1)(i). This does not include the amount attributed to supplemental coverage for enhanced alternative plans. Any LIS-eligible individuals enrolled in a non-renewing PBP offering basic prescription drug coverage that were transferred into a PBP offering enhanced alternative coverage, and who did not change their election, might therefore have to pay more than they would for a PBP offering basic prescription drug coverage, even if the enhanced alternative PBP had a lower overall premium. The commenter's recommendation for an LIS-only offering is beyond the scope of our proposal.

Comment: One commenter requested clarification on how CMS would compare a premium increase to the base beneficiary premium when considering whether to allow a crosswalk that would result in a premium increase of over 100 percent compared to the non-renewing plan's total plan premium. The commenter interpreted the requirement proposed for § 423.530(c)(1)(vi) and (2)(vi) to compare the base beneficiary premium to the premium increase amount, not to the total premium after the increase. The commenter interpreted our proposal to allow a consolidated renewal or contract consolidation crosswalk if the premium increase were the same or lower than the base beneficiary premium and asked for confirmation of that interpretation.

Response: The commenter's interpretation of the proposed language is accurate. CMS will evaluate compliance with this requirement by comparing the anticipated premium increase for crosswalked beneficiaries to the base beneficiary premium.

Comment: One commenter expressed concern that ''forcing'' plans to crosswalk members into certain plans would negatively impact current members in those plans by increasing premiums based on the claims history of the crosswalked members.

Response: This commenter appears to confuse our current crosswalk policy, which does mandate crosswalks when sponsors non-renew an enhanced alternative plan while continuing to offer PDP PBPs in a service area, with the proposal, which would no longer require such crosswalks. Under the proposed policy, sponsors could choose not to perform a consolidated renewal crosswalk for members from a non-renewing enhanced alternative PDP PBP into another PBP under the same contract. CMS would bar the sponsor from creating a new enhanced alternative plan to replace the non-renewing one if the sponsor opted not to crosswalk membership from the non-renewed plan, but CMS would no longer require plans to perform such crosswalks.

Comment: A commenter expressed general support for codifying the

[20] CMS Press Release, ''Medicare Advantage and Medicare Prescription Drug Programs to Remain Stable in 2024,'' September 26, 2023, available at *https://www.cms.gov/newsroom/press-releases/medicare-advantage-and-medicare-prescription-drug-programs-remain-stable-2024*.

crosswalk requirements as proposed because it would create clear requirements for PDP crosswalks. They asked that CMS consider other factors in the PDP market that create incentives for plan sponsors to consolidate PDP offerings and that may result in unnecessary premium increases. Specifically, the commenter asked that CMS make modifications to the Prescription Drug Hierarchical Condition Category (Rx-HCC) Risk Adjustment Model to enhance the predictive power of the tool and ensure more appropriate reimbursement to plan sponsors. They believe that the current model may no longer adequately mitigate against plan sponsors' incentives to engage in risk selection. They specifically asked that CMS take steps to reduce the lag time for including updated claims data in the model to not more than three years.

Response: CMS appreciates the commenter's support for this proposed rule. CMS does not believe there are additional factors related to premium increases that could be addressed through our proposed crosswalk requirements. The comments regarding the Rx-HCC Risk Adjustment Model are beyond the scope of this proposal.

After considerations of the comments and for the reasons outlined in the proposed rule and our response to comments, we are finalizing the plan crosswalk provisions as proposed but with minor grammatical and formatting changes and a delayed effective date from January 1, 2025 to January 1, 2026.

I. Call Center Text Telephone (TTY) Services (§§ 422.111 and 423.128)

We proposed to make a technical change by modifying §§ 422.111(h)(1)(iv)(B) and 423.128(d)(1)(v)(B) to require a plan's call center to establish contact with a customer service representative within 7 minutes on no fewer than 80 percent of incoming calls requiring TTY services, rather than establishing contact with a TTY operator within 7 minutes on no fewer than 80 percent of incoming calls. Our proposed change was intended to remove any ambiguity that might result from our use of the term ''TTY operator,'' because our intent was to ensure a beneficiary could establish contact with a customer service representative within 7 minutes. When an MA organization or Part D sponsor operates their own TTY device and thereby creates a direct TTY to TTY communication, the plan customer representative is also the TTY operator. However, when MA organizations and Part D sponsors use telecommunications relay systems, a TTY operator serves as an intermediary between the caller and the plan's customer service representative and is not able to answer the caller's questions about plan benefits.

We received several comments supporting and no comments opposing this proposal. CMS thanks those in support of our proposal. For the reasons outlined in the proposed rule, we are finalizing the revision as proposed.

J. Clarify Language Related to Submission of a Valid Application (§§ 422.502 and 423.503)

1. Overview and Summary

In the December 2022 proposed rule, we summarized the history of our treatment of substantially incomplete applications and proposed to amend the language in §§ 422.502 and 423.503 to codify CMS's authority to decline to consider a substantially incomplete application for a new or expanded Part C or D contract. We also proposed to codify longstanding criteria for determining that an application is substantially incomplete. We are finalizing these provisions as proposed.

We proposed to modify §§ 422.502 and 423.503 by adding new paragraphs (a)(3) and (a)(4), respectively, regarding substantially incomplete applications. At §§ 422.502(a)(3)(i) and 423.503(a)(4)(i), we proposed to codify that we do not evaluate or issue a notice of determination as described in §§ 422.502(c) and 423.503(c), respectively, when an entity submits a substantially incomplete application. This proposed modification to the regulatory text is consistent with our longstanding policy to treat substantially incomplete applications as if they were not submitted by the application deadline and therefore the submitting entity is not entitled to review of its submitted material or an opportunity to cure deficiencies.

We also proposed at §§ 422.502(a)(3)(ii) and 423.503(a)(4)(ii) to codify our definition of a substantially incomplete application as one that does not include responsive materials to one or more sections of the MA or Part D application. Pursuant to §§ 422.501(c) and 423.502(c), entities seeking to qualify as an MA organization (or to qualify to offer a specialized MA plan for special needs individuals (a SNP)) and/or Part D sponsor to must fully complete all parts of a certified application, in the form and manner required by CMS. Applications for service area expansions are subject to the same rules and review processes because we treat the expansion of a plan service area as a new application for a new area. We prescribe the form and manner in an application published annually. This application is subject to the Paperwork Reduction Act review process. The form and manner vary somewhat from year to year, but generally include several sections that require an entity to demonstrate compliance with specific categories of program requirements. For instance, Part D applications for new Part D contracts include: (1) a series of attestations whereby the applicant agrees that it understands and complies with various program requirements; (2) a contracting section that requires entities to demonstrate compliance with Part D requirements by submitting certain first tier, downstream, and related entity contracts and network pharmacy templates; (3) a network section that requires entities to submit lists of contracted pharmacies that meet geographic and other access requirements; (4) a program integrity section that requires entities to submit documentation that they have documented and implemented an effective compliance program as required by § 423.504(b)(vi); and (5) a licensure and solvency section that requires entities to meet applicable licensure and fiscal solvency requirements. MA applications require substantially similar information related to the operation of an MA plan, and SNP applications include additional sections related specifically to SNP requirements for the type of SNP the applicant seeks to offer. Consistent with past practice, CMS proposed to treat an application that does not include required content or responsive materials for one or more of these sections as substantially incomplete. In our assessment, applications that fail to include significant amounts of responsive information and/or materials, including failing to include required content or responsive material for any section of the application, in their submission by the application deadline are merely submitting placeholder applications that do not merit additional opportunities to meet CMS requirements.

An example of a Part D application that would be incomplete and therefore excluded from further consideration under the proposed rule is one that failed to include (by uploading to the application system) a retail pharmacy list that would allow CMS to determine whether it met pharmacy access requirements. This would include failure to submit a list at all, submitting a list containing fictitious pharmacies, or submitting a list that contained so

few pharmacies that CMS could reasonably conclude that no good faith effort had been made to create a complete network. CMS would also deem as substantially incomplete any application that failed to submit any executed contracts with first tier, downstream, or related entities that the applicant had identified as providing Part D services on its behalf.

An example of an MA application that would be incomplete and therefore excluded from further consideration is one that failed to upload either a state license or documentation that the state received a licensure application from the applicant before the CMS application due date. Another example of an incomplete MA application might be one that failed to upload network adequacy materials, including failing to submit network lists for designated provider types, submitting fictitious providers, or submitting a list that contained so few providers that CMS could only conclude that no good faith effort had been made to create a complete network.

An example of a SNP application that would be incomplete and therefore excluded from further consideration is one that failed to upload a model of care (MOC) that would allow CMS to determine whether or not it met MOC element requirements. This would include failure to submit MOC documents at all or submitting incomplete documents that did not contain all of the required MOC elements.

Finally, we proposed at §§ 422.502(a)(3)(iii) and 423.503(a)(4)(iii) to explicitly state that determinations that an application is substantially incomplete are not contract determinations as defined at §§ 422.641 and 423.641, respectively. Because they are not contract determinations, determinations that an application is substantially incomplete are not entitled to receipt of specific notices or to file an appeal under Parts 422 and 423, subpart N. CMS has consistently taken this position when determining an application is substantially incomplete because a submission that is so incomplete as to not be deemed a valid application did not meet the application deadline and cannot be meaningfully reviewed. Nevertheless, a few entities have used the contract determination hearing process to appeal CMS's determination that they did not submit a substantially complete application by the application deadline. In such cases, the Hearing Officer has ruled that such determinations were not contract determinations entitled to hearings under §§ 422.660 and 423.650.

We do not believe that our proposed regulatory provisions at §§ 422.502(a)(3)(i) and 423.503(a)(4)(i) will have a significant impact on the Part C or D programs. Only a handful of entities have attempted to submit substantially incomplete applications in recent years. We believe that codifying our treatment of substantially incomplete applications will further discourage entities from submitting placeholder applications and ensure that materials submitted by the application deadline represent entities' good faith efforts to meet application requirements.

We received comments on this proposal, which are summarized below:

Comment: A commenter expressed support for the proposal and appreciated the clarifications regarding what constitutes a substantially incomplete application.

Response: CMS appreciates the commenter's support.

Comment: Several commenters generally supported the proposal but requested clarification on what documentation would be sufficient to indicate that an application was not substantially incomplete. A few commenters specifically requested further clarification on what constitutes evidence that a state licensure application was filed. One commenter wanted additional clarity on what evidence would indicate that a plan made ''best efforts'' to complete an application.

Response: CMS appreciates the commenters' support. As summarized from the proposed rule earlier in this section, an example of a substantially incomplete application is one where the organization failed to provide evidence of state licensure or documentation that the state received a licensure application from the applicant before the CMS application due date. When an entity submits, with the MA application, documentation that the entity has filed a complete state licensure application with the appropriate state before the CMS MA and Part D application due date, CMS will not determine that the application is substantially incomplete based on a failure to provide responsive materials in the state licensure section of the MA application. (However, all other portions of the MA application must also be complete for CMS to review and evaluate the application.) Documentation to demonstrate that the entity has applied for the appropriate state licensure for its MA application could consist of a copy of the application and a receipt or other documentation that the application was sent to and received by the state before the CMS MA and Part D application due date. MA organizations must be licensed in the state(s) of the service area(s) covered by the application in order to ultimately have their application approved by CMS.

CMS did not propose and does not currently use a ''best efforts'' standard for determining whether an application is substantially incomplete. In the proposed rule (87 FR 79520), we described an example of an MA applicant submitting a list of providers that was so few that CMS could only conclude that that applicant had not even made a good faith effort to create a complete network by the application deadline, which is key to demonstrating the ability to provide adequate access to covered services. For example, an application would be substantially incomplete if it only included a single pharmacy in the retail pharmacy network submission, regardless of how much effort the organization submitting the application put into enrolling pharmacies in the network. An organization that was acting in good faith would not have filed an application wherein they certified they met application requirements if they had not been able to enroll more than a single pharmacy by the application deadline. While CMS recognizes that it can be challenging for an organization to prepare to offer MA and Part D plans, CMS expects any organization filing an application to have already made sufficient progress in its preparations to provide responsive materials to all parts of the application.

After consideration of the comments and for the reasons outlined in the proposed rule and our response to comments, we are finalizing the revisions to §§ 422.502(a)(3) and 423.503(a)(4) as proposed without substantive modification. The final regulation text includes minor stylistic changes.

K. Expanding Network Adequacy Requirements for Behavioral Health

Section 1852(d)(1) of the Act allows an MA organization to select the providers from which an enrollee may receive covered benefits, provided that the MA organization, in addition to meeting other requirements, makes such benefits available and accessible in the service area with promptness and assures continuity in the provision of benefits. Further, our regulation at § 422.112(a), requires that a coordinated care plan maintain a network of appropriate providers that is sufficient

to provide adequate access to covered services to meet the needs of the population served. To establish standards for these requirements, CMS codified network adequacy criteria and access standards in the ''Medicare Program; Contract Year 2021 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, and Medicare Cost Plan Program'' final rule, which appeared in the **Federal Register** on June 2, 2020 (85 FR 33796), hereinafter referred to as the ''June 2020 final rule.'' In that final rule, we codified, at § 422.116(b), the list of 27 provider specialty types and 13 facility specialty types subject to CMS network adequacy standards. Further, as part of the ''Medicare Program; Contract Year 2023 Policy and Technical Changes to the Medicare Advantage and Medicare Prescription Drug Benefit Programs'' published in the **Federal Register** January 12, 2022 (87 FR 1842) proposed rule, hereinafter referred to as the ''January 2022 proposed rule,'' we solicited comments through a Request for Information (RFI), regarding challenges in building MA behavioral health networks and opportunities for improving access to services. In response to the RFI, stakeholders commented on the importance of ensuring adequate access to behavioral health services for enrollees and suggested expanding network adequacy requirements to include additional behavioral health specialty types. As a result, in the ''Medicare Program; Contract Year 2024 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicare Cost Plan Program, and Programs of All-Inclusive Care for the Elderly'' final rule, which appeared in the **Federal Register** on April 12, 2023, (88 FR 22120) hereinafter referred to as the ''April 2023 final rule,'' CMS finalized the addition of two new specialty types to the provider-specialty types list at § 422.116(b)(1), Clinical Psychology and Clinical Social Work, to be subject to the specific time and distance and minimum provider number requirements used in CMS's network adequacy evaluation.

While our regulation at § 422.116(b)(3) authorizes the removal of a specialty or facility type from the network evaluation criteria for a specific year without rulemaking, CMS did not implement a process in § 422.116 to add new provider types without rulemaking. In a continued effort to address access to behavioral health services within MA networks, we proposed to add to the list of provider specialties at § 422.116(b) and add corresponding time and distance standards at § 422.116(d)(2).

In addition to meeting the network adequacy evaluation requirements, MA organizations are required at § 422.112(a) to maintain and consistently monitor their provider networks to ensure they are sufficient to provide adequate access to covered services that meet the needs of enrollees. This also helps MA organizations maintain a complete and accurate health plan provider directory as required under §§ 422.111(b)(3) and 422.120(b). The Health Plan Management System (HPMS) provides MA organizations with access to the ''Evaluate my Network'' functionality, which allows MA organizations the opportunity to test their provider networks against the evaluation standards in § 422.116 outside of a formal network review. The ''Evaluate my Network'' functionality provides MA organizations the ability to test their networks using the standards in § 422.116(a)(2) in different scenarios, including at the Plan Benefit Package (PBP) level, to consistently monitor whether their provider networks are meeting the current network adequacy standards. We encourage MA organizations to utilize the HPMS ''Evaluate my Network'' tool to monitor their PBP-level active provider networks and keep abreast of any network issues that could hinder access to care for enrollees. We also remind MA organizations to report any compliance issues or significant changes in their provider network to their CMS Account Manager.

With the revisions applicable to coverage beginning January 1, 2024, MA organizations are required to demonstrate that they meet network adequacy for four behavioral health specialty types: psychiatry, clinical psychology, clinical social work, and inpatient psychiatric facility services. The Consolidated Appropriations Act (CAA), 2023 (Pub. L. 117–328) amended the Act to authorize payment under Medicare Part B for services furnished by a Marriage and Family Therapist (MFT) and by a Mental Health Counselor (MHC), effective January 1, 2024. Specifically, section 4121 of the CAA amends section 1861(s)(2) of the Act by adding a new subparagraph (II) that establishes a new benefit category under Part B for MFT services (as defined in section 1861(lll) of the Act) and MHC services (as defined in section 1861(lll) of the Act). MA organizations are required to cover virtually all Part B covered services. As such, these new services must be covered as defined and furnished, respectively, by MFTs, as defined in section 1861(lll)(2) of the Act, and MHCs, as defined in section 1861(lll)(4) of the Act. As a practical matter, MA organizations need to ensure access to these new Medicare-covered services that can only be provided by these types of individual providers and therefore must contract with these types of providers in order to furnish basic benefits as required by section 1852 of the Act (when furnished by different providers, the services will be supplemental benefits covered by the MA plan).

In addition, we discussed in the April 2023 final rule that the responses CMS received to the January 2022 proposed rule RFI emphasized the importance of expanding network adequacy standards to include other outpatient behavioral health physicians and health professionals that treat substance use disorders (SUDs) to better meet behavioral health care needs of enrollees. Medicare fee-for-service claims data for 2020 shows that Opioid Treatment Program (OTP) providers had the largest number of claims for SUD services during that timeframe. At the time of publishing our April 2023 final rule, we indicated that while we were not able to finalize adding a combined specialty type called ''Prescribers of Medication for Opioid Use Disorder,'' which included OTPs and Medication for Opioid Use Disorder (MOUD) waivered providers to the facility-specialty type list in § 422.116(b)(2) as proposed, we would consider the appropriateness of setting network adequacy standards for OTPs in future rulemaking.

Considering the statutory changes to section 1861 of the Act as mentioned, and our interest in establishing network adequacy standards for SUD providers, CMS proposed to amend the MA network adequacy requirements to address the new provider types and SUD provider types through a combined behavioral health specialty type to include MFTs, MHCs, OTPs, Community Mental Health Centers and other behavioral health and addiction medicine specialty providers that will help us enhance behavioral health access for enrollees. This is consistent with the explanation in our April 2023 final rule that setting a meaningful access standard for the OTP specialty type will be possible under a combined behavioral health specialty type.

CMS is committed to improving access to behavioral health care services for enrollees in the MA program. The

CMS Behavioral Health Strategy,[21] aims to improve access and quality of mental health care and services, including access to substance use disorder prevention and treatment services. We proposed to extend network adequacy requirements to additional behavioral health and substance use disorder providers and facilities by adding time and distance and minimum provider number requirements for a combined provider category. Specifically, we proposed to add Outpatient Behavioral Health as a new type of facility-specialty in § 422.116(b)(2) and to add Outpatient Behavioral Health to the time and distance requirements in § 422.116(d)(2). For purposes of network adequacy evaluations under § 422.116, Outpatient Behavioral Health can include, MFTs (as defined in section 1861(lll) of the Act), MHCs (as defined in section 1861(lll) of the Act), OTPs (as defined in section 1861(jjj) of the Act), Community Mental Health Centers (as defined in section 1861(ff)(3)(B) of the Act), or those of the following who regularly furnish or will regularly furnish behavioral health counseling or therapy services, including, but not limited to, psychotherapy or prescription of medication for substance use disorders: physician assistants, nurse practitioners, and clinical nurse specialists (as defined in section 1861(aa)(5) of the Act); addiction medicine physicians; or outpatient mental health and substance use treatment facilities. Per § 422.2, the term ''provider'' means (1) any individual who is engaged in the delivery of health care services in a State and is licensed or certified by the State to engage in that activity in the State; and (2) any entity that is engaged in the delivery of health care services in a State and is licensed or certified to deliver those services if such licensing or certification is required by State law or regulation. Although we are not using the term ''provider'' specifically here in listing the type of healthcare professionals that we expect to be available to furnish services in order to count for purposes of the proposed new network evaluation standard, all applicable laws about the practice of medicine and delivery of health care services must be met and specific healthcare professionals must be appropriately licensed or certified to furnish the applicable services.

We proposed to add this combined facility-specialty type instead of adding individual provider-specialty types for a few reasons. First, data from the U.S. Department of Labor, Bureau of Labor Statistics show that currently MFTs and MHCs are generally providing services in outpatient behavioral health settings, such as community mental health centers, substance abuse treatment centers, hospitals, and some private practices. [22] [23] These types of clinical settings offer a fuller range of services and usually provide access to additional providers, such as advanced practice nurses and physician assistants who provide counseling and other therapeutic services to individuals with behavioral health conditions; our review of the Place of Service codes recorded on professional claims for behavioral health services in the Medicare FFS program illustrates this. In addition, currently, there are a limited number of (if any) claims in the Medicare FFS program from MFTs and MHCs; combining the MFT and MHC provider types into the ''Outpatient Behavioral Health'' facility type provides time for CMS to develop additional data as FFS claims are submitted by MFTs and MHCs to show patterns of access to these provider types across the country. CMS needs such claims and utilization data to support the development of time and distance standards for these particular provider-specialty types. Finally, categorizing these provider specialties as a facility type is consistent with our practice under § 422.116, wherein physical therapy (PT), occupational therapy (OT), and speech therapy (ST) providers have traditionally been categorized as facility types, even though care is typically furnished by individual health care providers. These provider types (that is, PT, OT, ST) are reported for network adequacy purposes under facility specialty types on Health Service Delivery (HSD) tables.

As mentioned previously, the statutory change under the CAA will allow MFTs and MHCs to bill Medicare directly for services provided beginning January 1, 2024. We acknowledge that these provider types may not always be located in facilities and provide facility-based services. As such, we will continue to monitor the appropriateness of maintaining this proposed new behavioral health specialty type as a facility-specialty type (that is, under § 422.116(b)(2)) for network adequacy review purposes. Similarly, as the list [24] of OTPs enrolled in Medicare continues to expand, we will continue to monitor whether network adequacy for OTPs is best measured under a combined facility type for the purpose of network adequacy reviews. Thus, we may engage in future rulemaking to revise this requirement if the landscape of providers changes such that access will be best evaluated separately for MFTs, MHCs, or OTPs instead of under the one facility-specialty type we proposed in this rule. Any related changes will be proposed in future rulemaking. We proposed that MA organizations are allowed to include on their facility HSD tables for the proposed new facility type (Outpatient Behavioral Health) the following: contracted individual practitioners, group practices, or facilities that are applicable under this specialty type. We proposed that MA organizations may not submit a single provider for purposes of meeting the Outpatient Behavioral Health requirement if they have already submitted that provider under another specialty. For example, MA organizations would not be permitted to submit a single provider as a psychiatry, clinical social work, or clinical psychologist provider specialty and as an Outpatient Behavioral Health facility.

Our current regulations, at § 422.116(a)(2), specify that an MA plan must meet maximum time and distance standards and contract with a specified minimum number of each provider and facility-specialty type. Therefore, as part of the proposed changes to our list of facility specialty types under § 422.116(b)(2), we proposed base time and distance standards in each county type for the new specialty type as follows:

TABLE CK-1: MAXIMUM TIME AND DISTANCE STANDARDS:

Provider/ Facility type	Large Metro		Metro		Micro		Rural		Counties with Extreme Access Considerations (CEAC)	
	Max Time	Max Distance	Max Time	Max Distance	Max Time	Max Distance	Max Time	Max Distance	Max Time	Max Distance
Outpatient Behavioral Health	20	10	40	25	55	40	60	50	110	100

In the proposed rule titled ''Medicare and Medicaid Programs; Contract Year 2021 and 2022 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicaid Program, Medicare Cost Plan Program, and Programs of All-Inclusive Care for the Elderly'' which appeared in the **Federal Register** on February 18, 2020 (85 FR 9002) (hereinafter referred to as the ''February 2020 proposed rule''), we explained how CMS developed the base time and distance standards and the minimum provider requirements used in § 422.116 (85 FR 9094 through 9103). Further, we explained in the February 2020 proposed rule how CMS determines the minimum number requirement for all provider and facility specialty types, which is now codified in § 422.116(e). We codified at § 422.116(e)(2)(iii) that all facilities, except for acute inpatient hospitals facilities, have a minimum number requirement of one. Because we had previously established paragraph (e)(2)(iii) to refer to all facility types listed in paragraph (b)(2)(ii) through (xiv) and proposed to add Outpatient Behavioral Health as a facility type at paragraph (b)(2)(xiv), we did not propose any revisions to paragraph (e)(2)(iii). We followed the analysis and methodology described in the February 2020 proposed rule to develop the time and distance standards that we proposed to apply to the new behavioral health facility-specialty type described here. However, we utilized updated data, including outpatient facility and professional Part B claims data from August 1, 2021, through July 31, 2022, to inform our proposed standard.

Finally, as we indicated in the April 2023 final rule, Medicare FFS claims data shows that telehealth was the second most common place of service for claims with a primary behavioral health diagnosis in 2020 (88 FR 22170). Per § 422.116(d)(5), MA plans may receive a 10-percentage point credit towards the percentage of beneficiaries that reside within published time and distance standards for certain providers when the plan includes one or more telehealth providers of that specialty type that provide additional telehealth benefits, as defined in § 422.135, in its contracted network. Currently, § 422.116(d)(5) specifies 14 specialty types for which the 10-percentage point credit is available. Because we understand from stakeholders who commented on our April 2023 final rule that they were supportive of usage of the 10-percentage point credit for behavioral health specialty types, we also proposed to add the new Outpatient Behavioral Health facility-specialty type to the list at § 422.116(d)(5) of the specialty types that will receive the credit if the MA organization's contracted network of providers includes one or more telehealth providers of that specialty type that provide additional telehealth benefits, as defined in § 422.135, for covered services.

We solicited comments on this proposal. Our responses to the comments received are outlined below.

Comment: Numerous commenters supportive of our proposal to improve behavioral health network adequacy standards in MA plans. Commenters commended CMS for continuing to work towards increasing access to behavioral health and improving health equity for MA enrollees through these efforts. However, several commenters expressed concerns regarding the proposal to consolidate several specialty and facility types into a new single category for purposes of evaluating network adequacy in MA. Specifically, commenters expressed concern that combining mental health (MH) and substance use disorder (SUD) specialties into one category may diminish the distinct access needs for these individual specialty types and that the combined standard as proposed was too broad.

Recognizing the specialized nature of these services, commenters advocated for differentiating MH and SUD network adequacy requirements. Many commenters recommended establishing separate specialty categories for ''Outpatient Mental Health'' and ''Outpatient Substance Use Disorder,'' while other commenters suggested separate categories for Opioid Treatment Programs (OTPs), and separate standards for MFTs and MHCs. Commenters stated that the creation of separate standards for these specialties would allow for more visibility for enrollees of the availability of these services and better meet enrollees' behavioral health and SUD needs.

Response: We thank commenters for their support and careful consideration of our proposal. We agree with stakeholders that establishing policies that improve network adequacy is critical to improving access to behavioral health care, including access to substance use disorder prevention and treatment services in MA.

We indicated in the November 2023 proposed rule that setting meaningful network adequacy standards that include MFTs, MHCs, and OTPs at this time is possible under a combined behavioral health specialty type. We determined this through our review of U.S. Department of Labor data and the Place of Service codes recorded on certain professional claims data from 2017–2020 for behavioral health services in the Traditional Medicare program, which indicate that MFTs and MHCs are generally providing services in outpatient behavioral health settings.[25] [26] As we have also stated in our April 2023 final rule, setting a meaningful access standard for the OTP specialty type would be possible under a combined behavioral health specialty type. We are taking this approach to provide additional time for CMS to collect the specific claims and utilization data for MFTs and MHCs. We may engage in future rulemaking to establish specific time and distance

[25] Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, Marriage and Family Therapists, at *https://www.bls.gov/ooh/community-and-social-service/marriage-and-family-therapists.htm* (visited July 03, 2023).

[26] Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, Substance Abuse, Behavioral Disorder, and Mental Health Counselors, at *https://www.bls.gov/ooh/community-and-social-service/substance-abuse-behavioral-disorder-and-mental-health-counselors.htm* (visited July 06, 2023).

standards for these specialties separately. More robust claims and utilization data will help us to evaluate how enrollees are accessing these benefits in Medicare Advantage and Traditional Medicare. Additionally, we noted our intent to continue monitoring the availability of OTPs across the country and determine whether network adequacy for OTPs is best measured separately from the broader Outpatient Behavioral Health facility-specialty type.

The Outpatient Behavioral Health facility-specialty type will include individual practitioner and facility providers that furnish psychotherapy and/or counseling services to individuals with mental health or substance use disorders. Our review of certain Traditional Medicare claims data from 2017–2020 (Place of Service codes, Type of Bill codes, CCN codes, and Revenue Center codes) indicates that facility types treat individuals with both mental health disorders and substance use disorders. While the individual providers may specialize in either mental health or substance use disorder treatment, many of the facility providers will offer a variety of services and provider types to meet the range of enrollees' behavioral health needs. In the absence of more robust utilization and claims data, the Outpatient Behavioral Health specialty type should be effective for use in our MA plan network adequacy standards at this time.

Finally, § 422.116(a) requires that each network-based MA plan demonstrate that it has an adequate contracted provider network that is sufficient to provide access to medically necessary covered services consistent with standards in section 1851(d) of the Act, the regulations at §§ 422.112(a) and 422.114(a), and when required by CMS, an MA organization must attest that it has an adequate network for access and availability of a specific provider or facility type that CMS does not independently evaluate in a given year (see section II.A. of this final rule regarding the definition of ''network-based plan''). In addition, § 422.112 requires MA coordinated care plans (which are network-based plans) to ensure covered services are accessible and available to enrollees. Therefore, MA organizations must always provide access to all covered services whether or not access to a particular provider specialty is specifically evaluated by CMS through our network adequacy standards.

Comment: Many commenters requested that CMS revise the proposed Outpatient Behavioral Health time and distance standards to align with those already established for Qualified Health Plans (QHPs). Commenters emphasized that shortening the standards to reflect the benchmarks set for QHPs would potentially benefit enrollees as behavioral health services may be needed more frequently. Commenters emphasized that aligning these standards would provide consistent and adequate access across Federal programs and support operational needs of health plans.

Response: We are interested in aligning policies across Medicare, Marketplace, and Medicaid wherever practicable. However, for MA plans, CMS utilizes data on the unique health care utilization patterns and geographic locations of Medicare beneficiaries and providers and facilities to set the MA network adequacy time and distance as well as the minimum provider and facility number requirements under 42 CFR 422.116. Therefore, at this time, we believe the requirements we proposed, and are finalizing in this rule, are appropriate for providing access and meeting the health care needs of the specific beneficiary population served by this program.

Comment: Multiple commenters expressed concerns that MA provider network adequacy standards could be met utilizing Nurse Practitioners (NPs), Physician Assistants (PAs), and Clinical Nurse Specialists (CNSs) within the new Outpatient Behavioral Health facility-specialty type. Commenters suggested that the absence of clear and transparent criteria for incorporating these provider types could result in the creation of ''ghost networks,'' and one commenter referred to ghost networks as networks where providers may be listed in a provider directory without actively treating patients for behavioral health. Further, commenters indicated that these provider types (NPs, PAs, CNSs) might lack the necessary skills, training, or expertise to effectively address the mental health and substance use disorder needs of enrollees.

Response: We appreciate the feedback regarding the inclusion of NPs, PAs, and CNSs within the new Outpatient Behavioral Health facility-specialty type. We reiterate that the revisions to § 422.116(b) and (d), as proposed and finalized, mandate that for purposes of network adequacy evaluation, providers, including NPs, PAs, and CNSs, must regularly furnish or will regularly furnish behavioral health counseling or therapy services, including psychotherapy or the prescription of medication for substance use disorders, in order for those providers to be included in the new facility specialty Outpatient Behavioral Health. Further, by defining the new facility specialty Outpatient Behavioral Health so broadly, we expect that these facilities will generally deliver a comprehensive array of services. This includes services from MFTs, MHCs, OTPs, community mental health centers, addiction medicine physicians, and outpatient mental health and substance use treatment facilities.

Recognizing the diverse capabilities of NPs, PAs, and CNSs in providing services to beneficiaries, CMS acknowledges the concerns raised by stakeholders regarding the use of NPs, PAs, and CNSs to satisfy the Outpatient Behavioral Health network adequacy standards without verifying their qualifications to address and actual practice of addressing behavioral health or SUD needs. To address this, we are finalizing a clarification in § 422.116(b)(2)(xiv) to limit when MA organizations may list an NP, PA, or CNS, for purposes of network evaluation under the Outpatient Behavioral Health facility-specialty type. Specifically, the final rule establishes a standard to identify when an NP, PA, or CNS regularly furnishes, or will furnish, behavioral health counseling or therapy services, including psychotherapy or medication prescription for SUDs.

For an NP, PA, or CNS to satisfy the Outpatient Behavioral Health network adequacy standards, the NP, PA, and/or CNS must have furnished certain psychotherapy or SUD prescribing services to at least 20 patients within the previous 12-months. The 20-patient threshold is consistent with the minimum denominator requirement of several quality measures, including many that are measured at the clinician-level in the Merit-based incentive payment system (MIPS) in Traditional Medicare. If the threshold is an important minimum for individual practitioners being held accountable for the quality of care delivered in Traditional Medicare, then having a similar threshold here for when the practitioner ''regularly furnishes'' behavioral health care will ensure that the NP, PA, or CNS is providing a meaningful amount of behavioral health counseling or therapy services, including psychotherapy or medication prescription for SUDs. In addition, we believe the 12-month period timing will provide the best reflection of current practice and is a sufficient time predicter of the next year's practice by the provider.

Further, this standard supports the intent that a provider who is an NP, PA or CNS, must ''regularly furnish or will regularly furnish'' behavioral health

services. This will help ensure that organizations only include providers who have expertise in delivering services to be counted for network adequacy purposes. The 12-month and 20 patient threshold demonstrates that an NP, PA, or CNS has provided the applicable services on an ongoing basis, and it will also provide a standard for organizations that wish to utilize these provider types for network adequacy evaluation.

As part of this minimum threshold for identifying that a specific PA, NP and CNS regularly furnishes behavioral health services, we are adopting specific requirements in new paragraphs (b)(2)(xiv)(A) and (B) for how this threshold will be used. The list of psychotherapy or SUD prescribing services to be used for this purpose will be identified by CMS in the Health Service Delivery (HSD) Reference File (described in § 422.116(a)(4)(i)). CMS will identify the applicable services in the HSD Reference File, using HCPCS code(s), narrative descriptions, or something sufficiently similar to specify the necessary type of services on an annual basis.

The MA organization must annually verify that this standard is met by each individual NP, PA and/or CNS it intends to submit for purposes of the Outpatient Behavioral Health facility type by analyzing reliable information about services furnished by the provider such as the MA organization's claims data, prescription drug claims data, electronic health records, or similar data. This analysis must be performed at least annually using a recent 12-month period and must be completed before the MA organization includes the NP, PA and/or CNS to CMS for purposes evaluation of the MA organization's network for the Outpatient Behavioral Health facility type. If there is insufficient evidence of these provider types having previous practice experience sufficient to meet the threshold of 20 patients within a recent 12-month period, MA organizations must have a reasonable and supportable basis for concluding that the provider will meet the threshold in the next 12 months. If an NP, PA, or CNS is new to independent practice (and therefore doesn't have the appropriate claims record in previous years), has received psychiatry or addiction medicine specialized training, and is listed as a psychiatry or addiction medicine NP, PA, or CNS on public-facing websites, this would be a reasonable and supportable basis for concluding that the practitioner would meet the requirement in the next 12 months, and therefore able to be utilized towards meeting network adequacy standards for Outpatient Behavioral Health. We are establishing these requirements in § 422.116(b)(2)(xiv)(B)(1) and (2).

This requirement is designed to prevent MA organizations from including providers in their networks submitted to CMS for review that are lacking a history of delivering or intent to deliver behavioral health services, thereby improving the reliability of MA organization's network's once operational. Further, this requirement will help MA organizations identify the requisite services that NPs, PAs, and CNSs must provide. MA organizations may be required to demonstrate, in the specified form and manner requested by CMS, that the MA organization has verified the service provision threshold. These criteria aim to enhance transparency and accountability while preventing the formation of ''ghost networks.'' This ensures that beneficiaries receive care from providers with proven expertise in treating mental health and substance use disorders.

Finally, we are also adopting a requirement, at § 422.116(b)(2)(xiv)(B)(3) that an MA organization must submit evidence and documentation to CMS, upon request and in the form and manner specified by CMS, of the MA organization's determination that the PA, NP, and/or CNS has furnished or is reasonably expected to furnish one or more of the specified psychotherapy or medication prescription to at least 20 patients within a 12 month period.

This provision will help to ensure compliance.

Comment: Some commenters stressed that network adequacy requirements should accurately reflect the actual availability of health care providers. These commenters emphasized that CMS should tailor its approach to address the unique barriers that underserved rural areas face in accessing behavioral health services. Some commenters suggested that including NPs, PAs, and CNSs is particularly important in rural areas where there is often a shortage of health care providers. Commenters noted that NPs are increasingly providing behavioral health services, with a significant percentage treating conditions like depression in their practice. Commenters supported the proposed changes to expand the definition of behavioral health providers through the Outpatient Behavioral Health network adequacy requirement since it will not only address the provider shortage, but also align with the goal of ensuring that MA enrollees have access to comprehensive and high-quality behavioral health care.

Response: We thank commenters for their support of our proposal to include certain provider types such as NPs, PAs, and CNSs as part of the Outpatient Behavioral Health network adequacy standard. Our network adequacy standards take into account the unique access challenges in rural areas. Network adequacy is assessed at the county level, and counties are classified into five county type designations: Large Metro, Metro, Micro, Rural, or CEAC (Counties with Extreme Access Considerations), this allows us to set our criteria to represent the geographic variations across the United States based on population size and density of each county.

Comment: We received numerous comments supporting our proposal to add Outpatient Behavioral Health specialty type to the list at § 422.116(d)(5), which would provide a 10 percent credit towards the percentage of beneficiaries residing within published time and distance standards when the plan includes one or more telehealth providers that offer additional telehealth benefits as defined in § 422.135 in its contracted network. Commenters agreed that network access through telehealth benefits is critical, especially for enrollees in rural areas where traditional services may be less accessible.

A few commenters suggested that CMS should increase the telehealth credit from the proposed 10 percent up to 30 percent or that we increase the credit and make it applicable to all behavioral health network adequacy standards under § 422.116(d)(5). Other commenters expressed concerns regarding CMS's proposal to add Outpatient Behavioral Health to the list at § 422.116(d)(5). Commenters cautioned against an over-reliance on telehealth that may not provide the same level of care as in-person visits. These commenters emphasized the need for telehealth services to adhere to the same capacity and accessibility standards as in-person services, including the ability to accept new patients and deliver specified services promptly.

Response: Our decision to extend the telehealth credit for the new Outpatient Behavioral Health facility-specialty type is consistent with our established practice for MA organizations receiving the credit as part of a network adequacy evaluation. As we previously mentioned, Medicare Fee-For-Service (FFS) claims data indicated that telehealth was the second most common place of service for claims with a

primary behavioral health diagnosis in 2020.

The telehealth credit is designed to encourage the use of telehealth services but is not a replacement for in-person care. Per § 422.116(d)(5), the telehealth credit is available when the MA plan includes one or more telehealth providers that provide additional telehealth benefits, as defined in § 422.135, in the listed specialties. Consistent with § 422.135, MA plans that cover additional telehealth benefits must offer enrollees the option to choose their preferred mode of care delivery and to access the services in person. This requirement underlines our commitment to encouraging use of and access to telehealth without compromising the availability of in-person care. Providers who receive the telehealth credit are listed under § 422.116(d)(5) and currently include all outpatient behavioral health providers that are evaluated for network adequacy purposes.

We understand and appreciate the concerns raised about the potential over-reliance on telehealth services. We agree it is necessary for these services to meet the same standards of capacity and accessibility as in-person visits, including the acceptance of new patients and the timely delivery of specified services. We recognize the careful balance between expanding access through telehealth and maintaining the quality and immediacy of care. As we move forward, CMS will continue to monitor the effectiveness and impact of the telehealth credit on network adequacy, especially in the context of Outpatient Behavioral Health services. We remain open to considering adjustments to the telehealth credit percentage in future rulemaking based on evidence, stakeholder feedback, and the evolving landscape of telehealth services. Our goal is to ensure that our policies support the effective use of telehealth in enhancing access to care while maintaining high standards of care delivery for MA enrollees.

Comment: Commenters requested clarification from CMS on whether primary care practices that integrate behavioral health services, including those staffed by MFTs, MHCs, and addiction medicine physicians, fall under the ''Outpatient Behavioral Health'' category. Commenters expressed that this clarification is critical to accurately reflect network adequacy, especially since many MFTs work in medical offices that provide behavioral health services.

Response: We confirm that primary care practices that integrate behavioral health services are within the scope of the ''Outpatient Behavioral Health'' category provided that the practice includes providers of the type listed in § 422.116(b)(2)(xiv), such as MFTs and MHCs, and PAs, NPs, CNSs, and addiction medicine physicians who regularly furnish or will regularly furnish behavioral health counseling or therapy services. These services can be represented at the level of individual providers or as a facility, depending on their billing practices.

We are committed to conducting an in-depth evaluation of network adequacy, acknowledging the changing landscape of healthcare delivery where behavioral health services are becoming an integral part of primary care. To that end, CMS annually publishes a Provider Supply file (42 CFR 422.116(a)(4)(ii)) that lists available providers and facilities and their corresponding office locations and specialty types. MA organizations may use this as a resource to identify providers and facilities. However, given the dynamic nature of the market, MA organizations remain responsible for conducting validation of data used for network adequacy review purposes.

Comment: Some commenters raised concerns regarding the possibility of delays in the enrollment of MFTs and MHCs as Medicare providers, as these providers will be registering for the first time. Commenters suggested that CMS should closely monitor any potential backlogs of providers or delay implementation of this rule if such issues arise.

Response: We are monitoring any potential issues or backlogs with MFTs and MHCs enrolling as Medicare providers. We do not foresee any such barriers to new provider enrollments at this time, and therefore would not need to delay implementation of this rule.

Comment: Several commenters suggested that CMS should create a complete list of qualifications for MFTs and MHCs so that MA plans can properly determine and incorporate eligible providers.

Response: The qualifications for MFTs and MHCs are specified in section 1861(lll) of the Act. Specifically, MFT services are defined in section 1861(lll)(1) and the term MFT is defined in section 1861(lll)(2); MHC services are defined in section 1861(lll)(3) and the term MHC is defined in section 1861(lll)(4) of the Act. These definitions provide the necessary information for MA organizations to understand and comply with the requirement to cover Part B covered services, which now includes the services furnished by MFTs and MHCs as newly defined eligible providers. MA organizations are required to cover these services as defined in the Act and ensure that they are furnished by providers who meet the qualifications specified in section 1861(lll)(2) of the Act for MFTs and in section 1861(lll)(4) of the Act for MHCs. We also direct readers to the regulations at 42 CFR 410.53 and 410.54 for CMS regulations on Medicare-covered MFT and MHC services.

Comment: Commenters suggested policy adjustments to allow for more realistic and flexible standards for network adequacy in underserved rural areas. For example, a few commenters recommended that CMS introduce waivers or exceptions to address difficulties faced by plans in contracting with a diverse range of providers due to workforce shortages.

Response: We acknowledge the unique circumstances in rural areas. CMS already addresses these circumstances when setting network time and distance standards according to county type to account for the different level of access in existing patterns of care for populations in these areas. To further account for the specific landscape in a particular area, CMS's time and distance standards measure the relationship between the approximate locations of beneficiaries and the locations of the network providers and facilities (42 CFR 422.116(d)(1)(i)). In addition, we have established guidelines under 42 CFR 422.116(f), which were finalized in our June 2020 final rule, that outline the circumstances under which an MA plan may request an exception to the network adequacy criteria. These provisions are designed to provide flexibility while ensuring that beneficiaries have access to necessary healthcare services.

Comment: Commenters expressed that many behavioral health providers possess multiple professional credentials, enabling them to qualify for more than one behavioral health specialty category. Commenters recommended that CMS permit providers holding multiple credentials to be included in the new behavioral health specialty category and be counted within each applicable specialty.

