Comments: Several commenters representing both industry and consumers asked the Department to define ''base fare'' to mean all mandatory carrier-imposed charges and agreed with the Department's assessment in the NPRM that providing a ''base fare'' discount would be misleading if the base fare did not include all such mandatory charges. For example, Southwest Airlines stated that some airlines advertise ''generous eye-catching percentage-off discounts that can be fairly described as 'bait-and-switch' tactics'' of a large percentage off a low ''base fare'' that does not include all mandatory carrier-imposed fees. Southwest explained that in such circumstances mandatory carrier-imposed fees ''often make up the majority of the ticket price'' and are not discounted. In addition, both Travelers United and Southwest Airlines requested that DOT clarify that the ''base fare'' must include all mandatory airline-imposed fees on the distribution channel where a fare is viewed (*e.g.,* if there is a charge for online booking and the consumer is searching for airfare online, then the online booking fee must be included in the base fare). A small travel agent asked the Department to go further and prohibit all fuel surcharges and carrier-imposed fees, stating that fares are filed to ATPCO with the base fare only, making it difficult to compare fares between carriers. On the other hand, IATA opposed any additional regulation in this area, stating that consumers understand that percentage-off discount offers do not discount carrier surcharges.

Regarding the existing full fare rule, a joint comment from multiple State attorneys general noted that airlines often charge fees in connection with different methods of booking, including online, telephone, or in-person booking fees. These commenters noted that they understand that the existing full fare rule already requires such fees to be included in the full fare, but asked DOT to cover such fees in this rulemaking in the event that this understanding was incorrect.

DOT Response: In this final rule, the Department is permitting airlines and ticket agents to disclose a total price inclusive of mandatory taxes and fees and ancillary fees in place of or more prominently than a total price that only includes all mandatory taxes and fees.

In response to comments, the Department is adding a new paragraph (e) to § 399.84, which provides that it is an unfair and deceptive practice for an airline or ticket agent to offer a percentage-off discount for air transportation, a tour, or a tour component that does not make clear at the outset the terms and conditions of the offer, including how the discount is calculated. This new provision further provides that, when used in any advertising or solicitation, the term ''base fare'' must refer to the amount that includes all mandatory carrier-imposed charges. The Department agrees with commenters that an advertisement of a percentage-off discount that is unclear about its terms or is offered as a percentage off a ''base fare'' that does not include all mandatory carrier-imposed charges is unfair and deceptive to consumers. The Department is unpersuaded by IATA's

unsupported statement that consumers understand that base fare discounts do not include discounts off carrier-imposed surcharges, particularly as to those consumers who purchase air transportation infrequently. The Department notes that carriers and ticket agents may continue to list the components of the ''base fare'' separately, consistent with § 399.84(a).

Also, as requested in a joint comment from multiple State attorneys general, the Department is making clear that mandatory booking charges are required to be included in the quoted fare under the full fare rule. Southwest Airlines and Traveler's United also requested confirmation that if there is a charge for online booking and the consumer is searching for airfare online, then the online booking fee must be included in the base fare. That is correct. As the Department explained when it issued its final rule that addresses full fare advertising in 2011, while a carrier or ticket agent generally is not required to include a booking fee in its advertised fare if there are other means for the passenger to obtain the air transportation (*e.g.,* a booking fee only applies for tickets that are purchased over the telephone), where airfares are advertised via an internet site that permits consumers to purchase fares, the fares advertised on the site must include all charges required to make the purchase on the site. For example, it would be unfair and deceptive to hold out on such an internet site a fare that can be purchased only at airport ticket counters but that excludes a convenience fee that is applied to internet sales.[114] To avoid confusion in this area, the Department is adding this clarification to its full fare rule.

(g) Codeshare Flights

Proposal: The Department did not propose any new requirements specific to codeshare flights, separate from the general proposal that airlines and ticket agents disclose critical ancillary fees on an itinerary-specific basis.

Comments: A comment from multiple State attorneys general stated that ''where there is a codeshare arrangement in place, the consumer must be notified of the fees that will actually be charged, whether they are imposed by the airline through which the consumer booked the flight or the airline operating the flight.'' Though this comment noted that the issue appeared to be addressed by the requirement that the fees provided be accurate, these commenters asked DOT to consider whether special requirements were necessary for codeshare flights. Two individual commenters similarly stated that carriers should be required to disclose the fees of their partners.

DOT Response: The Department has determined that no revisions to the proposed rule are necessary to address these comments. The Department proposed, and this final rule requires, that airlines and ticket agents disclose critical ancillary fees on an itinerary-specific basis. This includes the requirement in § 399.85(c) of this rule for a carrier to accurately display itinerary-specific fees, including those involving flights operated by a partner carrier. In addition, this final rule maintains the existing regulatory requirement in § 399.85(e) (recodified in this rule at § 399.85(i)) that airlines must disclose through their websites any differences between their optional services and related fees and those of a carrier operating the flight under a codeshare arrangement. This existing requirement includes the fees for ancillary services that are not covered by the requirements of this final rule. This final rule also maintains the existing regulatory requirement in 14 CFR 399.87 that, for passengers whose ultimate ticketed origin or destination is a U.S. point, U.S. and foreign carriers must apply the baggage allowances and fees that apply at the beginning of a passenger's itinerary throughout his or her entire itinerary. That section also specifies that, in the case of code-share flights that form part of an itinerary whose ultimate ticketed origin or destination is a U.S. point, U.S. and foreign carriers must apply the baggage allowances and fees of the marketing carrier throughout the itinerary to the extent that they differ from those of any operating carrier.

(h) Additional Comments

The Department received several comments that did not specifically address the proposals in the NPRM.

Comment: Google noted that the NPRM did not address how the proposed requirements would affect existing requirements at 14 CFR part 256 governing how ticket agents and air carriers must respond to consumer searches and disclose display bias. Specifically, Google asked whether fees for baggage, ticket changes and cancellations, and seat assignments should be included in the total price when ranking responses based on the lowest total price.

DOT Response: The Department's existing regulation at 14 CFR 256.4 prohibits undisclosed display bias and requires each electronic airline information system to ''display information in an objective manner based on search criteria selected by the user;'' the regulation provides ''lowest total cost'' as one example of search criterion. This regulation further requires that those flight options best satisfying the user's selected search criteria ''must be ranked in lists above other flight options,'' but provides that this ''does not preclude systems from setting default display parameters that are not deceptive or offering users the option to choose a variety of display methods within those parameters.''

The Department clarifies that this final rule does not alter the existing requirements in part 256. If an airline or ticket agent's site enables a consumer to select desired ancillary services (*e.g.,* baggage) to be included in the total quoted price for search results and the consumer requests to receive search results by ''lowest total cost,'' then any ancillary fees selected by the passenger should be included in the total price for purposes of ranking flight options to reflect the consumer's selected search parameters.

Comments: FlyersRights and multiple State attorneys general stated that states should be provided with statutory authority to regulate aviation consumer protection.

DOT Response: This issue is outside the Department's authority and cannot be addressed by the Department in this final rule. The Department works with state authorities on aviation consumer protection issues where appropriate and within the confines of existing statutory authority.[115]

Comment: The U.S. PIRG Education Fund asked the Department to update its method of reporting consumer complaints, suggesting models currently used by the National Highway Traffic Safety Administration (NHTSA) and the Consumer Financial Protection Bureau (CFPB).

DOT Response: The Department has been examining how best to review, process, and report air travel service consumer complaints, which has included looking at various models including models currently used by NHTSA and CFPB. The Department anticipates that its new modernized system will be operational in 2024 and will be further enhanced with funding

[114] 76 FR 23110, 23143 (Apr. 25, 2011).

[115] On April 16, 2024, the Department announced a new partnership with State attorneys general to prioritize misconduct cases referred to DOT by State attorneys general who uncover unfair or deceptive airline practices. *See https://www.transportation.gov/briefing-room/secretary-buttigieg-launches-bipartisan-partnership-state-attorneys-general-protect.*

from the Technology Modernization Fund (TMF) in the coming years.

Comments: A few individual commenters asked the Department to impose a comprehensive passengers' bill of rights.

DOT Response: This comment is outside of the scope of this rulemaking. The Department notes that it provides a comprehensive list of current consumer protections for air consumers at *https://www.transportation.gov/airconsumer/fly-rights* and an Airline Passengers with Disabilities Bill of Rights at *https://www.transportation.gov/airconsumer/disabilitybillofrights.* Also, the Department has an open rulemaking to respond to section 429 of the 2018 FAA Act which directs the Department to require carriers to submit a one-page document that describes the rights of air consumers to the agency and require those carriers to make that document available on their websites.[116]

F. Compliance Period

Proposal: The Department proposed a six-month implementation period for the rule's requirements. In support of the proposed six-month implementation period, the Department noted that, at the June 2022 ACPAC meeting, one airline representative indicated that, broadly speaking, sharing ancillary fee data with ticket agents is not technologically difficult and could be accomplished within a short time frame.[117] The Department specifically sought comment on whether it should impose a date certain by which carriers must share ancillary service fee information with ticket agents.

Comments: The ACPAC decided to refrain from recommending a specific timeframe for compliance with the final rule. Instead, the ACPAC recommended at its January 12, 2023, meeting that the Department should consider what can be done realistically, as well as the need for consumers to have ancillary fee information as soon as possible, in determining the timeframe for compliance with the final rule.

A few groups representing consumers requested that the Department adopt either the six-month period from the NPRM or a shorter three-month implementation period. For example, AARP supported the proposed six-month compliance period, calling it a ''reasonable amount of time'' and urged the Department to finalize and implement the rule quickly ''so that the benefits of fee disclosure can be extended to travelers as soon as possible.'' In addition, FlyersRights asked the Department to instead require a three-month implementation period. In support, it cited the June 2022 ACPAC testimony that the Department cited in the NPRM as evidence that airlines and ticket agents could implement the proposed rule more quickly. On the other hand, Travelers United commented that the significant technological changes required by the proposal would require additional time to implement.

Industry commenters uniformly opposed the proposed six-month compliance period, stating that it was far too short and recommending significantly longer periods, with many stating at least three years was needed. Specifically, industry commenters raised concerns with the ability to complete data-sharing agreements, develop the proposed first page display of critical ancillary fees, display real-time, transactable family seating fees, and calculate and display passenger-specific fees within the six-month timeframe proposed. For example, A4A stated that a compliance period of at least three years was ''necessary to provide time for all parties to re-engineer their own marketing platforms and re-design and re-engineer connections to other stake holders, especially with regard to family seating transactions and passenger-specific search information.'' IATA also recommended a three-year implementation period, citing prior challenges with data sharing using EDIFACT and testifying at the Department's March 30, 2023, hearing that providing transactable family seating fees would take years. In addition, Frontier Airlines suggested that required data sharing with ticket agents ''would be measured in years, and perhaps decades,'' and American Airlines stated that ''to disclose passenger-specific ancillary fees on the first page of search results requires a highly complex reconfiguration'' of its distribution technology that ''could take years to resolve.''

Other industry commenters suggested less than three years was needed but still emphasized that implementation of the proposal would take longer than the six months proposed. For example, USTOA recommended an implementation period of at least 18 months, Travelport suggested a period of 24 months (with the first 12 months for data sharing) if the Department elected not to require data sharing with GDSs, and Travel Tech stated that at least two years would be needed to display all critical ancillary fees at the first point in the search process where schedule and fare information is provided.

Some industry commenters stated or suggested that their time estimates would be shorter if the Department modified its proposal. For example, American Airlines stated that if the Department allowed itinerary-specific disclosures later in the booking process, its ''estimate would change meaningfully.'' Bookings Holdings commented that its three-year implementation estimate could be reduced to two years if the Department required data sharing through GDSs and to 18 months if the Department allowed affirmative opt-ins or static rollovers, links, or pop-ups for the display of fees. Amadeus noted that ''[r]evision of the rules to allow more flexible displays and to eliminate the proposed requirement that all critical fee data be provided on the first search results page will go far to allow for timely and cost-efficient implementation.'' Travel Tech stated that the rule could possibly be implemented in as few as 18 months with modifications to the proposal.

DOT Response: After carefully considering the comments received, the Department extends the proposed compliance period as follows: (1) airlines must share data with ticket agents as required in this rule not later than six months after this rule's publication date, or October 30, 2024; (2) airlines must meet the critical ancillary service fee disclosure requirements not later than 12 months after this rule's publication date, or April 30, 2025; (3) ticket agents that do not meet the SBA definition of a small entity[118] must meet the critical ancillary service fee disclosure requirements to consumers not later than 18 months after this rule's publication date, or October 30, 2025; and (4) ticket agents that meet the SBA definition of small entity must meet critical ancillary fee disclosure requirements to consumers not later than 24 months after this rule's publication date, or April 30, 2026. The additional six months for large ticket agents to comply beyond the deadline for airlines reflects that carriers already have access to the required ancillary fee information, but ticket agents cannot implement the disclosure requirements

[116] ''One-Page Document on Passenger Rights'' (RIN 2015–AE82) is available in the Fall 2023 Unified Agenda of Regulatory and Deregulatory Action at *https://www.reginfo.gov/public/do/eAgendaViewRule?pubId=202310&RIN=2105-AE82.*

[117] Remark of American Airlines, *available at https://www.transportation.gov/airconsumer/ACPAC/June2022Meeting/webcast* (Day 1 afternoon session).

[118] A ticket agent is a small entity if it has total annual revenues below $25 million *See https://www.sba.gov/document/support--table-size-standards,* NAICS Code 561510.

in this rule until data-sharing arrangements are complete. The longer implementation period for small ticket agents reflects that those businesses may require additional time for compliance as discussed in section E (1)(b).

The Department believes that the implementation period set forth in this final rule is reasonable. The Department has modified several key aspects of the proposal in this final rule,—including in areas that were of particular concern to industry commenters—which will permit quicker implementation than the periods generally suggested by industry commenters. Among those significant changes, this final rule does not require display or transactability of family seating fees and provides additional flexibility in how critical ancillary fees must be disclosed, as requested by many commenters. In addition, while some commenters cited the requirement to provide passenger-specific fees as a challenge to timely implementation, the Department notes that some commenters appeared to misunderstand this requirement and mistakenly believed that information provided by the consumer would need to be validated before the airline or ticket agent could disclose passenger-specific fees, posing technological challenges. As discussed in section E (5), airlines and ticket agents may present passenger-specific ancillary fees based on the information provided by the consumer, and so this requirement should not significantly slow implementation.

Finally, although this final rule does not require data sharing with GDSs as requested by some commenters to speed implementation, the Department expects that airlines and ticket agents will work in good faith to come to an agreement on the method used to transmit the ancillary fee information required by this final rule. Nothing in this final rule prevents airlines and ticket agents from voluntarily agreeing to use GDSs to distribute the ancillary fee information if that is their preferred method for meeting the rule's requirements within the timeframe provided.

Regulatory Notices

Executive Order 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

The final rule meets the threshold for a significant regulatory action as defined in section (3)(f)(1) of E.O. 12866, ''Regulatory Planning and Review,'' as amended by E.O. 14094, ''Modernizing Regulatory Review,'' because it is likely to have an annual effect on the economy of $200 million or more. Accordingly, the Department has prepared a regulatory impact analysis for the proposed rule, summarized in this section and available in the docket. Table X summarizes the results of the analysis.

The final rule changes how U.S. air carriers, foreign air carriers, and ticket agents disclose information about certain ancillary fees for flights. Expected benefits of the rule are due to the reduction of excess consumption of air travel, or deadweight loss, which occurs because consumers who are unaware of ancillary service fees behave as if the price for air travel is lower than it is. Annual benefits expected from reducing deadweight loss amount to $5.5 million. The other source of expected benefits is from the time consumers will save when they search for airfare because they no longer need to interrupt their search to find information on ancillary service fees. The amount in expected benefits due to time savings varies significantly depending on assumptions regarding the number of consumers who consider ancillary fee information when they search for airfare.

Expected costs of this rule include costs to consumers uninterested in receiving this information due to the time needed to navigate increased amounts of information, which again, varies according to the percentage of consumers who consider ancillary fee information relevant to their purchase decision. The primary costs of the rule to carriers and ticket agents are the costs that they would incur to modify their websites to adjust their displays of fares, schedules, and fees. Third parties involved in data exchange, such as GDSs and direct-channel companies might incur some costs due the need to upgrade their systems, though the Department understands that these entities are already upgrading systems for market reasons and have been for several years. As shown in table X, the analysis considered two scenarios, each representing an alternative estimate regarding the percentage of consumers who consider ancillary fee information when they purchase airfare. Across the two scenarios, the estimate of annual net benefits ranges from $30 million to $254 million, indicating that this percentage is a key driver of the results. Formal uncertainty analysis suggests that the final rule might be expected to produce net societal benefits with a probability of about 53 percent under plausible assumptions about the percentage of consumers who consider ancillary fees when they purchase airfare.

One effect of better information on ancillary fees, however, is that some consumers will pay less for the ancillary services they use when they travel by air. These economic effects are not societal benefits or costs but represent a transfer from airlines to consumers, estimated to be about $543 million annually. This transfer represents $543 million in overpayment in fees for consumers, or from the perspective of airlines, additional revenue from consumers who are surprised by fees and, for example, then need to pay a higher fee at the airport to check a bag. This transfer, as well as the benefits due to any reduction in deadweight loss, accrue to consumers and are expected to occur regardless of any time savings impacts.

TABLE X—SUMMARY OF ANNUAL ECONOMIC EFFECTS

[Millions of $2022]

Item	Annual amount	
	Scenario 1 *	Scenario 2 **
Benefits:		
Reduction in deadweight loss	$5.5	$5.5
Reduction in search time for consumers interested in ancillary service fees when they search for airline tickets on airline sites	365.2	484.3
Reduction in search time for consumers interested in ancillary service fees when they search for airline tickets on non-airline sites	37.4	49.5
Total annualized benefits	408.1	539.4
Costs:		

TABLE X—SUMMARY OF ANNUAL ECONOMIC EFFECTS—Continued

[Millions of $2022]

Item	Annual amount	
	Scenario 1 *	Scenario 2 **
Increased time navigating search results	330.8	238.9
Annualized one-time and recurring costs for airlines to update price displays and provide fee information to ticket agents	32.1	32.1
Annualized one-time and recurring costs for ticket agents to update price displays	13.9	13.9
Annualized costs to ticket agents for offline disclosures	1.0	1.0
Costs to GDSs and other third-parties engaged in data exchange to upgrade systems	Unquantified	Unquantified
Total annualized costs	377.8	285.9
Net benefits (costs)	30.3	253.5
Transfers:		
Reduction in prices paid for ancillary services (airlines to consumers)	543.1	543.1

* Scenario 1: 46% of consumers consider ancillary fees when they search for airfare.
** Scenario 2: 61% of consumers consider ancillary fees when they search for airfare.

Executive Order 13132 (Federalism)

This final rule has been analyzed in accordance with the principles and criteria contained in E.O. 13132 (''Federalism''). This final rule does not include any requirement that (1) has substantial direct effects on the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government, (2) imposes substantial direct compliance costs on State and local governments, or (3) preempts State law. States are already preempted from regulating in this area by the Airline Deregulation Act, 49 U.S.C. 41713. Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

Executive Order 13175

This final rule has been analyzed in accordance with the principles and criteria contained in E.O. 13175 (''Consultation and Coordination with Indian Tribal Governments''). Because none of the provisions of this final rule will significantly or uniquely affect the communities of the Indian tribal governments or impose substantial direct compliance costs on them, the funding and consultation requirements of E.O. 13175 do not apply.

Regulatory Flexibility Act

When a Federal agency is required to publish a notice of proposed rulemaking (5 U.S.C. 553), the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires the agency to conduct a final regulatory flexibility analysis (FRFA). A FRFA describes the impact of the rule on small entities and describes the steps the agency has taken to minimize the significant economic impact on small entities consistent with the stated objectives of applicable statutes (5 U.S.C. 604). A FRFA is not required if the agency head certifies that a rule will not have a significant economic impact on a substantial number of small entities (5 U.S.C. 605). The Department has prepared a FRFA for this final rule, set forth in the paragraphs that follow. DOT has provided a statement of the need for, and objectives of, the rule elsewhere in the preamble and does not restate them here. In the preamble to this final rule, DOT responds to the comments received on the economic impacts of the rule, including on small entities, and provides DOT's assessment of those comments and any changes made as a result of those comments (*e.g.,* the extended compliance period, exclusion of corporate travel agents, removal of family seat fee disclosure and transactability, flexibilities provided in the way carriers and ticket agents display ancillary fee information, and permitting baggage and change and cancellation policies to be displayed later in the booking process). DOT does not repeat that information here. The Department's Regulatory Impact Analysis developed in support of this final rule also provides information on the economic impacts of the final rule, as modified in response to public comments and further consideration by the Department. DOT did not receive comments from the Chief Counsel for Advocacy of the Small Business Administration in response to the proposed rule.

Description of and an estimate of the number of small entities to which the rule will apply.

The rule will have some impact on U.S. air carriers, foreign air carriers and ticket agents that qualify as small entities. It would also have some impact on GDSs, but none of the three major GDS companies in the market (Amadeus, Sabre, and Travelport) qualify as small businesses.

A carrier is a small entity if it provides air transportation exclusively with small aircraft, defined as any aircraft originally designed to have a maximum passenger capacity of 60 seats or less or a maximum payload capacity of 18,000 pounds or less, as described in 14 CFR 399.73. In 2020, 28 carriers meeting these criteria reported passenger traffic data to the Bureau of Transportation Statistics.[119]

A ticket agent is a small entity if it has total annual revenues below $25 million.[120] This amount excludes funds received in trust for an unaffiliated third party, such as bookings or sales subject to commissions, but includes commissions received. In 2017, the latest year with available data, 7,827 travel agency establishments had annual revenues of less than $25 million.[121]

Description of the projected reporting, recordkeeping, and other compliance requirements of the rule, including an estimate of the classes of small entities which will be subject to the requirement and the type of professional skills necessary for preparation of the report or record.

The final rule would have impacts on small entities because carriers and ticket agents would incur costs to modify websites and upgrade systems to exchange ancillary fee data. The Department stated in its initial regulatory flexibility analysis prepared in support of the proposed rule that

[119] Bureau of Transportation Statistics. No date. ''T1: U.S. Air Carrier Traffic and Capacity Summary by Service Class.'' *https://transtats.bts.gov/.*

[120] *See https://www.sba.gov/document/support--table-size-standards,* NAICS Code 561510.

[121] U.S. Census Bureau. 2022. ''Economic Census.'' *https://www.census.gov/programs-surveys/economic-census.html.*

because the Department could not estimate these costs reliably, it could not determine whether the proposed rule would impose a significant impact on a substantial number of small entities. For this final rule, the Department estimated that the primary costs of the rule to carriers and ticket agents are the costs that they would incur to modify their websites by adjusting their displays of fares, schedules, and fees. Third parties involved in data exchange, such as GDSs and direct-channel companies might incur some costs due the need to upgrade their systems, though the Department understands that these entities are already upgrading systems for market reasons and have been for several years. DOT estimated quantified costs range from $658 million to $1.5 billion annually. The Department acknowledges that some portion of these costs would be incurred by small entities.

Description of the steps the agency has taken to minimize the significant economic impact on small entities consistent with the stated objectives of applicable statutes, including a statement of the factual, policy, and legal reasons for selecting the alternative adopted in the final rule and why each one of the other significant alternatives to the rule considered by the agency which affect the impact on small entities was rejected.

The Department considered several alternatives to the measures adopted in this final rule. In this section, the Department describes the steps taken to minimize the significant economic impact on small entities consistent with the objectives of 49 U.S.C. 41712 and the other authorities discussed in the Statutory Authorities section of this final rule.

The Department proposed to cover U.S. air carriers, foreign air carriers, and ticket agents that advertise or sell airline tickets, whether traditional brick-and-mortar travel agencies, corporate travel agents, OTAs or metasearch sites that display airline flight search options directly to consumers. The final rule defers for a separate rulemaking a determination on whether metasearch sites that display airline flight search options directly to consumers are ticket agents subject to the disclosure requirements in this rule. To ensure consumers have access to critical ancillary service fee information under this final rule while metasearch entities are excluded from the rule's disclosure requirements, the Department requires that airlines and ticket agents display the required critical ancillary service fee information on the landing page on the airline or ticket agent's online platform to which consumers are directed after using a metasearch site. The Department believes that this option best balances the concerns that more examination is needed in the Department's separate rulemaking on ticket agents before the Department determines whether to cover metasearch sites that display airline flight search options directly to consumers as ticket agents required to disclose critical ancillary fee and policy information to consumers.

The final rule also excludes corporate travel agents from the final rule's requirements. Ancillary fee disclosures by those agents are the subject of contractual agreements between a business client and the travel agent, with the relevant ancillary services and fees negotiated as part of the contract. Moreover, the fees often are irrelevant for corporate clients, and are not a significant consideration in corporate travelers' purchasing decisions. The corporate client, not the business traveler, generally pays the cost of transportation, including fees. The benefits of covering corporate agents would therefore be limited but would involve costs.

The Department also considered differing compliance periods for the requirements established in the rule. In the proposed rule, the Department proposed a compliance period of 6 months for all covered entities to comply with the rule's requirements. The Department received comment that additional time was needed for compliance, including from small entities. In consideration of these comments, the Department requires in this final rule that: (1) airlines must provide fee and policy information of critical ancillary services to entities required to disclose this information directly to consumers no later than six months after this rule's publication date, (2) airlines must comply with all other regulatory requirements not later than 12 months after this rule's publication date, (3) ticket agents that do not meet the SBA definition of small entity must comply with all regulatory requirements not later than 18 months after this rule's publication date, and (4) ticket agents that that meet the SBA definition of small entity must comply with all regulatory requirements not later than 24 months after this rule's publication date.

In the proposed rule, DOT would have required airlines and ticket agents to provide fee information for first and second checked bags, carry-on bags, and change and cancellation fees in text form next to the fare information provided to consumers. On consideration of comments that the proposed requirements would result in screen clutter and be potentially confusing to consumers, the Department determined in this final rule to allow fee information to be displayed using pop-ups, expandable text, or other means except for hyperlinks as long as the disclosure is clear and conspicuous. This is intended to minimize clutter and allow airlines and ticket agents flexibility in how they disclose information. The Department also allows some information—specifically, airline policies for baggage and ticket changes and cancellations—later in the process, as long as the disclosure occurs before ticket purchase. Policy information can be displayed using hyperlinks. The Department believes that these additional flexibilities will reduce costs to airlines and assist consumers because airlines will be able to present the information in a manner that, while clear and conspicuous, is not confusing to consumers.

In this final rule, the Department also made changes to the proposed requirements for offline disclosures. In the proposed rule, the Department required these disclosures to be made for every quoted itinerary. The Department received comments that such disclosures would add a significant amount of ''talk time'' that would burden airlines and ticket agents with having to provide the information and consumers with having to spend time listening to the disclosures even if the information was not relevant to them. As a result of these comments, the Department is finalizing a requirement that airlines and ticket agents inform consumers purchasing air travel offline about whether a critical ancillary fee applies to the itinerary being quoted and give the consumer an opportunity to request information on the fee. The airline or ticket agent must then provide the critical ancillary fee information upon request of the consumer. This modification is expected to reduce extra time spent on the phone, which will benefit not only airlines and ticket agents, but also consumers who will not have to listen to information not relevant to them.

The Department considered whether to apply the disclosure requirements to all online platforms, in addition to computer websites. The Department finalizes the requirement that the disclosure requirements apply to all online platforms in this final rule. While this option may increase costs, the Department determined that it was necessary to ensure consumers received the same information on critical ancillary fees and policies regardless of

the online platform used to purchase their tickets for air travel.

DOT also considered whether to require disclosure of family seating fees in this rulemaking and to make those fees transactable by ticket agents. The Department is not finalizing the proposal to require carriers and ticket agents to disclose applicable fees for passengers 13 or under to be seated next to an accompanying adult on an aircraft, and to make those fees transactable. Instead, the Department is pursuing a separate rulemaking to address the issue of a young child being able to sit adjacent to an accompanying adult at no additional cost beyond the fare. Not requiring family seating disclosures and fee transactability reduces the cost burden on airlines and ticket agents.

Paperwork Reduction Act

In this final rule, the Department imposes new collections of information that require approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 49 U.S.C. 3501 *et seq.*). The Department also amends an existing collection of information, 2105–0561, in this final rule, with regard to the requirements for customer service plans. The Department has sought approval from OMB for the collections of information established in this final rule and will also seek approval for the amendment to the collection approved under OMB Control No. 2105–0561 as part of the renewal of that OMB control number, due to expire August 31, 2024. The Department will publish a separate notice in the **Federal Register** announcing OMB approval of the new and amended collections and advising the public of the associated OMB control numbers. Notwithstanding any other provisions of law, no person shall be subject to penalty for failing to comply with a collection of information if the collection of information does not display a currently valid OMB control number.

Industry commenters generally expressed the view that the proposed rule's disclosure requirements would impose significant burdens on industry. Many airlines stated that the disclosure requirements would require a reconfiguration of their processes. A study of the NPRM commissioned by A4A estimated $33 billion in costs to airlines over 10 years. A4A estimated that the initial airline cost of implementation would be $86.5 million and $9 million annually for maintenance and additional development. American Airlines stated that over 100,000 engineering hours would be required to begin reworking the search process on the airline's desktop website and other platforms.

Booking Holdings and USTOA stated that the Department's PRA analysis in the NPRM greatly underestimated burdens for planning, development, and programming by ticket agents to provide online displays of ancillary fee information on their websites. In addition, Booking Holdings estimated that the initial costs of engineering and testing the required displays, including to ensure readability and timeliness, would be multiple millions of dollars per entity covered by the regulation for initial development. Similarly, while USTOA did not provide an alternative burden hour estimate, USTOA stated that the 80 hours per entity that DOT estimated for programming, data management, website modification, and other related costs was an underestimate, given what it characterized as the ''extensive and ongoing website revisions that would be necessary to compile ancillary fee options,'' [122] and that the hourly wage of $45.90/hour used by the Department for web and interface designs was too low.[123]

Booking Holdings and USTOA asserted that the Department was incorrect to assume no costs for ongoing website maintenance by ticket agents. Instead, Booking Holdings estimated that the proposal would impose annual maintenance costs of hundreds of thousands of dollars per entity/ticket agent, stating that the proposal would require ticket agents to employ ''multiple full time engineers/developers, a project manager, and a full-time quality assurance associate to ensure that dynamic displays continue to operate appropriately'' and to periodically update and maintain hardware associated with the searches, for example, as carriers update and change their ancillary service fee policies. Further, Booking Holdings stated that the Department failed to account for any costs of negotiating new data-sharing agreements with carriers. A4A estimated that $8.8 million would be spent to supply data to agents.

In USTOA's view, the Department underestimated the number of ticket agents who would be required to comply with the rule's requirements, given the rule's applicability to offline transactions. USTOA and ASTA also disagreed with the Department's assessment that orally conveying the proposed ancillary fee information in offline transactions would involve only a ''marginal increase in time'' with minimal burden. ASTA estimated that 17.2 million offline transactions are completed each year by ticket agents and that the proposed disclosures for offline transactions would add at least 20 seconds to each offline transaction at an estimated cost of $21.3 million per year in ''talk time'' for ticket agents.

The Department has carefully considered public comments regarding the costs of the information collections required by this rule and reexamined the burden estimates presented in this section in light of the regulatory impact analysis developed in support of the final rule. As noted above, the Department has made modifications in this final rule that may have differing effects on the information collection burdens implicated by the NPRM. In contrast to the NPRM, the final rule does not impose a requirement to disclose family seating fees and provides additional flexibility in how critical ancillary fee information is disclosed and when policy information is disclosed. The final rule also extends information collection requirements to online platforms, which includes mobile applications.

Based on comments that the hours used to account for the initial information disclosures in the NPRM was too low and comments that the rule's impact on maintenance and other ongoing costs is measurable (recognizing, however, that regulated entities have already been operating and maintaining their own online platforms prior to implementation of this rule), the Department increased the number of hours per entity that DOT estimated for programming, data management, website modification, and other related costs from 80 to 120 and also added additional burden hours for ongoing maintenance of online platforms. The Department also updated the applicable hourly wage from $45.90 to $53.27. The updated hourly wage was calculated using an hourly rate of $53.27 for computer programmers, which is based on a median wage of $40.02 for web and digital interface designers from the BLS Occupational Employment and Wage Statistics from May 2022, multiplied by 1.41 to account for employee benefits and other costs to employers.

The Department has also updated the number of ticket agents to whom this rule would apply using data from the *US Census Bureau, 2017 Economic*

[122] USTOA further stated that the costs of complying with the full fare rule were not analogous to the costs of displaying complex ancillary fee information, as DOT suggested.

[123] USTOA stated that an inflation adjustment of the Department's estimated hourly rate for such services from the 2014 NPRM would result in an hourly of wage of $142.85/hour for a total annual cost to ticket agents of ''*at least* $6,856,800.''

Census based on NAICS Code 561501 Travel Agencies.

The Department also accepts commenters' arguments that the rule imposes a measurable burden on offline transactions and has added this additional burden to its estimates.

The Department has not added costs of negotiating new data-sharing agreements between ticket agents and carriers because contract negotiations are a cost that carriers and ticket agents incur to do business and are not a paperwork burden for purposes of the PRA.

The Department has consolidated all the information collections involving the disclosure of critical ancillary fees and policies into one information collection (*i.e.,* the 24-hour cancellation and hold policy disclosure is included in the information collection for change and cancellation fee and bag fee disclosures). Consolidating the information collections better reflects the burden of respondents to implement the changes to their online platforms to implement this rule's disclosure requirements. At the same time, the Department is separately estimating the burden for offline disclosures of bag, change, and cancellation fees, as the labor type involved is substantially different from other disclosures in this rule.

This rule requires three information collections: (1) U.S. air carriers, foreign air carriers, and ticket agents must disclose, during the online booking process, applicable fee and policy information for the first and second checked baggage and for carry-on baggage, and applicable fee and policy information for changing and cancelling reservations (including 24-hour cancellation or reservation hold policy); (2) U.S. air carriers, foreign air carriers, and ticket agents in offline transactions must disclose that bag, change, or cancellation fees apply to a quoted itinerary and disclose such fees upon request, and (3) U.S. air carriers and foreign air carriers must ensure that entities to which they provide fare, schedule, and availability information that display or sell the carrier's flights directly to consumers receive information regarding baggage fee rules and policies as well as ticket change and cancellation fees and policies, if the entities are required to disclose this information to consumers.

For each of the information collections, the title, a description of the respondents, and an estimate of the burdens are set forth below:

1. *Requirement that U.S. air carriers, foreign air carriers, and ticket agents disclose, during the online booking process, the applicable fee and policy information for the first and second checked baggage, one carry-on bag, and the applicable fee and policy information for changing and canceling reservation (including 24-hour cancellation or reservation hold policy).*

Title: Disclosure of Ancillary Fees and Policies During the Air Transportation Booking Process

Respondents: U.S. carriers, foreign air carriers, and ticket agents that sell or display carrier fare and schedule information to consumers in the United States.

Number of Respondents: We estimate that as many as 206 U.S. air carriers and foreign air carriers and as many as 7,497 ticket agents may be impacted by this requirement. Our estimate is based on the following information and assumptions: Ticket agents includes OTAs, brick-and-mortar travel agencies, and tour operators that market airline tickets. We updated our number of ticket agents based on data from NAICS code 561510 (*Source: US Census Bureau, 2017 Economic Census),* although not all of those entities market air transportation online to consumers in the United States. In addition, most ticket agents rely on GDSs to create online fare and schedule displays. GDSs and entities that create or develop and maintain their own online fare and schedule displays, such as many of the impacted carriers and the largest travel agents, will incur some planning, development, and programming costs to reprogram their systems to provide online displays of fare and schedule information that includes baggage fee information on their websites. Thus, our estimate of the number of impacted ticket agents may be overstated.[124] Many smaller carriers also rely on GDSs to create online fare and schedule displays, so our estimate of 206 impacted carriers may be overstated.

Estimated Annual Burden on Respondents: Approximately 133 hours per respondent (120 hours of initial display updates and 13 hours for ongoing maintenance). We base our estimate on the following information and assumptions: the primary costs to respondents for the disclosure requirement would arise from programming, data management, website modification, and other related costs to carriers and ticket agents to display the required ancillary fee information. The Department has modified the estimated annual burden on respondents to account for the following: extension of this rule to online platforms, which have increased in usage; an incremental increase in one time and ongoing costs to maintain online platforms; inclusion of 24-hour cancellation and hold policy disclosures in this information collection; [125] and a reduction in burden from removal of the proposed requirement for family seating fee disclosures.[126] The more significant burdens in this rulemaking are expected to be incurred one time by regulated entities. Once the modifications required by this information collection have been incorporated into the online platforms of regulated entities, we expect that this information collection will impose smaller additional ongoing costs, such as website maintenance, beyond what regulated entities were already incurring for operating online platforms prior to the promulgation of this rulemaking. In response to the comments received on this point, however, the Department estimates that this information collection adds approximately 13 hours of burden per respondent to maintain online platform systems. This rulemaking does not require the creation of new websites or online platforms by regulated entities that did not already maintain such online platforms for the purpose of selling air transportation.

Estimated Total Annual Burden: Approximately 1,024,499 hours for all respondents (based on an assumption of 27,398 hours for carriers (24,720 hours for the initial upgrade and 2,678 hours for ongoing costs) and 997,101 hours for ticket agents (899,640 hours for the initial upgrade and 97,461 hours for ongoing maintenance costs)). Based on

[124] In the NPRM, we assumed for the PRA analysis that about five percent of United States ticket agents, including GDSs and large travel agencies would be impacted by this requirement. In the Department's FRIA developed in support of this final rule, however, the cost estimates for ticket agents included the total number of ticket agents who may incur costs, or 7,497. Therefore, we do not include the five percent assumption in our PRA analysis for the final rule and instead assume all ticket agents are impacted. This is consistent with the approach taken for airlines, even though smaller airlines may also use GDSs.

[125] The NPRM estimated an average annual burden of 80 hours per respondent for the design, programming, and modification of websites to provide disclosure of 24-hour cancellation or hold information. The Department believes this number was an overestimate due to the static nature of this disclosure (*i.e.,* the disclosure should not have noticeable variation due to the relatively stagnant nature of 24-hour cancellation or hold policies). Such policies also exist generally unchanged in carrier customer service plans. The burden is also reduced as this final rule does not require this disclosure if the ticket is purchased within 7 days of the flight.

[126] The Department acknowledges USTOA's comment that the burdens of this rulemaking are not analogous to those in the full fare rule (76 FR 23110). The Department has taken this comment into account in increasing the paperwork burdens in this analysis, including the considerations noted above.

an estimated median hourly wage of $53.27 for web and digital interface designers,[127] this results in a total annual cost of $49,240,657 ($1,316,834 for carriers and $47,923,823 for ticket agents) for the first year. Note that after the initial costs are incurred, the annual cost will decrease to an estimated $142,657 per year for carriers and $5,191,747 per year for ticket agents.

Frequency: One time incorporation of information into online platform displays and ongoing costs (such as for maintenance). Costs are annual.

2. *U.S. air carriers, foreign air carriers, and ticket agents in offline transactions must disclose that bag, change, or cancellation fees apply to a quoted itinerary and disclose such fees upon request.*

Title: Disclosure of Ancillary Fees During the Offline Booking Process

Respondents: U.S. carriers, foreign air carriers, and ticket agents that sell or market tickets to U.S. consumers by phone or in-person

Number of Respondents: We estimate that as many as 206 U.S. air carriers and foreign air carriers and as many as 7,497 ticket agents may be impacted by this requirement. We base our estimate on the following information and assumptions: Ticket agents includes OTAs, brick-and-mortar travel agencies, and tour operators that market airline tickets. There may be an estimated 7,497 travel agencies in the United States, based on data from NAICS code 561510 (*Source: US Census Bureau, 2017 Economic Census*), although not all of those entities market air transportation by phone or in-person to U.S. consumers. Many carriers and ticket agents may not offer sales to U.S. consumers by phone or in-person; therefore, our estimate of 7,497 impacted ticket agents and 206 impacted carriers may be overstated.

Estimated Annual Burden on Respondents: Approximately 4 hours per respondent. This information collection adds additional disclosures to in-person or phone transactions when a ticket is marketed to U.S. consumers. The time required to provide the additional disclosure is not expected to be significant, and some consumers may not request additional disclosures.

The rule would require entities selling tickets marketed to U.S. consumers by phone or in-person to inform consumers about certain ancillary service fees at the time a fare is quoted. The Department estimates that respondents will incur 4.3 additional hours of burden on average annually on providing the offline disclosures required by this rule.

Estimated Total Annual Burden: Approximately 33,123 hours for all respondents (based on an assumption of 886 hours for carriers and 32,237 hours for ticket agents). Based on an estimated median hourly wage of $31.46 for travel agents,[128] this results in a total annual cost of $1,042,050 ($27,874 for carriers and $1,014,176 for ticket agents). The PRA estimate developed here supports a determination that the additional ''talk time'' for carriers is *de minimis.*

Frequency: This information collection imposes an additional cost for carriers and ticket agents for each interaction between a consumer and the carrier or ticket agent's in-person or telephone reservation agents. Costs are annual.

3. *Requirement that U.S. air carriers and foreign air carriers ensure that entities to which they provide fare, schedule, and availability information to display or sell the carrier's flights directly to consumers receive information regarding baggage fee rules and ticket change and cancellation fees and policies, if the entities are required to disclose this information to consumers.*

Title: Disclosure of critical ancillary fee information to other entities required to disclose fee information to consumers.

Respondents: U.S. air carriers and foreign air carriers that provide fare, schedule, and availability information to ticket agents to sell or display flights within, to, or from the United States.

Number of Respondents: We estimate that approximately 206 carriers will be impacted by this requirement. This includes foreign carriers that may not serve the United States on their own equipment but may sell connecting itineraries between the United States and a foreign point, when at least one of the foreign-to-foreign segments is operated by the foreign carrier.

Estimated Annual Burden on Respondents: Approximately 30 hours per respondent. The information collection requires carriers to either distribute baggage and change and cancellation fee rules or make the specific rules, including the calculation of baggage and change and cancellation fees applicable for passenger-specific itineraries, available to third parties. Carriers selling tickets in the United States already display baggage and ancillary fee information on their websites, as required by existing regulation (14 CFR 399.85(d)). This information includes the use of baggage fee calculators and other tables accessible to consumers. The rulemaking requires that this information be made available in such a way that other entities to which they provide fare, schedule, and availability information to display or sell the carrier's flights directly to consumers have access to this information in a non-static, dynamic format such that the entities can disclose baggage fee and change and cancellation fee information to consumers during each itinerary search. The Department adjusted its number of burden hours per respondent based on comments suggesting that the cost of data sharing with ticket agents is higher than the Department initially estimated. Several carriers, however, already share this information with other entities by agreement, which suggests that the added cost of implementing any modifications required by this rule may be limited for many carriers. This potential burden of 30 hours per respondent, as referenced here, may overestimate the actual burden for most carriers.

Estimated Total Annual Burden: This information collection would result in an estimated annual burden of 6,180 hours. Based on an estimated mean hourly wage of $66.30 for computer programmers,[129] this results in a total cost of approximately $409,734.

Frequency: This information collection imposes an additional cost for carriers to provide information on critical ancillary fees to ticket agents required to disclose this information to consumers. Costs are annual.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act (UMRA) of 1995, 2 U.S.C. 1501, requires agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate likely to result in the expenditures by States, local, or Tribal governments, or by the private sector, of $100 million or more (adjusted annually for inflation with base year of 1995) in any one year. The 2023 threshold after adjustment for inflation is $198 million, using the Implicit Price Deflator for the Gross Domestic Product. The assessment may be included in conjunction with other assessments, and

[127] The median base wage for web and digital interface developers in 2022 was $37.78, *https://www.bls.gov/oes/current/oes151254.htm.* We multiply this by 1.41 to account for benefits *https://www.bls.gov/news.release/archives/ecec_09202022.pdf.*

[128] The median base wage for travel agents in 2022 was $22.31, *https://www.bls.gov/oes/current/oes413041.htm.* We multiply this by 1.41 to account for benefits, *https://www.bls.gov/news.release/archives/ecec_09202022.pdf.*

[129] The median base wage for computer programmers in 2022 was $47.02, *https://www.bls.gov/oes/current/oes151251.htm.* We multiply this by 1.41 to account for benefits, *https://www.bls.gov/news.release/archives/ecec_09202022.pdf.*

the Department has provided the assessment required by UMRA within the RIA prepared in support of the final rule.

National Environmental Policy Act

The Department has analyzed the environmental impacts of this action pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*) and has determined that it is categorically excluded pursuant to DOT Order 5610.1C, Procedures for Considering Environmental Impacts (44 FR 56420, Oct. 1, 1979). Categorical exclusions are actions identified in an agency's NEPA implementing procedures that do not normally have a significant impact on the environment and therefore do not require either an environmental assessment (EA) or environmental impact statement (EIS).[130] In analyzing the applicability of a categorical exclusion, the agency must also consider whether extraordinary circumstances are present that would warrant the preparation of an EA or EIS.[131] Paragraph 4(c)(6)(i) of DOT Order 5610.1C provides that ''actions relating to consumer protection, including regulations'' are categorically excluded. The purpose of this rulemaking is to enhance protections for air travelers and to improve the air travel experience. The Department does not anticipate any environmental impacts, and there are no extraordinary circumstances present in connection with this rulemaking.

Congressional Review Act

Pursuant to subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (the Congressional Review Act), OMB's Office of Information and Regulatory Affairs has found that this rule falls within the scope of 5 U.S.C. 804(2).

List of Subjects

14 CFR Part 259

Air carriers and foreign air carriers, Consumer protection, Reporting and recordkeeping requirements.

14 CFR Part 399

Administrative practice and procedure, Air carriers and foreign air carriers, Air rates and fares, Air taxis, Consumer protection, Law enforcement, Small businesses.

Peter Paul Montgomery Buttigieg,

Secretary of Transportation.

For the reasons stated in the preamble, DOT amends 14 CFR chapter II, subchapters A and F, as follows:

PART 259—ENHANCED PROTECTIONS FOR AIRLINE PASSENGERS

■ 1. The authority citation for part 259 continues to read as follows:

Authority: 49 U.S.C. 40101(a)(4), 40101(a)(9), 40113(a), 41702, 41708, 41712, and 42301.

■ 2. Amend § 259.5 by:
■ a. Revising paragraphs (a) and (b)(4);
■ b. Removing the word ''and'' at the end of paragraph (b)(13);
■ c. Removing the period at the end of paragraph (b)(14) and adding ''; and'' in its place; and
■ d. Adding paragraph (b)(15).

The revisions and addition read as follows:

§ 259.5 Customer Service Plan.

(a) *Adoption of Plan.* Each covered carrier must adopt a Customer Service Plan applicable to its scheduled flights as specified in paragraphs (b)(1) through (15) of this section and adhere to the plan's terms.

(b) * * *

(4) Allowing reservations to be held at the quoted fare without payment, or cancelled without penalty, for at least twenty-four hours after the reservation is made if the reservation is made one week or more prior to a flight's departure, and disclosing its chosen twenty-four hour policy on the last page of the booking process;

* * * * *

(15) Disclosing critical ancillary service fees to consumers on the carrier's online platform or when a customer contacts the carrier's reservation center to inquire about a fare or make a reservation in person or by telephone and disclosing policies for critical ancillary service fees to consumers on the carrier's online platform as required by § 399.85 of this chapter.

* * * * *

PART 399—STATEMENTS OF GENERAL POLICY

■ 3. The authority citation for part 399 continues to read as follows:

Authority: 49 U.S.C. 40113(a), 41712, 46106, and 46107.

■ 4. Amend § 399.80 by revising the introductory text, adding paragraph (o), and revising paragraph (s) to read as follows:

§ 399.80 Unfair and deceptive practices of ticket agents.

It is the policy of the Department to regard as an unfair or deceptive practice or unfair method of competition the practices enumerated in paragraphs (a) through (o) of this section by a ticket agent of any size and the practice enumerated in paragraph (s) of this section by a ticket agent that sells air transportation online and is not considered a small business under the Small Business Administration's size standards set forth in 13 CFR 121.201:

* * * * *

(o) Failing to disclose ancillary service fee information as required by § 399.85.

* * * * *

(s) Failing to disclose and offer web-based discount fares to prospective passengers who contact the agent through other channels (*e.g.,* by telephone or in the agent's place of business) and indicate they are unable to use the agent's website due to a disability.

■ 5. Amend § 399.84 by revising paragraph (a) and adding paragraphs (d) and (e) to read as follows:

§ 399.84 Price advertising and opt-out provisions.

(a) The Department considers any advertising or solicitation by a direct air carrier, indirect air carrier, an agent of either, or a ticket agent, for passenger air transportation, a tour (*i.e.,* a combination of air transportation and ground or cruise accommodations) or tour component (*e.g.,* a hotel stay) that must be purchased with air transportation that states a price for such air transportation, tour, or tour component to be an unfair and deceptive practice in violation of 49 U.S.C. 41712, unless the price stated is the entire price (all mandatory charges) to be paid by the customer to the carrier, or agent, for such air transportation, tour, or tour component. Mandatory charges refer to all taxes and fees that are required to purchase air transportation on the channel where the advertising or solicitation occurs (*e.g.,* if a fare is advertised online for $100 then that means the fare must be available for the consumer to purchase for $100 online). Mandatory charges included within the single total price listed may be stated separately or through links or ''pop ups'' on online platforms that display the total price, but such charges may not be false or misleading, may not be displayed prominently, may not be presented in the same or larger size as

[130] *See* 40 CFR 1508.4.

[131] *Id.*

the total price, and must provide cost information on a per passenger basis that accurately reflects the cost of the item covered by the mandatory charge.

* * * * *

(d) A carrier or ticket agent may display a price that includes all mandatory charges and one or more ancillary service fees (*i.e.,* fees charged for any optional service related to air travel beyond passenger air transportation) in place of or more prominently than a price that only includes all mandatory charges.

(e) The Department considers any offer of a percentage-off discount for passenger air transportation or for a tour (*i.e.,* a combination of air transportation and ground or cruise accommodations) or tour component (*e.g.,* a hotel stay) that must be purchased with air transportation, that does not make clear at the outset the terms and conditions of the offer, including how the discount is calculated, to be an unfair and deceptive practice in violation of 49 U.S.C. 41712. When used in any advertising or solicitation, the term ''base fare'' must refer to an amount that includes all mandatory carrier-imposed charges and the terms ''flight,'' ''ticket,'' or ''fare'' must refer to an amount that includes all mandatory carrier-imposed and government charges.

■ 6. Revise § 399.85 to read as follows:

§ 399.85 Notice of ancillary service fees.

(a) *Definitions.* For purposes of this section, the following definitions apply:

Air transportation means interstate air transportation, foreign air transportation, or the transportation of mail by aircraft as defined in 49 U.S.C. 40102(a)(23) and (25).

Ancillary service fee means the fee charged for any optional service related to air travel that a U.S. or foreign air carrier provides beyond passenger air transportation. Such fees may include, but are not limited to, fees for checked or carry-on baggage, advance seat selection, access to in-flight entertainment programs, in-flight beverages, lounge access, snacks and meals, pillows and blankets, and seat upgrades.

Ancillary service package means a package or bundle of one or more ancillary services offered for sale by a carrier or ticket agent.

Anonymous itinerary search means a search that does not take into account information specific to the passenger but does take into account information specific to the itinerary (*e.g.,* geography, travel dates, cabin class, and ticketed fare class) that may impact the critical ancillary service fees to be charged or policies to be applied.

Break in journey means a deliberate interruption by a passenger of a journey between a point in the United States and a point in a foreign country where a stopover at a foreign point is scheduled. The factors to consider to determine whether a stopover is a deliberate interruption include whether the segment between two foreign points and the segment between a foreign point and the United States were purchased in a single transaction and as a single ticket/itinerary, whether the segment between two foreign points is operated or marketed by a carrier that has no codeshare or interline agreement with the carrier operating or marketing the segment to or from the United States, and whether the stopover at a foreign point involves the passenger picking up checked baggage, leaving the airport, and continuing the next segment after a substantial amount of time.

Clear and conspicuous means that a disclosure is difficult to miss (*i.e.,* easily noticeable), easily understandable by consumers, and presented in a manner that allows consumers to determine the true cost and enable them to select the best flight options for them.

Critical ancillary service means any ancillary service critical to consumers' purchasing decisions. Such services are: transporting the first checked bag, the second checked bag, or a carry-on bag, the ability for a consumer to cancel or change a reservation, and any other services determined, after notice and opportunity to comment, to be critical by the Secretary.

Consumer or *user* refers to a person who seeks to obtain information about or purchase air transportation from a U.S. carrier, a foreign carrier, or a ticket agent, whether through an online platform or other means (*e.g.,* over the telephone, in person).

Corporate travel agent refers to a ticket agent engaged in providing travel services to the employees of a business entity pursuant to a written contract with that entity for the business travel of its employees.

Online platform refers to any interactive electronic medium, including, but not limited to, websites and mobile applications, that allow the consumer to search for or purchase air transportation from a U.S. carrier, a foreign carrier, or a ticket agent.

Passenger-specific itinerary search means a search that takes into account information specific to the passenger (*e.g.,* the passenger's status in the airline's frequent flyer program, the passenger's military status, or the passenger's status as a holder of a particular credit card) that was affirmatively provided by that passenger and information specific to the itinerary (*e.g.,* geography, travel dates, cabin class, and ticketed fare class) that may impact the critical ancillary service fees to be charged or policies to be applied.

(b) *Passenger-specific and anonymous itinerary searches.* Each U.S. air carrier, foreign air carrier, and ticket agent (except a corporate travel agent) that advertises or sells air transportation marketed to U.S. consumers must offer consumers both the option to conduct a passenger-specific itinerary search and the option to conduct an anonymous itinerary search.

(c) *Online disclosures of ancillary service fees*—(1) *Critical ancillary service fees.* Each U.S. air carrier, foreign air carrier, and ticket agent (except a corporate travel agent) that has an online platform marketed to U.S. consumers where it advertises or sells air transportation must clearly and conspicuously disclose on its online platform the accurate fee that applies, if any, for all critical ancillary services. The fee cannot be designated as $0 in circumstances where a critical ancillary service is not available to the consumer but rather must state ''not available'' or a similar notation. The fee information must be provided the first time that fare and schedule information is disclosed after a consumer conducts a passenger-specific itinerary search or an anonymous itinerary search. The fees cannot be displayed through a hyperlink.

(2) *Other ancillary service fees.* Each U.S. air carrier, foreign air carrier, and ticket agent (except a corporate travel agent) that has an online platform marketed to U.S. consumers where it advertises or sells air transportation may disclose ancillary service fees that are not critical ancillary service fees at the same time as critical ancillary service fees.

(3) *Ancillary service packages.* Each U.S. air carrier, foreign air carrier, and ticket agent (except a corporate travel agent) that has an online platform marketed to U.S. consumers where it advertises or sells air transportation must disclose the standalone fee for each critical ancillary service required under paragraph (c)(1) of this section when fare and schedule information is provided. Nothing in this section requires or prohibits a carrier or ticket agent from disclosing an ancillary service package that includes critical ancillary services if it chooses to do so.

(4) *Air tour packages.* Each ticket agent that has an online platform marketed to U.S. consumers where it advertises or sells air tour packages must clearly and conspicuously disclose, at the time the ticket agent

offers a package fare quotation for a specific itinerary selected by a consumer, where the carrier providing air transportation is not known, that additional fees for baggage may apply and that those fees may be reduced or waived based on the passenger's frequent flyer status, method of payment, or other consumer characteristic. When the carrier providing air transportation for an air-tour package is known, that ticket agent must provide baggage fee information as prescribed by this paragraph (c) at the time that the ticket agent discloses the name of the carrier to the consumer.

(5) *Website disclosure of all ancillary service fees.* A U.S. or foreign air carrier that has a website marketed to U.S. consumers where it advertises or sells air transportation must clearly and conspicuously disclose on its website accurate information on ancillary service fees available to a passenger purchasing air transportation with a clear and conspicuous link from the carrier's homepage directly to a page or a place on a page where all such ancillary services and related fees are disclosed. In general, fees for particular services may be expressed as a range; however, baggage fees must be expressed as specific charges taking into account any factors (*e.g.,* frequent flyer status, early purchase) that affect those charges.

(d) *Online disclosure of baggage policies.* Each U.S. air carrier, foreign air carrier, and ticket agent (except a corporate travel agent) that has an online platform marketed to U.S. consumers where it advertises or sells air transportation must clearly and conspicuously disclose on its online platform, before ticket purchase, the accurate weight and dimension limitations that the carrier imposes for a first and second checked bag and a carry-on bag after a consumer conducts a passenger-specific itinerary search or an anonymous itinerary search.

(e) *Intent to travel with a bag.* Each U.S. air carrier, foreign air carrier, and ticket agent that has an online platform marketed to U.S. consumers where it advertises or sells air transportation may clearly and conspicuously solicit information from a consumer prior to the consumer conducting a passenger-specific itinerary or an anonymous itinerary search for air transportation regarding the consumer's intention to travel with a carry-on bag, a first checked bag, or a second checked bag. If the consumer affirmatively takes action to indicate that the consumer and all others in the booking party do not intend to travel with a carry-on bag, a first checked bag, or a second checked bag, then the carrier or ticket agent may forego disclosing the fees for that bag with the fare and schedule information as required by paragraph (c) of this section. Carriers and ticket agents (except a corporate travel agent) must disclose the baggage policies before ticket purchase as required by paragraph (d) of this section and must disclose information regarding the passenger's free baggage allowance and fee information for a carry-on bag, a first checked bag, and a second checked bag on e-ticket confirmations as required by paragraph (k) of this section even if a consumer indicates an intention not to travel with a bag.

(f) *Online disclosure of cancellation and change policies.* Each U.S. carrier, foreign air carrier, and ticket agent (except a corporate travel agent) that has an online platform marketed to U.S. consumers where it advertises or sells air transportation must accurately, clearly, and conspicuously, disclose on its online platform, before ticket purchase, the components of change and cancellation policies identified in paragraphs (f)(1) through (4) of this section.

(1) *Restrictions and prohibitions.* A summary of the applicable restrictions and prohibitions to change or cancel a ticket that apply to the consumer conducting a passenger-specific itinerary or an anonymous itinerary search, including any prohibitions or restrictions to obtaining a refund of the full amount paid;

(2) *Form of refund.* A summary of the applicable policy regarding the form of the refund for a change or cancellation (*e.g.,* a credit to the original form of payment, airline credits or voucher) that apply to the consumer conducting a passenger-specific itinerary or an anonymous itinerary search;

(3) *Fare differential.* A summary of the applicable policy regarding a consumer's right to, or responsibility for, any fare differential, including whether the consumer is entitled to a refund in fare difference if the consumer changes to a lower cost replacement flight, that apply to the consumer conducting a passenger-specific itinerary or an anonymous itinerary search; and

(4) *24-Hour hold or cancellation.* A statement disclosed clearly and conspicuously on the last page of the booking process on allowing the reservation to be held at the quoted fare without payment, or cancelled without penalty, for at least twenty-four hours after the reservation is made, consistent with a carrier's customer service plan in § 259.5(b)(4) of this chapter and consistent with a ticket agent's policy. A ticket agent that has a policy of not allowing a 24-hour hold or cancellation must disclose that information clearly and conspicuously on the last page of the booking process. The disclosures in this paragraph (f)(4) are required if the reservation is made one week or more prior to a flight's departure.

(g) *Disclosures on landing page.* Each U.S. air carrier, foreign air carrier, and ticket agent (except a corporate travel agent) that has an online platform marketed to U.S. consumers where it sells air transportation and that accepts a redirect of consumers to its online platform to complete the booking must ensure that the required critical ancillary service fee information in paragraph (c) of this section is accurately, clearly, and conspicuously displayed on the first page of the online platform to which the consumer has been directed, unless the consumer was provided accurate fee information of critical ancillary services on the directing entity's online platform.

(h) *Seat guarantee notice.* Each U.S. carrier, foreign air carrier, and ticket agent (except a corporate travel agent) that has an online platform marketed to U.S. consumers where it advertises or sells air transportation must clearly and conspicuously disclose the following notice on any page or step of the booking process in which a consumer is offered a seat selection for a fee: ''A seat is included in your fare. You are not required to purchase a seat assignment to travel. If you decide to purchase a ticket and do not select a seat prior to purchase, a seat will be provided to you without additional charge when you travel.''

(i) *Code-share partner disclosures.* For air transportation within, to or from the United States, a carrier marketing a flight under its identity that is operated by a different carrier, otherwise known as a code-share flight, must through its website disclose to consumers booked on a code-share flight any differences between its optional services and related fees and those of the carrier operating the flight. This disclosure may be made through a conspicuous notice of the existence of such differences on the marketing carrier's website or a conspicuous hyperlink taking the reader directly to the operating carrier's fee listing or to a page on the marketing carrier's website that lists the differences in policies among code-share partners.

(j) *Offline fee disclosures of ancillary services.* Each U.S. air carrier, foreign air carrier, and ticket agent (except a corporate travel agent) that markets air transportation to U.S. consumers in person or by phone must disclose to

consumers, at the time a fare is quoted for an itinerary, that baggage fees (for a first checked, second checked, or carry-on bag), change fees, and cancellation fees apply, if that is the case. The U.S. carrier, foreign carrier, or ticket agent (other than a corporate travel agent) must then ask the consumer if they wish to hear more about the specific baggage fees, change fees, cancellation fees, and any other critical ancillary service fees that apply. These carriers and ticket agents, upon request from the consumer, must disclose those specific fees taking into account passenger-specific information provided by the consumer.

(k) *Disclosures of baggage fees on e-ticket confirmations.* A U.S. carrier, a foreign air carrier, or a ticket agent (except a corporate travel agent) that has an online platform marketed to U.S. consumers where it advertises or sells air transportation must include information regarding the passenger's free baggage allowance (including personal item) and the applicable fee for a carry-on bag and the first and second checked bag on all e-ticket confirmations for air transportation within, to or from the United States, including on the summary page at the completion of an online purchase and in a post-purchase email confirmation. Carriers and ticket agents must provide the fee information for a carry-on bag, first checked bag, and second checked bag in text form in the e-ticket confirmation taking into account any passenger-specific factors that affect those charges.

(l) *Sharing information on fee rules and policies.* Each U.S. and foreign air carrier that provides fare, schedule, and availability information for air transportation within, to, or from the United States to an entity that is required by law to disclose critical ancillary service fee and policy information directly to consumers must disclose fee and policy information for critical ancillary fee services to that entity. The information provided must be useable, current, accurate, and sufficient to ensure compliance by such entities.

(m) *Unfair and deceptive practice.* The Department considers the failure to provide and adhere to the disclosures required by this section to be an unfair and deceptive practice within the meaning of 49 U.S.C. 41712.

■ 7. Amend § 399.88 by revising paragraph (a) to read as follows:

§ 399.88 Prohibition on post-purchase price increase.

(a) It is an unfair and deceptive practice within the meaning of 49 U.S.C. 41712 for any seller of scheduled air transportation within, to or from the United States, or of a tour (*i.e.,* a combination of air transportation and ground or cruise accommodations), or tour component (*e.g.,* a hotel stay) that includes scheduled air transportation within, to or from the United States, to increase the ticket price of that air transportation, tour or tour component, or to raise the price for critical ancillary services as defined in § 399.85(a) to a consumer after the air transportation has been purchased by the consumer, except in the case of an increase in a government-imposed tax or fee. A purchase is deemed to have occurred when the full amount agreed upon has been paid by the consumer.

Department of Commerce

Bureau of Industry and Security

15 CFR Parts 732, 734, 738, et al.
Revision of Firearms License Requirements; Interim Final Rule

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

15 CFR Parts 732, 734, 738, 740, 742, 743, 748, 750, 758, 762, 772, and 774

[Docket No. 240419–0113]

RIN 0694–AJ46

Revision of Firearms License Requirements

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Interim final rule.

SUMMARY: In this interim final rule (IFR), the Bureau of Industry and Security (BIS) is amending the Export Administration Regulations (EAR) to enhance the control structure for firearms and related items. These changes will better protect U.S. national security and foreign policy interests, which include countering the diversion and misuse of firearms and related items and advancing human rights. This rule identifies semi-automatic firearms under new Export Control Classification Numbers (ECCNs); adds additional license requirements for Crime Control and Detection (CC) items, thereby resulting in additional restrictions on the availability of license exceptions for most destinations; amends license review policies so that they are more explicit as to the nature of review that will accompany different types of transactions and license exception availability (including adding a new list of high-risk destinations); updates and expands requirements for support documentation submitted with license applications; and better accounts for the import documentation requirements of other countries (such as an import certificate or other permit prior to importation) when firearms and related items are authorized under a BIS license exception. BIS is publishing this rule as an IFR to solicit comments from the public on additional changes to export controls on firearms and related items that would better protect U.S. national security and foreign policy interests.

DATES: This rule is effective May 30, 2024. Comments must be received by BIS no later than July 1, 2024.

ADDRESSES: Comments on this rule may be submitted to the Federal rulemaking portal (*www.regulations.gov*). The *regulations.gov* ID for this rule is: BIS–2024–0003. Please refer to RIN 0694–AJ46 in all comments.

All filers using the portal should use the name of the person or entity submitting the comments as the name of their files, in accordance with the instructions below. Anyone submitting business confidential information should clearly identify the business confidential portion at the time of submission, file a statement justifying nondisclosure and referring to the specific legal authority claimed, and provide a non-confidential version of the submission.

For comments submitted electronically containing business confidential information, the file name of the business confidential version should begin with the characters ''BC.'' Any page containing business confidential information must be clearly marked ''BUSINESS CONFIDENTIAL'' on the top of that page. The corresponding non-confidential version of those comments must be clearly marked ''PUBLIC.'' The file name of the non-confidential version should begin with the character ''P.'' Any submissions with file names that do not begin with either a ''BC'' or a ''P'' will be assumed to be public and will be made publicly available through *https://www.regulations.gov*. Commenters submitting business confidential information are encouraged to scan a hard copy of the non-confidential version to create an image of the file, rather than submitting a digital copy with redactions applied, to avoid inadvertent redaction errors which could enable the public to read business confidential information.

The Firearms Guidance Memorandum is available at *www.bis.gov/guidance_memorandum* and at *www.regulations.gov* under the *regulations.gov* ID BIS–2024–0003.

FOR FURTHER INFORMATION CONTACT: Anthony Christino, Acting Director, Office of Nonproliferation and Foreign Policy Controls; tel. (202) 482–3825 or email *NFPC_firearms@bis.doc.gov*.

SUPPLEMENTARY INFORMATION:

A. Background

BIS is amending the EAR (15 CFR parts 730–774) by revising the license requirements and review policies, as well as other aspects of the control structure (*e.g.,* license exceptions eligibility and export clearance requirements) for firearms, shotguns and related items (*e.g.,* discharge type arms, optical devices, ammunition, and related technology and software) controlled under the following ECCNs: 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, 0A509, 0B501, 0B505, 0D501, 0D505, 0E501, 0E504, and 0E505 (collectively referred to as firearms and related items for the purposes of this IFR). Background regarding these changes is detailed below.

1. History of EAR Firearms Controls

Firearms and related items have been controlled in the current structure by the Commerce Department (Commerce) under the EAR since March 9, 2020, when jurisdiction over certain end-item firearms and related items was transferred from the State Department's (State) United States Munitions List (USML) (*see* 22 CFR part 121) to the Commerce Control List (CCL), supplement no. 1 to part 774 of the EAR, maintained by BIS. *See* the January 23, 2020, BIS final rule, ''Control of Firearms, Guns, Ammunition and Related Articles the President Determines No Longer Warrant Control Under the United States Munitions List (USML)'' (85 FR 4136) (January 2020 EAR final rule; effective date: March 9, 2020) and the January 20, 2020, State final rule, ''International Traffic in Arms Regulations: U.S. Munitions List Categories I, II, and III.'' (85 FR 3819; effective date: March 9, 2020). Notably, BIS controlled long barrel shotguns prior to the publication of those rules. For the past almost four years, BIS has required that authorization be obtained for all exports and reexports of these firearms and related items to all destinations, including Canada. This worldwide license requirement under the EAR for firearms and certain related items is more restrictive than the license requirement that applies to other items whose jurisdiction transferred from the USML to the CCL as part of the Export Control Reform initiative (*i.e.,* the ''600 series'' military items and 9x515 spacecraft items), as the license requirement for those other items in most cases does not extend to Canada.

In addition to the worldwide license requirement, since March 9, 2020, BIS has maintained other requirements with respect to firearms and related items. These include certain export clearance requirements that provide increased transparency regarding the specific items being exported; limitations on the availability of license exceptions; certain recordkeeping requirements; and requirements to address temporary imports into the United States. As referenced in the January 2020 EAR final rule, these requirements were imposed to ensure, as much as possible, that the EAR control structure for firearms and related items would protect U.S. national security and foreign policy interests, which include countering diversion and misuse of firearms and related items and advancing human rights. As part of this control structure, BIS included provisions to ensure that U.S. export

controls under the EAR account for the firearms-related import controls of other countries; specifically, the use of BIS licenses is predicated on having an Import Certificate or other permit (if required) by the importing country.

2. Firearms Licensing Pause

On October 27, 2023, Commerce paused the issuance of new BIS export licenses involving certain firearms, related ''parts'' and ''components,'' and ammunition (detailed under ECCNs 0A501, 0A502, 0A504, and 0A505) to non-governmental end users not located in Ukraine, Israel, and most Wassenaar Arrangement Participating States (*i.e.,* Country Group A:1, supplement no. 1 to part 740). During this ''pause,'' Commerce assessed export control review policies for firearms and related items to determine whether any changes to the regulatory measures implemented in March 2020 were warranted to advance U.S. national security and foreign policy interests. The review focused on assessing and mitigating the risk of firearms being diverted to entities or activities that promote regional instability, abuse or violate human rights, or fuel criminal activities, including terrorism, extortion, and illicit trafficking of any kind.

This pause followed the identification by Commerce over the past year of several instances in which lawfully exported firearms and related items from the United States have been diverted or misused in a manner contrary to U.S. national security and foreign policy interests; this includes instances predating the transfer of licensing authorities from State to the Commerce Department. Because those instances of diversion largely involved commercial exports to non-governmental end users, Commerce tailored the pause to apply only to exports involving non-governmental end users.

Leading up to the pause, Commerce reviewed aggregate data showing that a substantial number of firearms recovered by foreign law enforcement agencies were lawfully exported from the United States. For example, a GAO report published in January 2022 identified concerns that the U.S. government is licensing firearm exports that fuel criminal activity and gun violence, enable human rights abuses, and destabilize government institutions in foreign countries, particularly in Central America.[1] The report explained that in Belize, El Salvador, Guatemala, and Honduras, transnational criminal organizations and other violent criminals frequently use firearms to commit murders for hire, carry out extortion schemes, and resist local police forces. The report further explained that, between 2015 and 2019, nearly 20% of approximately 27,000 firearms recovered and traced by law enforcement agencies in those four countries were U.S.-origin firearms diverted from legitimate commerce (*i.e.,* they were not illicitly smuggled from the United States, but rather lawfully exported).

The 2023 National Firearms Commerce and Trafficking Assessment provides additional data regarding the diversion of lawfully exported firearms. As described in that report, participating law enforcement agencies in foreign countries can submit firearm trace requests to ATF's eTrace system to help determine the purchase or ownership history of a recovered crime gun. ATF's analysis of all international crime gun trace requests received between 2017 and 2021 indicates that at least 11% (18,749) of traced firearms were lawfully exported from the United States and later recovered in a foreign country. For countries outside of North America, at least 37% of firearms submitted to ATF were lawful exports; for countries in Central America, at least 19% of firearms submitted to ATF were lawful exports.[2] These data are of particular concern given that ATF was working with a limited set of international crime guns for which a trace request was submitted. Together, these reports indicate that a sizeable portion of international crime guns are diverted from lawful exports.

Commerce also identified specific cases in which lawful exports of firearms and related items were misused or diverted in a manner that adversely impacted U.S. national security and foreign policy interests. In one case, a firearm that was licensed for export to one country was subsequently diverted to a bordering country and used in a political assassination. In another, a license exception was used to export parts for the unlawful assembly of firearms in Taiwan. BIS also identified instances of firearms and ammunition exports being diverted to Russia via commercial resellers in third countries; such firearms and ammunition may be used to support Russia's further invasion of Ukraine.

In addition, partner governments, particularly those in the Western Hemisphere, have expressed, and have continued to express, concern to Commerce with respect to illicit firearms trafficking, including the diversion of lawfully exported firearms. For example, governments in the Caribbean region expressed concern that individuals are using license exceptions to bring firearms, particularly semi-automatic handguns, to their countries, and that those firearms are being diverted to violent criminals. These partner governments have sought U.S. assistance in addressing diversion, which is fueling violence, criminal activity, and instability within their countries or regions.

Commerce takes seriously its responsibility to regulate the export of firearms and related items consistent with U.S. national security and foreign policy interests, which include countering diversion and misuse of firearms and advancing human rights. Given the lethality of these items, the significant volume and value of the applications being processed, and the risk of diversion or misuse associated with them, Commerce is committed to ensuring that controls for these items appropriately protect the security of the United States and our allies and partners. Thus, during the pause, Commerce conducted a thorough review to assess the risk factors that contribute to the diversion and misuse of firearms and related items, evaluate whether existing review policies sufficiently account for those factors, and determine whether those policies could be improved. As part of that review, Commerce closely reexamined the data and case studies that led to the pause. It supplemented those data and case studies by studying reports and other empirical evidence regarding the conditions and risk factors that enable diversion and misuse of U.S. firearms and related items. Additionally, Commerce continued to engage with stakeholders and partner governments to gather different perspectives on addressing the risks associated with the diversion of firearms and related items.

As part of this review, Commerce, together with interagency export control partners in the Departments of Defense, Energy, and State, as well as other federal agencies with technical expertise in firearms and related items, assessed current U.S. firearms export control policies to determine whether updates to BIS's review process and procedures

[1] United States Government Accountability Office, *Firearms Trafficking: More Information is Needed to Inform U.S. Efforts in Central America* (Jan. 2022) (''GAO Report''), *https://www.gao.gov/assets/gao-22-104680.pdf.*

[2] Bureau of Alcohol, Tobacco, Firearms, and Explosives, ''National Firearms Commerce and Trafficking Assessment (NFCTA): Crime Guns—Volume Two, Part IV: Crime Guns Recovered Outside the United States and Traced by Law Enforcement,'' January 2023, pg 5, *https://www.atf.gov/firearms/docs/report/nfcta-volume-ii-part-iv-crime-guns-recovered-outside-us-and-traced-le/download.*

would further U.S. foreign policy and national security interests and how to appropriately implement those updates. In particular, as discussed further below, Commerce worked extensively with State, which is a key participant in the review process for license applications involving items subject to Commerce's jurisdiction. At the outset of the review process, Commerce drew upon its extensive experience reviewing applications for exports and reexports of firearms and related items and outlined an initial set of factors that increase the risk of these items being diverted or misused in a manner contrary to U.S. national security and foreign policy. Commerce consulted with State about these risk factors and, upon further review of the data and case studies as informed by State's experience, the agencies determined the key risk factors. In light of the fact that many of the factors concern conditions in destination countries, Commerce requested that State, which has deep expertise in evaluating such conditions, determine whether there are specific destinations where there is a substantial risk that firearms and related items will be diverted or misused in a manner contrary to U.S. national security and foreign policy. After conducting a thorough analysis that included consultation with U.S. Government stakeholders, State responded by developing a list of destinations in which it determined that there is a substantial risk that lawfully exported firearms sold to non-government end users will be diverted or misused in a manner contrary to U.S. national security and foreign policy.

Commerce also engaged with certain counterparts in Country Group A:1 destinations that export firearms and related items to understand the export license application requirements and risk factors considered under their firearms export control authorities and related policies. Because governments in A:1 destinations have demonstrated a commitment to export controls as participants in the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods and Technologies and share our interest in countering diversion or misuse of firearms and related items, advancing human rights, and promoting mutual security, BIS found it helpful to consult their processes and policies in making the regulatory updates outlined in this IFR.

Commerce also continued regular engagement with the Caribbean Community (CARICOM) to identify specific actions the U.S. could take to minimize the diversion to unauthorized end users of U.S. firearms and related items that were lawfully exported to end users in CARICOM member and partner countries. For example, concerns were raised that certain license exceptions, including License Exception Shipments of Limited Value (LVS) under § 740.3 and License Exception Baggage (BAG) under § 740.14, may have been used to bring firearms and related items into these CARICOM countries that were subsequently diverted in violation of license exception terms, or to export greater quantities of firearms and related items than were legally available under these two license exceptions. Note that License Exception LVS is not available for end-item firearms but is available for certain ''parts'' and ''components'' of firearms when for export or reexport to a Country Group B destination. Commerce also engaged with the U.S. firearms industry, as well as a wide variety of other stakeholders, to assess current export control processes and policies for firearms and related items and seek recommendations on effectively addressing diversion and misuse risks.

3. Findings of Policy Review and Engagement

As a result of this policy review and engagement, Commerce identified several concerns associated with export controls that apply under the EAR to firearms and related items. First, Commerce determined that the existing licensing procedures and requirements did not provide it with sufficient documentation and data to evaluate national security and foreign policy risks effectively. In particular, limited documentation requirements made it challenging to validate that firearms and related items are exported only to trustworthy foreign partners. Existing data collection practices also limited visibility of agencies that participate in the license review process into trade flows for different types of firearms under its jurisdiction, rendering it difficult to assess whether lawful exports might be at a particularly acute risk of diversion. In addition, these practices limited the US Government's ability to monitor potentially high-risk sales from distributors to third parties.

Second, Commerce concluded that the existing EAR license application requirements and review process for firearms and related items did not sufficiently enable identification of transactions that pose a heightened risk of diversion or misuse contrary to U.S. national security and foreign policy. Given that data and case studies show that exports of U.S. firearm and related items are at significant risk of being diverted or misused, Commerce conducted an extensive analysis to determine whether certain types of license applications warrant more scrutiny than others.

As an initial matter, Commerce determined that the risk of diversion is significantly higher for exports to non-government end users than for exports to government end users and that consequently applications involving non-government end users warrant additional scrutiny. Data show that ''[g]lobally, the private civilian stockpile is less accountable, far less strictly guarded and three times as plentiful as its state counterpart—all qualities that support easy diversion of weapons to the illegal sector.'' [3] For example, as ATF explained in a report on firearm theft in the U.S., ''more than 95% of stolen guns originate via thefts from private citizens.'' [4] The case studies reviewed by BIS provide additional support for these general trends. Indeed, in each of the case studies described above, the diverted firearm had originally been exported to a non-governmental end user.

Commerce also determined that the licensing process would benefit from clarifying the specific national security and foreign policy factors considered when license applications are reviewed; such factors are associated with the risk of diversion or misuse of firearms and related items and the potential impact to U.S. national security and foreign policy interests. While national security and foreign policy concerns have always been considered as part of the review process, detailing transparent review criteria will enable BIS, its interagency partners, exporters, and reexporters to more effectively and consistently assess the potential risks associated with a given transaction. The factors that will be considered include, but are not limited to: the nature of the end user; destination-specific national security and foreign policy risk factors, including firearms trafficking, terrorism, human rights concerns and political violence, state fragility, corruption, organized crime or gang activity, and drug trafficking; instances of past diversion or misuse; and the capabilities, potential uses, and lethality of the item. These factors are consistent

[4] Bureau of Alcohol, Tobacco, Firearms, and Explosives, ''National Firearms Commerce and Trafficking Assessment (NFCTA): Crime Guns—Volume Two, Part V: Firearm Thefts,'' January 2023, pg 1 *https://www.atf.gov/firearms/docs/report/nfcta-volume-ii-part-v-firearm-thefts/download*.

with U.S. National Security Memorandum 18, Conventional Arms Transfer Policy,[5] as well as the criteria that the United Kingdom and allies and partners in European Union member states apply to similar transactions, including the consideration of human rights; the preservation of regional peace, security, and stability; internal repression, tensions, or armed conflicts; terrorism and organized crime risks; and diversion risks. Notably, these key review factors, which are set forth in a new regulatory note to § 742.7(b)(3) of the EAR, apply to applications involving certain exports and reexports of firearms and related items to both government and non-government end users in all destinations.

Each of the destination-specific factors directly correlates with the risk of diversion or misuse. In countries with high rates of firearms trafficking, there is an increased risk that criminals will seek to divert U.S. firearms and sell them to traffickers. There is a similar risk in countries with high rates of drug trafficking, as ''illicit drugs are the most common non-firearms-related commodities seized together with firearms.'' [6] Drug traffickers and producers frequently seek to obtain diverted firearms, both to further their core operations [7] and to establish illicit firearms markets.[8]

Organized crime, human rights abuses, and terrorist activity are strong indicators of diversion risk because the ''interface between organized crime, violent extremism and terrorism, as well as state actors, allows regions to become flush with weapons looted from government stockpiles and weapons legally procured but sold on the black market.'' [9] As discussed, the GAO report on arms trafficking in Belize, El Salvador, Guatemala, and Honduras provides empirical evidence that countries with high degrees of organized crime, human rights abuses, and violent extremism also have high degrees of firearm diversion.[10]

A high degree of corruption in a country also increases diversion risk.[11] Specifically, in countries where corruption leads to reduced funding for law enforcement agencies, those agencies are less equipped to prevent criminals from diverting U.S. firearms. The risk of diversion is especially high in countries where corrupt government officials work directly with criminal organizations to traffic diverted U.S. firearms.[12]

Finally, state fragility correlates with diversion risk because ''strong states should have greater ability to manage and to control legal arms shipments than their weaker counterparts.'' [13] Diversion risk is especially high in countries experiencing internal violent conflict because conflict incentivizes armed groups to stockpile weapons through any means necessary, including through the diversion of U.S. firearms.[14]

The destination-specific factors also correlate with the risk that a diverted firearm will be used to commit violent acts that undermine U.S. national security and foreign policy objectives. As an initial matter, in countries with high rates of firearms trafficking, there is an increased risk that diverted firearms and related items will end up in the hands of cartels, gangs, terrorists, paramilitary groups, and other criminal organizations, all of which use firearms and related items for activities that directly undermine U.S. national security and foreign policy.

In countries with high rates of drug trafficking and organized crime, there is an increased risk that the diversion or misuse of firearms and related items will increase the ability of cartels, gangs, and other criminal organizations to undermine U.S. national security and foreign policy by flooding the United States with potentially deadly substances, sparking regional conflict that has spillover effects in the United States, and establishing transnational operations that extend into the U.S.[15] Similarly, in countries where terrorist groups have a significant presence, there is an increased risk that the diversion of firearms and related items will increase the capability of those groups to carry out attacks that undermine U.S. national security.[16] And in countries with high rates of human rights abuses and political violence, whether by government-sponsored paramilitary groups or non-state forces, there is an increased risk that the diversion of firearms and related items will enable further human rights abuses, which directly undermines a key U.S. foreign policy objective.[17]

The diversion and misuse of firearms and related items in countries with high degrees of corruption and state fragility poses similar risks to national security and foreign policy. In countries with high degrees of corruption, there is an increased risk that the diversion of firearms and related items to criminal organizations will further undermine the ability of law enforcement agencies to promote country stability, which is a central U.S. foreign policy objective. In turn, in a fragile state experiencing violent internal conflict, ''the influx of arms not only fuels the fighting but it contributes to the fragmentation and spreading of conflict; increases the number of criminal groups and their use of violence as a vehicle for market control; and strengthens armed groups against state responses.'' [18] Not only does such conflict undermine U.S. foreign policy by increasing country instability, it causes spillover effects that directly threaten U.S. national security.

In addition to the destination-specific factors, other important factors are the capabilities, lethality, and potential uses of different firearms and related items. BIS controls a diverse range of firearms and related items, including optics and

scopes, antique firearms, non-automatic and semi-automatic firearms, and ammunition. The potential for diversion or misuse of each of these categories of items should be carefully considered during the review of an export application.

The capabilities, lethality, and potential use of an item have numerous implications for U.S. national security and foreign policy interests. To begin with, certain items under BIS jurisdiction have characteristics that may render them either more or less dangerous in criminal, terrorist, or other adversaries' hands. For example, buckshot, blank ammunition, or antique firearms regulated by BIS under the EAR, have relatively limited capacity to pose harm to U.S. interests if they are diverted or misused. By contrast, some items subject to the EAR, such as certain semiautomatic firearms, may pose a higher risk to U.S. national security and foreign policy interests if diverted to criminals, terrorists, and cartels. For example, ATF studies on the import of semiautomatic rifles and shotguns have found that certain characteristics can render such firearms ''particularly suitable for the military or law enforcement'' use.[19] Firearms that could be used to give cartels, terrorist organizations, and other non-state actors parity with law enforcement agencies, including those of the U.S. and their allies, could pose a unique risk if diverted or misused. Furthermore, data from ATF indicates that weapons with these characteristics have, in fact, been diverted and misused in criminal activities,[20] and that certain types of weapons may be particularly appealing to cartels that seek to destabilize regions and engage in drug trafficking activities. Such factors are important to consider alongside other indicia of the end user's credibility and a destination's risk profile.

The capabilities, lethality, and potential uses of an item can also render it more amenable to diversion than other comparable items. In the context of drug trafficking and other criminal activity in the CARICOM region, for example, studies have indicated that criminals rely on access to unlawfully exported or diverted handguns. This is due to the fact that handguns are ''concealable, easier to use in close quarters, and just as effective for almost every criminal task'' as other firearms.[21] Similarly, a study of diversion in the CARICOM region showed both that criminals use various methods of concealment and that there is a prevalence of 9mm semiautomatic handguns in criminal activity.[22] These data are consistent with other studies showing that Central American police recovered and traced pistols at a greater rate than other types of weapons in that region.[23] Foreign government law enforcement agencies have likewise identified instances in which extraordinarily large quantities of ammunition—which is small and often can be repurposed for a large variety of firearms—are illicitly trafficked.[24] Put simply, some items may be more dangerous if they are diverted or misused, and others might be easier to divert or misuse. As such, the capabilities, lethality, and potential uses of certain items are closely linked to the U.S. national security and foreign policy interests that should be considered in the context of reviewing licensing applications.

Finally, in addition to specifying certain key factors that will be considered when reviewing license applications to export firearms and related items to any end user, Commerce determined that destination-specific factors should be used to identify destinations where firearm exports to non-government end users entail a substantial risk of diversion or misuse in a manner adverse to U.S. national security and foreign policy. Identifying those ''high-risk destinations'' enables BIS to develop a uniform review policy for license applications, ensuring that the licensing process consistently accounts for the risks associated with various transactions; provides transparency and predictability to exporters, stakeholders, and the public; and adequately safeguards U.S. foreign policy and national security interests.

As discussed above, Commerce requested that State, which has extensive expertise in evaluating country-specific conditions and associated national security and foreign policy concerns, assist in developing a list of high-risk destinations. In response, State provided Commerce with a guidance memorandum, which is available on the BIS website at *www.bis.gov/guidance_memorandum* and on *regulations.gov,* outlining a methodology to evaluate the risk that firearms exports to specific destinations will be diverted or misused in a manner contrary to U.S. national security and foreign policy (hereinafter, the ''Firearms Guidance Memorandum''). As the Firearms Guidance Memorandum explains, State leveraged its expertise in foreign policy and in subject matter areas, including human rights, international counternarcotics, counterterrorism, and arms control, and the expertise of stakeholders from across the U.S. Government in conducting its analysis.

After working with Commerce to determine the key risk factors, State gathered data and other empirical evidence relevant to assessing how those factors apply to specific destinations. That evidence came from a diverse set of credible sources, including reports produced by the U.S. Government (*e.g.,* the State Department's Country Reports on Human Rights Practices and the Presidential Determination on Major Drug Transit or Major Illicit Drug Producing Countries) and reports produced by reputable non-government organizations (*e.g.,* the Global Terrorism Index and the Corruption Perceptions Index). State also engaged in consultations with U.S. Embassy officials, including those with significant experience working with local law enforcement agencies, subject matter experts, and regional experts. Finally, State sought policy guidance from stakeholders across the U.S. Government to ensure that the assessment incorporated relevant aspects of U.S. national security and foreign policy interests.

Based on that analysis, State identified 36 countries in which there is a substantial risk that lawful firearms exports to non-governmental end users will be diverted or misused in a manner adverse to U.S. national security and foreign policy interests. Commerce has decided to apply a presumption of denial review policy to firearm license

applications involving non-government end users in those destinations. That uniform policy will ensure that the licensing process consistently accounts for the risks associated with those transactions, provides transparency to exporters and other stakeholders, and safeguards U.S. national security and foreign policy interests.

4. Policy Changes

BIS has determined that the changes described in this IFR will advance U.S. national security and foreign policy interests. As with all EAR controls, these changes are designed to be as targeted as possible to accomplish BIS's mission to protect the national security and foreign policy interests of the United States, including a full consideration of this IFR's economic impact. The regulatory changes implemented by this IFR will facilitate more robust data tracking capabilities for exports and re-exports of firearms and related items. Updates to license application requirements and applicable review policies will enhance the ability of BIS and its interagency partners to review and process license applications consistent with U.S. national security and foreign policy interests. In addition, this IFR creates greater transparency for industry by identifying the risk factors considered during the application review process, as well as destinations identified in the Firearms Guidance Memorandum as presenting a substantial risk of diversion or misuse in a manner contrary to U.S. national security and foreign policy.

B. New ECCNs for Semi-Automatic Firearms and Certain Related Parts, Components, Attachments, and Accessories

Prior to this IFR, ECCN 0A501 controlled rifles, pistols, and related ''parts,'' ''components,'' and certain ''attachments,'' and ''accessories'' on the CCL, while ECCN 0A502 controlled shotguns and related ''parts,'' ''components,'' and certain ''attachments,'' and ''accessories.'' Neither ECCN distinguished between non-automatic and semi-automatic firearms. BIS was unable to readily identify what share of firearms exports to a country were semi-automatic rifles versus non-automatic pistols because they were controlled under the same item paragraph of ECCN 0A501. Accordingly, BIS was unable to readily disaggregate and review licensing and export data for specific types of end-item firearms or specific ''parts,'' ''components,'' ''attachments'' and ''accessories'' of most concern. This data gap limited BIS's ability to efficiently evaluate the export, reexport, transfer (in-country) and diversion of specific types of rifles, pistols, shotguns, and certain ''parts,'' ''components,'' ''attachments,'' and ''accessories'' that may pose risks to U.S. national security and foreign policy. However, such information is useful to assess the risk of diversion.

To better track the export, reexport, transfer (in-country) and diversion of different types of firearms and related items, this IFR adds four new ECCNs to the CCL. ECCN 0A506 controls semi-automatic rifles, ECCN 0A507 controls semi-automatic pistols, ECCN 0A508 controls semi-automatic shotguns, and ECCN 0A509 controls certain ''parts,'' ''components,'' devices, ''accessories,'' and ''attachments'' for items controlled under ECCNs 0A506, 0A507, and 0A508. The creation of these four new ECCNs will enable BIS to better track and more readily identify exports of end-item semi-automatic firearms and shotguns and certain related ''parts,'' ''components,'' ''accessories,'' and ''attachments'' of concern when reviewing the Electronic Export Information (EEI) that exporters file in the Automated Export System (AES). Pursuant to § 758.1(g)(1) and (2), an EEI must specify the ECCN of the exported item. In order to further enhance transparency and the collection and review of export data on these items, this IFR also implements export clearance changes as described below under the heading *Changes to make identification of end-item firearms mandatory in AES.*

The addition of ECCNs 0A506, 0A507, 0A508, and 0A509 is not expected to have an impact on the number of license applications received by BIS, because these items were previously controlled under different ECCNs. Other changes included in this IFR that are expected to increase the number of licenses and other support documents are described elsewhere in this preamble.

1. Addition of ECCN 0A506 for Semi-Automatic Rifles

The commodities controlled under ECCN 0A506 were controlled previously under ECCN 0A501. BIS, supported by an interagency working group, consulted the Wassenaar Munitions List (WAML1) as well as ATF's non-sporting firearm importation criteria to identify specific features or accessories to delineate in the ECCN 0A506 item paragraphs. The item paragraph structure will enable better tracking and transparency for exports of various types of end-item semi-automatic rifles. ECCN 0A506 has two primary item paragraphs. Item paragraph .a details semi-automatic centerfire (non-rimfire) rifles equal to .50 caliber (12.7 mm) or less that have any of the following characteristics (controlled under .a.1 through .a.4): the ability to accept a detachable large capacity magazine (more than 10 rounds) or may be easily modified to do so; folding, telescoping, or collapsible stock; separate pistol grips; or a flash suppressor. Item paragraph .b controls all other semi-automatic rifles equal to .50 caliber (12.7 mm) or less, including all non-centerfire (rimfire) that are not elsewhere specified (noted as ''n.e.s.'' on the CCL). ECCN 0A506 includes a note to 0A506.a and .b that ''parts'' and ''components'' that are ''specially designed'' for a commodity classified under .a or .b of 0A506, except those controlled under ECCN 0A509, are controlled under ECCN 0A501. ECCN 0A506 also includes a technical note stating that firearms controlled in 0A506 include those chambered for the .50 BMG cartridge. The reasons for control for new ECCN 0A506 mirror the reasons for control that apply to ECCN 0A501 (with the addition of CC Column 2 reason for control outlined below). Specifically, National Security (NS) Column 1, Regional Stability (RS) Column 1, Firearms Convention (FC) Column 1, CC Column 2, United Nations Security Council arms embargo (UN), and Anti-Terrorism (AT) Column 1 apply to the entire entry. License Exceptions LVS, Shipments to Country Group B Countries (GBS), and License Exception Strategic Trade Authorization (STA) are not available for use with commodities controlled under ECCN 0A506, as discussed in greater detail below.

2. Addition of ECCN 0A507 for Semi-Automatic Pistols

The commodities controlled under ECCN 0A507 were controlled previously under ECCN 0A501. BIS, supported by an interagency working group, consulted the WAML1 and 27 CFR 478.12 to identify specific features or accessories to delineate in the ECCN 0A507 item paragraphs. The item paragraph structure will enable better tracking and transparency for exports of various types of end-item semi-automatic pistols. ECCN 0A507 has two item paragraphs: paragraph .a controls semi-automatic centerfire (non-rimfire) pistols equal to .50 caliber (12.7 mm) or less; and paragraph .b controls semi-automatic (rimfire) pistols equal to .50 caliber (12.7 mm) or less. ECCN 0A507 includes a note to 0A507.a and .b to specify that ''parts'' and ''components'' that are ''specially designed'' for a commodity classified under 0A507,

except those controlled under ECCN 0A509, are controlled under ECCN 0A501.c, .d, .x, or .y. The ECCN also includes a technical note stating that firearms described in 0A507 includes those chambered for the .50 BMG cartridge, which clarifies that any handgun that may be developed to fire .50 BMG cartridges will be controlled under this ECCN. The reasons for control for new ECCN 0A507 mirror the reasons for control that apply to ECCN 0A501 (with the addition of CC Column 2 reason for control outlined in D.2 of this preamble in this IFR). Specifically, NS Column 1, RS Column 1, FC Column 1, CC Column 2, UN, and AT Column 1 apply to the entire entry. License Exceptions LVS, GBS, and STA are not available for use with commodities controlled under ECCN 0A507, as discussed in greater detail below.

3. Addition of ECCN 0A508 for Semi-Automatic Shotguns

The commodities controlled under ECCN 0A508 were controlled previously under ECCN 0A502. BIS, supported by an interagency working group, consulted both the WAML1 and ATF's non-sporting importation criteria to identify specific characteristics or attachments and accessories to delineate in the ECCN 0A508 item paragraphs. The item paragraph structure will better enable tracking and transparency for exports of various types of end-item semi-automatic shotguns. ECCN 0A508 has two item paragraphs. Item paragraph .a controls semi-automatic centerfire (non-rimfire) shotguns with any of the of the following characteristics (which are detailed in a.1 through a.6): folding, telescoping, or collapsible stock; magazine over five rounds; a drum magazine; a flash suppressor; Excessive Weight (greater than 10 lbs. for 12 gauge or smaller); or Excessive Bulk (greater than 3 inches in width and/or greater than 4 inches in depth). Item paragraph .b controls all other semi-automatic shotguns, including all non-centerfire (rimfire) shotguns that are not elsewhere specified. The reasons for control for new ECCN 0A508 mirror the reasons for control that apply to ECCN 0A502 (except for CC Column 2, which now applies to the entire 0A502 and 0A508 entry): Specifically, NS Column 1 and RS Column 1 for 0A508 commodities (with barrel length less than 18 inches), FC Column 1, CC Column 2, UN for the entire entry, and AT Column 1 for 0A508 commodities (with barrel length less than 18 inches). LVS, GBS, and License Exception STA are not available for use with ECCN 0A508, as discussed in greater detail below.

4. Addition of ECCN 0A509 for Certain ''Parts,'' ''Components,'' Devices, ''Accessories,'' and ''Attachments'' for Items Controlled Under ECCNs 0A506, 0A507, and 0A508

The commodities controlled under ECCN 0A509 were controlled previously under ECCNs 0A501 and 0A502. The commodities controlled under 0A509 warrant separate tracking under a distinct ECCN due to their sensitivity, including the potential that these firearms-related items are used to illicitly assemble firearms or are otherwise used to convert a non-automatic firearm controlled by 0A501 or 0A502 into a semi-automatic firearm or to accelerate the rate of fire of a semi-automatic firearm controlled by 0A506, 0A507, or 0A508. The item paragraph structure will enable better tracking and transparency for exports of certain ''parts,'' ''components,'' devices, ''accessories,'' and ''attachments'' separate from the end-item semi-automatic rifles, pistols, and shotguns controlled under ECCNs 0A506, 0A507, and 0A508. ECCN 0A509 has four item paragraphs. Item paragraph .a controls any ''part,'' ''component,'' device, ''attachment,'' or ''accessory'' not elsewhere specified on the USML that is designed or functions to accelerate the rate of fire of a semi-automatic firearm controlled under ECCNs 0A506, 0A507, or 0A508. Item paragraphs .b and .c control receivers (frames), including castings, forgings, stampings, or machined items thereof, ''specially designed'' for an item controlled under ECCNs 0A506 and 0A507, respectively. Item paragraph .d of ECCN 0A509 controls receivers (frames) and ''specially designed'' ''complete breech mechanisms'' for a commodity controlled under ECCN 0A508. ECCN 0A509 has a note to item paragraphs .b and .c stating that receivers (frames) under 0A509.b and .c refers to any ''part'' or ''component'' of the firearm that has or is customarily marked with a serial number when required by law; the ''parts'' and ''components'' in paragraphs 0A509.b and .c are regulated by ATF as firearms (*see* 18 U.S.C. 921(a)(3); 27 CFR parts 447, 478, and 479). The reasons for control for commodities controlled under new ECCN 0A509 are as follows: NS Column 1, RS Column 1, FC Column 1, CC Column 2, UN, and AT Column 1 apply to the entire entry. License Exceptions LVS, GBS, and STA are not available for use with commodities controlled under ECCN 0A509, as discussed in greater detail below.

5. Other Changes for Existing 0x5zz ECCNs

BIS also reevaluated the reasons for control for rifles, pistols, shotguns, ammunition, and related ''parts,'' ''components,'' ''accessories,'' ''attachments,'' ''software,'' and ''technologies'' detailed under existing ECCNs 0A501, 0A502, 0A504, 0A505, 0D501, 0D505, 0E501, 0E504, and 0E505. BIS is applying or maintaining CC column 2-based controls on most items under these ECCNs, consistent with BIS policy to apply CC controls on items to address human rights-related concerns. Certain specific ''parts'' and ''components'' and ammunition controlled under ECCNs 0A501.y and 0A505.c, 0A505.d, and 0A505.x are not controlled for CC reasons (or certain other reasons under the EAR), because they raise relatively few concerns related to human rights or other foreign policy objectives. The CC changes described in this paragraph, along with the other CC changes described in this preamble section B.5, are expected to result in an increase of 1,115 license applications received annually by BIS.

Prior to this IFR, either CC Column 1, CC Column 2, or CC Column 3 applied to shotguns controlled under ECCN 0A502 based on the barrel length and particular end user (specifically, police or law enforcement). This IFR revises the CC reasons for control on 0A502 to underscore their significant relationship to U.S. foreign policy objectives, including human rights. CC Column 2 applies to the entire entry of 0A502, regardless of barrel length or end user. Similarly, CC Column 2 applies to the entire entry of 0A508, regardless of barrel length or end user. These changes implement a new license requirement for the export of certain shotguns to certain countries and end users. All other existing reasons for control on 0A502 remain in effect under this IFR. In particular, consistent with the licensing policy for items controlled for RS reasons, § 742.6(b)(1)(i), BIS will continue to review these items to determine whether the transaction is contrary to U.S. foreign policy interests, including promoting the observance of human rights throughout the world.

Similarly, this IFR adds CC Column 2 reasons for control to software controlled under ECCNs 0D501 and 0D505 and technology controlled under 0E501. Given that these ECCNs control the software and technology that relate to firearms and related items, the same human rights concerns apply. Therefore, as noted above, this change aligns the reason for control for ECCNs 0D501,

0D505, and 0E501 with BIS policy to apply CC to firearms and related items.

6. Other EAR conforming changes to reflect the new ECCNs for semi-automatic firearms and semi-automatic shotguns.

With the exception of those commodities controlled under new ECCNs 0A506, 0A507, 0A508, and 0A509 as described above, all firearms, shotguns, and their ''parts,'' ''components,'' ''accessories,'' ''attachments,'' and equipment remain controlled under ECCNs 0A501 and 0A502 on the CCL. However, the creation of the four new ECCNs requires conforming changes throughout the EAR to maintain enhanced restrictions on end-item firearms where only ECCNs 0A501 and 0A502 were previously referenced. This IFR adds references to semi-automatic firearms and semi-automatic shotguns controlled under ECCNs 0A506, 0A507, and 0A508, as well as the commodities controlled under 0A509, where appropriate; these conforming changes ensure that the semi-automatic versions of end-use firearms and shotguns controlled under these three new ECCNs, as well as the commodities controlled under 0A509, continue to be subject to licensing restrictions and limitations on licensing exception availability.

The conforming changes appear in the following EAR provisions (referenced here in the order in which they are described under Table 1): §§ 732.2(b), 734.7(c), 740.2(a)(21), 740.2(a)(23), 740.9(a) and (b)(5) introductory text, 740.9(b)(5)(ii), 740.9, Note 1 to paragraph (b)(5), 740.10(b)(1) introductory text and (b)(4), 740.10(b)(4)(i), 740.10, Note 1 to paragraph (b)(4), 740.11 introductory text, 740.14(e)(1) introductory text, 740.14(e)(1)(i), 740.14(e)(3) introductory text, 740.14(e)(3)(i), 740.14(e)(3)(iv), 740.14(e)(4), 740.20(b)(2)(ii)(A), 740.20(b)(2)(ii)(B), 742.6(b), 742.7(a)(5), 742.17(f), 743.4(c) (redesignated as paragraph (b)), 743.6(a) introductory text, (a)(1) and (2), (b), and (c), 748.12(a)(1), 748.12, Note 2 to paragraph (d)(3), supplement no. 2 to part 748, paragraph (z), supplement no. 2 to part 748, Note 1 to paragraph (z), supplement no. 2 to part 748, paragraph (bb) (redesignates as paragraph (aa)(1)), 758.1(b)(9), Note 1 to paragraph (c)(1), and (g)(4)(i), 758.1(g)(4)(ii), 758.10(a) introductory text, Note 1 to paragraph (b)(1), and Note 2 to paragraph (b)(1), 758.11(a) and (b)(2), 762.2(a)(11), 762.3(a)(5), as well as ECCNs 0A501 heading, Related Controls paragraph, Technical Note to 0A501.c, Note 5 to 0A501.e, and 0A501.x and .y, 0A502 heading, and Related Controls paragraph, 0A505.a and .d, 0B501 heading and 0B501.e, 0D501 heading, 0E501 heading, 0E501.a and .b, 0E502 heading, and ECCN 2B018 text under the heading. These changes are not expected to have any impact on the number of license applications received by BIS.

There are a number of references to the 0x5zz ECCNs in existing EAR provisions that pertain to firearms controls. However, no changes are required to such references because the four new ECCNs are also considered 0x5zz ECCNs.

Table 1—Identification of Conforming Changes Made to Existing EAR Regulatory References to Reflect the Addition of ECCN 0A506, 0A507, 0A508, and 0A509

This table identifies the specific EAR provision and type of conforming changes required for consistency with the addition of these four new ECCNs. BIS welcomes comments in response to this IFR on these conforming changes, as well as any other conforming changes that the public believes would be warranted to reflect the addition of these four new ECCNs.

ECCN 2B018 text under the heading	0A506, 0A507, and 0A509 in the text under the heading

[1] Unless otherwise noted in the table, references to 0A508 are to shotguns with a barrel length less than 18 inches to conform to the controls already in place on shotguns with a barrel length less than 18 inches that are controlled under 0A502.

[2] These conforming changes include adding one reference to 0D501, 0D505, 0E501, and 0E504 to reflect the addition of the four new ECCNs 0A506, 0A507, 0A508, and 0A509.

BILLING CODE 3510–33–P

C. Changes to License Exceptions and Related Changes

1. General restrictions on use of license exceptions. Section 740.2 of the EAR details restrictions in place on the use of all License Exceptions. Paragraph (a) enumerates these restrictions. This IFR makes two changes to this section. First, as a conforming change to the addition of the CC control under ECCNs 0A501, 0A506, and 0A507, this IFR revises the general restriction on the use of license exceptions under paragraph (a)(4)(iii) in § 740.2 for CC items identified in § 742.7 to remove the parenthetical phrase that limited the eligibility of License Exception BAG under paragraph (e) to certain shotguns and shotgun shells for personal use as the only License Exception BAG authorization that could overcome the general restriction in this paragraph (a)(4)(iii). Because the other firearms controlled under new ECCNs 0A506, 0A507, and 0A508 will require a license for CC as of the effective date of this IFR, all of these firearms and related items that are authorized under paragraph § 740.14(e) should be eligible to overcome this general restriction on the use of license exceptions under

§ 740.2(a)(4). These changes are not expected to have any impact on the number of license applications received by BIS.

Second, this IFR adds paragraph (a)(24) in § 740.2. New paragraph (a)(24) requires exporters to obtain a copy of an import certificate or equivalent document (if required by the government of the importing country) before the exporter can use any license exception for items controlled under ECCNs 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, or 0A509. This new requirement parallels the new policy detailed below related to obtaining and submitting an import certificate when applying for a license for certain firearms and related items. Although BIS anticipates that this requirement could increase the burden under this collection to some degree, BIS believes that exporters, as part of their current compliance programs, already have processes in place to confirm whether the firearms and related items that are to be exported may be imported into these foreign countries. Therefore, this recordkeeping requirement likely reflects practices and processes exporters already have in place and will therefore be of minimal burden to exporters. As described below under the Rulemaking section under paragraph 2, BIS welcomes comments from the public on this aspect of this IFR.

2. LVS additional restrictions. License Exception LVS is detailed under § 740.3. BIS is further restricting the eligible destinations for LVS under paragraph (b). As amended by this IFR, LVS is no longer available for commodities controlled under ECCNs 0A501, 0A502, 0A504 (except 0A504.g), 0A505, 0A506, 0A507, 0A508, and 0A509 when they are destined for destinations in ''CARICOM'' or destinations specified in both Country Groups B and D:5. The addition to the EAR of the ''CARICOM'' as a defined term is detailed below. License Exception LVS remains available only for certain commodity ECCNs. These changes are expected to result in an increase of five hundred license applications received annually by BIS.

3. License Exception BAG new restrictions and single trip limit.

i. BAG is detailed under § 740.14. License Exception BAG authorizes individuals leaving the United States either temporarily (*i.e.,* traveling) or longer-term (*i.e.,* moving) and crew members of exporting or reexporting carriers to take, as personal baggage, certain items. This IFR revises § 740.14 such that destination eligibility under License Exception BAG for items controlled under ECCNs 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, and 0A509 is limited to destinations other than those specified in Country Group D:5 (except for Zimbabwe) or destinations in ''CARICOM.''

This IFR adds ''CARICOM'' as a defined term in § 772.1, which lists the definitions of terms used in the EAR. The definition of ''CARICOM'' specifies that for purposes of §§ 740.3 and 740.14 of the EAR, the term means an intergovernmental organization that consists of the following member states and associate members: member states: Antigua and Barbuda, Bahamas, Barbados, Belize, Dominica, Grenada, Guyana, Haiti, Jamaica, Montserrat, St. Lucia, Suriname, St. Kitts and Nevis, St. Vincent and the Grenadines, and Trinidad and Tobago; associate members: Anguilla, Bermuda, British Virgin Islands, Cayman Islands, and Turks and Caicos, as well as any other state or associate member that has acceded to membership in accordance with Article 3 or Article 231 of the Treaty of Chaguaramas for members or associate members, respectively. The definition of ''CARICOM'' includes a note specifying that Anguilla, Bermuda, British Virgin Islands, Cayman Islands, Montserrat, and Turks and Caicos are treated as the United Kingdom under all other EAR provisions that govern licensing requirements and license exceptions. These changes are expected to result in an increase of five hundred license applications received annually by BIS.

ii. *Limit BAG to three shotguns and firearms in total for a single trip.* This IFR also revises § 740.14 to limit the number of shotguns and firearms that an individual may export using BAG. Previously, paragraphs (e)(1)(i) and (e)(3)(i), read together, permitted U.S. citizens to export or reexport three shotguns, three firearms, and 1,000 rounds of ammunition on any one trip. This IFR limits U.S. citizens to three firearms or shotguns in total on any one trip. This change is expected to result in an increase of 50 license applications received annually by BIS.

D. Revisions to License Review Policies

As part of the BIS effort to review firearms-related policies and address concerns related to misuse or diversion contrary to U.S. national security and foreign policy interests, including diversion to entities or activities that promote regional instability, abuse or violate human rights, and/or fuel criminal activities, two control policies were identified for revision. This IFR revises the license review policies under the Regional Stability (RS) and Crime Control (CC) sections in part 742 of the EAR pursuant to BIS's findings. The revisions to the RS and CC license review policies, which impose presumptions of denial for certain high-risk transactions, are expected to result in a decrease of 650 license applications received annually by BIS, due to certain applicants likely being deterred from applying for licenses.

1. Revisions to RS license review policies. Under § 742.6(b)(1), licensing policy for RS column 1 items, this IFR makes several structural changes to paragraph (b)(1)(i). To make the paragraph more readily understandable, this IFR sets forth each license review policy in a separate paragraph, (b)(1)(i)(A) through (G). This IFR also makes conforming changes to clarify which items are reviewed under the policies set forth in each paragraph. This IFR also makes substantive revisions to RS reason for control, as detailed below.

i. Adoption of policy of denial review policy for D:5 for certain 0x5zz ECCNs. BIS reviews applications for exports and reexports of items classified under any 9x515 or ''600 series'' ECCN destined to Country Group D:5, destinations subject to a U.S. arms embargo, consistent with United States arms embargo policies in § 126.1 of the ITAR (22 CFR 126.1). This IFR amends § 742.6 of the EAR to extend this licensing policy to include all firearms and related items in ECCNs 0A501, 0A502, 0A505, 0A506, 0A507, 0A508, or 0A509 that are destined for D:5 destinations. This change is detailed in new paragraph (b)(1)(i)(D).

Furthermore, BIS previously reviewed applications for items controlled under certain firearms-related ECCNs and any 9x515 ECCN under a policy of denial when destined for China or a Country Group E:1 country. This IFR amends § 742.6 to extend this stringent review policy to all items classified under ECCNs 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, 0A509, 0B501, 0B505, 0D501, 0D505, 0E501, 0E504, or 0E505, or any 9x515 ECCNs. This change is detailed in new paragraph (b)(1)(i)(F).

2. Revisions to CC license review policies. As stated above, this IFR also revises the CC licensing policy in § 742.7(b) to apply stricter scrutiny to exports of firearms and related items to destinations where diversion risks are particularly acute, such as destinations in which significant drug trafficking and associated criminal activity occurs. Previously, § 742.7(a) consisted of paragraphs (a)(1) through (6). Under this IFR, the firearms and shotgun related items are listed in paragraph (a)(5) (ECCNs 0A501, 0A502, 0A504, 0A505.b,

0A506, 0A507, 0A508, 0E502, and 0E505). The contents of previous paragraphs (a)(2) and (3) are removed as a conforming change to the removal of CC Column 2 and CC Column 3 from shotguns. The non-firearms and shotgun related items remain in (a)(1). Previous paragraphs (a)(4) through (6) are now paragraphs (a)(2) though (4). Paragraphs (a)(2) and (a)(4) contain a sentence showing that controls for these items appear in each ECCN; a column specific to these controls does not appear in the Country Chart (supplement no. 1 to part 738 of the EAR).

Given that this IFR makes § 742.7(a)(5) solely pertain to firearms and shotguns related items, BIS is designating these items as having CC Column 2 reasons for control. As a result of this change, the public can more easily identify firearms and shotguns related items on the CCL. To ensure easy understanding of the applicability of license requirements for CC Column 2 designated items, BIS in this IFR is putting an X in the box on the Commerce Country Chart (supplement no. 1 to part 738) for all countries except Canada. This change does not impose licensing requirements on exports or reexports to destinations for which a license was not previously required, as NS and RS requirements are already in place for all destinations other than Canada.

Previously, § 742.7(b) consisted of paragraphs (b)(1) and (2). Under this IFR, paragraph (b) consists of paragraphs (b)(1) through (3). Paragraphs (b)(1) and (2) remain, but apply to (a)(1) through (4). Paragraph (b)(3) applies to items controlled under § 742.7(a)(5). The review policy for these items is broken out for two types of end users as described in section D.2.i and D.2.ii:

i. License review policies for government end users. Paragraph (b)(3)(i) describes policies for license applications when the items are destined for government end users. These applications will be reviewed on a case-by-case basis to determine the risk that the items will be diverted or misused in a manner that would adversely impact U.S. national security or foreign policy.

ii. License review policies for non-government end users. Paragraph (b)(3)(ii) describes policies for license applications when the items are destined for non-government end users. These license applications will also be reviewed on a case-by-case basis. They will additionally be reviewed under a presumption of denial if one of two conditions (detailed in paragraphs (b)(1)(ii)(A) and (B)) are met: (A) the items are being exported or reexported to a destination identified in the Firearms Guidance Memorandum as a destination in which it determined that there is a substantial risk that firearms exports to non-governmental end users will be diverted or misused in a manner adverse to U.S. national security and foreign policy, or (B) there is otherwise a substantial risk that the items will be diverted or misused in a manner that would adversely impact U.S. national security or foreign policy.

The presumption of denial review policy for license applications involving exports and reexports to high-risk destinations identified in the Firearms Guidance Memorandum ensures that all exports of firearms and related items to those destinations are consistent with U.S. national security and foreign policy. As discussed above, to support Commerce's ongoing efforts to impose export controls that further U.S. national security and foreign policy, State has developed a list of destinations in which there is a substantial risk that lawfully exported firearms sold to non-governmental end users could be diverted or misused in a manner adverse to U.S. national security and foreign policy. The Firearms Guidance Memorandum, which is available on the BIS website at *www.bis.gov/guidance_memorandum* and on *regulations.gov*, outlines the methodology for evaluating destination-specific risks and identifies 36 high-risk destinations.

Having carefully reviewed the list and methodology, which was developed by national security and foreign policy experts at State in consultation with other experts from across the U.S. Government, BIS has determined that a presumption of denial should apply to applications for the export and reexport of firearms and related items involving non-government end users in these 36 destinations. Thus, as part of this IFR, BIS is adopting the list and adding it to a supplement to the EAR (see below, in this section of the preamble, for details).

A presumption of denial review policy for exports and reexports to non-government end users to the destinations identified in the Firearms Guidance Memorandum will significantly further U.S. national security and foreign policy interests. As described above, based on analysis of destination-specific risk factors and consultations with U.S. Embassy officials and stakeholders across the U.S. Government, State determined that firearms and related items exported to non-government end users in those 36 destinations face a substantial risk of diversion or misuse in a manner adverse to U.S. national security and foreign policy. In other words, there is a substantial risk that firearms and related items exported to those destinations will fall into the hands of organizations and individuals that will use those items to expand transnational drug operations, spark regional conflicts, commit acts of terrorism, abuse human rights, destabilize governments, or harm communities. Applying a presumption of denial to license applications for those exports will ensure that the licensing process fully and consistently accounts for those risks, thereby significantly furthering and safeguarding U.S. national security and foreign policy interests.

In addition, transparency with respect to destinations of concern will promote predictable and timely review of license applications and will help industry and other stakeholders understand the licensing process. It will also make the review process more efficient, thereby allowing BIS to focus time and resources on other license applications, including applications for exports to other destinations and applications to government end users in all destinations. Instead of reassessing the risks associated with transactions involving destinations identified in the Firearms Guidance Memorandum as presenting a substantial risk of diversion or misuse, BIS will be able to focus on assessing applications that present other, varying risk factors or indicia of reliability.

Moreover, exporters will have the opportunity to overcome the presumption of denial by demonstrating that a specific transaction does not present a substantial risk of diversion or misuse. A presumption of denial, as opposed to an absolute prohibition, will provide BIS with the flexibility to tailor its review to the individual facts and related policy interests. For example, BIS may recommend to approve a transaction involving a non-government security service charged with protecting a third-country embassy in a destination identified in the Firearms Guidance Memorandum as presenting a substantial risk of diversion or misuse. Notably, a presumption of denial in the firearms context is generally consistent with BIS's licensing review policies under the EAR, including in connection with other sensitive items and destinations of concern.

State has also committed to lead an interagency process to assess periodically, the risk that exports of firearms and related items to specific destinations, including those identified on the list, will be diverted or misused in a manner adverse to U.S. national

security and foreign policy. State will also lead a periodic interagency review of the factors and other aspects of in the Firearms Guidance Memorandum, with the goal of updating both the guidance memorandum and its list of destinations on an annual basis. State has also noted that the Firearms Guidance Memorandum and corresponding list of destinations may be updated outside of the annual window if there are exigent circumstances (*e.g.,* a coup) or if updates are otherwise needed to advance U.S. national security and foreign policy interests.

BIS will review any changes recommended as the result of the State-led, interagency-informed assessment process, and maintain the list in supplement no. 3 to part 742 of the EAR. BIS will publish any additions or deletions to the list in the **Federal Register**. As set forth in new supp. no. 3 to part 742, the list of countries for which there is a presumption of denial application review policy for exports and reexports to non-governmental end users is as follows: The Bahamas, Bangladesh, Belize, Bolivia, Burkina Faso, Burundi, Chad, Colombia, Dominican Republic, Ecuador, El Salvador, Guatemala, Guyana, Honduras, Indonesia, Jamaica, Kazakhstan, Kyrgyzstan, Laos, Malaysia, Mali, Mozambique, Nepal, Niger, Nigeria, Pakistan, Panama, Papua New Guinea, Paraguay, Peru, Suriname, Tajikistan, Trinidad and Tobago, Uganda, Vietnam, and Yemen.

iii. Addition of factors that will be considered for all 0x5zz license applications regardless of end user. For all end users, paragraph (b)(3) details specific factors that BIS will consider in assessing the risk that firearms and related items will be diverted or misused in a manner that would adversely impact U.S. national security or foreign policy. For each license application, BIS will specifically review concerns in the destination associated with state fragility, human rights and political violence, terrorism, corruption, organized crime or gang-related activity, drug trafficking, and past diversion or misuse of firearms; the nature of the end user; the capabilities, potential uses, and lethality of the item; and other factors as needed. As always, license applicants are strongly encouraged to consider license review factors that are detailed in the EAR when sourcing potential customers abroad.

3. *Revision to license review policies for Exports of Firearms to Organization of American States (OAS) Member Countries.*

Consistent with Commerce's findings during its policy review, this IFR revises the licensing policies for the export and reexport of most firearms and related items to all OAS member countries, under § 742.17(b). There continue to be two distinct licensing policies for exports and reexports of firearms and related items to OAS member countries: a case-by-case review policy and a policy of denial for applications linked to drug trafficking, terrorism, and criminal activities. These are further discussed below under this section D.3.

Under this IFR, applications supported by an FC Import Certificate or equivalent official document issued by the government of the importing country will now be reviewed on a case-by-case basis, as opposed to the license review policy of general approval that applied before. This change matches the text in other provisions in part 742 of the EAR, which use the ''case-by-case'' text. Previously, applications supported by an FC Import Certificate or equivalent official document would ''generally be approved.'' With the increased visibility into transactions provided by other regulatory changes discussed in this IFR, a ''case-by-case'' review policy more accurately reflects the standards under which BIS will assesses these applications going forward. As part of the license review process, BIS will continue utilizing a variety of open-source and classified resources and anticipates that the other regulatory changes implemented by this IFR will provide increased visibility regarding these applications. These changes are expected to result in a decrease of 100 license applications received annually by BIS, due to certain applicants being deterred from applying for licenses because of the case-by-case license review policy.

This IFR does not change the review policy of denial for applications linked to drug trafficking, terrorism, and criminal activities. Applications linked to drug trafficking, terrorism, and transnational organized crime activities will continue to be reviewed under a policy of denial. This retention of the existing policy is not expected to have any impact on the number of license applications received by BIS.

E. Changes in Support Document Requirements for Firearms License Applications

1. Import Certificate Requirements

i. Require submission as part of the license application for all firearms license applications for Organization of American States (OAS) member countries and other destinations that require an import certificate or equivalent official document for the importation of firearms. Previously, BIS required the submission of an import certificate or other equivalent official document only for OAS member states; for non-OAS member states that require an import certificate or equivalent official document, the applicant was required to obtain a copy of such documentation but was not required to submit it with the license application unless specifically requested by BIS. Under this IFR, the requirement that all license applications for firearms and related items include an import certificate or equivalent official document as part of the submission will minimize the risk of an exporter failing to obtain an import certificate or equivalent official document if required by the importing country. This requirement will also help ensure that the importing country's government is aware of the shipment and has confirmed that the import is lawful. This requirement applies to all firearms and related items described under 0x5zz ECCNs. These changes are expected to result in an increase of 250 import certificates or other equivalent official documents that need to be submitted with BIS licenses. BIS estimates that the time to submit each document will be 1 minute. This will result in an increase in burden hours of 4 hours.

ii. Combining the OAS and non-OAS requirements to simplify the requirements and improve understanding. To facilitate this support document requirement, this IFR revises § 748.12, which addresses requirements for obtaining an import certificate or import permit. Previously, paragraph (a) specified the requirements for OAS member states and paragraph (e) specified the requirements for non-OAS member states. Given the detail set forth regarding the required documentation, and the fact that all destinations will be treated the same, this IFR removes previous paragraph (e). All applicable information in previous paragraph (e) is moved to revised paragraph (a), and conforming changes are included in revised paragraphs (a) through (d). These formatting and clarifying changes are expected to facilitate compliance and are not expected to have any impact on the number of import certificates or other equivalent official documents received by BIS. Paragraph (a)(2)(i) details OAS member countries; BIS is taking this opportunity to add a reference to this paragraph that OAS member countries includes any member country that has acceded in accordance with Chapter III of the Charter of the Organization of American States.

2. Requiring Purchase Orders for Certain Firearms License Applications

i. Conforming changes to provide clarity and to make the requirements easier to understand. To facilitate understanding by the public regarding the changes discussed in sections E.2.ii and E.3 of this preamble, this IFR redesignates paragraphs (aa) and (bb) to supplement no. 2 to part 748 (Unique Application and Submission Requirements), such that previous (aa) paragraph, detailing ''600 Series Major Defense Equipment,'' is redesignated as paragraph (bb). Previous paragraph (bb) detailing ''semi-automatic firearms controlled under ECCN 0A501.a'' is redesignated as paragraph (aa), such that it follows existing paragraph (z) detailing ''exports of firearms and certain shotguns temporarily in the U.S.'' By making these changes so that the contents of paragraphs (z) and redesignated paragraph (aa) appear sequentially, these requirements should be clearer to the public.

This IFR also revises redesignated paragraph (aa) to include the unique application and submission requirements that apply to exports of other firearms, certain shotguns, and related items. The contents of the original paragraph, ''semiautomatic firearms controlled under ECCN 0A501.a,'' are redesignated under (aa)(1), with conforming revisions made to the title corresponding to the addition of new ECCNs detailed above. New paragraph (aa)(2) requires the submission of purchase documentation for certain applications. New paragraph (aa)(3) requires the submission of passport or other national identity card information for certain applications. Requirements in new paragraphs (aa)(2) and (3) are detailed below. These formatting and clarifying changes are not expected to have any impact on the number of purchase orders received by BIS.

ii. Addition of purchase order requirement for non-A:1 countries. This IFR amends the EAR to require that a purchase order be submitted for exports and reexports of firearms and related items to non-A:1 countries. Previously, exporters were not required to submit a purchase order with BIS license applications, unless requested during the course of BIS's review of a particular application. This practice created a number of challenges. First, BIS processed and reviewed many applications that did not result in actual exports, thereby unnecessarily expending staffing resources. Previously, less than 20% of licensed quantities were actually exported. In addition, such licensing that did not result in exports offered limited visibility into actual demand for U.S. firearms abroad, which in turn made effective monitoring of diversion risks more difficult. Requiring purchase orders for exports and reexports to non-A:1 countries will enable BIS to use licensed quantities to estimate *bona fide* local demand, thereby ensuring that BIS can appropriately evaluate the national security and foreign policy risks associated with a given transaction and effectively allocate review and processing resources. This IFR specifies that purchase orders must be dated within 1 year of their submission with a license application. Purchase orders are required for certain items controlled under ECCNs 0A501 (except 0A501.y), 0A502, 0A505 (except 0A505.c), 0A505.d, and 0A505.e), 0A506, 0A507, and 0A508, and 0A509. Upon approving a license for these items, BIS will generally limit the licensed quantity to the quantity specified on the purchase order. However, applicants may request up to a 10% increase in quantity from the purchase order amount, which will be reviewed on a case-by-case basis. Additionally, parties may export or reexport various model types under the approved license, so long as the items remain consistent with the ECCN and ECCN item level paragraph specified on the approved application. These requirements appear in new paragraph (aa)(2) of supplement no. 2 to part 748. These changes are expected to result in a net increase of 7,109 purchase orders that will need to be submitted with license applications. BIS estimates that the time required to submit each will be 1 minute; this will result in an increase in burden hours of 116 hours. That estimate factors in that these changes are expected to result in a decrease of 500 license applications received annually because some exporters will be unwilling or unable to provide purchase orders.

3. Requiring Passport or National Identity Card for Firearms License Applications for Natural Persons Located in Destinations Other Than in Country Group A:1

Governmental purchasers and commercial distributors constitute the vast majority of end users identified on firearms license applications. However, in some cases, an exporter or reexporter may apply for a license to export or reexport firearms to a natural person (individual) abroad. This IFR amends the EAR to require that a passport or national identity card be submitted for exports and reexports of firearms and related items to natural persons in non-A:1 countries. Previously, passports or other national identity cards were not required with submission of applications for export to individuals unless requested by BIS for a specific license application. Based on its history of reviewing applications destined for individual recipients, BIS has determined that a passport or national identity card would help ensure robust vetting of the appropriate end user identified on the application, including vetting by local law enforcement in the recipient country, particularly to address any potential diversion risks. For example, BIS might use a national identity card to distinguish between individuals with the same name. Under this IFR, license applications for items controlled under ECCNs 0A501 (except 0A501.y), 0A502, 0A504, 0A505 (except 0A505.c, 0A505.d, and 0A505.e), 0A506, 0A507, 0A508, and 0A509 for individuals in destinations other than Country Group A:1 require the submission of passport or other national identity card information for all named individual recipient end users of those items. This requirement is detailed under new paragraph (aa)(3) to supplement no. 2 to part 748. These changes are expected to result in an increase of 3,160 passports or other national identity card information that will be submitted annually. BIS estimates that the time required to submit each document is 1 minute; resulting in an increase in burden hours of 57 hours. That estimate factors in that these changes are expected to result in a decrease of 100 license applications received annually by BIS, because some individuals will not want to provide such information to exporters or reexporters as part of the license application process.

F. Adoption of Formalized Interagency Working Group for Firearms License Application To Enhance the Existing Interagency License Review Process

BIS license applications involving 0x5zz items are reviewed by the longstanding interagency review processes specified under part 750 of the EAR. Accordingly, BIS has consulted with interagency partners regarding the review of license applications for exports and reexports of these items since their respective additions to the CCL. Additionally, BIS has participated in an informal interagency working group with representatives from State since summer 2023 to ensure appropriate focus on firearms license applications. This interagency review process is an important mechanism in ensuring that U.S. national security and foreign policy

interests are adequately considered in all licensing decisions.

This IFR builds on the existing review process by formalizing an interagency working group, chaired by State, to evaluate firearm diversion and misuse risks. By formalizing an interagency working group on the review process for licensing involving firearms and related items, BIS seeks to ensure proactive tracking across relevant stakeholder agencies of licensing and export data, ongoing review of licenses or pending applications of concern, and collaboration on addressing issues in various countries or with specific end users. Formalizing this process will help ensure its longevity and showcase the U.S. Government's commitment to its success. The creation of a formal interagency working group will help ensure that the risk factors outlined in this IFR (including terrorism, state fragility, corruption, human rights, political violence, and past diversion or misuse) are thoroughly vetted by interagency experts when reviewing firearms-related license applications. State has also committed to lead interagency efforts to use this working group to assess the determinations set out in the Firearms Guidance Memorandum, with the goal of revising the memorandum and updating its list of high-risk destinations annually and as needed. Interagency licensing working groups are detailed under § 750.4(d) of the EAR. This IFR will add § 750.4(d)(2)(v), which describes a new working group called ''The Safeguard.'' The Safeguard will be chaired by State and will review license applications involving firearm-related items controlled under 0x5zz ECCNs. These changes are not expected to have any impact on the number of license applications received by BIS.

G. Reduction in General License Validity Period (1-Year License Validity for Firearms Licenses)

This IFR amends the EAR to reduce the general validity period from four years to one year for all future licenses involving firearms and related items. Because national security and foreign policy considerations (including human rights-related considerations) in destinations abroad can change rapidly, the risks or potential benefits associated with certain transactions can be difficult to predict several years in advance. Limiting the length of the license validity period will lead to more frequent reviews of exports and thus enable BIS to account for developments and often fluid circumstances in destinations; doing so enables more precise and timely consideration of diversion risk and national security and foreign policy interests. A shortened validity period also reduces the risk of shipments on an expired import certificate, as well as the risk that BIS has to suspend or revoke a license based on rapidly developing national security and foreign policy concerns.

Previously, the general license validity period for a BIS license (with limited exceptions) was four years. Under this IFR, items controlled under ECCNs 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, and 0A509 are generally limited to a 12-month validity period under revised § 750.7(g). Licenses extending beyond 12 months for firearms and related items may still be granted in certain limited circumstances, such as transactions involving intra-company transfers of items (*e.g.,* from a subsidiary to a parent company) or government contracts that require a period of performance longer than 12 months. This IFR does not make any other changes to § 750.7(g), and all other aspects of the license validity period (such as expiration date) continue to apply to firearms and related items. This change is expected to result in an increase of 500 license applications received annually by BIS.

H. Changes To Make Mandatory in the Automated Export System the Identification of End-Item Firearms and Shotguns, Along With Certain ''Parts,'' ''Components,'' Devices, ''Accessories,'' and ''Attachments'' for Semi-Automatic Firearms and Semi-Automatic Shotguns, and Conforming Changes to Conventional Arms Reporting Requirements

As referenced above under section C of this preamble, this IFR creates four new ECCNs, 0A506, 0A507, 0A508, and 0A509, to help distinguish between non-automatic and semi-automatic firearms exports in AES EEI filings, along with the export of certain ''parts,'' ''components,'' devices, ''accessories,'' and ''attachments'' for semi-automatic firearms and semi-automatic shotguns. However, in order to further enhance the export data to distinguish between end-item firearms exports and other firearms ''parts,'' ''components,'' devices, ''accessories, or ''attachments'' exports, as well as simplify the conventional arms reporting requirements for firearms under the EAR (§ 743.4), this IFR revises the requirement in § 758.1(g)(4)(ii), which previously allowed exporters to complete their conventional arms reporting requirements without submitting conventional arms reports to BIS. This IFR revises this reporting requirement by making conventional arms reporting information in the EEI filing in AES mandatory; it does this by specifying that exporters must include the items-level classification or other items-level descriptor in the Commodity description block in the EEI filed in AES. Section I further describes the conventional arms reporting-related changes to the EAR that are being made by this IFR.

Specifically, this IFR revises paragraph (g)(4)(ii) to expand the scope of the heading to include certain ''parts,'' ''components,'' devices, ''accessories,'' and ''attachments'' controlled under new ECCN 0A509. Because of the importance of these commodities for semi-automatic firearms and semi-automatic shotguns, additional visibility is needed regarding these ''parts,'' ''components,'' devices, ''accessories,'' and ''attachments'' controlled under new ECCN 0A509, as well as the commodities controlled under ECCNs 0A506, 0A507, and 0A508, for the export clearance requirement under paragraph (g)(4)(ii).

This IFR revises the paragraph (g)(4)(ii) introductory text to make the requirements of this paragraph mandatory instead of optional for all shipments that meet the specified criteria. It also expands the scope of this mandatory export clearance requirement to include not just ECCNs 0A501.a or .b and shotguns with a barrel length less than 18 inches controlled under ECCN 0A502, but also to include items controlled under ECCNs 0A501.a or .b, 0A506.a or .b, 0A507.a and .b, shotguns with a barrel length less than 18 inches controlled under ECCNs 0A502 or 0A508.a. or .b, or ''parts,'' ''components,'' devices, ''accessories,'' or ''attachments'' controlled under 0A509.a, .b, .c, or .d, as of the effective date of this IFR. To assist exporters in identifying the information that must be included in the Commodity description block in the EEI filing in AES, this IFR also adds new paragraphs (g)(4)(ii)(A) through (F). This information will be particularly helpful for certain ECCNs, such as new ECCN 0A506.a, which controls any semi-automatic centerfire (non-rimfire) rifles equal to .50 caliber (12.7 mm) or less that has any of the characteristics that will be specified under 0A506.a.1 through .a.6. New paragraph (g)(4)(ii)(C) specifies that, in that case, .a will appear as the first text in the Commodity description block in the EEI filing in AES. These changes are not expected to result in an increase in burden; a commodity description was already required to be provided in the EEI in AES prior to the effective date of this IFR, so including this additional information as part of the commodity

description will not change the burden hours for exporters.

I. Conventional Arms Reporting—Related Changes

This IFR revises the conventional arms reporting requirements in § 743.4 to make a conforming change for new ECCNs 0A506.a. and .b and 0A507.a. and .b. This IFR also revises § 743.4 to specify that BIS will be relying solely on the alternative submission method for obtaining the required information for the conventional arms reporting, as was also referenced above under section F of this preamble.

1. *Conforming change to add 0A506.a and .b and 0A507.a and .b to the conventional arms reporting requirements.* This IFR revises § 743.4 to add references to the end-item firearms controlled under ECCNs 0A506.a and .b and 0A507.a, .b, and .c, to specify that these semi-automatic rifles and pistols are included for the conventional arms reporting for the Wassenaar Arrangement semi-annual reporting and the United Nations annual report described under § 743.4. This approach is consistent with how these items were previously reported when controlled under ECCN 0A501.a or .b. The changes discussed below regarding BIS's use of EEI data to meet conventional arms reporting requirements affect both the existing ECCNs and the newly added ECCNs referenced in § 743.4 (*i.e.,* ECCNs 0A501.a and .b, 0A506.a and .b, and 0A507.a. and .b).

2. *Specifying that BIS will use AES EEI data to meet the conventional arms reporting requirements of 0A501.a and .b, 0A506.a and .b, and 0A507.a and .b.*

In preparing this IFR, BIS reevaluated the conventional arms reporting requirements under existing § 743.4 and the alternative submission method for ECCN 0A501.a and .b referenced under §§ 743.4(h) and 758.1(g)(4)(ii) based on its experience since ECCNs 0A501.a and .b were added to the EAR on March 9, 2020. BIS determined, based on this review, that the conventional arms reporting requirements could be simplified by making the alternative submission method the sole method that exporters use to submit the information to meet the conventional arms reporting requirement for ECCN 0A501.a or .b, as well as for semi-automatic rifles controlled under ECCN 0A506.a and .b and semi-automatic pistols controlled under 0A507.a and .b.

Previously, BIS added the alternative submission method in § 743.4(h) of the EAR as part of the January 2020 EAR final rule to reflect exporters' recommendation that BIS use AES EEI data to obtain the information required for these two conventional arms reports. The alternative submission method gave exporters the option of including the additional .a or .b information as the first characters to appear in the commodity description block in AES, rather than requiring submission of information on end-item firearms under ECCN 0A501.a and .b in separate reports to BIS. Based on data reviewed by BIS, nearly all exporters have been using this alternative submission method to meet their conventional arms reporting requirements since March 9, 2020, the effective date of the January 2020 rule. The alternative submission method has also been an efficient method for extracting the data needed by BIS to prepare these reports.

In addition, consistent with BIS's interest in increasing transparency regarding exports and reexports of the semi-automatic firearms and related ''parts,'' ''components,'' devices, ''accessories,'' and ''attachments,'' this IFR revises § 758.1(g)(4)(ii), as described above under section F, to include the ''items'' level paragraph classification as the first characters to appear in the Commodity description block in the EEI filed in AES mandatory for ECCNs 0A501.a and .b, 0A506.a and .b, 0A507.a and .b, 0A508.a and .b. Given that a commodity description was already previously required in the EEI filing in AES, including this additional information as part of the commodity description is not expected to change the burden hours for exporters.

As a result of the requirement to submit item paragraph information in AES, the existing provisions in § 743.4 that require exporters to submit annual and semi-annual reports for the purposes of conventional arms reporting via email (''standard method'') unless the exporter provides the item paragraph classification with the exporter's AES EEI filings (''alternative method'') are no longer necessary, because BIS will be able to rely on AES data pursuant to the revisions to § 758.1(g)(4)(ii) addressing conventional arms reporting for ECCN 0A501.a and .b, as well as for 0A506.a and .b and 0A507.a and .b. These changes will streamline the exporter's reporting obligations by limiting them to the AES filing requirement. Because nearly all exporters that were required to submit conventional arms reports to BIS were already using the alternative method, the elimination of the submission of email reports as an available method under revised § 743.4 will not result in a substantive change in the burden on exporters.

J. Revocations and Modifications to Existing Licenses

Based on the policy rationale identified above, BIS has determined that it is necessary to revoke or modify certain valid licenses for the export and reexport of firearms and related items to non-government end users. As described below, on July 1, 2024, BIS will revoke all currently valid licenses to non-government end users in High-Risk Destinations for Firearms and Related Items. (*See* supplement no. 3 to part 742.) In addition, on May 30, 2024, BIS will modify certain other valid licenses with validity periods that end more than one year from the effective date of this IFR by rendering them invalid one year from the effective date of this IFR. These modified licenses cover exports and reexports to non-government end users in destinations outside High-Risk Destinations for Firearms and Related Items, Country Group A:1, Israel, and Ukraine.

1. License Revocations

On July 1, 2024, pursuant to § 750.8 of the EAR, BIS will revoke existing licenses for the export and reexport of firearms and related items to non-government end users in destinations identified in supplement no. 3 to part 742 (High-Risk Destinations for Firearms and Related Items). As discussed above, the Firearms Guidance Memorandum has identified that there is a substantial risk that firearms and related items exported or reexported to non-government end users in these destinations will be diverted or misused in a manner adverse to U.S. national security and foreign policy, including for use in drug trafficking, regional conflict, or human rights abuses. Accordingly, as discussed above, this IFR applies a presumption of denial to all license applications submitted on or after May 30, 2024 and seeking to export or reexport firearms and related items to non-government end users in these destinations. Existing licenses for exports and reexports to non-government end users in these destinations were issued under previous review criteria. Accordingly, failure to revoke these licenses would allow firearms and related items to continue to be exported to these destinations for up to several more years without review under the new policy. Such ongoing exports or reexports of firearms and related items could create a substantial risk of diversion and stockpiling in a manner contrary to U.S. national security and foreign policy interests.

BIS will issue these revocations on July 1, 2024, 30 days after the effective

date of this IFR, to ensure that planned shipments may be completed without disruption to ongoing trade. For any license that is revoked, the license holder may appeal a revocation to the Under Secretary for Industry and Security pursuant to § 756 of the EAR. Procedures for filing such an appeal are described in detail in § 756.2(b) of the EAR and will be included in the letters that BIS will send to notify license holders of the pending revocation. License holders whose license(s) are revoked by BIS may reapply to export or reexport the items covered by the revoked license without prejudice under BIS's new licensing policy, as described in this IFR.

2. License Modification

In addition to revoking the licenses described above, BIS will, upon the effective date of this IFR, May 30, 2024, pursuant to § 750.8 of the EAR, modify certain existing licenses for firearms and related items to non-government end users that have more than one year remaining of their validity periods to render them invalid on May 30, 2025. These modifications will not affect licenses to non-government end users in Country Group A:1, Israel, and Ukraine (which implement export controls consistent with the Wassenaar Arrangement), or to High-Risk Destinations for Firearms and Related Items. The affected licenses were not reviewed under the new policies established in this IFR, and were issued with a four-year validity period rather than the one-year general validity period established in this IFR. As discussed elsewhere in this IFR, BIS is shortening the validity period of licenses to export or reexport firearms and related items to one year to enable more precise consideration of the risk of diversion or misuse, consistent with national security and foreign policy interests. Accordingly, BIS is modifying the validity period of certain existing licenses, not subject to revocation, in furtherance of this effort.

The revocations and modifications described in section J, are expected to result in an increase of 270 license applications received annually by BIS. However, this is anticipated to be a one-time increase.

K. Request for Public Comment

In addition to seeking public comment on the changes reflected in this IFR, including the four new ECCNs and conforming changes (*see* Table 1 under section B.6 of this IFR), BIS is specifically seeking public comment on the issues below. See the **ADDRESSES** section of this rule for instructions on how to submit comments.

(1) BIS seeks comments on the expected impact on individuals, as well as industry, should BIS impose a time limit on the use of § 740.14 BAG License Exception for firearms classified under ECCNs 0A501, 0A502, 0A506, 0A507, and 0A508. Such limits would require the items to be returned to the United States or other country of re-export within the specified time limit, or to otherwise be disposed of in accordance with the EAR, *e.g.,* by obtaining a BIS license to authorize a longer temporary export or a permanent export. For temporary exports or reexports longer than the BAG time limit, a license would be required to authorize the export or reexport. In considering revisions to BAG, BIS identified that imposing a time limit of 45-, 60-, 90-, or 180-days on how long the exporter is eligible to keep the firearms out of the country could help address diversion risks.

(2) BIS seeks comments on potential additional revisions to § 740.14 of the EAR to require exporters of applicable firearms and related commodities authorized under License Exception BAG to submit EEI filings in AES under § 758.1(b)(9). This IFR does not make changes to the exemption from the EEI filing requirements for License Exception BAG authorized exports or the export clearance requirements under § 758.11, which will continue to require submission of the CBP Form 4457. However, BIS seeks comments on the potential impact on individuals if BIS were to remove the requirements in § 758.11 and instead require mandatory EEI filing in AES. BIS is aware of concerns about requiring individuals to file EEI in AES for License Exception BAG authorized exports; because of the benefits to increasing transparency and reducing the chance of diversion, BIS is considering whether additional changes may be warranted in this export clearance area. BIS also welcomes comments that provide alternative suggestions for increasing transparency and reducing diversion risk without imposing a mandatory EEI filing requirement in AES for exports authorized under License Exception BAG.

Export Control Reform Act of 2018

On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which included the Export Control Reform Act of 2018 (ECRA), 50 U.S.C. 4801–4852. ECRA, as amended, provides the legal basis for BIS's principal authorities and serves as the authority under which BIS issues this IFR.

Rulemaking Requirements

1. BIS has examined the expected impact of this IFR as required by Executive Orders 12866, 13563, and 14094, which direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public, health, and safety effects, distributive impacts, and equity). This IFR is considered a ''significant regulatory action'' under section 3(f) of Executive Order 12866, as amended by Executive Order 14094.

2. Notwithstanding any other provision of law, no person may be required to respond to or be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This regulation involves five collections currently approved by OMB.

- OMB Control Number 0694–0088, *Simplified Network Application Processing System;*
- OMB Control Number 0694–0096, *Five Year Records Retention Period;*
- OMB Control Number 0694–0122, *Licensing Responsibilities and Enforcement;*
- OMB Control Number 0694–0137, *License Exceptions and Exclusions;* and
- OMB Control Number 0607–0152, *Automated Export System (AES) Program.*

Additional information regarding these collections of information—including all background materials—can be found at *https://www.reginfo.gov/public/do/PRAMain* by using the search function to enter either the title of the collection or the OMB Control Number.

With regard to control number 0694–0088, *Simple Network Application Process and Multipurpose Application Form.* BIS expects an increase of 1003 burden hours for this collection; however, 132 hours of this increase is anticipated to be a one-time increase related to the revocation and modification of licenses for firearms and related items described in section J of this IFR. These additional burden hours will be added during the current renewal approval process for this information collection.

For OMB control number 0694–0137, *License Exceptions and Exclusions,* BIS expects a slight increase in burden

hours for this collection because of the new restriction on the use of License Exceptions under § 740.2(a)(24). This requires exporters to obtain a copy of an import certificate or equivalent document (if required by the importing country) before the exporter can use any license exception for items controlled under ECCNs 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, and 0A509. Although BIS anticipates that this requirement could increase reporting burden to some degree under this collection, BIS believes that exporters, as part of their existing compliance programs, likely already have processes in place to confirm whether the firearms and related items that are to be exported may be imported into these foreign countries. BIS believes this requirement is likely reflective of practices and processes exporters already have in place and will therefore be of a minimal burden to exporters. BIS welcomes comments on this information collection requirement and on the assumptions that this confirmation requirement is not a deviation from exporters' current practices to ensure that exports of firearms and related items that are authorized under BIS license exceptions may be imported into the respective countries of import. In order to protect U.S. national security and foreign policy interests and to ensure that EAR license exceptions are not used to authorize an export of a firearm or related commodity when a foreign government requires an import certificate or other equivalent document that has not been issued, this IFR imposes a new general restriction on the use of all EAR license exceptions under § 740.2(a)(24). A similar type of import certificate or other equivalent document requirement applies for items authorized under a BIS license.

The AES change included in this rule under § 758.1(g)(4)(ii) is not anticipated to result in a change in the burden under the OMB control number 0607–0152, *Automated Export System (AES) Program* because exporters are already required to provide a description in the Commodity description block in the EEI filing in AES. Similarly, changes impacting OMB control numbers 0694–0096 and 0694–0122, *Five Year Records Retention Period* and *Licensing Responsibilities and Enforcement,* respectively, are not expected to result in an increase in burden hours.

3. This rule does not contain policies with federalism implications as that term is defined under Executive Order 13132.

4. Pursuant to Section 1762 of ECRA (50 U.S.C. 4821), this action is exempt from the Administrative Procedure Act (APA) (5 U.S.C. 553) requirements for notice of proposed rulemaking, opportunity for public participation, and delay in effective date.