Response: In our proposal, we indicated that MA organizations may not submit a single provider as a psychiatry, clinical social work, or clinical psychologist provider specialty to meet that network specialty requirement and then submit that same provider as an ''Outpatient Behavioral Health facility'' to meet this separate standard. 88 FR 78485. We explained that because Outpatient Behavioral Health is not a specialty on its own,

such as other specialty types like Primary Care Physicians or Cardiologists, but rather is an umbrella term for which several specialties can be used to meet the requirement, it is important to make this distinction. We acknowledge that there are other circumstances when providers may hold multiple credentials that enable them to be counted under more than one network adequacy standard. We clarify here that MA organizations are still allowed to submit these types of providers, for purposes of network adequacy evaluation, under each applicable category that meets the specialty type requirements as defined under statute and meet the requirements of the standard in § 422.116. Organizations are responsible for ensuring that the contracted providers meet state and federal licensing requirements as well as the organization's credentialing requirements for each specialty type.

Comment: A few commenters requested that CMS consider postponing the new Outpatient Behavioral Health network adequacy standard until 2026 in order to provide flexibility for provider certification and contracting discussions with the relevant provider types.

Response: Behavioral health services, including the OTP benefit, MFT and MHC services are covered under Traditional Medicare today, so MA plans should have a network in place that assures adequate access to those services when medically necessary for enrollees under section 1852(d) of the Act and § 422.112. Therefore, we expect that MA organizations are already conducting ongoing work related to provider contracting and evaluating prevailing patterns of health care delivery in their service areas. We anticipate issuing guidance on the specified behavioral health services that need to be regularly furnished by PAs, NPs, and CNSs, for them to be submitted under the Outpatient Behavioral Health facility-specialty type after release of this final rule so that MA organizations can determine how to include those providers in their HSD tables for CMS to evaluate the provider network. The applicability date of January 1, 2025, of this final rule, provides sufficient time for organizations to prepare to include these provider types for the formal network adequacy evaluations conducted by CMS under § 422.116 beginning in 2025.

Based on our review and consideration of the comments received and for the reasons outlined in the proposed rule and our responses to comments, we are finalizing these provisions as proposed with modifications to outline the criteria MA organizations must use to determine when an NP, PA or CNS can be considered as part of a network to meet the Outpatient Behavioral Health network adequacy standard. To address concerns that NPs, PAs, and CNSs might lack the necessary skills, training, or expertise to effectively address the behavioral health needs of enrollees and that the absence of criteria for incorporating these provider types could result in networks where these providers may be listed in a provider directory without actively treating patients, '' we are finalizing provisions in § 422.116(b)(2)(xiv) to establish specific criteria that MA organizations must use to determine when an NP, PA or CNS can be considered part of a network to meet the Outpatient Behavioral Health network adequacy standard. MA organizations must independently verify that the provider has furnished or will furnish certain services to 20 patients within a recent 12-month period, using reliable information about services furnished by the provider such as the MA organization's claims data, prescription drug claims data, electronic health records, or similar data. For NPs, PAs, or CNSs new to independent practice, MA organizations must have a reasonable and supportable basis for concluding that the practitioner would meet the requirement in the next 12 months, including information related to psychiatry or addiction medicine specialized training, and that the provider listed as a psychiatry or addiction medicine NP, PA, or CNS on public-facing websites.

L. Improvements to Drug Management Programs (§§ 423.100 and 423.153)

Section 1860D–4(c)(5)(A) of the Act requires that Part D sponsors have a drug management program (DMP) for beneficiaries at risk of abuse or misuse of frequently abused drugs (FADs), currently defined by CMS as opioids and benzodiazepines. CMS codified the framework for DMPs at § 423.153(f) in the April 16, 2018 final rule ''Medicare Program; Contract Year 2019 Policy and Technical Changes to the Medicare Advantage, Medicare Cost Plan, Medicare Fee-for-Service, the Medicare Prescription Drug Programs, and the PACE Program'' (83 FR 16440), hereafter referred to as the April 2018 final rule.

Under current DMP policy, CMS identifies potential at-risk beneficiaries (PARBs) who meet the clinical guidelines described at § 423.153(f)(16), which CMS refers to as the minimum Overutilization Monitoring System (OMS) criteria. CMS, through the OMS, reports such beneficiaries to their Part D plans for case management under their DMP. There are also supplemental clinical guidelines, or supplemental OMS criteria, which Part D sponsors can apply themselves to identify additional PARBs. Under § 423.153(f)(2), sponsors are required to conduct case management for PARBs, which must include informing the beneficiary's prescribers of their potential risk for misuse or abuse of FADs and requesting information from the prescribers relevant to evaluating the beneficiary's risk, including whether they meet the regulatory definition of exempted beneficiary.

If the sponsor determines through case management that the enrollee is an at-risk beneficiary (ARB), after notifying the beneficiary in writing, the sponsor may limit their access to opioids and/or benzodiazepines to a selected prescriber and/or network pharmacy(ies) and/or through a beneficiary-specific point-of-sale claim edit, in accordance with the requirements at § 423.153(f)(3). CMS regulations at § 423.100 define exempted beneficiary, at-risk beneficiary, potential at-risk beneficiary, and frequently abused drug.

1. Definition of Exempted Beneficiary § 423.100

Section 1860D–4(c)(5)(C)(ii) of the Act defines an exempted individual as one who receives hospice care, who is a resident of a long-term care facility for which frequently abused drugs are dispensed for residents through a contract with a single pharmacy, or who the Secretary elects to treat as an exempted individual. At § 423.100 CMS defines an exempted beneficiary as an enrollee being treated for active cancer-related pain, or who has sickle-cell disease, resides in a long-term care facility, has elected to receive hospice care, or is receiving palliative or end-of-life care.

The OMS criteria finalized in the April 2018 final rule were developed to align with available information and guidelines, such as the Centers for Disease Control and Prevention (CDC) Guideline for Prescribing Opioids for Chronic Pain (2016 CDC Guideline) issued in March 2016.[27] The current policy to exempt beneficiaries with cancer from DMPs was developed through feedback from interested parties and alignment with the 2016 CDC Guideline's active cancer treatment exclusion. Patients within the scope of

[27] *https://www.cdc.gov/mmwr/volumes/65/rr/rr6501e1.htm.*

the 2016 CDC Guideline included cancer survivors with chronic pain who have completed cancer treatment, were in clinical remission, and were under cancer surveillance only. The 2022 CDC Clinical Practice Guideline for Prescribing Opioids for Pain (2022 CDC Guideline) [28] expands and updates the 2016 CDC Guideline to provide evidence-based recommendations for prescribing opioid pain medication for acute, subacute, and chronic pain for outpatients aged ≥18 years, excluding pain management related to sickle cell disease, cancer-related pain treatment, palliative care, and end-of-life care.

In the interest of alignment with the 2022 CDC Guideline regarding applicability in individuals with cancer, we proposed to amend the regulatory definition of ''exempted beneficiary'' at § 423.100 by replacing the reference to ''active cancer-related pain'' with ''cancer-related pain.'' With this proposal, we would expand the definition of exempted beneficiary to more broadly refer to enrollees being treated for cancer-related pain to include beneficiaries undergoing active cancer treatment, as well as cancer survivors with chronic pain who have completed cancer treatment, are in clinical remission, or are under cancer surveillance only.

We solicited comments on this proposal.

Comment: Most commenters supported the proposal to expand the definition of exempted beneficiary to more broadly refer to enrollees being treated for cancer-related pain to include beneficiaries undergoing active cancer treatment, as well as cancer survivors with chronic pain who have completed cancer treatment, are in clinical remission, or are under cancer surveillance only. One commenter suggested that expanding the definition to cancer-related pain beyond beneficiaries undergoing active cancer treatment better encompasses the range of patients with cancer related circumstances who are in need of extended pain relief. Other commenters agreed that the proposed definition was aligned with the 2022 CDC Guideline regarding individuals with cancer or cancer-related pain treatment. Other commenters agreed that enrollees being treated for cancer-related pain require long-term pain management, commonly including opioid pain medications, and thus, should be exempted from DMPs that are intended to address potential opioid misuse. Another commenter wanted to ensure that patients experiencing pain while not in the active cancer phase can still reliably access treatment options. Another commenter agreed that many patients in cancer survivorship experiencing pain-related lasting effects of treatment or disease should be excluded from these exemptions.

Response: We thank the commenters for their support.

Comment: A commenter appreciated CMS's efforts to improve the definition of an ''exempted beneficiary'' but was concerned that the proposal was too broad and would inadvertently include individuals who are not experiencing cancer- or cancer treatment-related pain, but instead are experiencing pain and have a prior, unrelated cancer diagnosis. The commenter wanted to ensure clinicians involved in case management will be able to exercise their professional judgement in determining whether an opioid used for ''cancer-related pain'' is reasonable, particularly when the cancer has been resolved for several years and/or required minimal treatment. The commenter wanted to ensure that CMS does not change the OMS criteria based on this change in definition. The commenter also suggested that a member who meets the criteria for identification in the OMS should not be omitted based solely on a diagnosis code indicating a history of cancer or cancer-related pain.

Response: CMS disagrees that the proposal is too broad. Our analysis of beneficiary data estimates only a small increase in exempted beneficiaries as a result of the proposed updated definition, which we used to estimate burden in the proposed rule. Refer to section X. Collection of Information Requirements, ICRs Regarding to Improvements to Drug Management Programs in this final rule for additional details. Beneficiaries who meet the regulatory definition for exempted beneficiary must be exempted from the DMP despite meeting all other OMS criteria. CMS attempts to remove exempted beneficiaries from OMS reporting; however, we acknowledge that the data we have at the time of quarterly OMS reporting may not be complete. Part D sponsors must use data available to them or obtained through case management to identify exempted beneficiaries, including those who are reported by OMS or when the sponsor is reviewing cases and making its own determinations based on OMS criteria. Therefore, a Part D sponsor's DMP may identify a beneficiary who meets the OMS criteria and allow clinicians to perform case management until it is determined that the beneficiary is exempt and must be removed from the program. This proposal changes the definition of ''exempted beneficiary'' at § 423.100 and does not change the OMS criteria or clinical guidelines described at § 423.153(f)(16).

Comment: One commenter was concerned with identification of patients whose opioid use is appropriately linked to cancer-related pain but who are not otherwise receiving active treatment for some form of cancer. The commenter pointed out that while plans have access to clinical data on members, there is a need to conduct additional administrative and clinical reviews of patient records to properly exempt individuals meeting this new standard from participation in DMPs. The commenter also anticipated a slight increase in the number of individuals who will be exempted from DMPs due to cancer-related pain under the proposed definition and a transition period in which existing processes designed to identify ARBs evolve to match the broader exemption for cancer-related pain.

Response: We acknowledge that there will be a transition period for DMPs to adapt their processes for the proposed exemption. Part D sponsors may identify exempted beneficiaries before or during case management. We expect sponsors to diligently engage in case management, but there is no deadline for sponsors to complete it. We also recognize that every case is unique and that the time needed for case management will vary depending on many factors, such as the complexity of the case, and the promptness with which, and whether, prescribers respond to sponsors' outreach. While the approach to case management may vary based on the facts and circumstances of the case, the general goal of case management is to understand why the beneficiary meets the OMS criteria and whether a limitation on access to coverage for FADs is warranted for the safety of the beneficiary. Thus, Part D sponsors are expected to address all cases without unreasonable delay and to triage their review of the most concerning cases to the extent possible.

Comment: A commenter agreed with the proposed updates but recommended that CMS establish a clinical documentation code that reflects the new definition, as is the case today with ''active cancer-related pain.'' The commenter suggested that for accurate identification of exempted beneficiaries, Part D plans would need specific exclusion identifiers for the term ''cancer-related pain.'' The commenter also asked that CMS provide guidance allowing case management

[28] *https://www.cdc.gov/mmwr/volumes/71/rr/rr7103a1.htm.*

documentation to be sufficient for ''cancer-related pain'' in situations when there is no code submitted by a provider. Another commenter suggested that it would be extremely helpful if CMS could indicate in the detailed OMS report the reason why a member was identified for DMP review and, when this is based on a diagnosis, when the diagnosis was made. The commenter also stated that stand-alone Prescription Drug Plans (PDPs) have no access to medical encounter data or to the member's medical history and even Medicare Advantage Prescription Drug Plans (MA–PDs) lack visibility into events that pre-date a member's enrollment with the MA–PD.

Response: We will share all exemption codes used in the OMS reporting in the technical user guide, including any codes for cancer-related pain. Should there be no code for cancer-related pain available from a provider, plans should ensure that case management documentation is sufficiently clear to justify OMS case responses to CMS.

We will also consider how best to update future OMS reporting, including the level of detail reported for PARBs. As detailed in the OMS technical user guide available on the CMS Part D Overutilization website,[29] the quarterly OMS report to Part D sponsors currently provides a list of beneficiaries meeting the minimum OMS criteria during the measurement period and information including the criteria met (*i.e.,* based on level of opioid use from multiple prescribers/pharmacies (referred to as MIN1) or history of opioid-related overdose (referred to as MIN2)).

Comment: Another commenter agreed with the proposed updates to the definition of exempted beneficiary but requested further guidance on when and how to intervene earlier when it is unclear that a beneficiary is using drugs aberrantly, which may increase DMP case volume without achieving the program's goal. The commenter also requested that CMS publish any criteria under consideration for use.

Response: While Part D sponsors may not vary the OMS criteria to include more or fewer beneficiaries in their DMPs, they may apply the criteria more frequently than CMS currently does, which is quarterly. A sponsor must remove an exempted beneficiary from a DMP as soon as it reliably learns that the beneficiary is exempt (including in their internal claims systems), whether that be via the beneficiary, the facility, a pharmacy, a prescriber, or an internal or external data source. As part of ongoing case management, CMS expects plan sponsors to have a process in place to regularly monitor such information for enrollees in their DMP, and to take appropriate action expeditiously, when they obtain new information. In the November 2023 proposed rule, CMS provided information on data analysis and solicited feedback on potentially using a machine-learning model to enhance the minimum or supplemental OMS criteria in the future. This Request for Information is addressed in section III.N. Improvements to Drug Management Programs, OMS Criteria Request for Feedback of this final rule.

Comment: Another commenter agreed with the proposed update but added that the CDC Guideline also refers to specialty guidelines as an evidence-based resource for pain management in certain populations. A commenter noted that the guidelines may be an additional useful resource for plans as this policy is updated and implemented. The commenter referred to the National Comprehensive Cancer Network (NCCN) Clinical Practice Guidelines in Oncology: Adult Cancer Pain, NCCN Clinical Practice Guidelines in Oncology: Survivorship, and Management of Chronic Pain in Survivors of Adult Cancers: American Society of Clinical Oncology Clinical Practice Guideline for recommendations on pain management for patients with cancer and patients who have survived cancer and American Society of Hematology 2020 Guidelines for Sickle Cell Disease: Management of Acute and Chronic Pain.

Response: We thank the commenter for the feedback and agree that CMS should refer Part D sponsors to the guidelines for both cancer-related pain and sickle-cell disease. We remind Part D sponsors that while both cancer-related pain and sickle-cell disease diagnoses exempt Part D enrollees from DMPs and coverage limitations on FADs, Part D sponsors must still comply with other utilization management requirements in § 423.153 to continue to monitor the safe use of opioids.

After reviewing the comments received, we are finalizing the proposal to amend the regulatory definition of ''exempted beneficiary'' at § 423.100 by replacing the reference to ''active cancer-related pain'' with ''cancer-related pain'' without modification.

2. Drug Management Program Notices: Timing and Exceptions § 423.153(f)(8)

As discussed above under section III.N. Improvements to Drug Management Programs of this final rule, sponsors must provide case management for any PARB that meets the OMS criteria to determine whether the individual is an ARB and whether to implement a limitation on their access to FADs. Under section 1860D–4(c)(5)(B)(i)(I) of the Act, a sponsor must send an initial and second notice to such beneficiary prior to imposing such limitation. In the April 2018 final rule (83 FR 16440), CMS adopted requirements for the initial and second notices at §§ 423.153(f)(5) and 423.153(f)(6). The initial notice must inform the beneficiary that they have been identified as a PARB and must include information outlined in § 423.153(f)(5)(ii). The second notice must inform the beneficiary that they have been identified as an ARB and of the limitations on the beneficiary's coverage of FADs, as specified in § 423.153(f)(6)(ii). In the event that, after sending an initial notice, a sponsor determines that a PARB is not an ARB, a second notice is not sent; instead, an alternate second notice is sent. Though not required by the Act, CMS codified a requirement at § 423.153(f)(7) to provide an alternate second notice for the purpose of informing the beneficiary that they are not an ARB and that no limitation on their coverage of FADs will be implemented under the DMP.

Section 1860D–4(c)(5)(B)(iv) of the Act establishes that sponsors must send a second notice on a date that is not less than 30 days after the initial notice. The 30 days allow sufficient time for the beneficiary to provide information relevant to the sponsor's determination, including their preferred prescribers and pharmacies. CMS codified at § 423.153(f)(8) the timing for providing both the second notice and alternate second notice. Currently, CMS requires sponsors to send either the second or alternate second notice on a date not less than 30 days from the date of the initial notice and not more than the earlier of the date the sponsor makes the determination or 60 days after the date of the initial notice.

We proposed to change the timeframe within which a sponsor must provide an alternate second notice to a beneficiary who is determined to be exempt from the DMP subsequent to receiving an initial notice. Specifically, we proposed to redesignate existing § 423.153(f)(8)(ii) as § 423.153(f)(8)(iii), and to revise the text at § 423.153(f)(8)(ii) to specify that, for such exempted beneficiaries, the sponsor must provide the alternate second notice within 3 days of determining the beneficiary is exempt, even if that occurs less than 30 days from the date of the initial notice. In other words, we proposed to remove the

[29] *https://www.cms.gov/medicare/coverage/prescription-drug-coverage-contracting/improving-drug-utilization-review-controls-part-d.*

requirement that sponsors wait at least 30 days from the date of the initial notice to send the alternate second notice to exempted beneficiaries.

Through program oversight, including audits of Part D sponsors, CMS has observed that initial notices are sometimes sent to Part D enrollees who meet the definition of an exempted beneficiary at § 423.100, often because the sponsor does not have the necessary information—for example, that the enrollee has a cancer diagnosis or is receiving palliative care or end-of-life care—at the time the sponsor sends the initial notice. However, this information may be provided later by the enrollee or their prescriber in response to the initial notice. In some cases, sponsors identify exemptions very quickly after issuing the initial notice, prior to 30 days elapsing. Under current CMS regulations, if a beneficiary meets the definition of an exempted beneficiary, the beneficiary does not meet the definition of a PARB. For this reason, exempted beneficiaries cannot be placed in a Part D sponsor's DMP. Therefore, as stated in the preamble to the April 2018 final rule (83 FR 16455), a sponsor must remove an exempted beneficiary from a DMP as soon as it reliably learns that the beneficiary is exempt (whether that be via the beneficiary, their representative, the facility, a pharmacy, a prescriber, or an internal or external data source, including an internal claims system). CMS understands that sponsors may have already been sending alternate second notices after determining that a beneficiary is exempt, without waiting for 30 days to elapse. This proposed change would specify that sponsors must send such notices to exempted beneficiaries sooner than 30 days after the provision of the initial notice.

CMS reminds Part D sponsors that, during their review and during case management, they are expected to use all available information to identify whether a PARB is exempt in advance of sending an initial notice to protect these vulnerable beneficiaries from unnecessary burden, anxiety, and disruptions in medically necessary drug therapy. Thorough review of plan records and robust outreach efforts to prescribers during case management help to minimize the risk that an exempted beneficiary would receive an initial notice.

Sections 8.1 and 8.2.2 of the DMP guidance [30] state that if a sponsor learns that a beneficiary is exempt after sending an initial notice, the sponsor should inform the beneficiary that the initial notice is rescinded. If less than 30 days have passed since the initial notice, a sponsor should send a Part D Drug Management Program Retraction Notice for Exempted Beneficiaries. The model retraction notice addresses the required 30-day timing issue in the current regulation. As proposed, the Part D Drug Management Program Retraction Notice for Exempted Beneficiaries would no longer be used because sponsors would instead send the alternate second notice. We did not estimate any reduction of burden for sponsors no longer using the Retraction Notice. The Retraction Notice was implemented as a temporary solution for Part D sponsors to use for exempted beneficiaries in place of the alternate second notice, which had been accounted for in the latest version of CMS–10141 (OMB control number 0938–0964).

We note that sponsors may determine that a PARB is not an ARB prior to 30 days elapsing for reasons other than the beneficiary being exempt. However, we believe the existing 30-day requirement before a sponsor may send an alternate second notice in such situations is important to maintain because it allows the beneficiary and other prescribers enough time to provide the sponsor with information that may influence the sponsor's determination.

We received the following comments on this proposal and our responses follow.

Comment: We received several comments supporting our proposal to eliminate the requirement that sponsors wait 30 days to send an alternate second notice to a beneficiary determined to be exempt after receiving an initial notice. Commenters described the proposal as efficacious, reasonable, and aimed at protecting exempted beneficiaries from unnecessary burden, including interrupted treatments. No commenters opposed this proposal. One commenter expressed support for discontinuing use of the Part D DMP Retraction Notice for Exempted Beneficiaries, noting that the Retraction Notice would no longer be needed under this proposal.

Response: We thank the commenters for their support and are finalizing this provision as proposed.

We proposed an additional technical change related to the timeframe for providing second notices and alternate second notices. The current regulation at § 423.153(f)(8)(i) requires that a sponsor provide a second notice or alternate second notice not more than the earlier of the date the sponsor makes the relevant determination or 60 days after the date of the initial notice. It is critical that beneficiaries receive timely written notice about changes to their access to Part D drugs, as well as information about appeal rights, and the second notice and alternate second notices are tied to the date of the plan's determination. However, CMS understands that sponsors may not always be able to issue printed notices on the exact day they make a determination for a variety of reasons, such as they made the determination on a day when there is no United States Postal Service mail service, or later in the day after files have been sent to a print vendor. Specifically, we proposed to add at § 423.153(f)(8)(i)(A) a window of up to 3 days to allow for printing and mailing the second notice or alternate second notice. We noted in the proposed rule that this change would provide sponsors sufficient time to print and mail the notices while ensuring that beneficiaries receive timely information about DMP limitations. Sponsors must continue to issue these notices as soon as possible when a determination is made, and CMS does not expect that sponsors will routinely take the maximum amount of time.

We did not propose to change the requirement in § 423.153(f)(8)(i)(B) that the second notice or alternate second notice must be provided no later than 60 days from the date of the initial notice. This is because sponsors have ample time to account in advance for the days needed to print and mail these notices.

We received the following comments on this proposal and our responses follow.

Comment: We received several comments on this proposal. Commenters were supportive of adding a window of time between making a determination and providing the second notice or alternate second notice; no commenters were opposed. Most of these commenters noted the importance of notifying beneficiaries as soon as practicable about DMP determinations.

Response: CMS thanks the commenters for their support.

Comment: Several of the commenters that generally supported this proposal opined that CMS should allow more than 3 days for sponsors to provide the second notice or alternate second notice following a determination, and offered specific recommendations, including allowing up to 4 days, 5 business days, or 7 calendar days. One commenter stated that weekends and holidays would make the proposed 3-day window almost impossible to meet. Another commenter opined that sponsors should not be held to the same timeframe that applies to written notice of a Part D coverage determination

[30] *https://www.cms.gov/files/zip/cy-2023-part-d-dmp-guidance-april-20-2023.zip.*

because of the impracticality of verbally conveying the information in a DMP notice prior to mailing the written notice. The commenter instead recommended that the timing align with the 7-day window that applies to other current requirements, including certain DMP data disclosure requirements. One commenter appeared to have misunderstood the existing timeframes for providing the second notice and alternate second notice.

Response: We thank the commenters for their feedback but disagree with their recommendations to allow more than 3 days between making the determination and providing the notice. These notices contain important information concerning a beneficiary's prescription drug access and must not be unnecessarily delayed. As described above and in the November 2023 proposed rule, there is precedent for establishing a 3-day window for sponsors to provide a written notice for coverage determinations under §§ 423.568(d) and (f) and 423.572(b). CMS recognizes that the DMP notices do not follow initial verbal notification, but that makes timely written notification even more important for these cases. Additionally, sponsors already have established processes for providing written notices within a 3-day timeframe, and these processes can be leveraged for sending DMP notices.

Regarding the data disclosure provision at § 423.153(f)(15)(ii)(D) that requires sponsors to update DMP information in MARx as soon as possible but no later than 7 days from the date the sponsor provides an initial notice or second notice to a PARB or ARB or terminates a DMP limitation, it is important to note that this requirement is unrelated to beneficiary notification and thus not as urgent. The purpose of the data disclosure is not comparable to the purpose of sending beneficiary notices regarding a restriction on their access to Part D drugs; therefore, it is not an appropriate benchmark to use to establish this timeframe. CMS does not expect plans to routinely take the maximum amount of time possible and reminds sponsors that the maximum 60-day timeframe from the date of the initial notice is unchanged under our proposal. For example, if a determination is made on day 60, the second notice or alternate second notice must be provided on the same day.

Currently, under § 423.153(f)(8)(i), Part D sponsors must provide the second notice or the alternate second notice on the date of the determination, with no additional window of time for providing (*i.e.,* printing and mailing) the written notice. As such, this change extends from 0 days to up to 3 days the time sponsors have to provide a notice after making a determination. After consideration of the comments received and existing Part D beneficiary notice requirements, CMS believes this change allows sponsors sufficient time to print and mail the notices while ensuring that beneficiaries receive timely information about their DMP limitations.

Comment: Some commenters requested clarification on how CMS will calculate the 3-day window for providing the alternate second notice and second notice and whether the provision refers to calendar or business days. One commenter asked whether CMS intends for plans to ensure the DMP notices are mailed within 3 days of the determination, or whether CMS intends for the beneficiary to receive the notice within 3 days of the determination.

Response: CMS intends that a sponsor will have issued (*i.e.,* printed and mailed, or sent electronically if the beneficiary has indicated such a preference) the second notice or alternate second notice within 3 days of making the relevant determination. We do not require sponsors to send these notices in a manner that tracks receipt by the beneficiary and consequently would be unable to enforce such a timeframe. We further clarify that this proposal refers to calendar days, consistent with the other DMP notice requirements specified at § 423.153(f)(8) and various beneficiary notice requirements throughout Part 423, Subpart M. CMS will update the 2025 DMP guidance to provide these clarifications as they relate broadly to the DMP beneficiary notice requirements.

After consideration of the comments received, we are finalizing the regulation text at §§ 423.153(f)(8)(i)(A) and 423.153(f)(8)(ii) as proposed.

3. OMS Criteria Request for Feedback

CMS regulations at § 423.153(f)(16) specify that CMS and Part D sponsors identify PARBs and ARBs using clinical guidelines that are developed with stakeholder consultation, derived from expert opinion backed by analysis of Medicare data, and include a program size estimate. In addition, the clinical guidelines (also referred to as the ''OMS criteria'') are based on the acquisition of FADs from multiple prescribers, multiple pharmacies, the level of FADs used, or any combination of these factors, or a history of opioid-related overdose.

PARBs are the Part D beneficiaries who CMS believes are potentially at the highest risk of opioid-related adverse events or overdose. The current minimum OMS criteria [31] identifies PARBs who (1) use opioids with an average daily morphine milligram equivalents (MME) of greater or equal to 90 mg for any duration during the most recent six months, who have received opioids from 3 or more opioid prescribers and 3 or more opioid dispensing pharmacies, *or* from 5 or more opioid prescribers regardless of the number of dispensing pharmacies (also referred to as ''MIN1'' minimum OMS criteria), or (2) have a history of opioid-related overdose, with a medical claim with a primary diagnosis of opioid-related overdose within the most recent 12 months and a Part D opioid prescription (not including Medication for Opioid Use Disorder [32] (MOUD)) within the most recent 6 months (also referred to as ''MIN2'' minimum OMS criteria). Sponsors may use the current supplemental OMS criteria to address plan members who are receiving opioids from a large number of prescribers or pharmacies, but who do not meet a particular MME threshold. These are (1) use of opioids (regardless of average daily MME) during the most recent 6 months; AND (2) 7 or more opioid prescribers OR 7 or more opioid dispensing pharmacies.

In 2019, CMS assigned the Health Federally Funded Research and Development Center (FFRDC) to develop evidence-based recommendations for improving the OMS criteria for the future. The Health FFRDC conducted a literature review, facilitated a Technical Expert Panel (TEP), and performed data analyses. All three activities served as inputs into the evidence-based recommendations. The Health FFRDC recommended that the results of the literature review and data analysis support the continued inclusion of average MME, number of opioid dispensing pharmacies, and number of opioids prescribers as indicators for PARBs. In addition, they recommended that further data analysis would be necessary to determine which additional criteria would be appropriate to potentially adopt. CMS conducted subsequent literature reviews and analysis.

In recent years, there has been a marked decrease in Part D prescription opioid overutilization, but opioid-related overdose deaths continue to be

[31] April 20, 2023 HPMS memorandum, CORRECTION—Contact Year 2023 Drug Management Program Guidance available at: *https://www.cms.gov/medicare/prescription-drug-coverage/prescriptiondrugcovcontra/rxutilization.*

[32] Referred to as medication-assisted treatment (MAT) in past guidance.

a growing problem throughout the United States.[33] While the CDC found synthetic opioids (other than methadone) to be the main driver of opioid overdose deaths, accounting for 82 percent of all opioid-involved deaths in 2020,[34] we must remain vigilant regarding the risks of prescription opioids including misuse, opioid use disorder (OUD), overdoses, and death. CMS tracks prevalence rates for Part D beneficiaries with an OUD [35] diagnosis and beneficiaries with an opioid poisoning (overdose). While overall opioid-related overdose prevalence rates among Part D enrollees have declined over the period from contract year 2017 through 2021 at about 6.5 percent per annum, overall opioid-related overdose prevalence rates increased by 1.0 percent between 2020 and 2021. Furthermore, about 1.6 percent of all Part D enrollees had a provider diagnosed OUD in Contract Year 2021, and the OUD prevalence rate has grown by 3.2 percent per annum since contract year 2017.

A past overdose is the risk factor most predictive for another overdose or suicide-related event.[36] CMS finalized regulations to implement section 2004 of the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities (SUPPORT) Act to include beneficiaries with a history of opioid-related overdose as PARBs in DMPs. While the implementation of the SUPPORT ACT enables identification of beneficiaries with a history of opioid-related overdose and continues to identify PARBs who receive high levels of opioids through multiple providers who may be more likely to misuse prescription opioids,[37] CMS is working on alternative methods to identify beneficiaries potentially at risk before their risk level is diagnosed as an OUD or the person experiences an opioid-related overdose.

A recently published article that evaluated the use of machine learning algorithms for predicting opioid overdose risk among Medicare beneficiaries taking at least one opioid prescription concluded that the machine learning algorithms appear to perform well for risk prediction and stratification of opioid overdose especially in identifying low-risk groups having minimal risk of overdose.[38] Machine learning is a method of data analysis that automates analytical model building, based on the idea that systems can learn from data, identify patterns and make decisions with minimal human intervention.

While we did not propose changes to the clinical guidelines or OMS criteria in the November 2023 proposed rule, we provided information on our data analysis to date and welcome feedback for future changes. Using predictor variables identified through the literature reviews, CMS performed a data analysis to determine the top risk factors for Part D enrollees at high-risk for one of two outcomes: (1) having a new opioid poisoning (overdose) or (2) developing newly diagnosed OUD. Since Part D enrollees with a known opioid-related overdose are already identified in OMS, CMS focused on individuals at high risk for a new opioid-related overdose or OUD. We anticipated no additional sponsor burden since we did not propose regulatory changes and solicited feedback.

In the analysis, we utilized Medicare data and traditional logistic regression as well as machine learning models like Random Forest, Least Absolute Shrinkage and Selection Operator (LASSO), and Extreme Gradient Boosting (XGBoost) [39] Cross Validation (CV) to examine and evaluate performance in predicting risk of opioid overdose and OUD. The models were compared based on the following criteria: Area Under the Curve (AUC), sensitivity, specificity, positive predictive value (PPV), negative predictive value (NPV), and number needed to examine (NNE). An XGBoost model with CV performed best according to the specified criteria and was selected as the model of choice for predicting a beneficiary with a new opioid overdose or OUD diagnosis.

The model population included 6,756,152 Medicare beneficiaries contemporaneously enrolled in Part D and Parts A, B, or C during the period from January to June 2019, who were prescribed at least one non-MOUD prescription opioid during the measurement period and did not have a DMP exemption (that is, cancer, sickle cell disease, hospice, LTC facility resident, palliative care, or end-of-life care). We excluded beneficiaries with a prior opioid-related overdose or an OUD diagnosis in the year prior to the prediction period. The training dataset used to build the model consisted of a random 75 percent sample of the study population (5,067,114). The remaining 25 percent of the population (1,689,038) was used for validating the prediction performance of the model. The measurement period to obtain information for the predictor variables (for example, opioid use patterns, demographics, comorbidities, etc.) was from January 1 to June 30, 2019, and the prediction period we used to identify beneficiaries with a new opioid overdose event or new OUD diagnosis was from July 1 to December 31, 2019.

The following risk factors [40] were incorporated into the XGBoost model:

BILLING CODE P

Evaluation of Machine-Learning Algorithms for Predicting Opioid Overdose Risk Among Medicare Beneficiaries With Opioid Prescriptions. JAMA Netw Open. 2019 Mar 1;2(3):e190968. doi: 10.1001/jamanetwork open.2019.0968. Erratum in: JAMA Netw Open. 2019 Jul 3;2(7):e197610. PMID: 30901048; PMCID: PMC6583312.

[39] Extreme Gradient Boosting (XGBoost) model—data mining technique that is similar to Random Forest that combines multiple decision trees into a single strong prediction model, but it differs in doing so in an iterative manner by building one tree at a time and optimizing a differentiable loss function.

[40] Multicollinearity tests were undertaken in order to ensure that there was no collinearity among the explanatory variables used in the model.

TABLE CN-1: Risk factors used for the XGBOOST MODEL

Risk Factor Flag	Description
Age	Beneficiary age in years
Sex	Female or Male sex
Race	White, Black, Asian, Hispanic, Native American, Other or Unknown race/ethnicity
LIS	Beneficiary low-income subsidy status
Dual	Beneficiary dual-eligibility status
Current Medicare Entitlement	Beneficiary current Medicare entitlement: ESRD (1) / non-ESRD (2)
MME	Average daily morphine milligram equivalents (MME)
Number of Opioid Pharmacies	Number of different pharmacies with an opioid prescription drug event (PDE) claim
Number of Opioid Prescribers	Number of different opioid prescribers
Number of Short-Acting Opioid Fills	Number of short-acting opioid PDEs
Number of Long-Acting Opioid Fills	Number of long-acting opioid PDEs
Number of Different Prescription Opioids	Number of different opioids prescribed (GPI-14[41])
Number of MOUD Days	Number of Medication-Assisted Treatment (MOUD) days
Hepatitis	Hepatitis diagnosis
Cervical nerve injury	Cervical nerve injury diagnosis
Lumbar nerve injury	Lumbar nerve injury diagnosis
Thoracic nerve injury	Thoracic nerve injury diagnosis
Neuropathy	Neuropathy diagnosis
Other chronic pain	Other chronic pain diagnosis
Number of Mental Health Conditions	Number of mental health conditions (ADHD, anxiety, bipolar, depression, PTSD, personality disorder, schizophrenia) diagnosed
Number of Substance Use Disorders	Number of substance use disorders (alcohol, cannabis, hallucinogen, inhalant, non-psychoactive, psychoactive, sedative, stimulant) diagnosed

[41] The Generic Product Identifier (GPI) designates any or all of a drug's group, class, sub-class, name, dosage form, and strength.

Risk Factor Flag	Description
	hallucinogen, inhalant, non-psychoactive, psychoactive, sedative, stimulant) diagnosed
Antianxiety Drug Fill	PDE claim for antianxiety drug
Antipsychotic Drug Fill	PDE claim for antipsychotic drug
Anticonvulsant Drug Fill	PDE claim for anticonvulsant drug
Concurrent use of opioid and benzodiazepine (1 or more days)	Concurrent PDE for opioid and benzodiazepine (1+ day overlap)
Concurrent use of opioid and benzodiazepine (30 or more days)	Concurrent PDE for opioid and benzodiazepine (30+ day overlap)
Codeine Fill	PDE opioid claim for codeine (GPI-10)
Fentanyl Fill	PDE opioid claim for fentanyl (GPI-10)
Methadone Fill	PDE opioid claim for methadone (GPI-10)
Morphine Fill	PDE opioid claim for morphine (GPI-10)
Oxycodone Fill	PDE opioid claim for oxycodone (GPI-10)
Oxymorphone Fill	PDE opioid claim for oxymorphone (GPI-10)
Tramadol Fill	PDE opioid claim for tramadol (GPI-10)
Hydrocodone Fill	PDE opioid claim for hydrocodone (GPI-10)
Hydromorphone Fill	PDE opioid claim for hydromorphone (GPI-10)
Other Opioid Fill	PDE opioid claim for other opioid (GPI-10)

We evaluated the performance of the model using the confusion matrix generated by applying the prediction model to the validation dataset to calculate various metrics.

TABLE CN-2: Confusion Matrix for the XGBoost Model

Actual New OUD or Opioid-Related Overdose Diagnosis:	Predicted New OUD or Opioid-Related Overdose Diagnosis: No	Predicted New OUD or Opioid-Related Overdose Diagnosis: Yes	Total
No	1,154,395	513,551	1,667,946
Yes	3,920	17,172	21,092
Total	1,158,315	530,732	1,689,038

TABLE CN-3: Performance Metrics for the XGBoost Model

Criteria	Result
AUC	0.8253
Sensitivity	81.41 Percent
Specificity	69.21 Percent
PPV	3.24 Percent
NPV	99.66 Percent
NNE	31
Probability Threshold	0.474

The top 15 risk factors that were highly associated with a new OUD or opioid-related overdose diagnosis were:

TABLE CN-4: Top 15 Risk Factors

Rank	Risk Factor Variable	Gain
1	Number of Short-Acting Opioid Fills	0.3853
2	MME*	0.1256
3	Age	0.0882
4	Number of Long-Acting Opioid Fills	0.0729
5	Number of Mental Health Conditions	0.0539
6	Number of Substance Use Disorders	0.0298
7	Anticonvulsant Drug Fill	0.0294
8	Number of Different Prescription Opioids	0.0234
9	Oxycodone Fill	0.0230
10	Other Opioid Fill	0.0227
11	Dual	0.0200
12	Number of Opioid Prescribers*	0.0148
13	Concurrent use of opioid and benzodiazepine (30 or more days)	0.0134
14	Morphine Fill	0.0112
15	LIS	0.0102

*Part of current minimum OMS criteria.

The number of short-acting prescription opioid fills and the average daily MME were found to contribute most to XGBoost model predictions of a new OUD or opioid-related overdose diagnosis. Risk was present across a range of MME levels and increased with higher MME levels. The risk of developing a new OUD or opioid-related overdose diagnosis also increased with the number of diagnosed mental health or substance use disorders. Utilization of opioids with other high-risk medications like anticonvulsants, benzodiazepines, anti-psychotics, and anti-anxiety medications were positively associated with higher risk. Also, utilization of opioids like oxycodone and morphine were positively associated with higher risk, while utilization of codeine, tramadol, and opioids in the other category were positively associated with lower risk.

Lastly, we applied our finalized model to data from October 1, 2021 through March 31, 2022 to predict future new opioid-related overdose events and OUD diagnoses during the period from April 1, 2022 to September 30, 2022 to understand program size estimates and NNE values.

TABLE CN-5: Risk Probability Thresholds and Performance Metrics

Risk Probability Threshold	Number of Beneficiaries with Predicted New OUD or Opioid-Related Overdose Diagnosis	Number of True Positives*	PPV (Percent)	NNE
Top 1 percent**(Validation Data)	16,862	1,860	11.01	9
Top 1 percent	62,571	5,445	8.70	11
Top 50,000	50,000	4,562	9.12	11
Top 40,000	40,000	3,792	9.48	11
Top 30,000	30,000	2,996	9.99	10
Top 20,000	20,000	2,168	10.84	9
Top 10,000	10,000	1,219	12.19	8
Top 5,000	5,000	679	13.58	7
Top 1,000	1,000	150	15.00	7

*True Positives are beneficiaries that were categorized into the given risk probability threshold group based on data from the October 1, 2021 to March 31, 2022 measurement period, then were subsequently found to have experienced a new opioid OD/OUD during the April 1, 2022 to September 30, 2022 prediction period.
**Validation data: random 25 percent sample of total population: January 1, 2019 to June 30, 2019 measurement period, and July 1, 2019 to December 31, 2019 prediction period.

BILLING CODE C

Between 9 percent and 15 percent of the beneficiaries with a predicted new opioid-related overdose/OUD actually experienced a new overdose or OUD diagnosis during the evaluation period (April 1, 2022, through September 30, 2022) depending on the Risk Probability Threshold. The Top 1 percent threshold (n = 62,571) reported the lowest precision score, while the Top 1,000 threshold showed the highest precision. Among those who had a new opioid-related overdose/OUD in the evaluation period, about 92 percent developed a new OUD; the proportion with a new opioid overdose increased from 10 percent to 17 percent as the risk probability threshold increased from the Top 1 percent to the Top 1,000; and, as the risk probability threshold increased, about 2 percent to 8 percent had both a new opioid overdose and were identified as having a newly diagnosed OUD. Among the different Risk Probability Thresholds, between 93 to 98 percent of the correctly predicted new overdoses/OUDs do not meet the current OMS criteria. The percentage that meets the current OMS criteria decreases as the Risk Probability Threshold becomes more restrictive. Thus, our analysis shows that there is very little overlap between the population identified through this model and beneficiaries already identified through the OMS.[42] Furthermore, our analysis confirms that machine learning models can analyze large datasets and identify complex patterns that are not easily discernible by current non-statistical approaches. This makes them a powerful tool for identifying new opioid-related overdose or OUD risk and capturing an additional population of potential at-risk beneficiaries who have not been identified through our current OMS criteria.

In the November 2023 proposed rule, we discussed that CMS next plans to assess risk in the model, validate the stability of the model as new data become available, and develop guidelines on how to feasibly implement the model into the existing DMP and OMS processes. We solicited feedback on the following:

- Potentially using such a model to enhance the minimum or supplemental OMS criteria in the future (either in addition to the current criteria or as a replacement).
- How to avoid the stigma and/or misapplication of identification of a PARB at high risk for a new opioid-related overdose or OUD using the variables in the model.
- Implementation considerations, such as effectively conducting case management, as described in 423.153(f)(2), with prescribers of PARBs identified by the model; opportunities to promote MOUD, co-prescribing of naloxone, or care coordination; or potential unintended consequences for access to needed medications.
- Other factors to consider.

Comment: Commenters supported our machine learning model approach or further testing. Several commenters encouraged CMS to provide a demographic breakdown or the fairness analysis used to evaluate the model. Several commenters suggested that CMS use clearly defined risk factors that foster case management, ensure correctness of the risk factors used, or focus on distinguishing factors to identify at-risk beneficiaries and to minimize misapplication of the criteria for beneficiaries with low risk of overdose or OUD. One commenter recommended methods to better identify overdose risk such as removing beneficiaries who do not show continuous use of opioids after an overdose event and shortening look back windows.

Response: We thank the commenters for their support of our machine learning model approach and thoughtful input. CMS will consider the feedback, and we will proceed with further testing to improve the model and risk factors.

[42] CMS also notes that historically, only about 1.6 percent of the beneficiaries meeting the history of opioid-related overdose (MIN2) OMS criteria also meet the (MIN1) minimum OMS criteria.

The model focused on Part D beneficiaries at high-risk of one of two outcomes: (1) having a new opioid poisoning (overdose) or (2) developing newly diagnosed OUD. Since Part D beneficiaries with a known opioid-related overdose are already identified in OMS, CMS focused on individuals at high risk for a new opioid-related overdose or OUD. CMS also excluded beneficiaries with a prior opioid-related overdose or an OUD diagnosis in the year prior to the prediction period. Also, we did include demographic factors in the initial model and a few of the factors were highly associated with a new OUD or opioid-related overdose diagnosis as described above and in the November 2023 proposed rule. We will look for opportunities to provide additional details or output from the analysis after we conduct more testing.

Comment: Some commenters recommended that CMS assess whether any new criteria resulting from the use of such model could unintentionally lead providers to be less likely to diagnose someone with OUD, as that, in turn, would decrease access to MOUD.

Response: We will evaluate unintentional consequences of using updated criteria that may affect the likelihood of diagnosing beneficiaries with OUD. We encourage sponsors and prescribers to promote co-prescribing of naloxone, MOUD, or other treatment referrals through the DMP case management process.

Comment: Some commenters requested sufficient lead time and proper communication language be in place before CMS implements any changes.

Response: We did not propose changes to the clinical guidelines or OMS criteria in the November 2023 proposed rule. Changes would be proposed through a future notice of proposed rulemaking with sufficient lead time and guidance, if finalized.

M. Codification of Complaints Resolution Timelines and Other Requirements Related to the Complaints Tracking Module (CTM) (42 CFR 417.472(l), 422.125, 423.129, and 460.119)

CMS maintains the CTM in the Health Plan Management System (HPMS) as the central repository for complaints received by CMS from various sources, including, but not limited to the Medicare Ombudsman, CMS contractors, 1–800–MEDICARE, and CMS websites. The CTM was developed in 2006 and is the system used to comply with the requirement of section 3311 of the Affordable Care Act for the Secretary to develop and maintain a system for tracking complaints about MA and Part D plans received by CMS, CMS contractors, the Medicare Ombudsman, and others. Complaints from beneficiaries, providers, and their representatives regarding their Medicare Advantage (MA) organizations, Cost plans, Programs of All-inclusive Care for the Elderly (PACE) organizations, and Part D sponsors are recorded in the CTM and assigned to the appropriate MA organization (MAO), Cost plan, PACE organization, and Part D sponsor if CMS determines the plan, organization, or sponsor is responsible for resolving the complaint. Unless otherwise noted, ''plans'' applies to MAOs, Part D sponsors, Cost plans, and PACE organizations for purposes of this section.

We proposed to codify existing guidance for the timeliness of complaint resolution by plans in the CTM. Currently, §§ 422.504(a)(15) and 423.505(b)(22) require MAOs and Part D sponsors to address and resolve complaints received by CMS against the MAO and Part D sponsor through the CTM; we proposed to codify the expectation in guidance that Cost plans and PACE organizations also address and resolve complaints in the CTM. We proposed to codify the existing priority levels for complaints based on how quickly a beneficiary needs to access care or services and to codify a new requirement for plans to make first contact with individuals filing non-immediate need complaints within 3 calendar days. This timeframe will not apply to immediate need complaints because those complaints need to be resolved within two calendar days.

CMS codified the requirement for MAOs and Part D sponsors to address and resolve complaints in the CTM at §§ 422.504(a)(15) and 423.505(b)(22) in the ''Medicare Program; Changes to the Medicare Advantage and the Medicare Prescription Drug Benefit Programs for Contract Year 2012 and Other Changes'' (76 FR 21431), which appeared in the April 15, 2011 **Federal Register** (hereafter referred to as the ''April 2011 final rule''). As described in the April 2011 final rule, the regulation requires that MAOs and Part D sponsors provide a summary of the resolution in the CTM when a complaint is resolved. (76 FR 21470)

As Part D sponsors, Cost plans and PACE organizations that offer Part D coverage have been required to comply with § 423.505(b)(22). We proposed to add language to §§ 417.472(l) and 460.119 to codify in the Cost plan regulations and PACE regulations, respectively, the requirement that Cost plans and PACE organizations address and resolve complaints in the CTM. This proposed new requirement will apply to all complaints in the CTM for Cost plans and PACE organizations, not just complaints about Part D.

In addition, CMS has issued guidance describing our expectations for how complaints should be handled. In the Complaints Tracking Module Plan Standard Operational Procedures (CTM SOP), the most recent version of which was released on May 10, 2019, via HPMS memo,[43] CMS provides detailed procedures for plans to use when accessing and using the CTM to resolve complaints. This includes describing the criteria CMS uses in designating certain complaints as ''immediate need'' or ''urgent'' (all other complaints are categorized ''No Issue Level'' in the CTM), setting forth our expectation that plans should review all complaints at intake, and documentation requirements for entering complaint resolutions in the CTM. The CTM SOP defines an ''immediate need complaint'' for MAOs, Cost plans, and PACE organizations as ''a complaint where a beneficiary has no access to care and an immediate need exists.'' For Part D sponsors, ''an immediate need complaint is defined as a complaint that is related to a beneficiary's need for medication where the beneficiary has two or less days of medication remaining.'' The CTM SOP defines an ''urgent complaint'' for MAOs, Cost plans, and PACE organizations as a complaint that ''involves a situation where the beneficiary has no access to care, but no immediate need exists.'' For Part D sponsors, ''an urgent complaint is defined as a complaint that is related to the beneficiary's need for medication where the beneficiary has 3 to 14 days of medication left.''

In Chapter 7, section 70.1 of the Prescription Drug Benefit Manual, ''Medication Therapy Management and Quality Improvement Program,'' [44] CMS requires Part D sponsors to resolve any ''immediate need'' complaints within two (2) calendar days of receipt into the CTM and any ''urgent'' complaints within seven (7) calendar days of receipt into the CTM. Chapter 7, section 70.1 also sets forth CMS's expectation that Part D sponsors promptly review CTM complaints and notify the enrollee of the plan's action as expeditiously as the case requires based on the enrollee's health status.

[43] Available at *https://www.hhs.gov/guidance/sites/default/files/hhs-guidance-documents/ctm%20plan%20sop%20eff053019.pdf.*

[44] Available at *https://www.cms.gov/medicare/prescription-drug-coverage/prescriptiondrugcovcontra/downloads/dwnlds/chapter7pdf.*

Requirements for resolution of complaints received in the CTM do not override requirements related to the handling of appeals and grievances set forth in 42 CFR part 422 subpart M (which apply to cost plans as well as MAOs per § 417.600), Part 423 subpart M, for Part D sponsors, and §§ 460.120–460.124 for PACE organizations. Rather, CTM requirements supplement the appeals and grievance requirements by specifying how organizations must handle complaints received by CMS in the CTM and passed along to the plan. The requirement for organizations to enter information on the resolution of complaints in the CTM within specified time periods allows CMS to track and ensure accountability for complaints CMS itself received, either directly from beneficiaries or via entries in the CTM from the Medicare ombudsman, CMS contractors, or others. A beneficiary who filed a complaint directly with CMS may later contact CMS to find out the status of the complaint and the plan's use of the system will allow CMS to answer the beneficiaries inquires more expeditiously. In order to comply with the applicable regulations, plans must handle any CTM complaint that is also an appeal or grievance within the meaning of the regulation in such a way that complies with the notice, timeliness, procedural, and other requirements of the regulations governing appeals and grievances.

We proposed to codify the timeliness requirements for MAOs and Part D plans at new §§ 422.125 and 423.129, both titled ''Resolution of Complaints in Complaints Tracking Module.'' We proposed to codify these requirements for Cost plans and PACE organizations at §§ 417.472(l) and 460.119 by adopting §§ 422.504(a)(15) and 422.125 by reference into the requirements for Cost plans and PACE organizations, respectively.

Specifically, we proposed to codify at §§ 422.125(a) and 423.129(a) the definitions of ''immediate need'' and ''urgent'' complaints in substantially the same way as they are currently defined in guidance for MA and Part D-related complaints. However, we proposed to specify that immediate need and urgent complaints for MA plans (as well as Cost plans, and PACE) also include situations where a beneficiary has access to enough of a drug or supply to last fewer than 2 days or from 3 to 14 days, respectively, as part of the definition that these complaints are about situations that prevent the beneficiary from accessing care or a service. This proposed change recognizes that some complaints to an MAO (or Cost plan or PACE organization) may overlap with Part D access, such as when a beneficiary reports a problem with their enrollment in an MA–PD plan that is blocking access to Part D coverage. The change also recognizes that non-Part D MA, Cost plan, and PACE complaints relate not just to access to physician services but to drugs and supplies that may be covered by the MA plan, Cost plan, or PACE organization's non-Part D benefit (for example, Part B drugs or diabetic test strips covered under the medical benefit of an MA plan). Further, MA plans, Cost plans, and PACE also cover Part B drugs.

We also proposed to codify at §§ 422.125(b) and 423.129(b) the current timeframes reflected in section 70.2 of Chapter 7 of the Prescription Drug Benefit Manual for resolving immediate need and urgent complaints. A two (2) calendar day deadline for resolving plan-related immediate need complaints is both consistent with current practice by plans and logically follows from the definition of an ''immediate need'' complaint. By its nature, an immediate need complaint requires swift action. Because we define immediate need, in part, as a situation where a beneficiary has access to two or fewer days' worth of a drug or supply they need, a timeline greater than two calendar days for resolving a complaint would represent an unacceptable risk to beneficiaries.

Similarly, a 7 calendar day deadline for ''urgent'' complaints reflects the importance of not delaying resolution of a situation that is preventing access to care or services a beneficiary needs. Because we define ''urgent'' in part as a situation where a beneficiary has 3 to 14 days' worth of a drug or supply they need, allowing more than a week to elapse before resolving the complaint will put beneficiaries at unacceptable risk of not receiving replacement drugs or supplies timely.

For all other Part D and non-Part D complaints in the CTM, we proposed requiring resolution within 30 days of receipt. This is consistent with current practice and the guidance in section 70.2 of Chapter 7 of the Prescription Drug Benefit Manual, and we believe will prevent complaints from lingering for months without resolution in the CTM. Further, a 30-day timeframe for resolving complaints in the CTM aligns with the 30-day period provided in §§ 422.564(e) and 423.564(e) for resolution of grievances. Although those regulations permit an extension of up to 14 days for resolving the grievance if the enrollee requests the extension or if the organization justifies a need for additional information and documents how the delay is in the interest of the enrollee, we do not believe that including the authority to extend the deadline to resolve complaints in the CTM is appropriate because complaints received into the CTM are often the result of failed attempts to resolve issues directly with the plan. Allowing plans to further extend the time to resolve the complaint only allows further delays in addressing beneficiary concerns. Moreover, recent evidence indicates that the vast majority of non-immediate need or urgent complaints are resolved within 30 days—98 percent of such complaints were resolved by plans within 30 days in 2022.

All timeframes for resolution will continue to be measured from the date a complaint is assigned to a plan in the CTM, rather than the date the plan retrieves the complaint from the CTM. This is consistent with current guidance and practice. Measuring the timeframe in this manner is the best way to protect beneficiaries from delayed resolution of complaints and encourages organizations to continue retrieving CTM complaints in a timely manner so that they have sufficient time to resolve complaints.

We do not anticipate that plans will have difficulty meeting these timeframes. The vast majority of complaints are currently resolved in the timelines specified for the priority level of the complaint. For example, in 2022, plans resolved 97 percent of complaints within the required time frames for the level of complaint. Plans resolved 94 percent of immediate need complaints within two (2) calendar days, 97 percent of urgent complaints within seven (7) calendar days, and 98 percent of complaints with no issue level designated within thirty (30) calendar days. Codifying the timeframes as proposed merely formalizes CMS's current expectations and the level of responsiveness currently practiced by plans.

We also proposed to create a new requirement for plans to contact individuals filing non-immediate need complaints. At §§ 422.125(c) and 423.129(c), we proposed to require plans to contact the individual filing a complaint within three (3) calendar days of the complaint being assigned to a plan. While current guidance generally includes the expectation that organizations inform individuals of the progress of their complaint, CMS has never specified a timeframe for reaching out to a complainant. CMS has observed that, particularly for complaints that are not assigned a priority level, plans sometimes wait until the timeframe for resolution has almost elapsed to contact the complainant. Because the timeframe

for resolving uncategorized complaints is 30 days, an individual who files a complaint may wait weeks to hear back from the plan responsible for resolving it. We believe that such delays cause unnecessary frustration for beneficiaries and are inconsistent with the customer service we expect from plans.

We acknowledge that our proposed timeframe for reaching out to the complainant concerning a CTM complaint is more specific than our requirement at §§ 422.564(b) and 423.564(b) for plans to ''promptly inform the enrollee whether the complaint is subject to its grievance procedures or its appeals procedures.'' We proposed a specific timeframe for contacting the beneficiary regarding a CTM complaint because, unlike with complaints received by the plans outside the CTM, the complainant has not reached out directly to the plan and may not know that their complaint has been passed on to the plan by CMS via the CTM. Moreover, as previously noted, CMS monitors the handling of complaints it receives through the CTM in real time. Part of handling CTM complaints through the CTM, as required by §§ 422.504(a)(15) and 423.505(b)(22), is entering information into the CTM when the plan reaches out to the complainant. CMS will therefore be able to monitor whether a plan has reached out to a beneficiary within the required timeframe and follow up with the plan well before timeframe for resolving the complaint has elapsed.

We proposed a three (3) calendar day timeframe for reaching out to the individual filing the complaint because it will provide a timely update to individuals filing both urgent and uncategorized complaints without delaying resolution of immediate need complaints. We expect that a plan will indicate in this communication that the plan has received and is working on the complaint, and that they provide contact information that the individual filing the complaint could use to follow up with the plan regarding the complaint. We solicited comment on whether this timeframe is appropriate and whether a longer or shorter timeframe will better balance the needs of beneficiaries with the capacity of plans to respond to complaints.

We also proposed conforming changes to §§ 422.504(a)(15) and 423.505(b)(22) to incorporate the proposed new requirements into the existing contractual requirements for MAOs and Part D sponsors. The proposed revisions to §§ 417.472(l) and 460.119 incorporate both the requirements in proposed § 422.125 and the requirement for a contract term for resolving complaints received by CMS through the CTM for Cost plans and PACE organizations and their contracts with CMS.

We received comments on the proposal and our responses to the comments are below.

Comment: Several commenters supported the proposed rule, with one noting that they support any effort to improve the timeliness and transparency associated with enrollee complaints to MA plans. One organization was particularly appreciative of CMS's goal to ensure that beneficiaries receive a timely response to complaints. Another commenter likewise expressed the need to codify a timeline for letting complainants know that the plan had received the complaint, stating that beneficiaries and their representatives frequently have no idea if a plan has received and is addressing the complaint.

Response: We appreciate the support for our proposal. We agree that establishing clear timelines for MA plans, Cost plans, PACE organizations and Part D plans to respond to CTM complaints is important.

Comment: A few comments supported the proposal and suggested that CMS adopt measures to promote greater transparency and accountability for beneficiary and provider complaints. Specifically, they suggested making CTM complaints publicly available on Medicare Plan Finder or elsewhere, carefully monitoring trends in CTM complaints and use them to focus CMS audits, creating an online portal for all stakeholders to enter complaints about plans, and creating a provider hotline similar to 1–800–MEDICARE specifically for providers to submit complaints.

Response: We appreciate the commenter's support. While the commenter's suggestions are out of scope for the proposed rule, we will consider them as we continue to explore ways to improve transparency and accountability. We already closely monitor CTM complaints and that complaint rates are used to calculate Star Ratings for MA and Part D plans.

Comment: A commenter supported the proposal, but expressed concern that many CTM complaints appear to be the result from MAO attempts to shield denials of coverage from review by the Independent Review Entities (IREs) that handle reconsiderations of adverse appeals and coverage determination decisions by MAOs and Part D sponsors. The commenter was particularly concerned that CMS does not appear to have an effective mechanism to monitor what should have been sent to the IRE for review but was not.

Response: This comment is out of scope for this proposal, but we appreciate the commenter's concern. We agree it is critical for MAOs, Part D sponsors and cost plan organizations (which must comply with the MA appeal regulations per § 417.600) to send all of the cases to the IRE that should be sent to the IRE. See section VII.E of this rule for a discussion of our revision to the process for identifying data completeness issues at the IRE and calculating scaled reductions for the Part C appeals measures to help ensure that all of the cases that should be sent to the IRE are sent.

Comment: A commenter expressed concern with CMS's statements that CTM complaints must be handled as appeals or grievances when appropriate. The commenter stated that treating all CTM complaints as appeals or grievances would result in conflicting timeframes for resolution and duplicative communications to members. The commenter requested clarification of whether CMS expects all complaints to be treated as appeals or grievances and, if not, whether complaints that are appeals or grievances would be held to the CTM timeframes in addition to the appeals and grievance timeframes.

Response: We understand the commenter's concern. We wish to clarify that CTM complaints should only be treated as appeals or grievances when they otherwise meet the definition of appeals or grievances under the applicable regulations. We note that MA and Part D appeals and grievances must be resolved ''as expeditiously as the case requires'' and that this would require resolution of the appeal or grievance within the proposed timeframe for immediate need and urgent complaints if the appeal or grievance involved a service or drug for which the beneficiary has a need that meets the definition of ''immediate need'' or ''urgent'' that we proposed and are finalizing in §§ 422.125 and 423.129. See §§ 422.564(e)(1), 422.630(e) and 423.564(e)(1) regarding the timeline for responses to enrollee appeals and grievances. Although the regulations at §§ 422.564(e)(2), 422.630(e)(2), and 423.564(e)(2) permit the 30-day timeframe resolution of grievances to be extended by up to 14 days if the enrollee requests the extension or if the organization justifies a need for additional information and documents how the delay is in the interest of the enrollee, the stricter timing requirements for CTM complaints addressed in §§ 422.125 and 423.129

will control where a CTM complaint has been filed.

Similarly, PACE service determinations and appeals must be resolved as ''expeditiously as the participant's condition requires'', but no later than three days after the request is received for service determinations, 30 days after the request is received for appeals, and 72 hours after the appeal request is received for expedited appeals. See §§ 460.121(i), 460.122(c)(6), and 460.122(f) regarding the timelines for response to PACE participant service determination requests and appeals and the definition of expedited appeals. Pursuant to provisions of this rule, PACE grievances must also be resolved as ''expeditiously as the case requires,'' but no later than 30 calendar days after the PACE organization receives the grievance. See section XI.H of this rule, adopting changes to § 460.120, including a timeline for resolution of PACE grievances at § 460.120(g). Immediate need complaints that also qualify as PACE grievances, service determination requests, appeals, or expedited appeals therefore need to be resolved within two days under both PACE requirements and the requirements of this rule. Although the regulations at §§ 460.121(i)(1) and 460.122(f)(3) allow the timeline for resolution of service determination requests and expedited appeals to be extended by five days or 14 days, respectively, under certain circumstances, the stricter timing requirements for CTM complaints addressed in §§ 422.125 and 423.129 will control where a CTM complaint has been filed in the same way they would for MA and Part D grievances.

Because existing CMS regulations explicitly permit extension for MA and Part D appeals and grievances, we do not think it is appropriate to penalize an organization for extending the resolution of a non-immediate need and non-urgent CTM complaint that meets the definition of an MA or Part D appeal or grievance. Therefore we are adding a new paragraph (4) to §§ 422.125(b) and 423.129(b) to allow organizations to extend the timeline to respond to a CTM complaint if the complaint is also a grievance within the scope of §§ 422.564, 422.630 or 423.564 *and* if it meets the requirements for an extension of time under §§ 422.564€(2), 422.630(e)(2), or 423.564(e)(2) as applicable. (Depending on the type of organization—MA plan, applicable integrated plan, Part D plan, or cost plan the specific regulation that governs the time frame for responding to a grievance will vary.) This extension will not be available for any complaint that meets the definition of an immediate need complaint or urgent complaint or that requires expedited treatment under §§ 422.564(f), 422.630(d), or 423.564(f) because such a delay would present an unacceptable risk of harm to the beneficiary. PACE organizations are not permitted to extend the 30-day timeframe for resolution grievances under the revisions to § 460.120 finalized in this rule or for non-expedited appeals under § 460.122(c)(6) and service determinations must be resolved within eight days even with the permitted five-day extension under § 460.121(i), so it is not necessary to allow an extension of the 30-day timeline for non-immediate need and non-urgent complaints that also qualify as PACE grievances, service determination requests, or appeals.

We also acknowledge the potential conflict between the timelines for resolving immediate need complaints or urgent complaints and the requirement for organizations to respond within 24-hours to MA and Part D grievances that meet the definition of ''expedited grievances'' under §§ 422.564(f), 422.630(d), and 423.564(f). Similarly, there is a potential conflict between the timeline for resolving urgent complaints and the three days and 72 hours permitted to respond to PACE service determination requests and expedited appeals under §§ 460.121(i) and 460.122(f)(2). We did not intend to allow organizations to take longer to resolve an expedited MA or Part D grievance or PACE service determination request or expedited appeal than is currently required under the regulation merely because the grievance, service determination request, or appeal was received as a CTM complaint. Therefore, we are adding a new paragraph (5) to §§ 422.125(b) and 423.129(b) to make clear that organizations must comply with the shortest applicable timeframe for resolving a CTM complaint when the complaint also qualifies as a grievance, PACE service determination request, or PACE appeal. By shortest applicable timeframe, we mean the timeframe that (1) applies under this new CTM provision for the type of complaint (that is, immediate need complaint, urgent complaint, or other type of CTM complaint), the grievance regulation (that is §§ 422.56, 422.630, 423.564, or 460.120), or the PACE service determination or appeals regulation (that is §§ 460.121 or 460.122) and (2) is the shortest of those two applicable time frames. So, if a CTM complaint qualifies as both an urgent complaint and an expedited MA or Part D grievance, the organization responsible for responding to the complaint would be required to do so within 24 hours, as required by §§ 422.564(f), 422.630(d), and 423.564(f), and not within the seven days permitted under §§ 422.125(b)(2) and 423.129(b)(2) for urgent complaints. Similarly, with respect to the requirement for organizations to contact the individual making the complaint in the CTM within a specific timeframe, we expect that organizations will meet this timeframe for CTM complaints that also meet the definition of MA, Part D, or PACE grievances. To the extent that the requirement in §§ 422.564(b) and 423.564(b) to ''promptly inform the enrollee whether the complaint is subject to its grievance procedures or its appeals procedures'' would permit organizations to take longer than seven days to notify enrollees, §§ 422.125(c) and 423.129(c) would nevertheless require organizations to contact individuals who file a complaint that qualifies as a grievance in the CTM within seven days.

Comment: A commenter recommended shorter timeframes for resolving complaints submitted in the CTM. The commenter urged CMS to require that immediate need complaints be resolved within 24 hours and that all other cases be resolved within 72 hours. The commenter noted that this would reflect timelines for the appeals processes for Part B drugs and Part D benefits, which require that decisions be made ''as soon as the beneficiary requires'' but not later than 72 hours for standard requests (§§ 422.568 and 423.568) and 24 hours for expedited requests (§§ 422.572 and 423.572). The commenter noted that a seven-day resolution timeline for urgent complaints in which patients have three to fourteen days of treatment left would potentially leave patients without needed care for four days.

Response: We acknowledge that some complaints may require quicker resolution than the timeframes currently required for CTM complaints. As previously discussed, we expect organizations to treat complaints that meet the definition of appeals or grievances in a manner consistent with the requirements prescribed in the regulation for handling appeals and grievances. When a CTM complaint is actually an appeal, the organization must comply with the appeal regulations; nothing in the new regulations we are finalizing to address handling of CTM complaints changes or creates an exception to the appeal regulations that apply to cost plans, MA plans (including applicable integrated plans), Part D plans or PACE

organizations. We are finalizing a new paragraph (b)(4) as part of §§ 422.125 and 423.129 to make clear that organizations should comply with the shortest timeline called for in the applicable regulations when the timeliness requirements related to CTM complaints and grievances both apply. Therefore, an organization would have to respond to an immediate need complaint that also meets the definition of an expedited grievance within the 24 hours required by §§ 422.564(f), 422.630(d), or 423.564(f). Similarly, if an urgent complaint meets the definition of a grievance under §§ 422.561 and 423.560, or a PACE service determination request or appeal under §§ 460.121 and 460.122, and involves a beneficiary with only four days of medication remaining, the organization would be required to resolve the issue within four days because §§ 422.564I(1), 422.630(e), 423.564(e)(1), 460.121(i), and 460.122(c)(6) require organization notify an enrollee of its decision on a grievance (or PACE service determination request or appeal) ''as expeditiously as the case requires'' based on the enrollee's health status.

The resolution timeframes of two days for immediate need complaints, seven days for urgent complaints, and 30 days for all other CTM complaints have been in effect for many years and we do not have evidence that beneficiaries entitled to quicker resolutions under the regulations for grievances have had those resolutions delayed as a result. We are finalizing the resolution timeframes for CTM complaints as proposed in §§ 422.125 and 423.129 with the modifications described for §§ 422.125(b)(4) & (5) and 423.129(b)(4) & (5), but we will continue to monitor CTM complaint resolutions and appeals and grievances procedures and records for evidence that the CTM resolution timeframes are causing unnecessary delays in the resolution of appeals and grievances.

Comment: A commenter supported the proposed requirement to contact complainants within three days of filing a CTM complaint but recommended that CMS require organizations to provide beneficiaries with the CTM complaint ID number in addition to the plan contact information. The commenter also recommended that CMS require plans to document the contact within one to two business days of making the contact.

Response: We appreciate the commenter's support. We agree that organizations should provide the complainant with the CTM complaint ID number when reaching out to them regarding the complaint. However, we do not believe that it is necessary to codify this expectation at this time. Individuals filing CTM complaints receive the complaint ID number when they call 1–800–MEDICARE, and we do not think organizations reaching out to complainants would ordinarily fail to provide this information when contacting the individual to update them on the status of the complaint. We also agree that organizations should update the CTM promptly when contacting complainants and resolving complaints. We currently monitor CTMs on an ongoing basis and our experience is that organizations meet this expectation. Therefore, we do not believe that it is necessary to codify this expectation at this time.

Comment: A commenter noted that their State guidance requires health plans to acknowledge a complaint within ten days. They questioned whether there was a way to align the CMS requirement with the State requirement.

Response: We recognize that States may have different expectations with respect to handling complaints. However, State insurance laws other than licensure and solvency do not apply to MA plans under section 1856(b)(3) of the Act, and we do not believe that it is necessary or practical to allow organizations a longer time to contact complainants or resolve complaints merely because a State may permit longer timeframes for other types of health plans. We expect and will continue to expect MA plans, cost plans, Part D plans, and PACE organizations to meet the federal timeframes for beneficiary contact and complaint resolution adopted here (or in other applicable laws).

Comment: A commenter was generally supportive of the proposal but noted that complaints related to D–SNPs may require action from State Medicaid agencies, which may require longer to resolve. The commenter recommended that CMS modify the proposal to account for the need to involve State Medicaid agencies in the resolution of D–SNP complaints.

Response: We appreciate the commenter's support and acknowledge that some complaints for D–SNPs may require action by or input from State agencies or others that are not bound by CMS requirements. However, we do not believe a modification related to potential involvement of a State Medicaid agency to the requirements we proposed and are finalizing in this rule is necessary. Some CTM complaints have always required action by or input from outside agencies. This has not caused any significant delays in complaint resolution. Our experience is that most States recognize the need to resolve urgent complaints and immediate need complaints quickly and that States rarely take longer than 30 days to respond to other complaints. Isolated complaints may take longer to resolve as a result of inaction by outside agencies, but we do not believe that it is necessary to extend the timeframe for resolution to account for these outlier events. Rather, we will continue to exercise its discretion to take into account such outliers when determining whether compliance or enforcement actions are necessary in a particular circumstance.

Comment: A few commenters expressed concern that CMS would expect organizations to actually make contact with beneficiaries within the required timeframes, rather than requiring them to attempt to make contact. They requested that CMS clarify whether an attempt to make contact within the specified timeframe would satisfy the requirement. They also requested that CMS clarify the means by which the organization make contact.

Response: We recognize that beneficiaries are not always available to receive calls when plans reach out to them. We are therefore finalizing the proposed regulations at §§ 422.125(c) and 423.129(c) rule with a modification to clarify that organizations *attempt* to make contact with individuals filing complaints in the CTM within the specified timeframe. We believe that this ensures that plans will reach out to complainants in a timely manner without creating an unrealistic expectation that plans be able to reach complainants who may not be available to receive calls or other communications within the specified timeframes.

We also recognize that plans have many ways to contact beneficiaries, including by phone or mail. We expect plans to attempt to contact complainants regarding time sensitive matters by the most expeditious means available. We also expect that plans would generally use the same method to reach out to complainants as the complainants used to file complaints. Generally, this would require that plans attempt to contact complainants by phone, since this is the way the vast majority of complaints are made and the quickest way to reach individuals in real time. Our experience operating the CTM indicates that organizations do attempt to contact complainants by phone. We therefore do not believe that it is necessary to explicitly codify this expectation at this time. However, we

will continue to monitor CTM complaints to ensure that organizations continue to observe best practices for reaching out to complainants.

Comment: Several commenters requested greater flexibility in the timeframes for resolving CTM complaints and reaching out to individuals filing complaints. Some requested that CMS use a business day standard rather than a calendar day standard, stating that it would allow PACE organization to better manage communications outside of weekends and holidays. One commenter suggested extending the time period for contacting a complainant to five calendar days as an alternative to a business day standard to balance the need for timely communication against PACE organizations' need for flexibility. Another commenter was concerned that contacting the complainant within three calendar days of filing a complaint does not guarantee that the individual will get meaningful feedback and may result in beneficiary confusion regarding the status of their complaint. Some commenters believe that requiring contact within three calendar days for a complaint that MAOs and Part D sponsors have 30 days to resolve would negatively impact the resources needed to investigate and resolve immediate need and urgent cases. They noted that they already strive to reach out within four to seven days for urgent and uncategorized complaints. One commenter also noted that beneficiaries often express frustration with receiving calls at inopportune times, such as on holidays, especially when the complaint is not an immediate need complaint.

Response: We appreciate the commenters' desire for greater flexibility and the difficulty plans may experience in meeting a 3-calendar day timeframe for reaching out to beneficiaries. However, we do not believe that switching from a calendar day to a business day standard would be the best way to balance the needs of the beneficiary for transparency with the plans' needs for flexibility. The need for health care services can occur at any time, regardless of holidays or business schedules. Moreover, different states and territories celebrate different holidays, making it difficult for us to hold plans accountable to a uniform standard that is based on business days. We have long applied a calendar day standard to requirements related to complaints, as well as to appeals and grievances. It would therefore be inconsistent to switch to a business day standard when codifying CTM resolution requirements.

We also do not share the commenter's concern that contacting complainants before a complaint has been resolved would be premature or confusing. As discussed previously, one of the major purposes of requiring organizations to contact individuals filing complaints before the complaint has been resolved is to ensure that the complainant knows that the organization has received and is working to resolve the complaint. We do not believe such communications would be confusing for beneficiaries.

However, we do recognize that a three-calendar day requirement to contact beneficiaries is a new requirement that may prove difficult for organizations to adhere to and that it may not significantly improve the beneficiary experience such that burden is sufficiently outweighed. Based on these comments, we are finalizing a slightly longer deadline by which organizations must attempt to contact individuals filing non-immediate need complaints as finalized §§ 422.125(c) and 423.129(c) require organizations to attempt to contact the complainant within 7 calendar days of the organization being assigned the complaint from the CTM. We believe that this strikes a balance between providing individuals timely information regarding the handling of their complaints with plans' valid concerns about being able to meet a shorter timeframe. We also believe that this will address commenter's concerns about the difficulty of contacting beneficiaries on non-business days—it is unusual for an organization to have more than two or three consecutive non-business days in a 7-day period, so organizations should be able to meet the longer 7-day timeframe regardless of whether a complaint was received immediately before a weekend or holiday.

Final Decision: We thank commenters for their input. We note that comments were generally supportive, with many commenters representing plans requesting more flexibility and some commenters representing beneficiaries and providers requesting more stringent requirements and improved transparency. We received several comments requesting greater public transparency for CTM complaints and increased scrutiny of plans' handling of appeals and grievances that were out of scope for the proposal, but which we will take into account as we continue to monitor plan performance in these areas. Based on the comments received and for the reasons outlined in the proposed rule and our responses to comments, we are finalizing the proposed rule with four significant modifications: (1) changing the requirement to make contact to a requirement to attempt contact, (2) adding language that permits the extension of time to resolve non-immediate need and non-urgent complaints that also qualify as non-expedited grievances in a manner consistent with the extension permitted for grievances under §§ 422.564, 422.630, and 423.564, (3) adding language that requires organizations to adhere to the shortest timeframe required by the regulation for CTM complaints and grievances when a CTM complaint also qualifies as a grievance; and (4) requiring that organizations contact individuals filing complaints within 7 calendar days rather than 3 calendar days.

N. Changes to an Approved Formulary—Including Substitutions of Biosimilar Biological Products (§§ 423.4, 423.100, 423.104, 423.120, 423.128, and 423.578)

Section 1860D–11(e)(2) of the Act provides that the Secretary may only approve Part D plans if certain requirements are met, including the provision of qualified prescription drug coverage. Section 1860D–11(e)(2)(D) of the Act specifically permits approval only if the Secretary does not find that the design of the plan and its benefits, including any formulary and tiered formulary structure, are likely to substantially discourage enrollment by certain Part D eligible individuals. Section 1860D–4(c)(1)(A) of the Act requires ''a cost-effective drug utilization management program, including incentives to reduce costs when medically appropriate.'' Lastly, section 1860D–4(b)(3)(E) of the Act requires Part D sponsors to provide ''appropriate notice'' to the Secretary, affected enrollees, physicians, pharmacies, and pharmacists before removing a covered Part D drug from a formulary or changing the preferred or tiered cost-sharing status of such a drug.

In section III.Q., Changes to an Approved Formulary, of the December 2022 proposed rule, we proposed regulations related to (1) Part D sponsors obtaining approval to make changes to a formulary already approved by CMS, including extending the scope of immediate formulary substitutions (also generally referred to as immediate substitutions herein);[45] and (2) Part D

[45] In the subsequent November 2023 proposed rule, we noted the distinction between formulary substitutions made by a plan sponsor and product substitutions made by a pharmacist at the point of dispensing. As we described in section III.F.2.a.(2) of the November 2023 proposed rule, state laws

Continued

sponsors providing notice of such changes.

For reasons discussed therein, the December 2022 proposed rule proposed regulatory changes on how to obtain approval to make changes to a formulary already approved by CMS and to provide notice of such changes. We proposed to codify, with some revisions, longstanding sub-regulatory guidance and terminology specifying when and how Part D sponsors can obtain approval to make negative formulary changes and the enrollees to whom these changes would apply.

Approval of formulary changes: Specifically, we proposed to codify our existing practice with respect to CMS review and approval of negative formulary changes by proposing in § 423.120(e) that Part D sponsors may not make any negative formulary changes to the CMS-approved formulary except as specified in the regulation. We proposed to codify longstanding policy at proposed § 423.120(e)(3)(i), to permit each Part D sponsor that has submitted a maintenance change request to assume that CMS has approved the request if it does not hear back from CMS within 30 days of submission, and at § 423.120(e)(3)(ii) to specify that Part D sponsors must not implement any non-maintenance changes until they receive notice of approval from CMS. We also proposed to codify our longstanding policy that affected enrollees are exempt from approved non-maintenance changes for the remainder of the contract year at § 423.120(e)(3)(ii).

In support thereof, we proposed to define ''negative formulary changes'' to Part D drugs in § 423.100 to include drug removals, moves to higher cost-sharing tiers, and adding or making more restrictive prior authorization (PA), step therapy (ST), or quantity limit (QL) requirements. We proposed to specify that negative formulary changes can be classified in one of three categories, which we also proposed to define in that same section as—

- ''Maintenance changes,'' which we proposed to define to encompass seven types of changes including drug substitutions that do not meet our requirements of immediate substitutions under § 423.120(e)(2)(i); changes based on particular events such as certain FDA actions, long-term shortages, and new clinical guidelines or information, or to promote safe utilization; or adding PA to help determine Part B versus Part D coverage;
- ''Non-maintenance changes,'' which we proposed to define as negative formulary changes that are not maintenance changes or immediate negative formulary changes; or
- ''Immediate negative formulary changes,'' a newly coined term that we proposed to encompass all types of immediate substitutions or market withdrawals under § 423.120(e)(2)(i) or (ii) respectively.

As an exception to the general rule requiring prior CMS approval of formulary changes, our current regulations permit immediate generic substitutions and the removal of drugs ''deemed unsafe'' by FDA or ''removed from the market by their manufacturer.'' We proposed in the December 2022 proposed rule to move and incorporate that regulation text as follows: In § 423.120(e)(2)(i), we proposed to permit ''immediate substitutions,'' meaning Part D sponsors could make immediate generic substitutions as well as substitute a new ''interchangeable biological product'' for its corresponding reference product; a new ''unbranded biological product'' for its corresponding brand name biological product; and a new ''authorized generic'' for its corresponding brand name equivalent. We proposed to support this proposal by defining the above quoted terms in § 423.4; identifying the corresponding relationships (including the previously permitted generic substitutions) in our definition of a ''corresponding drug'' in § 423.100; and also defining ''biological product,'' ''brand name biological product,'' and ''reference biological product'' in § 423.4. In proposing in § 423.120(e)(2)(ii) to continue to permit plans to immediately remove from their formulary any Part D drugs deemed unsafe by FDA or withdrawn from sale by their manufacturer, we proposed to newly describe these changes as ''market withdrawals.'' Under § 423.120(e)(2), as proposed in the December 2022 proposed rule, Part D sponsors meeting our requirements for immediate substitutions and market withdrawals would be able to make these changes immediately without submitting negative change requests to CMS. However, proposed § 423.120(f)(2) and (3) would require Part D sponsors to provide advance general notice of such changes and to submit specific changes with their next required or scheduled CMS formulary updates.

We proposed in respective §§ 423.120(b)(3)(i)(B) and 423.120(e)(4) to conform our regulations such that the same transition and timing rules would apply for all immediate negative formulary changes: as proposed, all immediate negative formulary changes could take place at any time (previously this exception only applied to immediate generic substitutions and market withdrawals) and Part D sponsors would not need to provide a transition supply (previously we only specified in regulation that this exception applied to immediate generic substitutions).

We also proposed to update and move to a new place the current regulation at § 423.120(b)(6), which prohibits Part D sponsors from making certain changes from the start of the annual enrollment period to 60 days after the beginning of the contract year. We proposed to update such regulation at § 423.120(e)(4) to specify that plans cannot make negative formulary changes during the stated time period except, as noted earlier, for immediate negative formulary changes (that is, immediate substitutions or market withdrawals).

We also proposed miscellaneous changes in § 423.100 in support of the previously described changes, including updating the definition of ''affected enrollee'' to encompass beneficiaries affected by all negative formulary changes and moving our current regulatory description of ''other specified entities'' from § 423.120(b)(5)(1) to be a standalone definition of the term in § 423.100.

Permitted formulary changes and the IRA: We also proposed in the December 2022 proposed rule a change related to the Inflation Reduction Act of 2022 (IRA). Section 11001 of the IRA added section 1860D–4(b)(3)(I)(i) of Act to require, starting in 2026, Part D sponsors to include on their formularies each covered Part D drug that is a selected drug under section 1192 of the Act for which a maximum fair price is in effect with respect to the plan year. Section 1860D–4(b)(3)(I)(ii) of the Act clarifies that nothing in clause (i) shall be construed as prohibiting a Part D sponsor from removing such a selected drug from a formulary if such removal would be permitted under § 423.120(b)(5)(iv) or any successor regulation. We proposed to identify § 423.120(e)(2)(i) as the successor regulation to § 423.120(b)(5)(iv) for purposes of section 1860D–4(b)(3)(I)(ii) of the Act.

Notice of formulary changes: We proposed to move, with some revisions and streamlining, current regulations on

govern the ability of pharmacists to substitute biological products at the point-of-dispensing. By contrast, the Secretary's statutory authority under section 1860D–11(e)(2) of the Act governs approval of, and by extension any changes to, Part D formularies. The provisions we describe herein strictly apply to changes to Part D formularies made by plan sponsors, and do not apply to substitutions made by pharmacists at the point of dispensing.

notice of changes, and align them with our proposed approval requirements. Specifically, in § 423.120(f)(1) we proposed to specify that maintenance and non-maintenance negative formulary changes would require 30 days' advance notice to CMS, other specified entities, and in written form to affected enrollees. We proposed to retain and move to § 423.120(f)(1) an alternative option for Part D sponsors to provide a month's supply with notice at the point of sale as specified. We also proposed to move and extend our existing requirements for immediate generic substitutions to include immediate substitutions of corresponding drugs and market withdrawals, by requiring advance general notice of immediate negative formulary changes at § 423.120(f)(2), followed by written retrospective notice required under § 423.120(f)(3) to affected enrollees. We proposed that this retrospective notice be provided to affected enrollees as soon as possible after a specific change, but by no later than the end of the month following any month in which a change takes effect. We proposed at § 423.120(f)(4) to reorganize and renumber our current requirements for the contents of the direct written notice, and to provide more flexibility by no longer restricting appropriate alternative drugs to those in the same therapeutic category or class or cost-sharing tier. Our proposed revision aimed to make clear that the contents of the written notice would be largely the same regardless of the timing: whether Part D sponsors were providing notice before making a particular change (for maintenance and non-maintenance changes under § 423.120(f)(1)) or after (for negative immediate changes under § 423.120(f)(3) as proposed). Section 423.120(f)(5) proposed to newly specify how to provide advance general notice and specific notice of changes other than negative formulary changes.

We also proposed conforming amendments to update § 423.128(d)(2)(iii) to require online notice of ''negative formulary changes'' and to update cross citations in §§ 423.104(d)(2)(iv)(A)(6) and 423.128(e)(6) to reflect the fact we proposed to move the bulk of our requirements on formulary changes from § 423.120(b)(5) and (6) to § 423.120(e) and (f). We proposed to revise text at § 423.120(b)(5) and (6) to indicate that Part D sponsors must provide notice of formulary changes and can only make changes to CMS-approved formularies as specified, respectively, in § 423.120(f) and (e).

After receiving comments on the December 2022 proposed rule, we identified a limited number of changes that we wanted to make to that proposed regulatory text, which we proposed in the November 2023 proposed rule. We noted that the November 2023 proposed rule reflected our intent to consider the formulary change proposals in section III.Q. of the December 2022 proposed rule, as updated by the limited changes proposed in the November 2023 proposed rule, for inclusion in future rulemaking.

In the November 2023 proposed rule, we noted that commenters on section III.Q. of the December 2022 proposed rule did not agree on the requirements that should apply to formulary substitutions of Food and Drug Administration (FDA) approved and licensed biosimilar biological products. Different commenters submitted divergent requests that formulary substitutions of biosimilar biological products other than interchangeable biological products be treated as immediate substitutions, be treated as maintenance changes, or not be permitted whatsoever. Our proposed regulatory text in the December 2022 proposed rule only addressed substitution of interchangeable biological products and unbranded biological products, and did not specify how Part D sponsors could treat substitution of biosimilar biological products other than interchangeable biological products. We stated that we believed, in part because of the interest in the topic, it would be appropriate to propose changes then to solicit comment directly on the subject.

Accordingly, we proposed in the November 2023 proposed rule to update the regulatory text we proposed in the December 2022 proposed rule to the extent necessary to permit Part D sponsors to treat substitutions of biosimilar biological products other than interchangeable biological products as ''maintenance changes,'' as defined in the December 2022 proposed rule. We also proposed to define a new term, ''biosimilar biological product,'' distinct from our previously proposed term ''interchangeable biological product.'' We also proposed some technical changes to the term ''interchangeable biological product.'' We believe these proposals from the November 2023 proposed rule add to the December 2022 proposed rule to increase access to biosimilar biological products in the Part D program, consistent with the Biden-Harris Administration's commitment to competition as outlined in Executive Order (E.O.) 14306: ''Promoting Competition in the American Economy.'' [46]

We specifically proposed to define biosimilar biological products consistent with sections 351(i) and (k) of the Public Health Service Act (PHSA) to include interchangeable biological products. As we noted in section III.F.2.b.(1) of the November 2023 proposed rule, in section III.Q of the December 2022 proposed rule, we originally proposed to permit maintenance changes and immediate substitutions involving interchangeable biological products. In the November 2023 proposed rule, we also proposed to allow substitution of biosimilar biological products other than interchangeable biological products for reference products as a maintenance change. To ensure clarity, we proposed in the November 2023 proposed rule to address the application of these policies to interchangeable biological products and to biosimilar biological products other than interchangeable biological products in separate paragraphs of the proposed definition of maintenance change in § 423.100.