5. Because neither the Administrative Procedure Act nor any other law requires notice of proposed rulemaking and an opportunity for public comment for this rule, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) are not applicable. Accordingly, no Final Regulatory Flexibility Analysis is required and none has been prepared.

List of Subjects

15 CFR Part 732, 738, 740, 750, and 758

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements.

15 CFR Part 734

Administrative practice and procedure, Exports, Inventions and patents, Research, Science and technology.

15 CFR Part 742

Exports, Terrorism.

15 CFR Part 743

Administrative practice and procedure, Reporting and recordkeeping requirements.

15 CFR Part 748

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements, Terrorism.

15 CFR Part 762

Administrative practice and procedure, Business and industry, Confidential business information, Exports, Reporting and recordkeeping requirements.

15 CFR Part 772

Exports.

15 CFR Part 774

Exports, Reporting and recordkeeping requirements, Terrorism.

Accordingly, parts 732, 734, 738, 740, 742, 743, 748, 750, 758, 762, 772 and 774 of the Export Administration Regulations (15 CFR parts 730–774) are amended as follows:

PART 732—STEPS FOR USING THE EAR

■ 1. The authority citation for 15 CFR part 732 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 2. Section 732.2 is amended by revising paragraph (b) introductory text to read as follows:

§ 732.2 Steps regarding scope of the EAR.

* * * * *

(b) *Step 2: Publicly available technology and software.* This step is relevant for both exports and reexports. Determine if your technology or software is publicly available as defined and explained at part 734 of the EAR. The Bureau of Industry and Security (BIS) website at *https://www.bis.doc.gov* contains several practical examples describing publicly available technology and software that are outside the scope of the EAR under the FAQ section of the website. See the FAQs under the heading, EAR Definitions, Technology and Software, Fundamental Research, and Patents FAQs at *https://www.bis.doc.gov/index.php/documents/compliance-training/export-administrationregulations-training/1554-ear-definitions-faq/file.* The examples are illustrative, not comprehensive. Note that encryption software classified under ECCN 5D002 on the Commerce Control List (refer to supplement no. 1 to part 774 of the EAR) is subject to the EAR even if publicly available, except for publicly available encryption object code software classified under ECCN 5D002 when the corresponding source code meets the criteria specified in § 740.13(e) of the EAR. The following also remains subject to the EAR: ''Software'' or ''technology'' for the production of a firearm, or firearm frame or receiver, controlled under ECCNs 0A501, 0A506, 0A507, or 0A509, as referenced in § 734.7(c) of the EAR.

* * * * *

PART 734—SCOPE OF THE EXPORT ADMINISTRATION REGULATIONS

■ 3. The authority citation for 15 CFR part 734 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13020, 61 FR 54079, 3 CFR, 1996 Comp., p. 219; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13637, 78 FR 16129, 3 CFR, 2014 Comp., p. 223; Notice of November 8, 2022, 87 FR 68015 (November 10, 2022).

■ 4. Section 734.7 is amended by revising paragraph (c) to read as follows:

§ 734.7 Published.

* * * * *

(c) The following remains subject to the EAR: ''software'' or ''technology'' for the production of a firearm, or firearm

frame or receiver, controlled under ECCNs 0A501, 0A506, 0A507, or 0A509, that is made available by posting on the internet in an electronic format, such as AMF or G-code, and is ready for insertion into a computer numerically controlled machine tool, additive manufacturing equipment, or any other equipment that makes use of the ''software'' or ''technology'' to produce the firearm frame or receiver or complete firearm.

* * * * *

PART 738—COMMERCE CONTROL LIST OVERVIEW AND THE COUNTRY CHART

■ 5. The authority citation for 15 CFR part 738 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 10 U.S.C. 8720; 10 U.S.C. 8730(e); 22 U.S.C. 287c; 22 U.S.C. 2151 note; 22 U.S.C. 3201 *et seq.;* 22 U.S.C. 6004; 42 U.S.C. 2139a; 15 U.S.C. 1824; 50 U.S.C. 4305; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 6. Supplement no. 1 to part 738 is revised to read as follows:

SUPPLEMENT NO. 1 TO PART 738—COMMERCE COUNTRY CHART

[1] See § 746.1(b) for United Nations Security Council Sanctions under the EAR. See § 746.3 for United Nations Security Council-related license requirements for exports and reexports to Iraq or transfer within Iraq under the EAR, as well as regional stability licensing requirements not included in the Country Chart.
[2] See § 742.4(a) for special provisions that apply to exports and reexports to these countries of certain thermal imaging cameras.
[3] See § 742.6(a)(3) for special provisions that apply to military commodities that are subject to ECCN 0A919.
[4] See § 742.6(a)(2) and (4)(ii) regarding special provisions for exports and reexports of certain thermal imaging cameras to these countries.
[5] Refer to Switzerland for licensing requirements for Liechtenstein under the EAR.
[6] See § 746.5 of the EAR for additional license requirements under the Russian Industry Sector Sanctions for ECCNs 0A998, 1C992, 3A229, 3A231, 3A232, 6A991, 8A992, and 8D999 and items identified in supplement no. 2 to part 746 of the EAR. See § 746.8 of the EAR for Sanctions against Russia and Belarus, including additional license requirements for items listed in any ECCN on the CCL.
[7] Note that a license is still required for items controlled under ECCNs 6A003.b.4.b and 9A515.e for RS column 2 reasons when destined to India.
[8] See § 746.6 of the EAR for additional license requirements for exports and reexports to the Crimea region of Ukraine and the so-called Donetsk People's Republic (DNR) and Luhansk People's Republic (LNR) regions of Ukraine and transfers (in-country) within the Crimea, DNR, and LNR regions of Ukraine for all items subject to the EAR, other than food and medicine designated as EAR99 and certain EAR99 or ECCN 5D992.c software for internet-based communications.

PART 740—LICENSE EXCEPTIONS

■ 7. The authority citation for 15 CFR part 740 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 22 U.S.C. 7201 *et seq.;* E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 8. Section 740.2 is amended by:

■ a. Revising paragraphs (a)(4)(iii), (a)(21) and (23); and

■ b. Adding paragraph (a)(24).

The revisions and addition read as follows:

§ 740.2 Restrictions on all License Exceptions.

* * * * *

(a) * * *

(4) * * *

(iii) Authorized by § 740.14(e) of the EAR; or

* * * * *

(21) The reexport or transfer (in-country) of firearms classified under ECCNs 0A501, 0A502, 0A506, 0A507, or 0A508 with either an ITAR-defined ''foreign defense article'' (22 CFR 120.39) that is not subject to Department of State jurisdiction that is incorporated into the firearm or ''knowledge'' that an ITAR-defined ''defense article'' (22 CFR 120.31) will be subsequently incorporated into the firearm, where the ''(foreign) defense article'' is described in USML Category I(h)(2). In such instances, no license exceptions are available except for License Exception GOV (§ 740.11(b)(2)(ii)).

* * * * *

(23) Exports, reexports, or transfers (in-country) of semi-automatic firearms or shotguns controlled under ECCNs 0A506, 0A507, or 0A508 sold under a contract or otherwise part of an export that includes $4,000,000 or more of such items are not eligible for any license exceptions except to personnel and agencies of the U.S. Government

under License Exception GOV (§ 740.11(b) of the EAR), for official use by an agency of NATO, or where a license exception would otherwise be available for the export, reexport, or transfer (in-country) of such items to a destination specified in Country Groups A:5 or A:6 (see supplement no. 1 to part 740 of the EAR) except Mexico, South Africa, or Turkey.

(24) Exporters of items controlled under ECCNs 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, or 0A509 wishing to use an EAR license exception for such items must first have the consignee obtain and provide to the exporter an import certification or equivalent document, if the importing country requires one, prior to using an EAR license exception.

* * * * *

■ 9. Section 740.3 is amended by revising paragraph (b) to read as follows:

§ 740.3 Shipments of limited value (LVS).

* * * * *

(b) *Eligible destinations.* This License Exception is available for all destinations in Country Group B (see supplement no. 1 to this part), provided that the net value of the commodities included in the same order and controlled under the same ECCN entry on the CCL does not exceed the amount specified in the LVS paragraph for that entry. However, License Exception LVS is not available for 0x5zz items (except 0A504.g) when destined for countries in ''CARICOM'' or countries in Country Group D:5.

* * * * *

■ 10. Section 740.9 is amended by revising paragraphs (a) introductory text, (b) introductory text, and (b)(5) to read as follows:

§ 740.9 Temporary imports, exports, reexports, and transfers (in-country) (TMP).

(a) *Temporary exports, reexports, and transfers (in-country).* License Exception TMP authorizes exports, reexports, and transfers (in-country) of items for temporary use abroad (including use in or above international waters) subject to the conditions specified in this paragraph (a). No item may be exported, reexported, or transferred (in-country) under this paragraph (a) if an order to acquire the item, such as a purchase order, has been received before shipment; with prior knowledge that the item will stay abroad beyond the terms of this License Exception; or when the item is for subsequent lease or rental abroad. The references to various countries and country groups in these TMP-specific provisions do not limit or amend the prohibitions in § 740.2 of the EAR on the use of license exceptions generally, such as for exports of 9x515 or ''600 series'' items to destinations in Country Group D:5. This paragraph (a) does not authorize any export of a commodity controlled under ECCNs 0A501.a or .b, 0A506 or 0A507, or shotguns with a barrel length less than 18 inches controlled under ECCN 0A502 or 0A508 to, or any export of such an item that was imported into the United States from, a country in Country Group D:5 (supplement no. 1 to this part), or from Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan. The only provisions of this paragraph (a) that are eligible for use to export such items are paragraph (a)(5) of this section (''Exhibition and demonstration'') and paragraph (a)(6) of this section (''Inspection, test, calibration, and repair''). In addition, this paragraph (a) may not be used to export more than 75 firearms per shipment. In accordance with the requirements in § 758.1(b)(9) and (g)(4) of the EAR, the exporter or its agent must provide documentation that includes the serial number, make, model, and caliber of each firearm being exported by filing these data elements in an EEI filing in AES. In accordance with the exclusions in License Exception TMP under paragraph (b)(5) of this section, the entry clearance requirements in § 758.1(b)(9) do not permit the temporary import of: Firearms controlled in ECCNs 0A501.a or .b, 0A506, or 0A507 that are shipped from or manufactured in a Country Group D:5 country, or that are shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan (except for any firearm model designation (if assigned) controlled by ECCNs 0A501, 0A506, or 0A507 that is specified under annex A in supplement no. 4 to this part); or shotguns with a barrel length less than 18 inches controlled in ECCNs 0A502 or 0A508 that are shipped from or manufactured in a Country Group D:5 country, or from Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan, because of the exclusions in License Exception TMP under paragraph (b)(5) of this section.

* * * * *

(b) *Exports of items temporarily in the United States.* No provision of this paragraph (b), other than paragraph (b)(3), (4), or (5), may be used to export firearms controlled by ECCN 0A501.a, .b, 0A506, 0A507, or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502 or 0A508.

* * * * *

(5) *Exports of firearms and certain shotguns temporarily in the United States.* This paragraph (b)(5) authorizes the export of no more than 75 firearms per shipment controlled by ECCN 0A501.a or .b, 0A506, 0A507, or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502 or 0A508 that are temporarily in the United States for a period not exceeding one year, provided that:

(i) The firearms were not shipped from or manufactured in a U.S. arms embargoed country, *i.e.,* destination listed in Country Group D:5 in supplement no. 1 to this part;

(ii) The firearms were not shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan, except for any firearm model controlled by 0A501, 0A506, or 0A507 that is specified under annex A in supplement no. 4 to this part; and

(iii) The firearms are not ultimately destined to a U.S. arms embargoed country, *i.e.,* destination listed in Country Group D:5 in supplement no. 1 to this part;

(iv) When the firearms entered the U.S. as a temporary import, the temporary importer or its agent:

(A) Provided the following statement to U.S. Customs and Border Protection: ''This shipment will be exported in accordance with and under the authority of License Exception TMP (15 CFR 740.9(b)(5))'';

(B) Provided to U.S. Customs and Border Protection an invoice or other appropriate import-related documentation (or electronic equivalents) that includes a complete list and description of the firearms being temporarily imported, including their model, make, caliber, serial numbers, quantity, and U.S. dollar value; and

(C) Provided (if temporarily imported for a trade show, exhibition, demonstration, or testing) to U.S. Customs and Border Protection the relevant invitation or registration documentation for the event and an accompanying letter that details the arrangements to maintain effective control of the firearms while they are in the United States; and

(v) In addition to the export clearance requirements of part 758 of the EAR, the exporter or its agent must provide the import documentation related to paragraph (b)(5)(iv)(B) of this section to U.S. Customs and Border Protection at the time of export.

Note 1 to paragraph (b)(5): In addition to complying with all applicable EAR

requirements for the export of commodities described in paragraph (b)(5) of this section, exporters and temporary importers should contact U.S. Customs and Border Protection (CBP) at the port of temporary import or export, or at the CBP website, for the proper procedures for temporarily importing or exporting firearms controlled in ECCNs 0A501.a or .b, 0A506, or 0A507, or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502 or 0A508, including regarding how to provide any data or documentation required by BIS.

Note 2 to paragraph (b): A commodity withdrawn from a bonded warehouse in the United States under a 'withdrawal for export' customs entry is considered as 'moving in transit'. It is not considered as 'moving in transit' if it is withdrawn from a bonded warehouse under any other type of customs entry or if its transit has been broken for a processing operation, regardless of the type of customs entry.

Note 3 to paragraph (b): Items shipped on board a vessel or aircraft and passing through the United States from one foreign country to another may be exported without a license provided that (a) while passing in transit through the United States, they have not been unladen from the vessel or aircraft on which they entered, and (b) they are not originally manifested to the United States.

Note 4 to paragraph (b): A shipment originating in Canada or Mexico that incidentally transits the United States en route to a delivery point in the same country does not require a license.

* * * * *

■ 11. Section 740.10 is amended by revising paragraphs (b)(1) and (4) to read as follows:

§ 740.10 License Exception Servicing and replacement of parts and equipment (RPL).

* * * * *

(b) * * *

(1) The provisions of this paragraph (b) authorize the export and reexport to any destination, except for 9x515 or ''600 series'' items to destinations identified in Country Group D:5 (see supplement no. 1 to this part) or otherwise prohibited under the EAR, of commodities and software that were sent to the United States or to a foreign party for servicing and replacement of commodities and software ''subject to the EAR'' (see § 734.2(a) of the EAR) that are defective or that an end user or ultimate consignee has found unacceptable. The export of firearms controlled by ECCNs 0A501.a or .b, 0A506, or 0A507 or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502 or 0A508 temporarily in the United States for servicing and replacement may be exported under paragraph (b)(2) or (3) of this section only if the additional requirements in paragraph (b)(4) of this section are also met.

* * * * *

(4) This paragraph (b)(4) authorizes the export of firearms controlled by ECCNs 0A501.a or .b, 0A506, 0A507 or shotguns with a barrel length less than 18 inches controlled in ECCNs 0A502 or 0A508 that are temporarily in the United States for servicing or replacement for a period not exceeding one year or the time it takes to service or replace the commodity, whichever is shorter, provided that the requirements of paragraph (b)(2) or (3) of this section are met and:

(i) The firearms were not shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan, except for any firearm model controlled by 0A501, 0A506, or 0A507 that is specified under Annex A in Supplement No. 4 to this part;

(ii) When the firearms entered the U.S. as a temporary import, the temporary importer or its agent:

(A) Provided the following statement to U.S. Customs and Border Protection: ''This shipment will be exported in accordance with and under the authority of License Exception RPL (15 CFR 740.10(b))'';

(B) Provided to U.S. Customs and Border Protection an invoice or other appropriate import-related documentation (or electronic equivalents) that includes a complete list and description of the firearms being temporarily imported, including their model, make, caliber, serial numbers, quantity, and U.S. dollar value; and

(C) Provided (if temporarily imported for servicing or replacement) to U.S. Customs and Border Protection the name, address and contact information (telephone number and/or email) of the organization or individual in the U.S. that will be receiving the item for servicing or replacement; and

(iii) In addition to the export clearance requirements of part 758 of the EAR, the exporter or its agent must provide the import documentation related to paragraph (b)(4)(iii)(B) of this section to U.S. Customs and Border Protection at the time of export.

Note 1 to paragraph (b)(4): In addition to complying with all applicable EAR requirements for the export of commodities described in this paragraph (b)(4), exporters and temporary importers should contact U.S. Customs and Border Protection (CBP) at the port of temporary import or export, or at the CBP website, for the proper procedures for temporarily importing or exporting firearms controlled in ECCN 0A501.a or .b, 0A506, 0A507 or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502 or 0A508, including regarding how to provide any data or documentation required by BIS.

* * * * *

■ 12. Section 740.11 is amended by revising the introductory text to read as follows:

§ 740.11 Governments, international organizations, international inspections under the Chemical Weapons Convention, and the International Space Station (GOV).

This License Exception authorizes exports and reexports for international nuclear safeguards; U.S. government agencies or personnel; agencies of cooperating governments; international inspections under the Chemical Weapons Convention; and the International Space Station. Commodities listed in ECCNs 0A501, 0A506, 0A507, 0A508, and 0A509 are eligible only for transactions described in paragraphs (b)(2)(i) and (ii) of this section. Any item listed in a 0x5zz ECCN for export, reexport, or transfer (in-country) to an E:1 country is eligible only for transactions described in paragraphs (b)(2)(i) and (ii) solely for U.S. Government official use of this section.

* * * * *

■ 13. Section 740.14 is amended by revising paragraph (e) to read as follows:

§ 740.14 Baggage (BAG).

* * * * *

(e) *Special provisions for firearms and ammunition.* (1) A United States citizen or a permanent resident alien leaving the United States may export or reexport shotguns with a barrel length of 18 inches or over controlled under ECCN 0A502 and 0A508 and shotgun shells controlled under ECCN 0A505.b and .c under this License Exception, subject to the following limitations:

(i) Not more than three firearms may be taken on any one trip (this includes shotguns in ECCNs 0A502 or 0A508, as well as firearms in ECCNs 0A501, 0A506, or 0A507).

(ii) The shotguns and shotgun shells must be with the person's baggage.

(iii) The shotguns and shotgun shells must be for the person's exclusive use for legitimate hunting or lawful sporting purposes, scientific purposes, or personal protection, and not for resale or other transfer of ownership or control. Accordingly, except as provided in (e)(2) of this section, shotguns may not be exported permanently under this License Exception. All shotguns and unused shotgun shells must be returned to the United States. Note that since certain countries may require an Import Certificate or a U.S. export license

before allowing the import of a shotgun, you should determine the import requirements of your country of destination in advance.

(2) A nonresident alien leaving the United States may export or reexport under this License Exception only such shotguns and shotgun shells as he or she brought into the United States under the provisions of the Department of Justice Regulations (27 CFR 478.115(d)).

(3) A United States citizen or a permanent resident alien leaving the United States may export under this License Exception firearms, ''parts,'' ''components,'' ''accessories,'' or ''attachments'' controlled under ECCNs 0A501, 0A506, 0A507, and 0A509 and ammunition controlled under ECCN 0A505.a, subject to the following limitations:

(i) Not more than three firearms may be taken on any one trip (this includes firearms in ECCNs 0A501, 0A506, or 0A507, as well as shotguns in ECCNs 0A502 or 0A508), and no more than 1,000 rounds of ammunition may be taken on any one trip.

(ii) ''Parts,'' ''components,'' ''accessories,'' and ''attachments'' exported pursuant to this paragraph (e)(3) must be of a kind and limited to quantities that are reasonable for the activities described in paragraph (e)(3)(iv) of this section or that are necessary for routine maintenance of the firearms being exported.

(iii) The commodities must be with the person's baggage.

(iv) The commodities must be for the person's exclusive use and not for resale or other transfer of ownership or control. Accordingly, except as provided in paragraph (e)(4) of this section, firearms, ''parts,'' ''components,'' ''accessories,'' ''attachments,'' and ammunition, may not be exported permanently under this License Exception. All firearms, ''parts,'' ''components,'' ''accessories,'' or ''attachments'' controlled under ECCN 0A501, 0A506, 0A507, and 0A509 and all unused ammunition controlled under ECCN 0A505.a exported under this License Exception must be returned to the United States.

(v) Travelers leaving the United States temporarily are required to declare the firearms, ''parts,'' ''components,'' ''accessories,'' ''attachments,'' and ammunition being exported under this License Exception to a Customs and Border Protection (CBP) officer prior to departure from the United States and present such items to the CBP officer for inspection, confirming that the authority for the export is License Exception BAG and that the exporter is compliant with its terms.

(4) A nonimmigrant alien leaving the United States may export or reexport under this License Exception only such firearms controlled under ECCN 0A501, 0A506, 0A507, and ammunition controlled under ECCN 0A505 as he or she brought into the United States under the relevant provisions of Department of Justice regulations at 27 CFR part 478.

(5) Destination eligibility under this License Exception for items controlled under ECCNs 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, or 0A509 is limited to countries other than those in Country Group D:5 (except for Zimbabwe) and ''CARICOM'' countries.

* * * * *

■ 14. Section 740.20 is amended by revising paragraph (b)(2)(ii) to read as follows:

§ 740.20 License Exception Strategic Trade Authorization (STA).

* * * * *

(b) * * *

(2) * * *

(ii) License Exception STA may not be used for:

(A) Any item controlled in ECCNs 0A501.a, .b, .c, .d, or .e; 0A506; 0A507; 0A509; 0A981; 0A982; 0A983; 0A503; 0E504; 0E982; or

(B) Shotguns with barrel length less than 18 inches controlled in 0A502 or 0A508.

* * * * *

PART 742—CONTROL POLICY—CCL BASED CONTROLS

■ 15. The authority citation for 15 CFR part 742 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 22 U.S.C. 3201 *et seq.;* 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; Sec. 1503, Pub. L. 108–11, 117 Stat. 559; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Presidential Determination 2003–23, 68 FR 26459, 3 CFR, 2004 Comp., p. 320; Notice of November 8, 2022, 87 FR 68015 (November 10, 2022).

■ 16. Section 742.6 is amended by revising paragraph (b)(1)(i) to read as follows:

§ 742.6 Regional stability.

* * * * *

(b) * * *

(1) * * *

(i) Applications for exports and reexports of ECCN 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, 0A509, 0B501, 0B505, 0D501, 0D505, 0E501, 0E504, and 0E505 items, 9x515, and ''600 series'' items will be reviewed under the following policies:

(A) Applications for exports and reexports of ECCN 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, 0A509, 0B501, 0B505, 0D501, 0D505, 0E501, 0E504, and 0E505 items; 9x515 and ''600 series'' items will be reviewed on a case-by-case basis to determine whether the transaction is contrary to the national security or foreign policy interests of the United States, including the foreign policy interest of promoting the observance of human rights throughout the world.

(B) Other applications for exports and reexports described in paragraph (a)(1), (2), (6), or (8) of this section will be reviewed on a case-by-case basis to determine whether the export or reexport could contribute directly or indirectly to any country's military capabilities in a manner that would alter or destabilize a region's military balance contrary to the foreign policy interests of the United States.

(C) Applications for reexports of items described in paragraph (a)(3) of this section will be reviewed applying the policies for similar commodities that are subject to the ITAR.

(D) Applications for export or reexport of items classified under ECCNs 0A501, 0A502, 0A505, 0A506, 0A507, 0A508, or 0A509, or any 9x515 or ''600 series'' ECCN requiring a license in accordance with paragraph (a)(1) or (9) of this section, will also be reviewed consistent with United States arms embargo policies in § 126.1 of the ITAR (22 CFR 126.1), if destined to a country set forth in Country Group D:5 in Supplement No. 1 to part 740 of the EAR.

(E) Applications for export or reexport of ''parts,'' ''components,'' ''accessories,'' ''attachments,'' ''software,'' or ''technology'' ''specially designed'' or otherwise required for the F–14 aircraft will generally be denied.

(F) Applications for exports and reexports of items classified under ECCNs 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, 0A509, 0B501, 0B505, 0D501, 0D505, 0E501, 0E504, or 0E505, or any 9x515 ECCN will be subject to a policy of denial, when destined to China or a country listed in E:1 in Supplement No. 1 to part 740 of the EAR.

(G) Applications for exports and reexports of ECCNs 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, 0A509, 0B501, 0B505, 0D501, 0D505, 0E501, 0E504, and 0E505 items will be subject to a policy of denial when there is reason to believe the transaction involves criminal organizations, rebel groups, street gangs, or other similar

groups or individuals, that may be disruptive to regional stability, including within individual countries.
* * *

* * * * *

■ 17. Revise § 742.7 to read as follows:

§ 742.7 Crime control and detection.

(a) *License requirements.* In support of U.S. foreign policy to promote the observance of human rights throughout the world, a license is required to export and reexport crime control and detection equipment, related technology and software as follows:

(1) Crime control and detection instruments and equipment and related ''technology'' and ''software'' identified in the appropriate ECCNs on the CCL under CC Column 1 in the Country Chart column of the ''License Requirements'' section. A license is required to countries listed in CC Column 1 (Supplement No. 1 to part 738 of the EAR). Items affected by this requirement are identified on the CCL under the following ECCNs: 0A977, 0A978, 0A979, 0D977, 0E977, 1A984, 1A985, 3A980, 3A981, 3D980, 3E980, 4A003 (for fingerprint computers only), 4A980, 4D001 (for fingerprint computers only), 4D980, 4E001 (for fingerprint computers only), 4E980, 6A002 (for police-model infrared viewers only), 6E001 (for police-model infrared viewers only), 6E002 (for police-model infrared viewers only), and 9A980.

(2) Items designed for the execution of human beings as identified in ECCN 0A981 require a license to all destinations including Australia, Canada, and the United Kingdom. Controls for these items appear in each ECCN; a column specific to these controls does not appear in the Country Chart (supplement no. 1 to part 738 of the EAR).

(3) Certain crime control items require a license to all destinations, except Canada only. These items are identified under ECCNs 0A982, 0A503, and 0E982. Controls for these items appear in each ECCN; a column specific to these controls does not appear in the Country Chart (supplement no. 1 to part 738 of the EAR).

(4) See § 742.11 of the EAR for further information on items controlled under ECCN 0A983, which require a license to all destinations, including Australia, Canada, and the United Kingdom. Controls for these items appear in each ECCN; a column specific to these controls does not appear in the Country Chart (supplement no. 1 to part 738 of the EAR).

(5) Items detailed under this paragraph are specific to certain firearms, shotguns, and related items. Crime control and detection instruments and equipment and related ''technology'' and ''software'' identified in the appropriate ECCNs on the CCL under CC Column 2 in the Country Chart column of the ''License Requirements'' section. A license is required to countries listed in CC Column 2 (supplement no. 1 to part 738 of the EAR). Items affected by this requirement are identified on the CCL under the following ECCNs: 0A501 (except 0A501.y), 0A502, 0A504, 0A505. a, .b, and .x, 0A506, 0A507, 0A508, 0A509, 0D501, 0D505, 0E501, 0E502, 0E504, and 0E505.

(b) *Licensing policy.* (1) Applications for items controlled under paragraphs (a)(1) through (a)(4) of this section will generally be considered favorably on a case-by-case basis, unless there is civil disorder in the country or region or unless there is a risk that the items will be used to violate or abuse human rights. The judicious use of export controls is intended to deter human rights violations and abuses, distance the United States from such violations and abuses, and avoid contributing to civil disorder in a country or region.

(2) BIS will review license applications in accordance with the licensing policy in paragraph (b)(1) of this section for items that are not controlled under this section but that require a license pursuant to another section for any reason other than short supply and could be used by the recipient Government or other end user specifically to violate or abuse human rights.

(3) Applications for items controlled under paragraph (a)(5) of this section will be reviewed under the following license review policies:

(i) Applications destined for government end users will be reviewed on a case-by-case basis to determine whether there is a risk of diversion or misuse of the items in a manner that would adversely impact U.S. national security or foreign policy.

(ii) Those applications destined for non-government end users will be reviewed on a case-by-case basis, unless one of the following apply, in which case they will be reviewed under a presumption of denial:

(A) The destination is identified in supplement no. 3 to this part; or

(B) There is a substantial risk that the items will be diverted or misused in a manner that would adversely impact U.S. national security or foreign policy.

Note 1 to paragraph (b)(3): In reviewing applications under this paragraph, BIS will consider the following risks in the destination country or region: firearms trafficking or diversion, terrorism, corruption, human rights concerns and political violence, state fragility, organized crime or gang-related activity, and drug trafficking. BIS will also consider prior instances of diversion or misuse; the capabilities, potential uses, and lethality of the item; the nature of the end user; and other factors as appropriate.

(c) *Contract sanctity.* Contract sanctity date: August 22, 2000. Contract sanctity applies only to items controlled under ECCNs 0A982, 0A503, and 0E982 destined for countries not listed in CC Column 1 of the Country Chart (supplement no. 1 to part 738 of the EAR).

(d) *U.S. controls.* In maintaining its controls on crime control and detection items, the United States considers international norms regarding human rights and the practices of other countries that control exports to promote the observance of human rights. However, these controls are not based on the decisions of any multinational export control regime and may differ from controls imposed by other countries.

■ 18. Section 742.17 is amended by revising paragraphs (b) and (f) to read as follows:

§ 742.17 Exports of firearms to OAS member countries.

* * * * *

(b) *Licensing policy.* Applications will be reviewed on a case-by-case basis when supported by an FC Import Certificate or equivalent official document issued by the government of the importing country. However, there is a policy of denial for applications to export items linked to such activities as drug trafficking, terrorism, and transnational organized crime.

* * * * *

(f) *Items/Commodities.* Items requiring a license under this section are ECCNs 0A501 (except 0A501.y), 0A502, 0A504 (except 0A504.f), 0A505 (except 0A505.d), 0A506, 0A507, 0A508, and 0A509. (See supplement no. 1 to part 774 of the EAR).

* * * * *

■ 19. Add supplement no. 3 to part 742 to read as follows:

Supplement No. 3 to Part 742—High-Risk Destinations for Firearms and Related Items

Bahamas,
The Bangladesh
Belize
Bolivia
Burkina Faso
Burundi
Chad
Colombia

Dominican Republic
Ecuador
El Salvador
Guatemala

Yemen

PART 743—SPECIAL REPORTING AND NOTIFICATION

■ 20. The authority citation for 15 CFR part 743 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13637, 78 FR 16129, 3 CFR, 2014 Comp., p. 223; 78 FR 16129. (January 23, 2020).

■ 21. Section 743.4 is revised to read as follows:

§ 743.4 Conventional arms reporting.

(a) *Scope.* This section outlines special reporting requirements for exports of certain items included in the UN Register of Conventional Arms (UNRoCA) and Wassenaar Arrangement (WA) Munitions List. These reports cover substantially similar arms. States participating in the UNRoCA report annually on all transfers of arms (see *www.disarmament.unoda.org/convarms/register/*); Participating States of the Wassenaar Arrangement exchange information every six months on deliveries and transfers to non-WA governments of conventional arms set forth in the *Wassenaar Arrangement's Basic Documents* under Part II ''Guideline and Procedures, including the Initial Elements'', Appendix 3: ''Specific Information Exchange on Arms Content by Category''. Public Documents, Vol. 1—Founding Documents at *https://www.wassenaar.org/app/uploads/2021/12/Public-Docs-Vol-I-Founding-Documents.pdf*). BIS obtains the information needed for such conventional arms reporting from the information exporters are required to submit in the EEI submission in AES, pursuant to § 758.1(b)(9) and (g)(4)(ii) of the EAR. No additional reporting to BIS is required for purposes of this section. BIS does not submit reports for reexports or transfers (in-country) under this section. BIS does not include exports to Wassenaar member countries, identified in supplement no. 1 to part 743 in the Wassenaar reports. required under this section.

(b) *Information included in the reports*—(1) *Authorizations reported.* Exports authorized under BIS licenses, License Exceptions TMP, RPL, STA, or GOV (see part 740 of the EAR) and under the Validated End User authorization (see § 748.15 of the EAR).

(2) *ECCNs reported.* ECCNs 0A501.a and .b, 0A506.a. and .b, and 0A507.a and .b.

(3) *Quantity and recipient state reported.* The quantity and the name of the recipient state.

(c) *Contacts.* Information concerning the reporting requirements for items identified in paragraph (b)(2) of this section is available from the Office of Nonproliferation and Foreign Policy Controls (NFPC), Tel.: (202) 482–4188, Fax: (202) 482–4145.

■ 22. Section 743.6 is amended by revising paragraphs (a), (b), and (c) to read as follows:

§ 743.6 Prior notifications to Congress of exports of certain semi-automatic firearms.

(a) *General requirement.* Applications to export semi-automatic firearms controlled by ECCNs 0A506 or 0A507 will be notified to Congress as provided in this section before licenses for such items are issued, except as specified in paragraphs (a)(1) and (2) of this section.

(1) Exports of semi-automatic firearms controlled by ECCNs 0A506 or 0A507 to personnel and agencies of the U.S. Government under License Exception GOV (§ 740.11(b) of the EAR) do not require such notification.

(2) Exports of semi-automatic firearms controlled by ECCNs 0A506 or 0A507 for official use by an agency of NATO do not require such notification.

(b) *Notification criteria.* Unless excluded in paragraphs (a)(1) and (2) of this section, BIS will notify Congress prior to issuing a license authorizing the export of items to Mexico, South Africa, or Turkey or any other country not listed in Country Group A:5 or A:6 (see supplement no. 1 to part 740 of the EAR) if the items are sold under a contract or are otherwise part of an export transaction that includes $4,000,000 or more of semi-automatic firearms controlled by ECCNs 0A506 or 0A507.

(c) *License application information.* In addition to information required on the application, the exporter must include a copy of the signed contract or, if there is no contract, a written explanation from the applicant (including a statement of the value of the firearms controlled by ECCNs 0A506 or 0A507 to be exported) for any proposed export described in paragraph (b) of this section. License applications for semi-automatic firearms controlled by ECCNs 0A506 or 0A507 may include other nonautomatic firearms, shotguns, other 0x5zz items, or other items subject to the EAR, but the applicant must clearly identify the semi-automatic firearms controlled by ECCNs 0A506 or 0A507. The applicant clearly distinguishing the semi-automatic firearms controlled by ECCNs 0A506 or 0A507 from any other items on the license application will assist BIS in assessing whether the license application requires congressional notification under this section and identifying the information that will need to be reported to Congress. Any activity intended to circumvent notification requirements is prohibited. Such devices include, but are not limited to, the splitting or structuring of contracts to avoid exceeding applicable notification dollar value limits described in paragraph (a) of this section.

* * * * *

PART 748—APPLICATIONS (CLASSIFICATION, ADVISORY, AND LICENSE) AND DOCUMENTATION

■ 23. The authority citation for 15 CFR part 748 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Notice of August 4, 2022, 87 FR 48077 (August 5, 2022).

■ 24. Section 748.8 is amended by revising paragraph (z) to read as follows:

§ 748.8 Unique application and submission requirements.

* * * * *

(z) Firearms.

■ 25. Section 748.12 is amended by revising the introductory text, and paragraphs (a) through (d) to read as follows:

§ 748.12 Firearms import certificate or import permit.

License applications for certain firearms and related commodities require support documents in accordance with this section.

(a) *Requirement to obtain and submit documentation.* Unless an exception in

§ 748.9(c) applies, an import certificate or permit is required for license applications for firearms and related commodities, regardless of value, if required by the importing country. For OAS member states, this requirement is consistent with the OAS Model Regulations described in § 742.17 of the EAR. The exporter or reexporter must obtain and submit with the license application the original or a copy of the import certificate or permit before applying for an export or reexport license in situations in which an import certificate or permit is required by the importing country.

(1) *Items subject to requirement.* Firearms and related commodities are those commodities controlled under 0x5zz ECCNs.

(2) *Countries subject to requirement.* (i) OAS member countries include: Antigua and Barbuda, Argentina, Bahamas, Barbados, Belize, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Dominica, Dominican Republic, Ecuador, El Salvador, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, Trinidad and Tobago, Uruguay, Venezuela, and any member country that has acceded in accordance with Chapter III of the Charter of the Organization of American States.

(ii) All other countries that require an import certificate or permit.

(3) *Equivalent official document in place of an import certificate or permit.* For those countries that have not yet established or implemented an import certificate procedure, BIS will accept an equivalent official document (*e.g.,* import license or letter of authorization) issued by the government of the importing country as supporting documentation for the export of commodities detailed under paragraph (a)(1) of this section.

(b) *Obtaining the document.* (1) Applicants must request that the importer (*e.g.,* ultimate consignee or purchaser) obtain the import certificate, permit, or an equivalent official document from the government of the importing country, and that it be issued covering the quantities and types of firearms and related items that the applicant intends to export. Upon receipt of this document or a certified copy, the importer must provide the original or a certified copy to the license applicant.

(2) If the government of the importing country will not issue such document, the applicant must supply the information described in paragraphs (c)(1) and (c)(6) through (c)(8) of this section on company letterhead.

(c) *Content of the document.* The document must contain the following information:

(1) Applicant's name and address. The applicant may be either the exporter, supplier, or order party.

(2) Import Certificate Identifier/ Number.

(3) Name of the country issuing the certificate or unique country code.

(4) Date the document was issued, in international date format (*e.g.,* 24/12/12 for 24 December 2012, or 3/1/99 for 3 January 1999).

(5) Name of the agency issuing the certificate, address, telephone and facsimile numbers, signing officer name, and signature.

(6) Name of the importer, address, telephone and facsimile numbers, country of residence, representative's name if commercial or government body, citizenship, and signature.

(7) Name of the end user(s), if known and different from the importer, address, telephone and facsimile numbers, country of residence, representative's name if commercial (authorized distributor or reseller) or government body, citizenship, and signature. Note that BIS does not require the identification of each end user when the firearms and related commodities will be resold by a distributor or reseller if unknown at the time of export.

(8) Description of the commodities approved for import including a technical description and total quantity of firearms, parts and components, ammunition and parts.

Note 1 to paragraph (c)(8): You must furnish the consignee with a detailed technical description of each commodity to be given to the government for its use in issuing the document. For example, for shotguns, provide the type, barrel length, overall length, number of shots, the manufacturer's name, and the country of manufacture. For ammunition, provide the caliber, velocity and force, type of bullet, manufacturer's name and country of manufacture.

(9) Expiration date of the document in international date format (*e.g.,* 24/12/12) or the date the items must be imported, whichever is earlier.

(10) Name of the country of export (*i.e.,* United States).

(11) Additional information. Certain countries may require the tariff classification number, by class, under the Brussels Convention (Harmonized Tariff Code) or the specific technical description of a commodity. For example, shotguns may need to be described in barrel length, overall length, number of shots, manufacturer's name and country of manufacture. The technical description is not the Export Control Classification Number (ECCN).

(d) *Procedures for using document with license application*—(1) *Information necessary for license application.* The license application must include the same commodities as those listed on the document.

(2) *Alterations.* After the document is used to support the issuance of a license, no corrections, additions, or alterations may be made on the same document by any person. Any necessary corrections, additions, or alterations should be noted by the applicant in a separate statement on file with the applicant.

(3) *Validity period.* Documents issued by the importing country will be valid until the expiration date on the documents themselves.

Note 2 to paragraph (d)(3): Applicants for license applications for exports and reexports must submit an import certificate, permit, or comparable document with the license application. All BIS licenses for ECCNs 0A501, 0A505, 0A506, 0A507, 0A508, and 0A509 commodities will include a standard rider that requires that the applicant/exporter must have a current FC Import Certificate on file prior to export. The text of the standard rider will generally be as follows: ''A current, complete, accurate and valid Firearms Convention (FC) Import Certificate (or equivalent official document) shall be obtained, if required by the government of the importing country, from the Ultimate Consignee and maintained in the exporter's file prior to any export of the item(s) listed on this license. A copy shall be provided to the U.S. Government upon request. (Refer to § 742.17(b) of the EAR for guidance.)''

* * * * *

■ 26. Supplement no. 2 to part 748 is amended by revising paragraph (z)(1), note 1 to paragraph (z), and paragraphs (aa) and (bb) to read as follows:

Supplement No. 2 to Part 748—Unique Application and Submission Requirements

* * * * *

(z) * * *

(1) Certification. If you are submitting a license application for the export of firearms controlled by ECCNs 0A501.a or .b, 0A506, or 0A507, or shotguns with a barrel length less than 18 inches controlled in ECCNs 0A502 or 0A508 that will be temporarily in the United States, *e.g.,* for servicing and repair or for intransit shipments, you must include the following certification in Block 24:

The firearms in this license application will not be shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan,

except for any firearm model controlled by 0A501, 0A506, or 0A507 that is specified under Annex A in supplement no. 4 to part 740. I and the parties to this transaction will comply with the requirements specified in paragraphs (z)(2)(i) and (ii) of supplement no. 2 to part 748.

* * * * *

Note 1 to paragraph (z): In addition to complying with all applicable EAR requirements for the export of commodities described in paragraph (z) of this supplement, exporters and temporary importers should contact U.S. Customs and Border Protection (CBP) at the port of temporary import or export, or at the CBP website, for the proper procedures for temporarily importing or exporting firearms controlled in ECCNs 0A501.a or .b, 0A506, or 0A507 or shotguns with a barrel length less than 18 inches controlled in ECCNs 0A502 or 0A508, including regarding how to provide any data or documentation required by BIS.

* * * * *

(aa) *Exports of other firearms, certain shotguns, and related commodities.* (1) *Semi-automatic* firearms controlled under *0A506 and 0A507.* For export license applications that require prior notifications to congress of exports of semi-automatic firearms controlled under ECCNs 0A506 and 0A507 under the criteria of § 743.6, the exporter must include a copy of the signed contract or, if there is no contract, a written explanation from the applicant (including a statement of the value of the firearms controlled by ECCNs 0A506 and 0A507 to be exported). License applications for semi-automatic firearms controlled by ECCNs 0A506 and 0A507 may include other non-automatic firearms, shotguns, other 0x5zz items, or other items subject to the EAR, but the applicant must clearly identify the semi-automatic firearms controlled by ECCNs 0A506 and 0A507.

(2) *Purchase orders for certain commodities controlled under ECCNs 0A501, 0A502, 0A505, 0A506, 0A507, 0A508, and 0A509.* License applications for items controlled under ECCNs 0A501 (except 0A501.y), 0A502, 0A505 (except 0A505.c, 0A505.d, and 0A505.e), 0A506, 0A507, 0A508, or 0A509 to destinations other than Country Group A:1 require the submission of purchase documentation (*e.g.,* a purchase order, request for proposals, or other appropriate documentation) with the submission of the license application, dated within one year of submission with the license application. Upon approving a license for these items, BIS will generally limit the licensed quantity to the quantity specified on the purchase order. However, applicants may request up to a 10% variance in quantity from the purchase order amount, which will be reviewed on a case-by-case basis. Additionally, exporters may export various model types under the approved license, so long as the items remain consistent with the ECCN and ECCN item paragraph specified on the approved application.

(3) *Passport or other national identity card information.* License applications for items controlled under ECCNs 0A501 (except 0A501.y), 0A502, 0A505 (except 0A505.c, 0A505.d, and 0A505.e), 0A506, 0A507, 0A508, or 0A509 to destinations other than Country Group A:1 require the submission of passport or other national identity card information when the end user is an individual person.

(bb) ''600 Series Major Defense Equipment.'' For license applications that require prior notifications to Congress of exports of ''600 series major defense equipment'' pursuant to § 743.5, the exporter must include a copy of the signed contract (including a statement of the value of the ''600 Series Major Defense Equipment'' to be exported under the contract). (See § 743.5(d) of the EAR)

PART 750—APPLICATION PROCESSING, ISSUANCE, AND DENIAL

■ 27. The authority citation for 15 CFR part 750 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* Sec. 1503, Pub. L. 108–11, 117 Stat. 559; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13637, 78 FR 16129, 3 CFR, 2013 Comp., p. 223; Presidential Determination 2003–23, 68 FR 26459, 3 CFR, 2004 Comp., p. 320.

■ 28. Section 750.4 is amended by adding paragraph (d)(2)(v) to read as follows:

§ 750.4 Procedures for processing license applications.

* * * * *

(d) * * *

(2) * * *

(v) *The Safeguard.* The Safeguard, chaired by the Department of State, reviews license applications involving firearm and shotgun related items controlled under 0x5zz ECCNs.

* * * * *

■ 29. Section 750.7 is amended by revising paragraph (g) to read as follows:

§ 750.7 Issuance of licenses.

* * * * *

(g) *License validity period.* Licenses involving the export or reexport of items will generally have a four-year validity period, unless a different validity period has been requested and specifically approved by BIS or is otherwise specified on the license at the time that it is issued. Exceptions from the four-year validity period include: license applications for items controlled for short supply reasons, which will be limited to a one-year validity period and license applications reviewed and approved as an ''emergency'' (see § 748.4(h) of the EAR); and controlled under ECCNs 0A501, 0A502, 0A504, 0A505, 0A506, 0A507, 0A508, or 0A509, which will generally be limited to a one-year validity period. Emergency licenses will expire no later than the last day of the calendar month following the month in which the emergency license is issued. The expiration date will be clearly stated on the face of the license. If the expiration date falls on a legal holiday (Federal or State), the validity period is automatically extended to midnight of the first business day following the expiration date.

(1) *Extended validity period.* BIS will consider granting a validity period exceeding four years (or exceeding one year for applications subject to that shorter validity period) on a case-by-case basis when extenuating circumstances warrant such an extension. Requests for such extensions may be made at the time of application or after the license has been issued and it is still valid. BIS will not approve changes regarding other aspects of the license, such as the parties to the transaction and the countries of ultimate destination. An extended validity period will generally be granted where, for example, the transaction is related to a multi-year project; when the period corresponds to the duration of a manufacturing license agreement, technical assistance agreement, warehouse and distribution agreement, or license issued under the International Traffic in Arms Regulations; when production lead time will not permit an export or reexport during the original validity period of the license; when an unforeseen emergency prevents shipment within the 4-year validity of the license; or for other similar circumstances.

(2) *Request for extension.* (i) The applicant must submit a letter in writing to request an extension in the validity period of a previously approved license. The subject of the letter must be titled: ''Request for Validity Period Extension'' and contain the following information:

(A) The name, address, and telephone number of the requestor;

(B) A copy of the original license, with the license number, validation

date, and current expiration date legible; and

(C) Justification for the extension;

(ii) It is the responsibility of the applicant to ensure that all applicable support documents remain valid and are in the possession of the applicant. If the request for extension is approved, BIS will provide the applicant with a written response.

* * * * *

PART 758—EXPORT CLEARANCE REQUIREMENTS AND AUTHORITIES

■ 30. The authority citation for 15 CFR part 758 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 31. Section 758.1 is amended by revising paragraphs (b)(9), (c)(1), and (g)(4) to read as follows:

§ 758.1 The Electronic Export Information (EEI) filing to the Automated Export System (AES).

* * * * *

(b) * * *

(9) For all exports, except for exports authorized under License Exception BAG, as set forth in § 740.14 of the EAR, of commodities controlled under ECCNs 0A501.a or .b, 0A506, or 0A507, shotguns with a barrel length less than 18 inches controlled under ECCNs 0A502 or 0A508, or ammunition controlled under ECCN 0A505 except for .c, regardless of value or destination, including exports to Australia, Canada, and the United Kingdom.

* * * * *

(c) * * *

(1) License Exception Baggage (BAG), as set forth in § 740.14 of the EAR. See 15 CFR 30.37(x) of the FTR;

Note 1 to paragraph (c)(1): See the export clearance requirements for exports of firearms controlled under ECCNs 0A501.a or .b, 0A506, or 0A507, shotguns with a barrel length less than 18 inches controlled under ECCNs 0A502 or 0A508, or ammunition controlled under ECCN 0A505, authorized under License Exception BAG, as set forth in § 740.14 of the EAR.

* * * * *

(g) * * *

(4) *Exports of firearms and related items.* This paragraph (g)(4) includes two separate requirements under paragraphs (g)(4)(i) and (ii) of this section that are used to better identify exports of certain firearms under the EAR. Paragraph (g)(4)(i) of this section is limited to certain EAR authorizations. Paragraph (g)(4)(ii) of this section applies to all EAR authorizations that require EEI filing in AES.

(i) *Identifying firearms by manufacturer, model, caliber, and serial number in the EEI filing in AES.* For any export authorized under License Exception TMP or a BIS license authorizing a temporary export of items controlled under ECCNs 0A501.a or .b, 0A506, or 0A507 or shotguns with a barrel length less than 18 inches controlled under ECCNs 0A502 or 0A508, in addition to any other required data for the associated EEI filing, you must report the manufacturer, model, caliber, and serial number of the exported items. The requirements of this paragraph (g)(4)(i) also apply to any other export authorized under a BIS license that includes a condition or proviso on the license requiring the submission of this information specified in paragraph (g) of this section when the EEI is filed in AES.

(ii) *Identifying firearms and certain ''parts,'' ''components,'' devices, ''accessories,'' and ''attachments'' by ''items'' level classification or other control descriptor in the EEI filing in AES.* For any export of items controlled under ECCNs 0A501.a or .b, 0A506, 0A507, shotguns with a barrel length less than 18 inches controlled under ECCNs 0A502 or 0A508.a.1, or .a.2, or ''parts,'' ''components,'' devices, ''accessories,'' or ''attachments'' controlled under 0A509.a, .b, .c, or .d, in addition to any other required data for the associated EEI filing, the exporter must include the items paragraph classification or other control descriptor as specified in paragraphs (g)(4)(ii)(A) through (F) for ECCNs 0A501, 0A502, 0A506, 0A507, 0A508, or 0A509, as applicable, as the first text to appear in the Commodity description block in the EEI filing in AES. (*See* § 743.4 of the EAR for the use of this information for ECCNs 0A501.a or .b, 0A506.a or .b, and 0A507.a, or .b for conventional arms reporting).

(A) If exporting firearms controlled under 0A501, enter .a or .b, as applicable;

(B) If exporting shotguns with a barrel length less than 18 inches controlled under 0A502, enter .SB;

(C) If exporting semi-automatic rifles controlled under 0A506, enter .a or .b, as applicable;

(D) If exporting semi-automatic pistols controlled under 0A507, enter .a or .b, as applicable;

(E) If exporting semi-automatic shotguns controlled under 0A508, enter .a or .b, as applicable; *or*

(F) If exporting ''parts,'' ''components,'' devices, ''accessories,'' or ''attachments'' controlled under ECCN 0A509, enter .a, .b, .c, .d, or .e, as applicable.

Note 2 to paragraph (g)(4): If a commodity described in paragraph (g)(4) of this section is exported under License Exception TMP under § 740.9(a)(6) of the EAR for inspection, test, calibration, or repair is not consumed or destroyed in the normal course of authorized temporary use abroad, the commodity must be disposed of or retained in one of the ways specified in § 740.9(a)(14)(i), (ii), or (iii) of the EAR. For example, if a commodity described in this paragraph (g)(4) was destroyed while being repaired after being exported under § 740.9(a)(6), the commodity described in this paragraph (g)(4) would not be required to be returned. If the entity doing the repair returned a replacement of the commodity to the exporter from the United States, the import would not require an EAR authorization. The entity that exported the commodity described in this paragraph (g)(4) and the entity that received the commodity would need to document this as part of their recordkeeping related to this export and subsequent import to the United States.

* * * * *

■ 32. Section 758.10 is amended by revising paragraphs (a) and notes 1 and 2 to paragraph (b)(1) to read as follows:

§ 758.10 Entry clearance requirements for temporary imports.

(a) *Scope.* This section specifies the temporary import entry clearance requirements for firearms ''subject to the EAR'' that are on the United States Munitions Import List (USMIL, 27 CFR 447.21), except for firearms ''subject to the EAR'' that are temporarily brought into the United States by nonimmigrant aliens under the provisions of Department of Justice regulations at 27 CFR part 478 (*See* § 740.14(e) of the EAR for information on the export of these firearms ''subject to the EAR''). These firearms are controlled in ECCNs 0A501.a or .b, 0A506 or 0A507, or shotguns with a barrel length less than 18 inches controlled in ECCNs 0A502 or 0A508. Items that are temporarily exported under the EAR must have met the export clearance requirements specified in § 758.1.

(1) An authorization under the EAR is *not* required for the temporary import of ''items'' that are ''subject to the EAR,'' including for ''items'' ''subject to the EAR'' that are on the USMIL. Temporary imports of firearms described in this section must meet the entry clearance requirements specified in paragraph (b) of this section.

(2) Permanent imports are regulated by the Attorney General under the direction of the Department of Justice's Bureau of Alcohol, Tobacco, Firearms and Explosives (see 28 CFR 0.130; 27 CFR parts 447, 478, 479, and 555).

(b) * * *

(1) * * *

Note 1 to paragraph (b)(1): In accordance with the exclusions in License Exception

TMP under § 740.9(b)(5) of the EAR, the entry clearance requirements in § 758.1(b)(9) do not permit the temporary import of: Firearms controlled in ECCN 0A501.a or .b, 0A506 or 0A507 that are shipped from or manufactured in a Country Group D:5 country; or that are shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan (except for any firearm model controlled by 0A501.a or .b, 0A506, or 0A507 that is specified under annex A in supplement no. 4 to part 740 of the EAR); or shotguns with a barrel length less than 18 inches controlled in ECCNs 0A502 or 0A508 that are shipped from or manufactured in a Country Group D:5 country, or from Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan, because of the exclusions in License Exception TMP under § 740.9(b)(5).

Note 2 to paragraph (b)(1): In accordance with the exclusions in License Exception RPL under § 740.10(b)(4) and supplement no. 2 to part 748, paragraph (z), of the EAR, the entry clearance requirements in § 758.1(b)(9) do not permit the temporary import of: Firearms controlled in ECCN 0A501.a or .b, 0A506, or 0A507 that are shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan (except for any firearm model controlled by 0A501.a or .b, 0A506, or 0A507 that is specified under Annex A in Supplement No. 4 to part 740 of the EAR); or shotguns with a barrel length less than 18 inches controlled in ECCNs 0A502 or 0A508 that are shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan, because of the exclusions in License Exception RPL under § 740.10(b)(4) and supplement no. 2 to part 748, paragraph (z), of the EAR.

* * * * *

■ 33. Section 758.11 is amended by revising paragraphs (a) and (b)(2) to read as follows:

§ 758.11 Export clearance requirements for firearms and related items.

(a) *Scope.* The export clearance requirements of this section apply to all exports of commodities controlled under ECCNs 0A501.a or .b, 0A506, or 0A507, or shotguns with a barrel length less than 18 inches controlled under ECCNs 0A502 or 0A508, or ammunition controlled under ECCN 0A505 except for .c, regardless of value or destination, including exports to Australia, Canada, and the United Kingdom, that are authorized under License Exception BAG, as set forth in § 740.14 of the EAR.

(b) * * *

(2) Required ''description of articles'' for firearms to be included on the CBP Form 4457. For all exports of firearms controlled under ECCNs 0A501.a or .b, 0A506, or 0A507, or shotguns with a barrel length less than 18 inches controlled under ECCNs 0A502 or 0A508, the exporter must provide to CBP the serial number, make, model, and caliber for each firearm being exported by entering this information under the ''Description of Articles'' field of the CBP Form 4457, Certificate of Registration for Personal Effects Taken Abroad.

* * * * *

PART 762—RECORDKEEPING

■ 34. The authority citation for 15 CFR part 762 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 35. Section 762.2 is amended by revising paragraph (a)(11) to read as follows:

§ 762.2 Records to be retained.

(a) * * *

(11) The serial number, make, model, and caliber for any firearm controlled in ECCNs 0A501.a, 0A506, or 0A507 and for shotguns with barrel length less than 18 inches controlled in 0A502 and 0A508 that have been exported. The ''exporter'' or any other party to the transaction (see § 758.3 of the EAR), that creates or receives such records is a person responsible for retaining this record; and

* * * * *

■ 36. Section 762.3 is amended by revising paragraph (a)(5) to read as follows:

§ 762.3 Records exempt from recordkeeping requirements.

(a) * * *

(5) Warranty certificate, except for a warranty certificate issued for an address located outside the United States for any firearm controlled in ECCNs 0A501.a or .b, 0A506 or 0A507 and for shotguns with barrel length less than 18 inches controlled in 0A502 or 0A508;

* * * * *

PART 772—DEFINITIONS OF TERMS

■ 37. The authority citation for 15 CFR part 772 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 38. Section 772.1 is amended by adding a definition in alphabetical order for ''CARICOM,'' to read as follows:

§ 772.1 Definitions of terms as used in the Export Administration Regulations (EAR).

* * * * *

CARICOM (Caribbean Community). For purposes of §§ 740.3 and 740.14 of the EAR, the term CARICOM is defined as follows: An intergovernmental organization that consists of the following (1) member states Antigua and Barbuda, Bahamas, Barbados, Belize, Dominica, Grenada, Guyana, Haiti, Jamaica, Montserrat, St. Lucia, Suriname, St. Kitts and Nevis, St. Vincent and the Grenadines, and Trinidad and Tobago; (2) associate members Anguilla, Bermuda, British Virgin Islands, Cayman Islands, and Turks and Caicos; and (3) any other state or associate member that has acceded to membership in accordance with Article 3 or Article 231 of the Treaty of Chaguaramas.

Note to definition of CARICOM: Anguilla, Bermuda, British Virgin Islands, Cayman Islands, Montserrat, and Turks and Caicos are treated as the United Kingdom under all other EAR provisions that govern licensing requirements and license exceptions.

* * * * *

PART 774—THE COMMERCE CONTROL LIST

■ 39. The authority citation for 15 CFR part 774 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 10 U.S.C. 8720; 10 U.S.C. 8730(e); 22 U.S.C. 287c, 22 U.S.C. 3201 *et seq.;* 22 U.S.C. 6004; 42 U.S.C. 2139a; 15 U.S.C. 1824; 50 U.S.C. 4305; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 40. Supplement no. 1 to part 774 is amended by:

■ a. In Category 0:

■ i. Revising ECCNs 0A501, 0A502, 0A504, and 0A505;

■ ii. Adding ECCNs 0A506, 0A507, 0A508, and 0A509; and

■ iii. Revising ECCNs 0B501, 0D501, 0E501, 0E502, 0E504 and 0E505; and

■ b. In Category 2, by revising ECCN 2B018.

The revisions and additions read as follows:

Supplement No. 1 to Part 774

Category 0—Nuclear Materials, Facilities, and Equipment [and Miscellaneous Items]

A. ''**End Items,**'' ''**Equipment,**'' ''**Accessories,**'' ''**Attachments,**'' ''**Parts,**'' ''**Components,**'' **and** ''**Systems**''

* * * * *

0A501 Firearms (except 0A502 shotguns, 0A506 semi-automatic rifles, 0A507 semi-automatic pistols, and 0A508 semi-automatic shotguns) and related commodities (except semi-automatic related commodities enumerated or otherwise described in ECCN 0A509 for

ECCNs 0A506, 0A507, or 0A508) as follows (see List of Items controlled).

License Requirements

Reason for Control: NS, RS, FC, CC, UN, AT

Control(s)	Country chart (see Supp. No. 1 to part 738)
NS applies to entire entry except 0A501.y.	NS Column 1
RS applies to entire entry except 0A501.y.	RS Column 1
FC applies to entire entry except 0A501.y.	FC Column 1
CC applies to entire entry except 0A501.y.	CC Column 2
UN applies to entire entry.	See § 746.1 of the EAR for UN controls
AT applies to entire entry.	AT Column 1

License Requirement Note: In addition to using the Commerce Country Chart to determine license requirements, a license is required for exports and reexports of ECCN 0A501.y.7 firearms to the People's Republic of China.

List Based License Exceptions (See Part 740 for a Description of All License Exceptions)

LVS: $500 for 0A501.c, .d, and .x.
$500 for 0A501.c, .d, .e, and .x if the ultimate destination is Canada.
GBS: N/A

Special Conditions for STA

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in this entry.

List of Items Controlled

Related Controls: (1) See USML Category I for firearms that are fully automatic, and certain related parts, components, accessories, and attachments (including magazines with a capacity of greater than 50 rounds). (2) See ECCN 0A506 for semi-automatic rifles. (3) See ECCN 0A507 for semi-automatic pistols. (4) See ECCN 0A508 for semi-automatic shotguns and ECCN 0A502 for certain ''parts'' and ''components'' for semi-automatic shotguns that are not controlled by 0A509.a or .c. (5) See ECCN 0A509 for enumerated or otherwise described ''parts,'' ''components,'' devices, ''accessories,'' and ''attachments'' for ECCNs 0A506, 0A507, and 0A508. (6) See .d, .x, and .y of this entry for other ''parts,'' ''components,'' ''accessories,'' and ''attachments'' ''specially designed'' for 0A506 and 0A507, or 0A508. (7) See ECCN 0A502 for non-automatic shotguns and their ''parts'' and ''components'' that are subject to the EAR and for certain ''parts'' and ''components'' for semi-automatic shotguns that are not controlled by 0A509.a or .c. (8) See ECCN 0A504 and USML Category XII for controls on optical sighting devices.
Related Definitions: N/A
Items:

a. Non-automatic and non-semi-automatic firearms equal to .50 caliber (12.7 mm) or less.

Note 1 to paragraph 0A501.a: *'Combination pistols' are controlled under ECCN 0A501.a. A 'combination pistol' (a.k.a., a combination gun) has at least one rifled barrel and at least one smoothbore barrel (generally a shotgun style barrel).*

Note 2 to paragraph 0A501.a: *Semi-automatic firearms* equal to .50 caliber (12.7 mm) or less *are controlled under ECCNs 0A506 and 0A507.*

Technical Note to 0A501.a: *Firearms described in 0A501.a include those chambered for the .50 BMG cartridge.*

b. Non-automatic and non-semi-automatic rifles, carbines, revolvers or pistols with a caliber greater than .50 inches (12.7 mm) but less than or equal to .72 inches (18.0 mm).

c. The following types of ''parts'' and ''components'' if ''specially designed'' for a commodity controlled by paragraph .a or .b of this entry or ECCNs 0A506 or 0A507, or USML Category I (unless otherwise enumerated or elsewhere specified on the USML or controlled under ECCN 0A509): Barrels, cylinders, barrel extensions, mounting blocks (trunnions), bolts, bolt carriers, operating rods, gas pistons, trigger housings, triggers, hammers/striker, sears, disconnectors, pistol grips that contain fire control ''parts'' or ''components'' (*e.g.,* triggers, hammers/striker, sears, disconnectors) and buttstocks that contain fire control ''parts'' or ''components.''

Technical Note to 0A501.c: *Barrel blanks that have reached a stage in manufacturing in which they are either chambered or rifled are controlled by 0A501.c.*

d. Detachable magazines with a capacity of 17 to 50 rounds ''specially designed'' for a commodity controlled by paragraph .a or .b of this entry or controlled by ECCNs 0A506 or 0A507.

Note 3 to paragraph 0A501.d: *Magazines with a capacity of 16 rounds or less are controlled under 0A501.x; for magazines with a capacity greater than 50 rounds, see USML Category I.*

e. Receivers (frames) and ''complete breech mechanisms,'' including castings, forgings, stampings, or machined items thereof, ''specially designed'' for a commodity controlled by paragraph .a or .b of this entry.

Note 4 to 0A501.e: *Frames (receivers) under 0A501.e refers to any ''part'' or ''component'' of the firearm that has or is customarily marked with a serial number when required by law. This paragraph 0A501.e is synonymous with a ''part'' or ''component'' that is regulated by the Bureau of Alcohol, Tobacco, Firearms and Explosives (see 18 U.S.C. 921(a)(3); 27 CFR parts 447, 478, and 479,) as a firearm.*

Note 5 to 0A501.e: *Frames (receivers) ''specially designed'' for semi-automatic firearms are controlled under ECCN 0A509.b or .c.*

f. through w. [Reserved]

x. ''Parts'' and ''components'' that are ''specially designed'' for a commodity classified under paragraphs .a through .c of this entry, a commodity classified under ECCNs 0A506 or 0A507, or the USML and not elsewhere specified on the USML or CCL or controlled under ECCN 0A509.

y. Specific ''parts,'' ''components,'' ''accessories'' and ''attachments'' ''specially designed'' for a commodity subject to control in this ECCN, ECCNs 0A506, 0A507, or common to a defense article in USML Category I and not elsewhere specified in the USML or CCL as follows, and ''parts,'' ''components,'' ''accessories,'' and ''attachments'' ''specially designed'' therefor.

y.1. Stocks (including adjustable, collapsible, blades and braces), grips, handguards, or forends, that do not contain any fire control ''parts'' or ''components'' (*e.g.,* triggers, hammers/striker, sears, disconnectors);

y.2 to y.5. [Reserved]

y.6. Bayonets; and

y.7. Firearms manufactured from 1890 to 1898 and reproductions thereof.

Technical Note 1 to 0A501: *ECCN 0A501 includes ''parts'' and ''components'' that are not ''subject to the ITAR'' even though they are common to firearms described in ECCN 0A501 and to those firearms ''subject to the ITAR.''*

Technical Note 2 to 0A501: *A receiver with any other controlled ''part'' or ''component'' (e.g., a barrel (0A501.c), or trigger guard (0A501.x), or stock (0A501.y.1)) is still controlled under 0A501.e.*

Note 6 to 0A501: *Antique firearms i.e., those manufactured before 1890) and reproductions thereof, muzzle loading and black powder firearms except those designs based on centerfire weapons of a post 1937 design, BB guns, pellet rifles, paint ball, and all other air rifles are EAR99 commodities.*

Note 7 to 0A501: *Muzzle loading and black powder firearms with a caliber less than 20 mm that were manufactured post 1937 that are used for hunting or sporting purposes that were not ''specially designed'' for military use and are not described on the USML nor controlled as shotguns under ECCN 0A502 are EAR99 commodities.*

Note 8 to 0A501: *Scope mounts or accessory rails, iron sights, sling swivels, and butt plates or recoil pads that are subject to the EAR are designated as EAR99. These commodities have been determined to no longer warrant being ''specially designed'' for purposes of ECCN 0A501.*

Note 9 to 0A501: *A kit, including a replacement or repair kit, of firearms ''parts'' or ''components'' customarily sold and exported together takes on the classification of the most restrictive ''part'' or ''component'' that is included in the kit. For example, a kit containing 0A501.y and .x ''parts,'' is controlled as a 0A501.x kit because the .x ''part'' is the most restrictive ''part'' included in the kit. A complete 0A501 firearm disassembled in a kit form is controlled as a firearm under 0A501.a, .b, or .y.7.*

0A502 Shotguns; shotguns ''parts'' and ''components,'' consisting of complete trigger mechanisms; magazines and magazine extension tubes; ''complete breech mechanisms;'' except: semi-

automatic shotguns controlled under ECCN 0A508; certain ''parts,'' components,'' devices, ''accessories,'' and ''attachments'' for semi-automatic shotguns controlled under ECCN 0A509; equipment used to slaughter domestic animals or used exclusively to treat or tranquilize animals; and arms designed solely for signal, flare, or saluting use.

License Requirements

Reason for Control: RS, FC, CC, UN, AT, NS

Control(s)	Country chart (see Supp. No. 1 to part 738)

RS applies to shotguns with a barrel length less than 18 inches (45.72 cm).	RS Column 1
FC applies to entire entry.	FC Column 1
CC applies to entire entry.	CC Column 2
UN applies to entire entry.	See § 746.1(b) of the EAR for UN controls
AT applies to shotguns with a barrel length less than 18 inches (45.72 cm).	AT Column 1

List Based License Exceptions (See Part 740 for a Description of All License Exceptions)

LVS: $500 for 0A502 shotgun ''parts'' and ''components,'' consisting of complete trigger mechanisms; magazines and magazine extension tubes. $500 for 0A502 shotgun ''parts'' and ''components,'' consisting of complete trigger mechanisms; magazines and magazine extension tubes, ''complete breech mechanisms'' if the ultimate destination is Canada.

GBS: N/A

List of Items Controlled

Related Controls: (1) See USML Category I for shotguns that are fully automatic. (2) See ECCN 0A508 for semi-automatic shotguns. (3) See ECCN 0A509 for enumerated or otherwise described ''parts,'' ''components,'' devices, ''accessories,'' and ''attachments'' for ECCN 0A508. (4) See 0A501.d, .x, and .y for other ''parts,'' ''components,'' ''accessories,'' and ''attachments'' ''specially designed'' for 0A508. (5) See ECCNs 0A501 for non-semi-automatic firearms, 0A506 for semi-automatic rifles, and 0A507 for semi-automatic pistols.

Related Definitions: N/A

Items: The list of items controlled is contained in the ECCN heading.

Note 1 to 0A502: *Shotguns made in or before 1898 are considered antique shotguns and designated as EAR99.*

Technical Note: *Non-automatic and non-semi-automatic shot pistols or shotguns that have had the shoulder stock removed and a pistol grip attached are controlled by ECCN 0A502. Non-automatic and non-semi-automatic slug guns are also controlled under ECCN 0A502.*

* * * * *

0A504 Optical sighting devices for firearms (including shotguns controlled by 0A502); and ''components'' as follows (see List of Items Controlled).

License Requirements

Reason for Control: FC, RS, CC, UN

Control(s)	Country chart (see Supp. No. 1 to part 738)
RS applies to paragraph .i.	RS Column 1
FC applies to paragraphs .a, .b, .c, .d, .e, .g, and .i of this entry.	FC Column 1
CC applies to entire entry.	CC Column 2
UN applies to entire entry.	See § 746.1(b) of the EAR for UN controls

List Based License Exceptions (See Part 740 for a Description of All License Exceptions)

LVS: $500 for 0A504.g.

GBS: N/A

List of Items Controlled

Related Controls: (1) See USML Category XII(c) for sighting devices using second generation image intensifier tubes having luminous sensitivity greater than 350 μA/lm, or third generation or higher image intensifier tubes, that are ''subject to the ITAR.'' (2) See USML Category XII(b) for laser aiming or laser illumination systems ''subject to the ITAR.'' (3) Section 744.9 of the EAR imposes a license requirement on certain commodities described in 0A504 if being exported, reexported, or transferred (in-country) for use by a military end user or for incorporation into an item controlled by ECCN 0A919.

Related Definitions: N/A

Items:

a. Telescopic sights.

b. Holographic sights.

c. Reflex or ''red dot'' sights.

d. Reticle sights.

e. Other sighting devices that contain optical elements.

f. Laser aiming devices or laser illuminators ''specially designed'' for use on firearms, and having an operational wavelength exceeding 400 nm but not exceeding 710 nm.

Note 1 to 0A504.f: *0A504.f does not control laser boresighting devices that must be placed in the bore or chamber to provide a reference for aligning the firearms sights.*

g. Lenses, other optical elements and adjustment mechanisms for articles in paragraphs .a, .b, .c, .d, .e, or .i.

h. [Reserved]

i. Riflescopes that were not ''subject to the EAR'' as of March 8, 2020 and are ''specially designed'' for use in firearms that are ''subject to the ITAR.''

Note 2 to paragraph i: *For purpose of the application of ''specially designed'' for the riflescopes controlled under 0A504.i, paragraph (a)(1) of the definition of ''specially designed'' in § 772.1 of the EAR is what is used to determine whether the riflescope is ''specially designed.''*

0A505 Ammunition as follows (see List of Items Controlled).

License Requirements

Reason for Control: NS, RS, FC, CC, UN, AT

Control(s)	Country chart (see Supp. No. 1 to part 738)
NS applies to 0A505.a and .x.	NS Column 1
RS applies to 0A505.a and .x.	RS Column 1
FC applies to entire entry except 0A505.d.	FC Column 1
CC applies to 0A505.a, .b, and .x.	CC Column 2
UN applies to entire entry.	See § 746.1 of the EAR for UN controls
AT applies to 0A505.a, .d, and .x.	AT Column 1
AT applies to 0A505.c.	A license is required for items controlled by paragraph .c of this entry to North Korea for anti-terrorism reasons. The Commerce Country Chart is not designed to determine AT licensing requirements for this entry. See § 742.19 of the EAR for additional information.

List Based License Exceptions (See Part 740 for a Description of All License Exceptions)

LVS: $500 for items in 0A505.x, except $3,000 for items in 0A505.x that, immediately prior to March 9, 2020, were classified under 0A018.b. (*i.e.,* ''Specially designed'' components and parts for ammunition, except cartridge cases, powder bags, bullets, jackets, cores, shells, projectiles, boosters, fuses and components, primers, and other detonating devices and ammunition belting and linking machines (all of which are ''subject to the ITAR''). (See 22 CFR parts 120 through 130))

GBS: N/A

Special Conditions for STA

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 0A505.

List of Items Controlled

Related Controls: (1) See USML Category III for ammunition for modern heavy weapons such as howitzers, artillery, cannon, mortars and recoilless rifles as well as inherently military ammunition types such as ammunition preassembled into links or belts, caseless ammunition, tracer ammunition, ammunition with a depleted uranium projectile or a projectile with a hardened tip or core and ammunition with

an explosive projectile. (2) Percussion caps, and lead balls and bullets, for use with muzzle-loading firearms are EAR99 items. (3) See USML Category III for shotgun projectiles that are flechettes, incendiary, tracer, or explosive.

Related Definitions: 'Marking rounds' are non-lethal, typically used for training purposes, and contain a dye or paint in a capsule that is not a chemical irritant.

Items:

a. Ammunition for firearms controlled by ECCNs 0A501, 0A506, or 0A507 or USML Category I and not enumerated in paragraph .b, .c, or .d of this entry or described in USML Category III.

b. Buckshot (No. 4 .24″ diameter and larger, any material) shotgun shells and shotgun shells that contain only buckshot, or are for the dispersion of chemical irritants.

c. Shotgun shells (including less than lethal rounds) that do not contain buckshot; and ''specially designed'' ''parts'' and ''components'' of shotgun shells.

d. Blank ammunition for firearms controlled by ECCNs 0A501, 0A502, 0A506, 0A507, or 0A508 and not described in USML Category III.

Technical Note to 0A505.d: *Includes 'marking rounds' that have paint/dye as the projectile.*

e. through w. [Reserved]

x. ''Parts'' and ''components'' that are ''specially designed'' for a commodity subject to control in this ECCN or a defense article in USML Category III and not elsewhere specified on the USML or the CCL.

Note 1 to 0A505.x: *The controls on ''parts'' and ''components'' in this entry include Berdan and boxer primers, metallic cartridge cases, and standard metallic projectiles such as full metal jacket, lead core, copper projectiles, and frangible projectiles.*

Note 2 to 0A505: *Metal shot smaller than No. 4 Buckshot, empty and unprimed shotgun shells, shotgun wads, smokeless gunpowder, 'dummy rounds' and 'drill rounds' (unless linked or belted), not incorporating a lethal or non-lethal projectile(s) are designated EAR99. A 'dummy round' or 'drill round' is a round that is completely inert, (i.e., contains no primer, propellant, or explosive charge). It is typically used to check weapon function and for crew training.*

Note 3 to 0A505: *Shotgun shells that contain two or more balls/shot larger than .24-inch are controlled under 0A505.b.*

0A506 Semi-Automatic Rifles as follows (see List of Items Controlled).

Fisheries of the Exclusive Economic Zone off Alaska; Cook Inlet Salmon; Amendment 16; Final Rule

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR 902

50 CFR Parts 600 and 679

[Docket No.: 240417–0111]

RIN 0648–BM42

Fisheries of the Exclusive Economic Zone off Alaska; Cook Inlet Salmon; Amendment 16

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this final rule to implement amendment 16 to the Fishery Management Plan (FMP) for the Salmon Fisheries in the Exclusive Economic Zone (EEZ) Off Alaska (Salmon FMP). Amendment 16 and this final rule establish Federal fishery management for all salmon fishing that occurs in the Cook Inlet EEZ, which includes commercial drift gillnet and recreational salmon fishery sectors. This action is necessary to comply with rulings from the U.S. Court of Appeals for the Ninth Circuit and the U.S. District Court for the District of Alaska, and to ensure the Salmon FMP is consistent with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). This final rule is intended to promote the goals and objectives of the Magnuson-Stevens Act, the Salmon FMP, and other applicable laws.

DATES: This rule is effective on May 30, 2024.

ADDRESSES: Electronic copies of amendment 16; the Environmental Assessment, the Regulatory Impact Review, and the Social Impact Analysis (contained in a single document and collectively referred to as the ''Analysis''); the Finding of No Significant Impact; and the public comment announcement and tribal consultation and meeting summaries prepared for this action may be obtained from *http://www.regulations.gov* or from the NMFS Alaska Region website at *https://www.fisheries.noaa.gov/action/amendment-16-fmp-salmon-fisheries-alaska.*

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this final rule may be submitted to NMFS Alaska Region, P.O. Box 21668, Juneau, AK 99802–1668, Attn: Gretchen Harrington; in person at NMFS Alaska Region, 709 West 9th Street, Room 401, Juneau, AK; and to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments''; or by using the search function.

FOR FURTHER INFORMATION CONTACT: Doug Duncan, 907–586–7228 or *doug.duncan@noaa.gov.*

SUPPLEMENTARY INFORMATION: This final rule implements amendment 16 to the Salmon FMP. NMFS published the proposed rule and Notice of Availability (NOA) for amendment 16 in the **Federal Register** on October 19, 2023 (88 FR 72314), with public comments invited through December 18, 2023. Comments submitted on the NOA and the proposed rule for amendment 16 were considered jointly. The Secretary of Commerce approved amendment 16 on April 9, 2024, after considering public comment and determining that amendment 16 is consistent with the Salmon FMP, the Magnuson-Stevens Act, and other applicable laws.

NMFS manages U.S. salmon fisheries in the EEZ off of Alaska under the Salmon FMP. The North Pacific Fishery Management Council (Council) prepared, and the Secretary of Commerce (Secretary) approved, the Salmon FMP under the authority of the Magnuson-Stevens Act, 16 U.S.C. 1801 *et seq.* Regulations implementing the Salmon FMP are located at 50 CFR part 679. General regulations governing U.S. fisheries also appear at 50 CFR part 600. NMFS is authorized to prepare an FMP amendment necessary for the conservation and management of a fishery managed under the FMP if the Council fails to develop and submit such an amendment after a reasonable period of time (section 304(c)(1)(A); 16 U.S.C. 1854(c)(1)(A)). Because the Council failed to take action to recommend an FMP necessary for the conservation and management of the Cook Inlet EEZ salmon fishery, NMFS developed amendment 16 to the Salmon FMP and this final rule pursuant to section 304(c) of the Magnuson-Stevens Act in order to comply with rulings from the U.S. Court of Appeals for the Ninth Circuit and the U.S. District Court for the District of Alaska, and to ensure the Salmon FMP is consistent with the Magnuson-Stevens Act.

Amendment 16 Overview

Amendment 16 incorporates the Cook Inlet EEZ into the Salmon FMP as the Cook Inlet EEZ Area (defined as the EEZ waters of Cook Inlet north of a line at 59°46.15′ N), thereby bringing the salmon fishery that occurs within it under Federal management by the Council and NMFS.

Two different sectors participate in the Cook Inlet EEZ Area salmon fishery: the commercial drift gillnet sector and the recreational sector. Historically, the commercial drift gillnet fleet has harvested over 99.99 percent of salmon in the Cook Inlet EEZ Area. Under this action, all salmon fishing in the Cook Inlet EEZ Area is managed by NMFS and the Council separately from adjacent State of Alaska (State) water salmon fisheries.

Amendment 16 revises the Salmon FMP, beginning with an updated history of the FMP and introduction in chapter 1, as well as a revised description of the fishery management unit in chapter 2 that includes the Cook Inlet EEZ Area as a separate and distinctly managed area. The management and policy objectives in chapter 2 are revised to include consideration of the Cook Inlet EEZ Area. Amendment 16 consolidates chapters describing management of the Salmon FMP's East Area and West Area into chapter 3. No substantive changes are made to Salmon FMP content related to the East Area and West Area.

A new chapter 4 comprehensively describes Federal management measures and the roles and responsibilities of NMFS and the Council in managing the Cook Inlet EEZ Area salmon fishery. In particular, chapter 4 defines all required conservation and management measures, including maximum sustainable yield (MSY), optimum yield (OY), and status determination criteria, and includes an outline of the harvest specifications process. Chapter 4 also describes required Federal permits; fishing gear restrictions; fishing time and area restrictions; NMFS inseason management provisions; and monitoring, recordkeeping, and reporting requirements.

Chapter 5 contains all content related to domestic annual harvesting and processing capacity, finding that all salmon fisheries off Alaska can be fully utilized by U.S. harvesters and processors. This finding is unchanged by this action.

Chapter 6 contains information on Essential Fish Habitat and Habitat Areas of Particular Concern and is not modified by this action. Amendment 16 removes the outdated Fishery Impact Statement in the Salmon FMP. The Analysis prepared for amendment 16 contains the Fishery Impact Statement for the Cook Inlet EEZ salmon fishery and this action.

Maximum Sustainable Yield and Optimum Yield

Under amendment 16, MSY and OY are specified consistent with the National Standard guidelines and are briefly described below. The definitions of MSY and OY are explained in greater detail in the preamble to the proposed rule and remain unchanged in this final rule.

MSY is specified for salmon stocks and stock complexes in Cook Inlet and defined as the maximum potential yield, which is calculated by subtracting the lower bound of the escapement goal (or another escapement value as recommended by the Council's Scientific and Statistical Committee (SSC) based on the best scientific information available) from the total run size for stocks where data are available. An escapement goal is the number of spawning salmon likely to result in sustainable yields over a broad range of expected conditions. Any fish in excess of that necessary to achieve the escapement goal for each stock or stock complex are theoretically available for harvest under this definition of MSY. For stocks where escapement is not known, historical catch is used as a proxy for MSY.

Amendment 16 defines the OY range for the Cook Inlet EEZ salmon fishery in the Salmon FMP as the range between the averages of the three lowest years of total estimated EEZ salmon harvest and the three highest years of total estimated EEZ salmon harvest from 1999 to 2021. This definition of OY tempers the influence of extreme events in defining OY (*e.g.,* fishery disasters at the low end, or extremely large harvests at the high end), thereby resulting in a range of harvests that are likely to be sustainable and provide the greatest net benefit to the Nation into the future.

Status Determination Criteria and Annual Catch Limits

Amendment 16 specifies objective and measurable criteria for determining when a stock or stock complex is subject to overfishing or is overfished. These are referred to as status determination criteria and are established during the harvest specification process and evaluated each year after fishing is complete.

Amendment 16 establishes a tier system to assess salmon stocks based on the amount of available information for each stock. NMFS annually assigns each salmon stock to a tier based on the best available scientific information during the harvest specifications process as follows:

- Tier 1: salmon stocks with escapement goals and stock-specific estimates of harvests
- Tier 2: salmon stocks managed as a complex, with specific salmon stocks as indicator stocks
- Tier 3: salmon stocks or stock complexes with no reliable estimates of escapement

For stocks and stock complexes where escapement is known (Tier 1), or escapement of indicator stocks is thought to be a reliable index for the number of spawners in a stock complex (Tier 2), overfishing is defined as occurring when the fishing mortality rate in the Cook Inlet EEZ Area (F_{EEZ}) exceeds the maximum fishery mortality threshold (MFMT). The MFMT is defined as the maximum potential fishing mortality rate in the EEZ above which overfishing occurs for Tier 1 and 2 stocks, expressed as an exploitation rate that is assessed over one generation.

For Tier 1 and Tier 2 stocks, the Salmon FMP defines the overfishing limit (OFL) as the amount of salmon harvest in the EEZ for the coming year that corresponds with the spawning escapement target not being achieved, based on information available preseason. Acceptable biological catch (ABC) is established based on the OFL. As an ABC control rule, ABC must be less than or equal to OFL, and the SSC may recommend reducing ABC from OFL to account for scientific uncertainty, including uncertainty associated with the assessment of spawning escapement goals, forecasts, harvests, and other sources. The annual catch limit (ACL) for each stock is set equal to ABC.

For Cook Inlet salmon, the minimum stock size threshold (MSST)—the level of biomass below which a stock would be considered overfished—is calculated for stocks in Tier 1 and 2 as follows: a stock or stock complex is overfished when summed escapements over a generation fall below one half of summed spawning escapement goals over that generation.

For Tier 3 stocks, which have no reliable estimates of escapement, overfishing is defined as occurring when harvest exceeds the OFL. The OFL for Tier 3 stocks is set as the maximum EEZ catch of the stock multiplied by the generation time (years). The result of this calculation is compared against the cumulative EEZ catch of the stock for the most recent generation. The SSC may recommend an alternative catch value for the OFL on the basis of the best scientific information available. As with Tier 1 and 2 stocks, ABC for these stocks must be set less than or equal to the OFL, and may be reduced by a buffer to account for scientific uncertainty. For Tier 3 stocks or stock complexes with escapement goals for a suitable indicator stock, the MSST is calculated the same as for Tier 1 and 2 stocks. For Tier 3 stock complexes without any suitable indicator stocks with escapement goals, it is not possible to calculate MSST.

While OFL, ABC, and ACL are calculated based on the best scientific information available preseason when harvest specifications must be established, realized harvest and escapement data are used post-season to determine whether ACLs were exceeded, whether overfishing occurred, and whether any stocks are overfished. Accountability measures are applied to prevent ACL overages and, if they occur, to prevent the recurrence of any ACL overages.

Harvest Specifications and Annual Processes

Amendment 16 establishes a harvest specification process for the Cook Inlet EEZ Area, along with specific definitions of required status determination criteria using the tier system described in the previous section.

A Stock Assessment and Fisheries Evaluation (SAFE) report provides the SSC and Council with a summary of the most recent biological condition of the salmon stocks, including all status determination criteria, and the social and economic condition of the fishing and processing industries. NMFS develops the SAFE report for the Cook Inlet EEZ Area, with public and scientific review through the Council process and public review through publication of the proposed salmon harvest specifications in the **Federal Register**.

The SAFE report summarizes the best available scientific information concerning the past, present, and possible future condition of Cook Inlet salmon stocks and fisheries, along with ecosystem considerations, taking into account any uncertainty. This includes recommendations of OFL, ABC, and MSST that are calculated following the tier system described above. The SAFE report will include a final post-season evaluation of the previous fishing year based on realized catches and escapement with all information needed to make ''overfishing'' and ''overfished'' determinations, as well as recommendations to develop harvest specifications for the upcoming fishing year. In providing this information, the SAFE report uses a time series of historical catch for each salmon stock,

including estimates of retained and discarded catch taken in the salmon fishery; bycatch taken in other fisheries; catch in State commercial, recreational, personal use, and subsistence fisheries; and catches taken during scientific research (*e.g.,* test fisheries).

The SAFE report also provides information needed to document significant trends or changes in the stocks, marine ecosystem, and fisheries over time, as well as the impacts of management. The SAFE report will be developed to contain economic, social, community, essential fish habitat, and ecological information pertinent to the success of salmon management or the achievement of Salmon FMP objectives.

The SSC reviews the SAFE report each year and recommends the OFL, ABC, MFMT, and MSST for each stock or stock complex, which then constrain the maximum allowable harvest for each stock based on biology and scientific uncertainty identified in the assessments. This SSC review constitutes the official peer review of scientific information used to manage the Cook Inlet EEZ Area salmon fishery for purposes of National Standard 1 and for the purposes of the Information Quality Act. Upon review and acceptance by the SSC, the SAFE report, after incorporating any associated SSC comments, constitutes the best scientific information available for purposes of the Magnuson-Stevens Act.

Total allowable catches (TACs) are set for the Cook Inlet EEZ commercial salmon fishery. A TAC is a limit on the annual catch of a stock, stock complex, or species that is the management target of the fishery, and operates as an accountability measure that accounts for management uncertainty to ensure total catch remains at or below the ACL for each stock. In the Cook Inlet EEZ, TACs will initially be set at the species level because it is not currently possible to distinguish among individual stocks of the same species when monitoring harvests during the fishing season. TACs are set considering the estimated proportional contributions of each stock to total harvest of a species such that ACLs are not expected to be exceeded for any component stock if all TACs are fully achieved. Because of the uncertainty inherent to estimating the proportional contributions of each stock to total harvest pre-season, species-level TACs are reduced from the combined ACLs of component stocks by an appropriate buffer that accounts for the degree of management uncertainty.

NMFS will establish harvest specifications each year by publishing proposed and final salmon harvest specifications in the **Federal Register**. NMFS will consider public comments on proposed harvest specification prior to making a final decision. If approved, final harvest specifications are issued with any applicable modifications and the agency responses to public comments.

Changes From Proposed to Final Amendment 16

After considering public comments, NMFS revised amendment 16 to specify the salmon stocks or stock complexes for which status determination criteria are being established, and, as recommended by the SSC at their February 2024 meeting, to better describe how the OFL would be set preseason. For Tier 1 stocks, the preseason OFL was updated in accordance with the SSC recommendation that it be based solely on the preseason total run size for the coming fishing season (equation 6 within section 4.2.4 of the Salmon FMP) rather than on the generational (multi-year) formula that was defined in equations 8 and 9 of proposed amendment 16. For Tier 3 stocks, the language that describes how the preseason OFL is set was updated in accordance with the SSC recommendation that rather than considering only maximum historical catch, the preseason OFL could also be based on other values such as average or maximum catch for a particular period of time in the catch history. Finally, several technical corrections were also made to improve formatting consistency and to eliminate redundancy in the FMP.

Final Rule

This final rule modifies Federal regulations to implement amendment 16 by revising the definition of Salmon Management Area at 50 CFR 679.2 to redefine the Cook Inlet Area as the Cook Inlet EEZ Area and incorporate it into the Federal Salmon Management Area. This final rule creates figure 22 to 50 CFR part 679 to show the location of the Cook Inlet EEZ Area. Regulations at § 600.725 are modified to authorize the use of drift gillnet gear for the Cook Inlet EEZ Area commercial salmon fishery. Existing regulations related to salmon fisheries under the Salmon FMP throughout part 679 are moved to subpart J beginning at § 679.110. Management measures necessary for the Cook Inlet EEZ Area are added to subpart J. The following sections provide a summary of management measures implemented by this final rule.

Federal Commercial Fishing Season and Fishing Periods

Under this final rule, the Cook Inlet EEZ Area commercial drift gillnet fishing season begins each year on either the third Monday in June or June 19, whichever is later. For 2024, the third Monday in June is June 17, so the season will begin on June 19. However, because June 19 falls on a Wednesday—which as described below is not an open fishing period—the first day of fishing in the 2024 Cook Inlet EEZ Area commercial fishing season will be on Thursday, June 20.

On or after the season start date, NMFS will open the Cook Inlet EEZ Area for drift gillnet fishing for two, 12-hour periods each week, from 7 a.m. Monday until 7 p.m. Monday, and from 7 a.m. Thursday until 7 p.m. Thursday, a schedule that will continue until July 15 unless a harvest limit (TAC) is reached. From July 16 to July 31, drift gillnet fishing will be open for one 12-hour period per week from 7 a.m. until 7 p.m. on Thursdays, unless a TAC is reached before that time. From August 1 to August 15, the Cook Inlet EEZ Area will again be open for drift gillnet fishing for two, 12-hour periods each week, from 7 a.m. Monday until 7 p.m. Monday, and from 7 a.m. Thursday until 7 p.m. Thursday unless a TAC is reached before that time. The Cook Inlet EEZ Area will be closed to drift gillnet fishing when the TAC is reached, or on August 15, whichever comes first.

Inseason Management for Commercial Fishing

NMFS will actively monitor and manage the commercial salmon fishery in the Cook Inlet EEZ Area throughout the fishing season by exercising the inseason management authorities described in this rule. In regulations at § 679.118(c)(1)(i), this final rule provides NMFS the authority to prohibit commercial salmon fishing in the Cook Inlet EEZ Area. In regulations at § 679.25, this final rule provides NMFS inseason authority to adjust a TAC for any salmon species or stock and to close or open the Cook Inlet EEZ Area as necessary to prevent overfishing or prevent underharvest of a TAC for any species or stock (assuming there are no countervailing conservation concerns regarding co-occurring species or stocks).

Fishing will occur during the regularly scheduled fishing periods described above. Throughout the fishing season, NMFS will project the additional harvest expected from each additional opening of the fishery based on the number of participating vessels,

catch rates, and any other available information. NMFS will close the Cook Inlet EEZ Area to commercial fishing for salmon if projections indicate that an additional fishery opening is expected to exceed any specified TAC. NMFS will implement inseason management actions through publication in the **Federal Register**, consistent with the Administrative Procedure Act (APA).

NMFS will monitor all available sources of information during the fishery to evaluate whether the TAC remains appropriate. If the best scientific information available indicates that the number of salmon returning to Cook Inlet is significantly different than what was forecasted, NMFS may adjust management of the fishery using the adjustment authorities described above and specified in regulations at § 679.25. If significantly fewer fish return relative to the forecast, NMFS may close the fishery before a TAC is reached or before the season closure date to prevent overfishing. This may be determined based on fishery catches, test-fishery catches, escapement, or other scientific information.

NMFS may also consider an inseason adjustment to modify the TAC if scientific information indicates that salmon abundance is significantly higher than forecasted. To implement any inseason adjustment, NMFS publishes a temporary rule in the **Federal Register** and considers all public comments on the action. Any such action must not result in overfishing on any other co-occurring fish stocks and will also consider the potential impacts of such an action to all Cook Inlet salmon harvesters. NMFS could not adjust the TAC above any ABC or allowable de minimis amounts set forth in the harvest specifications established for the Cook Inlet EEZ Area in that fishing year without engaging in notice and comment rulemaking to amend the harvest specifications.

NMFS will use the authorities described above to achieve conservation and management goals. These tools may be used to either increase or decrease harvests in the Cook Inlet EEZ Area drift gillnet fishery as appropriate based on the specified TAC amounts, the amount already harvested, and other available information on inseason salmon abundance.

Federal Management Area

The management area is all Federal waters of upper Cook Inlet (EEZ waters of Cook Inlet north of a line at 59°46.15′ N).

Retention of Bycatch

Drift gillnet vessels fishing in the Cook Inlet EEZ Area may retain and sell non-salmon bycatch including groundfish (*e.g.,* Pacific cod, pollock, flounders, *etc.*) if they have a groundfish Federal fisheries permit (FFP). These are referred to as incidental catch species and this final rule allows retention of these species up to a specified maximum retainable amount (MRA). Drift gillnet vessels retaining non-salmon incidental catch species are also required comply with all State requirements when landing these fish in Alaska. The MRA of an incidental catch species is calculated as a proportion (percentage) of the weight of salmon on board the vessel.

Table 10 to 50 CFR part 679 establishes MRA percentages in the Gulf of Alaska (GOA) and applies to the Cook Inlet EEZ Area. For commercial salmon fishing in the Cook Inlet EEZ Area, the basis species are salmon, which is classified as ''Aggregated amount of non-groundfish species'' in the table for the purposes of the calculation. To obtain the MRAs for each incidental catch species, multiply the retainable percentage for the incidental catch species from table 10 by the round weight of salmon (Basis Species: Aggregated amount of non-groundfish species) on board. For example, if there were 100 pounds (45.36 kg) of salmon aboard the vessel, then 20 pounds (9.07 kg) of pollock and 5 pounds (2.27 kg) of aggregated rockfish could be retained, because pollock has a retainable percentage of 20 and aggregated rockfish has a retainable percentage of 5 in table 10 when the basis species is the aggregated amount of non-groundfish species (*i.e.* salmon). Pacific halibut are not defined as a groundfish and may not be retained by drift gillnet vessels.

Cook Inlet EEZ Area Commercial Salmon Fishing Monitoring, Recordkeeping, and Reporting Requirements

This action manages the Cook Inlet EEZ Area salmon fishery separately from the adjacent State waters salmon fisheries. Recordkeeping and reporting requirements for commercial salmon fishing vessels operating in the Cook Inlet EEZ Area are specified at § 679.115. This final rule requires processors to report all landings of Cook Inlet salmon harvested in the EEZ through eLandings by noon of the day following completion of the delivery.

Commercial salmon fishing vessels, processors, and other entities receiving deliveries of Cook Inlet EEZ Area salmon (*i.e.,* fish transporters, catcher sellers, and direct marketers) must obtain Federal permits and comply with Federal recordkeeping, reporting, and monitoring requirements consistent with regulations at § 679.114. While operating, all entities required to have any Federal salmon permit(s) for the Cook Inlet EEZ Area must have a legible copy of each valid permit in either paper or electronic format.

Requirements for Commercial Salmon Fishing Vessels

Harvesting vessel owners are required to obtain a Salmon Federal Fisheries Permit (SFFP). NMFS will issue SFFPs at no charge to the owner or authorized representative of a vessel. An SFFP will authorize a vessel of the United States to conduct commercial salmon fishing operations in the Cook Inlet EEZ Area, subject to all other Federal requirements. An SFFP applicant must be a citizen of the United States. NMFS will issue SFFPs after receipt, review, and approval of a complete SFFP application. SFFPs will have a 3-year application cycle. Once a vessel owner or authorized representative obtains an SFFP, it is valid until the expiration date shown on the permit, which is after 3 years if issued at the beginning of a permit cycle. Participants must maintain a physical or electronic copy of their valid SFFP aboard the named vessel. As with other Federal fisheries, if a vessel owner or authorized representative surrenders an SFFP, they could not obtain a new SFFP for that vessel until the start of the next 3-year permit cycle.

The SFFP is associated with a specific vessel and not transferable to another vessel. If the vessel is sold, the new owner will need to apply for an SFFP amendment from NMFS to reflect the new owner or authorized representative of the vessel. A vessel could not operate in the Cook Inlet EEZ Area fishery until the SFFP amendment was complete and the amended SFFP issued. The SFFP number is required to be displayed on the vessel's hull and buoys attached to the vessel's drift gillnet.

For a vessel being leased, the vessel operator is considered the authorized representative of the SFFP holder and no amendments to the permit are required. The vessel operator is subject to all SFFP requirements and limitations and liable for any violations.

This final rule requires commercial salmon fishing vessels to operate a Vessel Monitoring System (VMS) as specified at § 679.28(f)(6)(x). VMS transmits the real-time GPS location of fishing vessels to NMFS. A vessel with an SFFP is required to keep VMS active at all times when operating with drift

gillnet gear on board in the waters of Cook Inlet any day the Cook Inlet EEZ Area is open to commercial salmon fishing. This includes when operating within State waters to ensure that entire fishing trips are monitored and to help verify that no fishing occurred within State waters during a fishing trip that included salmon harvest in the Cook Inlet EEZ, or that a vessel with an SFFP does not fish in Federal waters during the same calendar day it fishes in State waters.

To collect catch and bycatch information, this final rule requires vessels to use a Federal fishing logbook as specified at § 679.115(a)(1). Commercial salmon fishing vessels will record the start and end time and GPS position of each set, as well as a count of the catch and bycatch. Logbook sheets are submitted electronically to NMFS by the vessel operator when the fish are delivered to a processor. The data provided by the logbooks will provide information to satisfy the Magnuson-Stevens Act Standardized Bycatch Reporting Methodology (SBRM) requirement (16 U.S.C. 1853(a)(11)).

State requirements, including possession of appropriate State Commercial Fisheries Entry Commission (CFEC) permit(s), continue to apply for drift gillnet vessels landing salmon or other species caught in the EEZ within the State or entering State waters.

This final rule prohibits commercial salmon fishing vessels from landing or otherwise transferring salmon caught in the Cook Inlet EEZ Area within the EEZ off Alaska. Commercial salmon fishing vessels delivering to tenders may deliver salmon caught in the Cook Inlet EEZ Area only to a tender vessel operating in State waters. This final rule prohibits processing (as defined by Federal regulations at § 679.2) salmon harvested in the Cook Inlet EEZ Area in the EEZ off Alaska in order to ensure historical participants and operation types are not displaced. Commercial salmon fishing vessels are allowed to gut, gill, and bleed salmon prior to landing but cannot freeze or further process salmon prior to landing their catch (freezing is considered processing per Federal regulations at § 679.2 and therefore is prohibited in Cook Inlet EEZ waters).

Requirements for Processors and Other Entities Receiving Deliveries of Commercially Caught Cook Inlet EEZ Salmon

This final rule requires processors that receive and process landings of salmon that are caught in the Cook Inlet EEZ Area by a vessel authorized by an SFFP to obtain a Salmon Federal Processor Permit (SFPP). This includes any person, facility, vessel, or stationary floating processor that receives, purchases, or arranges to purchase and processes unprocessed salmon harvested in the Cook Inlet EEZ Area, except registered salmon receivers. Persons or businesses that receive landings (deliveries) of Cook Inlet EEZ salmon from harvesting vessels but do not immediately process it, or transport it to another location for processing, are required to obtain a Registered Salmon Receiver Permit (RSRP). If a tender vessel or vehicle receiving deliveries of salmon is operated by an SFPP holder, it may operate under the SFPP and does not need to obtain an RSRP. SFPP and RSRP holders may not receive deliveries or process salmon that were harvested in the Cook Inlet EEZ Area while in the Cook Inlet EEZ Area or any EEZ waters.

SFPP and RSRP holders are required to report all salmon landings through eLandings by noon of the day following completion of the delivery. Landings must be reported using existing Cook Inlet drift gillnet statistical areas, with the addition of an EEZ identifier and a requirement to identify the Federal permit associated with each landing.

NMFS issues SFPPs and RSRPs on a 1-year cycle. If the ownership of an entity holding a SFPP or RSRP changes, the new owner will need to submit an application for an amended permit. An amended permit is issued with a new permit number to reflect the change.

Because SFPPs are facility-specific, one SFPP is required for every processing facility, even if a facility is controlled by a company already holding an SFPP for another processing facility. An RSRP is required for each entity receiving but not processing landings of Cook Inlet EEZ salmon at the location of the delivery if they are not operated by an SFPP holder. If a single entity operates multiple vehicles or vessels receiving landings of Cook Inlet EEZ salmon, each one of those vehicles or vessels could use the RSRP held by the entity. This includes fish transporters or buying stations unaffiliated with an SFPP holder that receive deliveries directly from harvesting vessels.

For direct-marketing operations where the owner or operator of a commercial salmon fishing vessel catches and processes their catch, both an SFFP and an SFPP are required. For catcher-seller operations where the owner or operator of a harvesting vessel catches and sells unprocessed salmon (*e.g.,* whole fish or headed and gutted) directly to someone other than an SFPP or RSRP holder, both an SFFP and an RSRP are required.

Other Commercial Fishing Management Measures and Prohibitions

This final rule defines the legal gear for the Cook Inlet EEZ Area drift gillnet fishery consistent with legal gear in the State waters drift gillnet fishery, to the extent practicable (see § 679.118(f)). Legal drift gillnet gear is no longer than 200 fathoms (365.76 m) in length, 45 meshes deep, and has a mesh size no greater than 6 inches (15.24 cm). Buoys at each end of the drift gillnet must be marked with the participant's SFFP number.

Gillnets will be measured, either wet or dry, by determining the maximum or minimum distance between the first and last hanging of the net when the net is fully extended with traction applied at one end only. It is illegal to stake or otherwise fix a drift gillnet to the seafloor. The float line and floats of drift gillnets must float on the surface of the water while the net is fishing, unless natural conditions cause the net to temporarily sink.

This final rule includes the following prohibitions specified at § 679.117 for drift gillnet fisheries in the Cook Inlet EEZ Area:

- Vessels are prohibited from fishing in both State and Federal waters on the same day, or otherwise having on board or delivering fish harvested in both EEZ and State waters, to ensure accurate catch accounting for Federal managers.
- Vessels cannot have salmon harvested in any other fishery on board.
- Vessels are prohibited from having gear in excess of the allowable configuration or deploying multiple nets.
- Vessels are prohibited from participating in other fisheries while operating drift gillnet gear for salmon in the Cook Inlet EEZ Area and are not allowed to have other fishing gear on board capable of catching salmon while commercial fishing for salmon in the Cook Inlet EEZ Area (*i.e.,* operating drift gillnet gear).
- Because vessels legally participating in adjacent State water salmon fisheries may transit across the Cook Inlet EEZ Area, vessels can have other fishing gear on board while moving through the Cook Inlet EEZ Area, but are prohibited from commercial fishing for salmon within the Cook Inlet EEZ Area on any day they are participating in State water salmon fisheries.
- Manned or unmanned aircraft cannot be used to locate salmon or otherwise direct fishing.
- Vessels are prohibited from discarding any salmon caught while harvesting salmon using drift gillnet gear in the Cook Inlet EEZ Area.

• Vessels are prohibited from commercial or recreational fishing for salmon in the Cook Inlet EEZ Area contrary to notification of inseason action, closure, or adjustment issued under § 679.25 or § 679.118.

Cook Inlet EEZ Recreational Fishing Management Measures

This final rule includes management measures for recreational salmon fishing in the Cook Inlet EEZ Area as specified at § 679.119. NMFS establishes bag and possession limits in Federal regulations. For Chinook salmon, from April 1 to August 31, the bag limit is one Chinook salmon per day including a total limit of one in possession of any size. From September 1 to March 31, the bag limit is two Chinook salmon per day including a total limit of two in possession of any size. For coho (silver) salmon, sockeye salmon, pink salmon, and chum salmon there is a combined six fish bag limit per day, including a total limit of six in possession of any size. However, only three fish per day, including a total limit of three in possession, may be coho salmon.

In addition to Federal bag limits, recreational anglers are constrained by State bag and possession limits if landing fish in Alaska. Because of this, an angler cannot exceed State limits when landing fish in Alaska, or otherwise have both an EEZ limit and a State limit on board at the same time in either area.

Recreational fishing is open for the entire calendar year. In regulations at § 679.118(c)(1)(ii), this final rule provides that NMFS may prohibit, through an inseason management action, retention of individual salmon species while still allowing harvest of other salmon species if necessary. In addition to prohibiting retention, NMFS may also prohibit fishing for one or more salmon species if required for conservation. Inseason management actions for the recreational sector will be published in the **Federal Register** and subject to the same process and timing limitations outlined for the commercial sector in the Cook Inlet EEZ.

Recreational fishing for salmon in the Cook Inlet EEZ Area may only be done using hook and line gear with a single line per angler with a maximum of two hooks. Salmon harvested must not be filleted or otherwise mutilated in a way that could prevent determining how may fish had been retained prior to landing. Gills and guts may be removed from retained fish prior to landing. Any salmon that is not returned to the water with a minimum of injury counts toward an angler's bag limit.

Federal managers will review any available developing inseason information, including escapement data, and may prohibit retention of one or more salmon species if additional harvest could not be supported. This final rule does not establish a TAC specific to the recreational sector because the recreational harvest in the Cook Inlet EEZ has been small historically (less than 100 fish per year), but estimated removals in combination with commercial harvests are evaluated against the ACL to ensure they are not exceeded and to implement accountability measures, if required, for future seasons.

The State's existing Saltwater Charter Logbook, the Statewide Harvest Survey, and creel surveys provide the information needed to account for recreational harvest in the Cook Inlet EEZ Area, as well as satisfy the Magnuson-Stevens Act SBRM requirement.

Changes From Proposed to Final Rule

In response to public comment, this final rule modifies the number of commercial salmon fishing periods in the Cook Inlet EEZ Area.

The commercial fishing season was proposed to extend from approximately June 19 to August 15 each year, with two, 12-hour fishing periods each week. Overall, public comments highlighted a conservation and management concern associated with allowing two days of harvest per week between July 16 and July 31. Under the status quo of State management, this is the time period during which there has been a single drift gillnet opener per week in order to allow salmon bound for Northern Cook Inlet to pass through Federal waters (a management option many public commenters referred to as a ''conservation corridor''). The State requested that NMFS close the EEZ to all commercial fishing after July 15 to avoid conservation concerns, including stocks not achieving spawning escapement goals. In addition, multiple Alaska Native tribes from the Cook Inlet region, communities in Northern Cook Inlet, and regional sportfishing organizations all expressed concern that two fishery openings per week from July 16–July 31—which would provide significantly more fishing opportunity to the drift gillnet fleet—was likely to result in conservation concerns when compared to the status quo of one opening per week during this time period (see Comment 34). In all, these comments emphasized that reducing drift gillnet openings to one per week from July 16–July 31 is a management measure important to stakeholders and Alaska Native tribes in Northern Cook Inlet because it gives salmon stocks of lower abundance more opportunities to pass through the EEZ during the time period they are most likely to be present in Federal waters.

In light of the public comments identifying significant potential conservation concerns, NMFS reviewed information contained in the Analysis and 2024 SAFE report to further consider the potential impacts that could result from increased commercial fishing opportunity during this late-July migratory period. State management measures that limited drift gillnet fishing effort in the Cook Inlet EEZ began in 2015. As described in section 3.1.2 of the Analysis, under Federal reference points, overfishing likely occurred on ''other sockeye salmon'' in 2008, and on Cook Inlet coho salmon in 2013. Both of these stock complexes have substantial components that originate from the Northern District. Overfishing is not thought to have occurred on any stock since the State began restricting fishing in the EEZ in late July. Susitna (Yentna) River sockeye salmon were declared a State stock of concern in 2008 after repeated failures to meet escapement goals. After subsequent restrictions to fishing, including the reductions to EEZ fishing opportunities in late July, this stock met escapement goals to the point where it was delisted from being a stock of concern by the State of Alaska's Board of Fisheries (BOF) in 2020. Given the historical evidence suggesting an increased likelihood of conservation concerns for these stocks when there is additional EEZ fishing effort from July 16 until July 31, and because some salmon stocks have continued to miss spawning escapement goals during recent years when there was only a single drift gillnet opening per week from July 16–July 31, NMFS has determined that it would be unwise to increase the number of fishing periods in late July from the status quo. Therefore, this final rule reduces the proposed number of openings to one per week during this period. The final rule, however, does not adopt the State's request to close the EEZ July 15. As explained in this final rule, the fishery will be open for one opening per week July 16–July 31 and two openings per week August 1–August 15, unless a TAC is reached.

NMFS expects that one opening per week in late July will allow for the harvest of surplus yield to the extent practicable while still achieving spawning escapement goals in most years. If TACs allow for additional harvest in August, the fishery will

return to two openings per week from August 1 to August 15. This approach is expected to reduce the risk of higher than expected harvests in the EEZ that could result in overfishing or reduce or eliminate the harvestable surplus of one or more salmon stocks for all other salmon users in Cook Inlet.

Further, NMFS expects this change will better allow the drift gillnet fleet to target the stocks of highest abundance while reducing the risk of early closures because a TAC is reached for a stock of lower abundance. As explained above and in the preamble to the proposed rule, the Cook Inlet EEZ salmon fishery will be managed using TACs. Allowing salmon stocks of lower abundance bound for Northern Cook Inlet more opportunities to pass through the EEZ in July—particularly coho and Chinook salmon—means it is less likely the fishery will close early due to reaching the TAC for a stock of lower abundance before the drift gillnet fleet is able to harvest the TAC for abundant sockeye salmon. Additionally, spreading out the sockeye salmon harvest throughout the season by reducing fishing periods in late July will reduce pressure on Northern District sockeye salmon—which are Tier 3 stocks with less known conservation status—as more of the salmon in the EEZ in August are expected to be from the highly abundant Tier 1 Kenai and Kasilof stocks for which there is better information to inform inseason management decisions.

In this final rule, NMFS also clarified language at § 679.28(f)(6)(x) to clearly define when and where VMS is required to be used by vessels named or required to be named on a SFFP. An operational and transmitting VMS unit that complies with the requirements in § 679.28(f) must be carried by any such vessel operating in the waters of Cook Inlet with drift gillnet gear on board during a calendar day when commercial salmon fishing is authorized in the Cook Inlet EEZ Area. The corresponding prohibition at § 679.117(b)(1)(xiv) is similarly revised to prohibit operation contrary to requirements specified at § 679.28(f)(6)(x). This final rule also adds a definition of the ''waters of Cook Inlet'' at § 679.2. For purposes of §§ 679.28(f)(6)(x) and 679.117(b)(1)(xiv), the waters of Cook Inlet includes all waters north of a line from Cape Douglas (58°51.10′ N) to Point Adam (59°15.27′ N). In sum, these changes from proposed to final regulations clarify that the VMS requirement for SFFP holders applies: (1) on days when directed fishing for salmon using drift gillnet gear is open in the Cook Inlet EEZ Area; (2) if the vessel has drift gillnet gear on board the vessel or deployed; and (3) if the vessel is operating in the waters of Cook Inlet.

This final rule also modifies regulations at § 679.118(c)(1)(ii) to provide NMFS the authority to prohibit fishing for one or more salmon species if required for conservation. While the recreational salmon fishery in the Cook Inlet EEZ Area is extremely small, this would give NMFS all management tools potentially required to conserve stocks at very low abundance. The most likely potential need for this authority is because declines in Chinook salmon abundance have, in some cases, entirely eliminated the harvestable surplus of Chinook (*i.e.,* escapement goals cannot be achieved even if no fish are harvested). In this instance, even the limited mortality resulting from catch and release fishing (*i.e.,* what would be allowed under a prohibition on retention) could potentially result in exceeding an ABC/ACL. NMFS would also maintain the authority to prohibit retention of one or more species if a closure to salmon fishing was not required to achieve conservation objectives or avoid exceeding an ABC/ACL.

Additionally, this final rule adds two new prohibitions to § 679.117 to clarify that it is unlawful for any person to: (1) engage in commercial fishing for salmon in the Cook Inlet EEZ Area contrary to notification of inseason action, closure, or adjustment issued under §§ 679.25 and 679.118 (see § 679.117(b)(1)(xvi)); or (2) engage in recreational fishing for salmon in the Cook Inlet EEZ Area contrary to notification of inseason action, closure, or adjustment issued under § 679.118 (see § 679.117(b)(2)(v)). The final rule also makes clarifying edits to § 679.117(b) as follows: (1) moves ''of the Salmon Management Area, defined at § 679.2 and Figure 22 to this part,'' from § 679.117(b)(1)(ii), to § 679.117(b)(1)(i), which is the first time the term ''Cook Inlet EEZ Area'' appears in § 679.117(b)(1); (2) replaces the word ''set'' in § 679.117(b)(1)(v), and replaces it with ''deploy''; and (3) adds the term ''Cook Inlet EEZ Area'' to two prohibitions applicable to recreational fishing (see § 679.117(b)(2)(ii) and (iii)). Throughout the regulatory text, NMFS also made technical and grammar edits to correct regulatory cross references, use consistent terms, remove redundancy, and promote clarity.

One additional change from the proposed rule was removing a proposed requirement that any interactions or entanglements with marine mammals would be required to be recorded in the logbook. NMFS determined that this requirement would be duplicative with and may be confused with existing reporting requirements under the Marine Mammal Authorization Program and has therefore removed the requirement from this final rule. Participants are, however, still required to report marine mammal interactions under the Marine Mammal Authorization Program.

Comments and Responses

NMFS received 87 comment submissions on amendment 16 and the proposed rule. NMFS has summarized and responded to 95 unique and relevant comments below. The comments were from individuals, environmental groups, local governments, the Alaska Department of Fish and Game (ADF&G), sportfishing organizations, fishing guides, tribes and tribal members, drift gillnet fishermen, and commercial fishing organizations. Several comment submissions were duplicates or addressed topics outside the scope of amendment 16 and the proposed rule. Overall, there was a mix of support and opposition, with those comments opposing the rule expressing concerns about expanding Federal management to salmon fisheries, impacts to adjacent state salmon fisheries, the cost and burden of monitoring requirements, adverse economic impacts, preseason catch limits, the prohibition on fishing in both state and Federal waters on the same day, and underharvest (exceeding spawning escapement goals). The vast majority of commenters supported some version of Federal management (mostly drift gillnet fishers, commercial processors, and tribal groups), and a small minority opposed any type of Federal management. Comments are organized by topic into the following categories:

- Scope of the Fishery Management Plan
- National Standard 1
- Status Determination Criteria and Annual Catch Limits
- Inseason Management
- Cook Inlet EEZ Commercial Salmon Fishing Management Measures
- Federal Commercial Fishing Season and Fishing Periods
- Monitoring, Recordkeeping, and Reporting Requirements
- Other Commercial Salmon Fishing Management Measures and Prohibitions
- Recreational Fishing
- National Standard 2
- National Standard 3
- National Standard 4
- National Standards 5 and 7
- National Standard 8
- National Standard 10
- Economic Impacts

- General Support
- General Opposition
- Tribal Comments
- Marine Mammals
- Process Concerns
- Other

Scope of the Fishery Management Plan

Comment 1: NMFS's decision to limit the scope of Federal management to the Cook Inlet EEZ violates *UCIDA* v. *NMFS,* 837 F.3d 1055 (9th Cir. 2016), in which the Ninth Circuit Court of Appeals held that NMFS must manage the entire ''fishery,'' including State waters.

Response: NMFS disagrees that the Ninth Circuit's decision requires this FMP to cover both State and Federal waters. Rather, limiting NMFS management solely to Federal waters (*i.e.,* the Cook Inlet EEZ) is consistent with the court's decision in *UCIDA* v. *NMFS.* In that case, UCIDA challenged amendment 12 to the Salmon FMP, which had excluded the Cook Inlet EEZ from the Salmon FMP. The Ninth Circuit considered only whether NMFS had the legal authority to exclude portions of the EEZ from the FMP. In ruling against NMFS, the Court held that NMFS must include the Cook Inlet EEZ in the Salmon FMP because it has an obligation to issue an FMP for each fishery under its authority that requires conservation and management. The phrase ''under its authority'' was critical to that Ninth Circuit decision, which considered whether a State could manage a fishery in Federal waters outside the context of an FMP. Nothing in *UCIDA* v. *NMFS* implied that a Federal FMP must cover fishing that occurs in State waters if a harvested stock occurs in both State and Federal waters. Not only was that question not before the Ninth Circuit, but requiring NMFS to manage in State waters through an FMP would violate the plain language of Magnuson-Stevens Act section 306(a), which provides that states retain management jurisdiction over fishing in state waters.

In fact, the Ninth Circuit explicitly recognized that the Cook Inlet EEZ constitutes a fishery, stating that ''the statute requires an FMP for a fishery, a defined term,'' and adding ''[n]o one disputes that the exempted area of Cook Inlet''—*i.e.* the Cook Inlet EEZ—''is a salmon fishery.'' 837 F.3d at 1064. The portion of Cook Inlet at issue in the litigation over amendment 12 was the Cook Inlet EEZ, not all of Cook Inlet. In this action, NMFS is complying with the Ninth Circuit's decision by incorporating the very ''fishery'' at issue in that case—the Cook Inlet EEZ salmon fishery—into the Salmon FMP.

Comment 2: NMFS's decision to limit the scope of Federal management to the Cook Inlet EEZ violates the plain language of the Magnuson-Stevens Act. The term ''fishery,'' as defined within section 3 of the Magnuson-Stevens Act, requires that amendment 16 include a definition of ''fishery'' that extends throughout the range of salmon in Cook Inlet, including State waters.

Response: NMFS disagrees that its definition of the ''fishery'' violates the Magnuson-Stevens Act. As explained in the preamble to the proposed rule and the response to *Comment 1,* the ''fishery'' that is subject to Federal management under amendment 16 are the salmon stocks harvested by the commercial and recreational fishing sectors within the Cook Inlet EEZ Area. Defining the fishery as geographically constrained to the Cook Inlet EEZ is consistent with the Magnuson-Stevens Act. Section 3 of the Magnuson-Stevens Act broadly defines a ''fishery'' as one or more stocks of fish that can be treated as a unit for purposes of conservation and management and which are identified on the basis of geographical, scientific, technical, recreational, and economic characteristics; and any fishing for such stocks.

NMFS has determined that salmon stocks in the Cook Inlet EEZ can be treated as a unit for purposes of conservation and management because they all fall within the geographical management area under NMFS's jurisdiction, the best scientific information available supports NMFS's determination that the EEZ has unique ecological characteristics due to the mixed stock nature of fishing in the EEZ, and fishing for these stocks in the EEZ has distinct technical and economic characteristics that distinguish it from State water fisheries, as discussed in the response to *Comment 55.*

The Magnuson-Stevens Act expressly limits the management authority of NMFS and the Council to the EEZ, with a narrow exception. Section 101(a) of the Magnuson-Stevens Act establishes the Nation's sovereign rights and exclusive fishery management authority over all fish and all Continental Shelf fishery resources within the EEZ. Section 3(11) of the Magnuson-Stevens Act defines the inner boundary of the EEZ as a line coterminous with the seaward boundary of each of the coastal States. Section 302(a)(l)(G) states that the Council has authority over the fisheries in the Arctic Ocean, Bering Sea, and Pacific Ocean seaward of Alaska. Because Alaska's seaward boundary is 3 nautical miles (nmi) (5.56 kilometers) from its coast (3-nmi boundary line), 43 U.S.C. 1301(b), the inner boundary of the EEZ, and therefore the Council's authority, starts 3 nmi (5.56 kilometers) from the Alaskan coast and extends to the outer boundary of the EEZ 200 nmi (370.4 kilometers) seaward of the coast of Alaska. In section 306, the Magnuson-Stevens Act expressly states that it shall not be construed as extending or diminishing the jurisdiction or authority of any State within its boundaries. Therefore, the Magnuson-Stevens Act does not contemplate the extension of Federal authority into State waters, except under the very limited circumstances described in section 306(b) (discussed further in the response to *Comment 4*). In sum, given the geographic limits placed on NMFS's authority to manage fisheries, it is necessary for the ''fishery'' to be geographically constrained to the EEZ.

Comment 3: NMFS's decision to define the fishery as geographically constrained to the Cook Inlet EEZ is arbitrary. There cannot be two adjacent management schemes for salmon; one in Federal waters and one in State waters, because one management scheme will always depend on the other. Salmon management depends on escapement goals. That means an FMP for just the EEZ will always depend on the State which sets the escapement goals.

Response: Defining the fishery as geographically constrained to the Cook Inlet EEZ is not arbitrary; it is required by the Magnuson-Stevens Act and is consistent with fisheries management throughout the EEZ off Alaska and throughout the U.S. Nearly all stocks harvested in the EEZ nationwide also occur in State waters, but as explained in the response to *Comment 2,* the Magnuson-Stevens Act explicitly left jurisdiction over state waters to the states.

Recognizing Federal and State jurisdictional boundaries is a foundational principle in the management of natural resources that straddle jurisdictions in the U.S. In mining, forestry, oil, gas, and fisheries, the location of the activity determines the applicable regulations, even if the relevant resource is also present in an adjacent jurisdiction. Furthermore, this is consistent with the management approach for other fisheries off Alaska. For example, in the GOA, the State manages fisheries for pollock and Pacific cod in State waters and NMFS manages pollock and Pacific cod fisheries in Federal waters. For these fisheries, the State determines when State waters will be open to fishing for pollock and Pacific cod, while the Council recommends and NMFS makes

those determinations for the EEZ, taking into account any anticipated harvest in State waters.

Similar to the Federal management of the Cook Inlet EEZ, the Pacific Fishery Management Council's Salmon FMP expressly limits Federal management to the fisheries in EEZ waters. That FMP covers salmon stocks caught in the EEZ off the coasts of Washington, Oregon, and California.

NMFS disagrees that a stock of anadromous fish cannot be successfully managed by different adjacent management regimes. NMFS and State management agencies regularly have separate fisheries that harvest the same stocks of fish. Management will be coordinated to the extent practicable. NMFS will establish catch limits for the Cook Inlet EEZ that are based on achieving escapement goals as defined in the Federal stock assessment, while accounting for both State and Federal expected harvests.

There are cooperative management arrangements where a single management agency can make decisions for both State and Federal waters. But these are dependent on a mutually accepted delegation of management authority or international treaties. For example, NMFS's management jurisdiction over the Bering Sea and Aleutian Islands king and Tanner crab fisheries is limited to the Bering Sea and Aleutian Islands Area EEZ, but because the Council recommended delegated management of the EEZ to the State through the Crab FMP—and NMFS determined State management was consistent with the FMP and the Magnuson-Stevens Act—the State executes delegated management actions for crab stocks in Federal waters while also managing these stocks within State waters. While there is often coordination between NMFS and the State to ensure that fishery management decisions achieve the common goal of sustainability, State and Federal authority remains constrained by jurisdictional limits.

Management of the Salmon FMP's East Area is different from the management of salmon in the Cook Inlet EEZ Area because of both the delegation of management authority to the State and the Pacific Salmon Treaty. Management of the salmon commercial troll and recreational fisheries in the East Area EEZ occurs across the State and EEZ boundary because the Council voted to delegate management of the salmon fisheries in the East Area EEZ to the State, the State was willing to accept such a delegation of authority, and NMFS determined State management was consistent with both the Salmon FMP and the Magnuson-Stevens Act. The Council and NMFS considered delegating management of the Cook Inlet EEZ to the State, similar to the arrangement in the East Area. However, the State refused to accept delegated management on two occasions and NMFS has no authority to compel a state to accept such delegation. As a result, there is no alternative to having separately managed salmon fisheries in Cook Inlet, and the State and Federal fisheries are separated along the jurisdictional EEZ boundary.

Comment 4: Even if states generally retain jurisdiction over state waters pursuant to Magnuson-Stevens Act 306(a), here Magnuson-Stevens Act 306(b) requires NMFS to preempt State management and assert management authority over salmon fishing in the state waters of Cook Inlet.

Response: NMFS disagrees that Magnuson-Stevens Act section 306(b) requires NMFS to assert management jurisdiction over the State waters of Cook Inlet and/or implement management measures for State waters through this FMP amendment.

Magnuson-Stevens Act section 306(b) includes two criteria that must both be met before NMFS can assert management authority over fishing in State waters: (1) the fishery must occur predominantly in the EEZ and (2) after notice and opportunity for a hearing, the Secretary must determine that a State is ''substantially and adversely'' affecting the carrying out of an FMP. Even when these criteria are met, Magnuson-Stevens Act section 306(b) explicitly states that NMFS cannot assert management authority over internal (fresh) waters, meaning the scope of Magnuson-Stevens Act section 306(b) is narrower than claimed by the commenter even when it does apply.

Historically, the State has managed salmon fishing in Cook Inlet as a single fishery with no distinction between State and Federal waters. Under State management, approximately 75 percent of total upper Cook Inlet salmon harvests occurred in State waters. NMFS has previously determined that the State-managed fishery did not occur predominantly in the EEZ, and thus for that reason alone it had no basis for asserting management authority over State waters under Magnuson-Stevens Act section 306(b)(1)(A). In addition, NMFS has consistently found that State management is consistent with Magnuson-Stevens Act requirements and the goals and objectives of the FMP. Thus, both criteria for preemption under Magnuson-Stevens Act section 306(b) have not been satisfied. As a result of litigation brought by drift gillnet fishermen, among others, status quo management as a single fishery by the State is no longer possible. NMFS acknowledges that amendment 16 will create a new fishery in Cook Inlet, which will occur entirely within Federal waters.

Even assuming the 306(b)(1)(A) criteria was met for the Cook Inlet EEZ salmon fishery after implementation of amendment 16—though total harvest of Cook Inlet salmon stocks will continue to occur predominantly within State waters—for NMFS to assert management jurisdiction over State waters it would also have to determine that State management ''substantially and adversely'' affects implementation of the Salmon FMP, after notice and opportunity for a hearing. The procedures and requirements for notice and the hearing at 50 CFR part 600, subpart G are prescriptive, none have occurred here, and NMFS has no basis to begin proceedings at this time. No fishing has yet occurred under amendment 16 to the Salmon FMP and this final rule, and NMFS has no information that suggests that State action or inaction will prevent the Council or NMFS from carrying out the management measures and management objectives specified in amendment 16. Thus, the criteria for preemption under Magnuson-Stevens Act section 306(b)(1)(B) has not been satisfied.

Comment 5: Every other FMP in Alaska sets management measures, including ACL and TAC, for the fishery in both State and EEZ waters. The King Crab closure around Kodiak Island does not allow the fishery in State waters to continue without direction, nor does the Pacific Cod TAC in the GOA apply for the EEZ waters only with the State waters fishery unregulated; the same is true for every other stock of fish except salmon. For the Salmon FMP, NMFS is trying to make us believe the rules governing this fishery are different, even after the Federal court decision that have determined they are not.

Response: NMFS disagrees. Federal ACLs and TACs are not established for State waters in other Federal FMPs. The BOF has established State managed fisheries in State waters, for example, the GOA Pacific cod fishery that the State manages by setting a guideline harvest level (GHL) outside the Federal harvest specifications process. For some fisheries, the BOF bases the GHL amount on a percentage of the Federal ABC. However, the GHL fishery is managed by the State. To comply with the Federal ACL regulations and National Standard 1 guidelines, NMFS manages Pacific cod in Federal waters to ensure the sum of all State waters and

Federal waters Pacific cod removals from the GOA do not exceed the Federal Pacific cod ABC (and therefore ACL) for the GOA. Accordingly, each year the Council recommends, and NMFS approves, a TAC in the GOA that is set at an amount to accommodate the State's GHL for the Pacific cod caught in State waters. This is consistent with the Magnuson-Stevens Act and National Standard guidelines that direct, as a fundamental component of sustainable fisheries management, that catch should not exceed the ACL and that all sources of mortality from fishing activities should be evaluated for stock status and specification of Federal harvest limits. If the State changed the applicable State waters GHL, there are no limits on the amount of Pacific cod that may be harvested in State waters, and NMFS would adjust the Federal TAC accordingly to ensure that total Pacific cod removals do not exceed the Federal Pacific cod ABC and ACL. In other words, as under amendment 16, the Federal TAC accounts for State water harvest but does not constrain or limit State water harvest.

The commenter also appears to reference the State Pacific cod parallel fishery. In this parallel fishery, some of the Federal TAC is harvested in State waters, under State regulations generally mirroring those used in Federal waters. NMFS does not establish a TAC for State waters or manage in State waters; rather, NMFS deducts catch in the parallel fishery from the Federal TAC per a longstanding arrangement that ensures this fishery does not create conservation concerns. The State originally developed and implemented parallel fisheries to provide fishing opportunities within State waters before the State had capacity and expertise to independently develop and manage State water groundfish fisheries (GHL fisheries). While the State has since developed State-managed groundfish fisheries, parallel fisheries have been maintained to address allocation issues with respect to vessel gear type, operation type, and size. The State opposes the Federal management approach for salmon in the Cook Inlet EEZ Area and has not expressed interest in either a delegation of management authority or taking State action to develop a parallel fishery for salmon. Therefore, NMFS must manage salmon fishing in the Cook Inlet EEZ in the same manner as it manages the vast majority of fish stocks off Alaska—by accounting for projected State water GHL harvest when establishing harvest limits for the EEZ, and debiting catch that occurs in the parallel fisheries against the Federal TAC during the fishing season.

In regards to the crab fisheries in the GOA, there are no federally managed crab fisheries in the GOA, and there is no GOA crab FMP. The king crab closure around Kodiak is a State management measure.

Comment 6: The proposed FMP violates both the letter and the spirit of the District Court's ruling in 2022, the Ninth Circuit's order in 2016, and the Magnuson-Stevens Act. NMFS's repeated failure to provide the relief requested has caused severe economic harm to the drift gillnet fleet. Amendment 16 violates nearly all of the National Standards and imposes a harvest plan that is both burdensome and inefficient. Do not approve this action.

Response: NMFS disagrees. NMFS developed amendment 16 to comply with the decisions of the Ninth Circuit and the District Court, the Magnuson-Stevens Act, and other applicable Federal law. NMFS considered all Magnuson-Stevens Act requirements for FMPs and balanced the competing demands of the National Standards when developing amendment 16. NMFS finds this final rule to be consistent with all 10 National Standards, as detailed in section 5.1 of the Analysis and further addressed in responses to comments under the National Standard headings below. Economic impacts are further addressed in responses to comments below.

Because the State refused to accept delegated management authority, amendment 16 must necessarily establish an entirely separate management jurisdiction and, therefore, results in decreased management efficiency relative to the status quo (management of all salmon fishing in Upper Cook Inlet by the State). Separate Federal management infrastructure and regulations must be established while all existing State management measures remain in place. In order to manage the fishery in the Cook Inlet EEZ Area, NMFS must begin collecting the data essential to manage the fishery and required by the Magnuson-Stevens Act. In particular, NMFS must know who is participating in the fishery, how many vessels are active, and where catch is occurring, and must be able to debit catch against established limits during the season to prevent overfishing, even though collecting this information will involve new recordkeeping, reporting, and monitoring requirements for participants that are separate from those required in State waters.

Comment 7: NMFS is effectively deferring to State management by managing conservatively, claiming that it is unprepared and procedurally limited in its ability to manage the fishery.

Response: NMFS disagrees that it is implicitly deferring to State management by managing conservatively. This will be the first year since Alaska Statehood that there will be a federally-managed salmon fishery in the Cook Inlet EEZ, and currently all data collection and management infrastructure are run by the State. In light of these realities, ''managing conservatively'' is a responsible approach to fishery management, ensuring that NMFS does not harm salmon stocks as it builds infrastructure and expertise, and begins collecting the data needed to manage a new Federal fishery. It is unreasonable and imprudent to expect that NMFS could greatly increase total harvests from the status quo in the first year of a new fishery, with less management flexibility, less information, and less management experience in Cook Inlet. The best available science suggests status quo harvest levels in the EEZ could not be significantly increased without reducing or eliminating the harvestable surplus for other users and further increasing the risk that stocks of lower abundance will not achieve spawning escapement goals (which have not always been achieved in all years even under status quo EEZ harvests). While NMFS's approach is necessarily precautionary, the proposed 2024 Cook Inlet EEZ Area harvest specifications (89 FR 25857, April 12, 2024) would establish TACs for all species except coho salmon (due to elevated conservation risks and high uncertainty) that are higher than the recent 10-year average estimated Cook Inlet EEZ Area harvest.

As described in the preamble to the proposed rule, this action contains all of the management measures required for NMFS to administer and manage all salmon fishing in the Cook Inlet EEZ Area consistent with the Magnuson-Stevens Act. No management decisions are deferred to the State and NMFS will not rely on the State—implicitly or otherwise—to achieve OY or prevent overfishing (one of the flaws the District Court identified with amendment 14).

Using the best scientific information available, each year NMFS will prepare a SAFE report and develop harvest specifications based on the recommendations from the Council's SSC. As described in the response to *Comment 5,* although NMFS must necessarily account for projected

removals from State-managed fisheries in setting the harvest levels for the Cook Inlet EEZ Area, and other Federal fisheries off Alaska, that is part of making decisions based on best scientific information available and consistent with National Standard 2. Accounting for State action is not the same as deferring to State action. The processes by which Federal reference points are independently developed and annually reviewed is described in the preamble to the proposed rule and amendment 16.

Although NMFS has not historically managed salmon fishing in the Cook Inlet EEZ, it has the ability to do so successfully. Acknowledging that the State has decades of institutional expertise and management tools that make it currently more capable of efficient administration (as described in the Analysis) is not an indictment of NMFS's management. Further, while Federal notice requirements limited the suite of management alternatives and options when developing amendment 16 and preclude rapid fishery openings and closings as occurs under State management, no procedural limitations will prevent NMFS from implementing amendment 16, which has been designed to comply with all Magnuson-Stevens Act requirements. NMFS is confident it can effectively manage this fishery.

Comment 8: Regulations for Cook Inlet should allow fishing 110 miles (177.03 km) out from the mouth of the fish spawning grounds. For sport fishing, regulations should allow snagging one mile (1.61 km) from the mouth of any rivers in the inlet.

Response: This final rule would allow recreational salmon fishing in all waters of the Cook Inlet EEZ Area. EEZ waters of the West Area (3–200 nmi (5.56–370.4 km) off Alaska) outside of the Cook Inlet EEZ Area remain closed to commercial salmon fishing, as under the status quo, but recreational salmon fishing is authorized. Waters within 3 nmi (5.56 km) of shore are State waters and not subject to this action.

Comment 9: Several commenters suggested it would be best if all salmon fishing in Cook Inlet was managed by ADF&G. Some commenters expressed skepticism about the track record of Federal fisheries management (*e.g.,* halibut fishery declines and salmon bycatch concerns) and other Federal resource management in Alaska. Other commenters noted that the State has more expertise and better flexibility to manage salmon, which is desirable given the complexity and challenge of salmon management in Cook Inlet. One commenter noted that Federal management may prioritize non-Alaskan constituencies.

Response: NMFS acknowledges the complexity and challenges of salmon management in Cook Inlet. The challenges associated with Federal management are identified sections 2.4 and 2.5 of the Analysis. NMFS developed amendment 16 to address these challenges to the extent practicable.

NMFS is required to implement Federal management of salmon fishing in the Cook Inlet EEZ. The Ninth Circuit held that section 302(h)(1) of the Magnuson-Stevens Act requires a Council to prepare and submit FMPs for each fishery under its authority that requires conservation and management. *United Cook Inlet Drift Ass'n* v. *NMFS,* 837 F.3d 1055, 1065 (9th Cir. 2016). Because NMFS determined that the Cook Inlet EEZ salmon fishery requires conservation and management, the Ninth Circuit ruled that it must be included in the Salmon FMP. Because of this litigation and the State's subsequent decision not accept a delegation of management authority for the Cook Inlet EEZ, management of all salmon fishing in Cook Inlet by the State is not possible at this time. Additional discussion of Federal jurisdiction is provided in the response to *Comment 3.*

Further, this rule will not prioritize any constituency. Consistent with National Standard 4, amendment 16 does not discriminate between residents of different states in allocating fishery resources and is fair and equitable to all fishermen. Consistency with National Standard 4 is discussed further below.

National Standard 1

Comment 10: The Magnuson-Stevens Act requires that NMFS set MSY and OY for fishing that occurs in both Federal and state waters. Only by doing so can NMFS ensure that the State's action in the State waters fishery does not interfere with NMFS's obligation to follow the Magnuson-Stevens Act in the Federal-waters fishery and achieve OY. NMFS should define OY for both State and Federal waters so as to prevent the overescapement caused by State management decisions.

Response: NMFS disagrees that it must set MSY and OY for fishing that occurs in both State and Federal waters. As discussed in the preamble to the proposed rule, MSY is a reference point, informed by the best available scientific information. The Magnuson-Stevens Act and National Standard 1 guidelines require that every FMP include an estimate of MSY for the stocks and stock complexes that require conservation and management (§ 600.310(e)(1)). MSY is defined as the largest long-term average catch or yield that can be taken from a stock or stock complex under prevailing ecological, environmental conditions and fishery technological characteristics (*e.g.,* gear selectivity), and the distribution of catch among fleets (§ 600.310(e)(1)). Thus, under National Standard 1, NMFS acknowledges that MSY should be defined for a stock or stock complex, regardless of where fishing occurs, and thus it is not set for State waters or Federal waters. Because MSY is not a management target, it does not depend on any management actions. Rather, it describes the capacity of a stock to be harvested sustainably, regardless of who manages fishing or how harvest is authorized. Only by accounting for catch wherever it occurs can NMFS understand the largest long-term average catch or yield that can be taken from the entire stock or stock-complex. Amendment 16 provides that, for salmon stocks harvested in the Cook Inlet EEZ Area, MSY is defined at the stock or stock complex level (as described below), consistent with National Standard 1 guidelines for establishing MSY. Because MSY must be defined in terms of stocks or stock complexes, this definition of MSY does not subdivide between State and EEZ waters in Cook Inlet.

NMFS disagrees that OY should be established for fishing occurring in both State and Federal waters. In contrast to MSY, OY may be established at the stock, stock complex, or fishery level (§ 600.310(e)(3)). With respect to the yield from a fishery, the Magnuson-Stevens Act defines ''optimum'' as the amount of fish that will provide the greatest overall benefit to the Nation. Under amendment 16, the fishery is properly defined as all harvest of co-occurring salmon stocks in the Cook Inlet EEZ for the reasons stated in *Comments 1, 3, 4,* and *29.* Because there is limited ability to target individual stocks of salmon in the Cook Inlet EEZ Area, stocks of varying abundance are inevitably all harvested in the same fishing trip. The amount of harvest that will provide the greatest overall benefit to the Nation in this highly mixed stock fishery where vessels operating in the EEZ cannot discriminate between stocks of varying abundance is very different from the amount of harvest that may be optimum for stocks or fisheries in State waters where vessels are better able to target individual stocks of fish near their natal streams. Thus, OY is better defined for the Cook Inlet EEZ fishery rather than at the stock or stock complex level, taking into account the

interactions among various stocks in the EEZ.

Furthermore, by defining OY at the level of the Cook Inlet EEZ fishery under Federal jurisdiction, NMFS ensures that OY is entirely within its purview and control to achieve on a continuing basis. In vacating amendment 14, the U.S. District Court for the District of Alaska found that NMFS had impermissibly deferred too much management authority to the State, stating ''hinging federal management targets on the changing landscape of state decisions is an improper delegation of management authority to the State.'' *United Cook Inlet Drift Ass'n* v. *Nat'l Marine Fisheries Serv.,* No. 3:21–cv–00255 at *28 (D. Alaska, June 21, 2022). In developing amendment 16, NMFS took a different approach. For the first time since Alaska Statehood, there will be two salmon fishery management jurisdictions in Cook Inlet. To avoid relying on the State to achieve any Federal management targets under amendment 16, NMFS has established OY for the Cook Inlet EEZ fishery and developed a harvest specifications process that will achieve that OY on a continuing basis while preventing overfishing of any of the salmon stocks of varying abundance that co-occur in the EEZ.

Comment 11: Amendment 16 addresses the complexities of a mixed stock fishery, with the added burden of separate adjacent jurisdictional authorities. The proposed rule addresses MSY and OY, the jurisdictional issues, and notes reliance on the State's scientific knowledge and management authority but does not describe what triggers fishing in the Cook Inlet EEZ Area. Because the State did not accept delegated management and because NMFS lacks management expertise, amendment 16 implements Federal management that is not reliant on State input. However, because the State frequently develops the best scientific information available for Cook Inlet salmon stocks, amendment 16 should be modified to provide that NMFS authorize EEZ fishing only after receiving notice from the State that doing so will not negatively impact the State's management goals and strategies.

Response: NMFS acknowledges the jurisdictional complexity related to this action, and the State's expertise in salmon management. This action is intended to establish a Federal salmon management framework that is not dependent on the State and has the flexibility to adapt to changing conditions. The annual status determination criteria, harvest specifications, and inseason management will be dependent on the best scientific information available and the circumstances present in each fishing year.

NMFS expects that it will develop management expertise and strengthen cooperative relationships with various Agency partners related to management of the Cook Inlet EEZ Area over time. NMFS acknowledges that the mixed stock nature of and status of weaker salmon stocks within the fishery can make it difficult to harvest all of the surplus yield for all component stocks and that the interaction between stocks must also factor into the definition of OY.

NMFS disagrees that the FMP should include language requiring approval from the State prior to opening salmon fishing in the Cook Inlet EEZ Area. Consistent with the direction of the District Court, NMFS has implemented management measures including a fishing season, fishing periods, and TACs to ensure that OY can be achieved without relying on the State.

Comment 12: Under the State's management and based on the State's preliminary numbers, the overescapement of sockeye in just two rivers in Upper Cook Inlet exceeded the total commercial harvest of sockeye for the entirety of Upper Cook Inlet and likely exceeded the escapement necessary for all other rivers in Cook Inlet. According to NMFS's own scientific information included in its analysis, overescapement is problematic because it results in ''foregone yield in the current'' year and ''may be expected to result in reduction in future recruitment,'' (*i.e.,* reduction in long-term yield). To further put these numbers in perspective, overescapement of sockeye in the Kenai and Kasilof in 2023 was more than NMFS's OY range—approximately 291,631 to 1,551,464—for the entire Cook Inlet EEZ salmon fishery for all species of salmon in Upper Cook Inlet. There is no discussion in proposed amendment 16 of how NMFS's management measures for the Cook Inlet EEZ salmon fishery will address and prevent rampant overescapement by the State and the resulting unutilized waste to ensure compliance with National Standard 1. Amendment 16 focuses only on the concept of avoiding overfishing, without making any meaningful effort to simultaneously prevent drastic underfishing by optimizing yield.

Response: NMFS acknowledges that Kenai and Kasilof sockeye salmon stocks have exceeded escapement goals in recent years, resulting in foregone yield. As described in the preamble to the proposed rule, salmon fishing in the Cook Inlet EEZ necessarily targets mixed stocks of salmon. Conservation measures to prevent overfishing on less abundant co-occurring salmon stocks are a primary driver of this foregone yield as they limit a complete harvest of the most abundant sockeye salmon stocks to prevent overfishing on less abundant salmon stocks. As referenced within the 2024 SAFE report, which was reviewed by the SSC, during recent years when Kenai and Kasilof river sockeye salmon escapement goals were exceeded, some sockeye, coho, and Chinook salmon escapement goals in Cook Inlet were not achieved at the status quo level of salmon harvest; thereby highlighting the difficulty of managing mixed stock fisheries to enable the harvest of potential yield while also achieving conservation objectives. Management measures that are required to prevent overfishing on all stocks are consistent with the Magnuson-Stevens Act.

As described in the response to *Comments 18, 25,* and *55,* Cook Inlet is a mixed stock fishery within which there are weak stocks (*i.e.,* stocks of relatively low abundance). This situation requires management decisions that can result in overescapement of abundant stocks, such as Kenai and Kasilof sockeye salmon. Providing for greater harvest of the more abundant stocks in the EEZ would create a significant risk of not meeting escapement goals for less abundant stocks and reducing or eliminating the harvestable surplus of these stocks available to all other salmon users. As noted above, NMFS has evaluated historical EEZ harvest levels and found that harvest in the EEZ could not be increased to fully harvest surplus Kenai and Kasilof salmon without causing serious impacts to other salmon harvesters and major conservation problems for other stocks. Whether management in State waters could be modified to increase harvest of these stocks closer to their natal streams without increasing pressure on the stocks of lower abundance in the EEZ is outside the scope of this action, as NMFS has no jurisdiction over State waters (as described in the response to *Comment 10*). The potential for overescapement to reduce future yields is addressed in the response to *Comment 18.*

The Magnuson-Stevens Act has no prohibition against foregone harvest, and in fact suggests foregone harvest is necessary when additional harvest of an abundant stock would also result in bycatch of species for which there is a conservation concern. In contrast, the

Magnuson-Stevens Act explicitly mandates that NMFS prevent overfishing. Therefore, in defining OY for a mixed stock fishery, NMFS cannot look at the strongest stocks in isolation. Here, OY is appropriately limited to EEZ waters and defined so as to identify the amount of cumulative harvest of all co-occurring EEZ stocks that provides the greatest net benefit to the Nation while preventing overfishing. This is consistent with NMFS's approach to salmon management on the West Coast where ''weak stock'' management is required to avoid exceeding limits for the stocks with the most constraining limits. Each year when setting harvest specifications, NMFS will evaluate the maximum potential harvest available in the Cook Inlet EEZ Area and will work to provide harvest opportunities to the extent possible, subject to the constraints of scientific and management uncertainty. As the information available to NMFS to manage salmon fishing in the Cook Inlet EEZ Area improves through implementation of this new Federal fishery management regime, it is possible that harvest levels could increase.

The State's management decisions prior to NMFS implementing amendment 16 regarding allocations among fishery sectors under State jurisdiction are State decisions that are outside the scope of this action.

Comment 13: This definition of OY is inconsistent with a 2018 NMFS legal memorandum describing that OY should not be subdivided between State and Federal waters.