Further, in considering a comment on immediate formulary substitutions we received on the December 2022 proposed rule, we also determined it would be appropriate to propose in the November 2023 proposed rule to provide Part D sponsors with additional flexibility with respect to the timing requirements for maintenance changes and immediate substitutions than as originally proposed in the December 2022 proposed rule. Rather than requiring a Part D sponsor to add a ''corresponding drug'' and make a ''negative formulary change'' (as both such terms are defined in the December 2022 proposed rule) to its related drug ''at the same time'' for a maintenance change, we proposed in the definition of maintenance change in § 423.100(1) in the November 2023 proposed rule to allow Part D sponsors to make a negative formulary change to the related drug within 90 days of adding the corresponding drug. We made similar changes in § 423.100(2) requiring negative formulary changes be made to a reference product within 90 days of adding a biosimilar biological product other than an interchangeable biological product. This means that the same flexibility is available when Part D sponsors make any biosimilar biological product substitutions that are maintenance changes. Lastly, we also

[46] *https://www.whitehouse.gov/briefing-room/presidential-actions/2021/07/09/executive-order-on-promoting-competition-in-the-american-economy/.*

proposed to make similar adjustments to the timing requirements for immediate substitutions of corresponding drugs in § 423.120(e)(2)(i). Specifically, as proposed in the November 2023 proposed rule, Part D sponsors would be able to make negative formulary changes to a brand name drug, a reference product, or a brand name biological product within 30 days of adding a corresponding drug (as such terms are defined in the December 2022 proposed rule, as updated by the November 2023 proposed rule).

Additionally, we also proposed in the November 2023 proposed rule a technical change to our proposed definition of ''corresponding drug'' in § 423.100 included in the December 2022 proposed rule to specify that the reference to an ''unbranded biological product of a biological product'' is intended to refer to ''an unbranded biological product marketed under the same BLA [Biologics License Application] as a brand name biological product.''

Lastly, we proposed in the November 2023 proposed rule to address a technical change to the regulatory text proposed in the December 2022 proposed rule to specify in introductory language to the § 423.100 proposed definition of ''maintenance change'' that maintenance changes apply with respect to ''a covered Part D drug.''

As discussed earlier, we noted in the November 2023 proposed rule that we intended to consider section III.Q. of the December 2022 proposed rule, as updated by the limited proposed changes discussed in that November 2023 proposed rule, for inclusion in future rulemaking. Even though we acknowledged in the November 2023 proposed rule at a high level some comments regarding the December 2022 proposed rule that informed the limited changes we proposed in the November 2023 proposed rule, we stated that if we were to move forward in future rulemaking, we would respond to comments received in response to section III.Q. of the December 2022 proposed rule, as well as comments received in response to the changes proposed in section III.F. of the November 2023 proposed rule. We summarize those comments, and our responses as follows:

Comment: Many commenters voiced general and specific support for the proposals both in the December 2022 and November 2023 proposed rules. Somewhat fewer commenters offered criticism, in whole or in part, including some commenters who generally supported the proposals but had concerns with specific parts.

Response: We thank supporters for their support and all commenters for providing us with their feedback. We address specific comments about the proposals in more detail below.

Comment: Several commenters supported that our proposal in the December 2022 proposed rule codified rules on formulary changes in one place, with a few appreciating the clarity. A few supporters also specifically supported certain proposed definitions such as ''negative formulary change''; ''maintenance change'' and ''non-maintenance change''; and ''affected enrollee.'' Conversely, a few commenters suggested that we change certain definitions (as discussed in specific comments and responses below). Another commenter stated that the policy was too complex and required streamlining rather than a discussion in two preambles, and suggested we use a chart and that we not only explain the relationship of our proposals to Chapter 6 of the Prescription Drug Benefit Manual [47] but also update that manual chapter. A few other commenters stated that the proposed regulation did not conform to the guidance in Chapter 6.

Response: We thank those commenters who supported our proposal and specific definitions. One of our major goals with this proposal was to codify in one place guidance that had long stood apart from related regulations and conform the two in a reorganized regulation. We acknowledge that the policy related to changes to an approved formulary has been and remains intricate and that the December 2022 proposed rule and November 2023 proposed rule addressed a wide range of issues related to formulary changes, including with respect to conforming current regulations and longstanding guidance, while proposing new policies (for example, related to substitutions of biosimilar biological products). We will take the chart suggestion under consideration for any future updates to guidance and Chapter 6, but we do not think that the final rule is the appropriate location for such a chart. Where there is a conflict between the regulations and the manual chapter, the regulations supersede and take precedence. We discuss substantive issues related to interpretations of manual guidance later in these responses.

Comment: A commenter stated that CMS should not distinguish between authorized generic drugs and unbranded biological products in formulary placement policy because they are approved or licensed (respectively) under the same New Drug Application (NDA) or BLA as the brand name drug and, other than the fact that they are not labeled with a brand name on their label, they are the branded product. A product that is identical in all respects because it is approved or licensed under the same NDA or BLA should not be considered a ''negative'' formulary change, immediate or otherwise.

Response: While the commenter is technically correct that we could look at formulary replacement of a branded drug product with its authorized generic or unbranded biological product, as applicable, as not being a formulary change at all, we do not think this would be a meaningful distinction for enrollees.

When an enrollee goes to the pharmacy, they would not know the difference between an authorized generic drug or a generic drug as those terms will be defined in § 423.4. Similarly, if the name changes from the branded biological product to an unbranded biological product licensed under the same BLA, an enrollee might not know the difference between the unbranded biological product and a biosimilar of the branded biological product. Consequently, to avoid enrollee confusion, we are finalizing a rule that treats all these replacements as substitutions.

Comment: A commenter thanked CMS for the steps we proposed to take to eliminate ''barriers'' for patients to access lower-cost treatment options by permitting plans to add biosimilar biological products to formularies as they become available, while another commenter suggested that requiring 30 days' notice before the effective date of maintenance changes was an unnecessary ''barrier'' to patients getting the exact treatment they need.

Response: There have never been any barriers to Part D sponsors adding at any time to their formularies any Part D drugs that they think their enrollees need for treatment (such as new biosimilar biological products) or from adding those drugs on lower cost-sharing tiers or with fewer restrictions than those that apply to related drugs already on the formulary (such as reference products). Our guidance in section 30.3.3.1 of Chapter 6 of the Prescription Drug Benefit Manual states that Part D sponsors may add any Part D drug to their formularies at any time. We note, however, that we have and continue to maintain approval and notice requirements that Part D sponsors must follow when they seek to remove

[47] *https://www.cms.gov/medicare/prescription-drug-coverage/prescriptiondrugcovcontra/downloads/part-d-benefits-manual-chapter-6.pdf.*

a drug or make negative formulary changes to drugs already on the formulary and that enrollees may currently be taking.

Comment: Several commenters stated we should not permit any midyear changes to formularies because enrollees enroll in plans with the expectation that they will have access to the same drugs for the entirety of the plan year and to permit any changes is tantamount to a bait and switch. A few commenters suggested that CMS should not permit any midyear formulary changes because enrollees cannot leave plans midyear, with one commenter requesting a special enrollment period (SEP) for enrollees to join other plans midyear following formulary changes.

Response: We do not agree that formularies should be static for the plan year. As discussed more fully in section III.Q.2.a. of the December 2022 proposed rule, section 1860D–4(b)(3)(E) of the Act itself contemplates that Part D sponsors may make changes to formularies during a plan year. For example, there is a need for certain changes to an approved formulary to reflect the availability of new drug therapies as well as for Part D sponsors to take advantage of opportunities to improve safety and quality and lower costs.

We understand that enrollees sign up for plans with the expectation of continued access to their drugs. Accordingly, we have established, and are codifying in this final rule, approval and notice requirements for different kinds of formulary changes. We are permitting the following changes to drugs currently provided on a formulary: (i) immediate substitutions of corresponding drugs, such as new generic drugs for brand name drugs and interchangeable biological products for reference products; (ii) immediate removal of drugs withdrawn from sale by their manufacturer or that FDA determines to be withdrawn for safety or effectiveness reasons; (iii) maintenance changes, which include substitutions of generic drugs for brand name drugs that are not being made on an immediate substitution basis; substitutions of interchangeable biological products for their reference products; and removals based on long term shortage and market availability; (iv) non-maintenance changes, which can only be made if CMS provides explicit approval and which do not apply to enrollees currently taking the applicable drug; and (v) enhancements to the formulary (for instance, Part D sponsors can add a drug to the formulary or lower its cost-sharing), which can be made at any time.

We believe these requirements strike the appropriate balance between protecting enrollees by ensuring they have adequate notice of changes to their plan's formulary, while ensuring Part D sponsors have the flexibility to ensure formularies reflect the latest market developments and clinical guidelines. We monitor negative change request submissions and changes to HPMS formularies as a matter of standard operations, and we are not aware of widespread complaints from beneficiaries stating they have been subject to formulary changes without proper notice. Part D sponsors submit all maintenance and non-maintenance changes to CMS for approval and, even if approved, non-maintenance changes do not apply to enrollees currently taking a drug for the remainder of the plan year. In addition, enrollees can avail themselves of the formulary exception process if the enrollee or their physician believes it is necessary that the enrollee remain on a drug that is subject to a midyear change. The request for a SEP based on a midyear formulary change is out of scope.

Comment: A few commenters specifically supported the time periods within which we required specific notice. A few other commenters pointed to the fact that section 30.3.4.1 of Chapter 6 of the Prescription Drug Benefit Manual requires 60 days' advance direct notice and asked that we conform any final regulation to that guidance.

Response: We appreciate commenters' support for the specific notice time periods that we proposed. Our intent in the December 2022 proposed rule was to codify much of our longstanding guidance. However, while Chapter 6 of the Prescription Drug Benefit Manual specifies a requirement for 60 days' advance direct notice, the current § 423.120(b)(5)(i) has required Part D sponsors to provide 30 days' notice rather than 60 days' notice for formulary changes since the effective date of the ''Medicare Program; Contract Year 2019 Policy and Technical Changes to the Medicare Advantage, Medicare Cost Plan, Medicare Fee-for-Service, the Medicare Prescription Drug Benefit Programs, and the PACE Program'' final rule, which appeared in the April 16, 2018 **Federal Register** (hereinafter referred to as the April 2018 final rule). Where there is a conflict between the regulations and the manual chapter, the regulations supersede and take precedence. The same considerations for adopting a 30-day requirement that we discussed in the November 2017 proposed rule titled ''Medicare Program; Contract Year 2019 Policy and Technical Changes to the Medicare Advantage, Medicare Cost Plan, Medicare Fee-for-Service, the Medicare Prescription Drug Benefit Programs, and the PACE Program,'' which appeared in the November 28, 2017 **Federal Register** (82 FR 56413) (hereafter referred to the November 2017 proposed rule), and which led us to finalize the April 2018 final rule, strike us as applicable today. Additionally, we have several years of operational experience with the requirements of the April 2018 final rule, for which we have not received widespread complaints.

As discussed in section II.A.14 of the November 2017 proposed rule, we believe the 30 days' notice provides the necessary beneficiary protections and affords enrollees sufficient time to either change to a covered alternative drug or to obtain needed prior authorization or an exception for the drug affected by the formulary change. CMS regulations establish robust beneficiary protections in the coverage determination and appeals processes. CMS requires at § 423.568(b) that standard coverage determinations are completed within 72 hours and at § 423.572(a) that expedited coverage determinations for exigent circumstances are completed within 24 hours. If an initial coverage determination is unfavorable, the enrollee or prescriber can request a standard redetermination, which in accordance with § 423.590(a) must be completed within 7 days of receipt of the request, or an expedited redetermination, which in accordance with § 423.590(d)(1) must be completed within 72 hours. (See a later response addressing comments supporting and opposing the advance direct notice requirements we would require for Part D sponsors seeking formulary to substitution of biosimilar biological products for reference products as maintenance changes.)

Comment: A commenter suggested that we no longer require any notification of immediate substitutions because it would be confusing to send a notice about a change that already took effect. In contrast, another commenter suggested that permitting sponsors to provide notice as late as almost two months after an immediate formulary substitution takes effect is too long a time period and asked that we not finalize the requirement to provide notice ''no later than the end of the month following any month in which a change takes effect.'' They suggested that such notice be provided on or before the effective date of the change. A few other commenters recommended that there should be advance direct notice for any changes made to a

formulary, including immediate substitutions.

Response: We disagree with the suggestion to do away entirely with requiring direct notice to affected enrollees of immediate substitutions. It is still important that affected enrollees learn about formulary changes made to the drugs they take, even in the context of immediate substitutions that may have already taken effect. For immediate substitutions, under proposed § 423.120(f)(2), and under current § 423.120(b)(5)(iv)(C), permitting immediate substitutions of generic drugs for brand name drugs, Part D sponsors must provide advance general notice in beneficiary communications materials describing the types of changes that can be made without giving advance direct notice of specific changes, including to enrollees currently taking a drug subject to substitution. Part D sponsors must specify in this advance general notice that affected enrollees will receive direct notice of any specific changes made to drugs they take, which may arrive after the change is effective, and that will explain steps they may take to request coverage determinations, including exceptions. Proposed § 423.120(f)(3) and current § 423.120(b)(5)(iv)(E) require that Part D sponsors provide retrospective direct notice to affected enrollees. Additionally, § 423.128(d)(2)(ii) requires Part D sponsors to update their online formulary monthly. However, we decline to require that notice be provided in advance or at the same time as the effective date of an immediate substitution. A central reason that we do not require advance direct notice of specific changes in these cases is to support and encourage Part D sponsors to add corresponding drugs to their formularies as soon as possible. We are not aware of a notable volume of enrollee complaints related to the notice requirements for immediate substitutions of generic drugs under the current § 423.120(b)(5)(iv), which we finalized in the April 2018 final rule to permit Part D sponsors to send retrospective direct notice of immediate generic substitutions to affected enrollees after such changes take effect. We do not believe that extending similar rules to immediate substitutions of authorized generics, interchangeable biological products, and unbranded biological products will have different results for enrollees and, therefore, we decline to change that regulation now or to require different notice requirements for immediate substitutions of products that qualify as corresponding drugs other than generics.

Comment: A commenter stated that there was a technical error in our definition of maintenance change proposed in § 423.100 because it failed to indicate that corresponding drugs must be newly available to align with sub-regulatory guidance at Chapter 6, section 30.3.3.1, of the Prescription Drug Benefit Manual, which the commentor interprets as requiring that maintenance changes involving brand-name drugs being substituted with generic drugs to be limited to newly available generic drugs only.

Response: The comment pointing to a technical error with respect to maintenance changes misinterprets our guidance. While section 30.3.3.1 of Chapter 6 provides an example of a maintenance change involving a new generic drug, our sub-regulatory guidance has not limited maintenance changes to only newly approved generic drugs. Notably, section 30.3.3.2 states that ''CMS will generally give positive consideration to the following types of formulary changes'' including ''[r]emoval or placement in a less preferred tier of a brand name drug upon the availability and addition of an A-rated generic or multi-source brand name equivalent, at a tier with lower cost to the beneficiary.'' It does not require that generic drugs added to the formulary as part of maintenance changes be newly available. However, to make an immediate substitution, the generic drug being added to the formulary must be newly available.[48] Although some sponsors might choose to make maintenance changes only to substitute newly marketed generics, we do not want to preclude sponsors from making maintenance changes to add generics that are not newly available because there are other appropriate factors that Part D sponsors could consider when determining when to make such formulary substitutions. For example, a Part D sponsor might not make a formulary substitution when a generic first becomes available on the market because there may not be a significant price difference between the first generic and brand name drug. However, as more generics are introduced to the market, the price of all generic drugs may decrease to the point a Part D sponsor could later decide a formulary change would be advantageous.

Comment: A few commenters supported all or parts of our proposal, as updated in the November 2023 proposed rule, to require Part D sponsors to remove, or otherwise apply a negative formulary change to, a brand name drug, reference product, or brand name biological product within 30 days of adding a corresponding drug as part of an immediate substitution (under proposed § 423.120(e)(2)(i)) or within 90 days of adding a corresponding drug or biosimilar biological product as part of a maintenance change (under subparagraphs (1) and (2), respectively, of the proposed § 423.100 definition of maintenance change). A few commenters did not support the change as proposed but had differing views on what the policy should be. One commenter stated that we must continue to require immediate substitutions to take place ''at the same time'' because there was no evidence that the existing requirement created a problem that needs to be fixed. A few other commenters asked that we provide more time than a 30- or 90-day window within which to apply a negative formulary change to a brand name drug or reference product after adding a corresponding drug or biosimilar biological product other than an interchangeable biological product to the formulary. Another commenter said that we should apply the same 90-day window to both types of changes because implementing different time frames within which to complete immediate substitutions and maintenance changes could be burdensome for Part D sponsors and confuse enrollees, pharmacies, and providers. Another commenter stated that the 30- and 90-day windows did not provide enough time for Part D sponsors to evaluate new products' attributes and availability in the marketplace, update systems, and consider market condition for pricing changes (for instance, whether a generic price will drop even more after additional entries). Another commenter asked that we monitor this flexibility on an annual basis to ensure providing more time to complete immediate substitutions would not permit Part D sponsors to game the system by delaying coverage for generic drugs.

Response: We appreciate comments on both sides of the issue. We think 30- and 90-day limits to make negative formulary changes after adding a drug as part of an immediate substitution or maintenance change under

[48] Section 423.120(b)(5)(iv) requires in part that, ''The Part D sponsor previously could not have included such therapeutically equivalent generic drug on its formulary when it submitted its initial formulary for CMS approval consistent with paragraph (b)(2) of this section because such generic drug was not yet available on the market.'' In the proposed regulatory reorganization, this requirement would appear at § 423.120(e)(2)(i) and would apply to immediate substitutions of corresponding drugs.

§ 423.120(e)(2)(i) or subparagraphs (1) and (2) of the definition of a maintenance change in § 423.100, respectively, are reasonable. As for evidence to support our proposal, we proposed these flexibilities in our November 2023 proposed rule in response to a comment we received in response to our December 2022 proposed rule that stated it was difficult to make substitutions ''at the same time''. The commenter suggested that while they could quickly add a drug to the formulary, before removing or making negative formulary changes to a drug currently on the formulary they needed time to, for instance, evaluate new product attributes such as formulation, interchangeability, and pricing; determine sufficient availability in the marketplace; communicate changes; and update systems. In response to our November 2023 proposed rule, the original commenter repeated its concerns and a couple of other commenters also asked for more time. Additionally, a couple of commenters specified that they supported the 90-day window. We believe these comments, as well as our appreciation of formulary management considerations and the practicalities of programming internal systems, provide sufficient evidence to support the proposed timeframes.

To respond to commenters to the November 2023 proposed rule that asked for longer times frames within which to make negative changes to the drug on the formulary, the purpose of immediate substitutions is to support quick action, in which Part D sponsors put a newer corresponding drug on the formulary right away and remove the drug it replaces as soon as possible. To encourage this quick action, we permit Part D sponsors implementing immediate substitutions to provide notice to affected enrollees of the specific changes after they have taken effect. For that reason, we continue to encourage that immediate substitutions take place ''at the same time.'' Extending the time within which to remove a brand name drug, brand name biological product, or reference product past 30 days would negate the concept of an ''immediate'' change.

While maintenance changes are not as urgent a matter, it would be challenging for CMS to monitor negative formulary changes that take place more than 90 days after adding a corresponding drug or biosimilar biological product other than an interchangeable biological product.[49] Further, the more days that pass after a Part D sponsor adds a replacement drug and before it removes or makes another other negative formulary change to the drug on the formulary it will replace, the more the two actions seem less like a substitution of one drug for another so much as two unrelated formulary changes.

In response to the concern that implementing different time frames to make immediate substitutions versus maintenance changes creates a burden for Part D sponsors, they are not required to take advantage of the flexibility offered. The respective 30- and 90-day timeframes to make a negative formulary change after adding a corresponding drug to the formulary are limits, not requirements. Under the proposal, a Part D sponsor could decide to ensure all immediate substitutions and maintenance changes take place ''at the same time.''

We have carefully considered the commenter's concern that implementing different windows could confuse enrollees, providers, and pharmacies. It is possible that Part D sponsors are currently removing brand name drugs after the date they add corresponding generic drugs. As discussed in our November 2023 proposed rule, there has been a longstanding operational limitation that Part D sponsors remove a brand name drug from the formulary within 90 days of adding a generic drug. We also do not believe that enrollees will be aware of the exact moment that a Part D sponsor decides to add a drug. Rather, affected enrollees will most likely learn that their plan will be making, or already has made, a formulary substitution either when they receive direct notice or request a refill on a brand name drug or reference product. We are not aware that the current limitation has resulted in undue confusion and do not expect that to be the case with this rule. We will also continue to review beneficiary complaints in our Complaint Tracking Module, should any complaints arise related to confusion about the different timeframes.

Lastly, we do not believe that monitoring immediate substitutions on an annual basis would provide a means to determine or address if Part D sponsors are gaming the system by delaying coverage for generic drugs because this provision has not and will not require Part D sponsors to offer generic drugs.

[49] Please note that the definition of corresponding drug in § 423.120 includes interchangeable biological products.

Comment: A commenter asked that we clarify whether we mean business or calendar days in all instances that apply a number of days to a requirement.

Response: For regulations related to notice and approval of changes to approved formularies, any requirements that refer to days are a reference to calendar days. This includes § 423.120(b)(5) and (6) and proposed (e) and (f) and related definitions including ''maintenance changes'' as defined in § 423.100. We believe the use of calendar days for regulations related to notice and approval of changes to approved formularies is appropriate because they are easier for CMS, plan sponsors, enrollees, and others to track.

Comment: Several commenters stated that maintenance changes did not require prior approval from CMS, with a commenter characterizing such changes as ''near-immediate.''

Response: While it is technically true that Part D sponsors may not receive explicit notice of approval of a negative change request for a maintenance change, the proposed § 423.120(e)(3)(i) would codify longstanding sub-regulatory guidance from Chapter 6, section 30.3.3.2, of the Prescription Drug Benefit Manual, under which Part D sponsors may assume a maintenance change request has been approved if they do not hear from CMS within 30 days of submission. This is in contrast to our longstanding policy for non-maintenance changes, which we proposed to codify at § 423.120(e)(3)(ii), under which Part D sponsors must not implement non-maintenance changes until they receive explicit notice of approval of the negative change request from CMS. Regardless of whether approval can be assumed after a period of time, contrary to the commenters' assertions, both longstanding guidance and our proposal require Part D sponsors to submit maintenance and non-maintenance change requests to CMS for approval. Moreover, it is important to note that approval of maintenance changes is not automatic. While we noted in our preamble to the November 2023 proposed rule that most such requests are routinely approved, CMS endeavors to review all requests and we have denied maintenance change requests, albeit infrequently, before the end of the 30-day approval period. Furthermore, we have instituted edits within the HPMS Negative Change Request module which can raise flags on issues that require our review or in some cases will prevent Part D sponsors from submitting a negative change request that would not meet CMS requirements. Lastly, should a Part D sponsor make a change to their HPMS

formulary file that is inconsistent with an approved (or assumed approved) negative change request, CMS may deny the formulary change via the line-level review process.

Comment: A couple of commenters asked CMS to expand the proposed definition of maintenance changes to include as additional categories of maintenance changes (1) applying PA to exclude non-Part D drugs or to reflect new indications or (2) placing PA or ST on protected class drugs specified under section 1860D–4(b)(3)(G)(iv) of the Act to ensure they are used for protected indications. Another commenter requested that CMS allow prescribers to continue to prescribe the reference product to an enrollee currently taking the affected product without a lengthy prior authorization requirement.

Response: We did not propose to permit the midyear addition of PA to prevent use of drugs for excluded uses, when a new indication is approved, or to permit Part D sponsors to cover only protected indications for protected class drugs. We appreciate commenters raising these issues, and we may take some of these suggestions into consideration for future rulemaking. Generally, we expect Part D sponsors to submit such PA or ST requirements for review and approval with their annual formulary submissions. Additionally, under current policy, Part D sponsors can submit these types of requests midyear as non-maintenance change requests for consideration by CMS. In the absence of a PA requirement on a particular drug, Part D plans may conduct retrospective review under § 423.153(c)(3) to confirm that a dispensed drug is being used for a medically accepted indication. We note that non-protected indications for protected class drugs are not excluded from Part D coverage as long as the use is for a medically accepted indication, as defined in section 1860D–2(e)(4) of the Act.

Our intent is to allow Part D sponsors to promote utilization of biosimilar biological products. We believe the current PA process continues to be the appropriate mechanism for providers to provide the necessary justification for continuing on a reference product.

Comment: A few commenters offered divergent views on our proposal that the list of alternative drugs, which we require under the current § 423.120(b)(5)(ii)(D) to be provided as part of the written notice of a formulary change, no longer be limited under our proposed § 423.120(f)(4)(iv) to alternative drugs in the same therapeutic category or class as the drug to which the negative formulary change applies. A couple of commenters were concerned that Part D plans would use this flexibility to switch patients under the immediate substitution rules to drugs with different forms or modes of therapeutic action. In contrast, a supporter noted that drugs may span multiple therapeutic categories and appreciated the extra flexibility provided for Part D sponsors to negotiate discounts and reduce overall prescription drug spending. Another supporter asked that we permit clinical experts outside of the P&T committee to identify appropriate formulary alternatives because P&T committees only meet quarterly.

Response: We appreciate commenters' support. For commenters that did not support our proposed policy, we clarify that the current requirement that Part D sponsors list alternative drugs in § 423.120(b)(5)(ii)(D) addresses a different topic than does the current regulation § 423.120(b)(5)(iv), which specifies drugs that can be immediately substituted. Section 423.120(b)(5)(ii) addresses the content that must be included in notices of change—including a list of alternatives—but, contrary to the commenters' suggestions, does not govern what types of drugs can be substituted or the conditions for making such changes. Rather, § 423.120(b)(5)(iv) governs what types of drugs can be immediately substituted and the conditions for making such changes.

While § 423.120(b)(5)(ii) does not govern the types of drugs that can be substituted, it requires Part D sponsors to list alternatives. We believe provision of this list could affect treatment in that it might provide alternatives that an enrollee and their provider have not considered, or steer the enrollee to certain drugs on that list given their coverage on their formulary. An enrollee and their provider can consider the list of alternatives to the drug that is being removed or otherwise subject to a negative formulary change as they decide whether to try the new drug added to the formulary, try another drug that appears on the list of alternatives, or to request an exception for coverage of the removed drug. As we noted in our proposal, there can be multiple drug options to treat the same condition and we believe that the list of alternatives should not limit possibilities of treatment by a strict adherence to class and category, particularly since Part D sponsors are not required to use a particular classification system for their Part D formularies. Therefore, we are finalizing § 423.120(f)(4)(iv) as proposed.

As to the question regarding who can determine what drug alternatives exist, we do not believe it is appropriate for Part D sponsors to outsource consideration of formulary alternatives to clinical experts outside of the P&T committee. Section 423.120(b)(1) specifies that a P&T committee must develop and revise the formulary. Applying a negative formulary change to a drug is a formulary revision, and we believe that consideration of the formulary in its entirety is part and parcel of any formulary revision decision. We do not see how, for example, a decision could be made to remove or apply utilization management restrictions to a drug without examining which drugs are being added to or are already on the formulary that could treat the same conditions as the drug subject to the negative formulary change.

Comment: A couple of commenters supported our proposal in the December 2022 proposed rule to identify § 423.120(e)(2)(i) as the successor regulation to § 423.120(b)(5)(iv) under section 1860D–4(b)(3)(I)(ii) of the Act, as added by the IRA. Another commenter asked us to clarify expectations for when a Part D drug that is a selected drug under section 11001 of the IRA is removed from the formulary and give plans the flexibility to determine lowest price on a drug-by-drug basis.

Response: We thank the commenters for their support. Section 1860D–4(b)(3)(I)(i) of the Act requires Part D sponsors to include on their formularies each covered Part D drug that is a selected drug under section 1192 of the Act for which a maximum fair price is in effect with respect to the plan year. Because maximum fair prices will not take effect until 2026, the formulary inclusion requirement in section 1860D–4(b)(3)(I)(i) of the Act does not apply in 2025. As a result, we are not finalizing the proposed language in § 423.120(b)(5) to identify a successor regulation for purposes of section 1860D–4(b)(3)(I)(ii) of the Act at this time.

It is not within the scope of this provision on formulary changes to address the request for flexibility to determine the lowest price of the drug.

Comment: A commenter pointed out that our regulation assumes all enrollees receive and comprehend notices of midyear formulary changes, whereas in reality enrollees may experience low health literacy, language barriers, or cognitive impairments that impede their understanding of such notices. Furthermore, the commenter noted that enrollees from socioeconomically disadvantaged communities and those experiencing major health challenges

such as rare diseases may not be capable of navigating the exceptions process. The commenter suggested that, by ignoring health disparities, our proposed policy for formulary substitution of biosimilar biological products as maintenance changes could cause disproportionate harm to vulnerable patient communities.

Response: We certainly appreciate that the health care system, along with all its complexities, presents significant challenges for those experiencing health care and other disparities. CMS continues to take action to address those disparities. However, we do not believe that our biosimilar biological product policy on maintenance changes widens health care disparities. In fact, our intent is quite the opposite. For example, if this proposal improves access to more biosimilar biological products in the Part D program, it could lead to greater utilization of lower price biosimilar biological products that have been determined by FDA to be just as safe and effective as their reference products.

CMS has implemented various requirements to help protect enrollees, address disparities, and mitigate confusion and burdens for enrollees, especially those with low health literacy, language barriers, and cognitive and other health care impairments. For example, under § 423.2267(a), we require Part D sponsors to provide: translated materials proactively in any non-English language that at least 5 percent of the beneficiaries in their service area speak, and materials in alternative formats (such as recordings and braille) to beneficiaries who are visually impaired. Furthermore, pursuant to § 423.128(d), we require all plans to have call centers to respond to current and prospective enrollee requests for assistance, and § 423.128(d)(1)(iii) also requires Part D sponsors to provide interpreters for non-English speaking and limited English proficient (LEP) individuals at their call centers. States also have established State Health Insurance Assistance Programs (SHIPs) that can assist enrollees in navigating their options. Enrollees can also designate a person to speak to plans on their behalf.

Comment: A commenter requested that we permit Part D sponsors to immediately substitute a brand name drug for an authorized generic, and an authorized generic drug for a generic drug, including within the same plan year. Another commenter asked that we make clear there could be only one maintenance change for a reference product within a single plan year to avoid confusion and potential disruption of care. A few other commenters asked us either to clarify or make sure that § 423.120(e)(2)(i) only permitted substitution of an interchangeable biological product for a reference product and not substitution of an interchangeable biological product for another interchangeable biological product that has the same reference product. Another commenter asked that we clarify that maintenance changes would only be allowed for biosimilar biological products for their reference products and not among different biosimilar biological products that have the same reference product. Without identifying them all, a commenter asked for guidance specific to 36 different permutations of formulary change types it counted among branded and unbranded versions of reference products and biosimilar biological products. In contrast, another commenter asked generally how Part D sponsors should treat enrollees taking a biosimilar biological product that is not the biosimilar biological product that is covered by the plan.

Response: We would not permit the immediate substitution of a brand name drug for an authorized generic (that is, applying a negative formulary change to an authorized generic already on the formulary and adding a brand name drug to the formulary). Our proposed regulation is not written to support that substitution. The proposed § 423.120(e)(2)(i) allows Part D sponsors to apply immediate negative formulary changes to a ''brand name drug. . . . within 30 days of adding a corresponding drug.'' The proposed definition of ''corresponding drug'' in § 423.100 refers in part to ''a generic or authorized generic of a brand name drug.'' Therefore, an immediate substitution would not allow a Part D sponsor to make a negative formulary change to an authorized generic within 30 days of adding a brand name drug. We do not support modifying our proposal in this way because the intent of our generic substitution policy is to encourage plans to make substitutions as soon as new generic drugs or authorized generic drugs are marketed to provide beneficiaries with access to lower cost therapeutically equivalent drugs. Moreover, it is unlikely that a brand name drug would be marketed after an authorized generic and, therefore, it would not fit within the structure of our proposed regulation, which contemplates the substitution within the plan year of a brand name drug to be removed or subject to a negative formulary change with a drug that is marketed (after CMS approves an initial formulary).

Likewise, our proposed regulation would not permit Part D sponsors to immediately substitute a generic for an authorized generic or an authorized generic for a generic as an immediate substitution under § 423.120(e)(2)(i). Nevertheless, an authorized generic and a generic of the same brand name drug generally are represented by the same RxCUI, as assigned by the National Library of Medicine's RxNorm.[50] In other words, one RxCUI can represent multiple NDCs. As more NDCs become available and assigned to an RxCUI, to the extent there is not a different RxCUI to submit on the formulary file, Part D sponsors cannot submit NDC-specific formulary changes in the HPMS system. Further, we note that it is not inconsistent with CMS policy for Part D sponsors not to cover every NDC associated with an RxCUI for a generic drug. Accordingly, a Part D sponsor can adjust which NDCs for a generic drug and authorized generic of the same brand name reference drug are covered on its formulary in a manner that would not be considered a formulary change subject to the requirements of this final rule.

With respect to interchangeable biological products, the proposed § 423.120(e)(2)(i) likewise would not permit immediate substitutions among interchangeable biological products—that is, we would not permit Part D sponsors to immediately substitute an interchangeable biological product for another interchangeable biological product as an immediate substitution under § 423.120(e)(2)(i). This is because § 423.120(e)(2)(i) would be limited to immediate substitutions of interchangeable biological products for their reference products, not for other interchangeable biological products that may be interchangeable with the same reference product. However, in contrast to generic drugs and authorized generic drugs of the same brand name drug sharing the same RxCUI, every biosimilar biological product is assigned its own distinct RxCUI. Therefore, a Part D sponsor cannot adjust which NDCs for interchangeable biological products with the same reference product are covered on its formulary in a manner that would not be considered a formulary change subject to the requirements of this rule. We believe this is in line with FDA's approach that approves biosimilar biological products in relation to reference products. For instance, our definition of a ''biosimilar

[50] *https://www.nlm.nih.gov/research/umls/rxnorm/overview.html.*

biological product'' at § 423.4 cites section 351(i)(2) of the PHSA (42 U.S.C. 262(i)(2)), which establishes similarity of a biological product compared to the reference product and not with respect to other biosimilar biological products. Similarly, our definition of an ''interchangeable biological product'' at § 423.4 cites section 351(k)(4) of the PHSA (42 U.S.C. 262(k)(4)), which provides that interchangeability is determined with respect to a reference product and not with respect to other interchangeable biological products.

Our proposed definition of a maintenance change at § 423.100 would not permit substitutions among biosimilar biological products that share a reference product as maintenance changes, nor would our proposed definition of immediate substitutions at § 423.120(e)(2)(i) permit maintenance changes among interchangeable biological products that share a reference product. For interchangeable biological products, § 423.100 would define a maintenance change at subparagraph (1) as making any negative formulary change to a drug within 90 days of adding a corresponding drug as specified. Section 423.100 would define a corresponding drug to include ''an interchangeable biological product of a reference product''. For biosimilar biological products other than interchangeable biological products, § 423.100 would define a maintenance change at subparagraph (2) as ''making any negative formulary changes to a reference product within 90 days of adding a biosimilar biological product other than an interchangeable biological product of that reference product.'' This definition does not include making negative formulary changes to a biosimilar biological product after adding a different biosimilar biological product for the same reference product.

With respect to the commenter's question about how to treat enrollees taking a biosimilar biological product that is not the biosimilar biological product on the formulary, this situation would be treated the same as any other situation where an enrollee is taking a non-formulary drug. If the plan only has biosimilar biological product A on the formulary and then an enrollee who has been taking biosimilar biological product B enrolls in the plan, the enrollee would need a new prescription for the biosimilar biological product A.

We do not prohibit multiple maintenance changes with respect to the same drug within the same plan year, and our review process considers each such request on its own merit. We think multiple maintenance changes within the same year would be rare given the type of changes we allow but not impossible. For example, a plan may add a therapeutically equivalent generic drug to the formulary and add a PA to the brand name drug. If the brand name drug then becomes subject to a long-term shortage, a maintenance change to remove the brand name drug from the formulary altogether may be appropriate.

It is beyond the scope of this regulation to address every hypothetical scenario provided by the commenter, but we will take them into account when providing guidance in the future.

Finally, we note that, regardless of whether Part D sponsors are permitted to replace an existing drug, they can always add the generic or authorized generic, or biosimilar biological product or unbranded biological product, to their formulary.

Comment: Several commenters, including a few concerned only about the proposed expansion of immediate substitutions to include interchangeable biological products for reference products, asked that we require transition supplies for immediate substitutions, including for some generic substitutions of brand name drugs. Additionally, a few commenters, including commenters concerned that we would now permit as maintenance changes substitution of biosimilar biological products other than interchangeable biosimilar biological products for reference products, asked that we require Part D sponsors to provide transition supplies for midyear maintenance changes. A commenter asked that we explain how our rules apply to hypothetical transition scenarios.

Response: We do not agree with the commenters asking us to apply the transition process to immediate substitutions or maintenance changes. The current § 423.120(b)(3) provides that Part D sponsors must provide a transition process for specified enrollees. In the April 2018 final rule, we finalized the current § 423.120(b)(3)(i)(B) to provide that Part D sponsors do not need to provide a transition supply when a Part D sponsor immediately substitutes a generic drug for a brand name drug under § 423.120(b)(5)(iv). We are not aware of widespread complaints regarding this policy and therefore do not see a reason to undo a policy that has been in place for several years or to apply different rules to other kinds of immediate substitutions or to maintenance changes permitted under this proposal.

In the December 2022 proposed rule, we proposed to move the current regulation on immediate generic substitutions, § 423.120(b)(5)(iv), to § 423.120(e)(2)(i) and to expand it to include among other products, interchangeable biosimilar biological products. We also proposed in the December 2022 proposed rule to change the reference in § 423.120(b)(3)(i)(B) to now refer to § 423.120(e)(2), which would mean we would not require Part D sponsors to provide a transition supply, for instance, when replacing a reference product with an interchangeable biological product within the requirements of § 423.120(e)(2)(i). Similar to our decision in the April 2018 final rule not to provide transition supplies for immediate generic substitutions under § 423.120(b)(5)(iv), we are not convinced there is a need to require transition supplies for immediate substitutions of interchangeable biological products, authorized generics, or unbranded biological products under the proposed § 423.120(e)(2)(i). Requiring transition supplies for one type of immediate substitution but not others would introduce an unnecessary level of operational complexity for Part D sponsors and inconsistent policies.

With respect to requiring transition supplies for maintenance changes, we did not propose to change the existing transition policy. Maintenance changes require 30 days advance notice to affected enrollees under § 423.120(f)(1). That 30 days' advance notice serves the same function as the transition policy to provide affected enrollees time to consider a formulary alternative or pursue a formulary or tiering exception for the drug they are taking that will be subject to the negative formulary change. As a reminder, the transition regulation at § 423.120(b)(3)(i)(B) requires 30 days' notice and a month's supply. Similarly, affected enrollees getting 30 days advance notice of a maintenance change who have refills or obtain a new prescription can go to the pharmacy and request a refill before the maintenance change becomes effective.

It is beyond the scope of this regulation to address every hypothetical transition scenario, but we will take them into account when providing guidance in the future to reflect regulatory changes.

Comment: While many commenters generally supported greater use of biosimilar biological products, they were generally divided into three main groups regarding our specific proposals relating to biosimilar biological product substitutions (which we mean to describe generally as a formulary change in which a Part D sponsor would add a biosimilar biological product and either

remove or apply a negative formulary change to its reference product).

The first group of commenters supported some or all of our specific proposals regarding biosimilar biological product substitutions, under which we would permit immediate substitutions of interchangeable biological products for their reference products under proposed § 423.120(e)(2)(i) and also permit Part D sponsors to treat as maintenance changes all biosimilar biological product substitutions under subparagraphs (1) and (2) of the definition of maintenance changes proposed in § 423.100. They stated, for instance, that the proposed policies would result in more uptake of biosimilar biological products by switching enrollees taking reference products to biosimilar biological products, a move they felt could improve the overall affordability of the Part D program to enrollees due to the lower cost of biosimilar biological products as compared to reference products. They stated, for instance, that because a distinction is made between interchangeable biological products and biosimilar biological products other than interchangeable biological products, with respect to pharmacy-level substitutions, CMS had struck the right balance by proposing to provide 30 days' advance notice to enrollees to get a new prescription or to ask for an exception before a Part D sponsor substitutes a biosimilar biological product other than an interchangeable biological product for their reference product.

The second group of commenters did not support some or all of the proposed flexibilities for biosimilar biological product substitutions to occur as immediate substitutions or maintenance changes, including interchangeable biological products. These commenters stated, for instance, that switching from biosimilar biological products to reference products was not the same as switching from generic drugs to brand name drugs and that any biosimilar biological product substitutions could disrupt patient treatment. They posited that biosimilar biological products, being complex molecules made from living organisms, are different than small molecule drugs that are chemically synthesized and that even minor differences in manufacturing processes could cause variations leading to clinical differences in a given patient's experience or reaction. They pointed out that biosimilar biological products are often used to treat patients with complex chronic conditions, whom they believe would be less well prepared to deal with adverse effects resulting from changes to the drugs they take.

The final group of commenters did not feel CMS went far enough in providing flexibilities to promote greater use of biosimilar biological products and recommended that we permit immediate substitutions of all biosimilar biological products regardless of whether they are licensed as interchangeable biological products or not. They pointed to the fact that FDA had found all biosimilar biological products to be highly similar and to have no clinically meaningful differences from reference products in safety and effectiveness and pointed out that FDA's recently proposed labeling changes would reduce the visibility of a product's interchangeability status. These commenters stated that interchangeability is only meaningful in that it allows substitution at the pharmacy counter. A commenter stated that treating biosimilar biological products other than interchangeable biological products as maintenance changes would not go far enough to make a major difference in terms of savings because the regulation would still require 30 days' advance notice, time in which the product could already have been switched. A few of these commenters acknowledged that if we did not move towards more flexibility, they supported what we had proposed.

Response: We appreciate the time all commenters took to explain many different points of view regarding biosimilar biological products, which are a relatively new category of products on the market. We appreciate the first group of commenters who supported our proposals to permit immediate substitutions of interchangeable biological products and maintenance changes of all biosimilar biological products. As explained in section III.F.2.b.(1) of the November 2023 proposed rule, our proposal accounts for the current PHSA delineation between interchangeable biological products, which may be substituted for the reference product without the intervention of the health care provider who prescribed the reference product (also called pharmacy-level substitution), and biosimilar biological products which do not meet the standards for interchangeability. However, substitution in terms of the conditions and requirements that must be met for a pharmacist to dispense a biosimilar biological product in place of its reference product without a new prescription is subject to state pharmacy law. Our review of state requirements with respect to pharmacy-level substitutions involving biosimilar biological products indicates that currently states overwhelmingly require that a biosimilar biological product is an interchangeable biological product for a pharmacist to make such a substitution for a reference product without the intervention of the health care provider who prescribed the reference product, among other conditions and requirements.[51] [52] [53] Our goal is to promote greater use of biosimilar biological products, and for that reason we expanded our original December 2022 proposal in the November 2023 proposed rule to include as maintenance changes substitutions of biosimilar biological products other than interchangeable biological products for their reference products. Since in most cases a pharmacist would not be permitted to make a pharmacy-level substitution involving biosimilar biological products other than interchangeable biological products without the intervention of the prescriber, we maintain our decision that substitutions of biosimilar biological products other than interchangeable biological products should be maintenance changes with 30-days advance notice to provide enrollees with time to obtain new prescriptions for the biosimilar biological products other than interchangeable biological products or obtain formulary exceptions for the reference products.

We do not agree with commenters in the second group that did not support permitting any formulary changes for biosimilar biological products. We believe that the emerging biosimilars market provides too great an opportunity for potential savings and that prohibiting plan sponsors from making such formulary changes would fail to acknowledge FDA determinations that such products are as safe and effective as their reference products and could discourage greater use of biosimilar biological products.

As to the last group of commenters, we disagree that our proposals did not go far enough in providing plan sponsors with flexibilities to promote greater use of biosimilar biological products. With respect to the comment that treating formulary substitutions for reference products of biosimilar

[51] *https://www.cardinalhealth.com/content/dam/corp/web/documents/publication/Cardinal-Health-Biosimilar-Interchangeability-Laws-by-State.pdf.*

[52] *https://www.mintz.com/sites/default/files/media/documents/2019-02-08/State%20Legislation%20on%20Biosimilars.pdf* n.

[53] *https://www.nacds.org/pdfs/government/2021/State-Substitution-Practices-for-Biological-Drugs-chart-July-2021.pdf.*

biological products other than interchangeable biological products as maintenance changes would not make much of a difference in savings, we note that our proposed policy is still a significant change from our current sub-regulatory policy. Current policy treats biosimilar biological product substitutions as non-maintenance changes, and exempts such biosimilar biological product substitutions from applying to enrollees currently taking an affected drug for the remainder of the plan year, which limits the potential cost savings of any such formulary change.