Response: NMFS disagrees that amendment 16's definition of OY is inconsistent with the 2018 NMFS legal memorandum filed in *UCIDA* v. *NMFS.* The relevant portion of the legal memorandum stated, ''because the fisheries take place in the EEZ and State waters without formal recognition of the boundary between these two areas, the OY should not and cannot be subdivided into separate parts for the EEZ and State waters.'' At that time, management of Cook Inlet had never been divided into separate State and Federal management regimes under the FMP. As such, it was assumed that continued State management over the drift gillnet fishery throughout both Federal and State waters would continue through delegation under Magnuson-Stevens Act section 306(a). Delegation of certain Federal management authorities to the State would have maintained a single fishery that could operate without specific regard for the EEZ boundary, but the State declined delegation. Therefore, under amendment 16, which will create separate Federal and State fisheries, it is appropriate to define OY for the specific fishery under NMFS's jurisdiction—the Cook Inlet EEZ salmon fishery.

Comment 14: If NMFS could acknowledge that achieving OY/MSY escapement goals should be the driving factor in developing its FMP, then much of the complication built into amendment 16 would go away.

Response: NMFS acknowledges that an FMP must contain conservation and management measures, including ACLs and accountability measures, to achieve OY on a continuing basis and provisions for information collection that are designed to determine the degree to which OY is achieved. As stated above, here OY is defined for the fishery—which currently includes seven stocks or stock complexes of varying abundance—and accounts for the mixed stock nature of the salmon fishery in the EEZ and the needs of multiple user groups in identifying the harvest levels that will produce the greatest net benefit to the Nation across a variety of run sizes. The FMP's management measures are explicitly designed to achieve OY on a continuing basis while preventing overfishing, consistent with National Standard 1.

NMFS does not agree that achieving MSY or MSY escapement goals are its mandates. MSY is not a management target, as described above, and MSY identifies the maximum sustainable harvest level an individual stock could theoretically support if it was possible to target that stock in isolation and without uncertainty. OY is prescribed on the basis of MSY, as reduced by any relevant economic, social, or ecological factors. Here, for Tier 1 and 2 salmon stocks, MSY in the Cook Inlet EEZ represents all salmon in excess of the stock's escapement goal in a given year. For Tier 3 stocks, which have no reliable estimates of escapement, maximum catch over a recent range of years that are representative of current biological and environmental conditions is used as a proxy for MSY. But because it is not possible to target individual stocks of salmon in the EEZ, it is not possible to design conservation and management measures intended to fully harvest MSY for each stock, as such harvest levels would result in overfishing of the least abundant stocks. Instead, OY is defined for the fishery on the basis of MSY—in that it aims to achieve as much surplus yield for each stock as possible—but is reduced from MSY to account for interactions between stocks (ecological factors) and identify the harvest levels that will continue to support multiple active fishery sectors without resulting in any one stock routinely missing its escapement goal (*i.e.,* likely overfishing) or any user group losing access to the resource (economic factors). Fully harvesting MSY for Kenai late run sockeye in the EEZ, for example, could decimate co-occurring populations of salmon bound for Northern Cook Inlet, completely eliminating fishing opportunities for other users. Such an outcome would benefit one user group to the exclusion of all others and thus would not produce the greatest *net* benefit to the Nation. Here, NMFS has defined OY by carefully considering net benefits, the competing demands of the numerous stakeholders and tribes who rely on Cook Inlet salmon stocks, and the fundamental characteristic of co-occurring, mixed stocks in the Cook Inlet EEZ. NMFS concludes the management measures in this final rule will achieve OY as defined in amendment 16 on a continuing basis.

Comment 15: Federal oversight of this fishery is a must to obtain maximum harvest and sustainable yield.

Response: The Magnuson-Stevens Act mandates that Federal fishery management measures shall prevent overfishing while achieving OY, which is different from achieving maximum harvest or MSY. To the degree that the commenter is suggesting that Federal management will result in harvests equal to MSY, NMFS disagrees. To the contrary, many stocks of fish in the EEZ are harvested at levels well below their MSY because of the complex interactions between stocks; achieving MSY for certain stocks would result in overfishing of other stocks, which would be inconsistent with the first mandate of National Standard 1. Instead, Federal fishery management measures must achieve OY on a continuing basis. OY is defined as the amount of fish that:

(1) Will provide the greatest overall benefit to the Nation, particularly with respect to food production and recreational opportunities, and taking into account the protection of marine ecosystems;

(2) Is prescribed as such on the basis of the maximum sustainable yield from the fishery, as reduced by any relevant economic, social, or ecological factor; and

(3) In the case of an overfished fishery, provides for rebuilding to a level consistent with producing the maximum sustainable yield in such fishery (16 U.S.C. 1802(33)).

Comment 16: Using historical catch data from 1999–2021 is incorrect as a proxy for MSY and OY. This period begins after the State increased

escapement levels, resulting in large overescapements of sockeye in the Kenai and Kasilof Rivers and under-harvest of coho, pink and chum salmon. Because the State has not been managing the fishery on the basis of MSY, this historical catch data has no relationship with MSY. This continues poor State management practices in Federal management. NMFS should include harvest data from the 1980s.

Response: NMFS disagrees. To start, historical catch is not used as a basis for establishing MSY in this action for any stocks or stock complexes with escapement goals or estimates of total run size (Tier 1 and Tier 2 stocks). Rather, MSY represents the maximum potential harvest of a run in excess of the spawning escapement goal. The annual SAFE reports will review the best scientific information available regarding escapement goals and estimated run sizes. For Tier 3 stocks with no data on run size or total escapement, maximum catch over a recent range of years that is representative of current conditions is used as a proxy for MSY because it represents the best scientific information available to estimate MSY. In prescribing OY on the basis of MSY, NMFS used the best scientific information available to identify the range of harvest levels in the EEZ that will provide the greatest net benefit to the Nation by ensuring all stocks harvested in the EEZ can meet their escapement goals and the greatest number and diversity of stakeholders and fishery sectors will retain access to the resource. In other words, NMFS defined OY as the harvest levels that are expected to capture as much yield in excess of escapement goals as possible in the EEZ without any individual stock routinely not achieving these escapement goals and risking overfishing, thereby maintaining a harvestable surplus for all other salmon users.

The best scientific information available regarding the appropriate harvest levels in this mixed stock fishery are currently estimates of historic catch in years of high and low abundance across stocks from 1999–2021. As explained in the Analysis, the 1999–2021 time period was chosen due to the advent of the current abundance-based approach to management of salmon in Upper Cook Inlet. In addition, this time series represents the recent range of salmon productivity conditions that are representative of reasonably foreseeable future conditions, reflects a range of time when management measures both increased and decreased fishing opportunity in EEZ waters, and captures a range of different social and economic conditions within fishing communities. Furthermore, this period also reflects the time for which high quality and comparable data for nearly all fisheries and fishing communities throughout Cook Inlet are available. The OY range considers but does not include the 1980s because there was a different ecological regime in place in the North Pacific (highly productive for salmon stocks), seafood markets for salmon were significantly different (strong Asian demand and less competition from farmed salmon), and the regional population was significantly smaller. These factors all influence NMFS's consideration of the greatest net benefit to the Nation, including consideration of food production and recreational opportunities and taking into account the protection of marine ecosystems.

The harvest levels from 1999–2021 have resulted in numerous viable fisheries while preventing stocks from becoming overfished. While it may be possible to develop better information in the future as NMFS collects more data specific to the EEZ—and section 302(h)(5) of the Magnuson-Steven Act requires the Council to review OY on a continuing basis—at present, historic catch is the best scientific information available. Therefore, ranges of catch in years of high and low salmon abundance is an appropriate method to determine OY.

This action establishes a Federal management framework that accommodates varying levels of harvest over time as the information available to inform harvest specifications and both relative and absolute abundances of salmon change each year. NMFS reviewed fishery data dating back to 1966 when developing a definition for OY. Harvests by the drift gillnet fleet, and all other salmon users in Cook Inlet, have fluctuated dramatically over time based on both salmon abundance cycles and management decisions. Ultimately, as explained above, NMFS determined that the best scientific information available for prescribing OY is currently the estimates of historic catch in years of high and low abundance across stocks from 1999–2021.

Comment 17: The proposed calculation of MSY, OY, and TAC includes 3 years, 2018, 2020 and 2021, which were declared economic disasters by the Secretary of Commerce. This data should be omitted from all analyses of historic harvest.

Response: This action does not use historical catch data to define MSY or to set TACs, as explained above.

For the reasons explained in response to *Comment 16,* the best available science for developing OY includes historic catch data. Of the 2018, 2020, and 2021 fishery disaster determinations referenced by the commenter, only the 2020 disaster determination applied to the drift gillnet fleet. The 2018 and 2021 determinations only applied to the East Side set net fishery sector. The East Side set net fishery does not operate in EEZ waters. Further, NMFS disagrees that disaster and low harvest years should be omitted from consideration in defining OY, as they represent part of the range of conditions experienced in the fishery. In defining the lower bound of OY for the Cook Inlet EEZ Area, the three lowest EEZ harvests are averaged together, and this number identifies what optimum harvest levels might be in years when low stock abundance reduces harvest opportunities.

It should be noted that OY is not an annual management target but is a long-term objective. Harvests may fall above or below the OY range in some years. Furthermore, OY may appropriately encompass very low harvests when that is what is required to prevent overfishing on all stocks. For example, in the GOA groundfish FMP, the lower bound of the OY range is defined by the year with the absolute lowest fishery harvest in the time series and in the BSAI King and Tanner Crab FMP, the lower bound of the OY range is zero.

Comment 18: Multiple commenters expressed concern about overescapement reducing future yields of Cook Inlet salmon stocks. Commenters stated that underfishing (too little harvest) can jeopardize the capacity of a salmon stock to produce MSY on a continuing basis by allowing too many salmon to enter the stream to spawn and exceeding the carrying capacity of the spawning and rearing habitat, thereby reducing future runs. ADF&G data indicates all the salmon stocks in Cook Inlet are underfished, and with such low exploitation rates, we cannot be overfishing. The commenters stated that most salmon stocks in Cook Inlet are underfished with returns that have exceeded escapement goals. For example, Kenai and Kasilof River sockeye salmon have consistently exceeded escapement goals, sometimes by over a million fish. This action will continue or increase overescapement and result in overcompensation. Management practices that jeopardize the long-term health of the salmon resource reduce opportunities for harvesters and processors and harm the economies of fishing communities.

Response: NMFS disagrees that all salmon stocks in Cook Inlet are

underfished, that overfishing cannot occur in Cook Inlet, and that amendment 16 will jeopardize the long-term health of the salmon resource if the stocks of highest abundance exceed their escapement goals when harvest restrictions are required to protect stocks of lower abundance. As discussed in the 2024 SAFE report, escapements for some stocks of sockeye, coho, and Chinook salmon have been below spawning escapement goals during recent years when Kenai and Kasilof sockeye salmon have exceeded the upper bound of their escapement goals.

As discussed in section 3.1 of the Analysis, the need to conserve weaker stocks by reducing fishing effort sometimes results in foregone yield from more productive stocks. For salmon, this can result in escapement goals being exceeded, which is sometimes referred to as overescapement. NMFS has evaluated the best available science on overescapement. Appendix 14 of the Analysis is an independent analysis of the potential for overcompensation (reduced yield as a result of overescapement) in Kenai and Kasilof river sockeye salmon stocks. The SSC reviewed this analysis, which found that ADF&G's escapement goals were established within the range expected to produce MSY for those stocks, that ADF&G's point estimates of MSY were accurate, and that there is limited evidence for overcompensation across the observed range of escapements for Kenai and Kasilof sockeye salmon. Thus, while instances of overescapement will result in foregone yield in the current year, existing spawner-recruitment information does not indicate that overescapement has resulted in substantial reductions in recruitment and yield for the primary stocks harvested by the drift gillnet fleet in Cook Inlet. In other words, though the Kenai and Kasilof sockeye salmon stocks have recently exceeded their escapement goals, this has not resulted in a conservation problem for those stocks and available data does not indicate that overescapement has resulted in a reduction in future yields. NMFS concludes that increased fishing effort in the EEZ to fully harvest the available yield for Kenai and Kasilof sockeye salmon would result in serious conservation concerns for stocks of lower abundance, which would fail to achieve their escapement goals.

For Cook Inlet salmon stocks without escapement goals, information is not available to analyze overescapement or its potential impacts on future yields. In the absence of specific stock information, conservative management using suitable proxies while following the precautionary principle is consistent with the National Standard 1 guidelines for dealing with data-poor stocks (§ 600.310(e)(1)(v)(B) and (h)(2)). The guidelines provide flexibility in setting MSY and other reference points based on insufficient data and in consideration of stocks with unusual life history characteristics, including salmon. The risk of overfishing as a result of harvest rates that are too high is much greater than the uncertain and speculative risk of underharvest or overescapement. Therefore, precautionary management is appropriate for data-poor fish stocks.

From a practical perspective, it is not possible to manage the mixed stock salmon fishery in the Cook Inlet EEZ Area by harvesting surplus yield on all stocks because the composition, abundance, and productivity of stocks and species in the fishery vary substantially. Overescapement occurs in Cook Inlet, as noted in section 3.1 of the Analysis. Overescapement usually results from (1) a lack of fishing effort, (2) unexpectedly large salmon runs, or (3) management or economic constraints on the fishery. In this instance, management must constrain harvest of the largest, most productive salmon stocks to protect less abundant salmon stocks and species.

Comment 19: The Exxon Valdez litigation had documented damage to the Kenai River due to overescapement and the Exxon Valdez Oil Spill Trustees Council funded ADF&G research on damage from Kenai Sockeye overescapement and plaintiffs' compensation in part was for damage to future runs caused by overescapement. Now the State is managing the sockeye fishery in a manner that results in substantial overescapement, similar to what occurred after the oil spill.

Response: The response to *Comment 18* explains that the best scientific information available indicates that large escapements of sockeye salmon to the Kenai River have not resulted in reduced future yields and are not a conservation concern compared to the clear risks of overfishing and/or stocks failing to meet the lower bound of escapement goals. The claims and damages paid to plaintiffs in the decades of litigation arising from the Exxon Valdez oil spill are beyond the scope of this action.

Comment 20: The result of the overescapement on the Kenai and Kasilof rivers caused by commercial fishery restrictions wastes a food resource that belongs to the whole nation (see the Supreme Court's case of *Hughes* v. *Oklahoma* which reversed *Greer* v. *Connecticut*). It is in the whole Nation's interest as to what happens to salmon in Alaska. When Alaska became a state, the State compact with Congress was for the State to manage its fish and wildlife in the national interest. The State created ADF&G to manage fish and game in the national interest. It is no longer doing that. This is the reason for the involvement of NMFS and the Department of Commerce.

Response: The U.S. Supreme Court in *Hughes* v. *Oklahoma,* 441 U.S. 322, 338 (1979), held that a State could not prohibit transporting fish out of state for sale once caught. *Hughes* v. *Oklahoma* is not relevant to this action.

NMFS has determined that this action would achieve OY for the Cook Inlet EEZ Area and, in doing so, will result in the greatest overall net benefit to the Nation. The National Standard 1 guidelines provide that OY means the amount of fish that will provide the greatest overall benefit to the Nation, particularly with respect to food production and recreational opportunities, and taking into account the protection of marine ecosystems. This means NMFS must look at the impacts of its harvest management on all salmon stocks and stakeholders and cannot look at the interests of the drift gillnet fleet alone.

As noted in the preamble to the proposed rule, amendment 16 defines OY as the average range of target EEZ harvest across all species that maximizes fishing opportunities while preventing overfishing on any one stock. This OY range provides the greatest overall net benefits to the Nation because it ensures sustainable stock levels throughout the ecosystem, preserves multiple viable commercial fishery sectors for continued food production, and maintains a viable recreational fishing sector that attracts participants from throughout the Nation.

This OY range is expected to result in drift gillnet harvests near historic levels, protect less abundant salmon stocks transiting to Northern Cook Inlet, and ensure other commercial and non-commercial stakeholders in Cook Inlet continue to have access to salmon resources. Any management plan designed only to prevent overescapement in the Kenai and Kasilof rivers by increasing EEZ harvest would upset this balance, preempting other users, and likely causing stocks of lower abundance—particularly in Northern Cook Inlet—to more regularly miss their escapement goals, ultimately resulting in overfishing.

Comment 21: Use the flexibility within the National Standard 1 guidelines (§ 600.310(h)(2)) to adopt an escapement-based inseason management methodology similar to the State. If the State is allowing too much harvest in its jurisdiction, it will be reflected in too low escapement numbers, and Federal managers will know to restrict fishing. Likewise, if the State is not providing for enough harvest, daily escapement numbers will indicate a higher than acceptable final escapement, and Federal managers will know to allow more fishing time. One commenter noted that an alternative approach is needed for salmon because of the following: (1) unlike groundfish stocks, salmon reproduce only once; (2) the harvestable surplus is entirely new recruits and the catch comprises almost exclusively mature salmon; (3) productivity of a specific year class cannot be improved by limiting harvest in subsequent years; (4) foregone harvest cannot be recaptured in future years; and (5) abundance cannot be estimated effectively in advance. Therefore, inseason estimates of abundance using contemporaneous data, with appropriate management actions taken to assure escapement and optimum production in future years, is the most effective way to avoid the risk of overfishing.

Response: As set forth under section 301 of the Magnuson Stevens Act, National Standard 1 provides that conservation and management measures shall prevent overfishing while achieving, on a continuing basis, the optimum yield from each fishery for the United States fishing industry. Section 303(a)(15) of the Magnuson Stevens Act requires that each FMP establish mechanisms for specifying ACLs to prevent overfishing and include accountability measures to prevent ACLs from being exceeded and to correct overages of the ACL if they do occur. The National Standard 1 guidelines at § 600.310(h)(2) contemplate limited circumstances in which alternative approaches to establishing ACLs may be appropriate, and specifically cite Pacific salmon as an example of stocks that may require an alternative approach to ACLs. However, while § 600.310(h)(2) provides NMFS some flexibility to consider alternative means of establishing ACL mechanisms and accountability measures in FMPs, the National Standard 1 guidelines do not provide discretion to consider alternative means of establishing other reference points, like OFL or ABC. And any alternative approach to establishing ACLs must be consistent with the Magnuson-Stevens Act.

The primary function of status determination criteria, ACLs, and related requirements is to ensure that a scientifically-based approach is used for controlling catch to maintain stock abundance at the level necessary to prevent overfishing, ensure no stocks become overfished, and achieve OY in the fishery. Therefore, an alternative approach that is consistent with the Magnuson-Stevens Act must document how the alternative management measures would limit catch and explain how such measures would rely on the best scientific information available.

When the Council was developing the alternatives for analysis, the Council and NMFS considered using the State's salmon escapement goal management as an alternative approach for satisfying the ACL requirements of the Magnuson-Stevens Act under delegated management to the State (Alternative 2). Under amendment 12, the Council recommended this alternative approach for ACLs in the East Area. Escapement goals are specified annually, in terms of numbers of fish. The biology of salmon is such that escapement is the point in the species life history best suited for routine assessment and long-term monitoring. Using spawning escapement goals is consistent with the long-standing practice of using spawning escapement to assess the status of salmon stocks.

Under this alternative approach (not adopted in amendment 16), the mechanisms for specifying ACLs salmon stocks would be the State's scientifically-based management measures used to determine stock status and control catch to achieve the number of spawners necessary to produce MSY. The State's salmon management program is based on scientifically defensible escapement goals and inseason management measures to prevent overfishing. Accountability measures would include the State's inseason management measures and the escapement goal setting process that incorporates the best scientific information available on stock abundance.

Using the State's inseason management approach as an alternative approach to establishing ACLs is not possible under Federal management of a new fishery in the EEZ that will be managed separately from fishing in State waters. NMFS currently has no infrastructure for collecting escapement information in Cook Inlet and there is no guarantee NMFS managers would have access to information collected by the State quickly enough to make real time management decisions. Additionally, escapement information is not available from any source for many salmon stocks in Cook Inlet. The responses to *Comments 23* and *28* provide additional discussion of the procedural challenges of implementing escapement-based inseason management in this situation.

For management of the Cook Inlet EEZ Area as an entirely separate jurisdiction, using escapement-based inseason management as an alternative approach for ACLs may have additional limitations. Because there is a lag of multiple days (or longer for the Northern District salmon stocks currently with the greatest conservation risks) between encountering EEZ fisheries and being counted at escapement monitoring stations, that data may not be timely for the current management situation. This lag between receipt of data and action can have huge consequences in a fishery where a single opening can harvest well over 300,000 salmon per day. Further, just because one stock has reached an escapement goal and can sustain additional harvest that does not mean that all of the other stocks, which are highly mixed in EEZ waters, can support additional harvest. This issue is compounded by fishing in EEZ waters occurring before all other users. Basing management solely on escapement would make it more difficult to ensure there was at least some harvestable surplus available to all salmon users in Cook Inlet across all jurisdictions when cooperation is not guaranteed through established agreements.

During the development of this action—first at the Council, then as a Secretarial FMP amendment after the Council failed to recommend any management measures—no one identified any alternative means of specifying ACLs for the Cook Inlet EEZ Area that would be consistent with the Magnuson-Stevens Act, rely on the best scientific information available, and limit catch to ensure no overfishing occurred. Therefore, amendment 16 uses the default ACL approach described in the National Standard 1 guidelines—establishing preseason harvest limits based on the best scientific information available at the time stock assessments are drafted and harvest specifications are recommended. This is similar to how ACLs are set for salmon along the US West Coast and how the 2019 Pacific Salmon Treaty Agreement establishes pre-season limits on Chinook harvest under the Treaty.

Comment 22: The State, several regional sportfishing organizations, and

stakeholders in the Northern District believe amendment 16 will disrupt conservation and management benefits realized by the State's management plans, which these commenters have found to successfully balance the complexity and challenges of managing multiple user groups in a highly populated area. They emphasize that the State's management plans were developed by the BOF to ensure long-term sustainability of both strong and weak salmon stocks, optimize yields and opportunities of the diverse fisheries, and allocate benefits among user groups. They feel this action will result in overfishing of weak salmon stocks, produce suboptimum yields, and confound the State's effective in-season management. This is not consistent with the Magnuson-Stevens Act or National Standard 1.

Response: NMFS recognizes the complex and challenging nature of Cook Inlet salmon fisheries. NMFS disagrees that amendment 16 will undermine the State's Central District Drift Gillnet Fishery Management Plan, result in overfishing, or produce suboptimal yields.

As described in the preamble to the proposed rule, NMFS recognizes that salmon harvest in the Cook Inlet EEZ occurs first and can impact the amount of salmon available to upstream users and to meet spawning escapement goals. In developing this final rule, NMFS considered the management measures implemented by the BOF and worked to balance competing interests and provide opportunity for all users of salmon throughout Cook Inlet.

NMFS acknowledges that, in some years, this action may allow for more days of drift gillnet fishing in the Cook Inlet EEZ Area relative to previous State management plans. NMFS will use TACs that account for uncertainty and harvest in other fisheries in order to prevent overfishing on any less abundant salmon stocks transiting through the Cook Inlet EEZ Area. As described in section 2.5.2.1 of the Analysis and the response to *Comment 25,* TACs will account for stocks of lower abundance and prevent overfishing on weak stocks. The TACs are expected to result in total harvests fairly consistent with the status quo. NMFS will have inseason management authority to adjust TACs and close or reopen the fishery as needed to account for inseason conditions. NMFS and the Council will use the best scientific information available and work to improve salmon monitoring and assessment where possible/practicable, and will coordinate with the State to the extent possible. Further, as discussed in the section on changes from the proposed to final rule, NMFS is reducing the number of open fishing periods from two to one from July 16 to July 31 to directly respond to the comments from users in Northern Cook Inlet who said they depend on the conservation corridor established under State management.

NMFS expects that this final rule will continue to provide for a harvestable surplus for all Upper Cook Inlet salmon fishery sectors in both State and Federal waters. NMFS anticipates that under this final rule all Cook Inlet salmon fisheries will remain viable and produce economic benefits commensurate with the status quo.

Status Determination Criteria and Annual Catch Limits

Comment 23: Many commenters raised concerns about using TACs for salmon harvest in the EEZ, including the following perspectives.

Use of a TAC established on preseason projections will result in inappropriate catch. While uncertainty may be accounted for when setting ABC and OFL, it lacks the benefit of inseason information on run strength, weak stocks, harvests, and other important factors. Cook Inlet salmon run sizes and timing are variable and unpredictable, especially in recent years. Establishing a TAC increases the likelihood of either overfishing or underfishing and reduces the likelihood of remaining within the escapement goal range for those stocks with goals. Further, if there are deviations from forecasted run size, procedural constraints on Federal management may exacerbate the resulting problems. These issues combined could jeopardize sustainability, especially for weak stocks, and could result in overfishing of weak stocks.

Commenters from the drift gillnet fleet emphasized that forecasts will be inaccurate, management objectives will not be met, harvest will be unnecessarily reduced, MSY and OY will not be achieved, and this action will cause adverse economic impacts.

Other commenters voiced concerns that a TAC would not be conservative enough given that this action sets TACs for a first-in-line fishery, which would require the State to reduce State water fisheries harvest if the pre-season forecasts are not realized. Commenters from other commercial and recreational salmon fishery sectors in Upper Cook Inlet, as well as associated communities, were significantly concerned that TACs would not be precautionary enough and EEZ harvests would reduce or eliminate the harvestable surplus available to other users. Some commenters cited unpredictable escapement data that would require unexpected fishery closures.

Response: Under section 303(a)(15) of the Magnuson-Stevens Act, the FMP must include a mechanism for specifying ACLs at a level that overfishing does not occur in the fishery, including measures to ensure accountability. NMFS is therefore required to have ACLs and management measures to implement them, and amendment 16 includes these required elements. TACs (*i.e.,* preseason catch limits) are established to ensure fishery harvests remain below ACLs. Because salmon of the same species originate from separate stocks but cannot be visually distinguished, in amendment 16, TACs are set at the species level based on the cumulative estimated contribution by stock, at least until inseason genetic information becomes available. There is uncertainty inherent to forecast-based catch limits. In establishing TACs, NMFS will take into account management uncertainty and public comment, just as NMFS and the SSC will consider scientific uncertainty in setting OFL and ABC (and therefore ACL since ACL equals ABC) each year. OFL and ABC are specified for each stock or stock complex. TACs are established for species rather than stocks or stock complexes because inseason it is not currently possible to differentiate among stocks of the same species. TACs for each species are set based on the aggregate ABC for each component stock and stock complex and account for the assumed contribution of each stock or stock complex to total catch to ensure ABC is not exceeded for any one component stock. NMFS will monitor the fishery daily and use inseason management measures and adjust the TAC, if practicable, to ensure that catch amounts are appropriate for the realized run strength. And NMFS expects that TACs set for the Cook Inlet EEZ will be suitably precautionary to avoid overfishing.

Establishing TACs is consistent with the NMFS's management approach for salmon stocks in ocean fisheries on the West Coast with an ACL requirement (*e.g.,* stocks that are not subject to a tribal/international treaty or ESA exception). The Pacific Salmon Treaty also establishes pre-season catch limits for Chinook salmon covered by the Treaty. NMFS considered alternative approaches to establishing ACLs as described in the response to *Comment 21.*

NMFS will consider all available information about Cook Inlet salmon

run strength and coordinate with the State to the extent practicable when making management decisions for the Cook Inlet EEZ Area. However, this action establishes Federal reference points and harvest specifications for the Federal fishery, as required by the Magnuson-Stevens Act, which are different from existing State management measures.

NMFS acknowledges that the ACL requirement and additional Federal notice requirements—mandated by the Magnuson-Stevens Act and the APA—are less flexible in adjusting fishing opportunity based on inseason information about run size when compared to managing by monitoring escapement goals and exercising emergency order authority pursuant to State law, as under State management. This is described in section 2.5.2.6 of the Analysis. NMFS also acknowledges that fishing in the Cook Inlet EEZ Area takes place before all other salmon fisheries in upper Cook Inlet and that it can impact salmon escapement for each stock as well as the harvestable surplus available to all other subsequent salmon users. NMFS acknowledges the uncertainty inherent to forecast-based catch limits. However, NMFS designed the harvest specification process and management framework implemented by this action to account for the inherent uncertainty in preseason estimates and the need for inseason management, as well as the mixed-stock, first-in-line nature of the Cook Inlet EEZ Area fishery, consistent with the Magnuson-Stevens Act and the APA.

Comment 24: Appropriate harvest rates are not considered when determining what should be harvested in the Cook Inlet EEZ Area. The 2002 ADF&G mark-recapture population estimate study (Regional Information Report 2A03–20, published 2003) on coho, pinks, and chums found that the commercial fishery harvest rates on coho were about 10 percent, pinks were around 2 percent, and chums were around 6 percent. These harvest rates were the results of State management policies that were in effect at that time. To further skew the harvest rates since 2002, when the study was done, the commercial fishery was even more restricted by State salmon management plans that continue to fail to meet the requirements of Magnuson-Stevens Act. All harvest rates should be based on 81 percent overfishing exploitation rate and a 65 percent MSY exploitation rate. MSY exploitation rates should be 63 percent for coho, 53 percent for pinks, and 56 percent for chums to achieve MSY on these stocks over the long term.

Response: Harvest rates (exploitation rates) could not be considered for the Federal management of stocks of pink, chum, and coho salmon in Upper Cook Inlet because there are not sufficient data available to estimate such harvest rates. The mark-recapture studies cited by the commenter are now more than 20 years old, and salmon populations are not stable over time. Rather, as cited in the Analysis and the SAFE report, a variety of publications, including State of Alaska escapement goal reports, annual management reports, and stock assessments, indicate that Alaska's salmon populations experience substantial year-to-year fluctuations in abundance over time. Population estimates from a given year are not indicative of the population abundance during other years. There are no contemporary estimates of total run size or overall spawning escapement for stocks of coho, pink, and chum salmon for all of Upper Cook Inlet, and historical estimates are highly uncertain. As such, exploitation rates have not been estimated during recent years and therefore, it is not possible to precisely estimate MSY for these stocks based on current assessment methods. Moreover, there are no estimates of population abundance for these stocks to inform preseason harvests specifications. NMFS will use the best available scientific information to inform harvest specifications and management decisions for the Cook Inlet EEZ Area.

Comment 25: Several commenters, including Alaska Native tribes in the region, emphasized the importance of precautionary salmon management and felt that amendment 16 was not suitably precautionary given large potential harvests by the drift gillnet fleet, which includes a mixture of strong and weak stocks.

One commenter noted that many Northern District salmon stocks lack estimates of annual escapement, escapement goals, and numeric data (historic or current). Cook Inlet salmon fisheries harvest mixed stocks and need to be managed to account for this. Precautionary management would help meet escapement goals. NMFS should fund genetic data collection and more escapement monitoring.

Another commenter suggested setting conservative TACs for the first 6 years. One commenter generally suggested that management measures in addition to TACs would be needed. Another commented stated that NMFS must develop a plan for pre-season commercial fishing closures as well as in-season commercial fishing closures based on in-season escapements.

Response: NMFS acknowledges the importance of precautionary fishery management and avoiding overfishing on all salmon stocks. Furthermore, NMFS acknowledges that some Cook Inlet salmon stocks are highly abundant and may support additional harvests while other salmon stocks are a major conservation concern and can support little or no harvest. Over time, NMFS will work to expand the scientific information available to manage Cook Inlet salmon stocks. Amendment 16 includes accountability measures, and NMFS can implement additional accountability measures if needed to avoid exceeding ACLs.

NMFS must establish harvest specifications before fishing begins. NMFS agrees that there is a need for precaution when there is significant scientific or management uncertainty associated with salmon management in Cook Inlet. Drift gillnet fishing in Cook Inlet harvests mixed stocks of salmon. The best scientific information available will be used to assess the status of each salmon stock in Cook Inlet and set harvest limits each year. The harvest limits set for each species will consider the proportional contribution of each salmon stock to total catch, when known. Species-level TACs may also be reduced from combined ACLs to protect weak stocks when there is uncertainty about catch composition (a key type of management uncertainty). Furthermore, NMFS will close commercial fishing for all salmon species in the Cook Inlet EEZ when catch limits for one or more stocks are met or exceeded, or if other information becomes available that indicates overfishing is likely. This will help ensure that overfishing does not occur on any one stock.

NMFS disagrees that the management framework established by this action is not sufficiently precautionary. As described in the preamble to the proposed rule, every year the Council's SSC will establish ABCs for each Cook Inlet salmon stock, accounting for scientific uncertainty by reducing ABC from OFL. TAC would then be set for each salmon species to account for management uncertainty to ensure that total catch does not exceed the ABC for any stock and may also include additional reductions to account for social, economic, and/or ecological factors. As noted in the changes from proposed to final rule section, this action reduces the number of fishing periods per week in the Cook Inlet EEZ Area to one opening per week from July 16–July 31 to allow salmon stocks of lower abundance to migrate northward. To further address mixed-stock conservation needs, drift gillnet fishing

in the Cook Inlet EEZ area will be closed after a TAC for a single species is reached or would be exceeded by another opening because drift gillnet gear catches all stocks present in the EEZ and the fleet could not focus harvest on only those species for which there is remaining TAC.

NMFS acknowledges that there is some uncertainty in estimated EEZ harvests but recognizes it as the best scientific information available. Forecasted salmon abundance and associated uncertainty will be considered each year to set harvest specifications that are appropriately precautionary. After implementation of this action, NMFS will collect high quality data to determine total EEZ harvests.

For further explanation of NMFS's approach to management of this mixed stock fishery, see the response to *Comment 55.*

Comment 26: The State cannot commit to adjusting the work schedule and timing of Cook Inlet salmon management and science products to accommodate the proposed Federal harvest specification process. Salmon scales take time to read and age, data takes time to analyze, and models take time to run and fact check. Expediting these processes could result in errors. We already anticipate that this action will increase the volume and complexity of information requests that ADF&G receives from fishery participants, increasing staff workload.

Response: Nothing in this action requires the State to change the timing of their reports, publications, or other work products. However, as described in sections 4.7.3.2 and 4.8 of the Analysis, NMFS acknowledges that this action will increase costs and burden to State and Federal fishery management agencies. NMFS acknowledges the timing, logistical challenges, and costs associated with fishery data collection, analyses, and the timing requirements of the Federal process for the SSC and Council to recommend harvest specifications and for NMFS to implement them by publishing proposed and final harvest specifications in the **Federal Register**.

NMFS and the Council will use the best scientific information available at the time that harvest specifications must be developed or other fishery management decisions made. This may include information from the State or other sources, and NMFS will work with the State to the extent practicable. NMFS, the Council, and the SSC will evaluate the level of uncertainty in available data and information and adjust harvest specifications and other management measures accordingly.

Comment 27: To establish a reliable TAC based on the proportional contribution of each stock to this fishery, better data must first be established including in-season genetics and escapement information for Northern Cook Inlet salmon stocks. Test fisheries need to take place where northern-bound fish are most easily differentiated from Kenai-bound fish. Using averages of previous years to establish the TAC is no substitute for timely in-season management. NMFS may want to support the State's test fishery or establish another test fishery to monitor salmon numbers, species, and stocks entering upper Cook Inlet. Timely genetic analysis from test fisheries could provide better real-time abundance information for management.

Response: NMFS acknowledges that there are incomplete genetics and escapement data for Cook Inlet salmon stocks, as described in section 2.5.2.2 of the Analysis. However, NMFS will use the best scientific information that is available, including information from test fisheries and historical data on genetic stock composition to manage salmon fishing in the Cook Inlet EEZ Area. Any uncertainties in the available scientific information will be accounted for, and management measures will be adjusted based on the level of precaution warranted. As discussed in the response to *Comment 28,* NMFS will monitor the fishery and make management decisions on a daily basis depending on currently available information on realized salmon abundance.

NMFS will work to improve the level of information available to manage the fishery and may consider other management tools including Federal test fisheries and genetics sampling to address future management needs.

Inseason Management

Comment 28: Daily management of the fishery must take place like all other State salmon fisheries.

Response: NMFS will monitor catch from each Federal fishing day, catch in other fisheries, and any other information available about inseason salmon abundance to make management decisions for the Cook Inlet EEZ Area on a daily basis. NMFS may close the fishery, reopen it, or—potentially—adjust the TAC amounts to account for emerging inseason conditions. However, unlike the State and as described in the proposed rule, NMFS must comply with the APA when implementing any fishery management decision. The need to comply with the APA's notice requirements for all inseason actions, and the Magnuson-Stevens Act requirement to establish ACLs, make it infeasible to implement an escapement-based salmon management approach like that used by the State.

Comment 29: Catch per unit effort (CPUE) should be used instead of a TAC to manage salmon fishing in the Cook Inlet EEZ Area.

Response: NMFS disagrees that CPUE should be used to manage salmon fishing in the Cook Inlet EEZ Area as CPUE data alone would be insufficient to meet Federal Magnuson-Stevens Act and National Standards requirements. CPUE data would provide managers with the information about catch rates of salmon in the fishery, but not about the specific stocks caught. Even with stock specific catch information, CPUE data for salmon harvests may not correspond to overall run size or numbers of fish necessary to meet spawning escapement goals. As described in section 2.4.4 of the Analysis, methods that use CPUE (*e.g.,* catch per delivery) would likely not provide sufficient information to judge whether catches had exceeded a level thought to cause overfishing for a stock. NMFS does agree that CPUE can, under some circumstances, provide useful inseason information for fishery managers.

Comment 30: The proposed TAC does not discuss the criteria that will be used to close the fishery. The only criterion that is presented is a salmon harvest of 291,631. This single criterion of 291,631 salmon does not meet Magnuson-Stevens Act and the National Standards requirements.

Response: This final rule does not establish a TAC of 291,631 salmon. NMFS will establish TACs in a separate proposed and final harvest specifications process.

The preamble to the proposed rule for this action comprehensively describe how TACs for each salmon species would be established according to the process laid out in the Harvest Specifications and Annual Processes section, while the criteria for closure are described in the Inseason Management section. This action establishes the lower bound of the OY range at 291,631 salmon. The OY range is not used to establish harvest specifications or close salmon fishing. The OY range is a long-term average amount of desired yield from the fishery, not an annual management target, and thus 291,631 represents the lower bound of the desired long-term average yield from the fishery. As described in the response to *Comment 10,* the OY range specified by this action is consistent with the

Magnuson-Stevens Act and the National Standards.

Cook Inlet EEZ Commercial Salmon Fishing Management Measures

Comment 31: Several commenters objected to the prohibition on drift gillnet fishing in State and Federal waters on the same calendar day. They indicated this will be inefficient, have adverse economic impacts, decrease flexibility to harvest salmon as migration paths and run timing vary, and be inconsistent with National Standard 6. Another commenter noted that there is not a similar prohibition on recreational fishing in both State and Federal waters on the same day. Some commenters also suggested these requirements are intended to be punitive against members of the drift gillnet fleet.

Response: This final rule provides that it is unlawful for commercial fishery sector participants to:

- Set drift gillnet gear within, or allow any portion of drift gillnet gear to enter, State waters on the same calendar day that drift gillnet gear is also deployed in the Cook Inlet EEZ Area while commercial fishing for salmon in the Cook Inlet EEZ Area (§ 679.117(b)(1)(v));
- Use a vessel named, or required to be named, on an SFFP to fish for salmon in the Cook Inlet EEZ Area if that vessel fishes for salmon in Alaska State waters on the same calendar day (§ 679.117(b)(1)(vii));
- Possess salmon, harvested in Alaska State waters, on board a vessel commercial fishing for salmon in the Cook Inlet EEZ Area or to have salmon on board a vessel at the time a fishing trip commences in the Cook Inlet EEZ Area (§ 679.117(b)(1)(viii) and (ix)); and
- Land salmon harvested in Alaska State waters concurrently with salmon harvested commercially in the Cook Inlet EEZ Area'' (§ 679.117(b)(1)(xii)).

As noted in the preamble to the proposed rule (Other Commercial Fishery Management Measures and Prohibitions section), NMFS has determined that there is a need to restrict vessels from fishing in both State and Federal waters during the same calendar day. The Cook Inlet EEZ Area is managed separately from adjacent waters managed by the State. NMFS must be able to accurately account for harvest in the Cook Inlet EEZ to avoid exceeding the Federal TAC, prevent overfishing, and accurately manage to the established Federal reference points, as required by the Magnuson-Stevens Act, which NMFS would be less able to do if catches from State and Federal waters were mixed on a vessel during a single fishing trip.

If vessels could fish in both State and Federal waters on the same calendar day, landings could contain a mix of salmon harvested in both the State and Federal fisheries. Some method to attribute a proportional amount of catch to Federal waters would be needed. This would embed assumptions about the correct proportions and thus would substantially increase uncertainty for Federal managers and would likely require significantly more conservative management decisions for the Cook Inlet EEZ Area. This could also create an incentive for fishermen to over-report State waters catch to keep the Cook Inlet EEZ open to commercial salmon fishing longer, which would necessitate additional monitoring, recordkeeping, and reporting measures. In short, NMFS could not accurately monitor EEZ harvests and ensure the fishery complies with all Magnuson-Stevens Act requirements if vessels could move between State and Federal waters on the same day and land fish caught in both jurisdictions.

As described in the response to *Comment 37,* these prohibitions do allow vessels to choose whether to fish in State or Federal waters on each calendar day. This allows vessels to operate where catches are highest or efficiency is maximized depending on their port location or any other factor.

Also as described in the response to *Comment 37,* NMFS did consider management that would schedule the Federal drift gillnet fishery on separate days to alleviate the catch accounting concern but chose not to implement this approach due to significant uncertainty about the total number of drift gillnet fishing days in Cook Inlet that would result in highly unpredictable effort and catch.

NMFS acknowledges that there is not a prohibition on recreational (sport) salmon fishing in State and Federal waters on the same day. As described in section 4.5.2.2 of the Analysis, fewer than 70 salmon per year are estimated to be harvested by recreational salmon fishing in the Cook Inlet EEZ Area. Furthermore, recreational anglers are not allowed to harvest additional salmon by fishing in either or both areas—the same bag limit applies in State and Federal waters and anglers are prohibited from catching or possessing a bag limit for both State and Federal waters on the same day. Therefore, there is no identified management need to prohibit recreational fishing in State and Federal waters on the same calendar day. If recreational salmon harvests in the Cook Inlet EEZ Area increase in the future, the Council may recommend and NMFS may choose to implement additional restrictions on recreational salmon fishing as needed.

Comment 32: If NMFS implemented escapement-based management rather than a TAC, then there would be no need to prohibit vessels from fishing in State and Federal waters in the same trip.

Response: Escapement-based management was considered during the development of this action under Alternative 2, which would have delegated management authority to the State. Delegated management under Alternative 2 would not have included a prohibition on fishing in both State and Federal waters on the same calendar day and provided for the State's use of their escapement-based tools to achieve Federal reference points. However, the State refused to accept delegated management. The response to *Comment 21* describes why escapement-based management as currently conducted by the State could not be implemented by this action.

Comment 33: Opening the whole EEZ and drift gillnet Area 2 will spread out the small drift gillnet fleet (less than 300 boats in recent years), reducing pressure on returning non-sockeye stocks and allowing maximum harvest of abundant sockeye stocks.

Response: Under this final rule, the entire Cook Inlet EEZ Area will be open to drift gillnet salmon fishing during established fishing periods. Because this is similar to historical State management of the Area, as described in the response to *Comment 25,* NMFS remains concerned about mixed-stock harvests and impacts to less abundant stocks and will manage salmon fishing within the Cook Inlet EEZ to prevent overfishing on all stocks through the use of TACs and inseason information.

While there have been fewer participants in recent years, this trend could reverse and over 200 additional latent permits could reenter the fishery, which must be considered in this long-term management framework.

Drift gillnet Area 2 is entirely within State waters and will continue to be managed by the State and is outside the scope of this action.

Federal Commercial Fishing Season and Fishing Periods

Comment 34: Many commenters expressed concern about the amount of fishing that this action will allow between July 15 and August 15, when certain stocks are migrating north through the Cook Inlet EEZ. Fishing by the drift fleet in EEZ waters from July 16 through July 31 is highly impactful

due to large catches and mixed stocks. Commenters noted that currently the drift gillnet fishery can only fish once per week during this critical period for migrating stocks and additional openings from July 16 through July 31 are authorized only under certain conditions and in limited areas. Multiple regional tribes, Northern district communities, and regional sportfishing organizations recommended that NMFS allow only one EEZ opening per week between July 15 and July 31, or until the season closure date. The State and one other commenter proposed that NMFS close the Cook Inlet EEZ to fishing after July 15.

Response: Upon reviewing the significant public comment received regarding the number of fishing periods in the proposed rule for this action and the importance of Cook Inlet salmon resources to all salmon users throughout Cook Inlet, NMFS agrees that it is prudent for conservation of Cook Inlet salmon stocks to reduce the number of commercial fishery openings in the Cook Inlet EEZ Area to one per week in late July. The reason for this change is discussed in detail above in the section on changes from the proposed to final rule and briefly summarized here.

In addition to establishing TACs that are suitably precautionary in light of uncertainty, the other primary means by which NMFS prevents overfishing and ensures all stocks are able to meet their escapement goals is by managing the amount and timing of scheduled fishing periods. In this final rule, NMFS has decided to decrease the number of commercial fishing openings between July 16 and July 31 from two to one per week. This more closely aligns with the number of openings under the status quo and is responsive to the significant public comments received on the importance of this time period to Northern Cook Inlet salmon stocks that transit through the EEZ to spawning grounds. From June 19 until July 15, and from August 1 to August 15, there will still be two drift gillnet fishery openings per week, unless otherwise closed. NMFS expects that when there are high salmon abundances, and no constraining stocks, this management framework will allow for harvest of TACs in the Cook Inlet EEZ Area.

Decreasing the number of fishing periods in the second half of July may also have other important conservation and management benefits. First, it allows for more even utilization of the beginning, middle, and late returning components of each salmon stock. Second, it may decrease the risk of a smaller TAC for one salmon species being reached and resulting in a closure of the fishery before the larger, high value sockeye salmon TAC can be fully achieved. For example, while Chinook salmon are not harvested in large quantities by the drift gillnet fleet in the Cook Inlet EEZ Area, declines in Chinook salmon abundance have, in some cases, entirely eliminated the harvestable surplus of Chinook (*i.e.,* escapement goals cannot be achieved even if no fish are harvested). As a result, the Chinook salmon TACs established for the Cook Inlet EEZ Area are likely to be relatively small. Although very few Chinook have historically been caught after August 1, significant numbers have been caught in the second half of July. Reducing fishing time in the second half of July makes it less likely that a Chinook TAC will be reached, triggering a closure before the sockeye salmon TAC has been harvested.

As described in the preamble to the proposed rule, NMFS considered but rejected other management measures that would provide fewer drift gillnet fishing periods per week in the Cook Inlet EEZ Area. NMFS determined that allowing only one 12-hour drift gillnet fishing period per week in the Cook Inlet EEZ Area throughout the entire season may not allow for adequate harvest opportunities in the Cook Inlet EEZ Area in years when salmon abundances are higher. Similarly, a fixed July 15 closure would be expected to unnecessarily limit harvest in the Cook Inlet EEZ Area to less than half of its historical amount.

Comment 35: The State objected to the drift gillnet fishing season ending on August 15, as it stated that allowing fishing in the Cook Inlet EEZ during the August 1 to August 15 time period conflicts with its 1 percent rule. Under that State regulation, from August 1 to August 15, if less than 1 percent of the season's total drift gillnet sockeye salmon harvest has been taken per fishing period for two consecutive fishing periods in the drift gillnet fishery, the fishery is restricted to the west side of Upper Cook Inlet where the fleet is less likely to catch salmon from weak stocks or those needed to provide a harvestable surplus to other users. These area restrictions are also implemented if the East Side Set Net fishery is closed. The State stated that the proposed closure date of August 15 rule is not based on conservation objectives and fails to coordinate with the existing Cook Inlet allocation processes.

Response: NMFS chose not to implement a regulation similar to the State's 1 percent rule for the Cook Inlet EEZ Area. NMFS expects that the season closure date of August 15 combined with the TAC will be sufficient to address conservation and management of coho salmon stocks in Cook Inlet. In most Federal fisheries, a TAC-based closure occurs before a season closure date. NMFS does not anticipate that drift gillnet fishing in the Cook Inlet EEZ Area will be open through August 15 in all years. NMFS will close the fishery when necessary to prevent exceeding a TAC. However, in years when salmon abundance supports higher TACs, two fishery openings per week for all of the season besides July 16–July 31 is expected to provide sufficient opportunities to harvest the available TAC by August 15 without creating conservation concerns for stocks of lower abundance.

Comment 36: Consider opening drift gillnet fishing in the Cook Inlet EEZ and Area 2 for two or three 12-hour periods a week. When the Kenai River reaches the lower end of the sockeye escapement goal, the commercial fleet should get additional openers to maximize harvest to protect the river from overescapement.

Response: As described in the preamble to the proposed rule and above, NMFS carefully considered the number of weekly commercial drift gillnet fishing periods. As described in the response to *Comment 2,* management of the Cook Inlet EEZ Area must balance utilization of abundant salmon stocks with protecting less abundant stocks from overfishing and ensuring stocks important to users other than the drift gillnet fleet continue to meet their escapement goals. While two 12-hour openings per week was proposed by NMFS, public commenters identified significant potential conservation concerns associated with increasing Cook Inlet EEZ Area commercial fishing time from the status quo. Opening the Cook Inlet EEZ Area to commercial fishing for three 12-hour periods per week would represent a major increase in fishing time and could significantly exacerbate the conservation concerns identified in this final rule. Kenai sockeye salmon reaching their escapement goal does not provide information to managers that other salmon stocks (*e.g.,* other sockeye, coho, and Chinook salmon) can also support additional harvest at that time.

There are also potential procedural challenges associated with significant inseason changes or adjustments. Sections 2.5.2.6 and 2.5.13 of the Analysis detail the constraints of the harvest specifications (*i.e.,* the TAC amounts) that it must publish prior to the fishing season. If there are

unexpectedly large salmon returns, fishing may continue for the remaining days for the season until any TAC amount is reached. If a TAC amount is reached and the fishery closes, but the best scientific information available indicates there is still a harvestable surplus, NMFS may adjust the TAC and reopen the fishery until August 15, or the revised TAC amount(s) is reached, whichever comes first. In addition, the Federal reference points established by this action and required by the Magnuson-Stevens Act are not directly equivalent to State escapement goals.

Drift gillnet Area 2 is entirely within State waters and will continue to be managed by the State and is outside the scope of this action.

Comment 37: Do not conduct Federal openings on the exact same schedule as State openings. Combining the two on the same day will result in nothing more than lost opportunity and inefficiency of effort and cost.

Response: This final rule at § 679.118(e) provides that the Cook Inlet EEZ will be open to drift gillnet fishing for two, 12-hour periods each week, from 7 a.m. Monday until 7 p.m. Monday, and from 7 a.m. Thursday until 7 p.m. Thursday from the later of the third Monday in June or June 19 until July 15, and from August 1 to August 15, and one, 12-hour fishing period on Thursdays from July 16 to July 31, until either (1) the TAC is reached, or (2) August 15, whichever comes first.

As discussed in the proposed rule and sections 2.5.9 and 4.8 of the Analysis, NMFS considered whether to open the Cook Inlet EEZ Area to drift gillnet fishing on different days than when State waters are open. NMFS chose to open the Cook Inlet EEZ Area on the same days to avoid unpredictable impacts to Cook Inlet salmon stocks, as additional days of fishing in a week would put additional pressure on stocks of lower abundance, allowing those stocks less opportunity to pass through the EEZ with sufficient abundance to both meet escapement goals and provide a harvestable surplus to all other users. If the EEZ were open on days when adjacent State waters were closed, and the State maintained its existing management plan, it is likely there would be a significantly increased number of total drift gillnet fishing days in upper Cook Inlet. This would increase the likelihood of harvests that are too high (the drift gillnet fleet has the potential to harvest over 300,000 salmon per opening) and it may not be possible to mitigate the impacts of additional fishing days each week in Cook Inlet, even with severe restrictions or closures of later occurring fishery sectors. Further, to achieve OY while preventing overfishing in salmon fisheries, an important consideration is balancing harvest and escapement over the period salmon are returning. Providing regular periods when fishing is closed allows early, middle, and late returning components of each salmon stock to move up Cook Inlet to their natal spawning streams. By largely maintaining the existing fishing schedule, these migratory periods where fishing is closed—and which have largely been successful in allowing Northern District stocks to meet their escapement goals—are maintained.

Fishery participants may select whether to fish in State or Federal waters each day to maximize their harvest opportunities as salmon stocks move up Cook Inlet. NMFS acknowledges that, within a single fishing day, this may decrease efficiency and increase costs during times when salmon abundance may be unpredictably concentrated on the State/EEZ boundary. Across years, there is a high level of variability in the spatial and temporal distributions of salmon stocks migrating through Cook Inlet waters, including the Cook Inlet EEZ Area, due to changes in wind, tide, water temperature, and other factors. Therefore, it is very difficult to predict with accuracy any change in efficiency that may result from this rule.

Comment 38: Several drift gillnet stakeholders requested that the commercial fishing season start several weeks early (June 1) and finish later (September 15) to increase harvests of all salmon species, including pink and chum salmon.

Response: As described in the preamble to the proposed rule, historically drift gillnet fishing in Cook Inlet has not occurred prior to the third week in June as sockeye, coho, chum, and pink salmon are not present in commercially significant quantities in the Cook Inlet EEZ. The start date is based on this history of commercial fishing in the EEZ area. Further, as discussed in the preamble to the proposed rule, NMFS has concerns about additional impacts from the drift gillnet fleet to Chinook salmon that are present in the Cook Inlet EEZ before June 19. Opening after mid-June helps avoid potential additional impacts to early-run Cook Inlet Chinook salmon stocks. These stocks migrate through upper Cook Inlet in May and early June. For these reasons, NMFS did not choose to open drift gillnet fishing within the Cook Inlet EEZ prior to the third week in June.

NMFS has concerns that additional fishing time after August 15 could result in disproportionate impacts to coho salmon stocks in Cook Inlet. Fishing in the Cook Inlet EEZ after August 15 would be expected to primarily increase harvests of this species. Based on recent indices of spawning escapements, additional harvests of coho salmon may result in a failure to achieve spawning escapement goals. The EEZ is relatively far from Northern District streams and associated weirs where escapements are monitored. As such, fishery openings targeting coho salmon (which have an elevated conservation concern) in the EEZ carry the largest risk in terms of potential harvest on Northern District stocks prior to information about the achievement of spawning escapement goals. In contrast, State waters are closer to natal streams and can be prosecuted more precisely on target stocks and during a time when escapement data is more likely to be available since there is significantly less travel time between the State fishery and weirs. This action does not modify management of State waters, and it is expected that the majority of coho salmon harvests, which occur in State waters after August 15, will be unaffected by this action.

NMFS disagrees that closing the fishery later than August 15 would increase pink and chum salmon harvests. Historically, by August 15, over 99 percent of the average Chinook, sockeye, pink, and chum salmon harvest has been completed in both State and EEZ waters as those salmon species have largely moved through Cook Inlet EEZ waters and up into Cook Inlet State marine and fresh waters by that time (section 4.5.1.2.1. of the Analysis). Therefore, additional Cook Inlet EEZ Area fishing time after August 15 would be expected to impact only coho salmon, for which there are conservation concerns.

Comment 39: With amendment 16, NMFS's inseason management authority to close the fishery should be based on best available science and salmon escapement goals. NMFS needs more access to funding and resources to carry out these goals.

Response: NMFS will use the best scientific information available when making any inseason management decisions. NMFS will consider all sources of information when determining what constitutes the best scientific information available. However, for the reasons explained in *Comment 23,* NMFS inseason management decisions are based on TACs. NMFS will consider the escapement goals and the best scientific information available regarding

projected run sizes for an upcoming fishing season during the stock assessment and harvest specifications process. The SSC and NMFS will account for scientific uncertainty in these projections when setting ABC, and the Council and NMFS will also consider management uncertainty in recommending and establishing TACs. Inseason closures before the end of the season are most likely to be based on information suggesting an additional opener would result in exceeding a TAC for any species or could result in overfishing of any stock. NMFS will consider available spawning abundance information inseason (*i.e.,* progress toward meeting escapement goals) to ensure the abundance assumptions underlying the TACs are appropriate and will identify any potentially needed management changes.

NMFS will strive to make timely and efficient inseason management decisions, consistent with the APA, Federal regulations, and other applicable law. NMFS will work to build capacity and resources for salmon management in the Cook Inlet EEZ Area over time, however NMFS has determined that it can successfully implement amendment 16 at this time.

Comment 40: Pacific salmon evolved into the species we know today. Today, various stocks of salmon are considered threatened or endangered under the Endangered Species Act (ESA). Originally, indigenous people developed a social custom that delayed the start of salmon fishing and allowed salmon to reach their spawning grounds and complete their lifecycle, and this has been continued by government regulators. Flexibility in the opening and closing dates is needed to account for variations in run timing and migration patterns, especially under climate change, to avoid adversely affecting sport and subsistence fishers. The proposed new date of the third (or possibly fourth) Monday in June allows more flexibility.

Response: NMFS recognizes the evolution of conservation and management measures for salmon stocks as jurisdictions have changed over time. No salmon stocks spawning in Alaska are listed under the ESA. As described in the response to *Comment 38,* NMFS established the fixed season start and end dates to maintain historical harvest patterns and avoid adverse impacts to non-target salmon stocks within the Cook Inlet EEZ Area. However, NMFS does agree that flexibility is important to account for variations and contingencies and expects that the TACs and associated inseason actions will ensure that harvest is adjusted to the specific conditions experienced during each fishing season to provide harvest opportunity and prevent overfishing, within the established commercial fishery season dates (approximately June 19 to August 15). NMFS may close and reopen fishing during the season to account for run conditions.

Comment 41: The season ending date needs to reflect the size of the return, which is not known until the very end of a salmon run or shortly thereafter.

Response: NMFS acknowledges that the realized run size of a stock is not fully known until the end of the fishing season, but has selected a fixed season closure date that falls after nearly all EEZ harvest has historically taken place and avoids potential new impacts on coho stocks of lower abundance. However, NMFS will use its inseason management authorities specified at § 679.25 to adjust the closure of the fishery based on TAC or other scientific information each year—up to August 15—including available indices of abundance (*e.g.,* test fishery data and spawning escapements).

Monitoring, Recordkeeping, and Reporting Requirements

Comment 42: ADF&G supports the monitoring, recordkeeping, reporting, legal gear, and prohibitions proposed for the commercial salmon fishery in the Cook Inlet EEZ Area. These requirements are necessary to minimize conflicts between fisheries in State and Federal waters, ensure accurate catch accounting, and facilitate enforcement of Federal regulations. The proposed prohibitions on fishing in both State and EEZ waters on the same day and having on board or delivering fish harvested in both State and EEZ waters are particularly important to meeting these objectives and the State supports including them in the final rule. We also support the proposed prohibitions on landing or otherwise transferring salmon that is caught within the Cook Inlet EEZ Area in the EEZ to ensure that harvesting vessels delivering to a tender vessel do so within State waters.

Response: NMFS acknowledges the support for these fishery management measures. NMFS agrees that the measures in this final rule are necessary to minimize conflicts between fisheries in State and Federal waters, ensure accurate catch accounting, and facilitate enforcement of Federal regulations.

Comment 43: ADF&G supports the proposed monitoring requirements to enforce the prohibitions on drift gillnet fishing in State and Federal waters on the same day, including requirements for commercial salmon fishing vessels in the Cook Inlet EEZ Area to operate a VMS and complete a Federal logbook. NMFS may wish to consider onboard monitoring requirements such as electronic monitoring or observers to ensure adequate total catch accounting.

Response: NMFS acknowledges the support for the VMS and Federal logbook management measures described in the proposed rule and required by this final rule. As discussed in sections 2.5.6 and 4.7.2.2 of the Analysis, NMFS considered but did not require electronic monitoring or observers due to high costs and limited additional management utility beyond the measures contained in this final rule.

Comment 44: NMFS received comments that a VMS requirement is not necessary. These comments indicated that the drift gillnet fishery has minimal or no bycatch of marine mammals, sea birds, or protected fish stocks; there are no closed economic zones nearby; and that there is no VMS requirement in salmon fisheries in the East and West Areas of the EEZ, where ADF&G reporting requirements are deemed sufficient. Commenters also asserted that NMFS did not provide a legitimate or sufficient justification for the VMS requirement. Several commenters also said that they felt NMFS was imposing it as a punishment. One commenter asked if other forms of electronic monitoring are required. Commenters also noted that the VMS devices cost 3,000 dollars, which can be a significant portion of their gross earnings in seasons when there is a declared fishery disaster, and require additional monthly fees to operate.

Response: The final rule at § 679.117(b)(1)(xiv) prohibits a vessel named, or required to be named, on an SFFP from operating in the waters of Cook Inlet with drift gillnet gear on board any day the Cook Inlet EEZ Area is open to commercial salmon fishing without a functioning VMS as described in § 679.28(f). Regulations at § 679.28(f)(6)(x) requires a vessel named, or required to be named, on an SFFP issued under § 679.114 to use VMS when operating in the waters of Cook Inlet with drift gillnet gear on board on any calendar day the Cook Inlet EEZ Area is open to commercial salmon fishing. NMFS has determined that use of a VMS is necessary to effectively and efficiently manage the fishery. A VMS requirement is not punitive, it is not based on assumed bycatch of protected species nor intended to reduce bycatch, and NMFS disagrees that there are no closed fishing areas adjacent to the Cook Inlet EEZ Area. NMFS relies on VMS for most Federal fisheries off Alaska, particularly

when fishing vessels must comply with area restrictions. Vessels drift gillnet fishing for salmon in the Cook Inlet EEZ Area are prohibited from fishing in the adjacent EEZ waters south of the Anchor Point line at all times and, on the same calendar day, in the State waters directly adjacent to the eastern, western, and northern boundaries of the Cook Inlet EEZ Area. As stated above, for the purposes of catch accounting and enforcement it is critical for NMFS to understand where a vessel has been fishing—in State or Federal waters. Drift gillnet vessels that are fishing for salmon in the Cook Inlet EEZ are therefore subject to closed areas, and VMS is a standard technology used to monitor compliance with these regulations.

NMFS acknowledges that VMS is not a requirement in the East Area commercial troll salmon fishery. However, management of the East Area is delegated to the State, which allows fishing to occur seamlessly across the EEZ boundary. The State has well-established monitoring and enforcement infrastructure as well as other regulations to manage the fishery without the use of VMS. Similarly, the delegated management approach proposed for the Cook Inlet EEZ Area under Alternative 2 (section 2.4.8.1 the Analysis) was not expected to include a VMS requirement given the State's existing management tools and expertise. However, the State would not accept delegated management authority, and therefore under this final rule VMS is needed to enforce the prohibition against harvesting salmon in both State and Federal waters on the same calendar day.

As described in sections 2.5.6 and 4.7.2.2 of the Analysis, NMFS considered but chose not to require more costly onboard observers or electronic monitoring camera systems in this fishery. Therefore, VMS data and logbooks are necessary to ensure accuracy of reported fishing effort, catch accounting, and compliance with regulations. Critically, NMFS managers will depend on VMS to determine the effort and projected catch in order to inform management decisions. Furthermore, without VMS, NOAA Fisheries Office of Law Enforcement would have to rely exclusively on resource-intensive patrols by air and sea; methods that are not as consistent as VMS in verifying that no fishing is occurring in closed waters and confirming fleet-wide reported fishing effort information.

Vessel owners will be responsible for the cost of obtaining and operating a VMS. As discussed in section 4.7.2.2.7 of the Analysis, NMFS estimates the cost of purchasing a compliant VMS unit at 3,100 dollars. One-time installation and tax costs are estimated at 888 dollars. Annual service and maintenance is estimated at 206 dollars. NMFS acknowledges that these requirements place additional burden on fishermen. However, Federal funds may be available to qualified vessel owners or operators for complete reimbursement of the cost of purchasing type-approved VMS units, which could offset over 75 percent of the total purchase and installation cost for fishery participants.

To facilitate compliance with the VMS requirement, NMFS has provided information on obtaining VMS and opportunities for reimbursement within the small entity compliance guide published with this final rule. Beyond VMS, this final rule does not require other electronic monitoring for vessels commercially fishing for salmon in the Cook Inlet EEZ.

Comment 45: VMS devices impose a significant privacy cost, requiring vessel owners to transmit their exact location to NMFS every hour of every day, regardless of why they are using their vessel.

Response: NMFS disagrees. VMS use would be required when operating a vessel named, or required to be named, on an SFFP in the waters of Cook Inlet with drift gillnet gear on board, and only on days when the Cook Inlet EEZ Area is open to commercial salmon fishing. When a vessel is operated outside the waters of Cook Inlet, the Cook Inlet EEZ Area is closed, or no drift gillnet gear is onboard the vessel, the VMS unit would not be required to be activated and transmitting. VMS data are collected for many Federal fisheries. Section 402(a)(2) of the Magnuson-Stevens Act authorizes the collection of data necessary for the efficient management of fisheries but provides for restrictions on the release of that data beyond NMFS. VMS collects vessel location information in near real time that it uses to ensure efficient management and compliance with regulations. VMS data collected for law enforcement purposes is considered confidential under sections 311(b)(1)(a)(vi) and 402 of the Magnuson-Stevens Act. Federal regulations at § 679.28(f)(3)(v) provide that vessel owners participating in a fishery that requires a VMS must make the VMS transmitter available to ''NMFS personnel, observers, or an authorized officer.'' Federal regulations at § 600.1509(b) limit the circumstances under which personally identifying information, including business identifiable information, can be disclosed beyond authorized entities, such as NMFS. NMFS does not release confidential data to the public unless directed by a court order. If NMFS uses VMS data in publications, it is aggregated to prevent release of confidential information.

Comment 46: Will the drift gillnet fishery participants be required to maintain a digital logbook?

Response: This final rule does not require a digital logbook. Under regulations at § 679.115, this action requires vessel operators to complete and submit logbooks in paper or electronic format. NMFS will make logbook sheets available to participants at no cost.

Comment 47: The proposed rule appears to allow new participants into the commercial fishery by requiring only a Federal fisheries permit and provides no explanation or justification for doing so. Commercial fishing for salmon in Federal and State waters in Cook Inlet has been restricted to State CFEC limited entry permit holders since 1974. If the permitting requirements under this action allow new participants by no longer requiring a CFEC permit, that will significantly devalue the CFEC permits held by existing participants. If NMFS is not opening the fishery up to new participants, it must clarify the ambiguity in the proposed rule in response to this comment.

Response: This action does not modify the State requirements related to CFEC permits. As described in section 2.5.6 of the Analysis, NMFS issues Federal permits authorizing participation in Federal fisheries and allowing for implementation of Federal monitoring, recordkeeping, and reporting requirements in order to manage fisheries. This final rule at § 679.114(b)(1) requires vessel owners or operators to obtain a SFFP to commercially fish for salmon in the Cook Inlet EEZ. NMFS will issue SFFPs free of charge. A SFFP is not a Federal limited entry permit. As described in section 2.5.15 of the Analysis, a Federal limited entry program was considered but not selected.

Although the SFFP is not a limited entry permit, vessels that land salmon from the Cook Inlet EEZ in Alaska must also comply with all applicable State requirements, which include the requirement to have the appropriate State CFEC permit, which is a limited entry permit. Because landing or transferring fish in the EEZ is prohibited, and there are significant logistical constraints to landing salmon outside of Alaska, NMFS anticipates that all participating vessels will land

their fish within the State of Alaska where they would be required to have State CFEC S03H limited entry permits. This will help ensure that historical participants in the fishery are not displaced or disrupted by new entrants and avoid negative impacts to CFEC permit values.

As described in section 2.5.15 of the Analysis, in the future the Council may consider whether it is necessary to recommend an FMP amendment to limit entry in the Cook Inlet EEZ Area.

Comment 48: Can a vessel registered in a separate Alaska gillnet area (*e.g.,* a vessel fishing in Bristol Bay state waters) participate in the Federal Cook Inlet fishery?

Response: No, as explained in response to *Comment 47,* in order to use drift gillnet gear in the Cook Inlet EEZ Area, participants are required to have a SFFP. State CFEC permit requirements fall under the purview of the State and are not modified by this final rule. NMFS anticipates that a CFEC S03H permit for Cook Inlet drift gillnet would continue to be required to land fish caught using drift gillnet gear in the Cook Inlet EEZ Area in Alaska. Participants should consult the applicable State of Alaska regulations for a definitive answer regarding landing requirements.

Comment 49: The State supports maintaining the requirement for drift gillnet vessels in the EEZ to have the appropriate CFEC permit(s) to land salmon or other species caught in the EEZ within the State or enter State waters.

Response: NMFS acknowledges this comment. This final rule does not modify any State requirements for landing salmon or other species caught in the EEZ within the State or transiting through State waters with drift gillnet gear on board.

Other Commercial Salmon Fishing Management Measures and Prohibitions

Comment 50: The State supports the proposed legal gear definition for drift gillnet fishing of a net no longer than 200 fathoms (365.76 m) in length, 45 meshes deep, and maximum mesh size of no greater than 6 inches (15.24 cm). The proposed definition is consistent with State regulations and would help maintain consistency with recent fishery operations in terms of effort and selectivity and enable managers to estimate projected catches in the fishery more effectively.

Response: NMFS acknowledges this comment.

Comment 51: Are the net length requirements the same as State waters or can a single permit fish 200 fathoms (365.76 m) in Federal waters?

Response: This final rule at § 679.118(f)(1) limits the length of drift gillnet gear in the Cook Inlet EEZ Area to a maximum length of 200 fathoms (365.76 m) for all participants. Fishery participants should consult State of Alaska regulations when determining what amount of gear is allowable when transiting State waters and landing salmon in Alaska with the CFEC permit(s) they hold.

Comment 52: One commenter stated that no more than 150 fathoms (274.32 m) of gillnet gear per permit should be allowable. Another suggested that NMFS impose the same State of Alaska CFEC rules regarding permits (*i.e.,* allow 150 fathoms (274.32 m) for 1 CFEC permit, and 200 fathoms (365.76 m) for 2 CFEC permits).

Response: NMFS disagrees with these recommendations. As described in section 4.5.1.2.1 of the Analysis, up to 200 fathoms (365.76 m) of drift gillnet gear may be used by participants who are drift gillnet fishing in the Cook Inlet EEZ Area. NMFS does not anticipate this final rule will increase the allowable length of gear and result in increased harvests in the Cook Inlet EEZ Area, as State restrictions on the amount of gear a vessel can have on board will still apply when transiting through State waters following a fishing trip in the Cook Inlet EEZ Area.

Fishery participants should consult State of Alaska regulations to determine the amount of fishing gear they are allowed to have on board while transiting through State waters and landing salmon in Alaska.

Recreational Fishing

Comment 53: The State supports the proposed management measures for recreational anglers in the EEZ, including requirements for allowable gear, processing harvested salmon and reporting harvest. The proposed rule would establish bag and possession limits in Federal regulations consistent with current State regulations; however, we note that State regulations could change in the future and result in different regulations for anglers harvesting salmon in State waters and the EEZ.

Response: NMFS acknowledges this comment.

National Standard 2

Comment 54: NMFS failed to use the best scientific information, as required by National Standard 2. One example of this is the data used to calculate a potential TAC, as it is unknown what percent of fish have been harvested in the EEZ. ''Best guess'' data should not be used.

Similarly, NMFS relied on State catch records, but those may be skewed by 20 percent or more due to the history of overescapement and pulling the in-river fish counters prior to the end of the later runs. The one good historical reference is the Offshore Test Fishery, which should be used in the analysis and to set TACs. Previous years run data cannot be considered reliable because Cook Inlet has not been properly managed for many years which has resulted in overescapement and stock declines. Consider modifying the historical percent of drift gillnet harvests attributed to the Cook Inlet EEZ to 65 percent.

Response: NMFS disagrees that the management measures implemented by amendment 16 and this final rule rely on information that is inconsistent with National Standard 2. National Standard 2 provides that conservation and management measures shall be based upon the best scientific information available. NMFS considered and weighed all of the information available in making the decisions, including public testimony, to develop and approve amendment 16, respectively.

NMFS used the best scientific information to inform the Analysis, which includes comprehensive fish ticket data including locale codes. Previously, data regarding harvests, landings, and statistical areas in Upper Cook Inlet did not differentiate between State and Federal waters. Therefore, NMFS had to develop a methodology to estimate historic salmon harvest in the Cook Inlet EEZ. The methodology used to develop EEZ harvest estimates for the Cook Inlet EEZ Area is presented in section 4.5.1.2.3 of the Analysis, along with a description of the associated uncertainties. This method and the results were reviewed and approved by the SSC, which agreed that the Analysis and harvest specification process relies on the best scientific information available. NMFS received no comments providing additional data to estimate EEZ harvest and no suggested alternate methodologies and cannot arbitrarily increase the attribution of historical harvest to the EEZ in the absence of any supporting data. Therefore, NMFS determined that the estimates presented in the Analysis constitute the best scientific information available.

However, this action establishes a fishery management framework that is adaptive, and is expected to improve the scientific information available for management of Cook Inlet salmon stocks over time. Once amendment 16 is implemented, NMFS will collect the

landings information needed to directly and precisely determine EEZ harvests. NMFS will review the information available to manage Cook Inlet salmon stocks each year, including any data gaps and uncertainties. As actual data is collected on harvest in this new fishery, NMFS will include that information in the ongoing assessment of what constitutes best scientific information available at that time, reviewed by the SSC, to establish harvest specifications and manage the Cook Inlet EEZ Area.

NMFS agrees that the offshore test fishery may be a useful source of information for management of the Cook Inlet EEZ salmon fishery, but disagrees that it should have relied on it. The offshore test fishery provides standardized CPUE information. However, as described in the response to *Comment 29* and in section 2.4.4 of the Analysis, CPUE data could not provide sufficient information to evaluate salmon abundance and determine whether catches exceed a level that could cause overfishing.

National Standard 3

Comment 55: Defining fishing as limited to the Cook Inlet EEZ violates National Standard 3. NMFS's definition of the fishery fails to manage salmon stocks as a unit throughout their range. Splitting the fishery into a Federal and State fishery makes the Federal fishery subordinate to the State fishery because the State fishery will continue overescapement. If there are harvestable surpluses, waiting to find out via the State fishery will mean the EEZ fishery will be compromised by State management.

Response: As explained in greater detail in the proposed rule, NMFS has determined that amendment 16 is consistent with National Standard 3. As set forth under section 301 of the Magnuson Stevens Act, National Standard 3 provides that, to the extent practicable, an individual stock of fish shall be managed as a unit throughout its range, and interrelated stocks of fish shall be managed as a unit or in close coordination.

The key term here is ''practicable.'' It is not practicable for NMFS to manage salmon stocks into State waters where NMFS has no management jurisdiction, and, thus, NMFS has designed management measures that allow it to manage stocks of salmon as a unit throughout the portion of their range under NMFS's authority, grouping interrelated stocks of salmon together because vessels cannot target individual stocks in the EEZ. Amendment 16 will allow NMFS to manage to optimum levels of EEZ harvest while preventing overfishing, but NMFS cannot rely on National Standard 3 as a basis to assert management authority over State waters.

Furthermore, the National Standard 3 guidelines explain how to structure appropriate management units for stocks and stock complexes (§ 600.320). These guidelines state that the purpose of National Standard 3 is to induce a comprehensive approach to fishery management (§ 600.320(b)). The guidelines define management unit as a fishery or that portion of a fishery identified in an FMP as relevant to the FMP's management objectives and state that the choice of a management unit depends on the focus of the FMP's objectives and may be organized around biological, geographic, economic, technical, social, or ecological perspectives (§ 600.320(d)). As discussed above, in defining the fishery, NMFS primarily focused on co-occurring salmon stocks harvested within the Cook Inlet EEZ Area, as that geographic area defines the routine limits of NMFS's management jurisdiction.

There are unique technical, ecological, and economic features of salmon fishing in the Cook Inlet EEZ Area that further support limiting the management unit to the Cook Inlet EEZ. As described in the preamble to the proposed rule, drift gillnet gear captures all salmon in an area, and an entangled salmon cannot be released without an extremely high mortality rate. Further, in EEZ waters, salmon stocks are highly mixed, and catch in the EEZ includes both the Kenai and Kasilof stocks of sockeye salmon that are currently highly abundant, as well as much less abundant Northern District salmon stocks. In contrast, in nearshore waters, individual salmon stocks can be targeted by fishing adjacent to the river a specific salmon stock is returning to. This is not possible in EEZ waters. In other words, the EEZ is ecologically unique compared to near-shore waters due to the highly mixed stock nature of the fishery, with varying abundances and compositions of the stocks caught. The stocks that are mixed in the EEZ may be more discretely targeted in State waters management districts. Therefore, salmon fishery management in the EEZ requires an approach that ensures the stocks of lowest abundance are not overharvested before they reach their natal streams. The Cook Inlet EEZ Area is also economically unique because the drift gillnet fleet has exclusive use of the area for commercial salmon fishing. Within State waters, there are multiple commercial and non-commercial fishery sectors operating to selectively target specific individual stocks to the extent practicable, with management measures in place to limit catch and mortality on stocks at risk of overfishing.

Federal management of the Cook Inlet EEZ Area under amendment 16 achieves National Standard 3 objectives through coordination with the State to the extent practicable before, during, and after each fishing season, as described in the harvest specifications and annual processes section of this preamble. This includes reviewing the available scientific information for management of Cook Inlet salmon stocks held by the State, as well as other sources, and estimating what harvests are expected in State waters to inform harvest limits for the Cook Inlet EEZ Area that are designed to prevent overfishing on all Cook Inlet salmon stocks. NMFS and the Council will evaluate both where harvest of salmon stocks may be constrained by the presence of stocks of low abundance and where there may be opportunities to harvest additional salmon that would not otherwise be utilized. NMFS will provide data on early EEZ catches to the State to inform run strength forecasts for management of all other upper Cook Inlet salmon fisheries.

National Standard 4

Comment 56: This action discriminates against Cook Inlet commercial fishers. Amendment 16 violates National Standard 4 as it does not allocate fishing privileges in a way that is fair and equitable. It places a TAC on one group of harvesters (the drift gillnet fleet) in one area (the EEZ), without a similar requirement on any other group. This can severely affect the economic viability of the drift gillnet fleet if the TAC is set incorrectly, and the drift gillnet fleet is precluded from harvesting the excess salmon. In addition, requiring a VMS system to commercial fish in Federal waters is not equitable as there is no similar requirement for the recreational fishery sector, or any VMS requirement for vessels fishing salmon in the East Area.

Response: NMFS disagrees that amendment 16 is inconsistent with National Standard 4, or that it allocates harvest in a manner that is not fair and equitable to the drift gillnet fleet. As set forth under section 301 of the Magnuson Stevens Act, National Standard 4 provides that conservation and management measures shall not discriminate between residents of different states. This final rule does not in any way discriminate between residents of different states. National Standard 4 further provides that, if it becomes necessary to allocate or assign

fishing privileges among various United States fishermen, such allocation shall be (1) fair and equitable to all such fishermen; (2) reasonably calculated to promote conservation; and (3) carried out in such manner that no particular individual, corporation, or other entity acquires an excessive share of such privilege.

To start, this action allocates all commercial fishing privileges in the Cook Inlet EEZ to the drift gillnet fleet—NMFS cannot conclude that an allocation made to a single sector is not fair and equitable for that sector. No other commercial sector is subject to a TAC because no other commercial sector is permitted to fish in the EEZ at all. The drift gillnet fleet has historically harvested over 99.99 percent of the salmon caught in the Cook Inlet EEZ. The recreational fishery sector in the Cook Inlet EEZ harvests the remaining amount, an estimated average of 66 fish per year. This action is expected to maintain the harvest range of both sectors in the EEZ and does not allocate any harvest away from the drift gillnet fleet.

Although allocations must be fair and equitable and reasonably calculated to promote conservation, not all management measures required by the Magnuson-Stevens Act are subject to the same analysis. Neither the use of TACs to manage fishery effort nor the requirement to install VMS are allocations. The Magnuson-Stevens Act requires ACLs for fisheries managed under the Magnuson-Stevens Act, and TACs are how NMFS implements ACLs. And because fishing will take place adjacent to multiple closed areas, VMS is needed to enforce and monitor time and area closures. But even if NMFS were required to show that TACs or VMS requirements were fair and equitable to the drift gillnet fleet when compared to regulations that apply to the only other authorized sector in the EEZ, the recreational sector, it easily meets that burden here. Because the recreational sector catches under 100 fish per year in the EEZ and because recreational anglers are prohibited from possessing or landing the bag limit for both State and Federal waters on the same day—and thus there is no way that sector could increase its harvest opportunities compared to the status quo—neither a TAC nor VMS is needed to control recreational harvest or enforce rules for recreational fishermen.

The rationale for requiring VMS for commercial salmon fishing vessels in the Cook Inlet EEZ Area but not the East Area is described in the response to *Comment 44.*

If harvests by the recreational fishery sector increase, then NMFS may implement monitoring, recordkeeping, or reporting measures. For the time being, on-the-water and dockside enforcement of the recreational fishery sector is sufficient because the same bag limits apply across State and Federal waters for a single calendar day.

The allocation decisions referenced in National Standard 4 do not apply to decisions made by other management authorities that govern fishing outside of the Cook Inlet EEZ.

Comment 57: The proposed TAC does not address priority use for Federal Subsistence.

Response: Although it is unclear from the comment what the commenter means by ''Federal Subsistence,'' NMFS acknowledges that, in Alaska, subsistence taking of fish and wildlife is regulated by Federal law under Title VIII of the Alaska National Interests Land Conservation Act (ANILCA), which accords a priority for taking of fish and wildlife for subsistence uses over recreational/sport and commercial users on Federal public lands in Alaska (16 U.S.C. 3102, 3114). However, here NMFS is managing the Cook Inlet EEZ Area (*i.e.,* Federal marine waters) pursuant to the Magnuson-Stevens Act, and therefore Title VIII of ANILCA does not apply to this action regulating Federal marine waters in the Cook Inlet EEZ. The Magnuson-Stevens Act does not have a subsistence priority for fisheries in the EEZ.

Comment 58: Multiple commenters, including municipalities, trade associations, and fishing guides located in the Matanuska-Susitna Valley indicated that stable and predictable salmon fishing opportunities for all commercial and non-commercial users have both provided food security and an economic base for the region (communities of Palmer, Wasilla, Knik, Houston, Willow, Skwentna, Talkeetna, and Trapper Creek). These commenters cited several economic studies, which concluded that a broad base of fishing activities and fishing activities with conservative regulations, limits, and harvest opportunities (*e.g.,* recreational and subsistence) generate considerable economic benefit for each fish harvested.

Response: NMFS acknowledges the importance of salmon to fishermen and communities in Northern Cook Inlet, and when there are declines in salmon abundance, it results in adverse economic impacts. For discussion of the potential economic impacts on communities from this action, see sections 4.7.1.3 to 4.7.1.4 of the Analysis.

Comment 59: Several commenters felt this action would increase Cook Inlet EEZ Area salmon harvests, which would require the State to implement more restrictive fishery management measures for the Northern District commercial and non-commercial fisheries and may cause overfishing of weak stocks, such as the Susitna sockeye stock and the coho stock. By increasing commercial harvest, this action will exacerbate the inequity between the drift gillnet fleet and Northern Cook Inlet fishing groups. Drift gillnet permit holders have historically been the only commercial fishermen allowed to harvest salmon in Federal waters and also have better harvest opportunities in State waters.

Response: As described in section 4.7.1.3 of the Analysis, this action is not expected to increase salmon harvests in the Cook Inlet EEZ. Therefore, historical harvests by all fishery sectors in both State and EEZ waters should be maintained. As described in the response to *Comment 25,* this action will account for weak stocks and uncertainty when setting TACs for the Cook Inlet EEZ. NMFS acknowledges that harvest in the Cook Inlet EEZ Area occurs before all other salmon users in upper Cook Inlet and before there is robust information on realized inseason salmon abundance, both generally and for specific stocks. The uncertainty associated with this and risks of reducing or eliminating the harvestable surplus for other salmon users will be accounted for in both the harvest specification process and inseason management decisions. NMFS also acknowledges that the drift gillnet fleet is one of the largest salmon harvesters in Cook Inlet and has fishing opportunities in both State and Federal waters.

Comment 60: The Magnuson-Stevens Act emphasizes fairness in allocation and the production of food. To that end, the drift gillnet fleet should have not only meaningful harvest opportunities for sockeye but also a fair chance to bring northbound coho to market.

Response: As described in section 4.5.1.2.2 of the Analysis, the drift gillnet fleet is generally the largest or second largest harvester of coho salmon in Cook Inlet. On average, they harvest over 30 percent of the coho salmon in Cook Inlet, with an increasing harvest trend from 1999 to 2021. This results in an approximately even split between the drift gillnet fleet, the commercial set gillnet sector, and all non-commercial fishery sectors (recreational, personal use, and subsistence). This action is not expected to significantly reduce drift gillnet harvests of coho salmon. NMFS

determined that this action balances food production and recreational opportunities across all users in Cook Inlet while also protecting salmon stocks and the marine ecosystem. If there are increased harvests by the drift gillnet fleet, it is expected that the harvest of other users would necessarily be reduced, which NMFS concludes would reduce the fairness of salmon resource allocations in Cook Inlet by preempting or even eliminating harvest opportunities for other users, many of which can only operate in State waters.

Comment 61: Where in amendment 16 are the management plans the State will follow? For example, amendment 16 does not address closures of the East Side set net fishery and the implications for Federal management. The East Side set net fishery is the second largest fishery in Cook Inlet but has been ignored. The failure to include the entire fishery has decimated the East Side set net fishery, which has been restricted and closed based on illegal and unscientific objectives.

Response: NMFS does not include management measures in this action for salmon fishing in State waters. The East Side set net fishery sector and other salmon fishery sectors operating in State waters are described in section 4.6 of the Analysis. The East Side set net fishery sector occurs entirely within State waters. NMFS has no jurisdiction to implement management measures within State waters in Cook Inlet. NMFS will consider the harvests of other fisheries, including the East Side set net fishery sector, in making management decisions for the Cook Inlet EEZ Area. Comments on State management of the East Side set net fishery are outside of the scope of this action.

National Standard 5 and 7

Comment 62: The restriction on fishing in State and Federal waters on the same calendar day violates National Standard 5 because it is impossible to fish near the boundary line between State and Federal waters, given large Cook Inlet tides and current speeds in excess of 7 knots (12.96 kph) and the difficulty of staying within the irregularly-shaped Federal boundary line. Drift gillnetters lack the technology to determine where the boundary line is located while fishing.

Response: NMFS disagrees that the prohibition on fishing in both State and Federal waters in a single calendar day is not practicable and disagrees that the prohibition violates National Standard 5, which provides that conservation and management measures shall consider efficiency in the utilization of fishery resources where practicable. Under State management, participants have successfully remained within the boundaries open to drift gillnet fishing within either State or EEZ waters. This action does not modify legal fishing gear or other operational elements in a way that is expected to increase the difficulty of staying within an open area. Nothing in this rule prohibits participants who are concerned about their ability to remain within Federal waters during certain fishing conditions from setting and retrieving their gear farther away from the State/EEZ boundary. Vessels participating in the Cook Inlet EEZ Area drift gillnet fishery are expected to be aware of their fishing location and fish only in locations and at times open to that fishery. In other Federal fisheries off Alaska and elsewhere, federally permitted vessels fishing in EEZ waters are commonly prohibited from fishing in State waters and are able to successfully remain with the Federal waters open to fishing immediately adjacent to the EEZ boundary. Examples include the Pacific cod fisheries in the Kodiak, Chignik, and South Alaska Peninsula areas, and the Aleutian Islands and Dutch Harbor subdistricts of the Bering Sea-Aleutian Islands Area.

As for the availability of suitable technology to verify vessel locations, NMFS has provided charts depicting the boundary and will provide electronic charts compatible with smartphone applications and commonly used commercial navigation products available at the NMFS Alaska Region website at *https://www.fisheries.noaa.gov/region/alaska*. More information is provided in the small entity compliance guide published with this action.

Comment 63: Amendment 16 does not adequately consider or promote efficiency in the utilization of fishery resources, and it fails to minimize costs and avoid unnecessary duplication to the extent practicable in violation of National Standards 5 and 7.

NMFS's analysis notes that amendment 16 will increase direct costs and burdens to drift gillnet vessels harvesting salmon in the Cook Inlet EEZ Area due to requirements including obtaining a SFFP, installing and operating a VMS, and maintaining a Federal logbook. NMFS also chose to open fishing in the EEZ on the same days and at the same times that the State fishery is open and to prohibit participants from fishing in State and Federal waters during the same trip. This limitation makes no sense, is extremely inefficient, is impracticable for participants, and appears punitive.

Response: NMFS disagrees that any of the above-described requirements are punitive, impractical, or inconsistent with either National Standard 5 or 7. As set forth under section 301 of the Magnuson Stevens Act, National Standard 5 provides that conservation and management measures shall, where practicable, consider efficiency in the utilization of fishery resources, except that no such measure shall have economic allocation as its sole purpose. National Standard 7 provides that conservation and management measures shall, where practicable, minimize costs and avoid unnecessary duplication.

This action considers efficiency in the utilization of fishery resources and minimizes costs and avoids unnecessary duplication to the extent practicable. NMFS recognizes that a system in which a single authority manages both State and Federal waters could allow for a more efficient means of conducting the catch accounting necessary to avoid overfishing. This is not possible here. Because the State did not accept delegated management authority nor would it commit to providing the information required for management within the needed timeframe, NMFS must establish Federal monitoring, recordkeeping, and reporting requirements to supply this essential information to Federal fishery managers, consistent with the mandates of the Magnuson-Stevens Act. As discussed in the response to *Comment 31,* to account for fish caught solely in the Federal EEZ, it is necessary for NMFS to prohibit fishing in State and Federal waters on the same trip. As such, this requirement is consistent with National Standard 7.

As described thoroughly in the response to *Comment 44* and in section 4.7.2.2 of the Analysis, NMFS identified the minimum level of information required to effectively manage and enforce salmon fishing in the Cook Inlet EEZ Area. NMFS considered the additional costs and burden of these measures, including the costs of VMS equipment, on participants. NMFS managers will depend on VMS to determine the effort and projected catch in order to inform management decisions. Furthermore, without VMS, NOAA Fisheries Office of Law Enforcement would have to rely exclusively on resource-intensive patrols by air and sea; methods that are not as consistent as VMS in verifying that no fishing is occurring in closed waters and confirming fleet-wide reported fishing effort information. NMFS considered but did not choose to require management measures that would provide additional information

but impose disproportionate costs to participants such as fishery observers and electronic monitoring camera systems. Federal funds may be available to qualified vessel owners or operators for complete reimbursement of the cost of purchasing type-approved VMS units, which could offset over 75 percent of the total purchase and installation cost for fishery participants.

Logbooks are similarly necessary to ensure accuracy of reported fishing effort, catch accounting, and compliance with regulations. Logbook sheets will be available for participants to obtain from NOAA's website, free of charge.

National Standard 8

Comment 64: Amendment 16 violates National Standard 8 because it fails to take into account the importance of fishery resources to the Cook Inlet fishing communities and does not utilize economic and social data to provide for the sustained participation of such communities and to minimize adverse economic impacts on such communities.

Response: NMFS disagrees that amendment 16 violates National Standard 8. As set forth under section 301 of the Magnuson Stevens Act, National Standard 8 provides that conservation and management measures shall, consistent with the conservation requirements of the Act (including the prevention of overfishing and rebuilding of overfished stocks), take into account the importance of fishery resources to fishing communities by utilizing economic and social data (based on the best scientific information available), in order to (1) provide for the sustained participation of such communities, and (2) to the extent practicable, minimize adverse economic impacts on such communities.

Section 4 of the Analysis extensively documents the importance of salmon to Cook Inlet fishing communities throughout the Cook Inlet region as well as communities in Washington and Oregon. Many of these communities are jointly dependent on commercial salmon fishing (both drift gillnet and set gillnet), as well as non-commercial salmon fishing (recreational participants and guides, subsistence, ceremonial, and educational fishery sectors). NMFS carefully considered the costs and benefits of each management measure. As described in the Analysis and the preamble to the proposed rule, NMFS selected measures that balance the burden on participants with providing the information that is essential for NMFS to manage salmon fishing in the Cook Inlet EEZ Area. Further, NMFS expects that participants drift gillnet fishing in the Cook Inlet EEZ Area will be able to maintain their existing range of harvests and may be able to increase harvests if conservation conditions allow for it. Overall, because harvest levels of all sectors are expected to remain more or less consistent with status quo conditions, no long term community level impacts are expected. And because this rule is expected to maintain more or less status quo fishing opportunities for all users in Cook Inlet—with some possibility of additional days for the drift gillnet fleet—it appropriately provides for the sustained participation of fishing communities throughout Cook Inlet, including communities with residents that participate in State water fisheries. Many public commenters from Northern Cook Inlet expressed concern with any management plan that would increase EEZ harvests and thereby decrease salmon returns to the Northern Cook Inlet, causing adverse economic impacts on those communities. Instead, NMFS selected a management strategy that will preserve the complicated balance among various groups throughout Cook Inlet that has provided for the sustained participation of all Cook Inlet fishing communities for decades.

National Standard 10

Comment 65: There is no meaningful discussion of National Standard 10 Safety for this action. In the recent 10 year period, many vessels have been lost or damaged during periods of bad weather. Amendment 16 needs to address what happens and how the fishery will still achieve OY when these regular bad weather events occur.

Response: NMFS disagrees; the impacts of amendment 16 on the safety of human life at sea are discussed in sections 4.5.1.7 and 4.7.4 of the Analysis and NMFS finds this rule in consistent with National Standard 10. National Standard 10 provides that conservation and management measures shall, to the extent practicable, promote the safety of human life at sea. Overall impacts to public health and safety from this action are not expected to be significant. The VMS requirement provides a valuable tool for search and rescue efforts to locate a vessel in distress by regularly providing position information. This action also closes fishing in the Cook Inlet EEZ Area prior to the advent of deteriorating late summer and fall weather conditions. NMFS acknowledges that an inseason closure of the Cook Inlet EEZ under this action could result in vessel congestion in the fishing areas that remain open. In addition, closures of traditional, local fishing areas may induce vessel operators to take additional risks, such as fishing in weather and sea conditions that they would normally avoid, to remain economically viable. However, NMFS expects that the safety benefits resulting from VMS will more than offset any marginal, indirect adverse effects on safety that this action may have.

Economic Impacts

Comment 66: Multiple commenters cited studies and information highlighting the economic importance of salmon fisheries to participants and regional Alaskan communities. Several commenters support amendment 16 as a vehicle to conserve the salmon species on which these fisheries depend.

Response: NMFS acknowledges this comment. Economic information, community information, and an analysis of expected economic impacts are presented in section 4 of the Analysis.

Comment 67: Many commenters and their families are long-term Cook Inlet drift gillnet participants who feel State management has left drift gillnet fishery participants struggling, and worry this will continue under amendment 16. They allege this action does not correct the perceived errors in State management and will continue to reduce harvester and processor participation.

Response: NMFS acknowledges relatively low revenues to the Cook Inlet drift gillnet fleet and decreases in participation in recent years. Under this action, NMFS will be responsible for managing salmon fishing within the Cook Inlet EEZ Area. NMFS has no jurisdiction to modify salmon management within State waters.

As discussed in the response to *Comment 10,* NMFS recognizes that some of the management measures necessary to meet Federal managements in the EEZ will require additional costs and time commitments from participants. As described in the Final Regulatory Flexibility Analysis in the Classifications section of this preamble, NMFS designed the management measures related to collection of information for management purposes to minimize the financial impact on participants to the extent practicable. NMFS selected these measures after evaluating a range of options for information collection, as described in sections 2.5.6 and 4.7.2.2 of the Analysis. More information is provided in the response to comments related to Monitoring, Recordkeeping, and Reporting Requirements.

Because EEZ fishing opportunity is expected to be similar to the status quo under this action, salmon harvests in

the Cook Inlet EEZ Area and other areas of Cook Inlet are expected to remain at or near existing levels. As described in section 4.7.1.3, temporary shutdown or permanent closing of some processing businesses would only be expected to occur if there were substantial decreases in production. This is not expected to occur because harvest levels are expected to remain near existing levels. However, in the event NMFS closed the EEZ under this action, that likely means fishery conditions would also be expected to result in EEZ closure or severe restrictions under status quo management by the State. The most likely reason for closure is the low abundance of stocks that pass through the EEZ as they move into the Northern District of Cook Inlet. Thus, as compared to the status quo, no substantial reductions in EEZ harvest are anticipated when considered in the context of run strength in a given fishing season.

NMFS disagrees that State management has arbitrarily left the drift gillnet fleet struggling. The low abundance of specific salmon stocks in Cook Inlet has been challenging to all salmon fishery sectors in Cook Inlet. The State has taken necessary management action to protect these weak stocks, which has reduced harvest for all users. As described in section 4.5.1.2.2 of the Analysis, despite these conservation challenges, the drift gillnet fleet has, on average, harvested an increasing percentage of the available harvestable surplus for all salmon species over this same time period (1999–2021).

Further, the Analysis includes an examination of the social and economic impacts of the alternatives. Section 3 of the Analysis evaluates the impact of the proposed action on salmon stocks and other parts of the environment while section 4.7 of the Analysis discusses the impact on fishing communities in comparison to the status quo. Based on the Analysis, NMFS concluded that this final rule will not have a significant impact on the human environment.

Comment 68: A commenter stated support for NMFS's proposed action to manage the Cook Inlet EEZ because the local economy on the Kenai Peninsula is fragile, with people affected by economic disasters such as fishing closures and fires and faced with few employment opportunities.

Response: NMFS acknowledges this comment.

Comment 69: Several local government representatives and bodies requested that NMFS implement management for the Cook Inlet EEZ Area that provides for a healthy commercial fishing industry including processors and support services, considers all user groups, and considers the impact that management of the Cook Inlet EEZ can have on all Alaska communities that rely on sportfishing for economic development and subsistence use of salmon.

Response: NMFS acknowledges this comment. One of NMFS's primary concerns in developing amendment 16 is ensuring that all Cook Inlet salmon users, processors, and fishing communities retain access to and benefits from Cook Inlet salmon resources.

Comment 70: NMFS has not adequately addressed the economic impacts on fishermen and communities where the harvest is landed, including consideration of landing taxes, employment on the vessels, and in the processing plants.

Response: NMFS disagrees. The economic impacts of salmon fishing under the alternatives in Cook Inlet were comprehensively described and analyzed throughout section 4 of the Analysis. This included consideration of revenues, taxes, employment, and dependency. As summarized in section 4.10 of the Analysis, this action is expected to maintain harvest levels and opportunities commensurate with status quo conditions to the extent possible while accounting for uncertainty and the expectation that Federal management should improve over time as management expertise is developed. In fact, as noted above, this action allows for the possibility of slight increases in fishing days and harvest for the drift gillnet fleet when possible without impacting stocks of lower abundance. Thus, because this action is expected to maintain status quo harvest opportunities or even increase harvest opportunities for participants willing to comply with regulations in Federal waters, the best scientific information available supports NMFS's conclusion that minimal adverse economic impacts are anticipated from this action. Landings, landings taxes, employment, and processing are not expected to be significantly affected by this final rule compared to status quo conditions.

Comment 71: Market conditions arising from competition with farm-raised salmon account for a large part of the economic losses in salmon fisheries around Alaska. Permitting increased harvest of salmon in the Cook Inlet EEZ is unlikely to correct this problem but will likely adversely affect other Upper Cook Inlet salmon users.

Response: NMFS acknowledges that market conditions can have significant impacts on fishery values and that fisheries management decisions made in other jurisdictions do affect market conditions. Sections 4.5.1 and 4.7.1.3 of the Analysis describe market conditions. In the near-term, this action is not expected to result in the harvesting of significantly more or less salmon in the Cook Inlet EEZ. Therefore, it should not directly affect the market conditions for commercially harvested salmon.

NMFS also acknowledges that management of the Cook Inlet EEZ Area may impact the harvestable surplus available to all other salmon users in Upper Cook Inlet. Again, because NMFS does not anticipate a significant change in harvest in the Cook Inlet EEZ as a result of this action, NMFS disagrees that this action will adversely affect the fishing opportunity, and associated economic value, for other users in the Upper Cook Inlet area.

As described in sections 4.5.1.3.4.2 and 4.6 of the Analysis, commercial catches and fishery values in nearly all Cook Inlet salmon fishery sectors were above the long-term average from 2010 to 2014. The ability to realize high fishery values are dependent on the number and value of harvested species. Drift gillnet fishery catches during recent years have been constrained by mixed stock management considerations, including constraining fishing time and area in order to avoid overharvesting less abundant salmon stocks.

Section 4.6 of the Analysis included an examination of the potentially affected fisheries, including personal use, set net, freshwater, subsistence, and educational fisheries and determined that harvests near status quo levels are likely to be maintained by this action.

General Support

Comment 72: I support Federal management of fisheries in Alaska.

Response: NMFS acknowledges this comment.

Comment 73: Federal management will ensure optimum yield and sustainable fish populations.

Response: NMFS acknowledges this comment.

Comment 74: I support this action. Federally regulating fishing for all salmon in the Cook Inlet EEZ will help save the resources so that salmon fishing by all users can continue. However, I want more input from Alaskans.

Response: NMFS acknowledges this comment. The public had multiple opportunities to provide input, including at AP, SSC, and Council meetings in 2022 and 2023; during a public hearing hosted online by NMFS

on Mary 18, 2023; and during the public comment period on the proposed rule and notice of availability for Amendment 16. Public input on this action from all members of the public was considered and is summarized and responded to in this final rule.

General Opposition

Comment 75: NMFS does not need to recreate the wheel to create this FMP. It should adopt the FMP management plan put forward by Cook Inlet Fisherman's Fund, which is based on historic regulations and would manage the Cook Inlet fishery to comply with the court orders, Magnuson-Stevens Act, and other applicable laws.

The commenter's proposed FMP amendment can be viewed at *https://www.regulations.gov/comment/NOAA-NMFS-2023-0065-0071*.

The commenter's FMP includes the following primary provisions:

- Escapement based management.
- Management measures for all commercial salmon fishery sectors in both State and Federal waters.
- Management of Chinook stocks throughout upper Cook Inlet with the commercial fishery allowed whatever harvest necessary to achieve the MSY/OY objectives for sockeye, coho, pink, and chum stocks.
- Prioritize restrictions on non-resident sport fishing over resident sport-fishing when restrictions are needed to achieve OY.
- A commercial fishing season from May through December, with two or three 12 hour regular commercial fishing periods per week. The State or NMFS would retain authority to adjust this fishing schedule to manage for MSY escapement goals or exploitation rates as required.

Response: NMFS disagrees that this commenter's proposed FMP amendment should be adopted. As explained in the responses to *Comments 3* and *4*, NMFS cannot adopt Federal management measures that apply to the State waters of Cook Inlet. As explained in the response to *Comment 23,* NMFS cannot implement escapement based management through amendment 16. NMFS disagrees that commercial salmon fishing should be exempt from management restrictions required to conserve Chinook salmon or other salmon stocks. Even with severe restrictions to both recreational and commercial salmon fishing, Chinook salmon stocks in Cook Inlet are not meeting escapement goals under the status quo. Forgoing any restrictions on commercial fishing to harvest all available yield of sockeye, coho, pink, and chum salmon stocks would result in overfishing, which is inconsistent with NMFS's National Standard 1 mandate. NMFS disagrees that achieving MSY, particularly for a single fishery sector, constitutes achieving OY or maximizing net benefits to the nation. As explained in the response to *Comment 39,* a dramatic increase the fishing season duration and number of commercial fishing periods in the Cook Inlet EEZ Area would result in overfishing and reduce or eliminate the harvestable surplus for other salmon users in Cook Inlet. And NMFS may not discriminate between residents of different states when adopting Federal management measures. Section 2.7 of the Analysis generally explains why other provisions in stakeholder-submitted FMP amendments are inconsistent with the Magnuson-Stevens Act.

Amendment 16 complies with the Ninth Circuit ruling by amending the Salmon FMP to include the Cook Inlet EEZ Area. It complies with the District Court's order by implementing a federally-managed fishery in the EEZ that includes all Magnuson-Stevens Act requirements—including ACLs—and does not rely on the State to achieve any of the FMP's management objectives. The Analysis provides a comprehensive description of the purpose and need for this action, the management alternatives considered, and an analysis of their respective impacts.

Comment 76: Despite having the flexibility and resources to do an excellent job, NMFS is making amendment 16 unnecessarily complicated and difficult.

Response: NMFS developed amendment 16, the proposed rule, and this final rule in compliance with the Magnuson-Stevens Act and all other applicable Federal law. Management of Cook Inlet salmon fisheries is complex and challenging. The fishery includes multiple stocks of varying abundance, no stocks can be targeted in isolation in EEZ waters, and Cook Inlet includes many stakeholders beyond the drift gillnet fleet with competing demands. There is no simple solution to fisheries management in the Cook Inlet EEZ Area if NMFS is to consider the perspectives of all stakeholders and tribes, as it must. The Analysis identifies the strengths and weaknesses of each management alternative under consideration, including procedural constraints and currently available expertise.

NMFS intends to do an effective job managing the Cook Inlet EEZ Area salmon fishery, and expertise in this new Federal fishery will increase over time.

Comment 77: This unprecedented action should not be implemented. It will disrupt management of Cook Inlet waters and lead to further lawsuits. While not everyone will be happy with any rule, the action's legality and the resources are most important.

Response: NMFS acknowledges that this action implements a separate Federal salmon fishery management regime within Cook Inlet for the Cook Inlet EEZ Area and that salmon users have diverse preferences for management measures. As described in the response to *Comment 9,* NMFS must implement Federal management of the Cook Inlet EEZ to comply with applicable court orders, the Magnuson-Stevens Act, and all other applicable Federal law.

Tribal Comments

Comment 78: Regional tribes were not adequately consulted in the development of amendment 16, which may have adverse impacts to salmon stocks that tribes have traditionally depended on since time immemorial. Three federally recognized regional tribal groups requested government-to-government tribal consultation.

Response: NMFS acknowledges the importance of salmon to many tribal entities located throughout Cook Inlet and adjacent lands. NMFS's efforts to engage and consult with tribes on this action are described in detail in the Tribal Summary Impact Statement of this rule. In brief, NMFS participated in three tribal engagement meetings on this action before the Council failed to take action and NMFS began developing a Secretarial FMP amendment. NMFS offered to consult with tribes after the Council failed to take action, and NMFS subsequently held consultations with two tribes in May and June, 2023. NMFS held a public hearing on the action in May 2023, to which it invited all impacted tribes. After publishing the proposed rule in October 2023, NMFS directly solicited comments on the proposed rule from impacted tribes in the fall of 2023. In December 2023, NMFS held an engagement meeting with the tribal fishing group, and in January 2024, NMFS held two informational meetings with tribal entities throughout the Southcentral Alaska region.

Many of the tribes NMFS engaged with requested an indigenous subsistence fishery set-aside to be incorporated into amendment 16 and this final rule. However, given the impending court deadline of May 1, 2024 for publication of this action, there was not sufficient opportunity to work with interested tribes on developing a proposal that could be analyzed and incorporated into amendment 16 while

remaining on schedule to comply with the court order. NMFS received additional tribal consultation requests related to the possibility of an indigenous subsistence fishery in the Cook Inlet EEZ and will honor them.

Comment 79: Multiple tribes in the region noted that this action impacts sovereign federally recognized Tribes and their citizens and ask that NMFS, as part of its Federal trust responsibilities to tribes, co-develop with Alaska Native tribes a tribal subsistence fishery or set-aside (tribal fishery) and include it as part of this action. Many reasons were provided in support, including that Alaska Natives have used Cook Inlet salmon since ancestral times; they have stewarded salmon for thousands of years; tribal inherent fishing rights have long been ignored; a lack of equitable tribal representation in Federal fisheries management; obligations under international law, Executive orders, and ANILCA; and that a new subsistence set-aside fishery in the EEZ would be highly beneficial for tribal members unable to sufficiently meet their needs with other harvest opportunities. It was suggested that a tribal fishery be modeled after the subsistence halibut fishery.

Response: NMFS recognizes that Alaska tribes are seeking more equitable fisheries management and increased involvement in Federal fisheries management processes. Furthermore, NMFS acknowledges the long-standing and ancestral use of salmon fishery resources by Alaskan tribes.

NMFS evaluated the impacts of this action on tribes in the Analysis and the tribal impact summary statement. NMFS recognizes that salmon fishing in the Cook Inlet EEZ Area occurs before all other fishing in Cook Inlet and impacts the harvestable surplus available to all others who rely on the salmon resources in Cook Inlet, including tribal and subsistence users. As described in section 4.7.1.3 of the Analysis, because this action is expected to maintain salmon harvests near status quo levels, NMFS does not expect that amendment 16 will decrease the harvestable surplus for ongoing tribal and subsistence fisheries in Cook Inlet.

To create a new tribal fishery within the Cook Inlet EEZ would require an FMP amendment, including further analysis and consideration by NMFS and the Council. NMFS has committed to honor requests for tribal consultation regarding the potential establishment of a tribal fishery in the Cook Inlet EEZ. FMPs are adaptive and the Council may recommend and NMFS may amend the FMP in the future to incorporate feedback from tribes received in upcoming consultations.

Comment 80: The proposed action and subsequent management directly impacts the sovereign federally recognized tribes of the Cook Inlet and their citizens, which directly ties to their vital cultural way of life that has sustained their people for millennia. NMFS must partner with the Cook Inlet Tribes, thereby fulfilling their Federal trust responsibilities and guaranteeing the utilization and sustainability of traditional resources. The requirement to engage directly, government-to-government, is found in international law, treaties, declarations, Presidential Executive Orders (E.O.), and Secretarial Orders (See U.S. Department of the Interior's Secretary Order No. 3335 affirming the Federal trust responsibility of the United States to Indian Tribes and their citizens). Furthermore, the White House signed E.O. 14096 on Environmental Justice in April 2023. The E.O. directly cites tribal sovereignty and self-governance, recognizing the requirement for tribal consultation and enhanced collaboration with tribes on Federal policies, stating, in part, that we must recognize, honor, and respect the different cultural practices—including subsistence practices, ways of living, Indigenous Knowledge, and traditions—in communities across America.

Response: As described in response to *Comment 78* and in the Tribal Summary Impact Statement section of this final rule, NMFS provided multiple informational meetings to tribes and conducted tribal consultations. Impacts to tribes, their members and all other salmon users in Cook Inlet will continue to be considered in management of the Cook Inlet EEZ Area. NMFS will continue to consult and work with interested tribes to develop potential future management actions for the Cook Inlet EEZ Area that may provide subsistence or tribal fishing opportunities.

Marine Mammals

Comment 81: I support including the Cook Inlet EEZ in the Salmon FMP. Consider the importance of available salmon to the Cook Inlet beluga whales, which are endangered under the ESA. Cook Inlet beluga whales rely on salmon as prey. Failure to protect against overfishing or otherwise could amount to an illegal ''taking'' under the ESA. Harassing or harming the beluga whale is another reason the Salmon FMP must include the Cook Inlet EEZ.

Response: NMFS acknowledges that salmon are important prey to Cook Inlet beluga whales and that the availability of salmon prey for Cook Inlet beluga whales is a factor identified in the recovery plan. NMFS Sustainable Fisheries Division consulted with NMFS Protected Resources Division under ESA section 7 to evaluate the potential impacts of these management measures to all ESA-listed species, including Cook Inlet beluga whales, that may be affected by this action. As described in section 3.3.1 of the Analysis, the best scientific information available at this time suggests that status quo salmon prey availability is adequate for belugas. This final rule is not expected to appreciably alter salmon availability to belugas compared to the status quo. NMFS will continue to review and consider any new information on the importance and availability of salmon prey to Cook Inlet beluga whales.

Comment 82: Drift gillnet gear can be destructive and its continued use in Cook Inlet may have adverse impacts to endangered beluga whales.

Response: As described in section 3.3.1 of the Analysis, NMFS has no information indicating that the drift gillnet gear used in the Cook Inlet EEZ Area has resulted in entanglements of Cook Inlet beluga whales or habitat degradation. This action does not modify drift gillnet fishing in Cook Inlet in any way that is expected to increase the entanglement risk for Cook Inlet beluga whales.

Process Concerns

Comment 83: One commenter stated that the EEZ line being used was ruled illegal in *U.S.* v. *Alaska* in 1975. This commenter alleges NMFS continues to use an illegal EEZ boundary. If NMFS were to use a proper boundary line (50 to 60 miles (80.47 to 96.56 km) north), the majority of the fishery would occur in State waters, undermining its argument that it cannot regulate State waters under section 306(b) of the Magnuson-Stevens Act.

Another commenter suggested that the EEZ boundary was incorrect for fisheries jurisdiction and should only be used for oil and gas leasing purposes. Federal waters for fishing have not been designated and need to be decided by the Boundary Commission as in Southeast Alaska.

Response: NMFS disagrees that it is using an incorrect EEZ boundary. NMFS also disagrees that Federal waters boundaries for the purpose of fisheries jurisdiction have not been defined in Cook Inlet. Under the Magnuson-Stevens Act, the EEZ is defined as the zone established by Proclamation Numbered 5030, dated March 10, 1983. For purposes of applying this Act, the inner boundary of that zone is a line

coterminous with the seaward boundary of each of the coastal States. The baselines used to determine the EEZ boundary are reviewed and approved by an interagency committee called the U.S. Baseline Committee, which is chaired by the Department of State. In 2006, a new method was used to calculate the baseline and NOAA navigation charts published in 2006 depict changes in the 3 nmi (5.56 km) boundary in parts of Alaska. In 2011, the U.S. Baseline Committee reviewed some of the changes to the baseline in Cook Inlet based on feedback from the State and updated their recommendations. However, not all areas where the baseline changes occurred have been reviewed by the Baseline Committee. For this reason, NMFS manages and enforces Federal fisheries according to the decisions of the U.S. Baseline Committee for the areas they reviewed and approved after considering input from the State since 2006. NMFS recognizes the historical (pre-2006) t3-nmi (5.56 km) state-waters boundary line for all other areas. This information is documented in a letter from NMFS to Alaska Department of Fish and Game that is posted on NMFS Alaska Region website.

To the extent this comment is alleging the U.S. Baseline Committee erred in approving this EEZ boundary, the decisions of the Baseline Committee are outside the scope of this action. For NMFS's response to the contention that it has authority to regulate state waters under section 306(b) of the Magnuson-Stevens Act, see the response to *Comment 4.*

Comment 84: NMFS has repeatedly disregarded instruction from courts, and a special master should be appointed to oversee development of Federal management of Cook Inlet.

Response: NMFS disagrees that it disregarded instruction from any court. NMFS has worked to ensure that Federal management of salmon fishing in the Cook Inlet EEZ will be in place by May 1, 2024, consistent with the Ninth Circuit and District Court orders.

Comment 85: One commenter felt that NMFS has been disingenuous, duplicitous, insulting to stakeholders, and deliberately obstructive throughout this process and produced poor work product that suggests it does not understand the fishery. It was also suggested that this action fails to reflect consideration or incorporation of input that the stakeholders from the drift gillnet fleet have provided on multiple occasions over several years, including the Council's stakeholder committee, resulting in an unworkable product.

Response: NMFS disagrees. The proposed rule and Analysis prepared for this action contains all relevant information about salmon fisheries in Cook Inlet and perspectives provided by stakeholders during the development of this action. Amendment 16 and this final rule implement Federal management in the Cook Inlet EEZ Area in accordance with the Magnuson-Stevens Act and as appropriate in recognition of the multiple users of salmon throughout Cook Inlet.

Throughout the development of this action, some stakeholders advocated for many provisions to increase harvests by the drift gillnet fleet that NMFS is not implementing for reasons discussed in a number of responses to comments. This input, as well as recommendations from the stakeholder committee, is also summarized in section 2.7 of the Analysis, which provides a comprehensive discussion of why certain recommendations were not incorporated into the management alternatives under consideration. Many of the drift gillnet fleets requests can be distilled to two basic premises, neither of which are consistent with the Magnuson-Stevens Act: (1) NMFS must apply Federal management to both State and Federal waters in Cook Inlet; and (2) NMFS must manage to fully harvest MSY for Kenai and Kasilof sockeye salmon, as well as all other salmon stocks and prevent overescapement. As described in the response to *Comment 4,* NMFS does not have jurisdiction to assert management authority over the State waters of Cook Inlet. As explained throughout the Analysis, the preamble to the proposed rule, and in responses to comments in this final rule, fully harvesting the entire harvestable surplus for Kenai and Kasilof sockeye would require an amount of fishery effort in the EEZ that would result in overfishing of other salmon stocks and could completely eliminate fishery opportunities and access to fishery resources for other users in Cook Inlet. To achieve OY and ensure that the fishery results in the greatest net benefits to the Nation, NMFS cannot prioritize access for one user group over access for all others. And in mixed stock fisheries, harvest is always constrained by the stocks of lowest abundance, as the Magnuson-Stevens Act requires that fishery management measures prevent overfishing.

NMFS's decision not to implement specific measures advocated for by one group of fishery stakeholders—and which other stakeholders and tribes oppose as likely to decrease their access to salmon and the State opposes based on conservation concerns—does not mean NMFS is being disingenuous, duplicitous, insulting, or deliberately obstructive.

Comment 86: Most Council members could see their special interests (trawlers) affected by further scrutiny over salmon management. These conflicts are the reason that the Magnuson-Stevens Act requires science to drive management. These conflicts and the lack of accountability are why councils nationwide should be appointed by the president and be held responsible for their decisions.

Alaska has a majority of seats on the Council, including the commissioner of ADF&G, and the Council will mostly rule in favor of the State's parochial interests. This prioritizes protecting State interests and revenues.

Response: Amendment 16 is a Secretarial FMP amendment developed by NMFS and was not recommended by the Council. When this action was previously under Council consideration, none of the Council members had financial interests that would have required recusal from voting had the Council decided to recommend action. Regardless, the statutorily prescribed system for appointing Council members is outside the scope of this action.

Comment 87: ADF&G has a financial conflict of interest in managing South Central Alaska Salmon stocks. They are funded, in part, by sport fishing licenses and associated Federal matched funds. Therefore, they have a financial incentive to favor the recreational and personal use fisheries.

Response: The State of Alaska's allocation decisions among various sectors within State waters are outside of the scope of this action. In the Cook Inlet EEZ, nearly all catch is by the commercial drift gillnet fleet. There is no Federal personal use fishery, and the recreational sector catches less than 70 fish per year on average in the Cook Inlet EEZ.

Comment 88: Multiple commenters suggested that ADF&G had prioritized political considerations, or specific user groups, over sustainability and has not managed salmon and other species properly, which has resulted in the declines of Chinook and sockeye fisheries in Cook Inlet and unnecessary litigation. One commenter felt that amendment 16 results in more political management.

Response: NMFS disagrees that amendment 16 is political management. As described throughout the preamble to the proposed rule, NMFS worked to balance competing interests and demands of the National Standards in the policy decisions inherent to this fishery management action. NMFS will

manage salmon fishing in the Cook Inlet EEZ Area using best available science to achieve OY and prevent overfishing on all Cook Inlet salmon stocks. The State will continue to manage salmon fishing within State waters.

NMFS found the State has prioritized protecting stocks with the lowest abundance in regulating salmon fishing in Cook Inlet. As described in sections 3.1, 4.5, and 4.6 of the Analysis, salmon abundance is cyclical, and the harvests of different user groups have both increased and decreased at different times. To the extent the comment is criticizing allocation decisions made by the BOF (*i.e.,* which user group(s) are allowed to harvest the available excess yield of salmon), that is outside the scope of this action.

Comment 89: Our fisheries statewide are in peril because of multi-jurisdictional authority and allocations to specific user groups based on political agendas. Trawling back and forth across the mouth to Cook Inlet occurred only weeks prior to our State-regulated 2023 commercial salmon season being shut down due to a prediction of a shortage of what turned out to be less than 1,500 Chinook salmon. This was under both jurisdictions. So who should manage the anadromous fishery? The owner of the resource.

Response: NMFS, with guidance from the Council, has jurisdiction over salmon fishing in the Cook Inlet EEZ Area. This action addresses directed fishing for salmon in the Cook Inlet EEZ Area. Comments regarding salmon bycatch in trawl fisheries are outside of the scope of this action.

Comment 90: The State should no longer manage the fishery as they have failed to do so in a way that supports Alaskan interests. Furthermore, there is no longer a fishery to manage in the EEZ, as the president has taken away the ability of Alaskans to utilize Alaska's natural resources, such as oil and gas.

Response: Under this rule, NMFS, not the State of Alaska, will manage all salmon fishing (commercial and recreational) in the Cook Inlet EEZ. Comments regarding executive actions that affect other natural resources in Alaska are outside the scope of this action.

Comment 91: Alaskans who are licensed business owners and fishing in the EEZ should be managing their resources. People in Washington DC or Washington State are the reason many of our wild resources are being depleted; they should not have a say in managing Alaska fisheries.

Response: The Magnuson-Stevens Act governs the management of the fisheries in the EEZ. Section 2 of the Magnuson-Stevens Act provides that the purpose of the Act is to exercise sovereign rights for the purpose of exploring, exploiting, conserving, and managing all fish within the exclusive economic zone. It further provides that, with respect to management within the EEZ adjacent to Alaska waters, the Council is responsible for developing and recommending fishery management plans and regulations that implement those plans for management. Comments from all stakeholders and members of the public were considered in the development of amendment 16 and will be considered every year in the annual management processes for establishing salmon harvest specifications for the Cook Inlet EEZ Area.

Comment 92: Alaska's permanent fund dividend is declining and is being used to build commercial vessel docks. This litigation, which favors one fishing group over others, is costing millions of dollars. Commercial fishing is not hurting anyone. Protecting recreational fishing is not needed.

Response: Comments on the Alaska permanent fund, State government revenues, and dock construction are outside of the scope of this action. Comments about the cost of litigation are outside the scope of this action. This action will implement conservation and management measures for commercial drift gillnet and recreational fishing solely within the Cook Inlet EEZ Area.

Other

Comment 93: The proposed rule is incomplete without a complete overview of how offshore wind turbines, which are responsible for the increase in deaths of whales, dolphins, and other cetaceans off the East Coast, will be handled off Alaska.

Response: This action does not include elements related to offshore wind energy. Therefore, this comment is outside of the scope of this action.

Comment 94: Protect the hooligan (eulachon); that fishery needs review.

Response: This comment is outside the scope of this action.

Comment 95: In the Cook Inlet area, salmon spawning and rearing occurs on Federal lands and waters under the Department of the Interior. The Department of the Interior should be consulted and included in the development of this action.

Response: The United States Fish and Wildlife Service (USFWS), an agency within the Department of the Interior, has a representative on the Council and is aware of the issue. The USFWS did not provide comments to NMFS during the comment period on amendment 16 or the proposed rule. In this action, NMFS implements federal management over commercial and recreational fishing in the Cook Inlet EEZ Area consistent with NMFS's authorities under the Magnuson-Stevens Act. The authorities of other agencies, including the Department of the Interior and USFWS, over lands and waters outside of the EEZ are outside the scope of this action.

Classification

The NMFS Assistant Administrator (AA) has determined that this action is consistent with the Salmon FMP, the National Standards, other provisions of the Magnuson-Stevens Act, and other applicable law.

NMFS prepared an environmental assessment (EA) for amendment 16 and the AA concluded that there will be no significant impact on the human environment as a result of this rule. This action is expected to maintain Cook Inlet EEZ salmon harvests at or near existing levels. The same or similar vessels will continue to use the same or similar fishing gear. As a result, no significant environmental impacts are anticipated. Copies of the EA and Finding of No Significant Impact are available from the NMFS (see **ADDRESSES**).

This final rule has been determined to be not significant for the purposes of Executive Order 12866.

A Regulatory Impact Review was prepared to assess costs and benefits of available regulatory alternatives. A copy of this analysis is available from NMFS (see **ADDRESSES**). NMFS approved amendment 16 and these regulations based on those measures that maximize net benefits to the Nation when considering the viable management alternatives. Specific aspects of the economic analysis are discussed below in the Final Regulatory Flexibility Analysis (FRFA) section.

Small Entity Compliance Guide

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a FRFA, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as ''small entity compliance guides.'' Copies of the proposed rule, this final rule, and the small entity compliance guide are available on the Alaska Region's website at: *https://www.fisheries.noaa.gov/region/alaska.*

Final Regulatory Flexibility Analysis

NMFS prepared a FRFA that incorporates the Initial Regulatory Flexibility Analysis (IRFA) and a summary of the analyses completed to support this final rule.

Section 604 of the Regulatory Flexibility Act (RFA) requires that, when an agency promulgates a final rule under section 553 of title 5 of the U.S. Code (5 U.S.C. 553), after being required by that section or any other law to publish a general notice of final rulemaking, the agency shall prepare a FRFA (5 U.S.C. 604). Section 604 describes the required contents of a FRFA: (1) A statement of the need for and objectives of the rule; (2) a statement of the significant issues raised by the public comments in response to the IRFA, a statement of the assessment of the agency of such issues, and a statement of any changes made to the proposed rule as a result of such comments; (3) the response of the agency to any comments filed by the Chief Counsel for Advocacy of the Small Business Administration (SBA) in response to the proposed rule, and a detailed statement of any change made to the proposed rule in the final rule as a result of the comments; (4) a description of and an estimate of the number of small entities to which the rule will apply or an explanation of why no such estimate is available; (5) a description of the projected reporting, recordkeeping, and other compliance requirements of the rule, including an estimate of the classes of small entities that will be subject to the requirement and the type of professional skills necessary for preparation of the report or record; and (6) a description of the steps the agency has taken to minimize the significant economic impact on small entities consistent with the stated objectives of applicable statutes including a statement of the factual, policy, and legal reasons for selecting the alternative adopted and why each one of the other significant alternatives to the rule considered by the agency which affect the impact on small entities was rejected.

A description of this final rule and the need for and objectives of this rule are contained in the preamble to the proposed rule and final rule and are not repeated here.

Public and Chief Counsel for Advocacy Comments on the IRFA

An IRFA was prepared in the Classification section of the preamble to the proposed rule. The Chief Counsel for Advocacy of the SBA did not file any comments on the proposed rule. NMFS received no comments specifically on the IRFA. No comments provided information that refuted the conclusions presented in the IRFA.

Number and Description of Small Entities Regulated by This Final Action

This final rule will directly regulate commercial salmon fishing vessels that operate in the Cook Inlet EEZ Area, charter guides and charter businesses fishing for salmon in the Cook Inlet EEZ Area, and entities receiving deliveries of salmon harvested in the Cook Inlet EEZ Area.

For RFA purposes only, NMFS has established small business size standards for businesses, including their affiliates, whose primary industries are commercial fishing, charter fishing, seafood processing, and seafood buying (see 50 CFR 200.2). A business primarily engaged in commercial fishing (NAICS code 11411) is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $11 million for all its affiliated operations worldwide. For charter fishing vessels (NAICS code 713990), this threshold is combined annual receipts not in excess of $9 million. For shoreside processors (NAICS code 311710), the small business size is defined in terms of number of employees, with the threshold set at not greater than 750 employees. For entities that purchase seafood but do not process it (NAICS code 424460), the small business threshold is not greater than 100 employees.

From 2019 to 2021, there was an average of 567 S03H permits in circulation, with an average of 361 active permit holders, all of which are considered small entities based on the 11 million dollar threshold. Because NMFS expects the State to maintain current requirements for a commercial salmon fishing vessels landing any salmon in upper Cook Inlet to hold a CFEC S03H permit, NMFS does not expect participation from non-S03H permit holders in the federally managed salmon fishery in the Cook Inlet EEZ Area. Therefore, the number of S03H permit holders represents the maximum number of directly regulated entities for the commercial salmon fishery in the Cook Inlet EEZ Area. From 2019 to 2021, there was an average of 11 shoreside processors and 6 direct marketers, all of which are considered small entities based on the 750 employee threshold. From 2019 to 2021, there was an average of 4 catcher-sellers, all of which are considered small entities based on the 100 employee threshold. From 2019 to 2021, there was an average of 58 charter guides that fished for salmon at least once in the Cook Inlet EEZ Area, all of which are considered small entities based on the 9 million dollar threshold. Additional detail is included in sections 4.5 and 4.9 in the Analysis prepared for this action (see **ADDRESSES**).

Description of Significant Alternatives That Minimize Adverse Impacts on Small Entities

NMFS considered, but did not select three other alternatives. The alternatives, and their impacts to small entities, are described below.

Alternative 1 would take no action and would maintain existing management measures and conditions in the fishery within recently observed ranges, resulting in no change to impacts on small entities. This is not a viable alternative because it would be inconsistent with the Ninth Circuit's ruling that the Cook Inlet EEZ must be included within the Salmon FMP and managed according to the Magnuson-Stevens Act.

Alternative 2 would delegate management to the State. If fully implemented, Alternative 2 would maintain many existing conditions within the fishery. Fishery participants would have the added burdens of obtaining a SFFP, maintaining a Federal fishing logbook, and monitoring their fishing position with respect to EEZ and State waters as described in sections 2.4.8 and 4.7.2.2 of the Analysis. However, section 306(a)(3)(B) of the Magnuson-Stevens Act provides that NMFS cannot delegate management to the State without a three-quarter majority vote by the Council, which did not occur. Therefore, Alternative 2 cannot be implemented and is not a viable alternative.

Alternative 4 would close the Cook Inlet EEZ but not impose any additional direct regulatory costs on participants and would allow directly regulated entities to possibly recoup lost EEZ harvest inside State waters. However, the District Court ruled that Alternative 4 was contrary to law. Therefore, Alternative 4 is not a viable alternative.

This action (Alternative 3) will result in a Cook Inlet EEZ salmon fishery managed directly by NMFS and the Council. Within Alternative 3, there were numerous sub-options for management measures. As described below, NMFS worked to select specific management measures that minimized cost and burden on participants to the extent practicable. This action will increase direct costs and burdens to

commercial salmon fishing vessels that operate in the Cook Inlet EEZ Area by requiring an SFFP, associated requirements to install and operate a VMS, and maintaining a Federal logbook as described in sections 2.5.6 and 4.7.2.2 of the Analysis. This action also requires that TACs be set before each fishing season. The TAC will be set to account for management uncertainty and reduce the risk of overfishing without the benefit of inseason harvest data, but overall catch in the EEZ is likely to remain near existing levels with a possibility for slight increases from the status quo (particularly as Federal managers collect data specific to the EEZ and develop expertise managing the fishery). As is possible under the status quo, salmon harvest in the EEZ could be reduced or prohibited in years when salmon returns are not predicted to result in a harvestable surplus, with an appropriate buffer to account for scientific and management uncertainty.

Processors receiving deliveries of salmon commercially harvested in the Cook Inlet EEZ Area are required to obtain an SFPP. Entities receiving deliveries of salmon commercially harvested in the Cook Inlet EEZ but not processing the fish are required to obtain an RSRP. All of these permits are available at no cost from NMFS. However, entities with these permits are required to use eLandings and report landings with all associated information by noon of the day following the completion of each delivery, which increases direct costs and burden.

While these measures do increase costs to commercial fishery sector participants, all of these elements are necessary to manage the fishery and prevent overfishing. Specific consideration was given in their development to minimize the burden on participants to the extent practicable while also providing required information to Federal fishery managers in a timely manner. More costly means of monitoring catch—including observers and electronic monitoring—were considered but rejected by NMFS. All entities that may be directly regulated by this action could also choose to continue participating in only the State waters fisheries to avoid being subject to these Federal requirements.

Charter fishing vessels do not have any additional Federal recordkeeping, reporting, or monitoring requirements but are subject to Federal bag, possession, and gear regulations. These measures are the same as existing State requirements and do not add additional burden.

Based upon the best scientific information available, there are no significant alternatives to the action that have the potential to comply with applicable court rulings, accomplish the stated objectives of the Magnuson-Stevens Act and any other statutes, and minimize any significant adverse economic impact of the action on small entities while preventing overfishing. After a public process, NMFS concluded that of the viable management options, Alternative 3, amendment 16 and this final rule, best accomplish the stated objectives articulated in the preamble for this action and in applicable statutes, and minimizes, to the extent practicable, adverse economic impacts on directly regulated small entities.

Recordkeeping, Reporting, and Other Compliance Requirements

This action implements new recordkeeping, reporting, and compliance requirements. These requirements are necessary for the management and monitoring of the Cook Inlet EEZ Area salmon fishery.

All Cook Inlet EEZ Area salmon fishery participants using drift gillnet gear are required to provide additional information to NMFS for management purposes. As in other North Pacific fisheries, processors provide catch recording data to managers to monitor harvest. Processors are required to record deliveries and processing activities to aid in fishery administration.

To participate in the fishery, persons are required to complete application forms, reporting requirements, and monitoring requirements. These requirements impose costs on small entities in gathering the required information and completing the information collections.

NMFS has estimated the costs of complying with the requirements based on information such as the burden hours per response, number of responses per year, and wage rate estimates from industry or the Bureau of Labor Statistics. Persons are required to complete many of the requirements prior to fishing, such as obtaining permits. Persons are required to complete some requirements every year, such as the SFPP and RSRP applications. Other requirements are more periodic, such as the SFFP application, which must be submitted every 3 years. The impacts of these changes are described in more detail in sections 2.5.6 and 4.7.2 of the Analysis prepared for this action (see **ADDRESSES**).

Vessels commercially fishing for salmon in the Cook Inlet EEZ Area are required to obtain an SFFP, complete a Federal fishing logbook, and install and maintain an operational VMS. NMFS issues SFFPs at no cost. Although VMS costs may be significant for some participants, there may be funds available from NMFS for reimbursement of the purchase costs. Information on the VMS reimbursement program is contained in the small entity compliance guide published with this Final Rule. The vessel will also be required to mark buoys at each end of their drift gillnet with their SFFP number. While commercially fishing for salmon in the Cook Inlet EEZ Area, participants must remain within Federal waters and cannot also fish in State waters on the same calendar day or conduct any other types of fishing while in Federal waters.

Processors and other entities receiving landings of commercially caught Cook Inlet salmon from the Cook Inlet EEZ Area are required to obtain an SFPP or an RSRP, and report landings through eLandings by noon of the day following completion of the delivery. NMFS issues SFPPs and RSRPs at no cost.

For recreational salmon fishing, no additional Federal recordkeeping and reporting requirements are established. The State's existing recordkeeping and reporting requirements are expected to provide the information needed to manage recreational fishing in the Cook Inlet EEZ Area and satisfy Magnuson-Stevens Act requirements given the small scale and very limited harvest by the recreational sector. Information collected by the State includes creel sampling, the ADF&G's Statewide Harvest Survey, harvest records for annual limits, and the Saltwater Guide Logbooks.

Paperwork Reduction Act

This final rule contains collection-of-information requirements subject to review and approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act (PRA). This final rule adds a new collection of information for the Cook Inlet EEZ salmon fishery under new OMB control number 0648–0818 and revises and extends for 3 years existing collection-of-information requirements for OMB Control Number 0648–0445 (NMFS Alaska Region VMS Program). The public reporting burden estimates provided below for these collections of information include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

OMB Control Number 0648–0818

A new collection of information is created for reporting, recordkeeping, and monitoring requirements implemented by this action that are necessary to federally manage the Cook Inlet EEZ Area salmon fishery. This new collection contains the applications and processes used by harvesters, processors, and other entities receiving deliveries of Cook Inlet EEZ Area salmon to apply for and manage their permits; provide catch, landings, and processing data; and mark drift gillnet buoys. The data are used to ensure that the fishery participants adhere to harvesting, processing, and other requirements for the Cook Inlet EEZ Area salmon fishery.

The public reporting burden per individual response is estimated to average 15 minutes for the SFFP application, 25 minutes for the SFPP application, 20 minutes for the RSRP application, 15 minutes to register for eLandings, 10 minutes for landing reports, 15 minutes for the daily fishing logbook, and 30 minutes to mark drift gillnet buoys.

OMB Control Number 0648–0445

NMFS proposes to revise and extend by 3 years the existing requirements for OMB Control Number 0648–0445. This collection contains the VMS requirements for the federally managed groundfish and crab fisheries off Alaska. This collection is revised because this action requires vessels commercially fishing for salmon in the Cook Inlet EEZ Area to install and maintain an operational VMS. The public reporting burden per individual response is estimated to average 6 hours for installation of a VMS unit, 4 hours for VMS maintenance, and 2 hours for VMS failure troubleshooting. VMS transmissions are not assigned a reporting burden because the transmissions are automatic.

Public Comments

We invite the general public and other Federal agencies to comment on proposed and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Written comments and recommendations for these information collections should be submitted on the following website: *https://www.reginfo.gov/public/do/PRAMain.* Find the particular information collection by using the search function and entering either the title of the collection or the OMB Control Number.

Notwithstanding any other provisions of the law, no person is required to respond nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number.

Tribal Summary Impact Statement

NMFS's responsibility to engage in tribal consultations on Federal policies with tribal implications is outlined in Executive Order (E.O.) 13175, Consultation and Coordination with Indian Tribal Governments (November 6, 2000), the Executive Memorandum (April 29, 1994), the American Indian and Alaska Native Policy of the U.S. Department of Commerce (March 30, 1995), the Department of Commerce Tribal Consultation and Coordination Policy (78 FR 33331, June 4, 2013), Presidential Memorandum (Tribal Consultation and Strengthening Nation-to-Nation Relationships) (86 FR 7491, January 29, 2021), and the updated NOAA Policy on Government-to-Government Consultations with Federally Recognized Indian Tribes and Alaska Native Corporations (July 27, 2023). Congress required federal agencies to consult with Alaska Native corporations on the same basis as federally recognized Indian tribes under E.O. 13175 (Pub. L. 108–199, 118 Stat. 452, as amended by Pub. L. 108–447, 118 Stat. 3267). NOAA interprets the term ''Alaska Native corporations'' in this requirement to mean ''Native corporation[s]'' as that term is defined under the Alaska Native Claims Settlement Act (ANCSA) of 1971 (43 U.S.C. 1602).

Section 5(b)(2)(B) of E.O. 13175 requires a ''Tribal Summary Impact Statement'' for any regulation that has tribal implications, imposes substantial direct compliance costs on Native Tribal governments, and is not required by statute. Although not required by section 5(b)(2)(B) of E.O. 13175, the following is a tribal summary impact statement for this final rule that is consistent with E.O. 13175 and summarizes and responds to issues raised during all tribal consultations on Amendment 16 and the proposed rule.

Under E.O. 13175 and agency policies, NMFS notified all potentially impacted federally recognized Tribal governments in Alaska and Alaska Native Corporations and provided the opportunity to comment and respond to the agency's invitation for tribal consultation on the action.

A Description of the Extent of NMFS's Prior Consultation With Tribal Officials

On February 17, 2023, NMFS emailed tribal consultation invitation letters to Alaska Native Tribes, Alaska Native Corporations, and Alaska Native Organizations (''Alaska Native representatives''). The letter notified Alaska Native representatives that the management of salmon fisheries in the Federal (EEZ) marine waters of upper Cook Inlet would be presented to the Council for review, with an invitation to participate in the process and contribute to fishery decisions at the April 2023 meeting. NMFS invited Alaska Native representatives to consult with and provide comments to the agency directly via meeting or by telephone.

NMFS received one response from the Chickaloon Village Traditional Council (CVTC) to consult on management of salmon fisheries in the Federal (EEZ) waters of Cook Inlet. The purpose was to complete consultation between CVTC and NMFS Alaska Region per the agency's government-to-government relationship regarding the management of salmon fisheries in the EEZ waters of Cook Inlet before scheduled final action at the April 2023 Council meeting to hear and better understand the CVTC's perspectives regarding tribal impacts. NMFS also shared information about the action and its potential implementation and answered questions during the consultation.

NMFS was invited by Alaska Native representatives to speak on this action at the Tikahtnu Forum Meeting on February 24, 2023, the Kenaitze/Salamatof Hunting Fishing and Gathering Commission Meeting on March 7, 2023, and the Cook Inlet Fishers Group on March 30, 2023, to listen to tribal perspectives, provide information and answer questions on the action.

On April 21, 2023, NMFS sent an announcement to Alaska Native representatives stating the agency was under a court order to implement an amendment to the Salmon FMP by May 1, 2024 to federally manage the salmon fisheries that occur in the Cook Inlet EEZ, consistent with Magnuson-Stevens Act requirements. NMFS provided a second invitation for tribal consultation and engagement opportunities on this issue. Two Alaska Native tribes responded to the invitation to consult on amendment 16. NMFS held tribal consultation on this action with the Salamatof Tribe on May 22, 2023, and with the Chickaloon Native Village (CNV) on June 20, 2023. NMFS shared information regarding Federal salmon management during the meeting but

primarily wanted to hear and better understand the Salamatof Tribe's and CNV's perspectives regarding tribal impacts. Also, on June 22, 2023, NMFS received a letter from the Ninilchik Traditional Council (NTC). NTC thanked NMFS for the invitation to consult and for engaging with tribes on the action but declined NMFS's invitation to consult based on lack of agency engagement in the past, lack of adequate time, and because of NTC's concern that the action did not incorporate tribal input in studies and impact statements related to traditional ecological knowledge.

On April 26, 2023, NMFS notified Alaska Native representatives that NMFS would hold a public hearing to receive input on an amendment to the Salmon FMP to establish Federal management for salmon fishing in the Federal waters of upper Cook Inlet. Alaska Native representatives were given another opportunity to provide verbal comments at the public hearing on May 18, 2023 or written comments by May 25, 2023 during the public comment process.

On October 18, 2023, NMFS solicited public comment—including comments from Alaska Native representatives—on the proposed rule that would implement Federal management of commercial and recreational salmon fishing in the Cook Inlet EEZ (88 FR 72314, October 19, 2023). NMFS invited comment from Alaska Native representatives on the action through December 18, 2023. Additionally, on October 20, 2023, NMFS provided a response letter to the NTC thanking them for their concerns and encouraging the NTC to reconsider engagement with NMFS on this action.

On November 16, 2023, NMFS received a response from the Cook Inlet Fishers Group asking for tribal engagement. On December 5, 2023, NMFS met with tribal representatives from the Cook Inlet Tribal Fishers Group, which included the Knik Tribal Council, CVTC, and NTC. The purpose of this meeting was to engage with interested Cook Inlet Tribes regarding Federal management of salmon fisheries in the Cook Inlet EEZ. NMFS shared information about the action and its potential implementation during the meeting but primarily wanted to hear and better understand the Cook Inlet Tribes' perspectives regarding tribal impacts. At the close of the meeting, participants agreed that a follow up tribal engagement meeting on this action would be pertinent in January 2024.

At the close of the amendment 16 public comment period on December 18, 2023, NMFS received written comments from NTC, Salamatof Tribe, CVTC, and Kenaitze Tribe. The Salamatof Tribe requested separate government-to-government engagement while the remaining Cook Inlet tribes requested joint government-to-government consultation. On January 8, 2024, NMFS met with the Salamatof Tribe to share a status update on amendment 16 as well as hear and better understand their perspectives on the need for an indigenous subsistence fishery set-aside. On January 9, 2024, NMFS met with 11 Alaska Native representatives, including the NVC, CVTC, Seldovia Village Tribe, NTC, Knik Tribe, Native Village of Eklutna, Kenaitze Tribe, Chugach Regional Resource Commission, Ninilchik Native Association, Tyonek Native Corporation, and the Salamatof Tribe. NMFS listened to tribal concerns and perspectives regarding the new idea for an indigenous subsistence fishery set-aside and provided a status update on the amendment 16 process.

After the close of the amendment 16 public comment period, NMFS also received three written tribal comments from the Chugach Regional Resource Commission representing the Nanwalek Indian Reorganization Act Council and Port Graham Village Council, Tyonek Conservation District, and Native Village of Eklutna. The Chugach Regional Resource Commission requested tribal consultation with Nanwalek IRA Council and Port Graham Village Council. The Tyonek Conservation District expressed significant interest in participating in natural resource management decisions that could affect Cook Inlet. The Native Village of Eklutna requested to further develop traditional stewardship, through a degree of co-management with NMFS and the U.S. Fish and Wildlife Service (USFWS), of culturally important trust salmon stocks returning to traditional areas.

Many tribal members requested an indigenous subsistence fishery set-aside to be incorporated into amendment 16 and this final rule. Such a modification could not have been made to amendment 16 without publishing a new proposed rule, which was not possible given the impending court deadline for implementation of a final rule. Creating an indigenous subsistence fishery set-aside within the Cook Inlet EEZ would require further analysis and consideration by NMFS and the Council that are outside of the original scope and purpose of this action. As noted in response the *Comment 79,* FMPs are adaptive and the Council may recommend amending the Salmon FMP in the future to incorporate feedback from tribes in upcoming consultations that NMFS has committed to honoring.

A Summary of the Nature of Tribal Concerns

Comments from Alaska Native representatives received prior to the close of the public comment period are summarized in the Comments and Responses section of this final rule. NMFS also received three written comments from Alaska Native representatives after the public comment period closed. Tribal comments received after the public comment period are included in the summary below.

Cook Inlet tribes expressed a significant interest in collaborating with NMFS on this action. The primary question received from Alaska Native representatives during tribal outreach and engagement on amendment 16 was how this action would impact tribal subsistence fishing. Based on the above tribal engagements, consultations, and public comments, the nature of tribal concerns fell into four main categories: (1) impacts to traditional lands/Federal trust responsibility; (2) indigenous subsistence fishery set-aside; (3) salmon status/fishery management; and (4) fish & habitat enhancement. The nature of tribal concerns are summarized for each of these categories below.

Impacts To Traditional Lands/Federal Trust Responsibility

All Cook Inlet tribes expressed that this action would affect their traditional ancestral territories, customary areas of use, and vital way of life and would impact environmental and cultural resources that are imperative to the health, safety, and welfare of tribal citizens. Cook Inlet tribes stated that NMFS must partner with them to fulfill the Federal trust responsibility and international obligations for tribal rights and food security, including access to traditional resources such as salmon. Cook Inlet tribes stated that Federal, territorial, and State regulations have dramatically reduced the fishing opportunities for Alaska Native tribal citizens while globally significant markets have been developed to sell Alaskan fish, which have eroded indigenous rights and have had a huge impact on Alaska Native peoples.

Indigenous Subsistence Fishery Set-Aside

Cook Inlet tribes expressed concerns that less weight was given to tribal comments relative to the commercial fishing industry and that they do not have a voice in the government process. Cook Inlet tribes asked NMFS to be

mindful of this power imbalance and that the action impacts tribal rights. Personal use, educational fishery permits, and a few (select) subsistence permits are how tribal citizens currently harvest fish in Cook Inlet. Cook Inlet tribes believe that Federal management of salmon in the Cook Inlet EEZ provides a long overdue opportunity for an indigenous subsistence fishery (*e.g.,* tribal fishery set-aside) in the Cook Inlet EEZ, ahead of commercial and recreational needs, and would like to work with NMFS to develop an indigenous set-aside for salmon harvest that has priority over other uses.