Comment: A commenter specifically supported our definition of ''biosimilar biological product.'' A few commenters each respectively asked that we: (i) revise the definition of ''unbranded biological product'' in our proposed § 423.4 to be modeled on the definition of ''authorized generic drug'' found in section 505(t) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(t)), which includes a description of distribution; (ii) provide an explanation of the meaning of the word ''potency'' as used in our proposed definition of a ''biosimilar biological product'' in § 423.4; and (iii) revise our definition in § 423.4 to define ''interchangeable biological product'' in order that it resemble the statutory definition in 42 U.S.C. 262(i)(3). Another commenter asked that we add biological products to the existing definition of ''brand drug'' in § 423.4 (more precisely, ''brand name drug'') to be more like our current definition of ''covered Part D drug'' in § 423.100 includes both small molecule drugs and biological products.

Response: While we appreciate the comments, we disagree with the suggestions to change our proposed definitions. Specifically, we are not revising the proposed definition of ''unbranded biological product'' to conform it to a statutory definition of ''authorized generic drug.'' Our proposed definition is consistent with how the FDA considers the unbranded biological product to be the same product as the brand name biological product, but marketed without the brand name on its label.[54] Nor do we think it is necessary for the purpose of CMS regulations to redefine what potency means for ''biosimilar biological products.''

We are persuaded to revise our proposed definition of ''interchangeable biological product'' in § 423.4 to include language that links the standards described in 42 U.S.C. 262(k)(4) to the definition of interchangeability at 42 U.S.C. 262(i)(3), since this is more descriptive while maintaining the accuracy of the proposed definition. We will therefore modify our proposed definition of ''interchangeable biological product'' in this final rule by adding the following language to the end: ''which in accordance with section 351(i)(3) of the Public Health Service Act (42 U.S.C. 262(i)(3)), may be substituted for the reference product without the intervention of the health care provider who prescribed the reference product.''

We decline to revise our definition of brand name drug given that we are finalizing a definition of ''brand name biological product'' in § 423.4, as proposed.

Comment: Several commenters who did not agree with our policy proposals contended that CMS was undermining the work of the FDA. For instance, a commenter stated that it is the role of FDA to decide what biosimilar biological products are interchangeable. In their opinion, if CMS were to permit Part D plans to substitute any biosimilar regardless of a determination of interchangeability, this is tantamount to disregarding the distinction between interchangeable biological products and biosimilars other than interchangeable biological products as set forth in the PHSA. On the other hand, several commenters that supported our proposed policies believed our policies were consistent with those of FDA. Several commenters on all sides of the issue looked to FDA publications and studies to support their positions, with a few citing the Biologics Price Competition and Innovation Act (BPCIA) or the PHSA. A few commenters also asked CMS to work with FDA, and one commenter specifically requested that the two agencies come to a consensus on the definitions and data surrounding biosimilarity and interchangeability, and the need for any more studies to support interchangeability determinations.

Response: We disagree that our proposals interfere with FDA's review of biosimilar biological products. CMS, among other things, works in partnership with the entire health care community to improve quality, equity, and outcomes in the health care system.[55] This includes regulation of Part D sponsors. FDA's mission, among other things, is to protect the public health by assuring the safety, efficacy, and security of human drugs and biological products.[56] It has long been the case that both agencies have had overlap on some issues, and both agencies have undertaken complementary initiatives under the Executive Order on Promoting Competition in the American Economy (E.O. 14306). Examples of such initiatives include FDA's work to continue to clarify and improve the approval framework for generic drugs and biosimilar biological products to make generic drug and biosimilar biological product approval more transparent, efficient, and predictable, including improving and clarifying the standards for interchangeability of biological products, as well as CMS's efforts to prepare for Medicare and Medicaid coverage of interchangeable biological products, and to develop payment models to support increased utilization of generic drugs and biosimilar biological products. This work includes issuing regulations codifying definitions specific to our missions and authorities. The policies being finalized in this rule are appropriate for the needs of the Part D program.

Comment: A commenter questioned the underlying premise for our proposed policies, noting that, as compared to brand name drugs and generics, biosimilar biological products were not priced at a significant savings from their reference products. Another commenter stated that treating substitutions of reference products with biosimilar biological products other than interchangeable biological products as maintenance changes would not make a major difference in terms of the uptake of biosimilar biological products because it would not cause manufacturers of reference products to provide lower prices or increase rebates. Another commenter posited that providing more flexibilities for biosimilar biological products other than interchangeable biological products could dampen manufacturer innovation by reducing the incentive to devote additional time and resources to interchangeable product development.

[54] See FAQ #11: How are ''unbranded biologics'' displayed in the Purple Book? *https://purplebooksearch.fda.gov/faqs#11.*

[55] *https://www.cms.gov/about-cms#:~:text=CMS%20is%20the%20federal%20agency,in%20the%20health%20care%20system.* ''CMS is the federal agency that provides health coverage to more than 160 million through Medicare, Medicaid, the Children's Health Insurance Program, and the Health Insurance Marketplace. CMS works in partnership with the entire health care community to improve quality, equity and outcomes in the health care system.''

[56] *https://www.fda.gov/about-fda/what-we-do#mission* ''The Food and Drug Administration is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation.''

Lastly, another commenter did not support our policy on the basis that allowing Part D sponsors to remove reference products from their formularies removes incentives for the biosimilar biological product to compete on price and could harm biologic competition, especially when only one or a few biosimilar biological products are currently on the market.

Response: These comments highlight a variety of factors that may influence the biological product market, but we do not speculate on every potential downstream effect of our proposal to permit substitutions of biosimilar biological products other than interchangeable biological products as maintenance changes. It is up to Part D sponsors to negotiate with manufacturers, and section 1860D–11(i) of the Act generally prohibits the Secretary from interfering with those negotiations. We believe that it is in the interest of the Part D program and Medicare beneficiaries to provide Part D sponsors with flexibilities that can be leveraged in negotiations with manufacturers to reduce costs to the government and Medicare beneficiaries. While we cannot estimate savings for our proposals with any certainty or predict whether fewer or more manufacturers will produce interchangeable biological products in the future, we clarify that the intent of this specific proposal has never been to affect decisions by manufacturers. Rather our goal is to promote greater access to and utilization of biosimilar biological products by providing more flexibility for Part D sponsors to substitute them for reference products than had previously been permitted. The introduction of biosimilar biological products to the market is relatively recent compared to generic small molecule drugs. We believe there is a potential for savings to the Medicare Trust Fund in the long term as acceptance of biosimilar biological products grows and increased competition drives down costs.

Comment: A commenter pointed out that CMS stated in the December 2022 proposed rule at pages 79536–7 with respect to another proposal on midyear benefit changes that such midyear changes violate uniformity and integrity of bids. A few commenters pointed out that we had stated in our December 2022 proposed rule that it was not appropriate to immediately substitute biosimilar biological products other than interchangeable biological products, and one commenter noted that we indicated in the April 2018 final rule that it could cause confusion if we were to define generic drugs to include biosimilar biological products. Pointing out that nothing had changed since that time, these commenters suggested we had no support to undertake what they reviewed as a reversal in policy.

Response: The commenter failed to note that in the December 2022 proposed rule, we drew a distinction between changes in ''bid-level'' cost sharing (for example, the cost sharing associated with an entire tier of drugs) and changes in the cost sharing for an individual drug (for example, when such drug moves from one tier to another). That discussion in the December 2022 proposed rule explained that section 1860D–4(b)(3)(E) of the Act contemplates that there will be midyear changes in cost sharing of individual formulary drugs. Since the beginning of the Part D program, we have allowed formulary changes that result in changes to the cost sharing for individual drugs (for example, moving a single drug to a different cost-sharing tier), but have declined to permit Part D sponsors to change their benefit designs or waive or reduce premiums, ''bid-level'' cost sharing (for example, the cost sharing associated with an entire tier of drugs), or cost sharing (for some or all enrollees) once plans are permitted to market for the following contract year (on October 1, consistent with § 423.2263(a)) on the grounds that such activities would be inconsistent with the CMS-approved bid.

We do not believe our previously finalized policies are inconsistent with our proposal to permit substitution of biosimilar biological products other than interchangeable biological products as maintenance changes. In the December 2022 proposed rule, we stated that we were not permitting the immediate substitution of biosimilar biological products other than interchangeable biological products as immediate substitutions, and our proposals in the November 2023 proposed rule did not propose to permit such immediate substitutions. (See the November 2023 proposed rule at III.F.2.(b)(1) for a detailed discussion.) In our April 2018 final rule, we noted that, to avoid confusion, we were not finalizing a proposed rule regarding the similar treatment of biosimilar biological products and generic drugs for purposes of LIS cost-sharing. We do not believe a concern about avoiding confusion in 2018 with respect to the separate issue of LIS cost-sharing is relevant to the policy proposals in our December 2022 and November 2023 proposed rules that involve the same type of products but in a different context.

We do not believe that finalizing our proposals regarding formulary substitution of biosimilar biological products precludes us from revisiting these policies in the future. Of course, in such instances, as is the case anytime that we feel it necessary to revisit regulatory policy, we would carefully consider all factors and issue proposals through rulemaking subject to public comment and response.

We also note we are finalizing our proposals to provide safeguards to mitigate potential confusion, including a requirement that Part D sponsors provide 30 days' advance notice requirement for substitutions of biosimilar biological products other than interchangeable biological products.

Comment: Several commenters requested that we exempt enrollees currently taking a reference product if we finalize a policy that permits Part D sponsors to treat as maintenance changes formulary substitutions of biosimilar biological products other than interchangeable biological products for reference products.

Response: We disagree with these commenters. As noted earlier, we believe the right course of action is to treat such substitutions as maintenance changes. These commenters appeared to support the feature of our current sub-regulatory policy on non-maintenance changes that exempts enrollees currently taking an affected product for the remainder of the plan year from substitution of reference products by biosimilar biological products other than interchangeable biological products. However, the non-maintenance policy also requires Part D sponsors to obtain explicit approval of such changes from CMS. We believe that to continue to require every Part D sponsor that seeks to substitute a biosimilar biological product other than an interchangeable biological product for a reference product to wait to obtain explicit permission before making any change and to continue to exempt enrollees currently taking the reference product would be counter to the goal of promoting the utilization of biosimilar biological products. Additionally, as noted previously in this section, the 30-day advance notice timeframe affords enrollees sufficient time to change to a covered alternative drug which could include biological products; to get a refill of the reference product to be replaced; or to obtain needed prior authorization or an exception for the reference product affected by the formulary change. Affected enrollees may still be able to access the reference

product through the plan's coverage determination and exceptions process.

Comment: Many commenters opposed ''non-medical switching'' formulary changes that are based on payer mandated reasons other than strict medical necessity (such as cost and coverage reasons). They stated that permitting biosimilar biological product substitutions for enrollees who are stable on reference products would disrupt treatment and undermine the doctor-patient relationship and central role of prescribers in determining the best course of treatment, leading to poor health outcomes and exacerbating health care disparities. Several commenters opposed to the proposal noted that biosimilar biological product substitutions could disrupt patient care or result in unexpected cost sharing. One commenter suggested that rather than finalizing this proposal, CMS should focus on policies that empower physicians when partnering with their patients, such as expanded access to real-time benefit tool (RTBT) use. A few commenters asked us to require Part D sponsors to send notice of specific changes to the prescribers of affected enrollees. Several commenters also noted the importance of having a robust exceptions process.

Response: We take seriously concerns that enrollees, especially those facing health challenges, may have when they are either switched from a drug they have been stable on or told their plan will no longer cover it, including for products such as biosimilar biological products that are relatively new to the market. However, as we discussed in our December 2022 proposed rule and the November 2017 proposed rule and as contemplated under section 1860D–4(b)(3)(E) of the Act, Part D sponsors may make changes to their formularies as specified during the year. As detailed in the November 2023 proposed rule, all biosimilar biological products have been determined by FDA to be safe and effective, and we believe that, over time, biosimilar biological products will gain more acceptance, as was the case with generic drugs as substitutes for brand name drugs. For instance, the FDA has stated:

Both [biosimilar biological products and reference products] are rigorously and thoroughly evaluated by the FDA before approval. For [biosimilar biological products] to be approved by the FDA, manufacturers must show that patients taking [biosimilar biological products] do not have any new or worsening side effects as compared to people taking the [reference products].

As it does with all medication approvals, the FDA carefully reviews the data provided by manufacturers and takes several steps to ensure that all [biosimilar biologic products] meet standards for patient use. The FDA's thorough evaluation makes sure that all [biosimilar biological products] are as safe and effective as their [reference products] and meet the FDA's high standards for approval. This means [consumers] can expect the same safety and effectiveness from the [biosimilar biological product] over the course of treatment as [they] would from the original product.[57]

We are not convinced that sending notices to prescriber offices, which serve a great many patients covered by many types of insurance and receive many communications, is an effective means to address enrollee concerns. Prescribers are more likely to respond to direct requests from their patients asking for a new prescription or help supporting an exception request. We agree with the commenter who noted the importance of RTBTs to provide prescribers with drug coverage and cost-sharing information for their patients at the point of prescribing. CMS does not require prescribers to use RTBTs, but requires at § 423.160(b)(7) that Part D sponsors implement at least one RTBT capable of integrating with at least one prescriber's e-prescribing system or electronic health record. See section III.L.5. of this final rule for a discussion of our proposals to enable more widespread access to RTBTs through the adoption of a standard.

Lastly, we agree with commenters about the importance of a robust exceptions process being available to affected enrollees. Since the start of the Part D program in 2006, CMS has had such a process in place. Under the coverage determination and appeal processes described in Part 423, subpart M, Part D enrollees and their prescribers have the right to request an exception to a plan coverage rule, including an exception to the plan's tiered cost-sharing structure or formulary utilization management (UM) criteria. Part D plan sponsors are required to make coverage decisions and notify the enrollee (and the prescriber, as appropriate) in writing in accordance with strict regulatory timeframes. Under § 423.578, a Part D plan must grant a tiering or formulary exception request (for example, provide coverage for a non-formulary drug or an exception to the UM criteria) when it determines that the requested drug is medically necessary, consistent with the prescriber's supporting statement indicating that preferred alternatives(s) would not be as effective and/or would have adverse effects. Enrollees have a statutory right to an expedited determination if the prescriber indicates that applying the standard timeframe may jeopardize the enrollee's health, and plans must issue all coverage decisions, except those seeking reimbursement only, as expeditiously as the enrollee's health condition requires. Any initial coverage request that the plan expects to deny based on a lack of medical necessity must be reviewed by a physician. If the Part D sponsor makes an adverse coverage determination, the required written notice must explain the specific reason(s) for the denial and include a description of the enrollee's right to a standard or expedited redetermination by the plan, and the right to request independent review. We require plans to conduct all redeterminations (first level appeals) using a physician or other appropriate health care professional with sufficient medical and other expertise, including knowledge of Medicare criteria, if the initial denial was based on a lack of medical necessity. If a plan fails to make a coverage decision and notify the enrollee within the required timeframe, the request must be forwarded to the independent review entity to be adjudicated.

Moreover, while we do not treat a claim transaction as a coverage determination, we do require Part D sponsors to arrange with network pharmacies to provide enrollees with a written copy of the Office of Management and Budget (OMB)-approved standardized pharmacy notice (''Notice of Denial of Medicare Prescription Drug Coverage,'' CMS–10146) when the enrollee's prescription cannot be filled under the Part D benefit and the issue cannot be resolved at the point of sale. The notice instructs the enrollee on how to contact his or her plan and explains the enrollee's right to request a coverage determination. Thus, all beneficiaries immediately receive clear, concise instructions on how to pursue their appeal rights whenever a prescription cannot be filled. For additional information on the coverage determination, appeals, and grievance process, including information about the pharmacy notice, see 42 CFR part 423, subparts M and U, and the Parts C & D Enrollee Grievances, Organization/Coverage Determinations, and Appeals

[57] See FDA website entitled ''Biosimilar and Interchangeable Biologics: More Treatment Choices'' at: *https://www.fda.gov/consumers/consumer-updates/biosimilar-and-interchangeable-biologics-more-treatment-choices#:~:text=Biosimilars%20are%20a%20type%20of,macular%20degeneration%2C%20and%20some%20cancers.*

Guidance.[58] We believe these requirements are comprehensive enough to address issues that might arise related to any transition from a reference product to a biosimilar biological product.

Comment: Several commenters specifically noted that requiring 30 days' notice for maintenance changes would be sufficient time for an enrollee to communicate with their health care provider to get a new prescription for a biosimilar biological product other than an interchangeable biosimilar biological product. A commenter asked if patients taking a reference product could waive their 30 days' advance notice of maintenance changes and immediately switch to a substituted biosimilar biological product. Several commenters asked CMS to extend the advance direct notice period from 30 days to either 60 or 90 days. These commenters posited that biosimilar biological products were different than other drugs and that enrollees taking these drugs were likely to be sicker or experiencing a chronic illness. They stated that enrollees taking reference products would need to schedule appointments with their providers to discuss changing treatment to a biosimilar biological product and that average wait times may exceed a month. Another commenter suggested that given the level of concern many patients who have been on the same medication have regarding biosimilar biological products with which they may not be familiar, providing a longer time period would give enrollees and their prescribers more of an opportunity to feel comfortable making the transition. A commenter that opposed permitting Part D sponsors to treat the substitution of biosimilar biological products for their reference products as maintenance changes, noted that the 30-day notice period might not provide sufficient time for an enrollee to obtain the biosimilar biological product if it is subject to risk evaluation and mitigation strategies (REMS). In such instances, FDA may require manufacturers to restrict a drug's distribution or use only to patients with prescriptions from authorized physicians or pharmacies under specified conditions via one or more ''Elements to Assure Safe Use'' (ETASU).

Response: As noted earlier, the needs of enrollees are an important priority for CMS. However, we have required advance direct notice of maintenance changes since the beginning of the Part D program and are not convinced that there is anything unique about biosimilar biological products other than interchangeable biological products that justifies a change to that longstanding policy. CMS has for some time permitted maintenance changes; since our April 2018 final rule, Part D plans have been required to provide 30 days' notice to these enrollees of changes. We are not aware of widespread complaints regarding the 30 days' advance direct notice, and do not believe it is necessary to create a special rule for individuals taking reference products subject to biosimilar biological product maintenance changes. We believe it would add unnecessary complications and set a poor precedent to establish a different time period of advance direct notice for biosimilar biological products substituted as maintenance changes (be they interchangeable or other than interchangeable) relative to other Part D drugs. We find this level of complications unmerited because, as discussed in section III.F of the November 2023 proposed rule, we trust in FDA evaluations that have determined all biosimilar biological products are safe and effective. See our discussion in the proposed rule for more on this (88 FR 78518). Additionally, affected enrollees may still be able to access the reference product through the plan's coverage determination and exceptions process.

Section 1860D–4(b)(3)(E) of the Act requires ''appropriate notice'' of formulary changes; further, we view appropriate notice of change as an integral beneficiary right. Therefore, we disagree that we need to change the requirement for advance direct notice of maintenance changes or create more complexity by requiring plans to create a means for enrollees to waive formulary change notice on an individual basis. If a prescriber were to recommend a switch to a new biosimilar biological product to their patient, either they or the patient could call or otherwise reach out to the plan to see if the drug was available on the formulary ahead of receipt of any 30-day advance notice of drug change.

We appreciate that a REMS could cause complications relative to the 30-day notice period, for example, if the prescriber needs to enroll in a different REMS for a biosimilar biological product than for the reference product in order to be certified to prescribe the biosimilar biological product; however, we do not think this scenario is unique to biological products. The same scenario could occur under our current policy for maintenance changes involving generic substitutions for brand name drugs, because when a brand name drug has a REMS, the generic drug must also have a REMS and manufacturers may not have a shared system REMS.[59] We are not aware of complaints indicating that our current policy for substitutions of generic drugs for brand name drugs has been complicated by REMS for drugs involved. Consequently, we do not see a need to change the policies we have proposed for substitution of biosimilar biological products.

Comment: A few commenters suggested that if we were to permit plans to require patients stable on reference products to switch to biosimilar biological products to reduce costs for payers, those savings should be shared with enrollees. A few commenters requested that we require biosimilar biological products to be placed on lower cost-sharing tiers than the reference products they replaced.

Response: By encouraging Part D sponsors to introduce biosimilar biological products to their formularies more quickly, we believe enrollees may also be able to share in savings when negotiated prices for those products are lower than for the reference products, particularly in coinsurance-based benefit designs. CMS disagrees with the commenters' proposal to require biosimilar biological products to be placed on lower cost-sharing tiers than the reference products they replaced because it has been longstanding policy to require substitutions to apply to the same or lower tier. Moreover, most biological products qualify for the specialty tier, as defined at § 423.560. Unless the plan benefit structure includes two specialty tiers as permitted under § 423.104(d)(2)(iv)(D), requiring substituted biosimilar biological products to be placed on a lower tier than the reference product would in effect prohibit Part D sponsors from placing biosimilar biological products on the specialty tier if the reference product had been on the specialty tier.

Comment: While we received support for recognizing the role of education to advance uptake and acceptance of biological products, several commenters stressed that biosimilar biological products are a relatively new concept that could cause confusion and concern for enrollees who would prefer to continue taking drugs they are familiar with. They asked that we develop educational resources on biological products to better inform patients and

[58] *https://www.cms.gov/medicare/appeals-and-grievances/mmcag/downloads/parts-c-and-d-enrollee-grievances-organization-coverage-determinations-and-appeals-guidance.pdf.*

[59] *https://www.fda.gov/drugs/risk-evaluation-and-mitigation-strategies-rems/frequently-asked-questions-faqs-about-rems.*

health care professionals and urge plan sponsors to engage in robust education and utilize communications best practices. A commenter encouraged us to update the Medicare Plan Finder tool to identify coverage of and savings associated with biosimilar biological products.

Response: We plan to update our materials to reflect any regulatory changes regarding the provision of biosimilar biological products, as well as investigate options for identifying biosimilar biological product alternatives on Medicare Plan Finder. Likewise, we encourage Part D sponsors to educate their enrollees, including making sure that call center customer service representatives are trained to discuss biosimilar biological products. We note that the FDA also plays an important role in educating consumers on emerging drug therapies. FDA offers a variety of materials in multiple formats and languages to help promote understanding of biosimilar biological products and interchangeable biological products.[60]

Comment: A commenter asked us to ensure enrollees receive appropriate notifications of midyear changes, develop such notices with stakeholder feedback, and hold Part D sponsors responsible if timelines or other standards are not met. A commenter requested that if the rule is finalized, that we monitor enrollee and prescriber experiences with biosimilar biological products to determine whether notice is necessary, particularly as state laws regarding substitution evolve.

Response: We will keep this feedback in mind as we consider different monitoring options.

Comment: A few commenters were concerned that permitting immediate substitutions of interchangeable biological products for reference products and maintenance changes of all biosimilar biological products for reference products would impose a greater administrative burden upon pharmacists.

Response: While we certainly favor reducing unnecessary burdens on pharmacists, it is not clear to us how permitting immediate substitutions of interchangeable biological products under proposed § 423.120(e)(2)(i) will increase the administrative burden placed on pharmacists. State laws determine the requirements for pharmacists to make pharmacy-level substitutions of interchangeable biological products for their reference products and these pharmacy-level substitutions can take place even when a reference product remains on the formulary (that is, in the absence of any immediate substitution by the plan). We acknowledge that permitting Part D sponsors to substitute biosimilar biological products for reference products as maintenance changes means the claim will potentially be denied at the pharmacy (if the negative formulary change adds restrictions or removes the reference product from the formulary) or the enrollee will be faced with higher than expected cost-sharing (if the negative formulary change moves the reference product to a different cost-sharing tier). The changes may cause enrollees to ask the pharmacist questions at the point of sale. In some cases, a pharmacist might reach out to the patient or their prescriber to obtain a new prescription if, for example, a refill of a reference product that a patient has been taking is denied by the plan. However, the advance direct notice provided to affected enrollees is intended to prompt the enrollee to act before the formulary change takes place and before the next fill of the reference product at the pharmacy. We decline to make further changes to our proposal based on these comments.

Comment: A commenter was concerned that expanding immediate substitutions to include substitutions of authorized generics, interchangeable biological products, and unbranded biological products, as proposed in the December 2022 proposed rule, would allow plans to choose different specified products for coverage, such that facilities would have to stock every single product option or substitution, whereas currently, only one substitution needs to be stocked. Conversely, a few commenters were concerned that substituted drugs would have a different delivery form. A commenter on the November 2023 proposed rule shared concerns that, given that all biosimilar biological products are not necessarily available in all delivery forms, our proposed rule could mean enrollees would lose access to their current delivery form (for instance, be able to only obtain a vial when they currently use a pen cartridge).

Response: We appreciate the concern the commenter raised about the potential impact of our proposed policies on pharmacies that may need to stock multiple biosimilar biological products and the challenges that could create as more biosimilar biological products come to the market. However, that issue is not specific to Part D and is beyond the scope of our proposal to expand midyear substitutions. Regarding the concerns about changes in available delivery forms, under proposed § 423.120(e)(2)(i), we would only allow immediate substitutions of an interchangeable biological product that FDA has determined to be interchangeable with its reference product. Our annual formulary review process ensures that Part D plan formularies include adequate representation of drugs consistent with best practices of formularies currently in widespread use. Part D sponsors are not required to cover every dosage or delivery form of a particular drug; however, Part D sponsors are expected to cover widely available dosage and delivery forms so as to not unduly limit enrollee access. If a Part D sponsor has multiple dosage or delivery forms of a particular drug on their formulary, Part D sponsors implementing immediate substitutions will be expected to continue to offer a similar variety of dosage and delivery forms to meet the needs of patients. CMS will review changes submitted on the HPMS formulary file and take action as appropriate if it appears that any immediate substitutions are inappropriate. As for maintenance changes defined in § 423.100, these determinations are subject to our review on a case-by-case basis. CMS takes into consideration differences in available delivery forms when making decisions to approve or deny such negative change requests.

Comment: A few commenters opined that our policy conflates pharmacy substitutions and formulary coverage, and that there is a distinction between the ability of a pharmacist to substitute a product without prescriber intervention and a plan's decisions regarding formulary coverage of a product.

Response: We understand the decision by a Part D sponsor to provide formulary coverage of any given product is very different from the ability of a pharmacist to substitute a product for another drug. However, coverage decisions do not take place in a vacuum, and CMS cannot ignore practical realities despite these commenters' position that formulary design should not be affected by pharmacy substitutions policies. In contrast, CMS believes that to prevent enrollees from standing in line at the pharmacy counter unable to get the biosimilar biological product because they do not have a new prescription for it, our proposal to require 30 days' advance direct notice in § 423.120(f)(1) is appropriate.

Comment: A few commenters asked us to align our proposed regulations

[60] See the following FDA website on Multimedia Education Materials | Biosimilars: *https://www.fda.gov/drugs/biosimilars/multimedia-education-materials-biosimilars.*

with policies in certain other countries. Specifically, both a commenter that asked us to restrict immediate substitutions to interchangeable biological products and a few commenters that asked us to permit immediate substitutions of all biosimilar biological products for reference products cited policies in Europe to support their different views.

Response: We appreciate the comments but clarify that we are proposing policies on approval and notice of formulary changes for Part D plans in the United States independent of policies in other countries. As explained in detail in both the December 2022 and the November 2023 proposed rules, our policies are informed by another federal agency, FDA, which implements the statutory and regulatory framework for the review and approval of biosimilar biological products.

After consideration of the comments received on both the December 2022 and November 2023 proposals, and for the reasons set forth in the proposed rules and our responses to the comments in this final rule, we are finalizing the proposed regulation text changes at §§ 423.4, 423.100, 423.104, 423.120, and 423.128, with the minor modifications discussed below, in addition to other non-substantive organizational and editorial changes for clarity.

- In § 423.4, removing the word ''biological'' from the term ''reference biological product.''
- In § 423.4, adding the following language to the end of the definition of ''interchangeable biological product'': ''which in accordance with section 351(i)(3) of the Public Health Service Act (42 U.S.C. 262(i)(3)), may be substituted for the reference product without the intervention of the health care provider who prescribed the reference product.''
- In § 423.100, in the definition of ''maintenance change,'' revising and reordering language to provide more clarity by stating that drugs subject to removal include those ''that FDA determines to be withdrawn for safety or effectiveness reasons.''
- In § 423.120(b)(5), finalizing the requirement that Part D sponsors must provide notice of changes as specified in § 423.120(f), but removing a reference to selection of a successor regulation to § 423.120(b)(5)(iv) for purposes of section 1860D–4(b)(3)(I)(ii) of the Act.
- In § 423.120(e)(2)(ii), revising and reordering language on market withdrawals to provide more clarity by stating that drugs subject to removal include those ''that the Food and Drug Administration (FDA) determines to be withdrawn for safety or effectiveness reasons.''
- In § 423.120(f)(4)(iv), revising language requiring Part D sponsors to include in their written notice of change a list of formulary alternatives to specify that the alternative drugs be ''on the formulary'' to make clear these alternatives are on the formulary and can meet the definition of a Part D drug.
- In § 423.120(f)(4)(v), revising language specifying that Part D sponsors provide written notice of the coverage determinations and exceptions to make clear that an exception is a type of coverage determination and to correct the regulatory cross-reference.

Additionally, in the course of developing the final rule, it came to our attention that we had inadvertently omitted updating § 423.578(d) when proposing updates to the regulations to reflect the agency's proposals. Accordingly, we are making conforming changes in this final rule to the existing regulation text in § 423.578(d) to correspond with the changes we are finalizing in this rule to require Part D sponsors to provide notice regarding negative formulary changes under § 423.120(f).

O. Parallel Marketing and Enrollment Sanctions Following a Contract Termination (§§ 422.510(e) and 423.509(f))

Sections 1857(c)(2) and 1860D–12(b)(3)(B) of the Act provide CMS with the ability to terminate MA (including MA–PD) and PDP contracts if we determine that a contract(s) has met any of the following thresholds:

- Has failed substantially to carry out the contract
- Is carrying out the contract in a manner that is inconsistent with the efficient and effective administration of, respectively, Part C or Part D of Title XVIII of the Act (that is, the Medicare statute).
- No longer substantially meets the applicable conditions of the applicable part of the statute.

This termination authority is codified at 42 CFR 422.510(a)(1) through (3) and 423.509(a)(1) through (3), respectively. In addition, section 1857(g)(3) of the Act (incorporated for Part D sponsors under section 1860D–12(b)(3)(F) of the Act) specifies that intermediate sanctions and civil money penalties (CMPs) can be imposed on the same grounds upon which a contract could be terminated (63 FR 34968 and 70 FR 4193). CMS codified this authority at §§ 422.752(b) and 423.752(b) with respect to intermediate sanctions, and §§ 422.752(c)(1)(i) and 423.752(c)(1)(i) with respect to CMPs.

If CMS terminates an MA organization or Part D sponsor contract(s) during the plan year but the termination is not effective until January 1 of the following year, the MA organization or Part D sponsor could potentially continue to market and enroll eligible beneficiaries (as described in 422 Subpart B and 423 Subpart B) into plans under the terminating contract(s) unless CMS imposes separate marketing and enrollment sanctions on the terminating contract(s).[61] A terminating contract that continues to market to and enroll eligible beneficiaries will cause confusion and disruption for beneficiaries who enroll in the period of time between when the termination action is taken and the January 1 effective date of the termination.

For these reasons, we proposed to add paragraph (e) to § 422.510 and paragraph (f) to § 423.509 that, effective contract year 2025, marketing and enrollment sanctions will automatically take effect after a termination is imposed. At paragraph (e)(1) of § 422.510 and paragraph (f)(1) of § 423.509, we proposed to state that the marketing and enrollment sanctions will go into effect 15 days after CMS issues a contract termination notice. This timeframe is consistent with the number of days CMS often designates as the effective date for sanctions after CMS issues a sanction notice.

At paragraph (e)(2) of § 422.510 and paragraph (f)(2) of § 423.509, we proposed that MA organizations and Part D sponsors will continue to be afforded the same appeals rights and procedures specific to contract terminations under 42 CFR Subpart N of parts 422 and 423, however, there will not be a separate appeal for the sanction (in other words the appeal of the termination will include the associated marketing and enrollment sanctions). In addition, at paragraph (e)(3) of § 422.510 and paragraph (f)(3) of § 423.509 we proposed that if an MA organization or Part D sponsor appeals the contract termination, the marketing and enrollment sanctions will not be stayed pending the appeal consistent with §§ 422.756(b)(3) and 423.756(b)(3). Finally, at paragraph (e)(4) of § 422.510 and paragraph (f)(4) of § 423.509 we proposed that the sanction will remain in effect until the effective date of the termination, or if the termination decision is overturned on appeal, until

[61] Regulations in 42 CFR 422 Subpart B and 423 Subpart B permit enrollees to enroll in a plan mid-year during their initial election period or special election periods.

the final decision to overturn the termination is made by the hearing officer or Administrator.

CMS rarely terminates MA organization and Part D sponsor contracts and, on average, contract terminations affect less than one MA organization or Part D sponsor a year. Therefore, we anticipate that this proposal will not result in additional costs or additional administrative burden for affected MA organizations and Part D sponsors. For example, an MA organization and Part D sponsor will not be required to submit a corrective action plan, and if appealed there will only be one appeal rather than multiple. MA organizations and Part D sponsors will continue to be required to comply with existing regulations that require public and beneficiary notice that their contract is being terminated under this proposal.

Comment: Several commenters expressed support for this proposal.

Response: CMS appreciates commenters' support.

Final Decision: After consideration of the public comments received and for the reasons discussed here and in the proposed rule, we are finalizing this provision without modification.

P. Update to the Multi-Language Insert Regulation (§§ 422.2267 and 423.2267)

Individuals with limited English proficiency (LEP) experience obstacles to accessing health care in the United States. Language barriers negatively affect the ability of patients with LEP to comprehend their diagnoses and understand medical instructions when they are delivered in English and impact their comfort with post-discharge care regimens.[62] We further described the language barriers faced by individuals with LEP in the November 2023 proposed rule at 88 FR 78523. These barriers contribute to disparities in health outcomes for individuals with LEP, which likely worsened during the COVID–19 pandemic.[63]

The multi-language insert (MLI) currently required at §§ 422.2267(e)(31) and 423.2267(e)(33) is a standardized communications material that informs enrollees and prospective enrollees that interpreter services are available in Spanish, Chinese, Tagalog, French, Vietnamese, German, Korean, Russian, Arabic, Italian, Portuguese, French Creole, Polish, Hindi, and Japanese. These were the 15 most common non-English languages in the United States when we reinstituted the MLI in the Contract Year 2023 Policy and Technical Changes to the Medicare Advantage and Medicare Prescription Drug Benefit Programs; Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency; Additional Policy and Regulatory Revisions in Response to the COVID–19 Public Health Emergency final rule (87 FR 27704) (hereafter referred to as the May 2022 final rule). Additionally, §§ 422.2267(e)(31)(i) and 423.2267(e)(33)(i) require plans to provide the MLI in any non-English language that is the primary language of at least five percent of the individuals in a plan benefit package (PBP) service area but is not already included on the MLI. These regulations also provide that a plan may opt to include the MLI in any additional languages that do not meet the five percent threshold, where it determines that including the language would be appropriate. The current MLI states, ''We have free interpreter services to answer any questions you may have about our health or drug plan. To get an interpreter, just call us at [1–xxx–xxx–xxxx]. Someone who speaks [language] can help you. This is a free service.'' The issuance of the MLI is independent of the Medicare written translation requirements for any non-English language that meets the five percent threshold, as currently required under §§ 422.2267(a)(2) and 423.2267(a)(2), and the additional written translation requirements for fully integrated D–SNPs (FIDE SNPs) and highly integrated D–SNPs (HIDE SNPs) provided in §§ 422.2267(a)(4) and 423.3367(a)(4).[64] Additionally, we note that pursuant to CMS's authority in section 1876(c)(3)(C) to regulate marketing and the authority in section 1876(i)(3)(D) to specify new section 1876 contract terms, we have also established in § 417.428 that most of the marketing and communication regulations in subpart V of part 422, including the MLI requirement in § 422.2267(e)(31), also apply to section 1876 cost plans.

Section 1557 of the Patient Protection and Affordable Care Act (ACA)[65] provides that, except where otherwise provided in Title I of the ACA, an individual shall not, on the grounds prohibited under Title VI of the Civil Rights Act of 1964, *42 U.S.C. 2000d et seq.* (race, color, national origin), Title IX of the Education Amendments of 1972, *20 U.S.C. 1681 et seq.* (sex), the Age Discrimination Act of 1975, *42 U.S.C. 6101 et seq.* (age), or section 504 of the Rehabilitation Act of 1973, *29 U.S.C. 794* (disability), be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any health program or activity, any part of which is receiving Federal financial assistance (including credits, subsidies, or contracts of insurance); any program or activity administered by the Department; or any program or activity administered by any entity established under Title I of the Act. On May 18, 2016, the Office for Civil Rights (OCR) published a final rule (*81 FR 31375;* hereinafter referenced to as the ''2016 section 1557 final rule'') implementing the requirement that all covered entities—any health program or activity that receives Federal financial assistance—include taglines with all ''significant communications.'' The sample tagline provided by the Department consisted of a sentence stating, in the 15 most common non-English languages in a State or States, ''ATTENTION: If you speak [insert language], language assistance services, free of charge, are available to you. Call 1–xxx–xxx–xxxx (TTY: 1–xxx–xxx–xxxx).'' On June 19, 2020, the Department published a new section 1557 final rule, 85 FR 37160 (2020 section 1557 final rule), rescinding the 2016 section 1557 final rule's tagline requirements, 84 FR 27860. That rule is currently in effect, save for a few provisions enjoined or set aside by the courts and pending OCR's new proposed rule for section 1557 of the ACA, published on August 4, 2022 (87 FR 47824).

None of the rulemaking impacting the various notifications of interpreter services changed the requirement that MA organizations, Part D sponsors, or cost plans must provide these services under applicable law. Plans have long been required to provide interpreters when necessary to ensure meaningful access to individuals with LEP, consistent with existing civil rights laws. In implementing and carrying out the Part C and D programs under

[64] This proposal pertains only to the MLI requirements in §§ 422.2267(e)(31) and 423.2267(e)(33), not §§ 422.2267 and 423.2267 broadly.

[65] 42 U.S.C 18116(c).

sections 1851(h), 1852(c), 1860–1(b)(1)(B)(vi), 1860D–4(a), and 1860D–4(l) of the Act, CMS considers the materials required under §§ 422.2267(e) and 423.2267(e) to be vital to the beneficiary decision making process; ensuring beneficiaries with LEP are aware of and are able to access interpreter services provides a clear path for this portion of the population to properly understand and access their benefits.

In the May 2022 final rule, we noted that we gained additional insight regarding the void created by the lack of any notification requirement associated with the availability of interpreter services for Medicare beneficiaries (87 FR 27821). We stated that we consider the materials required under §§ 422.2267(e) and 423.2267(e) to be vital to the beneficiary's decision-making process. We also noted that we reviewed complaint tracking module (CTM) cases in the Health Plan Management System (HPMS) related to ''language'' and found a pattern of beneficiary confusion stemming from not fully understanding materials based on a language barrier. We noted that solely relying on the requirements delineated in the 2020 section 1557 final rule for covered entities to convey the availability of interpreter services is insufficient for the MA, cost plan, and Part D programs and is not in the best interest of Medicare beneficiaries who are evaluating whether to receive their Medicare benefits through these plans and who are enrolled in these plans. We stated that we believed that informing Medicare beneficiaries that interpreter services are available is essential to realizing the value of our regulatory requirements for interpreter services.

On August 4, 2022, OCR published a new proposed rule for section 1557 of the ACA (87 FR 47824) that proposed to require covered entities to notify the public of the availability of language assistance services and auxiliary aids and services for their health programs and activities at no cost using a notice of availability of language assistance services and auxiliary aids and services (Notice of Availability). Proposed 45 CFR 92.11(b) would require the Notice of Availability to be provided in English and at least in the 15 most common languages spoken by individuals with LEP in the relevant State or States, and in alternate formats for individuals with disabilities who request auxiliary aids and services to ensure effective communications. These proposed provisions would result in misalignment with the MLI requirement under §§ 422.2267(e)(31) and 423.2267(e)(33) which require that notice be provided in the 15 most common non-English languages in the United States.

In addition, under § 438.10(d)(2), States must require Medicaid managed care organizations (MCOs), prepaid inpatient health plans (PIHPs), prepaid ambulatory health plans (PAHPs), and primary care case management programs to include taglines in written materials that are critical to obtaining services for potential enrollees in the prevalent non-English languages in the State explaining the availability of oral interpretation to understand the information provided, information on how to request auxiliary aids and services, and the toll-free telephone number of the entity providing choice counseling services in the State. Several States that use integrated Medicare and Medicaid materials for D–SNPs and Medicare-Medicaid Plans have contacted CMS and requested that we change the MLI to be based on the 15 most common languages in the State rather than the 15 most common languages nationally because the most common languages in the State are often not the same as the most common 15 languages nationally.

As a result of the MLI requirements at §§ 422.2267(e)(31) and 423.2267(e)(33) and the Medicaid requirement at § 438.10(d)(2), any applicable integrated plans (AIPs), as defined at § 422.561, that provide integrated Medicare and Medicaid materials for enrollees must currently include the MLI in the 15 most common languages nationally as well as the Medicaid tagline in the prevalent non-English languages in the State to comply with both Medicare and Medicaid regulatory requirements. Specifically, these plans that provide integrated materials must comply with the MLI requirements at §§ 422.2267(e)(31) and 423.2267(e)(33) and the Medicaid requirement at § 438.10(d)(2) to include taglines in written materials that are critical to obtaining services for potential enrollees in the prevalent non-English languages in the State. In the enrollee materials, this can result in a very long multi-page list of statements noting the availability of translations services in many languages. As discussed in greater detail below, we proposed to update §§ 422.2267(e)(31) and 423.2267(e)(33) to instead require that a Notice of Availability be provided in English and at least the 15 languages most commonly spoken by individuals with LEP of the relevant State; we articulated our expectation that this proposed policy would better align with the Medicaid translation requirements at § 438.10(d)(2).[66]

We believe rulemaking regarding a notice of the availability of language assistance services and auxiliary aids and services for individuals with LEP is needed to more closely reflect the actual languages spoken in the service area. We also believe it is in the best interest of enrollees for the requirements to align with the Medicaid translation requirements because it allows D–SNPs that are AIPs to provide a more applicable, concise Notice of Availability to enrollees that does not distract from the main purpose of the document. Further, alignment of Medicare and OCR rules would help to prevent confusion among MA organizations, Part D sponsors, and cost plans regarding which requirements they must comply with.

We proposed to amend §§ 422.2267(e)(31) and 423.2267(e)(33). First, we proposed to replace references to the MLI with references to a Notice of Availability. We proposed that this notice be a model communication material rather than a standardized communication material and thus that CMS would no longer specify the exact text that must be used in the required notice. Second, we proposed to change paragraphs (e)(31) and (e)(33) to require MA organizations and Part D sponsors to provide enrollees a Notice of Availability that, at a minimum, states that MA organizations and Part D sponsors provide language assistance services and appropriate auxiliary aids and services free of charge. Third, we proposed, in new paragraphs (e)(31)(i) and (e)(33)(i), that the Notice of Availability must be provided in English and at least the 15 languages most commonly spoken by individuals with limited English proficiency of the relevant State and must be provided in alternate formats for individuals with disabilities who require auxiliary aids and services to ensure effective communication. We noted in the proposed rule that this State-specific standard would ensure that a significant proportion of each State's particular LEP population receives key information in the appropriate languages. We cited the U.S. Census Bureau's ACS 2009–2013 multi-year data, which show that the top languages spoken in each State can

[66] We expect the 15 most common languages for a given State to include any language required by the Medicaid program at § 438.10(d)(2). Therefore, our NPRM would reduce burden on fully integrated dual eligible special needs plans and highly integrated dual eligible special needs plans, as defined at § 422.2, and applicable integrated plans, as defined at § 422.561, to comply with regulations at §§ 422.2267(a)(4) and 423.2267(a)(4).

vary significantly.[67] We concluded that State-specific language translations provide for flexibility to maximize access to care for individuals with LEP. Fourth, we proposed that the updated notice must also include a statement regarding the availability of appropriate auxiliary aids and services to reduce barriers to access for individuals with disabilities.

As discussed in the November 2023 proposed rule, we believe this proposal would make it easier for individuals to understand the full scope of available Medicare benefits (as well as Medicaid benefits available through the D–SNPs, where applicable), increasing their ability to make informed health care decisions, and promote a more equitable health care system by increasing the likelihood that MA enrollees have access to information and necessary health care. Additional benefits include mitigating the risk that §§ 422.2267(e)(31) and 423.2267(e)(33) could conflict with § 438.10(d)(2) and the forthcoming 1557 final rule, requiring applicable Medicare plans to comply with two, disparate sets of requirements. Further, requiring MA organizations and Part D sponsors to provide multiple sets of translated statements accompanying enrollee materials could lead to enrollee confusion and detract from the enrollee material message. Setting aside which specific policies are finalized in the forthcoming 1557 final rule, we generally continue to believe our proposed changes are appropriate given the benefits of a Notice of Availability for individuals with LEP and auxiliary aid and service needs more closely reflecting the actual languages spoken in the service area and aligning with the Medicaid translation requirements.

Additionally, we proposed in §§ 422.2267(e)(31)(ii) and 423.2267(e)(33)(ii) that if there are additional languages in a particular service area that meet the 5 percent service area threshold, described in paragraph §§ 422.2267(a)(2) and 423.2267(a)(2), beyond the languages described in §§ 422.2267(e)(31)(i) and 423.2267(e)(33)(i), the Notice of Availability must also be translated into those languages, similar to the current MLI requirements at §§ 422.2267(e)(31)(i) and 423.2267(e)(33)(i). While §§ 422.2267(a)(2) and 423.2267(a)(2) apply to the Notice of Availability since it is a required material under §§ 422.2267(e) and 423.2267(e), we wanted to clarify this in the regulation text. MA organizations and Part D sponsors may also opt to translate the Notice of Availability in any additional languages that do not meet the 5 percent service area threshold at §§ 422.2267(a)(2) and 423.2267(a)(2), where the MA organization or Part D sponsor determines that such inclusion would be appropriate, which is also included in the current MLI requirements at §§ 422.2267(e)(31)(i) and 423.2267(e)(33)(i). It is possible that there may be a subpopulation in the plan benefit package service area that uses a language that does not fall within the top 15 non-English languages or meet the 5 percent service area threshold that the plan determines can benefit by receiving the notice. We noted that pursuant to CMS's authority in section 1876(c)(3)(C) to regulate marketing and the authority in section 1876(i)(3)(D) to specify new section 1876 contract terms, and as established in § 417.428, this proposal would also apply to section 1876 cost plans.

To assist plans with fulfilling their requirements under §§ 422.2267(a)(2) and 423.2267(a)(2) to translate required materials into any non-English language that is the primary language of at least five percent of the population of a plan service area, since 2009 CMS has provided plans with a list of all languages that are spoken by 5 percent or more of the population for every county in the U.S. Each fall, we release an HPMS memorandum announcing that MA organizations and Part D sponsors can access this list in the HPMS marketing review module.[68] However, plans can also use U.S. Census Bureau ACS data to determine the top languages spoken in a given State or service area. The September 2023 Medicare Part C & D Language Data Technical Notes[69] outlines our methodology for calculating the percentage of the population in a plan's service area speaking a language other than English and provides plans with instructions to make these calculations on their own.

We received the following comments on this proposal and respond to them below:

Comment: Many commenters supported CMS's plan to require MA and Part D plans to provide enrollees a Notice of Availability that, at a minimum, states that MA organizations and Part D sponsors provide language assistance services and appropriate auxiliary aids and services free of charge in English and at least the 15 languages most commonly spoken by individuals with LEP of the relevant State and languages that meet the 5 percent service area threshold. The Medicaid and CHIP Payment and Access Commission (MACPAC) noted that the change aligns with work they have underway, more closely aligns Medicare requirements with existing Medicaid standards, reduces administrative burden on health plans, and may reduce health disparities for beneficiaries whose primary language is not English. A commenter stated that integrated Medicare and Medicaid plans have been experiencing this conflict between Medicaid requirements and Medicare MLI requirements for many years. Another commenter stated that using the same standard as Medicaid will reduce administrative time and effort for State Medicaid agencies overseeing D–SNPs by enabling State Medicaid staff to enforce a standard consistent with their other Medicaid products.

Response: We appreciate the widespread support for our proposal. We believe that requiring a Notice of Availability to be provided in English and in at least the 15 most commonly spoken non-English languages and languages that meet the 5 percent service area threshold free of charge is more closely tailored to the needs of the population where the notice will be sent and will make it easier for individuals to understand the full scope of available Medicare benefits (as well as Medicaid benefits available through a D–SNP, where applicable), increasing their ability to make informed health care decisions. It will also promote a more equitable health care system by increasing the likelihood that MA enrollees have access to information and necessary health care.

Comment: A few commenters opposed the proposal noting that it would place an undue administrative burden on plans, including national subcontractors that work with multiple plans across multiple States. Some commenters raised concerns about providing a State-based notice for plans with multi-State service areas. A commenter stated that providing the Notice of Availability based on an

[69] Found in HPMS as described in the September 25, 2023 HPMS memo, ''Corrected Contract Year 2024 Translated Model Materials Requirements and Language Data Analysis.'' This memo can be retrieved at *https://www.cms.gov/about-cms/information-systems/hpms/hpms-memos-archive-weekly/hpms-memos-wk-4-september-18-22.*

enrollee's location would require plans to implement enrollee-level programming for every plan communication for all 50 States. A few commenters reported having employer-group waiver plans that covered more than one State.

Response: We thank the commenters for their thoughts. We believe that requiring the Notice of Availability to be provided in at least the 15 most common languages spoken by individuals with LEP where the notice will be sent will make it easier for individuals to understand the full scope of available Medicare benefits (as well as Medicaid benefits available through the D–SNPs, where applicable), increasing their ability to make informed health care decisions, and promote a more equitable health care system by increasing the likelihood that MA enrollees have access to information and necessary health care. Any subcontractors will need to work with the applicable plan to ensure that they are meeting this requirement.

However, we share the concerns raised by commenters about plans that have a service area covering multiple States and the potential burden associated with determining the State of residence for enrollees within the plan. We also agree that requiring such plans to include the Notice of Availability in at least the top 15 non-English languages in each State in the plan's service area, potentially resulting in many more than 15 languages, may cause enrollee confusion and undue administrative and financial burden to the plan. As a result, we are updating the regulation to require the Notice of Availability to be provided in at least the top 15 languages most commonly spoken by individuals with LEP within the State or States associated with the plan benefit package service area, consistent with the section 1557 proposed rule. This approach would allow plans to aggregate the populations with LEP across all States in the plan's service area to determine the 15 languages in which it must provide the Notice of Availability. For example, if a plan's service area is New York, the Notice of Availability must include at least the top 15 languages spoken by individuals with LEP in New York, based on guidance published by the Secretary. If the plan's service area includes Connecticut, New Jersey, and New York, the plan may aggregate the populations with LEP across Connecticut, New Jersey, and New York to determine the 15 languages in which it must provide the Notice of Availability, based on guidance published by the Secretary. If the service area does not include an entire State, the plans should still use the top 15 languages for the entire State. If the service area is national, the plan may use the top 15 languages nationally for the Notice of Availability, based on guidance published by the Secretary.

Comment: Another commenter questioned whether, if CMS finalizes the proposal as a model communication material, plans can use each State's required tagline and language for the Notice of Availability.

Response: Since D–SNPs are State-specific at the plan level this will still allow D–SNPs to comply with § 438.10(d)(2) and use the State-specific tagline to satisfy the Notice of Availability requirements at §§ 422.2267(e)(31) and 423.2267(e)(33) as long as it states, at a minimum, in at least the 15 most common non-English languages and any language that meets the 5 percent service area threshold, that the MA organization provides language assistance services and appropriate auxiliary aids and services free of charge, since the Notice of Availability does not require standardized language. The D–SNP will not need to include multiple notices to meet these Medicaid and Medicare regulatory requirements.

Comment: A few commenters requested that we publish annually the 15 most common languages spoken by individuals with LEP in each State and nationally. Other commenters requested that we expand the list beyond 15 languages such as to the top 20 languages most commonly spoken by individuals with LEP in each State. They stated that including the top 20 languages on the list would help advocates identify languages that may meet the plan coverage area threshold even if they are not on the list of the top 15 for the State.

Response: We appreciate commenters' requests for CMS to publish lists of the top languages in each State and note that HHS will provide a list of the top 15 non-English languages most commonly spoken by individuals with LEP in each State and nationally based on the U.S. Census Bureau's American Community Survey (ACS) data. Additionally, since 2009, CMS has provided plans with a list of all languages that are spoken by five percent or more of the population for every county in the U.S. Each fall, we release an HPMS memorandum announcing that MA organizations and Part D sponsors can access this list in the HPMS marketing review module.[70] Further, the HPMS memorandum notes that plans can also use U.S. Census Bureau ACS data to determine the top languages spoken by individuals with LEP in a given State or service area. The September 2023 Medicare Part C & D Language Data Technical Notes[71] outlines our methodology for calculating the percentage of the population in a plan's service area speaking a language other than English and provides plans with instructions to make these calculations on their own.

We also appreciate commenters asking us to publish more than the 15 top languages spoken by individuals with LEP in each State. Plans will be able to identify the top 15 languages most commonly spoken by individuals with LEP in any State based on guidance published by the Secretary. Plans may opt to include additional languages, for which the U.S. Census Bureau's ACS data would be a helpful data source. We will consider expanding the list of languages provided in HPMS for MA and Part D plans in a future HPMS update.

Comment: A few commenters requested that we provide our methodology for determining the top 15 languages spoken by individuals with LEP in a State.

Response: We will provide guidance explaining our methodology for determining the top 15 languages spoken by individuals with LEP in each State and nationally based on ACS data.

Comment: A commenter encouraged CMS to clarify that the languages available be based on the ''plan State'' and not the enrollee's State of residence.

Response: We clarify that the requirement is based on the State or States associated with the plan benefit package service area rather than where an organization is located. To improve clarity, we are updating the regulation text at §§ 422.2267(e)(31) and 423.2267(e)(33) to, ''State or States associated with the plan's service area.''

Comment: We received a few comments asking us to clarify which communications a Notice of Availability must accompany and the frequency with which the Notice of Availability is sent to enrollees. A commenter suggested we develop a targeted list of

[70] We released the contract year 2024 version of this HPMS memorandum titled, ''Corrected Contract Year 2024 Translated Model Materials Requirements and Language Data Analysis'' on September 25, 2023. This memorandum can be retrieved at: *https://www.cms.gov/about-cms/information-systems/hpms/hpms-memos-archive-weekly/hpms-memos-wk-4-september-18-22.*

[71] Found in HPMS as described in the September 25, 2023 HPMS memo, ''Corrected Contract Year 2024 Translated Model Materials Requirements and Language Data Analysis.'' This memo can be retrieved at *https://www.cms.gov/about-cms/information-systems/hpms/hpms-memos-archive-weekly/hpms-memos-wk-4-september-18-22.*

materials with which to include the Notice of Availability while another commenter requested that we limit the types of documents that a Notice of Availability must accompany to those documents sent less frequently. Another commenter urged that we make the Notice of Availability an annual mailing instead of requiring inclusion in all materials and allow it to be suppressed if an enrollee has indicated a language of preference.

Response: While we acknowledge the comments suggesting we reduce the frequency with which we require the Notice of Availability, we believe it is important to continually make enrollees aware of the availability of language assistance services in all required materials under §§ 422.2267(e) and 423.2267(e). The requirement to include notice of available interpreter services and auxiliary aids and services with all required materials is an established policy that is already provided for in CMS regulations. CMS did not propose any amendments to this aspect of its policy as enrollee language and format preferences and needs may change over time. We also note that §§ 422.2267(e)(31) and 423.2267(e)(33) include provisions, such as allowing for a single copy of the requisite notice to be included in a mailing of multiple required documents, that ease burden and offer plans some flexibility, where practicable.

Comment: Several commenters requested that we work with OCR and Medicaid to ensure consistency between our proposal, the OCR section 1557 final rule, and Medicaid regulations.

Response: We thank the commenters recommending we better align our regulations with other relevant regulations. We strive to achieve this goal by better aligning Medicare regulations at 42 CFR 422.2267(a)(2) and 423.2267(a)(2) with OCR regulations at 45 CFR 92.11 and Medicaid regulations at 42 CFR 438.10(d)(2). We note that we have continued to work closely with OCR, the CMS Center for Consumer Information and Insurance Oversight (CCIIO), and other offices throughout the drafting of our rule to ensure alignment of regulations and mitigate burden on plans.

Comment: Several commenters opposed the use of a model notice instead of standardized language for the Notice of Availability. However, another commenter specifically noted support for the model communication approach and urged CMS to routinely review plans' Notices of Availability for compliance. A commenter requested that we work with States to publish a national Notice of Availability and any associated disclaimers, which aligns with all State requirements and accommodates all multi-plan materials by June of every year to reduce complexity and prevent enrollee confusion. Another commenter asked that we use specific notice language to ensure that all enrollees receive a full explanation of their rights while another commenter expressed concern that a model notice may result in more errors. Finally, another commenter recommended we collaborate with relevant stakeholders to develop a single, uniform Notice of Availability that can be used by health plans and providers without customization in the top 31 languages spoken nationally to accommodate 99 percent of the LEP population.

Response: We appreciate the commenters' concerns that a model Notice of Availability rather than standardized language may result in more errors and the concern with ensuring enrollees receive a full explanation of their rights. We also appreciate the support in making the Notice of Availability a model communication.

To mitigate errors in messaging, we specified that the content of the Notice of Availability must include at minimum, a statement that the MA organization provides language assistance services and appropriate auxiliary aids and services free of charge. In addition, for the purpose of compliance with section 1557 of the Affordable Care Act, OCR will be providing model language translated into the 15 languages most commonly spoken by individuals with LEP in every State and nationally that plans can use as a template to comply with the proposed CMS notice requirements. Also, allowing the use of a model Notice of Availability provides flexibility for D–SNPs in States that may require the use of a specific tagline or Notice language so that they do not have to include additional language in materials. We believe that allowing this flexibility along with the OCR model language outweighs the risk of errors in messaging.

We also thank the commenter for the recommendation to develop a Notice of Availability list translated in the top 31 languages spoken nationally. However, we believe that a list of 31 languages would be too long. As we explained in the proposed rule (88 FR 78525), States with AIP D–SNPs contacted CMS concerned that compliance with Medicaid requirements at § 438.10(d)(2) and Medicare requirements at §§ 422.2267(e)(31) and 423.2267(e)(33) would require D–SNPs to include a Notice with a long list of languages in the required materials. One State described how their current list of languages to comply with Medicare and Medicaid requirements for D–SNPs was over four pages. We noted this as a reason for updating this regulation in the proposed rule. As the commenter points out, lengthy notices can dilute the primary message, making it more difficult for enrollees to receive critical information. Lengthy inserts can also increase costs for plans.

Comment: A commenter encouraged us to promote flexibility for plans to send materials digitally as nearly a quarter of the commenter's plan enrollees selected to receive plan materials electronically. The commenter suggested we require MA organizations to ask enrollees for email address and cell phone information as part of the enrollment application.

Response: We clarify that plans may send the Notice of Availability digitally with required materials as described and permitted in proposed §§ 422.2267(e)(31)(vii) and 423.2267(e)(33)(vii) which we have renumbered as §§ 422.2267(e)(31)(ii)(G) and 423.2267(e)(33)(ii)(G) in this final rule that the notice may be provided electronically when a required material is provided electronically as permitted under §§ 422.2267(d)(2) and 423.2267(d)(2). We also note that the model MA enrollment form includes a section where enrollees can note materials they would like to receive via email and the option to add their email address. Enrollees may also include their cell phone number in the application.

Comment: A commenter questioned if the reference to ''auxiliary aids'' in the CMS proposal equates to what CMS traditionally considered alternate formats: audio, large print, and braille. Another commenter requested that braille be exempt from the requirement because plans know that an enrollee's preference is braille if the enrollee is already receiving documents in braille.

Response: We thank the commenter for the question and clarify that, in alignment with OCR, we define ''auxiliary aids'' as written in 45 CFR 92.102.[72] As noted, plans must provide the Notice of Availability in alternate formats, if requested. If an enrollee indicates a preference for receiving materials in braille, the plan should also provide that enrollee with the Notice of Availability text in English braille, and then—not in braille—include the text in the 15 languages most commonly

[72] *https://www.ecfr.gov/current/title-45/section-92.102.*

spoken by individuals with LEP in the State or States associated with the plan benefit package service area, informing them of the availability of verbal translation services as well as alternate formats. If an enrollee requests materials in large print, then the plan should provide them with the Notice of Availability text in English in large print and in at least the 15 languages most commonly spoken by individuals with LEP in the State or States associated with the plan benefit package service area. Plans must also comply with section 504 of the Rehabilitation Act and section 1557 of the Affordable Care Act, which may include providing the Notice of Availability in an alternate format or providing another auxiliary aid or service such as braille. Thus, if an enrollee is in need of the Notice of Availability in an alternate format or through another auxiliary aid or service, the enrollee's plan would likely already be required to provide the Notice of Availability in the requested medium, to comply with section 504 and section 1557.

Comment: Some commenters recommended that we delay the effective date or enforcement of the requirement to CY 2026 or until OCR's final rule is released to ensure consistency and prevent what they characterize as undue burden to plans. A commenter stated a concern with being able to include the associated costs in their 2024 MA bids and the time required to make the administrative updates.

Response: We appreciate the commenters' concerns about the timing of our proposal and OCR's section 1557 final rule. We have worked closely with OCR to eliminate potential conflicts with the section 1557 final rule.

We also understand that MA organizations may need to make some administrative adjustments to comply with this requirement. CMS will provide a list of the top 15 languages most commonly spoken by individuals with LEP in each State and nationally, and OCR will provide translations of the model Notice of Availability in those languages. In addition, in this final rule we have updated §§ 422.2267(e)(31) and 423.2267(e)(33) to allow plans to continue using the MLI until the beginning of contract year 2026 marketing on September 30, 2025. However, plans will also have the choice, starting at the beginning of marketing for contract year 2025 on September 30, 2024, of using the Notice of Availability described in subparagraphs 422.2267(e)(31)(ii) and 423.2267(e)(33)(ii) to satisfy the MLI requirement, as provided in §§ 422.2267(e)(31)(i)(G) and 423.2267(e)(33)(i)(G). This flexibility will allow D–SNPs in States requiring a State-specific tagline to use the State tagline for contract year 2025 marketing and communications without also having to include the MLI as well. It will also allow those plans that want to provide a State-specific notice for contract year 2025 marketing and communications to do so. Per §§ 422.2267(e)(31)(ii) and 423.2267(e)(33)(ii), all plans will be required to use the Notice of Availability for CY 2026 marketing and communications beginning September 30, 2025.

Comment: A commenter requested that all levels of government adopt policies ensuring that individuals with LEP have adequate language access to their health care provider. The commenter also recommended we work to ensure that professional language service providers are adequately trained, certified, and compensated, and that opportunities are made available for Medicare beneficiaries, family caregivers, and trained interpreters to provide input on the language used in the model communication materials.

Response: We appreciate the commenter's perspective that professional language service providers should be adequately trained, certified, and compensated. We agree that these are important issues, although matters of compensation are beyond the scope of this rulemaking. We note that OCR will provide model language based on beneficiary testing. In addition, we encourage MA organizations to consult with Medicare beneficiaries, family caregivers, and trained interpreters if they decide to include translations of the Notice of Availability in languages other than those provided by OCR.

Comment: A few commenters recommended that we provide all standard model materials in the top 15 languages that are on the current MLI.

Response: We appreciate the commenters' recommendation, but the requests for CMS to provide translations of all standard model materials are out of scope. Our proposal pertains to notifying enrollees of the availability of verbal translation services, not the translations of written model materials themselves. However, we note that in contract year 2024, CMS did translate the Annual Notice of Changes (ANOC), Evidence of Coverage (EOC), EOC errata, Explanation of Benefits (EOB), Provider Directory, Pharmacy Directory, Formulary, Low-Income Subsidy (LIS) Rider, and Part D transition letter in Chinese, Korean, Spanish, and Vietnamese. We also remind commenters that OCR will provide translations of the model Notice of Availability in the 15 languages most commonly spoken by individuals with LEP in each State and nationally. Additionally, we note that §§ 422.2267(a)(3) and 423.2267(a)(3) obligate plans to provide required materials to enrollees on a standing basis in any of the non-English languages identified in §§ 422.2267(a)(2) or (a)(4) and 423.2267(a)(2) or (a)(4) or in an accessible format, when an enrollee makes a request to receive these materials in a non-English language or accessible format.

Comment: A few commenters stated that the 5 percent service area threshold is not inclusive enough and recommended that we set a threshold of either 5 percent or 1,000 people, whichever is lower, in a service area. Another commenter requested that there be an undefined standard to ensure that smaller language communities receive the Notice of Availability in their preferred language.

Response: We appreciate the commenters' perspectives on this issue, but changes to the threshold for the translation requirement are beyond the scope of this regulation. We believe policy making on this issue would benefit from further study and engagement with interested parties, including notice to the public and the opportunity to submit comments on this topic.

Comment: A commenter strongly encouraged us to minimize future modifications to the Notice of Availability as such fluctuations over the years have created administrative burden and increased costs for plans.

Response: We agree with the commenter that limiting future modifications to regulations regarding notification of the availability of language assistance services and auxiliary aids and services would help reduce burden. We will work to limit future changes. Moreover, we anticipate the policy we are finalizing, which better aligns Medicare translation requirements with Medicaid and OCR requirements, will mitigate the need for future updates.

After considering the comments we received and for the reasons outlined in the proposed rule and our responses to comments, we are finalizing revisions to paragraphs at §§ 422.2267(e)(31) and 423.2267(e)(33) as follows: We are allowing plans a choice in the applicability date for the updates to §§ 422.2267(e)(31) and 423.2267(e)(33). Plans may implement the changes for contract year 2026 marketing and communications beginning September

30, 2025, or contract year 2025 marketing and communications beginning September 30, 2024. As a result, we are adding the heading *Notice of availability of language assistance services and auxiliary aids and services (Notice of Availability)* at §§ 422.2267(e)(31) and 423.2267(e)(33) and modifying sections §§ 422.2267(e)(31)(i) and 423.2267(e)(33)(i) to read, ''Prior to contract year 2026 marketing on September 30, 2025, the notice is referred to as the *Multi-language insert (MLI).* This is a standardized communications material which states, 'We have free interpreter services to answer any questions you may have about our health or drug plan. To get an interpreter, just call us at [1–xxx–xxx–xxxx]. Someone who speaks [language] can help you. This is a free service.' in the following languages: Spanish, Chinese, Tagalog, French, Vietnamese, German, Korean, Russian, Arabic, Italian, Portuguese, French Creole, Polish, Hindi, and Japanese.'' We are then inserting the former rule sections §§ 422.2267(e)(31)(i)–(vi) and 423.2267(e)(33)(i)–(vi) and renumbering them as §§ 422.2267(e)(31)(i)(A)–(F) and 423.2267(e)(33)(i)(A)–(F). We are also including a clarification in §§ 422.2267(e)(31)(i)(B) and 423.2267(e)(33)(i)(B) to incorporate the exception that we are finalizing in §§ 422.2267(e)(31)(i)(G) and 423.2267(e)(33)(i)(G), which will allow plans to utilize the new model notice described in §§ 422.2267(e)(31)(ii) and 423.2267(e)(33)(ii) to satisfy the existing MLI requirement during contract year 2025. We are also adding § 422.2267(e)(31)(i)(G) stating, ''At plan option for CY 2025 marketing and communications beginning September 30, 2024, the plan may use the model notice described in subparagraph 422.2267(e)(31)(ii) to satisfy the MLI requirements set forth in this subparagraph (i).'' We are adding an identical provision at § 423.2267(e)(33)(i)(G) except with a reference to subparagraph 423.2267(e)(33)(ii).

We are modifying sections §§ 422.2267(e)(31)(ii) and 423.2267(e)(33)(ii) to state, ''For CY 2026 marketing and communications beginning September 30, 2025, the required notice is referred to as the *Notice of availability of language assistance services and auxiliary aids and services (Notice of Availability).* This is a model communications material through which MA organizations must provide a notice of availability of language assistance services and auxiliary aids and services that, at a minimum, states that the MA organization provides language assistance services and appropriate auxiliary aids and services free of charge.'' We are then redesignating sections §§ 422.2267(e)(31)(i)–(vi) and 423.2267(e)(33)(i)–(vi) as new paragraphs §§ 422.2267(e)(31)(ii)(A)–(G) and 423.2267(e)(33)(ii)(A)–(G). For the redesignated paragraphs (e)(31)(ii)(A) and (e)(33)(ii)(A) we are adding ''or States associated with the plan's service area'' between the proposed language ''relevant State'' and ''and must be provided . . .'' to reduce the burden on organizations with plan benefit packages that operate in more than one State and conform with the section 1557 proposed rule, and to clarify that the requirement is based on the plan benefit package service area. Paragraph (A) will specify that this notice of availability of language assistance services and auxiliary aids and services must be provided in English and at least the 15 languages most commonly spoken by individuals with limited English proficiency of the relevant State or States associated with the plan's service area and must be provided in alternate formats for individuals with disabilities who require auxiliary aids and services to ensure effective communication.

Q. Expanding Permissible Data Use and Data Disclosure for MA Encounter Data (§ 422.310)

Section 1853(a) of the Act requires CMS to risk-adjust payments made to Medicare Advantage (MA) organizations. In order to carry out risk adjustment, section 1853(a)(3)(B) of the Act requires submission of data by MA organizations regarding the services provided to enrollees and other information the Secretary deems necessary. The implementing regulation at § 422.310(b) requires that MA organizations submit to CMS ''the data necessary to characterize the context and purposes of each item and service provided to a Medicare enrollee by a provider, supplier, physician, or other practitioner.'' Currently, § 422.310(d)(1) provides that MA organizations submit risk adjustment data equivalent to Medicare fee-for-service (FFS) data to CMS as specified by CMS. MA encounter data, which are comprehensive data equivalent to Medicare FFS data, are risk adjustment data.[73]

Section 1106(a)(1) of the Act authorizes the Secretary to adopt regulations governing release of information gathered in the course of administering programs under the Act. In addition, section 1856(b) of the Act authorizes CMS to adopt standards to carry out the MA statute, and section 1857(e)(1) of the Act authorizes CMS to add contract terms that are not inconsistent with the Part C statute and are necessary and appropriate for the program. The regulation at § 422.310(f)(1) establishes permissible CMS uses of MA encounter data (referred to as ''risk adjustment data'' in the regulation), while § 422.310(f)(2) and (f)(3) establish rules for CMS release of data. Prior to 2008, § 422.310(f) provided for CMS to use MA risk adjustment data to risk adjust MA payments and, except for any medical record data also collected under § 422.310, for other purposes. Over time, we subsequently refined the regulatory language describing the scope of permissible uses and releases of the MA risk adjustment data, including MA encounter data, to (i) risk adjusting MA payments, (ii) updating risk adjustment models, (iii) calculating Medicare disproportionate share hospital percentages, (iv) conducting quality review and improvement activities, (v) for Medicare coverage purposes, (vi) conducting evaluations and other analysis to support the Medicare program (including demonstrations) and to support public health initiatives and other health care-related purposes, (vii) for activities to support administration of the Medicare program, (viii) for activities to support program integrity, and (ix) for purposes authorized by other applicable laws (70 FR 4588; 73 FR 48650 through 48654; 79 FR 50325 through 50334).

Section 422.310(f)(2) permits the release of MA encounter data to other HHS agencies, other Federal executive branch agencies, States, and external entities, and § 422.310(f)(3) of our current regulation specifies circumstances under which we may release MA encounter data for the purposes described in § 422.310(f)(1). Existing regulations allow release of the data after risk adjustment reconciliation for the applicable payment year has been completed, under certain emergency preparedness or extraordinary circumstances, and when CMS determines that releasing aggregated data before reconciliation is necessary and appropriate for activities to support the administration of the

[73] See System of Records Notices for the CMS Encounter Data System (EDS), System No. 09–70–0506, published June 17, 2014 (79 FR 34539), as amended at February 14, 2018 (83 FR 6591); and for the CMS Risk Adjustment Suite of Systems (RASS), System No. 09–70–0508, published August 17, 2015 (80 FR 49237), as amended at February 14, 2018 (83 FR 6591).

Medicare program (finalized in the CY 2024 Payment Policies Under the Physician Fee Schedule and Other Changes to Part B Payment and Coverage Policies; Medicare Shared Savings Program Requirements; Medicare Advantage; Medicare and Medicaid Provider and Supplier Enrollment Policies; and Basic Health Program final rule (88 FR 79400)). We noted in the November 2023 proposed rule that further expanding MA encounter data sharing to include support for the Medicaid program would be consistent with the goals of the Federal Coordinated Health Care Office, as established in statute (88 FR 78527).

MA enrollment has grown to approximately half of all Medicare beneficiaries; a trend also seen in the enrollment of dually eligible individuals. For example, 51 percent of all dually eligible individuals were enrolled in an MA plan in 2021 (up from 12 percent in December 2006).[74] [75] Such individuals experience the health care system and incur health outcomes as individuals regardless of which health care program pays for the service, but currently, the States' ability to obtain MA encounter data for program analysis and evaluations or program administration for dually eligible individuals enrolled in an MA plan is limited to support of a Medicare-Medicaid demonstration. Our current regulation text does not specify that we may make MA encounter data available to States for Medicaid program administration or to conduct evaluations and other analyses for the Medicaid program, with the exception of those evaluations and analyses used to support demonstrations. Therefore, previous rulemaking limited opportunities for States to effectively perform functions such as coordination of care, quality measure design, and program evaluation and analysis by allowing them access to MA encounter data for these activities only for those dually eligible individuals enrolled in Medicare-Medicaid demonstrations.

We proposed changes to § 422.310(f) to improve States' access to MA encounter data, including making a specific exception to the timing of sharing MA encounter data. We noted that we did not intend for our proposals to impact the terms and conditions governing CMS release of MA risk adjustment data as described in § 422.310(f)(2), in accordance with applicable Federal laws and CMS data sharing procedures. As discussed in the August 2014 final rule, CMS data sharing procedures require each recipient of data from CMS to sign and maintain a CMS data sharing agreement, ''which addresses privacy and security for the data CMS discloses'' and ''contains provisions regarding access to and storage of CMS data to ensure that beneficiary identifiable information is stored in a secure system and handled according to CMS's security policies,'' which encompasses the limitations for additional disclosure of CMS data (79 FR 50333). We noted that such provisions would similarly apply to States that receive MA encounter data under our proposed amendments to § 422.310(f).

As stated in the August 2014 final rule, the data described in paragraphs (a) through (d) would include those elements that constitute an encounter data record, including contract, plan, and provider identifiers, with the exception of disaggregated payment data (79 FR 50325). In accordance with § 422.310(f)(2)(iv), we aggregate payment data to protect commercially sensitive information.

1. Expanding and Clarifying the Programs for Which MA Encounter Data May Be Used for Certain Allowable Purposes

As we stated in the Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and Fiscal Year 2015 Rates; Quality Reporting Requirements for Specific Providers; Reasonable Compensation Equivalents for Physician Services in Excluded Teaching Hospitals; Provider Administrative Appeals and Judicial Review; Enforcement Provisions for Organ Transplant Centers; and Electronic Health Record (EHR) Incentive Program proposed rule (hereafter referred to as the May 2014 proposed rule; 79 FR 27978), using MA encounter data enables us, our contractors, and external entities to support Medicare program evaluations, demonstration designs, and effective and efficient operational management of the Medicare program, encourages research into better ways to provide health care, and increases transparency in the administration of the Medicare program (79 FR 28281 through 28282). However, because States lack access to MA encounter data, States' ability to conduct activities for dually eligible individuals enrolled in MA plans is limited. As Medicare is the primary payer for dually eligible individuals, States generally lack comprehensive data on care provided to dually eligible individuals enrolled in MA. Over the years, various States have requested that CMS share MA encounter data for dually eligible individuals to better coordinate care, conduct quality improvement activities, support program design, conduct evaluations, and improve efficiency in the administration of the Medicaid program.

Our current regulation text at § 422.310(f)(1)(vi) (evaluations and analysis to support the Medicare program) and (vii) (activities to support administration of the program) specifies that, for these purposes, the encounter data must be used for the Medicare program. Therefore, though § 422.310(f)(2) permits CMS to release MA encounter data to States for the purposes listed in paragraph (f)(1), § 422.310(f)(1)(vi) and (vii) do not clearly permit CMS to release MA encounter data to States to support Medicaid program evaluations and analysis or to support administration of the Medicaid program.

We proposed to add ''and Medicaid program'' to the current MA encounter data use purposes codified at § 422.310(f)(1)(vi) and (vii) and explained that these additions would enable CMS to use the data and release it (in accordance with § 422.310(f)(2) and (3)) for the purposes of evaluation and analysis and program administration for Medicare, Medicaid, or Medicare and Medicaid combined purposes. We stated our belief that our release of MA encounter data for data use purposes that support the Medicare and Medicaid programs would generally be to the States and would support our responsibility to improve the quality of health care and long-term services for dually eligible individuals; improve care continuity, ensuring safe and effective care transitions for dually eligible individuals; improve the quality of performance of providers of services and suppliers under the Medicare and Medicaid programs for dually eligible individuals; and support State efforts to coordinate and align acute care and long-term care services for dually eligible individuals with other items and services furnished under the Medicare program.

We noted in the November 2023 proposed rule that, as stated above, CMS's usual data sharing procedures apply to the release of MA encounter data in accordance with § 422.310(f)(2) and address access to and storage of CMS data to ensure that beneficiary identifiable information is protected. We explained that we make other data available to external entities, including

[74] 2023 Medicare Trustees Report *https://www.cms.gov/oact/tr.*

[75] *https://www.cms.gov/files/document/managedcareenrollmenttrendsdatabrief2012-2021.pdf.*

States, in accordance with CMS data sharing procedures and Federal laws, including but not limited to the Privacy Act of 1974. We further explained that we review data requests for appropriate use justifications, including updated or amended use justifications for existing data requests, and we employ data sharing agreements, such as a Data Use Agreement and Information Exchange Agreement, that limit external entities to CMS-approved data uses and disclosure of CMS data. For example, States that request data from CMS for care coordination and program integrity initiatives may disclose the data to State contractors, vendors, or other business associates for those activities. In accordance with CMS data sharing agreements, these State contractors, vendors, or other business associates must also follow the terms and conditions for use of the CMS data, including limiting use of the CMS-provided data only for approved purposes. We explained that this would mean that, under our proposal, a State receiving MA encounter data for care coordination may disclose MA encounter data to Medicaid managed care plans to coordinate services for enrolled dually eligible individuals. We noted that comments submitted on the August 2014 final rule cited concerns that access to MA encounter data by competitors of the various MA organizations that are required to submit data could permit a competitor to gain an advantage by trending cost and utilization patterns over a number of years. We explained that § 422.310(f)(2)(iv) provides for aggregation of dollar amounts reported for the associated encounter to protect commercially sensitive data and that any release of MA encounter data to States would comply with applicable statutes, regulations, and processes including those described above, and we expressed our belief that concern around potential competitive advantage would be mitigated if the risk exists at all. We noted that, as stated in the August 2014 final rule, we believe that CMS data sharing procedures and review of use justifications ''strikes an appropriate balance between the significant benefits of furthering knowledge'' and the concerns regarding the release of risk adjustment data, including about beneficiary privacy or commercially sensitive nature of encounter information submitted by MA plans (79 FR 50328). Consistent with what we stated in the August 2014 final rule, CMS data sharing agreements have enforcement mechanisms, and data requestors acknowledge these mechanisms. For example, penalties under section 1106(a) of the Social Security Act [42 U.S.C. 1306(a)], including possible fines or imprisonment, and criminal penalties under the Privacy Act [5 U.S.C. 552a(i)(3)] may apply, as well as criminal penalties that may be imposed under 18 U.S.C. 641 (79 FR 50333). Requestors of CMS data, such as States, are responsible for abiding by the law, policies, and restrictions of the data sharing agreements—which extends to any downstream disclosures of the data to State contractors, vendors, or other business associates—as a condition of receiving the data. We noted our intent to only approve requests for MA encounter data that have clear written data use justifications and identify any downstream disclosure—such as to State contractors, vendors, or other business associates—for each requested purpose. We have not identified any issues regarding competitive harm or disadvantage in our current data sharing programs.

As stated in the November 2023 proposed rule, this proposal would allow us to use MA encounter data and disclose it—subject to the other limitations and protections specified in § 422.310(f) and other applicable laws and regulations—to States to perform evaluations and analysis, which would include program planning for dually eligible individuals. Currently, States generally only receive Medicare FFS data from CMS under current authorities, which results in an incomplete assessment of the dually eligible population. Under our proposal, we noted that States could request MA encounter data for all of the dually eligible enrollees they serve and include this growing portion of the dually eligible population in their data analysis and efforts to improve outcomes for low-income older adults and people with disabilities who are enrolled in the Medicaid program.

In the August 2014 final rule, we stated that, in addition to use of these data for review of bid validity and MLR, we expected there would be additional potential uses for these data as part of the program administration purpose, such as the development of quality measures (79 FR 50326). Consistent with our expectation at that time, we clarified in the November 2023 proposed rule that care coordination would be an allowable use for these data as part of the purpose currently codified at § 422.310(f)(1)(vii)—for activities to support the administration of the Medicare program—which includes activities that are not within the scope of the other permitted uses defined at § 422.310(f)(1). Similar to quality measure development, a use we explicitly named, care coordination is critical to ensuring that individuals receive effective and efficient care, especially when services may be covered under multiple health care programs, as is the case for dually eligible individuals who are enrolled in Medicaid and an MA plan. We also stated our belief that use and release of MA encounter data to States to support administering the Medicaid program, including to coordinate care and improve quality of care for Medicaid-covered individuals, is appropriate. We provided the example that, in administering the Medicaid program, a State may need MA encounter data to coordinate care for dually eligible individuals, which may include identification of individuals at high risk of institutional placement or other undesirable outcomes based on past service utilization; coordination of services from the MA plan's coverage of an inpatient stay to Medicaid coverage of subsequent home and community-based services; coordination of Medicaid-covered services in a skilled nursing facility for a dually eligible individual after reaching the limits of the individual's coverage through the MA plan; monitoring nursing facility quality of care, including through tracking rates of hospitalization and emergency room visits; and coordination of physical health services with behavioral health services, where Medicaid coverage differs from the MA plan's coverage.

2. Adding an Additional Condition Under Which MA Encounter Data May Be Released Prior to Reconciliation

Section 422.310(f)(3) describes the circumstances under which we may release MA encounter data. Specifically, the current regulation provides that MA encounter data will not become available for release unless the risk adjustment reconciliation for the applicable payment year has been completed, we determine it is necessary for certain emergency preparedness purposes, we determine that extraordinary circumstances exist, or we determine that releasing aggregated data is necessary and appropriate to support activities and authorized uses in the administration of the Medicare program. Section 422.310(g) specifies the deadlines that we use to determine which risk adjustment data submissions we will use to calculate risk scores for a given payment year. This section also establishes a reconciliation process to adjust payments based on additional data from the data collection period

(meaning the year the item or service was furnished to the MA enrollee) so long as we receive the submissions before the established final risk adjustment data submission deadline for the payment year, which is no earlier than January 31 of the year following the payment year. This submission window provides MA organizations an opportunity to update or submit encounter data records and chart review records to be considered for risk adjustment and payment in the applicable payment year. Section 422.310(b) requires MA organizations to submit data for all items and services provided to an MA enrollee; therefore, MA organizations must continue to submit encounter data records and data corrections after the final risk adjustment data submission deadline when timely data submissions are determined to be inaccurate, incomplete, or untruthful (see § 422.310(g)(2)(ii) for limitations on which submissions after the final risk adjustment data submission deadline may be used for additional payment). We explained that the timing limitation on release of MA encounter data in our current regulation is tied to the established final risk adjustment data submission deadline for a given payment year, and it results in a data lag of at least 13 months after the end of the MA risk adjustment data collection period (that is, the year during which the item or service was furnished to the MA enrollee), before CMS may release the MA risk adjustment data for the purposes described in § 422.310(f)(1). In the November 2023 proposed rule, we stated our belief that there will be increased utility of MA encounter data for Medicaid programs if the data is released before final risk adjustment reconciliation for coordination of care under the allowable purpose in § 422.310(f)(1)(vii) and that the reasons and concerns we identified when adopting the delay in release of MA encounter data can be sufficiently taken into account by CMS as part of evaluating a request to use the data for specific purposes and determining whether to release the data. Further, in many cases, those reasons and concerns likely do not sufficiently apply in the context of care coordination to require a delay in releasing the data, the further discussion of which we recount below.

In order to improve utility of MA encounter data for certain approved purposes, we proposed to add a new paragraph (f)(3)(v) to § 422.310 to authorize MA encounter data to be released to States for the purpose of coordinating care for dually eligible individuals when CMS determines that releasing the data to a State Medicaid agency before the final risk adjustment reconciliation for a relevant year is necessary and appropriate to support activities and uses authorized under paragraph (f)(1)(vii). As discussed in the November 2023 proposed rule, the proposed amendment to § 422.310(f)(1)(vii) would expand the scope of that provision to include using the data to support administration of the Medicaid program, and in our discussion, we clarified that coordination of care activities are within the scope of activities that support administration of these health care programs. We specified care coordination in our discussion of the proposal for release of MA encounter data prior to final risk adjustment reconciliation, because, as we explained in the November 2023 proposed rule, we believe providing States access to this more timely data is critical to effectively coordinating care which is directly tied to our responsibility to support States' efforts to coordinate and align care and services for dually eligible individuals and furthers our goal to improve care continuity and ensure safe and effective care transitions for dually eligible individuals (see 42 U.S.C. 1315B) while accommodating the concerns that led us to adopt the time limits in § 422.310(f)(3). Together, the proposed changes to § 422.310(f)(1)(vii) and (f)(3)(v) would improve the timeliness of the MA encounter data we make available to States for coordination of care for dually eligible individuals. For care coordination activities, States rely more on timely data about service utilization than on complete data. We stated our belief that improving access to timely MA encounter data and ensuring Medicaid programs can coordinate care for dually eligible individuals supports our goal of providing dually eligible individuals full access to the benefits to which they are entitled (42 U.S.C. 1315B(d)).

As discussed above, States cannot effectively coordinate care for individuals using data that is more than one or two years old. We recognize that the MA encounter data may be subject to edits before final risk adjustment reconciliation given the final risk adjustment data submission deadline for submission of risk adjustment data under § 422.310(g)(2)(ii), which states that the final risk adjustment data submission deadline is a date no earlier than January 31 of the year following the payment year. Therefore, data from some MA organizations or for some enrollees may not be available as quickly as data from or for others. However, we explained that we believe that earlier release of MA encounter data to States for the purpose of care coordination for dually eligible individuals would be appropriate and, as stated above, many of the reasons and concerns to require a delay releasing MA encounter data likely do not sufficiently apply in the context of care coordination. Care coordination activities require States, or their contractors, to identify and contact individuals who have received or are in need of services from their providers. We explained that as States would use the MA encounter data to identify opportunities for care improvement such as improving transitions of care or promoting the use of underutilized services, we did not foresee any risk to individuals from States using data that may be subject to change in the future. States would be able to use the data to identify more dually eligible individuals who are potentially in need of Medicaid-covered services. States are not required to act on the data and can address potential data concerns arising from using MA encounter data before final risk adjustment reconciliation as States have experience using Medicare data that may not be final for effective care coordination. We noted that many States already obtain timely Medicare FFS claims with a lag between 14 days to 3 months, depending on the data file, for uses such as care coordination, quality improvement, and program integrity. These Medicare FFS claims may also be subject to change subsequent to the States' receipt of the data, yet we are not aware of any problems in these use cases caused by CMS sharing data that is still subject to change. Because the MA encounter data released to States would be for care coordination purposes, we do not anticipate any negative impacts from any potential subsequent changes to the encounters. MA encounter data made available to States prior to final risk adjustment reconciliation would not contain disaggregated payment information, in accordance with § 422.310(f)(2)(iv). Additionally, States will not use the pre-reconciliation MA encounter data for plan payment. Under our proposal, release of the MA encounter data for care coordination purposes must be necessary and appropriate to support administration of the Medicaid program; we stated our belief that it would not be appropriate or necessary to use the MA data released on this accelerated schedule for payment purposes (88 FR 78530).