Salmon Status/Fishery Management

One Cook Inlet tribe felt overescapement was unsustainable for the available habitat. Another tribe had significant concerns about the EEZ fishing and wanted to maintain the conservation corridor in Cook Inlet. Other tribes highlighted that there are numerous and increasing threats to Cook Inlet salmon populations that decrease salmon runs originating from Cook Inlet. Several Cook Inlet tribes support Federal management of salmon in the Cook Inlet EEZ. Tribes generally emphasized that NMFS must do more to achieve a precautionary fishery management approach based on threats to Cook Inlet salmon populations. Tribes also stated that by merely focusing on the commercial and recreational fishing that was the subject of the District Court's 2022 order, NMFS ignores subsistence needs, which are also included in the Magnuson-Stevens Act. With subsistence use representing only one tenth of one percent of Cook Inlet harvest, Cook Inlet tribes stated a subsistence fishery would not threaten commercial or recreational fisheries, have a very small effect on the salmon populations, and have a notably beneficial impact on tribal cultural perpetuation, citizen health, and wellbeing. Cook Inlet tribes requested that Federal fishery management be precautionary with TACs based on timely in-season escapements and not historical harvest averages and pre-season forecasts. Tribal recommendations included funding better escapement data collection and genetic analysis of EEZ-harvested salmon, development of a salmon database with in-season genetic data, development of test fisheries, a fishery period from July 16 to August 15, allowing only one 12-hour fishing period per week, and maintaining the current drift gillnet length of 150 fathoms (274.32 m). Lastly, tribes recommend creating a tribal fishing opportunity modeled after the Alaska Subsistence Halibut Program and providing proxy fishing opportunities developed collectively with Tribal governments to ensure tribal elders and other tribal citizens who are physically unable to harvest fish in the Cook Inlet EEZ can access salmon.

Fish & Habitat Enhancement

All Cook Inlet tribes that commented want to work towards increasing salmon runs and have been taking actions (*e.g.,* fish and habitat enhancement) over the past 50 years to address Alaska Native community concerns by reducing invasive species; replacing fish passage barriers in their district; restoring over 45 miles (72.42 km) of upstream salmon habitat; leading regional efforts for the prevention, early detection, and treatment of aquatic invasive plants; collecting baseline stream data; and surveying streams for inclusion in the State of Alaska Anadromous Waters Catalog for protection. Cook Inlet tribes have also performed research to advise habitat assessments and salmon restoration planning.

In summary, tribal concerns were focused on providing relief to Alaska Native salmon fishing families and communities as well as continued communication in the NMFS tribal engagement and consultation process as it relates to fishery resource access that sustains the tribal way of life. Detailed meeting summaries of the tribal concerns listed above are available on the NMFS Alaska Region website (see **ADDRESSES**).

NMFS's Position Supporting the Need To Issue the Regulation

This final rule is needed to implement Federal fisheries management of the Cook Inlet EEZ. NMFS's position is stated in the preamble to the proposed rule and this final rule, and in the comments and responses section.

Statement of the Extent to Which the Concerns of Tribal Officials Have Been Met

From the perspective of a number of Cook Inlet tribes, the primary concern was over how this fishery would impact Alaska Native subsistence fishing and, secondly, if the action would include a tribal subsistence set-aside. The Analysis prepared for this action provides information on the current subsistence fisheries in Cook Inlet and indicates that there has not been a subsistence fishery in the EEZ during the time period for which NMFS has data, though tribes have stated that they did historically fish in EEZ waters. Throughout litigation and for much of the development of amendment 16, a tribal subsistence fishery did not come up as a management proposal. This final rule, developed in response to court decisions on a strict timeline, therefore authorizes only commercial drift gillnet and recreational fishing in the EEZ. To address tribal concerns that amendment 16 did not include an indigenous subsistence set-aside, NMFS has committed to honoring the Cook Inlet tribal consultation requests received in 2024 and welcomes further engagement and discussion.

NMFS and the Council have made significant efforts in conducting direct outreach and engagement, and for NMFS in conducting tribal consultations, with Alaska Native representatives, which include Alaska Native tribes, Alaska Native corporations, and Native organizations and communities over the last few years. NMFS made significant efforts to involve Alaska Native representatives in the development of this action. In conjunction with Council outreach, NMFS provided information to Alaska Native representatives that were interested in engaging at each step in the process and consulted with interested Alaska Native representatives, as described above.

NMFS considered all input from these consultations and engagements, consistent with E.O. 13175 and the agency's tribal consultation obligations before reaching a final decision on this action. In addition, NMFS committed to honoring the Cook Inlet tribal consultation and information requests to discuss the possibility of a tribal subsistence fishery in the Cook Inlet EEZ.

NMFS acknowledges the long-standing challenges that Alaska Native representatives have had communicating with the agency and appreciates the tribes' commitment to communicating needed improvements to the consultation process. NMFS has taken several actions over the last year, including building staff capacity and hosting listening sessions, and intends to continue to improve tribal consultation.

List of Subjects

15 CFR Part 902

Reporting and recordkeeping requirements.

50 CFR Part 600

Administrative practice and procedure, Confidential business information, Fish, Fisheries, Fishing, Fishing vessels, Foreign relations, Intergovernmental relations, Penalties,

Reporting and recordkeeping requirements, Statistics.

50 CFR Part 679

Alaska, Fisheries, Reporting and recordkeeping requirements.

Dated: April 18, 2024.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 15 CFR part 902 and 50 CFR parts 600 and 679 as follows:

TITLE 15—COMMERCE AND FOREIGN TRADE

PART 902—NOAA INFORMATION COLLECTION REQUIREMENTS UNDER THE PAPERWORK REDUCTION ACT: OMB COLLECTION NUMBERS

■ 1. The authority citation for 15 CFR part 902 continues to read as follows:

Authority: 44 U.S.C. 3501 *et seq.*

■ 2. Amend § 902.1, in the table in paragraph (b), by adding in numerical order entries for ''679.114'', ''679.115'', ''679.117(b)(1)(xiv)'', and ''679.118(f)(2)'' to read as follows:

§ 902.1 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

* * * * *

(b) * * *

CFR part or section where the information collection requirement is located	Current OMB control No. (all numbers begin with 0648–)
* * * * *	
50 CFR	.....
* * * * *	
679.114	–0818
679.115	–0818
679.117(b)(1)(xiv)	–0445
679.118(f)(2)	–0818

CFR part or section where the information collection requirement is located	Current OMB control No. (all numbers begin with 0648–)
* * * * *	

* * * * *

TITLE 50—WILDLIFE AND FISHERIES

PART 600—MAGNUSON-STEVENS ACT PROVISIONS

■ 3. The authority citation for part 600 continues to read as follows:

Authority: 5 U.S.C. 561 and 16 U.S.C. 1801 *et seq.*

■ 4. Amend § 600.725, in the table in paragraph (v), under the heading ''VII. North Pacific Fishery Management Council'' by revising entry ''8'' to read as follows:

§ 600.725 General prohibitions.

* * * * *

(v) * * *

Fishery	Authorized gear types
* * * * * * *	
VII. North Pacific Fishery Management Council	
* * * * * * *	
8. Alaska Salmon Fishery (FMP):	
A. East Area	A. Hook and line.
B. Cook Inlet EEZ Area	B. Drift gillnet, handline, rod and reel, hook and line.
* * * * * * *	

* * * * *

PART 679—FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

■ 5. The authority citation for part 679 continues to read as follows:

Authority: 16 U.S.C. 773 *et seq.,* 1801 *et seq.,* 3631 *et seq.;* Pub. L. 108–447; Pub. L. 111–281.

■ 6. Amend § 679.1 by revising paragraph (i)(1) to read as follows:

§ 679.1 Purpose and scope.

* * * * *

(i) * * *

(1) Regulations in this part govern commercial fishing for salmon by fishing vessels of the United States in the West Area and commercial and recreational fishing for salmon in the Cook Inlet EEZ Area of the Salmon Management Area.

* * * * *

■ 7. Amend § 679.2 by:

■ a. Adding, in alphabetical order, the definition for ''Daily bag limit'';

■ b. Revising the definition of ''Federally permitted vessel,''

■ c. Adding paragraph (7) to the definition of ''Fishing trip'';

■ d. Adding, in alphabetical order, the definitions for ''Possession limit'' and ''Registered Salmon Receiver'';

■ e. Revising the definition of ''Salmon Management Area''; and

■ f. Adding, in alphabetical order, the definitions for ''Salmon shoreside processor'' and ''Waters of Cook Inlet.''

The additions and revision read as follows:

§ 679.2 Definitions.

* * * * *

Daily bag limit means the maximum number of salmon a person may retain in any calendar day from recreational fishing in the Cook Inlet EEZ Area.

* * * * *

Federally permitted vessel means a vessel that is named on a Federal fisheries permit issued pursuant to § 679.4(b), a Salmon Federal Fisheries Permit issued pursuant to § 679.114(b), or a Federal crab vessel permit issued pursuant to § 680.4(k) of this chapter. Federally permitted vessels must conform to regulatory requirements for purposes of fishing restrictions in habitat conservation areas, habitat conservation zones, habitat protection areas, and the Modified Gear Trawl Zone; for purposes of anchoring prohibitions in habitat protection areas; for purposes of requirements for the BS and GOA nonpelagic trawl fishery pursuant to §§ 679.7(b)(9) and (c)(5), and 679.24(f); and for purposes of VMS requirements.

* * * * *

Fishing trip means:

* * * * *

(7) For purposes of subpart J of this part, the period beginning when a vessel

operator commences commercial fishing for any salmon species in the Cook Inlet EEZ Area and ending when the vessel operator offloads or transfers any unprocessed salmon species from that vessel.

* * * * *

Possession limit means the maximum number of unprocessed salmon a person may possess from recreational fishing in the Cook Inlet EEZ Area.

* * * * *

Registered Salmon Receiver means a person holding a Registered Salmon Receiver Permit issued by NMFS.

* * * * *

Salmon Management Area means those waters of the EEZ off Alaska (see figures 22 and 23 to part 679) under the authority of the Salmon FMP. The Salmon Management Area is divided into three areas: the East Area, the West Area, and the Cook Inlet EEZ Area:

(1) *The East Area* means the area of the EEZ in the Gulf of Alaska east of the longitude of Cape Suckling (143°53.6′ W).

(2) *The West Area* means the area of the EEZ off Alaska in the Bering Sea, Chukchi Sea, Beaufort Sea, and the Gulf of Alaska west of the longitude of Cape Suckling (143°53.6′ W), but excludes the Cook Inlet EEZ Area, Prince William Sound Area, and the Alaska Peninsula Area. The Prince William Sound Area and the Alaska Peninsula Area are shown in figure 23 to this part and described as:

(i) The Prince William Sound Area means the EEZ shoreward of a line that starts at 60°16.8′ N and 146°15.24′ W and extends southeast to 59°42.66′ N and 144°36.20′ W and a line that starts at 59°43.28′ N and 144°31.50′ W and extends northeast to 59°56.4′ N and 143°53.6′ W.

(ii) The Alaska Peninsula Area means the EEZ shoreward of a line at 54°22.5′ N from 164°27.1′ W to 163°1.2′ W and a line at 162°24.05′ W from 54°30.1′ N to 54°27.75′ N.

(3) *The Cook Inlet EEZ Area,* shown in figure 22 to this part, means the EEZ of Cook Inlet north of a line at 59°46.15′ N.

* * * * *

Salmon shoreside processor means any person or vessel that receives, purchases, or arranges to purchase, and processes unprocessed salmon harvested in the Cook Inlet EEZ Area, except a Registered Salmon Receiver.

* * * * *

Waters of Cook Inlet means, for the purposes of §§ 679.28(f)(6)(x) and 679.117(b)(1)(xiv), all Federal waters and Alaska State waters north of a line from Cape Douglas (58°51.10′ N) to Point Adam (59°15.27′ N).

* * * * *

■ 8. Amend § 679.3 by revising paragraph (f) to read as follows:

§ 679.3 Relation to other laws.

* * * * *

(f) *Domestic fishing for salmon.* Management of the salmon commercial troll fishery and recreational fishery in the East Area of the Salmon Management Area, defined at § 679.2, is delegated to the State of Alaska. Regulations governing the commercial drift gillnet salmon fishery and recreational salmon fishery in the Cook Inlet EEZ Area, defined at § 679.2, are set forth in subpart J of this part.

* * * * *

§ 679.7 [Amended]

■ 9. Amend § 679.7 by removing and reserving paragraph (h).

■ 10. Amend § 679.25 by:

■ a. Revising paragraph (a)(1) introductory text;

■ b. Adding paragraphs (a)(1)(vi) and (a)(2)(vi) through (viii); and

■ c. Revising paragraphs (b) introductory text and (b)(3) and (8).

The revisions and additions read as follows:

§ 679.25 Inseason adjustments.

(a) * * *

(1) *Types of adjustments.* Inseason adjustments for directed fishing for groundfish, fishing for IFQ or CDQ halibut, or fishing for Cook Inlet EEZ Area salmon issued by NMFS under this section include:

* * * * *

(vi) Adjustment of TAC for any salmon species or stock and closure or opening of a season in all or part of the Cook Inlet EEZ Area.

(2) * * *

(vi) Any inseason adjustment taken under paragraph (a)(1)(vi) of this section must be based on a determination that such adjustments are necessary to prevent:

(A) Overfishing of any species or stock of fish or shellfish;

(B) Harvest of a TAC for any salmon species or stock that, on the basis of the best available scientific information, is found by NMFS to be incorrectly specified; or

(C) Underharvest of a TAC for any salmon species or stock when catch information indicates that the TAC has not been reached, and there is not a conservation or management concern for any species or stock that would also be harvested with additional fishing effort.

(vii) The selection of the appropriate inseason management adjustments under paragraphs (a)(1)(vi) of this section must be from the following authorized management measures and must be based on a determination by the Regional Administrator that the management adjustment selected is the least restrictive necessary to achieve the purpose of the adjustment:

(A) Closure of a management area or portion thereof, or gear type, or season to all salmon fishing; or

(B) Reopening of a management area or season to achieve the TAC for any of the salmon species or stock without exceeding the TAC of any other salmon species or stock.

(viii) The adjustment of a TAC for any salmon species or stock under paragraph (a)(1)(vi) of this section must be based upon a determination by the Regional Administrator that the adjustment is based upon the best scientific information available concerning the biological stock status of the species or stock in question and that the currently specified TAC is incorrect. Any adjustment to a TAC must be reasonably related to the change in biological stock status.

(b) *Data.* Information relevant to one or more of the following factors may be considered in making the determinations required under paragraphs (a)(2)(i), (ii), (vi) and (vii) of this section:

* * * * *

(3) Relative distribution and abundance of stocks of groundfish species, salmon species or stocks, and prohibited species within all or part of a statistical area;

* * * * *

(8) Any other factor relevant to the conservation and management of groundfish species, salmon species or stocks, or any incidentally caught species that are designated as prohibited species or for which a PSC limit has been specified.

* * * * *

■ 11. Amend § 679.28 by adding paragraph (f)(6)(x) to read as follows:

§ 679.28 Equipment and operational requirements

* * * * *

(f) * * *

(6) * * *

(x) You operate a vessel named, or required to be named, on an SFFP issued under § 679.114 in the waters of Cook Inlet during a calendar day when directed fishing for salmon using drift gillnet gear is open in the Cook Inlet

EEZ Area and have drift gillnet gear on board or deployed.

* * * * *

■ 12. Add subpart J, consisting of §§ 679.110 through 679.119, to read as follows:

Subpart J—Salmon Fishery Management

Sec.
679.110 Applicability.
679.111 through 679.113 [Reserved]
679.114 Permits.
679.115 Recordkeeping and reporting.
679.116 [Reserved]
679.117 Salmon fisheries prohibitions.
679.118 Management measures.
679.119 Recreational salmon fisheries.

Subpart J—Salmon Fishery Management

§ 679.110 Applicability.

This subpart contains regulations governing the commercial and recreational harvest of salmon in the Salmon Management Area (See § 679.2).

§ 679.111 through 679.113 [Reserved]

§ 679.114 Permits.

(a) *Requirements*—(1) *What permits are available?* The following table describes the permits available under this subpart that authorize the retention, processing, and receipt of salmon in the Cook Inlet EEZ Area, respectively, along with date of effectiveness for each permit and reference paragraphs for further information:

If permit type is:	Permit is in effect from issue date through the end of:	For more information, see . . .
(i) *Salmon Federal Fisheries Permit* (SFFP)	3 years or until expiration date shown on permit.	Paragraph (b) of this section.
(ii) *Salmon Federal Processor Permit* (SFPP) ...	Until expiration date shown on permit	Paragraph (c) of this section.
(iii) *Registered Salmon Receiver Permit* (RSRP)	1 year	Paragraph (d) of this section.

(2) *Permit and logbook required by participant and fishery.* For the various types of permits issued pursuant to this subpart, refer to § 679.115 for recordkeeping and reporting requirements.

(3) *Permit application.* (i) A person may obtain an application for a new permit, or for renewal or revision of an existing permit, from NMFS for any of the permits under this section and must submit forms to NMFS as instructed in application instructions. All permit applications may be completed online and printed from the NMFS Alaska Region website (See § 679.2);

(ii) Upon receipt of an incomplete or improperly completed permit application, NMFS will notify the applicant of the deficiency in the permit application. If the applicant fails to correct the deficiency, the permit will not be issued. NMFS will not approve a permit application that is untimely or incomplete;

(iii) The owner or authorized representative of a vessel, owner or authorized representative of a processor, and Registered Salmon Receiver must obtain a separate permit for each vessel, entity, operation, or facility, as appropriate to each Federal permit in this section;

(iv) All permits are issued free of charge;

(v) NMFS will consider objective written evidence in determining whether an application is timely. The responsibility remains with the sender to provide objective written evidence of when an application to obtain, amend, or to surrender a permit was received by NMFS (*e.g.,* certified mail or other method that provides written evidence that NMFS Alaska Region received it); and

(vi) For applications delivered by hand delivery or carrier, the date the application was received by NMFS is the date NMFS staff signs for it upon receipt. If the application is submitted by fax or mail, the receiving date of the application is the date stamped received by NMFS.

(4) *Disclosure.* NMFS will maintain a list of permit holders that may be disclosed for public inspection.

(5) *Sanctions and denials.* Procedures governing permit sanctions and permit denials for enforcement purposes are found at subpart D of 15 CFR part 904. Such procedures are not required for any other purposes under this part.

(6) *Harvesting privilege.* Permits issued pursuant to this subpart are neither a right to the resource nor any interest that is subject to the ''Takings Clause'' provision of the Fifth Amendment to the U.S. Constitution. Rather, such permits represent only a harvesting privilege that may be revoked or amended subject to the requirements of the Magnuson-Stevens Act and other applicable law.

(7) *Permit surrender.* (i) NMFS will recognize the voluntary surrender of a permit issued under this subpart, if a permit is authorized to be surrendered and if an application is submitted by the permit holder or authorized representative and approved by NMFS; and

(ii) For surrender of an SFFP and SFPP, refer to paragraphs (b)(3)(ii) and (c)(3)(ii) of this section, respectively.

(b) *Salmon Federal Fisheries Permit (SFFP)*—(1) *Requirements.* (i) No vessel of the United States may be used to commercially fish for salmon in the Cook Inlet EEZ Area unless the owner or authorized representative first obtains an SFFP for the vessel issued under this part. Only persons who are U.S. citizens are authorized to obtain an SFFP; and

(ii) Each vessel used to commercially fish for salmon within the Cook Inlet EEZ Area must have a legible copy of a valid SFFP on board at all times. The vessel operator must present the valid SFFP for inspection upon the request of any authorized officer.

(2) *Vessel operation.* An SFFP authorizes a vessel to conduct operations in the Cook Inlet EEZ Area.

(3) *Duration*—(i) *Length of permit effectiveness.* NMFS issues SFFPs on a 3-year cycle, and an SFFP is in effect from the effective date through the expiration date, as indicated on the SFFP, unless the SFFP is revoked, suspended, or modified under § 600.735 or § 600.740 of this chapter, or surrendered in accordance with paragraph (a)(7) of this section.

(ii) *Surrendered permit.* (A) An SFFP may be voluntarily surrendered in accordance with paragraph (a)(7) of this section. NMFS will not reissue a surrendered SFFP to the owner or authorized representative of a vessel named on an SFFP until after the expiration date of the surrendered SFFP as initially issued.

(B) An owner or authorized representative who applied for and received an SFFP must notify NMFS of the intention to surrender the SFFP by submitting an SFFP application found at the NMFS Alaska Region website and indicating on the application that surrender of the SFFP is requested. Upon receipt and approval of an SFFP surrender application, NMFS will withdraw the SFFP from active status.

(4) *Amended permit.* An owner or authorized representative who applied for and received an SFFP must notify NMFS of any change in the permit

information by submitting an SFFP application found at the NMFS Alaska Region website. The owner or authorized representative must submit the application form as instructed on the form. Except as provided under paragraph (b)(3)(ii)(B) of this section, upon receipt and approval of an application form for permit amendment, NMFS will issue an amended SFFP.

(5) *SFFP application.* To obtain, amend, renew, or surrender an SFFP, the vessel owner or authorized representative must complete an SFFP application form per the instructions from the NMFS Alaska Region website. The owner or authorized representative of the vessel must sign and date the application form, certifying that all information is true, correct, and complete to the best of their knowledge and belief. If the application form is completed by an authorized representative, proof of authorization must accompany the application form.

(6) *Issuance.* (i) Except as provided in subpart D of 15 CFR part 904, upon receipt and approval of a properly completed permit application, NMFS will issue an SFFP required by paragraph (b) of this section.

(ii) NMFS will send an SFFP with the appropriate logbooks to the owner or authorized representative, as provided under § 679.115.

(7) *Transfer.* An SFFP issued under paragraph (b) of this section is not transferable or assignable and is valid only for the vessel for which it is issued.

(c) *Salmon Federal Processor Permit (SFPP)*—(1) *Requirements.* No salmon shoreside processor, as defined at § 679.2, may process salmon harvested in the Cook Inlet EEZ Area, unless the owner or authorized representative first obtains an SFPP issued under this subpart. A salmon shoreside processor may not be operated in a category other than as specified on the SFPP. A legible copy of a valid SFPP must be on site at the salmon shoreside processor at all times and must be presented for inspection upon the request of any authorized officer.

(2) *SFPP application.* To obtain, amend, renew, or surrender an SFPP, the owner or authorized representative of the salmon shoreside processor must complete an SFPP application form per the instructions from the NMFS Alaska Region website. The owner or authorized representative of the salmon shoreside processor must sign and date the application form, certifying that all information is true, correct, and complete to the best of their knowledge and belief. If the application form is completed by an authorized representative, proof of authorization must accompany the application form.

(3) *Issuance.* Except as provided in subpart D of 15 CFR part 904, upon receipt and approval of a properly completed permit application, NMFS will issue an SFPP required by paragraph (c) of this section.

(4) *Duration*—(i) *Length of effectiveness.* An SFPP is in effect from the effective date through the date of permit expiration, unless it is revoked, suspended, or modified under § 600.735 or § 600.740 of this chapter, or surrendered in accordance with paragraph (a)(7) of this section.

(ii) *Surrendered permit.* (A) An SFPP may be voluntarily surrendered in accordance with paragraph (a)(7) of this section. NMFS may reissue an SFPP to the person to whom the SFPP was initially issued in the same fishing year in which it was surrendered.

(B) An owner or authorized representative who applied for and received an SFPP must notify NMFS of the intention to surrender the SFPP by submitting an SFPP application found at the NMFS Alaska Region website and indicating on the application form that surrender of the SFPP is requested. Upon receipt and approval of an SFPP surrender application, NMFS will withdraw the SFPP from active status.

(5) *Amended permit.* An owner or authorized representative who applied for and received an SFPP must notify NMFS of any change in the permit information by submitting an SFPP application found at the NMFS Alaska Region website. The owner or authorized representative must submit the application form as instructed on the form. Upon receipt and approval of an SFPP amendment application, NMFS will issue an amended SFPP.

(6) *Transfer.* An SFPP issued under this paragraph (c) is not transferable or assignable and is valid only for the salmon shoreside processor for which it is issued.

(d) *Registered Salmon Receiver Permit (RSRP)*—(1) *Requirements.* An RSRP authorizes the person identified on the permit to receive a landing of salmon from an SFFP holder at any time during the fishing year for which it is issued until the RSRP expires, as indicated on the RSRP, or is revoked, suspended, or modified under § 600.735 or § 600.740 of this chapter, or surrendered in accordance with paragraph (a)(7) of this section. An RSRP is required for any person, other than an SFPP holder, to receive salmon commercially harvested in the Cook Inlet EEZ Area from the person(s) who harvested the fish. A legible copy of the RSRP must be present at the time and location of a landing. The RSRP holder or their authorized representative must make the RSRP available for inspection upon the request of any authorized officer.

(2) *Application.* To obtain, amend, renew, or surrender an RSRP, the owner or authorized representative must complete an RSRP application form per the instructions from the NMFS Alaska Region website. The owner or authorized representative of a Registered Salmon Receiver must sign and date the application form, certifying that all information is true, correct, and complete to the best of their knowledge and belief. If the application form is completed by an authorized representative, proof of authorization must accompany the application form.

(3) *Issuance.* Except as provided in subpart D of 15 CFR part 904, upon receipt and approval of a properly completed permit application, NMFS will issue an RSRP required by paragraph (d) of this section.

(4) *Duration.* An RSRP is issued on an annual cycle defined as May through the end of April of the next calendar year, to persons who submit a Registered Salmon Receiver Permit application that NMFS approves.

(i) An RSRP is in effect from the first day of May in the year for which it is issued or from the date of issuance, whichever is later, through the end of the current annual cycle, unless it is revoked, suspended, or modified under § 600.735 or § 600.740 of this chapter, or surrendered in accordance with paragraph (a)(7) of this section.

(ii) An RSRP may be voluntarily surrendered in accordance with paragraph (a)(7) of this section. An RSRP may be reissued to the permit holder of record in the same fishing year in which it was surrendered.

(5) *Amended permit.* An owner or authorized representative who applied for and received an RSRP must notify NMFS of any change in the permit information by submitting an RSRP application found at the NMFS Alaska Region website. The owner or authorized representative must submit the application form as instructed on the form. Upon receipt and approval of an RSRP amendment application, NMFS will issue an amended RSRP.

§ 679.115 Recordkeeping and reporting.

(a) *General recordkeeping and reporting (R&R) requirement.* R&R requirements include, but are not limited to, paper and electronic documentation, logbooks, forms, reports, and receipts.

(1) *Salmon logbooks and forms.* (i) The Regional Administrator will prescribe and provide logbooks required

under this section. All forms required under this section are available from the NMFS Alaska Region website or may be requested by calling the Sustainable Fisheries Division at 907–586–7228. These forms may be completed online, or submitted according to the instructions shown on the form.

(ii) The operator must use the current edition of the logbooks and current format of the forms, unless they obtain prior written approval from NMFS to use logbooks from the previous year. Upon approval from NMFS, electronic versions of the forms may be used.

(iii) Commercial salmon harvest that occurred in the Cook Inlet EEZ Area must be recorded in eLandings by an SFPP or RSRP holder. See paragraph (b) of this section for more information.

(2) *Responsibility.* (i) The operator of a vessel, the manager of a salmon shoreside processor (hereafter referred to as the manager), and a Registered Salmon Receiver are responsible for complying with applicable R&R requirements in this section.

(ii) The owner of a vessel, the owner of a salmon shoreside processor, and the owner of a Registered Salmon Receiver are responsible for ensuring their employees and agents comply with applicable R&R requirements in this section.

(3) *Fish to be recorded and reported.* The operator of a vessel or manager must record and report the following information (see paragraphs (a)(3)(i) through (iv) of this section) for all salmon, groundfish (see table 2a to this part), halibut and crab, forage fish (see table 2c to this part), and sculpins (see table 2c to this part). The operator of a vessel or manager may record and report the following information (see paragraphs (a)(3)(i) through (iv) of this section) for other species (see table 2d to this part):

(i) Harvest information from vessels;

(ii) Receipt information from vessels, buying stations, and tender vessels, including fish received from vessels not required to have an SFFP or FFP, and fish received under contract for handling or processing for another processor;

(iii) Discard or disposition information, including fish reported but not delivered to the operator or manager (*e.g.,* fish used on board a vessel, retained for personal use, discarded at sea), when receiving catch from a vessel, buying station, or tender vessel; and

(iv) Transfer information, including fish transferred off the vessel or out of the facility.

(4) *Inspection and retention of records*—(i) *Inspection of records.* The operator of a vessel, a manager, and a Registered Salmon Receiver must make available for inspection R&R documentation they are required to retain under this section upon the request of an authorized officer; and

(ii) *Retention of records.* The operator of a vessel, a manager, and a Registered Salmon Receiver must retain the R&R documentation they are required to make under this section as follows:

(A) Retain these records on board a vessel, on site at the salmon shoreside processor or stationary floating processor (see § 679.2), or at the Registered Salmon Receiver's place of business, as applicable, until the end of the fishing year during which the records were made and for as long thereafter as fish or fish products recorded in the R&R documentation are retained on site.

(B) Retain these records for 3 years after the end of the fishing year during which the records were made.

(5) *Maintenance of records.* The operator of a vessel, a manager, and a Registered Salmon Receiver must maintain all records described in this section in English and in a legible, timely, and accurate manner, based on Alaska local time (A.l.t.); if handwritten, in indelible ink; if computer-generated, as a readable file or a legible printed paper copy.

(6) *Custom processing.* The manager or Registered Salmon Receiver must record products that result from custom processing for another person in eLandings consistently throughout a fishing year using one of the following two methods:

(i) For combined records, record landings, discards or dispositions, and products of custom-processed salmon routinely in eLandings using processor name, any applicable RSRP number or SFPP number, and ADF&G processor code; or

(ii) For separate records, record landings, discards or dispositions, and products of custom-processed salmon in eLandings identified by the name, SFPP number or RSRP number, and ADF&G processor code of the associated business entity.

(7) *Representative.* The operator of a vessel, manager, and RSRP holder may identify one contact person to complete the logbook and forms and to respond to inquiries from NMFS.

(b) *Interagency Electronic Reporting System (IERS) and eLandings*—(1) *Responsibility.* (i) An eLandings User must obtain at his or her own expense hardware, software, and internet connectivity to support internet submissions of commercial fishery landings for which participants report to NMFS: landing data, production data, and discard or disposition data. The User must enter this information via the internet by logging on to the eLandings system at *https://elandings.alaska.gov* or other NMFS-approved software or by using the desktop client software.

(ii) If the User is unable to submit commercial fishery landings of Cook Inlet EEZ salmon due to hardware, software, or internet failure for a period longer than the required reporting time, the User must contact NMFS Sustainable Fisheries Division at 907–586–7228 for instructions. When the hardware, software, or internet is restored, the User must enter this same information into eLandings or other NMFS-approved software.

(2) *eLandings processor registration.* (i) Before a User can use the eLandings system to report landings, production, discard, or disposition data, he or she must request authorization to use the system, reserve a unique UserID, and obtain a password by using the internet to complete the eLandings processor registration at *https://elandings.alaska.gov/elandings/Register;*

(ii) Upon registration acceptance, the User must print, sign, and mail or fax the User Agreement Form to NMFS at the address or fax number shown on the form. Confirmation is emailed to indicate that the User is registered, authorized to use eLandings, and that the UserID and User's account are enabled; and

(iii) The User's signature on the registration form means that the User agrees to the following terms:

(A) To use eLandings access privileges only for submitting legitimate fishery landing reports;

(B) To safeguard the UserID and password to prevent their use by unauthorized persons; and

(C) To ensure that the User is authorized to submit landing reports for the processor permit number(s) listed.

(3) *Information required for eLandings processor registration form.* The User must enter the following information (see paragraphs (b)(3)(i) through (ix) of this section) to obtain operation registration and UserID registration:

(i) Select the operation type from the dropdown list;

(ii) Enter a name that will refer to the specific operation. For example, if the plant is in Kodiak and the company is East Pacific Seafoods, the operation name might read ''East Pacific Seafoods-Kodiak;''

(iii) Enter ADF&G processor code;

(iv) Enter all the Federal permits associated with the operation;

(A) If a processor for Cook Inlet EEZ salmon, enter the SFPP number; and

(B) If a Registered Salmon Receiver, enter the RSRP number;

(v) Enter the home port code (see tables 14a, 14b, and 14c to this part) for the operation;

(vi) If a tender operation, the operator must enter the ADF&G vessel identification number of the vessel;

(vii) If a buying station or Registered Salmon Receiver operation is a vehicle, enter vehicle license number and the state of license issuance;

(viii) If a buying station, tender vessel, or custom processor, enter the following information to identify the associated processor where the processing will take place: operation type, ADF&G processor code, and applicable SFPP number, and RSRP number; and

(ix) Each operation requires a primary User. Enter the following information for the primary User for the new operation: create and enter a UserID, initial password, company name, User name (name of the person who will use the UserID), city and state where the operation is located, business telephone number, business fax number, business email address, security question, and security answer.

(4) *Information entered automatically for eLandings landing report.* eLandings autofills the following fields from processor registration records (see paragraph (b)(2) of this section): UserID, processor company name, business telephone number, email address, port of landing, operation type (for catcher/processors, motherships, or stationary floating processors), ADF&G processor code, and Federal permit number. The User must review the autofilled cells to ensure that they are accurate for the landing that is taking place. eLandings assigns a unique landing report number and an ADF&G electronic fish ticket number upon completion of data entry.

(5) *Registered Salmon Receiver landing report.* The manager and a Registered Salmon Receiver that receives salmon from a vessel issued an SFFP under § 679.114 and that is required to have an SFPP or RSRP under § 679.114(c) or (d) must use eLandings or other NMFS-approved software to submit a daily landing report during the fishing year to report processor identification information and the following information under paragraphs (b)(5)(i)(A) through (C) of this section:

(i) Information entered for each salmon delivery to a salmon shoreside processor or Registered Salmon Receiver. The User for a shoreside processor, stationary floating processor, or Registered Salmon Receiver must enter the information specified at (b)(5)(i)(A) through (C) of this section for each salmon delivery provided by the operator of a vessel, the operator or manager of an associated buying station or tender vessel, and from processors for reprocessing or rehandling product into eLandings or other NMFS-approved software:

(A) *Delivery information.* The User must:

(*1*) For crew size, enter the number of licensed crew aboard the vessel, including the operator;

(*2*) Enter the management program name in which harvest occurred (see paragraph (a)(1)(iii) of this section);

(*3*) Enter the ADF&G salmon statistical area of harvest;

(*4*) For date of landing, enter date (mm/dd/yyyy) that the delivery was completed;

(*5*) Indicate (YES or NO) whether delivery is from a buying station or tender vessel;

(*6*) If the delivery is received from a buying station, indicate the name of the buying station;

(*7*) If the delivery is received from a tender vessel, enter the ADF&G vessel registration number;

(*8*) If delivery is received from a vessel, indicate the ADF&G vessel registration number of the vessel; and

(*9*) Mark whether the vessel logsheet has been received.

(B) *Catch information.* The User must record the number and landed scale weight in pounds of salmon, including any applicable weight modifier such as delivery condition code, and disposition code of fish by species.

(C) *Discard or disposition information.* (*1*) The User must record discard or disposition of fish: that occurred on and was reported by a vessel; that occurred on and was reported by a salmon shoreside processor or Registered Salmon Receiver; and that occurred prior to, during, and/or after production at the salmon shoreside processor.

(*2*) The User for a salmon shoreside processor or Registered Salmon Receiver must submit a landing report containing the information described in paragraph (b)(5)(i) of this section for each salmon delivery from a specific vessel by 1200 hours, A.l.t., of the day following completion of the delivery. If the landed scale weight required in paragraph (b)(5)(i)(B) of this section is not available by this deadline, the User must transmit an estimated weight and count for each species by 1200 hours, A.l.t., of the day following completion of the delivery, and must submit a revised landing report with the landed scale weight for each species by 1200 hours, A.l.t., of the third day following completion of the delivery.

(*3*) By using eLandings, the User for a salmon shoreside processor or a Registered Salmon Receiver and the operator of the vessel providing information to the User for the salmon shoreside processor or Registered Salmon Receiver accept the responsibility of and acknowledge compliance with § 679.117(b)(5).

(ii) [Reserved]

(c) *Logbooks*—(1) *Requirements.* (i) All Cook Inlet EEZ Area logbook pages must be sequentially numbered.

(ii) Except as described in paragraph (c)(1)(iii) or (iv) of this section, no person may alter or change any entry or record in a logbook;

(iii) An inaccurate or incorrect entry or record in printed data must be corrected by lining out the original and inserting the correction, provided that the original entry or record remains legible. All corrections must be made in ink; and

(iv) If after an electronic logsheet is signed, an error is found in the data, the operator must make any necessary changes to the data, sign the new logsheet, and export the revised file to NMFS. The operator must retain both the original and revised logsheet reports.

(2) *Logsheet distribution and submittal.* The operator of a vessel must distribute and submit accurate copies of logsheets to the salmon shoreside processor or Registered Salmon Receiver and to NOAA Fisheries Office of Law Enforcement Alaska Region according to the logsheet instructions.

(3) *Salmon drift gillnet vessel daily fishing log.* The operator of a vessel that is required to have an SFFP under § 679.114(b), and that is using drift gillnet gear to harvest salmon in the Cook Inlet EEZ Area, must maintain a salmon drift gillnet vessel daily fishing log.

(4) *Reporting time limits.* The operator of a vessel using drift gillnet gear must record in the daily fishing log the information from the following table for each set within the specified time limit:

REPORTING TIME LIMITS, CATCHER VESSEL DRIFT GILLNET GEAR

Required information	Time limit for recording
(i) SFFP number, set number, date and time gear set, date and time gear hauled, beginning and end positions of set, length of net deployed, total number of salmon, and estimated hail weight of groundfish for each set.	Within 2 hours after completion of gear retrieval.
(ii) Discard and disposition information	Prior to landing.
(iii) Submit an accurate copy of the groundfish discards reported on the daily fishing log to shoreside processor or Registered Salmon Receiver receiving catch.	At the time of catch delivery.
(iv) All other required information	At the time of catch delivery.
(v) Operator sign the completed logsheets	At the time of catch delivery.

§ 679.116 [Reserved]

§ 679.117 Salmon fisheries prohibitions.

In addition to the general prohibitions specified in § 600.725 of this chapter and § 679.7, it is unlawful for any person to do any of the following:

(a) *The East Area and the West Area*—(1) *East Area.* Engage in commercial fishing for salmon using any gear except troll gear, defined at § 679.2, in the East Area of the Salmon Management Area, defined at § 679.2 and figure 23 to this part.

(2) *West Area.* Engage in commercial fishing for salmon in the West Area of the Salmon Management Area, defined at § 679.2 and figure 23 to this part.

(b) *Cook Inlet EEZ Area*—(1) *Commercial fishery participants.* (i) Engage in commercial fishing for salmon in the Cook Inlet EEZ Area of the Salmon Management Area, defined at § 679.2 and figure 22 to this part, with a vessel of the United States that does not have on board a legible copy of a valid SFFP issued to the vessel under § 679.114;

(ii) Engage in commercial fishing for salmon using any gear except drift gillnet gear, described at § 679.118, in the Cook Inlet EEZ Area;

(iii) Have on board, retrieve, or deploy any gear, except a drift gillnet legally configured for the Cook Inlet EEZ Area commercial salmon fishery while commercial fishing for salmon in the Cook Inlet EEZ Area;

(iv) Deploy more than one drift gillnet while commercial fishing for salmon in the Cook Inlet EEZ Area;

(v) Deploy drift gillnet gear within, or allow any portion of drift gillnet gear to enter, Alaska State waters on the same calendar day that drift gillnet gear is also deployed in the Cook Inlet EEZ Area while commercial fishing for salmon in the Cook Inlet EEZ Area;

(vi) Deploy drift gillnet gear in excess of the allowable configuration for total length and mesh size specified at § 679.118(f) while commercial fishing for salmon in the Cook Inlet EEZ Area;

(vii) Use a vessel named, or required to be named, on an SFFP to fish for salmon in the Cook Inlet EEZ Area if that vessel fishes for salmon in Alaska State waters on the same calendar day;

(viii) Possess salmon, harvested in Alaska State waters, on board a vessel commercial fishing for salmon in the Cook Inlet EEZ Area;

(ix) Have salmon on board a vessel at the time a fishing trip commences in the Cook Inlet EEZ Area;

(x) Conduct recreational fishing for salmon, or have recreational or subsistence salmon on board, while commercial fishing for salmon in the Cook Inlet EEZ Area;

(xi) Use or employ aircraft (manned or unmanned) to locate salmon or to direct commercial fishing while commercial fishing for salmon in the Cook Inlet EEZ Area 1 hour before, during, and 1 hour after a commercial salmon fishing period;

(xii) Land salmon harvested in Alaska State waters concurrently with salmon harvested commercially in the Cook Inlet EEZ Area;

(xiii) Land or transfer salmon harvested while commercial fishing for salmon in the Cook Inlet EEZ Area, within the EEZ off Alaska;

(xiv) Operate a vessel named, or required to be named, on an SFFP in the waters of Cook Inlet without an operable VMS as required in § 679.28(f).

(xv) Discard any salmon harvested while commercial fishing for salmon in the Cook Inlet EEZ Area.

(xvi) Engage in commercial fishing for salmon in the Cook Inlet EEZ Area contrary to notification of inseason action, closure, or adjustment issued under §§ 679.25 and 679.118.

(2) *Recreational fishery participants.* (i) Engage in recreational fishing for salmon using any gear except for handline, rod and reel, or hook and line gear, defined at § 600.10, in the Cook Inlet EEZ Area of the Salmon Management Area, defined at § 679.2 and figure 22 to this part;

(ii) Use more than a single line, with more than two hooks attached, per angler in the Cook Inlet EEZ Area;

(iii) No person shall possess on board a vessel, including charter vessels and pleasure craft used for fishing, salmon retained in the Cook Inlet EEZ Area that have been filleted, mutilated, or otherwise disfigured in any manner, except that each salmon may be cut into no more than two pieces with a patch of skin on each piece, naturally attached. One piece from one salmon on board may be consumed.

(iv) Exceed the daily bag limits and possession limits established under § 679.119.

(v) Engage in recreational fishing for salmon in the Cook Inlet EEZ Area contrary to notification of inseason action, closure, or adjustment issued under § 679.118.

(3) *Processors and Registered Salmon Receivers.* (i) Receive, purchase or arrange for purchase, discard, or process salmon harvested in the Cook Inlet EEZ Area without having on site a legible copy of a valid SFPP or valid RSRP issued under § 679.114;

(ii) Process or receive salmon harvested in the Cook Inlet EEZ Area without submitting a timely and complete landing report as required under § 679.115;

(iii) Process salmon harvested in the Cook Inlet EEZ Area in the EEZ off Alaska; and

(iv) Receive or transport salmon caught in the Cook Inlet EEZ Area without an SFPP or RSRP issued under § 679.114.

(4) *Recordkeeping and reporting.* (i) Fail to comply with or fail to ensure compliance with requirements in § 679.114 or § 679.115.

(ii) Alter or forge any permit or document issued under § 679.114 or § 679.115;

(iii) Fail to submit or submit inaccurate information on any report, application, or statement required under this part; and

(iv) Intentionally submit false information on any report, application, or statement required under this part.

(5) *General.* Fail to comply with any other requirement or restriction specified in this part or violate any provision under this part.

§ 679.118 Management measures.

This section applies to vessels engaged in commercial fishing and recreational fishing for salmon in the Cook Inlet EEZ Area.

(a) *Harvest limits*—(1) *TAC.* NMFS, after consultation with the Council, will specify the annual TAC amounts for commercial fishing for each salmon stock or species after accounting for projected recreational fishing removals.

(2) *Annual TAC determination.* The annual determinations of TAC for each salmon species or stock may be based on a review of the following:

(i) Resource assessment documents prepared regularly for the Council that provide information on historical catch trends; updated estimates of the MSY of the salmon stocks or stock complexes; assessments of the stock condition of each salmon stock or stock complex; SSC recommendations on reference points established for salmon stocks; management uncertainty; assessments of the multispecies and ecosystem impacts of harvesting the salmon stocks at current levels, given the assessed condition of stocks, including consideration of rebuilding depressed stocks; and alternative harvesting strategies and related effects on the salmon species;

(ii) Social and economic considerations that are consistent with Salmon FMP goals for the Cook Inlet EEZ Area, including the need to promote efficiency in the utilization of fishery resources, including minimizing costs; the desire to conserve, protect, and rebuild depleted salmon stocks; the importance of a salmon fishery to harvesters, processors, local communities, and other salmon users in Cook Inlet; and the need to promote utilization of certain species.

(b) *Annual specifications*—(1) *Proposed specifications.* (i) As soon as practicable after consultation with the Council, NMFS will publish proposed specifications for the salmon fishery in the Cook Inlet EEZ Area; and

(ii) NMFS will accept public comment on the proposed specifications established by this section for a period specified in the notice of proposed specifications published in the **Federal Register**.

(2) *Final specifications.* NMFS will consider comments received on the proposed specifications and will publish a notice of final specifications in the **Federal Register** unless NMFS determines that the final specifications would not be a logical outgrowth of the notice of proposed specifications. If the final specifications would not be a logical outgrowth of the notice of proposed specifications, NMFS will either:

(i) Publish a revised notice of proposed specifications in the **Federal Register** for public comment, and after considering comments received on the revised proposed specifications, publish a notice of final specifications in the **Federal Register**; or

(ii) Publish a notice of final specifications in the **Federal Register** without an additional opportunity for public comment based on a finding that good cause pursuant to the Administrative Procedure Act justifies waiver of the requirement for a revised notice of proposed specifications and opportunity for public comment thereon.

(c) *Management authority*—(1) *Fishery closures.* (i) For commercial fishing, if NMFS determines that any salmon TAC for commercial fishing as specified under paragraph (b) of this section has been or may be reached for any salmon species or stock, NMFS will publish notification in the **Federal Register** prohibiting commercial fishing for salmon in the Cook Inlet EEZ Area.

(ii) For recreational fishing, if NMFS determines that any salmon ABC as specified under paragraph (b) of this section has been or may be reached, NMFS will publish notification in the **Federal Register** prohibiting retention of that salmon species when recreational fishing in the Cook Inlet EEZ Area and may also prohibit recreational fishing for one or more salmon species in the Cook Inlet EEZ Area. The Regional Administrator maintains the authority to open or close the Cook Inlet EEZ Area to recreational fishing for one or more salmon species if they deem it appropriate for conservation or other management purposes. Factors such as the ABC, anticipated harvest rates, expected mortality, and the number of participants will be considered in making any such determination.

(d) *Commercial Fishery maximum retainable amounts (MRA)*—(1) *Proportion of basis species.* The MRA of an incidental catch species is calculated as a proportion of the basis species retained on board the vessel using the retainable percentages in table 10 to this part for the GOA species categories.

(2) *Calculation.* (i) To calculate the MRA for a specific incidental catch species, an individual retainable amount must be calculated with respect to each basis species that is retained on board that vessel.

(ii) To obtain these individual retainable amounts, multiply the appropriate retainable percentage for the incidental catch species/basis species combination, set forth in table 10 to this part for the GOA species categories, by the amount of the relevant basis species on board, in round-weight equivalents.

(iii) The MRA for that specific incidental catch species is the sum of the individual retainable amounts for each basis species.

(e) *Seasons*—(1) *Fishing season.* Directed fishing for salmon using drift gillnet gear in the Cook Inlet EEZ Area may be conducted from 0700 hours, A.l.t., from the third Monday in June or June 19, whichever is later, through 1900 hours, A.l.t., August 15.

(2) *Fishing periods.* Notwithstanding other provisions of this part, fishing for salmon with drift gillnet gear in the Cook Inlet EEZ Area is authorized during the fishing season only from 0700 hours, A.l.t., until 1900 hours, A.l.t., Mondays and from 0700 hours, A.l.t., until 1900 hours, A.l.t., Thursdays from the third Monday in June or June 19, whichever is later, until July 15, and from August 1 until August 15. From July 16 until July 31, fishing for salmon with drift gillnet gear in the Cook Inlet EEZ Area is authorized during the fishing season only from 0700 hours, A.l.t., until 1900 hours, A.l.t., Thursdays. Fishing for salmon using drift gillnet gear at times other than during the specified fishing periods is not authorized.

(f) *Legal gear*—(1) *Size.* Drift gillnet gear must be no longer than 200 fathoms (1.1 kilometer) in length, 45 meshes deep, and have a mesh size of no greater than 6 inches (15.24 cm).

(2) *Marking.* Drift gillnet gear must be marked at both ends with buoys that legibly display the vessel's SFFP number.

(3) *Floating.* The float line and floats of gillnets must be floating on the surface of the water while the net is fishing, unless natural conditions cause the net to temporarily sink. Staking or otherwise fixing a drift gillnet to the seafloor is not authorized.

(4) *Measurement.* For purposes of paragraph (f)(1) of this section, nets must be measured, either wet or dry, by determining the maximum or minimum distance between the first and last hanging of the net when the net is fully extended with traction applied at one end only.

§ 679.119 Recreational salmon fisheries.

(a) *Daily bag limits and possession limits.* For each person recreational fishing for salmon in the Cook Inlet EEZ Area, the following daily bag and possession limits apply:

(1) *Chinook salmon.* From April 1 to August 31, the daily bag limit is one Chinook salmon of any size and the possession limit is one daily bag limit

(one Chinook salmon). From September 1 to March 31, the daily bag limit is two Chinook salmon of any size and the possession limit is one daily bag limit (two Chinook salmon).

(2) *Coho salmon, sockeye salmon, pink salmon, and chum salmon.* For coho salmon, sockeye salmon, pink salmon, and chum salmon, the daily bag limit is a total of six fish combined, of any size, of which a maximum of three may be coho salmon. The possession limit for coho salmon, sockeye salmon, pink salmon, and chum salmon is one daily bag limit (six fish total).

(3) *Combination of bag/possession limits.* A person who fishes for or possesses salmon in or from the Cook Inlet EEZ Area, specified in paragraph (a) of this section, may not combine such bag or possession limits with any bag or possession limit applicable to Alaska State waters.

(4) *Responsibility for bag/possession limits.* The operator of a vessel that fishes for or possesses salmon in or from the Cook Inlet EEZ Area is responsible for the cumulative bag or possession limit specified in paragraph (a) of this section that apply to that vessel, based on the number of persons aboard.

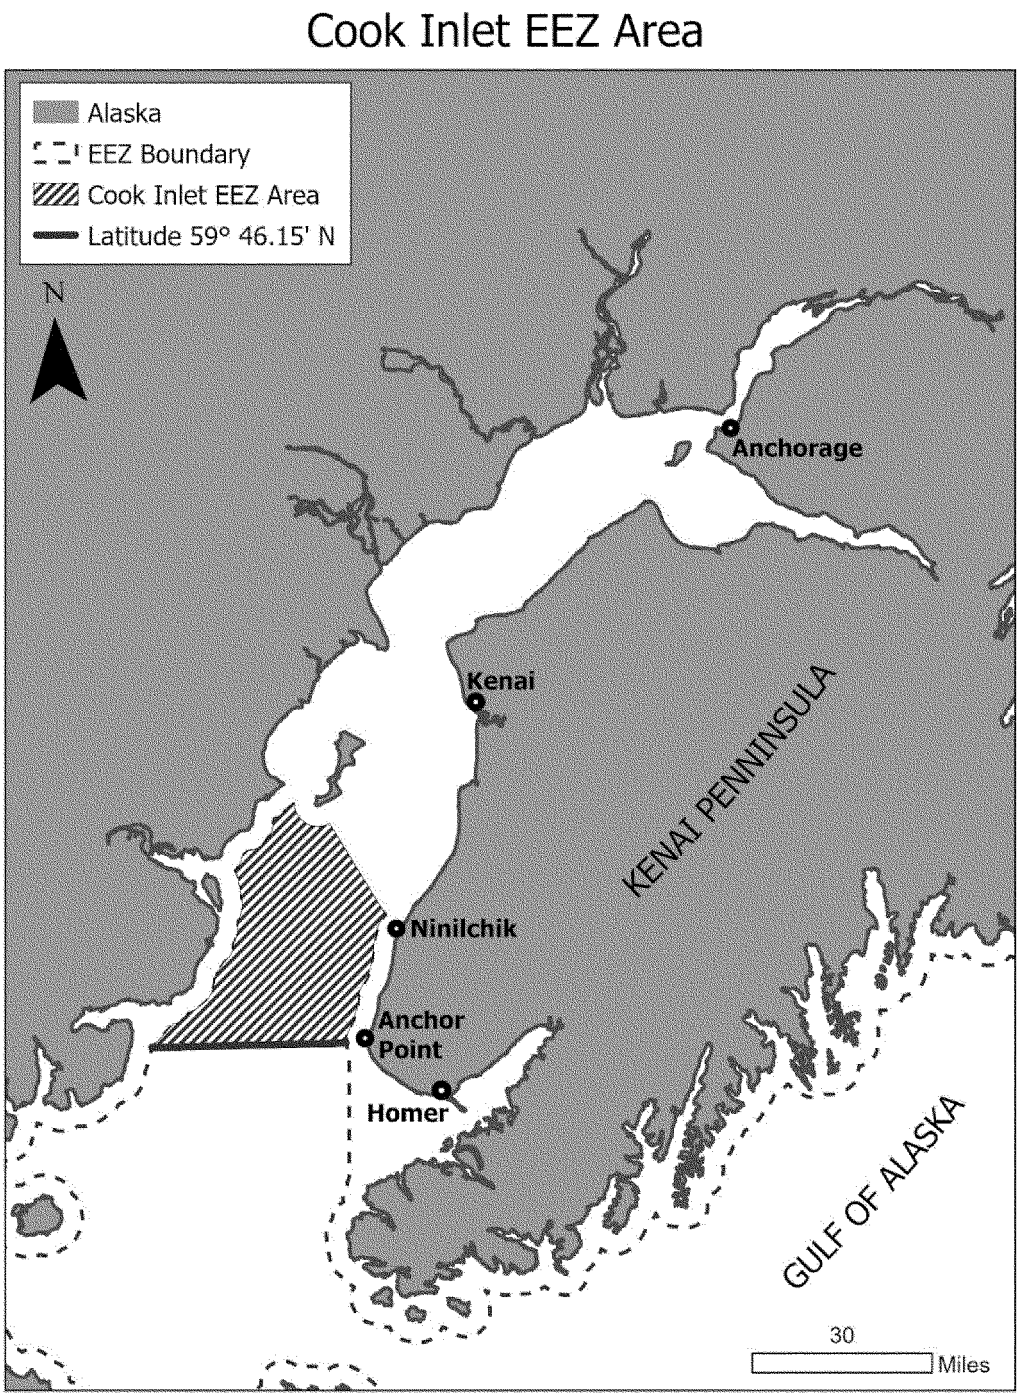
(5) *Transfer at sea.* A person who fishes for or possesses salmon in or from the Cook Inlet EEZ Area under a bag or possession limit specified in paragraph (a) of this section may not transfer a salmon at sea from a fishing vessel to any other vessel, and no person may receive at sea such salmon.

(b) *Careful release.* Any salmon brought aboard a vessel and not immediately returned to the sea with a minimum of injury will be included in the daily bag limit of the person catching the salmon.

■ 13. Add figure 22 to part 679 to read as follows:

Figure 22 to Part 679—Cook Inlet EEZ Area

BILLING CODE 3510–22–P



BILLING CODE 3510–22–C

■ 14. Amend table 15 to part 679 by:

■ a. Adding in alphabetical order the entry ''Gillnet, drift'' under the heading ''NMFS AND ADF&G GEAR CODES''; and

■ b. Removing the entry ''Gillnet, drift'' under the heading ''ADF&G GEAR CODES''.

The addition reads as follows:

* * * * *

TABLE 15 TO PART 679—GEAR CODES, DESCRIPTIONS, AND USE

Name of gear	Use alphabetic code to complete the following:			Use numeric code to complete the following:

26 CFR Part 1
Transfer of Certain Credits; Final Rule

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[TD 9993]

RIN 1545–BQ64

Transfer of Certain Credits

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final Regulations and removal of temporary regulations.

SUMMARY: This document contains final regulations concerning the election under the Inflation Reduction Act of 2022 to transfer certain tax credits. The regulations describe rules for the election to transfer eligible credits in a taxable year, including definitions and special rules applicable to partnerships and S corporations and regarding excessive credit transfer or recapture events. In addition, the regulations describe rules related to a required IRS pre-filing registration process. These regulations affect eligible taxpayers that elect to transfer eligible credits in a taxable year and the transferee taxpayers to which eligible credits are transferred.

DATES:

Effective Date: These regulations are effective on July 1, 2024.

Applicability Dates: For dates of applicability, *see* §§ 1.6418–1(r), 1.6418–2(g), 1.6418–3(f), 1.6418–4(d), and 1.6418–(5)(j).

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, James Holmes at (202) 317–5114 and Jeremy Milton at (202) 317–5665 (not toll-free numbers).

SUPPLEMENTARY INFORMATION: This document contains final regulations that amend the Income Tax Regulations (26 CFR part 1) to implement the statutory provisions of section 6418 of the Internal Revenue Code (Code), as enacted by section 13801(b) of Public Law 117–169, 136 Stat. 1818, 2009 (August 16, 2022), commonly known as the Inflation Reduction Act of 2022 (IRA).

Background

I. Overview of Section 6418

Section 6418(a) provides that, in the case of an eligible taxpayer that elects to transfer to an unrelated transferee taxpayer all (or any portion specified in the election) of an eligible credit determined with respect to the eligible taxpayer for any taxable year, the transferee taxpayer specified in such election (and not the eligible taxpayer) is treated as the taxpayer for purposes of the Code with respect to such credit (or such portion thereof). Under section 6418(b), any amount of consideration paid by the transferee taxpayer to the eligible taxpayer for the transfer of such credit (or such portion thereof) is (1) required to be paid in cash, (2) not included in the eligible taxpayer's gross income, and (3) not allowed as a deduction to the transferee taxpayer under any provision of the Code.

Section 6418(f)(2) defines the term ''eligible taxpayer'' to mean any taxpayer that is not described in section 6417(d)(1)(A) of the Code (that is, any taxpayer that is not an ''applicable entity'' by reason of section 6417(d)(1)(A)).

Section 6418(f)(1)(A) defines the term ''eligible credit'' to mean each of the following 11 credits:

(1) So much of the credit for alternative fuel vehicle refueling property allowed under section 30C of the Code that, pursuant to section 30C(d)(1), is treated as a credit listed in section 38(b) of the Code (section 30C credit);

(2) The renewable electricity production credit determined under section 45(a) of the Code (section 45 credit);

(3) The credit for carbon oxide sequestration determined under section 45Q(a) of the Code (section 45Q credit);

(4) The zero-emission nuclear power production credit determined under section 45U(a) of the Code (section 45U credit);

(5) The clean hydrogen production credit determined under section 45V(a) of the Code (section 45V credit);

(6) The advanced manufacturing production credit determined under section 45X(a) of the Code (section 45X credit);

(7) The clean electricity production credit determined under section 45Y(a) of the Code (section 45Y credit);

(8) The clean fuel production credit determined under section 45Z(a) of the Code (section 45Z credit);

(9) The energy credit determined under section 48 of the Code (section 48 credit);

(10) The qualifying advanced energy project credit determined under section 48C of the Code (section 48C credit); and

(11) The clean electricity investment credit determined under section 48E of the Code (section 48E credit).

Under section 6418(f)(1)(B), an election to transfer a section 45 credit, section 45Q credit, section 45V credit, or section 45Y credit is made separately with respect to each facility and for each taxable year during the credit period of the respective credit. Pursuant to section 6418(f)(1)(C) an eligible credit does not include any business credit carryforward or business credit carryback. Section 6418(g)(4) provides that an eligible taxpayer may not make an election to transfer credits for progress expenditures.

Pursuant to section 6418(e)(1), an eligible taxpayer must make an election to transfer any portion of an eligible credit on its original tax return for the taxable year for which the credit is determined by the due date of such return (including extensions of time) but such an election cannot be made earlier than 180 days after the date of the enactment of section 6418 by section 13801(b) of the IRA (that is, in no event earlier than 180 days after August 16, 2022, which is February 13, 2023). An eligible taxpayer cannot revoke an election to transfer any portion of a credit. Pursuant to section 6418(d), a transferee taxpayer takes the transferred eligible credit into account in its first taxable year ending with, or after, the eligible taxpayer's taxable year with respect to which the transferred eligible credit was determined. Section 6418(e)(2) provides that a transferee taxpayer may not make any additional transfers of a transferred eligible credit under section 6418.

II. Section 6418 Rules for Partnerships and S Corporations

Pursuant to section 6418(c), in the case of a partnership or an S corporation (as defined in section 1361(a)) that directly holds a facility or property for which an eligible credit is determined: (1) the election to transfer an eligible credit is made at the entity level and no election by any partner or shareholder is allowed with respect to such facility or property; (2) any amount received as consideration for a transferred eligible credit is treated as tax exempt income for purposes of sections 705 and 1366 of the Code; and (3) a partner's distributive share of the tax exempt income is based on the partner's distributive share of the transferred eligible credit.

III. Special Rules

Section 6418(g) provides special rules regarding the elective transfer of certain credits. Section 6418(g)(1) provides that, as a condition of, and prior to, any transfer of any portion of an eligible credit pursuant to section 6418(a), the Secretary of the Treasury or her delegate (Secretary) may require such information (including, in such form or manner as is determined appropriate by the Secretary, such information returns) or registration as the Secretary deems necessary for purposes of preventing

duplication, fraud, improper payments, or excessive payments under section 6418.

Pursuant to section 6418(g)(2), if the Secretary determines that there is an excessive credit transfer to a transferee taxpayer, then the tax imposed on the transferee taxpayer by chapter 1 of the Code (chapter 1), regardless of whether such entity would otherwise be subject to tax under chapter 1, is increased in the year of such determination by the amount of the excessive credit transfer plus 20 percent of such excessive credit transfer. The additional amount of 20 percent of the excessive credit transfer does not apply if the transferee taxpayer demonstrates to the satisfaction of the Secretary that the excessive credit transfer resulted from reasonable cause.

An excessive credit transfer is defined in section 6418(g)(2)(C) as, with respect to a facility or property for which an election is made under section 6418(a) for any taxable year, an amount equal to the excess of (i) the amount of the eligible credit claimed by the transferee taxpayer with respect to such facility or property for such taxable year; over (ii) the amount of the eligible credit that, without application of section 6418, would be otherwise allowable under the Code with respect to such facility or property for such taxable year.

Pursuant to section 6418(g)(3), if a section 48 credit, section 48C credit, or section 48E credit is transferred, the basis reduction rules of section 50(c) of the Code apply to the applicable investment credit property as if the transferred eligible credit was allowed to the eligible taxpayer. Further, if applicable investment credit property is disposed of, or otherwise ceases to be investment credit property with respect to the eligible taxpayer, before the close of the recapture period as described in section 50(a)(1), then certain notification requirements apply. The eligible taxpayer must notify the transferee taxpayer of a recapture event in such form and manner as the Secretary may provide. In addition, the transferee taxpayer must notify the eligible taxpayer of the recapture amount, if any, in such form and manner as the Secretary may provide.

Section 6418(h) directs the Secretary to issue regulations or other guidance as may be necessary to carry out the purposes of section 6418, including guidance providing rules for determining a partner's distributive share of the tax exempt income described in section 6418(c)(1).

IV. Notice 2022–50

On October 24, 2022, the Department of the Treasury (Treasury Department) and the IRS published Notice 2022–50, 2022–43 I.R.B. 325, to, among other things, request feedback from the public on potential issues with respect to the transfer election provisions under section 6418 that may require guidance. Stakeholders submitted more than 200 letters in response to Notice 2022–50.

V. Proposed and Temporary Regulations

On June 21, 2023, informed by the stakeholder feedback received in response to Notice 2022–50, the Treasury Department and the IRS published proposed regulations under section 6418 (REG–101610–23) in the **Federal Register** (88 FR 40496) to provide guidance on transfer elections (proposed regulations). The proposed regulations included proposed § 1.6418–4, which contained proposed rules identical to the text of temporary regulations (TD 9975) at § 1.6418–4T. Those temporary regulations also were published on June 21, 2023, in the **Federal Register** (88 FR 40086) to provide guidance on the mandatory information and registration requirements for transfer elections. The preamble to the proposed regulations discusses stakeholder feedback received in response to Notice 2022–50 and explains in greater detail the provisions of the proposed regulations.

VI. 6417 Final Regulations

On March 11, 2024, the Treasury Department and the IRS published final regulations under section 6417 (TD 9988) in the **Federal Register** (89 FR 17546) to provide guidance on the section 6417 elective payment election (section 6417 final regulations). Among other things, the section 6417 final regulations provide guidance on the definition of applicable entity under section 6417(d)(1)(A).

Summary of Comments and Explanation of Revisions

This Summary of Comments and Explanation of Revisions summarizes comments submitted in response to the proposed regulations and the revisions to the proposed regulations reflected in these final regulations. The Treasury Department and the IRS received more than 80 written comments in response to the proposed regulations. The comments are available for public inspection at *https://www.regulations.gov* or upon request. A hearing was conducted in person and telephonically on August 23, 2023, during which 10 presenters provided testimony. After full consideration of the comments received and testimony provided, these final regulations adopt the proposed regulations with modifications in response to such comments and testimony as described in this Summary of Comments and Explanation of Revisions.

Comments merely summarizing or interpreting the proposed regulations, recommending statutory revisions to section 6418 or other statutes, or addressing issues that are outside the scope of this rulemaking, such as the calculation of eligible credits (including any bonus credit amounts) or recommended changes to IRS forms, are beyond the scope of these regulations and are generally not described in this preamble.

I. General Rule and Definitions

Proposed § 1.6418–1 would have described general rules related to the transfer of eligible credits. Proposed § 1.6418–1(a) would have provided an overview of a transfer of eligible credits, and paragraphs (b) through (q) would have provided definitions of terms under the section 6418 regulations. Commenters addressed certain aspects of the proposed definitions, as described in this part I. To the extent a definition in § 1.6418–1(b) through (q) is not addressed in this part I and no comment addressed it, such definition is adopted by this Treasury Decision as proposed.

A. Eligible Taxpayer

Section 6418(f)(2) defines the term ''eligible taxpayer'' to mean any taxpayer that is not described in section 6417(d)(1)(A). Proposed § 1.6418–1(b) would have clarified that the term ''eligible taxpayer'' means any taxpayer (as defined in section 7701(a)(14) of the Code), other than one described in section 6417(d)(1)(A) and § 1.6417–1(b). The intended cite in the proposed regulations was to § 1.6417–1(c), rather than § 1.6417–1(b). As the preamble to the proposed regulations noted, the term ''taxpayer'' in section 7701(a)(14) means ''any person subject to any internal revenue tax'' and generally includes entities that have a United States employment tax or excise tax obligation even if they do not have a United States income tax obligation.

A commenter recommended that an eligible taxpayer also include any person that does not have a United States internal revenue tax obligation, such as a taxpayer that is only subject to the taxes of a territory of the United States. Broadening the definition of eligible taxpayer in section 6418(f)(2) is beyond the definition of taxpayer in section 7701(a)(14) and is not supported by section 6418. Section 6418(f)(2) defines eligible taxpayer as ''any taxpayer'' not described in section 6417(d)(1)(A). Section 7701(a)(14)

provides the definition of taxpayer for purposes of the Code. Pursuant to section 7701(a), the definition under section 7701(a)(14) apples to all Code provisions unless a different definition is otherwise distinctly expressed or the definition in section 7701(a)(14) is manifestly incompatible with the intent of section 6418. Under section 6418, there is no distinct expression that the term ''taxpayer'' should include those not subject to any United States tax obligations, and there is no indication that the definition in section 7701(a)(14) is incompatible with the intent of section 6418. Thus, it is appropriate to use the definition of taxpayer in section 7701(a)(14) for purposes of defining eligible taxpayer for purposes of section 6418, and these regulations finalize the definition of eligible taxpayer as proposed.

A commenter requested a clarification that a partnership wholly or partially owned by applicable entities described in section 6417(d)(1)(A) qualifies as an eligible taxpayer under section 6418(f)(2). The Treasury Department and the IRS agree that if such a partnership has not elected to be treated as an applicable entity with respect to the section 45Q credit, section 45V credit, or section 45X credit, it can otherwise qualify as an eligible taxpayer. Section 6418(f)(2) defines eligible taxpayer as a taxpayer other than one described in section 6417(d)(1)(A). Under section 6417 and the section 6417 final regulations, a partnership (regardless of the tax status of its partners) can only be treated as an applicable entity with respect to the section 45Q credit, section 45V credit, or section 45X credit and only if the partnership makes an elective payment election. Further, section 7701(a)(14) defines the term ''taxpayer'' as any person subject to any internal revenue tax. The term ''person'' is defined in section 7701(a)(1) and includes a partnership. Consequently, if a partnership has not elected to be treated as an applicable entity with respect to the section 45Q credit, section 45V credit, or section 45X credit, it can qualify as an eligible taxpayer.

The same commenter also sought to clarify that a partnership that has one or more applicable entity partners described in section 6417(d)(1)(A) is entitled to transfer the entirety of the eligible credits determined with respect to a property or facility held directly by the partnership without a reduction of the eligible credits allocable to the applicable entity partners. The Treasury Department and the IRS agree that such a partnership is entitled to transfer the entirety of the eligible credits determined with respect to a property or facility held directly by the partnership; however, section 50(b)(3) and (4) may limit the amount of eligible investment tax credits (ITCs) determined with respect to any tax-exempt or government entity partner.

B. Eligible Credit Property

Section 6418(a) states that an eligible taxpayer can elect to transfer all (or any portion specified in the election) of an eligible credit determined with respect to such eligible taxpayer. Proposed § 1.6418–1(a) would have provided that an eligible taxpayer may make a transfer election to transfer any specified portion of an eligible credit determined with respect to any eligible credit property of the eligible taxpayer for any taxable year. Proposed § 1.6418–1(d) would have defined the term ''eligible credit property'' as the unit of property of an eligible taxpayer with respect to which the amount of an eligible credit is determined. Proposed § 1.6418–1(d)(1) through (11) would have described the unit of property that is considered an eligible credit property for each of the 11 eligible credits.

A commenter recommended that the final regulations use the same concept of a unit of property as is used for the various underlying eligible credit provisions (for example, energy property or energy project for purposes of section 48, and qualified facility for purposes of section 45). The proposed regulations referenced the statutory rules for each eligible credit to determine the appropriate unit of measurement for section 6418 registration and election and provided additional information relevant for each eligible credit. For example, proposed § 1.6418–1(d)(2) would have provided that, in the case of a section 45 credit, the relevant unit of property is a qualified facility described in section 45(d). Likewise, proposed § 1.6418–1(d)(9) would have provided that, in the case of a section 48 credit, the relevant unit of property is an energy property described in section 48, or, at the option of the taxpayer, an energy project described in section 48(a)(9)(A)(ii) and defined in guidance. The proposed regulations, without modification, are consistent with this comment. Thus, these final regulations, consistent with the proposed regulations, base the definition of an eligible credit property on the underlying Code provisions for the eligible credits and no further changes are necessary.

Another commenter asked for clarification that section 48 credits determined with respect to energy property qualifying as ''energy storage technology'' under section 48(c)(6)(A) would be eligible credits that could be transferred under section 6418. The preamble to the proposed regulations provided in part that energy property is comprised of all components of property necessary to generate electricity up to the point of transmission or distribution. The commenter raised that ''energy storage technology'' is specifically designated as ''energy property'' under section 48(a)(3)(A)(ix), but unlike other forms of ''energy property,'' it does not generate electricity. The Treasury Department and the IRS confirm that, to the extent a section 48 credit is determined with respect to energy property held by an eligible taxpayer, whether the credit is with respect to energy storage technology or other energy property, such credit is an eligible credit that can be transferred under section 6418 by the eligible taxpayer.

Other commenters recommended revising the definition of eligible credit property for purposes of section 45Q. Proposed § 1.6418–1(d)(3) would have provided that an eligible credit is determined, for purposes of section 45Q, based on a *single process train of carbon capture equipment* described in § 1.45Q–2(c)(3). Commenters recommended that, for the section 45Q credit, the definition of eligible credit property be a component of a single process train for the capture, disposal, utilization, or injection of qualified carbon oxide, rather than a single process train of carbon capture equipment described in § 1.45Q–2(c)(3). Other commenters urged that the final regulations reconcile the proposed rules with Rev. Rul. 2021–13, 2021–30 I.R.B. 152, under which a taxpayer need own only one component in a single process train to be the person to whom the section 45Q credit is attributable to (assuming the taxpayer also meets the requirements of section 45Q(a), as applicable). The Treasury Department and the IRS agree that guidance under section 45Q does not require a taxpayer to own every component of a single process train and have revised the language under § 1.6418–1(d)(3) (defining eligible credit property with respect to the section 45Q credit) to state ''[i]n the case of a section 45Q credit, a component of carbon capture equipment within a *single process train* described in § 1.45Q–2(c)(3).''

C. Paid in Cash

Section 6418(b)(1) requires that any amount paid by a transferee taxpayer to an eligible taxpayer as consideration for a transfer be paid in cash. Proposed § 1.6418–1(f) would have defined the

term ''paid in cash'' to mean a payment in United States dollars that (1) is made by cash, check, cashier's check, money order, wire transfer, automated clearing house (ACH) transfer, or other bank transfer of immediately available funds; (2) is made within the period beginning on the first day of the eligible taxpayer's taxable year during which a specified credit portion is determined and ending on the due date for completing a transfer election statement (as provided in proposed § 1.6418–2(b)(5)(iii)); and (3) may include a transferee taxpayer's contractual commitment to purchase eligible credits with United States dollars in advance of the date a specified credit portion is transferred to such transferee taxpayer if all payment of United States dollars are made in a manner described in proposed § 1.6418–1(f)(1) and during the time period in proposed § 1.6418–1(f)(2).

Several commenters recommended revising the proposed paid in cash rule so that advanced payments could be made for eligible credits that will be determined in later taxable years. For example, commenters specifically requested that the final regulations allow upfront payments for transfers of eligible credits that are production tax credits (PTCs) that are expected to be determined in a future taxable year. Commenters suggested that such a rule would more closely align the timing of payments for eligible credits that are PTCs with the timing of payments for eligible credits that are ITCs. Commenters raised that upfront payments for PTCs determined in future taxable years are standard in tax equity transactions and that allowing for upfront payments for future PTCs under section 6418 would more closely align transferability with traditional tax equity structures. Another commenter asked for clarification that the use of certain loan structures would not violate the paid in cash rule. Specifically, the commenter requested confirmation that loans, including security arrangements, made on arm's length terms by a transferee taxpayer or a third party to an eligible taxpayer would not be treated as an upfront payment under an eligible credit purchase and sale agreement or otherwise recharacterized.

Allowing advanced payments prior to the taxable year an eligible credit is determined may more closely align the section 6418 regulations with current tax equity transactions. However, proposed § 1.6418–1(f)(2) would have specifically provided a timing safe harbor that is intended to provide certainty as to the treatment of payments of United States dollars made during the prescribed time period. Allowing advanced payments would also raise several complex legal and administrative issues, such as whether an excessive credit transfer has occurred or if the eligible taxpayer has gross income if prepaid eligible credits were not transferred in a later tax year. No commenter addressed the administrative and legal challenges of allowing for advanced payments. Based on these reasons, the Treasury Department and the IRS have adopted the paid in cash definition of the proposed regulations without change.

Further, the Treasury Department and the IRS note that there is no prohibition on either a transferee taxpayer or another third-party loaning funds to an eligible taxpayer, including loans secured by an eligible credit purchase and sale agreement, provided such loans are at arm's length and treated as loans for Federal tax purposes. Whether such loans are treated as upfront payments for eligible credits or otherwise recharacterized is an analysis based on the facts and circumstances of the loan and is otherwise outside the scope of these final regulations.

D. Specified Credit Portion

Section 6418(a) provides that an eligible taxpayer can elect to transfer all (or any portion specified in the election) of an eligible credit determined with respect to such taxpayer. Proposed § 1.6418–1(h) would have defined the term ''specified credit portion'' to mean a proportionate share (including all) of an eligible credit determined with respect to a single eligible credit property of the eligible taxpayer that is specified in a transfer election. The proposed regulations further provided that a specified credit portion of an eligible credit reflects a proportionate share of each bonus credit amount that is taken into account in calculating the entire amount of eligible credit determined with respect to a single eligible credit property. Thus, under the proposed regulations, an eligible taxpayer would not be permitted to sever bonus credit amounts taken into account to determine an eligible credit from the base eligible credit determined with respect to the relevant eligible credit property and separately transfer any bonus credit amount or base eligible credit amount (horizontal credit transfer). Instead, an eligible taxpayer would be permitted to transfer the entire eligible credit (or portion of the entire eligible credit, which would include a proportionate amount of any component bonus credit amounts taken into account to determine the entire eligible credit) determined with respect to a single eligible credit property (vertical credit transfer).

Several commenters recommended that the final regulations allow for horizontal credit transfers and that the term ''portion'' in section 6418(a) should be broadly construed. As support, commenters contended that horizontal credit transfers would increase flexibility and marketability of eligible credits and allow eligible taxpayers to better allocate credit risk among various transferee taxpayers. Commenters also asserted that requiring vertical credit transfers favors large investors with sufficient resources for diligence, finance, and risk tolerance. One commenter stated that requiring vertical credit transfers will increase the burden of tax administration because auditing a transferee taxpayer's portion of a vertical credit transfer would require a larger audit team and auditors conversant with the rules applicable to the underlying eligible credits and the rules applicable to the bonus credit amounts. Another commenter suggested the final regulations allow for eligible taxpayers to elect either a vertical or a horizontal credit transfer for each specified credit portion.

Each eligible credit determined with respect to a single eligible credit property is a single eligible credit that cannot be separated into a base credit amount and bonus credit amounts for purposes of making transfer elections. The language in section 6418(a) that refers to a portion specified in the election is better understood to refer to a percentage of a single overall eligible credit amount, rather than to a particular ''layer'' of credit. Further, while commenters suggested allowing horizontal transfers of eligible credits, none of the commenters fully addressed the potential administrative issues with the approach. For example, allowing horizontal credit transfers would add another layer of compliance due to the need for taxpayers and the IRS to track all base and bonus credit amounts separately. Moreover, a bonus credit amount is not itself an eligible credit but only an amount taken into account to determine the single eligible credit with respect to an eligible credit property. In this regard, the pre-filing registration portal does not allow for registration numbers associated only with bonus credit amounts. Thus, these final regulations adopt the definition of specified credit portion in proposed § 1.6418–1(h) without change.

II. Rules for Making Transfer Elections

A. In General

Proposed § 1.6418–2 would have provided general rules for an eligible taxpayer to make a transfer election under section 6418 with respect to any eligible credit determined with respect to such taxpayer. Proposed § 1.6418–2(a)(1) would have provided that an eligible taxpayer can make an election as provided in proposed § 1.6418–2. Proposed § 1.6418–2(a)(2) through (4) would have provided rules regarding making multiple transfer elections, rules for determining the eligible taxpayer in certain ownership situations, and rules describing circumstances in which no transfer election is allowed. Commenters addressed aspects of these proposed rules, as discussed in this part II of the Summary of Comments and Explanation of Revisions. These final regulations generally adopt the rules as proposed, with the modifications described in this part II of the Summary of Comments and Explanation of Revisions.

Proposed § 1.6418–2(a)(2) would have provided that an eligible taxpayer may make multiple transfer elections to transfer one or more specified credit portion(s) to multiple transferee taxpayers, provided that the aggregate amount of specified credit portions transferred with respect to any single eligible credit property does not exceed the amount of the eligible credit determined with respect to the eligible credit property. A commenter asked for clarification of whether an eligible taxpayer may transfer all or a portion of an eligible credit to more than one taxpayer. The Treasury Department and IRS confirm that the proposed regulations, as drafted, would have allowed an eligible taxpayer to make multiple transfer elections of specified credit portions of an eligible credit determined with respect to an eligible credit property subject to the limitation that such portions, in the aggregate, cannot exceed the amount of the determined eligible credit. Because proposed § 1.6418–2(a)(2) would have already provided this result, a revision to the proposed rules is unnecessary, and these final regulations adopt the proposed rule without change.

Proposed § 1.6418–2(a)(3) would have provided rules for transfer elections in certain ownership situations, specifically with respect to ownership through a disregarded entity, as an undivided ownership interest, as a member of a consolidated group (as defined in § 1.1502–1), and for partnerships and S corporations. One commenter asked for clarity as to whether a grantor trust is treated as a disregarded entity in determining ownership of an eligible credit property, and, if a grantor trust directly holds an eligible credit property, which party registers the property and makes a transfer election. The Treasury Department and the IRS agree that these final regulations should provide rules for transfer elections if eligible property is held directly by a grantor trust. Accordingly, the final regulations add § 1.6418–2(a)(3)(v) to provide that if an eligible taxpayer is a grantor or any other person that is treated as the owner of any portion of a trust as described in section 671 of the Code, then the eligible taxpayer may make a transfer election in the manner provided in § 1.6418–2 for any eligible credits determined with respect to eligible credit property held directly by the portion of the trust that the eligible taxpayer is treated as owning under section 671.

Proposed § 1.6418–2(a)(4) would have described three circumstances in which no transfer election can be made. First, consistent with section 6418(g)(4), the proposed regulations would have precluded any election with respect to any amount of an eligible credit determined based on progress expenditures that is allowed pursuant to rules similar to the rules of section 46(c)(4) and (d) (as in effect on the day before the date of the enactment of the Revenue Reconciliation Act of 1990). Second, consistent with section 6418(b)(1), proposed § 1.6418–2(a)(4)(ii) would have precluded a transfer election if an eligible taxpayer receives any amount not paid in cash (as defined in proposed § 1.6418–1(f)) as consideration in connection with the transfer of a specified credit portion. Third, consistent with section 6418(a), proposed § 1.6418–2(a)(4)(iii) would have provided that no election is allowed if eligible credits are not determined with respect to an eligible taxpayer. As a result, proposed § 1.6418–2(a)(4)(iii) would have provided as an example that a section 45Q credit allowable to an eligible taxpayer because of an election under section 45Q(f)(3)(B), or a section 48 credit allowable to an eligible taxpayer because of an election made under section 50(d)(5) and § 1.48–4, although described in proposed § 1.6418–1(c)(2), is not an eligible credit that can be transferred because such credit is not determined with respect to the eligible taxpayer.

A commenter suggested that the final regulations allow transfers of section 48 ITCs before the taxable year in which the energy property is placed in service. While not explicitly referenced, the commenter appears to be requesting that progress expenditures (under section 48(b)) be permitted to be transferred under section 6418. Section 6418(g)(4) and proposed § 1.6418–2(a)(4)(i) both directly prohibit making a transfer election if an eligible credit is related to progress expenditures. Based on this, these final regulations adopt the rule in proposed § 1.6418–2(a)(4)(i) without change.

Multiple commenters advocated that the proposed regulations be modified to permit a taxpayer that is allowed a section 45Q credit due to an election under section 45Q(f)(3)(B) to make a transfer election with respect to the section 45Q credit. Commenters generally suggested that the proposed rule is incorrect because (1) ownership of the single process train is not necessary for credit determination, and (2) a taxpayer claiming the credit and making an election under section 45Q(f)(3)(B) does in fact determine the credit because of their activities. Commenters relied in part on the language in proposed § 1.6418–2(d)(1), which states that ''[f]or an eligible credit to be determined with respect to an eligible taxpayer, the eligible taxpayer must own the underlying eligible credit property or, *if ownership is not required, otherwise conduct the activities giving rise to the underlying eligible credit* [emphasis added].''

A taxpayer that is allowed a section 45Q credit as a result of an election under section 45Q(f)(3)(B) is not the taxpayer with respect to which the section 45Q credit is determined. Under section 45Q(f)(3)(A)(ii), a section 45Q credit is attributable to the person that owns the carbon capture equipment *and* physically or contractually ensures the capture and disposal, utilization, or use as a tertiary injectant of such qualified carbon oxide. Further, under § 1.45Q–1(h)(3), it is the taxpayer described in § 1.45Q–1(h)(1) to whom the section 45Q credit is attributable (electing taxpayer), that may elect to allow the person that enters into a contract with the electing taxpayer to dispose of the qualified carbon oxide (disposer), utilize the qualified carbon oxide (utilizer), or use the qualified carbon oxide as a tertiary injectant to claim the credit (section 45Q(f)(3)(B) election). Contrary to commenters' assertions, it is not sufficient for a party to only conduct carbon capture activities to be eligible for a section 45Q credit. Further, the ownership requirement in the section 45Q statute and regulations means the commenters' suggestions that the language in proposed § 1.6418–2(d)(1) allows a section 45Q credit to be

determined with respect to an eligible taxpayer if the party ''otherwise conducts the activities giving rise to the underlying applicable credit'' is misplaced. That language in proposed § 1.6418–2(d)(1) applies only in the case of an eligible credit for which ownership of property is not required, which is not the case with respect to a section 45Q credit. Thus, these final regulations clarify in § 1.6418–2(d)(1) that the only eligible credit for which ownership is not required is the section 45X credit. While the activities of a contractor may be necessary for a section 45Q credit to be determined, ultimately, the credit is attributable to and determined by the person that both owns the equipment and physically or contractually ensures the capture and disposal, injection, or utilization of such qualified carbon oxide. Thus, these final regulations adopt the proposed regulations without change on this issue.

A commenter asked that separate, unrelated taxpayers to which section 45Q credits and section 45Z credits are determined with respect to the same qualified facility each be permitted to make a separate transfer election with respect the section 45Q credits or section 45Z credits determined with respect to such taxpayer. Specifically, the commenter requested clarification as to who is an eligible taxpayer if more than one eligible credit (for example, a section 45Q credit and a section 45Z credit) is determined with respect to two unrelated, eligible taxpayers for units of property or a facility within the same general geographic location. The commenter stated that the qualified facility definition under section 45Z(d)(4) should not preclude an owner and producer taxpayer from making a transfer election, even if an unrelated taxpayer who is eligible for the section 45Q credit makes a transfer election in the same taxable year.

It is beyond the scope of these final regulations to address underlying requirements of eligible credits, such as the requirements of sections 45Q and 45Z, and who may be eligible for those credits. The Treasury Department and the IRS will consider this comment in connection with drafting additional guidance under sections 45Q and 45Z.

Several commenters recommended that the final regulations allow transfer elections following a lease passthrough election under the rules of section 50(d)(5), both generally and with specific additional rules (such as, revising § 1.48–4 to require a lessor to commit to not making an election to transfer under section 6418 and requiring the lessee to complete pre-filing registration). One commenter stated that the proposed regulations are inconsistent with existing tax law, suggesting that the original inclusion of the lease passthrough election obviated the need to engage in more complicated sale-leaseback transactions in order to calculate the credit based on fair market value of a property rather than on its cost. The commenter posited that the proposed regulations would upend that balance by putting sale-leaseback transactions on unequal footing with lease passthrough structures in the context of a contemplated transfer of eligible credits, which the commenter thought was precisely the outcome that Congress sought to avoid in 1962 at the time of the introduction of the ITC.

There is a distinction between sale-leaseback transactions under section 50(d)(4) and lease passthrough elections under former section 48(d) (pursuant to section 50(d)(5)). In the latter case, it is the owner or lessor that is the party with respect to which the credit is determined, and not the lessee that is allowed to claim the credit as a result of the election. Therefore, the lessee does not meet the requirement of section 6418(a), which requires the eligible credit to be determined with respect to the eligible taxpayer making the transfer election. For the reasons stated, these final regulations adopt the proposed rule without change.

B. Manner and Due Date of Making a Transfer Election

1. In General

Proposed § 1.6418–2(b)(1) would have provided that an eligible taxpayer must make a transfer election to transfer a specified credit portion on the basis of a single eligible credit property. As an example, the proposed regulations would have provided that an eligible taxpayer that determines eligible credits with respect to two eligible credit properties would need to make a separate transfer election with respect to any specified credit portion determined with respect to each eligible credit property. Because no comments were received on proposed § 1.6418–2(b)(1), these final regulations adopt this provision without change. Some commenters requested that grouping of eligible credit properties be permitted for purposes of registration and making a transfer election. These comments are discussed in part IV of this Summary of Comments and Explanation of Revisions.

2. Special Rules for Certain Eligible Credits

Section 6418(f)(1)(B) provides that, in the case of any eligible credit under sections 45, 45Q, 45V, or 45Y, an election is made (1) separately with respect to each facility for which a credit is determined, and (2) for each taxable year during the 10-year period beginning on the date such facility was originally placed in service (or, in the case of a section 45Q credit, for each taxable year during the 12-year period beginning on the date the single process train of carbon capture equipment was originally placed in service). Proposed § 1.6418–2(b)(2) would have provided rules consistent with section 6418(f)(1)(B). Because no comments were received on proposed § 1.6418–2(b)(2), these final regulations adopt this provision without change.

3. Manner of Making a Valid Transfer Election

Proposed § 1.6418–2(b)(3) would have provided rules for making a valid transfer election and included that a transfer election is made based on each specified credit portion with respect to a single eligible credit property. To make a valid transfer election, an eligible taxpayer as part of filing an annual tax return (or a return for a short year within the meaning of section 443 of the Code), must include the following: (1) a properly completed relevant source credit form for the eligible credit for the taxable year that the eligible credit was determined; (2) a properly completed Form 3800, General Business Credit (or its successor); (3) a schedule attached to the Form 3800 (or its successor) showing the amount of eligible credit transferred for each eligible credit property, except as otherwise provided in guidance; (4) a transfer election statement as described in proposed § 1.6418–2(b)(5); and (5) any other information related to the election specified in guidance. While comments were received on individual aspects of this proposed rule as described later in this Summary of Comments and Explanation of Revisions, there were no comments received on proposed § 1.6418–2(b)(3), and so these final regulations adopt the proposed rule without substantive change. However, the final regulations clarify that the registration number received during the required pre-filing registration (as described in proposed § 1.6418–4) related to an eligible credit property with respect to which a transferred eligible credit was determined must be included on a

properly completed relevant credit source form.

4. Due Date and Original Return Requirement of a Transfer Election

Section 6418(e)(1) states that an election under section 6418(a) to transfer any portion of an eligible credit must be made not later than the due date (including extensions of time) for the return of tax for the taxable year for which the credit is determined, but in no event earlier than 180 days after the date of the enactment of this section. Proposed § 1.6418–2(b)(4) would have provided that a transfer election must be made on an original return not later than the due date (including extensions) for the original return of the eligible taxpayer for the taxable year for which the eligible credit is determined. The proposed regulations stated that no transfer election could be made or revised on an amended return or by filing an administrative adjustment request under section 6227 of the Code (AAR). The preamble to the proposed regulations clarified that an original return includes a superseding return filed on or before the due date (including extensions). The proposed regulations also did not provide for relief under §§ 301.9100–1 through 301.9100–3 (9100 relief) for a late transfer election.

Some commenters asked that a transfer election be permitted on an amended return or AAR and/or that a taxpayer be permitted an extension of time under the 9100 relief procedures to make a late election. Commenters raised concerns that the amount of information required to obtain a registration number and file a transfer election is substantial, and that given there are bound to be omissions and misstatements, an eligible taxpayer should have the ability to cure errors or omissions on an amended return or pursuant to an AAR. Further, commenters urged that 9100 relief should be available in situations in which the parties acted in good faith with respect to a transfer election.

The section 6418 transfer election process is novel and eligible taxpayers may experience inadvertent errors or omissions. The statutory text of section 6418(e), however, provides that a transfer election must not be made ''later than the due date (including extensions of time) for the return of tax for the taxable year for which the credit is determined.'' The preamble to the proposed regulations provided that eligible taxpayers could make a transfer election on a superseding return up until the extended due date for the return.

Neither the Code nor regulations define a superseding return, but administrative IRS guidance provides that a superseding return is a return filed subsequent to the originally-filed return but before the due date for filing the return (including extensions). For example, if an eligible taxpayer subject to an automatic 6-month extension files an original return on the due date (excluding extensions) and then files a subsequent return within the automatic extension period, the subsequent return would generally be considered a superseding return. Unlike a superseding return, an amended return is a return filed after the taxpayer filed an original return and after the due date for filing the return (including extensions).

Accordingly, these final regulations modify proposed § 1.6418–2(b)(4) by clarifying that a transfer election filed by an electing taxpayer may be made or revised on a superseding return, but not on an amended return or AAR. These final regulations further clarify that a transfer election cannot be made for the first time on an amended return, withdrawn on an amended return, or made or withdrawn by filing an AAR, although a numerical error with respect to a properly claimed transfer election may be corrected on an amended return or by filing an AAR if necessary. This clarification is intended to address situations in which an eligible taxpayer intended to make a transfer election but made a reporting error with respect to an element of a valid election (for example, miscalculating the amount of the eligible credit on the original return or making a typographical error in the process of inputting a registration number), and to allow the eligible taxpayer to correct any errors that would result in a denial of the transfer election. The provision cannot be used to revoke a transfer election made on an original return or to make a transfer election for the first time on an amended return. In addition, the eligible taxpayer's original return (including a superseding return), which must be signed under penalties of perjury, must contain all of the information, including a registration number, required by these final regulations. In order to correct an error on an amended return or AAR, an eligible taxpayer must have made an error in the information included on the original return such that there is a substantive item to correct; a taxpayer cannot correct a blank item or an item that is described as being ''available upon request.''

The Treasury Department and the IRS note that the rules described in this part II.B.4 of the Summary of Comments and Explanation of Revisions, regarding the original return requirement, apply to transfer elections made on an originally filed return of the eligible taxpayer. A transferee taxpayer, however, may take a transferred specified credit portion into account on a properly filed amended return or AAR, or correct the amount of the transferred specified credit portion on a properly filed amended return or AAR to, for example, avoid a determination by the IRS that the transferee taxpayer is subject to an excessive credit transfer under § 1.6418–5(a). Excessive credit transfers are discussed in more detail in part V.A of this Summary of Comments and Explanation of Revisions.

An eligible taxpayer may file an amended return or an AAR to adjust the amount of the eligible credit following a timely and properly filed transfer election. Such an adjustment may affect the information that was reported on the transfer election statement under § 1.6418–2(b)(5)(ii), for example, the total amount of the credit determined with respect to the eligible credit property and any corresponding specified credit portion being transferred. Some commenters suggested that the final regulations provide clarity for a taxpayer that may need to correct the amount of an eligible credit reported on its tax return. The final regulations modify proposed § 1.6418–2(b)(4) to provide that an eligible taxpayer may, after making a timely and complete transfer election, file an amended return or AAR, if applicable, to adjust the amount of the eligible credit reported on the eligible taxpayer's original return if the amount of the eligible credit was incorrectly reported on the original return. Under § 1.6418–2(b)(4)(ii)(B), to the extent the eligible taxpayer's correction of an eligible credit results in an increase in the amount of the eligible credit reported, such amount must be reflected on the credit source forms with the eligible taxpayer's amended return or AAR, if applicable. However, such increase cannot be reflected by either the eligible taxpayer or the transferee taxpayer as a transferred specified credit portion on the transfer election statement, in accordance with the rules set forth in § 1.6418–2(b)(4)(i). Those rules, regarding the due date and original return requirement of a transfer election, are described in greater detail in part II.B.3 and 4 of the Summary of Comments and Explanation of Revisions.

Under § 1.6418–2(b)(4)(ii)(C), to the extent the eligible taxpayer's correction of an eligible credit results in a decrease in the amount of the eligible credit

reported, such amount must be reflected on the credit source forms with the eligible taxpayer's amended return or AAR, if applicable, and the transfer election statement reducing the amount of the credit reported. The amount of the decrease first reduces the amount of the eligible credit that is retained, if any (and thus not transferred) by the eligible taxpayer. Any portion of such decrease that remains after reducing the eligible credit retained by the eligible taxpayer then reduces the amount reported by the transferee taxpayer. If the eligible credit was transferred to more than one transferee taxpayer, the reduction to each transferee taxpayer's specified credit portion is on a pro rata basis. The amount of any cash consideration retained by the eligible taxpayer after accounting for any reduction in the amount of the eligible credit transferred to the transferee taxpayer(s) cannot be excluded from gross income. These rules are further described in § 1.6418–2(e)(2). The final regulations provide examples illustrating these rules.

If an eligible taxpayer has made an adjustment such that the specified credit portion is reduced, depending on the facts and circumstances, a transferee taxpayer may be at risk for an excessive credit transfer, should the IRS make such a determination prior to the transferee taxpayer making its own adjustment to correct the specified credit portion through a qualified amended return under § 1.6664–2(c)(3). The eligible taxpayer itself may have income to include to the extent it received a payment that directly relates to the excessive credit transfer.

These final regulations do not mandate a reporting or notification requirement on the eligible taxpayer or the transferee taxpayer in the event of an adjustment that occurs after a timely and properly filed transfer election. The eligible taxpayer and the transferee taxpayer may freely contract for such a requirement. Nevertheless, this part II.B.4 of the Summary of Comments and Explanation of Revisions acknowledges that an adjustment to the eligible credit determined by an eligible taxpayer may impact the tax liability of a transferee taxpayer.

Additionally, these final regulations modify the proposed regulations to permit an extension of time under § 301.9100–2(b) to allow for an automatic six-month extension of time from the due date of the return (excluding extensions) to make the election prescribed in section 6418(e)(1). A transfer election is a statutory election because its due date is prescribed by statute. As such, the section 9100 relief procedures only apply insofar as the late election is being filed pursuant to § 301.9100–2(b), which requires that the taxpayer timely filed its return for the year the election should have been made. Relief under this provision will only apply to taxpayers that have not received an extension of time to file a return after the original due date (excluding extensions). Taxpayers eligible for this relief must take corrective action under § 301.9100–2(c) and follow the procedural requirements of § 301.9100–2(d).

5. Transfer Election Statement

Proposed § 1.6418–2(b)(5)(i) generally would have defined a transfer election statement as a written document that describes the transfer of a specified credit portion between an eligible taxpayer and transferee taxpayer and would have provided rules for both an eligible taxpayer and transferee taxpayer to attach a transfer election statement to their respective return. The proposed regulations would have provided that any document can be used that meets the requirements of proposed § 1.6418–2(b)(5)(ii), with the document labeled as a ''Transfer Election Statement'' that is attached to a return. The information required in proposed § 1.6418–2(b)(5)(ii) would not otherwise have limited any other information that the eligible taxpayer and transferee taxpayer may agree to provide in connection with the transfer of any specified credit portion. The proposed regulations would have provided that the statement must be signed under penalties of perjury by an individual with authority to legally bind the eligible taxpayer and must also include the written consent of an individual with authority to legally bind the transferee taxpayer.

Proposed § 1.6418–2(b)(5)(ii) described the information required in a transfer election statement, which generally would have included: (1) information related to the transferee taxpayer and the eligible taxpayer; (2) a statement that provides the necessary information and amounts to allow the transferee taxpayer to take into account the specified credit portion with respect to the eligible credit property; (3) an attestation that the parties are not related (within the meaning of section 267(b) or 707(b)(1)); (4) a statement or representation from the eligible taxpayer that it has or will comply with all relevant requirements to make a transfer election; (5) a statement or representation from the eligible taxpayer and the transferee taxpayer acknowledging the notification of recapture requirements under section 6418(g)(3) and the section 6418 regulations (if applicable); and (6) a statement or representation from the eligible taxpayer that it has provided the required minimum documentation to the transferee taxpayer.

A commenter requested clarification on whether a transfer election statement can be a partnership agreement. Unless otherwise provided in guidance, any document, including a written partnership agreement, can serve as a transfer election statement if the document otherwise meets the requirements of proposed § 1.6418–2(b)(5)(i) and includes the information outlined in proposed § 1.6418–2(b)(5)(ii). The Treasury Department and the IRS did not include a specific rule in these final regulations allowing for a partnership agreement to be treated as a transfer election statement because the language in proposed § 1.6418–2(b)(5) was already broad enough to allow for such an agreement to qualify.

Another commenter recommended that an eligible taxpayer be required, in a form accompanying its annual tax return, to list all tax credits it generated in the year by credit type, the total amount of those tax credits it sold, a schedule of projects to which the sold credits relate, the parties to whom it sold, and the remaining credits it retained. The Treasury Department and the IRS note that the registration and transfer election process will require an eligible taxpayer to list all eligible credits it determined and transferred during a taxable year. Additionally, an eligible taxpayer will be required to file the relevant credit source forms and the Form 3800, which will include the type of credits the eligible taxpayer determined and if it claimed any credits against its tax liability. At this time, the Treasury Department and the IRS do not think it is necessary for tax administration purposes for an eligible taxpayer to report the parties to whom it transferred eligible credits as part of the registration process. This is because the IRS matches the registration numbers obtained by an eligible taxpayer in the registration process with the transferee taxpayers that claim transferred specified credit portions against their tax liability. Because no changes are necessary to proposed § 1.6418–2(b)(5)(i) and (ii), these final regulations adopt these provisions without substantive change.

Proposed § 1.6418–2(b)(5)(iii) described the time by which a transfer election statement must be completed. The proposed rule provided that a transfer election statement can be completed at any time after the eligible taxpayer and transferee taxpayer have sufficient information to meet the

requirements of proposed § 1.6418–2(b)(5)(ii), but, for any year, the transfer election statement cannot be completed after the earlier of: (1) the filing of the eligible taxpayer's return for the taxable year for which the specified credit portion is determined with respect to the eligible credit; or (2) the filing of the transferee taxpayer's return for the year in which the specified credit portion is taken into account. Because no comments were received on proposed § 1.6418–2(b)(5)(iii), these final regulations adopt this provision without change.

Proposed § 1.6418–2(b)(5)(iv) would have defined required minimum documentation as the minimum documentation that the eligible taxpayer is required to provide to a transferee taxpayer. This documentation included: (1) information that validates the existence of the eligible credit property; (2) if applicable, documentation substantiating that the eligible taxpayer has satisfied the requirements to include any bonus credit amounts (as defined in proposed § 1.6418–1(c)(3)); and (3) evidence of the eligible taxpayer's qualifying costs in the case of a transfer of an eligible credit that is part of the investment credit or the amount of qualifying production activities and sales amounts, in the case of a transfer of an eligible credit that is a production credit. Proposed § 1.6418–2(b)(5)(v) would have specified that a transferee taxpayer, consistent with § 1.6001–1(e), would be required to retain the required minimum documentation provided by the eligible taxpayer so long as the contents thereof may become material in the administration of any internal revenue law.

Several commenters recommended that the final regulations increase the amount of required minimum documentation that an eligible taxpayer must provide to a transferee taxpayer to make a valid transfer election under section 6418(a). One commenter urged that all of the records that would be necessary for an eligible taxpayer to substantiate the claimed tax credit should be provided to the transferee taxpayer. Other commenters stated that more robust minimum documentation requirements should be imposed, including specific disclosure requirements and minimum documentation that an eligible taxpayer must provide to a transferee taxpayer concerning compliance with labor laws and an affirmation that the eligible taxpayer has undertaken best efforts to establish compliance. Another commenter asked for confirmation that the required minimum documentation is the same for all taxpayers.

In providing for the required minimum documentation that an eligible taxpayer must provide to a transferee taxpayer, the intention was to require a baseline of information that is necessary for validating an eligible taxpayer's claim of eligibility to an eligible credit, while not overburdening the eligible taxpayer with production requirements or altering the arm's length arrangement between the parties. Further, the proposed regulations did not limit the amount or type of information that a transferee taxpayer can require prior to agreeing to an eligible credit transfer. This means that while the required minimum documentation requirements are the same for all taxpayers, any particular agreement between an eligible taxpayer and transferee taxpayer may go beyond the required minimum documentation based on the arrangement of the parties. The proposed regulations allowed sufficient flexibility for market participants to determine if more information is necessary in a particular transaction, while balancing the burden of producing the required minimum documentation required to make a transfer election. Thus, these final regulations adopt proposed § 1.6418–2(b)(5)(iv) and (v) without substantive change.

Another commenter requested clarification that any responsibility to engage in regular reporting of certified payroll, apprentice labor hour reports, or other obligation under the prevailing wage and apprenticeship requirements for transferred specified credit portions remain with the eligible taxpayer. Because an eligible taxpayer determines any increased credit amount applicable to the prevailing wage and apprenticeship requirements, proposed regulations under section 45 would provide that the requirements relevant to determining the credit, including the correction and penalty provisions described in section 45(b)(7)(B) and 45(b)(8)(D), would remain with the eligible taxpayer who determined the credit. On August 30, 2023, the Treasury Department and the IRS published proposed regulations under section 45 (REG–100908–23) in the **Federal Register** (88 FR 60018) (section 45 proposed regulations) that would also provide that the general recordkeeping requirements for prevailing wage and apprenticeship (PWA) requirements would remain with an eligible taxpayer who transfers a specified credit portion that includes an increased credit amount. The section 45 proposed regulations would not require regular reporting of certified payroll or apprentice labor hour reports to the IRS. The responsibility of determining a credit is initially with the eligible taxpayer, and the transfer of an eligible credit does not relieve an eligible taxpayer of this responsibility or the responsibility to substantiate. Thus, the responsibility for substantiating a PWA increased credit amount does not shift to the transferee taxpayer, although a transferee taxpayer may be treated as the relevant taxpayer for other purposes under the IRA under section 6418(a). In light of the section 45 proposed regulations, the Treasury Department and the IRS have determined that no clarification is needed under proposed § 1.6418–2(b)(5)(iv) and (v) and thus, these final regulations adopt these provisions without substantive change.

C. Limitations After a Transfer Election Is Made

Proposed § 1.6418–2(c)(1) would have provided that a transfer election with respect to a specified credit portion is irrevocable. No comments were received on this rule, and these final regulations adopt the rule without change.

Consistent with section 6418(e)(2), proposed § 1.6418–2(c)(2) would have provided that a specified credit portion may only be transferred pursuant to a transfer election once. A transferee taxpayer cannot make a transfer election of any specified credit portion transferred to the transferee taxpayer. As described in the Explanation of Provisions in the preamble to the proposed regulations, the proposed rule would have disallowed any arrangement in which the Federal income tax ownership of a specified credit portion transfers first from an eligible taxpayer to a dealer or intermediary and then, ultimately, to a transferee taxpayer. In contrast, the Explanation of Provisions in the preamble to the proposed regulations provided that an arrangement using a broker to match eligible taxpayers and transferee taxpayers should not violate the no additional transfer rule, assuming the arrangement at no point transfers the Federal income tax ownership of a specified credit portion to the broker or any taxpayer other than the transferee taxpayer.

Commenters advocated for the final regulations to allow certain transactions with brokers, or other taxpayers, that were disallowed under proposed § 1.6418–2(c)(2) based on the no additional transfer rule of section 6418(e)(2). Those commenters posited that allowing such transactions would increase the number of participants entering the credit purchasing market. Another commenter recommended that

the final regulations apply the no additional transfer rule in proposed § 1.6418–2(c)(2) to prohibit only successive transfers made by a transferee taxpayer specified in the transfer election, assuming the intent of the rule is not to prohibit the development of a liquid trading market or derivative activity by third parties other than the eligible taxpayer. The commenter stated that if the intent of the rule is to prevent the development of such a market or activities, then the final regulations should contain clear and administrable rules based upon the other timing rules provided in the proposed regulations because applying normal ''benefits and burdens of ownership'' principles, as described in the Explanation of Provisions in the preamble to the proposed regulations, to transfers of eligible credits is not workable.

The Treasury Department and the IRS agree that it is unnecessary to apply benefits and burdens of ownership principles to transfers of eligible credits under section 6418, but no changes are needed to proposed § 1.6418–2(c)(2) because it does not reference those principles. To clarify the rules, to make a transfer election, all the requirements of § 1.6418–2(b) must be satisfied. Until the requirements are satisfied, then there is no valid transfer, no transferee taxpayer, and the requirements of § 1.6418–2(c)(2) are not applicable. To the extent there are brokers or other taxpayers providing liquidity, it is noteworthy that any payments received by those taxpayers related to eligible credits will be taxable because the provisions of section 6418 will not prevent the inclusion of gross income for such taxpayers, or for any amounts received by an eligible taxpayer other than amounts paid by a transferee taxpayer in consideration for the eligible credit. Further, if brokers, or others, are transferred a specified credit portion after satisfying the rules of § 1.6418–2(b) such that they are considered transferee taxpayers, then the prohibition of section 6418(e)(2) and the requirements of § 1.6418–2(c)(2) will prevent a second transfer by such transferee taxpayer.

A commenter recommended that the final regulations clarify that agreements for the right to purchase eligible credits may be transferred and are not subject to the rule in proposed § 1.6418–2(c)(2). Specifically, the commenter raised that the statutory language prohibiting multiple transfers with respect to any portion of an eligible credit does not prohibit a transferee taxpayer that entered into an agreement with an eligible taxpayer for the right to purchase eligible credits for a number of years from transferring that right to another transferee taxpayer as long as the eligible credits themselves have not been transferred to the original transferee taxpayer first. These final regulations do not adopt a specific rule related to this situation because it describes a transaction that is outside of section 6418. As previously described, until the requirements of a valid transfer election are satisfied, then there is no valid transfer and no transferee taxpayer.

Several commenters asked for clarity on when a transfer has occurred or recommended the point at which a transfer has occurred. For example, one commenter recommended a rule that once the amount of the credit has been determined, the specified credit portion is considered to have been transferred on the earliest date on which payment for credit has been made, the last day of the eligible taxpayer's taxable year, or (if earlier) the date the transfer election statement has been filed. To clarify, a transfer of a specified credit portion does not technically occur until an eligible taxpayer satisfies all the requirements in § 1.6418–2(b) to make a valid transfer election. However, it is important to note that the technical transfer date does not necessarily control for other purposes of section 6418. For example, under the paid in cash rule, amounts can be paid with respect to the specified credit portion as early as the beginning of the taxable year in which the related eligible credit is determined.

D. Determining the Eligible Credit

Section 6418(a) states that an eligible taxpayer may elect to transfer an eligible credit determined with respect to such taxpayer. Proposed § 1.6418–2(d) would have provided rules to clarify how an eligible taxpayer determines an eligible credit. Under proposed § 1.6418–2(d)(1), an eligible taxpayer can only transfer eligible credits determined with respect to the eligible taxpayer. The proposed regulations would have provided that, for an eligible credit to be determined with respect to an eligible taxpayer, the eligible taxpayer must own the underlying eligible credit property or, if ownership is not required, conduct the activities giving rise to the underlying eligible credit.

A commenter suggested that, in the absence of clear statutory language indicating that ownership of underlying eligible credit property or conducting activities giving rise to the underlying eligible credit is a prerequisite to transferability, such requirements should not be imposed under proposed § 1.6418–2(d)(1). The text of section 6418(a), which requires the eligible credit to be determined with respect to the eligible taxpayer, and the text of the underlying eligible credit provisions confirm the requirement that ownership of underlying eligible credit property or conducting activities giving rise to the underlying eligible credit is a prerequisite to transferability. However, as discussed in part 2.A of this Summary of Comments and Explanation of Revisions, these final regulations clarify that the only eligible credit for which an eligible taxpayer does not have to own an underlying eligible credit property, and instead can merely conduct activities, is section 45X. This revision should help clarify the ''determined with respect to'' requirements of section 6418.

A commenter noted that section 50(b)(1) limits the use of certain eligible credits in the territories and requested that the final regulations provide an exception to section 50(b)(1) to allow eligible taxpayers in U.S. territories to transfer all eligible credits. Since before the enactment of the IRA, section 50(b)(1) has limited the use of certain credits (including ITCs, vehicle-related credits, and energy efficiency incentives) for property used in the U.S. territories. Section 50(b)(1) provides that no credit can be determined with respect to any property that is used predominantly outside the United States [1] unless section 168(g)(4)(G) applies. Section 168(g)(4)(G) provides an exception for any property that is owned by a domestic corporation or by a United States citizen other than a citizen entitled to the benefits of sections 931 or 933, and that is used predominantly in a possession of the United States by such a corporation or such a citizen, or by a corporation created or organized in, or under the law of, a possession of the United States. The IRA did not amend these provisions; instead, the IRA specifically referenced section 50(b)(1) in section 30C and did not exclude section 48, 48C, or 48E from the application of section 50(b)(1). Without specific language in section 6418 or in the underlying eligible credits addressing section 50(b)(1), or other compelling evidence of Congressional intent, a special rule turning off the application of section 50(b)(1) is not supported by the Code. Therefore, these final regulations do not adopt this recommendation.

[1] Under section 7701(a)(9), ''[t]he term 'United States' when used in a geographical sense includes only the States and the District of Columbia.''

E. Treatment of Payments Made in Connection With a Transfer Election

Section 6418(b)(1) through (3) provides rules related to the treatment of payments made in connection with a transfer. Proposed § 1.6418–2(e)(1) through (4) would have provided guidance related to these rules, including that such amounts are required to be paid in cash, are not includable in the gross income of the eligible taxpayer and are not deductible by the transferee taxpayer, as well as an anti-abuse rule that included examples illustrating the anti-abuse rule.

1. Cash Requirement

Section 6418(b)(1) requires that any amount paid by a transferee taxpayer for an eligible credit must be paid in cash. Consistent with section 6418(b)(1), proposed § 1.6418–2(e)(1) would have provided that an amount paid by a transferee taxpayer to an eligible taxpayer would be consideration for a transfer of a specified credit portion only if it is paid in cash (as defined in proposed § 1.6418–1(f)), directly relates to the specified credit portion, and is not described in proposed § 1.6418–5(a)(3) (describing payments related to an excessive credit transfer). Consistent with section 6418(b)(2), proposed § 1.6418–2(e)(2) would have provided that any amount paid to an eligible taxpayer as consideration for a transfer of a specified credit portion is not includible in the gross income of the eligible taxpayer. Correspondingly and consistent with section 6418(b)(3), proposed § 1.6418–2(e)(3) would have provided that no deduction is allowed to the transferee taxpayer for consideration that is paid as consideration for a transfer of a specified credit portion.

2. Anti-Abuse Provision

Section 6418(h) authorizes the Secretary to issue regulations or other guidance that may be necessary to carry out the purposes of section 6418. To prevent transactions contrary to the purposes of section 6418, the proposed regulations would have included an anti-abuse provision in proposed § 1.6418–2(e)(4). This rule would have provided that a transfer election of any specified credit portion, and therefore the transfer of that specified credit portion to a transferee taxpayer, may be disallowed, or the Federal income tax consequences of any transaction(s) effecting such a transfer may be recharacterized, in circumstances in which the parties to the transaction have engaged in the transaction or a series of transactions with the principal purpose of avoiding any Federal tax liability beyond the intent of section 6418. For example, under the proposed rule, an amount of cash paid by a transferee taxpayer would not be considered as paid in connection with the transfer of a specified credit portion in proposed § 1.6418–2(e)(1) if a principal purpose of a transaction or series of transactions was to allow an eligible taxpayer to avoid gross income. Conversely, an amount of cash paid by a transferee taxpayer would have been considered paid in connection with the transfer of a specified credit portion under proposed § 1.6418–2(e)(1) if a principal purpose of a transaction or series of transactions was to increase a Federal income tax deduction of a transferee taxpayer.

The proposed regulations included two examples in § 1.6418–2(e)(4)(ii) and (iii) to illustrate the application of the anti-abuse rule. In the first example, to avoid recognizing gross income, the eligible taxpayer (Taxpayer A) undercharges for services to the transferee taxpayer (Customer B) in combination with the transfer of a specified credit portion, and so the transaction is recharacterized. Specifically, Taxpayer A normally charges $20 for the same services without the purchase of the eligible credit, and the average transfer price of the eligible credit between unrelated parties is $80 paid in cash for $100 of an eligible credit. The example provides that Taxpayer A instead charges Customer B $100 for the eligible credit and $0 for the services. In the second example, to increase a transferee taxpayer's (Customer D) deduction, an eligible taxpayer (Taxpayer C) overcharges for property and undercharges for the eligible credit. Specifically, Taxpayer C normally charges $20 for the same property without the transfer of the eligible credit, and the average transfer price of an eligible credit between unrelated parties is $80 paid in cash for $100 of the eligible credit. The example provides that Taxpayer C instead charges Customer D $80 for the property and $20 for the eligible credit. In both examples, the proposed regulations would have recharacterized the transactions.

A number of commenters made suggestions related to the proposed anti-abuse rule and examples. One commenter urged the Treasury Department and the IRS to take all possible precautionary measures to protect taxpayer interests and prevent abuse. Another commenter, while acknowledging that concerns raised by the anti-abuse rule and the examples are fair and appropriate, recommended as an alternative that the final regulations only include the general anti-abuse rule and remove the specific rules and examples. The commenter suggested that the IRS could rely on generally applicable principles and the anti-abuse rule to recharacterize abusive transactions and separately issue sub-regulatory guidance to provide safe harbors for cases in which the anti-abuse rule will not be asserted. The commenter also suggested that the IRS could issue further clarifying guidance if a publicly available and readily commoditized market develops. While the commenter did not expressly describe the specific rules it recommended be removed, the Treasury Department and the IRS infer that the commenter was referring to the language describing situations that had a principal purpose of eligible taxpayers avoiding the recognition of gross income or of transferee taxpayers increasing deductions. Other commenters, however, recommended that the final regulations include additional specific examples or safe harbors to determine those situations that would not be considered abusive. In considering all of these commenters' views, the Treasury Department and IRS have determined that taxpayers would benefit from having fact patterns in these final regulations that are likely to represent situations in which abuse could be present. Thus, these final regulations adopt the anti-abuse provision of the proposed regulations, but with certain revisions in response to commenters that are described in the following paragraphs.

A commenter noted a discrepancy in the language of the anti-abuse rule in proposed § 1.6418–2(e)(4)(i), making it unclear whether the standard of the anti-abuse rule was that parties to the transaction have engaged in the transaction or a series of transactions with ''the'' or ''a'' principal purpose of tax avoidance. As noted by the commenter, the use of ''the'' or ''a'' represent different standards. To demonstrate the difference, the commenter compared the regulations under section 269 of the Code (employing a ''the principal purpose'' standard) with the regulations under section 881 of the Code (section 881 regulations) (employing a ''one of the principal purposes'' standard). The proposed rule was intended to apply the anti-abuse provision if a transaction was entered into with ''a'' principal purpose of avoidance of tax beyond the intent of section 6418. In response to the comment, these final regulations are

clarified. This ''a'' principal purpose standard is similar to other anti-abuse standards, such as the standard in the section 881 regulations cited by the commenter or the anti-abuse rule in § 1.45D–1(g) (relating to the new markets tax credit determined under section 45D (section 45D credit)). This standard is appropriate based on the goals of preventing fraud and improper payments and in accordance with section 6418(h) to provide rules necessary to carry out the purposes of section 6418.

Another commenter requested clarification on the meaning of the phrase ''will be considered paid'' in proposed § 1.6418–2(e)(4)(i), noting that the proposed regulations would have provided that an ''amount of cash paid by a transferee taxpayer will not be considered as paid in connection with the transfer of a specified credit portion under paragraph (e)(1) of this section if a principal purpose of a transaction or series of transactions is to allow an eligible taxpayer to avoid gross income.'' The commenter stated, however, that the next sentence in proposed § 1.6418–2(e)(4)(i) provides: ''[c]onversely, an amount of cash paid by a transferee taxpayer *will be considered paid* in connection with the transfer of a specified credit portion under paragraph (e)(1) of this section if a principal purpose of a transaction or series of transactions is to increase a Federal income tax deduction of a transferee taxpayer [emphasis added].'' The commenter believed that the ''will be considered paid'' in the quoted second sentence should read as ''will not be considered paid'' similar to the quoted first sentence. The Treasury Department and the IRS clarify that the proposed rule is written as intended, and no changes to the proposed rule are made based on this comment. The quoted second sentence is describing a situation in which a transferee taxpayer paid less for an eligible credit and more for an item or service that resulted in a deduction. In this scenario, it is correct that the amount ''will be considered paid'' in connection with the transfer of the specified credit portion, and not with respect to the purchase of the item that was deductible.

Commenters requested clarification of the language in the examples in proposed § 1.6418–2(e)(4)(ii) and (iii) that referred to the ''the average transfer price of the eligible credit between unrelated parties'' in determining whether the transactions are subject to recharacterization under the proposed anti-abuse rule. Commenters raised concerns about the availability of pricing information, including specifically in the case of the section 45U credit. A commenter thought that there will be insufficient publicly available pricing information, and if the available data are limited and incomplete, price averages will not yield reliable results. That same commenter noted that if the IRS develops the requisite data to determine an average transfer price for each eligible credit, organizing such data and publishing it regularly would be administratively burdensome. Further, commenters were concerned that the average price would not take into account the facts and circumstances of an arrangement, which commenters believed relevant for determining price. The commenter recommended changing ''the average transfer price of the eligible credit between unrelated parties'' to ''an arm's length price of the eligible credit without regard to other commercial relationships'' could solve potential issues with the language in the proposed regulations. The commenter stated that the recommendation would also resolve a separate comment related to the use of the term ''unrelated party'' in the proposed regulations by clarifying that the intent was the price be determined without regard to other commercial relationships.

In response, these final regulations adopt the commenter's suggested language and revise the examples in proposed § 1.6418–2(e)(4)(ii) and (iii) accordingly. This change is made in acknowledgment that average price data may not be currently available, may take more time to develop, and will most likely be dependent on the facts and circumstances of the transaction (for example, the risk profile of the project). The language suggested by the commenter will still allow average transfer price data to be used to the extent it is relevant. The intent of using an average transfer price was to suggest an objective criterion for evaluating a transaction, along with using the pricing information of the eligible taxpayer in the determination. While the language ''an arm's length price of the eligible credit without regard to other commercial relationships'' has the potential to add more subjectivity to the determination, concerns with respect to determining the average transfer price of a certain eligible credit, including those with limited markets, outweigh any benefit with respect to retaining a potentially more objective standard.

Another commenter requested clarification on whether a transfer of a credit for cash consideration could ever be fully respected in cases in which the cash consideration for such credit transfer is greater or less than the average transfer price of the eligible credit between unrelated parties. Any deviation from an average transfer price of an eligible credit should not necessarily require recharacterization under the anti-abuse rule; however, the revisions made to the examples in proposed § 1.6418–2(e)(4)(ii) and (iii) should help clarify this issue. The intent of the anti-abuse rule is to allow recharacterization if the price paid is not economically supportable and is unreasonable based on the facts and circumstances of the transaction.

Another commenter asked that the final regulations include considerations of whether an eligible taxpayer is viewed as transferring credits at a discount without avoiding tax liabilities. For example, if an eligible taxpayer is willing to transfer eligible credits at a discount and receive income from product sales or services that is in accordance with such eligible taxpayer's acceptable investment rate of return, the commenter wanted to know whether the anti-abuse rule would be applicable. In the commenter's hypothetical, the eligible taxpayer appears to be decreasing the price of eligible credits to encourage customers to purchase products or services but not making a corresponding increase to the price of its products or services, which could avoid recognizing gross income. However, the facts and circumstances would dictate whether the eligible taxpayer and the transferee taxpayer were engaging in the transaction with a principal purpose of avoiding any Federal income tax liability beyond the intent of section 6418.

The Treasury Department and the IRS have concluded that it is premature to adopt any safe harbor or a list of abuse examples in these final regulations in § 1.6418–2(e)(4) but will continue to study transactions between eligible taxpayers and transferee taxpayers to determine if it is appropriate to adopt an objective safe harbor or clarify other examples of abusive practices.

F. Transferee Taxpayer's Treatment of Eligible Credit

1. Taxable Year

Pursuant to section 6418(d), a transferee taxpayer takes the transferred eligible credit into account in its first taxable year ending with, or after, the eligible taxpayer's taxable year with respect to which the transferred eligible credit was determined. Proposed § 1.6418–2(f)(1) would have adopted this rule and further explained that to the extent the taxable years of an eligible taxpayer and a transferee taxpayer end on the same date, the

transferee taxpayer will take the specified credit portion into account in that taxable year. To the extent the taxable years of an eligible taxpayer and a transferee taxpayer end on different dates, the transferee taxpayer will take the specified credit portion into account in the first taxable year that ends after the taxable year of the eligible taxpayer.

Commenters requested clarification on whether a taxpayer that has a 52–53-week taxable year can rely on § 1.441–2(c)(1) to allow its taxable year that otherwise ends the last Saturday in December to be treated as ending on December 31. Otherwise, a transferee taxpayer with a 52–53-week taxable year would have to wait until the following taxable year to take into account an eligible credit that was transferred by an eligible taxpayer with a calendar year. A similar delay could result if the eligible taxpayer had a 52–53-week taxable year ending in January and the transferee taxpayer has a taxable year ending on December 31. Section 1.441–2(c)(1) provides, in relevant part, that for purposes of determining the effective date (for example, of legislative, regulatory, or administrative changes) or the applicability of any provision of the internal revenue laws that is expressed in terms of taxable years beginning, including, or ending with reference to the first or last day of a specified calendar month, a 52–53-week taxable year is deemed to begin on the first day of the calendar month nearest to the first day of the 52–53-week taxable year, and is deemed to end or close on the last day of the calendar month nearest to the last day of the 52–53-week taxable year, as the case may be. While the fact patterns from commenters do not fall within the explicit language of § 1.441–2(c)(1), the Treasury Department and the IRS conclude it is consistent to adopt a similar rule with respect to taxable year ends for purposes of section 6418(d). Thus, these final regulations include a rule in § 1.6418–2(f)(1)(ii) providing that, for purposes of determining the taxable year in which a credit is taken into account under section 6418(d) and § 1.6418–2(f)(1)(i), a 52–53-week taxable year of an eligible taxpayer and transferee taxpayer is deemed to end on or close on the last day of the calendar month nearest to the last day of the 52–53-week taxable year, as the case may be. Thus, in the fact patterns described by commenters, the transferee taxpayer and the eligible taxpayer would have the same year end, and the transferee taxpayer would not have to wait until the following year-end to take the eligible credit into account.

Another commenter asked when a transferee taxpayer with a taxable year that is a calendar year can take into account an eligible credit transferred from an eligible taxpayer that has a fiscal year ending June 30, if the eligible taxpayer's project was placed in service on November 1, 2023, and the eligible taxpayer proposes to transfer the eligible credit to the transferee taxpayer on November 15, 2023 (and assuming all other requirements of section 6418 were met). It appears this comment is seeking clarity on whether it is possible for an eligible taxpayer to determine an eligible credit during its taxable year beginning July 1, 2023, and ending June 30, 2024, and transfer the eligible credit in November 2023 to a transferee taxpayer with a taxable year ending December 31, 2023, for the transferee taxpayer to use in calculating its 2023 tax liability. Section 6418(d)(1) requires that a transferee taxpayer take a specified credit portion into account in a taxable year ending with or after the taxable year of the eligible taxpayer to which the eligible credit was determined. In this fact pattern, the transferee taxpayer's taxable year ends after the eligible taxpayer's taxable year. The transferee taxpayer cannot take into account the eligible credit until its first taxable year ending after June 30, 2024, meaning that the transferee taxpayer would have to wait until it filed its 2024 tax return (not considering whether the transferee taxpayer was able to use the eligible credit against its estimated tax payments as described in part II.F.5 of this Summary of Comments and Explanation of Revisions). The eligible taxpayer's taxable year end of June 30, 2023, does not impact this analysis, as there was no eligible credit determined with respect to the eligible taxpayer in that taxable year. Further, even if a credit was determined in the taxable year ending June 30, 2023, because section 6418 only applies to taxable years beginning after December 31, 2022, no eligible credits generated in such year are eligible to be transferred.

2. No Gross Income for a Transferee Taxpayer Upon Claiming a Transferred Specified Credit Portion

Proposed § 1.6418–2(f)(2) would have provided that a transferee taxpayer does not have gross income upon claiming a transferred specified credit portion even if the amount of cash paid to the eligible taxpayer was less than the amount of the transferred specified credit portion, assuming all other requirements of section 6418 are met. For example, a transferee taxpayer who paid $9X for $10X of a specified credit portion that the transferee taxpayer then claims on its return does not result in the $1X difference being included in the gross income of the transferee taxpayer.

A commenter suggested that the proposed rule conflicted with *Palmer* v. *Commissioner,* 302 U.S. 63 (1937), which held that the purpose of a bargain purchase determines its tax treatment; that is, if it is intended as compensation, then it is so treated for Federal tax purposes. Based on the case, the commenter thought that it is not possible to determine that a bargain purchase of a tax credit is not gross income to the purchaser, as the proposed regulations provided, without examining the facts and circumstances surrounding the transaction.

Proposed § 1.6418–2(f)(2) does not conflict with *Palmer.* The proposed rule presumes that the eligible taxpayer and the transferee taxpayer negotiated the consideration paid for the specified credit portion at arm's length and that the difference between the specified credit portion and the consideration paid for the credit (the ''discount'') reflects the transferee taxpayer's assumption of the risk of an excess credit transfer or recapture event. The proposed rule does not preclude the IRS from parsing the net consideration paid for the specified credit portion and analyzing whether the net consideration reflects a reduction due to an amount separately owed by the transferor to the transferee due to the receipt of services or property from the transferee. In such situation, the proposed rule does not preclude the IRS from asserting that a portion of the discount is income to the transferee taxpayer under *Palmer* or the anti-abuse rule in § 1.6418–2(e)(4) if a portion of the discount, in fact, constitutes compensation to the transferee taxpayer under section 61. Section 6418(a) is unambiguous that the transferee taxpayer is treated as the eligible taxpayer for purposes of the Code. Because the eligible taxpayer does not recognize gross income from generating or claiming a transferred specified credit portion under the Code, the Treasury Department and the IRS interpret section 6418(a) to provide the transferee taxpayer with the same treatment upon claiming a transferred specified credit portion acquired at a discount. Section 6418(a) is also unambiguous that the income exclusion is limited to the claiming of the eligible credit and does not cover compensation paid to the transferee taxpayer.

For these reasons, these final regulations adopt proposed § 1.6418–2(f)(2) without substantive change.

3. Transferee Taxpayer Treated as the Eligible Taxpayer

Consistent with the language in section 6418(a), proposed § 1.6418–2(f)(3)(i) would have provided that a transferee taxpayer (and not the eligible taxpayer) is treated as the taxpayer for purposes of the Code with respect to the transferred specified credit portion. Proposed § 1.6418–2(f)(3)(i) further explained that an eligible taxpayer must apply the rules necessary to determine the amount of an eligible credit prior to making the transfer election for a specified credit portion, and therefore a transferee taxpayer does not re-apply rules that relate to a determination of an eligible credit, such as the rules in sections 49 or 50(b). However, a transferee taxpayer must apply rules that relate to computing the amount of the specified credit portion that is allowed to be claimed in the taxable year by the transferee taxpayer, such as the rules in sections 38 or 469, as applicable.

a. Passive Credit Rules Generally

Proposed § 1.6418–2(f)(3)(ii) provided a more specific rule regarding application of section 469 to a transferee taxpayer. This proposed rule provided that a specified credit portion transferred to a transferee taxpayer is treated as determined in connection with the conduct of a trade or business and, if applicable, such transferred specified credit portion is subject to the rules in section 469 (passive credit rules).

Many comments were received regarding the application of section 469 to transferred specified credit portions. One commenter supported applying the passive credit rules to transferee taxpayers and believed that a more restrictive rule would better prevent potential fraud and abuse. Similarly, another commenter raised that allowing individuals to be credit purchasers raises important potential concerns about fraud and abuse since individuals, particularly those who are less affluent, may have less ability to perform due diligence on the transferred eligible credits and may become targets of fraudulent schemes. Most commenters, however, asserted that the passive credit rules should not apply to transferee taxpayers or that the rules should only apply in limited circumstances.

Some commenters argued that applying the rules will limit the market of potential purchasers of eligible credits to corporate entities with large tax liabilities and thus, exclude other taxpayers as potential investors. Other commenters contended that if the passive credit rules did not apply to transferee taxpayers, participation of individuals could materially increase, which would strengthen the transferability market and support the IRA's renewable energy and job creation goals. One commenter supported providing a carveout from the application of the passive credit rules for projects that generate less than 5 megawatts of energy. A few commenters requested that if the application of the passive credit rules remains, the Treasury Department and the IRS should allow for some amount of non-passive income tax liability flowing from operating S corporations and limited liability companies to be eligible to be offset by transferred eligible credits.

Many commenters addressed the rule in proposed § 1.6418–2(f)(3)(ii) that would treat a specified credit portion transferred to a transferee taxpayer as determined in connection with the conduct of a trade or business. One commenter generally supported the position that an eligible credit is earned in connection with the conduct of a trade or business, as that reflects how an eligible credit would arise. Other commenters, however, contended that treating transferred specified credit portions as earned in connection with a trade or business is inconsistent with the language in section 6418(a), which states that the transferee taxpayer is treated as the taxpayer with respect to a transferred credit. Some commenters stated that the language in section 6418(a) should be read as only transferring the rights of the credit to the transferee rather than subjecting the transferee to the passive credit rules. Another commenter argued that section 469 cannot apply to an activity that is not owned directly, or indirectly, by the taxpayer. A few commenters urged that instead of treating transferred specified credit portions as determined in connection with the conduct of a trade or business, it would be appropriate to treat transferee taxpayers as engaged in an investment activity and specified credit portions as determined in connection with such investment activity. As support for this position, these commenters cited Rev. Rul. 2010–16, 2010–26 I.R.B. 769, which addresses the application of the passive credit rules to section 45D credits earned through certain factual situations. Although unclear, another commenter appeared to assert that a transferred specified credit portion should be treated as a capital asset under section 1221 to a transferee taxpayer and that *Palmer* v. *Commissioner, supra,* is misapplied.

The language in section 6418 is most straightforwardly understood to not support disregarding the passive credit rules for transferred specified credit portions or applying the rules in a different manner than they apply to other general business credits arising in a trade or business. In enacting the novel credit delivery mechanisms of sections 6417 and 6418 as part of the IRA, Congress considered the application of the rules governing the determination and the utilization of tax credits. In cases in which Congress desired to alter the application of certain rules, they provided as such. For example, Congress generally turned off section 38(c) and sections 50(b)(3) and (4)(A)(i) in the case of elective pay under section 6417. Like section 38(c), the application of section 469 can materially affect whether a taxpayer can use tax credits to offset its tax liability. There is no carveout for section 469 in section 6418. Instead, section 469 provides in relevant part that a credit is subject to the passive credit rules if the credit arises in the conduct of a trade or business in which the taxpayer does not materially participate in the year to which it is attributable, and the credit is a general business credit under section 38. All of the eligible credits listed in section 6418(d) arise in the conduct of a trade or business and are general business credits under section 38. As a result, section 469 applies to the use of such eligible credits unless Congress provides otherwise, and commenters did not point to strong statutory or other evidence that Congress intended a different result. Moreover, any differences in the application of the passive credit rules among taxpayers is a result of section 469(a) and not the result of section 6418 or the proposed regulations.

Also, the application of section 469 to a transferee taxpayer is not inconsistent with the language in section 6418(a) that provides a transferee taxpayer ''shall be treated as the taxpayer'' for purposes of the Code with respect to a transferred credit. Absent section 6418, any taxpayer that has determined a general business credit under section 38 in the conduct of a trade or business is subject to section 469. While section 469 may not apply, for example, because a taxpayer is not a person described in section 469(a)(2), or may not result in a passive activity credit because a taxpayer materially participated in the trade or business or has sufficient passive activity income, all taxpayers have to consider whether section 469 is applicable to the use of any general

business credit arising in the conduct of a trade or business. Thus, it is not inconsistent to apply section 469 to a transferee taxpayer that is treated as the taxpayer for purposes of the Code with respect to a transferred credit. Moreover, an eligible credit generated through the conduct of a trade or business and transferred does not lose its status as a section 38 credit or its status of having arisen in a trade or business solely because the credit is transferred. If such attributes did not transfer under section 6418, eligible credits earned and used by eligible taxpayers would be subject to different limitations than transferred eligible credits used by transferee taxpayers. Lastly, the Treasury Department and the IRS agree with commenters that not applying the passive credit rules to transferred specified credit portions could increase the risk of fraud and abuse.

It is also inappropriate to treat transferred specified credit portions as determined in connection with the conduct of an investment activity or as a capital asset. Specifically, the facts and analysis in Rev. Rul. 2010–16 are distinguishable from transfers of specified credit portions under section 6418. Rev. Rul. 2010–16 held that if an acquisition, either directly or indirectly through a partnership, of a qualified equity investment in a community development entity (CDE) is not in connection with the conduct of a trade or business (or in anticipation of a trade or business), the section 45D credit will not be a passive activity credit under section 469. The determination of a section 45D credit does not require the conduct of a trade or business. Instead, a section 45D credit is determined based on the percentage of the amount paid to a CDE for a qualified equity investment at original issue and can be determined through a mere investment activity. Under the facts of Rev. Rul. 2010–16, the section 45D credit was not a passive activity credit under section 469 to either the individual or the partnership investors because it did not arise in the conduct of a trade or business. Conversely, eligible credits under section 6418 can only be determined (or arise) in connection with the conduct of a trade or business. Moreover, eligible credits are not determined through (or do not arise in connection with) an investment activity by a transferee taxpayer. Instead, all eligible credits are determined with respect to (or arise in connection with) the conduct of a trade or business owned by an eligible taxpayer. Eligible credits are transferred after they are determined. Thus, they cannot be redetermined in connection with an investment activity by a transferee. For these reasons, the final regulations do not adopt commenters' suggestions to not apply the passive credit rules to transferred specified credit portions or to apply the passive credit rules in a different manner than as provided in the proposed regulations. For a discussion of the application of *Palmer* v. *Commissioner, supra,* to section 6418, *see* part II.F.2 of this Summary of Comments and Explanation of Revisions.

A comment was received stating that the proposed regulations were silent on the rule of section 48(a)(3)(C) requiring the property to be used in a trade or business or held for the production of income. Any rules applicable to the underlying eligible credits are beyond the scope of the final regulations; however, the Treasury Department and the IRS note that any rules that relate to the determination of the eligible credit apply to the eligible taxpayer as described in proposed § 1.6418–2(d).

b. Material Participation and Grouping Rules

Proposed § 1.6418–2(f)(3)(ii) provided that in applying section 469, a transferee taxpayer is not considered to own an interest in the eligible taxpayer's trade or business at the time the work was done (as required for material participation under § 1.469–5(f)(1)) (material participation rules). Accordingly, a transferee taxpayer will not ordinarily materially participate within the meaning of section 469(h) in order to be treated as participating in the activity. Proposed § 1.6418–2(f)(3)(ii) also provided that a transferee taxpayer cannot change the characterization of its participation (or lack thereof) in the eligible taxpayer's trade or business by using any of the grouping rules under § 1.469–4(c) (grouping rules). Generally, § 1.469–4(c) allows a taxpayer to satisfy the material participation standard for a specific activity by virtue of having materially participated in a separate but related trade or business.

Comments were received in connection with the application of the material participation and grouping rules under section 469 to transferred specified credit portions. One commenter supported treating a transferee as not materially participating in the trade or business that generates an eligible credit if they did not actually do so. Other commenters asserted that the final rules should clarify that a transferee taxpayer that actually owns an interest in an eligible taxpayer, and materially participates in the credit generating activity, is treated as owning an interest in the eligible taxpayer's trade or business at the time the work was done. One commenter requested that transferee taxpayers that conduct an activity directly relating to and necessary for the generation of an eligible credit (but do not own an interest in the eligible taxpayer's credit generating trade or business) be treated as materially participating in the credit generating activity for purposes of section 469. Another commenter supported an approach that would permit taxpayers subject to the passive credit rules that satisfy the material participation requirement with respect to a specific activity (but do not own an interest in the activity that generates to the specified credit portion) to treat purchased credits from that activity as nonpassive. The same commenter raised that the application of the grouping rules under § 1.469–4(c) could be used to expand the potential purchasers of credits but acknowledged that this approach would be difficult to administer. Other commenters suggested that the language in section 6418(a) treating the transferee taxpayer as the taxpayer for purposes of the Code with respect to the transferred specified credit portion supports attributing the activities or all characteristics of an eligible taxpayer to a transferee taxpayer for purposes of applying the passive credit rules.

The Treasury Department and the IRS agree that in the limited circumstance of a transferee taxpayer who materially participates in an eligible credit generating activity within the meaning of section 469(h) in which the transferee taxpayer owns an interest at the time the work is done, the transferee taxpayer should be permitted to purchase eligible credits generated from the activity (assuming the transferee taxpayer is not related to the eligible taxpayer within the meaning of section 267(b) or section 707(b)(1)) and treat those purchased credits as not arising in connection with a passive activity. It is not workable to expand the material participation rules under section 469 for purposes of transferred specified credit portions in a meaningful manner without substantially increasing administrative burdens. For example, such a view would presumably require ownership of the underlying eligible credit property to be attributed to a transferee taxpayer. This formulation would be impracticable for purposes of section 50(c) and section 6418(g)(3)(A), which require an eligible taxpayer to make basis adjustments for transferred ITCs. Commenters did not address how to overcome the technical and

administrative complexities in attributing the activities or attributes of an eligible taxpayer to a transferee taxpayer for purposes of applying the passive credit rules. Additionally, allowing a transferee taxpayer to change the characterization of an eligible credit based on grouping with its own activities is inconsistent with the grouping rules under § 1.469–4(c) and would create significant administrative complexity. As such, these final regulations clarify that a transferee taxpayer who directly owns an interest in an eligible taxpayer's trade or business at the time the work was done (as required for the material participation rules), is not deemed to fail the requirements of section 469(h). However, these final regulations do not adopt commenters' suggestions to expand the material participation or grouping rules for purposes of applying the passive credit rules to transferred specified credit portions.

Lastly, commenters wanted confirmation that an individual transferee taxpayer can use eligible credits acquired as a result of a transfer election to offset passive income tax liability if the approach from the proposed regulations is adopted. The Treasury Department and the IRS confirm that if an individual transferee taxpayer does not materially participate (within the meaning of §§ 1.469–5 and 1.469–5T) in the activity that generates a specified credit portion, a transferred specified credit portion will be treated to the transferee taxpayer as arising in connection with a passive activity.

4. Transferee Taxpayer Requirements To Take Into Account a Transferred Specified Credit Portion

Section 6418(d) provides the taxable year that a transferee taxpayer takes a transferred eligible credit into account but does not provide rules on how a transferee taxpayer can take a transferred specified credit portion into account. To that end, proposed § 1.6418–2(f)(4) would have required (1) a properly completed Form 3800, General Business Credit (or its successor), taking into account a transferred eligible credit as a current general business credit, including all registration number(s) related to the transferred eligible credit; (2) the transfer election statement described earlier in this preamble attached to the return; and (3) any other information related to the transfer election specified in guidance. Because no comments were received on proposed § 1.6418–2(f)(4), these final regulations adopt this provision without change.

5. Estimated Tax Payments

The preamble to the proposed regulations explained that a transferee taxpayer could take into account a specified credit portion that it has purchased, or intends to purchase, to calculate its estimated tax payments, though the transferee taxpayer remains liable for any additions to tax in accordance with sections 6654 and 6655 of the Code to the extent the transferee taxpayer has an underpayment of estimated tax.

Commenters generally acknowledged that the preamble to the proposed regulations provided that transferred credits could be taken into account for purposes of calculating estimated tax but asked that the final regulations include a specific rule on how transferred credits should be taken into account. Commenters also offered particular circumstances for the Treasury Department and the IRS to consider in formulating a potential rule regarding transferred credits and estimated tax. One commenter requested that credits purchased in the first quarter could be applied against the transferee taxpayer's first quarter estimated tax payment if the taxpayer relied on a ''prior year safe harbor'' under section 6655(d)(2)(B). Another commenter requested clarification that the transferred credits should apply to a transferee's tax liability when the credit is determined. Another commenter requested that the final regulations should permit a transferee taxpayer to make an election to take into account the specified credit portion in the first taxable year in which such credit was determined by the eligible taxpayer.

The addition of a specific rule on estimated tax payments is unnecessary. The appropriateness of a transferee taxpayer taking the eligible credit into account for purposes of determining its quarterly estimated tax liability depends on the facts and circumstances. Nevertheless, as a clarification, because section 6418 generally contemplates a transferee taxpayer effectively stepping in the shoes of the eligible taxpayer from whom the transferee taxpayer was transferred the eligible credit, it follows that a transferee taxpayer can take into account the eligible credit for purposes of determining its quarterly estimated tax liability no earlier than an eligible taxpayer would. Further, if a transferee taxpayer is required to take a transferred eligible credit into account in a taxable year that has not yet begun because of the application of section 6418(d) and § 1.6418–2(f)(1), then a transferee taxpayer cannot take the eligible credit into account for purposes of determining quarterly estimated tax liability until after the start of that later year. As noted in the preamble to the proposed regulations and confirmed in this part II.F.5 of the Summary of Comments and Explanation of Revisions, the transferee taxpayer remains liable for any additions to tax in accordance with sections 6654 and 6655 to the extent the transferee taxpayer has an underpayment of estimated tax.

For example, if a calendar year eligible taxpayer enters into an agreement with a calendar year transferee taxpayer during calendar year 2024 to transfer an eligible credit, and such credit is determined with respect to the eligible taxpayer in calendar year 2024, then assuming a timely and complete transfer election is made, the transferee taxpayer can take the transferred credit into account when calculating the required annual payment and quarterly estimated tax installments for calendar year 2024. The transferee taxpayer cannot treat the transferred credit as a payment of estimated tax. If any portion of the eligible credit that is ultimately transferred to a transferee taxpayer under section 6418(a) is subsequently adjusted to an amount less than what was agreed upon by the eligible taxpayer and the transferee taxpayer in calendar year 2024, the transferee taxpayer may be liable for any additions to tax under sections 6654 or 6655, given the reduced credit amount being transferred.

Commenters requested clarification of the phrase ''intends to purchase'' as used in the preamble to the proposed regulations. The phrase captures a situation in which the taxpayer plans to complete a transaction that meets the requirements of proposed § 1.6418–2(b) so that the taxpayer would qualify as a transferee taxpayer with respect to a specified credit portion, but has not yet done so. This phrase illustrates that all the requirements of proposed § 1.6418–2(b) do not have to be met for a transferee taxpayer to take the expected eligible credit into account in its estimated tax calculations, though the transferee taxpayer remains liable for any additions to tax in accordance with sections 6654 and 6655 of the Code to the extent the transferee taxpayer has an underpayment of estimated tax if the eligible credit is not obtained as expected.

6. Chaining

Multiple commenters responding to the section 6418 proposed regulations, as well as the section 6417 proposed regulations, requested that a transferee

taxpayer that is also an applicable entity under section 6417 be permitted to make an elective payment election under section 6417(a) for a credit that the transferee taxpayer purchased from an eligible taxpayer under section 6418(a) (referred to in the section 6417 regulations as ''chaining''). These comments are outside of the scope of these final regulations because they ask a question that can only be resolved under section 6417. As explained in the preamble to TD 9988, the Treasury Department and the IRS note that § 1.6417–2(c)(4) specifically does not adopt commenters' recommendations. However, the Treasury Department and the IRS also published Notice 2024–27, 2024–12 IRB 715, which requests comments on situations in which a section 6417(a) election could be made for credits purchased in transfers under section 6418(a). Written comments submitted pursuant to procedures described in Notice 2024–27 are due by December 1, 2024.

III. Additional Rules for Partnerships and S Corporations

Section 6418(c)(2) provides that, in the case of any facility or property held directly by a partnership or an S corporation, any election under section 6418(a) is made by such partnership or S corporation. Section 6418(c)(1)(A) and (B) describes the treatment of a transfer election made by a partnership or an S corporation, and proposed § 1.6418–3 would have provided additional rules for partnerships or S corporations that are eligible taxpayers or transferee taxpayers.