As we explained in the November 2023 proposed rule, coordination of care is a clear situation where more timely MA encounter data is needed for effective intervention without invoking risks that we have cited in the past about sharing MA risk adjustment data before final risk adjustment reconciliation. The timing limits in § 422.310(f)(3) were adopted in the August 2014 final rule in response to comments expressing concern about release of the MA risk adjustment data (79 FR 50331 through 50332). In that prior rulemaking, some commenters cited concerns about release of MA encounter data submitted in the initial years due to concerns regarding systems development and submission challenges. We stated our belief that these concerns were mitigated by the subsequent years since the implementation of the August 2014 final rule that have resulted in accumulation of experience submitting, reviewing, and using MA encounter data in accordance with § 422.310(f). We noted that, in addition, CMS maintains several checks and edits in the encounter data system to minimize duplicate, incomplete, or inappropriate data stored in the encounter data system. In the November 2023 proposed rule, we reiterated that our proposed amendment to paragraph (f)(3) would only permit the release of MA encounter data to State Medicaid agencies for care coordination for dually eligible individuals.

We also explained that we had noted in prior rulemaking that our approach to reviewing requests for MA encounter data from external entities would incorporate the Medicare Part A/B and Part D minimum necessary data policy, with additional restrictions to protect beneficiary privacy and commercially sensitive information of MA organizations and incorporated that limitation into paragraph (f)(2) (79 FR 50327). Further, we noted that this limitation would also apply when reviewing State requests for MA encounter data under the proposed expansion of § 422.310(f)(1)(vi) and (vii), and to any State requests for MA encounter data before the reconciliation deadline to support coordination of care. We explained that CMS data sharing procedures include a review team that assesses data requests for minimum data necessary and appropriate use justifications for care coordination, and we would only approve release of MA encounter data for any data requests where the requestor has sufficiently demonstrated that the request satisfies all requirements of § 422.310(f). We noted that other commenters on the August 2014 final rule had expressed concerns that MA organizations are able to delete, replace, or correct MA encounter data before the reconciliation deadline, which could potentially result in inaccurate or incomplete MA encounter data and that incomplete or inaccurate data should not be used or released for the purposes outlined in § 422.310(f). Additionally, CMS makes available technical assistance to States to help with State use and understanding of Medicare data. In the November 2023 proposed rule, we expressed our intent to extend this technical assistance to States requesting MA encounter data to mitigate issues arising from non-final data, and to evaluate the potential concerns arising from using MA encounter data before final reconciliation when determining whether to release MA encounter data to States for care coordination activities for dually eligible individuals to support administration of the Medicare and Medicaid programs.

Finally, we proposed that these amendments to § 422.310(f) would be applicable upon the effective date of the final rule. As outlined in section I.A. of the November 2023 proposed rule, the majority of our proposals were proposed to be applicable beginning January 1, 2025. We stated that we do not believe delaying the applicability of these proposed amendments beyond the effective date of the final rule is necessary because these proposals address CMS's authority to use and share MA encounter data but do not impose any additional or new obligations on MA organizations.

We received the following comments on these two proposals and respond to them below:

Comment: Numerous commenters, including the vast majority who commented on these proposals, expressed support for CMS proposals to expand the allowable MA encounter data uses by adding ''and Medicaid'' to existing uses at § 422.310(f)(1)(vi) and (vii) and our proposal to share MA encounter data with States in advance of reconciliation for the purpose of care coordination for dually eligible individuals. These commenters agreed that these changes would improve States' ability to understand and improve service delivery for dually eligible individuals. Many comments also included additional perceived benefits, such as: identification of unaligned dually eligible individuals (that is, individuals enrolled in one MA plan and a separate, unaligned Medicaid managed care plan); D–SNP program planning; assessing supplemental benefit use; facilitating development of a long term services and supports dashboard to inform policy and quality improvement efforts; ensuring proper payment for services and determination of third party liability with minimal disruption to providers; focusing outreach for service provision by Medicaid managed care plans; analysis for required reporting on managed care network adequacy and service access; eliminating potentially duplicative evaluations; and providing continuity within both primary and specialty care for dually eligible individuals.

Response: We appreciate the comments and support.

Comment: A commenter requested clarification on how the facilitation of the data exchange may occur and if this requires data exchange agreements, three-way contracts, business associate agreements, or other contractual arrangements.

Response: To effectuate encounter data sharing with States, we would utilize our existing pathways for new data requests, including the existing data transfer mechanisms and data sharing agreements that we currently hold with the States for the disclosure of Medicare data. As stated in the proposed rule, we ''review data requests for appropriate use justifications, including updated or amended use justifications for existing data requests'' and ''employ data sharing agreements, such as a Data Use Agreement and Information Exchange Agreement, that limit external entities to CMS-approved data uses and disclosure of CMS data'' (88 FR 78528).

Comment: Many commenters supported CMS's intent to provide technical assistance and emphasized its importance. A few of those commenters provided suggestions on technical assistance that we could provide to States for encounter data, including sharing information on best practices for utilizing the data; content and limitations of the data set; data request processes and timelines; disclosure parameters and suggested uses for the data; purposes not permitted; data linkage; and building data infrastructure for use of MA encounter data.

Response: We thank these commenters for their suggestions. We agree that technical assistance to States would be an important aspect of sharing MA encounter data. As we noted in our proposal, we intend to provide technical assistance to States, such as the CCW Medicare Encounter Data User Guide (*https://www2.ccwdata.org/web/guest/user-documentation*), to help them make the most effective use of MA

encounter data, including ways to mitigate issues arising from non-final data, potential concerns arising from using MA encounter data before final reconciliation, and what disclaimers are appropriate to provide to requestors, to help them understand the limitations of the MA encounter data (88 FR 78531). We will take these suggestions into consideration when developing our technical assistance approach.

Comment: A commenter provided additional suggestions for our communication around sharing of MA encounter data with States. These suggestions included notifying plans when MA encounter data is shared with a State, guidance to States on how to communicate with plans and address anomalies, particularly when the State is analyzing and interpreting these data for performance evaluation and quality reporting, and publishing a report following 2 years of implementation that provides the industry with information on how the sharing of MA encounter data has facilitated greater coordination, integration, and quality measure alignment.

Response: We thank the commenter for these suggestions. We will take them into consideration as we establish operational processes to support sharing MA encounter data with States.

Comment: A commenter supported CMS proposals and suggested CMS include other data collected from or submitted by MA organizations, such as data obtained from chart reviews, lab results, EMR records, and other clinical documents, in addition to MA encounter data in the data that is shared with States under § 422.310(f).

Response: We note that current regulation at § 422.310(f) specifies the purposes and procedures according to which we may use and release the MA risk adjustment data, which is defined in § 422.310(a) and includes encounter data and other data submitted by MA organizations for risk adjustment purposes (such as chart review records, which are reports of diagnoses, and may be sourced from chart reviews, lab results, EMR record or other clinical documents). However, aside from the chart review records, any clinical documentation that CMS may have access to will not be released. The regulation at § 422.310(f) excludes the use and release of the data described at § 422.310(e) for validation of risk adjustment data; this means that the medical records or other clinical documents that MA organizations submit to validate their risk adjustment submissions are not released under § 422.310(f). CMS did not propose any changes to expand data sharing to include medical records or other clinical documents; therefore, CMS is not finalizing any regulatory changes related to sharing such information.

Comment: Some commenters stressed the importance of establishing strong measures to ensure data privacy and security when disclosing MA encounter data, including limiting access to medical records to protect the trust and security of the physician-patient relationship and the safety of the patient.

Response: We appreciate these comments underscoring the importance of protecting data privacy and security. In the proposed rule, we stated that we disclose data in accordance with applicable Federal laws and CMS data sharing procedures that include privacy and security measures for data sharing to protect individuals' PHI and PII, (88 FR 78527). We also noted in our proposed rule the following additional CMS data sharing processes to protect the safety of the individual: we review data requests for appropriate use justifications, employ data sharing agreements that limit data requestors to CMS-approved data uses and disclosure of CMS data, and include enforcement mechanisms; and data requestors acknowledge these mechanisms and that they will abide by the law, policies, and restrictions of the data sharing agreements as a condition of receiving the data (88 FR 78528). We will only approve data requests that are within the allowable uses of MA risk adjustment data (generally MA encounter data) as detailed in § 422.310(f)(1). With regard to the comment about limiting access to medical records, as discussed in a prior response to a public comment, § 422.310(f) does not authorize the release of medical records or other records submitted by an MA organization under § 422.310(e) to validate its risk adjustment data submissions.

Comment: Some commenters underscored the importance of data quality and provided recommendations to ensure data accuracy and completeness. These recommendations included suggesting that CMS continue to seek ways to improve the completeness of encounter data, including considering MedPAC's 2019 recommendation on MA encounter data completeness; considering ways to ensure that data is as accurate as possible when shared to avoid incorrect care planning and potential patient harm; and providing further clarity on how this data will be communicated. Additionally, a commenter recommended CMS avoid any changes that may impact data quality or how MA organizations currently report to CMS and State Medicaid programs.

Response: We thank these commenters for the recommendations to ensure data quality and accuracy. We reiterate our intent to provide technical assistance and necessary resources for data requestors, including appropriate disclaimers to help requestors understand the limitations of the MA encounter data (88 FR 78531). We stated in the proposed rule that we do not foresee any potential patient harm from States using data that may be subject to change in the future since States would use the MA encounter data to identify opportunities for care improvement, such as improving transitions of care or to promote the use of underutilized services, and that States are not required to act on the data. We also explained that States have experience using Medicare data that may not be final for effective care coordination (88 FR 78530). We appreciate MedPAC's 2019 recommendations and note that we have been working with MA plans to ensure that the accuracy and completeness of MA encounter data improve over time. We note that we have released the *Request for Information: Medicare Advantage Data* to solicit feedback ''on all aspects of data related to the MA program—both data not currently collected as well as data currently collected,'' including ''precise detail and definitions on the data format, fields, and content that would facilitate comprehensive analyses of any publicly released MA data, including comparisons with existing data sets'' and ''recommendations related to operational considerations as part of this effort'' (89 FR 5907 through 5908).

Additionally, we confirm that our proposal does not impact how MA plans submit MA encounter data to CMS. As mentioned above, we will utilize our existing pathways for new MA encounter data requests, including the existing data transfer mechanisms.

Comment: A commenter raised the concern that in order for the proposed policies to be meaningful, States would need necessary resources and infrastructure in place to utilize MA encounter data effectively. The commenter also explained that it is important to coordinate with States to understand their current and planned capacity for ingesting and utilizing the MA encounter data before proceeding. The commenter further stressed that without sufficient IT supports and specific plans for how to leverage MA encounter data, providing the data as proposed would not achieve CMS's goals. Another commenter suggested

that MA encounter data be available at the discretion of the State, as with other Medicare data sharing, as not all State systems are sophisticated enough to use this data.

Response: We appreciate the comments regarding States' capabilities for intake and analysis of the MA encounter data. Many States have extensive history with encounter data through their Medicaid managed care programs. Many also have experience working with Medicare FFS and MA encounter data. For example, since 2011, we have disclosed Medicare data to States to support the dually eligible population, and over 30 States have requested and used, or are still using, these data. Another example is that numerous States currently receive and use MA encounters directly from MA plans in accordance with the terms of a demonstration or as detailed by the contract held by a D–SNP with the State. Additionally, our data sharing agreements require States attest to certain requirements regarding appropriate administrative technical and physical safeguards to protect the integrity, security, and confidentiality of the data as well as system security requirements in order to request data from us. Nonetheless, capacity and experience vary across States, and we confirm our stated intention in the proposed rule that MA risk adjustment data would be available, consistent with § 422.310(f) as amended, when the State requests such data; a State's request for MA encounter data from CMS would be voluntary.

Comment: A few commenters raised questions regarding duplicative data sharing practices and the requirements in some State Medicaid agency contracts (SMACs) for D–SNPs to submit MA encounter data directly to States. A commenter asked how the proposed change would impact existing SMAC requirements, which may currently require such data sharing between D–SNPs and the State, and whether our proposal would create redundancies, inefficiencies, or simply obviate the need for such data sharing. A commenter wished to avoid duplicating any data sharing practices currently in place, and suggested we collaborate with MA plans and States to determine if data sharing can be streamlined through one process. Another commenter suggested removing the requirement for D–SNPs to submit MA encounter data directly to States and, instead, CMS would create a uniform set of MA encounter data available from a central organization, eliminating 50 different systems that collect data in different ways, formats, and times.

Response: We appreciate the interest in streamlining data sharing processes and will consider these comments as we implement the final rule. However, nothing in our final rule imposes any additional or new obligations on MA organizations (88 FR 78531) or creates any additional data sharing or data reporting burden for MA plans. These comments relate to MA encounter data that D–SNPs submit to States in accordance with SMACs established under § 422.107(d)(1). Changes to SMAC requirements about data sharing or data access are outside the scope of our current proposals and are subject to negotiation between the MA organization (or D–SNP) and the State; our current proposals do not directly impact these SMAC requirements or data sharing processes.

Comment: A commenter suggested that CMS provide additional resources for MA organizations on collecting encounter data, citing burdens associated with collecting, processing, and submitting the data. Another commenter suggested that CMS encourage MA plans to submit more timely, higher quality, and uniform MA encounter data directly to States to improve usability for time-sensitive care coordination.

Response: We believe that these suggestions for additional resources for MA organizations to collect MA encounter data and encouraging MA plans to submit more timely, higher quality data directly to States are beyond the scope of this rule. However, as mentioned above, we released the *Request for Information: Medicare Advantage Data* to solicit additional feedback on all aspects of data related to the MA program, including ways that we could improve our current MA data collection and release methods (89 FR 5907).

Comment: A commenter recommended CMS create data sharing agreements to exclude downstream disclosure of MA encounter data to commercial entities. Another commenter expressed concern that changes made by Congress or CMS could expand the type of information captured by MA encounter data in the future to include competitively sensitive information that should not be shared with States. This commenter said that CMS should create an explicit exclusion of payment and pricing data and other competitively sensitive information, indicating that only MA encounter data necessary to support coordination of care, quality measure design, and program evaluation and analysis be shared with States.

Response: As stated in the proposed rule, we intend to only approve requests for MA encounter data that have clear written data use justifications and identify any downstream disclosure—such as to State contractors, vendors, or other business associates—for each requested purpose (88 FR 78528). Also, consistent with what we stated in the August 2014 final rule, CMS data sharing agreements have enforcement mechanisms, and data requestors acknowledge these mechanisms. For example, penalties under section 1106(a) of the Social Security Act [42 U.S.C. 1306(a)], including possible fines or imprisonment, and criminal penalties under the Privacy Act [5 U.S.C. 552a(i)(3)] may apply, as well as criminal penalties may be imposed under 18 U.S.C. 641 (79 FR 50333). Requestors of CMS data, such as States, are responsible for abiding by the law, policies, and restrictions of the data sharing agreements—which extends to any downstream disclosures of the data to State contractors, vendors, or other business associates—as condition of receiving the data. Additionally, we note that current regulation at § 422.310(2)(iv) limits CMS release of MA encounter data ''(s)ubject to the aggregation of dollar amounts reported for the associated encounter to protect commercially sensitive data.'' We stated in the proposed rule that—given that § 422.310(f)(2)(iv) provides for aggregation of dollar amounts reported for the associated encounter to protect commercially sensitive data and that any release of MA encounter data to States would comply with applicable statutes, regulations, and processes including those described above—we believe that concern around potential competitive advantage is mitigated, if the risk exists at all. We have not identified any issues regarding competitive harm or disadvantage in our current data sharing programs, including current disclosure of MA encounter data (88 FR 78528).

Finally, we note that in the Medicare and Medicaid Programs; Patient Protection and Affordable Care Act; Advancing Interoperability and Improving Prior Authorization Processes for Medicare Advantage Organizations, Medicaid Managed Care Plans, State Medicaid Agencies, Children's Health Insurance Program (CHIP) Agencies and CHIP Managed Care Entities, Issuers of Qualified Health Plans on the Federally-Facilitated Exchanges, Merit-based Incentive Payment System (MIPS) Eligible Clinicians, and Eligible Hospitals and Critical Access Hospitals in the

Medicare Promoting Interoperability Program final rule (hereinafter referred to as the January 2024 final rule), we finalized a requirement for impacted payers to employ a Payer-to-Payer API by January 1, 2027 to satisfy two requirements: first, for transfer of data from a previous payer to a current payer for a new enrollee, and second, for quarterly exchange of data between two concurrent payers. Impacted payers include States, Medicaid managed care plans, and MA plans, and therefore would apply to individuals dually enrolled in two or more of these payers—such as between an MA organization and a Medicaid managed care plan (89 FR 8759).

Comment: We received a comment on our discussion in section XI of the November 2023 proposed rule (88 FR 78605), which provided examples where the commenter felt we inadequately justified the need for rulemaking. Specific to our MA encounter data use proposals in this section, the commenter suggested that we include the number of States that have requested such data and provide more specific information about how the wording of the current rule has harmed coordination and quality of care.

Response: As described in the proposed rule, 51 percent of all dually eligible individuals were enrolled in an MA plan in 2021, but previous rulemaking limited opportunities for States to effectively perform functions such as coordination of care, quality measure design, and program evaluation and analysis by allowing them access to MA encounter data for these activities only for those dually eligible individuals enrolled in Medicare-Medicaid demonstrations (88 FR 78527). We also noted in the proposed rule that ''(a)s Medicare is the primary payer for dually eligible individuals, States generally lack comprehensive data on care provided to dually eligible individuals enrolled in MA'' and that ''(o)ver the years, various States have requested that CMS share MA encounter data for dually eligible individuals to better coordinate care, conduct quality improvement activities, support program design, conduct evaluations, and improve efficiency in the administration of the Medicaid program'' (88 FR 78527). We further clarify here that while we do not have a definitive list of all the States that would have requested MA encounter data if it were made available, our contractor conducted an informal poll in 2017 of the States that requested Medicare FFS data and found that 14 out of 15 respondents were interested in requesting MA encounter data if made available. Additionally, during 2022, four States directly asked us for MA encounter data to support specific projects related to dually eligible individuals. In 2023, 26 States (and the District of Columbia) requested Medicare data for dually eligible individuals for care coordination, quality improvement, program planning, and program integrity data uses. The remaining 25 States that did *not* request Medicare data for such uses had various levels of engagement and interaction with our program. Over the previous decade, some of those 25 non-participating States with high managed care penetration cited the lack of MA encounter data as the reason the State did not request Medicare FFS data via our data sharing program.

In the proposed rule, we provided numerous examples of ways States could use MA encounter data. These examples included identification of individuals at high risk of institutional placement or other undesirable outcomes based on past service utilization; coordination of services from the MA plan's coverage of an inpatient stay to Medicaid coverage of subsequent home and community-based services; coordination of Medicaid-covered services in a skilled nursing facility for a dually eligible individual after reaching the limits of the individual's coverage through the MA plan; monitoring nursing facility quality of care, including through tracking rates of hospitalization and emergency room visits; and coordination of physical health services with behavioral health services, where Medicaid coverage differs from the MA plan's coverage (88 FR 78528). As the current regulation at § 422.310(f) does not permit CMS to disclose MA encounter data to States for these data uses, we believe there is harm incurred when States are unable to conduct these activities for dually eligible individuals. We note that we do not know the full extent of States that would have requested MA encounter data if current regulation permitted, the exact data uses for which the States would have used the data, or the number of dually eligible individuals impacted by such data-driven initiatives. However, based on our experience and observations, we believe that it is appropriate to conclude that access to MA risk adjustment data on an accelerated timeframe could support State efforts to coordinate care for dually eligible individuals who are in MA plans.

Finally, as stated in the proposed rule, we believe disclosure for the purpose of improving States' ability to understand and improve care provided to dually eligible individuals is appropriate and consistent with our intention in prior rulemaking regarding uses of MA risk adjustment data and proposed changes to regulation to support our intention (88 FR 78526).

Comment: A commenter recommended additional data sharing efforts for CMS to undertake to improve care coordination for dually eligible individuals. The commenter suggested CMS establish a database with Medicare data for all dually eligible individuals—including Medicare program and contract enrollment data, as well as their Medicare claims data—and disclose to States and plans for coordination across payers. The commenter also suggested requiring States to share standard elements (for example, Medicare program enrollment, Medicare contract number) to Medicaid managed care plans in standard benefit enrollment and maintenance files to facilitate coordination for dually eligible individuals.

Response: We appreciate the suggestions, but they are outside of the scope of our proposal.

After considering the comments received and for the reasons outlined in the proposed rule and our responses to comments, we are finalizing without modification our proposed amendment to add ''and Medicaid program'' to the current MA encounter data use purposes at § 422.310(f)(1)(vi) to conduct evaluations and other analysis to support the Medicare program (including demonstrations) and to support public health initiatives and other health care-related research, and § 422.310(f)(1)(vii) for activities to support the administration of the Medicare program. We are also finalizing without modification our proposed addition of new § 422.310(f)(3)(v) to allow for MA encounter data to be released to States for the purpose of coordinating care for dually eligible individuals when CMS determines that releasing the data to a State Medicaid agency before reconciliation is necessary and appropriate to support activities and uses authorized under paragraph (f)(1)(vii). These amendments to § 422.310(f) will be applicable upon the effective date of this final rule as outlined in section I.A. of this final rule. As explained in the proposed rule, delaying the applicability of these proposed amendments beyond the effective date of the final rule is not necessary because these proposals address CMS's authority to use and share MA risk adjustment data but do

not impose any additional or new obligations on MA organizations.

3. Solicitation of Comments on Use of MA Encounter Data To Support Required Medicaid Quality Reporting

We requested comments on making MA encounter data available to States to support Child and Adult Core Set reporting as efficiently as possible while complying with § 422.310(f) and balancing considerations related to the timeliness of quality reporting with accuracy and completeness. While States are required to include all Medicaid and CHIP beneficiaries in certain mandatory Child and Adult Core Set reporting, including dually eligible individuals, States lack access to the Medicare utilization data needed to report on dually eligible individuals enrolled in MA plans. We discussed these mandatory Core Set reporting requirements and the timing limitations posed by our current regulations in the November 2023 proposed rule (88 FR 78531).

Several commenters supported CMS sharing MA encounter data to States prior to reconciliation for quality review and improvement use. A commenter suggesting alternative options to using MA encounter data prior to reconciliation. We appreciate the support and suggestions for our efforts to improve both the utility of MA encounter data and support of State requirements for quality reporting. We will consider comments and suggestions received as we move forward.

T. Standardize the Medicare Advantage (MA) Risk Adjustment Data Validation (RADV) Appeals Process

In this final rule, we are revising certain timing issues in terms of when RADV medical record review determination and payment error calculation appeals can be requested and adjudicated. Specifically, we proposed that Medicare Advantage (MA) organizations must exhaust all levels of appeal for medical record review determinations before the payment error calculation appeals process can begin. We believed that this clarification was necessary because RADV payment error calculations are directly based upon the outcomes of medical record review determinations. We also proposed several other changes to our regulatory appeals process to conform with these proposed revisions.

Section 1853(a)(1)(C) of the Act requires that CMS risk-adjust payments made to MA organizations. Risk adjustment strengthens the MA program by ensuring that accurate payments are made to MA organizations based on the health status and demographic characteristics of their enrolled beneficiaries, and that MA organizations are paid appropriately for their plan enrollees (that is, less for healthier enrollees who are expected to incur lower health care costs, and more for less healthy enrollees who are expected to incur higher health care costs). Making accurate payments to MA organizations also ensures we are safeguarding Federal taxpayer dollars.

Contract-level RADV audits are CMS's main corrective action for overpayments made to MA organizations when there is a lack of documentation in the medical record to support the diagnoses reported for risk adjustment. CMS conducts RADV audits of MA organization-submitted diagnosis data from a selection of MA organizations for specific payment years to ensure that the diagnoses they submitted are supported by their enrollees' medical records. CMS can collect the improper payments identified during CMS and Department of Health and Human Services Office of Inspector General (HHS–OIG) audits, including the extrapolated amounts calculated by the OIG. The RADV audit appeals process, as outlined in 42 CFR 422.311, is applicable to both CMS and HHS–OIG audits and is therefore referred to as the ''MA RADV audit appeals process.'' Additional information regarding CMS's contract level RADV audits was outlined in the RADV final rule, CMS–4185–F2, published on February 1, 2023.[76]

1. Current MA RADV Appeals Process

CMS previously established a process after notice and comment rulemaking for MA organizations to appeal RADV audit findings as outlined by provisions at 42 CFR 422.311(c)(6)–(c)(8). Once review of the medical records submitted by MA organizations to support audited HCCs is completed and overpayment amounts are calculated, HHS (CMS or HHS–OIG) issues an audit report to each audited MA organization contract. In accordance with § 422.311(b)(1), this audit report includes the following:

- Detailed enrollee-level information relating to confirmed enrollee HCC discrepancies.
- The contract-level RADV-payment error estimate in dollars.
- The contract-level payment adjustment amount to be made in dollars.
- An approximate timeframe for the payment adjustment.
- A description of the MA organization's RADV audit appeal rights.

The MA RADV audit appeals process begins once MA organizations are notified of their audit findings via a RADV audit report. MA organizations have 60 days from the date of issuance of a RADV audit report to file a written request for appeal and must follow the Secretary's RADV audit appeals procedures and requirements under § 422.311. MA organizations may appeal RADV medical record review determinations and/or the MA RADV payment error calculation and must specify which findings the MA organization is appealing when requesting an appeal of a RADV audit finding.

Under CMS's existing RADV audit appeals regulations under 42 CFR 422.311(c)(6)–(8), the MA RADV administrative audit appeals process consists of three levels: reconsideration, hearing, and CMS Administrator review. Below is a summary of the three levels of appeal for background information only. This regulation is not revising the basic structure of these three levels of appeal.

a. Reconsideration

Reconsideration is the first stage of the RADV audit appeals process. When appealing a medical record review determination, the MA organization's written request must specify the audited HCC(s) that it wishes to appeal and provide a justification of why the audited HCC(s) should not have been identified as an error. When appealing a payment error calculation, the MA organization's written request must include its own RADV payment error calculation that clearly indicates where HHS' payment error calculation was erroneous, as well as additional documentary evidence pertaining to the calculation of the error that the MA organization wishes the reconsideration official to consider. For payment error calculation appeals, a third-party who was not involved in the initial RADV payment error calculation reviews the HHS and MA organization's RADV payment error calculations and recalculates, as appropriate, the payment error using the appropriate payment error calculation method for the relevant audit.

The reconsideration official issues a written reconsideration decision to the MA organization, and this decision is considered final unless the MA organization disagrees with the reconsideration official's decision and submits a valid request for CMS hearing officer review. A new audit report is

[76] *https://www.federalregister.gov/documents/2023/02/01/2023-01942/medicare-and-medicaid-programs-policy-and-technical-changes-to-the-medicare-advantage-medicare.*

subsequently issued for either a medical record review determination reconsideration or a payment error calculation reconsideration only if the reconsideration official's decision is considered final.

b. Hearing Officer Review

An MA organization that disagrees with the reconsideration decision may request a hearing officer review in accordance with procedures and timeframes established by CMS under 42 CFR 422.311(c)(7). If the MA organization appeals the medical record review reconsideration determination, the written request for RADV hearing must include a copy of the written decision of the reconsideration official, specify the audited HCC(s) that the reconsideration official confirmed as being in error, and explain why the MA organization disputes the reconsideration official's determination. If the MA organization appeals a RADV payment error calculation, the written request for RADV hearing must include a copy of the written decision of the reconsideration official and the MA organization's RADV payment error calculation that clearly specifies where the MA organization believes the Secretary's payment error calculation was erroneous.

The hearing officer has the authority to decide whether to uphold or overturn the reconsideration official's decision and, pursuant to this decision, sends a written determination to CMS and the MA organization explaining the basis for the decision. If necessary, a third party who was not involved in the initial RADV payment error calculation recalculates the RADV payment error and issues a new RADV audit report to the MA organization. For MA organizations appealing the RADV payment error calculation only, a third party not involved in the initial RADV payment error calculation recalculates the MA organization's RADV payment error and issues a new RADV audit report to the appellant MA organization and CMS. The hearing officer's decision is final unless the decision is reversed or modified by the CMS Administrator.

c. CMS Administrator Review

Under the existing RADV audit appeals regulation at 42 CFR 422.311(c)(8), a request for CMS Administrator review must be made in writing and filed with the CMS Administrator within 60 days of receipt of the hearing officer's decision. After receiving a request for review, the CMS Administrator has the discretion to elect to review the hearing officer's decision or decline to review the hearing officer's decision. If the CMS Administrator elects to review the hearing decision, the CMS Administrator then will acknowledge the decision to review the hearing officer's decision in writing and notify CMS and the MA organization of their right to submit comments within 15 days of the date of the notification. The CMS Administrator renders his or her final decision in writing to the parties within 60 days of acknowledging his or her decision to review the hearing officer's decision. The decision of the hearing officer becomes final if the CMS Administrator declines to review the hearing officer's decision or does not render a decision within 60 days.

2. Proposed Policies

In this final rule, we are revising the timing of when a medical record review determination and a payment error calculation appeal can be requested and adjudicated. Specifically, we proposed that MA organizations must exhaust all levels of appeal for medical record review determinations before beginning the payment error calculation appeals process. We believed that this change was necessary because RADV payment error calculations are based upon the outcomes of medical record review determinations and the current regulatory language is somewhat ambiguous regarding this point. Adjudicating medical record review determination appeals prior to payment error calculation appeals alleviates operational concerns for CMS and burden on MA organizations by preventing unnecessary appeals of payment error calculations that will be moot if revisions must be made to payment error calculations based on medical record review determination appeal decisions.

Section 422.311(c)(5)(iii) states that, ''for [MA organizations] that appeal both medical record review determination appeal and RADV payment error calculation appeal [,] (A) the Secretary adjudicates the request for the RADV payment error calculation following conclusion of reconsideration of the MA organization's request for medical record review determination appeal.'' The regulations also state that, for cases in which an MA organization requests both a medical record review determination appeal and payment error calculation appeal, ''. . . (B) an [MA organization's] request for appeal of its RADV payment error calculation will not be adjudicated until appeals of RADV medical record review determinations filed by the MA organization have been completed and the decisions are *final for that stage of appeal*'' [emphasis added]. This language arguably addresses both those cases in which the final adjudication is reached during the reconsideration phase, as well as those that proceed to the second and third level of appeal. We proposed to delete § 422.311(c)(5)(ii)(C), which requires MA organizations requesting both a medical record review determination appeal and payment error calculation appeal to file their written requests for both appeals within 60 days of the issuance of the RADV audit report before the reconsideration level of administrative appeal. Instead, we proposed that MA organizations may request only a medical record review determination appeal or payment error calculation appeal for purposes of reconsideration, and not both at the same time. We proposed to amend § 422.311(c)(5)(iii) by providing that MA organizations who request a medical record review determination appeal may only request a payment error calculation appeal after the completion of the medical record review determination administrative RADV appeal process.

An MA organization may also choose to only appeal the payment error calculation, and therefore, no preceding medical record review determination appeal will occur. MA organizations choosing to only file a payment error calculation appeal will not be able to file a medical record review determination appeal after the adjudication of payment error calculation appeal. At § 422.311(c)(5)(ii)(B), we proposed to specify that MA organizations will forgo their medical record review determination appeal if they choose to only file a payment error calculation appeal, because medical record review appeals decisions need to be final prior to adjudicating a payment error calculation appeal.

At § 422.311(c)(5)(iii)(A) *and (B),* we proposed to specify that this process is complete when the medical record review determination appeals process has been exhausted through the three levels of appeal, or when the MA organization does not timely request a medical record review determination appeal at the hearing officer or CMS Administrator review stage. At proposed § 422.311(c)(5)(iii)(B), we proposed that an MA organization whose medical record review determination appeal has been completed has 60 days from the issuance of a revised RADV audit report to file a written request for payment error calculation appeal, which specifies the issues with which the MA organization disagrees and the reasons for the disagreements. If, as a result of the medical record review determination appeals process, no

original determinations are reversed or changed, then the original audit report will be reissued, and the MA organization will have 60 days from the date of issuance to submit a payment error calculation appeal if it so chooses.

We also proposed to revise § 422.311(c)(6)(i)(A) to clarify that an MA organization's request for medical record review determination reconsideration must specify any and all audited HCCs from an audit report that the MA organization wishes to dispute. The intent of this revision is to permit an MA organization to submit only one medical record review determination reconsideration request per audited contract, which includes all disputed audited HCCs, given that the results of all audited HCCs for a given audited contract are communicated as part of a single audit report.

We also proposed to revise § 422.311(c)(6)(iv)(B) to clarify that the reconsideration official's decision is final unless it is reversed or modified by a final decision of the hearing officer as defined at § 422.311(c)(7)(x).

We also proposed to add § 422.311(c)(6)(v) to clarify that the reconsideration official's written decision will not lead to the issuance of a revised audit report until the decision is considered final in accordance with § 422.311(c)(6)(iv)(B). If the reconsideration official's decision is considered final in accordance with § 422.311(c)(6)(iv)(B), the Secretary will recalculate the MA organization's RADV payment error and issue a revised RADV audit report superseding all prior RADV audit reports to the appellant MA organization.

We also proposed to revise § 422.311(c)(7)(ix) to clarify that if the hearing officer's decision is considered final in accordance with § 422.311(c)(7)(x), the Secretary will recalculate the MA organization's RADV payment error and issue a revised RADV audit report superseding all prior RADV audit reports for the specific MA contract audit. Once the medical record review determination decision of the adjudicator is final, we believe the same entity that issued the audit report will be able to revise the audit report by applying any medical record review determination findings that may have changed through the medical record review determination appeal process and issue a revised audit report in the most efficient and streamlined manner. Issuing a revised audit report is a standard process and neutrally applies the final adjudicator's medical record review determination findings. This process is consistent with other long standing CMS appeals program, such as the Provider Reimbursement Review Board (PRRB), where post-adjudication revised determinations are issued by the same entity (*e.g.,* the Medicare Administrative Contractor for PRRB cases) that issued the original determination.

- We also proposed the following to provide clarity to the Administrator's level of appeal: To revise § 422.311(c)(8)(iii) to add a requirement that if the CMS Administrator does not decline to review or does not elect to review within 90 days of receipt of either the MA organization or CMS's timely request for review (whichever is later), the hearing officer's decision becomes final.
- To revise § 422.311(c)(8)(iv)(A) to clarify that CMS and the MA organization may submit comments within 15 days of the date of the issuance of the notification that the Administrator has elected to review the hearing decision.
- To revise § 422.311(c)(8)(v) to clarify that the requirement of the Administrator to render a final decision in writing within 60 days of the issuance of the notice acknowledging the decision to elect to review the hearing officer's decision and the 60-day time period is determined by the date of the final decision being made by the Administrator, not by the date it is delivered to the parties.
- To revise § 422.311(c)(8)(vi) to clarify the scenarios in which the hearing officer's decision becomes final after a request for Administrator review has been made.
- To add new § 422.311(c)(8)(vii) that states once the Administrator's decision is considered final in accordance with § 422.311(c)(8)(vi), the Secretary will recalculate the MA organization's RADV payment error and issue a revised RADV audit report superseding all prior RADV audit reports to the appellant MA organization.

We also proposed to add new § 422.311(c)(9) to specify what actions related to the RADV audit appeals process constitute final agency action. Specifically, in cases when an MA organization appeals a payment error calculation subsequent to an MRRD appeal that has completed the administrative appeals process, the MRRD final decision and the payment error calculation final decision will not be considered a final agency action until the related payment error calculation appeal has completed the administrative appeals process and a final revised audit report has been issued.

We also proposed to revise § 422.311(a) to remove the word ''annually'' for clarity, as the Secretary may conduct RADV audits on differing cadences between the CMS and HHS–OIG RADV audits.

3. Summary of Public Comments

We invited public comment on these proposals and received several comments. Specifically, we received numerous comments regarding our proposals related to the timing of requesting and adjudication of MRRD and PEC appeals. We did not receive any comments specifically addressing our proposals related to the finality of decisions at each level of appeal of appeal, nor the requirements for revised or reissued audit reports. We did not receive any comments specifically addressing our proposals related to the requirements affecting the elective Administrator review process. We did not receive any comments specifically related to our proposal concerning the definition of final agency action. A discussion of these comments, along with our responses follows.

Comment: Commenters generally expressed support for our proposed policies regarding the timing of MRRD and PEC appeals. Commenters stated that these proposals will provide needed clarity in the RADV audit appeals process and that by disallowing MRRD appeals and PEC appeals from being adjudicated concurrently, we will avoid potential administrative complications. Commenters generally agreed that these changes will create uniformity and consistency in the appeals process. One commenter, in addition to supporting our proposed appeals policies, encouraged CMS to consider larger scale reforms to reduce substantial overpayments to MA organizations and recover improper payments.

Response: We thank these commenters for their support of our RADV audit program and our appeals proposals. We agree that the proposals will create uniformity and consistency, as well as avoid administrative complications in the appeals process.

Comment: A commenter requested clarification regarding whether completion of the MRRD appeals process is distinct if an MA organization does not have a medical record to review.

Response: Any valid medical record that is reviewed as part of a RADV audit and found to not substantiate the audited diagnosis may be appealed if the MA organization disagrees with the audit finding. If an MA organization does not wish to appeal any of the medical record review determinations or does not request an appeal by the deadline, the MA organization may

proceed with a PEC appeal. If the commenter is asking whether there are MRRD appeal rights when an MA organization does not submit a medical record to substantiate a diagnosis during an audit, pursuant to § 422.311(c)(3)(iv) MA organizations may not appeal RADV errors that result from failure to submit a valid medical record.

Comment: A commenter requested that we alter the proposal to support uniformity between the RADV appeals process and the OIG audit process.

Response: The RADV audit appeals provisions being finalized in this rule are applicable to appeals of RADV audit findings resulting from both CMS and OIG audits. As stated in § 422.311(a), RADV audits are conducted by the Secretary and the results of any such audit by CMS or OIG are appealable pursuant to § 422.311(c). Appeal rights to audit findings based on either CMS or OIG RADV audits begin with the issuance of an audit report that details audit findings.

4. Comments Out of Scope of the Proposed Policies

We received several comments that were beyond the scope of the proposed rule. Commenters sought additional clarification and made recommendations related to the underlying risk adjustment payment model, aspects of the RADV audit methodology related to sampling and extrapolation, and the need for monetary penalties to be applied to providers or other actors that contributed to a negative RADV finding.

We thank commenters for making broad recommendations for changes to the risk adjustment payment model and for the application of monetary penalties; however, the scope of this rule is limited to the RADV audit appeals process.

Regarding the use of extrapolation and other aspects of RADV audit methodology, the RADV audit appeals process is limited to medical record review determinations and payment error calculations communicated to MA organizations in an audit report. Pursuant to § 422.311(c)(3)(iii), the Secretary's medical record review determination methodology and payment error calculation methodology are ineligible for appeal under this process. While MA organizations may appeal individual medical record review determinations and the resulting payment error calculation, they may not appeal the underlying audit methodology.

5. Final Policy

After consideration of the public comments received, we are finalizing these policies as proposed. As noted above, we did not receive comments on some proposals and are finalizing those policies as proposed.

IV. Benefits for Medicare Advantage and Medicare Prescription Drug Benefit Programs

A. Part C and Part D Midyear Benefit Changes (§§ 422.254, 423.265)

1. Overview and Summary

In our proposed rule titled ''Medicare Program; Contract Year 2024 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, Medicare Cost Plan Program, Medicare Parts A, B, C, and D Overpayment Provisions of the Affordable Care Act and Programs of All-Inclusive Care for the Elderly; Health Information Technology Standards and Implementation Specifications,'' (*87 FR 79452*) which appeared in the December 27, 2022 issue of the **Federal Register** (hereinafter referred to as the ''December 2022 proposed rule''), we proposed two provisions that, if finalized, would restrict changes to the benefits offered by plans (inclusive of MA, MA–PD, and Part D) within the contract year.

We proposed these provisions to codify our longstanding policy prohibiting midyear benefit changes (MYBCs), previously referred to as midyear benefit enhancements (MYBEs), for MA and Part D plans. Specifically, we proposed to prohibit changes to non-drug benefits, premiums, and cost sharing by an MA organization after plans are permitted to begin marketing prospective contract year offerings on October 1 (consistent with § 422.2263(a)) of each year for the following contract year and until the end of the applicable contract year. Similarly, we proposed to codify our longstanding policy prohibiting Part D sponsors from making midyear changes to the benefit design or waiving or reducing premiums, bid-level cost sharing (for example, the cost sharing for an entire formulary tier of Part D drugs), or cost sharing for some or all of a Part D plan's enrollees. This prohibition applies after plans are permitted to begin marketing prospective contract year offerings on October 1 (consistent with § 423.2263(a)) of each year for the following contract year and until the end of the applicable contract year.

2. Medicare Advantage Prohibition on Midyear Benefit Changes (§ 422.254)

In a 2008 final rule titled, ''Medicare Program; Prohibition of Midyear Benefit Enhancements for Medicare Advantage Organizations'' (*73 FR 43628*), which appeared in the **Federal Register** on July 28, 2008, and is hereinafter referred to as the ''July 2008 final rule,'' we prohibited MA organizations from making any midyear changes in benefits, premiums, or cost sharing, even under the circumstances in which these types of changes had been permitted previously.[77] We have enforced this policy to the present day. It is necessary to prohibit benefit changes after bids are submitted and after marketing is permitted to begin in order to maintain the integrity of the bidding process. MA organizations are still allowed to make changes during the bidding process when permitted by CMS to remain in compliance with the requirements set forth at § 422.254 and when permitted by § 422.256. Per § 422.2263, following the start of marketing on October 1 of each year, MA organizations may begin to market and publicize their plan offerings for the following contract year, such that organizations may compare their approved plans against competitors in order to make advantageous changes. However, allowing MYBCs undermines the integrity of the bidding process because it would allow MA organizations to alter their benefit packages after the bidding process is complete. Finally, MA organizations may use MYBCs to misrepresent their actual costs and noncompetitively revise their benefit packages later in the year (*69 FR 46899, 70 FR 4301, 71 FR 52016*).

Altering an approved plan to include new benefits after marketing has started may also give MA organizations an unfair advantage over competitors when beneficiaries are selecting their plans during the initial coverage elections period (ICEP). We articulated in the July 2008 final rule that we believe enrolling newly age-eligible enrollees is attractive to MA organizations because of their relatively low health care utilization, as these individuals tend to be healthier compared to older beneficiaries (*73 FR 43631*). Therefore, to prevent MA organizations from inappropriately changing bids to appeal to low-utilization enrollees, an MA organization must provide the benefits

[77] HHS Secretary Xavier Becerra Statement on End of the COVID–19 Public Health Emergency, *https://www.hhs.gov/about/news/2023/05/11/hhs-secretary-xavier-becerra-statement-on-end-of-the-covid-19-public-health-emergency.html.*

described in the MA organization's final plan benefit package (PBP) (as defined in § 422.162(a)) until the end of the applicable contract year. The July 2008 final rule reiterated these points. Despite the July 2008 final rule, we have continued to receive inquiries from MA organizations requesting changes to PBPs after the contract year has begun.

We also noted in the December 2022 proposed rule that CMS has interpreted MYBCs after the start of the contract year to violate the uniformity requirements set forth at § 422.100(d)(ii), which require that an MA organization must offer a plan to all beneficiaries in a service area ''at a uniform premium, with uniform benefits and level of cost sharing throughout the plan's service area, or segment of service area as provided in § 422.262(c)(2).'' Altering the non-prescription drug benefits, premiums, or cost sharing midyear violates this requirement, even if the new benefit, premium, or cost sharing is offered to all of the plan's enrollees, because some enrollees would have paid for such benefits, premiums, or cost sharing already, and might not be eligible for reimbursement of these costs. In other words, some plan enrollees would have paid higher or lower amounts for the same benefits or services than other plan enrollees who paid depending on when the MYBC was put in effect.

Furthermore, we noted in the December 2022 proposed rule that Employer Group Waiver Plans (EGWPs) exclusively enroll the members of the group health plan sponsored by the employer, labor organization (that is, union) or trustees of funds established by one or more employers or labor organizations to furnish benefits to the entity's employees, former employees, or members or former members of the labor organizations; these plans generally have ''800 series'' MA contracts with CMS. We stated that these EGWPs are not currently subject to this prohibition on MYBCs under existing CMS waivers for EGWPs and will not be subject to the new regulation prohibiting MYBCs. However, we stated, an MA organization is subject to the prohibition on MYBCs if the MA organization offers an MA plan that enrolls both individual beneficiaries and employer or union group health plan members (that is, a plan open to general enrollment); for those types of plans, the employer or union sponsor may make mid-year changes to offer or change only non-MA benefits that are not part of the MA contract (that is, are not basic benefits or MA supplemental benefits). (*See 73 FR 43630* and Chapter 9, section 20.3, of the Medicare Managed Care Manual, available at *https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/mc86c09.pdf*.)