A. Rules Applicable to Both Partnerships and S Corporations

Proposed § 1.6418–3(a)(1) through (6) provided certain rules that are applicable to both partnerships and S corporations. Proposed § 1.6418–3(a)(1) provided generally that a partnership or an S corporation may qualify as an eligible taxpayer or a transferee taxpayer, assuming all other relevant requirements in section 6418 are met. Proposed § 1.6418–3(a)(2) provided that in the case of any specified credit portion determined with respect to any eligible credit property held directly by a partnership or an S corporation, if such partnership or S corporation makes a transfer election with respect to such specified credit portion, (i) any amount of cash payment received as consideration for the transferred specified credit portion will be treated as tax exempt income for purposes of sections 705 and 1366 of the Code, and (ii) a partner's distributive share of such tax exempt income will be as described in proposed § 1.6418–3(b)(1) and (2). Proposed § 1.6418–3(a)(3) clarified that in the case of an eligible credit property held directly by a partnership or an S corporation, no transfer election by any partner or S corporation shareholder is allowed. Proposed § 1.6418–3(a)(4) clarified that the language in section 6418(c) requiring an eligible credit property to be ''held directly'' by a transferor partnership or transferor S corporation allows for such eligible credit property to be owned by an entity disregarded as separate from the transferor partnership or transferor S corporation for Federal income tax purposes. Proposed § 1.6418–3(a)(5) provided that any tax exempt income resulting from the receipt of consideration for the transfer of a specified credit portion by a transferor partnership or transferor S corporation is treated as arising from an investment activity and not from the conduct of a trade or business within the meaning of section 469(c)(1)(A). Additionally, the proposed regulations provided that any tax exempt income is not treated as passive income to any direct or indirect partners or shareholders who do not materially participate within the meaning of section 469(c)(1)(B). Lastly, proposed § 1.6418–3(a)(6)(i) provided that the disposition of a partner's interest under § 1.47–6(a)(2) or the disposition of an S corporation shareholder's interest under § 1.47–4(a)(2) in a transferor partnership or an S corporation, respectively, does not result in recapture under section 6418(g)(3)(B) to which a transferee taxpayer is liable. Likewise, proposed § 1.6418–3(a)(6)(ii) provided that a change in the nonqualified nonrecourse financing (as defined in section 49(a)(1)(D)) amount of any partner or shareholder of a transferor partnership or transferor S corporation, respectively, after the close of the taxable year in which the investment credit property is placed in service and the specified credit portion is determined, is disregarded for purposes of section 6418(g)(3)(B). That is, only the applicable partner in the transferor partnership or shareholder in the transferor S corporation is liable for recapture in such a circumstance. As such, notification by the transferor partnership or transferor S corporation to the transferee taxpayer of a section 49 recapture event is not required. Because there were no comments related to the provisions described in this paragraph, the proposed regulations are adopted without change in these final regulations.

B. Rules Solely Applicable to Transferor and Transferee Partnerships

Section 6418(c)(1)(A) provides that any amount received as consideration for a transfer of eligible credits by a transferor partnership is treated as tax exempt income for purposes of section 705. Section 6418(c)(1)(B) provides that a partner's distributive share of such tax exempt income is based on such partner's distributive share of the otherwise eligible credit for each taxable year. Proposed § 1.6418–3(b)(1) provided that a transferor partnership must generally determine a partner's distributive share of any tax exempt income resulting from the receipt of consideration by a transferor partnership for a transferred specified credit portion based on such partner's proportionate distributive share of the eligible credit that would otherwise have been allocated to such partner absent the transfer of the specified credit portion (otherwise eligible credit). The proposed regulations noted that a partner's distributive share of an otherwise eligible credit is determined under §§ 1.46–3(f) and 1.704–1(b)(4)(ii). The proposed regulations further clarified that any tax exempt income resulting from the receipt of consideration by a transferor partnership for a transferred specified credit portion is treated as received or accrued, including for purposes of section 705, as of the date the specified credit portion is determined with respect to the transferor partnership (such as, for investment credit property, the date the property is placed in service).

Proposed § 1.6418–3(b)(2) provided a special rule for allocations of tax exempt income and eligible credits resulting from a transfer of a specified credit portion of less than all eligible credits determined with respect to an eligible credit property held by a transferor partnership. This special rule permitted tax exempt income resulting from the receipt of consideration for a transfer of one or more specified credit portion(s) of less than all eligible credits from an eligible credit property to, generally, be allocated to those partners that desired to transfer their distributive share of the underlying credits. To take advantage of this special rule, the proposed regulations provided that a transferor partnership would first determine each partner's distributive share of the otherwise eligible credits determined with respect to such eligible credit property in accordance with §§ 1.46–3(f) and 1.704–1(b)(4)(ii). This amount is referred to as a ''partner's eligible credit amount.'' Thereafter, the transferor

partnership would determine, either in a manner described in the partnership agreement or as the partners may agree, the portion of each partner's eligible credit amount to be transferred and the portion of each partner's eligible credit amount to be retained and allocated to such partner. Following the transfer of the specified credit portion(s), the transferor partnership would be permitted to allocate to each partner its agreed upon share of eligible credits, tax exempt income resulting from the receipt of consideration for the transferred specified credit portion(s), or both, as the case may be; provided that, the amount of eligible credits allocated to each partner did not exceed such partner's eligible credit amount and the amount of tax exempt income allocated to each partner would equal such partner's proportionate share of tax exempt income resulting from the transfer(s). Each partner's proportionate share of tax exempt income resulting from the transfer(s) would be equal to the total tax exempt income resulting from the transfer(s) of the specified credit portion(s) multiplied by a fraction, (i) the numerator of which would be a partner's total eligible credit amount minus the amount of eligible credits actually allocated to the partner with respect to the eligible credit property for the taxable year, and (ii) the denominator of which would be the total amount of the specified credit portion(s) transferred by the partnership with respect to the eligible credit property for the taxable year. The proposed regulations provided examples of this rule.

A commenter generally supported the partnership allocation rules in the proposed regulations, although there was a non-specific question related to the administrability of the proposed rules in the tax credit industry. The Treasury Department and the IRS appreciate that the partnership allocation rules under section 6418 could be considered complex and difficult to administer, but any such complexity of those rules is warranted given the flexibility they provide to taxpayers operating through transferor partnerships.

A commenter requested clarifying language and an example showing that the varying annual election and separate determination of each partner's eligible credit amount to be transferred under section 6418 and the portion of each partner's eligible credit amount to be retained and allocated to such partner and related allocations of tax exempt income can be made or revised at any time during the taxable year the eligible credit is generated and the following taxable year up to the due date of the partnership return for the taxable year under sections 706 and 761. Section 761(c) provides that for purposes of subchapter K of chapter 1 of the Code, a partnership agreement includes any modifications of the agreement made on or before the due date (not including extensions) of the partnership return for the taxable year, which are agreed to by all the partners or are adopted in accordance with the provisions of the agreement. The effect of section 761(c) is that a partnership is allowed to change its partners' distributive shares of income, gain, loss, deductions or credits for a taxable year (assuming such allocations are compliant with section 704(b)) up until the due date (not including extensions) for the partnership's tax return for such year. Proposed § 1.6418–3(b)(2)(ii) would have provided that a transferor partnership may determine, in any manner described in the partnership agreement, or as the partners may agree, the portion of each partner's eligible credit amount to be transferred, and the portion of each partner's eligible credit amount to be retained and allocated to such partner. Assuming the agreement between the partners as to the portion of each partner's eligible credit amount to be transferred, and the portion of each partner's eligible credit amount to be retained and allocated to such partner, is properly treated as part of the partnership's agreement, such amounts can be made or revised under section 761(c) up until the due date (not including extensions) of the partnership's annual tax return. As such, there would already be considerable flexibility under the proposed regulations, and that additional language or an example is unnecessary to address this commenter's request.

Proposed § 1.6418–3(b)(4)(i) would have provided that a partnership may qualify as a transferee partnership to the extent it is not related (within the meaning of section 267(b) or 707(b)(1)) to an eligible taxpayer. The proposed regulations also would have provided that while a transferee partnership is subject to the no additional transfer rule, an allocation of a transferred specified credit portion to a direct or indirect partner of a transferee partnership under section 704(b) is not a transfer for purposes of section 6418. Proposed § 1.6418–3(b)(4)(ii) would have provided that a cash payment by a transferee partnership as consideration for a transferred specified credit portion is treated as an expenditure described in section 705(a)(2)(B). Proposed § 1.6418–3(b)(4)(iii) would have provided that each partner's distributive share of any transferred specified credit portion is based on such partner's distributive share of the section 705(a)(2)(B) expenditures used to fund the purchase of such transferred specified credit portion. Under the proposed regulations, each partner's distributive share of the section 705(a)(2)(B) expenditures used to fund the purchase of any transferred specified credit portion would be determined by the partnership agreement. Or, if the partnership agreement did not provide for the allocation of such nondeductible expenditures, then each partner's distributive share would be based on the transferee partnership's general allocation of nondeductible expenditures.

To prevent avoidance of the no additional transfer rule in proposed § 1.6418–2(c)(2), the proposed regulations in proposed § 1.6418–3(b)(4)(iv) would have provided that a transferred specified credit portion purchased by a transferee partnership is treated as an extraordinary item under § 1.706–4(e) (and would have included a proposed addition to § 1.706–4(e) confirming a transferred specified credit portion is an extraordinary item). The proposed regulations further would have provided that if the transferee partnership and eligible taxpayer have the same taxable years, such extraordinary item is deemed to occur on the date the transferee partnership first makes a cash payment to an eligible taxpayer for any transferred specified credit portion. The proposed regulations also would have provided that if the transferee partnership and eligible taxpayer have different taxable years, the extraordinary item is deemed to occur on the later of the first date the transferee partnership takes the transferred specified credit portion into account under section 6418(d), or the first date that the transferee partnership made a cash payment to the eligible taxpayer for the transferred specified credit portion.

Lastly, proposed § 1.6418–3(b)(4)(v) would have provided that if an upper-tier partnership is a direct or indirect partner of a transferee partnership and directly or indirectly receives an allocation of a transferred specified credit portion, the upper-tier partnership is not an eligible taxpayer under section 6418 with respect to the transferred specified credit portion. The proposed regulations would have provided that an upper-tier partnership must determine each partner's distributive share of the transferred specified credit portion in accordance

with rules in proposed § 1.6418–3(b)(4)(iii) and (iv) and must report the credits to its partners in accordance with guidance.

A commenter recommended that the final regulations avoid excluding partners from credit allocations due to the extraordinary items rule of proposed § 1.6418–3(b)(4)(iv) if a new partner is admitted to the partnership after the transferee taxpayer signs a credit purchase agreement but before any cash payments have been made. The commenter's concern was with respect to the application of proposed § 1.6418–1(f)(3) to a partnership. This provision stated that the term ''paid in cash'' means a payment in U.S. dollars and ''[m]ay include a transferee taxpayer's contractual commitment to purchase eligible credits with United States dollars in advance of the date a specified credit portion is transferred to such transferee taxpayer.'' The commenter suggested that the clause in the previous sentence could be interpreted to mean that the term ''paid in cash'' means the advance contractual commitment itself, rather than the payment pursuant to the advance commitment and suggested some changes to proposed § 1.6418–1(f)(3). The paid in cash definition in proposed § 1.6418–1(f)(3) confirms that advanced commitments are permissible and do not violate the paid in cash requirement. As the commenter hypothesizes, this provision is intended to clarify that payments in U.S. dollars made at the proper time can qualify even if the payments are made pursuant to advance contractual commitments. Likewise, the Treasury Department and the IRS confirm that an advanced commitment is not by itself considered a cash payment. Thus, if a partnership has not yet made any cash payments pursuant to a commitment to purchase eligible credits, an extraordinary item has not yet arisen.

A commenter requested additional guidance in the form of examples that illustrate the transfer of partnership interests. The Treasury Department and the IRS have considered these general requests and have determined such additional guidance is not necessary. The final regulations already provide examples demonstrating the rules applicable to a transferee partnership and its partners under section 6418, including rules applicable to an upper-tier partnership that is a direct or indirect partner in a transferee partnership. However, the final regulations clarify that an upper-tier partnership's distributive share of a transferred specified credit portion is treated as an extraordinary item to the upper-tier partnership. As a result, a transferred specified credit portion must be allocated among the partners of an upper-tier partnership as of the time the transfer of the specified credit portion is treated as occurring to the transferee partnership in accordance with § 1.6418–3(b)(4)(iv) and § 1.706–4(e)(1) and (e)(2)(ix). This is the case regardless of whether the transferee partnership and the upper-tier partnership have different taxable years under section 706(b).

A commenter recommended updates to § 1.704–1(b)(3) to provide that the special allocations of tax exempt income and non-deductible expenses in the manner contemplated by the proposed regulations will be treated as having been made in accordance with the partners' interests in the partnership. The Treasury Department and the IRS have considered whether updates to § 1.704–1(b)(3) are necessary and have determined that updates to those regulations are outside the scope of final regulations for section 6418.

C. Rules Solely Applicable to Transferor and Transferee S Corporations

Section 6418(c)(1)(A) provides that any amount received as consideration for a transfer of eligible credits by a transferor S corporation is treated as tax exempt income for purposes of section 1366. Proposed § 1.6418–3(c)(1) would have provided that each shareholder of a transferor S corporation must take into account such shareholder's pro rata share (as determined under section 1377(a) of the Code) of any tax exempt income resulting from the receipt of consideration for the transfer. The proposed regulations further would have provided that any tax exempt income resulting from the receipt of consideration by a transferor S corporation for a transferred specified credit portion is treated as received or accrued, including for purposes of section 1366 of the Code, as of the date the specified credit portion is determined with respect to the transferor S corporation (such as, for investment credit property, the date the property is placed in service).

Proposed § 1.6418–3(c)(2)(i) would have provided that an S corporation may qualify as a transferee taxpayer to the extent it is not related (within the meaning of section 267(b) or 707(b)(1)) to an eligible taxpayer. The proposed regulations also would have provided that while a transferee S corporation is subject to the no additional transfer rule, an allocation of a transferred specified credit portion to a direct or indirect shareholder of a transferee S corporation is not a transfer for purposes of section 6418. Proposed § 1.6418–3(c)(2)(ii) would have provided that a cash payment by a transferee S corporation as consideration for a transferred specified credit portion is treated as an expenditure described in section 1367(a)(2)(D) of the Code. Proposed § 1.6418–3(c)(2)(iii) would have provided that each shareholder of a transferee S corporation must take into account such shareholder's pro rata share (as determined under section 1377(a)) of any transferred specified credit portion. The proposed regulations further would have provided that if a transferee S corporation and eligible taxpayer have the same taxable years, the transfer of a specified credit portion is treated as occurring to a transferee S corporation during the transferee S corporation's permitted year (as defined under section 1378(b)) or the taxable year elected under section 444 that the transferee S corporation first makes a cash payment as consideration to the eligible taxpayer for the specified credit portion. The proposed regulations also would have provided that if a transferee S corporation and eligible taxpayer have different taxable years, then the transfer of a specified credit portion is treated as occurring to a transferee S corporation during the transferee S corporation's first permitted year (as defined under sections 444 and 1378(b)) ending with or after, the taxable year of the eligible taxpayer to which the transferred specified credit portion was determined. Because there were no comments related to the provisions described in this paragraph, the proposed regulations are adopted without change in these final regulations.

D. Elections for Transferor Partnerships and Transferor S Corporations

Proposed § 1.6418–3(d) would have provided specific rules relating to elections for transferor partnerships or transferor S corporations. Proposed § 1.6418–3(d)(1) would have provided that a transfer election is made on the basis of an eligible credit property and only applies to the specified credit portion identified in the transfer election by such partnership or S corporation in the taxable year for which the election is made. Proposed § 1.6418–3(d)(2) would have provided that a transfer election for a specified credit portion must be made in the manner provided in proposed § 1.6418–2(b)(1) through (3), including that all documents required in proposed § 1.6418–2(b)(1) through (3) must be attached to the partnership or S corporation return for the taxable year during which the transferred specified

credit portion was determined. The proposed regulations further would have provided that for the transfer election to be valid, the return must be filed not later than the time prescribed by §§ 1.6031(a)–1(e) and 1.6037–1(b) (including extensions of time) for filing the return for such taxable year. Additionally, the proposed regulations would have provided that no transfer election may be made or revised on an amended return or by filing an AAR and that no 9100 relief would be available for a transfer election that is not timely filed. Lastly, proposed § 1.6418–3(d)(3) would have provided that a transfer election by a partnership or an S corporation is irrevocable. As described in greater detail in part II.B.4 of this Summary of Comments and Explanation of Revisions, these final regulations modify proposed § 1.6418–2(b)(4) to permit an automatic six-month extension of time under § 301.9100–2(b) to make the election prescribed in section 6418(e)(1). Consistent with that modification, these final regulations also modify proposed § 1.6418–3(d)(2) to provide for late-election relief under § 301.9100–2(b) for a partnership or an S corporation making a transfer election and permit, based on some commenters' requests, that a partnership or an S corporation, much like any other eligible taxpayer, may correct a numerical error with respect to a properly claimed transfer election on an amended return or AAR. The partnership's or S corporation's original return must have been signed under penalties of perjury and must have contained all of the information, including a registration number, required by these final regulations. The final regulations clarify that in order to correct an error on an amended return or AAR, a partnership or an S corporation must have made an error in the information included on the original return such that there is a substantive item to correct. A partnership or an S corporation cannot correct a blank item or an item that is described as being ''available upon request.''

IV. Additional Information and Registration

Section 6418(g)(1) provides that as a condition of, and prior to, any transfer of any portion of an eligible credit under section 6418, the Secretary may require such information (including, in such form or manner as is determined appropriate by the Secretary, such information returns) or registration as the Secretary deems necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments under this section. Proposed § 1.6418–4 would have addressed these requirements by adding a pre-filing registration process, and § 1.6418–4T, issued contemporaneously, put those rules into effect for taxable years ending on or after June 21, 2023. Because the temporary regulations are removed, this part IV discusses the proposed regulations rather than the temporary regulations, which are identical.

Proposed § 1.6418–4(a)–(c) would have provided the mandatory pre-filing registration process that, except as provided in guidance, an eligible taxpayer would be required to complete as a condition of, and prior to, the transfer of an eligible credit under proposed § 1.6418–2 or § 1.6418–3.

Proposed § 1.6418–4(a) would have provided an overview of the pre-filing registration process. Proposed § 1.6418–4(b) would have included the pre-filing registration requirements, including: (1) manner of pre-filing registration; (2) pre-filing registration and election for members of a consolidated group; (3) timing of pre-filing registration; (4) that each eligible credit property must have its own registration number; and (5) information required to complete the pre-filing registration process. Proposed § 1.6418–4(c) would have provided rules related to the registration number, including: (1) general rules; (2) that the registration number is valid for only one taxable year; (3) renewing registration numbers; (4) amendment of previously submitted registration information if a change occurs before the registration number is used; and (5) that the registration number is required to be reported by an eligible taxpayer and transferee taxpayer.

Several commenters requested that the IRS implement a streamlined process for registration, including registration for multiple properties. Several commenters provided suggestions for alternatives to a registration process, such as creating a registry of tax credits, an election out of pre-filing registration, or utilizing the current process for matching transactions. Section 6418(g)(1) provides that the Secretary may implement a registration process she deems necessary for purposes of preventing duplication, fraud, or improper or excessive transfers of eligible credits. Proposed § 1.6418–4(a) would have required an eligible taxpayer to satisfy the pre-filing registration requirements of proposed § 1.6418–4(b) as a condition of, and prior to, making a transfer election under section 6418(a). The Treasury Department and the IRS recognize the concerns of eligible taxpayers needing an efficient registration process to transfer eligible credits but must mitigate opportunities for fraud. The IRS will consider ways outside of these final regulations to make the pre-filing registration process more streamlined for eligible taxpayers, and the IRS will continue to monitor the pre-filing registration process to determine whether there are areas in which more efficiencies in the pre-filing registration process can be created. However, these final regulations finalize proposed § 1.6418–4(a) without change.

Several commenters recommended that the final regulations allow transfers under section 6418(a) without a registration requirement if the pre-filing registration application had been submitted. The Treasury Department and the IRS understand commenters' recommendations were made prior to the pre-filing registration portal being open; however, pre-filing registration is necessary to help meet the government's compelling interest to prevent fraud and duplication while also allowing for a more efficient processing and payment upon filing of the return. These final regulations do not adopt this suggestion because the timing of the submission is only one issue. The quality and accuracy of information of the provided information is also important, and so only submitting an application is an insufficient guardrail.

Several commenters stated that the registration process might create burdens for taxpayers that could prevent their participation in transfer opportunities. A commenter stated that the documentation and process related to acquiring a registration number should account for the fact that, while there are many large taxpayers that may be selling tax credits, the transfer market will include many smaller taxpayers as well. The Treasury Department and the IRS understand commenters' concerns about the need for resources to complete the pre-filing registration process; however, as described previously, pre-filing registration is necessary to help meet the government's compelling interest to prevent fraud and duplication while also allowing for a more efficient processing of the eligible taxpayer's return and the transferee taxpayer's return. The information requested during the pre-filing registration process is also information that the eligible taxpayer should have available after having engaged in an activity for which an eligible credit is determined. Further, for smaller eligible taxpayers that engage in fewer projects, the pre-filing registration process will be less complex. For example, an eligible taxpayer with one eligible credit property for which an eligible credit is

determined during the taxable year will have a more streamlined registration process than will an eligible taxpayer with multiple eligible credit properties for which multiple eligible credits are determined during the taxable year. Finally, the IRS is committed to ongoing efforts to provide guidance to help taxpayers understand how to qualify for the underlying credits, how to meet the pre-filing registration requirements, and how to complete the transfer election process. These efforts, among others undertaken by the IRS, should address the commenters' concerns. Thus, these final regulations adopt the pre-filing registration process as proposed.

Commenters recommended a time limit for registration approval. A commenter urged the IRS to provide registration numbers as quickly as possible and publicly share estimates for issuing registration numbers to incentivize efficiency. Another commenter urged that the IRS be required to clarify reasons for delay in issuing a registration number and provide relief from estimated tax penalties due to the delay. Several commenters recommended that the final regulations create specific exceptions to the pre-filing registration requirement, such as a transition rule allowing transferee taxpayers to take eligible credits into account on the transferee taxpayer's 2023 tax return without a registration number for the eligible credits if a pre-registration application has been submitted by the eligible taxpayer. These final regulations do not adopt these suggestions for a time limit or a transition rule for a 2023 taxable year. Instead, the Treasury Department and the IRS recommend that taxpayers with these sorts of questions consult the current version of Publication 5884, *Inflation Reduction Act (IRA) and CHIPS Act of 2022 (CHIPS) Pre-Filing Registration Tool User Guide and Instructions,* for the latest guidance on the pre-filing registration process. In April 2024, Publication 5884 stated:

> Even though registration is not possible prior to the beginning of the tax year in which the credit will be earned, the IRS recommends that taxpayers register as soon as reasonably practicable during the tax year. The current recommendation is to submit the pre-filing registration at least 120 days prior to when the organization or entity plans to file its tax return. This should allow time for IRS review, and for the taxpayer to respond if the IRS requires additional information before issuing the registration numbers.

This information in Publication 5884 should also help other commenters that asked for clarification on the timeline for such a pre-filing registration process, including the lead-time required to initiate the process before the anticipated date of filing the applicable tax return.

One commenter suggested that the proposed regulations failure to mention bonus credits in proposed § 1.6418–4 means it is ambiguous whether eligible taxpayers must separately declare their intent to elect to transfer a bonus credit. The commenter strongly encouraged that the final regulations resolve this ambiguity and clearly specify that such an intent must be separately reported. However, as explained in part I.D of the Summary of Comments and Explanation of Revisions, bonus credits are not separately transferred from an eligible credit. Further, these final regulations do not adopt these proposed revisions to the proposed regulations because the pre-filing registration process is primarily intended to verify that the applicant is an eligible taxpayer and that the registered property is an eligible credit property. Calculation of the credit amount (including qualifying for any bonus amounts that would increase the base credit amount) is done on an annual return. However, the Treasury Department and the IRS will monitor the pre-filing registration process to determine whether requesting additional information is needed to prevent duplication, fraud, improper payments, or excessive credit transfers under section 6418.

Several commenters requested clarification of the IRS's review and determination procedures after a taxpayer completes registration, including whether taxpayers may appeal any denials of registration numbers. Publication 5884 describes this process. In cases in which a pre-filing registration submission is incomplete, the IRS will attempt to contact the registrant using the information provided to indicate deficiencies with the registration prior to making a determination.

Section 7803(e)(3) of the Code provides that it is the function of the IRS Independent Office of Appeals (Appeals) to resolve Federal tax controversies without litigation. Decisions made by the IRS relating to the denial, suspension, or revocation of a registration number are not Federal tax controversies within the meaning of section 7803(e)(3) because registration is too attenuated and separate from any tax liability of the eligible taxpayer. Accordingly, once the IRS determines that a registration number should not be given, the registrant cannot appeal the denial unless the IRS and Appeals agree that such review is available and the IRS provides the time and manner for such review.

Commenters requested that the final regulations clarify documentation retention requirements, including additional rules for the types of documents to retain or the type of information to be retained. The documentation to support the existence of valid eligible credit property will vary by the credit being claimed. The pre-filing registration portal and Publication 5884 list, for each credit, a description of the types of documents that will facilitate processing of the pre-filing registration. A registrant does not need to provide all information that may be available; in fact, as of April 2024, Publication 5884 states:

> If detailed project plans or contractual agreements are the best support that the taxpayer is engaging in activities or making tax credit investments that qualify the registrant to claim a credit, the registrant should submit an extract of the document showing the name of the taxpayer, date of purchase and identifying information such as serial numbers, rather than the entire document.

However, to the extent the information provided is insufficient for purposes of the pre-filing registration process, the IRS may request further information. *See* Publication 5884.

Commenters provided suggestions of how the registration portal should be constructed and how it should function. Commenters also recommended that the IRS enable a transferee taxpayer to verify the legitimacy of a registration number by providing the eligible taxpayer's pre-filing registration information, including a truncated taxpayer identification number, into the portal. The Treasury Department and the IRS recognize that these comments were provided prior to the opening of the registration portal; however, much of the infrastructure and planning for the registration portal was in process at the time these comments were received. The Treasury Department and the IRS will continue to review the efficiency of the registration portal, including functionality responses from the public, to determine whether changes should be implemented or whether additional guidance or publications should be issued; however, these comments are outside of the scope of these final regulations.

Several commenters stated that the final regulations should allow grouping for registration and transfer either by means of the underlying Code section provisions or existing guidance. Other commenters recommended changes in the final regulations to allow for grouping based on specific types of property. The definition of eligible credit property in section 6418 is based

on the relevant rules for the underlying eligible credit, and changes to the definition of particular properties pursuant to the underlying Code sections is outside the scope of this rulemaking. If any such underlying Code section allows grouping to determine a qualified property, then grouping for purposes of a registration number is permitted. If such definition does not allow grouping, then each eligible credit property must be registered separately; however, for some eligible credits, the pre-filing registration portal allows eligible credit property information to be uploaded by way of a spreadsheet file (bulk upload). *See* Publication 5884.

A commenter specifically asked that grouping of charging properties under section 30C be permitted for registration purposes. The commenter argued that requiring the pre-registration on a single eligible credit property basis would be unduly burdensome and costly in some cases. The commenter suggested allowing taxpayers to bundle multiple projects at different locations into a single pre-registration to process and reduce transaction costs, believing in most cases that it would reflect the realities of the transfer. The Treasury Department and the IRS did not adopt the commenters recommendation regarding section 30C, as the approach recommended was determined to be too subjective, which could lead to differences in interpretation between taxpayers and the IRS. As such, the grouping of eligible credit property continues to depend on the definition of that eligible credit property under the relevant Code section and regulations implementing the underlying eligible credit. In this commenter's case, this means the rules in section 30C(c). However, it is relevant to note the pre-filing registration portal allows eligible credit property information to be uploaded by way of bulk upload for certain credits, including the section 30C credit. *See* Publication 5884.

Commenters sought clarification that the pre-filing registration process will not require designation of a qualified clean hydrogen production facility's applicable ''lifecycle greenhouse gas emissions rate'' under section 45V. Similar to the issue of grouping eligible credit properties, the definition of eligible credit property in section 6418 is based on the relevant rules for the underlying eligible credit, and clarification of the definitions contained in the underlying Code sections for particular properties is outside the scope of this rulemaking. Therefore, these final regulations do not make this recommended change.

A commenter recommended that the final regulations allow the owner of a single process train to register the eligible credit property and the owner and the disposer(s) or utilizer(s) to each make a transfer election using the same registration number for a section 45Q credit. The commenter also recommended that in this case the pre-filing registration portal allow the owner of the single process train to disclose as part of its pre-filing registration that the credit or a portion thereof will be allowed to disposer(s) or utilizer(s) under a section 45Q(f)(3)(B) election. As explained in part II.A of this Summary of Comments and Explanation of Revisions, § 1.6418–2(a)(4)(iii) of these final regulations provides that a section 45Q credit allowable to an eligible taxpayer because of an election under section 45Q(f)(3)(B) is not an eligible credit that can be transferred because the credit is not determined with respect to the eligible taxpayer. Thus, the final regulations do not adopt this recommendation.

Several commenters sought exceptions to the yearly registration requirement. A commenter requested an illustration of a specified change that would require an amendment or resubmission. The purpose of the registration process is to assist with the administrative needs of the IRS in tracking the eligible credit property and the transferred specified credit portion. Proposed § 1.6418–4(c)(2) would have stated that a registration number is valid with respect to an eligible taxpayer only for the taxable year in which the credit is determined for the eligible credit property for which the registration is completed, and for a transferee taxpayer's taxable year in which the eligible credit is taken into account under proposed § 1.6418–2(f). Additionally, proposed § 1.6418–4(c)(3) would have stated that renewal must be made in accordance with applicable guidance, including attesting that all the facts previously provided are still correct or updating any facts. Thus, any changes to the pre-filing registration process to make it be more streamlined for renewals will be addressed in applicable guidance. After reviewing this comment, the Treasury Department and the IRS have determined that a yearly registration process is still necessary to meet these administrative needs.

Proposed § 1.6418–4(b)(5)(vii)(D) would have required that, to complete the pre-filing registration process, registrants must provide information as to the beginning of construction date and the placed in service date of the eligible credit property. Commenters requested that the final regulations require registration up to sixty days before construction has begun as well as an IRS visit to the jobsite as part of the registration process for PWA purposes. The Treasury Department and the IRS have determined that a registration number should not be given before the eligible credit property is placed in service, which is an important step to ensuring that the eligible credit property qualifies for the eligible credit for which the eligible taxpayer seeks to make a transfer election. Because a credit must be determined in the taxable year of the transfer election, maintaining the proposed requirement will ensure that taxpayers are not attempting to make a transfer election in a year in which a credit is not determined. Further, this information will help the IRS prevent fraud. The Treasury Department and the IRS have also determined that it is not necessary for sound tax administration to require registration or a jobsite visit prior to construction for PWA purposes. Thus, these final regulations adopt proposed § 1.6418–4(b)(5)(vii)(D) without change.

A commenter recommended that tax professionals be allowed to assist in the registration process on behalf of eligible taxpayers. The Treasury Department and the IRS note that the proposed regulations would not have restricted a taxpayer from authorizing a representative to apply for a registration number on behalf of the taxpayer, and these final regulations similarly do not do so. *See* Publication 5884, which provides that a person who wishes to access Energy Credits Online on behalf of a taxpayer must authorize an IRS Energy Credits Online account by selecting ''Start Authorization.'' These final regulations modify proposed § 1.6418–4(c)(5) to clarify that a valid registration number is one that was assigned to the particular taxpayer during the pre-registration process.

A commenter requested guidance stating that subsequent changes in law will not impact tax credits for which the taxpayer has already applied in the pre-filing registration process. The Treasury Department and the IRS do not adopt this request. The pre-filing registration process is not a guarantee that a project will qualify for an eligible credit for which a transfer election may be made, as verification of initial pre-filing information cannot be used by the IRS to confirm compliance with the requirements of an underlying credit. Compliance with the underlying credit requirements is reported and verified in additional detail on the annual tax return, and, as those requirements are provided in Code sections outside of

section 6418, are largely outside the scope of these final regulations. Generally, for an ITC, the amount of the credit can be determined as of the placed in service date, and for a PTC, the amount of the credit is generally determined as of the end of the taxable year. Thus, for either type of credit, changes in later taxable years to the underlying Code sections would not affect an eligible taxpayer's qualification in the taxable year the credit was determined.

V. Special Rules

A. Excessive Credit Transfers

Pursuant to section 6418(g)(2)(A), if the Secretary determines that there is an excessive credit transfer to a transferee taxpayer, then the tax imposed on the transferee taxpayer by chapter 1 of the Code (chapter 1) (regardless of whether such entity would otherwise be subject to tax under chapter 1) is increased in the year of such determination by the amount of the excessive credit transfer plus 20 percent of such excessive credit transfer. Under section 6418(g)(2)(B), the additional amount of 20 percent of the excessive credit transfer does not apply if the transferee taxpayer demonstrates to the satisfaction of the Secretary that the excessive credit transfer resulted from reasonable cause. An excessive credit transfer is defined in section 6418(g)(2)(C) as, with respect to a facility or property for which an election is made under section 6418(a) for any taxable year, an amount equal to the excess of (1) the amount of the eligible credit claimed by the transferee taxpayer with respect to such facility or property for such taxable year; over (2) the amount of the eligible credit that, without application of section 6418, would be otherwise allowable under the Code with respect to such facility or property for such taxable year.

1. In General

Proposed § 1.6418–5(a)(1) would have provided a general rule that is consistent with the rule in section 6418(g)(2)(A) for any specified credit portion transferred to a transferee taxpayer pursuant to an election in proposed § 1.6418–2(a) or proposed § 1.6418–3.

2. Taxable Year of Determination

Proposed § 1.6418–5(a)(2) would have defined the taxable year of determination as the taxable year that includes the determination of the excessive credit transfer to the transferee taxpayer and not the taxable year during which the eligible credit was originally determined by the eligible taxpayer, unless those are the same taxable years.

A commenter recommended that the final regulations also describe any further procedures that apply with respect to this IRS determination or the taxable year of the determination. The commenter noted that the proposed regulations do not describe any appeal rights of the taxpayer of such determination, including the application of deficiency procedures and the right to petition the U.S. Tax Court. The commenter recommended that the final regulations clarify that appeal rights and deficiency procedures apply to any excessive credit transfer determination.

Any excessive credit transfer determination will be made by the IRS under established examination procedures and these final regulations do not except any taxpayers or any calculations from this process. An eligible taxpayer or transferee taxpayer may challenge an adverse determination by the IRS with respect to an excess credit transfer determination if the determination creates a tax deficiency, for which deficiency procedures apply, including the right to petition the U.S. Tax Court. For example, if a transferee taxpayer claimed a transferred specified credit portion, and the transferred specified credit portion was subsequently disallowed and determined by the IRS to be an excessive credit transfer, then the transferee taxpayer could protest the disallowance before Appeals and ultimately petition the U.S. Tax Court, if desired.

3. Payments Related to Excessive Credit Transfer

Proposed § 1.6418–5(a)(3) would have provided a rule that any payments made by a transferee taxpayer to an eligible taxpayer that directly relate to an excessive credit transfer (as defined in proposed § 1.6418–5(b)) are not subject to section 6418(b)(2) or proposed § 1.6418–2(e).

Several commenters recommended clarifying the tax consequences to a transferee taxpayer with respect to payments made to an eligible taxpayer that directly relate to an excessive credit transfer. In general, the commenters thought that proposed § 1.6418–5(a)(3) only addressed the eligible taxpayer side of a transaction by only referencing section 6418(b)(2). Specifically, some commenters recommended revising the rule so that section 6418(b)(3), which says that payments related to the transfer of an eligible credit are not deductible to the transferee taxpayer, would not apply in the excessive credit transfer context. For example, a commenter raised that amounts paid as consideration by a transferee taxpayer related to an excessive credit transfer should be deductible as an ordinary business expense in year of the excess credit determination, and corresponding indemnity or insurance payment received should be included as ordinary income in the year the all events test is met (for accrual method) or in the year of payment (for cash method). Another commenter stated that amounts paid by a transferee taxpayer related to an excessive credit transfer should be deductible only to the extent they exceed the amount for which there is a claim or reimbursement with a reasonable prospect of recovery. A commenter also recommended clarifying the amount of the deduction, if a deduction is possible. Lastly, a commenter asked that the final regulations provide that any indemnification payments made by an eligible taxpayer to a transferee taxpayer relating to an excessive credit transfer be deductible as an ordinary business expense under section 162(a) in the year that the liability to make the payment is taken into account under section 461, assuming the eligible taxpayer uses the accrual method.

In response to these comments, these final regulations revise proposed § 1.6418–5(a)(3) to provide that any payment made by a transferee taxpayer to an eligible taxpayer that directly relates to the excessive credit transfer (as defined in proposed § 1.6418–5(b)) is not subject to section 6418(b)(2), section 6418(b)(3), or proposed § 1.6418–2(e). Adding the reference to section 6418(b)(3) should clarify that a transferee taxpayer is not precluded from deducting the portion of the consideration paid to the eligible taxpayer for a specified credit portion that relates to an excessive credit transfer. In addition, these final regulations revise proposed § 1.6418–5(a)(3) to clarify that the amount of a payment that directly relates to an excessive credit transfer is equal to the total consideration paid in cash by the transferee taxpayer for its specified credit portion multiplied by the ratio of the amount of the excessive credit transferred to the transferee taxpayer to the amount of the transferred specified credit portion claimed by the transferee taxpayer. However, determining the timing and character of any deduction, or the impact of insurance or indemnity payments, is beyond the scope of these final regulations. General income tax principles apply to determine the timing of any deduction to a transferee

taxpayer, or gross income to an eligible taxpayer, with respect to a payment that directly relates to an excessive credit transfer. Similarly, the character of any deduction to a transferee taxpayer, or gross income to an eligible taxpayer, with respect to a payment that directly relates to an excessive credit transfer may be determined under section 6418 and general income tax principles. Finally, general income tax principles apply to determine the income tax consequences of any insurance payments received by a transferee taxpayer or indemnities paid by the eligible taxpayer to a transferee taxpayer.

4. Reasonable Cause

Section 6418(g)(2)(B) provides that, if a transferee taxpayer demonstrates to the satisfaction of the Secretary that the excessive credit transfer resulted from reasonable cause, the excessive credit transfer addition to tax described in section 6418(g)(2)(A)(ii) will not apply. Proposed § 1.6418–5(a)(4) would have provided that the determination of reasonable cause will be made based on the relevant facts and circumstances. Generally, the most important factor is the extent of the transferee taxpayer's efforts to determine that the amount of specified credit portion transferred by the eligible taxpayer to the transferee taxpayer is not more than the amount of the eligible credit determined with respect to the eligible credit property for the taxable year in which the eligible credit was determined and has not been transferred to any other taxpayer. Circumstances that may indicate reasonable cause can include, but are not limited to, review of the eligible taxpayer's records with respect to the determination of the eligible credit (including documentation evidencing eligibility for bonus credit amounts), reasonable reliance on third party expert reports, reasonable reliance on representations from the eligible taxpayer that the total specified credit portion transferred (including portions transferred to other transferee taxpayers in a case in which an eligible taxpayer makes multiple transfer elections with respect to a single eligible credit property) does not exceed the total eligible credit determined with respect to the eligible credit property for the taxable year, and review of audited financial statements provided to the Securities and Exchange Commission (and underlying information), if applicable.

The Treasury Department and the IRS received several comments regarding the definition of reasonable cause. For the reasons described further in this part V.A.4 of the Summary of Comments and Explanation of Revisions, these final regulations do not adopt the recommendations submitted by commenters, and the proposed regulations are finalized without any substantive changes on this issue.

A few commenters stated that the proposed regulations defined reasonable cause subjectively and did not sufficiently protect transferee taxpayers from an eligible taxpayer's inadequate controls or fraud, such as cases in which an eligible taxpayer provided material, false, or misleading information on which the transferee taxpayer relied. Some commenters suggested bright-line or safe harbor rules under which the reasonable cause exception would be deemed to be satisfied, such as if an eligible taxpayer provides to a transferee taxpayer a written certification that the requirements of a section 6418 transfer have been met, or if a transferee taxpayer can produce due diligence information or attestations or uses a third-party advisor for its due diligence.

A commenter requested that the final regulations provide guidance on the definition of reasonable cause for labor standards noncompliance, including that state and local governments should receive reasonable cause relief if a failure is due to labor noncompliance. Another commenter recommended transferee taxpayers be able to rely on project labor agreements for purposes of determining reasonable cause.

These final regulations do not adopt these comments because the determination of whether an excessive credit transfer was due to reasonable cause is based on full consideration of all the facts and circumstances. To the extent additional rules are needed to prevent eligible taxpayers from providing materially false or misleading information to transferee taxpayers, or to the extent additional enforcement mechanisms are needed to prevent this type of abuse, such a change is beyond the scope of these final regulations. These final regulations also do not adopt a bright-line rule or safe harbor identifying any particular action or omission as the transferee taxpayer's deemed satisfaction of the reasonable cause standard. Guidance regarding reasonable cause in the context of labor standards noncompliance is outside the scope of these final regulations.

The Treasury Department and the IRS note that section 6418(g)(2)(B) specifically places a due diligence responsibility on the transferee taxpayer. As provided in proposed § 1.6418–5(a)(4), the most important factor in demonstrating reasonable cause under section 6418 would be the transferee taxpayer's efforts in determining that the eligible taxpayer had the specified credit portion to transfer. As acknowledged by one of the commenters, the proposed regulations would have considered representations by an eligible taxpayer as part of determining whether a transferee taxpayer has demonstrated reasonable cause. Relying solely on an eligible taxpayer's representations does not align with section 6418(g)(2)(B). Moreover, reasonable cause standards are already well-established under case law and administrative and regulatory authorities. A transferee taxpayer that is subject to an excessive credit transfer may assert defenses that are commonly raised by taxpayers in other situations in which the IRS has asserted an addition to tax. Section 1.6664–4, for example, provides guidance related to reasonable cause in the context of accuracy-related penalties under section 6662. Accordingly, these final regulations do not adopt commenters' suggestions to create bright-line rules, safe harbors, or other new standards and adopt the proposed regulations without modification.

5. Recapture Events

Proposed § 1.6418–5(a)(5) clarified that a recapture event under section 45Q(f)(4) or 50(a) is not an excessive credit transfer. The Treasury Department and the IRS did not receive any comments regarding this clarification, and thus, these final regulations adopt proposed § 1.6418–5(a)(5) without change, except that, for clarity, the final regulations add section 49(b) to the list of recapture events that are not an excessive credit transfer.

6. Definition of Excessive Credit Transfer

Proposed § 1.6418–5(b)(1) would have defined an excess credit transfer consistent with section 6418(g)(2)(C) as meaning, with respect to an eligible credit property for which a transfer election is made under proposed § 1.6418–2 or § 1.6418–3 for any taxable year, an amount equal to the excess of (1) the amount of the transferred specified credit portion claimed by the transferee taxpayer with respect to such eligible credit property for such taxable year; over (2) the amount of the eligible credit that, without the application of section 6418, would be otherwise allowable under the Code with respect to such eligible credit property for such taxable year.

Proposed § 1.6418–5(b)(2) would have provided a rule for determining an excessive credit transfer if there are multiple transferees by treating the

transferees as one. The proposed regulations would have provided that all transferee taxpayers are considered one transferee for calculating whether there was an excessive credit transfer and the amount of the excessive credit transfer. If there was an excessive credit transfer, then the amount of excessive credit transferred to a specific transferee taxpayer would be equal to the total excessive credit transferred multiplied by the transferee taxpayer's portion of the total credit transferred to all transferee taxpayers. This rule would be applied on an eligible credit property basis.

A commenter recommended that the final regulations adopt a rule allowing an eligible taxpayer to determine the order of eligible credits transferred for determining an excessive credit transfer if there are multiple transferees. Specifically, the commenter recommended allowing an eligible taxpayer to choose the order in which transferred credits will be treated as excessive credit transfers. The Treasury Department and the IRS acknowledge that an ordering rule could potentially limit the number of transferee taxpayers to which an excessive credit transfer determination is made, rather than applying pro rata to all transferee taxpayers as provided in proposed § 1.6418–5(b)(2). However, inclusion of an ordering rule between an eligible taxpayer and transferee taxpayers is not described in the definition of excessive credit transfer in section 6418(g)(2)(C). The definition, by limiting excessive credit transfers to amounts claimed by a transferee taxpayer over amounts otherwise allowable, effectively only applies to the extent the disallowed credit exceeds the amount retained by an eligible taxpayer. For example, if an eligible taxpayer retained $25X of a $100X eligible credit and transferred $75X of the same eligible credit and it was later determined that only $75X of the eligible credit is otherwise allowable with respect to the relevant eligible credit property, the excess credit transfer would be $0 ($75X − $75X). The $25X of disallowed credit would be disallowed to the eligible taxpayer. Thus, the definition of an excessive credit transfer effectively includes an ordering rule so that any disallowed eligible credit first reduces the eligible credit retained by an eligible taxpayer before applying to any transferee taxpayer. However, the definition does not distinguish between different transferee taxpayers. Further, adding an ordering election would add administrative complexity that does not exist with a pro rata rule. For example, rules would be needed on whether the election is made on a single eligible credit property basis or for all eligible credit properties, and the IRS would have to create additional systems to track that such an election was made. Also, additional complexity could arise with respect to tax administration if there was a disagreement between an eligible taxpayer and transferee taxpayers as to the order of a transfer. Based on this reasoning, the Treasury Department and the IRS do not adopt the commenter's suggestion, and these final regulations adopt the definition of excessive credit transfer without change and provide clarifying language for calculating the amount of excessive credit transferred to a specific transferee taxpayer if there is more than one transferee taxpayer.

7. Examples Illustrating Excessive Credit Transfers

Proposed § 1.6418–5(b)(3) would have provided three examples to illustrate cases in which there is no excessive credit transfer, in which there is an excessive credit transfer, and in which there is an excessive credit transfer as to multiple transferees. Consistent with the modifications made to proposed § 1.6418–5(a)(3), as described in part V.A.3 of this Summary of Comments and Explanation of Revisions, the final regulations provide additional clarification to each of the three examples in § 1.6418–5(b)(3).

The Treasury Department and the IRS understand from the comment letters that partners in a transferor partnership that decide to retain their share of eligible credits generated through the partnership may refuse to consent to the partnership transferring other partners' shares of eligible credits because eligible taxpayers are first liable under the excessive credit transfer rules up to the amount of the credit retained. Commenters requested that the final regulations include an election not to apply any disallowed eligible credit amounts to an eligible taxpayer (to the extent it retained eligible credits) before triggering an excessive credit transfer. As previously described, section 6418(g)(2)(C) limits an excessive credit transfer to the amount claimed by a transferee taxpayer(s) over amounts otherwise allowable, meaning the rule only applies to the extent the disallowed credit exceeds the amount retained by an eligible taxpayer. After considering this comment, the Treasury Department and the IRS have determined that including an election not to apply the excessive credit transfer rules in specified circumstances is not consistent with the definition of an excessive credit transfer in section 6418(g)(2)(C).

Several comments were received seeking clarification on the interaction between the additions to tax for excessive credit transfers and penalties for labor standards noncompliance, as well as recommendations for additional enforcement and documentation rules. After considering these comments, the Treasury Department and the IRS have decided not to provide further clarification in these final regulations. The additions to tax imposed by section 6418 are applied in addition to other penalties imposed by the Code. Moreover, the imposition of penalties under section 45(b)(7) and (8) are addressed in the section 45 proposed regulations. The Treasury Department and the IRS will continue to study whether inequities or unfair burdens exist for taxpayers and potentially address such situations in future guidance.

B. Recapture

Unlike excessive credit transfers, recapture of a tax credit occurs if the original tax credit reported would have been correct without the occurrence of a subsequent recapture event.

Section 6418(g)(3)(B) provides that if, during any taxable year, the applicable investment credit property (as defined in section 50(a)(5)) is disposed of, or otherwise ceases to be investment credit property with respect to the eligible taxpayer, before the close of the recapture period (as described in section 50(a)(1)), then (i) such eligible taxpayer must provide notice of such occurrence to the transferee taxpayer (in such form and manner as the Secretary prescribes), and (ii) the transferee taxpayer must provide notice of the recapture amount (as defined in section 50(c)(2)), if any, to the eligible taxpayer (in such form and manner as the Secretary prescribes). The proposed regulations would have included a rule that the recapture amount is calculated and taken into account by the transferee taxpayer.

The proposed regulations would have provided guidance on the notifications that are required by the eligible taxpayer and the transferee taxpayer after a recapture event, as described in section 6418(g)(3)(B)(i) and (ii), stating that an eligible taxpayer is required to provide notification of a recapture event to a transferee taxpayer, with such notification including all of the information necessary for the transferee taxpayer to calculate the recapture amount (as defined under section 50(c)(2)).

On November 22, 2023, the Treasury Department and the IRS published

proposed regulations (REG–132569–17) in the **Federal Register** (88 FR 82188) relating to the section 48 credit that supplemented proposed § 1.6418–5 to provide guidance on the notification requirements for an eligible taxpayer and that a transferee taxpayer is responsible for any amount of tax increase under section 48(a)(10)(C). These final regulations reserve on § 1.6418–5(f) as proposed in REG–132569–17 because the Treasury Department and the IRS continue to consider comments received regarding the application of section 48(a)(10)(C). Accordingly, any comments received on § 1.6418–5(f) as proposed in REG–132569–17 will be separately addressed as part of that rulemaking.

Commenters recommended that the final regulations allocate the risk of recapture to the eligible taxpayer for several reasons, including that the eligible taxpayer would have the greatest ability to cause or prevent a recapture event. Another commenter urged that the final regulations allocate the risk of recapture to the eligible taxpayer for recapture events solely under section 50(a). Other commenters stated that placing the risk of recapture on the transferee taxpayer creates increased transactions costs, reduces the number of market participants, and distorts the market value of the transferred credits. The Treasury Department and the IRS have determined that the risk of recapture should be borne by the transferee taxpayer with respect to its specified credit portion for all types of recapture events (including those under sections 49(b) and 45Q(f)(4)) directly relating to an eligible taxpayer (that is, other than section 50(a) and 49(b) recapture events involving transfers of interests by partners in a transferor partnership or shareholders in a transferor S corporation). This determination is consistent with the statutory framework for recapture under sections 45Q(f)(4), 49(b), and 50(a), which generally imposes recapture tax on the taxpayer who claimed the credit, regardless of whether the underlying credit is determined with respect to such taxpayer (for example, whether the taxpayer owns the underlying credit property). This interpretation is also consistent with section 6418(a), which treats the transferee taxpayer (and not the eligible taxpayer) as the taxpayer for purposes of the Code with respect to a specified credit portion, and with section 6418(g)(3)(B)(ii), which requires the transferee taxpayer to provide notice of the recapture amount, if any, to the eligible taxpayer. Therefore, these final regulations adopt the proposed rule without change on this issue.

A commenter requested clarification as to the allocation of recapture liability between an eligible taxpayer and a transferee taxpayer to the extent the eligible taxpayer retains any eligible credits and whether there is an ordering rule applied similar to an excessive credit transfer. As discussed in part V.A.5 of this Summary of Comments and Explanation of Revisions section, proposed § 1.6418–5(a)(5) would have clarified that recapture tax liability is not treated in the same manner as an excessive credit transfer tax liability, and these final regulations adopt that rule without change. Under the excessive credit transfer rules, the eligible taxpayer will be subject to a credit reduction up to the amount of the eligible credit retained before a transferee taxpayer's credit is reduced. However, the position most consistent with the statutory language of the multiple Code sections involved is that the transferee taxpayer bears a proportionate share of recapture risk, without looking to the eligible taxpayer first. Consequently, the Treasury Department and the IRS have not made a change to the proposed regulations allocating recapture risk to the eligible taxpayer for any retained credits before causing a recapture event to any transferee taxpayer. However, the final regulations under § 1.6418–5(d)(3)(i) clarify that, except in the case of a partner or S corporation shareholder that has disposed of an interest in a transferor partnership or transferor S corporation and is subject to the rules relating to such disposition under § 1.47–6(a)(2) or § 1.47–4(a)(2), respectively, recapture liability applies proportionately to any transferee taxpayers and an eligible taxpayer to the extent an eligible taxpayer has retained eligible credits determined with respect to the relevant eligible credit property. The final regulations also add formulas for determining the recapture amount for which a transferee taxpayer and an eligible taxpayer is responsible for.

In addition, the final regulations clarify the effect of a partner or S corporation shareholder recapture event on the remaining amount of recapture liability for which the transferee taxpayer and the transferor partnership or transferor S corporation is responsible and provide two examples to illustrate who is responsible for recapture in the case of a sale of a portion of an interest in a transferor partnership and a subsequent sale of the investment credit property by the transferor partnership.

A commenter stated that the recapture notice requirement under proposed § 1.6418–5(d) could be burdensome, particularly to smaller taxpayers, due to the complexity and compliance needed to prepare the necessary documentation and notify the respective party of the occurrence of a recapture event or the determination of the recapture amount. The Treasury Department and the IRS note that section 6418(g)(3)(B)(i) provides these notification requirements and that the proposed regulations merely implement the statute. For these reasons, the Treasury Department and the IRS have determined that the notification requirements in the proposed regulations should be retained.

Several commenters requested that exceptions be provided to the recapture rules, for example, by limiting the scope of recapture events, such as if a project ceases to be credit eligible property, or by limiting recapture events to those causing recapture under the former grant program created under section 1603 of the American Recovery and Reinvestment Tax Act of 2009 (Pub. L. 111–5, 123 Stat. 115, 364). Section 6418(g)(3)(B) specifically provides for recapture in the event applicable investment credit property (as defined in section 50(a)(5)) is disposed of or otherwise ceases to be investment credit property with respect to the eligible taxpayer before the end of the recapture period described in section 50(a)(1). As such, providing exceptions to the operation of section 50(a) is beyond the scope of these final regulations. Consequently, the Treasury Department and the IRS decline to make the recommended changes.

Some commenters urged the Treasury Department and the IRS to mitigate instances of duplicate recapture of the same ITC. Specifically, commenters requested that to the extent an amount of an eligible ITC has been recaptured by a partner in a transferor partnership or a shareholder in a transferor S corporation under section 50(a) or section 49(b) pursuant to § 1.6418–3(a)(6), the amount of potential recapture liability remaining to a transferee taxpayer should be reduced accordingly. The Treasury Department and the IRS agree that a single ITC should not be subject to duplicate recapture. As a result, the final regulations clarify that to the extent a partner in a transferor partnership or a shareholder in a transferor S corporation recognizes an amount of tax increase under sections 50(a) or 49(b) that does not result in recapture liability to a transferee taxpayer pursuant to § 1.6418–3(a)(6), that amount reduces

the remaining amount of ITC subject to recapture for a recapture event caused directly by the transferor partnership or transferee S corporation.

Commenters also requested additional guidance and examples of the recapture rules, including a recapture event under §§ 1.6418–5(e) and 1.45Q–5. For purposes of recapture, section 6418(g)(3) cross-references to section 50(a). Thus, recapture occurs with respect to the taxable year in which an investment credit property for which an eligible credit is determined is disposed of, or otherwise ceases to be investment credit property with respect to the eligible taxpayer before the end of the recapture period. Section 45Q has similar requirements in that carbon oxide that has been sequestered, utilized, or used and to which a section 45Q credit has been determined is generally intended to remain sequestered, utilized, or used for the entire recapture period. The proposed regulations would have clarified that the rules under proposed §§ 1.6418–5(e) and 1.45Q–5 apply to a transferee taxpayer to the extent any eligible section 45Q credit is transferred under section 6418. Based on the explanations provided in the preamble to the proposed regulations, as well as this Summary of Comments and Explanation of Revisions, the Treasury Department and the IRS have decided not to provide additional guidance generally or through examples. However, the final regulations clarify that recapture liability applies proportionately to an eligible taxpayer and any transferee taxpayers to the extent an eligible taxpayer has retained any amount of an eligible credit determined with respect to a component of carbon capture equipment owned by the eligible taxpayer within a single process train described in § 1.45Q–2(c)(3).

A commenter requested examples illustrating the section 49(b) rules causing recapture to a transferee taxpayer, particularly in cases in which specified credit portions are transferred to multiple transferee taxpayers. The Treasury Department and the IRS believe examples of the interaction of sections 49 and 6418 are beyond the scope of these regulations. As such, no examples have been added to these final regulations regarding this interaction.

A commenter stated that credit buyers will prefer purchasing credits from partnerships or S corporations because owners of partnerships and S corporations may transfer their interests without triggering recapture to the transferee taxpayer and achieve the same tax result as a sale of the underlying assets. The Treasury Department and the IRS acknowledge that the recapture rules for indirect dispositions by partners in a transferor partnership or shareholders in a transferor S corporation are different than the rules for direct dispositions by an eligible taxpayer. However, these differences are generally consistent with the effect of entity versus aggregate principles throughout the Code and regulations. Consequently, no changes are necessary to the proposed regulations on this issue.

C. Ineffective Transfers

Proposed § 1.6418–5(f) states that an ineffective transfer election means that no transfer of an eligible credit has occurred for purposes of section 6418, including section 6418(b). The proposed regulations would have provided a clarification that an ineffective election is not considered an excessive credit transfer to the transferee taxpayer. This means that section 6418 would not apply to the transaction, and the tax consequences are determined under any other relevant provisions of the Code.

A commenter requested clarification of the general tax consequences of a transfer that was ineffective. The Treasury Department and the IRS have reviewed this comment and determined that the proposed regulations provide sufficient guidance for taxpayers if an ineffective transfer occurs. To avoid the risk of not addressing a specific consequence of an ineffective transfer, the proposed regulations would have stated that the tax consequences are determined under any relevant provision of the Code. Addressing those tax consequences is outside of section 6418 and is beyond the scope of these final regulations. Consequently, these final regulations adopt the rule in proposed § 1.6418–5(f) (redesignated as § 1.6418–5(g)), without including specific tax consequences.

A commenter requested that the final regulations address ineffective transfer determinations made after the transfer election deadline and the resulting conflict given that an eligible taxpayer is entitled to transfer a tax credit once. The Treasury Department and the IRS understand this comment to mean that there is a potential prohibition on a transfer if the same eligible taxpayer attempted to transfer the same eligible credit in relation to an eligible credit property, but the previous transaction was deemed to be an ineffective transaction. If a previous transaction is unwound because it is deemed to be an ineffective transaction, then no transfer has occurred. In addition to the application of existing tax rules, the eligible taxpayer would be able to make a transfer election to properly transfer the credit assuming the eligible taxpayer can satisfy the requirements for making a transfer election. Because the proposed regulations would have identified the treatment of ineffective transactions, these final regulations are adopted without change.

Another commenter suggested that the final regulations adopt a rule providing for reasonable cause relief in the event of an ineffective transfer election. These final regulations do not adopt this comment. As described in the preamble to the proposed regulations, and previously in this part V.C of the Summary of Comments and Explanation of Revisions, an ineffective transfer does not result in an excessive credit transfer to the transferee taxpayer, and so reasonable cause relief is not necessary.

D. Credit Carryforward

The proposed regulations would have provided special rules relating to the carryback and carryforward of transferred specified credit portions. Proposed § 1.6418–5(g) would have stated that a transferee taxpayer can apply the rules in section 39(a)(4) of the Code (regarding a 3-year carryback period for unused current year business credits) to a specified credit portion to the extent the specified credit portion is described in section 6417(b) (list of applicable credits, taking into account any placed in service requirements in section 6417(b)(2), (3), and (5)). The preamble to the proposed regulations provided clarity on two complementary issues related to the carryback of transferred credits stating (i) if the credit is listed in section 6417(b), then the credit is an applicable credit, and (ii) no statutory language prohibits a transferee taxpayer from using the rule in section 39(a)(4) with respect to an eligible credit.

Several commenters asked that the final regulations confirm that the transferee taxpayer should be able to carryforward an unused credit amount. These final regulations provide the requested clarification by revising proposed § 1.6418–5(g) (redesignated as § 1.6418–5(h)) so that the language now refers to both the carryback and carryforward period when describing application of the rules in section 39(a)(4).

E. Real Estate Investment Trusts

With respect to real estate investment trusts under section 856 of the Code (REITs), commenters requested that the final regulations clarify that eligible credits that have not yet been transferred are treated as real estate assets, cash, or cash items and, thus,

will not cause a REIT to fail REIT qualification under section 856(c)(4)(A) (section 856(c)(4)(A) together with section 856(c)(4)(B), the REIT Asset Test). Another commenter requested that the final regulations state that eligible credits that have not been transferred are disregarded for purposes of determining whether a REIT satisfies the REIT Asset Test. Commenters asserted that guidance is needed to avoid instances in which a REIT might fail the REIT Asset Test because it planned to make an election to transfer an eligible credit but did not do so prior to the end of a calendar quarter, when the REIT's compliance with the REIT Asset Test is measured.

The Treasury Department and the IRS recognize that REITs may be continuously earning and selling eligible credits and, therefore, need certainty with respect to this REIT qualification issue. Accordingly, § 1.6418–5(i)(1) of these final regulations addresses those comments by providing that eligible credits that have not yet been transferred pursuant to section 6418 are disregarded for purposes of the REIT Asset Test.

The preamble to the proposed regulations stated that under section 6418, the cash received by an eligible REIT as consideration for the transfer of an eligible credit is not included in that taxpayer's gross income. Because the transaction does not result in any net income, the transfer does not pose a prohibited transaction tax issue. A commenter stated that, although this clarification is appreciated, the final regulations should contain a provision that the transfer of an eligible credit pursuant to section 6418 is not a sale of property for purposes of the ''seven sales'' safe harbor in section 857(b)(6)(C)(iii)(I) or section 857(b)(6)(D)(iv)(I) of the Code. The commenter further pointed out that many eligible credit programs allow a taxpayer to earn a large number of separately transferable credits. Thus, the commenter explained, if the transfer of an eligible credit were a sale of property for these purposes, that result could cause the REIT to have so many sales that it would be taxed 100 percent on any sale of real property in which it engaged. The possibility of that 100 percent tax could effectively deter REITs from participating in any eligible credit programs.

The Treasury Department and the IRS agree that participation in the transfer of eligible credits under section 6418 should not burden all of a REIT's sales of real property. Accordingly, § 1.6418–5(i)(2) of these final regulations provides that the transfer of a specified credit portion pursuant to a valid section 6418 election is not a sale of property for purposes of section 857(b)(6)(C)(iii) and section 857(b)(6)(D)(iv) and, thus, does not count as one of the seven sales described in those provisions.

One commenter requested confirmation that receipt of (or the right to receive) an eligible credit does not result in income to an eligible taxpayer that is a REIT. Generally, Federal income tax rules do not treat a taxpayer as receiving gross income upon becoming entitled to a credit against Federal income tax. This general principle equally applies to an eligible taxpayer, including a REIT, becoming entitled to an eligible credit that it may transfer under section 6418. Accordingly, these final regulations do not include the requested rule specifically addressing REITs.

A commenter also requested confirmation that the sale of energy under sections 45 and 45Y is not a dealer sale under the REIT prohibited transactions rules of section 857(b)(6). Although, a REIT's Federal income tax treatment of the sale of energy and earning of eligible credits is outside the scope of these final regulations, the Treasury Department and the IRS note that the preamble to TD 9784 (81 FR 59849, 59856 (August 31, 2016)) (2016 preamble) stated that until additional guidance is published in the Internal Revenue Bulletin, in any taxable year in which (1) the quantity of excess electricity transferred to the utility company during the taxable year from energy-producing distinct assets that serve an inherently permanent structure does not exceed (2) the quantity of electricity purchased from the utility company during the taxable year to serve the inherently permanent structure, the IRS will not treat any net income resulting from the transfer of such excess electricity as constituting net income derived from a prohibited transaction under section 857(b)(6). Any sale of electricity that is not within the scope of the statement in the 2016 preamble should be analyzed on a facts and circumstances basis to determine whether the sale is subject to the prohibited transaction rules of section 857(b)(6).

VI. Other Comments

A. Normalization

The proposed regulations did not address the impact of the rules described in section 50(d)(2) (normalization rules) on eligible credit transfers under section 6418, which only are relevant for credits that are ITCs. Several commenters requested guidance on the application of the normalization rules. Some commenters stated that the normalization rules could not and should not apply to eligible credit transfers. One commenter suggested that there is no authority to apply the normalization rules to eligible credit transfers. Lastly a commenter stated that the normalization rules do apply to credits related to public utility property otherwise subject to the ITC normalization requirements because section 6417(g) provides, in part, that ''rules similar to the rules of section 50'' apply for purposes of section 6417. The commenter went on to state that there is not a similar provision included in section 6418 to invoke application of the normalization rules, and the wording of section 6418(a) has the opposite effect. The final regulations do not adopt a specific rule addressing the normalization rules because it is beyond the scope of the final regulations. However, the Treasury Department and the IRS clarify that an eligible taxpayer is not subject to the normalization rules with respect to any cash consideration paid by a transferee taxpayer for a specified credit portion that is described in section 6418(b)(2). Any portion of an eligible credit that is not transferred, however, would remain subject to the normalization rules as applicable.

B. Transaction Costs and Deductions

The proposed regulations did not address the Federal income tax treatment of transaction costs, either for the eligible taxpayer or the transferee taxpayer but described specific matters and considerations that the Treasury Department and the IRS are taking into account in developing rules outside of these final regulations.

Commenters recommended that the final regulations clarify the treatment of transaction costs, including categories of costs such as: legal and consulting fees; success-based fees; tax insurance; and indemnity payments. The treatment of transaction costs is beyond the scope of the section 6418 final regulations. Section 6418(b)(2) and (3) only cover the treatment of consideration that is paid for the transfer of an eligible credit. The treatment of other costs is generally governed by other Code sections, and subject to general Federal income tax principles. However, the application of other Code sections and general Federal income tax principles to determine such treatment may involve the relation-back of such costs to the credit transfer transaction and its general characterization under section 6418(a) and (b). The Treasury Department and the IRS anticipate issuing further guidance taking into account the

comments received regarding transaction costs.

Effect on Other Documents

The temporary regulations are removed effective July 1, 2024.

Special Analyses

I. Regulatory Planning and Review

Pursuant to the Memorandum of Agreement, Review of Treasury Regulations under Executive Order 12866 (June 9, 2023), tax regulatory actions issued by the IRS are not subject to the requirements of section 6(b) of Executive Order 12866, as amended. Therefore, a regulatory impact assessment is not required.

II. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) (PRA) generally requires that a Federal agency obtain the approval of the Office of Management and Budget (OMB) before collecting information from the public, whether such collection of information is mandatory, voluntary, or required to obtain or retain a benefit. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

The collections of information in these final regulations contain reporting and recordkeeping requirements. The recordkeeping requirements mentioned within these final regulations are considered general tax records under § 1.6001–1(e). These records are required for the IRS to validate that transferee taxpayers have met the regulatory requirements and are entitled to the transferred specified credit portions. For PRA purposes, general tax records are already approved by OMB under 1545–0074 for individuals and under 1545–0123 for business entities.

These final regulations also mention reporting requirements related to making transfer elections as detailed in §§ 1.6418–2 and 1.6418–3. These transfer elections will be made by eligible taxpayers as part of filing a return (such as the appropriate Form 1040, Form 1120, Form 1120–S, or Form 1065), including filling out the relevant source credit form and completing the Form 3800. The final regulation in § 1.6418–2(b)(5) describes third-party disclosures, which require eligible taxpayers and transferee taxpayers to complete transfer election statements and also require eligible taxpayers to provide required minimum documentation to transferee taxpayers as part of making a transfer election. These forms and third-party disclosures are approved under 1545–0074 for individuals and 1545–0123 for business entities.

These final regulations also describe recapture procedures as detailed in § 1.6418–5 that are required by section 6418(g)(3). The reporting of a recapture event will still be required to be reported using Form 4255, Recapture of Investment Credit. This form is approved under 1545–0074 for individuals and 1545–0123 for business entities. The final regulation is not changing or creating new collection requirements not already approved by OMB.

These final regulations mention the reporting requirement to complete pre-filing registration with IRS to be able to transfer eligible credits to a transferee taxpayer as detailed in § 1.6418–4. The pre-filing registration portal is approved under 1545–2310 for all filers.

The IRS solicited feedback on the collection requirements for reporting, recordkeeping, and pre-filing registration. Although no public comments received by the IRS were directed specifically at the PRA or on the collection requirements, several commenters generally expressed concerns about the burdens associated with the documentation requirements contained in the Proposed Rules. As described in the relevant portions of this preamble, the Treasury Department and IRS believe that the documentation requirements are necessary to administer the transfer of eligible credit under section 6418.

III. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) (RFA) imposes certain requirements with respect to Federal rules that are subject to the notice and comment requirements of section 553(b) of the Administrative Procedure Act (5 U.S.C. 551 *et seq.*) and that are likely to have a significant economic impact on a substantial number of small entities. Unless an agency determines that a proposal is not likely to have a significant economic impact on a substantial number of small entities, section 603 of the RFA requires the agency to present a final regulatory flexibility analysis (FRFA) of the final regulations. The Treasury Department and the IRS have not determined whether the final regulations will likely have a significant economic impact on a substantial number of small entities. This determination requires further study. Because there is a possibility of significant economic impact on a substantial number of small entities, a FRFA is provided in these final regulations.

Pursuant to section 7805(f) of the Code, the proposed regulations were submitted to the Chief Counsel of Advocacy of the Small Business Administration, and no comments were received.

1. Need for and Objectives of the Rule

The final regulations provide greater clarity to eligible taxpayers that intend to make an election under section 6418 to transfer eligible credits. The final regulations also provide guidance to transferee taxpayers as to the treatment of transferred eligible credits under section 6418. The final regulations include needed definitions, the time and manner to make a transfer election, and information about the pre-filing registration process, among other items. The Treasury Department and the IRS intend and expect that providing taxpayers guidance that allows them to effectively use section 6418 to transfer eligible credits will beneficially impact various industries, deliver benefits across the economy, and reduce economy-wide greenhouse gas emissions.

In particular, section 6418 allows eligible taxpayers to transfer an eligible credit (or portion thereof) to a transferee taxpayer. Allowing eligible taxpayers without sufficient Federal income tax liability to use a business tax credit to instead transfer the tax credit to a taxpayer that has sufficient tax liability to use the credit will increase the incentive for taxpayers to invest in clean energy projects that generate eligible credits. It will also increase the amount of cash available to such taxpayers, thereby reducing the amount of financing needed for clean energy projects.

2. Significant Issues Raised by Public Comments in Response to the IRFA

There were no comments filed that specifically addressed the Proposed Rules and policies presented in the IRFA. Additionally, no comments were filed by the Chief Counsel of Advocacy of the Small Business Administration.

3. Affected Small Entities

The RFA directs agencies to provide a description of, and where feasible, an estimate of, the number of small entities that may be affected by the final regulations, if adopted. The Small Business Administration's Office of Advocacy estimates in its 2023 Frequently Asked Questions that 99.9 percent of American businesses meet its definition of a small business. The applicability of these final regulations

does not depend on the size of the business, as defined by the Small Business Administration. As described more fully in the preamble to these final regulations and in this FRFA, section 6418 and these final regulations may affect a variety of different entities across several different industries as there are 11 different eligible credits that may be transferred pursuant to a transfer election. Although there is uncertainty as to the exact number of small businesses within this group, the current estimated number of respondents to these rules is 50,000 taxpayers. The Treasury Department and the IRS expect to receive more information on the impact on small businesses once taxpayers start to make transfer elections using the guidance and procedures provided in these final regulations.

4. Impact of the Rules

The final regulations provide rules for how taxpayers can take advantage of the section 6418 credit monetization regime. Taxpayers that elect to take advantage of transferability will have administrative costs related to reading and understanding the rules in addition to recordkeeping and reporting requirements because of the pre-filing registration and tax return requirements. The costs will vary across different-sized taxpayers and across the type of project(s) in which such taxpayers are engaged.

The pre-filing registration process requires a taxpayer to register itself as intending to make a transfer election, to list all eligible credits it intends to transfer, and to list each eligible credit property that contributed to the determination of such credits. This process must be completed to receive a registration number for each eligible credit property with respect to which the eligible taxpayer intends to transfer an eligible credit. On filing the return, to make a valid transfer election, the eligible taxpayer and transferee taxpayer would be required to complete and attach a transfer election statement. The transfer election statement is generally a written document that describes the transfer of a specified credit portion between an eligible taxpayer and transferee taxpayer. Further, the eligible taxpayer is required to provide certain required minimum documentation to the transferee taxpayer, and the transferee taxpayer is required to retain the documentation for as long as it may be relevant. Many of the other requirements, such as completing the relevant source credit form and completing the Form 3800 would be required for any taxpayer that is claiming a general business credit, regardless of whether the taxpayer was transferring the credit under section 6418. Although the Treasury Department and the IRS do not have sufficient data to determine precisely the likely extent of the increased costs of compliance, the estimated burden of complying with the recordkeeping and reporting requirements are described in the Paperwork Reduction Act section of the preamble.

5. Alternatives Considered

The Treasury Department and the IRS considered alternatives to the final regulations. The final regulation requirements of pre-filing registration and the additional requirements to make a valid transfer election were designed to minimize burden while also minimizing the opportunity for duplication, fraud, improper payments, or excessive payments under section 6418. For example, in adopting these requirements, the Treasury Department and the IRS considered whether such information could be obtained strictly at filing of the relevant return. However, the Treasury Department and IRS decided that such an option would increase the opportunity for duplication, fraud, improper payments or excessive payments under section 6418. Section 6418(g)(1) specifically authorizes the IRS to require such information or registration as the Secretary deems necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments under section 6418 as a condition of, and prior to, any transfer of any portion of an eligible credit. As described in the preamble to these final regulations, these final rules carry out that Congressional intent as pre-filing registration allows for the IRS to verify certain information in a timely manner and then process the annual tax return of the eligible taxpayer and the transferee taxpayer with minimal delays. Having a distinction between eligible taxpayers that are small businesses versus others making a transfer election would create a scenario in which a subset of taxpayers seeking to transfer eligible credits would not have been verified or received registration numbers, potentially delaying return processing for both eligible taxpayers and transferee taxpayers.

Another example is the final regulation requirement that eligible taxpayers and transferee taxpayers complete a transfer election statement. In determining to adopt this proposed rule, the Treasury Department and the IRS considered that such a statement would again minimize opportunity for fraud and decrease the chance of duplication but would also benefit a transferee taxpayer by allowing the filing of its return without having to wait for an eligible taxpayer to file in all cases. Further, the contents of the transfer election statement were intended to be available to eligible taxpayers, such that the size of the business should not impact greatly the time needed to prepare such statements. The Treasury Department and the IRS also considered whether any required documentation was needed to be provided by eligible taxpayers to transferee taxpayers, which the transferee taxpayers are then required to keep for so long as the contents thereof may become material in the administration of any internal revenue law. Again, this requirement was considered consistent with the goal of minimizing fraud, as the information is generally documentation to validate the existence of the eligible credit property, any bonus credits amounts, and the evidence of credit qualification. Any size business generating an eligible credit should have access to such information. Further the recordkeeping duration is consistent with general recordkeeping rules under § 1.6001–1(e). This final regulation requirement also will benefit small businesses that are transferee taxpayers as it provides a mechanism to receive such information from the eligible taxpayer.

Treasury and the IRS solicited comments on the requirements in the proposed regulations, including specifically, whether there are less burdensome alternatives that do not increase the risk of duplication, fraud, improper payments, or excessive payments under section 6418. The comments received in response to this request have been discussed in the preceding paragraphs.

5. Duplicative, Overlapping, or Conflicting Federal Rules

The final regulations do not duplicate, overlap, or conflict with any relevant Federal rules. As discussed above, the final regulations merely provide procedures and definitions to allow taxpayers to take advantage of the ability to transfer eligible credits. The Treasury Department and the IRS solicited input from interested members of the public about identifying and avoiding overlapping, duplicative, or conflicting requirements. No comments were received in response to this request.

IV. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandate Reform Act of 1995 requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a State, local, or tribal government, in the aggregate, or by the private sector, of $100 million (updated annually for inflation). These final regulations do not include any Federal mandate that may result in expenditures by State, local, or tribal governments, or by the private sector in excess of that threshold.

V. Executive Order 13132: Federalism

Executive Order 13132 (Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on State and local governments, and is not required by statute, or preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. These final regulations do not have federalism implications and do not impose substantial, direct compliance costs on State and local governments or preempt state law within the meaning of the Executive order.

VI. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments) prohibits an agency from publishing any rule that has tribal implications if the rule either imposes substantial, direct compliance costs on Indian tribal governments, and is not required by statute, or preempts tribal law, unless the agency meets the consultation and funding requirements of section 5 of the Executive order. These final regulations do not have substantial direct effects on one or more federally recognized Indian tribes and does not impose substantial direct compliance costs on Indian tribal governments within the meaning of the Executive order.

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs has designated this rule as a major rule as defined by 5 U.S.C. 804(2).

Statement of Availability of IRS Documents

IRS notices and other guidance cited in this preamble are published in the Internal Revenue Bulletin (or Cumulative Bulletin) and are available from the Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402, or by visiting the IRS website at *https://www.irs.gov.*

Drafting Information

The principal authors of these final regulations are James Holmes and Jeremy Milton, Office of the Associate Chief Counsel (Passthroughs and Special Industries), IRS. However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, the Treasury Department and the IRS amend 26 CFR part 1 as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by adding an entry in numerical order for §§ 1.6418–0 through 1.6418–5 to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

* * * * *

Sections 1.6418–0 through 1.6418–5 also issued under 26 U.S.C. 6418(g)(1) and (h).

* * * * *

■ **Par. 2.** Section 1.706–4 is amended as follows:

■ 1. Redesignate paragraphs (e)(2)(ix) through (xi) as paragraphs (e)(2)(x) through (xii).

■ 2. Add new paragraph (e)(2)(ix).

■ 3. Revise and republish paragraph (g).

The addition, revision and republication read as follows:

§ 1.706–4 Determination of distributive share when a partner's interest varies.

* * * * *

(e) * * *

(2) * * *

(ix) Any specified credit portion transferred pursuant to section 6418 and §§ 1.6418–1 through 1.6418–5;

* * * * *

(g) *Applicability date.* (1) Except with respect to paragraph (c)(3) of this section, this section applies for partnership taxable years that begin on or after August 3, 2015. The rules of paragraph (c)(3) of this section apply for taxable years of partnerships other than existing publicly traded partnerships that begin on or after August 3, 2015. For purposes of the immediately preceding sentence, an existing publicly traded partnership is a partnership described in section 7704(b) that was formed prior to April 14, 2009. For purposes of this effective date provision, the termination of a publicly traded partnership under section 708(b)(1)(B) due to the sale or exchange of 50 percent or more of the total interests in partnership capital and profits is disregarded in determining whether the publicly traded partnership is an existing publicly traded partnership.

(2) Paragraph (e)(2)(ix) of this section applies to taxable years ending on or after April 30, 2024.

■ **Par. 3.** Sections 1.6418–0 through 1.6418–5 are added to read as follows:

Sec.

* * * * *

* * * * *

§ 1.6418–0 Table of contents.

This section lists the captions contained in §§ 1.6418–1 through 1.6418–5.

§ 1.6418–1 Transfer of eligible credits.

(a) *Transfer of eligible credits.* An eligible taxpayer may make a transfer election under § 1.6418–2(a) to transfer any specified portion of an eligible credit determined with respect to any eligible credit property of such eligible taxpayer for any taxable year to a transferee taxpayer in accordance with section 6418 of the Code and the section 6418 regulations (defined in paragraph (g) of this section). Paragraphs (b) through (q) of this section provide definitions of terms for purposes of applying section 6418 and the section 6418 regulations. *See* § 1.6418–2 for rules and procedures under which all transfer elections must be made, limitations to making transfer elections, the treatment of payments made in connection with transfer elections, and the treatment of eligible credits transferred to transferee taxpayers. *See* § 1.6418–3 for special rules pertaining to transfer elections made by partnerships or S corporations. See § 1.6418–4 for pre-filing registration requirements and other information required to make any transfer election effective. *See* § 1.6418–5 for special rules related to the imposition of tax on excessive credit transfers, basis reductions, required notifications and impacts of the recapture of transferred credits, and rules regarding carrybacks and carryforwards.

(b) *Eligible taxpayer.* The term *eligible taxpayer* means any taxpayer (as defined in section 7701(a)(14) of the Code), other than one described in section 6417(d)(1)(A) and § 1.6417–1(b).

(c) *Eligible credit*—(1) *In general.* The term *eligible credit* is a credit described in paragraph (c)(2) of this section determined for a taxable year with respect to a single eligible credit property of an eligible taxpayer but does not include any business credit carryforward or business credit carryback determined under section 39 of the Code.

(2) *Separately determined credit amounts.* The amount of any credit described in this paragraph (c)(2) is the entire amount of the credit separately determined with respect to each single eligible credit property of the eligible taxpayer and includes any bonus credit amounts described in paragraph (c)(3) of this section determined with respect to that single eligible credit property. The eligible credits described in this paragraph (c)(2) are:

(i) *Alternative fuel vehicle refueling property.* So much of the credit for alternative fuel vehicle refueling property allowed under section 30C of the Code that, pursuant to section 30C(d)(1), is treated as a credit listed in section 38(b) of the Code (section 30C credit).

(ii) *Renewable electricity production.* The renewable electricity production credit determined under section 45(a) of the Code (section 45 credit).

(iii) *Carbon oxide sequestration.* The credit for carbon oxide sequestration determined under section 45Q(a) of the Code (section 45Q credit).

(iv) *Zero-emission nuclear power production.* The zero-emission nuclear power production credit determined under section 45U(a) of the Code (section 45U credit).

(v) *Clean hydrogen production.* The clean hydrogen production credit determined under section 45V(a) of the Code (section 45V credit).

(vi) *Advanced manufacturing production.* The advanced manufacturing production credit determined under section 45X(a) of the Code (section 45X credit).

(vii) *Clean electricity production.* The clean electricity production credit determined under section 45Y(a) of the Code (section 45Y credit).

(viii) *Clean fuel production.* The clean fuel production credit determined under section 45Z(a) of the Code (section 45Z credit).

(ix) *Energy.* The energy credit determined under section 48 of the Code (section 48 credit).

(x) *Qualifying advance energy project.* The qualifying advanced energy project credit determined under section 48C of the Code (section 48C credit).

(xi) *Clean electricity.* The clean electricity investment credit determined under section 48E of the Code (section 48E credit).

(3) *Bonus credit amounts.* The bonus credit amounts described in this paragraph (c)(3) are:

(i) In the case of a section 30C credit, the increased credit amounts for which the requirements under section 30C(g)(2)(A) and (3) are satisfied.

(ii) In the case of a section 45 credit, the increased credit amounts for which the requirements under section 45(b)(7)(A)(8), (9), and (11) are satisfied.

(iii) In the case of a section 45Q credit, the increased credit amounts for which the requirements under section 45Q(h)(3) and (4) are satisfied.

(iv) In the case of a section 45U credit, the increased credit amount for which the requirements under section 45U(d)(2) are satisfied.

(v) In the case of a section 45V credit, the increased credit amounts for which the requirements under section 45V(e)(3) and (4) are satisfied.

(vi) In the case of a section 45Y credit, the increased credit amounts for which the requirements under section 45Y(g)(7), (9), (10), and (11) are satisfied.

(vii) In the case of a section 45Z credit, the increased credit amounts for which the requirements under section 45Z(f)(6) and (7) are satisfied.

(viii) In the case of a section 48 credit, the increased credit amounts for which the requirements under section 48(a)(10), (11), (12), (14), and (e) are satisfied.

(ix) In the case of a section 48C credit, the increased credit amounts for which the requirements under section 48C(e)(5) and (6) are satisfied.

(x) In the case of a section 48E credit, the increased credit amounts for which the requirements under section 48E(a)(3)(A), (B), (d)(3), (d)(4), and (h) are satisfied.

(d) *Eligible credit property.* The term *eligible credit property* means each of the units of property of an eligible taxpayer described in paragraphs (d)(1) through (11) of this section with respect to which the amount of an eligible credit is determined:

(1) In the case of a section 30C credit, a *qualified alternative fuel vehicle refueling property* described in section 30C(c).

(2) In the case of a section 45 credit, a *qualified facility* described in section 45(d).

(3) In the case of a section 45Q credit, a component of carbon capture

equipment within a *single process train* described in § 1.45Q–2(c)(3).

(4) In the case of a section 45U credit, a *qualified nuclear power facility* described in section 45U(b)(1).

(5) In the case of a section 45V credit, a *qualified clean hydrogen production facility* described in section 45V(c)(3).

(6) In the case of a section 45X credit, a *facility* that produces eligible components, as described in guidance under sections 48C and 45X.

(7) In the case of a section 45Y credit, a *qualified facility* described in section 45Y(b)(1).

(8) In the case of a section 45Z credit, a *qualified facility* described in section 45Z(d)(4).

(9) *Section 48 property*—(i) *In general.* In the case of a section 48 credit and except as provided in paragraph (d)(9)(ii) of this section, an *energy property* described in section 48.

(ii) *Pre-filing registration and elections.* At the option of an eligible taxpayer, and to the extent consistently applied for purposes of the pre-filing registration requirements of § 1.6418–4 and the election requirements of §§ 1.6418–2 through 1.6418–3, an *energy project* as described in section 48(a)(9)(A)(ii) and defined in guidance.

(10) In the case of a section 48C credit, an *eligible property* described in section 48C(c)(2).

(11) In the case of a section 48E credit, a *qualified facility* as defined in section 48E(b)(3) or, in the case of a section 48E credit relating to a qualified investment with respect to energy storage technology, an *energy storage technology* described in section 48E(c)(2).

(e) *Guidance.* The term *guidance* means guidance published in the **Federal Register** or Internal Revenue Bulletin, as well as administrative guidance such as forms, instructions, publications, or other guidance on the IRS.gov website. *See* §§ 601.601 and 601.602 of this chapter.

(f) *Paid in cash.* The term *paid in cash* means a payment in United States dollars that—

(1) Is made by cash, check, cashier's check, money order, wire transfer, automated clearing house (ACH) transfer, or other bank transfer of immediately available funds;

(2) Is made within the period beginning on the first day of the eligible taxpayer's taxable year during which a specified credit portion is determined and ending on the due date for completing a transfer election statement (as provided in § 1.6418–2(b)(5)(iii)); and

(3) May include a transferee taxpayer's contractual commitment to purchase eligible credits with United States dollars in advance of the date a specified credit portion is transferred to such transferee taxpayer if all payments of United States dollars are made in a manner described in paragraph (f)(1) of this section during the time period described in paragraph (f)(2) of this section.

(g) *Section 6418 regulations.* The term *section 6418 regulations* means §§ 1.6418–1 through 1.6418–5.

(h) *Specified credit portion.* The term *specified credit portion* means a proportionate share (including all) of an eligible credit determined with respect to a single eligible credit property of the eligible taxpayer that is specified in a transfer election. A specified credit portion of an eligible credit must reflect a proportionate share of each bonus credit amount that is taken into account in calculating the entire amount of eligible credit determined with respect to a single eligible credit property.

(i) *Statutory references*—(1) *Chapter 1.* The term *chapter 1* means chapter 1 of the Code.

(2) *Code.* The term *Code* means the Internal Revenue Code.

(3) *Subchapter K.* The term *subchapter K* means subchapter K of chapter 1.

(j) *Transfer election.* The term *transfer election* means an election under section 6418(a) of the Code to transfer to a transferee taxpayer a specified portion of an eligible credit determined with respect to an eligible credit property in accordance with the section 6418 regulations.

(k) *Transferee partnership.* The term *transferee partnership* means a partnership for Federal tax purposes that is a transferee taxpayer.

(l) *Transferee S corporation.* The term *transferee S corporation* means an S corporation within the meaning of section 1361(a) that is a transferee taxpayer.

(m) *Transferee taxpayer.* The term *transferee taxpayer* means any taxpayer that is not related (within the meaning of section 267(b) or 707(b)(1) of the Code) to the eligible taxpayer making the transfer election to which an eligible taxpayer transfers a specified credit portion of an eligible credit.

(n) *Transferor partnership.* The term *transferor partnership* means a partnership for Federal tax purposes that is an eligible taxpayer that makes a transfer election.

(o) *Transferor S corporation.* The term *transferor S corporation* means an S corporation within the meaning of section 1361(a) that is an eligible taxpayer that makes a transfer election.

(p) *Transferred specified credit portion.* The term *transferred specified credit portion* means the specified credit portion that is transferred from an eligible taxpayer to a transferee taxpayer pursuant to a transfer election.

(q) *U.S. territory.* The term *U.S. territory* means the Commonwealth of Puerto Rico, Guam, the U.S. Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(r) *Applicability date.* This section applies to taxable years ending on or after April 30, 2024. For taxable years ending before April 30, 2024, taxpayers, however, may choose to apply the rules of this section and §§ 1.6418–2, –3, and –5, provided the taxpayers apply the rules in their entirety and in a consistent manner.

§ 1.6418–2 Rules for making transfer elections.

(a) *Transfer election*—(1) *In general.* An eligible taxpayer can make a transfer election as provided in this section. If a valid transfer election is made by an eligible taxpayer for any taxable year, the transferee taxpayer specified in such election (and not the eligible taxpayer) is treated as the taxpayer for purposes of the Code with respect to the specified credit portion. This paragraph (a) provides rules on the number of transfers permitted, rules for determining the eligible taxpayer in certain ownership situations, and rules describing circumstances under which no transfer election is allowed. Paragraph (b) of this section provides specific rules regarding the scope, manner, and timing of a transfer election. Paragraph (c) of this section provides rules regarding limitations applicable to transfer elections. Paragraph (d) of this section provides rules regarding an eligible taxpayer's determination of an eligible credit. Paragraph (e) of this section provides the treatment of payments in connection with a transfer election. Paragraph (f) of this section provides rules regarding a transferee taxpayer's treatment of an eligible credit following a transfer.

(2) *Multiple transfer elections permitted.* An eligible taxpayer may make multiple transfer elections to transfer one or more specified credit portion(s) to multiple transferee taxpayers, provided that the aggregate amount of specified credit portions transferred with respect to any single eligible credit property does not exceed the amount of the eligible credit determined with respect to the eligible credit property.

(3) *Transfer election in certain ownership situations*—(i) *Disregarded*

entities. If an eligible taxpayer is the sole owner (directly or indirectly) of an entity that is disregarded as separate from such eligible taxpayer for Federal income tax purposes and such entity directly holds an eligible credit property, the eligible taxpayer may make a transfer election in the manner provided in this section with respect to any eligible credit determined with respect to such eligible credit property.

(ii) *Undivided ownership interests.* If an eligible taxpayer is a co-owner of an eligible credit property through an arrangement properly treated as a tenancy-in-common for Federal income tax purposes, or through an organization that has made a valid election under section 761(a) of the Code, then the eligible taxpayer's undivided ownership share of the eligible credit property will be treated for purposes of section 6418 as a separate eligible credit property owned by such eligible taxpayer, and the eligible taxpayer may make a transfer election in the manner provided in this section for any eligible credit(s) determined with respect to such eligible credit property.

(iii) *Members of a consolidated group.* A member of a consolidated group (as defined in § 1.1502–1) is required to make a transfer election in the manner provided in this section to transfer any eligible credit determined with respect to the member. *See* § 1.1502–77 (providing rules regarding the status of the common parent as agent for its members).

(iv) *Partnerships and S corporations.* A partnership or an S corporation that determines an eligible credit with respect to any eligible credit property held directly by such partnership or S corporation may make a transfer election in the manner provided in § 1.6418–3(d) with respect to eligible credits determined with respect to such eligible credit property.

(v) *Grantors or others treated as owners of a trust.* If an eligible taxpayer is a grantor or any other person that is treated as the owner of any portion of a trust as described in section 671 of the Code, then the eligible taxpayer may make a transfer election in the manner provided in this section for eligible credits determined with respect to any eligible credit property held directly by the portion of the trust that the eligible taxpayer is treated as owning under section 671.

(4) *Circumstances under which no transfer election can be made*—(i) *Prohibition on election or transfer with respect to progress expenditures.* No transfer election can be made with respect to any amount of an eligible credit that is allowed for progress expenditures pursuant to rules similar to the rules of section 46(c)(4) and (d) (as in effect on the day before the enactment of the Revenue Reconciliation Act of 1990).

(ii) *No election allowed if eligible credit transferred for non-cash consideration.* No transfer election is allowed if an eligible taxpayer receives any consideration other than cash (as defined in § 1.6418–1(f)) in connection with the transfer of a specified credit portion.

(iii) *No election allowed if eligible credits not determined with respect to taxpayer.* No transfer election is allowed for eligible credits that are not determined with respect to an eligible taxpayer as described in paragraph (d) of this section. For example, a section 45Q credit allowable to an eligible taxpayer because of an election made under section 45Q(f)(3)(B), or a section 48 credit allowable to an eligible taxpayer because of an election made under section 50(d)(5) and § 1.48–4, although described in § 1.6418–1(c)(2), is not an eligible credit that can be transferred by the taxpayer because such credit is not determined with respect to the eligible taxpayer.

(b) *Manner and due date of making a transfer election*—(1) *In general.* An eligible taxpayer must make a transfer election to transfer a specified credit portion of an eligible credit on the basis of a single eligible credit property. For example, an eligible taxpayer that determines eligible credits with respect to two eligible credit properties would need to make a separate transfer election with respect to any specified credit portion of the eligible credit determined with respect to each eligible credit property. Any transfer election must be consistent with the eligible taxpayer's pre-filing registration under § 1.6418–4.

(2) *Specific rules for certain eligible credits.* In the case of any section 45 credit, section 45Q credit, section 45V credit, or section 45Y credit that is an eligible credit, the rules in paragraph (b)(2)(i) and (ii) of this section apply.

(i) *Separate eligible credit property.* A transfer election must be made separately with respect to each eligible credit property described in § 1.6418–1(d)(2), (3), (5), and (7), as applicable, for which an eligible credit is determined.

(ii) *Time period.* A transfer election must be made for each taxable year an eligible taxpayer elects to transfer specified credit portions with respect to such an eligible credit property during the 10-year period beginning on the date such eligible credit property was originally placed in service (or, in the case of a section 45Q credit, for each taxable year during the 12-year period beginning on the date the single process train of carbon capture equipment was originally placed in service).

(3) *Manner of making a valid transfer election.* A transfer election is made by an eligible taxpayer on the basis of each specified credit portion with respect to a single eligible credit property that is transferred to a transferee taxpayer. To make a valid transfer election, an eligible taxpayer, as part of filing an annual tax return (or a return for a short year within the meaning of section 443 of the Code (short year return)), must include the following—

(i) A properly completed relevant source credit form for the eligible credit (such as Form 7207, *Advanced Manufacturing Production Credit,* if making a transfer election for a section 45X credit) for the taxable year that the eligible credit was determined, including the registration number received during the required pre-filing registration (as described in § 1.6418–4) related to the eligible credit property with respect to which a transferred eligible credit was determined;

(ii) A properly completed Form 3800, *General Business Credit* (or its successor), including reductions necessary because of the transferred eligible credit as required by the form and instructions and the registration number received during the required pre-filing registration (as described in § 1.6418–4) related to the eligible credit property with respect to which a transferred eligible credit was determined;

(iii) A schedule attached to the Form 3800 (or its successor) showing the amount of eligible credit transferred for each eligible credit property (such as for a section 45X election, the relevant lines that include the eligible credit property reported on Form 7207), except as otherwise provided in guidance;

(iv) A transfer election statement as described in paragraph (b)(5) of this section; and

(v) Any other information related to the election specified in guidance.

(4) *Due date and original return requirement of a transfer election.* (i) *In general.* A transfer election by an eligible taxpayer with respect to a specified portion of an eligible credit must be made on an original return (including a superseding return or any revisions made on a superseding return) not later than the due date (including extensions of time) for the original return of the eligible taxpayer for the taxable year for which the eligible credit is determined. No transfer election may be made for the first time on an amended return, withdrawn on an

amended return, or made or withdrawn by filing an administrative adjustment request under section 6227 of the Code. A numerical error with respect to a properly claimed transfer election may be corrected on an amended return or by filing an administrative adjustment request under section 6227 if necessary; however, the eligible taxpayer's original return, which must be signed under penalties of perjury, must contain all of the information, including a registration number, required by the section 6418 regulations. In order to correct an error on an amended return or administrative adjustment request under section 6227, an eligible taxpayer must have made an error in the information included on the original return such that there is a substantive item to correct; an eligible taxpayer cannot correct a blank item or an item that is described as being ''available upon request.'' There is no late-election relief available under §§ 301.9100–1 or 301.9100–3 of this chapter for a transfer election that is not timely filed; however, relief under § 301.9100–2(b) may apply if the eligible taxpayer has not received an extension of time to file a return after the original due date, has timely filed a return, takes corrective action under § 301.9100–2(c) within the six-month extension period, and meets the procedural requirements outlined in § 301.9100–2(d).

(ii) *Amending the amount of the eligible credit reported*—(A) *In general.* If an eligible taxpayer, after making a transfer election in accordance with paragraph (b)(3) of this section on an original return in accordance with this paragraph (b)(4)(i) of this section, determines that the amount of the eligible credit reported on the eligible taxpayer's original return is incorrect, the eligible taxpayer may timely file an amended return, or administrative adjustment request under section 6227, if applicable, adjusting the amount of eligible credit.

(B) *Amending the amount of the credit determined to reflect an increased amount.* To the extent an eligible taxpayer corrects the amount of an eligible credit to reflect an increase in the amount of the eligible credit reported, such amount must be reflected on the credit source forms filed with the amended return, or administrative adjustment request under section 6227, if applicable, but cannot be reflected by either the eligible taxpayer or any transferee taxpayer as a transferred specified credit portion on the transfer election statement.

(C) *Amending the amount of the credit determined to reflect a decreased amount.* To the extent an eligible taxpayer corrects the amount of the eligible credit to reflect a decrease in the amount of the eligible credit reported, such amount must be reflected on the credit source forms filed with the amended return or administrative adjustment request, if applicable, and the transfer election statement reducing the amount of the credit reported in accordance with the following—

(I) The amount of such decrease first reduces the amount if any, of the eligible credit not transferred by the eligible taxpayer; and

(II) Any portion of the amount of such decrease that remains after applying the reduction described in paragraph (b)(4)(ii)(C)(I) of this section, reduces the amount reported by the transferee taxpayer, or if the eligible credit was transferred to more than one transferee taxpayer, reduces the amount of each transferee taxpayer's specified credit portion on a pro rata basis.

(D) *Treatment of cash consideration.* In the case of a decrease in the amount of the credit determined by the eligible taxpayer, any amount of the cash consideration retained by the eligible taxpayer after making an adjustment in accordance with paragraph (b)(4)(ii)(C) of this section that does not directly relate to the remaining specified credit portion must not be excluded from gross income as described in paragraph (e)(2) of this section.

(iii) *Examples.* The examples in this paragraph (b)(4)(iii) illustrate the application of paragraphs ((b)(6)(i) and (ii) of this section.

(A) *Example 1.* A, a U.S. C corporation for Federal income tax purposes (as defined in section 1361(a)(2) of the Code), qualifies as an eligible taxpayer and determines a section 45V clean hydrogen tax credit of $100X in year 1. At the end of year 1, A transfers the entire $100X of the section 45V credit to B. A timely makes a transfer election and properly reports the transaction in accordance with § 1.6418–2(b) on its original return. In year 2, A concludes that the amount of section 45V credit determined in year 1 was $120X. A may file an amended return increasing the amount of the credit reported by $20X on the appropriate credit source forms. A cannot increase the amount of the credit reported on the transfer election statement, and B cannot increase the amount of credit claimed on its return.

(B) *Example 2.* Same facts as *Example 1* except that, in year 2, A concludes that the amount of section 45V credit determined in year 1 was $80X. On an amended return, A decreases the amount of the credit reported by $20X on the appropriate credit source forms. A should then reduce the amount of the credit reported on the transfer election statement. To avoid a determination of an excessive credit transfer, B should file a qualified amended return pursuant to § 1.6664–2(c)(3) reducing the amount of credit claimed on its return by $20X.

(C) *Example 3.* C, a U.S. C corporation for Federal income tax purposes (as defined in section 1361(a)(2) of the Code), qualifies as an eligible taxpayer and determines a section 45Y clean electricity production tax credit of $100X in year 1. At the end of year 1, C transfers $80X of the 45Y credit determined to D, E, and F, with D receiving $40X, E receiving $32X, and F receiving $80X. C timely makes the transfer election and properly reports the transaction in accordance with § 1.6418–2(b) on its original return. In year 2, C concludes that the amount of section 45Y credit determined in year 1 was $60X. C files an amended return decreasing the amount of the credit reported by $40X on the appropriate credit source forms to reflect $60X of section 45Y credit on its credit source forms. As a result of the $40X decrease in the credit determined, C reduces the $20X of section 45Y retained by C to $0X, and reduces the amount of section 45Y credit transferred to D, E, and F to $30X, $24X, and F $6X, respectively (their respective pro rata shares of the reduced amount). Each of D, E, and F should file a qualified amended return under § 1.6664–2(c)(3) reducing the amount of the credit claimed on their returns to avoid a determination of an excessive credit transfer.

(5) *Transfer election statement*—(i) *In general.* A transfer election statement is a written document that describes the transfer of a specified credit portion between an eligible taxpayer and transferee taxpayer. Unless otherwise provided in guidance, an eligible taxpayer and transferee taxpayer must each attach a transfer election statement to their respective return as required under paragraphs (b)(3)(iv) and (f)(4)(ii) of this section. Unless otherwise provided in guidance, an eligible taxpayer and transferee taxpayer can use any document (such as a purchase and sale agreement) that meets the conditions in paragraph (b)(5)(ii) of this section but must label the document a ''Transfer Election Statement'' before attaching such labeled document to their respective returns. The information required in paragraph (b)(5)(ii) of this section does not otherwise limit any other information that the eligible taxpayer and transferee taxpayer may agree to provide in connection with the transfer of any specified credit portion. The statement must be signed under penalties of

perjury by an individual with authority to legally bind the eligible taxpayer. The statement must also include the written consent of an individual with authority to legally bind the transferee taxpayer.

(ii) *Information required in transfer election statement.* A transfer election statement must, at a minimum, include each of the following:

(A) Name, address, and taxpayer identification number of the transferee taxpayer and the eligible taxpayer. If the transferee taxpayer or eligible taxpayer is a member of a consolidated group, then only include information for the group member that is the transferee taxpayer or eligible taxpayer (if different from the return filer).

(B) A statement that provides the necessary information and amounts to allow the transferee taxpayer to take into account the specified credit portion with respect to the eligible credit property, including—

(*1*) A description of the eligible credit (for example, advanced manufacturing production credit for a section 45X transfer election), the total amount of the credit determined with respect to the eligible credit property, and the amount of the specified credit portion;

(*2*) The taxable year of the eligible taxpayer and the first taxable year in which the specified credit portion will be taken into account by the transferee taxpayer;

(*3*) The amount(s) of the cash consideration and date(s) on which paid by the transferee taxpayer; and

(*4*) The registration number related to the eligible credit property.

(C) Attestation that the eligible taxpayer (or any member of its consolidated group) is not related to the transferee taxpayer (or any member of its consolidated group) within the meaning of section 267(b) or 707(b)(1)).

(D) A statement or representation from the eligible taxpayer that it has or will comply with all requirements of section 6418, the section 6418 regulations, and the provisions of the Code applicable to the eligible credit, including, for example, any requirements for bonus credit amounts described in § 1.6418–1(c)(3) (if applicable).

(E) A statement or representation from the eligible taxpayer and the transferee taxpayer acknowledging the notification of recapture requirements under section 6418(g)(3) and the section 6418 regulations (if applicable).

(F) A statement or representation from the eligible taxpayer that the eligible taxpayer has provided the required minimum documentation (as described in paragraph (b)(5)(iv) of this section) to the transferee taxpayer.

(iii) *Timing of transfer election statement.* A transfer election statement can be completed at any time after the eligible taxpayer and transferee taxpayer have sufficient information to meet the requirements of paragraph (b)(5)(ii) of this section, but the transfer election statement cannot be completed for any year after the earlier of:

(A) The filing of the eligible taxpayer's return for the taxable year for which the specified credit portion is determined with respect to the eligible taxpayer; or

(B) The filing of the return of the transferee taxpayer for the year in which the specified credit portion is taken into account.

(iv) *Required minimum documentation.* The eligible taxpayer must provide to a transferee taxpayer the following minimum documentation—

(A) Information that validates the existence of the eligible credit property, which could include evidence prepared by a third party (such as a county board or other governmental entity, a utility, or an insurance provider);

(B) If applicable, documentation substantiating that the eligible taxpayer has satisfied the requirements to include any bonus credit amounts (as defined in § 1.6418–1(c)(3)) in the eligible credit that was part of the transferred specified credit portion; and

(C) Evidence of the eligible taxpayer's qualifying costs in the case of a transfer of an eligible credit that is part of the investment credit or the amount of qualifying production activities and sales amounts, as relevant, in the case of a transfer of an eligible credit that is a production credit.

(v) *Transferee recordkeeping requirement.* Consistent with § 1.6001–1(e), the transferee taxpayer must retain the required minimum documentation provided by the eligible taxpayer as long as the contents thereof may become material in the administration of any internal revenue law.

(c) *Limitations after a transfer election is made*—(1) *Irrevocable.* A transfer election with respect to a specified credit portion is irrevocable.

(2) *No additional transfers.* A specified credit portion may only be transferred pursuant to a transfer election once. A transferee taxpayer cannot make a transfer election of any specified credit portion transferred to the transferee taxpayer.

(d) *Determining the eligible credit*—(1) *In general.* An eligible taxpayer may only transfer eligible credits determined with respect to the eligible taxpayer (paragraph (a)(4) of this section disallows transfer elections in other situations). An eligible credit is determined with respect to an eligible taxpayer if the eligible taxpayer owns the underlying eligible credit property and conducts the activities giving rise to the credit or, in the case of section 45X (under which ownership of eligible credit property is not required), is considered (under the regulations under section 45X) the taxpayer with respect to which the section 45X credit is determined. All rules that relate to the determination of the eligible credit, such as the rules in sections 49 and 50(b) of the Code, apply to the eligible taxpayer and therefore can limit the amount of eligible credit determined with respect to an eligible credit property that can be transferred. Rules relating to the amount of an eligible credit that is allowed to be claimed by an eligible taxpayer, such as the rules in sections 38(c) or 469 of the Code, do not limit the eligible credit determined, but do apply to a transferee taxpayer as described in paragraph (f)(3) of this section.

(2) *Application of section 49 at-risk rules to determination of eligible credits for partnerships and S corporations.* Any amount of eligible credit determined with respect to investment credit property held directly by a transferor partnership or transferor S corporation that is eligible credit property (eligible investment credit property) must be determined by the partnership or S corporation taking into account the section 49 at-risk rules at the partner or shareholder level as of the close of the taxable year in which the eligible investment credit property is placed in service. Thus, if the credit base of an eligible investment credit property is limited to a partner or an S corporation shareholder by section 49, then the amount of the eligible credit determined by the transferor partnership or transferor S corporation is also limited. A transferor partnership or transferor S corporation that transfers any specified credit portion with respect to an eligible investment credit property must request from each of its partners or shareholders, respectively, that is subject to section 49, the amount of such partner's or shareholder's nonqualified nonrecourse financing with respect to the eligible investment credit property as of the close of the taxable year in which the property is placed in service. Additionally, the transferor partnership or transferor S corporation must attach to its tax return for the taxable year in which the eligible investment credit property is placed in service, the amount of each partner's or shareholder's section 49 limitation with

respect to any specified credit portion transferred with respect to the eligible investment credit property. Changes to at-risk amounts under section 49 for partners or S corporation shareholders after the close of the taxable year in which the eligible investment credit property is placed in service do not impact the eligible credit determined by the transferor partnership or transferor S corporation, but do impact the partner(s) or S corporation shareholder(s) as described in § 1.6418–3(a)(6)(ii).

(e) *Treatment of payments made in connection with a transfer election*—(1) *In general.* An amount paid by a transferee taxpayer to an eligible taxpayer is in connection with a transfer election with respect to a specified credit portion only if it is paid in cash (as defined in § 1.6418–1(f)), directly relates to the specified credit portion, and is not described in § 1.6418–5(a)(3) (describing payments related to an excessive credit transfer).

(2) *Not includible in gross income.* Any amount paid to an eligible taxpayer that is described in paragraph (e)(1) of this section is not includible in the gross income of the eligible taxpayer.

(3) *Not deductible.* No deduction is allowed under any provision of the Code with respect to any amount paid by a transferee taxpayer that is described in paragraph (e)(1) of this section.

(4) *Anti-abuse rule*—(i) *In general.* A transfer election of any specified credit portion, and therefore the transfer of that specified credit portion to a transferee taxpayer, may be disallowed, or the Federal income tax consequences of any transaction(s) effecting such a transfer may be recharacterized, when the parties to the transaction have engaged in the transaction or a series of transactions with a principal purpose of avoiding any Federal tax liability beyond the intent of section 6418. For example, an amount of cash paid by a transferee taxpayer will not be considered as paid in connection with the transfer of a specified credit portion under paragraph (e)(1) of this section if a principal purpose of a transaction or series of transactions is to allow an eligible taxpayer to avoid gross income. Conversely, an amount of cash paid by a transferee taxpayer will be considered paid in connection with the transfer of a specified credit portion under paragraph (e)(1) of this section if a principal purpose of a transaction or series of transactions is to increase a Federal income tax deduction of a transferee taxpayer.

(ii) *Example 1.* Taxpayer A, an eligible taxpayer, generates $100 of an eligible credit with respect to an eligible credit property in the course of its trade or business. Taxpayer A also provides services to customers. Taxpayer A offers Customer B, a transferee taxpayer that cannot deduct the cost of the services, the opportunity to be transferred $100 of eligible credit for $100 while receiving Taxpayer A's services for free. Taxpayer A normally charges $20 for the same services without the purchase of the eligible credit, and an arm's length price of the eligible credit without regard to other commercial relationships is $80 paid in cash for $100 of the eligible credit. Taxpayer A is engaged in a transaction in which it is undercharging for services to Customer B to avoid recognizing $20 of gross income. This transaction is subject to recharacterization under the anti-abuse rule in paragraph (e)(4) of this section, and Taxpayer A will be treated as transferring $100 of the eligible credit for $80, and have $20 of gross income from the services provided to Customer B.

(iii) *Example 2.* Taxpayer C, an eligible taxpayer, generates $100 of an eligible credit with respect to an eligible credit property in the course of its trade or business. Taxpayer C also sells property to customers. Taxpayer C offers Customer D, a transferee taxpayer that can deduct the purchase of property, the opportunity to receive the $100 of eligible credit for $20 while purchasing Taxpayer C's property for $80. Taxpayer C normally charges $20 for the same property without the transfer of the eligible credit, and an arm's length price of the eligible credit without regard to other commercial relationships is $80 paid in cash for $100 of the eligible credit. Taxpayer C is willing to accept the higher price for the property because Taxpayer C has a net operating loss carryover to offset any taxable income from the transaction. This transaction is subject to recharacterization under the anti-abuse rule under paragraph (e)(4) of this section, and Taxpayer C will be treated as selling the property for $20 and transferring $100 of the eligible credit for $80, and Customer D will have a $20 deduction related to the purchase of the property instead of $80.

(f) *Transferee taxpayer's treatment of eligible credit*—(1) *Taxable year in which credit taken into account*—(i) *In general.* In the case of any specified credit portion transferred to a transferee taxpayer pursuant to a transfer election under this section, the transferee taxpayer takes the specified credit portion into account in the transferee taxpayer's first taxable year ending with or ending after the taxable year of the eligible taxpayer with respect to which the eligible credit was determined. Thus, to the extent the taxable years of an eligible taxpayer and a transferee taxpayer end on the same date, the transferee taxpayer will take the specified credit portion into account in that taxable year. To the extent the taxable years of an eligible taxpayer and a transferee taxpayer end on different dates, the transferee taxpayer will take the specified credit portion into account in the transferee taxpayer's first taxable year that ends after the taxable year of the eligible taxpayer.

(ii) *Rule for 52–53-week taxable years.* For purposes of determining the taxable year in which a credit is taken into account under section 6418(d) and paragraph (f)(1)(i) of this section, a 52–53-week taxable year of an eligible taxpayer and transferee taxpayer is deemed to end on or close on the last day of the calendar month nearest to the last day of the 52–53-week taxable year, as the case may be.

(2) *No gross income for a transferee taxpayer upon claiming a transferred specified credit portion.* A transferee taxpayer does not have gross income upon claiming a transferred specified credit portion even if the amount of cash paid to the eligible taxpayer was less than the amount of the transferred specified credit portion, assuming all other requirements of section 6418 are met. For example, a transferee taxpayer who paid $9X for $10X of a specified credit portion that the transferee taxpayer then claims on its return does not result in the $1X difference being included in the gross income of the transferee taxpayer.

(3) *Transferee treated as the eligible taxpayer*—(i) *In general.* A transferee taxpayer (and not the eligible taxpayer) is treated as the taxpayer for purposes of the Code with respect to the transferred specified credit portion. An eligible taxpayer must apply the rules necessary to determine the amount of an eligible credit prior to making the transfer election for a specified credit portion, and therefore a transferee taxpayer does not re-apply rules that relate to a determination of an eligible credit, such as the rules in sections 49 or 50(b). However, a transferee taxpayer must apply rules that relate to computing the amount of the specified credit portion that is allowed to be claimed in the taxable year by the transferee taxpayer, such as the rules in section 38 or 469, as applicable.

(ii) *Application of section 469.* A specified credit portion transferred to a transferee taxpayer is treated as determined in connection with the conduct of a trade or business and, if applicable, such transferred specified

credit portion is subject to the rules in section 469. In applying section 469, unless a transferee taxpayer owns an interest in the eligible taxpayer's trade or business at the time the work was done, the fact that the specified credit portion is treated as determined in connection with the conduct of a trade or business does not cause the transferee taxpayer to be considered to own an interest in the eligible taxpayer's trade or business at the time the work was done and does not change the characterization of the transferee taxpayer's participation (or lack thereof) in the eligible taxpayer's trade or business by using any of the grouping rules under § 1.469–4(c).

(4) *Transferee taxpayer requirements to take into account a transferred specified credit portion.* In order for a transferee taxpayer to take into account in a taxable year (as described in paragraph (f)(1) of this section) a specified credit portion that was transferred by an eligible taxpayer, as part of filing a return (or short year return), an amended return, or a request for an administrative adjustment under section 6227 of the Code, the transferee taxpayer must include the following—

(i) A properly completed Form 3800, *General Business Credit* (or its successor), to take into account the transferred specified credit portion as a current general business credit, and including all registration number(s) related to the transferred specified credit portion;

(ii) The transfer election statement described in paragraph (b)(5) of this section attached to the return; and

(iii) Any other information related to the transfer election specified in guidance.

(g) *Applicability date.* This section applies to taxable years ending on or after April 30, 2024. For taxable years ending before April 30, 2024, taxpayers, however, may choose to apply the rules of this section and §§ 1.6418–1, –3, and –5, provided the taxpayers apply the rules in their entirety and in a consistent manner.

§ 1.6418–3 Additional rules for partnerships and S corporations.

(a) *Rules applicable to both partnerships and S corporations*—(1) *Partnerships and S corporations as eligible taxpayers and transferee taxpayers.* Under section 6418, a partnership or an S corporation may qualify as a transferor partnership or a transferor S corporation and may elect to make a transfer election to transfer a specified credit portion to a transferee taxpayer. A partnership or an S corporation may also qualify as a transferee partnership or a transferee S corporation. This section provides rules applicable to transferor partnerships and transferor S corporations and transferee partnerships and transferee S corporations. Paragraph (b) of this section provides rules applicable solely to partnerships. Paragraph (c) of this section provides rules applicable solely to S corporations. Paragraph (d) of this section provides guidelines for the manner and due date for which a partnership or an S corporation makes an election under section 6418(a). Paragraph (e) of this section contains examples illustrating the operation of the provisions of this section. Except as provided in this section, the general rules under section 6418 and the section 6418 regulations apply to partnerships and S corporations.

(2) *Treatment of cash received for a specified credit portion.* In the case of any specified credit portion determined with respect to any eligible credit property held directly by a partnership or an S corporation, if such partnership or S corporation makes a transfer election with respect to such specified credit portion—

(i) Any amount of cash payment received as consideration for the transferred specified credit portion will be treated as tax exempt income for purposes of sections 705 and 1366 of the Code; and

(ii) A partner's distributive share of such tax exempt income will be as described in paragraphs (b)(1) and (2) of this section.

(3) *No partner or shareholder level transfers.* In the case of an eligible credit property held directly by a partnership or an S corporation, no transfer election by any partner or S corporation shareholder is allowed under § 1.6418–2 or this section with respect to any specified credit portion determined with respect to such eligible credit property.

(4) *Disregarded entity ownership.* In the case of an eligible credit property held directly by an entity disregarded as separate from a partnership or an S corporation for Federal income tax purposes, such eligible credit property will be treated as held directly by the partnership or S corporation for purposes of making a transfer election.

(5) *Treatment of tax exempt income.* Tax exempt income resulting from the receipt of consideration for the transfer of a specified credit portion by a transferor partnership or transferor S corporation is treated as arising from an investment activity and not from the conduct of a trade or business within the meaning of section 469(c)(1)(A). As such, any tax exempt income is not treated as passive income to any direct or indirect partners or shareholders who do not materially participate within the meaning of section 469(c)(1)(B).

(6) *Certain recapture events not requiring notice*—(i) *Indirect dispositions under section 50*—(A) *Treatment of transferor partnership or transferor S corporation and transferee taxpayer.* For purposes of section 6418(g)(3)(B) only, the disposition of a partner's interest under § 1.47–6(a)(2) or an S corporation shareholder's interest under § 1.47–4(a)(2) in an eligible taxpayer that is treated as a transferor partnership or transferor S corporation is disregarded. As such, provided the investment credit property that is eligible credit property owned by the transferor partnership or transferor S corporation is not disposed of, and continues to be investment credit property with respect to such transferor partnership or transferor S corporation, a transferor partnership or transferor S corporation is not required to provide notice to a transferee taxpayer of an interest disposition by the partner or shareholder because the disposition does not result in recapture under section 6418(g)(3)(B) to which the transferee taxpayer is liable, and thus, the transferee taxpayer does not have to calculate a recapture amount.

(B) *Treatment of partner or shareholder.* A partner or an S corporation shareholder that has disposed of an interest in a transferor partnership or transferor S corporation is subject to the rules relating to such disposition under § 1.47–6(a)(2) or § 1.47–4(a)(2), respectively. Any recapture to a disposing partner is calculated based on the partner's share of the basis (or cost) of the section 38 property to which the specified credit portion was determined in accordance with § 1.46–3(f). Any recapture to a disposing shareholder is calculated based on the shareholder's pro rata share of the basis (or cost) of the section 38 property to which the specified credit portion was determined in accordance with § 1.48–5.

(ii) *Changes in at-risk amounts under section 49*—(A) *Treatment of transferor partnership or transferor S corporation and transferee taxpayer.* For purposes of section 6418 only, a change in the nonqualified nonrecourse financing (as defined in section 49(a)(1)(D)) amount of any partner or shareholder of a transferor partnership or transferor S corporation, respectively, after the close of the taxable year in which the investment credit property is placed in service and the specified credit portion is determined, is disregarded. A transferor partnership or transferor S

corporation is not required to provide notice to a transferee taxpayer of the change because the change does not cause recapture under section 6418(g)(3)(B) to which the transferee taxpayer is liable, and thus, the transferee taxpayer does not have to calculate a recapture amount.

(B) *Treatment of partner or shareholder.* A partner or shareholder in a transferor partnership or transferor S corporation, respectively, must apply the rules under section 49 at the partner or shareholder level if there is a change in nonqualified nonrecourse financing with respect to the partner or shareholder after the close of the taxable year in which the investment credit property is placed in service and the specified credit portion is determined. If there is an increase in nonqualified nonrecourse financing to a partner, any adjustment under the rules of section 49(b) is calculated based on the partner's share of the basis (or cost) of the section 38 property to which the specified credit portion was determined in accordance with § 1.46–3(f). If there is an increase in nonqualified nonrecourse financing to a shareholder, any adjustment under the rules of section 49(b) is calculated based on the shareholder's pro rata share of the basis (or cost) of the section 38 property to which the specified credit portion was determined in accordance with § 1.48–5. If there is a decrease in nonqualified nonrecourse financing, any increase in the credit base is taken into account by the partner or shareholder as provided under section 49, and any resulting credit is not eligible for transfer under section 6418.

(b) *Rules applicable to partnerships*—(1) *Allocations of tax exempt income amounts generally.* A transferor partnership must generally determine a partner's distributive share of any tax exempt income resulting from the receipt of consideration for the transfer based on such partner's proportionate distributive share of the eligible credit that would otherwise have been allocated to such partner absent the transfer of the specified credit portion (otherwise eligible credit). A partner's distributive share of an otherwise eligible credit is determined under §§ 1.46–3(f) and 1.704–1(b)(4)(ii). Tax exempt income resulting from the receipt of consideration for the transfer of a specified credit portion by a transferor partnership is treated as received or accrued, including for purposes of section 705 of the Code, as of the date the specified credit portion is determined with respect to the transferor partnership (such as, for investment credit property, the date the property is placed in service).

(2) *Special rule for allocations of tax exempt income amounts and eligible credits for an election to transfer less than all eligible credits determined with respect to an eligible credit property.* In the event a transferor partnership elects to transfer one or more specified credit portions of less than all eligible credits determined with respect to an eligible credit property held directly by the partnership, the partnership may allocate any tax exempt income resulting from the receipt of consideration for the specified credit portion(s) in accordance with the rules in this paragraph (b)(2).

(i) First, the partnership must determine each partner's distributive share of the otherwise eligible credits with respect to such eligible credit property in accordance with paragraph (b)(1) of this section (partner's eligible credit amount).

(ii) Thereafter, the transferor partnership may determine, in any manner described in the partnership agreement, or as the partners may agree, the portion of each partner's eligible credit amount to be transferred, and the portion of each partner's eligible credit amount to be retained and allocated to such partner. The partnership may allocate to each partner its agreed upon share of eligible credits, tax exempt income resulting from the receipt of consideration for the specified credit portion(s), or both, as the case may be, provided that—

(A) The amount of eligible credits allocated to each partner cannot exceed such partner's eligible credit amount; and

(B) Each partner is allocated its proportionate share of tax exempt income resulting from the transfer(s).

(iii) Each partner's proportionate share of tax exempt income resulting from the transfer(s) is equal to the total amount of tax exempt income resulting from the transfer(s) of the specified credit portion(s) by the partnership multiplied by a fraction—

(A) The numerator of which is such partner's eligible credit amount minus the amount of eligible credits actually allocated to such partner with respect to the eligible credit property for the taxable year; and

(B) The denominator of which is the specified credit portion(s) transferred by the partnership with respect to the eligible credit property for the taxable year.

(3) *Transferor partnerships in tiered structures.* If a partnership (upper-tier partnership) is a direct or indirect partner of a transferor partnership and directly or indirectly receives—

(i) An allocation of an eligible credit, the upper-tier partnership is not an eligible taxpayer under section 6418 with respect to any eligible credit allocated by a transferor partnership; or

(ii) An allocation of tax exempt income resulting from the receipt of consideration for the transfer of a specified credit portion by a transferor partnership, the upper-tier partnership must determine its partners' distributive shares of such tax exempt income in proportion to the partners' distributive shares of the otherwise eligible credit as provided in paragraph (b)(1) of this section.

(4) *Partnership as a transferee taxpayer*—(i) *Eligibility under section 6418.* A partnership may qualify as a transferee partnership to the extent it is not related (within the meaning of section 267(b) or 707(b)(1)) to an eligible taxpayer. A transferee partnership is subject to the no additional transfer rule in § 1.6418–2(c)(2), however, an allocation of a transferred specified credit portion to a direct or indirect partner of a transferee partnership under section 704(b) is not a transfer for purposes of section 6418.

(ii) *Treatment of a cash payment for a transferred specified credit portion.* A cash payment by a transferee partnership as consideration for a transferred specified credit portion is treated as an expenditure described in section 705(a)(2)(B).

(iii) *Allocations of transferred specified credit portions.* A transferee partnership must determine each partner's distributive share of any transferred specified credit portion based on such partner's distributive share of the nondeductible expenses for the taxable year used to fund the purchase of such transferred specified credit portion. Each partner's distributive share of the nondeductible expenses used to fund the purchase of any transferred specified credit portion is determined by the partnership agreement, or, if the partnership agreement does not provide for the allocation of nondeductible expenses paid pursuant to section 6418, then the allocation of the specified credit portion is based on the transferee partnership's general allocation of nondeductible expenses.

(iv) *Transferred specified credit portion treated as an extraordinary item.* A transferred specified credit portion is treated as an extraordinary item and must be allocated among the partners of a transferee partnership as of the time the transfer of the specified credit portion to the transferee

partnership is treated as occurring in accordance with this paragraph (b)(4)(iv) and § 1.706–4(e)(1) and (e)(2)(ix). If the transferee partnership and eligible taxpayer have the same taxable years, the transfer of a specified credit portion to a transferee partnership is treated as occurring on the first date that the transferee partnership makes a cash payment to the eligible taxpayer as consideration for the specified credit portion. If the transferee partnership and eligible taxpayer have different taxable years, the transfer of a specified credit portion to a transferee partnership is treated as occurring on the later of—

(A) The first date of the taxable year that the transferee partnership takes the specified credit portion into account under section 6418(d); or

(B) The first date that the transferee partnership makes a cash payment to the eligible taxpayer for the specified credit portion.

(v) *Transferee partnerships in tiered structures.* If an upper-tier partnership is a direct or indirect partner of a transferee partnership and directly or indirectly receives an allocation of a transferred specified credit portion, the upper-tier partnership is not an eligible taxpayer under section 6418 with respect to the transferred specified credit portion. The upper-tier partnership's distributive share of the transferred specified credit portion is treated as an extraordinary item to the upper-tier partnership and must be allocated among the partners of the upper-tier partnership as of the time the transfer of the specified credit portion to the transferee partnership is treated as occurring in accordance with paragraph (b)(4)(iv) of this section and § 1.706–4(e)(1) and (e)(2)(ix), regardless of whether the transferee partnership and upper-tier partnership have different taxable years under section 706(b). The upper-tier partnership must report the credits to its partners in accordance with guidance.

(c) *Rules applicable to S corporations*—(1) *Pro rata shares of tax exempt income amounts.* Each shareholder of a transferor S corporation must take into account such shareholder's pro rata share (as determined under section 1377(a) of the Code) of any tax exempt income resulting from the receipt of consideration for the transfer. Tax exempt income resulting from the receipt of consideration for the transfer of a specified credit portion by a transferor S corporation is treated as received or accrued, including for purposes of section 1366, as of the date the specified credit portion is determined with respect to the transferor S corporation (such as, for investment credit property, the date the property is placed in service).

(2) *S corporation as a transferee taxpayer*—(i) *Eligibility under section 6418.* An S corporation may qualify as a transferee taxpayer to the extent it is not related (within the meaning of section 267(b) or 707(b)(1)) to an eligible taxpayer (transferee S corporation). A transferee S corporation is subject to the no additional transfer rule in § 1.6418–2(c)(2), however, an allocation of a transferred specified credit portion to a direct or indirect shareholder of a transferee S corporation is not a transfer for purposes of section 6418.

(ii) *Treatment of a cash payment for a transferred specified credit portion.* A cash payment by a transferee S corporation as consideration for a transferred specified credit portion is treated as an expenditure described in section 1367(a)(2)(D) of the Code.

(iii) *Pro rata shares of transferred specified credit portions.* Each shareholder of a transferee S corporation must take into account such shareholder's pro rata share (as determined under section 1377(a)) of any transferred specified credit portion. If the transferee S corporation and eligible taxpayer have the same taxable years, the transfer of a specified credit portion is treated as occurring to a transferee S corporation during the transferee S corporation's permitted year (as defined under sections 444 and 1378(b)) that the transferee S corporation first makes a cash payment as consideration to the eligible taxpayer for the specified credit portion. If the transferee S corporation and eligible taxpayer have different taxable years, then the transfer of a specified credit portion is treated as occurring to a transferee S corporation during the transferee S corporation's first permitted year (as defined under sections 444 and 1378(b)) ending with or after, the taxable year of the eligible taxpayer to which the transferred specified credit portion was determined.

(d) *Transfer election by a partnership or an S corporation*—(1) *In general.* A partnership or an S corporation may make a transfer election to transfer a specified credit portion under section 6418 if it files an election in accordance with the rules set forth in this paragraph (d). A transfer election is made on the basis of an eligible credit property and only applies to the specified credit portion identified in the transfer election by such partnership or S corporation in the taxable year for which the election is made.

(2) *Manner and due date of making a transfer election.* A transfer election for a specified credit portion must be made in the manner provided in § 1.6418–2(b)(1) through (3). All documents required in § 1.6418–2(b)(1) through (3) must be attached to the partnership or S corporation return for the taxable year during which the transferred specific credit portion was determined. For the transfer election to be valid, the return must be filed not later than the time prescribed by §§ 1.6031(a)–1(e) and 1.6037–1(b) (including extensions of time) for filing the return for such taxable year. No transfer election may be made for the first time on an amended return, withdrawn on an amended return, or made or withdrawn by filing an administrative adjustment request under section 6227 of the Code. A numerical error with respect to a properly claimed transfer election may be corrected on an amended return or by filing an administrative adjustment request under section 6227 if necessary; however, the partnership or S corporation's original return, which must be signed under penalties of perjury, must contain all of the information, including a registration number, required by these final regulations. In order to correct an error on an amended return or administrative adjustment request under section 6227, a partnership or an S corporation must have made an error in the information included on the original return such that there is a substantive item to correct; a partnership or an S corporation cannot correct a blank item or an item that is described as being ''available upon request.'' There is no late-election relief available under §§ 301.9100–1 or 301.9100–3 of this chapter for a transfer election that is not timely filed; however, relief under § 301.9100–2(b) may apply if the partnership or S corporation has not received an extension of time to file a return after the original due date, has timely filed a return, takes corrective action under § 301.9100–2(c) within the six-month extension period, and meets the procedural requirements outlined in § 301.9100–2(d).

(3) *Irrevocable election.* A transfer election by a partnership or an S corporation is irrevocable.

(e) *Examples.* The examples in this paragraph (e) illustrate the application of paragraphs (a)(6), (b), and (c) of this section.

(1) *Example 1. Transfer of all eligible credits by a transferor partnership*—(i) *Facts.* A and B each contributed $150X of cash to AB partnership for the purpose of investing in energy property. The partnership agreement provides that A and B share equally in all items of income, gain, loss, deduction, and

credit of AB partnership. AB partnership invests $300X in an energy property in accordance with section 48 and places the energy property in service on date X in year 1. As of the end of year 1, AB partnership has $90X of eligible credits under section 48 with respect to the energy property. Before AB partnership files its tax return for year 1, AB partnership transfers the $90X of eligible credits to an unrelated transferee taxpayer, Transferee Taxpayer X for $80X and executes a transfer election statement with Transferee Taxpayer X.

(ii) *Analysis.* Under § 1.6418–3(b)(1), AB partnership allocates the tax exempt income resulting from the transfer of the specified credit portion proportionately among the partners based on each partner's distributive share of the otherwise eligible section 48 credit as determined under §§ 1.46–3(f) and 1.704–1(b)(4)(ii). Under § 1.46–3(f)(2), each partner's share of the basis of the energy property is determined in accordance with the ratio in which the partners divide the general profits (or taxable income) of the partnership. Under the AB partnership agreement, A and B share partnership profits equally. Thus, each partner's share of the basis of the energy property under § 1.46–3(f) and distributive share of the otherwise eligible credits under § 1.704–1(b)(4)(ii) is 50 percent. The transfer made pursuant to section 6418(a) causes AB partnership's eligible credits under section 48 with respect to the energy property to be reduced to zero, and the consideration of $80X received by AB partnership for the transferred specified credit portion is treated as tax exempt income. Because the tax exempt income is allocated in the same proportion as the otherwise eligible credit would have been allocated, A and B will each be allocated $40X of tax exempt income. Each of partner A's and partner B's basis in its partnership interest and capital account will be increased by $40X. Also in year 1, the basis in the energy property held by AB partnership and with respect to which the credit is calculated is reduced under section 50(c)(3) by 50 percent of the amount of the credit so determined, or $45X. A's and B's basis in their partnership interests and capital accounts will be appropriately adjusted to take into account adjustments made to the energy property under section 50(c)(5) and § 1.704–1(b)(2)(iv)(*j*). The tax exempt income received or accrued by AB partnership as a result of the transferred specified credit portion is treated as received or accrued, including for purposes of section 705, as of date X in year 1, which is the date the transferred specified credit portion was determined with respect to AB partnership.

(2) *Example 2. Recapture to a transferor partnership*—(i) *Facts.* Assume the same facts as in paragraph (e)(1)(i) of this section (*Example 1*), except in year 3, within the recapture period related to the energy property, A reduces its proportionate interest in the general profits of the partnership by 50 percent causing a recapture event to A under § 1.47–6(a)(2). The energy property is not disposed of by AB partnership and continues to be energy property with respect to AB partnership.

(ii) *Analysis.* AB partnership should not provide notice of recapture to Transferee Taxpayer X as a result of the recapture event under § 1.47–6(a)(2) with respect to A. Transferee Taxpayer X is not liable for any recapture amount. A, however, is subject to recapture as provided in § 1.47–6(a)(2) and based on its share of the basis (or cost) of the energy property to which the eligible credits were determined under § 1.46–3(f)(2).

(3) *Example 3. Transfer of a portion of eligible credits by a transferor partnership*—(i) *Facts.* C and D each contributed cash to CD partnership for the purpose of investing in a qualified wind facility. The partnership agreement provides that until a flip point, C is allocated 99 percent of all items of income, gain, loss, deduction and credit of CD partnership and D is allocated the remaining 1 percent of such items. After the flip point, C is allocated 5 percent of all items of income, gain, loss, deduction and credit of CD Partnership and D is allocated 95 percent of such items. CD partnership invests in a qualified wind facility and places the facility in service in year 1. CD partnership generates $100X of credit under section 45(a) for year 1. Before the due date for CD partnership's year 1 tax return (with extension), C and D agree that D's share of the eligible credit will be transferred, and C will be allocated its share of eligible credit. CD partnership transfers $1X of the eligible credit to an unrelated transferee taxpayer for $1X. The flip point has not been reached by the end of year 1.

(ii) *Analysis.* Under paragraph (b)(2) of this section, CD partnership must first determine each partner's eligible credit amount, which is equal to such partner's distributive share of the otherwise eligible section 45(a) credit as determined under § 1.704–1(b)(4)(ii). Under § 1.704–1(b)(4)(ii), for an eligible credit that is not an investment tax credit, allocations of credit are deemed to be in accordance with the partner's interest in the partnership if the credit is allocated in the same proportion as the partners' distributive share of the receipts that give rise to the credit. The CD partnership agreement provides that until the flip point, C is allocated 99 percent of all items of income, gain, loss, deduction and credit of CD partnership and D is allocated the remaining 1 percent of such items. Assuming all requirements of the safe harbor provided for in Revenue Procedure 2007–65, 2007–2 CB 967 are met, CD partnership's allocations of the otherwise eligible credits would be respected as in accordance with section 704(b). Thus, partner C's and partner D's distributive share of the otherwise eligible credit is 99 percent and 1 percent, respectively. C and D have agreed to sell D's eligible credit amount of $1X for full value and to allocate to C its eligible credit amount of $99X. The transfer made pursuant to section 6418(a) causes CD partnership's eligible credits under section 45(a) with respect to the wind facility to be reduced to $99X, and the consideration of $1X received by CD partnership is treated as tax exempt income. D is allocated $1X of tax exempt income from the transfer of the eligible credits, and C is allocated $99X of eligible credits under section 45(a) with respect to the wind facility. Neither C nor D is allocated more eligible credits than its eligible credit amount. Additionally, D is allocated an amount of tax exempt income equal to $\$1X \times (1 - 0)/1$ and C is allocated none of the tax exempt income. The allocations of eligible credits and tax exempt income are permissible allocations under paragraph (b)(2) of this section.

(4) *Example 4. Upper-tier partnership of a transferor partnership*—(i) *Facts.* E, F, and G each contributed $100X of cash to EFG partnership for the purpose of investing in an energy property. E, F, and G are partnerships for Federal income tax purposes. The partnership agreement provides that E, F and G share equally in all items of income, gain, loss, and deduction of EFG partnership. EFG partnership invests $300X in an energy property in accordance with section 48 and places the energy property in service in year 1. As of the end of year 1, EFG partnership has $90X of eligible credits under section 48 with respect to the energy property. Before the due date for EFG partnership's year 1 tax return (with extension), E, F and G agree that E's share of the eligible credits will be transferred, and F and G will each be allocated their shares of eligible credits (or basis). EFG partnership transfers $30X of the eligible credits to an

unrelated transferee taxpayer for $25X. Assuming the allocations to E, F and G of the eligible credits and tax exempt income resulting from the receipt of cash for the transferred specified credit portion are permissible allocations under paragraph (b)(2) of this section, E is allocated $25X of tax exempt income from the transfer of the eligible credits and F and G are each allocated $30X of eligible credits with respect to the energy property.

(ii) *Analysis.* E must allocate the $25X of tax exempt income to its partners as if it had retained its share of the eligible credits. Under § 1.46–3(f)(2), each partner's share of the basis of the section 48 energy property is determined in accordance with the ratio in which the partners divide the general profits (or taxable income) of the partnership. The E partnership agreement provides for equal allocations of income, gain, deduction, and loss to its partners, and thus, E partnership must allocate the otherwise eligible credits in the same manner. Therefore, E partnership must allocate the $25X of tax exempt income equally among its partners. In accordance with paragraph (b)(3)(i) of this section, F and G do not qualify as an eligible taxpayer for purposes of section 6418 and thus, are not permitted to make a transfer election for any portion of the $30X of eligible credit allocated to them by EFG partnership. Under § 1.46–3(f)(2), each partner's share of the basis of the section 48 energy property is determined in accordance with the ratio in which the partners divide the general profits (or taxable income) of the partnership. The F and G partnership agreements provide for equal allocations of income, gain, deduction, and loss to its partners, and F and G must allocate the basis from the energy property to their partners in the same manner.

(5) *Example 5. Transferee partnership*—(i) *Facts.* Y and Z each contributed $50X of cash to YZ partnership for the purpose of purchasing eligible section 45 credits under section 6418. The partnership agreement provides that all items of income, gain, loss, deduction, and credit are shared equally among Y and Z. The partnership agreement also provides that any nondeductible expenses used to fund the purchase of any transferred specified credit portion will be shared equally among Y and Z. On date X in year 1, YZ partnership qualifies as a transferee taxpayer and makes a cash payment of $80X to an eligible taxpayer for $100X of a transferred specified credit portion. The eligible credits will be determined with respect to the eligible taxpayer as of the end of year 1. Both YZ partnership and the eligible taxpayer are calendar year taxpayers.

(ii) *Analysis.* The cash payment of $80X made by YZ partnership for the transferred specified credit portion is treated as a nondeductible expenditure under section 705(a)(2)(B). Under paragraph (b)(4)(iii) of this section, YZ partnership must determine each partner's distributive share of the transferred specified credit portion based on such partner's distributive share of the nondeductible expenses for the taxable year used to fund the purchase of such transferred specified credit portion. The YZ partnership agreement provides that nondeductible expenses used to fund the purchase of any transferred specified credit portion will be shared equally among Y and Z and thus, the transferred specified credit portion is also shared equally among Y and Z. The transferred specified credit portion is treated as an extraordinary item under § 1.706–4(e)(2)(ix) that is deemed to occur on date X in year 1. As of date X in year 1, each of Y and Z are allocated $40X of a section 705(a)(2)(B) expenditure with respect to the cash payment for the transferred specified credit portion and $50X of transferred section 45 credits.

(6) *Example 6. Upper-tier partnership of a transferee partnership*—(i) *Facts.* Assume the same facts as in paragraph (e)(5)(i) of this section (*Example 5*), except Y is a partnership for Federal tax purposes, and Z is a U.S. C corporation for Federal tax purposes (as defined in section 1361(a)(2) of the Code).

(ii) *Analysis.* In accordance with paragraph (b)(4)(v) of this section, Y does not qualify as an eligible taxpayer for purposes of section 6418 for that portion of the transferred specified credit portion allocated to it by YZ partnership. Under paragraph (b)(4)(iii) of this section, Y must determine each partner's distributive share of the transferred specified credit portion based on such partner's distributive share of the nondeductible expenses for the taxable year used to fund the purchase of such transferred specified credit portion. The Y partnership agreement provides that all items of income, gain, loss, deduction, and credit are shared equally. The partnership agreement also provides that any nondeductible expenses used to fund the purchase of any specified credit portion are shared equally. Thus, the transferred specified credit portion must be shared equally among the partners of Y. Y's distributive share of the transferred specified credit portion is treated as an extraordinary item to Y and must be allocated among the partners of Y as of date X in year 1, which is when the item is deemed to occur to YZ partnership, regardless of whether Y and YZ partnership have the same taxable years under section 706(b).

(7) *Example 7. Transferor S corporation*—(i) *Facts.* V and W each contributed $150X of cash to an S corporation for the purpose of investing in energy property. The S corporation invests $300X in an energy property in accordance with section 48 and places the energy property in service on date X in year 1. As of the end of year 1, the S corporation has $90X of eligible credits under section 48 with respect to the energy property. Before the due date for the S corporation's year 1 tax return (with extension), the S corporation transfers the $90X of eligible credits to an unrelated transferee taxpayer for $80X.

(ii) *Analysis.* The transfer made pursuant to section 6418(a) causes the S corporation's eligible credits under section 48 with respect to the energy property to be reduced to zero, and the consideration of $80X received by the S corporation for the transferred specified credit portion is treated as tax exempt income. Under paragraph (c)(1) of this section, each of V and W must take into account its pro rata share (as determined under section 1377(a)) of any tax exempt income resulting from the receipt of consideration for the transfer of the eligible credit, or $40X. Under section 1367(a)(1)(A), each of the shareholder's basis in its stock will be increased by $40X. Also in year 1, the basis in the energy property with respect to which the credit is calculated is reduced under section 50(c)(3) by 50 percent of the amount of the credit so determined, or $45X. The tax exempt income received or accrued by the S corporation as a result of the transfer of the specified credit portion is treated as received or accrued, including for purposes of section 1366, as of date X in year 1, which is the date the transferred specified credit portion was determined with respect to the transferor S corporation.

(8) *Example 8. Transferee S corporation*—(i) *Facts.* J and K each contributed $50X of cash to an S corporation for the purpose of purchasing eligible section 48 credits under section 6418. At the beginning of year 2, the S corporation qualifies as a transferee taxpayer and makes a cash payment of $80X to an eligible taxpayer for $100X of a transferred specified credit portion. The transferred specified credit portion was determined with respect to the eligible taxpayer for energy property placed in service in year 1. Both the S corporation and the

eligible taxpayer are calendar year taxpayers.

(ii) *Analysis.* The cash payment of $80X made by the S corporation for the transferred specified credit portion is treated as an expenditure described in section 1367(a)(2)(D). Each of J and K must take into account its pro rata share (as determined under section 1377(a)) of the transferred specified credit portion. The transferred specified credit portion is deemed to arise for purposes of sections 1366 and 1377 during year 2 of the S corporation. For year 2, each of J and K take into account $40X of a section 1367(a)(2)(D) expenditure with respect to the cash payment for the transferred specified credit portion and $50X of transferred section 48 credits.

(f) *Applicability date.* This section applies to taxable years ending on or after April 30, 2024. For taxable years ending before April 30, 2024, taxpayers, however, may choose to apply the rules of this section and §§ 1.6418–1, –2, and –5, provided the taxpayers apply the rules in their entirety and in a consistent manner.

§ 1.6418–4 Additional information and registration.

(a) *Pre-filing registration and election.* As a condition of, and prior to, any specified credit portion being transferred by an eligible taxpayer to a transferee taxpayer pursuant to an election under § 1.6418–2, or a specified credit portion being transferred by a partnership or an S corporation pursuant to § 1.6418–3, the eligible taxpayer is required to satisfy the pre-filing registration requirements in paragraph (b) of this section. An eligible taxpayer that does not obtain a registration number under paragraph (c)(1) of this section, and report the registration number on its return pursuant to paragraph (c)(5) of this section, is ineligible to make a transfer election for a specified credit portion under § 1.6418–2 or § 1.6418–3, with respect to the eligible credit determined with respect to the specific eligible credit property for which the eligible taxpayer has failed to obtain and report a registration number. However, completion of the pre-filing registration requirements and receipt of a registration number does not, by itself, mean the eligible taxpayer is eligible to transfer any specified credit portion determined with respect to the eligible credit property.

(b) *Pre-filing registration requirements*—(1) *Manner of pre-filing registration.* Unless otherwise provided in guidance, eligible taxpayers must complete the pre-filing registration process electronically through an IRS electronic portal and in accordance with the instructions provided therein.

(2) *Pre-filing registration and election for members of a consolidated group.* A member of a consolidated group (as defined in § 1.1502–1) is required to complete pre-filing registration to transfer any eligible credit determined with respect to the member. *See* § 1.1502–77 (providing rules regarding the status of the common parent as agent for its members).

(3) *Timing of pre-filing registration.* An eligible taxpayer must satisfy the pre-filing registration requirements of this paragraph (b) and receive a registration number under paragraph (c) of this section prior to making a transfer election under § 1.6418–2 or § 1.6418–3 for a specified credit portion on the taxpayer's return for the taxable year at issue.

(4) *Each eligible credit property must have its own registration number.* An eligible taxpayer must obtain a registration number for each eligible credit property with respect to which a transfer election of a specified credit portion is made.

(5) *Information required to complete the pre-filing registration process.* Unless modified in future guidance, an eligible taxpayer is required to provide the following information to the IRS to complete the pre-filing registration process:

(i) The eligible taxpayer's general information, including its name, address, taxpayer identification number, and type of legal entity;

(ii) Any additional information required by the IRS electronic portal, such as information establishing that the entity is an eligible taxpayer;

(iii) The taxpayer's taxable year, as determined under section 441;

(iv) The type of annual tax return(s) normally filed by the eligible taxpayer, or that the eligible taxpayer does not normally file an annual tax return with the IRS;

(v) The type of eligible credit(s) for which the eligible taxpayer intends to make a transfer election;

(vi) Each eligible credit property that the eligible taxpayer intends to use to determine a specified credit portion for which the eligible taxpayer intends to make a transfer election;

(vii) For each eligible credit property listed in paragraph (b)(5)(vi) of this section, any further information required by the IRS electronic portal, such as—

(A) The type of eligible credit property;

(B) Physical location (that is, address and coordinates (longitude and latitude) of the eligible credit property);

(C) Supporting documentation relating to the construction or acquisition of the eligible credit property (such as State, Indian Tribal, or local government permits to operate the eligible credit property, certifications, evidence of ownership that ties to a land deed, lease, or other documented right to use and access any land or facility upon which the eligible credit property is constructed or housed, and U.S. Coast Guard registration numbers for offshore wind vessels);

(D) The beginning of construction date, and the placed in service date of the eligible credit property; and

(E) Any other information that the eligible taxpayer believes will help the IRS evaluate the registration request;

(viii) The name of a contact person for the eligible taxpayer. The contact person is the person whom the IRS may contact if there is an issue with the registration. The contact person must either:

(A) Possess legal authority to bind the eligible taxpayer; or

(B) Must provide a properly executed power of attorney on Form 2848, *Power of Attorney and Declaration of Representative;*

(ix) A penalties of perjury statement, effective for all information submitted as a complete application, and signed by a person with personal knowledge of the relevant facts that is authorized to bind the registrant; and

(x) Any other information the IRS deems necessary for purposes of preventing duplication, fraud, improper payments, or excessive payments under this section that is provided in guidance.

(c) *Registration number*—(1) *In general.* The IRS will review the registration information provided and will issue a separate registration number for each eligible credit property for which the eligible taxpayer provided sufficient verifiable information.

(2) *Registration number is only valid for one taxable year.* A registration number is valid with respect to an eligible taxpayer only for the taxable year in which the credit is determined for the eligible credit property for which the registration is completed, and for a transferee taxpayer's taxable year in which the eligible credit is taken into account under § 1.6418–2(f).

(3) *Renewing registration numbers.* If an election to transfer an eligible credit will be made with respect to an eligible credit property for a taxable year after a registration number under this section has been obtained, the eligible taxpayer must renew the registration for that subsequent taxable year in accordance with applicable guidance, including attesting that all the facts previously

provided are still correct or updating any facts.

(4) *Amendment of previously submitted registration information if a change occurs before the registration number is used.* As provided in instructions to the pre-filing registration portal, if specified changes occur with respect to one or more applicable credit properties for which a registration number has been previously obtained, but not yet used, an eligible taxpayer must amend the registration (or may need to submit a new registration) to reflect these new facts. For example, if the owner of a facility previously registered for a transfer election under § 1.6418–2 or § 1.6418–3 for eligible credits determined with respect to that facility and the facility undergoes a change of ownership (incident to a corporate reorganization or an asset sale) such that the new owner has a different employer identification number (EIN) than the owner who obtained the original registration, the original owner of the facility must amend the original registration to disassociate its EIN from the eligible credit property and the new owner must submit separately an original registration (or if the new owner previously registered other credit properties, must amend its original registration) to associate the new owner's EIN with the previously registered eligible credit property.

(5) *Reporting of registration number by an eligible taxpayer and a transferee taxpayer*—(i) *Eligible taxpayer reporting.* As part of making a valid transfer election under § 1.6418–2 or § 1.6418–3, an eligible taxpayer must include the registration number of the eligible credit property on the eligible taxpayer's return (as provided in § 1.6418–2(b) or § 1.6418–3(d)) for the taxable year the specified credit portion was determined. The IRS will treat a transfer election as ineffective if an eligible taxpayer fails to include the registration number of the eligible credit property on the eligible taxpayer's return.

(ii) *Transferee taxpayer reporting.* A transferee taxpayer must report the registration number received (as part of the transfer election statement as described in § 1.6418–2(b) or otherwise) from a transferor taxpayer on the Form 3800, *General Business Credit,* as part of the return for the taxable year that the transferee taxpayer takes the transferred specified credit portion into account. The specified credit portion will be disallowed to the transferee taxpayer if the transferee taxpayer does not include the registration number on the return.

(d) *Applicability date.* This section applies to taxable years ending on or after April 30, 2024.

§ 1.6418–5 Special rules.

(a) *Excessive credit transfer tax imposed*—(1) *In general.* If any specified credit portion that is transferred to a transferee taxpayer pursuant to an election in § 1.6418–2(a) or § 1.6418–3 is determined to be an excessive credit transfer (as defined in paragraph (b) of this section), the tax imposed on the transferee taxpayer by chapter 1 (regardless of whether such entity would otherwise be subject to chapter 1 tax) for the taxable year in which such determination is made will be increased by an amount equal to the sum of—

(i) The amount of such excessive credit transfer; and

(ii) An amount equal to 20 percent of such excessive credit transfer.

(2) *Taxable year of the determination.* The taxable year of the determination for purposes of paragraph (a)(1) of this section is the taxable year during which the excessive credit transfer determination is made and not the taxable year during which the eligible credit was originally determined by the eligible taxpayer, unless those are the same taxable years.

(3) *Payments related to excessive credit transfer.* Any payments made by a transferee taxpayer to an eligible taxpayer that directly relate to the excessive credit transfer (as defined in paragraph (b) of this section) are not subject to section 6418(b)(2), section 6418(b)(3), or § 1.6418–2(e). The amount of a payment that directly relates to the excessive credit transfer is equal to the total consideration paid in cash by the transferee taxpayer for the specified credit portion multiplied by the ratio of the amount of the excessive credit transferred to the transferee taxpayer to the amount of the transferred specified credit portion claimed by the transferee taxpayer.

(4) *Reasonable cause.* Paragraph (a)(1)(ii) of this section does not apply if the transferee taxpayer demonstrates to the satisfaction of the IRS that the excessive credit transfer resulted from reasonable cause. Determination of reasonable cause is made based on the relevant facts and circumstances. Generally, the most important factor is the extent of the transferee taxpayer's efforts to determine that the amount of specified credit portion transferred by the eligible taxpayer to the transferee taxpayer is not more than the amount of the eligible credit determined with respect to the eligible credit property for the taxable year in which the eligible credit was determined and has not been transferred to any other taxpayer. Circumstances that may indicate reasonable cause can include, but are not limited to, review of the eligible taxpayer's records with respect to the determination of the eligible credit (including documentation evidencing eligibility for bonus credit amounts), reasonable reliance on third party expert reports, reasonable reliance on representations from the eligible taxpayer that the total specified credit portion transferred (including portions transferred to other transferee taxpayers if an eligible taxpayer makes multiple transfer elections with respect to a single credit property) does not exceed the total eligible credit determined with respect to the eligible credit property for the taxable year, and review of audited financial statements provided to the Securities and Exchange Commission (and underlying information), if applicable.

(5) *Recapture events.* A recapture event under section 45Q(f)(4), 49(b), or 50(a) is not an excessive credit transfer.

(b) *Excessive credit transfer defined*—(1) *In general.* The term *excessive credit transfer* means, with respect to an eligible credit property for which a transfer election is made under § 1.6418–2 or § 1.6418–3 for any taxable year, an amount equal to the excess of—

(i) The amount of the transferred specified credit portion claimed by the transferee taxpayer with respect to such eligible credit property for such taxable year; over

(ii) The amount of the eligible credit that, without the application of section 6418, would be otherwise allowable under the Code with respect to such eligible credit property for such taxable year.

(2) *Multiple transferees treated as one.* All transferee taxpayers are considered as one transferee for calculating whether there was an excessive credit transfer and the amount of the excessive credit transfer. If there was an excessive credit transfer, then the amount of excessive credit transferred to a specific transferee taxpayer is equal to the total excessive credit transferred multiplied by the ratio of the transferee taxpayer's portion of the total specified credit to the total specified credit portions transferred to all transferees. The rule in this paragraph (b)(2) is applied on an eligible credit property basis, as applicable.

(3) *Examples.* The following examples illustrate the rules of this paragraph (b):

(i) *Example 1—No excessive credit transfer.* Taxpayer A claims $40x of an eligible credit and transfers $60x of an eligible credit to Transferee Taxpayer B related to a single facility that was expected to generate $100x of such

eligible credit. In a subsequent year it is determined that the facility only generated $60x of such eligible credit. There is no excessive credit transfer in this case because the amount of the eligible credit claimed by Transferee Taxpayer B of $60x is equal to the amount of the credit that would be otherwise allowable with respect to such facility for the taxable year the transfer occurred. Taxpayer A is disallowed the $40x of the eligible credit claimed.

(ii) *Example 2—Excessive credit transfer.* Same facts as in paragraph (b)(3)(i) of this section (*Example 1*) except that Taxpayer A transfers $75x of the $100x of eligible credit to Transferee Taxpayer B in exchange for a cash payment of $67.5x. Taxpayer A claims $25x of the eligible credit and Transferee Taxpayer B claims $75x of the eligible credit. In this situation, a $40x reduction in credit results in a $15x excessive credit transfer to Transferee Taxpayer B because the amount of the credit claimed by Transferee Taxpayer B ($75x) exceeds the amount of credit otherwise allowable with respect to the facility ($60x) by $15x. Therefore, Transferee Taxpayer B's tax is increased for the determination year by $18x, which is equal to the amount of the excessive credit transfer plus 20 percent of the excessive credit transfer as provided in paragraph (a) of this section and section 6418(g)(2)(A). If Transferee Taxpayer B can show reasonable cause as provided in paragraph (a)(4) of this section and section 6418(g)(2)(B), then Transferee Taxpayer B will only have a tax increase of $15x. Taxpayer A is disallowed the $25x of the eligible credit claimed. Under paragraph (a)(3) of this section, the portion of the cash payment of $67.5x made by Transferee Taxpayer B that is attributable to the excessive credit transfer is $13.5x and is equal to Transferee Taxpayer B's cash payment of $67.5x multiplied by the ratio of the excessive credit transfer ($15x) to the transferred specified credit portion claimed by Transferee Taxpayer B ($75x). Pursuant to paragraph (a)(3) of this section, the payments of $13.5x made to Taxpayer A from Transferee Taxpayer B that directly relate to the excessive credit transfer are not subject to section 6418(b)(2), 6418(b)(3), or § 1.6418–2(e).

(iii) *Example 3—Excessive credit with multiple transferees.* Same facts as in paragraph (b)(3)(i) of this section (*Example 1*) except that Taxpayer A transfers $50x of the eligible credit to Transferee Taxpayer B and $30x of the eligible credit to Transferee Taxpayer C. In exchange for transfer of the credit, Transferee Taxpayer B made a cash payment of $45x and Transferee Taxpayer C made a cash payment of $27x. Taxpayer A claims $20x of the eligible credit, Transferee Taxpayer B claims $50x of the eligible credit, and Transferee Taxpayer C claims $30x of the eligible credit. In this situation, because there are multiple transferees, all transferees are treated as one transferee for determining the excessive credit transfer amount under paragraph (b)(2) of this section. There is a total excessive credit transfer of $20x because the amount of the credit claimed by the transferees in total ($80x) exceeds the amount of credit otherwise allowable with respect to the facility ($60x) by $20x. The excessive credit transfer to Taxpayer B is equal to ($50x/$80x * $20x) = $12.5x, and the excessive credit transfer to Taxpayer C is equal to ($30x/$80x * $20x) = $7.5x. Therefore, Transferee Taxpayer B and Transferee Taxpayer C are subject to the provisions in paragraph (a) of this section. Transferee Taxpayer B's and Transferee Taxpayer C's tax is increased for the determination year by the respective excessive credit transfer amount and 20 percent of the excessive credit transfer amount ($15x for Transferee Taxpayer B and $9x for Transferee Taxpayer C) as provided in paragraph (a) of this section and section 6418(g)(2)(A). If Transferee Taxpayer B or Transferee Taxpayer C can show reasonable cause as provided in paragraph (a)(4) of this section and section 6418(g)(2)(B), then the tax increase will only be $12.5x or $7.5x, respectively. Taxpayer A is disallowed the $20x of eligible credit claimed. Under paragraph (a)(3) of this section, the portion of the cash payment of $45x made by Transferee Taxpayer B that is attributable to its portion of the excessive credit transfer is $11.25x and is equal to Transferee Taxpayer B's cash payment of $45x multiplied by the ratio of the excessive credit transfer ($12.5x) to the transferred specified credit portion claimed by Transferee Taxpayer B ($50x). Similarly, the portion of the cash payment of $27x made by Transferee Taxpayer C that is attributable to its portion of the excessive credit transfer is $6.75x and is equal to Transferee Taxpayer C's cash payment of $27x multiplied by the ratio of the excessive credit transfer ($7.5x) to the transferred specified credit portion claimed by Transferee Taxpayer B ($30x). Pursuant to paragraph (a)(3) of this section, the payments made to Taxpayer A by Transferee Taxpayer B ($11.25x) and Transferee Taxpayer C ($6.75x) that directly relate to the excessive credit transfer are not subject to section 6418(b)(2), 6418(b)(3), or § 1.6418–2(e).

(c) *Basis reduction under section 50(c).* In the case of any transfer election under § 1.6418–2 or § 1.6418–3 with respect to any specified credit portion described in § 1.6418–1(c)(2)(ix) through (xi), section 50(c) will apply to the applicable investment credit property (as defined in section 50(a)(6)(A)) as if such credit was allowed to the eligible taxpayer.

(d) *Notification and impact of recapture under section 50(a)*—(1) *In general.* In the case of any election under § 1.6418–2 or § 1.6418–3 with respect to any specified credit portion described in § 1.6418–1(c)(2)(ix) through (xi), if, during any taxable year, the applicable investment credit property (as defined in section 50(a)(6)(A)) is disposed of, or otherwise ceases to be investment credit property with respect to the eligible taxpayer, before the close of the recapture period (as described in section 50(a)(1)(A)), other than as described in § 1.6418–3(a)(6), such eligible taxpayer and the transferee taxpayer must follow the notification process in paragraph (d)(2) of this section, with recapture impacting the transferee taxpayer and eligible taxpayer as described in paragraph (d)(3) of this section. Rules similar to the rules of this paragraph (d) apply in determining the amount of and liability for any section 49(b) recapture as between an eligible taxpayer and the transferee taxpayer.

(2) *Notification requirements*—(i) *Eligible taxpayer.* The eligible taxpayer must provide notice of the occurrence of recapture to the transferee taxpayer. This notice must provide all information necessary for a transferee taxpayer to correctly compute the recapture amount (as defined under section 50(c)(2)), and the notification must occur in sufficient time to allow the transferee taxpayer to compute the recapture amount by the due date of the transferee taxpayer's return (without extensions) for the taxable year in which the recapture event occurs. The eligible taxpayer and transferee taxpayer can contract with respect to the form of the notice and any specific time periods that must be met, so long as the terms of the contractual arrangement do not conflict with the requirements of this paragraph (d)(2)(i). Any additional information that is required or other specific time periods that must be met may be prescribed by the IRS in guidance issued with respect to this notification requirement.

(ii) *Transferee taxpayer.* The transferee taxpayer must provide notice of the recapture amount (as defined in section 50(c)(2)), if any, to the eligible

taxpayer. This must occur in sufficient time to allow the eligible taxpayer to calculate any basis adjustment with respect to the investment credit property by the due date of the eligible taxpayer's return (without extensions) for the taxable year in which the recapture event occurs. The eligible taxpayer and transferee taxpayer can contract with respect to the form of the notice and any specific time periods that must be met, so long as the terms of the contractual arrangement do not conflict with the requirements of this paragraph (d)(2)(ii). Any additional information that is required or other specific time periods that must be met may be provided in guidance prescribed by the IRS issued with respect to this notification requirement.

(3) *Impact of recapture*—(i) *Section 50(a) recapture event.* Except as provided in paragraph (d)(3)(iii) of this section, the transferee taxpayer is responsible for any amount of tax increase under section 50(a) upon the occurrence of a recapture event, provided that if an eligible taxpayer retains any amount of an eligible credit determined with respect to an investment credit property directly held by the eligible taxpayer, the amount of the tax increase under section 50(a) that the eligible taxpayer is responsible for is equal to the recapture amount multiplied by a fraction, the numerator of which is the total credit amount that the eligible taxpayer retained, and the denominator of which is the total credit amount determined for the eligible credit property. The amount of the tax increase under section 50(a) that the eligible transferee is responsible for is equal to the recapture amount multiplied by a fraction, the numerator of which is the specified credit portion transferred to the transferee taxpayer, and the denominator of which is the total credit amount determined for the eligible credit property.

(ii) *Impact of section 50(a) recapture event on basis of investment credit property held by eligible taxpayer.* The eligible taxpayer must increase the basis of the investment credit property (immediately before the event resulting in such recapture) by an amount equal to the recapture amount provided to the eligible taxpayer by the transferee taxpayer under paragraph (d)(2)(ii) of this section and the recapture amount on any credit amounts retained by the eligible taxpayer in accordance with section 50.

(iii) *Impact of partner or shareholder recapture under § 1.6418–3(a)(6).* To the extent that a partner in a transferor partnership or a shareholder in a transferor S corporation recognizes an amount of tax increase under section 50(a) or section 49(b) (that is, a recapture amount) for an investment tax credit determined with respect to investment credit property held directly by the transferor partnership or transferor S corporation that does not result in recapture liability to a transferee taxpayer pursuant to § 1.6418–3(a)(6), that amount reduces the remaining recapture amount under paragraph (d)(3)(i) of this section with respect to the investment credit property, and thus reduces the remaining recapture amounts to which a transferee taxpayer and eligible taxpayer (to the extent of retained credit amounts that have not be previously recaptured) is liable. The amount of the reduction to the transferee taxpayer is proportionate to the amount of the tax increase for the transferred specified credit portion (based on the partner's or shareholder's distributive share or pro rata share of tax exempt income, respectively, resulting from the transfer).

(iv) *Example (1). Impact of transferor partner recapture event to transferee taxpayer*—(A) *Facts.* A, B, C, and D are equal partners in ABCD partnership, a partnership for Federal tax purposes that accounts for tax items on a calendar year basis. The partnership agreement provides that A, B, C and D share equally in all items of income, gain, loss, deduction, and credit of ABCD partnership. ABCD partnership invests $1,000x in an energy property in accordance with section 48 and places the energy property in service on September 30, 2024. As of the end of 2024, ABCD partnership has $300x of eligible credits under section 48 with respect to energy property. Under § 1.6418–3(b)(2)(iv), each of A's, B's, C's, and D's distributive shares of the otherwise eligible section 48 credits is determined under §§ 1.46–3(f) and 1.704–1(b)(4)(ii) and is equal to $75x (based on each of A, B, C and D being allocated $250x of basis). Before the due date for ABCD partnership's 2024 tax return (with extension), A, B, C, and D agree that with respect to A's $75x distributive share of the otherwise eligible section 48 credits, $60x of eligible credits will be transferred and $15x of eligible credits (or $50x basis) will be allocated to A. A, B, C and D also agree that B, C, and D will each be allocated their respective $75x of the $250x of section 48 eligible credits (or basis). On November 15, 2024, ABCD partnership transfers $60x of its eligible section 48 investment credits to Y, an unrelated taxpayer. On January 1, 2025, A sells 50 percent of its interest in ABCD partnership, which results in recapture under § 1.47–6(a)(2).

(B) *Analysis—recapture from partner A's disposition.* Pursuant to § 1.6418–3(a)(6)(i), A is subject to the rules relating to recapture caused by the disposition of its interest under § 1.47–6(a)(2), and A calculates recapture based on half of its share of the basis of the investment credit property ($125x of basis) because A disposed of 50 percent of its interest in ABCD partnership. This results in a recapture amount of $37.5x to A (that is, the amount of the tax increase that A is responsible for due to the recapture event). Of the $37.5x recapture amount, $7.5x relates to $15x of credits retained by A, and $30x relates to the $60x of A's distributive share of the otherwise eligible section 48 credits that were transferred. This recapture event reduces the total potential recapture with respect to the investment credit property from $300x to $262.5x. Y is not subject to recapture because of partner A's disposition, but, if a recapture event with respect to the energy property takes place at a later date, the rules in § 1.6418–5(d)(3)(i) will take partner A's disposition and recapture amount into account when determining Y's recapture amount at that date.

(v) *Example (2). Impact of recapture from ABCD partnership's disposition of the investment credit property*—(A) *Facts.* Same facts as Example (1), except that on October 15, 2025, ABCD partnership sells the investment credit property to an unrelated third party.

(B) *Analysis—recapture event from ABCD partnership's disposition.* As a result of ABCD partnership's disposition of the energy property to a third party after one year, but before two years after placing the energy property into service, under section 50(a)(1)(B), the recapture percentage is 80 percent. This means that 80 percent of the remaining $262.5x of eligible section 48 credits (or $210x) is subject to recapture. Because ABCD partnership retained eligible credits related to the energy property, the $210x recapture amount, which is the amount of the tax increase under section 50(a), must be split between ABCD partnership and Y. Under § 1.6418–5(d)(3)(i), ABCD partnership must recapture $186x of the $210x credit amount, which is determined by multiplying the $210x by a fraction, the numerator of which is $232.5x ($240x of retained eligible credits less $7.5x of retained eligible credits already recaptured by A) and the denominator of which is $262.5x ($300x of total credits determined for the energy property less $37.5x credits recaptured with respect to A's distributive share of

the otherwise eligible section 48 credits transferred by ABCD partnership to Y and A's distributive share of the eligible credits retained by A). Also under § 1.6418–5(d)(3)(i), Y has a $24x recapture amount determined by multiplying the $210x recapture amount by a fraction, the numerator of which is $30x ($60x specified credit portion transferred to Y less the $30x recaptured by A that relates to A's distributive share of the otherwise eligible section 48 credits transferred by ABCD partnership to Y), and the denominator of which is $262.5x ($300x of total credits determined for the energy property less $37.5x credits recaptured with respect to A's distributive share of the otherwise eligible section 48 credits transferred by ABCD partnership to Y and A's distributive share of the eligible credits retained by A).

(e) *Notification and impact of recapture under section 45Q(f)(4)*—(1) *In general.* In the case of any election under § 1.6418–2 or § 1.6418–3 with respect to any specified credit portion described in § 1.6418–1(c)(2)(iii), if, during any taxable year, there is recapture of any section 45Q credit allowable with respect to any qualified carbon oxide that ceases to be captured, disposed of, or used as a tertiary injectant in a manner consistent with section 45Q, before the close of the recapture period (as described in § 1.45Q–5(f)), such eligible taxpayer and the transferee taxpayer must follow the notification process in paragraph (e)(2) of this section with recapture impacting the transferee taxpayer as described in paragraph (e)(3) of this section.

(2) *Notification requirements.* The notification requirements for the eligible taxpayer are the same as for an eligible taxpayer that must report a recapture event as described in paragraph (d)(2)(i) of this section, except that the recapture amount that must be computed is defined in § 1.45Q–5(e).

(3) *Impact of recapture.* The transferee taxpayer is responsible for any amount of tax increase under section 45Q(f)(4) and § 1.45Q–5 upon the occurrence of a recapture event, provided that if an eligible taxpayer retains any amount of an eligible credit determined with respect to a component of carbon capture equipment owned by the eligible taxpayer within a single process train described in § 1.45Q–2(c)(3), the amount of the tax increase under section 45Q(f)(4) that the eligible taxpayer is responsible for is equal to the recapture amount multiplied by a fraction, the numerator of which is the total credit amount that the eligible taxpayer retained, and the denominator of which is the total credit amount determined for the eligible credit property. The amount of the tax increase under section 45Q(f)(4) that the transferee taxpayer is responsible for is equal to the recapture amount multiplied by a fraction, the numerator of which is the specified credit portion transferred to the transferee taxpayer, and the denominator of which is the total credit amount determined for the eligible credit property.

(f) [Reserved].

(g) *Impact of an ineffective transfer election by an eligible taxpayer.* An ineffective transfer election means that no transfer of an eligible credit has occurred for purposes of section 6418, including section 6418(b). Section 6418 does not apply to the transaction and the tax consequences are determined under any other relevant provisions of the Code. For example, an ineffective election results if an eligible taxpayer tries to elect to transfer a specified credit portion, but the eligible taxpayer did not register and receive a registration number with respect to the eligible credit property (or otherwise satisfy the requirements for making a transfer election under the section 6418 regulations) with respect to which the specified credit portion was determined.

(h) *Carryback and carryforward.* A transferee taxpayer can apply the rules in section 39(a)(4) of the Code (regarding the carryback and carryforward period for applicable credits) to a specified credit portion to the extent the specified credit portion is described in section 6417(b) (list of applicable credits, taking into account any placed in service requirements in section 6417(b)(2), (3), and (5)).

(i) *Rules applicable to real estate investment trusts*—(1) *Treatment of eligible credits prior to transfer.* If a real estate investment trust has eligible credits that it may transfer, the value of those credits is not included in either the numerator or denominator in determining the value of the REIT's total assets in section 856(c)(4) of the Code.

(2) *Treatment of eligible credit transfer for purposes of section 857 safe harbor rules.* The transfer of a specified credit portion pursuant to a valid transfer election under section 6418 is not a sale for purposes of section 857(b)(6)(C)(iii) and section 857(b)(6)(D)(iv) of the Code.

(j) *Applicability date.* This section applies to taxable years ending on or after April 30, 2024. For taxable years ending before April 30, 2024, taxpayers, however, may choose to apply the rules of this section and §§ 1.6418–1 through –3 provided the taxpayers apply the rules in their entirety and in a consistent manner.

§ 1.6418–4T [Removed]

■ **Par. 4.** Section 1.6418–4T is removed.

Douglas W. O'Donnell,

Deputy Commissioner.

Approved: April 18, 2024

Aviva Aron-Dine,

Acting Assistant Secretary of the Treasury (Tax Policy).

Department of Health and Human Services

Administration for Children and Families

45 CFR Part 1355

Designated Placement Requirements Under Titles IV–E and IV–B for LGBTQI+ Children; Final Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

45 CFR Part 1355

RIN 0970–AD03

Designated Placement Requirements Under Titles IV–E and IV–B for LGBTQI+ Children

AGENCY: Children's Bureau (CB); Administration on Children, Youth and Families (ACYF); Administration for Children and Families (ACF); Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: This rule finalizes requirements under titles IV–E and IV–B for children in foster care who are LGBTQI+ (an umbrella term used in this regulation). The proposed rule was published on September 28, 2023. Federal law requires that state and tribal title IV–E and IV–B agencies (''agencies'') ensure that each child in foster care receives ''safe and proper'' care and has a case plan that addresses the specific needs of the child while in foster care to support their health and wellbeing. To meet these and other related statutory requirements, this final rule requires agencies to ensure that placements for all children are free from harassment, mistreatment, and abuse. The final rule requires that title IV–E and IV–B agencies ensure a Designated Placement is available for all children who identify as LGBTQI+ and specifies the Designated Placement requirements.

DATES: This final rule is effective on July 1, 2024. Title IV–E and IV–B agencies must implement the provisions of this final rule on or before October 1, 2026.

I. Executive Summary

Overview of Notice of Proposed Rulemaking

On September 28, 2023 (88 FR 66752), HHS issued a notice of proposed rulemaking (NPRM) called *Safe and Appropriate Foster Care Placement Requirements for Titles IV–E and IV–B.* ACF proposed the NPRM to support states and tribes in complying with Federal laws that require that all children in foster care receive safe and proper care. In the NPRM, ACF proposed that it would require agencies to implement specific processes and requirements to ensure that children in foster care who identify as LGBTQI+ would be placed with foster care providers who were trained to meet their specific needs related to their sexual orientation and gender identity and who would facilitate access to age-appropriate services to support their health and wellbeing. The NPRM referred to these specially designated placements as ''Safe and Appropriate'' placements for LGBTQI+ youth. Under the proposed rule, agencies would be required to ensure that such placements were available for any child in foster care who identifies as LGBTQI+ and provided to any such child in foster care. However, the NPRM would not have required providers to become designated as such a placement for LGBTQI+ children. The NPRM also proposed agency procedures to ensure a child who identifies as LGBTQI+ would not experience retaliation—regardless of whether the child was in a specially designated ''Safe and Appropriate'' placement, or whether the child was placed with a foster care provider who had chosen not to seek such a designation.

The NPRM proposed that title IV–E/IV–B agencies would be required to notify specified children (including all children at or above the age of 14) about the availability of these placements, the process to request such a placement, and the process to report placement concerns. The NPRM also set forth specific steps for the placement of transgender, intersex, and gender non-conforming children in sex-segregated child care institutions and required specific training for title IV–E/IV–B agency caseworkers and supervisors on how to appropriately serve LGBTQI+ children.

Finally, the proposed rule explained that HHS would monitor a state agency's compliance with the requirement in proposed § 1355.22(a)(1) through the Child and Family Services

Reviews (CFSRs). As explained in the proposed rule, the CFSRs are a formal monitoring protocol in which the state's efforts to comply with title IV–E and IV–B program requirements are assessed at the case and systems level. No tribal title IV–E agency is currently subject to CFSRs because none has a sufficient number of children in foster care and children receiving in-home services for ACF to apply the onsite CFSR case sampling procedures.

Overview of Final Rule

In this final rule, ACF clarifies how title IV–E/IV–B agencies must meet title IV–E and IV–B statutory requirements to appropriately serve LGBTQI+ children in foster care.

ACF received a total of 13,768 comments on the NPRM and has carefully considered each comment. A summary of comments and responses are included in sections III and IV of this preamble. Based on comments received, ACF has made modifications to the final rule.

To address requests from many commenters for further clarity about the meaning of ''safe and appropriate,'' and its applicability to all placements, the final rule distinguishes between the requirement of a safe and appropriate placement, which is applicable to all children in foster care, and a Designated Placement for LGBTQI+ children, which is the term used in the final rule to describe providers who meet specified requirements described in the rule to serve as a designated provider for LGBTQI+ children. Because Federal law requires that every child in foster care receive ''safe and proper'' care and placement in the ''most appropriate setting available,'' ACF reiterates that *all* foster care placements must be safe and appropriate for *all* children—including LGBTQI+ children. This general protection that all foster care placements must be safe and appropriate reiterates existing statutory and regulatory requirements that title IV–E/IV–B agencies must meet to comply with Federal law for all children in foster care. This final rule specifies that as part of meeting the requirement to provide a safe and appropriate placement for all children in foster care, the title IV–E/IV–B agency must ensure that placements, including those for LGBTQI+ children, are free from harassment, mistreatment, and abuse, including related to a child's sexual orientation or gender identity.

As set forth in the NPRM, HHS recognizes that LGBTQI+ youth face significant disparities in the child welfare system. In order for LGBTQI+ youth to receive care that meets Federal statutory guarantees that each child in foster care will receive safe and proper care that is consistent with the best interest and special needs of the child, title IV–E/IV–B agencies must ensure LGBTQI+ children have access to specially designated placements that are prepared to meet their unique needs and create a supportive environment. This final rule refers to those specially designated placements as ''Designated Placements.'' The requirements of a Designated Placement are consistent with the requirements proposed in the NPRM for specially designated placements for LGBTQI+ children (which the NPRM referred to as ''Safe and Appropriate'' placements), with some clarifying text added. Recognizing that safe and proper treatment for LGBTQI+ children requires attention to certain particular harms and risks that this population faces, this final rule specifies that Designated Placement providers must have particular training and provide particular protections for LGBTQI+ children that may not be relevant or necessary for non-LGBTQI+ children.

The final rule does not require any provider to become a Designated Placement. Further, the rule specifies that nothing in the rule should be construed as requiring or authorizing a state to penalize a provider that does not seek or is determined not to qualify as a Designated Placement provider. It also says that nothing in this rule shall limit any State, tribe, or local government from imposing or enforcing, as a matter of law or policy, requirements that provide greater protection to LGBTQI+ children than this rule provides.

The rule requires that the title IV–E/IV–B agency ensure a Designated Placement is available for, and may be requested by, any child in foster care who identifies as LGBTQI+. In order to be considered a Designated Placement for an LGBTQI+ child, the placement must satisfy three conditions, each of which goes beyond the general requirements that apply to all placements. First, the provider must commit to establishing an environment that supports the child's LGBTQI+ status or identity. Second, the provider must be trained with the appropriate knowledge and skills to provide for the needs of the child related to the child's self-identified sexual orientation, gender identity, and gender expression. Third, the provider must facilitate the child's access to age- or developmentally appropriate resources, services, and activities that support their health and well-being. HHS has concluded that these conditions are generally necessary to effectuate the statutory promise of a safe and appropriate placement for children who are LGBTQI+ because of the extensive evidence of the specific needs LGBTQI+ children have which require more specialized support. This rule requires title IV–E/IV–B agencies to ensure that the totality of their child welfare system includes sufficient placements for LGBTQI+ children that meet each of these standards.

As explained further below, when making placement and services decisions related to an LGBTQI+ child, the title IV–E/IV–B agency must give substantial weight to the child's concerns or request for a Designated Placement in determining the child's best interests.

The final rule requires agencies to notify certain children about the availability of Designated Placements, the process to request one, and the process to report concerns about their current placement or about retaliation against them. Notification requirements apply to all children age 14 and over, as well as those under age 14 removed from their home due, in whole or part, to familial conflict about their sexual orientation, gender identity, gender expression, or sex characteristics; or if they have disclosed their LGBTQI+ status or identity; or whose LGBTQI+ status or identity is otherwise known to the agency. The final rule also requires that the title IV–E/IV–B agency ensure that LGBTQI+ children have access to age and developmentally appropriate services that support their needs related to their sexual orientation and gender identity or expression. This includes clinically appropriate mental and behavioral health care supportive of their sexual orientation and gender identity and expression, as needed.

A number of commenters emphasized that, in many cases, if a child requests services and a current placement chooses to accept them, that could make a current placement more appropriate for an LGBTQI+ child and prevent any need for a placement change. Other commenters raised concerns about the potential for disruptive placement changes as a result of the proposed rule. In response, the final rule recognizes that, in addition to requesting a change in placement to a Designated Placement, a child could also request that services be offered to stabilize their current placement. Moreover, if a child requests a Designated Placement, the final rule clarifies that to promote placement stability, the title IV–E/IV–B agency must first consider whether, if the current provider wishes to accept additional services, it would allow the current provider to voluntarily meet the conditions for a Designated Placement.

Promoting such stability is particularly important in cases where children are placed with kin, siblings, close to families of origin, and in family-like settings. In making the determination about the child's best interests, the agency is required to give substantial weight to the child's request. If the child's current provider elects to become a Designated Placement, in accordance with the case review system and protocols, the title IV–E/IV–B agency must regularly review the status of the placement to ensure it progresses towards meeting the relevant conditions. ACF expects this process will in some cases enable title IV–E/IV–B agencies to provide Designated Placements while preserving placement stability, particularly in settings where children are placed with kin, with siblings, in close proximity to families of origin, or in family-like settings as recommended by commenters.

The final rule also requires that the title IV–E/IV–B agency have a procedure to protect LGBTQI+ children in foster care from retaliation for disclosure of their LGBTQI+ status and/or identity, if they are reported or perceived to have LGBTQI+ status and/or identity, or for requesting a Designated Placement. It also requires training for title IV–E/IV–B agency caseworkers and supervisors on how to appropriately serve LGBTQI+ children and on how to implement the procedural requirements of the rule. The final rule requires title IV–E/IV–B agencies to ensure that agency contractors and subrecipients who have responsibility for placing children in foster care, making placement decisions, or providing services, as well as all placement providers, are informed of the procedural requirements of the rule.

The statute at 42 U.S.C. 671(a)(8) enumerates safeguards which restrict the use or disclosure of information concerning children in foster care. These critical safeguards ensure the privacy and confidentiality of children with very limited exceptions. Consistent with title IV–E and IV–B confidentiality requirements at 42 U.S.C. 671(a)(8) and 45 CFR 1355.21(a), 1355.30(p)(3), and 205.50, the final rule provides that agencies are prohibited from disclosing information about a child's LGBTQI+ status or identity except as provided by statute and that any such disclosure must be the minimum necessary to accomplish the legally-permitted purposes. In response to comments, the final rule clarifies the privacy and confidentiality protections for information related to an LGBTQI+ child's status or identity. The Children's Bureau will monitor a state agency's compliance through the CFSRs, a formal monitoring protocol in which the state's efforts to comply with title IV–E and IV–B program requirements are assessed at the case and systems level. No tribal title IV–E agency is currently subject to CFSRs because none has a sufficient number of children in foster care and children receiving in-home services for ACF to apply the onsite CFSR case sampling procedures. All requirements of the rule will be subject to the partial review process.

The final rule expressly provides that insofar as the application of any requirement under the rule would violate applicable Federal protections for religious freedom, conscience, and free speech, such application shall not be required. The rule does not require any provider to become a Designated Placement, and specifies that nothing in the rule should be construed as requiring or authorizing a state to penalize a provider that does not seek or is determined not to qualify as a Designated Placement from participation in the state's program under titles IV–E and IV–B. The final rule also clarifies that the rule does not limit any State, Tribal or local government or agency from imposing or enforcing as a matter of state, tribal or local law or policy, requirements that provide greater protection to LGBTQI+ children than this rule provides.

Legal Authority for the Final Rule

Titles IV–E and IV–B of the Social Security Act (the Act) require title IV–E/IV–B agencies to provide case plans for all children in foster care. Under section 475(1)(B) of the Social Security Act, 42 U.S.C. 675(1)(B), case plans must include a plan for assuring that the child receives safe and proper care and that services are provided to improve the conditions in the parents' home, facilitate return of the child to his own safe home or the permanent placement of the child, and address the needs of the child while in foster care. The plan must also discuss the appropriateness of the services provided to the child under the plan. Agencies must also have case review systems through which they ensure that each foster child's case plan is ''designed to achieve placement in a safe setting that is the least restrictive (most family like) and most appropriate setting available and in close proximity to the parents' home, consistent with the best interest and special needs of the child[.]'' (Section 475(5) of the Social Security Act, 42 U.S.C. 675(5)(A)) In order to receive title IV–E and IV–B funds, agencies must have plans approved by ACF that provide for case plans and case review systems that meet these statutory requirements (sections 471(a)(16) and 422(b) of the Social Security Act, 42 U.S.C. 671(a)(16) and 622(b)).

Additionally, in order to receive title IV–E funds, states and tribes must certify in their title IV–E plans that they will ensure that before a child in foster care is placed with prospective foster parents, the prospective foster parents ''will be prepared adequately with the appropriate knowledge and skills to provide for the needs of the child [and] that the preparation will be continued, as necessary, after the placement of the child'' (section 471(a)(24) of the Social Security Act, 42 U.S.C. 671(a)(24)). The Act also requires that agencies ensure that foster parents, as well as at least one official at any child care institution providing foster care, receive training on how to use and apply the ''reasonable and prudent parent standard,'' a ''standard characterized by careful and sensible parental decisions that maintain the health, safety, and best interests of a child while at the same time encouraging the emotional and developmental growth of the child, that a caregiver shall use when determining whether to allow a child in foster care under the responsibility of the State to participate in extracurricular, enrichment, cultural, and social activities'' (Social Security Act 471(a)(24) and (a)(10) and 475(10)(A), 42 U.S.C. 671(a)(24) and (a)(10) and 675(10)(A)).

The Act requires agencies to develop and implement standards to ensure that children in foster care placements are provided quality services that protect their safety and health (Social Security Act section 471(a)(22), 42 U.S.C. 671(a)(22)).

The Act authorizes the Secretary of Health and Human Services (the Secretary) to review state compliance with the title IV–E and IV–B program requirements. Specifically, the Act requires the Secretary to determine whether state programs are in substantial conformity with state plan requirements under titles IV–E and IV–B, implementing regulations promulgated by the Secretary and the states' approved state plans (section 1123A of the Social Security Act, 42 U.S.C. 1320a–2a).

Finally, the Act authorizes the Secretary to ''make and publish such rules and regulations . . . as may be necessary to the efficient administration of the functions with which [the Secretary] is charged under [the Social Security Act].'' (Section 1102 of the Social Security Act, 42 U.S.C. 1302)

II. Background

LGBTQI+ Children in the Child Welfare System

As the NPRM explained, a significant body of evidence demonstrates that LGBTQI+ children are overrepresented in the child welfare system and face poor outcomes in foster care.[1]

Overrepresentation of LGBTQI+ Children in Foster Care

LGBTQI+ children are overrepresented in the foster care population. One recent confidential survey revealed that 32 percent of foster youth ages 12–21 surveyed report that they identify as having a diverse sexual orientation or gender identity.[2] Another large confidential survey found that 30.4 percent of foster children aged 10–18 identify as LGBTQ+.[3] A recent study using nationally representative survey data found that youth with a minority sexual orientation, such as lesbian, gay, and bisexual youth, are nearly two and a half times as likely as heterosexual youth to experience a foster care placement.[4]

A study published in 2016 of the population of youth who have been involved in both the foster care and juvenile justice systems found that LGBTQ+ juvenile-justice involved youth were three times more likely to have been removed from their home and twice as likely to have experienced being physically abused in their homes prior to removal than their non-LGBTQ+ juvenile-justice involved counterparts.[5]

LGBTQI+ children are overrepresented in the child welfare system because of a confluence of factors. Studies suggest that LGBTQ+ children face higher rates of parental physical abuse and are more likely to run away from home or be kicked out than their non-LGBTQ+ counterparts, often because of conflict over their sexual orientation or gender identity.[6] These experiences place LGBTQI+ children at greater risk of entering foster care and mean that many LGBTQI+ children enter foster care with complex needs and trauma related to the discrimination and stigma they have experienced because of their sexual orientation or gender identity. As a result of reviewing this research, and hearing from LGBTQI+ individuals with lived experience in foster care, we have developed this regulation to improve how title IV–E/IV–B agencies address the needs of this population.[7]

Impact of Family and Caregiver Behavior on LGBTQI+ Child Wellbeing

Research shows that the support LGBTQI+ children receive from their families and caregivers related to their sexual orientation or gender identity is highly predictive of their mental health and wellbeing. For example, a 2022 survey found the five most common ways that LGBTQ youth reported feeling supported by their parents or caregivers included having been welcoming to their LGBTQ friends or partners, talking with them respectfully about their LGBTQ identity, using their name and pronouns correctly, supporting their gender expression, and educating themselves about LGBTQ people and issues. That survey found that LGBTQ youth who felt high social support from their family in these ways reported less than half the number of suicide attempts than LGBTQ youth who experienced low or moderate social support from their family.[8] Another study quantified the negative impacts of family rejection of LGBTQ children, which can lead to greater representation in foster care.[9] The study found that family behaviors, including excluding LGBTQ children from family events and activities because of their identity, not letting their child learn about their LGBTQ identity, or trying to change their child's LGBTQ identity increased the risk of depression, suicide, illegal drug use, and other serious health risks. The study also found that family behaviors that support LGBTQ children, including standing up for their child when others mistreat them because of their LGBTQ identity, had positive outcomes, helped promote self-esteem, overall health, and protected against suicidal behavior, depression, and substance abuse. The study found that lesbian, gay, and bisexual young adults who reported high levels of family rejection during adolescence were more than eight times more likely to report having attempted suicide, nearly six times more likely to report high levels of depression, and more than three times more likely to use illegal drugs compared with their lesbian, gay, and bisexual counterparts from families that reported no or low levels of family rejection.[10] Studies found improved health outcomes in youth whose caregivers demonstrated supportive behavior towards the child's LGBTQ+ identity, including connecting the child to an LGBTQ+ adult role model.[11] Moreover, caregiver behavior

[1] Some studies cited below defined their scope as LGBTQ, LGBT, or Lesbian, Gay, and Bisexual (LGB) children or youth specifically. Where one of those studies is cited, this regulation uses the same acronym as the study itself.

that is not affirming, including refusing to use a child's chosen name and pronouns, or ridiculing or name-calling because of the child's LGBTQ+ identity, contributes to increased risks for serious health concerns for the child, such as depression, suicidal thoughts, suicidal attempts, and illegal drug use.[12]

Experience of LGBTQI+ Children in Foster Care

A meaningful body of research demonstrates that LGBTQI+ children in foster care face disproportionately worse outcomes and experiences than other children in foster care due to their specific mental health and well-being needs often being unmet. Further, evidence from qualitative studies, listening sessions, and Congressional testimony makes clear that many LGBTQI+ foster youth do not currently receive placements or services that are safe and proper, as required by statute.[13]

LGBTQI+ children in foster care report experiencing mistreatment related to their sexual orientation or gender identity. One study found that ''one of the most consistent themes that LGBTQ youth in foster care have conveyed in focus groups and qualitative interviews is a tendency to be harassed, teased, and bullied by staff, peers, and [foster] care providers . . . LGBTQ youth are often excluded and rejected by their peers and caretakers . . . It is common for LGBTQ youth in group home and foster home settings to be isolated to their own bedroom or to their own wing of the house due to fears of placing them with youth of the same sex.'' [14]

Children in foster care who identify as LGBTQI+ are more likely to be placed in congregate care settings (group homes and residential care rather than family like settings), experience multiple placements, and have adverse experiences in their placement than non-LGBTQI+-identifying youth.[15] One study found that LGBTQI+ youth in foster care are more likely to experience at least 10 foster care placements, with youth of color who are LGBTQ reporting the highest rates.[16]

A 2021 study showed that children in foster care who identify as LGBTQ+ report a perception of poor treatment by the foster care system more frequently than their non-LGBTQ peers and feel less frequently that they can be themselves.[17] Children in foster care who identify as LGBTQI+ are less likely to report at least ''good'' physical and mental health and are less likely to have at least one supportive adult on whom they can rely for advice or guidance than their non-LGBTQI+ counterparts in foster care.[18]

In one study that looked at LGBTQ+ status-related discrimination, 37.7 percent of children in foster care ages 12 through 21 who identify as LGBTQ+ reported poor treatment connected to their gender expression, sexual minority status, or transgender status. The study also showed that LGBTQ+ foster youth were more likely than their non-LGBTQ+ foster youth counterparts to have been hospitalized for emotional reasons or been homeless at some point in their life.[19]

Research has also demonstrated strong correlations between LGBTQI+ children who spent time in foster care and who later experienced housing instability, homelessness, and food insecurity. LGBTQI+ youth who reported past housing instability or a current homeless episode were six times more likely to have been in foster care than LGBTQI+ youth who did not report any housing instability.[20]

These many findings illustrate the need for child welfare personnel and foster parents to be trained on their critical role in the lives of LGBTQI+ children to avoid re-traumatization and further victimization of children.[21] Implementing strategic training and recruitment to meet the well-being needs of children who are LGBTQI+ is critical.

Mental Health Needs of LGBTQI+ Children

Research consistently shows that when LGBTQI+ youth experience supportive environments and services, they experience the same positive mental health outcomes as other youth.[22] However, research demonstrates that LGBTQI+ youth in foster care face significant mental health disparities that result from experiences of stigma and discrimination. A 2020 survey found that LGBTQ youth in foster care were more than two and a half times more likely to report a past year suicide attempt than LGBTQ youth who were not in foster care, with 35 percent of LGBTQ foster youth reporting

such an attempt. Reports of past year suicide attempt rates were even higher among LGBTQ+ foster youth of color (38 percent) and non-binary and transgender foster youth (45 percent).[23]

One area of particular concern for the mental health of LGBTQI+ youth in foster care is possible exposure to sexual orientation or gender identity or expression change efforts (so-called ''conversion therapy''), as well as other actions to change, suppress or undermine a child's sexual orientation, gender identity, or gender expression. Such efforts are not supported by credible evidence and have been rejected as harmful by the American Academy of Child and Adolescent Psychiatry, the American Academy of Pediatrics, the American Psychiatric Association, the American Psychological Association, and the National Association of Social Workers, among others.[24] The American Psychological Association (APA) has concluded that any behavioral health or other effort that attempts to change an individual's gender identity or expression is inappropriate and, further, can cause harm and/or suffering. After reviewing scientific evidence on gender identity change efforts, harm, affirmative treatments, and professional practice guidelines, the APA has affirmed gender identity change efforts are associated with reported harm, and the APA opposes these practices because of their association with harm.[25] Likewise, according to the APA, sexual orientation change efforts are ''coercive, can be harmful, and should not be part of behavioral health treatment.[26] A literature review by Substance Abuse and Mental Health Services Administration (SAMHSA) discussed in its 2023 report, ''Moving Beyond Change Efforts: Evidence and Action to Support and Affirm LGBTQI+ Youth'' concluded that [sexual orientation change efforts] were not effective and may cause harm.'' It found that no research has ''demonstrated that gender identity change efforts are effective in altering gender identity.'' In fact, the review found that ''exposure to gender identity change efforts . . . is associated with harm, including suicidality, suicide attempt, and other negative mental health outcomes such as severe psychological distress.'' [27]

Current Approaches To Meet the Needs of LGBTQI+ Children in Foster Care

Current approaches for meeting the needs of LGBTQI+ children in foster care vary across states and tribes. Some agencies use, or are working towards implementing, child welfare practice models that address the specific needs of LGBTQI+ children, in line with existing Federal statutory requirements applicable to all children in foster care. In 2023, the Child Welfare Information Gateway issued a report on ''Protecting the Rights and Providing Appropriate Services to LGBTQI+ Youth in Out-of-Home Care'' (''Report'').[28] The Report provides a review of state laws, regulations, and policies related to reducing the negative experiences of any child who identifies as LGBTQI+, including laws and policies that support a child's ability to be safe and free from discrimination; have access to needed care and services; and be placed in ''safe and supportive'' placement settings with caregivers who have received appropriate training. The Report found that 22 states and the District of Columbia require agencies to provide youth who identify as LGBTQI+ with services and supports that are tailored to meet the specific needs of an LGBTQI+ child, such as providing clothing and hygiene products and referring to the child by the name and pronouns that align with their gender identity. The Report found that eight states and the District of Columbia offer developmentally appropriate case management that helps child welfare workers support LGBTQI+ youth. The Report found that fifteen states and the District of Columbia require training on LGBTQI+ issues for foster caregivers and related staff, including on how to communicate effectively and professionally with youth who identify as LGBTQI+, and education on current social science research and common risk factors for LGBTQI+ youth experiencing various negative outcomes.

However, the Report also demonstrates that a majority of title IV–E/IV–B agencies do not have laws, regulations, or policies to make appropriate services and supports or Designated Placements available to an LGBTQI+ child in foster care. Without such laws or policies, agencies may not adequately meet statutory requirements that guarantee that LGBTQI+ children in foster care, like all foster children, receive a safe and proper placement. In March 2022, ACF published Information Memorandum (IM) ACYF–CB–IM–22–01, which included suggestions on how agencies could best provide services and supports to each LGBTQI+ child who is at risk of entering or is in foster care.[29] ACF believes this final rule will help address the extensively documented risk factors and adverse outcomes for LGBTQI+ children in foster care.

III. Regulatory Provisions and Responses to Comments

Summary of Commenters

The comment period for the NPRM was open for 60 days and closed on November 27, 2023. We received a total of 13,768 comments consisting of:

- Comments from 15 state or local child welfare agencies and governmental entities, such as state attorneys generals (AG) and a state civil legal aid office;
- Two letters representing 26 congressional members;
- Comments from 65 advocacy organizations, providers, and university institutes; and
- 13,536 comments from individuals, more than 12,000 of which consisted of two form letters, one in support and one in opposition.

We also received comments that were submitted on a different NPRM, were out of scope, or were duplicate submissions, and will therefore not be addressed. No comments were received by the deadline from Indian Tribes, Tribal organizations or consortiums, or organizations that represent Tribal interests. The comments are available in the docket for this action on *https://www.regulations.gov/docket/ACF-2023-0007/comments.* We reviewed and analyzed all of the NPRM comments and considered them in finalizing this rule.

Below is a summary of comments received. We include a detailed

response to comments in section IV of this preamble.

Summary of Comments by Commenter Type

Summary of Comments From State and Local Child Welfare Agencies

Four states or government entities expressed support: three were supportive of ACF's goal to improve care for LGBTQI+ children but also expressed concerns and recommended substantive changes to the proposal, and one expressed a neutral position. The supporters expressed that they are currently undertaking efforts to meet the needs of LGBTQI+ children in foster care, such as state-level non-discrimination laws, a foster children's bill of rights, resource groups for LGBTQI+ community outreach, requiring providers to demonstrate an ability to support LGBTQI+ children, and training for their workforce on cultural competency and sensitivity related to sexual orientation and gender identity. State agencies and governments who supported the rule expressed appreciation for the efforts of HHS to establish protections for LGBTQI+ children in foster care. They also supported some of the NPRM's requirements around assessing that placements meet the unique needs of LGBTQI+ children, reporting concerns with such placements, and placing children in sex-segregated child care institutions according to their gender identity.

Four states or government entities and the three letters representing 20 state attorneys general opposed the proposal. The state agencies and governments who opposed the rule stated a general belief that the NPRM creates a separate and distinct process for LGBTQI+ children that violates privacy and raised concerns related to the religious beliefs of providers. Additional concerns raised included that the NPRM would require an ''upfront'' conversation about a child's sexual orientation and gender identity instead of allowing a child to decide when to share this information with their case worker. Those states or entities who opposed the NPRM also argued that it creates a ''cumbersome fix'' for a problem that lacks clear definition while states are currently having issues finding enough providers for all children in foster care. They also argued that the NPRM's provisions would disincentivize families who may object to providing specially designated care for LGBTQI+ children from serving as foster parent providers and would ''drive individuals and organizations of faith away.'' They also expressed concerns that most congregate care providers are not currently equipped to meet the provisions around placing children according to their gender identity. Finally, there were objections to what they saw as unfunded burdens on the agencies to develop new trainings, modify licensing and placement rules, and revise case management systems to track placements, notifications, and other requirements in the NPRM.

Letters from State attorneys general raised legal concerns that the NPRM violates various statutory and constitutional requirements; these concerns are addressed in section IV.

Suggestions for revisions from state and local child welfare agencies and Government entities included:

- Expanding the approach proposed in the NPRM to apply the process to report placement concerns and provide notice to all children in foster care and not only to those specified in the NPRM, such as those over age 14;
- Providing clear guidance related to all of the rule's requirements and specifically the treatment of kin placements;
- Providing more funding to establish or enhance services for LGBTQI+ children within the states; in rural areas; and for recruitment, retention, and training of child welfare workers and foster care providers; and
- Replacing specific terms or phrases to broaden or provide flexibility to certain requirements, such as replacing ''retaliation'' with ''discrimination'' and replacing ''age-appropriate'' with ''developmentally appropriate.''

Summary of Comments From Congressional Members

Two sign-on letters from a total of 26 congressional members expressed opposition to the NPRM. They generally expressed a belief that the NPRM imposes mandates on a subset of children based exclusively on the child's gender identity and sexual orientation while there are no Federal policies that define ''safe and proper care'' for other children with unique characteristics, such as those living with a disability. They argued that the proposed rule would dissuade families of faith from being foster parents, thus impacting availability of foster care placements and that the training requirements would impact availability of caseworkers. They also expressed concern that the proposed rule will impose ''significant financial and administrative burdens'' on title IV–E agencies. They expressed concerns about the NPRM's requirements for transgender children and that placing children according to their gender identity could result in children being placed in settings ''they find uncomfortable and invasive or, at worst, unsafe.''

Summary of Comments From Advocacy Organizations, Providers, and Universities

Of the 65 advocacy organizations, providers, and university institutions that commented, 34 were supportive of the Department's goal to improve care for LGBTQI+ children but also recommended substantive changes to the proposal. Seven expressed support without recommending changes to the proposal, and 24 opposed.

Those organizations, providers, and university institutions who supported the rule without making changes concurred with the research summarized in the NPRM that demonstrates the complex challenges faced by LGBTQI+ children in foster care and agreed that the NPRM would help prevent discrimination and retaliation against LGBTQI+ children by allowing them to express their identities without fear of discrimination. They argued that the NPRM balances the exercise of religion with the need to ensure child wellbeing and represents an essential step towards creating an inclusive and supportive child welfare community. Some of the providers who commented expressed support for the NPRM and outlined the programs, policies, and procedures that they currently undertake to assist LGBTQI+ children in foster care. These practices included training kin caregivers and families of origin on affirming care, helping youth identify lasting affirming connections, having a mix of residential facilities for children, and training for facilities staff.

The 34 advocacy organizations, providers, and university institutes that expressed general support but also concerns with the NPRM's requirements appreciated ACF's commitment to ensuring that LGBTQI+ children in foster care are protected from harm. They agreed that LGBTQI+ children are overrepresented in the child welfare system and appreciated that ACF's summary of research documents the discrimination and challenges LGBTQI+ children in foster care face.

However, some of the advocacy organization and providers that commented expressing overall support also raised concerns about the approach of the NPRM and some stated that it was vague, lacking clarification at various decision-making points, and would negatively impact the availability of providers, specifically kin and religious

providers. Commenters raised concerns over freedom of religion and the legality of the NPRM's proposed requirements. Several organizations argued the NPRM as drafted could harm, instead of help, LGBTQI+ children in foster care. Specific concerns about the NPRM raised by these commenters include that the proposed rule added a layer of bureaucracy on child welfare agencies; may present a burden for kin caregiver providers to meet; creates a ''two-tiered system'' where non-LGBTQI+ children have an expectation of safety anywhere, but for LGBTQI+ children only certain placements are ''safe and appropriate''; places the onus on children to request a placement change, requiring them to disclose their identity when they may not feel comfortable doing so; did not explicitly contain anti-discrimination policies; lacked additional funding to implement the rule's requirements; and questioned whether CFSR would be the best mechanism for monitoring. As with all comments noted in these summaries, these concerns are addressed in the comment and response section that follows.

A number of the commenters who opposed the NPRM said that, while they agreed that every child in foster care should feel safe and be in a hostility-free environment, they were concerned that the NPRM only applied to LGBTQI+ children. Those that opposed generally argued the NPRM infringes upon religious liberties, questioned whether it was legal in its approach, and stated it minimized the contributions of faith-based providers. Some providers who submitted comments said the NPRM would have ''unintended consequences'' such as exacerbating the placement shortage. They also argued the NPRM was overly broad and vague, for example stating that not defining ''hostility, mistreatment, and abuse'' was ''deliberate'' to enable labeling providers as unsafe for ''simply disagreeing with the state's so-called 'appropriate' method for caring for LGBT children.'' They expressed concern that the NPRM would preclude ''reasonable efforts'' to help children think through their ''current feelings and assumptions'' arguing that foster parents should be free to offer their views. They also expressed concerns that ''age-appropriate services and supports'' could require gender-affirming care for transgender minors, which they argued creates various risks for children and should not be provided. Some commenters said that the NPRM's provision to place children according to their gender identity would ''threaten girls' privacy'' and that requiring use of a youth's chosen pronouns is a violation of free speech. A few commenters suggested instead creating a certification process for providers who have undergone training to be particularly supportive and affirming for LGBTQI+ children in foster care, such as something similar to having training to be a therapeutic foster care placement.

Summary of Comments From Individual Commenters

As noted earlier, we received approximately 13,536 comments from individuals, more than 12,000 of which consisted of two form letters. Of those, over 1,700 form letters expressed support, and over 10,000 form letters expressed opposition. Additionally, over 100 non-form letters expressed support, over 1,300 non-form letters expressed opposition, and 25 non-form letters expressed a neutral position. In general, the supportive commenters agreed that LGBTQI+ children are overrepresented in foster care, applauded HHS for requiring agencies to maintain enough safe and appropriate placements for LGBTQI+ children, and expressed their belief that this rule would be a ''huge step forward'' in keeping children safe. They also agreed that LGBTQI+ foster children should not be subjected to abuse or discrimination, including by placements that practice ''conversion therapy.'' Some commenters stated that agencies have no policies that protect LGBTQI+ children in foster care and that the proposals in the NPRM will create important mandates for agencies and providers. Others expressed that ensuring that providers are trained and equipped with skills to provide for a child's needs regarding sexual orientation and gender identity is the ''next step in improving the well-being of the LGBTQI+ youth in foster care.'' Supportive commenters asked who will define ''safe and proper care.''

Commenters who expressed opposition expressed a belief that the approach taken in the NPRM would harm, rather than help, children in foster care. They argued that it would disqualify most faith-based providers and label people of faith and religious organizations as ''unsafe'' and ''inappropriate.'' The individuals and anonymous commenters who opposed the NPRM expressed concerns that the proposal would reduce the number of available providers, exacerbate the placement shortage, and discourage religious families and individuals from becoming foster parents or seeking employment in the child welfare profession. There were also a substantial number of commenters who appeared to misunderstand or misinterpret the NPRM's provisions, including a substantial number of comments discussing the appropriateness or lack thereof of gender-affirming care for children. These comments are outside the scope of the rule because this rule does not establish any particular standard of medical care or require that anyone receive any particular medical services.

The 25 commenters who expressed neutral positions shared personal stories of their experience with LGBTQI+ children or foster care, views on child rearing, or generally that placements should be free from hostility and mistreatment.

Section by Section Discussion of Regulatory Provisions

We respond to the relevant comments we received in response to the NPRM in this section-by-section discussion.

Title and Definition of LGBTQI+

In the proposed rule we proposed the title of § 1355.22 to be ''Placement requirements under titles IV–E and IV–B for children who identify as lesbian, gay, bisexual, transgender, queer or questioning, intersex, as well as children who are non-binary or have non-conforming gender identity or expression.'' The proposed rule used the terms ''LGBTQI+ status'' and ''LGBTQI+ identity'' in various locations to refer to LGBTQI+ children.

Comments: Some commenters encouraged ACF to amend the rule to explicitly include other identities—such as children who are Two Spirit—to be as inclusive as possible and provide clarity for providers. Some commenters encouraged ACF to explicitly include children with a variation in sex characteristics in addition to intersex children, as not all such children identify as intersex. Other commenters encouraged ACF to include protections based on ''LGBTQI+ identity'' in addition to ''LGBTQI+ status'' to provide maximum clarity about which children are entitled to Designated Placements.

Response: ACF agrees that addressing the needs of Two Spirit youth in the child welfare system is an important part of this regulation. ACF also agrees with the importance of providing clarity to title IV–E/IV–B agencies and providers about the meaning of the term ''LGBTQI+.'' For the purposes of this rule, the term refers to children who identify as lesbian, gay, bisexual, transgender, queer or questioning, intersex, as well as children who are non-binary, Two-Spirit, or have non-

conforming gender identity or expression, all of whom are referred to under the umbrella term of LGBTQI+ for this regulation.

For streamlining purposes, ACF updated the final rule's regulatory text to read ''LGBTQI+ children (including children who are lesbian, gay, bisexual, transgender, queer or questioning, and intersex).'' The word ''including'' clarifies that the umbrella term LGBTQI+ includes children who are non-binary, Two-Spirit, or have non-conforming gender identity or expression as well.

We also agree with commenters that the use of both ''LGBTQI+ status'' and ''LGBTQI+ identity'' offers greater clarity. The term ''LGBTQI+ status'' is frequently used in reference to protecting LGBTQI+ individuals from discrimination, harm, and mistreatment based on their ''LGBTQI+ status.'' Protecting a child from mistreatment based on their ''LGBTQI+ status'' would include protections should the child disclose their LGBTQI+ identity, should a third party identify a child as LGBTQI+, or should the child be perceived as having an LGBTQI+ identity. Other sections of the NPRM provided protections to children based on their ''LGBTQI+ identity.'' The term ''LGBTQI+ identity'' is frequently used when a person self-identifies as LGBTQI+. For this final rule, ACF uses the term ''LGBTQI+ status or identity,'' and any reference to LGBTQI+ children is intended to include both children with LGBTQI+ status and LGBTQI+ identity. For brevity, ACF has revised the title of this final regulation to be ''Designated Placement requirements under titles IV–E and IV–B for LGBTQI+ children.''

In regard to questions about children with variations in sex characteristics, ACF acknowledges that not all children with variations in sex characteristics self-identify with the term intersex but believes that the term LGBTQI+ provides sufficient clarity that the rule's protections apply to such children.

Final Rule Change: ACF updated the title of the regulation to ''Designated Placement requirements under titles IV–E and IV–B for LGBTQI+ children'' and updated the rule text to read ''LGBTQI+ children (including children with lesbian, gay, bisexual, transgender, queer or questioning, and intersex status or identity).''

Section 1355.22(a) Protections Generally Applicable

In § 1355.22(a)(1) of the proposed rule, ACF proposed to require that title IV–E/IV–B agencies ensure that a safe and appropriate placement is available for and provided to all children in foster care, including each LGBTQI+ child in foster care. The proposed rule referred to specially designated placements for LGBTQI+ children in foster care as ''Safe and Appropriate'' placements. The NPRM proposed that a ''Safe and Appropriate'' placement for an LGBTQI+ child would be a placement in which (1) the provider will establish an environment free of hostility, mistreatment, and abuse based on the child's LGBTQI+ status; (2) the provider is required to be trained on the appropriate knowledge and skills to provide for the needs of the child related to the child's self-identified sexual orientation, gender identity, and gender expression; and (3) the provider will facilitate the child's access to age-appropriate resources, services, and activities that support their health and well-being. The NPRM further clarified that providers would not be required to be ''Safe and Appropriate'' as the rule does not compel any particular provider to seek a special designation to provide supportive care to LGBTQI+ children.

Comments: Numerous commentors, including those who supported and opposed the requirements of the proposed regulation, provided recommendations for using clearer terminology in the final rule.

Some commenters suggested that every child is already entitled to a safe and appropriate placement under Federal child welfare law, and that the final rule should clarify that this requirement applies to all children in foster care, not just to children in specially designated placements for LGBTQI+ children.

A number of commenters were opposed to applying the protections in paragraph (a) of the NPRM only to LGBTQI+ children for various reasons, including that it could appear that LGBTQI+ children are provided protections not guaranteed to others. Another commenter stated that there are no other Federal policies that define how a state must provide ''safe and proper care'' to children of other unique circumstances.

Many commenters expressed concern with the terminology ''safe and appropriate'' placements, interpreting that such a placement was only available to LGBTQI+ children. One commenter expressed the belief that using the term ''safe and appropriate'' permits the state to place the child with caregivers who are merely tolerant of the child's sexual orientation or gender identity rather than in a home that is fully supportive. Commenters stated the rule does not go far enough to affirm children, and that the ''free from hostility, mistreatment, and abuse'' threshold was insufficient.

A number of commenters recommended that the final rule should require all placement providers to meet the requirements to be a safe and appropriate placement, unless they obtain a waiver based on a religious objection. Other commenters argued that unless all placement providers are required to be supportive, some LGBTQI+ foster children will not receive the benefit of such placements because they are not comfortable disclosing their identity to their caseworker.

Conversely, many commenters wrote that the proposed rule relies on a false assumption that only placements that support a child's LGBTQI+ identity are safe and proper. A commenter explained that the proposed rule would create a two-tiered system for both foster families and child-placing agencies in which consideration is given to homes that promote a liberal view of sexuality and gender. Commenters stated that this could particularly impact providers with religious beliefs and viewpoints that oppose same-sex marriage and believe that there are only two genders, for example. One commenter stated that, absent clear definitions and parameters for a safe home, foster families who hold certain religious convictions are at risk of being inappropriately deemed unsafe. One commenter stated that a foster family should not have to agree with a child's beliefs and that the foster parent's belief regarding sexuality and gender identity does not compromise their ability to provide safe and appropriate care for non-LGBTQI+ children.

Response: ACF appreciates commenters' views and suggestions. ACF agrees that the terminology used in the NPRM, which referred to placements that are specially designated for LGBTQI+ children as ''Safe and Appropriate,'' needed clarification.

First, consistent with comments received, ACF confirms that Federal law requires all foster care placements to be safe and appropriate. ACF did not intend to suggest otherwise with the terminology it used in the NPRM. The agency sought to clarify how these Federal statutory requirements should be met in the context of LGBTQI+ children who, as the preamble to this rule demonstrates, have specific needs related to placements and services. One important aspect of a safe and appropriate placement for all children is that the placement be free of harassment, mistreatment, and abuse, and at 45 CFR 1355.22(a), we have incorporated regulatory language

making clear that this requirement applies to all children in all placements, including LGBTQI+ children. We discuss the change to using the term ''harassment'' rather than the term ''hostility''—the term we had employed in the NPRM—below.

Second, ACF acknowledges the concerns of commenters that families who do not meet or seek to meet specified requirements to serve as a designated provider for LGBTQI+ children could be mislabeled as ''unsafe'' under the terminology of the proposed rule. ACF acknowledges the particular concerns of faith-based providers and families of faith who serve as foster families. We appreciate the vital role that many families and providers of faith play in the child welfare system, and ACF is committed to upholding Federal legal protections for religious exercise, free speech, or conscience as further discussed in the ''Response to Comments Raising Statutory and Constitutional Concerns'' section of this preamble.

In response to these concerns, HHS has revised the terminology used in the final rule. The rule now uses the phrase ''Designated Placements'' as shorthand to refer to providers that are specially designated to serve LGBTQI+ children because they have made a set of commitments and undergone training to better meet the needs of LGBTQI+ children. State and Tribal agencies must have available a sufficient number of these placements as part of their responsibilities to satisfy the statutory requirement that all children in foster care have access to a safe and appropriate placement.

ACF disagrees with commenters who asserted that placements that affirm the identity of LGBTQI+ children are not beneficial for the child. As described in the introductory section of this preamble addressing Mental Health Needs of LGBTQI+ Youth, an extensive body of research consistently shows that when LGBTQI+ youth experience supportive environments and services, they experience the same positive mental health outcomes as other youth. Further, evidence from studies, listening sessions, and Congressional testimony makes clear that many LGBTQI+ foster youth do not currently receive placements or services that are safe and appropriate, as required by statute. In view of the data, ACF disagrees with the commenter's view that supportive placements are not necessarily desirable for safe and appropriate placement of children.

Comments: Multiple commenters asked for clarification of what specific requirements would apply to placement providers (*i.e.,* foster family homes, child care institutions) that do not choose to become Designated Placements for LGBTQI+ children. Commenters asked that ACF provide examples of what such providers would and would not be required to do. For example, some commenters vocalized the importance of allowing placement providers to talk with children about their own feelings, and to have the ability to offer alternative viewpoints to LGBTQI+ children. Conversely, many commenters also suggested that the rule be expanded to require that all foster parents should be able to meet the needs of any child who enters their home to ensure that all children, including those who identify as LGBTQI+, are able to thrive in care.

Response: As noted above, ACF appreciates the opportunity to clarify that all children in foster care are entitled to safe and appropriate care under Federal law, regardless of whether they are LGBTQI+ or not, and if they are LGBTQI+, regardless of whether they are in a Designated Placement. Titles IV–E and IV–B of the Act provide protections that are designed to ensure that while in foster care, all children receive ''safe and proper care'' (Social Security Act section 475(1)(B), 42 U.S.C. 675(1)(B)). Specifically, as part of its title IV–E and IV–B plans, an agency must develop a case plan for each child in foster care that, among other things, assures that the child receives ''safe and proper'' care and ''address(es) the needs of the child while in foster care'' (*Id.*). This statutory process includes a ''discussion of the appropriateness of the services that have been provided to the child under the plan'' (*Id.*). Similarly, the title IV–E/IV–B case review system requires that the agency have procedures for assuring that each child has a case plan designed to achieve placements in the most appropriate setting available, consistent with the best interests and special needs of the child (Social Security Act sections 422(b), 471(a)(16), 475(1)(B), and 475(5), 42 U.S.C. 622(b), 671(a)16), and 675(5)). The responsibility to develop and implement foster children's case plans lies with the child welfare agency. Child welfare agencies assign foster children to placement providers in accordance with their case plans. These decisions are individualized and take many aspects of a child's circumstances into account. These general protections for safe and appropriate foster care placements apply to all placements and all children.

ACF appreciates the opportunity to further clarify what these general statutory provisions require. These statutory terms, which apply to all placements, at a minimum mean that the placement must be free from harassment, mistreatment, and abuse—including related to a child's sexual orientation, gender identity, or LGBTQI+ status. In this final rule, we use the term ''harassment'' in place of the term ''hostility'' used in the proposed rule. We agree with the concern, articulated by commenters, that the term ''hostility'' is insufficiently clear to provide guidance to providers. By using the term ''harassment,'' we seek to clarify that the general protections focus on the provider's conduct; a provider will not violate this rule simply because of the view or beliefs the provider may have or by good-faith and respectful efforts to communicate with LGBTQI+ children about their status or identities. Under its settled meaning in the law, the concept of harassment requires conduct that is sufficiently severe or pervasive to create an unsafe or hostile environment based on the child's characteristics. *See, e.g., Oncale* v. *Sundowner Offshore Servs.,* Inc., 523 U.S. 75, 78 (''When the workplace is permeated with discriminatory intimidation, ridicule, and insult that is sufficiently severe or pervasive to alter the conditions of the victim's employment and create an abusive working environment, Title VII is violated.'') (citation omitted).

Of course, children in foster care are especially vulnerable and rely on their providers to provide a supportive and protective environment. Protecting LGBTQI+ children from harassment, mistreatment, or abuse in all foster care placements is of particular importance given the vulnerability of these children. For example, as described in the preamble to this rule, a significant body of evidence demonstrates a connection between the risk that a LGBTQI+ child will consider or attempt suicide and the conduct and treatment of their caregivers towards the child's sexual orientation or gender identity. A 2009 study cited above showed that ''LGB young adults who reported higher levels of family rejection during adolescence were 8.4 times more likely to report having attempted suicide [and] 5.9 times more likely to report high levels of depression'' compared with children of families of low or no such behaviors.[30] Application of the legal

[30] Ryan, C., Huebner, D., Diaz, R.M., & Sanchez, J. (2009). *Family rejection as a predictor of negative health outcomes in white and latino lesbian, gay, and bisexual young adults.* Pediatrics, 123(1), *https://publications.aap.org/pediatrics/article-abstract/123/1/346/71912/Family-Rejection-as-a-*

Continued

definition of harassment must necessarily attend to this context. *See Oncale,* 523 U.S. at 81(1998) (determination of harassment ''requires careful consideration of the social context in which particular behavior occurs and is experienced by its target'').

Harassment does not include an isolated hurtful remark or action. But it can include deprivation of key resources. *See id.* at 650–651 (actionable harassment exists when it keeps ''female students from using a particular school resource—an athletic field or a computer lab, for instance''). Conduct need not physically deprive an individual of such a resource to constitute harassment; harassment includes conduct that so undermines and detracts from the victims' . . . experience [with the program], that the victim[s] are effectively denied equal access to [the program's] resources and opportunities.'' *Id.* at 651.

Harassment, mistreatment, or abuse of any child in foster care is impermissible in any placement. A provider that harasses a child about that child's religious beliefs or practices violates the general guarantee that all foster placements must be safe and appropriate. Similarly, a provider that harasses a child about that child's LGBTQI+ status or identity violates the same guarantee.

In response to commenters who sought clarity about what conduct would or would not be permissible in placements that had not sought designation as a Designated Placement, ACF appreciates that some providers, like some caregivers, parents, and kin, may struggle to understand an LGBTQI+ child's identity, or have questions or concerns about a child's wellbeing upon learning that a child in their care is LGBTQI+. Good-faith and respectful efforts to engage children appropriately do not constitute harassment, mistreatment, or abuse. However, though the inquiry must be fact specific, providers can cross the line into harassment, mistreatment, or abuse if they are found to have engaged in behaviors such as punishing the child, subjecting the child to harsher rules, or excluding the child from community activities because they are LGBTQI+; or disparaging the child, calling them shameful, or using slurs or derogatory language because they are LGBTQI+. Such conduct can also constitute prohibited retaliation as outlined in paragraph (d) of this rule.

ACF understands that many providers will be learning over time how to best engage LGBTQI+ children. As discussed below at *Section 1355.22(b)(3) Placement and Services Decisions and Changes,* ACF recognizes that some providers may be willing to accept and benefit from additional resources and training in order establish a supportive environment for an LGBTQI+ child. ACF will provide technical assistance and guidance to agencies to support training and resources for providers who desire such training. ACF again notes that good-faith and respectful efforts to communicate with LGBTQI+ children about their status or identity do not constitute harassment, mistreatment, or abuse.

Additionally, consistent with the proposed regulation, this final rule requires that the title IV–E/IV–B agency ensure that no LGBTQI+ child experience retaliation in any placement, including those that are not Designated Placements. Revisions to the rule's nonretaliation provisions are described below. Accordingly, if a placement provider were to engage in (or attempt to engage in) retaliation against an LGBTQI+ child, the title IV–E/IV–B agency must take steps to protect the child from such retaliation. Depending on the circumstances and child's wishes, those steps could include moving the child to a new Designated Placement.

ACF reiterates that the final rule does not directly regulate the actions of individual foster care providers, as title IV–E/IV–B agencies are responsible for ensuring that each placement the agency makes meets requirements that it is safe and appropriate. As with all provisions of this rule, caseworkers who make individualized placement decisions about each child in foster care will make case-by-case determinations about which placement is in the best interest of the child to implement the requirements of Federal statutory protections as well as this rule.

ACF reiterates that this rule does not prohibit individuals and organizations from continuing to participate as foster care providers if they do not wish to serve as Designated Placements. Although states and tribes must have sufficient Designated Placements for LGBTQI+ children, the final rule does not require any placement to meet the requirements of a Designated Placement. The fact that a given provider has not sought to become a Designated Placement is not evidence that the provider has engaged in harassment, mistreatment, or abuse. We have added a new provision at § 1355.22(j), which states that nothing in this rule requires or authorizes a State to penalize a provider in the state's titles IV–E and IV–B program because the provider does not seek or is determined not to qualify for the status of a Designated Placement under this rule.

Consistent with the NPRM, this rule also requires that placement providers who have not chosen to become Designated Placements for LGBTQI+ children are informed of the procedural requirements to comply with the rule, including the non-retaliation provision, described below.

Comment: Many commenters said the proposed rule did not define the terms ''hostility,'' ''mistreatment,'' and ''abuse'' and sought clarity on their meaning. One commenter suggested the final regulations provide greater specificity about what actions by providers/social workers cannot be permitted because they undermine, rather than create safe and appropriate spaces for, LGBTQI+ and other children.

Response: As described elsewhere in this preamble, we are clarifying that as part of meeting the requirement to provide a safe and appropriate placement for all children in foster care, the title IV–E/IV–B agency must ensure that placements, including those for LGBTQI+ children, are free from harassment, mistreatment, or abuse. As we explain above, we now use the term ''harassment'' in place of the term ''hostility'' used in the NPRM in response to requests from commenters for greater clarity. Applying the ''harassment, mistreatment, or abuse'' test advances the goal of providing a safe environment to children while ensuring that agency staff and foster care providers will not violate those general protections simply for holding any view or belief or for good-faith and respectful efforts to communicate with LGBTQI+ children about their status or identity. Since those requirements and all of the rule's retaliation requirements apply to all foster care placements, they also necessarily apply to all placement providers, including Designated Placements. We note, as well, that the final rule's non-retaliation provision is not limited to providers. Thus, similar actions by caseworkers would also be prohibited by this rule. And because the general protections apply to all children, this final rule prohibits harassment, mistreatment, or abuse even when not directed against a child based on LGBTQI+ status or identity. For example, harassment of a child because of their religious beliefs or cultural practices would violate those general statutory protections. For further discussion of these issues, we refer the reader to the beginning of this section.

Predictor-of-Negative-Health?redirectedFrom=full text.

Final Rule Changes: We have revised the final rule so that 45 CFR 1355.22(a) now provides that as part of meeting the requirement to provide a safe and appropriate placement for all children in foster care, the title IV–E/IV–B agency must ensure that placements, including those for LGBTQI+ children, are free from harassment, mistreatment, or abuse.

Section 1355.22(b)(1) Designated Placements and Services for LGBTQI+ Children

The NPRM preamble explained that title IV–E/IV–B agencies should have a sufficient number of placements specially designated to serve LGBTQI+ children throughout their foster care system to meet the requirement of the proposed rule to ensure that a safe and appropriate placement is available for and provided to each LGBTQI+ child in foster care.

Comments: Several commenters asked for clarification on preamble language regarding ''sufficient placements.'' For the determination of ''sufficient'' placements, they expressed concern that, in their view, the NPRM preamble failed to clearly articulate how agencies must determine whether their networks would include enough providers. Commenters cautioned that depending on how sufficient numbers are calculated, educational continuity and keeping children in their communities could be undermined. Commenters also stated the proposed rule failed to clarify how different placement types would be factored into determinations of sufficient numbers of providers. One commenter emphasized the need for geographic representation of placements.

Response: As noted above, the final rule clarifies that all providers must be safe and appropriate for all children. Title IV–E/IV–B agencies need to have sufficient Designated Placements to be responsive to the needs of LGBTQI+ children. Consistent with the proposed rule, this final regulation does not prescribe a specific number of Designated Placements that will be needed in a given child welfare program. Title IV–E/IV–B agencies are in the best position to determine the number of such placements that will be required to meet their local needs and comply with this regulation. Accordingly, the regulation does not mandate a specified number of placements, but rather mandates what the title IV–E/IV–B agency must do to provide access to Designated Placements. The title IV–E/IV–B agency will need to determine the number of placements needed to meet these requirements. In recognition of the diversity of programs and local contexts across the Nation, we are not seeking to establish a uniform, standard requirement that applies to all jurisdictions and populations. Each state and tribe is unique and best suited to identify their placement needs and how to meet the provision in the final rule based on considerations such as variation in population; geographical disbursement including rural, remote, and urban populations; and the number of children in need of foster care placements, among other consideration. ACF encourages agencies to use data, modeling, and case work to estimate how many Designated Placements may be needed. ACF will provide further technical assistance to states and tribes to help them achieve this requirement. As we discuss below, this final rule clarifies that nothing in this rule shall be construed to require or authorize a state or tribe to penalize a provider in the title IV–E and IV–B program because the provider does not seek or is determined not to qualify as a Designated Placement under this rule.

The final rule also clarifies the requirements for a placement to be considered a Designated Placement for LGBTQI+ children. First, in addition to the protections generally applicable, the provider must commit to establish an environment that supports the child's LGBTQI+ status or identity. We have added the term ''commit'' to reflect that assent to this designation will be documented by title IV–E/IV–B agencies and in recognition that current placements, working toward designation as part of a placement stabilization plan, may express their commitment while working to establish the environment as described in the rule. The criteria for Designated Placements include provider training as discussed below. Finally, a Designated Placement must facilitate the child's access to age- or developmentally appropriate resources, services, and activities that support their health and well-being.

Provider Training for Designated Placements

The proposed rule clarified that for a placement to be considered specially designated for an LGBTQI+ child, the provider must be ''trained to be prepared with the appropriate knowledge and skills to provide for the needs of the child related to the child's self-identified sexual orientation, gender identity, and gender expression.'' In the NPRM, we requested comments on how ACF can ensure training curriculums for foster care providers are of high quality.

Comment: Many commenters responded with recommendations on how ACF can ensure training curricula for foster care providers are of high quality. Many commenters recommended ACF work with LGBTQI+ youth with lived experience and other experts in the community to develop core elements that should be presented in high quality trainings. One commenter recommended that trainings and measures of success should be reviewed and evaluated by LGBTQI+ youth with lived experience. Several commenters recommended ACF ensure trainings are certified by organizations with experience serving LGBTQI+ children. One commenter recommended ACF develop a set of guidelines for placement providers' trainings to ensure the trainings address a robust set of topics. One commenter recommended ACF create a few standards for key concepts that must be included in trainings, at minimum, and discuss how to create supportive and inclusive environments for all sexual orientations and gender identities. The commenter also recommended trainings provide strategies on how to ask and respond to questions around these topics in a respectful way and that therapists who work with LGBTQI+ youth in care should provide evidence-based services and care. One commenter recommended all training include information about the critically important role of faith for the mental health of LGBTQI+ youth and that ACF should urge states to approve diverse training options, including at least one approved training sequence designed by and for theologically conservative faith-based providers. Several commenters recommended provider training should be offered annually for new resource families or as an opportunity for a training ''refresher'' and ideally should be coupled with coaching opportunities to reinforce training content. One commenter recommended training modules be updated and provide for recurring trainings as the agency best sees fit and that ACF should put in place a system to implement a data check to understand the effectiveness of these training programs. Several commenters recommended ACF highlight programs that have been developed to work with existing resource families and recommend that States provide similar programs to placement providers who are assessed as not yet supportive to LGBTQI+ children. One commenter recommended ACF should provide specific funding and grant opportunities to assist states and tribes to provide appropriate

training pertaining to LGBTQI+ children in foster care.

Many commenters had suggestions about foster care provider training, such as requiring that providers receive relevant trainings and resources that enable and empower them to care for LGBTQI+ children; agencies offer the same provider training requirements for kinship caregivers, and offer expanded provider training to ensure that all kinship and foster caregivers are equipped to be safe and appropriate, regardless of the child's sexual orientation or gender identity; and incentives are offered to agencies using evidence-based trainings. Another commenter said that being designated to provide care for LGBTQI+ children should not be solely defined by the receipt of specific provider training and instead be determined by an ability and willingness of the caregiver to meet the child's needs. Commenters also requested clarity on what constitutes ''appropriate knowledge'' and ''skills,'' recommending ACF work with faith-based groups on provider training development, while others suggested not to be overly specific. Other commenters disagreed saying that there is no ''official federal training available'' for providers and that since foster care training curriculum are administered by state and county authorities, enforcing specific provider training requirements would violate individual state statues. Other commenters suggested adding information about professional standards as part of the provider training requirement.

One commenter suggested expanding the rule to include training for all service providers, including attorneys and guardians ad litem.

Response: We considered all of the recommendations and comments. We have revised the final rule in paragraph (b)(1)(ii) to add additional specificity to the training for foster care providers. In addition to requiring the training to reflect evidence, studies, and research about the impacts of rejection, discrimination, and stigma on the safety and wellbeing of LGBTQI+ children, the final rule also requires the training to provide information for providers about professional standards and recommended practices that promote the safety and wellbeing of LGBTQI+ children. Those recommended practices should reflect evidence-based supportive behaviors shown to improve health and other outcomes for LGBTQI+ children and exclude behaviors shown to lead to poor health outcomes for LGBTQI+ children. ACF acknowledges that training materials could be improved through engagement with people with lived experience, and strongly encourages title IV–E/IV–B agencies to do so, though we have not chosen to make it a requirement. So long as the requirements in this final rule are satisfied, ACF will defer to states and tribes on how to best incorporate these additional requirements into their training. ACF will provide technical assistance to help agencies implement this requirement.

The final rule does not extend these training requirements in paragraph (b)(1)(ii) beyond the foster care provider, as the training is focused on becoming a Designated Placement for a child. ACF acknowledges title IV–E/IV–B agencies should offer training and services to kinship caregivers and foster families that opt to become Designated Placements for LGBTQI+ children, particularly those currently placed with them. The final rule in § 1355.22(b)(2) states that services and training can be offered to current providers, including kin, to help them become a Designated Placement if they wish and thus promote sibling unification, and retaining sibling, kinship, family, and community ties. ACF acknowledges that training on supportive services for LGBTQI+ children could be beneficial for guardians ad litem and attorneys. However, requirements for training attorneys are beyond the scope of this rule.

Other Comments on Designated Placement Requirements

Comment: One commenter wanted the rule to more clearly specify who is included in the term placement provider.

Response: Placement providers are foster family homes, child care institutions, or other facilities that provide foster care to children, consistent with the definition of foster care at 45 CFR 1355.20.

Comment: One commenter requested clarification on whether short-term, emergency placements are exempt from the Designated Placement requirements for an LGBTQI+ child if a designated provider is unavailable. One commenter expressed the need to afford flexibility for states to offer exceptions or alternatives for LGBTQI+ children placed with kin caregivers when it is in the best interest and desire of an LGBTQI+ child.

Response: The issues raised by the commenters regarding short-term or emergency placements are related to agency decision making and provider licensing which are determined at the local level. State and Tribal title IV–E/IV–B agencies that have placement and care responsibility of children who are in foster care have the authority to make placement decisions for the child. In doing so, they must consider the Federal statutory and regulatory requirements for foster care placements and must balance all of these factors in making a placement decision on a case-by-case basis. This requirement includes relative placement preferences, jointly placed sibling placement requirements, least restrictive placement requirements, and requirements for placements in close proximity to the parent's home and the child's school of origin. However, we are not revising the final rule to provide specific exemptions. ACF encourages title IV–E/IV–B agencies to work with foster care placement providers who wish to become Designated Placements, including relative placements to build their capacity to provide such placements through coaching, training, and education. As noted above, ACF encourages agencies to use case work, data, and modeling to ensure that there are enough placements as needed in specific geographic areas, which will help ensure that children are placed in proximity to the parent's home and child's school of origin. Ensuring adequate numbers of Designated Placements will also help increase the likelihood that LGBTQI+ children will be placed with siblings.

Comment: Several commenters had suggestions or requested clarification regarding the terms used in this provision of the NPRM. Several organizations suggested using the term ''developmentally appropriate'' instead of ''age-appropriate.''

Response: We agree with commenters that in addition to age-appropriate resources, services and activities, a child should have access to developmentally appropriate resources, services, and activities. Therefore, we are revising the final rule to read ''age- or developmentally- appropriate.'' This is to be consistent with the definition in section 475(11)(A) of the Act (Social Security Act Section 475(11)(A), 42 U.S.C. 675(11)(A)).

Final Rule Changes: The final rule provides requirements for a placement to be considered a Designated Placement, which goes beyond the general protection of an environment free of harassment, mistreatment, and abuse, which is now described as safe and appropriate. To be considered Designated, a placement must meet the criteria described in § 1355.22(b)(1).

Section 1355.22(b)(2) Process for Notification of and Request for Designated Placements

Section 1355.22(b)(2) describes the process the title IV–E/IV–B agency must implement to notify an LGBTQI+ child that they may request a Designated Placement or request that services be offered to their current placement to become a Designated Placement. In the NPRM, where the provision to request a placement for an LGBTQI+ child was located at § 1355.22(a)(2), ACF proposed that title IV–E/IV–B agencies must implement a process by which a child identifying as LGBTQI+ may request a placement specially designated as meeting specified requirements for LGBTQI+ children, and that the title IV–E/IV–B agency must consult with such child to provide an opportunity to provide input into that placement. The NPRM proposed that this process must safeguard the privacy and confidentiality of the child. It also proposed to require that title IV–E/IV–B agencies notify all children over the age of 14 that specially designated placements for LGBTQI+ children are available, as well as providing such notification to children under the age of 14 who have been removed from their home due to familial conflict about their LGBTQI+ status, and children who have disclosed their LGBTQI+ identity or whose LGBTQI+ identity or status is known to the agency. The NPRM further proposed that the notice should be provided in an age-appropriate manner both verbally and in writing, and that the notice must inform the child about how they request a safe and appropriate placement.

Notification Requirements—Frequency, Age, and Developmental-Appropriateness

Comment: Many commenters provided recommendations on how often the agency must provide the child notification and recommended providing multiple notifications to children. Suggestions included providing notice at least two times a year; continuously; at regular intervals; and no less than twice per year. One commenter stated that children should be notified within 72 hours of entering foster care that having a safe and appropriate foster placement is a right. They also recommended that youth should acknowledge receipt of rights at case hearings and placement changes and that rights be publicly posted in congregate care facilities, and accessible to youth in foster homes.

Response: There are existing mandated requirements for agencies to provide care and services to children in foster care. This includes conducting an initial case plan within 60 days of a child's removal and conducting monthly home visits with the child. These are opportunities that agencies already have in their ongoing work that will allow them to provide proper notifications in accordance with the rule; while the rule specifies information that must be included in the notice, agencies are not required to establish a new process to notify children that Designated Placements are available. ACF intends to clarify opportunities to ensure children are informed through technical assistance. We encourage agencies to use all opportunities available to ensure children are well informed. Therefore, we have determined not to make these changes in the final rule. However, ACF takes this opportunity to clarify that in response to comments about enforcement of the rule's provisions, the final rule provides for the notification requirement to be monitored through the CFSRs, a formal monitoring protocol in which the state's efforts to comply with title IV–E and IV–B program requirements are assessed at the case and systems level. This change is discussed below under *Section 1355.34(c) Criteria for Determining Substantial Conformity.*

Comment: Numerous commenters recommended that the notice of availability of safe and appropriate placements should be provided to all children regardless of age, rather than the age of 14 as specified in the NPRM. One organization commented that notice at age 14 is too late and should be provided at an earlier age. Another suggested varying ages at which to begin offering notifications.

Response: ACF appreciates the comments about the importance of providing notification to children. In the final rule, ACF has kept the age requirement for notification to all children 14 and over, in alignment with the existing case plan requirement in section 475(1)(B) of the Social Security Act.

Moreover, in addition to requiring agencies to notify all children age 14 and over, the final rule also requires agencies provide notice about Designated Placements to those under age 14 who are removed from their home due, in whole or part, to familial conflict about their sexual orientation, gender identity, gender expression or sex characteristics; have disclosed their LGBTQI+ status or identity; or whose LGBTQI+ status or identity is otherwise known to the agency. It also requires that the title IV–E/IV–B agency ensure that LGBTQI+ children have access to age- or developmentally appropriate services that support their needs related to their sexual orientation and gender identity or expression. This includes clinically appropriate mental and behavioral health care supportive of their sexual orientation and gender identity and expression as needed.

Comment: Many commenters recommended that the NPRM requirement for the written and verbal notice to be provided in an ''age-appropriate'' manner be revised. They recommended that age appropriate be changed to ''developmentally appropriate.''

Response: We agree with commenters that in addition to providing written and verbal notice in an age-appropriate manner, the notice should also be provided in a developmentally appropriate manner. Therefore, we are revising the final rule to read ''age- or developmentally appropriate.'' This is to be consistent with the definition in section 475(11)(A) of the Social Security Act, 42 U.S.C. 675(11)(A).

Requested Placements

Comment: A number of commenters stated that while the NPRM proposed that the agency must notify the child specified in the NPRM that a safe and appropriate placement was available, they understood it as written that a safe and appropriate placement is only available if the child requested the placement. Some commenters indicated that this would be too heavy a burden on the child to self-identify and to initiate the request, which would exacerbate negative health outcomes for these children. One commenter recommended removing all of paragraph (a)(2) in the NPRM because if all placements are safe and appropriate as required, there would be no need to request one, and others commented that they support this section as proposed.

Response: As we have previously discussed, the final rule expressly provides that all placements, including placements for LGBTQI+ children, must be safe and appropriate. However, we have clarified that because not all placements will be Designated Placements, the rule provides for a process by which a Designated Placement may be offered or requested. HHS intends that there are multiple processes through which Designated Placements may be provided to an LGBTQI+ child, including when initiated by a child's request.

Final Rule Changes: The final rule provides for a process by which an LGBTQI+ child may request a Designated Placement or request that

their current placement be offered services. The final rule maintains the proposed rule's minimum age of notification of 14 and over, and continues to require agencies to provide notice about Designated Placements to those under age 14 who are removed from their home due, in whole or part, to familial conflict about their sexual orientation, gender identity, gender expression, or sex characteristics; have disclosed their LGBTQI+ status or identity; or whose LGBTQI+ status or identity is otherwise known to the agency. In addition, the final rule adds a requirement that the notice given to children must also inform the child of non-retaliation protections and the process whereby a child may report concerns about retaliation.

Section 1355.22(b)(3) Placement and Services Decisions and Changes

Comments: A number of commenters raised concerns about the impact that they believed the proposed regulations would have on the placement stability of LGBTQI+ youth. One commenter raised a concern that if only some foster care providers are designated safe and appropriate for LGBTQI+ children, it may result in decreased placement stability for LGBTQI+ children. Other commenters stated that the result of an LGBTQI+ child requesting a placement that affirms their identity will be to move to another provider, and that such placement changes cause upheaval and trauma for children. Some commenters said that LGBTQI+ youth, especially those who are in placements with their siblings, would avoid requesting Designated Placements for fear of being separated from their siblings, community, or school.

Response: ACF agrees that placement stability is a vitally important component of a youth's experiences and outcomes in foster care, and that placement stability is impacted by a foster care provider being able to meet a child's individual needs. ACF further acknowledges that research shows that LGBTQI+ youth in the child welfare system have lower levels of placement stability compared with other youth.[31]

In response to concerns about placement stability, we note first that the placement stability of LGBTQI+ youth will be positively impacted by a title IV–E/IV–B agency's success in ensuring there are sufficient Designated Placements to meet the needs of LGBTQI+ youth. As clarified in the NPRM, IV–E agencies may claim Federal funds under title IV–E for certain activities to comply with this rule, including recruiting and training providers to be Designated Placements.

ACF further acknowledges that one consequence of an LGBTQI+ child requesting a Designated Placement may be a move to a new placement and that in certain instances, the child's first preference may not be a change in placement but rather that steps be taken to make the current placement more supportive of the child's LGBTQI+ status or identity. Accordingly, we revised the final rule in several important ways.

First, we have made clarifications at § 1355.22(b)(2) related to notification requirements. In addition to the requirement that title IV–E/IV–B agencies implement a process under which a child may request a Designated Placement, this final rule further requires that this process also enables a child to request services for a *current* placement to receive services to become supportive. Agencies must provide notice that the child can request a placement change or services for a current placement, and the process the agency will use for responding to the request. The final rule also clarifies that the title IV–E/IV–B agency's process for considering such a request must provide the child with an opportunity to express their needs and concerns.

Second, we have added a new section at § 1355.22(b)(3) which provides further clarity on how the title IV–E/IV–B agency should reach placement and services decisions. The final rule clarifies that when making placement and service decisions related to an LGBTQI+ child, the title IV–E/IV–B agency shall give substantial weight to the child's expressed concerns or requests when determining the child's best interests. As noted in the final regulatory text, placement decisions should give substantial weight to the child's requests; determining a child's best interests will require that the title IV–E/IV–B agency engage directly with the child to understand their needs and concerns.

The final rule further provides that, to support placement stability, when a request for a placement change or services is made, the title IV–E/IV–B agency must first determine whether actions could be taken to support the current provider in voluntarily meeting the conditions of a Designated Placement, and if the provider is willing to meet the conditions of a Designated Placement, requires that the title IV–E/IV–B agency use the case review process to regularly review the provider's compliance in providing a supportive environment. We believe this clarification in the final rule will allow more LGBTQI+ children to be safely served in their current placement.

Under these revised provisions, if an LGBTQI+ child expressed their preference to receive a Designated Placement, but their current provider had not sought to become a Designated Placement provider, the title IV–E/IV–B agency would be required to consider whether actions could be taken to support the current provider in meeting the conditions of a Designated Placement to maintain the child's placement stability, if the provider wishes to become such a placement. For example, the current placement provider could be offered the opportunity to receive the training needed to become a Designated Placement to better meet the needs of the LGBTQI+ child. Other steps to promote placement stability could include—consistent with child's best interests and the willingness of the provider—more regular visits by the caseworker, or counseling for the child alone or in conjunction with the placement provider to address any challenges.

As noted throughout this rule, we reiterate that nothing in this rule compels any provider to seek to become a Designated Provider. In the case of a provider who is not interested in becoming a Designated Placement for an LGBTQI+ child currently in their care, the title IV–E/IV–B agency could meet the child's needs by placing the child with a Designated Placement provider or, consistent with the child's preference for placement stability and the agreement of the current provider, by providing training and services necessary to make the current placement more supportive. To further support the placement stability of LGBTQI+ children, we reiterate that this rule's prohibition on retaliation encompasses unwarranted placement changes for a child because of their LGBTQI+ status or identity.

Compliance with some requirements of this rule will be assessed through the CFSRs and all requirements are subject to the partial review process. In pertinent part, the CFSRs assess the degree to which States have the necessary array of placement options available to serve the needs of all children who come into their care. The

reviews also assess state performance in ensuring placement stability.

Section 1355.22(c) Process for Reporting Concerns About Placements and Concerns About Retaliation

Section 1355.22(3) of the proposed rule described the process the agency must implement for LGBTQI+ children to report concerns about a placement that does not meet the requirements of this rule and concerns about retaliation. The NPRM proposed to require that title IV–E/IV–B agencies implement a process for LGBTQI+ children to report concerns about any placement that fails to meet the requirements of a placement that is specially designated for LGBTQI+ children. The NPRM proposed that this process must safeguard the privacy and confidentiality of the child. Like the requirement that certain children be notified that specially designated placements for LGBTQI+ children are available, the NPRM proposed that the same children be notified verbally and in writing about the process to raise concerns about a placement. Finally, the NPRM proposed to require that IV–E agencies ''respond promptly'' to a child's reported concern, consistent with the agency's timeframes for investigating child abuse and neglect reports, depending on the nature of the child's report.

Comment: Several commenters expressed their views on how an agency should respond to the child's placement concerns, when to make a placement change, and foster family home licensing considerations, such as placing the license on a hold while the family engages in training and is reassessed.

Response: State and Tribal title IV–E/IV–B agencies have placement and care responsibility for children who are in foster care, and this allows such agencies to make placement decisions for each child on a case-by-case basis. In reference to whether there should always be a placement change when a child expresses a concern, we want to clarify that, absent a safety concern or the specific desires of the child, placement changes should not necessarily be the first course of action. As noted above, the final rule requires that before initiating any placement changes, the title IV–E/IV–B agency must consider whether additional services and training would allow the current provider to meet the conditions for a Designated Placement, and whether the current provider is willing to meet the conditions of a Designated Placement. Thus, with the child's consent and subsequent agreement by the provider, we encourage the agency to offer the foster care provider supports including training, coaching, and information to enable the provider to provide an affirming home for the child. This approach should be prioritized when a child wishes to remain in their placement for reasons of sibling unification, proximity to family and community of origin and schools, wish to remain in a family-like setting, or generally to avoid placement disruption. Where caregivers agree to accept such services and training, we encourage agencies to work in an ongoing way to build caregivers' capacity to provide this kind of care for LGBTQI+ children.

Prompt Response to Concerns

In the NPRM, we requested public comment on whether and how best to define ''promptly'' as applied to the requirement at proposed paragraph (a)(3)(iii) that an agency respond promptly to a child's reported concerns.

Comment: Many commenters offered suggestions on how to define ''promptly'' as it applies to this paragraph. Many commenters responded with several suggestions recommending ''promptly'' be defined as immediate and that these instances should be investigated sooner than current agency timelines for investigating reports of abuse or neglect. Many included a timeframe for response in their recommendation to occur within two hours to 24 hours. Several expressed that any reported concerns should be handled with urgency as the LGBTQI+ population is already identified in the rule as having significant risk. Other commenters recommended ACF not define the term, leave flexibility to states to define it, and suggested that these requests be handled by an independent entity, such as an ombudsman.

Response: ACF has reviewed all of the suggestions, and, while we appreciate the comments, we are not defining ''promptly'' in the final rule. ACF is not mandating a uniform timeframe for agencies to respond to a placement concern as that would be unnecessary when agencies already have established protocols to respond to reports of child abuse and neglect investigations. As such, the title IV–E/IV–B agency will determine the timeframe for responding promptly to a child's report consistent with their existing timelines for agency child abuse and neglect reporting and investigating procedures commensurate with the seriousness of the child's concern. When there is reasonable cause to believe that a child is in imminent danger, most agencies require investigations to be initiated immediately, in as little as two hours and not longer than 24 hours, after the report is made. As part of its existing monitoring process, ACF may evaluate whether a title IV–E/IV–B agency is responding to all concerns promptly, including that those raised by LGBTQI+ children are responded with the same level of promptness as it responds to other comparable concerns. While this final rule does not dictate a timeline for response, a title IV–E/IV–B agency that treated concerns raised by LGBTQI+ children about the safety of their placements with lesser priority than concerns raised by other youth may be subject to the partial review process to determine compliance with this requirement.

Other Comments on Reporting Concerns About a Placement

Comment: Several commenters suggested that ACF monitor and enforce these provisions for responding to placement concerns to the maximum extent possible.

Response: These provisions in the final rule are monitored as part of the partial review process. This means that if ACF becomes aware of a potential non-compliance issue with the provisions in § 1355.22, it will initiate a ''partial'' review, which is a review of state and tribal title IV–E/IV–B plan requirements (45 CFR 1355.33(e)). If there is evidence of non-conformity identified through the partial review process, the state/tribal title IV–E/IV–B agency will be required to enter into a program improvement plan and make necessary changes to come into compliance. Therefore, since there is already an established protocol for monitoring, no changes to the final rule are warranted.

Comment: Several commenters recommended adding a requirement to engage LGBTQI+ youth with lived experience in process development. One commenter recommended that it should be required for agencies to have an independent forum for reporting, investigating, and resolution of reported concerns, such as a Foster Care Ombudsman. One commenter recommended that agencies provide updates about the ''investigation'' to youth and allow options for ongoing communication to keep youth updated such as phone call or email.

Response: We considered these comments and determined to retain the provision as proposed in the NPRM to allow agencies to design their notification processes. Instead, technical assistance is available to states and tribes as warranted in implementing in a manner consistent with best practices, including by engaging youth with lived

experience. Therefore, we are not making changes to the final rule.

Comment: Many organizations recommended adding that the written and verbal communication needed to be developmentally appropriate, rather than age appropriate.

Response: We agree with commenters that in addition to developmentally-appropriate services, a child should have access to developmentally-appropriate communications. Therefore, we are revising the final rule to read that ''notice must be provided in an age- or developmentally appropriate manner, both verbally and in writing.'' This is to be consistent with the definition in section 475(11)(A) of the Social Security Act, 42 U.S.C. 675(11)(A).

Final Rule Changes: As part of the final rule, ACF clarifies that, absent a safety concern or the specific desires of the child, placement changes should not necessarily be the first course of action. The final rule requires the process for reporting concerns about a child's placement also include reports about retaliation. In addition, it adds that a child should receive developmentally-appropriate notice both verbally and in writing of the process for reporting concerns about a placement or retaliation.

Section 1355.22(d) Retaliation Prohibited

In the proposed rule, ACF proposed to require that title IV–E/IV–B agencies must have a procedure to ensure that no LGBTQI+ child in foster care experiences retaliation for disclosing their LGBTQI+ identity, for requesting a specially designated placement for LGBTQI+ children, or for reporting concerns that their current placement does not meet their needs related to being LGBTQI+. The proposed rule described examples of what would be considered retaliatory under the rule.

Comment: Many commenters strongly supported the NPRM's prohibition on retaliation and said that such protections were important for the safety, health, and wellbeing of LGBTQI+ children who face heightened risks when they disclose their sexual orientation or gender identity.

Other commenters raised concerns about the retaliation prohibition and said that religious providers could be accused of retaliation for merely disagreeing with a child's sexual orientation or gender identity. As discussed in Section IV, a couple of commenters asserted that concepts included in the proposed rule that relate to a child's identity place individuals and organizations of faith at risk of being accused of retaliation that would unconstitutionally infringe on their free exercise of religion.

Response: ACF appreciates commenters' views on the rule's prohibition on retaliation. We agree with commenters who observed that LGBTQI+ children are particularly vulnerable to retaliation when their sexual orientation or gender identity is disclosed. We also acknowledge the concerns of some providers who worried about being accused of retaliation when engaged in conduct related to their faith or beliefs. As we address more fully below in our response to the First Amendment and Religious Freedom comments, ACF is committed to upholding Federal protections for free speech, religious exercise, and conscience for all providers and children in the child welfare system. In particular, we have developed this rule in a manner that respects these guarantees. The Department will apply Federal protections for religious exercise, free speech, and conscience, including by applying the Department's regulatory protections for seeking religious accommodations.

In response to requests for clarification, we are first more clearly specifying the actions for which retaliation is impermissible. The proposed rule had referred to retaliation for the child disclosing their LGBTQI+ identity; requesting a placement specially designated for LGBTQI+ children (which the final rule now refers to as Designated Placement); or for reporting concerns about the safety and appropriateness of their current placement. To this list, the final rule makes clear that the intended reference is to both LGBTQI+ status and identity, and further specifies that retaliation is impermissible for having a child's LGBTQI+ status or identity disclosed by a third party; for the child being perceived to have an LGBTQI+ status or identity; or for the child's request or report related to requirements for placements or services.

The proposed rule had specified that retaliation includes unwarranted placement changes including unwarranted placements in congregate care facilities; restriction of access to LGBTQI+ peers; or attempts to undermine, suppress, or change the sexual orientation or gender identity of a child; or other activities that stigmatize a child's LGBTQI+ identity. In response to commenters' requests for greater clarity on what actions would constitute retaliation, the final rule provides additional detail about such actions and how they interact with other provisions of the rule, such as the prohibition on harassment, mistreatment, or abuse in all foster placements.

Comment: Some commenters expressed concern that, in their opinion, the proposed rule did not provide sufficient reassurance that LGBTQI+ children would be protected from retaliation, whether for disclosure of their status or identity, requesting a new placement, or reporting a placement that is not safe and appropriate. One commenter expressed concern that absent Federal protections ''caseworkers could further harm children by engaging in discriminatory behavior,'' and shared the example of a caseworker blaming a child for mistreatment they experienced as a result of their status or identity. This commenter was also concerned that the rule ''fails to protect all families, including kin, and current and prospective foster and adoptive parents'' from discrimination in their interactions with the child welfare system. Finally, this commenter noted that absent Federal protections, officials might use retaliatory child protection investigations, such as a state investigating a parent because of bias toward the child's or the parent's disclosed or perceived identity or status.

Response: We agree with commenters that it is important that children have strong protections against retaliation for having disclosed their LGBTQI+ identity or status and having requested a new placement or reporting a placement that is not safe and appropriate. As a result, we have made several adjustments in the final rule.

First, we specify in paragraph (d)(2)(v) that the title IV–E/IV–B agency will be considered to have retaliated against a child if it uses information about the child's LGBTQI+ identity or status to initiate or sustain a child protection investigation or discloses information about the child's LGBTQI+ identity or status to law enforcement in any manner not permitted by law. While both of these actions already fall under the definition of retaliation in paragraph (d)(2)(iv), which includes ''disclosing the child's LGBTQI+ status and/or identity in ways that cause harm or risk the privacy of the child,'' we believe it is appropriate to name these actions directly in order to give assurance to LGBTQI+ children that such actions are not allowable.

Second, in paragraph (d)(2)(vi), we clarify that the prohibition on retaliation includes retaliation against current or potential caregivers (including foster parents, pre-adoptive parents, adoptive parents, kin caregivers, and birth families) for supporting a child's LGBTQI+ status or identity. We believe

this is necessary to ensure that children can benefit from the protections of this rule, as we are concerned that retaliation against a supportive adult could be used in an effort to prevent or discourage an LGBTQI+ child from requesting or receiving a Designated Placement or necessary services. While we do not define all of the actions that could constitute ''retaliation'' in this context, as it may vary significantly depending on circumstances, we understand it to mean any harmful action taken against a current or potential caregiver for an LGBTQI+ child because of their support of that child's LGBTQI+ identity or status.

Third, § 1355.22(b)(3)(iii) of the final rule includes a requirement that children receiving notice of the availability of Designated Placements also be provided notice of the retaliation protections in this final rule and describe the process by which a child may report a concern about retaliation. The title IV–E/IV–B agency must provide this information in an age- and developmentally appropriate manner, verbally and in writing, and must safeguard the confidentiality of the child. At a minimum, the agency must provide the notice about this process to: (1) all children age 14 and over, and (2) children under age 14 who have been removed from their home due to familial conflict about their sexual orientation, gender identity, gender expression or sex characteristics or have disclosed their LGBTQI+ status and/or identity, or it is otherwise known to the agency. In addition, the agency must respond promptly to the child's concerns, consistent with the agency's timeframes for investigating child abuse and neglect reports.

Finally, in response to comments raising concerns about enforcement of these provisions and safeguards on keeping a child free from retaliation, ACF welcomes the opportunity to clarify that state agencies' compliance with the final rule's requirements will be monitored by CB through the CFSRs, a formal monitoring protocol in which the state's efforts to comply with title IV–E and IV–B program requirements are assessed at the case and systems level.

Comment: Several commenters recommended that the provision be expanded to all children in foster care to ensure no child experiences retaliation. One commenter recommended modifying the final rule to include a prohibition on retaliation of the disclosure of the child's LGBTQI+ ''status'' in addition to the child's identity.

Response: We agree with commenters that retaliation against any child because of their characteristics or identity is harmful and impermissible. For example, title VI of the Civil Rights Act of 1964, which prohibits all recipients of Federal financial assistance from discriminating on the basis of race, color, or national origin, specifically prohibits retaliation against anyone seeking to vindicate a right under that law. This prohibition includes discrimination and retaliation against children based on their shared ancestry or ethnic characteristics, including children who are perceived to be Jewish, Christian, Muslim, Sikh, Hindu, or Buddhist, or of another religious group, if the discrimination is based on their ancestry or ethnic characteristics. The purpose of this rule is to clarify the specific protections necessary for LGBTQI+ youth to receive safe and proper care in an appropriate placement. In particular, safe and proper care for LGBTQI+ youth requires that no child in foster care experiences retaliation as a result of their LGBTQI+ status or identity or for being perceived to have an LGBTQI+ status or identity. This intent is reflected in the current text of the final rule.

Comment: One commenter recommended modifying the final rule to include that a child should not experience retaliation if an LGBTQI+ child's identity is disclosed by a ''third party.''

Response: We agree with the commenter and modified the final rule to ensure a child does not experience retaliation as a result of disclosure of an LGBTQI+ child's identity or status by a third party. As such, the provision now includes a prohibition on retaliation whether the child or a third party discloses the LGBTQI+ child's status or identity. This is to ensure that the provision is applied as broadly as needed and provides protection for a child whose identity or status is shared with another party resulting in the possibility of retaliation as discussed in the preamble of the proposed rule.

Comment: Several commenters recommended that retaliation include restricting normalcy activities (*e.g.,* attempts to restrict access to activities that allow youth to make and maintain friends, and develop problem solving skills) due to their sexual orientation or gender identity. One commenter recommended modifying the final rule to reflect that retaliation is not limited to items listed and can include restriction of access to supportive community resources.

Response: ACF agrees that restricting an LGBTQI+ child's access to age- and developmentally appropriate supportive resources or activities, or access to supportive peers or family members, based on their LGBTQI+ status or identity, would constitute retaliation under this rule. We also agree that disclosing the child's LGBTQI+ status and/or identity in ways that cause harm or risk the privacy of the child are impermissible forms of retaliation. The final rule clarifies the conduct that will be considered retaliation includes the examples listed at § 1355.22(d)(2)(i) through (vi).

Comment: One commenter voiced concern about a ''lack of an enforcement policy related to retaliation'' and stated without significant enforcement policy, the provision is hollow.

Response: We considered the commenters concern and, to provide further clarity, modified the regulatory provisions for monitoring in the final rule. The final rule now includes monitoring a state agency's compliance with the requirements of § 1355.22(d) through the CFSR.

Final Rule Changes: Consistent with the Protections Generally Applicable for all placements, discussed above, the final rule clarifies that harassment, mistreatment, or abuse would also be considered retaliation. In response to comments on other possible retaliatory actions against LGBTQI+ children or their caregivers, the final rule also specifies that a title IV–E/IV–B agency, provider, or any entity acting on behalf of an agency or provider will be considered to have retaliated against a child if it restricts access to developmentally appropriate materials or community resources; discloses private information in a way that causes harm or violates the rights of a child; or uses information about the child's LGBTQI+ status or identity to initiate or sustain an investigatory action. The final rule extends the prohibition on retaliation to include retaliation against current or potential caregivers. It clarifies a requirement that children receiving notice of the availability of Designated Placements also be provided notice of the retaliation protections, and it provides for monitoring state agency compliance through the CFSR.

Section 1355.22(e) Access to Supportive and Age- or Developmentally Appropriate Services

Section 1355.22(a)(5) of the proposed rule described the requirements for the agency to provide access to services that support the child's LGBTQI+ status and/or identity and includes clinically appropriate mental and behavioral health care that is supportive of their

sexual orientation and gender identity and expression.

Comment: Many organizations suggested adding medical care (some referred to this as health care) and clarifying what this entails. Several commenters said it was unclear whether the rule allows or requires gender-affirming medical care, with some commenters opposing access to gender-affirming care and others supporting such access. Many organizations suggested the rule should state that gender-affirming medical care is among the potential age-appropriate resources and services that may support transgender children's health and well-being. Other commenters said that gender-affirming care should never be considered ''appropriate'' services.

Response: This rule does not establish any standard of medical care. Title IV–E agencies determine what services to provide to an individual child, on a case-by-case basis, in accordance with statutory requirements. Specifically, the case plan must assure ''that services are provided to the parents, child, and foster parents in order to improve the conditions in the parents' home, facilitate return of the child to his own safe home or the permanent placement of the child, and address the needs of the child while in foster care, including a discussion of the appropriateness of the services that have been provided to the child under the plan''. See section 475(1)(B) of the Social Security Act, 42 U.S.C. 675(1)(B). What services are appropriate for an individual child would depend on many individual factors, including physicians' recommendations, the input and consent of the child's authorized legal representative or parent, the child's input, and the best available medical guidance at the time. Nothing in this rule preempts state laws regulating the practice of medicine or prohibiting particular treatments.

Comment: Many commenters recommended explicitly defining mental and behavioral health care as broad and inclusive of wellness practices and alternative supports.

Response: Mental and behavioral health supports are examples of required supports for which the agency must provide access to all children in foster care, including LGBTQI+ children. As such, ACF has determined it is not necessary to provide a definition for these examples. Title IV–E/IV–B agencies will determine what mental and behavioral health care services are needed on a case-by-case basis in accordance with a child's case plan to, among other things, facilitate the child's safe return home or the permanent placement of the child.

Comment: Several commenters suggested explicitly prohibiting the use of so-called ''conversion therapy'' and other harmful interventions that undermine and conflict with a youth's identity. Other commenters asked about the definition and ability to use ''talk therapy.'' Others provided information that addressed out of scope issues regarding this topic.

Response: As we stated in the NPRM, efforts to change or suppress a child's sexual orientation, gender identity, or gender expression—also known as so-called ''conversion therapy''—are not supported by credible evidence and have been rejected as harmful by the American Academy of Child and Adolescent Psychiatry, the American Academy of Pediatrics, the American Psychiatric Association, the American Psychological Association, and the National Association of Social Workers, among others. The final rule, at § 1355.22(d)(2)(ii), includes ''Attempts to undermine, suppress, change, or stigmatize a child's sexual orientation or gender identity or expression through so-called ''conversion therapy'' as a form of prohibited retaliation against any child known or perceived to have an LGBTQI+ status or identity.

Section 1355.22(e) requires that the title IV–E/IV–B agency must ensure that LGBTQI+ children have access to age- or developmentally appropriate services that are supportive of their sexual orientation and gender identity or expression, including clinically appropriate mental and behavioral health supports, which can include forms of talk therapy.

Comment: Several commenters had suggestions or requested clarification regarding the terms used in this provision. Several organizations suggested using the term ''developmentally appropriate'' instead of ''age-appropriate.''

Response: We agree with commenters that in addition to age-appropriate services, a child should have access to developmentally appropriate services. Therefore, we are revising the final rule to read ''age- or developmentally appropriate''. This is to be consistent with the definition in section 475(11)(A) of the Social Security Act, 42 U.S.C. 675(11)(A).

Comment: A few commenters recommended ACF provide technical assistance, consultants, or funding to support recruitment of providers in rural areas to support LGBTQI+ children in foster care. Several organizations expressed their views on working with local and national agencies and individuals with lived experience to maintain a list of national resources to assist agencies in identifying supportive and age-appropriate services and to add standards of care for what constitutes clinically appropriate care and services.

Response: ACF has a current solicitation for a training and technical assistance contractor to assist states and tribes by providing training to increase Designated Placements for LGBTQI+ children and youth in foster care. ACF intends to issue implementation guidance for the final rule incorporating many of these recommendations for recruiting Designated Placement providers including in rural areas, including partnering with local and national agencies serving LGBTQI+ youth, and approaches which are informed by the lived experiences of LGBTQI+ children and youth in foster care.

Final Rule Changes: The final rule states that attempts to undermine, suppress, change, or stigmatize a child's sexual orientation or gender identity or expression through so-called ''conversion therapy'' is a form of prohibited retaliation against any child known or perceived to have an LGBTQI+ status and/or identity. The final rule also adds that, in addition to age-appropriate services, a child should have access to developmentally appropriate services.

Section 1355.22(f) Placement of Transgender and Gender Non-Conforming Children in Foster Care

In the NPRM, ACF proposed that when considering placing a transgender, gender non-conforming or intersex child in sex segregated child care institutions, the title IV–E/IV–B agency must place the child consistent with their gender identity. The NPRM further proposed to require that IV–E/IV–B agency also consult with the transgender, gender non-conforming, or intersex child to provide an opportunity to voice any concerns related to the placement when the agency is considering a placement in such a facility.

Comment: A commenter asked that the final rule clarify placement procedures for non-binary and Two-Spirit children living in sex-segregated child care institutions.

Response: As explained in the preamble to the final rule for § 1355.22, non-binary and Two-Spirit children are included throughout this regulation under the term LGBTQI+. Thus, this provision for the agency to place the child consistent with their gender identity also applies to non-binary and Two-Spirit children and we have added the language to reflect this in the

preamble for clarity. When making placement decisions for children whose gender identity doesn't meet the sex-segregated options at the child care institution, the title IV–E/IV–B agency should engage with the child to determine the safest living arrangement that is in the child's best interest among the options that are available, giving substantial weight to the child's request.

Comment: Some commenters expressed concern about the NPRM requirement for children to be placed in sex segregated child care institutions consistent with their self-identified gender identity, not their ''biological sex.'' They stated it is a danger and ''disregards the child's safety and privacy interests to be placed in a mixed-sex setting'' that a child ''may find uncomfortable and invasive or, at worst, unsafe.'' One state recommended that the final rule allow for discussions that incorporate the child's preference as well as safety and risk concerns.

Response: ACF agrees that it is important to incorporate a child's preference for all placements. While ACF believes the requirement to offer a transgender or gender non-conforming child a placement consistent with their gender identity is most applicable to placements in child care institutions and sex segregated facilities, we have determined that it is necessary to extend that requirement to apply to all placements for transgender and gender non-conforming children. ACF accordingly updated the final rule text to apply to all placements for transgender and gender non-conforming children. The final rule text states that, when considering placing a child, the title IV–E/IV–B agency must offer the child a placement consistent with their gender identity. The updated regulatory text is consistent with the statutory requirement to place children in the ''most appropriate setting available'' (section 475(5) of the Social Security Act, 42 U.S.C. 675(5)(A)) and the rule's requirement that title IV–E/IV–B agencies must give substantial weight to the child's expressed concerns or requests when determining the LGBTQI+ child's best interest when making placement and service decisions.

ACF disagrees with the assertion that allowing transgender and other youth to access sex-segregated facilities consistent with their gender identity will diminish safety or privacy. Courts have held that all individuals' safety and privacy can be protected without also excluding transgender individuals from accessing sex-separate facilities and activities consistent with their gender identity.[32] Title IV–E/IV–B agencies have a range of tools at their disposal to accommodate any individuals' privacy concerns in a nondiscriminatory manner. However, a title IV/IV–B agency will be in violation of this rule if it refuses to offer a child a placement consistent with their gender identity. We also note that no application of this rule shall be required insofar as it would violate Federal religious freedom, conscience, or free speech law and that providers may request an accommodation from any rule provision as described in Section IV of the preamble, below.

In addition, the NPRM proposed to require consultation with the child and the final rule maintains this requirement. The final rule requires that the title IV–E/IV–B agency consult with the child to provide an opportunity for the child to voice any concerns related to their placement when the agency is considering placing the child in such a facility.

Comment: One commenter was concerned that the NPRM did not account for the preferences of parents whose rights are intact in these agency placement decisions.

Response: Title IV–B/IV–E agencies have an established responsibility to engage with parents. For example, under 45 CFR 1356.21, title IV–E agencies ''must make reasonable efforts to maintain the family unit and prevent unnecessary removal of a child from [their] home, as long as and the child's safety is assured; [and] to effect the safe reunification of the child and family if temporary out-of-home placement is necessary to ensure the immediate safety of the child.'' Under state and tribal law, parents often also retain certain rights even after their children have been removed from their physical and/or legal custody. We expect that agencies will act with appropriate awareness of parental rights under the law of the applicable state or tribe.

Comment: A few commenters expressed concerns that the provision may conflict with state laws and policies that govern sex-segregated childcare institutions and that many sex-segregated childcare institutions are not equipped to meet these placement requirements.

Response: The requirement to offer children a placement consistent with their gender identity is based on ACF's careful consideration of current research on best practices to promote children's health and wellbeing, as described in Section II of the preamble. This regulatory requirement does not preempt state or tribal laws regarding sex-segregated institutions. It simply requires that a child be offered a placement that is consistent with their gender identity. It thus clarifies, for children in foster care, the IV–E statutory requirement to place foster children in ''a safe setting . . . consistent with the best interest and special needs of the child.'' Section 475(5) of the Social Security Act, 42 U.S.C. 675(5)(A). If a state law prohibits placement in sex-segregated institutions based on gender identity, then the title IV–E/IV–B agency should explore all other placement options in order to offer a foster child a placement consistent with their gender identity, while also meeting the child's other particular needs. ACF further notes that pursuant to § 1355.22(d)(2)(iii), agencies may not place children in child care institutions solely due to their sexual orientation or gender identity or expression or allow child care institutions or other providers to segregate or isolate children on the basis of their sexual orientation or gender identity or expression.

Comment: Some commenters suggested having single or private rooms for youth who are non-binary and Two-Spirit who are placed in sex-segregated childcare institutions to ensure their comfort.

Response: ACF appreciates the commenter's concern for the privacy of such children and notes nothing in this rule would preclude those entities from accommodating the privacy needs of any child in their care. Appropriate placements should be determined based on the child's individual needs and their expressed preferences. We understand the commenters' concern that such children might feel especially uncomfortable in sex-segregated childcare institutions and encourage agencies to work with such children to ensure they receive appropriate placements.

Comment: Commenters made recommendations throughout about how Federal funding should be used and that it should be prohibited in specified circumstances, such as if a childcare institution does not allow children to be placed according to their gender identity.

Response: The final rule does not regulate how Federal funding under title IVE is reimbursed to states and tribes. Eligibility for title IV–E reimbursement of the placement of a particular child is based on many factors, including that the child is placed in a child care institution or foster family home as defined in section 472 of the Social Security Act. The final rule implements

[32] *See, e.g., Grimm* v. *Gloucester City*, 972. F.3d 586 (2020).

title IV–E and IV–B plan requirements, and not the particulars of title IV–E foster care funding. Therefore, the recommendations are not within the purview of this final rule and no changes were made to the final rule.

Final Rule Change: The final rule clarifies that the requirement for title IV–E/IV–B agencies to offer placements for transgender and gender non-conforming children consistent with a child's gender identity applies to all placements, not exclusively to sex-segregated child care institutions.

Section 1355.22(g) Compliance With Privacy Laws

As explained in the NPRM, title IV–E/IV–B agencies are prohibited from disclosing information concerning foster children for any purpose except for those specifically authorized by statute section 471(a)(8) of the Social Security Act. Information about a foster child's LGBTQI+ identity or status, as well as any other information in their foster care case file, is protected by these confidentiality requirements. Foster children's personal information may only be disclosed for specific authorized purposes, which are, in paraphrase: the administration of the title IV–E plan and that of other Federal assistance programs; any investigation, prosecution, or audit conducted in connection with any of those programs; and reporting child abuse and neglect to appropriate authorities. Under ACF regulations and policy, information that the IV–E/IV–B agency discloses for those allowable purposes may not be redisclosed by recipients unless the redisclosure is also for one of the enumerated allowable purposes. 45 CFR 205.50; Child Welfare Policy Manual 8.4E.

Comments: Commenters provided input on the impact of the regulations on the privacy and confidentiality of LGBTQI+ youth. In addition, in the NPRM we requested public comment on what further guidance states may need on producing administrative records to monitor and track requests for safe and appropriate placements for LGBTQI+ children, while protecting the privacy and confidentiality of all children.

Several commenters expressed concerns that children may feel unsafe disclosing their LGBTQI+ identity or reporting mistreatment in their current out-of-home placement due to their sexual orientation or gender identity. LGBTQI+ youth with lived experience in foster care have shared in comment letters, surveys, and testimony that they do not disclose their sexual orientation, gender identity or expression to foster parents and caseworkers for fear of lack of acceptance, unwarranted placement changes, fear of separation from siblings and/or unwarranted placements in congregate care facilities, feeling a ''taboo'' against sharing their LGBTQI+ identity, fearing prejudice, and lacking privacy. Commenters additionally stated that state laws restricting discussion of LGBTQI+ identities in school may have a chilling effect on whether children feel safe disclosing their sexual orientation or gender identity.

A few commenters made suggestions related to enhanced confidentiality provisions for data collection on a child's sexual orientation, gender identity, or sex characteristics. These included a recommendation to include a provision to require the agency to disclose information only when necessary for the wellbeing of the child or required by court, to regulate permissible uses of data, data sharing, and data security/storage protocols, to require consistency with confidentiality requirements for health data, and to require the child's consent to any disclosure under section 471(a)(8) of the Social Security Act (42 U.S.C. 671(a)(8)) about a specific child's sexual orientation, gender identity, or sex characteristics. Two commenters recommended provisions on how to store, seal and maintain a child's record. Specifically, they stated that the final rule should require agencies to seal physical records related to a child's sexual orientation, gender identity or expression and separately maintain the information from the case record and that electronic records should be maintained under separate, heightened data security levels.

Response: These experiences and concerns illustrate the need for data confidentiality, and protections from retaliation for disclosure or presumption of a child's LGBTQI+ identity and status. Such requirements are essential to help ensure that children will feel safe to disclose their identity and request Designated Placements.

Some states have existing privacy and data confidentiality requirements related to foster children's sexual orientation, or gender identity or expression. For example, California law provides that all children in foster care have the right ''to maintain privacy regarding sexual orientation and gender identity and expression, unless the child permits the information to be disclosed, or disclosure is required to protect their health and safety, or disclosure is compelled by law or a court order.'' Cal. Welf. & Inst. Code sec. 16001.9(a)(19). In response to comments, and to address risks related to the disclosure of a child's LGBTQI+ status or identity and to help ensure children feel safe in making such disclosures and requesting Designated Placements, the final rule includes a number of important protections. First, § 1355.22(b)(2) provides that the process for requesting a Designated Placement or services to make a current placement a supportive one must safeguard the privacy and confidentiality of the child, consistent with section 471(a)(8) of the Social Security Act (42 U.S.C. 671(a)(8)) and 45 CFR 205.50. Second, § 1355.22(c) provides that the process for reporting concerns about a current placement must safeguard the privacy and confidentiality of the child, consistent with section 471(a)(8) of the Act (42 U.S.C. 671(a)(8)) and 45 CFR 205.50. Third, § 1355.22(d)(2)(v) provides that prohibited retaliation includes disclosing the child's LGBTQI+ status or identity in ways that cause harm or risk the privacy of the child or that infringe on any privacy rights of the child. Fourth, § 1355.22(g) specifies that the title IV–E/IV–B agency must comply with all applicable privacy laws, including section 471(a)(8) of the Act (42 U.S.C. 671(a)(8)) and 45 CFR 205.50, in all aspects of its implementation of this section, and that information that reveals a child's LGBTQI+ status or identity may only be disclosed in accordance with law and any such disclosure must be the minimum necessary to accomplish the legally-permitted purposes. The amount of information necessary to achieve the purpose of the disclosure would be determined on a case-by-case basis and in consideration of the best interest of the child. For example, the information needed to make a referral for a child to receive services related to the child's identity or status could be greater than another type of referral for services. In addition, states that allow open courts would want to be mindful about the information shared in reports to the court as that information could be later shared openly.

The incorporation of these provisions is consistent with existing legal requirements relating to privacy and confidentiality. As discussed earlier in the preamble, title IV–E/IV–B agencies are required to maintain a child's information confidentially and may disclose it only for purposes specifically authorized by law. Under ACF regulations and policy, information that the IV–E/IV–B agency discloses for those allowable purposes may not be redisclosed by recipients unless the redisclosure is also for one of the enumerated allowable purposes. 45 CFR 205.50; Child Welfare Policy Manual

8.4E. Regarding the statutory provision that allows title IV–E/IV–B agencies to disclose a child's information for investigations, prosecutions, criminal or civil proceedings, or audits ''conducted in connection with the administration of any [Federal assistance] programs,'' the requirement that the proceeding or audit be ''conducted in connection with the administration'' of title IV–E or another Federal assistance program strictly limits the disclosures allowed. Title IV–E/IV–B agencies may not disclose information for purposes such as investigating whether children or families are in compliance with generally-applicable state or local laws, as such investigations would not be conducted in connection with the administration of a Federal assistance program.

Final Rule Changes: The final rule includes several revisions to address privacy protections. Paragraph (g) was added to make explicit that title IV–E/IV–B agencies must comply with all applicable privacy laws, including section 471(a)(8) of the Act and 45 CFR 205.50. Information revealing a child's LGBTQI+ status or identity may only be disclosed in accordance with law. Such disclosure should be the minimum necessary to accomplish the legally-permitted purposes. The final rule also includes disclosing the child's LGBTQI+ status or identity in ways that cause harm as conduct that constitutes prohibited retaliation. It also specifies that the title IV–E/IV–B agency must comply with all applicable privacy laws.

Section 1355.22(h) Training and Notification Requirements

In the NPRM, ACF proposed to require that in order to meet the requirements of the rule, title IV–E agencies must ensure that its employees who have responsibility for placing children in foster care, making placement decisions, or providing services are trained to implement the procedural requirements of this section, and are adequately prepared with the appropriate knowledge and skills to serve an LGBTQI+ child related to their sexual orientation, gender identity, and gender expression. The NPRM further proposed that the IV–E agency must ensure that all of its contractors and subrecipients who have responsibility for placing children in foster care, making placement decisions, or providing services are informed of the procedural requirements to comply with this section, including the required non-retaliation provisions. Finally, the NPRM proposed that the IV–E agency must ensure that any placement providers who have not chosen to become designated as safe and appropriate placements for LGBTQI+ children are informed of the procedural requirements to comply with this section, including the required non-retaliation provision.

Comment: Several organizations recommended engaging LGBTQI+ youth with lived experience in development and implementation, providing guidance or resources on minimum number of hours, frequency of trainings, curricula, topics, developing a list of curricula, or core elements for training requirements for employees. Many of the commenters provided specific topics and/or core elements and suggested curricula. A few commentors also recommended that the trainings be certified by certain non-profit agencies.

Response: We have reviewed all the recommendations and appreciate recommendations for high-quality training. ACF has determined not to make any changes to the final rule in order to provide appropriate flexibility to agencies to determine the breadth of training consistent with the statute and rule and not prescribe specific requirements on hours, frequency, development, implementation, topics, or core elements. ACF intends to issue implementation guidance for the final rule which incorporates many of these recommendations for high-quality initial and ongoing training for providing supportive care for LGBTQI+ children. We expect the guidance will be informed by the lived experiences of LGBTQI+ children and youth in foster care, and we encourage title IV–E/IV–B agencies to engage LGBTQI+ youth with lived experience in foster care in developing employee trainings. Further, ACF is committed to providing ongoing training and technical assistance to assist states, tribes, and agencies to provide training to increase Designated Placements for LGBTQI+ children in foster care.

Comment: Several commenters recommended that training should be mandatory for all staff, including all contractors and subrecipients of the child welfare agency.

Response: ACF has determined not to make any changes to the final rule for the following reasons: it would be overly burdensome to title IV–E/IV–B agencies to have specific training requirements for those employees who do not have responsibility for placing children in foster care, for making placement decisions, or for providing services. The rule is designed to effectuate Designated Placements in the least burdensome manner possible. Thus, the final rule retains the provision as proposed.

Comment. Some commenters recommended that all agency contractors must be informed of the procedural requirements.

Response: The requirement to be informed of the requirements in the final rule is essential only for those contractors that are fulfilling foster care placements and services. We are not expanding the requirement to include contractors and subrecipients who are not going to be involved with placements because it is unnecessary and overly burdensome for the agency to notify such contractors and subrecipients about the requirements of the rule. Thus, no changes to the final rule are warranted.

Comment: Some commenters recommended that all providers, including those that are seeking to serve as a designated placement for LGBTQI+ children must be informed of the procedural requirements.

Response: We agree with the commenters and have revised the final rule to ensure that all foster care providers are informed about the provisions in the final rule. Providers who are Designated Placements will receive additional training to meet the needs of the LGBTQI+ child, as knowing the full protections required for these children is necessary for fulfilling their role as a Designated Placement.

Final Rule Changes: The final rule clarifies agencies must ensure that all placement providers are informed of the procedural requirements to comply with this rule, including the required non-retaliation provisions.

Section 1355.22(i) Protections for Religious Freedom, Conscience, and Free Speech

Comment: Many commenters raised concerns that religious families and organizations will have sincerely held religious beliefs that conflict with the rule and as a result, those families and organizations will be deemed to not be ''safe and appropriate'' by the Federal Government. These commenters asserted that both individuals and organizations of faith will be discouraged from applying or continuing to provide foster care services because they will be penalized for their beliefs. Another commenter said that if adhering to a certain view of sexuality equates to a hostile environment, faith-based institutions and religious foster parents will not fit the standard. Similarly, a commenter wrote that a ''safe and appropriate'' placement designation implies that a home that espouses certain ethics of

marriage, sexuality, and gender identity is harmful to LGBTQI+ children. Several commenters also stated that in order to be considered a safe and appropriate placement, a provider would be expected to utilize the child's identified pronouns, chosen name, and allow the child to dress in an age-appropriate manner that the child believes reflects their self-identified gender identity and expression.

Response: ACF appreciates the vital role that faith-based providers and families of faith play in the child welfare system. Indeed, many families of faith are compelled by their religious beliefs to provide loving care to children in foster care, including LGBTQI+ children. ACF further anticipates that some faith-based providers and families of faith will seek to become Designated Placements for LGBTQI+ children, while others will choose not to do so.

ACF remains fully committed to complying with all religious freedom, free speech, and conscience laws and regulations, including the First Amendment and the Religious Freedom Restoration Act (RFRA), 42 U.S.C. 2000bb *et seq.,* as well as all other applicable Federal civil rights laws and HHS regulations including 45 CFR part 87 (''Equal Treatment for Faith-Based Organizations''). A provider requesting any accommodation would submit the request to their state's or tribe's title IV–E/IV–B agency. If the title IV–E/IV–B agency determines that the request concerns an objection based on religious freedom, conscience, or free speech to an obligation that is required or necessitated by this rule, the title IV–E/IV–B agency must promptly forward the request to ACF, which will consider the request in collaboration with the HHS Office of the General Counsel. ACF will carefully consider any organization's assertion that any obligations imposed upon them that are necessitated by this final rule conflicts with their rights under the Constitution and Federal laws that support and protect religious exercise, free speech, and freedom of conscience. Under ACF's established practice, a state or tribe may not disqualify from participation in the program a provider that has requested the accommodation unless and until the provider has made clear that the accommodation is necessary to its participation in the program and HHS has determined that it would deny the accommodation. See 45 CFR 87.3(c) and (q) (2014).

We reiterate that this rule does not diminish each state's and tribe's obligation to ensure that faith-based organizations are eligible on the same basis as any other organization to participate in child welfare programs administered with title IV–E and IV–B funds. *See* 45 CFR 87.3(a) (2014). Further, states and tribes are prohibited from discriminating for or against an organization on the basis of the organization's religious character, motives, or affiliation, or lack thereof, or on the basis of conduct that would not be considered grounds to favor or disfavor a similarly situated secular organization. *Id.*

Finally, to address some of the concerns that religious providers who decline to become designated as a placement provider for LGBTQI+ children could be deemed unsafe, the final rule uses different and clearer terminology, as outlined earlier in this preamble. The preamble notes that all placements must be safe and appropriate for all children, regardless of their sexual orientation or gender identity. And the final rule clarifies that all placements of LGBTQI+ children, like all other children, must be safe and appropriate, whereas placements that are offered by providers who decide to become specially designated to provide care for LGBTQI+ children will be referred to as Designated Placements. As we have explained elsewhere in this preamble, the general requirement to avoid harassment, mistreatment, and abuse—which applies to all children in all placements—does not turn on a provider's religious or nonreligious motivation for engaging in conduct that rises to the level of harassment, mistreatment, or abuse. Nor would a provider's merely holding particular views about sex and gender, whether for religious or nonreligious reasons, nor would respectful efforts to communicate with LGBTQ+ children about their status or identities violate that general requirement.

Comment: Some commenters discussed the impact of the rule on kinship caregivers who are people of faith, and who may have religious concerns or objections to provisions within this rule. For example, one commenter said that the proposed rule would require training for relatives of children who are LGBTQI+ in some circumstances. The commenter wrote that such a rule would violate the religious beliefs of kinship caregivers. Another commenter said that although the rule provides an exemption framework for religious providers, that framework does not appear to apply to individual foster parents. Similarly, the commenters expressed concern about how the proposed rule would impact individual foster care providers with deeply held religious beliefs that are not affiliated with a faith-based organization—which could include kinship caregivers.

Response: ACF appreciates that kinship caregivers often provide the best possible placement for a child in foster care. That includes kinship caregivers who are people of faith. Title IV–E agencies should seek to comply with the requirements of this rule while continuing to prioritize placements with kinship caregivers whenever a caseworker has determined that doing so is in the best interest of a child.

To be clear as to the training requirement, this final rule only requires that providers, including kinship caregivers, be informed of the procedural requirements of this rule, including the non-retaliation provision. The separate training requirement in paragraph (b)(1)(ii) applies only to those providers who voluntarily choose to offer Designated Placements. ACF understands that there could be instances in which a kinship caregiver has a religious objection to a requirement in this rule. But that does not mean the rule violates the religious beliefs of all kinship caregivers, or any other providers, irrespective of whether they have requested an accommodation. As with any provider that requests a religious accommodation, a kinship caregiver with a religious objection to a requirement of the rule could seek an accommodation by submitting the request to their state's or tribe's title IV–E/IV–B agency, which should then follow the same process that applies to other providers. As discussed more fully above, under that process, if the title IV–E/IV–B agency determines that the request concerns an objection based on Federal legal protections for religious exercise, free speech, or conscience an obligation that is required or necessitated by this rule, the title IV–E/IV–B agency must promptly forward the request to ACF, which will consider the request in collaboration with the HHS Office of the General Counsel.

As ACF acknowledged in the proposed rule preamble, in *Fulton* v. *City of Philadelphia,* 593 U.S. 522 (2021), the Court held that Philadelphia's decision to apply a non-discrimination requirement to a specific faith-based foster care provider, having made clear that the city had ''no intention'' of granting an exception to that organization, violated the Free Exercise Clause of the First Amendment. *Id.* at 535. In contrast, in the preambles to both the proposed rule and this final rule, ACF has made clear that the agency is fully committed to carefully considering any provider's assertion that any obligations imposed upon them that are necessitated by this

final rule conflict with their rights under the Constitution and Federal laws and regulations supporting and protecting religious exercise and freedom of conscience. ACF will enforce these Federal protections by granting religious accommodations that are consistent with them where appropriate. RFRA protects the religious liberty rights of individuals as well as ''corporations, companies, associations, firms, partnerships, societies, and joint stock companies.'' 42 U.S.C. 2000bb–1; 1 U.S.C. 1. This practice of considering such requests on a case-by-case basis is consistent with applicable department-wide regulations at 45 CFR 87.3(b) and (c). This individualized approach to any religious accommodation requests is also practical because ACF expects that many other care providers of varying religious or nonreligious backgrounds will be willing to be Designated Placements. ACF also recognizes that the facts that are relevant to any potential objection may vary considerably because the involvement of the child welfare system in kinship care varies from jurisdiction to jurisdiction as each state or tribe has its own laws and practices. For example, while some potential kinship care providers may have a pre-existing relationship with a child in foster care, others may not.

Through the religious accommodation process to which ACF refers above, this rule recognizes that, insofar as the application of any requirement under this section would violate applicable Federal protections for religious freedom, conscience, and free speech, such application shall not be required. It also states that nothing in this rule shall be construed to require or authorize a state to penalize a provider in the state's titles IV–E and IV–B program because the provider does not seek or is determined not to qualify as a Designated Placement.

Final Rule Change: The final rule clarifies that insofar as the application of any requirement under the rule would violate applicable Federal protections for religious freedom, conscience, and free speech, such application shall not be required. The proposed rule did not include this provision in the proposed regulation text.

Section 1355.22(j) No Penalties for Providers That Do Not Seek To Qualify as Designated Placements

Comment: Several commenters suggested that any agency contractors or subcontractors and their licensed foster care providers who do not seek a special designation to serve LGBTQI+ children should not have a contract with the state or at a minimum should not be able to utilize or claim any Federal funds. Other commenters asserted that the rule will penalize those providers who do not seek that designation and will thus discourage them from applying or continuing to provide foster care services.

Response: ACF does not intend for this final rule to require any provider to seek the status of a Designated Placement. To make that point clear, we have added a new § 1355.22(j). This provision states that nothing in this rule requires or authorizes a State to penalize a provider in the state's titles IV–E and IV–B program because the provider does not seek or is determined not to qualify for the status of a Designated Placement under this rule. It therefore underscores our intent that, as far as Federal law is concerned, the choice to become a Designated Placement is a voluntary one to be made by each foster care provider. By adopting this structure, ACF ensures that LGBTQI+ children in the foster care system will have Designated Placements available to them without requiring states or tribes to override the choices of providers who do not wish to be Designated Placements.

Final Rule Change: The final rule clarifies that nothing in the rule shall be construed to require or authorize a state or tribe to penalize a provider in the state's titles IV–E and IV–B program because the provider does not seek or is determined not to qualify as a Designated Placement under this rule. The proposed rule did not include this provision.

Section 1355.22(k) Severability

Section 1355.22(e) of the Proposed Rule described the severability provision in the event that a portion of the rule, if final, is determined by be invalid or unenforceable.

We received no comments about this section and made no changes to the final rule, as it appears at § 1355.22(k).

Section 1355.22(l) Implementation

Comment: We received comments expressing concerns that the provisions in the rule added burden on child welfare agencies. One commenter indicated that its state would require two to three years to implement these new provisions.

Response: We acknowledge that agencies will need time to come into compliance with these provisions, and this final regulation provides approximately two Federal fiscal years for implementation. The implementation date is on or before October 1, 2026.

Section 1355.22(m) No Effect on More Protective Laws or Policies

Comment: Commenters sought clarity about whether this regulation would preempt conflicting state laws.

Response: As noted throughout this preamble, this rule does not preempt state laws that regulate health care or other matters that extend beyond the federally funded title IV–E/IV–B system. Rather, it interprets key terms that delineate the care title IV–E/IV–B agencies must provide to foster children in the programs carried out with Federal title IV–B and IV–E financial assistance. It is within HHS' authority to implement the requirements applicable to the receipt of Federal matching funds under the Social Security Act for the administration of the title IV–B and IV–E programs, and nothing in this regulation requires state agencies or other persons to fail to comply with general state laws that regulate matters like health care that go beyond the foster care system.

This rule sets a Federal floor for safe and appropriate care of LGBTQI+ children in the title IV–B/IV–E program. But it does not limit states from providing additional protections to those children. To clarify that point, in this final rule, ACF has added a new § 1355.22(m), entitled ''No effect on more protective laws or policies.'' This provision applies to the entirety of the final rule and makes clear that nothing in the rule shall limit any State, Tribal, or local government from imposing or enforcing, as a matter of state law, requirements that provide greater protection to LGBTQI+ children than this rule provides. This provision makes clear that, in the context of LGBTQI+ children, the final rule creates a Federal floor to enforce Congress's mandate that children in title IV–E/IV–B programs receive safe and appropriate care. The rule requires that states ensure that they have a sufficient number of Designated Placements to serve all children in foster care who identify as LGBTQI+ and request or would benefit from such a placement. It imposes certain specific requirements on providers who have voluntarily agreed to serve as Designated Placements. It reaffirms that all children in title IV–E/IV–B programs, including LGBTQI+ children, are entitled to protections against harassment, abuse, and mistreatment, regardless of their placement. And it creates specific nonretaliation protections for LGBTQI+ children, also regardless of their placement.