We proposed to add new paragraph § 422.254(a)(5) explicitly prohibiting MYBCs and specifying when this prohibition applies. Specifically, we proposed to clarify in regulatory text that any changes to non-prescription drug benefits, cost sharing, and premiums are prohibited starting after plans are permitted to begin marketing prospective contract year offerings on October 1 of each year for the following contract year (consistent with § 422.2263(a)) and through the end of the applicable contract year, except for modifications in benefits required by law.

3. Part D Prohibition on Midyear Benefit Changes (§ 423.265)

In the December 2022 proposed rule (*87 FR 79452*), we proposed to add new paragraph § 423.265(b)(5), which states that once a Part D sponsor is permitted to market prospective plan year offerings for the following contract year (consistent with § 423.2263(a)), it may not change the benefits described in its CMS-approved plan benefit package (PBP) (as defined at § 423.182(a)) for the contract year, except where a modification in benefits is required by law.

In part, section 1860D–11(e)(2)(C) of the Act, codified at § 423.272(b)(1), requires that CMS may only approve a bid if it determines that the portions of the bid attributable to basic and supplemental prescription drug coverage are supported by the actuarial bases provided and reasonably and equitably reflect the revenue requirements (as used for purposes of section 1302(8)(C) of the Public Health Service Act) for benefits provided under that plan. MYBCs indicate that the plan bid was overstated and render the bid meaningless, while waiving or reducing the premiums, cost sharing, or both, that are reflected in the approved bid would indicate that the amounts provided in the bid were not necessary for the provision of coverage. In our final rule titled ''Medicare Program; Medicare Prescription Drug Benefit'' (*70 FR 4194*), which appeared in the January 28, 2005 issue of the **Federal Register** (hereinafter referred to as the ''January 2005 Part D final rule''), we stated in the preamble that in order to maintain the integrity of the bidding process, we believed it was not appropriate to allow either MA organizations or Part D sponsors to waive premiums or offer midyear benefit changes, as these would be de facto adjustments to benefit packages for which bids were submitted earlier in the year. We also stated that these adjustments would be de facto acknowledgement that the revenue requirements submitted by the plan were overstated, and further, that allowing premium waivers or midyear benefit enhancements would render the bid meaningless (*70 FR 4301*). In other words, waiving or reducing the premiums and/or cost sharing that are reflected in the approved bid would indicate that the amounts provided in the bid do not reasonably and equitably reflect the revenue requirements of the expected population for the plans' benefits as required.

In the December 2022 proposed rule, we drew a distinction between changes in ''bid-level'' cost sharing (for example, the cost sharing associated with an entire tier of drugs) and changes in the cost sharing for an individual drug (for example, when such drug moves from one already approved tier of the benefit to another already approved tier of the benefit). Section 1860D–4(b)(3)(E) of the Act, as codified at § 423.120(b)(5), requires that Part D sponsors provide appropriate notice before any removal of a covered Part D drug from a formulary and ''any change in the preferred or tiered cost-sharing status'' of such a drug. Thus, the statute contemplates midyear changes in cost sharing of individual formulary drugs. Consequently, since the beginning of the Part D program, we have allowed formulary changes that result in changes to the cost sharing for individual drugs (for example, moving a single drug to a different cost-sharing tier). However, CMS has declined to permit Part D sponsors to change their benefit designs, or waive or reduce premiums, ''bid-level'' cost sharing (for example, the cost sharing associated with an entire tier of drugs), or cost sharing (for all or individual enrollees) once plans are permitted to market for the following contract year (on October 1, now reflected in § 423.2263(a)) on the grounds that such activities would be inconsistent with the CMS-approved bid.

As we noted in our proposed rule titled, ''Medicare Program; Policy and Technical Changes to the Medicare Advantage and the Medicare Prescription Drug Benefit Programs'' (*74 FR 54633*), which appeared in the October 22, 2009 issue of the **Federal Register** (hereinafter referred to as the ''October 2009 proposed rule''), a Part D sponsor's waiver of cost sharing midyear violates the uniform benefit requirements because such a waiver results in plans not providing the same coverage to all eligible beneficiaries

within their service area (*74 FR 54690*). The CMS-approved benefit cannot be varied for some or all of the plan's enrollees at midyear because that would violate the uniform benefit provisions set forth in § 423.104(b). Even if the plan changed the benefit midyear for all of the plan's enrollees, this would still violate the uniform benefit provision because some of the plan's enrollees would still have paid for benefits prior to the change. For example, because drug costs are often not evenly distributed over the course of a year, a midyear reduction in cost sharing could provide unequal benefit to enrollees who had the same drug costs but in different phases of their Part D benefit.

We received the following comments on the proposed Medicare Advantage and Part D prohibitions on midyear changes to be added at §§ 422.254 and 423.265, and our responses follow:

Comment: Most of the comments received discussed midyear benefit changes broadly, without specific reference to the MA or Part D provisions. Most commenters took a positive or neutral stance on the two proposals, but a few were opposed to them. A commenter asked that CMS allow midyear benefit changes when plans attempt to improve their benefit packages. Another commenter stated that CMS should make an exception when new products are released to market, particularly pointing to new drugs that receive FDA approval.

Response: As discussed in the proposed rule, changes in bid-level cost sharing or benefits after bids have been submitted could undermine the integrity of the bidding system, disincentivize plans from submitting complete and accurate bids on time, provide competitive advantages to plans that make such changes, undermine CMS's ability to provide accurate comparative information to beneficiaries about plan benefits and costs, and potentially violate the uniform benefit requirements. Both the MA and Part D bid submissions rely on applying a consistent set of criteria for evaluating the suitability and reasonableness of an MA organization or Part D sponsor's estimated costs for the contract year. Allowing plans to make benefit changes after the bid submission deadline would compromise the integrity of that process by introducing new variation between the costs estimated at the bid submission deadline and the actual costs incurred. A sophisticated MA organization or Part D sponsor may attempt to analyze their population during the contract year and determine which benefit changes could improve their overall costs, causing their bid projections to be distorted relative to a different organization or plan sponsor's bids and costs. Similarly, an organization or plan sponsor that sees lower than expected membership could try to adjust their benefits within the year to be more enticing. They may decide, with the availability of the contract year emerging experience, to change their competitive position by adjusting benefits. This would be inconsistent with the standardized bidding process set forth in statute and regulation, which requires plans to bid using only the information available to them at that time. The bid process ensures that MA organizations and Part D sponsors are assuming the risk for the contract year on an equitable basis and receiving fair reimbursement for that risk.

In addition, the potential distortion between the bid amounts and the actual costs after a mid-year benefit change could reduce the accuracy of information based on the bids that is released by CMS. For example, if Part D sponsors are making changes during the contract year that would have resulted in higher bids, that would mean that the release of the national average monthly bid amount is artificially low. This, in turn, would mean that all downstream payments relying on the national average would be inaccurate as well.

The proposed regulatory provisions would restrict changes to the fundamental aspects of plan benefit package design. Under our proposal, MA plans would not be prohibited from making adjustments to their own rules on such matters as prior authorization or referral policies, or from making changes to their provider network, so long as these adjustments or network changes remain within the bounds of existing regulatory requirements and are consistent with the approved plan benefit package. *See,* for example, § 422.111(d) and (e). Likewise, Part D plans would continue to be allowed to make midyear formulary changes that result in cost sharing changes for individual drugs, but they would not be allowed to change cost sharing for entire tiers of drugs or adjust premiums.

In addition, we clarify that the prohibition on MYBCs, which has been longstanding CMS policy, does not and will not prohibit Part D plans (including MA–PD plans) from enhancing their formularies to add coverage of new FDA-approved products. Section 1860D–4(b)(3)(C)(iii) of the Act (echoed in regulation at § 423.120(b)(4)) specifically allows an exception to the rules prohibiting changes to the therapeutic classes and categories of a formulary in order ''to take into account new therapeutic uses and newly approved covered Part D drugs.'' Nothing in our proposed policy overrides the statutory requirement or the equivalent language in existing regulation. In addition, because MA plans must cover all Part A and Part B benefits (subject to limited exclusions as outlined at § 422.100(c)), changes in items and services covered under Parts A and B due to changes in the law, new or changed NCDs, and advances in medical technology or new healthcare services that are newly covered by Traditional Medicare under existing benefit rules must be covered for MA enrollees as well. See § 422.109 for more information on how NCD and legislative changes in benefits are incorporated into the coverage for MA enrollees.

Comment: Some commenters indicated that they appreciated a number of the waivers and flexibilities pertinent to midyear changes that CMS implemented during the COVID–19 public health emergency. One commenter highlighted several of the pharmacy access and cost-sharing flexibilities as particularly helpful in the midst of the emergency. The commenters who expressed appreciation for the COVID–19 waivers and flexibilities also requested that CMS extend those flexibilities through the end of 2023 to allow plans time to transition.

Response: We thank the commenters for providing their input. The waivers and flexibilities for which these commenters requested extensions ended with the conclusion of the Public Health Emergency on May 11, 2023.[78] We do not believe it is necessary or appropriate to continue those flexibilities outside of the context of the PHE. As discussed in the proposed rule (*87 FR 79514 through 79517*) and in the prior response, there are important policy considerations and statutory compliance issues served by the prohibition on MYBCs.

After consideration of the comments and for the reasons set forth in the proposed rule and our responses to the related comments, we are finalizing the proposed new provisions at §§ 422.254(a)(5) and 423.265(b)(5) without substantive modification. We have made minor modifications to clarify the text.

[78] HHS Secretary Xavier Becerra Statement on End of the COVID–19 Public Health Emergency, *https://www.hhs.gov/about/news/2023/05/11/hhs-secretary-xavier-becerra-statement-on-end-of-the-covid-19-public-health-emergency.html.*

AA. Failure To Collect and Incorrect Collections of Part D Premiums and Cost Sharing Amounts (§§ 423.293 and 423.294)

In the December 2022 proposed rule *(87 FR 79452),* we proposed requirements for Part D sponsors to: (1) refund incorrect collections of premiums and cost sharing, and (2) recover underpayments of premiums and cost sharing. We also proposed to establish both a lookback period and timeframe to complete overpayments and underpayment notices, as well as a de minimis threshold for associated refunds and recoveries. We solicited comments regarding the addition of similar requirements in MA, specifically regarding establishing a lookback period and de minimis threshold for refunding incorrect collections.

Part D sponsors' failure to attempt to collect cost sharing or premiums is a violation of statutory and regulatory requirements. Part D sponsors' incorrectly high or low collections of cost sharing and premiums would have the effect of making the benefit non-uniform and would violate the uniform premium and benefit requirements of section 1860D–2(a) of the Act and § 423.104(b). Existing language at § 423.104(b) mirrors the language at § 422.100(d)(1) and (2)(i) with regard to uniform premiums and cost sharing. Similarly, whether done in a small number of instances or to all members enrolled of a plan, the excess collection of premiums is the basis for intermediate sanctions, as stated in section 1857(g)(1)(B) of the Act, covering Medicare Advantage organizations, and 1860–12(b)(3)(E), for Part D sponsors. However, although CMS adopted a regulation for the MA program at § 422.270 to address incorrect collections of premiums and cost sharing in the final rule titled ''Medicare Program; Establishment of the Medicare Advantage Program'' (*70 FR 4640*), which appeared in the **Federal Register** on January 28, 2005, the regulations in Part 423 have not previously addressed Part D sponsor requirements regarding incorrect collections of premiums and cost sharing. In the December 2022 proposed rule, we proposed to add a new regulation at § 423.294 to establish new Part D requirements that generally align with the existing MA requirements in § 422.270 for incorrect collections and to establish new Part D requirements regarding failure to collect premiums and cost sharing amounts.

Specifically, in order to align Part D with the existing MA requirements in § 422.270 we proposed to add a new regulation at § 423.294, which at paragraph (c) would require a Part D sponsor to make a reasonable effort to collect monthly beneficiary premiums under the timing established in § 422.262(e) (made applicable to Part D premiums in § 423.293(a)(2)) and ensure collection of cost sharing at the time a drug is dispensed. If for some reason the Part D sponsor fails to collect or ensure collection in a timely manner, the Part D sponsor would be required to make a reasonable effort to bill for and recover the premium or cost sharing amount after the fact. Any adjustments to the premium or cost sharing amount that occur based on subsequently obtained information would be made within the same timeframe for coordination of benefits as established at § 423.466(b), which is 3 years from the date on which the monthly premium was due or on which the prescription for a covered Part D drug was filled. We also proposed to add new § 423.294(b)(2) to require a Part D sponsor to make a reasonable effort to identify all amounts incorrectly collected and to pay any other amounts due during the timeframe for coordination of benefits as established at § 423.466(b).

In addition, we proposed new Part D requirements for the management of incorrect collections. First, we proposed to clarify that the 3-year lookback period established in § 423.466(b) for coordination of benefits applies to retroactive claim or premium adjustments that result in refunds and recoveries at § 423.294(b)(2) and (4) and § 423.294(c)(2), respectively. Part D sponsors have been required to process retroactive claims adjustments within 45 days of receiving complete information, per § 423.466(a), but there has been no requirement for the timing of retroactive premium adjustments. Although § 423.466(b) allows 3 years for coordination of benefits, there was no limit in the regulation for how far back a Part D sponsor must look to determine whether retroactive premium adjustments or claims adjustments unrelated to coordination of benefits must be made. For example, if a Part D sponsor in 2022 identifies an error in their prior years' drug pricing files that resulted in beneficiaries being charged incorrect cost sharing from 2015 to 2020, the current regulation might require them to refund and/or recover amounts for prescriptions beneficiaries received as far back as seven years ago. This is not only inconsistent with our coordination of benefits requirements, which only require adjustments for the past 3 years, but is potentially confusing to beneficiaries. By establishing a 3-year lookback period in § 423.294(b)(2) and (4) and § 423.294(c)(2), we would align the timeframe established in § 423.466(b) for coordination of benefits with the timeframe for premium adjustments and claims adjustments unrelated to coordination of benefits. This 3-year period coincides with the timeframe established in § 423.466(b) for coordination of benefits with State Pharmaceutical Assistance Programs (SPAPs), other entities providing prescription drug coverage, beneficiaries, and others paying on the beneficiaries' behalf. A Part D sponsor would not be required to make a premium or claims payment adjustment if more than 3 years have passed from the date of service, just as a Part D sponsor is required to coordinate benefits for a period of 3 years.

Second, we proposed in §§ 423.294(b)(2) and (4) and 423.294(c)(2), respectively, that the 45-day timeframe in § 423.466(a) applies to the processing of refunds and recoveries for both claims and premium adjustments. This would make the timeframes for the refund or recovery of premium adjustments the same as the timeframes for claims adjustments, refunds, and recoveries related to the low-income subsidy program (which, under § 423.800(e), are the same as the requirements of § 423.466(a)). In other words, whenever a Part D sponsor receives, within the 3-year lookback period, information that necessitates a refund of enrollee overpayment of premiums and/or cost sharing, or recovery of underpayments of premiums and/or cost sharing, the Part D sponsor would be required to issue refunds or recovery notices within 45 days of the Part D sponsor's receipt of such information. Nothing in this proposal would alter the requirements of § 423.293(a)(4) with respect to the options a Part D sponsor must provide Part D enrollees for retroactive collection of premiums.

Finally, we proposed to apply a de minimis amount, calculated per Prescription Drug Event (PDE) transaction for cost sharing or, for premium adjustments, per month, for these refunds and recoveries. Specifically, we proposed in § 423.294(b) and (c)(1) that if a refund or recovery amount falls below the de minimis amount set for purposes of § 423.34(c)(2) for the low-income subsidy (currently set at $2), the Part D sponsor would not be required to issue a refund or recovery notice. For example, if a plan sponsor in 2025 discovered that it had charged incorrect premiums amounts to certain beneficiaries for a 12-month period from

January through December of 2022 and the de minimis amount for 2025 is $2, the sponsor would not have to issue recovery notices to any beneficiary who owed $24 or less for the 12-month period.

The proposed rule preamble also noted that we are not making any changes to the Medical Loss Ratio (MLR) requirements under §§ 422.2420(c) and 423.2420(c), which provide that uncollected premiums that could have been collected are treated as revenue and are included in the MLR denominator.

In addition, the proposed rule noted that current MA regulations set forth at § 422.270 do not contain allowances for de minimis amounts or limits to the lookback periods for MA organizations to refund or recover incorrect collections of cost sharing or premiums. On the contrary, § 422.270(b) states that an MA organization must agree to refund all amounts incorrectly collected from its Medicare enrollees, or from others on behalf of the enrollees, and to pay any other amounts due the enrollees or others on their behalf. With regard to timing of recovering underpayments when an enrollee is not at fault, § 422.262(h) provides that an enrollee may make payments in equal monthly installments spread out over at least the same period for which the premiums were due, or through other arrangements mutually acceptable to the enrollee and the Medicare Advantage organization. In the proposed rule, we solicited comments on adding requirements regarding a de minimis amount and lookback periods for recovering or refunding incorrect collections in MA that would mirror the proposed requirements in Part D.

We also proposed to implement a technical change to existing regulation text related to the Part D retroactive collection of monthly beneficiary premiums. Specifically, we proposed to amend § 423.293(a)(4) by replacing ''Medicare Advantage organization'' with ''Part D sponsor'' to be consistent with the terminology used in the rest of § 423.293.

We received comments in response to the proposed new regulatory text at §§ 423.293 and 423.294. A summary of the comments received and our responses follow.

Comment: A commenter stated that the collection of cost sharing is materially different from premium collection and stated that CMS should not proceed with the proposal to codify the collection of cost sharing and premiums together under § 423.294. They noted that premiums are collected by the plans, but collection of cost sharing is managed by pharmacies and should not be described as the plans' responsibility. This commenter believed it was inappropriate for the proposal codifying our interpretation of the uniform benefit requirement to include cost sharing because plans are not the parties that fail to collect beneficiary cost sharing. The commenter stated that plans would only have control over cost sharing in the case of retroactive adjustments and asked that the provision be revised to either explicitly state that the requirement only applies to plans in the case of retroactive adjustments, or to exclude language regarding cost sharing.

Response: We recognize that there is a fundamental difference between the collection of Part D cost sharing and premiums under normal circumstances. Pharmacies, not plans, collect cost sharing at the point of sale, and therefore plan oversight of cost sharing is more resource intensive in the case of retroactive adjustments. Pharmacies may also have certain autonomy when it comes to the collection of cost sharing. Pharmacies, as outlined at § 1001.952(k)(3), may choose to waive cost sharing under specific, but limited, circumstances (for example, in the circumstances outlined at 42 CFR § 1001.952(k)(3)). With those limitations in mind, the preamble of the December 2022 proposed rule *(87 FR 79517)* makes clear that we anticipate retroactive adjustments to be the primary circumstance in which plans will handle cost sharing directly.

However, the uniform benefit requirement at § 423.104(b)(2) requires Part D plan sponsors to offer ''a uniform premium, with uniform benefits and level of cost sharing throughout the plan's service area.'' As noted in the October 2009 proposed rule *(74 FR 54690),* CMS has consistently interpreted the uniform benefit requirement to prohibit Part D sponsors from varying cost sharing and premiums within its service area. While plan sponsors will primarily manage cost sharing directly in the case of retroactive adjustments, our existing regulations have placed significant responsibility for the correct collection of cost sharing on plan sponsors. For example, plans may exercise authority through their network participation agreements to define pharmacies' responsibility to collect cost sharing, per regulations at § 423.104(g). The proposed regulation merely codifies a portion of the obligations that plans have already been required to uphold.

Comment: A commenter stated that the proposed 3-year lookback period for incorrect collections does not align with the six-year overpayment lookback period. They proposed that CMS should revise the proposed provision to clarify that it would only require plan sponsors to refund or collect cost sharing created through retroactive adjustments. Alternatively, they asked CMS to clarify whether CMS would adjust its payments to plans outside of the 3-year lookback period but refuse to allow plans to initiate reimbursements or recoveries in that same period.

Response: While the commenter is correct that the proposed lookback period for incorrect collections would not align with the six-year overpayment lookback period (defined in regulation at § 423.360(f)), it was not our intention to align these lookback periods. It was our stated goal to clarify that the lookback period for Part D incorrect collections should be understood as covered by the lookback period outlined in regulation for coordination of benefits (at § 423.466(b)). While the overpayment lookback period in § 423.360(f) pertains to the reporting and returning of CMS overpayments by plans, our proposed incorrect collections provision better aligns with other aspects of coordination of benefits that are relevant to beneficiary or third-party payments to plans and pharmacies. For example, CMS payments to plans and the associated plan payment reconciliation processes are not closely related to the repayment to, or recovery of funds from, individuals. The incorrect collection of cost sharing and the adjustments that can be made in the coordination of benefits process, however, are inherently related. Furthermore, while the provision does not require plans to provide adjustments beyond the 3-year lookback window, there is nothing that would prohibit plans from voluntarily issuing refunds for premium or cost sharing overpayments, so long as they did so in a uniform manner.

Comment: A commenter stated that they were opposed to the 45-day timeframe for processing refunds and recoveries for premium adjustments proposed at § 423.294(b)(2). Because the adjustment process can be complicated, they indicated that a 90-day timeframe would be preferable instead.

Response: First, we note that the 45-day timeframe is meant for the beneficiary's benefit and is not related to record keeping. Furthermore, as stated in the December 2022 proposed rule *(87 FR 79517),* we are aligning the adjustment of retroactive premium adjustments with the timeline for processing retroactive claims adjustments. Part D sponsors are already required to process retroactive claims adjustments within 45 days of receiving

complete information, per § 423.466(a), and the proposal would simply impose a similar requirement for premium adjustments. While the process for refunding or recovering premiums may be complicated, we do not consider it to be substantially more complicated than final processing of retroactive claims adjustments. Furthermore, as noted earlier in this section, plan sponsors are already required to make claims adjustments for refunds and recoveries related to the low-income subsidy program within a 45-day window (per § 423.800(e)). Finally, we also believe it to be in the beneficiary's interest to resolve refunds and recoveries in a timely manner. As explained, the 45-day window has been used for adjustments in the past, and we consider it to be still most appropriate in this circumstance.

Comment: Commenters were divided in their opinions of the proposed de minimis amount for incorrect collections of Part D premiums and cost sharing. While some commenters were supportive, others expressed opposition to the proposal. A commenter suggested that the proposed de minimis regulation could be interpreted to be optional, but they argued that it should be made mandatory across all plans in order to prevent enrollee confusion. Another commenter suggested that the proposal, which they understood to be mandatory, would deprive plans of existing flexibility to determine on their own the financial thresholds that are appropriate for collection.

Response: We clarify that CMS has not previously provided Part D sponsors with flexibility to pursue or return incorrect collections only when they deem the funds sufficient to be worth the time and effort. As noted in the October 2009 proposed rule *(74 FR 54690),* CMS has interpreted a failure to attempt to collect premiums and cost-sharing as a violation of the uniform benefit requirement. Plans are already required to ensure correct payment of premiums and cost-sharing, consistent with current regulations and guidance, which do not define a minimum amount below which the obligation to provide a refund to enrollees (or to collect from enrollees) does not apply. We proposed and are finalizing at § 423.294(b) and (c)(1) that it is not mandatory for Part D sponsors to collect or refund amounts below the de minimis threshold established in the regulation.

Furthermore, there will be little financial difference to enrollees whether plans adopt the de minimis requirement or continue to refund or recover all incorrectly collected amounts. For instance, the de minimis amount for premium adjustments for 2024 will amount to $2 per month. Thus, under the proposed rule, plans would only be permitted to forego premium adjustments less than or equal to $24 for a calendar year. In the case of one-time errors or errors that took place over a small number of instances, the amounts involved may be less than the postage required to send a refund or recovery notice to a beneficiary. In combination with the 3-year lookback period, we believe that our proposed de minimis amount provision would enable plans to minimize their own burden while also limiting beneficiary confusion over minor adjustments to previously paid premiums and cost-sharing.

Comment: A commenter requested clarification regarding whether recoupment of underpayments will apply to dually eligible beneficiaries, noting that the dually eligible population often faces obstacles that limit their ability to make unexpected payments. The commenter also stated their belief that CMS had not previously required Part D sponsors to attempt to recover underpayments of premiums and cost-sharing and refund overpayments.

Response: Under current regulations and guidance, plan sponsors are already required to recover underpayments and refund overpayments, regardless of the amount. Our proposal elaborated on existing regulations applying to incorrect collections of premiums and cost sharing. As explained in the October 2009 proposed rule *(74 FR 54690)* and reiterated here, we have interpreted failure to attempt to collect premiums and cost sharing as a violation of the existing uniform benefit requirement at § 423.104(b). In addition, there is at present no clear limit to the lookback period for premium and cost-sharing adjustments. While our proposed policy would apply to dually eligible enrollees, the abbreviation of the lookback period and inclusion of de minimis amount regulation may serve to decrease the frequency with which plans attempt to recover incorrect collections from dually eligible enrollees. Existing regulation and guidance provide further protections for dually eligible enrollees. In the case of retroactive premium collections in which the enrollee is without fault, § 423.293(a)(4) instructs sponsors to offer the enrollee the opportunity to make payment by lump sum, by equal monthly installments spread out over at least the same period over which the payments were due, or through other arrangements mutually acceptable to the enrollee and the sponsor Similar recommendations can be found in section 70.3.1 of Chapter 13 of the Prescription Drug Benefit Manual, which covers refunds and recoupments for the premium and cost-sharing subsidies for low-income individuals and would apply to all full dually eligible enrollees and individuals eligible for a Medicare Savings Program as a Qualified Medicare Beneficiary, Specified Low Income Medicare Beneficiary, or a Qualifying Individual.

Comment: A commenter responded to CMS's request for feedback about aligning elements of the process for MA incorrect collections with those in the December 2022 proposed rule *(87 FR 79517)* for Part D. The commenter believed that the process for collecting cost sharing is more complex for MA plans than for Part D plans. The lag in payments and collections involved in, for example, clinical and hospital visits necessitates substantial differences between the incorrect collections policies of the two programs.

Response: We appreciate the commenter's feedback. We decline to revise § 422.270 at this time to: (1) apply a threshold for a de minimis amount below which refunds of excess MA cost sharing or excess MA premiums are not required, or (2) adopt lookback periods to limit the obligation for MA organizations to recover or refund incorrect collections of such payments. We may revisit these policies for the MA program at a later date.

After consideration of the comments received and for the reasons outlined in the proposed rule and our responses to comments, we are finalizing the changes to §§ 423.293 and 423.294 as proposed with minor grammatical and formatting changes.

B. Definition of ''Basic Benefits'' (§ 422.2)

Section 1852(a)(1)(B)(i) of the Act defines the term ''benefits under the original Medicare Fee-for-Service program option'' for purposes of the requirement in subparagraph (a)(1)(A) that each MA organization provide enrollees such benefits. Section 17006(c)(1) of the 21st Century Cures Act (Pub. L. 114–255) (hereafter referred to as ''the Cures Act'') amended section 1852(a)(1)(B)(i) of the Act by inserting ''or coverage for organ acquisitions for kidney transplants, including as covered under section 1881(d)'' after ''hospice care.'' Per section 17006(c)(3) of the Cures Act, this amendment applies with respect to plan years beginning on or after January 1, 2021. Thus, effective January 1, 2021, MA plans no longer cover organ acquisitions for kidney transplants, including the costs for

living donors covered by Medicare pursuant to section 1881(d) of the Act.

In the April 2019 final rule [79] and the January 2021 final rule, we amended the definition of ''basic benefits'' at § 422.100(c)(1) to exclude coverage for organ acquisitions for kidney transplants, effective beginning in 2021, in addition to the existing exclusion for hospice care. In the June 2020 final rule, we also amended several regulations to address coverage of organ acquisition for kidney transplants for MA enrollees, with amendments to §§ 422.258, 422.322, and 422.306. However, we inadvertently omitted making the same type of revision to the ''basic benefits'' definition at § 422.2. We proposed to correct the definition of basic benefits at § 422.2 to add the exclusion of coverage for organ acquisitions for kidney transplants to § 422.2.

Specifically, we proposed to revise the ''basic benefits'' definition at § 422.2 to change the phrase ''all Medicare-covered benefits'' to ''Part A and Part B benefits'' and correct the phrase ''(except hospice services)'' to include, beginning in 2021, organ acquisitions for kidney transplants (which includes costs covered under section 1881(d) of the Act).

This provision is a technical change to align the definition of basic benefits with existing law; therefore, neither an economic impact beyond current operating expenses nor an associated paperwork burden are expected.

We invited public comment on this proposal and received a comment in support of our proposal and an out-of-scope comment. We thank the commenter for their support.

For the reasons outlined in the proposed rule and summarized in this rule, we finalize the revisions to the definition of basic benefits at § 422.2 as proposed.

C. Standards for Determining Whether Special Supplemental Benefits for the Chronically Ill (SSBCI) Have a Reasonable Expectation of Improving the Health or Overall Function of an Enrollee

The Balanced Budget Act (BBA) of 2018 included new authorities concerning supplemental benefits that may be offered to chronically ill enrollees in Medicare Advantage (MA) plans. We addressed these new supplemental benefits extensively in the Medicare Program; Contract Year 2021 Policy and Technical Changes to the Medicare Advantage Program, Medicare Prescription Drug Benefit Program, and Medicare Cost Plan Program (hereafter referred to as ''June 2020 final rule'') (85 FR 33796, 33800–05), where we referred to them as Special Supplemental Benefits for the Chronically Ill (SSBCI).

As we summarized in the June 2020 final rule, we interpreted the intent of this new category of supplemental benefits as enabling MA plans to better tailor benefit offerings, address gaps in care, and improve health outcomes for chronically ill enrollees who meet the definition established by the statute. Section 1852(a)(3)(D)(ii)(II) of the Act authorizes the Secretary to waive the uniformity requirements generally applicable to the benefits covered by MA plans with respect to SSBCI. Therefore, CMS may allow MA plans to offer SSBCI that are not uniform across the entire population of chronically ill enrollees in the plans but that are tailored and covered for an individual enrollee's specific medical condition and needs (83 FR 16481–82).

In addition to limiting the eligibility of enrollees who can receive SSBCI to chronically ill enrollees, section 1852(a)(3)(D)(ii)(I) of the Act requires that an item or service offered as an SSBCI have a reasonable expectation of improving or maintaining the health or overall function of the chronically ill enrollee. We codified this statutory requirement as part of the definition of SSBCI at § 422.102(f)(1)(ii).

As we provided in a Health Plan Management System (HPMS) memorandum dated April 24, 2019 [80] (''2019 HPMS memo'' hereafter), SSBCI can be in the form of:

- Reduced cost sharing for Medicare-covered benefits;
- Reduced cost sharing for primarily health-related supplemental benefits;
- Additional primarily health-related supplemental benefits; and/or
- Non-primarily health-related supplemental benefits.

As we described in the November 2023 proposed rule, to offer an item or service as an SSBCI to an enrollee, an MA plan must make at least two separate determinations with respect to that enrollee in order to satisfy the statutory and regulatory requirements for these benefits. First, the MA plan must determine that an enrollee meets the definition of ''chronically ill enrollee.'' Section 1852(a)(3)(D)(iii) of the Act defines ''chronically ill enrollee'' as an individual enrolled in the MA plan who meets all of the following: (I) has one or more comorbid and medically complex chronic conditions that is life-threatening or significantly limits the overall health or function of the enrollee; (II) has a high risk of hospitalization or other adverse health outcomes; and (III) requires intensive care coordination. Per § 422.102(f)(1)(i)(B), CMS may publish a non-exhaustive list of conditions that are medically complex chronic conditions that are life-threatening or significantly limit the overall health or function of an individual. This list is currently the same as the list of chronic conditions for which MA organizations may offer chronic condition special needs plans, which can be found in section 20.1.2 of Chapter 16b of the Medicare Managed Care Manual. We require, currently at § 422.102(f)(3)(i), the MA plan to have written policies for making this determination and to document each determination that an enrollee is a chronically ill enrollee. Documentation of this determination must be available to CMS upon request according to § 422.102(f)(3)(ii) (to be redesignated to § 422.102(f)(4)(ii)).

Second, the MA plan must determine that the SSBCI has a reasonable expectation of improving or maintaining the health or overall function of the enrollee. Currently § 422.102(f)(3)(iii) provides that the MA plan ''must have written policies based on objective criteria for determining a chronically ill enrollee's eligibility to receive a particular SSBCI and must document these criteria.'' We also require the MA plan to document ''each determination that an enrollee is eligible to receive an SSBCI and make this information available to CMS upon request'' at § 422.102(f)(3)(iv). (See later in this section for how paragraph (f)(3) of § 422.102 is redesignated and revised in this final rule.)

We noted in the November 2023 proposed rule that we do not define or definitively interpret the phrase ''has a reasonable expectation of improving or maintaining the health or overall function of the enrollee'' in regulation or policy guidance. Rather, in the 2019 HPMS memo, we provided MA plans with ''broad discretion in determining what may be considered 'a reasonable expectation' when choosing to offer specific items and services as SSBCI.'' We stated that we granted MA plans this discretion so that they might effectively tailor their SSBCI offerings and the eligibility standards for those offerings to the specific chronically ill population upon which the plan is focusing.

[79] ''Medicare and Medicaid Programs; Policy and Technical Changes to the Medicare Advantage, Medicare Prescription Drug Benefit, Programs of All-Inclusive Care for the Elderly (PACE), Medicaid Fee-For-Service, and Medicaid Managed Care Programs for Years 2020 and 2021,'' final rule (84 FR 15680).

[80] ''Implementing Supplemental Benefits for Chronically Ill Enrollees'' *https://www.cms.gov/medicare/health-plans/healthplansgeninfo/downloads/supplemental_benefits_chronically_ill_hpms_042419.pdf* (April 24, 2019).

We further indicated that ''CMS will provide supporting evidence or data to an MA organization if CMS determines that an MA plan may not offer a specific item or service as an SSBCI because it does not have a reasonable expectation of improving or maintaining the health or overall function of a chronically ill enrollee.'' In other words, we placed the burden on CMS, and not the MA plan, to generate evidence demonstrating whether the ''reasonable expectation'' standard—a standard that we granted broad discretion for an MA plan to determine—has been met (or not met) when offering items or services as SSBCI.

As we described in the November 2023 proposed rule, supplemental benefits, including SSBCI, are generally funded using MA plan rebate dollars.[81] When submitting an annual bid to participate in the MA program, an MA organization includes in its bid a Plan Benefit Package (PBP) and Bid Pricing Tool for each of its plans, where the MA organization provides information to CMS on the premiums, cost sharing, and supplemental benefits (including SSBCI) it proposes to offer. Since issuing the 2019 HPMS memo, the number of MA plans that offer SSBCI—and the number and scope of SSBCI offered by an individual plan—has significantly increased. We have observed these trends in reviewing PBPs from MA plans submitted in the past few years.

In the November 2023 proposed rule, we noted that based on our internal data, 101 MA plans offered a food and produce benefit in contract year 2020, while 929 MA plans were offering this as an SSBCI in contract year 2023.[82] Similarly, 88 MA plans offered transportation for non-medical needs as an SSBCI in contract year 2020. In contract year 2023, 478 MA plans were offering this as an SSBCI.[83] MA plans are also continuing to identify items or services as SSBCI that were not included as examples in the 2019 HPMS memo. When an MA plan is offering such a benefit, the plan indicates it in the PBP [84] that is submitted with its bid. The MA plan categorizes the benefit within our PBP submission system as an ''other'' SSBCI (a benefit designation within the PBP submission system) and describes the proposed new benefit in a ''free text'' field. While 51 MA plans offered an ''other'' non-primarily health-related supplemental benefit in contract year 2020, 440 plans are offering at least one ''other'' non-primarily health related SSBCI in contract year 2023—and 226 plans are offering at least two.[85]

Through SSBCI, MA organizations can design and implement benefits, including non-primarily health-related benefits, that may be able to holistically address various needs of chronically ill enrollees. We provided in the November 2023 proposed rule that, as these benefits become a more significant part of the MA program, we believe it is important to update our processes for reviewing and approving SSBCI to manage the growth and development of new SSBCI offerings, as well as to ensure compliance with the statutory requirements at section 1852(a)(3)(D). Additionally, section 1854(b)(1)(C) of the Act requires that MA plans offer the value of MA rebates back to enrollees in the form of payment for supplemental benefits, cost sharing reductions, or payment of Part B or D premiums. As an increasing share of Medicare dollars is going toward MA rebates that plans are using to offer SSBCI, we believe that revising the regulation to adopt greater review and scrutiny of these benefits is important for CMS to maintain good stewardship of Medicare dollars, including the MA rebates used to pay for these benefits, and for ensuring that the SSBCI offered are consistent with applicable law and those most likely to improve or maintain the health or overall function of chronically ill enrollees. Therefore, we proposed to update our rules and processes to simultaneously ensure effective program administration and oversight, while enabling MA organizations to offer SSBCI and improve health outcomes for chronically ill enrollees.

Currently, the burden is on CMS to review SSBCI included in an MA organization's bid and determine whether sufficient evidence or data exists to demonstrate that it has a reasonable expectation of improving or maintaining the health or overall function of a chronically ill enrollee. Given the growth in the quantity and type of SSBCI offerings and given the associated burden increase on CMS in reviewing and approving bids that include SSBCI, we believe that it would be more efficient for the MA organization, rather than CMS, to demonstrate that the reasonable expectation standard has been met.

When CMS provides MA organizations with broad latitude in offering items or services as SSBCI and in establishing what a ''reasonable expectation'' means for a given SSBCI, we believe that it is appropriate for the MA organization, rather than CMS, to identify supporting evidence or data to support an SSBCI and to establish compliance with the applicable law.

We proposed that an MA organization that includes an item or service as SSBCI in its bid must be able to demonstrate through relevant acceptable evidence that the item or service has a reasonable expectation of improving or maintaining the health or overall function of a chronically ill enrollee. As part of shifting responsibility this way, we proposed, as relevant to an MA organization that includes SSBCI in its bid, to: (1) require the MA organization to establish, by the date on which it submits its bid, a bibliography of ''relevant acceptable evidence'' related to the item or service the MA organization would offer as an SSBCI during the applicable coverage year; (2) require that an MA plan follow its written policies (that must be based on objective criteria) for determining eligibility for an SSBCI when making such determinations; (3) require the MA plan to document denials of SSBCI eligibility rather than approvals; and (4) codify CMS's authority to decline to accept a bid due to the SSBCI the MA organization includes in its bid and to review SSBCI offerings annually for compliance, taking into account the evidence available at the time. In addition, we proposed to make a technical edit to § 422.102(f)(1)(i)(A)(*2*) to correct a typographical error. We describe each proposal in greater detail below.

First, we proposed to redesignate what is currently § 422.102(f)(3) to (f)(4), and to address, at new § 422.102(f)(3), new requirements for each MA plan that includes an item or service as SSBCI in its bid. The MA organization must be able to demonstrate, through relevant acceptable evidence, that the item or service to be offered as SSBCI has a reasonable expectation of improving or maintaining the health or overall function of a chronically ill enrollee and must, by the date on which it submits its bid to CMS, establish a bibliography of all ''relevant acceptable evidence'' concerning the impact that the item or service has on the health or overall function of its recipient. The bibliography must be made available to CMS upon request. As part of this

[81] MA plan rebates are a portion of the amount by which the bidding benchmark or maximum MA capitation rate for a service area exceeds the plan's bid; MA plans are obligated to use the MA rebates for the purposes specified in 42 CFR 422.266: payment of supplemental benefits (including reductions in cost sharing) or reductions in Part B or Part D premiums.

[82] Taken from CMS internal data.

[83] Taken from CMS internal data.

[84] A PBP is a set of benefits for a defined MA (or Prescription Drug Plan) service area. The PBP is submitted by MA organizations and PDP sponsors to CMS for benefit analysis, marketing, and beneficiary communication purposes.

[85] Taken from internal data.

proposal, an MA organization would be required to include, for each citation in its written bibliography, a working hyperlink to or a document containing the entire source cited. This proposal would apply only to SSBCI offered in the form of additional primarily health-related supplemental benefits or SSBCI offered in the form of non-primarily health-related supplemental benefits. It would not apply to an SSBCI offered in the form of reduced cost sharing, regardless of the benefit for which it is offered. We stated that we intended to exclude from this policy supplemental benefits offered under the Value-Based Insurance Design (VBID) Model administered by the Center for Medicare and Medicaid Innovation (CMMI), unless CMMI incorporates this policy within the VBID Model.

We also proposed, in new paragraph (f)(3)(iv), that the MA organization must make its bibliography of relevant acceptable evidence available to CMS upon request. CMS may request and use this bibliography, without limitation, during bid review to assess whether SSBCI offerings comply with regulatory requirements, or during the contract year as part of CMS's oversight activities. We noted that CMS does not intend at this time to require MA organizations to submit these bibliographies as a matter of course in submitting bids.

We proposed that the term ''relevant acceptable evidence'' would include large, randomized controlled trials or prospective cohort studies with clear results, published in a peer-reviewed journal, and specifically designed to investigate whether the item or service (that is proposed to be covered as an SSBCI) impacts the health or overall function of a population, or large systematic reviews or meta-analyses summarizing the literature of the same. We further proposed that the MA plan would need to include in its bibliography all relevant acceptable evidence published within the 10 years preceding the month in which the MA plan submits its bid. Ideally, relevant acceptable evidence should include studies and other investigations specific to the chronic conditions for which the MA organization intends to target the SSBCI, but we are not proposing to make this a requirement at this time. We are concerned that relevant acceptable evidence applicable to many SSBCI will already be limited, and that requiring a bibliography be limited to only studies concerning certain chronic conditions would discourage the development of new SSBCI. Similarly, to the extent there exists sufficient relevant acceptable evidence that the item or service meets the reasonable expectation standard for a sample of a population, an MA organization may still offer an SSBCI to enrollees with a specific chronic condition even in the absence of any studies addressing the connection between an item or service and its effect on the health or overall function of individuals with that condition.

We proposed that, in the absence of publications that meet these standards, ''relevant acceptable evidence'' for purposes of the MA plan's bibliography could include case studies, federal policies or reports, and internal analyses or any other investigation of the impact that the item or service has on the health or overall function of its recipient. By ''bibliography,'' we mean a list, and not a description, of scholarly publications or other works, as we describe below.

In our April 2023 final rule, we discussed what constituted sufficiently high-quality clinical literature in the context of an MA organization establishing internal clinical criteria for certain Medicare basic benefits (88 FR 22189, 22197). We believe that those standards are also applicable for identifying ''relevant acceptable evidence'' in the context of supporting whether an item or service offered as SSBCI has a reasonable expectation of improving or maintaining the health or overall function of a chronically ill enrollee. Therefore, our proposal for § 422.102(f)(3)(ii) largely tracked the language in § 422.101(b)(6) describing acceptable clinical literature for purposes of establishing internal coverage criteria, but with revisions to be specific to the context of SSBCI and the reasonable expectation standard.

As we noted in the November 2023 proposed rule, literature that CMS considers to be ''relevant acceptable evidence'' for supporting an SSBCI offering include large, randomized controlled trials or cohort studies or all-or-none studies with clear results, published in a peer-reviewed journal, and specifically designed to answer a question relevant to the requirements for offering and covering SSBCI and how the MA plan will implement the coverage—such as the impact of structural home modifications on health or overall function. Literature might also include that which involves large systematic reviews or meta-analyses summarizing the literature specifically related to the subject of the SSBCI—such as meal delivery, availability of certain food or produce, or access to pest control—published in a peer-reviewed journal with clear and consistent results. Under this proposal, an MA organization would be required to cite all such available evidence in its bibliography, and not just studies that present findings that are favorable to its SSBCI offering.

We also proposed that, in the absence of literature that conforms to these standards for relevant acceptable evidence, an MA organization would be required to include in its bibliography any other investigations of the impact of the item or service which may include evidence that is unpublished, is a case series or report, or derived solely from internal analyses within the MA organization. In this way, our proposed policy would deviate from the standard we established for the type of evidence necessary to support an MA organization's internal coverage criteria for Medicare basic benefits. We noted in our proposal that we believe this deviation is appropriate as there is relatively less research into the impact of the provision on items or services commonly offered as SSBCI on health or overall function of chronically ill individuals.