ACF believes that these provisions, taken together, advance the statutory guarantee that children in title IV–E/IV–

B programs receive safe and appropriate care. But those provisions set a floor only. States and tribes may legitimately decide that the welfare and interests of LGBTQI+ children require greater protection. Nothing in titles IV–E and IV–B authorizes ACF to stand in the way of those state decisions, and ACF makes clear in this provision it has no intention to do so.

ACF understands that a number of States have adopted statutes or policies that provide protections for LGBTQI+ children that go beyond those in this rule. Some of these States require training on how to support LGBTQI+ youth for all providers. See, *e.g.,* N.M. Admin. Code 8.26.5.18.A.(3) (requiring policies to ''educate prospective and current foster or adoptive families on how to create a safe and supportive home environment for youth in foster care regardless of their sexual orientation, gender identity or gender expression''). Others have adopted their own detailed requirements governing placements for LGBTQI+ children. See, *e.g.,* MD Policy SSA–CW #23–05 (Dec. 15, 2023). In a recent review of state laws and policies, ACF found that ''[l]aws and policies in 22 States and the District of Columbia require that agencies provide youth who identify as LGBTQIA2S+ with services and supports that are affirming of the youth's LGBTQIA2S+ identity and are tailored to meet their specific needs.'' Children's Bureau, *Protecting the Rights and Providing Appropriate Services to LGBTQIA2S+ Youth in Out-of-Home Care* at 2 (2023) (footnote omitted). In particular, ''[p]olicies in 21 States and the District of Columbia address the needed qualifications for persons who provide out-of-home care for children or youth who identify as LGBTQIA2S+.'' *Id.* at 4 (footnote omitted). And ''[f]ifteen States and the District of Columbia require training on LGBTQIA2S+ issues for foster caregivers and related staff.'' *Id.* (footnote omitted). These state laws and policies rest on the State's authority to provide protections for children in its foster care system, not on this final rule. The State's authority to provide those protections preexisted this final rule, and nothing in this final rule limits a State's, tribes, or local government's power to impose or enforce laws and policies like these.

Final Rule Change: The final rule clarifies that nothing in the rule shall limit any State, tribe, or local government from imposing or enforcing, as a matter of law or policy, requirements that provide greater protection to LGBTQI+ children than the rule provides. The proposed rule did not include this provision.

Section 1355.34(c) Criteria for Determining Substantial Conformity

Section 1355.34(c)(2)(i) describes an amendment to the Child and Family Services Review (CFSR) to monitor compliance with requirements in § 1355.22(b)(1).

Comment: Several commenters expressed support of this provision; however, one state expressed concern with monitoring the proposed placement provisions through the CFSR, stating it is already a cumbersome review process. In addition, a few commenters provided recommendations that are not within the purview of this final rule, such as changing the overall CFSR process and others suggested expanded monitoring processes in addition to the CFSR. Several commenters raised the concern that the proposed rule's prohibition on retaliation would not be enforced.

Response: We are modifying the final rule to expand the requirements in the rule to be monitored through the CFSR to include the retaliation provisions in paragraph (d) and Designated Placements and services requirements in paragraph (b), as applicable. Under the current CFSR regulations, the Children's Bureau reviews how state title IV–E agencies ensure the appropriateness of foster care placements as required by the title IVE/IVB case review system. Monitoring through the CFSR is the appropriate vehicle because the final rule implements these statutory case review system requirements that agencies must meet for LGBTQI+ children in foster care.

Comment: One state questioned how ACF intends to monitor compliance with these regulations and whether ACF anticipates making changes to reporting requirements for LGBTQI+ children and youth.

Response: As stated in the NPRM preamble, ACF will monitor both state and tribal title IV–E/IV–B agency plan compliance with the requirements of § 1355.22 using the partial review process outlined in § 1355.34(c)(2)(i). If ACF becomes aware of a potential non-compliance issue with § 1355.22, it will initiate the partial review process. In addition, the final rule now includes monitoring a state agency's compliance with § 1355.22(b) and (d) through the CFSR. Related to changes in reporting, the requirements in the final rule must be included in the state or tribe's title IV–E plan that ACF must review and approve.

Comment: One commenter recommended HHS clarify how, if at all, this proposed rule will impact state laws and questioned whether it was HHS's position that this rule will preempt state law? Would such state laws disqualify states from receiving funding for foster care or lead to an enforcement action by HHS? One commenter expressed concern that enforcing the requirements for safe and appropriate placements for LGBTQI+ children would constitute Federal overreach. The commenter also stated that the final rule would ''enforce a narrow definition of this requirement that usurps a state's constitutional authority to determine what is in the best interests of a child in its foster care system.''

Response: ACF refers commenters to our responses in section IV of the preamble to comments regarding federalism, nondelegation and Spending Clause concerns. As noted there, this rule does not preempt generally-applicable state laws. Rather, it interprets key terms regarding the care title IV–E/IV–B agencies must provide to foster children in order to qualify for the Federal title IV–B and IV–E Federal financial assistance programs. ACF also refers commenters to the new § 1355.22(m), entitled ''No effect on more protective laws or policies,'' which is discussed above.

Comment: A few commenters recommended to expand agency accountability beyond monitoring through the CFSR or to modify the CFSR process. Suggestions included to engage with impacted youth and families, youth advisory boards, and other experts, develop qualitative data collection and reporting processes, and provide annual reports to ACF.

Response: ACF reviewed the suggestions provided but we are not making any changes to add other monitoring requirements. Several of the recommendations are outside the authority of this final rule because they are suggestions for changing ACF's monitoring process or adding new monitoring processes for the provisions in the rule. However, ACF would like to note that the CFSR process includes reviewing qualitative data and consultation with youth and others as required under those regulations. For example, as part of the Round 4 CFSRs, through a series of focus groups, 18 young people with self-identified lived child welfare experience were asked about the best methods of recruiting, engaging, supporting, and retaining young people in all aspects of the CFSRs.

Final Rule Changes: ACF is retaining the provision in the final rule as proposed to review § 1355.22(b)(1) (which was numbered as § 1355.22(a)(1)

in the NPRM) and adding provisions to also review § 1355.22(b) and (d) through the CFSR, which is the authority that governs reviews of title IV–B and IV–E programs.

Comments on Cross-Cutting Issues

In the proposed rule, ACF requested public comment on various topics and provisions in the NPRM. Responses to these questions are described below.

Kinship Caregivers

In the NPRM, we requested public comment on how agencies can best comply with the requirements of the proposed rule and prioritize placements with kinship caregivers. In particular, we invited public comment on what resources agencies might need from HHS to support kinship caregivers in caring for an LGBTQI+ child.

Comments: Many commenters suggested that kinship caregivers should have access to specific training and support to ensure that they can provide a caring and nurturing environment for their LGBTQI+ child in foster care. Several commenters emphasized that the training should be culturally responsive and developed, delivered, and evaluated in partnership with youth with lived experience in foster care, kinship caregivers, and foster parents. They identified specific programs such as Family Builders' Youth Acceptance Project, Affirm for Caregivers, and Trans-Generations. A few commenters suggested specific faith-based trainings or faith-based partnerships to train and support religious families and kinship caregivers to promote family reconciliation and preservation, decreasing the need for foster care services, and improving outcomes for LGBTQI+ youth.

Many commenters expressed that Federal funding for recruitment, retention, and support of kinship caregivers is limited, and made suggestions for additional or enhanced funding for title IV–E/IV–B agencies. Several commenters recommended flexibility for states to offer exceptions or alternatives to the requirements of this rule for kinship caregivers when it is in the best interest and desire of a child.

A few commenters also urged HHS to enhance support for kinship placements, such as finding ways for agencies to get more Federal funding for pre-placement and in-placement supports, like mental or behavioral health services, skills-based trainings, and the ability to become a therapeutic foster home. They suggested that agencies enhance the staff dedicated to kinship support, increase engagement with kin early in a case, increase assistance to kinship navigator programs, and offer more support to kin to become licensed.

Other commenters said that LGBTQI+ children should not be placed with kin caregivers unless those caregivers have been designated as supportive for LGBTQI+ youth, meeting the requirements the rule would impose on any other placement.

Response: ACF recognizes the vital role that kin caregivers play in supporting children in the child welfare system. Indeed, a robust body of evidence suggests that children in foster care have better outcomes when they are placed with kin caregivers.[33]

ACF appreciates the opportunity to clarify that title IV–E/IV–B agencies are encouraged to continue their work to improve access to kinship care alongside implementing the requirements of this regulation. Indeed, ACF anticipates that in many instances, expanding access to kinship care and complying with the requirements of this rule will not be in tension. For example, some LGBTQI+ children may enter the foster care system unrelated to a familial conflict over their sexual orientation or gender identity. Other children who enter foster care because of a conflict with family over their LGBTQI+ status or identity may have a supportive relative who is willing to serve as a kin caregiver and a Designated Placement.

While ACF is not adopting commenter's requests to include an exception from the requirements of this rule for kin caregivers, ACF has revised the final rule, as explained above, to provide that when a request for a placement change or services is made, the title IV–E/IV–B agency must consider whether additional services and training would allow the current provider to meet the conditions for a Designated Placement. If so, the title IV–E/IV–B agency must use the case review system to regularly review the status of a placement that has elected to become a Designated Placement to ensure progress towards meeting the conditions of such a designation. These steps would also apply to kin placements.

ACF strongly encourages title IV–E/IV–B agencies to identify or develop services that effectively prioritize preserving placement stability by offering kin caregivers the resources, training, and support needed to serve as Designated Placements and otherwise meet the specific needs of LGBTQI+ children.

In many instances, ACF anticipates that kin caregivers will be the provider who can best meet the needs of an LGBTQI+ child. In some cases, the kinship caregiver will not wish to seek designation or serve as a supportive placement for a child as identified in paragraph (b)(1). Where the child prefers the kinship placement, and where the kinship caregiver can provide a safe and appropriate placement under this rule, even if it is not a Designated Placement as outlined in paragraph (b)(1), the kinship placement may often be in the children's best interest; in those circumstances, the kinship placement would not be inconsistent with this rule.

As the proposed rule laid out, title IV–E agencies may use Federal IV–E funds to provide trainings for providers seeking to become a Designated Placement or to recruit new Designated Placement providers. We appreciate the opportunity to clarify that providing additional resources and training to kinship caregivers to allow them to serve as a Designated Placement for an LGBTQI+ child, when caregivers choose to do so, would be an allowable use of IV–E funds. In addition, a recently published ACF final rule allows a title IV–E agency to claim title IV–E Federal financial participation (FFP) for the cost of foster care maintenance payments (FCMP) on behalf of an otherwise eligible child who is placed in a relative or kinship licensed or approved foster family home when the agency uses different licensing or approval standards for relative or kinship foster family homes and non-relative foster family homes.[34]

Impact of the Regulation on Foster Provider Availability and Participation

Requests for Comment on Recruitment of Providers To Support LGBTQI+ Children

In the NPRM, we requested public comment on how ACF can best support agencies in recruiting providers who

[34] 45 CFR part 1355. See 88 FR 66700, September 28, 2023 (*https://www.federalregister.gov/documents/2023/09/28/2023-21081/separate-licensing-or-approval-standards-for-relative-or-kinship-foster-family-homes#:~:text=In%20addition%2C%20the%20final%20rule,related%2Fnon%2Dkinship%20foster%20family*).

will be able to provide safe and appropriate placements for LGBTQI+ children.

Comments: Many commenters responded with several suggestions on how to support states and tribes' recruitment efforts. Some commenters expressed concern that Federal funding for recruitment, retention, and support for foster family caregivers is limited. They suggested that HHS convene workgroups and provide more guidance/best practices/technical assistance on recruitment strategies for foster family homes, collaborate with agencies to provide training for prospective foster families and employees of childcare institutions, make additional financial resources available to foster families, target assistance to rural areas, and adopt nondiscrimination protections prohibiting agencies from rejecting prospective LGBTQI+ providers. Other commenters made suggestions on how title IV–E/IV–B agencies can increase their pool of available providers. They suggested regularly reporting to state legislatures and the public on the pool of available providers and recruitment efforts.

Several commenters recommended that agencies expand partnerships with organizations representing/working with the LGBTQI+ community, faith organizations, and individuals with lived experience, and increase use of social media to enhance recruitment within the LGTBQI+ community. They encouraged agencies to be flexible in delivering foster family trainings (such as flexible times, virtual, etc.) and to also recruit people to support LGBTQI+ youth in other ways, such as being a guardian ad litem or mentor. A few commenters made suggestions on revisions to the training curriculum related to recruitment, such as including modules on youth development.

Response: ACF appreciates commenters' recommendations for how title IV–E/IV–B agencies can improve recruitment of providers and foster families to serve as Designated Placements. ACF agrees these are promising practices and may share additional best practices and technical assistance through additional guidance. As clarified in the NPRM, IV–E agencies may draw down funds under title IV–E for certain activities to comply with this rule, including recruiting and training providers to be Designated Placements.

Concerns About a Shortage of Providers

Comment: Many commenters (both in support and opposition of the NPRM) expressed a concern that the proposal's provisions would exacerbate a nationwide shortage of placements and services. Commenters said that the NPRM focuses on recruiting placements for LGBTQI+ children instead of all children in foster care. They also argued the NPRM did not include providing support for families and kin to become safe and supportive homes for LGBTQI+ children and expressed concern that this could lead to children being placed outside of their communities or separation from siblings. They expressed concerns either that faith-based providers would be ''disqualified'' from being placements or ''driven away'' due to their views, or that the NPRM would lead to agencies labeling faith-based families as ''hostile'' or ''abusive'' due to sincerely held religious beliefs.

Moreover, a commenter stated that placing the onus on states and tribes to confirm and affirm that a foster family home is safe and appropriate when there is already a shortage of foster homes will end up hurting the children that this regulation is purporting to protect. One commenter questioned the NPRM's assertion that enough foster parents can be found to replace those that would be lost as a result of their religious beliefs.

A few commenters elevated concerns about the lack of behavioral health care providers who specialize in working with LGBTQI+ youth. Some commenters were concerned that LGBTQI+ training would be added to the list of caseworker requirements without considering the capacity of the workforce to provide quality services. Another commenter said that some states already have a reimbursement structure that considers the unique needs of individual children and felt this NPRM would be cumbersome to implement. Some commenters offered suggestions, including:

- Issuing ACF guidance on how agencies should balance the requirements of this NPRM with other placement considerations such as: prioritizing kinship placements; no placement change unless a child is unsafe; conferring with youth on whether they want to remain in the current placement; and factors such as sibling unification, least restrictive setting, school, friends, and community.
- Utilizing incentives for recruiting more placements and evidence-based trainings/resources for supporting the child welfare workforce and providers to become Designated Placements.
- Building in flexibility for agencies to make exceptions or alternatives to Designated Placement criteria for kinship caregivers, emergency, and short-term placements, to offer religious exemptions for staff members, and to consider the best interest of a child.

Response: ACF appreciates the concerns raised by commenters about potential impacts of the final rule on the availability of services and placements. In response to these comments and suggestions offered, we note that the rule provides a two-year ramp up period for title IV–E/IV–B agencies; that title IV–E funds may be used for recruitment and training efforts; and that we have clarified in the final rule how kin and other potential or existing placements for LGBTQI+ children can be supported to become Designated Placements. ACF also notes that the NPRM did not assert that recruitment of foster parents to provide LGBTQI+ supporting placements would ''replace'' providers who did not seek to qualify as Designated Placements. Rather, ACF anticipates that additional outreach efforts by states and tribes to recruit providers will expand, not reduce, overall supply. And in response to comments expressing concern that some providers and families would be lost or disqualified from providing foster placements, we added language to the final rule clarifying it shall not be construed to require or authorize penalization of any provider that is not considered or seeking consideration as a Designated Placement for LGBTQI+ children. When states and tribes select organizations to participate in the child welfare program, ACF would recommend that states and tribes do not adopt selection criteria that disadvantage any faith-based organizations that express religious objections to providing Designated Placements for LGBTQI+ children.

Youth Disclosure of LGBTQI+ Status

Comment: Many commenters stated that by requiring that LGBTQI+ youth request a supportive placement, that they will be forced to disclose their sexual orientation or gender identity, and that forcing children to ''come out'' in order to receive services places an unfair onus on them. Several commenters provided suggestions for how to ascertain a youth's sexual orientation and gender identity information. Several commenters recommended varying ages at which it would be appropriate for a caseworker to inquire about a child's identity. Commenters said it was important to inform youth that there are resources available as part of regular, ongoing case practice. Others felt there may be many reasons why a youth will choose to not disclose their sexual orientation and gender identity, such as preventing a change in placement to stay with

siblings, avoiding changing schools, or leaving communities. Examples shared included a fear of coming forward to identify as LGBTQI+ due to unforeseen consequences in their lives or a fear of rejection—consequences that represent an added burden for youth already navigating stressful experiences. Commenters questioned how the NPRM's provisions would help these youth, or youth who would be ''presumed'' to be cisgender/heterosexual, and that choosing nondisclosure should not prevent them from being treated appropriately.

Response: ACF understands many LGBTQI+ children may choose not to disclose their LGBTQI+ identity to their caseworker. Commenters cited research showing that two key reasons LGBTQI+ children in foster care choose not to share their sexual orientation or gender identity with their caseworker are (a) fear of rejection by the caseworker and (b) fear of a placement change. Some measures to allay those fears were provided in the NPRM and remain in the final rule, including (a) ensuring that Title IV–B and IV–E agency employees who have responsibility for placing children in foster care, making placement decisions, or providing services are adequately prepared with the appropriate knowledge and skills to serve an LGBTQI+ child related to their sexual orientation, gender identity, and gender expression, and (b) prohibiting an unwarranted placement change as a form of prohibited retaliation due to a child's disclosure of or perceived LGBTQI+ status or identity. To further address these concerns, the final rule adds the requirement that the notice to inform children of the availability of Designated Placements or services to make their current placement more supportive must include informing the child that under no circumstances will there be retaliation against them for disclosure of their LGBTQI+ status or identity or their request for a Designated Placement, and to describe the process by which a child may report a concern about retaliation.

To further address commenters' concerns that children's fears that a request for a new placement will necessarily result in a placement change and possible separation from siblings and community, as well as the concerns of commenters who said it was important to inform youth that there are resources available as part of regular, ongoing case practice, ACF made changes in the final rule at § 1355.22(b)(2) to require providing a child: 1) with the option to request their current placement be offered services to become a Designated Placement; and 2) with an opportunity to express their needs and concerns. Further, § 1355.22(b)(3) of the final rule requires that, before initiating any placement changes, the title IV–E/IV–B agency must consider whether additional services and training would allow the current provider to meet the conditions for a Designated Placement, if the current provider wishes to do so, rather than necessarily generating a placement change, particularly for children placed with kin, siblings, in close proximity to their family of origin, and/or in a family-like setting. The final rule also adds at § 1355.22(d)(2)(iii) that prohibited retaliation against a child with or perceived to have an LGBTQI+ identity or status includes restricting access to siblings and family members.

In response to commenters who stated that children choosing not to disclose their LGBTQI+ identity should not prevent them from being treated appropriately, the final rule expands the definition of prohibited retaliation, requires informing children about protections from retaliation, and expands the notification requirements to subcontractors and providers of the prohibition on retaliation based on a child's actual or perceived LGBTQI+ status or identity. Specifically, as noted above, the final rule requires the notification of the availability of Designated Placements to provide information on the prohibition on retaliation and how to report retaliation. Further, the final rule retains the requirement from the NPRM that the title IV–E/IV–B agency must ensure that LGBTQI+ children have access to age- or developmentally appropriate services that are supportive of their sexual orientation and gender identity, including clinically appropriate mental and behavioral health supports, and must ensure that all its contractors and subrecipients who have responsibility for placing children in foster care, making placement decisions, or providing services are informed of the procedural requirements including the requirement to comply with prohibitions on retaliation. The final rule extends the requirement of informing placement providers of procedural requirements, including the prohibition on retaliation, to all providers.

Research on LGBTQI+ Children in Foster Care

In the NPRM, we described a significant body of evidence demonstrating that LGBTQI+ youth are overrepresented in the child welfare system and face worse outcomes.

Comment: Many commenters expressed their support and appreciation for the proposed rule's overview of research on the disparities that LGBTQI+ youth face in foster care. Other commenters raised concerns about specific studies cited by HHS. Some commenters argued that data cited by HHS overstates the extent of LGBTQI+ children in the foster care population, criticizing one study cited as having a small sample size and citing a previous local survey from 2014 which found 19 percent of foster youth surveyed identify as LGBTQI+.

Response: ACF thanks the commenters for their support for the rule's discussion of research on the disparities that LGBTQI+ youth face in foster care. In response to concerns about studies about the size of the LGBTQI+ foster youth population, ACF based its estimate on the three recent studies cited above, one of which is a more recent (2021) local survey than the 2014 local survey, and two others which draw on larger data sources (national data in one case and California statewide data in the other).[35]

Comment: One commenter stated that research about the impact of family acceptance or rejection on LGBTQI+ youth is methodologically flawed.

Response: ACF believes that two key studies cited in the NPRM about the impact of family acceptance or rejection on LGBTQI+ youth have sound methodology. The first utilized quantitative scales to assess retrospectively the frequency and nature of parent and caregiver responses to a lesbian, gay, or bisexual (LGB) sexual orientation in adolescence. The study was based on in-depth interviews with 224 LGB young adults aged 21–25 and found dramatic disparities in health outcomes between youth who experienced high levels of family rejection compared to those who experienced low levels of family

rejection.[36] An additional study cited in the NPRM on the critical importance of accepting caregiver behavior for positive mental health outcomes for LGBTQI+ youth was based on a 2022 survey of over 30,000 LGBTQ youth in the United States, which included questions regarding considering and attempting suicide that were identical to those used by the Centers for Disease Control and Prevention (CDC) in their Youth Risk Behavior Surveillance System (YRBS) and had overall findings which were corroborated by data from the YRBS survey.[37] Other studies find that it is ''clear from existing research that family acceptance and rejection is crucial to the health and well-being of LGBT youth.'' [38] This illustrates the importance of Designated Placements for LGBTQI+ children in foster care.

Comment: Two commenters criticized a 2021 study, which showed that children in foster care who identify as LGBTQI+ report a perception of poor treatment by the foster care system more frequently than their non-LGBTQI+ counterparts, as having ''significant limitations.'' [39]

Response: The data in this study is corroborated by five other studies cited by HHS.[40] Children in foster care who identify as LGBTQI+ are less likely to report at least ''good'' physical and mental health and are less likely to have at least one supportive adult on whom they can rely for advice or guidance, than their non-LGBTQI+ counterparts in foster care.[41]

Comment: Other commenters criticized a study on mental health disparities faced by LGBTQI+ youth as being unreliable and subject to bias.

Response: We note that the study cited by HHS is based on a sample size of over 40,000 youth surveyed and provides the adjusted odds ratio and a probability value of under .001 (showing that results are highly unlikely to be due to chance), and the NPRM cited two additional studies showing disproportionately poor mental health outcomes for LGBTQI+ foster youth.[42]

Nondiscrimination Provisions

Comments: Several commenters suggested that ACF issue stronger language on protections for children in foster care from discrimination on the basis of disability and gender identity. They specified that there are no anti-discrimination laws in many states to prohibit discrimination against LGBTQI+ prospective foster parents. Another commenter suggested that ACF adopt a similar anti-discrimination policy as in other Federal programs.

Other commenters recommended that the final rule forbid discrimination based on any characteristics in any part of the child welfare system. They argued that foster children, parents, kin caregivers, and prospective and current foster and adoptive parents have constitutional rights to due process and equal protection. A commenter also stated that ''discrimination is the proper and appropriate term instead of retaliation'' as that term was used in the proposed rule.

Response: Both the NPRM and this final rule focus on improving how the child welfare system meets the particular needs of LGBTQI+ foster children, based on the extensive evidence showing the difficulties those children disproportionately face. ACF is open to considering future policymaking that would address discrimination in broader ways, including discrimination on the basis of other characteristics, where ACF has legal authority to do so. We note that HHS's Office for Civil Rights enforces several statutes that prohibit various forms of discrimination in programs funded by the Department, including the title IV–E/IV–B program. Those statutes include section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, which prohibits disability discrimination by recipients of Federal financial assistance, and title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d, which prohibits discrimination by recipients of Federal financial assistance on the basis of race, color, or national origin, including discrimination on the basis of shared ancestry and ethnic characteristics.[43] The Department has already promulgated regulations implementing these prohibitions, see 45 CFR part 80 (title VI); *id.* part 84 (section 504). On September 14, 2023, HHS issued a proposed rule to update its section 504 regulation. 88 FR 63392. Whether additional antidiscrimination rules are necessary or consistent with ACF's statutory authority would be appropriately considered after the conclusion of this rulemaking.

In regard to the comment arguing for the use of ''discrimination'' in the place of retaliation, retaliation is, by definition, an intentional act. It is a form of discrimination because the individual in question is being subjected to differential treatment. *Cf. Jackson* v. *Birmingham Board of Education,* 544 U.S. 167 (2005) (holding that retaliation is a form of intentional discrimination under title IX of the Education Amendments of 1972). We use the term ''retaliation'' in the final rule because a key goal of this provision is to ensure

that children do not experience harm that might deter them from seeking or benefiting from the protections afforded by the rule.

Implementation Costs

In the NPRM, we requested comments on whether state and tribal agencies are likely to incur additional substantial costs as a result of this rulemaking.

Comments: Numerous commenters stated there would be additional costs to implement this proposal and increased costs for FFP matching, some stating that the NPRM's estimates were too low and others describing the cost increases as ''substantial'' or ''significant.'' State and state attorneys general commenters were generally concerned about increasing costs to expand recruitment, retention, and training of providers, to reprogram case management systems to track costs and notification requirements, and to enforce and monitor the retaliation provisions. States also expressed a concern with the increased cost for children who are not title IV–E eligible, which is outside of the scope of this rule.

Response: ACF acknowledges there will be state and tribal costs to implement the final rule. Responses to comments on the cost estimate are provided in the Annualized costs to the Federal Government section. ACF is providing a more than two-year implementation period to allow time for states and tribes to address their unique funding issues. We also reiterate that title IV–E agencies may claim allowable recruitment and training costs under the title IV–E foster care program.

Requests for Technical Assistance and Implementation Supports and Questions About Implementation and Compliance Monitoring

In the NPRM, we requested public comment on how ACF can best support agencies, including those located in rural and other resource-limited areas, in fulfilling a placement that will facilitate access to age-appropriate resources, services, and activities for LGBTQI+ children in foster care.

Comments: Many commenters responded with several recommendations on how ACF can support agencies, providing additional funding/or grants for expanding and reimbursing service costs (*e.g.,* transportation, technology aids). A few organizations recommended ACF provide technical assistance/consultants to support rural provider recruitment. Other commenters recommended ACF utilizing local faith-based services, developing a national resource list of providers including virtual/online or telehealth services, and requiring agencies to display available resources and hotlines and to note the technical assistance that is available.

Response: We appreciate the comments and suggestions. While we are not making any changes to the final rule related to this, there are numerous technical assistance resources available through CB, for example the Capacity Building Center for States and the National Center for Diligent Recruitment. The primary manner in which ACF can support state and tribal efforts is through CB's technical assistance providers, which is addressed in detail in the below response to comment.

Comments: Many commenters requested technical assistance, sought specifics on how compliance will be monitored, and asked questions about implementation. Several commenters recommended changes to the NPRM that would require providers to notify the agency, describe children and provide a rationale for whom they are ''unwilling or unable to provide safe and appropriate placements or care.''

A few commenters suggested clarification and support for challenges related to the Interstate Compact on the Placement of Children, such as the need for more placements across jurisdictional lines. Some commenters asked for clarification on licensing requirements for childcare institutions and foster family homes regarding room sharing based on gender identity and procedures for foster parents, such as identifying the children for whom they are willing to provide a home. One commenter recommended a targeted plan for specially designated placements for LGBTQI+ children within the five-year Child and Family Services Plans (CFSPs) in the NPRM. Many commenters suggested that HHS provide extensive training guidance through implementation guidelines, more funding for family acceptance training, and pilot programs in rural areas regarding the NPRM's provisions.

Commenters requested technical assistance on capacity building and recruitment strategies. Many commenters asked for clarification on how agencies should respond in circumstances where providers and agencies cannot fulfill the requirements of the NPRM and on ''accountability'' for the provisions.

Response: On behalf of the Children's Bureau (CB), the Capacity Building Center for States (the Center) helps state and territorial child welfare agencies strengthen, implement, and sustain effective child welfare practices. The Center provides tailored technical assistance to states and territories on a wide array of topics to improve outcomes and overall system functioning, including support for states in implementing this final rule. At the request of a jurisdiction (or the Children's Bureau), customized assistance is available to support effective program improvement efforts. In collaboration with the state or territory (and counties as appropriate) and the Children's Bureau, the Center assists child welfare agencies in implementation and program improvement efforts. Center technical assistance support may include training, coaching, curriculum development, data analysis and individualized program consultation. Each state or territory has an identified Center Liaison who can assist in initiating technical assistance. Liaison contact information for each state and territory is readily available via the Center's website.

On behalf of the Children's Bureau, the Capacity Building Center for Tribes (the Center for Tribes) is also available to assist tribes with implementing the final rule. The Center for Tribes collaborates with American Indian and Alaska native nations to help strengthen tribal child and family systems and services. The Center for Tribes offers an array of services, including peer networking activities and individualized expert consultation. These services are available at no cost to assist with improving tribal child welfare practice and performance in several key areas, such as recruiting and training families to meet the individualized needs of children in care.

In addition, the Children's Bureau has recently funded the National Center for Diligent Recruitment, a new component of the AdoptUSKids project. This national center provides multiple forms of free technical assistance to support states, tribes, and territories in developing and implementing strategic, data-driven diligent recruitment plans. The goals of the technical assistance are to increase capacity to effectively collect and analyze quantitative and qualitative data to guide targeted recruitment efforts; to provide on-site, tailored support for the work of states, tribes, and territories in constructing robust diligent recruitment plans based on evidence-informed and evidence-based research; and to further the evidence-base of family finding, relative outreach, reunion support, and intensive recruitment and retention services within the communities of origin of the children/youth in the foster care system.

With respect to the suggestions regarding the Interstate Compact on the

Placement of Children (ICPC), the Federal Government has no authority over the ICPC. Rather the compact amendments are made and ratified through agreement among the Compact members and the incorporation of those changes in respective state statutes. There is a minimum requirement of member states agreeing to changes before the Compact itself is ratified. This is outside the scope of this rule.

IV. Response to Comments Raising Statutory and Constitutional Concerns

First Amendment and Religious Freedom

Comment: As discussed above in section III of this preamble, many commenters expressed concerns that religious families and organizations will have sincerely held religious beliefs and practices that conflict with the rule and as a result those families and organizations will be deemed to not be ''safe and appropriate'' by the Federal Government. These commenters asserted that both individuals and organizations of faith will be discouraged from applying or continuing to provide foster care services because they will be penalized for their beliefs and practices.

Other commenters expressed concern that the proposed rule violates providers' First Amendment right to religious liberty. Commenters asserted that the proposed rule would prohibit them from fully participating in the foster care program. For example, commenters said that expressing or practicing their sincerely held beliefs about gender, sexuality, or marriage to a foster child in their home could result in being labelled as hostile or unsafe for the child.

Other commenters asserted that the rule will result in faith-based providers and individuals being excluded from helping large numbers of children in foster care. One commenter said that if ACF's data is accurate, excluding such providers would preclude them from providing care to potentially one-third of older children in foster care age 12–21.

Another commenter said that it is important to protect faith-based agencies from regulations that run contrary to their beliefs and practices; such protection, the commenter asserted, will ensure a diverse set of agencies to serve diverse populations, including placing children with specific or special needs such as older children and sibling groups.

Response: ACF values the vital role that religious families and faith-based organizations play in providing care and services for children in the Child Welfare program and appreciates that many families are compelled by their faith to offer safe and loving foster homes.

As noted previously, the final rule has been revised to clarify the general requirement that all providers must provide safe and appropriate placements for all foster children, and we believe this clarification will avoid any unintended implication that providers not wishing to offer Designated Placements would not be considered safe and appropriate.

ACF disagrees with the commenter's suggestion that this final rule discriminates against faith-based providers, as none of the provisions disqualify eligible providers from participating in the title IV–E and IV–B programs because of their religious character. *Espinoza* v. *Mont. Dep't of Revenue,* 140 S. Ct. 2246, 2255 (2020) (citing *Trinity Lutheran Church of Columbia, Inc.* v. *Comer,* 137 S. Ct. 2012, 2021 (2017)). This rule welcomes faith-based organizations and religious foster parents to continue participate in the program, and ACF anticipates that many will choose to do so without any religious objections. The obligation to provide an environment that supports the child's LGBTQI+ status or identity under this rule applies only to those providers who have chosen to be Designated Placements. We anticipate that numerous faith-based organizations and religious foster parents will choose to be Designated Placements. But this rule does not require any provider to make that choice, and it does not impose any penalty or adverse consequence on providers with religious objections to serving as a Designated Placement. Indeed, the final rule makes clear in paragraph (j) that nothing in the rule requires or authorizes a state or tribe to penalize a provider that—for whatever reason—chooses not to be a Designated Placement. Rather, the rule places the responsibility on states and tribes—rather than on providers—to find Designated Placements for LGBTQI+ identifying children.

ACF agrees that it is important to protect faith-based agencies from any obligation to comply with a regulatory requirement that violates statutory or constitutional protections of religious freedom. It is also important to retain a diverse set of agencies to serve diverse populations. ACF has determined that this regulation is consistent with these goals. In ACF's view, this rule should not dissuade any entity that does not meet the definition of a Designated Placement, whether for religious or secular reasons, from continuing to participate in the foster care program. ACF does not anticipate that this rule will cause faith-based providers to discontinue their participation in the program, or that it will substantially reduce the number of placement agencies available for children. ACF expects that states and tribes will not impose burdens on religious exercise when they have the discretion to work with the objections of a faith-based provider, and that any faith-based provider with a religious objection to a requirement in this rule will exercise their right to seek an accommodation by submitting a request to their state's or tribe's title IV–E/IV–B agency, which must promptly forward the request to ACF.

ACF takes seriously its obligations under the Constitution and Federal laws supporting religious exercise, freedom of conscience, and free speech, including the First Amendment and RFRA, and will continue to strongly enforce HHS regulations that ensure religious organizations must be considered eligible on the same basis as any other organization to participate in programs administered with title IV–E and IV–B funds. See 45 CFR 87.3(a) (2014) (''part 87''). That rule prohibits states and tribes from discriminating for or against an organization on the basis of the organization's religious character, motives, or affiliation, or lack thereof, or on the basis of conduct that would not be considered grounds to favor or disfavor a similarly situated secular organization. Also, that rule states that nothing in that regulation ''should be construed to preclude HHS from making an accommodation, including for religious exercise, with respect to one or more program requirements on a case-by-case basis in accordance with the Constitution and laws of the United States.'' See 45 CFR 87.3(b) (2014). In addition, this final rule has been revised in paragraph (i) to make clear that if application of any requirement under this rule would violate Federal protections for religious freedom, conscience, and free speech, that application will not be required.

Additionally, under part 87 states and tribes must inform grant subrecipients and contractors of their religious freedom rights in both solicitations for sub-grants and awards. See 45 CFR 87.3(n) (2014). ACF will consider any request for religious accommodation under RFRA or any other applicable authority protecting religious freedom to this rule's requirements. Under ACF's established practice, a state or tribe may not disqualify from participation in the program a provider that has requested the accommodation unless and until the

provider has made clear that the accommodation is necessary to its participation in the program and HHS has determined that it would deny the accommodation. See 45 CFR 87.3(c) and (q) (2014).

Comment: A number of commenters expressed concern that a final rule would abridge the First Amendment's protection of free speech. A commenter wrote that the rule would preclude legitimate sharing of ideas and perspectives and would prevent children and young people in care from encountering ideas and perspectives beyond their current ones. Some commenters argued that requiring agencies and foster families to use a child's correct pronouns or chosen name would violate the First Amendment by unconstitutionally forcing speech on foster care providers. Commenters argued that the First Amendment does not permit the government to compel ideological speech. Similarly, commenters contended that the rule would impede citizens' free speech more than would be necessary to achieve legitimate government ends. A commenter wrote that by omitting up-front exemptions, the proposed rule sought to chill speech. A couple of commenters asserted that concepts included in the proposed rule that relate to a child's identity place individuals and organizations of faith at risk of being accused of retaliation as described in the proposed rule. These commenters wrote that being penalized for retaliation because they were exercising their religious beliefs unconstitutionally infringes on and burdens religious providers' First Amendment rights both to free speech and free exercise.

Response: ACF is committed to upholding First Amendment rights to free speech and religious exercise for all providers and children in the child welfare system.

As to the commenters' concern that this rule violates the Free Speech Clause of the First Amendment, ACF also disagrees for two reasons. First, this rule does not govern the purely independent actions of private parties. Rather, it merely sets the terms on which an entity that chooses to provide services under a federally funded program must provide those services, without imposing any restrictions on any expression those entities engage in outside of the scope of the program. ACF is entitled to ensure that the providers of federally funded services carry out the Federal program in a way that ensures that the purposes of the Federal funding are met. *See Rust* v. *Sullivan,* 500 U.S. 173, 192–99 (1991); *Agency for Int'l Dev.* v. *All. for Open Soc'y Int'l, Inc.,* 570 U.S. 205, 217 (2013). No individual or entity is compelled to participate as a provider in the title IV–E/IV–B program—and, as this final rule makes clear, even among those who do choose to participate, no provider is compelled to become or seek to become a Designated Placement for LGBTQI+ children. And nothing in the rule purports to regulate any provider in their conduct outside of the scope of the title IV–E/IV–B program.

Second, any provider who chooses not to become a Designated Placement must simply comply with longstanding obligations under the title IV–E/IV–B programs to ensure that all foster children are placed in environments that provide safe and appropriate care for all children in foster care, as well as the nonretaliation provisions set forth in this regulation. As this final rule clarifies, the Department anticipates that as a general matter providing a placement that is safe and appropriate or complying with these nonretaliation requirements would not impose a substantial burden on providers' religious freedom, conscience or free speech rights, even aside from the voluntary nature of a provider's participation in the title IV–E/IV–B program. For example, as noted in section III of this preamble, a title IV–E/IV–B agency must ensure that each placement is safe and appropriate, meaning that no provider engages in acts of harassment, abuse, or mistreatment. Harassment, mistreatment, and abuse as contemplated by the rule are conduct, not speech. This is particularly so because harassment under the rule requires severe or pervasive acts that create a hostile environment, a standard that applies elsewhere in the law.

ACF disagrees with the commenters' concern that this rule generally violates the Free Speech Clause of the First Amendment or the religious exercise for all providers for several reasons. ACF has a compelling interest in providing these protections for children in the foster system as a general matter. ACF provides Federal funding to states and tribes to provide appropriate foster care placements for all children; to ensure all children are placed consistent with the child's best interest; and to provide support for meeting the safety, permanency, and well-being needs of all children.

As ACF has documented in the preambles for the proposed rule and this final rule, an extensive body of research shows that the treatment LGBTQI+ youth receive from their families and caregivers related to their sexual orientation or gender identity is highly predictive of their mental health and wellbeing, which the title IV–E/IV–B programs serve to protect.

This final rule requirement that all providers refrain from retaliating against children because of their sexual orientation or gender identity merely reflects the ordinary requirement that all children be provided safe and proper care in foster care. We expect that in the typical case the rule's protection against retaliation will be the least restrictive means of furthering the compelling interest in protecting the mental health and wellbeing of LGBTQI+ children. Should a provider establish that an application of the retaliation requirement imposes a substantial burden on the exercise of religion, ACF will assess whether that particular application is the least restrictive means of furthering a compelling interest.

However, as to the commenter's concern that the rule violates the right to religious exercise, we reiterate that Federal protections for religious exercise, and the Department's regulatory protections for seeking religious accommodation, continue to apply. When applying those protections to a particular case, ACF will consider as appropriate whether the application of this rule's protections to the particular party is the least restrictive means of furthering a compelling interest. When reviewing any request for religious accommodation ACF will conduct a case-by-case analysis in assessing whether application of the Rule's protections complies with RFRA and any other relevant Federal religious protection. We also expect title IV–E/IV–B agencies to similarly engage in assessing whether they are applying this rule and any state's or tribe's requirements in the manner that least restricts religious exercise.

Comment: A number of commenters noted that language protecting faith-based providers was included in the preamble of the NPRM but not in the regulation text. However, they wrote that the government's obligation to accommodate the religious freedom and conscience rights of private foster care providers should be incorporated into the rule text to create binding law on the Federal Government, states, and tribes.

Response: While the Constitutional and statutory protections would be applicable whether or not incorporated in regulatory text, text has been added at § 1355.22(i) stating that insofar as the application of any requirement under this part would violate applicable Federal protections for religious freedom, conscience, and free speech, such application shall not be required.

ACF further notes that all providers that are impacted by this rule are already covered by an HHS regulation at 45 CFR part 87 that protects religious freedom, nondiscrimination, and conscience rights. Consistent with the regulation at 45 CFR 87.3(n) and (q) as amended in 2014, state and tribal child welfare agencies must ensure that their notices or announcements of award opportunities include language that is substantially similar to that in section (a) of appendix A to part 87. In relevant part, those appendices require that sub-awards and contracts inform sub-awardees of their right to carry out child welfare programs consistent with ''religious freedom, nondiscrimination, and conscience protections in Federal law.''

A provider that requests any religious accommodation may submit the request to its State or Tribal title IV–E/IV–B agency. If the request concerns a religious objection to an obligation that is required or necessitated by this proposed rule as finalized, the title IV–E/IV–B agency must promptly forward the request to ACF, which will consider the request in collaboration with the HHS Office of the General Counsel.

Moreover, in response to concerns that the rule might be understood as requiring or authorizing the penalization of providers who decline to provide Designated Placements, the final rule has also been revised, at § 1355.22(j) to provide that nothing in this regulation shall be construed as requiring or authorizing a state or tribe to penalize a provider that does not seek or is determined not to qualify as a Designated Placement from participation in the state's or tribe's program under titles IV–E and IV–B.

Statutory Authority

Comment: A group of state attorneys general commented that they believed the proposed rule exceeded ACF's statutory authority under titles IV–B and IV–E of the Social Security Act. In support of their position, they argued that the IV–B and IV–E statutory requirements for agencies to ensure that foster children have ''case plans'' aimed at providing ''safe and proper'' care and ''appropriate'' placements that serve their ''best interests'' with providers who are ''prepared adequately with appropriate knowledge and skills'' do not authorize ACF to impose the specific requirements of the proposed rule. They describe the statutory requirements that ACF relies on as ''generalized provisions.'' In addition, these commenters argued that state family laws generally view the best interest of the child standard as flexible and fact-specific in determining appropriate placements, and that Congress did not intend ''to grant HHS this federal veto power over children's placements.''

Response: ACF disagrees that this rule exceeds ACF's statutory authority under titles IV–B and IV–E of the Social Security Act. The rule is consistent with the authority granted to ACF in the statutory provisions cited in the Legal Authority for the Final Rule section of this preamble, which promote the wellbeing and safety of children in foster care:

—Titles IV–E and IV–B of the Social Security Act (the Act) require title IV–E/IV–B agencies to provide case plans for all children in foster care that include a plan for assuring that the child receives safe and proper care and that services are provided to the parents, child, and foster parents in order to improve the conditions in the parents' home, facilitate return of the child to his own safe home or the permanent placement of the child, and address the needs of the child while in foster care, including discussion of the appropriateness of the services that have been provided to the child under the plan. Section 475(1)(B) of the Social Security Act, 42 U.S.C. 675(1)(B).

—Agencies must also have case review systems through which they ensure that each foster child's case plan is ''designed to achieve placement in a safe setting that is the least restrictive (most family like) and most appropriate setting available and in close proximity to the parents' home, consistent with the best interest and special needs of the child[.]'' Section 475(5) of the Social Security Act, 42 U.S.C. 675(5)(A). In order to receive title IV–E and IV–B funds, agencies must have plans approved by ACF that provide for case plans and case review systems that meet these statutory requirements. Sections 471(a)(16) and 422(b) of the Social Security Act, 42 U.S.C. 671(a)(16) and 622(b).

—States and tribes must certify in their title IV–E plans that they will ensure that before a child in foster care is placed with prospective foster parents, the prospective foster parents ''will be prepared adequately with the appropriate knowledge and skills to provide for the needs of the child [and] that the preparation will be continued, as necessary, after the placement of the child.'' Section 471(a)(24) of the Social Security Act, 42 U.S.C. 671(a)(24).

—Agencies must ensure that foster parents, as well as at least one official at any child care institution providing foster care, receive training on how to use and apply the ''reasonable and prudent parent standard,'' a standard characterized by careful and sensible parental decisions that maintain the health, safety, and best interests of a child while at the same time encouraging the emotional and developmental growth of the child, that a caregiver shall use when determining whether to allow a child in foster care under the responsibility of the State to participate in extracurricular, enrichment, cultural, and social activities. Social Security Act 471(a)(24) and (a)(10) and 475(10)(A), 42 U.S.C. 671(a)(24) and (a)(10) and 675(10)(A).

—Agencies must develop and implement standards to ensure that children in foster care placements are provided quality services that protect their safety and health. Social Security Act section 471(a)(22), 42 U.S.C. 671(a)(22).

—The Act authorizes the Secretary to review state compliance with the title IV–E and IV–B program requirements. Specifically, the Act requires the Secretary to determine whether state programs are in substantial conformity with state plan requirements under titles IV–E and IV–B, implementing regulations promulgated by the Secretary and the states' approved state plans. Section 1123A of the Social Security Act, 42 U.S.C. 1320a–2a.

As explained in detail in the NPRM, at 45 CFR 1355.22, we implement these statutory requirements for safe and proper care, placement in appropriate settings, appropriate and quality services, and adequate preparation of placement providers by requiring that LGBTQI+ children must be offered placements with providers who are committed to establishing an environment that supports their LGBTQI+ status or identity, trained to provide for their needs, and will facilitate their access to appropriate services that support their health and well-being. We further implement these statutory requirements by requiring that LGBTQI+ children must be provided with supportive services, protected from retaliation on the basis of their LGBTQI+ identity or status, and have their privacy protected. 42 U.S.C. 675(1)(B) and (5). For transgender and gender non-conforming children, we implement the statutory requirement for appropriate placements by requiring that they be offered placements consistent with their gender identity. ACF came to these conclusions based on our careful and thorough review of the evidence regarding LGBTQI+ children in foster care, as described in section II of the preamble.

Commenters cite a Federal district court decision, *Shane* v. *Cnty. of San Diego,* in support of their position. 677 F. Supp. 3d 1127, 1140 (S.D. Cal. 2023). However, that case does not address ACF's statutory authority. Instead, it addresses the standard under the doctrine of qualified immunity for holding a state government officer liable for money damages based on an alleged deprivation of a Federal right. Such cases may proceed only where the Federal right at issue is ''clearly established'' in case law. In *Shane,* the district court concluded that the state

government officers could not be held liable for their alleged failure to include adequate mental health and substance abuse protocols in the child's case plan because ''the Court has not identified any case law that establishes that a case plan must contain this level of specificity.'' *Id.* At 1140. (S.D. Cal. 2023). The court continued, ''[n]either the Ninth Circuit nor other circuits have otherwise examined what specific treatments need to be included in a case plan to be compliant with the CWA [Adoption Assistance and Child Welfare Act of 1980].'' *Id.* The district court's conclusion that existing caselaw had not addressed ''what specific treatments need to be included in a case plan'' (*Id.)* to comply with IV–B and IV–E is not relevant to this rulemaking. The lack of caselaw addressing a specific question regarding interpretation of the IV–E statute does not in any way limit ACF's ability to promulgate regulations interpreting and implementing the statute. With this rule, ACF specifies how the statutory ''case plan'' and ''case review'' requirements apply for LGBTQI+ foster children.

Regarding commenters' assertion that state family laws generally view the best interest of the child standard as flexible and fact-specific in determining appropriate placements, this rule does not prevent states or tribes from complying with their own state or tribal laws and policies regarding the best interest of the child in making placement decisions unless those laws or policies directly conflict with the requirements of the rule. ACF expects that title IV–E/IV–B agencies will continue to consider the many factors (such as kinship relationship, proximity to the child's school, etc.) that go into determining the most appropriate placement for a child. ACF recognizes and values the important role child welfare agencies play in balancing multiple needs to identify the most appropriate placement for each foster child. This rule simply clarifies that, for LGBTQI+ foster children, the statutory case plan and case review requirements require access to a placement that is supportive of their LGBTQI+ status or identity.

Arbitrary and Capricious

Comment: Some state attorneys general commented that the proposed rule is arbitrary and capricious. They cite *Motor Vehicle Mfrs. Ass'n* v. *State Farm Mut. Auto. Ins. Co.* for the principle that ''[a]gency analysis cannot 'run[ ] counter to the evidence before the agency,' must show a 'rational connection between the facts found and the choice made,' and needs to 'consider' all 'important aspect[s] of the problem' the agency is addressing. 463 U.S. 29, 43 (1983) (citation omitted).'' Commenters argue that the agency did not sufficiently consider ''countervailing consequences'' of its proposed approach, including the additional bureaucratic requirements it creates, the cost of complying with the mandates, the risk that foster care providers would be subject to retaliation claims, the likelihood of providers leaving the system as a result, the increase in likelihood that children would have to move multiple times while in foster care and that requiring urgent investigations of complaints about placements would take resources away from physical abuse investigations. Commenters also argued that the rule would endanger children through its requirement for youth to be offered a placement consistent with their gender identity. Commenters also argued that the cost estimate is unrealistically low. Commenters also argued that the rule does not offer sufficient evidence to show that LGBTQI+ youth are overrepresented in foster care or have worse outcomes or experiences while in care.

Response: ACF has carefully considered all important aspects of this rule, including the possibility that it may have unintended negative consequences, consistent with the requirements of *Motor Vehicle Mfrs.,* 463 U.S. 29. ACF has explained its consideration of the factors that commenters cite here in its discussion in the preamble in the discussion of regulatory provisions in Section III. ACF also considered alternatives like sub-regulatory guidance in the Regulatory Impact Analysis below. Based on its careful consideration of these factors, among many others discussed in the proposed rule and this final rule, ACF has concluded that the final rule is supported by the weight of the evidence before the agency specifically related to wellbeing of children being served in foster care.

Spending Clause

Comment: Some state attorneys general commented that they believe that the proposed rule violates the Spending Clause of the U.S. Constitution. They argue that caselaw requires that ''if Congress intends to impose a condition on the grant of federal moneys, it must do so unambiguously.'' *Pennhurst State Sch. & Hosp.* v. *Halderman,* 451 U.S. 1, 17 (1981). In their opinion, the IV–E and IV–B statutes do not authorize HHS to impose the requirements of this rule on state child welfare agencies.

Response: The IV–E and IV–B statutes are explicit that states and tribes may only qualify for IV–E and IV–B funding if they meet the statutory state plan requirements, described at 42 U.S.C. 671 and 622, which include the requirements to:

—Operate case review systems that assure that ''each child has a case plan designed to achieve placement in a safe setting that is the least restrictive (most family like) and most appropriate setting available and in close proximity to the parents' home, consistent with the best interest and special needs of the child[.]'' 42 U.S.C. 675(5), incorporated as a IV–E state plan requirement by 42 U.S.C. 671(a)(16) and as a IV–B state plan requirement by 42 U.S.C. 622(b)(8)(B).

—Ensure that case plans include a plan for assuring that the child receives safe and proper care and that services are provided to the parents, child, and foster parents in order to improve the conditions in the parents' home, facilitate return of the child to his own safe home or the permanent placement of the child, and address the needs of the child while in foster care, including a discussion of the appropriateness of the services that have been provided to the child under the plan. 42 U.S.C. 675(1)(B).

—Include a certification that, before a child in foster care under the responsibility of the State is placed with prospective foster parents, the prospective foster parents will be prepared adequately with the appropriate knowledge and skills to provide for the needs of the child, that the preparation will be continued, as necessary, after the placement of the child, and that the preparation shall include knowledge and skills relating to the reasonable and prudent parent standard for the participation of the child in age or developmentally-appropriate activities, including knowledge and skills relating to the developmental stages of the cognitive, emotional, physical, and behavioral capacities of a child, and knowledge and skills relating to applying the standard to decisions such as whether to allow the child to engage in social, extracurricular, enrichment, cultural, and social activities. 42 U.S.C. 671(a)(24).

—As a condition of each contract entered into by a child care institution to provide foster care, ensure the presence on-site of at least 1 official who, with respect to any child placed at the child care institution, is designated to be the caregiver who is authorized to apply the reasonable

and prudent parent standard to decisions involving the participation of the child in age or developmentally-appropriate activities, and who is provided with training in how to use and apply the reasonable and prudent parent standard in the same manner as prospective foster parents are provided the training pursuant to 42 U.S.C. 671(a)(24). 42 U.S.C. 671(a)(10).

Congress has expressly authorized the Secretary to ''make and publish such rules and regulations . . . as may be necessary to the efficient administration of the functions with which [the Secretary] is charged under [the Social Security Act].'' 42 U.S.C. 1302. This rule is necessary for the Secretary to fulfill his responsibility to ensure that child welfare agencies receiving IV–B and/or IV–E funding meet, for LGBTQI+ children in their care, the statutory mandates described above, including those to provide ''safe and proper care'' and ''appropriate'' placements.

ACF notes that the Supreme Court has held Congress need not in statute ''prospectively resolve every possible ambiguity concerning particular applications of the requirements of'' a spending program. *Bennett* v. *Kentucky Dep't of Education,* 470 U.S. 656, 669 (1985); *see also Mayweather* v. *Newland,* 314 F.3d 1062, 1067 (9th Cir. 2002) (''Congress is not required to list every factual instance in which a state will fail to comply with a condition. Such specificity would prove too onerous, and perhaps, impossible. Congress must, however, make the existence of the condition itself—in exchange for the receipt of federal funds—explicitly obvious.'') There is no question that the IV–B and IV–E statutes make explicitly obvious that states and tribes must comply with the IV–B and IV–E state plan requirements, including those related to case plans and case reviews, in order to qualify for Federal IV–B and IV–E funds.

Federalism Principles

Comment: Some state attorneys general and some members of Congress commented that they believe the proposed rule violates federalism principles. They stated that ''the U.S. Constitution leaves significant swaths of family, health, and safety regulation to the States' exercise of their constitutionally reserved police powers'' and argue that the proposed rule would shift the balance of power from states to the Federal Government. Commenters' primary concern is that the rule may preempt state laws limiting the availability of gender-affirming medical care for minors.

Response: ACF disagrees that this rule violates federalism principles. As discussed in the response directly above, the rule implements Federal statutory terms regarding the care title IV–E/IV–B agencies must provide to LGBTQI+ foster children in order to qualify for the Federal IV–B and IV–E financial assistance programs. The rule does not preempt state laws regarding gender-affirming medical care for minors generally. Thus, where the rule requires states to ensure that LGBTQI+ children have access to age- or developmentally appropriate services that are supportive of their sexual orientation and gender identity or expression, including clinically appropriate mental and behavioral health supports, it requires access only to those services and supports that are lawful in the state. When a state accepts funds under the title IV–E/IV–B program, it agrees to provide safe and proper care to children within the system funded by that program. This rule merely elaborates on what is necessary to provide such care in the specific context of LGBTQI+ children in that program. It does not preempt or require any change to state laws regulating medical care generally.

Nondelegation Doctrine

Comment: Some state attorneys general commented that they believe that the proposed rule violates the nondelegation doctrine of the U.S. Constitution. They stated that ''the nondelegation doctrine requires Congress to 'lay down' an 'intelligible principle' in an authorizing statute for the agency to follow. *Mistretta* v. *United States,* 488 U.S. 361, 372 (1989) (citation omitted). They then argued that the proposed rule's expansive interpretation of HHS's statutory authority ''cannot be squared with this foundational constitutional check. In HHS's view, the open-ended terms 'safe and proper care' and 'best interests and special needs of the child' are empty vessels waiting to enshrine any number of highly controversial requirements favored by federal agency heads.''

Response: ACF disagrees that this rule violates the nondelegation doctrine. Congress does not violate the nondelegation doctrine merely because it legislates in broad terms and leaves a certain degree of discretion to an executive agency, so long as Congress sets forth—as commenters acknowledged—''an intelligible principle'' to which the agency must conform. The Supreme Court has routinely upheld delegations to the Executive Branch ''under standards phrased in sweeping terms.'' *See Loving* v. *U.S.,* 517 U.S. 748, 771 (1996). Congress may permissibly delegate authority to the Executive Branch to regulate in a manner that is necessary to adhere to policy objectives in a statute. S*ee also Consumers' Rsch.* v. *Fed. Commc'ns Comm'n* (''The intelligible-principle test has long recognized 'that in our increasingly complex society, replete with ever changing and more technical problems, Congress simply cannot do its job absent an ability to delegate power under broad general directives.' [*Mistretta,* 488 U.S.] at 372, 109 S.Ct. 647; *Gundy,* 139 S. Ct. at 2123 (explaining that the Court's holdings recognize these considerations 'time and again').'' 67 F.4th 773, 787 (6th Cir. 2023)\.)\.

Congress here has charged the Secretary with ensuring that states and tribes operate case review systems in which ''each [foster] child has a case plan designed to achieve placement in a safe setting that is the least restrictive (most family like) and most appropriate setting available and in close proximity to the parents' home, consistent with the best interest and special needs of the child.'' 42 U.S.C. 675(5), 671(a)(16), 622(b)(8)(A)(ii). The case plan must also include a plan for assuring that each child receives ''safe and proper care'' 42 U.S.C. 675(1)(B). In addition, Congress has charged the Secretary with ''promulgat[ing] regulations for the review of [state IV–B and IV–E] programs to determine whether such programs are in substantial conformity with—State plan requirements under such parts B and E.'' 42 U.S.C. 1320a–2a(a). Those regulations must, among other things, describe ''the criteria to be used to measure conformity with such requirements and to determine whether there is a substantial failure to so conform.'' 42 U.S.C. 1320a–2a(b)(2) These portions of the statute, and others described in the Legal Authority for the Final Rule section of this preamble, provide the ''intelligible principle'' necessary for ACF to promulgate these regulations.

In a district court case, *CompRehab Wellness Grp., Inc.* v. *Sebelius,* No. 11–23377–CIV, 2013 WL 1827675 (S.D. Fla. Apr. 30, 2013), the court upheld against a nondelegation challenge a regulation promulgated pursuant to the Social Security Act's grant of rulemaking authority to the Secretary, which authorizes the Secretary to ''make and publish such rules and regulations . . . as may be necessary to the efficient administration of the functions with which [the Secretary] is charged under [the Social Security Act].'' 42 U.S.C.

1302. In finding the Social Security Act's grant of rulemaking authority to provide the necessary ''intelligible principle,'' the court stated that ''Essentially, what [the plaintiff] seeks is the invalidation of a statute granting authority to a named agency to regulate an identified federal program using statutory language well within the bounds of what has already been deemed constitutional.'' Id. at 6.

Although Congress has delegated authority ''from the beginning of the government,'' *Big Time Vapes, Inc.* v. *FDA,* 963 F.3d 436, 442 (5th Cir. 2020) (quoting *United States* v. *Grimaud, 220* U.S. 506, 517 (1911)), ''[o]n only two occasions—both in 1935 as part of its resistance to New Deal legislation—has the Court found a violation of the nondelegation doctrine,'' *Allstates Refractory Contractors, LLC* v. *Su,* 79 F.4th 755, 762 (6th Cir. 2023). One of those statutory provisions ''provided literally no guidance for the exercise of discretion,'' and the other ''conferred authority to regulate the entire economy on the basis of no more precise a standard than stimulating the economy by assuring 'fair competition.' '' *Whitman* v. *Am. Trucking Ass'ns,* 531 U.S. 457, 474 (2001) (citing *Panama Refin. Co.* v. *Ryan,* 293 U.S. 388 (1935); *A.L.A. Schechter Poultry Corp.* v. *United States,* 295 U.S. 495 (1935)). By contrast, in the almost 90 years since, the Supreme Court has consistently upheld ''Congress' ability to delegate power under broad standards,'' *Mistretta,* 488 U.S. at 373, and ''ha[s] 'almost never felt qualified to second-guess Congress regarding the permissible degree of policy judgment that can be left to those executing or applying the law,' '' *Am. Trucking,* 531 U.S. at 474–75 (quoting *Mistretta,* 488 U.S. at 416 (Scalia, J., dissenting).

Major Questions Doctrine

Comment: Some state attorneys general commented that they believe that the proposed rule violates the major questions doctrine of the U.S. Constitution. Commenters argue that the proposed rule ''raises controversial questions of vast 'political significance,' yet does not reflect the type of clear congressional authorization the major-questions doctrine requires. *West Virginia* v. *EPA,* 142 S. Ct. 2587, 2613 (2022) (quoting *FDA* v. *Brown & Williamson,* 529 U.S. 120, 160 (2000)).'' They specifically refer to the requirement in the proposed rule for children to be offered a placement consistent with their gender identity if they are being placed in child care institutions, arguing that ''this mandate overrides state policies governing sex-segregated childcare institutions, which heed the privacy and safety interests in maintaining sex-segregated spaces—particularly for children.''

Response: ACF disagrees that this rule violates the major questions doctrine. This rule does not address matters of ''exceptional economic and political significance,'' which would be necessary for the major questions doctrine to apply. Courts have held the major questions doctrine to apply where a regulation imposes extremely large costs or has far-reaching effects on areas outside of the agency's traditional regulatory domain. (*See e.g., Biden* v. *Nebraska,* 143 S. Ct. 2355, 2358 (2023), overturning the Department of Education's rule that would ''establish a student loan forgiveness program that will cancel about $430 billion in debt principal and affect nearly all borrowers,'' and *W. Virginia* v. *Env't Prot. Agency,* 597 U.S. 697, 724 (2022), overturning an EPA rule that would ''empower[] it to substantially restructure the American energy market.'')

This rule has no such exceptional reach. It implements ACF's core responsibility to promote the wellbeing of foster children in programs that receive Federal funding through requiring state and tribal compliance with titles IV–B and IV–E of the Social Security Act. Commenters do not point to any aspects of the rule which they believe are of ''exceptional economic significance.'' With regard to ''exceptional political significance,'' the only section they specifically point to is the requirement for child welfare agencies to place transgender and gender nonconforming youth consistent with their gender identity.[44] That requirement is not of ''exceptional political significance.''

Rather, it simply clarifies, for LGBTQI+ children in foster care, the IV–E statutory requirements to place foster children in ''a safe setting that is the . . . most appropriate setting available . . . consistent with the best interest and special needs of the child.'' 42 U.S.C. 675(5). This is not a ''transformative expansion in [ACF's] regulatory authority,'' but simply a clarification of how to apply a longstanding statutory requirement to a specific subset of children in foster care. *See W. Virginia* v. *Env't Prot. Agency,* 597 U.S. 697, 724 (2022). The requirement to offer children a placement that is consistent with their gender identity is based on ACF's careful consideration of current research on best practices to promote the health and safety of such youth, as described in the Background of the preamble. This regulatory requirement does not preempt state or tribal laws regarding sex-segregated child care institutions. If a state law prohibits placement in sex-segregated institutions based on gender identity, then the title IV–E/IV–B agency should explore all other placement options in order to offer a foster child a placement consistent with their gender identity, while also meeting the child's other particular needs.

Fulton v. City of Philadelphia

Comment: Many commenters stated that the proposed rule impermissibly attempts to bypass the ruling in *Fulton* v. *City of Philadelphia,* 593 U.S. 522 (2021), by placing obligations on states instead of directly placing them on providers. Commenters said that the Religious Freedom Restoration Act (RFRA), 42 U.S.C. 2000bb *et seq.,* and state-level RFRA laws cannot be circumvented merely by making states do the work of foster care provider. The commenter said that foster families of faith will be negatively affected by the proposed rule. Similarly, a group of commenters said that the rule attempts to bypass and shift responsibility for compliance with *Fulton* and will not survive a court challenge.

Response: The proposed rule and this final rule do not circumvent RFRA or otherwise undermine or attempt to bypass the Supreme Court's ruling in *Fulton* v. *Philadelphia.* Rather, the rule, as proposed and adopted, primarily imposes obligation on states and tribes because Titles IV–E and IV–B of the Social Security Act allocate funding to states and tribes to administer Child Welfare programs. Consequently, when obligations in this rule are imposed on states and tribes, that designation of responsibility is in keeping with the structure of the program.

ACF does not believe that administration of this rule will cause states or tribes to undertake any measures that violate *Fulton,* the Constitution, or Federal laws that support and protect religious exercise and freedom of conscience such as RFRA, applicable Federal civil rights laws or HHS regulations including 45 CFR part 87 (''Equal Treatment for Faith-Based Organizations''). As explained in the preamble to the NPRM, a provider may submit a request for religious accommodation regarding any requirement of this rule to the state or tribe, which must promptly forward the

[44] Note that the proposed rule applied the requirement for transgender and gender non-conforming children to be offered placements consistent with their gender identity to congregate care placements, whereas the final rule makes the requirement applicable to all placements.

request to ACF. We will then evaluate the request to determine whether an exemption is appropriate under the standards of the Constitution, RFRA, and any other applicable law.

V. Implementation Timeframe

We received comments expressing concerns that the provisions in the rule added a layer of bureaucracy and/or burden on child welfare agencies. ACF acknowledges that there will be additional costs placed on state and tribal title IV–E/IV–B agencies. Therefore, ACF is providing more than two fiscal years for state and tribal title IV–E/IV–B agencies to implement the provisions of this final rule on or before October 1, 2026. We added § 1355.22(l) accordingly.

VI. Regulatory Impact Analysis

Executive Orders 12866, 13563 and 14094

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 is supplemental to, and reaffirms the principles, structures, and definitions governing regulatory review as established in Executive Order 12866, emphasizing the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Section 3(f) of Executive Order 12866, as amended by Executive Order 14094, defines ''a significant regulatory action'' as an action that is likely to result in a rule that may: (1) have an annual effect on the economy of $200 million or more (adjusted every 3 years by the Administrator of the Office of Information and Regulatory Affairs (OIRA) for changes in gross domestic product), or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, territorial, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or (4) raise legal or policy issues for which centralized review would meaningfully further the President's priorities or the principles set forth in the order. OIRA has determined that this rule does meet the criteria for a significant regulatory action under section 3(f) of Executive Order 12866. Thus, it was subject to Office of Management and Budget (OMB) review.

Costs and Benefits

The benefits of this final rule are that placing children in foster care with providers the agencies consider Designated Placements for LGBTQI+ children will reduce the negative experiences of such children by allowing them to have access to needed care and services and to be placed in nurturing placement settings with caregivers who have received appropriate training. Ensuring such placements may also reduce LGBTQI+ foster children's high rates of negative health outcomes, homelessness, housing instability and food insecurity. This rule promotes a supportive environment for LGBTQI+ children in foster care.

ACF acknowledges that there will be a cost to implement changes made by this rule as we anticipate that a majority of states and tribes would need to expand their efforts to recruit and identify providers and foster families that the state or tribe could identify as Designated Placements for LGBTQI+ children. This cost would vary depending on an agency's available resources to implement the rule.

Alternatives Considered

As an alternative to this final rule, ACF considered providing sub-regulatory guidance requiring agencies to implement the provisions of the final rule for LGBTQI+. However, this alternative was rejected because it would not have the force of law and thus could not effectively ensure that LGBTQI+ children and youth in foster care receive Designated Placements and services. ACF has already provided extensive resources and sub-regulatory guidance to agencies about improving the health and wellbeing of LGBTQI+ children in foster care, but those resources alone have not been sufficient to ensure that LGBTQI+ youth are protected from mistreatment in foster care.

Regulatory Flexibility Analysis

The Secretary certifies, under 5 U.S.C. 605(b), as enacted by the Regulatory Flexibility Act (Pub. L. 96–354), that this rule will not result in a significant impact on a substantial number of small entities. This rule does not affect small entities because it is applicable only to state and tribal title IV–E agencies, and those entities are not considered to be small entities for purposes of the Regulatory Flexibility Act.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act (Pub. L. 104–4) requires agencies to prepare an assessment of anticipated costs and benefits before finalizing any rule that may result in an annual expenditure by state, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation). In 2023, that threshold is approximately $183 million. This rule does not contain mandates that will impose spending costs on state, local, or tribal governments in the aggregate, or on the private sector, in excess of the threshold.

Congressional Review

The Congressional Review Act (CRA) allows Congress to review major rules issued by Federal agencies before the rules take effect (see 5 U.S.C. 801(a)(1)(A)). The CRA defines a ''major rule'' as one that has resulted, or is likely to result, in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets (see 5 U.S.C. chapter 8). OMB's Office of Information and Regulatory Affairs has determined that this final rule does not meet the criteria set forth in 5 U.S.C. 804(2).

Assessment of Federal Regulations and Policies on Families

Section 654 of the Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to determine whether a policy or regulation may affect family well-being. If the agency's determination is affirmative, then the agency must prepare an impact assessment addressing seven criteria specified in the law. This rule will not have an impact on family well-being as defined in the law.

Executive Order 13132 on Federalism

Executive Order (E.O.) 13132 requires that Federal agencies, ''to the extent practicable and permitted by law,'' consult with state and local government officials in the development of regulatory policies with federalism

implications. Consistent with E.O. 13132 and *Guidance for Implementing E.O. 13132* issued on October 28, 1999, for rules with federalism implications, the Department must include in ''a separately identified portion of the preamble to the regulation'' a ''federalism summary impact statement'' (secs. 6(b)(2)(B) & (c)(2)). In the NPRM, ACF stated the proposed rule would not have substantial direct impact on the relationship between the Federal Government and the states, or on the distribution of power and responsibilities among the various levels of government. However, we anticipated that the proposed rule would have a substantial direct impact on the cost that title IV–E agencies would incur to implement administrative procedures and recruit and train their workforce and providers. Accordingly, ACF included a federalism summary impact statement in the preamble to the NPRM. In that statement, ACF wrote ''To inform the final rule, ACF will seek to further consult with state and local governments and request that such governments provide comments on provisions in the proposed rule and on whether state and local governments are likely to incur additional substantial costs.''

The Department's federalism summary impact statement for the final rule is as follows—''A description of the extent of the agency's prior consultation with state and local officials''—

The public comment period for the NPRM was open for 60 days and closed on November 27, 2023. During this time, we solicited comments via *regulations.gov* and email. During this comment period, we held two informational calls on October 11 and 30, 2023, for states, Indian tribes, and the public. During these calls, we provided an overview of the proposed provisions and where to submit comments.

''A summary of the nature of their concerns and the agency's position supporting the need to issue the regulation''—

As we discussed in the preamble to this final rule, some government entity commenters expressed support and appreciation for the efforts of HHS to establish protections for LGBTQI+ youth in foster care. Other government entity commenters opposed the rule and stated generally a belief that the NPRM creates a separate and distinct process for LGBTQI+ youth that violates privacy, and raised concerns related to religious beliefs of providers. Government entity critics of the NPRM also argued that it creates a ''cumbersome fix'' for a problem that lacks clear definition while states are currently having issues finding enough providers for all children in foster care. They also argued that the NPRM's provisions would disincentivize families from serving as foster parent providers and would ''drive individuals and organizations of faith away.'' They also expressed concerns that most congregate care providers are not currently equipped to meet the provisions around placing children according to their gender identity. Finally, there were objections to what they saw as unfunded burdens on the agencies to develop new trainings, modify licensing and placement rules, and revisions to case management systems to track placements, notifications, and other requirements in the NPRM. The state AG letters raised legal concerns that the NPRM violates various statutory and constitutional requirements; these concerns are addressed in section IV of this preamble.

''A statement of the extent to which the concerns of state and local officials have been met'' (secs. 6(b)(2)(B) and 6(c)(2))—

As we discussed in the preamble to this final rule, safe and appropriate placements are a requirement for all children in foster care. This final rule simply clarifies that requirement for LGBTQI+ children and preserves substantial state discretion consistent with that requirement.

Paperwork Reduction Act

This final rule does not contain additional information collection requirements (ICRs) subject to review by the OMB under the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501–3520. Information collection requirements for case plans required under title IV–E and IV–B are currently authorized under OMB number #0970–0428. This rule does not require changes to the existing information collection as there will be minimal burden associated with the proposed case plan requirements. Any additional costs would be minimal because agencies are already required to provide case review protections to children in foster care, and the rule provides more specificity for an LGBTQI+ child. While agencies will need to develop policies to comply with some of the provisions in the rule, the casework to provide safe placements, consult with children, and notify them of the procedures for reporting concerns or requests for placement changes are part of the agency's ongoing work with a child in foster care.

Information collection for the CFSR is currently authorized under OMB # is 0970–0214 and no changes are needed to that collection as this rule does not significantly change or add burden to the requirements. The CFSR already includes the review of case plan requirements for safe and appropriate placements for all children in foster care.

Annualized Cost to the Federal Government

ACF estimated that the proposed regulatory changes would cost the Federal Government $10,827,381 over a three fiscal year (2027–2029) period. ACF estimated that the combined total Federal and agency costs over three fiscal years would be $45,743,070.

The estimate for this final rule was derived using fiscal year (FY) 2021 data from the Adoption and Foster Care Analysis and Reporting System (AFCARS) on children in foster care, FY 2022 claiming data from the Form CB–496 ''Title IV–E Programs Quarterly Financial Report (Foster Care, Adoption Assistance, Guardianship Assistance, Prevention Services and Kinship Navigator Programs),'' National Child Abuse and Neglect Data System (NCANDS) child protection caseworker data collected between FY 2003 and FY 2014, state surveys, and the U.S. Department of Labor Bureau of Labor Statistics (BLS).

The portions of this final rule's requirements determined to have an identifiable impact on title IV–E/IV–B agency costs were as follows:

- To comply with the requirement that all LGBTQI+ children in foster care have access to a designated placement, agencies will likely need to increase the recruitment of providers who are qualified to provide safe and appropriate affirming care.
- Training agency caseworkers and supervisors on the procedural requirements in the final rule and on how to adequately serve LGBTQI+ foster children, and training placement providers seeking to become designated as a designated placement provider on how to meet the needs of LGBTQI+ children in foster care, as required in the proposal.

Assumptions: ACF made several assumptions when calculating administrative and training costs for this rule.

ACF assumes that quantifiable incremental costs with respect to the above activities will largely be incurred on behalf of children in foster care who are age 14 and older. ACF expects the population of children under age 14 who meet the proposed requirements of

paragraph (b)(2)(i)(A) or (B) to be relatively small, and therefore not likely to have a significant impact on cost. We are, however, accounting for the cost to recruit and train sufficient Designated Placement providers to serve all children in need of such a placement regardless of age. This is accomplished by calculating recruitment and training costs using the maximum expected level of designated placement needs for children ages 4 and older.

We assume that states and tribes will not be able to use title IV–B funding to implement this final rule. Children in foster care who are not title IV–E eligible are also subject to the proposed requirements based on the proposed rule's applicability to title IV–E and IV–B agencies. Title IV–B funding is available for 75 percent Federal financial participation (FFP) for recruitment and training of placement providers (section 424(a) of the Social Security Act). However, those funds are limited to an annual allotment provided to each title IV–B agency. Therefore, we assume agencies will likely need to cover 100 percent of the Designated Placement provision costs on behalf of non-title IV–E eligible children in foster care.

ACF assumes an overall annual one percent caseload growth rate in the foster care population based on our current title IV–E budgetary projections. Since this final rule focuses on older children in foster care, we increased this growth rate slightly (to an average of 1.4 percent annually) to consider an expected further growth in the age 18 and older foster care population, as more states opt to extend foster care through age 20.

This final rule will become effective at the beginning of FY 2027 and thus will apply to the entire population of children in foster care who are age 14 and older in that FY. ACF assumes that although implementation can begin earlier, the majority of incremental costs will be for the activities occurring in FY 2027. We expect costs in FYs 2028 and 2029 to be about half of those for FY 2027 since the required activities will affect primarily those children in care who are turning age 14 in the FY, or who are newly entering care at age 14 and older. It is possible that more of the costs will be concentrated in FY 2028, rather than FY 2029, if implementation occurs at a more accelerated pace. After the third year of implementation, we anticipate that incremental costs will largely be eliminated as available Designated Placement providers are recruited and the policies, procedures, and training requirements are implemented.

Federal cost estimate for implementation of Designated Placements: The table below displays the individual calculations by line. All entries in the table and the narrative below are rounded to the nearest whole number. The calculations to obtain these amounts, however, were performed without applying rounding to the involved factor(s).

Line 1. National number of children in foster care (FC). Line 1 of the table below displays the actual number of children in FC at the beginning of FY 2022 (baseline), which was 391,098. Line 1 also displays estimates of the annual number of children in FC in the subsequent FYs 2027, 2028, and 2029.

Line 2. National number of children in FC age 14 and older. Line 2 of the table below displays the actual number of children in FC who were age 14 and older at the beginning of FY 2022 (baseline) which was 92,852. We also provide estimates of the number of children in FC age 14 and older in the following subsequent FYs 2027, 2028, and 2029. In 2029 the caseload is estimated at 105,423.

Line 3. National average monthly number of children in title IV–E FC age 14 and older. Line 3 of the table below displays the actual number of title IV–E eligible children in FC age 14 or older at the beginning of FY 2022 (baseline), which was 36,817. This number is calculated by applying the percentage of all children in FC (title IV–E and non-IV–E eligible) that are age 14 or older to the reported count of title IV–E eligible children receiving FC administrative cost services. For example, in FY 2022 the title IV–E FC caseload for administrative costs was 155,075 and the percentage of all children in FC who were age 14 or older was 23.74 percent. Therefore, the calculated count of title IV–E eligible children in FC age 12 and older is 36,817 (155,075 × 23.74%). We also provide estimates of the number of children in FC age 14 and older in the following subsequent years: FYs 2027, 2028, and 2029.

Line 4. National number of children to be notified of Designated Placement requirements. Line 4 of the table below provides an estimate of the number of children in FC who must be notified of the Designated Placement provisions in proposed § 1355.22(a)(2)(i). For the first year of implementation (FY 2027) this number is the same as the Line 2 number (national number of children in foster care age 14 and older) since all of these children are required to be so notified. For FYs 2028 and 2029, we multiplied the national number of children in FC age 14 and older (Line 2) by the proportion of this population that entered care in that FY based on baseline year AFCARS data showing 40.64 percent. This step avoids counting children that are likely to have already received the notification in a prior FY. For example, in FY 2029 the national number of children that must be notified of Designated Placement requirements is 42,846 (105,423 (Line 2) × 40.64% (Line 4) = 42,846).

Line 5. Percentage of national foster care placements for children needing Designated Placements. Line 5 of the table below displays the estimated percentage of national foster care Designated Placements needed for children who identify as LGBTQI+. For each FY, we divided the number of children in foster care ages 14 and older (Line 4) by the expected total annual number of children entering foster care. Data available through surveys shows that about 30 percent of older children in foster care identify as LGBTQI+. An analysis of data collected from 2013–2015 in the California Health Kids Survey found that 30.4 percent of foster youth aged 10–18 identify as LGBTQ+.[45] Similarly, a 2021 study of foster children ages 12 through 21 in Cuyahoga County, Ohio, found that 32 percent identified as LGBTQI+.[46] For the purposes of this cost estimate, ACF's estimate of children age 14 and over in foster care who identify as LGBTQI+ is 30 percent. For example, in FY 2027 on Line 4, the national number of children to be notified of Designated Placement provisions is 103,423 and the base year total foster care entries is 206,812. ACF estimated 30 percent of older children in foster care identify as LGBTQI+. Therefore, Line 5, the percentage of national foster care placements for LGBTQI+ children needing designated placements, is 15.0 percent ((103,423 × 30 percent) ÷ 206,812). This estimate is purposefully high to account for some children under age 14 who may also need such designated placements.

Line 6. Total incremental costs (Federal and non-Federal) for recruiting Designated Placements. Line 6 of the table below displays the estimated total cost of recruiting placement providers to meet the proposed requirements for

[45] Baams, L., Russell, S.T, and Wilson, B.D.M. LGBTQ Youth in Unstable Housing and Foster Care, American Academy of Pediatrics, Volume 143, Issue 3, March 2019, *https://doi.org/10.1542/peds.2017-4211.*

[46] Institute for Innovation and Implementation at University of Maryland's School of Social Work and the National Quality Improvement Center on Tailored Services, Placement Stability, and Permanency for LBTQ2S Children and Youth in Foster Care (2021). Cuyahoga Youth Count: A Report on LBTQ+ Youth Experience in Foster Care, *https://theinstitute.umaryland.edu/media/ssw/institute/Cuyahoga-Youth-Count.6.8.1.pdf.*

Designated Placement providers for LGBTQI+ children in the foster care system. This estimate for each FY is based on data collected from ten title IV–E/IV–B agencies across the Nation with respect to their current annual budgets for foster care recruitment activities. We used this data to calculate a nationwide total estimated annual foster care recruitment cost of $185,998,176 based on an extrapolation of the provided data using FY 2022 foster care caseload information. This figure was adjusted for expected inflation (+2.0 percent per FY) thru FY 2027 resulting in an amount of $204,597,993 and was then multiplied by the calculated portion of the FC caseload ages 14 and older, and then further reduced to 30 percent of that number (estimated LGBTQI+ identification percentage) to reflect the maximum anticipated need for new Designated Placements in each FY. The resulting amount was then reduced by another 50 percent to reflect the likelihood that a significant portion of the Designated Placement recruitment budget would be obtained by refocusing the existing budget for recruitment costs towards Designated Placements. This would promote the agency's ability to comply with the proposed requirement in paragraph (a)(1), given agency recruitment budgets may be limited.

For example, in FY 2027 we estimate that up to 30 percent of notified children (Line 4) as a percentage of all newly placed children in that FY may require the availability of a placement that is designated by the agencies as a Designated Placement. This percentage for FY 2027 of 15.0 percent (31,027 ÷ 206,812) is then multiplied by the national estimated foster care recruitment cost budget $204,597,993) resulting in a total of $30,694,652. This figure is then reduced by 50 percent to reflect the anticipated incremental cost for Designated Placement provider recruitment efforts of $15,347,326. This estimate is purposefully high to account for some children under age 14 who may also need Designated Placements. The total cost for FYs 2025, 2026, and 2027 is $28,002,901.

Line 7. Total costs (Federal and non-Federal) for Designated Placement training (caseworkers, supervisors & providers). Line 7 of the table below provides the estimated total cost of training required for Designated Placements. This estimate for each FY is derived by first identifying the baseline cost of providing a model sexual orientation, gender identity or expression training curriculum developed by the National Quality Improvement Center on Tailored Services, Placement Stability, and Permanency for LGBTQ2S Children and Youth in Foster Care (QIC–LGBTQ2S); a project funded by ACF. This curriculum provides for a two-hour training that can be conducted in-person or remotely for an average group of 30 participants. The identified average cost of delivering this training is $300 plus overhead of 100 percent bringing the total cost to $600 or $20 per participant. Our estimate increases this figure by three percent per year to account for inflation.

We estimate the number of caseworker and casework supervisor (staff) in FY 2027 to be 100 percent of individuals in these positions. National foster care caseworker staffing level data was obtained from reports provided by six state title IV–E/IV–B agencies representing about 16 percent of the national FY 2021 foster care population. This data was then extrapolated using FC caseloads to obtain an estimate of the total number of national FC caseworkers in FY 2021. An estimated annual caseworker growth rate of +2.2 percent was also computed using national NCANDS child protection caseworker data collected between FY 2003 and FY 2014. This data results in an estimated FY 2027 national total of 39,929 FC caseworkers. The casework supervisor count uses the generally applied ratio of one supervisor for five workers resulting in an FY 2027 number of 7,986. The provider trainee population is calculated by using the count of children to be notified of Designated Placement provisions (Line 4) multiplied by 30 percent (maximum expected portion of these children identifying as LGBTQI+) and is then further reduced by the expectation that each provider will, on average, serve 1.5 children. This results in an FY 2027 Designated Placement provider trainee population of 23,270. The expected number of trainees for subsequent FYs is lower based on the expected number of newly placed children in each of these FYs.

Other costs included in the training estimate are staff participation costs and travel and per diem for in-person trainings conducted outside of the local area. Staff participation costs include salary and overhead for each worker spent in the training (two hours). Caseworker title average salary data (as of May 2022) sourced from the U.S. Department of Labor; Bureau of Labor Statistics (BLS) was used in the calculation along with an estimated overhead cost rate of 100 percent. This results in an FY 2022 (baseline) hourly cost (salary + overhead) of $55.98. The cost for two hours of activity is thus $111.97 per participant. A cost-of-living adjustment of +2 percent per year is than added for each subsequent year. Travel and per diem costs are estimated in FY 2022 (base year) as $100 per participant at in-person trainings which are expected to constitute 50 percent of total trainings. An inflation factor of three percent per year is applied to these costs for later FYs. For example, in FY 2027 we expect a total of 71,185 trainees (caseworkers, supervisors & foster care providers). Therefore, the 50 percent of that total expected to have travel & per diem costs is 35,592 trainees. At an average cost of $115 per participant the total cost in this category is $4,093,114. The total FY 2027 estimate for Designated Placement training is $11,064,847. This amount lowers to $3,406,624 for FY 2029. The total training cost for FYs 2027, 2028, and 2029 is $17,740,168.

Line 8. Total costs (Federal and non-Federal) for all Designated Placement activities. Line 8 displays the annual estimated total (Federal + non-Federal) costs for all recruitment and training activities for LGBTQI+ children. This is the sum of lines 6 and 7. We estimate these total costs in FY 2027 as $26,412,173 and the total cost for FYs 2027, 2028, and 2029 is $45,743,070.

Line 9. Total title IV–E FFP for all Designated Placement activity costs. Line 9 displays the annual estimated total title IV–E Federal share of costs for all placement activities for LGBTQI+ children. This is calculated by applying the applicable match rate and the estimated title IV–E participation (eligibility) rate that is generally used to allocate foster care administrative costs. Title IV–E agencies may claim FFP for 50 percent of the administrative costs that agencies incur to provide for activities performed on behalf of title IV–E eligible children in foster care, recruitment of foster homes and child-care institutions (CCIs), and certain other administrative activities identified in 45 CFR 1356.60. The agency must pay the remaining 50 percent non-Federal share of title IV–E administrative costs with state or tribal funds.

Title IV–E agencies may claim reimbursement for 75 percent of allowable training costs to provide for activities performed on behalf of title IV–E eligible children in foster care including training of agency caseworkers and supervisors (including staff participation costs) and training of foster care providers providing care to title IV–E eligible children. The title IV–E agency must pay the remaining 25 percent non-Federal share of title IV–E training costs with state or tribal funds. For example, the FY 2027 amount is

calculated by using the FY 2027 estimated title IV–E foster care participation rate of 39.65 percent along with the applicable FFP rates of 50 percent for administrative costs and 75 percent for training costs. We estimate these total title IV–E FFP costs beginning in FY 2027 as $6,333,200 and the total cost for FYs 2027, 2028, and 2029 is $10,827,381.

Line 10. Total title IV–E non-Federal share for all Designated Placement activity costs. Line 10 displays the annual estimated total title IV–E non-Federal (state or tribe) share of costs for all Designated Placement activities for LGBTQI+ children. This is calculated by applying the applicable non-Federal share match rate and the estimated non-IV–E participation (eligibility) rate that is generally used to allocate foster care administrative costs. For example, the FY 2027 amount is calculated by using the FY 2027 estimated title IV–E foster care participation rate of 39.65 percent along with the applicable non-Federal share matching rates of 50 percent for administrative costs and 25 percent for training costs. We estimate these total title IV–E non-Federal share costs beginning in FY 2027 as $4,139,530 and the total cost for FYs 2027, 2028, and 2029 is $7,310,288.

Line 11. Total title IV–B non-Federal share for all Designated Placement activity costs. Line 11 displays the annual estimated total title IV–B non-Federal (state or tribe) share of costs for all Designated Placement activities. This is calculated by deducting such placement activity costs that are allocable to title IV–E from such total costs. Although costs allocated to title IV–B are subject to Federal matching at the 75 percent rate, as explained previously we assume that none of these costs will be federally reimbursed through title IV–B due to the limited annual allotments for the title IV–B program. Therefore, agencies may need to fund the cost entirely from state or tribal funds or other sources of funding. We estimate these total title IV–B non-Federal share costs beginning in FY 2027 as $15,939,443 and the total cost for FYs 2027, 2028, and 2029 is $27,605,401.

Line 12. Total title IV–E and IV–B non-Federal share for all Designated Placement activity costs. Line 12 displays the annual estimated total title IV–E and IV–B non-Federal share of costs for all Designated Placement activities. This is the sum of amounts on Lines 10 and 11. We estimate these total title IV–E and IV–B non-Federal share costs beginning in FY 2027 as $20,078,973 and the total cost for FYs 2027, 2028, and 2029 is $34,915,689.

Year	2022 (baseline)	2027	2028	2029	Three-year total
1. National number of children in foster care (FC)	391,098	415,095	418,895	422,730	.....
2. National number of children in FC age 14 and older	92,852	103,423	104,418	105,423	.....
3. National average monthly number of children in title IV–E FC age 14 and older	36,817	41,008	41,403	41,801	.....
4. National number of children to be notified of Designated Placement provisions	N/A	103,423	42,438	42,846	.....
5. Percentage of national FC placements for children needing Designated Placements	N/A	15.0%	6.2%	6.2%	.....
6. Total incremental costs (Federal and non-Federal) for Designated Placement recruitment	N/A	$15,347,326	$6,297,488	$6,358,087	28,002,901
7. Total costs (Federal and non-Federal) for Designated Placement training (caseworkers, supervisors & providers)	N/A	$11,064,847	$3,268,697	$3,406,624	17,740,168
8. Total Federal and non-Federal costs for all Designated Placement activities (Lines 6+7)	N/A	$26,412,173	$9,566,185	$9,764,712	45,743,070
9. Total title IV–E FFP for all Designated Placement Activity costs	N/A	$6,333,200	$2,220,573	$2,273,609	10,827,381
10. Total title IV–E non-Federal share for Designated Placement activity costs	N/A	$4,139,530	$1,572,534	$1,598,224	7,310,288
11. Total title IV–B non-Federal share for Designated Placement activity costs	N/A	$15,939,443	$5,773,079	$5,892,879	27,605,401
12. Total titles IV–E and IV–B non-Federal share for placement Designated activity costs (Lines 10+11)	N/A	$20,078,973	$7,345,613	$7,491,103	34,915,689

ACF received several comments on the cost estimate.

Comment: One commenter expressed concerns that the fiscal impact calculations of this regulation are based on estimates of the number of LGBTQI+ children related to surveys conducted (one completed in California in 2014 and one completed in Ohio in 2021) rather than AFCARs data.

Response: AFCARS does not collect information on LGBTQI+ status or identity. Therefore, ACF believes that these surveys are the best available data to estimate the potential population to be served through this regulatory change.

Comment: Commenters expressed that the proposed rule underestimated the recruitment costs, and the cost estimate is unrealistic.

Response: As noted in the NPRM, the ACF estimate covers the maximum potential population for which foster home recruitment will be needed. It is also expected that as policies and procedures are modified to incorporate Designated Placements into existing recruitment activities, the incremental costs will decrease. We thus believe the estimate cost for recruitment to be reasonable.

Comment: One commenter stated that the basis for the cost estimate is not clear.

Response: ACF is basing its estimate that incremental costs of recruitment will no longer be in effect after FY 2027 on an expectation that recruiting activities for Designated Placements will be incorporated into existing recruitment contracts and services as well as the development of a significant pool of existing foster family homes that are trained to serve as Designated Placements.

Comment: One commenter indicated that their experience with 'estimates' of the cost of new proposals is alarmingly low. They always cost more than originally estimated.

Response: ACF understands the concern raised and has made a careful assessment of the likely costs based on information currently available.

Comment: One commenter stated the NPRM failed to adequately consider the costs state agencies will incur to comply with mandates. For example, state agencies will need to develop protocols and systems for implementing the rule's new oral and written notification regimes. State agencies also face significant costs to enforce and monitor the retaliation regime, including the costs of preparing and providing materials to all foster care providers.

Response: ACF determined that incremental costs for the Designated Placement regulatory changes were most likely to be concentrated in recruitment and training costs. We recognize that some other incremental costs may

occur, but do not expect them to be significant.

VII. Tribal Consultation Statement

Executive Order 13175, *Consultation and Coordination With Indian Tribal Governments,* requires agencies to consult with Indian tribes when regulations have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes and either impose substantial direct compliance costs on tribes or preempt state law. *Consultation and Coordination With Indian Tribal Governments,* 65 FR 67249. Similarly, ACF's Tribal Consultation Policy says that consultation is triggered for a new rule adoption that significantly affects tribes, meaning the new rule adoption has substantial direct effects on one on more Indian tribes, on the amount or duration of ACF program funding, on the delivery of ACF programs or services to one or more Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. This final rule does not meet either standard for consultation.

Some title IV–E/IV–B tribal agencies may need to amend their practices to ensure that a placement is available for and provided to an LGBTQI+ or Two-Spirit child in foster care that supports the child's identity. However, we do not expect the costs to be substantial and have received no comments indicating so. Tribal title IV–E agencies may claim FFP for title IV–E foster care administrative and training costs for a portion of the administrative costs incurred.

ACF is committed to consulting with Indian tribes and tribal leadership to the extent practicable and permitted by law. ACF engaged in consultation with Indian tribes and their leadership on the September 2023 NPRM as described below.

Description of Consultation

On September 29, 2023, ACF issued a letter to tribal leaders announcing the date, purpose, virtual location, and registration information for tribal consultation and shared it widely through a variety of peer groups and email list-serves. Tribal Consultation was held via a Zoom teleconference call on October 30, 2023. A report of the tribal consultation may be found on the CB website at: *https://www.acf.hhs.gov/cb/report/tribal-consultation-nprms-legal-foster-care.* In summary, the consultation participants expressed the importance of recognizing LGBTQI+ resources that are specific to each tribe because of differing traditions. A participant made the point that that there could be a potential conflict between placing a child in accordance with the ICWA placement preferences and the NPRM provisions on safe and appropriate placements. We agree that there could be numerous factors in Federal law and the final rule that impact an agency's decision on a case-by-case basis, which they will need to take into account in Federal law and the final rule. Participants requested clarification on what the law requires when there is a conflict between what a child is expressing and what the parents want for the child. This issue is addressed earlier in the preamble. Several participants commented that ACF can support tribal agencies by providing flexible funding to develop resources for LGBTQI+ youth. While flexible funding is not available at this time to implement the final rule, as noted in the NPRM, title IV–E administrative costs are available to claim recruitment and training costs.

List of Subjects in 45 CFR Part 1355

Adoption and foster care, Child welfare, Grant programs—social programs.

(Catalog of Federal Domestic Assistance Program Number 93.658, Foster Care Maintenance; 93.659, Adoption Assistance; 93.645, Child Welfare Services—State Grants).

Approved: April 23, 2024.

Xavier Becerra,

Secretary, Department of Health and Human Services.

For the reasons set forth in the preamble, ACF amends 45 CFR part 1355 as follows:

PART 1355—GENERAL

■ 1. The authority citation for part 1355 continues to read as follows:

Authority: 42 U.S.C. 620 *et seq.,* 42 U.S.C. 670 *et seq.;* 42 U.S.C. 1302.

■ 2. Add § 1355.22 to read as follows:

§ 1355.22 Designated Placement requirements under titles IV–E and IV–B for LGBTQI+ children.

LGBTQI+ children (including children with lesbian, gay, bisexual, transgender, queer, or questioning, and intersex status or identity) shall be placed and receive services in accordance with the following requirements:

(a) *Protections generally applicable.* As part of meeting the requirement to provide a safe and appropriate placement for all children in foster care, the title IV–E/IV–B agency must ensure that all placements, including those for LGBTQI+ children, are free from harassment, mistreatment, or abuse.

(b) *Designated Placements and services for LGBTQI+ children.* The title IV–E/IV–B agency must meet the following requirements for each LGBTQI+ child in foster care:

(1) *Designated Placements.* The title IV–E/IV–B agency must ensure there is a Designated Placement available for all LGBTQI+ children in foster care who request or would benefit from such a placement. Nothing in this section requires any provider to become or serve as a Designated Placement. As used in this section, for a placement to be specifically designated for an LGBTQI+ child, the provider must meet the protections generally applicable as defined at paragraph (a) of this section and:

(i) Commit to establish an environment that supports the child's LGBTQI+ status or identity;

(ii) Be trained with the appropriate knowledge and skills to provide for the needs of the child related to the child's self-identified sexual orientation, gender identity, and gender expression. The training must reflect evidence, studies, and research about the impacts of rejection, discrimination, and stigma on the safety and wellbeing of LGBTQI+ children, and provide information for providers about professional standards and recommended practices that promote the safety and wellbeing of LGBTQI+ children; and

(iii) Facilitate the child's access to age- or developmentally appropriate resources, services, and activities that support their health and well-being as described in paragraph (e) of this section.

(2) *Process for notification of and request for Designated Placements.* The IV–E/IV–B agency must implement a process by which an LGBTQI+ child may request a Designated Placement as described in paragraph (b)(1) of this section or request that their current placement be offered services to become a Designated Placement. The title IV–E/IV–B agency's process for considering such a request must provide the child with an opportunity to express their needs and concerns. The process must safeguard the privacy and confidentiality of the child, consistent with section 471(a)(8) of the Act and 45 CFR 205.50, and must include the following components:

(i) Notice of the availability of Designated Placements and the ability to request that services be offered to their

current placement must be provided to, at minimum:

(A) All children age 14 and over; and

(B) Children under age 14 who:

(*1*) Have been removed from their home due, in whole or part, to familial conflict about their sexual orientation, gender identity, gender expression or sex characteristics; or

(*2*) Have disclosed their LGBTQI+ status or identity or whose LGBTQI+ status or identity is otherwise known to the agency;

(ii) The notice must be provided in an age- or developmentally appropriate manner, both verbally and in writing, and must inform the child of how they may request a Designated Placement or services for their current placement and the process the title IV–E/IV–B agency will use in responding to their request; and

(iii) The notice must inform the child of the nonretaliation protections described at paragraph (d) of this section and describe the process by which a child may report a concern about retaliation.

(3) *Placement and services decisions and changes.* When making placement and service decisions related to an LGBTQI+ child, the title IV–E/IV–B agency shall give substantial weight to the child's expressed concerns or requests when determining the child's best interests. To promote placement stability, when an LGBTQI+ child requests a Designated Placement and before initiating any placement changes, the title IV–E/IV–B agency must consider whether additional services and training would allow the current provider to meet the conditions for a Designated Placement. If so, and if the current provider is willing to meet the conditions for a Designated Placement, the IV–E/IV–B agency must use the case review system to regularly review the provider's progress towards meeting the conditions of such a designation.

(c) *Process for reporting concerns about placements and concerns about retaliation.* The title IV–E/IV–B agency must implement a process for LGBTQI+ children to report concerns about a placement that fails to meet the applicable requirements of this section, and to report concerns about retaliation as described in paragraph (d) of this section. The process must safeguard the privacy and confidentiality of the child, consistent with section 471(a)(8) of the Act and 45 CFR 205.50. The title IV–E/IV–B agency must respond promptly to an LGBTQI+ child's reported concern, consistent with the agency's timeframes for investigating child abuse and neglect reports depending on the nature of the child's report.

(d) *Retaliation prohibited.* (1) The title IV–E/IV–B agency must have a procedure to ensure that neither the title IV–E/IV–B agency, nor any provider, nor any entity or person acting on behalf of the agency or a provider retaliates against an LGBTQI+ child in foster care based on the child's actual or perceived LGBTQI+ status or identity, any disclosure of that status or identity by the child or a third party, or the child's request or report related to the requirements for placements or services under this part.

(2) Conduct by the title IV–E/IV–B agency, provider, or any entity or person acting on behalf of the agency or a provider that will be considered retaliation includes, but is not limited to:

(i) Harassment, mistreatment, or abuse as described in paragraph (a) of this section.

(ii) Attempts to undermine, suppress, change, or stigmatize a child's sexual orientation or gender identity or expression through ''conversion therapy.''

(iii) Unwarranted placement changes, including unwarranted placements in congregate care facilities, or restricting an LGBTQI+ child's access to LGBTQI+ peers, siblings, family members, or age- or developmentally appropriate materials and community resources.

(iv) Disclosing the child's LGBTQI+ status or identity in ways that cause harm or risk the privacy of the child or that infringe on any privacy rights of the child.

(v) Using information about the child's LGBTQI+ status or identity to initiate or sustain a child protection investigation or disclosing information about the child's LGBTQI+ status or identity to law enforcement in any manner not permitted by law.

(vi) Taking action against current or potential caregivers (including foster parents, pre-adoptive parents, adoptive parents, kin caregivers and birth families) because they support or have supported a child's LGBTQI+ status or identity.

(e) *Access to supportive and age- or developmentally appropriate services.* The title IV–E/IV–B agency must ensure that LGBTQI+ children have access to age- or developmentally appropriate services that are supportive of their sexual orientation and gender identity or expression, including clinically appropriate mental and behavioral health supports.

(f) *Placement of transgender and gender non-conforming children in foster care.* When considering placing a child, the title IV–E/IV–B agency must offer the child a placement consistent with their gender identity. The title IV–E/IV–B agency must also consult with the child to provide an opportunity to voice any concerns related to placement.

(g) *Compliance with privacy laws.* The title IV–E/IV–B agency must comply with all applicable privacy laws, including section 471(a)(8) of the Act and 45 CFR 205.50, in all aspects of its implementation of this section. Information that reveals a child's LGBTQI+ status or identity may only be disclosed in accordance with law and any such disclosure must be the minimum necessary to accomplish the legally-permitted purposes.

(h) *Training and notification requirements.* In addition to meeting the requirements of paragraph (b)(1)(ii) of this section, the title IV–E–/IV–B agency must:

(1) Ensure that its employees who have responsibility for placing children in foster care, making placement decisions, or providing services:

(i) Are trained to implement the procedural requirements of this section; and

(ii) Are adequately prepared with the appropriate knowledge and skills to serve an LGBTQI+ child related to their sexual orientation, gender identity, and gender expression.

(2) Ensure that all its contractors and subrecipients who have responsibility for placing children in foster care, making placement decisions, or providing services are informed of the procedural requirements to comply with this section, including the required non-retaliation provisions outlined in paragraph (d) of this section.

(3) Ensure that all placement providers are informed of the procedural requirements to comply with this section, including the required non-retaliation provision outlined in paragraph (d) of this section.

(i) *Protections for religious freedom, conscience, and free speech.* Insofar as the application of any requirement under this section would violate applicable Federal protections for religious freedom, conscience, and free speech, such application shall not be required.

(j) *No penalties for providers that do not seek to qualify as Designated Placements.* Nothing in this section shall be construed to require or authorize a State or Tribe to penalize a provider in the titles IV–E or IV–B programs because the provider does not seek or is determined not to qualify as a Designated Placement under this section.

(k) *Severability.* Any provision of this section held to be invalid or

unenforceable as applied to any person or circumstance shall be construed so as to continue to give the maximum effect to the provision permitted by law, including as applied to persons not similarly situated or to dissimilar circumstances, unless such holding is that the provision of this section is invalid and unenforceable in all circumstances, in which event the provision shall be severable from the remainder of this section and shall not affect the remainder thereof.

(l) *Implementation.* Title IV–E/IV–B agencies must follow the requirements of this section beginning on October 1, 2026.

(m) *No effect on more protective laws or policies.* Nothing in this section shall limit any State, Tribe, or local government from imposing or enforcing, as a matter of law or policy, requirements that provide greater protection to LGBTQI+ children than this section provides.

■ 3. Amend § 1355.34 by revising paragraph (c)(2)(i) to read as follows:

§ 1355.34 Criteria for determining substantial conformity.

* * * * *

(c) * * *

(2) * * *

(i) Provide, for each child, a written case plan to be developed jointly with the child's parent(s) that includes provisions: for placing the child in the least restrictive, most family-like placement appropriate to the child's needs, and in close proximity to the parents' home where such placement is in the child's best interests; for visits with a child placed out of State/Tribal service area at least every 12 months by a caseworker of the agency or of the agency in the State/Tribal service area where the child is placed; for documentation of the steps taken to make and finalize an adoptive or other permanent placement when the child cannot return home; and for implementation of the requirements of § 1355.22(b) and (d) as applicable (sections 422(b)(8)(A)(ii), 471(a)(16), and 475(5)(A) of the Act and § 1355.22(b) and (d));

RIN 1615–AA59

Classification for Victims of Severe Forms of Trafficking in Persons; Eligibility for "T" Nonimmigrant Status

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security.

ACTION: Final rule.

SUMMARY: On December 19, 2016, the Department of Homeland Security (DHS) published an interim final rule (2016 interim rule) amending its regulations governing the requirements and procedures for victims of a severe form of trafficking in persons seeking T nonimmigrant status. The 2016 interim rule amended the regulations to conform with legislation enacted after the publication of the initial regulations and to codify discretionary changes based on DHS's experience implementing the T nonimmigrant status program since it was established in 2002. DHS is adopting the 2016 interim rule as final with several clarifying changes based on USCIS experience implementing the interim rule, in response to comments received, and due to an organizational change to move the regulations to a separate subpart as explained in the **SUPPLEMENTARY INFORMATION** section below. This final rule is intended to respond to public comments and clarify the eligibility and application requirements so that they conform to current law.

DATES: This rule is effective August 28, 2024.

Comments on the Paperwork Reduction Act section of this final rule must be submitted by July 1, 2024.

FOR FURTHER INFORMATION CONTACT: Rená Cutlip-Mason, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, by mail at 5900 Capital Gateway Dr, Camp Springs, MD 20529–2140; or by phone at 240–721–3000 (this is not a toll-free number). Individuals with hearing or speech impairments may access the telephone numbers above via TTY by calling the toll-free Federal Information Relay Service at 1–877–889–5627 (TTY/TDD).

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Purpose of the Regulatory Action

The T nonimmigrant status regulations—which include the eligibility criteria, application process, evidentiary standards, and benefits associated with the T nonimmigrant classification (commonly known as the ''T visa'' [1])—have been in effect since a 2002 interim rule. *New Classification for Victims of Severe Forms of Trafficking in Persons; Eligibility for ''T'' Nonimmigrant Status,* 67 FR 4783 (Jan. 31, 2002) (2002 interim rule). Since the publication of that interim rule, the public submitted comments on the regulations, and Congress enacted numerous pieces of related legislation. DHS published a 2016 interim rule to respond to the public comments, clarify requirements based on statutory changes and its experience operating the program for more than 14 years, and amend provisions as required by legislation. *Classification for Victims of Severe Forms of Trafficking in Persons; Eligibility for ''T'' Nonimmigrant Status,* 81 FR 92266 (Dec. 19, 2016). In July 2021, DHS reopened the public comment period for the interim rule for 30 days, and subsequently extended the deadline for comments. This final rule adopts the changes in the 2016 interim rule, with some modifications. The rationale for the 2016 interim rule and the reasoning provided in the preamble to the 2016 interim rule remain valid with respect to many of those regulatory amendments, and DHS adopts such reasoning to support this final rule. In response to the public comments received on the 2016 interim rule, DHS has modified some provisions in the final rule. DHS has also made some technical changes in the final rule. The changes are summarized in the following section I.B. Responses to public comments, and substantive changes being made in response, are discussed in detail in section III.

B. Summary of Changes Made in the Final Rule

1. Definitions

In the final rule, DHS has updated several definitions to clarify them and ensure that they are consistent with those in the Trafficking Victims Protection Act of 2000 (TVPA), as amended. *See* 22 U.S.C. 7102; new 8 CFR 214.201. The rule strikes language from the definition of ''involuntary servitude'' which had been derived from the *United States* v. *Kozminski,* 487 U.S. 931 (1988), decision. DHS has also added definitions of the terms ''serious harm'' and ''abuse or threatened abuse of the legal process.'' Additionally, DHS has added a definition of ''incapacitated or incompetent.'' DHS has clarified in the definition of law enforcement agency several additional examples of what may constitute such an agency. In addition, DHS has amended the definition for ''Law Enforcement Agency declaration.'' DHS has also included a new definition for the term ''law enforcement involvement.'' Finally, DHS has struck repetitive language from the definition of ''reasonable request for assistance.''

2. Bona Fide Determination Process

DHS has moved the definition of ''bona fide determination,'' (BFD) to define the process in the relevant provision of the regulations for clarity. *See* new 8 CFR 214.204(m), 214.205.

DHS has also amended provisions regarding BFDs, which reflect a modified process. *See* new 8 CFR 214.204(m), 214.205, and 274a.12(c)(40). The new streamlined process will include case review and background checks. Once an individual whose application has been deemed bona fide files a Form I–765, Application for Employment Authorization under new 8 CFR 274.a12(c)(40), USCIS will consider whether an applicant warrants a favorable exercise of discretion and will be granted deferred action and a BFD employment authorization document.[2]

3. Evidence of Extreme Hardship

In response to comments, DHS is clarifying the regulations to state that hardship to persons other than the applicant will be considered when determining whether an applicant would suffer the requisite hardship, only if the evidence specifically demonstrates that the applicant will suffer hardship upon removal as a result of hardship to a third party. New 8 CFR 214.209(c)(2).

4. Technical Changes

a. Reorganization of 8 CFR Part 214

This rule moves the regulations for T nonimmigrant status to a separate subpart of 8 CFR part 214 to reduce the length and density of part 214 and to make it easier to locate specific provisions. In addition to the renumbering and redesignating of paragraphs, the rule has reorganized and reworded some sections to improve readability, such as in new sections 8 CFR 214.204(d)(1) (discussing the law enforcement agency (LEA) declaration) and 8 CFR 214.208(e)(1) (discussing the trauma exception to the general requirement of compliance with any reasonable law enforcement requests for assistance). The rule also divides overly long paragraphs into smaller provisions to improve the organization of the regulations.

The Administrative Procedure Act (APA) exempts from the prior notice and opportunity for comment requirements, ''. . . rules of agency organization, procedure or practice.'' 5 U.S.C. 553(b)(A). Restructuring the regulations and moving them to a separate subpart resulted in no substantive changes to program requirements. This rule's changes to renumber paragraphs and improve readability affects rules of agency organization, procedure or practice, and those portions of the rule are exempt from the notice-and-comment requirements under 5 U.S.C. 553(b)(A).

Table 1 lists where provisions of 8 CFR 214.11 that were codified in the 2016 interim rule have been moved to in this final rule.

[1] Although T nonimmigrant status is known as the ''T visa'' colloquially, such a classification is not entirely accurate. T–1 applicants must be physically present in the United States or at a port of entry on account of the trafficking in persons to be eligible for T–1 nonimmigrant status, so they do not obtain a ''T visa'' to enter the United States. T–1 nonimmigrants may seek derivative T nonimmigrant status for certain family members. *See* new 8 CFR 214.211(a). Some of these family members may reside outside the United States and, if eligible, can join the T–1 nonimmigrant in the United States. Before family members with approved applications for derivative T nonimmigrant status can enter the United States, the family members must first undergo processing with the Department of State (DOS) at a U.S. Embassy or Consulate to obtain a T visa abroad. This is known as consular processing. USCIS will decide based on the application filed by the T–1 nonimmigrant whether an overseas family member qualifies for derivative T nonimmigrant status. DOS will then separately determine that family member's eligibility to receive a visa to enter the United States. A family member outside of the United States is not a derivative T nonimmigrant until they are granted a T–2, T–3, T–4, T–5, or T–6 visa by the DOS and are admitted to the United States in T nonimmigrant status. *See* new 8 CFR 214.211(a).

[2] Persons seeking or granted T nonimmigrant status pay no fee for Form I–765. *See* 8 CFR 106.3(b)(2)(viii).

Table 1. Redesignation Table	
Previous section	New section
214.11(a)	214.201
214.11(b)	214.202
214.11(c)	214.203
214.11(d)	214.204
214.11(e)	214.205
214.11(f)	214.206
214.11(g)	214.207
214.11(h)	214.208
214.11(i)	214.209
214.11(j)	214.210
214.11(k)	214.211
214.11(l)	214.212
214.11(m)	214.213
214.11(n)	214.214
214.11(o)	214.215
214.11(p)	214.216

b. Terminology Changes

USCIS is making technical clarifications throughout the regulation in amending the use of the term ''alien'' and replacing it with ''victim,'' ''applicant,'' ''survivor,'' or ''noncitizen'' where appropriate. USCIS is also updating terminology to be gender neutral throughout.

Throughout the regulations, DHS has made revisions to reference ''detection, investigation, or prosecution'' rather than just ''investigation or prosecution'' for consistency and accuracy.

DHS has also removed the term ''principal T nonimmigrant'' from the regulations and replaced it with the term ''T–1 nonimmigrant.'' The term ''principal T nonimmigrant'' did not appear elsewhere in the CFR, whereas ''T–1 nonimmigrant'' is used consistently to describe a victim of a severe form of trafficking in persons who has been granted T–1 nonimmigrant status.

c. Definition of Eligible Family Member

DHS has made a technical clarification to the definition of ''eligible family member.'' The 2016 Interim Rule defines this term as a family member who may be eligible for derivative T nonimmigrant status based on their relationship to a noncitizen victim and, if required, upon a showing of a present danger *or* retaliation; however, the statute indicates that the derivative must face a present danger *of* retaliation as a result of escape from the severe form of trafficking or cooperation with law enforcement. INA sec. 101(a)(15)(T)(ii)(III). As such, DHS has made a technical revision to the regulatory text to comply with Congressional intent. *See* new 8 CFR 214.201.

d. Clarification To Address T Visa Evidentiary Standard and Standard of Proof

DHS is also clarifying the evidentiary standard and standard of proof that apply to the adjudication of a T visa application. This rule retains the standard that applicants may submit any credible evidence relating to their T visa applications for USCIS to consider. *See* new 8 CFR 214.204(l).

e. Interview Authority

DHS is removing the interview provision at former 8 CFR 214.11(d)(6) to avoid redundancy. This section indicated that USCIS may require an applicant for T nonimmigrant status to participate in a personal interview. USCIS is removing this provision, because USCIS authority to require any individual filing a benefit request to appear for an interview is already covered at 8 CFR 103.2(b)(9).

f. USCIS Review

DHS has stricken ''de novo'' from 8 CFR 214.11(d)(5) and (8) (redesignated as 8 CFR 214.204(l)(2) and (n)) to reflect that USCIS conducts an initial review, not a ''de novo'' review.

g. Travel Authority

DHS has clarified that a noncitizen granted T nonimmigrant status must apply for advance parole to return to the United States after travel abroad pursuant to section 212(d)(5) of the INA, 8 U.S.C. 1182(d)(5). Compliance with advance parole procedures is required to maintain T nonimmigrant status upon return to the United States and remain eligible to adjust status under section 245(l) of the INA, 8 U.S.C. 1255(l). *See* new 8 CFR 214.204(p), 214.211(i)(4); 8 CFR 245.23(j).

h. Departure From the United States as a Result of Continued Victimization

DHS wishes to clarify that the ''continued victimization'' criteria referenced at 8 CFR 214.207(b)(1) does not require that the applicant is currently a ''victim of a severe form of trafficking in persons.'' Instead, continued victimization can include ongoing victimization that directly results from past trafficking. For example, if an applicant experienced harm such as abduction, abuse, threats, or other trauma that resulted in continuing harm, that applicant's reentry could be a result of their continued victimization, even though they were not trafficked upon reentry. As such, the applicant may be able to satisfy the physical presence requirement if they establish that their reentry into the United States was the result of continued victimization tied to ongoing or past trafficking. *See* new 8 CFR 214.207(b)(1).

i. Severe Form of Trafficking in Persons

DHS has revised the regulatory text so that references to ''trafficking'' and ''acts of trafficking'' are consistent with the INA, for consistency and clarity. These changes are intended to clarify for applicants when ''a severe form of trafficking in persons'' applies to a particular eligibility requirement and when instead ''trafficking'' or ''acts of trafficking'' apply to an eligibility requirement. For example, applicants must demonstrate that they have complied with reasonable requests for assistance in the investigation or prosecution of ''acts of trafficking'' or the investigation of crime where ''acts of trafficking'' are at least one central reason for the commission of the crime, pursuant to section 101(a)(15)(T)(i)(III)(aa) of the INA, 8 U.S.C. 1101(a)(15)(T)(i)(III)(aa), as distinct from a ''severe form of trafficking in persons'' that applies to other eligibility requirements, such as section 101(a)(15)(T)(i)(I) of the INA, 8 U.S.C. 1101(a)(15)(T)(i)(I). *See, e.g.,* new 8 CFR 214.201, 214.204(c), 214.208(a) and (c) through (e), 214.209(b), 214.211(a), 214.212(a) and (e), 214.215(b) (addressing ''acts of trafficking''); 214.201, 214.202(a) and (e), 214.204(g), 214.206(a), 214.207(a) and (b), 214.208(b), 214.209(b), 214.215(a) (discussing ''severe form of trafficking in persons'').

j. Extreme Hardship Involving Unusual and Severe Harm

DHS has amended previous 8 CFR 214.11(i)(1) because the previous citation at 8 CFR 240.58 no longer exists. *See* new 8 CFR 214.209(a).

k. Waiting List

DHS has revised previous 8 CFR 214.11(j) for clarity, and reorganized the provision at new 8 CFR 214.210, to reflect how the waiting list works in conjunction with the amended bona fide determination process.

l. Appeal Rights and Procedures

USCIS has clarified appeal rights and procedures at new 8 CFR 214.213(c). *See* 8 CFR 103.3. USCIS has further clarified the existing practice that an automatic revocation cannot be appealed. *See* new 8 CFR 214.213(a).

m. References to Forms

The phrase ''form designated by USCIS'' has been replaced in several places with an official form name. Form numbers have also been removed throughout and replaced by form names.

n. Law Enforcement Endorsement

DHS has updated references to ''Law Enforcement Endorsement'' to instead refer to ''Law Enforcement Declaration.'' This update more effectively captures the declaration process in the T visa program. In addition, DHS has deleted the requirement under 8 CFR 214.11(d)(3)(i) that a law enforcement agency (LEA) declaration must include ''the results of any name or database inquiries performed'' because the information is redundant, as USCIS conducts background checks on the applicant as part of its adjudication.

o. Assistance in the Investigation or Prosecution for Adjustment of Status

Prior to TVPRA 2008, the INA referenced the Attorney General at INA section 245(l)(1)(C), 8 U.S.C. 1255(l)(1)(C), which describes the requirement of assisting in an investigation or prosecution of acts of trafficking. TVPRA 2008 amended the INA so that the Secretary of Homeland Security is now only required to consult with the Attorney General as appropriate. *See* INA sec. 245(l)(1)(C), 8 U.S.C. 1255(l)(1)(C). As a result of TVPRA 2008, DHS has sole jurisdiction over the entire T nonimmigrant adjustment of status process, including the determination of whether an applicant complied with any reasonable requests for assistance in the investigation or prosecution of acts of trafficking, and DHS consults the Attorney General as it deems appropriate.[3] The regulations state that the Attorney General has jurisdiction to determine whether an applicant received any reasonable request for assistance in the investigation or prosecution of acts of trafficking, and, if so, whether they complied with that request. *See* previous 8 CFR 245.23(d). This required applicants for adjustment of status to submit a document issued by the Attorney General (or their designee) certifying the applicant had complied with any reasonable requests for assistance. *See* previous 8 CFR 245.23(f). After TVPRA 2008, however, an applicant was no longer required to obtain a certification from the Attorney General to demonstrate compliance with any reasonable requests in the investigation or prosecution of acts of trafficking, and immigration officers were no longer required to deny an application for lack of an Attorney General certification.[4] Instead, officers were required to determine whether the applicant had met the statutory requirement to comply with any reasonable request for assistance. Therefore, consistent with DHS' longstanding practice, and the changes made to the INA by TVPRA 2008, DHS amends 8 CFR 245.23(d) and (f) in this rule to indicate that an applicant is not required to provide a certification letter from the Attorney General regarding their compliance with any reasonable request for assistance in the investigation or prosecution of acts of trafficking. DHS has stricken any reference to the Attorney General in these sections; applicants must establish their compliance with any reasonable request for assistance to the satisfaction of USCIS only.

C. Costs and Benefits

As discussed further in the preamble below, this final rule adopts the changes from the 2016 interim final rule (IFR), with some modifications. The rationale for the 2016 interim rule and the reasoning provided in the preamble to the 2016 interim rule remain valid with respect to these regulatory amendments; therefore, DHS adopts such reasoning to support this final rule. In response to the public comments received on the 2016 interim rule, DHS has modified some provisions for this final rule. In addition, DHS has also made some technical changes in the final rule.

This final rule clarifies some definitions and amends the bona fide determination (BFD) provisions to implement a new process. This final rule also clarifies evidentiary requirements for hardship and codifies the evidentiary standard of proof that applies to the adjudication of an application for T nonimmigrant status. Lastly, DHS made technical changes to the organization and terminology of 8 CFR part 214.

For the 10-year period of analysis of the rule using the post-IFR baseline, DHS estimates the annualized costs of this rule will be $807,314 annualized at 3 and 7 percent. Table 1 in section IV provides a more detailed summary of the final rule provisions and their impacts.

II. Background and Legislative Authority

Congress created T nonimmigrant status in the TVPA. *See* Victims of Trafficking and Violence Protection Act

[3] *See* U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008: Changes to T and U Nonimmigrant Status and Adjustment of Status Provisions; Revisions to Adjudicator's Field Manual (AFM) Chapters 23.5 and 39 (AFM Update AD10–38)'' (2010), *https://www.uscis.gov/sites/default/files/document/memos/William-Wilberforce-TVPRAct-of-2008-July-212010.pdf* (TVPRA Memo).

[4] *See* TVPRA memo.

of 2000, div. A, TVPA, Public Law 106–386, 114 Stat. 1464 (Oct. 28, 2000). Congress has since amended the TVPA, including the T nonimmigrant status provisions, several times: Trafficking Victims Protection Reauthorization Act (TVPRA) of 2003, Public Law 108–193, 117 Stat. 2875 (Dec. 19, 2003); Violence Against Women Act (VAWA) 2005, Public Law 109–162, 119 Stat. 2960 (Jan. 5, 2006); Technical Corrections to VAWA 2005, Public Law 109–271, 120 Stat. 750 (Aug. 12, 2006); TVPRA 2008, Public Law 110–457, 122 Stat. 5044 (Dec. 23, 2008); VAWA 2013, Public Law 113–4, titles viii, xii, 127 Stat. 54 (Mar. 7, 2013); Justice for Victims of Trafficking Act (JVTA), Public Law 114–22, 129 Stat 227 (May 29, 2015). The TVPA may be found in 22 U.S.C. 7101–7110; 22 U.S.C. 2151n, 2152d.

The TVPA and subsequent reauthorizing legislation provide various means to detect and combat trafficking in persons, including tools to effectively prosecute and punish perpetrators of trafficking in persons, and protect victims of trafficking through immigration relief and access to Federal public benefits. T nonimmigrant status is one type of immigration relief available to victims of a severe form of trafficking in persons who assist LEAs in the investigation or prosecution of the perpetrators of these crimes.

The Immigration and Nationality Act (INA) permits the Secretary of Homeland Security (Secretary) to grant T nonimmigrant status to individuals who are or were victims of a severe form of trafficking in persons and have complied with any reasonable request by an LEA for assistance in an investigation or prosecution of crime involving acts of trafficking in persons (or are under 18 years of age or are unable to cooperate due to physical or psychological trauma), and to certain eligible family members of such individuals.[5] *See* INA sec. 101(a)(15)(T)(i)(I), (III), (ii), 8 U.S.C. 1101(a)(15)(T)(i)(I), (III), (ii). Applicants for T–1 nonimmigrant status must be physically present in the United States, American Samoa, or the Commonwealth of the Northern Mariana Islands, or at a port-of-entry to the United States, on account of a severe form of trafficking in persons. This includes being physically present on account of having been allowed to enter the United States to participate in investigative or judicial processes associated with an act or a perpetrator of trafficking. *See* INA sec. 101(a)(15)(T)(i)(II), 8 U.S.C. 1101(a)(15)(T)(i)(II). In addition, an applicant must demonstrate that they would suffer extreme hardship involving unusual and severe harm if removed from the United States. *See* INA sec. 101(a)(15)(T)(i)(IV), 8 U.S.C. 1101(a)(15)(T)(i)(IV). T nonimmigrant status allows eligible individuals to: remain in the United States for a period of not more than four years (with the possibility for extensions in some circumstances), receive work authorization, become eligible for certain Federal public benefits and services, and apply for derivative status for certain eligible family members. *See* INA sec. 214(o), 8 U.S.C. 1184(o); INA sec. 101(i)(2), 8 U.S.C. 1101(i)(2); 22 U.S.C. 7105(b)(1)(A); TVPA 107(b)(1); section 431 of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, as amended, 8 U.S.C. 1641(c)(4); INA sec. 101(a)(15)(T)(ii), 8 U.S.C. 1101(a)(15)(T)(ii). T nonimmigrants who qualify may also be able to adjust their status and become lawful permanent residents. INA sec. 245(l), 8 U.S.C. 1155(l).

[5] The primary applicant who is the victim of trafficking may also be referred to as the ''principal T nonimmigrant'' or ''principal applicant'' and receives T–1 nonimmigrant status, if eligible. The principal applicant may be permitted to apply for certain family members who are referred to as ''eligible family members'' or ''derivative T nonimmigrants'' and if approved, those family members receive T–2, T–3, T–4, T–5, or T–6 nonimmigrant status. The term derivative is used in this context because the family member's eligibility derives from that of the principal applicant.

III. Response to Public Comments on the 2016 Interim Final Rule

A. Summary of Public Comments

On December 19, 2016, DHS published an interim final rule (IFR) in the **Federal Register** and received 17 public comments. 81 FR 92266 (Dec. 19, 2016). On July 16, 2021, DHS reopened the public comment period for the IFR rule for 30 days to provide the public with further opportunity to comment on the interim final rule. 86 FR 37670 (July 16, 2021). DHS received multiple requests from stakeholders to extend the deadline for submitting public comments during the reopened public comment period. In response to that request, DHS extended the reopened comment period for an additional 30 days, to provide a total of 60 days for the public to submit comments. DHS received an additional 41 comments on the IFR during the reopened comment period. In total, between the two comment periods, DHS received 58 comments. DHS has reviewed all the public comments and addresses them in this final rule.

B. General and Preliminary Matters

Most comments came from representatives of nonprofit legal service providers who provided detailed recommendations based on their experience advocating for and providing services to trafficking victims. Commenters also included members of the public and individual law practitioners.

1. General Support for the Rule

Comment: Most commenters were generally in favor of the 2016 interim rule. Several commenters supported DHS's decision to issue detailed regulations that reflect statutory changes since the initial 2002 interim rule; some commenters mentioned the confusion that has been caused by having outdated regulations that did not reflect subsequent statutory changes. Some commenters expressed concern about the growing epidemic of human trafficking in the United States and globally. Commenters expressed support for the following:

- Eliminating the requirement that applicants for T nonimmigrant status provide three passport-sized photographs with their applications, which saves victims and assisting nonprofit organizations time and money;
- Removing the filing deadline for applicants whose trafficking occurred before October 28, 2000, recognizing that there was no statutory requirement for the deadline;
- Clarifying that if a T nonimmigrant cannot file for adjustment of status within the 4-year filing deadline and can show exceptional circumstances, they may be eligible to receive an extension of status and may potentially be able to adjust status to a lawful permanent resident;
- Updating regulatory language to reflect statutory changes to the categories of eligible family members and clarifying age-out protections for family members who are eligible at the time of filing but exceed the required age before USCIS adjudicates the application;
- Clarifying that T nonimmigrant applicants are exempted from the public charge ground of inadmissibility;
- Revising the waiver authority for grounds of inadmissibility during the T nonimmigrant application stage and the T adjustment of status stage;
- Providing additional guidance that an individual need not actually perform labor, services, or commercial sex acts to meet the definition of a ''victim of a severe form of trafficking in persons'';
- Clarifying the ''any credible evidence'' standard;

• Referencing the confidentiality provisions that apply to applicants for T nonimmigrant status under 8 U.S.C. 1367(a)(2) and (b);

• Exempting applicants who, due to trauma, are unable to comply with any reasonable request by a law enforcement agency;

• Clarifying that presence in the Commonwealth of the Northern Mariana Islands after being granted T nonimmigrant status qualifies towards meeting the requisite physical presence requirement for adjustment of status;

• Conforming the regulatory definition of sex trafficking to the revised statutory definition in section 103(10) of the TVPA, 22 U.S.C. 7102(10), as amended by section 108(b) of the JVTA, 129 Stat. 239;

• Expanding the definition of ''Law Enforcement Agency'' to include State and local agencies, as well as those that detect and investigate trafficking;

• Removing the requirement that an applicant establish they had no ''opportunity to depart'' the United States and clarifying the circumstances in which an applicant who has left the United States can establish physical presence in the United States on account of trafficking;

• Clarifying that ''involuntary servitude'' encompasses ''the use of psychological coercion''; and

• Removing the extreme hardship requirement for overseas derivative family members.

Response: DHS acknowledges and appreciates commenters' support of the rule. DHS agrees with the substance of these comments and believes these changes provide greater clarity and further align the T visa program with its statutory purpose.

2. Additional Comments

Commenters also requested that DHS modify certain provisions in the 2016 interim rule. Although there was some variation in the proposed changes, there was also significant overlap in their comments. DHS considered the comments received and all other material contained in the docket in preparing this final rule. This final rule does not address comments beyond the scope of the 2016 interim rule, including, for instance, those that express general opinions, those that include personally identifying information, or those that request that USCIS establish a regular timeline for regulatory updates. All comments and other docket material are available for viewing at the Federal Docket Management System (FDMS) at *www.regulations.gov* and searching under Docket Number USCIS–2011–0010.

Many commenters wrote about several subjects. Comments are summarized for clarity and combined with other comments on the same subject matter. The substantive comments received on the 2016 interim rule and DHS responses are discussed in depth below.

C. Terminology

Comment: Several commenters requested terminology changes to the regulation, including replacing ''victim'' with ''survivor,'' using gender neutral language throughout, and replacing ''alien'' with a more appropriate term.

Response: DHS agrees with these recommendations and has made technical clarifications throughout the regulation in amending the use of the term ''alien'' and replacing it with ''victim,'' ''applicant,'' ''survivor,'' or ''noncitizen'' where appropriate, while recognizing that ''alien'' is the statutorily-defined term used by Congress in INA sec. 101(a)(15)(T), 8 U.S.C. 1101(a)(15)(T) and INA sec. 214(o), 8 U.S.C. 1184(o).[6] DHS has also updated terminology to be gender neutral throughout.

D. Definitions

DHS added U.S. Code citations to the regulations that will be afforded due regard throughout subpart B of 8 CFR part 214 based on amendments to subsequent reauthorizing legislation.

1. Involuntary Servitude

Comment: Commenters wrote that they supported DHS removing the citation to *United States* v. *Kozminski,* 487 U.S. 931 (1988), from the definition of ''involuntary servitude'' and made several suggestions for further clarifying the definition. Several commenters requested that DHS delete language derived from the *Kozminski* decision to avoid confusion and promote consistency with the statutory definition of ''involuntary servitude'' at 22 U.S.C. 7102, which codifies section 103 of the TVPA and subsequent amendments.

Response: DHS agrees to delete the language derived from the *Kozminski* decision from the rule's involuntary servitude definition that is inconsistent with the TVPA's definition at 22 U.S.C. 7102(8). As stated in the preamble to the 2002 interim rule, Congress intended to expand the definition of involuntary servitude that was used in *Kozminski* by broadening the types of criminal conduct that could be labeled ''involuntary servitude.'' 67 FR 4786.

a. Abuse of the Legal System and Serious Harm

Comment: One commenter wrote that DHS should acknowledge that traffickers may specifically traffic individuals to force them to commit crimes for the benefit of the trafficker, force victims to commit crimes as a control mechanism, and target individuals with criminal histories for trafficking due to that person's reluctance or inability to seek redress from law enforcement agencies.

Response: DHS acknowledges that traffickers target individuals for these reasons, but does not feel it appropriate or necessary to include references to such practices in the regulations.

Comment: Multiple commenters proposed that the definitions section of the regulation adopt the current terms of ''abuse or threatened abuse of the legal process'' and ''serious harm'' from the criminal provisions related to ''forced labor'' in 18 U.S.C. 1589 and ''sex trafficking'' in 18 U.S.C. 1591, respectively. The commenters stated that these additional definitions would clarify for attorneys, LEAs, and advocates that ''serious harm'' is not based on subjective severity but broadly encompasses the surrounding circumstances, including financial and reputational harm. They commented further that many practitioners do not realize that ''abuse or threatened abuse of legal process'' can include administrative or civil processes and that the inclusion of these two definitions would be consistent with Congressional intent regarding how these terms should be interpreted in the trafficking context.

Response: DHS agrees with these proposed changes and the commenters' stated rationale. As stated in the preamble to the 2002 interim rule on T nonimmigrant status, the TVPA defines ''a severe form of trafficking in persons'' to include ''involuntary servitude.'' For purposes of T nonimmigrant status, this inclusion and other relevant definitions from section 103 of the TVPA, as amended, 22 U.S.C. 7102, apply. *See* 67 FR 4783, 4786. In defining ''severe form of trafficking in persons,'' the TVPA ''builds upon the Constitutional prohibition on slavery, on the existing criminal law provisions on slavery and peonage (Chapter 77 of title 18, U.S. Code, sections 1581 *et seq.*), on the case law interpreting the Constitution and these statutes (specifically *United States* v. *Kozminski,* 487 U.S. 931, 952 (1988)), and on the new criminal law prohibitions contained in the TVPA.''

[6] *See* INA sec. 101(a)(3), 8 U.S.C. 1101(a)(3) (The term ''alien'' means any person not a citizen or national of the United States).

Id. Furthermore, ''[t]he statutory definition of involuntary servitude [in the TVPA] reflects the new Federal crime of 'forced labor' contained in section 103(5) of the TVPA, and expands the definition of involuntary servitude contained in *Kozminski*.'' *Id.* Thus, DHS agrees that it is appropriate to draw from the definition of ''serious harm'' in the statute that criminalizes forced labor, 18 U.S.C. 1589. Accordingly, DHS incorporates these definitions in new 8 CFR 214.201.

b. Reasonable Person Standard

Comment: One commenter requested that the Department state within the involuntary servitude definition that the reasonable person standard applies to those with mental, cognitive, and physical disabilities or those who have been trafficked by a family member.

Response: DHS acknowledges that these factors are considered in individual cases but declines to adopt this language within the definition of involuntary servitude, as DHS does not feel it is necessary or prudent to address every possible scenario within the regulations and that such factors are best addressed in sub-regulatory guidance.[7]

c. Involuntary Servitude Induced by Domestic Violence

Comment: One commenter requested that the Department codify within the definition of involuntary servitude that the trafficker could be the victim's ''paramour or relative.'' Other commenters stated that USCIS inaccurately characterizes domestic relationships and presumes that the presence of domestic violence negates the possibility of trafficking.

Response: DHS acknowledges that trafficking can occur alongside intimate partner abuse, and involuntary servitude and domestic violence may coexist in some situations; however, DHS declines the commenter's suggestion. DHS believes that the regulations are not intended to explicitly capture every possible situation, and that this degree of specificity would not be helpful, and may inadvertently preclude scenarios that are not explicitly described in the regulation.

In determining whether threats, abuse, or violence create a condition of involuntary servitude that constitutes a severe form of trafficking in persons, DHS evaluates a number of factors, including but not limited to whether the situation involves compelled or coerced labor or services and is induced by force, fraud, or coercion. Although domestic violence and trafficking may intersect, not all work that occurs as the result of domestic violence constitutes involuntary servitude. To distinguish between domestic violence and labor trafficking resulting from domestic violence, an individual must demonstrate that the perpetrator's motive is or was to subject them to involuntary servitude.

d. Mixed Motives

Commenter: Several commenters wrote that DHS has incorrectly suggested that a trafficker's sole purpose must be involuntary servitude, and that a trafficker's intent cannot also be extortion or for monetary gain. They request DHS clarify that an applicant may meet the definition of a severe form of trafficking in persons if at least one purpose of the perpetrator's force, fraud, or coercion is to subject the person to involuntary servitude, peonage, debt bondage, slavery, or a commercial sex act. Commenters also request that DHS specify in the preamble of the final rule that a severe form of trafficking in persons may occur during smuggling even if the smugglers also have the purpose of subjecting the victim or their families to other crimes such as extortion, if they also have the purpose of subjecting them to, *inter alia,* involuntary servitude or commercial sex.

Response: DHS agrees that a trafficker may simultaneously have multiple motivations, including a desire to subject the victim to involuntary servitude and a desire for monetary gain through extortion. DHS acknowledges, as commenters note, that human trafficking rarely occurs in a vacuum. In the process of exerting force, fraud, and/or coercion on their victims, perpetrators may commit other crimes during the scheme to initiate and maintain control over the victim, including false imprisonment, assault, sexual assault, domestic violence, and extortion.

A perpetrator's motivations can be multifaceted. For example, smugglers who intend to extort an individual during a smuggling arrangement may also intend to compel forced labor or services that place the person into a condition of servitude, even where the forced labor or services end upon completion of the smuggling arrangement. Nonetheless, DHS recognizes that not all smuggling arrangements can or will qualify as a severe form of trafficking in persons, particularly where smugglers force a person to perform an act or multiple acts outside of a condition of servitude during a smuggling operation. For example, a person may be forced to perform certain labor during a smuggling arrangement to facilitate the smuggling operation or avoid detection at the border, which would not qualify as involuntary servitude and therefore would not constitute trafficking or a severe form of trafficking in persons. In addition, there may be situations where an individual is forced to perform labor for another purpose, and not for the purpose of involuntary servitude, peonage, debt bondage, or slavery. As with any T visa application, DHS considers all the evidence on a case-by-case basis before making a final determination on an application.

Although DHS agrees with the commenter, no changes have been made to the regulatory text in response to this comment given DHS' consideration of these factors when evaluating evidence in cases involving smuggling, as detailed in existing USCIS policy guidance.[8]

2. Law Enforcement Agency (LEA)

Comment: One commenter suggested using the term ''law enforcement agency'' (LEA) consistently throughout the regulation to provide clarity.

Response: DHS agrees with this comment and has amended the regulation to use the term ''law enforcement agency'' consistently throughout, rather than ''law enforcement'' or ''law enforcement officer.''

Comment: Multiple commenters expressed support for DHS expanding the definition of an LEA. Some commenters stated support for the rule's clarification that LEAs can provide

[7] For example, *see* U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''Volume 3, Humanitarian Protection and Parole, Part B, Victims of Trafficking, Chapter 2, Eligibility Requirements, Section B, Victim of Severe Form of Trafficking in Persons, Subsection 3, Definition of Coercion,'' *https://www.uscis.gov/policy-manual/volume-3-part-b-chapter-2* (discussing analyzing coercion using a ''reasonable person'' standard) (last updated Oct. 20, 2021). As discussed elsewhere, DHS also applies a victim-centered approach in its adjudications, which takes into consideration all relevant factors in the case, including a victim's individual circumstances. *See, e.g.,* U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''Volume 3, Humanitarian Protection and Parole, Part B, Victims of Trafficking, Chapter 7, Adjudication, Section A, Victim-Centered Approach,'' *https://www.uscis.gov/policy-manual/volume-3-part-b-chapter-7* (last updated Oct. 20, 2021).

[8] *See* U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''Volume 3, Humanitarian Protection and Parole, Part B, Victims of Trafficking, Chapter 2, Eligibility Requirements, Section B, Victim of Severe Form of Trafficking in Persons, Subsection 7, Difference Between Trafficking and Smuggling,'' *https://www.uscis.gov/policy-manual/volume-3-part-b-chapter-2 (last updated Oct. 20, 2021).*

Form I–914, Supplement B, Declaration of Law Enforcement Officer for Victim of Trafficking in Persons,[9] even when there is no formal investigation or prosecution. Several commenters requested that the rule further expand the LEA definition to include additional agencies, which would help inform victims of their reporting options and identify similar local and state counterpart agencies that would meet the LEA definition. Commenters wrote that employees of some Federal agencies have expressed confusion over their certification authority because they are explicitly designated as certifying agencies in the regulations for U nonimmigrant status but not in this regulation. *See* 8 CFR 214.14(a). Several commenters also requested DHS add tribal authorities to the list of authorized LEAs.

Response: Although the list of agencies included is not exhaustive, DHS agrees that expanding the list will provide clarity to victims, stakeholders, and the LEAs themselves, and has updated the definition accordingly. DHS has also amended the definition to include tribal authorities. Including a more expansive list will assist certifiers and will be an operational efficiency, as adjudicators will not need to evaluate in each case whether a specific agency meets the definition of an LEA.

3. Law Enforcement Involvement

Comment: DHS received comments related to the term ''law enforcement involvement,'' which is a concept used to analyze whether an applicant is physically present in the United States on account of trafficking (''physical presence''). Commenters requested additional clarification regarding the physical presence requirement, discussed in further detail in section J, below.

Response: DHS has defined ''law enforcement involvement'' under new 8 CFR 214.207(c)(4) to mean LEA action beyond simply receiving the applicant's reporting of victimization, to include the LEA interviewing the applicant, liberating the applicant from their trafficking, or otherwise becoming involved in detecting, investigating, or prosecuting the acts of trafficking. Liberation of an applicant from their trafficking will suffice to establish law enforcement involvement where the record indicates that the LEA detected the applicant's trafficking as part of this process. This definition will provide clarity to adjudicators and stakeholders as to the extent of involvement required for physical presence under new 8 CFR 214.207(c)(4).

4. Reasonable Request for Assistance

Although DHS did not specifically receive comments on this topic, as a technical edit DHS has removed the term ''reasonable'' from the definition of the term ''reasonable request for assistance,'' because the initial inquiry for DHS is to determine whether a request was made. After the threshold determination that a request was made by the LEA, the reasonableness of that request is analyzed. Accordingly, the reasonableness is assessed using the list of factors at new 8 CFR 214.208(c) (formerly 8 CFR 214.11(h)(2)). DHS retained ''reasonable request for assistance'' in other sections to reflect this analysis. DHS removed the paragraph at 8 CFR 214.11(a) describing the factors to consider the reasonableness of a request, because this language was duplicative of the language contained at 8 CFR 214.11(h)(2) (redesignated as 8 CFR 214.208(c)). Several revisions were made to the language at 8 CFR 214.208(c), which are discussed further below.

5. Commercial Sex Act

Comment: Commenters requested DHS interpret the term ''commercial sex act'' broadly, beyond what the commenters understood the current definition of ''anything of value'' may encompass, to avoid confusion and maintain consistency with the statute and legal precedent.

Response: DHS acknowledges that the term ''anything of value'' has been interpreted very broadly and encompasses things other than monetary or financial gain. ''Anything of value'' may include a range of activity that does not always have an exact monetary value attached to it, including but not limited to safety, protection, housing, immigration status, work authorization, or continued employment. Given Congressional intent and the significant precedent interpreting the term broadly, DHS has determined that it is not necessary to specifically reflect this range of activity in the regulatory text.

6. Severe Form of Trafficking in Persons

Comment: One commenter wrote that DHS should clarify that attempted trafficking may constitute a severe form of trafficking in persons by adding the following language to the definition of ''severe form of trafficking in persons'': ''This definition does not require a victim to have actually performed labor, services, or a commercial sex act.''

Response: DHS agrees that it is not necessary for the victim to actually perform the labor or commercial sex act(s) to be eligible for T nonimmigrant status. For example, a victim may be recruited through force, fraud, or coercion for the purpose of performing labor or services but be rescued or have escaped before performing any labor or services; however, DHS declines to adopt the commenter's suggestion to state this directly in the definition of a severe form of trafficking in persons, as the fact that attempted trafficking may qualify as trafficking is already clarified at 8 CFR 214.206(a) (formerly 8 CFR 214.11(f)).

E. Evidence and Burden and Standard of Proof

USCIS has historically considered ''any credible evidence'' when evaluating T visa applications. T nonimmigrant applicants are instructed to submit any credible, relevant evidence to establish that they have been a victim of a severe form of trafficking in persons, and that they have complied with any reasonable request for assistance from law enforcement. To this end, DHS has included new language in 8 CFR 214.204(f) indicating that all evidence demonstrating cooperation with law enforcement will be considered under the ''any credible evidence'' standard, for consistency with the remainder of the rule, which states that applicants may submit any credible evidence relating to their T applications for USCIS to consider. *See* new 8 CFR 214.204(l).

The ''preponderance of the evidence'' standard of proof is distinct from the evidentiary requirements and standard set by regulation. *Matter of Chawathe,* 25 I&N Dec. 369 (AAO 2010). USCIS has historically applied a ''preponderance of the evidence'' standard when determining whether the T applicant has established eligibility and has included that standard at new 8 CFR 214.204(l). To meet this standard, the applicant must prove that facts included in their claim are ''more likely than not'' to be true. *Id.* at 369. To determine whether an applicant has met their burden under the ''preponderance of evidence'' standard, DHS considers not only the quantity, but also the quality (including relevance, probative value, and credibility) of the evidence. *Id.* at 376.

This standard of proof should not be confused with the burden of proof. The burden of proving eligibility for the

[9] The title of the Form I–914, Supplement B, is being changed in this rule to ''Declaration for Trafficking Victim.''

benefit sought remains entirely with the applicant. *Id.* at 375.

1. Reasonable Person Standard

Comment: One commenter requested DHS acknowledge in the preamble or regulation that individuals with cognitive, mental, and physical impairments are at greater risk for trafficking and face greater barriers to escape trafficking. The commenter stated that this should be acknowledged so that whenever a reasonableness standard is used, it should be interpreted as a reasonable person with the cognitive, mental, and physical impairments of the specific applicant.

Response: DHS acknowledges that individuals with impairments are at greater risk for exploitation. DHS does not believe that this is necessary or appropriate to include in the regulation. DHS considers all relevant evidence in adjudicating each case, including the circumstances and any vulnerabilities of an individual applicant when determining reasonableness.[10] Despite the existence of certain vulnerabilities, however, each applicant retains the burden of proof to establish eligibility by a preponderance of the evidence.

2. Credibility of Evidence

Comment: Commenters suggested that DHS amend provisions regarding initial evidence at 8 CFR 214.11(d)(2) and (3) (redesignated here as 8 CFR 214.204(c) and (e)) to state that a victim's statement alone may prove victimization.

Response: DHS declines to amend 8 CFR 214.11(d)(2) and (3) (redesignated here as 8 CFR 214.204(c) and (e)) to explicitly state that a victim's statement alone may prove victimization. While DHS may determine, based on the facts and circumstances of a particular case, that a personal statement alone may be sufficient to prove victimization, in such a scenario, the victim's statement would have to be sufficiently detailed, plausible, and consistent in order to satisfy evidentiary requirements. With all T visa applications, DHS makes an individualized determination of whether trafficking has been established based on the evidence in each particular case. DHS notes that it has revised the requirements for a victim's personal statement included in the list of evidence in redesignated 8 CFR 214.204(c) (Initial evidence). These additions are intended to clarify what is expected to be included in a victim's personal statement to establish eligibility and will reduce barriers for victims of trafficking. The revisions in § 214.204(c)(1) are intended to align with longstanding USCIS policy guidance and practice, and are consistent with the program's evidentiary standards.

Comment: One commenter requested DHS clarify that evidence is not rendered less credible because of the amount of time that has elapsed between an applicant's eligibility for T nonimmigrant status and when they filed their application. The commenter also requested DHS clarify that evidence, including personal statements and psychiatric evaluations, is not less credible because it was generated in response to a Request for Evidence.

Response: DHS acknowledges there may be legitimate reasons why significant time elapses between an applicant's trafficking and when they file for T nonimmigrant status. DHS also acknowledges that individuals produce evidence that was not initially submitted with their application in response to Requests for Evidence (RFEs) for various reasons. DHS emphasizes that any credible evidence will be evaluated in determining an applicant's eligibility but declines to include this level of specificity within the regulation. DHS acknowledges that due to the nature of victimization, victims may be unable to provide information or documentation that would otherwise be available to establish eligibility. USCIS instructs adjudicators to be mindful of the ways trauma may impact victims, including their recollection of traumatic experiences, which may shift over time.[11]

3. Opportunity To Respond to Adverse Information

Comment: Multiple commenters discussed RFEs [12] that require applicants to explain inconsistencies identified by adjudicators in the applicant's administrative record to which the applicant is not privy. The commenters stated that the inconsistent evidence typically is found within records of other agencies and that attorneys often cannot obtain this information in a timely manner through requests under the Freedom of Information Act (FOIA), 5 U.S.C. 552, as amended. The commenters also wrote that advocates have reported that U.S. Customs and Border Protection (CBP) interviews were conducted without the use of trauma-informed techniques and did not lead to accurate identification of trafficking victims. The commenters wrote that statements taken during these interviews can later appear to be inconsistent statements. The commenters stated that the full content of the CBP interviews is not released in response to a FOIA request and that the applicant is not able to correct the inconsistent statements.

The commenters requested that DHS change the regulation to state that DHS will consider the totality of the evidence submitted along with the administrative record in evaluating the T visa application, and that if information contained in the administrative record could result in an unfavorable determination, the applicant must be given a copy of the information and must be provided an opportunity to meaningfully respond to such adverse evidence.

Response: DHS agrees that all evidence should be assessed in its totality. DHS also agrees that it is important for applicants and their advocates to understand derogatory information on which the decision will be based; however, other regulatory provisions currently address this issue. Specifically, under 8 CFR 103.2(b)(16)(i), when a decision will be adverse and is based on derogatory information ''of which the applicant or petitioner is unaware, [they] shall be advised of this fact and offered an opportunity to rebut the information and present information in [their] own behalf before the decision is rendered.'' Accordingly, when there is derogatory information of which the applicant is unaware and upon which an adverse decision will be based, USCIS will comply with existing laws and regulations in advising an applicant of the derogatory information and offer them an opportunity to rebut such information through an RFE, Notice of Intent to Deny, or other formal notice under 8 CFR 103.2(b)(8)(iii), (b)(16)(i) and 214.205(a)(1), except as otherwise provided in 8 CFR 103.2(b)(16).

[10] *See* U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''Volume 3, Humanitarian Protection and Parole, Part B, Victims of Trafficking, Chapter 3, Documentation and Evidence for Principal Applicants,'' *https://www.uscis.gov/policy-manual/volume-3-part-b-chapter-3 (discussing ''any credible evidence'' and the nature of victimization) (last updated Oct. 20, 2021).*

[11] As of the time of the publication of this regulation, further policy guidance describing USCIS' interpretation of the T nonimmigrant regulation can be found in the USCIS Policy Manual. *See* U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''Volume 3, Humanitarian Protection and Parole, Part B, Victims of Trafficking,'' *https://www.uscis.gov/policy-manual/volume-3-part-b* (last updated Oct. 20, 2021).

[12] 8 CFR 103.2(b)(8)(ii) (''If all required initial evidence is not submitted with the benefit request or does not demonstrate eligibility, USCIS in its discretion may deny the benefit request for lack of initial evidence or for ineligibility or request that the missing initial evidence be submitted within a specified period of time as determined by USCIS.'').

4. Requests for Evidence (RFE)

Comment: Some commenters expressed concern about a trend of increasing RFEs from USCIS. They indicate that the RFEs do not indicate what evidence is lacking, are boilerplate, and create unnecessary work for practitioners and anxiety for survivors. The commenters state that issuance of RFEs has increased processing times, leaving survivors vulnerable. Finally, the commenters state that these RFEs have resulted in unprecedented denial rates.

Response: DHS acknowledges the concerns stakeholders are raising regarding RFE trends in the program. USCIS strives to apply a victim-centered, trauma-informed approach in each adjudication while also ensuring that the statutory requirements for T nonimmigrant status are met. In addition, USCIS has recently issued significant guidance in the Policy Manual aimed at clarifying evidentiary requirements for both applicants and adjudicators and reducing the need for RFEs.[13] Along with these updates, USCIS included training to adjudicators on the updates. Adjudicators also receive ongoing training on this and other issues. In addition, USCIS reviews trends in the program and revises any guidance if necessary. For example, if USCIS notices patterns in inquiries or questions asked at stakeholder engagements, it prompts review and potential revision of internal procedures.

F. Application

1. Applicant Statements

Comment: One commenter proposed that 8 CFR 214.11(d)(2)(i) (redesignated here as 8 CFR 214.204(c)(1)), which requires applicants to provide a written statement describing their victimization, include an exemption for victims who are minors and victims who invoke the trauma exception from the requirement to comply with reasonable LEA requests. They wrote that DHS could determine on a case-by-case basis whether to waive the requirement of a signed statement. They noted that preparing a statement can re-traumatize victims, even when the victim is assisted by trauma-informed service providers. The commenter stated that the statement may not be necessary when the victimization is apparent from other evidence.

Response: DHS understands that applicants could be re-traumatized by retelling their experience of victimization. Nevertheless, the information provided in the victim's personal statement is very important for USCIS. It allows USCIS to fully understand the facts of the case from the victim's perspective and helps USCIS determine whether the eligibility requirements are met. In addition, it would not be efficient and would cause unnecessary processing delays for USCIS to determine on a case-by-case basis whether a statement was necessary and, when necessary, request one after reviewing the initial filing. Therefore, DHS maintains the requirement that applicants provide a written statement describing their victimization in this final rule. 8 CFR 214.204(c)(1).

2. Interviews of Applicants

Comment: Commenters suggested that 8 CFR 214.11(d)(6) explicitly state that interviews of applicants for T nonimmigrant status are not required, and that DHS could request an interview. They asserted that this change would encourage victims who have faced high levels of trauma to come forward to apply for immigration relief.

Response: DHS is sympathetic to the issues victims face and applies a victim-centered and trauma-informed approach but declines to adopt this recommendation. DHS still reserves the discretion to require an interview for all immigration benefits, including applicants for T nonimmigrant status, as it deems necessary. In such circumstances, interviews can be an important method of obtaining further information when determining eligibility for T nonimmigrant status. As discussed above, DHS has removed the interview provision at 8 CFR 214.11(d)(6) to avoid redundancy with 8 CFR 103.2(b)(9).

3. Notification to the Department of Health and Human Services (HHS)

Comment: One commenter wrote to welcome the addition of a provision indicating that upon receiving an application for T nonimmigrant status from a minor under the age of 18, USCIS will notify HHS to facilitate interim assistance. Multiple commenters discussed the automatic nature of USCIS's notification to HHS upon receiving an application for T nonimmigrant status from a minor. *See* 8 CFR 214.11(d)(l)(iii) (redesignated here as 8 CFR 214.204(b)(4)). These commenters wrote that, in some instances, a referral to HHS can result in premature termination of some State-funded benefits that may be more comprehensive than the Federal interim assistance obtained through HHS. The commenters requested that the rule be amended to include an exception to the provision mandating automatic notification of HHS upon receiving an application for T nonimmigrant status from a minor.

Response: DHS understands the commenters' concerns and appreciates why minor applicants may want to access more expansive State-funded benefits. DHS is unable to change the regulations in response to these concerns, however, because TVPRA 2008 section 212(a)(2), 22 U.S.C. 7105(b)(1)(H), requires that DHS notify HHS no later than 24 hours after discovering that a person who is under 18 years of age may be a victim of a severe form of trafficking in persons.

4. Notification of Approval of T Nonimmigrant Status

The rule at 8 CFR 214.11(d)(9) (redesignated as 8 CFR 214.204(o)) states that upon approving an application for T–1 nonimmigrant status, USCIS may notify others ''as it determines appropriate, including any LEA providing an LEA endorsement and the HHS Office of Refugee Resettlement, consistent with 8 U.S.C. 1367.''

Comment: Commenters requested that DHS clarify in the rule which agencies or bodies that it considers appropriate to receive information about applicants for T nonimmigrant status or to limit the language to the entities listed in the rule.

Response: DHS has maintained the current broader language because it provides USCIS and applicants with more flexibility in implementing these provisions than an exhaustive list would. USCIS may identify other entities that are appropriate to receive this information and instances in which the notification would be beneficial to the T–1 nonimmigrant and/or an LEA and its efforts to combat trafficking. The final rule continues to require that the disclosure of any information must be consistent with the restrictions on information sharing in 8 U.S.C. 1367. USCIS has issued guidance and training to those who adjudicate applications for T nonimmigrant status to ensure there is no inappropriate sharing of applicant information, and to ensure any information sharing action is consistent with 8 U.S.C. 1367.

G. Law Enforcement Declarations

As noted in new 8 CFR 214.204(e), applicants may wish to submit evidence

[13] U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''Volume 3, Humanitarian Protection and Parole, Part B, Victims of Trafficking, Chapter 3, Documentation and Evidence for Principal Applicants,'' *https://www.uscis.gov/policy-manual/volume-3-part-b-chapter-3* (last updated Oct. 20, 2021).

from LEAs, including an LEA declaration, to help establish their eligibility. Although an LEA declaration is an optional form of evidence and does not have any special evidentiary weight, it may support a T nonimmigrant application by providing detailed, relevant information about the applicant's victimization and compliance with reasonable requests for assistance. DHS received several comments on LEA declarations, discussed below.

1. Declaration Signature

Comment: One commenter supported the clarification that a formal investigation or prosecution is not required for an LEA to complete the declaration, and stated that the requirement that a law enforcement declaration be signed by a supervising official may add an unnecessary step to this more flexible approach.

Response: DHS declines to adopt this recommendation. First, the Law Enforcement Declaration is an optional form of evidence. Second, maintaining the status quo in requiring a supervisor's signature adds a level of review to DHS's flexible approach, which acknowledges that whether an investigation or prosecution occurs is outside of a victim's control.

2. Withdrawn Declarations and Revoked Continued Presence (CP)

DHS has updated terminology at new 8 CFR 214.204(h). DHS has replaced the term ''revocation'' relating to law enforcement declarations with ''withdrawal'' for accuracy and to avoid any confusion that status is being revoked.

a. Withdrawn Declarations

Comment: Commenters requested that DHS delete the language in 8 CFR 214.11(d)(3)(ii) (redesignated here as 8 CFR 214.204(h)) that provides that disavowed or withdrawn LEA declarations will no longer be considered evidence. Commenters suggested that rather than leaving it to the discretion of the LEA to provide a written explanation of its reasons for disavowing or withdrawing the declaration, the LEA should be required to do so. Commenters stated that an application should not be rejected based solely on one factor or one piece of evidence. They wrote that USCIS must provide a T nonimmigrant the opportunity to review and respond to the documentation from the LEA. Commenters also suggested adding language to 8 CFR 214.11(d)(3)(ii) (redesignated here as 8 CFR 214.204(h)) and 8 CFR 214.11(m)(2)(iv) (redesignated here as 8 CFR 214.213(b)(4)) to state that before revoking T nonimmigrant status due to a revocation or disavowal of an LEA declaration, USCIS would review the application and reassess the applicant's eligibility for T–1 nonimmigrant status in light of the LEA's explanation for the revocation, and consider all other evidence provided by the applicant under the ''any credible evidence'' standard. Finally, they stated that if USCIS determines that the application no longer meets the requirements, USCIS should issue a Notice of Intent to Revoke or a Request for Evidence.

Response: The rule at 8 CFR 214.213(b)(4) provides that USCIS may revoke T nonimmigrant status based on withdrawal by the LEA, but does not require USCIS to automatically revoke T nonimmigrant status upon a disavowal or withdrawal of the Supplement B. DHS recognizes that a Supplement B may be withdrawn or disavowed for reasons unrelated to the applicant's cooperation with the LEA's reasonable request for assistance. For example, an LEA may receive additional information indicating the initial Supplement B was issued in error. The law enforcement declaration is one piece of evidence that USCIS considers in determining whether an applicant meets the eligibility requirements for T nonimmigrant status based on the totality of the evidence. *See, e.g.,* new 8 CFR 214.204(c) and (l). Furthermore, 8 CFR 214.213(b)(4) indicates that the LEA must provide an explanation for any withdrawal or disavowal for it to serve as the basis for revocation. Therefore, DHS clarifies in this rule that a disavowed or withdrawn Supplement B will not be completely disregarded. After withdrawal or disavowal, the LEA declaration will *generally* no longer be considered as evidence of the applicant's compliance with requests for assistance in the LEA's detection, investigation, or prosecution; however, a disavowed or withdrawn Supplement B may be considered for other eligibility requirements (such as evidence of victimization) along with any other credible evidence relevant to the application. *See* new 8 CFR 214.204(f) and (h). DHS will determine whether the disavowed or withdrawn Supplement B will be considered as evidence of compliance by assessing the reasons for the disavowal or withdrawal. Once the Supplement B is disavowed or withdrawn, DHS will determine the reason for the disavowal or withdrawal and then determine what purpose, if any, for which it may be used. DHS notes that if there is an explanation from the LEA for the withdrawal or disavowal, adjudicators should consider that explanation in determining whether to still consider the declaration as evidence of compliance with requests for assistance.

DHS acknowledges that even if a declaration is disavowed or withdrawn, an individual may still meet the eligibility requirements for T nonimmigrant status, and a withdrawal or disavowal will not always lead to revocation of T nonimmigrant status. In addition, prior to issuing a Notice of Intent to Revoke (NOIR) based on the withdrawal or disavowal of the Supplement B, DHS would reassess an applicant's eligibility based on all available evidence. If DHS intends to revoke T nonimmigrant status following the withdrawal or disavowal of a Supplement B, DHS will issue a NOIR to inform the individual of the agency's intent to revoke T nonimmigrant status and the basis for intended revocation. The individual would then be able respond to the NOIR with additional evidence to overcome any noted deficiencies or discrepancies. The NOIR would detail or summarize the reasons for withdrawal or disavowal from the LEA and any other bases for intended revocation, but DHS declines to codify a requirement that USCIS provide a copy to the individual.

b. Revoked Continued Presence

DHS has similarly clarified that if the DHS Center for Countering Human Trafficking (CCHT) revokes a grant of Continued Presence (CP), generally the CP grant will no longer be considered as evidence of the applicant's compliance with the corresponding LEA investigation or prosecution but may be considered for other purposes. *See* new 8 CFR 214.204(i). If DHS determines that the revocation of the CP grant was unrelated to an applicant's compliance, for example revocation based on departing without advance parole or for subsequent criminal conduct, it may continue to consider the grant of CP as evidence of the applicant's compliance with the LEA investigation or prosecution.

3. Requirement To Sign Law Enforcement Declaration

Comment: One commenter stated DHS should clarify in the regulations that immigration judges and ICE counsel should be required to sign law enforcement declarations. The commenter wrote that a directive to immigration judges and ICE attorneys should indicate that they, and not just Homeland Security Investigations (HSI),

should be able to detect trafficking and certify in the process.

Response: DHS declines to adopt this recommendation. DHS cannot require any certifying agencies to certify a case, as signing the LEA Declaration is at the discretion of the LEA and the LEA Declaration is not a required piece of initial evidence. However, DHS agrees that immigration judges and ICE attorneys may submit declarations upon detection of trafficking consistent with applicable law and agency policy. However, DHS may accept declarations from immigration judges and ICE attorneys should such declarations be permissible under applicable law and agency policy.

H. Bona Fide Determination (BFD)

By statute, a determination that an application for T nonimmigrant status is bona fide (T BFD) enables trafficking survivors to obtain certain stabilizing benefits, including access to Federal services and benefits via the issuance of Certification Letters from HHS,[14] and the ability to obtain an administrative stay of removal.[15] The preamble to the 2016 IFR provided that USCIS may grant deferred action if the application for T nonimmigrant status is deemed bona fide, and the applicant could request employment authorization based on the grant of deferred action.[16] Although an extensive BFD process was codified in the 2016 IFR, such a process has not been implemented in the last decade outside of litigation cases due to resource constraints and the inefficiencies of the prior process. Under the extensive BFD review process set forth in the IFR, USCIS generally adjudicated the merits of T nonimmigrant applications in the same amount of time that it would take to issue a BFD. Therefore, it has generally been more efficient to adjudicate the T visa application alone than to conduct both a BFD review and full adjudication of the same application.

The revised BFD process codified in this rule at 8 CFR 214.205 is as follows: USCIS will conduct an initial review of the T nonimmigrant status application filed on or after the effective date for completeness and conduct and review the results of background checks to determine if the application is bona fide and the applicant merits a favorable exercise of discretion to receive a grant of deferred action and employment authorization. Applicants must file a Form I–765, Application for Employment Authorization, under proposed 8 CFR 274a.12(c)(40) to receive a BFD Employment Authorization Document (EAD), even if they have indicated on Form I–914, Application for T Nonimmigrant Status that they are requesting an EAD. If an applicant has not already filed a Form I–765, they will be notified in writing that they may do so, to receive a BFD EAD under 8 CFR 274a.12(c)(40). DHS strongly recommends that applicants file a Form I–765, Application for Employment Authorization, simultaneously with their T nonimmigrant status application to facilitate expeditious case processing.[17] If DHS issues a request for evidence in a case filed before the effective date of the final rule, DHS will automatically convert previously filed applications for employment authorization filed under 8 CFR 274a.12(a)(16) and (25), to applications for the newly created BFD EAD classification. This will limit the need for applicants to submit new requests or information, and enable DHS to focus on the adjudication, rather than the process of issuing multiple notices, including first notifying the applicant that they have a pending bona fide application, and then notifying the applicant that they are eligible for employment authorization. If initial review does not establish that the application is bona fide, USCIS will conduct a full T nonimmigrant status eligibility review. If the full review establishes eligibility and the statutory cap has been reached, the application will be considered bona fide.

In the situation where DHS is issuing a request for evidence and thus conducts a bona fide determination on an application filed before the effective date of this rule, if an applicant with a pending bona fide application has not previously filed an application for employment authorization, DHS will issue a notice of eligibility to apply for a BFD EAD, indicating that the individual should designate category ''(c)(40)'' on the application. *See* new 8 CFR 274a.12(c)(40).

After receipt of the Form I–765, USCIS will then consider whether the applicant warrants a favorable exercise of discretion to be granted deferred action, and if granted deferred action, whether they will be granted a discretionary employment authorization document.

In the interim rule, DHS provided that employment authorization for a bona fide T nonimmigrant applicant to whom USCIS grants deferred action would be requested under category ''(c)(14),'' 8 CFR 274a.12(c)(14). 81 FR 92285. DHS has decided to record T BFD EADs as a separate category from other EADs that are based on a grant of deferred action. Accordingly, in this rule DHS amends 8 CFR 274a.12 to establish a specific eligibility category for applicants for T nonimmigrant status whose applications have been deemed bona fide. These BFD EADs will be issued under category (c)(40). *See* new 8 CFR 274a.12(c)(40). DHS notes that a bona fide determination, or an initial grant or renewal of a BFD EAD and deferred action does not guarantee that DHS will approve the principal applicant or their derivative family members for T nonimmigrant status.

Comment: Several commenters wrote that USCIS has justified its operational practice of fully adjudicating the T visa application rather than initiating the BFD review process by claiming that because there is no T visa application backlog, it is more efficient to conduct a full adjudication. Commenters urged USCIS to uphold the regulatory mandate to provide BFDs. They emphasized that BFDs provide work authorization, which allows survivors to be self-sufficient and help reduce the risk of revictimization as well as provide access to federally funded public benefits. Commenters also wrote that BFDs are much more important given increased processing times, especially as applicants lose access to time-limited social services benefits. Commenters indicated that USCIS' failure to conduct BFDs has had a negative impact on trafficking survivors in removal proceedings and has led to survivors being removed while their applications were pending. Multiple commenters noted that applicants are forced to proceed with other forms of relief in removal proceedings while awaiting a decision on their T visa application, which wastes administrative resources and inflicts needless trauma.

Response: DHS acknowledges that processing times have increased in recent years. DHS also understands the important stabilizing benefits the BFD

[14] 22 U.S.C. 7105(b)(1)(E)(i)(II)(aa).

[15] INA sec. 237(d)(1); 8 U.S.C. 1227(d)(1). This statutory provision authorizes the Secretary of Homeland Security to grant an administrative stay of removal to an individual whose Application for T Nonimmigrant Status sets forth a ''prima facie case for approval,'' until the application is approved or there is a final administrative denial on the application after the exhaustion of administrative appeals. A determination that the application is ''bona fide'' is also sufficient to establish that the applicant has established a ''prima facie case for approval'' within the meaning of section 237(d)(1) of the INA, 8 U.S.C. 1227(d)(1). ''Prima facie'' means that the application appears sufficient on its face, which is encompassed by the bona fide determination described at 8 CFR 214.205.

[16] *See* 81 FR 92279.

[17] There is no fee for a Form I–765 filed by an applicant seeking T nonimmigrant status. 8 CFR 106.3(b)(2)(viii).

can provide to trafficking survivors, and that a lack of a viable BFD process can have negative impacts on victims. DHS is committed to implementing a streamlined and operationally efficient BFD process through the final rule and has codified a new BFD process at new 8 CFR 214.205, consistent with DHS's victim-centered approach. Pursuant to new 8 CFR 214.204(m), USCIS will conduct a BFD review for applicants in the United States once they have applied for principal or derivative T nonimmigrant status. DHS has also amended 8 CFR 214.11(d)(7) (redesignated as 8 CFR 214.204(m)) to state that USCIS will conduct an initial review of an eligible family member's Application for Derivative T Nonimmigrant Status once the principal's application has been deemed bona fide. However, as a matter of discretion, USCIS generally will not grant deferred action and employment authorization to an eligible family member based on a bona fide determination unless the principal applicant has received a positive bona fide determination.

Comment: Several commenters stated that the IFR's inclusion of an inadmissibility determination as part of the BFD is contrary to Congressional intent. They recommended that either the filing of a waiver of inadmissibility constitute *prima facie* evidence of eligibility, or that USCIS implement the same procedures used in the U visa BFD context, which eliminates the requirement that USCIS assess an applicant's admissibility as part of the BFD process. Some commenters further recommended that DHS amend the standard for finding an application to be bona fide to mirror the requirements to establish a prima facie case in an application for benefits available under VAWA. *See* 8 U.S.C. 1641; 8 CFR 204.2(c)(6).

Response: DHS agrees with the commenters' suggestion to remove the inadmissibility determination from the BFD process. The BFD process is an initial review, and an assessment of the applicant's admissibility is not necessary to determine whether an application is bona fide. In addition, as commenters noted, considering admissibility twice during adjudication would be inefficient and burdensome and would delay the BFD process. Accordingly, DHS has eliminated the requirement that USCIS analyze an applicant's admissibility as part of the BFD process, but will implement other safeguards, including background checks, to ensure the applications are bona fide, that the applicants merit a favorable exercise of discretion and do not present a threat to national security, and to maintain the integrity of the program.

Comment: Commenters also requested DHS eliminate 8 CFR 214.11(e)(1)(ii), which requires a T visa applicant to demonstrate that their application ''does not appear to be fraudulent,'' because the fraud assessment is superfluous to the other BFD requirements.

Response: DHS agrees with the commenters' rationale. Because USCIS considers an applicant's compliance with initial evidence requirements and background checks in the T visa BFD process, as well as whether the applicant merits a favorable exercise of discretion, it is unnecessary to separately analyze whether the application appears to be fraudulent. DHS has removed consideration of whether an application appears to be fraudulent from the BFD review process. An applicant who attempts to gain an immigration benefit through fraud is inadmissible,[18] and would not be granted deferred action or a BFD EAD.

Comment: Commenters urged DHS to implement a BFD review process for T derivative applicants, applying the standards set forth in the Policy Manual for eligible family members of U visa applicants.

Response: DHS understands the importance of BFDs not just for principal applicants, but for their eligible family members. Conducting BFD reviews and providing initial benefits to eligible family members is also consistent with a victim-centered approach, as it provides victims needed support from stabilized family members. DHS will conduct BFDs for eligible family members who are in the United States at the time of review, if the principal has already received a BFD.

Comment: Several commenters requested that USCIS commit to a 30- or 90-day timeline for making a bona fide determination and notifying applicants of the outcome in 8 CFR 214.11(e)(2) (redesignated here as 8 CFR 214.205(c)).

Response: Although DHS recognizes that being without work authorization or Federal benefits may be a hardship for applicants, it declines to mandate that USCIS conduct a BFD within a certain number of days. USCIS strives to process all immigration benefits in a reasonable and timely manner; however, USCIS cannot guarantee that the determination will be completed within any set number of days. The volume of applications to be reviewed will vary over time, each application is unique, and some may be complex. In addition, there are aspects of the determination beyond USCIS' control (for example, background checks) that may take longer than 90 days.

Comment: Some commenters recommended that qualified trafficking survivors on the waiting list should be granted BFDs and should have access to employment authorization and Federal benefits to ensure their safety, and so they are not vulnerable to exploitation or trafficking.

Response: DHS acknowledges the importance of these benefits for trafficking survivors, which is why USCIS will initiate the BFD process upon initial review of the application. After considering the comments on the interim final rule and our recent experience with the program, DHS has added 8 CFR 214.205(a)(3), which provides that USCIS will conduct a full T nonimmigrant status eligibility review of any applications that do not initially receive a favorable BFD. Applicants who are determined eligible following the T nonimmigrant status eligibility review will then be issued a BFD if the statutory cap has been met. In addition, applicants with a favorable BFD may be considered for deferred action and may request employment authorization based on a grant of deferred action. 8 CFR 214.205(d)(1).

DHS notes that the T visa waiting list has never been utilized in the history of the program due to the statutory cap never being reached. However, if the statutory cap is met, USCIS will place all applications that have been issued a BFD on the waiting list, including those that are deemed eligible for a BFD following a T nonimmigrant status eligibility review. 8 CFR 214.210(b). This revision will allow BFD recipients to be on the waiting list without having to provide additional information, avoid USCIS having to perform additional processing of cases with a BFD to place them on the waiting list, and provide all applications on the waiting list equal status of BFD, instead of some receiving a BFD and others being deemed approvable but for the unavailability of a visa.

This change will not affect the order in which applications are processed. The following fiscal year, when a new statutory cap becomes available, the oldest pending applications that are on the waiting list and have been granted a BFD will be processed first. The oldest application may not necessarily be approved in date-received order depending on updates and additional evidence that may be needed to adjudicate the application to a final decision. The date that applicants receive a BFD will generally not affect

[18] *See* INA 212(a)(6)(C)(i), 8 U.S.C. 1182(a)(6)(C)(i).

the order in which their application will be processed for cap adjudication.

Comment: Several commenters encouraged DHS to add language to the final rule that requires ICE to take affirmative steps to seek a BFD from USCIS for detainees with pending applications for T nonimmigrant status, which commenters note would lead to a stay of removal.

Response: DHS declines to add this language to the final rule as unnecessary, because all applications filed after the effective date of the final rule will receive a BFD review. In addition, in August 2021, ICE issued a Directive that addresses using a victim-centered approach with noncitizen crime victims, including applicants for T nonimmigrant status.[19] The ICE directive specifies that ICE will coordinate with USCIS to ''seek expedited adjudication of victim-based immigration applications and petitions'' and that in the cases of a detained individual with a pending application for a victim-based immigration benefit, ICE will request USCIS expedite the decision.[20] USCIS will continue to coordinate with ICE on this process.

I. Evidence To Establish Trafficking

Comment: Several commenters wrote that they appreciate that 8 CFR 214.11(f)(1) (redesignated here as 8 CFR 214.206(a)) includes examples of evidence that may be submitted to demonstrate a trafficker's purpose in cases where no commercial sex act or forced labor occurred. They also stated that they approve of the non-exhaustive list at 8 CFR 214.11(f)(1) (redesignated 8 CFR 214.206(a)) of examples of evidence that may be submitted to demonstrate the trafficker's purpose in this type of scenario. However, these same commenters also recommended that DHS expand the list of possible evidence and expressed that trafficking victims may not be able to supply the types of evidence in the list. They suggested DHS add additional types of evidence; clarify that all forms of evidence are acceptable; and clarify that no form of evidence is preferred over another. Specifically, commenters wrote that DHS should clarify that a law enforcement declaration or grant of Continued Presence are not required or preferred forms of evidence. The commenters also requested that 8 CFR 214.11(f)(l) (redesignated here as 8 CFR 214.206(a)) be revised to state that a victim's statement alone could be sufficient in proving attempted victimization.

Response: DHS agrees with the commenters' rationale and has amended the list of evidence in new 8 CFR 214.206(a). Although the list is not intended to be exhaustive, the regulation may have unintentionally emphasized certain types of evidence. In amending this list, DHS emphasizes that alternate forms of evidence can be submitted to establish an individual is a victim of a severe form of trafficking, or to establish the trafficker's purpose. DHS acknowledges there are some types of evidence that victims are more likely to have. Each form of evidence alone may be sufficient under the any credible evidence standard, and no form of evidence is preferred over another. As noted above, DHS declines to amend the regulatory text to explicitly state that a victim's statement alone may prove victimization. While DHS may determine, based on the facts and circumstances of a particular case, that a personal statement alone may be sufficient to prove victimization, in such a scenario, the victim's statement would have to be sufficiently detailed, plausible, and consistent in order to satisfy evidentiary requirements. With all T visa applications, DHS makes an individualized determination of whether trafficking has been established based on the evidence in each particular case. However, DHS encourages applicants to submit any additional credible evidence that could help establish their claim.

Comment: One commenter wrote that they were concerned about the statement in the Preamble to the 2016 IFR that a victim can submit any credible evidence from any reliable source that shows the purpose for which the victim was recruited, transported, harbored, provided, or obtained. *See* 81 FR 92272. That commenter requested that DHS clarify that reliable sources could include not only direct evidence, but also circumstantial evidence as well as the victim's own statement. The commenter asked that DHS assess the purpose or motivation of the trafficker in the same way it assesses the motive of a persecutor in asylum cases.

Response: DHS declines to specify in the regulation that circumstantial evidence and the applicant's affidavit can be submitted to establish the trafficker's purpose or motive. The evidentiary standards that DHS applies to all T nonimmigrant status eligibility requirements are based on an understanding that victims of severe forms of trafficking in persons often have difficulty acquiring evidence and that the best available evidence may include circumstantial evidence. But, as noted above, under the regulations an applicant's affidavit may be sufficient if it is sufficiently detailed, plausible, and consistent in order to satisfy evidentiary requirements. DHS declines to adopt asylum standards, as trafficking and asylum are distinct and involve unique forms of relief.

J. Physical Presence [21]

1. Applicability of Physical Presence Requirement

Comment: One commenter requested DHS replace the language in 8 CFR 214.11(g)(1) (redesignated here as 8 CFR 214.207(a)) that reads ''The requirement reaches an alien who'' with ''An applicant must demonstrate one of the following requirements.'' The commenter stated the wording was confusing for applicants and practitioners.

Response: DHS agrees that the language in 8 CFR 214.11(g)(1) caused confusion. DHS revised this section (new 8 CFR 214.207) to make it active tense and clarified the applicability of the physical presence standard, such that it reads: ''An applicant must demonstrate that they are physically present under one of the following grounds . . . .''

2. Passage of Time Between Trafficking and Filing the T Visa

Comment: Commenters stated that DHS has imposed a *de facto* deadline for physical presence, leading adjudicators to erroneously conclude that the mere passage of time signifies that an individual's physical presence in the United States is unrelated to their trafficking. The commenters claim this excludes many bona fide victims, who may file for T nonimmigrant status long after their trafficking. Commenters also recommended DHS explicitly consider when a survivor learned of their status as a victim of trafficking, by modifying § 214.11(g)(4) (redesignated here as 8 CFR 214.207(c)).

Response: DHS acknowledges the commenters' concerns and has clarified in the text of multiple provisions of the regulation that physical presence may be established regardless of the length of time that has passed between the trafficking and filing of the application. For example, DHS has clarified that under 8 CFR 214.207(a)(2) and (3), the applicant may satisfy the physical

[19] U.S. Immigr. & Customs Enforcement, U.S. Dep't of Homeland Security, ''ICE Directive 11005.3: Using a Victim-Centered Approach with Noncitizen Crime Victims'' (2021), *https://www.ice.gov/doclib/news/releases/2021/11005.3.pdf* (ICE Directive).

[20] *Id.*

[21] DHS also received comments regarding physical presence and law enforcement involvement, which are addressed above in Section D, Definitions.

presence requirement if they were liberated from a severe form of trafficking in persons by an LEA at any time prior to filing their T visa application. This is intended to clarify that there is no *de facto* deadline for filing. DHS has also already clarified its interpretation via policy guidance, consistent with the legislative intent behind the program.[22] In addition, under 8 CFR 214.207(a)(4), DHS has added that the current presence may be directly related, ''regardless of the length of time that has passed between the trafficking and filing'' of the applicant's T visa application.

DHS acknowledges that survivors of trafficking experience serious consequences because of their victimization that can delay filing, including lack of access to legal representation, trauma, lack of support, and even lack of knowledge that they are a victim of trafficking. DHS emphasizes that the passage of time alone does not negate an applicant's ability to establish physical presence on account of the trafficking. In addition, DHS has clarified in the regulation that when analyzing physical presence, it will consider when and how an applicant learned that they were a victim of human trafficking.[23] DHS acknowledges that many survivors may delay filing for legitimate reasons; however, the applicant still bears the burden of establishing that their current presence in the United States is on account of trafficking.

3. LEA Liberation and LEA Involvement

Comment: Many commenters requested DHS remove 8 CFR 214.11(g)(1)(ii) and (iii) (redesignated here as 8 CFR 214.207(a)(2) and (3)) because there has been no guidance clarifying the practical distinction between these provisions versus paragraph (g)(1)(iv) (redesignated here as 8 CFR 214.207(a)(5)), and adjudicators have required applicants claiming physical presence under paragraph (g)(1)(ii) or (iii) to also demonstrate their continuing physical presence.

Response: DHS declines to remove the language at new 8 CFR 214.207(a)(2) and (3), as these provisions are important ways applicants can establish their physical presence. DHS acknowledges there has been confusion surrounding these provisions. To establish physical presence under new 8 CFR 214.207(a)(2), an individual must demonstrate that law enforcement assisted in liberating them from their trafficking situation. To satisfy physical presence under new 8 CFR 214.207(a)(3), an individual must demonstrate that law enforcement became actively involved in detecting, investigating, or prosecuting the acts of trafficking. To establish physical presence under new 8 CFR 214.207(a)(5), regardless of where the trafficking occurred, an individual must establish that they have been allowed entry into the United States for the purpose of participating in the detection, investigation, prosecution, or judicial processes associated with an act or perpetrator of trafficking. DHS has retained these provisions as additional means by which an applicant can establish physical presence; however, as discussed above, DHS has updated these sections to clarify that physical presence can be satisfied if the LEA liberated the applicant from the trafficking situation or was involved in detecting, investigating, or prosecuting the acts of trafficking the case at any point prior to the application process.

4. Presumption of Physical Presence

Comment: Several commenters urged DHS to adopt a broader interpretation of ''physical presence on account of trafficking'' such that a presumption of physical presence could apply in various scenarios, including physical presence at the time of filing.

Response: DHS appreciates the commenters' concerns but declines to codify any generalized presumptions of physical presence in the regulations. The applicant bears the burden of establishing that they satisfy each eligibility criteria for T nonimmigrant status, including physical presence on account of trafficking at the time of filing and adjudication. Each application for T nonimmigrant status will be evaluated on its own merits. Although DHS declines to formally codify any presumptions of physical presence, DHS has clarified how physical presence may be satisfied, consistent with many of the commenters' requests. For example, the regulations have expanded the evidence applicants may submit to establish physical presence or overcome the effect of a prior departure. DHS notes that generally, where the applicant provides evidence that they are receiving services in the United States as a trafficking victim or pursuing civil, administrative, or criminal remedies because of the trafficking, this will be considered favorably in the physical presence assessment. Because DHS cannot enumerate all circumstances under which an applicant may satisfy physical presence, DHS declines to codify any presumption.

5. Continuing Presence and Nexus to Trafficking

Comment: Many commenters suggested revising 8 CFR 214.11(g)(1)(iv) (redesignated here as 8 CFR 214.207(a)(4)) to refer to ''current presence'' rather than ''continuing presence.'' One commenter stated that DHS ignores, discounts, or improperly analyzes the impacts of trafficking victimization in analyzing continuing presence. The commenter recommended DHS provide a non-exhaustive list of factors that USCIS will consider in determining whether an applicant has demonstrated continuing presence.

Response: DHS agrees that the ''continuing presence'' terminology at 8 CFR 214.11(g)(1)(iv) has caused confusion for adjudicators and stakeholders. DHS has replaced the phrase with ''current presence.'' This change is intended to clarify that the focus of the evaluation is on the applicant's presence at the time of filing and adjudication, rather than their presence prior to that time. *See* new 8 CFR 214.207(a)(4). DHS has also revised the regulation to include a non-exhaustive list of factors USCIS will consider in analyzing the physical presence requirement, at redesignated 8 CFR 214.207(c) (discussed further below). These updates clarify expectations regarding timeline requirements and bring this provision into present tense.

Commenter: One commenter requested the rule clarify that for an applicant's continuing presence in the United States to be directly related to their original trafficking, it is sufficient that if the applicant were to depart the United States, they would suffer hardship as a result of circumstances caused by their trafficking, regardless of whether such hardship constitutes extreme hardship. The commenter also requested the rule clarify that whether the applicant's continuing presence in the United States is directly related to their original trafficking, and whether the applicant would suffer extreme hardship upon removal are separate requirements that may be supported by the same evidence.

Response: DHS declines to adopt this recommendation. Physical presence is a current assessment of an applicant's experience, whereas extreme hardship

[22] *See* U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''Volume 3, Humanitarian Protection and Parole, Part B, Victims of Trafficking, Chapter 2, Eligibility Requirements,'' *https://www.uscis.gov/policy-manual/volume-3-part-b-chapter-2* (stating that an individual may satisfy the physical presence requirement regardless of the time that has passed since liberation from the initial trafficking and filing the T visa application) (last updated Oct. 20, 2021).

[23] *See* new 8 CFR 214.207(c)(1)(i).

is a prospective assessment of hardship the applicant may face. Although DHS acknowledges that the same evidence may be presented to satisfy multiple eligibility requirements, an applicant must explain how the evidence satisfies each eligibility requirement. The applicant bears the burden of establishing each eligibility requirement and clearly explaining how the evidence presented addresses each eligibility criteria.

Comment: Another commenter stated that if DHS retains the requirement that certain victims demonstrate that their continuing presence is directly related to trafficking, the rule should provide explicit guidance as to what sort of nexus is and is not required to meet this test. Another commenter indicated that USCIS practice suggests that if a survivor becomes stable at any point after their trafficking victimization, they are no longer present in the United States on account of their trafficking. The commenter emphasized that progress in a victim's life does not negate the ongoing impact of the trafficking victimization.

Response: DHS has revised the regulations to include a more expansive list of scenarios that can establish physical presence on account of trafficking. DHS has also provided significant guidance for adjudicators in its Policy Manual on analyzing whether an applicant's ongoing presence is directly related to their trafficking.[24] The Policy Manual provides that if the applicant has repeatedly traveled outside the United States since the trafficking, and their departures are not the result of continued victimization; or the applicant lacks continued ties to the United States or has established an intent to abandon life in the United States; this may support a finding that their current presence is not directly connected to the original trafficking. On the other hand, developments in an applicant's life following the trafficking do not prevent an applicant from establishing ongoing presence on account of trafficking. An applicant may still demonstrate that their current presence in the United States is directly related to the initial victimization and should not be penalized for stabilizing themselves following their victimization.

USCIS will assess the specific impacts of trafficking on the applicant's life at the time of application. The applicant may not establish eligibility if the evidence of the ongoing impact of trauma on the applicant's life does not sufficiently establish the connection between the trafficking and the applicant's presence in the United States at the time of filing.

6. Effect of Departure or Removal

Comment: Commenters asked DHS to eliminate the ''departure from the United States'' language at 8 CFR 214.11(g)(2) (redesignated here as 8 CFR 214.207(b)). Commenters indicated that the departure language prevents trafficking victims from obtaining benefits simply by virtue of their removal, even if they have a pending T application. They requested that DHS update the final rule to clarify that if an individual was in the United States on account of trafficking when they filed the application, subsequent departure or removal should not bar relief.

Response: DHS appreciates the concerns the commenters have raised but declines to eliminate the language describing the effect of departure or removal on physical presence. Instead, DHS has codified additional scenarios by which victims who have departed the United States following their victimization and subsequently re-entered may establish physical presence (including returning to the United States to pursue remedies against their trafficker or returning to seek treatment or services related to victimization they cannot obtain elsewhere). *See* new 8 CFR 214.207(b)(4) and (5). In addition, although DHS appreciates the sensitivities and unique impact removal has on applicants for T nonimmigrant status, T visa applicants must demonstrate physical presence in the United States pursuant to the statute.

Comment: Other commenters suggested that the rule should identify scenarios that may demonstrate that a victim's reentry to the United States is the ''result of continued victimization'' under § 214.11(g)(2)(i) (new 8 CFR 214.207(b)(1)) and would satisfy the physical presence requirement. The commenters proposed the following scenarios be included in the regulations: reentry into the United States (1) due to current fear of the traffickers in the victim's home country or last place of residence; (2) to seek treatment for victimization from trafficking which cannot be provided in the victim's home country or last place of residence; or (3) to pursue civil and criminal remedies against the traffickers in the victim's home country or last place of residence.

Response: DHS agrees with the second and third suggestions and has updated the regulations accordingly, such that both suggestions are encompassed in the new language at 214.207(b)(3)–(5). DHS declines to adopt the first suggestion, as a reentry to the United States due to current fear of the traffickers in the victim's home country or last country of residence would already fall under the ''continued victimization'' scenario articulated in 8 CFR 214.11(g)(2) (redesignated 8 CFR 214.207(b)).

Comment: One commenter requested that if DHS did not remove the departure language from the regulation, it should substantially alter the language found in 8 CFR 214.11(g)(2) (redesignated 8 CFR 214.207(b)), such that the regulation: acknowledges the possibility that a trafficker may have played a role in the survivor's departure from the United States; clarifies that a new incident of trafficking or new attempted incident of trafficking is not required; makes explicit that reentry related to fear of retaliation or re-victimization by the traffickers allows an applicant to meet this requirement; and clarifies that applicants may meet this requirement if, after their return to the United States, regardless of the exact motivation of the reentry, they are actively cooperating with an investigation or prosecution of trafficking.

Response: DHS has clarified how an applicant may establish physical presence after departure from and reentry to the United States by adding additional scenarios that can allow an applicant who has departed and returned to establish physical presence at 8 CFR 214.207(b)(4) and (5). These new provisions aim to provide clarity and reduce barriers for victims. Under new 8 CFR 214.207(b)(4), an applicant may establish physical presence after departure if their current presence in the United States ''is on account of their past or current participation in investigative or judicial processes associated with an act or perpetrator of trafficking, regardless of where such trafficking occurred.'' An applicant may satisfy this provision ''regardless of the length of time that has passed between their participation in an investigative or judicial process associated with an act or perpetrator of trafficking'' and the filing of their application for T nonimmigrant status. *See* new 8 CFR 214.207(b)(4). These new provisions allow individuals who have participated in investigative or judicial processes to establish physical presence following a prior departure, regardless of their manner of entry or where such trafficking occurred. Under new 8 CFR 214.207(b)(5), an applicant may establish physical presence following a

[24] *See* U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''Volume 3, Humanitarian Protection and Parole, Part B, Victims of Trafficking, Chapter 2, Eligibility Requirements,'' *https://www.uscis.gov/policy-manual/volume-3-part-b-chapter-2* (last updated Oct. 20, 2021).

previous departure if they returned to the United States and received treatment or services related to their victimization that cannot be provided in their home country or last place of residence. These additions support the dual purpose of the T visa, acknowledge there may be various reasons an individual may depart the United States, are consistent with a victim-centered approach to combatting trafficking, and do not require an individual to be revictimized to establish physical presence following a departure.

7. Trafficking That Occurs Outside the United States, and Traveling Outside the United States Following Victimization

Comment: Various commenters wrote that DHS interprets the physical presence requirement too narrowly for victims whose trafficking occurred outside the United States or who traveled outside of the United States after suffering trafficking. They stated that trafficking victims may be present in the United States on account of trafficking in various situations, including those in which they were trafficked in a neighboring country that failed to protect them before fleeing to the United States for protection. Some commenters stated that Congress did not specifically require that the trafficking occur in the United States or have violated U.S. law to qualify for the T visa. One commenter wrote that presence in the United States at the time of filing the application for T nonimmigrant status should be sufficient to meet the requirement, regardless of where the trafficking occurred or the circumstances of the applicant's reentry. Commentors also encouraged DHS to ensure definitions and interpretations acknowledge the global nature of trafficking, such as international child pornography rings and international sex trafficking rings, often with perpetrators based in the United States even if the trafficking occurred abroad.

Response: First, DHS acknowledges that trafficking may have a global nature and include a nexus to the United States even if the trafficking occurred abroad; however, DHS declines to interpret the TVPA to encompass trafficking situations in which a trafficking victim seeks protection in the United States for a trafficking situation that occurred fully outside U.S. borders and for which there is no nexus to the United States—either through presence at a United States port of entry on account of the trafficking or cooperation with U.S. law enforcement.

Congress created T nonimmigrant status with a dual purpose: to protect victims of a severe form of trafficking in persons and to encourage and facilitate assistance to U.S. law enforcement to prosecute and combat human trafficking. *See generally,* TVPA section 102, 22 U.S.C. 7101. Congress provided an incentive for victims of a severe form of trafficking in persons to report their victimization by providing for an immigration benefit contingent upon complying with reasonable requests for assistance to LEAs. *Id.;* new 8 CFR 214.202(c). If DHS adopted the commenters' suggested interpretation of the physical presence requirement, victims who were trafficked anywhere in the world could seek T nonimmigrant status in the United States, although a U.S. law enforcement agency would not necessarily have jurisdiction to investigate or prosecute the trafficking. This result would not be consistent with the dual purposes for which Congress created T nonimmigrant status.

DHS appreciates the difficult circumstances facing victims trafficked outside of the United States, particularly when an applicant is unable to find protection elsewhere; however, DHS does not believe that Congress intended to offer protection in the form of T nonimmigrant status in the United States to victims who suffer trafficking in other countries, who flee to the United States for protection, and whose trafficking has no nexus to the United States. DHS acknowledges, however, there may be situations in which trafficking could have occurred abroad that would make an applicant eligible for T nonimmigrant status; as indicated in the Policy Manual, applicants whose trafficking ended outside of the United States may be able to satisfy physical presence if they can demonstrate that they are now in the United States or at a port of entry on account of trafficking or were allowed valid entry into the United States to participate in a trafficking-related investigation or a prosecution or other judicial process. Cases where trafficking occurred abroad require an individualized and nuanced consideration. Consistent with this interpretation, DHS has amended 8 CFR 214.11(g)(1)(v) (redesignated 8 CFR 214.207(a)(5)) to indicate that an applicant may be deemed physically present under this provision regardless of where such trafficking occurred. *See* new 8 CFR 214.207(a)(5)(i). DHS has consolidated the language at 8 CFR 214.11(g)(3) at new 8 CFR 214.207(a)(5)(ii) and (b)(3) to instruct applicants how they may demonstrate physical presence, by showing documentation of valid entry into the United States for purposes of an investigative or judicial process associated with an act or perpetrator of trafficking.

Comment: Another commenter requested that DHS address situations where trafficking occurred abroad, but the applicant can satisfy physical presence because the trafficking is directly the result of U.S. immigration policy.

Response: DHS emphasizes that applicants who are physically present in the United States or at a port of entry on account of trafficking can demonstrate eligibility for T nonimmigrant status even if the trafficking occurred abroad; however, the requirement that an applicant be physically present in the United States or at a port of entry is a statutory requirement that cannot be waived. Eligibility may be established where there exists a nexus between the trafficking and presence in the United States.

8. Opportunity To Depart

Comment: Commenters also requested DHS strike the reference to the ''applicant's ability to leave the United States'' at 8 CFR 214.11(g)(4) because such evidence is unnecessary, and DHS had already removed the requirement for an applicant to prove they had no ''opportunity to depart'' the United States. Another commenter indicated that DHS imposes a de facto ''opportunity to depart'' requirement.

Response: DHS agrees that striking the ''ability to leave'' language is consistent with the prior removal of the ''opportunity to depart'' language and has revised the regulation accordingly. DHS clarifies that an applicant need not show they had no opportunity to depart the United States to establish physical presence.

9. Presence for Participation in Investigative or Judicial Process

Comment: Commenters stated that DHS incorrectly interprets the language in 8 CFR 214.11(g)(3), redesignated as § 214.207(a)(5)(ii) and (b)(3) to require a victim's entry through lawful means. *See* 81 FR 92274. The commenters claim the statute does not indicate that only lawful reentries or those arranged by the government can be used to demonstrate physical presence. The commenters noted that the regulations are not structured to include non-criminal processes, and it is likely that LEAs will not be involved in such proceedings, making it unlikely that a victim would be able to enter the United States through lawful means. The commenters

also stated that it would be unlikely for a victim to have a visa authorized for the purpose of pursuing civil remedies.

Response: DHS maintains that the current interpretation requiring a lawful entry to establish physical presence based on ''having been allowed entry into the United States for participation in investigative or judicial processes associated with an act or a perpetrator of trafficking,'' remains the best legal reading of the statutory language added by TVPRA 2008, as explained in detail in the 2016 IFR preamble. Where the regulatory provisions focus on the purpose of the entry, for example at 8 CFR 214.11(g)(2)(iii) (new 8 CFR 214.207(b)(3)), the statutory authority comes from the ''allowed entry'' language found in section 101(a)(15)(T)(i)(II) of the INA, 8 U.S.C. 1101(a)(15)(T)(i)(II), which includes physical presence on account of an individual ''having been allowed entry.'' DHS therefore is retaining the provisions as drafted, striking 8 CFR 214.11(g)(3), and moving the language to new 8 CFR 214.207(a)(5)(ii) and (b)(3). However, having been allowed entry to participate in investigative or judicial processes is just one example of how an individual can establish they are physically present on account of trafficking, and DHS acknowledges that the requirement of a lawful reentry in 8 CFR 214.11(g)(3) has had unintentional limitations, such that victims of trafficking who departed the United States and reentered unlawfully, but are present in order to participate in an investigative or judicial process associated with the trafficking, were unable to establish eligibility due to their manner of reentry. DHS believes it is consistent with Congressional intent to recognize that such victims may be able to establish that they are physically present on account of trafficking, regardless of the manner of reentry or the time that has passed between cooperation and filing of the T visa application. Accordingly, DHS has added new 8 CFR 214.207(b)(4), which focuses on the reason for the victim's current presence rather than the purpose or means of their entry. DHS maintains that ''allowed entry'' as used in section 101(a)(15)(T)(i)(II) of the INA, 8 U.S.C. 1101(a)(15)(T)(i)(II), signifies a ''lawful entry'' for purposes of initial entry and reentry after departure.

Comment: Another commenter requested that DHS revise the language in 8 CFR 214.11(g)(3) (consolidated into 8 CFR 214.207(a)(5)(ii) and (b)(3)) to include civil or administrative investigations, prosecutions, or judicial processes associated with acts or perpetrators of trafficking.

Response: DHS declines to make this edit, as the new language at 8 CFR 214.207(b)(5) encompasses these processes. ''Investigative or judicial processes'' covers all the suggested language from the commenter, and includes criminal, civil, administrative, or other investigations, prosecutions, or judicial processes.

10. Evidence To Establish Physical Presence

Comment: One commenter requested that in determining whether trafficking survivors are present on account of trafficking, DHS should consider the ability or inability of survivors to access legal and social services after escaping a trafficker.

Response: DHS emphasizes that adjudicators consider all evidence presented, including the applicant's ability to access services following victimization. DHS has made several clarifications and amendments to redesignated 8 CFR 214.207(c) to address this concern; however, DHS cannot specifically agree to such a broad request to acknowledge consideration of an applicant's inability to access services if this information is not presented via evidence relevant to a particular case.

Commenter: Another commenter proposed significant revisions to 8 CFR 214.11(g)(4) (redesignated as 8 CFR 214.207(c)). The commenter stated that Requests for Evidence appear to require mental health diagnoses, which places survivors in rural areas at great disadvantage; and current emphasis on law enforcement evidence reinforces that evidence from law enforcement is considered primary evidence and encourages misinterpretation that there is a statute of limitations to file for a T visa.

Response: DHS has updated the evidentiary requirements for how applicants may establish that they are physically present in the United States on account of trafficking in redesignated 8 CFR 214.207(c). The amended section codifies a non-exhaustive list of evidence with the intent of providing clarity to stakeholders and adjudicators around evidentiary expectations. DHS acknowledges that the prior regulation may have inadvertently created confusion surrounding what types of evidence are preferred, rather than underscoring that any credible evidence will be considered in determining whether an applicant has established physical presence in the United States on account of trafficking. Although the list at 8 CFR 214.207(c) has been significantly expanded, DHS again emphasizes that there is no preferred or required type of evidence, and victims may be more likely to have access to certain types of evidence.

K. Compliance With Any Reasonable Request for Assistance

1. Requirement To Comply With Reasonable Request

Comment: One commenter requested DHS rephrase, reconsider, or remove the requirement that an applicant for a T visa cooperate with law enforcement, particularly because of safety considerations for relatives abroad and continued victimization. The commenter also stated that LEAs deport individuals who refuse to cooperate.

Response: DHS declines to adopt this recommendation. Although DHS is sympathetic to these concerns, the statute requires compliance with a reasonable request for assistance in order to be eligible to receive T nonimmigrant status. DHS notes that there is a trauma exception and an age exemption to this eligibility requirement to account for circumstances that may impact an applicant's ability to comply with reasonable requests for assistance. In addition, as discussed above, DHS endeavors not to remove trafficking victims and applicants for T nonimmigrant status outside of exigent circumstances.[25] Moreover, as discussed further below, the statute and regulations provide eligibility for T nonimmigrant status to family members facing a present danger of retaliation as a result of the principal T nonimmigrant's escape from the severe form of trafficking or cooperation with law enforcement. *See* 8 CFR 214.211; INA sec. 101(a)(15)(T)(ii)(III), 8 U.S.C. 1101(a)(15)(T)(ii)(III).

2. Incompetence and Incapacity

Comment: Commenters requested DHS expand the exceptions for compliance with a reasonable request for assistance, including lack of capacity/competency found in the U visa regulations. The commenters proposed including the same exception for individuals lacking capacity or competency even if it is not linked to the trafficking because it often prevents

[25] The White House, ''The National Action Plan to Combat Human Trafficking,'' (2021) *https://www.whitehouse.gov/wp-content/uploads/2021/12/National-Action-Plan-to-Combat-Human-Trafficking.pdf* (National Action Plan); U.S. Dep't of Homeland Security, ''Department of Homeland Security Strategy to Combat Human Trafficking, the Importation of Goods Produced with Forced Labor, and Child Sexual Exploitation'' (Jan. 2020), *https://www.dhs.gov/sites/default/files/publications/20_0115_plcy_human-trafficking-forced-labor-child-exploit-strategy.pdf* (DHS Strategy); ''ICE Directive 11005.3,'' *https://www.ice.gov/doclib/news/releases/2021/11005.3.pdf.*

victims from complying with reasonable requests from law enforcement.

Response: DHS appreciates and shares these concerns about individuals who lack capacity or competency; however, the age exemption and trauma exception are both statutory. There is no statutory authority for an incapacity or incompetence exemption or exception. Instead, DHS has included consideration of an individual's capacity, competency, or lack thereof as factors to be considered when determining whether a request was reasonable. Moreover, the existing age exemption and trauma exception cover incapacity or incompetence due to age or trauma suffered. The existing exemption and exception, coupled with DHS's addition of capacity/competency as a factor to consider will have the same intended effect as a specific exception for incapacity and incompetency.

3. Minimum Contact With Law Enforcement

To meet the requirement that an applicant comply with reasonable LEA requests for assistance, 8 CFR 214.11(h)(1) (redesignated 8 CFR 214.208(b)) mandates that an applicant, at a minimum, has contacted an LEA regarding an act of a severe form of trafficking in persons, unless an exemption or exception applies.

Comment: One commenter requested DHS clarify that an applicant under 18 years of age who reports the trafficking to the National Human Trafficking Hotline or Office of Trafficking in Persons meets the requirement that the person report to LEAs and comply with reasonable requests, including if they make an anonymous report.

Response: DHS emphasizes that applicants who are under the age of 18 at the time of victimization are, by statute, exempt from the requirement to cooperate with any reasonable requests for assistance from law enforcement. Additionally, reports to the National Human Trafficking Hotline or the Office of Trafficking in Persons would generally satisfy the reporting requirement, if the person making the report requested or provided permission for the report to be referred to law enforcement; however, anonymous reports generally do not satisfy the requirement, as they do not meet the required evidentiary standard of proof.

Comment: Some commenters supported DHS' removal of regulatory provisions describing how to obtain an LEA declaration when the victim has not had contact with an LEA. *See* 81 FR 92276. Commenters stated that adjudicators apply inconsistent standards as to what type of contact with an LEA is sufficient. They wrote that some applicants have documented in their T visa applications that they reported to law enforcement, but received no LEA response, and then received RFEs requesting additional documentation of law enforcement contact including a Supplement B or proof of Continued Presence. The commenters recommended that DHS amend 8 CFR 214.11(h)(1) (redesignated 8 CFR 214.208(b)) to provide that a single contact with law enforcement by telephone or electronic means documented by the applicant is sufficient to meet the eligibility requirement. They also recommended that in this same section, DHS repeat aspects of the definition of an LEA to speed responses to RFEs, clarify the minimum amount of LEA contact required, and clarify that it is not necessary that law enforcement respond to the contact. Commenters also requested DHS explicitly clarify in the regulations that participation in civil, family, juvenile, criminal, administrative or any type of court proceedings involving human trafficking or where the victim reveals facts of the trafficking to the court meets the ''contact with an LEA'' requirement.

Response: DHS agrees to adopt this recommendation regarding clarifying what constitutes minimum conduct and has revised the regulation to state that a single contact through telephonic, electronic, or other means may suffice. The means of contact can vary depending on the agency and the facts of the case. Applicants may document whether the LEA responded, and the type of response received. DHS encourages applicants to document all interactions they have had with law enforcement. DHS also clarified that the LEA to which the applicant reports must have jurisdiction over the reported crime. DHS emphasizes that there is no requirement that an individual provide a Supplement B or evidence of a Continued Presence grant, that an investigation or prosecution has been initiated, or that law enforcement respond to the applicant. While an investigation or prosecution is not necessary, the LEA's response to the report of trafficking is helpful to understand LEA involvement in the criminal case and determine whether the applicant meets the requirement to comply with any reasonable LEA requests. DHS does not consider it necessary to repeat the definition of an LEA or to specify every type of contact or the context of that contact that would suffice, given that redesignated 8 CFR 214.201 (defining an LEA) clearly specifies the types of agencies that qualify as LEAs.

4. Determining the Reasonableness of a Request

Comment: Multiple commenters suggested eliminating language in 8 CFR 214.11(a) (redesignated here as 8 CFR 214.201) and 8 CFR 214.11(h)(2) (redesignated as 8 CFR 214.208(c)) referencing the presence of an attorney. The commenters stated that the presence of an attorney should not be evaluated as a factor in whether an LEA request was reasonable and doing so may lead to victims with an attorney being held to higher standards in complying with LEA requests than those without an attorney present. The commenters wrote that the presence of an attorney does not make the law enforcement request more or less reasonable.

Response: DHS declines to adopt this recommendation. Whether an attorney was present during an LEA request is just one of the potentially many factors that DHS considers in examining the totality of the circumstances. Applicants may feel pressured to comply with an LEA request in the absence of an attorney, so DHS believes that it is appropriate to include it as a relevant factor. Furthermore, including an attorney's presence as a factor does not create a higher standard for victims who have attorneys present when requests are made, nor does it put such victims at a relative disadvantage. The presence or absence of an attorney generally will not be dispositive, but is a relevant factor in determining the reasonableness of a request, and will be analyzed on a case-by-case basis.

Comment: Several commenters requested that a ''qualified interpreter'' be added into 8 CFR 214.11(h)(2) (redesignated as 8 CFR 214.208(c)), as language access during LEA interactions is critical to victim protections and is legally required by the Civil Rights Act.

Response: DHS agrees that language access during such interaction is important for victims and has updated the language at new 8 CFR 214.208(c)(11) accordingly.

Comment: Commenters requested DHS add additional factors in determining the reasonableness of a request, including: the circumstances in which a request was made, the ability and health of an applicant, and the nature of trauma suffered. Commenters stated it was critical to understand the context in which requests are made of victims, as well as the circumstances of the victim themselves. The commenters also requested striking ''severe'' from

''severe trauma'' at 8 CFR 214.11(h)(2) (redesignated as § 214.208(c)) because all trauma should be considered.

Response: DHS generally agrees with these comments and has amended the list of factors to consider, by adding the victim's capacity, competency, or lack thereof; removing ''severity'' of trauma; adding ''qualified'' to interpreters; adding the ''health'' of the victim; and adding ''any other relevant circumstances surrounding the request.'' *See* new 8 CFR 214.208(c). DHS believes that these clarifying changes will improve determinations of the applicant's compliance with a reasonable LEA request.

5. Trauma Exception

Comment: Several commenters expressed support for provisions clarifying the types of supporting evidence that applicants can submit to establish that they meet the trauma exception from the general eligibility requirement of compliance with any reasonable LEA request for assistance in 8 CFR 214.11(h)(4)(i) (redesignated here as 8 CFR 214.208(e)(1)). Commenters suggested DHS consider the circumstances of the victim while they were being victimized and the surrounding circumstances, which may have exacerbated the trauma. They also recommended including additional examples of types of evidence that could be submitted to establish that an applicant meets the trauma exception.

Response: DHS has revised the regulations to include additional examples of evidence that may be submitted to establish the applicant qualifies for the trauma exception, to benefit adjudicators and applicants, give applicants additional information, and allow for consistency in adjudications. The updated provision clarifies that an applicant's statement should explain the circumstances surrounding the trauma and includes additional types of credible evidence that may be submitted. *See* 8 CFR 214.208(e)(1).

Comment: One commenter recommended DHS define what constitutes physical or psychological trauma to help applicants determine what evidence to submit when claiming the exception.

Response: DHS declines to include a definition of trauma in the regulatory text, as it could have the unintended effect of restricting access to benefits for victims.

Comment: One commenter stated that requiring an applicant to prove trauma to qualify for the exception risks re-traumatization, and that implicit in the definition of trafficking is some element of trauma. The commenter stated that requiring survivors to retell their experiences could hinder healing, and this could be mitigated by mandating a signed attestation to the psychological trauma from a qualified individual. The commenter stated that not requiring an applicant's affidavit would reduce the risk of re-traumatization.

Response: DHS declines to adopt this recommendation. DHS is sympathetic to the risks of re-traumatization for survivors of trafficking, but the trauma exception is statutory. The personal statement is and will continue to be initial required evidence because it is one of the most important sources of information for adjudicators in determining whether an individual meets the eligibility requirements for T nonimmigrant status. The personal statement also allows an applicant to provide credible evidence of their experiences in their own words, without requiring them to provide other evidence that may be more difficult to obtain. In addition, adjudicators consider the impact of trauma and victimization when evaluating the personal statement.[26] DHS declines to mandate a signed attestation from a medical or other qualified professional, as this would be inconsistent with the ''any credible evidence'' standard and would create a limitation on types of evidence that may be submitted under this standard.

6. DHS Contact With Law Enforcement

Comment: Several commenters requested that DHS amend 8 CFR 214.11(h)(4)(i) (redesignated here as 8 CFR 214.208(e)(1)) to provide that, in cases where an applicant has invoked the trauma exception and is unable to comply with reasonable LEA requests, USCIS will only contact an LEA if the applicant has already had initial contact. These commenters stated that maintaining this provision might discourage applicants who fear that USCIS' discretion to contact an LEA could potentially endanger applicants or their family members. Multiple commenters also requested clarification to ensure adjudicators understand that applicants who qualify for the exception are not required to have any contact with any LEA.

Response: DHS appreciates the sensitivities of applicants who are seeking an exception due to trauma and acknowledges that individuals who qualify for the trauma exception are not required to have had contact with any LEA. However, DHS feels it is important to retain the authority to contact law enforcement agencies for any information that may be necessary to adjudicate an application, in certain limited circumstances, even where an applicant has not already contacted an LEA. This is especially true for T nonimmigrant status, which requires cooperation with law enforcement unless the trauma exception or age exemption applies. *See* 8 CFR 214.208. DHS has stricken the reference to contacting law enforcement in relation to the trauma exception and has created a new section at 8 CFR 214.208(f) indicating that USCIS reserves the authority and discretion to contact an LEA involved in a case where an applicant previously contacted an LEA or when otherwise permitted by law. *See, e.g.,* 8 U.S.C. 1367.

7. Age Exemption

Comment: Several commenters commended DHS for updating its regulations to reflect the statutory provision that minors under 18 years of age are not required to comply with any reasonable law enforcement requests. *See* INA sec. 101(a)(15)(T)(i)(III). Multiple commenters requested that DHS clarify its interpretation of the exemption by amending 8 CFR 214.11(h)(4)(ii) (redesignated here as 8 CFR 214.208(e)(2)) to specify that the relevant age for determining whether this exemption is met is the age at the time of victimization, not the age at the time of application. Commenters stated this change is important because child trafficking victims in particular suffer long-term trauma that may limit their ability to cooperate with law enforcement and to confide in their attorneys. Additionally, commenters noted that attorneys may not identify applicants who suffered trafficking as a minor until after they have turned 18. One commenter requested that DHS consider increasing the age for the minor exemption. Another commenter stated there should be no requirement to comply with reasonable requests for assistance from law enforcement regardless of age, considering that brains are not fully developed until the age of 25. One commenter requested DHS clarify that any credible evidence related to a minor's age be included. The commenter indicated they work with many children who do not have access to birth certificates, passports, or certified medical opinions; whose documents have been withheld by their legal guardians; or do not know their

[26] U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security ''Volume 3, Humanitarian Protection and Parole, Part B, Victims of Trafficking, Chapter 3, Documentation and Evidence for Principal Applicants,'' *https://www.uscis.gov/policy-manual/volume-3-part-b-chapter-3* (last updated Oct. 20, 2021).

own birthdates or exactly where they were born.

Response: DHS agrees that suffering human trafficking as a child can be particularly traumatizing and has significant and negative impacts on development. DHS has revised the regulation to clarify that the exemption for minors applies based on the age of the applicant at the time of victimization. An applicant is exempt from the requirement to comply with reasonable law enforcement requests if the applicant was under 18 years of age at the time at least one of the acts of trafficking occurred. This is consistent with longstanding DHS policy and practice. DHS declines to increase the age for the minor exemption above age 18, as this exemption is provided in the statute. Moreover, DHS declines to remove the requirement to comply with reasonable requests for assistance, as it is a statutory requirement, and individuals who were under the age of 18 at the time of at least one of the acts of trafficking or may not be able to comply with reasonable requests for assistance due to trauma qualify for an exemption or exception.

DHS also acknowledges that minors may have difficulty obtaining certain types of evidence to establish their age and has revised the regulation to emphasize that any other credible evidence regarding age will be considered.

L. Extreme Hardship

Comment: One commenter requested DHS remove the extreme hardship requirement altogether. Another commenter wrote that the standard for ''unusual and severe harm'' in 8 CFR 214.11(i) (redesignated here as 8 CFR 214.209) for purposes of evaluating whether an applicant would suffer extreme hardship if removed from the United States is unnecessarily narrow and should include considerations of hardship inflicted on individuals other than the applicant. The commenter also recommended that DHS revise this section to take greater account of economic detriment and financial harm as factors in assessing hardship, particularly when those factors create a risk of re-victimization. The commenter requested DHS add language to 8 CFR 204.11(i) (redesignated here as 8 CFR 214.209) ''indicating that current or economic detriment may be considered as one factor in assessing hardship, particularly when it creates a risk of re-victimization.'' Another commenter supported the broad list of factors that should be considered, but also requested to include financial and support issues, and encouraged DHS to provide a greater list of possible, but not exhaustive factors to be considered.

Response: DHS declines to fully adopt these recommendations. DHS cannot remove the extreme hardship eligibility requirement, as it is required by statute. *See* INA sec. 101(a)(15)(T)(i)(IV), 8 U.S.C. 1101(a)(15)(T)(i)(IV) (''the alien would suffer extreme hardship involving unusual and severe harm upon removal''). The statute is clear that the extreme hardship eligibility requirement refers to hardship that the applicant would suffer and does not include hardship to anyone other than the applicant as a factor. *See* INA sec. 101(a)(15)(T), 8 U.S.C. 1101(a)(15)(T). Accordingly, USCIS will not consider hardship to family members unless the evidence demonstrates specific harms that the applicant will suffer upon removal as a result of hardship to a family member. DHS has amended redesignated 8 CFR 214.209(c)(2) to provide this clarification.

DHS has revised 8 CFR 214.209 to include economic harm as an extreme hardship factor. Economic harm has always been considered a factor; the prior regulation indicated that economic detriment alone could not be the sole basis for a finding of extreme hardship involving unusual and severe harm. Although the revised regulations do not bar economic hardship as the sole basis for such a finding, it must rise to the level of extreme hardship involving unusual and severe harm, and thus, generally, economic hardship alone may not suffice. However, adjudicators will consider the totality of the circumstances and all relevant factors in making an extreme hardship determination. Each case will require an analysis based on the specific facts and circumstances present.

Comment: One commenter requested that DHS clarify whether the hardship must be directly related to trafficking and that it does not need to rise to the level of extreme hardship.

Response: As discussed above, DHS has not removed the reference to extreme hardship in the regulation. DHS clarifies that an applicant's hardship does not need to be directly related to their trafficking. *See* 8 CFR 214.209.

M. Family Members Facing a Present Danger of Retaliation

The regulations at 8 CFR 214.11(k) (redesignated here as 8 CFR 214.211) implement section 101(a)(15)(T)(ii)(III) of the INA, 8 U.S.C. 1101(a)(15)(T)(ii)(III), to provide that T nonimmigrant status may be available for a parent, unmarried sibling under the age of 18, or the adult or minor child of a derivative of the principal facing a present danger of retaliation as a result of the T–1 nonimmigrant's escape from the severe form of trafficking or cooperation with law enforcement. One commenter expressed support for allowing principal applicants under 21 years of age to apply for derivative T nonimmigrant status for unmarried siblings under 18 years and parents as eligible derivative family members.

Comment: Commenters requested that DHS mandate an expedited adjudication process for these applications, which would protect family members at risk and encourage victims of trafficking to report their victimization. Some commenters recommended a specific 30-day timeline.

Response: DHS shares the commenters' concerns about family members at risk; however, it declines to impose processing deadlines on itself given staffing resources and the case-by-case review required in adjudicating T visa applications. DHS notes that there is already a process in place to request expedited processing based on urgent humanitarian reasons. Guidance for requesting expedited processing can be found on the USCIS website.[27]

Comment: Commenters also wrote that section 101(a)(15)(T)(ii)(III) of the INA, 8 U.S.C. 1101(a)(15)(T)(ii)(III), does not provide an opportunity to request T nonimmigrant status for a principal's adult children who face a present danger of retaliation. Some commenters indicated they understood that DHS had limited ability to address this statutory gap, while others stated that DHS could construe the statute more broadly to include these adult children but did not provide legal support for this assertion.

Response: DHS acknowledges that the statute omits a principal's adult children who face a present danger of retaliation. However, the statutory language is not ambiguous on this point and a change in the law to include a principal's adult children would be necessary to include adult children of a T–1 nonimmigrant as eligible family members. INA sec. 101(a)(15)(T)(ii)(III), 8 U.S.C. 1101(a)(15)(T)(ii)(III).

Comment: Commenters wrote that family members at risk of retaliation from traffickers have difficulty securing evidence listed in 8 CFR 214.11(k)(6) (redesignated here as 8 CFR 214.211(f)) to prove a present danger of retaliation. They requested that DHS indicate that a victim's statement describing the present danger of retaliation alone would be sufficient or, at a minimum,

[27] U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''How to Make an Expedite Request,'' *https://www.uscis.gov/forms/filing-guidance/how-to-make-an-expedite-request* (last updated Oct. 20, 2022).

clarify that police reports filed in the home country and affidavits from witnesses in the home country would meet the evidentiary standard. Several commenters requested that DHS consider any credible evidence of the danger of retaliation.

Response: DHS appreciates the difficulties that trafficking victims and their family members may have in obtaining evidence. For this reason, the rule is clear that applicants may submit any credible evidence related to all the eligibility requirements for both principal applicants and derivative applicants. *See, e.g.,* 8 CFR 214.204(c) and (l). The standard also applies specifically to the evidentiary standard for proving that an eligible family member faces a present danger of retaliation. *See* 8 CFR 214.211(a)(3). In cases where the LEA has not investigated the trafficking, USCIS will evaluate any credible evidence demonstrating derivatives' present danger of retaliation. The types of evidence listed at 8 CFR 214.211(f) are non-exhaustive examples, and the inclusion of ''and/or'' at the end of the list before the inclusion of ''any credible evidence'' clarifies that USCIS will consider any credible evidence.

An applicant's personal statement alone could be sufficient to establish a present danger of retaliation, in accordance with the ''any credible evidence'' standard. *See* new 8 CFR 214.211(f). DHS has not specifically revised the rule to state that a statement describing the present danger of retaliation alone would be sufficient, as this is already permitted by the ''any credible evidence'' standard, and referencing one particular piece of evidence in the regulatory text could unintentionally discourage applicants from submitting additional relevant, credible evidence that would assist in the adjudication. DHS encourages applicants to submit additional credible evidence whenever possible to provide USCIS adjudicators with as complete an understanding of the facts of the case as possible.

The ''any credible evidence'' standard also encompasses evidence originating from a family member's home country; however, DHS has clarified that evidence may be from the United States or any country in which an eligible family member faces retaliation at new 8 CFR 214.211(f).

Comment: One commenter requested DHS revise the T–6 regulation to eliminate the policy of requiring that a derivative beneficiary of a T–1 nonimmigrant have already secured T nonimmigrant status before their adult or minor children facing present danger of retaliation become eligible for T–6 status. They stated that DHS's interpretation of ''derivative beneficiary'' is overly narrow, that the interpretation that the term means someone who has ''derived status'' and ''benefited'' from the qualifying relationship has no basis, and that it is inconsistent with DHS's own use of the term ''beneficiary'' elsewhere.

Response: DHS appreciates the commenter's concerns; however, it maintains that its interpretation as presented in the 2014 Policy Memorandum [28] regarding T derivatives (T Derivative Memo) is the correct legal reading of the statute. The commenter's contention that a ''derivative beneficiary'' may include someone who merely ''stands to benefit,'' but has not, at minimum, sought such a benefit, lacks statutory support. DHS maintains that the phrase ''adult or minor children of a derivative beneficiary'' plainly requires the T–6 family member to establish their eligibility through their relationship to the derivative beneficiary of the principal. A plain language reading of ''derivative beneficiary'' is someone who has *derived* a *benefit;* that is, an individual who has derived their nonimmigrant status as a family member, as defined at section 101(a)(15)(T)(ii) of the INA, 8 U.S.C. 1101(a)(15)(T)(ii), and who has benefited from the qualifying relationship to the principal. As noted in the T Derivative Memo, this means that a ''derivative beneficiary'' is a family member described in section 101(a)(15)(T)(ii)(I) and (II) of the INA, 8 U.S.C. 1101(a)(15)(T)(ii)(I) and (II), who has been granted derivative T nonimmigrant status. Accordingly, a ''derivative beneficiary'' must have been granted T–2, T–3, T–4, or T–5 nonimmigrant status through the principal in order for the derivative beneficiary's adult or minor child to be eligible for T–6 nonimmigrant status. This conclusion is further supported by the requirement under section 101(a)(15)(T)(ii) of the INA, 8 U.S.C. 1101(a)(15)(T)(ii) that any derivatives be ''accompanying, or following to join'' the principal T–1 applicant.

As noted in the T Derivative Memo, Congress created the T–6 classification through a relationship to a derivative, instead of directly to a principal, as it is in other immigration benefits. Therefore, establishing a qualifying relationship between the T–6 family member and their parent is insufficient to derive eligibility as a T–6, if the T–6's parent never held T nonimmigrant status as a T derivative beneficiary. To be eligible for T–6 classification, the adult or minor child must establish the qualifying relationship to their parent who actually derived T nonimmigrant status through the principal beneficiary. Accordingly, DHS declines to make any changes in response to this comment.

N. Marriage of Principal After Principal Files Application for T Nonimmigrant Status

The regulation at redesignated 8 CFR 214.211(g)(4) states that if an applicant marries after filing the application for T–1 nonimmigrant status, USCIS will not consider the spouse eligible for derivative T–2 nonimmigrant status.

Comment: Several commenters wrote that this limitation on eligible derivatives relies on an unnecessarily narrow interpretation of section 101(a)(15)(T)(ii) of the INA, 8 U.S.C. 1101(a)(15)(T)(ii), by requiring that a spousal relationship exist at the time of filing. They suggested that the spouse from a marriage that occurs after the principal applicant applies for T–1 nonimmigrant status should be able to be considered as a T–2 derivative spouse.

Response: The U.S. Court of Appeals for the Ninth Circuit, in *Medina Tovar* v. *Zuchowski,* held that the regulatory requirement at 8 CFR 214.14(f)(4) that a spousal relationship must exist at the time a Petition for U Nonimmigrant Status is filed for the spouse to be eligible for classification as a derivative U–2 nonimmigrant was invalid.[29] As a matter of policy, DHS applies this decision nationwide to spousal and stepparent relationships arising in adjudications of derivative U nonimmigrant status petitions, as well as derivative T nonimmigrant status applications.[30] Accordingly, DHS has amended the regulations in the final rule to adopt the holding in *Medina Tovar* for T nonimmigrant adjudications and has stricken the following language: ''If a T–1 marries subsequent to filing the application for T–1 status, USCIS will not consider the spouse eligible as a T–2 eligible family member.'' DHS has

[28] U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''New T Nonimmigrant Derivative Category and T and U Nonimmigrant Adjustment of Status for Applicants from the Commonwealth of the Northern Mariana Islands'' (2014), *https://www.uscis.gov/sites/default/files/document/memos/Interim_PM-602-0107.pdf* (T Derivative Memo).

[29] *Medina Tovar* v. *Zuchowski,* 982 F.3d 631 (9th Cir. 2020).

[30] U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''Volume 3, Humanitarian Protection and Parole, Part B, Victims of Trafficking, Chapter 4, Family Members, Section D, Family Relationship at the Time of Filing,'' *https://www.uscis.gov/policy-manual/volume-3-part-b-chapter-4* (last updated Oct. 20, 2021).

added language that principal applicants who marry while their Application for T Nonimmigrant Status is pending may file an Application for Family Member of T–1 Recipient on behalf of their spouse, even if the relationship did not exist at the time they filed their principal application. *See* new 8 CFR 214.211(e). DHS has also included language allowing for a principal applicant to apply for a stepparent or stepchild if the qualifying relationship was created after they filed their principal application but before it was approved. Finally, DHS has clarified that it will evaluate whether the marriage creating the qualifying spousal relationship or stepchild and stepparent relationship exists at the time of adjudication of the principal's application and thereafter.

Comment: One commenter requested that principal applicants should be permitted to apply for derivative T status for the parent of the principal's derivative children, as many individuals may not formalize their committed relationships through marriage.

Response: Although DHS sympathizes with these situations, the family relationships giving rise to derivative T nonimmigrant status eligibility are set forth at section 101(a)(15)(T)(ii) of the INA, 8 U.S.C. 1101(a)(15)(T)(ii). Thus, DHS declines to add a new standard for derivative benefits for a committed relationship in the T visa context.

O. Relationship and Age-Out Protections

DHS has amended new 8 CFR 214.211(e)(1) to state that if the principal applicant establishes that they have become a parent of a child after filing, the child will be deemed an eligible family member. This new language replaces ''had a child'' because it is more inclusive and accurate, and mirrors similar regulations in the U visa context.

DHS has also amended new 8 CFR 214.211(e)(3) to state that the age-out protections apply to a child who may turn 21 during the pendency of the principal's application for T nonimmigrant status. The prior text erroneously referred to age-out protections for children of principals who were 21 years of age or older.

P. Travel Abroad

Comment: Commenters encouraged DHS to provide advance parole for T nonimmigrants in recognition of the fact that victims' families may remain abroad. They wrote that victims would feel safer and be able to return to the United States without immigration consequences.

Response: DHS notes that T nonimmigrants are already permitted to apply for advance parole, as clarified in both the Form I–914 and Form I–131 form instructions and Policy Manual. Applications for advance parole are evaluated on a case-by-case basis pursuant to section 212(d)(5) of the INA, 8 U.S.C. 1182(d)(5). In addition, DHS has clarified that a noncitizen granted T–1 nonimmigrant status or an eligible family member must apply for advance parole to return to the United States after travel abroad. The T nonimmigrant must comply with advance parole requirements to maintain T nonimmigrant status upon return to the United States and remain eligible to adjust status under section 245(l) of the INA, 8 U.S.C. 1255(l). 8 CFR 245.23(j). *See* new 8 CFR 214.204(p), 214.211(i)(4).

Q. Extension of Status

DHS provides in this rule that a derivative T nonimmigrant may file for extension of status independently, if the T–1 nonimmigrant remains in status, or the T–1 nonimmigrant may file for an extension of their own status and request that the extension be applied to their derivative family members. This codifies the current process for derivatives to seek extensions of status. *See* new 8 CFR 214.212(b). In administering the T nonimmigrant program, USCIS found, and stakeholders expressed, that there was a lack of clarity with the extension of status process for T nonimmigrants. USCIS issued a Policy Memorandum in 2016 to clarify requirements for extension of status for T and U nonimmigrants (T/U Extension Memo).[31] DHS is codifying some of the policies in the T/U Extension Memo at new 8 CFR 214.212(f). First, this rule provides that USCIS may approve an extension of status for principal applicants based on exceptional circumstances. Second, when an approved eligible family member is awaiting initial issuance of a T visa by an embassy or a consulate and the principal's T–1 nonimmigrant status will soon expire, USCIS may approve an extension of status for a principal applicant based on exceptional circumstances. *See* new 8 CFR 214.212(f).

Finally, DHS has clarified in the evidence section for extension of status that it will consider affidavits from individuals with direct knowledge of or familiarity with the applicant's circumstances, rather than affidavits of ''witnesses.'' *See* new 8 CFR 214.212(g)(2)(v).

R. Revocation Procedures

DHS has clarified the existing practice that an automatic revocation cannot be appealed. *See* new 8 CFR 214.213(a). DHS has also clarified at § 214.213(c) that if an applicant appeals a (non-automatic) revocation, the decision will not become final until the appeal is decided. *See* 8 CFR 103.3. DHS has revised the language at new 8 CFR 214.213(b)(1) which previously referenced errors that affected the ''outcome'' and now refers to errors that led to an ''approval'' of a case.

Comment: Some commenters expressed concern that 8 CFR 214.11(m) (redesignated here as 8 CFR 214.213)) eliminates a step in the process of revocation, stating that under the prior rule at 8 CFR 214.11(s)(2), a notice of intent to revoke (NOIR) would initiate a 30-day window for the applicant to submit a rebuttal that a district director would then consider as evidence. They proposed that the rule include this prior process and provide individuals with an opportunity of rebuttal.

Response: The removal of this language in the interim rule does not reflect a change in USCIS' revocation procedures. T nonimmigrants who are issued a NOIR are provided 30 days to respond with evidence to rebut the grounds stated for revocation in the notice. These grounds and the deadline to respond are stated in all NOIRs. USCIS will consider all evidence presented in deciding whether to revoke the approved application. The reference to the district director in the 2002 interim rule is outdated, as district offices are no longer involved in revoking T nonimmigrant status. DHS has codified the current procedures for NOIRs, including the time period during which an individual may submit rebuttal evidence at 8 CFR 214.213(c).

S. Waivers of Inadmissibility

DHS has the authority to waive grounds of inadmissibility on a discretionary basis under section 212(d)(3)(A)(ii) or (d)(13) of the INA, 8 U.S.C. 1182(d)(3)(A)(ii), (d)(13).

Comment: Commenters requested that DHS clarify in the regulation that immigration judges have jurisdiction over waiver applications, referencing court decisions in the U visa context.

Response: DHS declines to adopt this recommendation. In the 2002 interim rule, DOJ delegated T-related waiver authority exclusively to the Immigration

[31] U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''Extension of Status for T and U Nonimmigrants (Corrected and Reissued)'' (2016), *https://www.uscis.gov/sites/default/files/document/memos/2016-1004-T-U-Extension-PM-602-0032-2.pdf* (T/U Extension Memo).

and Naturalization Service (INS), and INS's adjudicative authority transferred to USCIS with the Homeland Security Act.[32]

Comment: In cases involving violent or dangerous crimes, 8 CFR 212.16 specifies that USCIS will only exercise favorable discretion toward the applicant in extraordinary circumstances unless the criminal activities were caused by or were incident to the victimization. *See* 8 CFR 212.16(b)(3). Several commenters wrote that this provision is too stringent in its application. They stated that this language is not statutorily required, that victims of trafficking often have unfavorable criminal histories that are not directly tied to their victimization but are related to their vulnerability that led to their exploitation, and that this provision could have a chilling effect on victims coming forward to report crimes.

Other commenters encouraged DHS to require consideration of the effects and circumstances of the trafficking as they relate to criminal issues. They suggested DHS determine whether the crime occurred before the trafficking situation or is related to the trafficking, including trauma or vulnerabilities in the wake of trafficking. They requested DHS focus not on the seriousness or number of crimes and instead focus on a victim-centered approach using a balancing test.

Response: DHS declines these edits, while recognizing nuances in evaluating an applicant's criminal history and the potential for unique factors related to victimization. DHS believes that 8 CFR 212.16 appropriately informs the exercise of discretion and is fundamental to maintaining the integrity of the T nonimmigrant status program and the ability to adjudicate T visa applications on a case-by-case basis. DHS has broad waiver authority to waive most grounds of inadmissibility under section 212(d)(3)(A)(ii) and (d)(13) of the INA, 8 U.S.C. 1182(d)(3)(A)(ii), (d)(13) (if in the national interest for section 212(a)(1) of the INA, 8 U.S.C. 1182(a)(1), or if in the national interest and caused by or incident to the victimization for most other provisions of subsection 212(a) of the INA, 8 U.S.C. 1182(a) inadmissibility grounds). DHS reserves the ability to evaluate inadmissibility grounds in each individual case to ensure that the waiver is in the national interest and considers a broad variety of factors in doing so. Moreover, DHS already considers all positive and negative factors in the exercise of discretion.

T. Adjustment of Status

DHS has made several changes to the adjustment of status regulations for T nonimmigrants. DHS has stricken from 8 CFR 245.23(a)(3) the requirement that an applicant accrue 4 years in T–1 nonimmigrant status and file a complete application prior to April 13, 2009, as all such applications have been adjudicated.

In addition, DHS has removed the word ''first'' before ''date of lawful admission'' in 8 CFR 245.23(a)(4) to clarify the agency's interpretation of re-accrual of physical presence following a break in presence. This edit clarifies an outstanding legal and policy concern in the program and eliminates barriers for victims of trafficking. The statutes and regulations permit T nonimmigrants to restart the clock after a break in continuous physical presence after the first admission as a T nonimmigrant (including, but not limited to, restarting after a subsequent admission as a T nonimmigrant, or restarting after returning with advance parole after a break in continuous physical presence). This interpretation treats T nonimmigrant adjustment of status applicants and U nonimmigrant adjustment of status applicants the same regarding the requirements for continuous physical presence.

Comment: Commenters encouraged DHS to take a broader approach to adjustment of status eligibility, including allowing derivative family members to adjust independently of the T–1 nonimmigrant, and to evaluate each application on its own merits. One commenter recommended incorporating the policies outlined in the T/U Extension Memo, because it allowed derivatives to adjust independently of principals.

Response: Section 245(l) of the INA, 8 U.S.C. 1255(l), provides that if a T–1 nonimmigrant has been continuously physically present for three years since admission as a T–1 nonimmigrant (or during the investigation or prosecution of trafficking which is complete); establishes good moral character; and has complied with any reasonable request for assistance in the trafficking investigation or prosecution, would suffer extreme hardship involving unusual and severe harm upon removal, or was under age 18 at the time of victimization, the Secretary may adjust the status of the T–1 nonimmigrant and any person admitted under section 101(a)(15)(T)(ii) of the INA, 8 U.S.C. 1101(a)(15)(T)(ii). Thus, a precondition for a derivative T nonimmigrant to adjust status under section 245(l) of the INA, 8 U.S.C. 1255(l) is that the T–1 nonimmigrant has met the above specified requirements (continuous physical presence, good moral character, etc.). For all practical purposes, a derivative T nonimmigrant generally cannot demonstrate that the T–1 nonimmigrant meets the requirements for adjustment of status in the absence of USCIS adjudicating an application for adjustment of status from the T–1 nonimmigrant themself. Therefore, DHS declines to adopt the commenter's recommendation to permit T derivatives to adjust independent of the T–1 principal.

DHS also notes that the T/U Extension Memo says derivative family members with T nonimmigrant status do not lose their status when the T–1 nonimmigrant adjusts status, allowing the derivative to adjust status later. DHS has codified this longstanding policy at 8 CFR 245.23(b)(5).

Comment: Commenters also requested changes to 8 CFR 245.23(a)(6) such that it includes an exemption for trafficking victims under the age of 18 at the time of victimization, to be consistent with the statute at 8 U.S.C. 1255(l)(1)(C).

Response: DHS agrees that Congress intended to exempt trafficking victims who were under the age of 18 at the time of their victimization from being required to contact law enforcement. This exemption should apply at the adjustment of status stage; accordingly, DHS has made this change to the regulation as a technical edit. Similarly, DHS has added reference to the trauma exception, consistent with the statute and congressional intent. *See* new 8 CFR 245.23(a)(7)(iii) and (iv).

Comment: Other commenters requested changes be made to the minimum 3-year continuous physical presence requirement because it punishes trafficking victims by forcing them to wait, and conditions early adjustment eligibility on things outside the victim's control, such as the conclusion of the investigation or prosecution.

Response: DHS is sympathetic to the difficulties victims may face in waiting to adjust status; however, the continuous physical presence period is statutory and cannot be changed by regulation.

Comment: Commenters also requested that DHS implement a process by which principal applicants who obtain lawful permanent residence and subsequently marry may file the equivalent of a Form I–929, Petition for Qualifying Family Member of a U–1 Nonimmigrant on behalf of eligible family members.

[32] 6 U.S.C. 271(b).

Response: DHS is sympathetic to the concerns raised in these comments but declines to adopt a process for certain relatives to apply to adjust status if they have never held T nonimmigrant status. Commenters noted the ability of U–1 nonimmigrants to file for spouses they subsequently marry after receiving U nonimmigrant status; U–1 nonimmigrants are able to do so under 8 U.S.C. 1255(m)(3); however, there is no equivalent statutory basis to create such a process in the T visa context under 8 U.S.C. 1255(l)(1).

U. Applicants and T Nonimmigrants in Removal Proceedings or With Removal Orders

Commenter: One commenter requested DHS acknowledge that trafficking survivors often escape trafficking through arrest or contact with Immigration and Customs Enforcement (ICE), who may later prosecute them without investigating whether they have been trafficked. The commenter requested that special protections be extended to survivors placed in removal proceedings and detention, to ensure survivors have access to due process in requesting a T visa.

Response: DHS acknowledges that many survivors may escape their trafficking through encounters with ICE. Understanding the concern that trafficking victims may require additional protection, DHS has made several changes to the regulation (discussed below) to further its victim-centered approach. In addition, DHS has made significant accomplishments of Priority Actions within the Department of Homeland Security Strategy to Combat Human Trafficking, the Importation of Goods Produced with Forced Labor, and Child Sexual Exploitation (DHS Strategy). For example, in October 2020, DHS launched the Center for Countering Human Trafficking (CCHT), a DHS-wide effort comprising 16 supporting offices and components, led by U.S. Immigration and Customs Enforcement (ICE) Homeland Security Investigations (HSI). The CCHT is the first unified, intercomponent coordination center for countering human trafficking and the importation of goods produced with forced labor. In October 2021, the Secretary directed DHS components to incorporate a victim-centered approach into all policies, programs, and activities governing DHS interactions with victims of crime. Finally, in August 2021, ICE issued Directive 11005.3: Using a Victim-Centered Approach with Noncitizen Crime Victims, which sets forth ICE policy regarding civil immigration enforcement actions involving noncitizen crime victims, including victims of trafficking and Continued Presence recipients.[33] This Directive emphasizes the duty to protect and assist noncitizen crime victims.

Comment: Another commenter requested that in cases where applicants can make a credible showing that they were placed in removal proceedings through retaliatory actions of their trafficker or due to their trafficking, DHS should automatically join in a motion to administratively close or to terminate the removal proceeding for the pendency of the T nonimmigrant application, including through any appeals, and overcoming any applicable time and numerical limitations.

Response: DHS declines to adopt this recommendation. DHS is cognizant that individuals may be placed in removal proceedings because of their trafficking experience and implements a victim-centered approach for all individuals it encounters. DHS believes that the following changes (listed in the subsequent seven numbered paragraphs) made to the regulation will address many of the commenter's concerns.

1. Principal Applicants, T–1 Nonimmigrants, and Derivative Family Members

Comment: Commenters indicated that their clients have faced unnecessary hurdles and additional trauma when seeking to reopen and terminate a prior removal order due to opposition by ICE. Commenters also stated that ICE ''rarely'' joins applicants' motions to administratively close, continue, or terminate proceedings. They emphasized that removal from the United States can render a victim ineligible for a T visa and vulnerable to re-trafficking or retaliation from the trafficker. The commenters suggested that the regulations be amended to mandate ICE's participation in joint motions to reopen upon a grant of T–1 or T derivative nonimmigrant status in these circumstances, or at the respondent's request, ICE should agree to a motion to administratively close, terminate or continue proceedings (if proceedings are ongoing).

Response: DHS values the need to conserve government resources and maintain coordination across the department; however, DHS declines to codify limitations on ICE's ability to make case-by-case determinations. In line with the victim-centered approach, we have revised the regulation to provide that ICE will maintain a policy regarding the exercise of discretion toward all applicants for T nonimmigrant status, and all T nonimmigrants. *See* new 8 CFR 214.214(b). To that end, DHS has also revised the regulation at new 8 CFR 214.204(b)(1)(ii), 214.205(e), and 214.211(b)(2)(ii) to state that ICE may exercise prosecutorial discretion as appropriate.

Comment: Other commenters stated that if DHS disagreed with mandating ICE to join such motions, DHS should add permissive language to this effect, making clear that the language set forth at 8 CFR 214.11(d)(1)(ii) and (k)(2)(i) (redesignated as 8 CFR 214.204(b)(2) and 214.211(b)(2)) applies both to T–1 nonimmigrants as well as T derivatives in pending removal proceedings. Other commenters also requested the regulation address derivative family members in removal proceedings.

Response: DHS agrees with the commenter's suggestion, and as described above, has amended the regulation to state that ICE may exercise prosecutorial discretion, including in cases of T derivatives or eligible family members. *See* new 8 CFR 214.211(b)(2)(ii).

2. Immigration Judges

Comment: Several commenters requested DHS add language to the regulation specifically stating that an immigration judge may terminate removal proceedings once T nonimmigrant status is granted. They requested DHS add language clarifying that an immigration judge can administratively close removal proceedings while USCIS adjudicates an application for T nonimmigrant status.

Response: This rule amends DHS regulations only and is not a joint Department of Justice (DOJ) rule. Accordingly, comments related to the authority of an immigration judge to terminate or administratively close removal proceedings are outside the scope of this rule, which cannot bind DOJ.

Comment: Commenters also suggested that the regulation direct immigration judges to terminate or administratively close proceedings for all T nonimmigrant status applicants and recipients on their own accord without a motion or request from the parties.

Response: DHS declines to adopt this recommendation. This rule amends DHS regulations only and is not a joint Department of Justice (DOJ) rule. Thus, DHS cannot bind DOJ in this rule.

3. Automatic Stays of Removal

Comment: One commenter urged DHS to automatically stay removals of

[33] ''ICE Directive 11005.3,'' *https://www.ice.gov/doclib/news/releases/2021/11005.3.pdf.*

applicants whose applications are deemed to be properly filed. They request in the alternative that DHS expedite bona fide determinations for applicants with final orders of removal. Other commenters requested that DHS issue a stay of removal to applicants with pending T visa applications until a bona fide determination is made.

One commenter stated that if an application is found to be bona fide, DHS should extend an administrative stay of a final order until a final decision is made on the application for T nonimmigrant status.

Response: DHS declines to adopt these recommendations. DHS acknowledges the commenters' concerns regarding the removal of applicants with pending T visa applications. As a matter of policy, DHS generally will not remove applicants with pending T nonimmigrant status applications; however, there may be situations where it is prudent for DHS to execute removal orders prior to adjudication, and DHS does not intend to limit DHS discretion in this manner. DHS feels that the regulation's language at 8 CFR 214.204(b)(2)(i) and (ii) is sufficient to address these commenter's concerns by providing that, once granted, a stay of removal will remain in effect until a final decision is made on the application for T nonimmigrant status.

4. Unrepresented Applicants

Comment: One commenter requested that in cases where an applicant is unrepresented in proceedings, DHS should be mandated to move for termination, dismissal, administrative closure, or a continuance. The commenter stated that actively pursuing removal cases against survivors of trafficking is inconsistent with ICE's goal of prioritizing limited resources.

Response: DHS declines to adopt these recommendations. Generally, relief from removal has been historically requested by the noncitizen and is not initiated by DHS. DHS does not wish to limit ICE's discretion by mandating specific actions, as each case will present different circumstances. However, DHS agrees that prioritizing the removal of trafficking survivors is generally inconsistent with the victim-centered approach to which DHS adheres.

5. Detained Applicants

Comment: Commenters requested DHS be required to release a detained applicant once a bona fide determination has been made. Some commenters requested that DHS add a provision to the regulation requiring ICE to seek expedited processing for all detained T visa applicants (principals and derivatives). They also stated that ICE should be required to check DHS systems for VAWA confidentiality flags that indicate a pending or approved T, U, or VAWA application or petition for every detainee within 24 hours of detention. Finally, they state the regulation should specify how quickly ICE should make this request and how long USCIS should generally take to respond to the expedite request.

Response: DHS declines to adopt this recommendation. DHS appreciates the commenter's concerns. Existing USCIS and ICE processes already flag protected records via secure methods for information sharing, including through the USCIS Central Index System, which, among other things, includes flags for individuals whose records are protected under 8 U.S.C. 1367.

In addition, there is already a process in place to request expedited processing based on urgent humanitarian reasons, which can be found on the USCIS website.[34] ICE also will request expedited adjudication when necessary and appropriate, including when noncitizens are detained so adjudication of applications for T nonimmigrant status is prioritized. ICE then exercises discretion to defer decisions on enforcement action in compliance with their directives and processes.[35] Finally, although DHS understands the commenter's concerns about detained T applicants, it declines to impose processing deadlines on itself given resource needs and shifting priorities.

6. Reinstatement of Removal

Comment: One commenter requested DHS create a presumption that reinstatement of removal would not occur in cases of T, U, and VAWA eligible victims, to avoid victims being removed from the United States.

Response: DHS declines to adopt this recommendation. This comment is partially out of scope, as DHS can make no changes to VAWA or U regulations in this rule because we made no changes to those programs in the interim rule. In addition, relief from removal has been historically requested by the noncitizen and is not initiated by DHS. Operationally, it would take many resources and considerable infrastructure to create a process in which DHS could actively seek out noncitizens with pending T applications, and who have a prior removal order, just to ensure a reinstatement would not be issued. Furthermore, DHS declines to limit ICE's discretion in this manner, but emphasizes that ICE uses a victim-centered approach in which all relevant circumstances are considered.

7. Issuances of Notices To Appear (NTAs)

Comment: Commenters suggest codifying DHS statements from the 2016 Interim Final Rule preamble language regarding not issuing NTAs to individuals with pending applications for T nonimmigrant status.

Response: DHS agrees to adopt this suggestion and has introduced a new provision at 8 CFR 214.204(b)(3) clarifying that USCIS does not have a policy to refer applicants for T nonimmigrant status for removal proceedings absent serious aggravating circumstances, such as the existence of an egregious criminal history, a threat to national security, or where the applicant is complicit in trafficking. Issuing NTAs to survivors of trafficking outside of these circumstances undermines both the humanitarian and law enforcement purposes of the statute. The new provision at 8 CFR 214.204(b)(3) is consistent with several of the Priority Actions outlined in the White House's 2021 National Action Plan to Combat Human Trafficking[36] as well as several objectives laid out in the DHS Strategy.[37]

V. Notification to ICE of Potential Trafficking Victims

8 CFR 214.11(o) (redesignated here as 8 CFR 214.215) addresses the duty of USCIS employees who encounter potential victims of trafficking to consult with the appropriate ICE officials to initiate law enforcement investigation and assistance to victims.

Comment: Commenters requested that DHS reconsider whether USCIS employees should be making referrals to consult with ICE officials. They wrote

[34] U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, ''How to Make an Expedite Request,'' *https://www.uscis.gov/forms/filing-guidance/how-to-make-an-expedite-request* (last updated Oct. 20, 2022).

[35] *See* ''ICE Directive 11005.3,'' *https://www.ice.gov/doclib/news/releases/2021/11005.3.pdf.*

[36] ''National Action Plan,'' *https://www.whitehouse.gov/wp-content/uploads/2021/12/National-Action-Plan-to-Combat-Human-Trafficking.pdf.* In particular, this aligns with ''Priority Action 2.2.2: Provide human trafficking victims protection from removal'' and ''Priority Action 2.3.2: Provide immigration protections to ensure eligible victims are not removed.''

[37] ''DHS Strategy,'' *https://www.dhs.gov/sites/default/files/publications/20_0115_plcy_human-trafficking-forced-labor-child-exploit-strategy.pdf.* Specifically, the new regulation is consistent with the priority actions ''Develop Victim-Centered Policies and Procedures for DHS Personnel'' and ''Improve Coordination of Immigration Options for Victims of Human Trafficking.''

that interaction with ICE may put trafficking survivors at risk for criminal liability and potential deportation and that these interactions may harm applicants eligible for the trauma exception or who do not feel comfortable cooperating with LEAs. Commenters suggested instead that USCIS employees should advise potential victims of their possible immigration remedies and provide a referral to the National Human Trafficking Hotline. Some commenters suggested that such a referral would defeat the purpose of the confidentiality protections at 8 U.S.C. 1367. They wrote that USCIS should be especially cautious of such consultations when the potential victim is represented by an attorney or receiving services from a social services agency and recommended that DHS revise the provision to require USCIS to consider such information when consulting with ICE officials.

Response: DHS appreciates concerns about the protection of vulnerable applicants and the potential consequences of LEA intervention, including concerns that represented individuals and those receiving social services may have made an informed decision with regard to reporting to law enforcement in light of the trauma exception; however, referrals to ICE's Homeland Security Investigations (HSI) are important given the role they play in combating criminal organizations that commit human rights violations, including human trafficking. HSI is victim-oriented, has extensive experience handling trafficking cases with sensitivity, and employs victim assistance specialists that work directly with individuals who have experienced trafficking. Sharing information between USCIS and ICE under these circumstances is permitted under 8 U.S.C. 1367 because the referral is within DHS for legitimate Department purposes, including coordination on Continued Presence and expedite requests. Nevertheless, in consideration of these comments, DHS has revised 8 CFR 214.215 to state that USCIS ''may'' consult, rather than ''should'' consult with ICE.

USCIS exercises caution whenever it shares information protected under 8 U.S.C. 1367 with ICE HSI, and evaluates all relevant circumstances in deciding whether to share such information, including whether there is a legitimate Department purpose for sharing. ICE HSI is equally bound by the confidentiality protections of 8 U.S.C. 1367(a)(2), including whether a person is represented by an attorney or accredited representative.

W. Fees

Comment: Commenters stated that T visa applicants incur significant fees in filing related forms and that access to fee waivers is crucial. Some commenters noted that detained trafficking survivors do not have funds to pay filing fees or provide documentation of their financial circumstances. They asked DHS to simplify and streamline the fee waiver request process and consider ''any credible evidence'' in adjudicating fee waiver requests. Other commenters requested that DHS extend the fee exemption to all ancillary applications related to the application for T nonimmigrant status to include motions and appeals. A few commenters noted that DHS has eliminated many of the fees associated with applying for T nonimmigrant status in recognition of the challenges victims of a severe form of trafficking in persons and their family members may face in bearing these costs. Commenters asked that DHS extend the fee exemptions to applications for employment authorization filed by eligible family members in 8 CFR 214.11(k)(10) (redesignated here as 8 CFR 214.211(i)(3)). They proposed that, at a minimum, the rule clarify that family members seeking employment authorization can submit fee waiver requests instead of associated fees. Other commenters requested DHS require that all fee waiver requests be processed within 30 days of receipt.

Response: DHS recognizes the challenges faced by trafficking victims and their family members, including the costs of submitting applications associated with T nonimmigrant status. DHS appreciates the importance of the fee waiver process and takes note of the commenters' concerns. On January 31, 2024, USCIS published a Final Rule (Fee Rule) to adjust certain immigration and naturalization benefit request fees.[38] That rule codified 8 CFR 106.3(b)(2) which exempts persons seeking or granted T nonimmigrant status from the fees for several different USCIS forms. As a result, T nonimmigrants, T nonimmigrant applicants, and their derivatives will generally pay no USCIS fees until they apply for naturalization, at which time they may request a fee waiver or a reduced fee.

Comment: Commenters also requested a presumption in favor of granting fee waivers submitted in association with a T visa application or if the applicant is detained by DHS, in the absence of specific and exceptional circumstances.

Response: Persons seeking or granted T nonimmigrant status are exempt from paying fees for all related forms through adjustment of status. 8 CFR 106.3(b)(2). As a result, T nonimmigrants, T nonimmigrant applicants, and their derivatives will not be required to request a fee waiver until they file Form N–400, Application for Naturalization.[39]

X. Restrictions on Use and Disclosure of Information Relating to T Nonimmigrant Status

Comment: Commenters expressed support for DHS including the reference at 8 CFR 214.11(p) (redesignated as 8 CFR 214.216) in confidentiality provisions and exceptions that specifically apply to human trafficking survivors under 8 U.S.C. 1367(a)(2) and (b). One commenter acknowledged DHS's rationale for not including the entire list of exceptions to the restrictions included in 8 U.S.C. 1367(b) but requested that DHS add language to the provision that would highlight the exceptions on disclosure for law enforcement or national security purposes. The commenter wrote that including these specific examples would help victims make an informed decision of whether to apply for T nonimmigrant status.

Response: DHS recognizes the importance of ensuring that applicants are fully informed of the consequences of applying for immigration benefits. Nevertheless, DHS may share the information with other Federal, State, and local government agencies and other authorized organizations. *See* 5 U.S.C. 552a. DHS regulations already discuss the reasons an applicant's information may be released. *See* 6 CFR part 5, subpart B. In addition, the Form I–914, Application for T Nonimmigrant Status, Instructions clearly state that the information provided may also be made available as appropriate for law enforcement purposes or in the interest of national security as permitted by 8 U.S.C. 1367. Therefore, DHS made no changes in the final rule in response to this comment.

Comment: One commenter requested DHS add to the regulation that upon denial of an application, USCIS will inform an applicant that their privacy protections are void per 8 U.S.C. 1367 and will state the parties with whom the applicant's information may be shared.

Response: DHS declines to adopt this recommendation because protections

[38] *U.S. Citizenship and Immigration Services Fee Schedule and Changes to Certain Other Immigration Benefit Request Requirements,* 89 FR 6194 (Jan. 31, 2024).

[39] DHS published multiple new fee exemptions for T nonimmigrants as part of a comprehensive adjustment to all USCIS fees. *See, e.g.,* 89 FR 6392.

under 8 U.S.C. 1367(a)(2) only end when ''the application for relief is denied and all opportunities for appeal of the denial have been exhausted.'' 8 U.S.C. 1367(a)(2). Therefore, including such a notification in the denial notice would be premature.

Y. Public Comment and Responses on Statutory and Regulatory Requirements

Comment: Some commenters cited statistics on the number and demographics of trafficked victims within the United States. One commenter cited a survey entitled, ''YES Project; Youth Experiences Survey: Exploring the Sex Trafficking Experiences of Arizona's Homeless and Runaway Young Adults,'' conducted by Arizona State University (ASU) School of Social Work in 2014. The results of the survey found that 25 percent of the 246 homeless youth who were surveyed reported being victims of trafficking. Additionally, the commenter cited that the average age of entry to sex trafficking is 14 years old. Another commenter provided data on the total number of human trafficking victims (20.9 million people) as published in a U.S. News and World Reports opinion editorial.

Response: DHS appreciates the commenters' responses and has reviewed the cited data provided by commenters. Although DHS recognizes that the cited data supports the goals of this rule, DHS cannot confirm or deny the data with reliable accuracy and, therefore, does not use it in its analysis. The sampling frame of the YES Project survey included 246 homeless youth who received services from three Arizona-based young adult serving organizations.[40] Because the survey sampled only a small number of homeless youth and a small number of Arizona youth-based programs, DHS did not feel it was appropriate to make any general conclusions from such data.

Z. Biometrics

Comment: One commenter encouraged USCIS to accept biometrics taken by ICE rather than require a detained applicant to submit their biometrics at a USCIS Application Support Center.

Response: DHS appreciates the commenter's goal of increasing efficiency. USCIS is examining whether it has the legal authority and technical capability to submit to the Federal Bureau of Investigation biometrics collected by a criminal justice agency or from a non-criminal justice agency when the biometrics were collected for a different purpose from USCIS' purpose of use. DHS will continue to explore the feasibility of permitting USCIS to use biometrics collected by ICE for adjudication of applications for T nonimmigrant status from detained individuals, but declines to codify any changes at this time.

AA. Trafficking Screening, Training, and Guidance

1. Screening

Comment: One commenter requested that the regulation require DHS to conduct screening for trafficking victims by all levels of DHS, at each stage of the immigration process; require ICE to screen all detained individuals and provide release on bond or parole for anyone identified as a trafficking victim; and require OPLA attorneys to screen for trafficking both before issuing NTAs as well as for each case they prosecute. The commenter also stated that if an NTA has already been issued, the regulation should require that the ICE attorney immediately notify the court and opposing counsel (or, in absence of counsel, the Respondent), request a continuance or administrative closure, and refer the victim for trafficking support services and investigation.

Response: DHS appreciates the commenter's recommendation regarding screening efforts to protect victims of trafficking. In response to the White House National Action Plan to Combat Human Trafficking, there is a government-wide effort to update screening forms and protocols for all Federal officials who have the potential to encounter a human trafficking victim in the course of their regular duties that do not otherwise pertain to human trafficking. In support of this priority action, DHS co-chairs the interagency working group to document promising practices and identify opportunities to strengthen current efforts to screen for victims of human trafficking.[41] DHS declines to impose anything further via regulation at this time, as DHS believes these actions address the commenter's concerns.

2. Training

Comment: Several commenters requested DHS provide additional resources, support, and training to LEAs to help them understanding the nuances of trafficking. Specifically, they stated that LEAs should be trained to recognize the co-existence of trafficking and domestic violence. The commenters encouraged DHS to release a Law Enforcement Declaration Guide. They also suggested that DOJ's Office on Violence Against Women (OVW) should provide training, not DHS.

Response: DHS is committed to providing training and support to certifying officials and stakeholders on trafficking and the T visa program. As discussed extensively above, DHS acknowledges that domestic violence and trafficking may coexist, and has provided significant guidance in the Policy Manual to reflect this.

On October 20, 2021, USCIS published the first ever standalone T Visa Law Enforcement Resource Guide for certifying officials,[42] which clarifies the role and responsibility of certifying agencies in the T visa program, provides certifying officials with best practices for approaching the T visa certification process, and emphasizes that completing the declaration is consistent with a victim-centered approach. In addition, OVW provides leadership in developing the national capacity to ''reduce violence against women and administer justice for and strengthen services to victims of domestic violence, dating violence, sexual assault, and stalking.'' [43] OVW also supports the provision of training and technical assistance to assist service providers and the anti-trafficking field in ensuring successful for survivors of trafficking.[44]

As DHS is responsible for adjudicating T visas, and encounters trafficking victims in various ways, it is imperative DHS continues to train certifying officials and others about trafficking and the T visa.

3. Guidance

Comment: Several commenters requested DHS issue policy guidance to LEAs on referring potential victims to local nongovernmental organizations for assistance to identify, support, and protect trafficking victims.

Response: DHS already works with local governments and NGOs to assist

[40] Dominique Roe-Sepowitz, and Kristen Bracy, ''YES Project; Youth Experiences Survey: Exploring the Sex Trafficking Experiences of Arizona's Homeless and Runaway Young Adults.'' [44] *See, e.g.,* Office on Violence Against Women, U.S. Dep't of Justice, ''OVW Fiscal Year 2022 Training and Technical Assistance Initiative Solicitation'' (2022), *https://www.justice.gov/ovw/page/file/1484676/download.*

trafficking victims and it is not necessary to address those efforts and guidance in this rule. DHS will consider this comment in future policy-making efforts.

BB. Miscellaneous Comments

1. Cases Involving Multiple Victims

Comment: One commenter requested DHS recognize the complexity and special nature of cases of groups of trafficking victims in an active and ongoing law enforcement investigation. Specifically, the commenter requested DHS create a mechanism to identify cases with multiple victims and to coordinate a streamlined evaluation of these victims' applications.

Response: DHS declines to adopt this recommendation, as each applicant is required to meet their own individual burden of proof, and each case is evaluated based on the evidence presented in that specific application. USCIS adjudicates each case on its own merits and declines to create processes to handle cases as a group. DHS thinks a group application process would be particularly difficult to administer considering the confidentiality protections each member of the group would have as required by 8 U.S.C. 1367.

2. Social Security Cards

Comment: Another commenter requested that DHS revise the Form I–914 and Form I–914, Supplement A, Application for Family Member of T–1 Recipient, to include a checkbox for applicants to indicate they wish to receive a Social Security card, similar to the checkbox for applicants to indicate they wish to receive an Employment Authorization Document (EAD). The commenter stated that it would allow trafficking survivors to obtain their Social Security cards in a more streamlined manner, and this would allow individuals to more easily access important services needed for emotional and financial stability.

Response: DHS acknowledges the concerns of the commenter regarding delays in victims obtaining benefits and appreciates there are significant benefits and efficiencies that could be achieved through this change; however, DHS declines to adopt this recommendation in this final rule. The Social Security Administration (SSA) issues Social Security cards, whereas USCIS issues EADs. Implementing this suggestion would require specific coordination with SSA, as well as updating USCIS systems. At this time, DHS does not have the required infrastructure or resources to adopt this recommendation. Moreover, rulemaking would not be required to implement this recommendation when the capabilities are in place. Therefore, DHS will keep this suggestion under consideration for possible, future form revision efforts and interagency coordination.

3. Victim-Blaming

Comment: One commenter stated that USCIS routinely blames the victim and says in RFE and denial notices that individuals who knowingly undertook the dangerous journey to the United States should have expected to experience forced labor or rape. The commenter wrote that blaming the victim should not be allowed by regulation and this language should be prohibited from RFEs.

Response: DHS appreciates the commenter's concern and has taken these comments into consideration. DHS has implemented a victim-centered approach, which is evident in the language of the regulation. Moreover, adjudicators are specifically trained to write RFEs in a manner that does not revictimize applicants. Officers regularly receive supervisory guidance. USCIS conducts ongoing training to adjudicators, and routinely evaluates trends that may require additional training or recalibration of procedures. As part of this rulemaking, USCIS is also updating related policy guidance on issuance of RFEs and the victim-centered approach. However, DHS declines to adopt the recommendation of including specific language in the regulation about what should be included in RFEs. General guidelines on the contents of official correspondence are more appropriately suited for policy guidance, and DHS feels that prohibiting specific language could unnecessarily restrict discretion to address case-specific circumstances.

4. Processing Times

Comment: One commenter stated that the new regulations should indicate that any case pending for more than 90 days should be considered to be outside an acceptable processing time, to allow attorneys to sue USCIS more easily when it unnecessarily delays adjudication of T visas. The commenter wrote that survivors need status and adjudication quickly.

Response: DHS understands and is sympathetic to the commenter's concern about survivors receiving status as quickly as possible and their frustrations with processing times but declines to implement an ''acceptable processing time'' due to various factors, including USCIS resource constraints. Each case presents a different set of facts that require highly technical analysis, and processing times may differ between cases. Some cases, due to circumstances outside of DHS's control, may not be able to be adjudicated within such a prescribed timeframe. DHS also notes the new BFD provisions address this concern, as their goal is to help stabilize bona fide applicants faster.

5. Motions To Reopen and Reconsider

Comment: One commenter stated that there is a lack of clarity in the regulations as to whether a Motion to Reopen and Reconsider filed by a T visa principal extends to their derivatives' applications. The commenter stated that their clients who were derivatives received NTAs related to denied T visa applications, although the associated T principal applicant had submitted a timely Motion to Reopen and Reconsider. This would indicate that a separate Motion to Reopen and Reconsider should be filed for each individual derivative application, despite the fact that this would be duplicative, and the T–1 application is the decisive factor in the adjudication of the derivative applications. The commenter recommended revising the regulation to state that a denial would not become final for the applicant or their derivatives until the administrative appeal is decided.

Response: DHS declines to adopt this recommendation. Each denied application, Forms I–914 and I–914A, requires a separately filed Form I–290B, Notice of Appeal or Motion as a Form I–290B cannot be filed for multiple receipts or filings. DHS emphasizes that in cases where an appeal of a T–1 application denial has been filed, the case is considered to remain administratively pending until a decision on appeal is made. If an applicant files an appeal for a denied Form I–914A, then that application would also be considered administratively pending until a final decision is rendered by the Administrative Appeals Office (AAO). A decision on appeal is then considered to be administratively final even if a subsequent motion is filed. 8 CFR 214.11(d)(10) (redesignated as 8 CFR 214.204(q)). In this case, an administratively final decision occurs when the AAO issues a decision affirming the denial of the Form I–914. The filing of an appeal of the Form I–914 denial would affect its own administratively pending status and not automatically place any denied Form I–914As in a pending status.

6. HHS Notification

Comment: Other commenters requested that USCIS notify HHS of any applicant on the waiting list.

Response: DHS declines to adopt this recommendation. Such inter-agency communications are generally not appropriate to be mandated in the Code of Federal Regulations. In addition, given the confidentiality protections and sensitive nature of T applications, DHS wishes to avoid mandating any communications that are not required by statute.

7. Program Integrity

Comment: One commenter expressed concern about oversight in the T visa program. They expressed concern that victims could cause harm to themselves and American society. The commenter wondered about vetting and expressed concern about exploitation of loopholes. The commenter also stated that Americans should be receiving the same type of or superior benefits first.

Response: DHS acknowledges the commenter's concerns; however, DHS implements the T visa program as authorized by Congress. Adjudicators evaluate each application on its own merits. DHS remains committed to the fair and just adjudication of all immigration benefit requests. At the same time, DHS vets all immigration benefit requests to ensure they are granted only to those who have established eligibility. This requires DHS to ensure that applicants do not obtain benefits for which they are not eligible under the law.

8. Annual Cap

Commenter: One commenter stated that the annual cap on T visas is inconsistent with Congress' intent when creating T nonimmigrant status relief. They stated DHS should provide comprehensive data about T visa application trends, and other information as necessary, to support any Congressional efforts to eliminate the T visa cap.

Response: DHS provides comprehensive data on the characteristics of T visa applications, and regularly posts quarterly updates on the number of applications received, approved, denied, and pending by fiscal year.[45] In addition, DHS is responsive to Congressional and stakeholder inquiries on T visa filing trends, including questions and concerns about the cap.

9. Continued Presence Adjudication

Comment: Another commenter encouraged DHS to ensure Continued Presence (CP) benefits are not arbitrarily adjudicated or delayed. They suggested DHS create regulations on CP that: direct DHS to grant CP within 60 days of receiving a credible report of human trafficking; detail a uniform, fair, and timely process for granting or denying CP, with a focus on providing the maximum protections envisioned by Congress; and to the extent possible under legislation, allow DHS to receive CP requests from any law enforcement agency.

Response: DHS appreciates the commenter's concerns but declines to address them in this rulemaking effort, particularly because CP was not included in the IFR. The CCHT, which processes all requests for CP, implements a victim-centered approach. DHS declines to impose a deadline on adjudicating CP, given shifting priorities and resource allocations. CP may already be requested by any LEA with the authority to investigate or prosecute human trafficking, including local law enforcement.[46]

10. Comment Period

Comment: One commenter requested that DHS and other agencies allow 60 days for comment on proposed regulations. The commenter also requested that DHS establish a regular schedule for updating regulations when statutory changes are made in order to reflect legislative changes.

Response: DHS generally publishes proposed rules for 60 days of public comments as provided in section 6.(a)(1) of Executive Order 12866, Regulatory Planning and Review, unless exigent circumstances justify a 30-day comment period as permitted by 5 U.S.C. 553. DHS also published regulations as soon as practicable after new legislation is passed that requires a change in the applicable regulations. This comment requires no change to the final rule.

CC. Out of Scope Comments

Several comments were submitted that did not relate to the substance of the Final Rule. One commenter provided a list of general criticisms of USCIS in general and its administration of the T nonimmigrant program as follows:

- USCIS generally ignores expedite requests.
- USCIS regularly dismisses labor trafficking, particularly of men, as ''mere exploitation'' without defining what the difference between that and trafficking may be.
- USCIS uses boilerplate RFEs and denial letters that are victim blaming and dismissive of the survivor's experience.
- USCIS denial notices have stated that less weight would be given where an individual initiated therapy after issuance of an RFE, even though USCIS made it very difficult for a person to be able to pay for therapy, by refusing to review prima facie/bona fides and issue a determination that could help the person access services. The commenter wrote that this blames the victim for something outside their control.

Response: DHS acknowledges the commenter's feedback but notes that their suggestions are not about and do not affect the substantive content of this rulemaking. DHS makes no changes to the final rule in response to these comments.

IV. Statutory and Regulatory Requirements

A. Executive Orders 12866, 13563, and 14094

Executive Orders 12866 (Regulatory Planning and Review), as amended by Executive Order 14094 (Modernizing Regulatory Review), and 13563 (Improving Regulation and Regulatory Review) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying costs and benefits, reducing costs, harmonizing rules, and promoting flexibility.

The Office of Management and Budget (OMB) has designated this rule a ''significant regulatory action'' as defined under section 3(f) of E.O. 12866, as amended by Executive Order 14094, but it is not significant under section 3(f)(1) because its annual effects on the economy do not exceed $200 million in

any year of the analysis. Accordingly, OMB has reviewed this rule.

1. Summary

As discussed further in the preamble, this final rule adopts the changes from the 2016 interim rule with some modifications. The rationale for the 2016 interim rule and the reasoning provided in the preamble to the 2016 interim rule remain valid with respect to these regulatory amendments, therefore, DHS adopts such reasoning to support this final rule. In response to the public comments received on the 2016 interim rule, DHS has modified some provisions for the final rule. DHS has also made some technical changes in the final rule.

This final rule clarifies some definitions and amends provisions regarding bona fide determinations (BFD) to implement a new process. This final rule also clarifies evidentiary requirements for hardship, codifies the evidentiary standard, and codifies the standard of proof that applies to the adjudication of an application for T nonimmigrant status. DHS also made technical changes to the organization and terminology of 8 CFR part 214.

For the 10-year period of analysis of the rule using the post-IFR baseline of the rule, DHS estimates the annualized costs of this rule will be $807,314 annualized at 3- and 7 percent. Table 1 provides a more detailed summary of the final rule provisions and their impacts.

BILLING CODE 9111–97–P

Table 1. Summary of Provisions and Impacts of the Final Rule Using the Post-IFR Baseline			
Final Rule Provisions	Description of Change to Provision	Estimated Costs of Provisions	Estimated Benefits of Provisions
• Bona Fide Determination (BFD) Process Modifications.	• The new streamlined process will include case review and background checks. • Once an individual whose application has been deemed bona fide files a Form I-765, Application for Employment Authorization, DHS will consider whether the applicant warrants a favorable exercise of discretion and will be granted deferred action and a BFD employment authorization document.	Quantitative: Applicants - • None. • DHS estimates the additional cost for completing and filing Form I-765 will be $807,314 annually. DHS/USCIS - • None. Qualitative: Applicants – • None. DHS/USCIS – • DHS may incur additional costs due to the time to review evidence; however, DHS cannot estimate how many applications would take any additional time.	Quantitative: Applicants - • None. DHS/USCIS - • None. Qualitative: Applicants – • The primary benefits of this provision to applicants are the opportunity to receive work authorization sooner and the ability to receive forbearance from removal (deferred action) while the T visa application is pending. Likewise, applicants with a final order of removal will receive a stay of removal more quickly. DHS/USCIS – • The benefit of this provision is that it prioritizes efficient T visa BFD review, protects the integrity of the BFD review by requiring review of initial required evidence and assessment of routine background checks.
• Clarifications to eligibility requirements.	• DHS is also clarifying the eligibility requirements that apply to the adjudication of an application for a T visa.	Quantitative: Applicants - • None. DHS/USCIS - • None. Qualitative: Applicants – Based on the additional clarifications regarding eligibility requirements for T	Quantitative: Applicants - • None. DHS/USCIS - • None. Qualitative: Applicants – • None. DHS/USCIS –

		nonimmigrant status, USCIS estimates that there will be a reduction in Requests for Evidence (RFEs). This reduction will save the applicant time and will allow for their application to be adjudicated earlier. DHS/USCIS – • None.	• USCIS estimates that there will be a reduction in RFEs, because applicants will be aware of the evidentiary requirements from the outset, resulting in a decrease in time per adjudication.
• Technical Changes, Clarifying Definitions, and other Qualitative Impacts in this Final Rule.	• This rule moves the regulations for T nonimmigrant status to a separate subpart of 8 CFR part 214 to reduce the length and density of part 214, while making it easier to locate specific provisions. • In addition to the re-numbering and re-designating of paragraphs, the rule has reorganized and modified some sections to improve readability, such as in new sections.	Quantitative: Applicants - • None. DHS/USCIS - • None. Qualitative: Applicants – • None. DHS/USCIS – • None.	Quantitative: Applicants - • None. DHS/USCIS - • None. Qualitative: Applicants – • The benefit of these changes is to make the application process clearer for T visa applicants. DHS/USCIS – • None.

In addition to the impacts summarized above, and as required by OMB Circular A–4, Table 2 presents the prepared accounting statement showing the costs and benefits to each individual affected by this final rule using the post-IFR baseline.[47]

[47] Office of Mgmt. & Budget, Exec. Office of the President, ''OMB Circular A–4'' (2003), *https://www.whitehouse.gov/wp-content/uploads/legacy_drupal_files/omb/circulars/A4/a-4.pdf.*

BILLING CODE 9111–97–C

2. Background and Population

As stated in the 2016 interim final rule, Congress created T nonimmigrant status in the Trafficking Victims Protection Act (TVPA) of 2000. T nonimmigrant status is available to victims of a severe form of trafficking in persons who comply with any reasonable request for assistance from law enforcement agencies (LEAs) in investigating or prosecuting the perpetrators of these crimes and who meet other requirements. T nonimmigrant status provides temporary immigration benefits (nonimmigrant status and employment authorization) and the ability to adjust to lawful permanent resident status, provided that established criteria are met, and a favorable exercise of discretion is warranted. Additionally, if a victim of a severe form of trafficking in persons obtains T nonimmigrant status, then certain eligible family members may also obtain T nonimmigrant status.[49]

Table 4 provides the number of T nonimmigrant application receipts, approvals, and denials for principals and derivative family members for FY 2017 through FY 2022. Although the maximum annual number of T nonimmigrant visas that may be granted is 5,000 for T–1 principal applicants per fiscal year[50] Table 4 shows that based on a 6-year annual average, DHS receives 2,889 Form I–914 applications (both Form I–914 and I–914 Supplement A) per year.

Table 4. USCIS Processing Statistics for Form I-914[1] and Form I-914 Supplement A FY 2017 through FY 2022.

	VICTIMS (T-1), Form I-914			**FAMILY OF VICTIMS (T-2 through T-6), Form I-914A**			**Form I-914 and Form I-914A TOTALS**

Notes:

[1]Approved and denied volumes may not add up to the receipts in a given fiscal year because the processing and final adjudication decision for T nonimmigrant status applications may overlap fiscal years, due to backlogs. USCIS records indicate that processing an application for T nonimmigrant status requires an estimated 6 to 9 months. Data source for the table: Performance Analysis System (PAS), USCIS Office of Performance and Quality (OPQ), Data Analysis and Reporting Branch (DARB), March 2023& USCIS Analysis.

Table 5 shows the number of receipts received with and without Form G–28, FY 2017 through FY 2022. Based on a 6-year annual average, DHS estimates the annual average receipts to be 2,909 and the annual average number of Form G–28 receipts to be 2,673. Based on these figures, DHS estimates that 92 percent of Form I–914 receipts are filed by applicants represented by an attorney or accredited representative. The data in table 4 and table 5 differ due to the dates the data were pulled and the different systems from which they were pulled. Both data sources are accurate; however, they use different criteria/assumptions to extract the results from USCIS sources. Estimates in table 4 are based

[49] The current T nonimmigrant categories are T–1 (principal applicant), T–2 (spouse), T–3 (child), T–4 (parent), T–5 (unmarried sibling under 18 years of age); and T–6 (adult or minor child of a principal's derivative beneficiary).

[50] There is no statutory cap for grants of derivative T nonimmigrant status or visas.

on vintage data while results in table 5 continue to fluctuate in real-time, sometimes even in prior fiscal years, as updates are made in the administrative data.

Table 5. Total Form I-914 and Form I-914 Supplement A Receipts with and without Form G-28, FY 2017 through FY 2022.

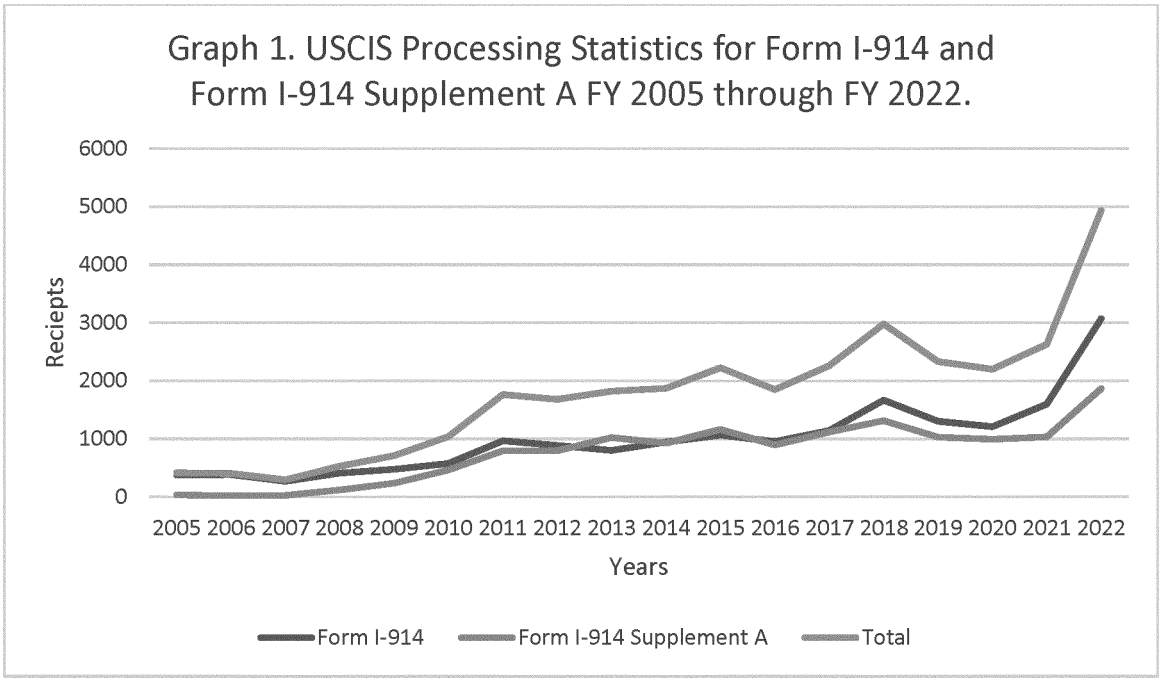
FY	Form G-28 Receipts Received without a Form I-914 and Form I-914 Supplement A	Form G-28 Receipts Received with a Form I-914 and Form I-914 Supplement A	Total Form I-914 and Form I-914 Supplement A Receipts	Percentage of Forms I-914 and Form I-914 Supplement A filed with Form G-28
2017	191	2,128	2,319	92%
2018	415	2,516	2,931	86%
2019	164	2,101	2,265	93%
2020	135	2,010	2,145	94%
2021	166	2,617	2,783	94%
2022	343	4,667	5,010	93%
6-year Total	**1,414**	**16,039**	**17,453**	**92%**
6-year Annual Average	**236**	**2,673**	**2,909**	**92%**

Source: USCIS, Office of Policy and Strategy (OP&S), Policy Research Division (PRD), Claims 3 database. May 31, 2023 & USCIS Analysis.

DHS acknowledges that there was a significant increase in receipts in FY 2022 as shown in table 4 and table 5. While there was a sharp increase in this single year, DHS could not build a forecast solely based on the increase during a single year. This analysis uses a 6-year annual average as an estimate to calculate the total costs of this rule.

As Graph 1 shows, since FY 2005 there has been a gradual increase in receipts until FY 2022. On October 20, 2021, USCIS added comprehensive policy guidance on T visas to its Policy Manual.[51] The goal of the Policy Manual Update was to provide consolidated guidance as to how USCIS approaches T visa adjudication and interprets eligibility criteria. The Policy Manual offers more comprehensive guidance than previous USCIS policy sources and provides interpretation and examples of previously undefined terms and concepts. This will hopefully assist practitioners better identify trafficking survivors who are eligible for a T visa. This could be one possible reason that there were increased receipts in FY 2022.

[51] U.S. Citizenship and Immigr. Servs., U.S. Dep't of Homeland Security, PA–2021–22 Policy Alert, ''T Nonimmigrant Status for Victims of Severe Forms of Trafficking in Persons'' (Oct. 20, 2021), *https://www.uscis.gov/sites/default/files/document/policy-manual-updates/20211020-VictimsOfTrafficking.pdf.*



3. Updates to the Economic Analysis Since the 2016 Interim Rule, Pre-IFR Baseline

In this final rule, DHS has updated several definitions to provide clarity and ensure consistency with the Trafficking Victims Protection Act (TVPA) of 2000. DHS has amended provisions regarding bona fide determinations (BFD), which reflect a modified process. This process will now allow applicants for T nonimmigrant status to file a Form I–765, Application for Employment Authorization, concurrently with their Form I–914.

DHS also codified the evidentiary standard and standard of proof that apply to the adjudication of a T visa application. For T nonimmigrants, this rule retains the standard that applicants may submit any credible evidence relating to their T visa applications for USCIS to consider. This is presented as a qualitative benefit to both USCIS and T nonimmigrant applicants.

The pre-IFR baseline is shown below with zero costs to the government or to the applicants. Because the pre-IFR baseline is identical to the post-IFR baseline, consistent with table 7, it is not useful to do a complete pre-IFR baseline and the analysis will focus on the post-IFR baseline.

Congress created the T nonimmigrant status in the TVPA of 2000. The TVPA provides various means to combat trafficking in persons, including tools for LEAs to effectively investigate and prosecute perpetrators of trafficking in persons. The TVPA also provides protection to victims of trafficking through immigration relief and access to Federal public benefits. DHS published an interim final rule on January 31, 2002, implementing the T nonimmigrant status and the provisions put forth by the TVPA 2000.[52] The 2002 interim final rule established the eligibility criteria, application process, evidentiary standards, and benefits associated with obtaining T nonimmigrant status.

T nonimmigrant status is available to eligible victims of severe forms of trafficking in persons who comply with any reasonable request for assistance from LEAs in investigating and prosecuting the perpetrators of these crimes or otherwise meet the statutory criteria. T nonimmigrant status provides temporary immigration benefits (nonimmigrant status and employment authorization) and a pathway to permanent resident status, provided that established criteria are met. Additionally, if a victim obtains T nonimmigrant status, certain eligible family members may also apply to obtain T nonimmigrant status.[53]

[52] *See* 67 FR 4784.

[53] The current T nonimmigrant categories are: T–1 (principal applicant), T–2 (spouse), T–3 (child), T–4 (parent), and T–5 (unmarried sibling under 18 years of age). The interim rule created a new T nonimmigrant category, T–6 (adult or minor child of a principal's derivative).

Table 6. USCIS Processing Statistics for Form I-914[1] and Form I-914 Supplement A FY 2005 through FY 2016.

	VICTIMS (T-1), Form I-914			FAMILY OF VICTIMS (T-2 through T-6), Form I-914 Supplement A			Form I-914 and Form I-914 Supplement A TOTALS		
FY	Receipts	Approved	Denied	Receipts	Approved	Denied	Receipts	Approved	Denied
2005	379	113	321	34	73	21	413	186	342
2006	384	212	127	19	95	45	403	307	172
2007	269	287	106	24	257	64	293	544	170
2008	408	243	78	118	228	40	526	471	118
2009	475	313	77	235	273	54	710	586	131
2010	574	447	138	463	349	105	1,037	796	243
2011	967	557	223	795	722	137	1,762	1,279	360
2012	885	674	194	795	758	117	1,680	1,432	311
2013	799	848	104	1,021	975	91	1,820	1,823	195
2014	944	613	153	925	788	105	1,869	1,401	258
2015	1,062	610	294	1,162	694	192	2,224	1,304	486
2016	953	750	194	895	986	163	1,848	1,736	357

Notes: Approved and denied volumes may not add up to the receipts in a given fiscal year because the processing and final decision for T nonimmigrant status applications may overlap fiscal years. USCIS records indicate that processing an application for T nonimmigrant status requires an estimated 6 to 9 months. Data for T-6 applications has been collected since January 2014 and is included in FY 2014 – FY 2016.

Data source for the table: Performance Analysis System (PAS), USCIS Office of Performance and Quality (OPQ), Data Analysis and Reporting Branch (DARB).

Table 6 provides the number of T nonimmigrant application receipts, approvals, and denials for principal victims and derivative family members for FY2005 through FY2016. The maximum annual number of T nonimmigrant visas that may be granted is 5,000 for T–1 principal applicants per fiscal year.

From the publication of the interim final rule in 2002 through 2016, Congress passed various statutes amending the original TVPA 2000. These include: the Trafficking Victims Protection Reauthorization Act of 2003 (TVPRA 2003), the Violence Against Women and Department of Justice Reauthorization Act of 2005 (VAWA 2005), the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008 (TVPRA 2008), and the Violence Against Women Reauthorization Act of 2013 (VAWA 2013). After the passage of each of the statutes, as noted in section I.A.1 of this preamble, USCIS issued policy and guidance memoranda to both implement the provisions of the Acts and to ensure compliance with the legal requirements of the Acts.[54]

The 2016 interim final rule codified DHS policy and guidance from these statutes into the Code of Federal Regulations (CFR). The statutory changes from TVPRA 2003, TVPRA 2008, and VAWA 2005 are reflected in table 7, below. Codifying existing USCIS policy and guidance ensures that the regulations are consistent with the applicable legislation, and that the general public has access to these policies through the CFR without locating and reviewing multiple policy memoranda. DHS provides the impact of these provisions in table 7 assuming a pre-IFR baseline per OMB Circular A–4 requirements.

Table 7. Summary of Impacts to the Regulated Population of TVPRA 2003, TVPRA 2008 and VAWA 2005 Statutory Changes Codified by this Interim Rule

Provision	Current policy	Expected cost of the interim rule	Expected benefit of the interim rule	Actual Outcome of Changes
Expanding the definition and discussion of LEA (added by VAWA 2005)	LEA includes State and local law enforcement agencies	None	Provides clarity and consistency in DHS practice with DHS regulations will lead to a qualitative benefit providing transparency to both the victims of trafficking and USCIS adjudicators.	There were no costs associated with this change. This provision provided clarity to the victims and adjudicators.
Removing the requirement that eligible family members must face extreme hardship if the family member is not admitted to the United States or was removed from the United States (removed by VAWA 2005)	Family members may be eligible for T nonimmigrant status without having to show extreme hardship	No additional costs, other than the opportunity cost of time to file Form I-914 Supplement A. However, DHS reiterates that this is a voluntary provision	Provides a broader definition of an eligible family member and may increase the number of eligible family members.	There were no costs associated with this change. This provision provided increased the number of eligible family members.
Raising the age at which the applicant must comply with any reasonable request by an LEA for assistance in an investigation or prosecution of acts of trafficking in persons (added by TVPRA 2003)	The provision increased the minimum age requirement from 15 years to 18 years of age	None	Provides a benefit by acknowledging the significance of an applicant's maturity in understanding the importance of participating with an LEA.	There were no costs associated with this change.

Exempting T nonimmigrant applicants from the public charge ground of inadmissibility (added by TVPRA 2003)	DHS may grant T nonimmigrant status to applicants even if they are likely to become a public charge	No additional costs, other than the opportunity cost of time to file Form I-914 and if necessary, Supplement B	Victims who are likely to become a public charge are able to apply for T nonimmigrant status and receive the benefits associated with that status.	There were no costs associated with this change. This provision allowed victims who were likely to become a public charge
Exemptions to an applicant's requirement, to comply with any reasonable request by an LEA (added by TVPRA 2008)	Applicants are exempt from the requirement to comply with any reasonable request by an LEA in cases where the applicant is unable to comply, due to physical or psychological trauma	None	Provides a benefit by acknowledging the significance of an applicant's mental capacity in understanding the importance of participating with an LEA.	There were no costs associated with this change.
Limiting duration of T nonimmigrant status but providing extensions for LEA need, for exceptional circumstances, and for the pendency of an application for adjustment of status (VAWA 2005 and TVPRA 2008)	Extends the duration of T nonimmigrant status from 3 years to 4 years, but limits the status to 4 years unless an applicant can qualify for an extension	None	Provides T nonimmigrants status for an additional year with the possibility of extension.	There were no costs associated with this change.
Expanding the regulatory definition of physical presence on account of trafficking (added by TVPRA 2008)	DHS will consider victims as having met the physical presence requirement if they were allowed entry into the United States for participation in investigative or judicial processes associated with an act or perpetrator trafficking for purposes of eligibility for T nonimmigrant classification	None	Provides a broader definition of physical presence on account of trafficking and may increase the number of eligible applicants.	There were no costs associated with this change. This provision allowed more applicants to be eligible.

Allowing principal applicants under 21 years of age to apply for derivative T nonimmigrant status for unmarried siblings under 18 years and parents as eligible derivative family members (added by TVPRA 2003)	Unmarried siblings under 18 years of age and parents of the principal applicant may now be eligible for T nonimmigrant status under the T-4 and T-5 derivative category, if the principal applicant is under age 21	No additional costs, other than the opportunity cost of time to file Form I-914 Supplement A on behalf of the principal's unmarried siblings under 18 years of age and parents	Provides a broader definition of eligible family member and may increase the number of eligible family members.	There were no costs associated with this change. This provision allowed more family members to be eligible.
Providing age-out protection for child principal applicants to apply for eligible family members (added by TVPRA 2003)	A principal applicant who was under 21 years of age at the time of filing the Form I-914 can file Form I-914 Supplement A on behalf of eligible family members, including parents and unmarried siblings under age 18, even if the principal alien turns 21 years of age before the principal T-1 application is adjudicated	None	Provides a qualitative benefit by removing an age-out restriction, allowing principal applicants to apply for parents and unmarried siblings under age 18, even if the principal applicant turns 21 years of age before the T-1 application is adjudicated.	There were no costs associated with this change. This provision allowed more applicants to be eligible.
Providing age-out protection for child derivatives (added by TVPRA 2003)	An unmarried child of the principal who was under age 21 on the date the principal applied for T-1 nonimmigrant status may continue to qualify as an eligible family member, even if he or she reaches age 21 while the T-1 application is pending	None	Provides a qualitative benefit by removing an age-out restriction, allowing a principal applicant parent to apply for a child as a derivative beneficiary, even if the child reaches age 21 while the principal's T-1 application is pending.	There were no costs associated with this change. This provision allowed more applicants to be eligible.

Allowing principal applicants of any age to apply for derivative T nonimmigrant status for unmarried siblings under 18 years of age and parents as eligible family members if the family member faces a present danger of retaliation as a result of the principal applicant's escape from a severe form of trafficking or cooperation with law enforcement (added by TVPRA 2008)	Allows any principal applicant, regardless of age, to apply for derivative T nonimmigrant status for parents or unmarried siblings under 18 years of age if they face a present danger of retaliation	No additional costs, other than the opportunity cost of time to file Form I-914 Supplement A, on behalf of the derivative's unmarried siblings under 18 years of age and parents	If eligible, unmarried siblings under 18 years of age and parents of principal applicants may qualify for T-4 and T-5 nonimmigrant status and obtain the immigration benefits that accompany that status. In addition, LEAs may benefit if more victims come forward to report trafficking crimes.	There were no costs associated with this change. This provision allowed more applicants to be eligible.
Care and custody of unaccompanied children with the HHS (added by TVPRA 2008)	Federal agencies must notify HHS upon apprehension or discovery of an unaccompanied child or any claim or suspicion that an individual in custody is under 18 years of age. Minors are eligible to receive federally funded benefits and services as soon as they are identified by HHS as a possible victim of trafficking	DHS may have some additional administrative costs associated with informing HHS of unaccompanied children. As a result, HHS may have some additional costs in providing benefits and services to the affected minors	Provides a qualitative benefit by enabling the health and well-being of a minor victimized by trafficking. These victims also obtain federally funded benefits and services.	There were no costs recorded with this change.

BILLING CODE 9111–97–C

In calculating the additional costs of the increased time burden to Form I–765, DHS uses updated wage and fiscal year data. Wages were updated according to the occupational data released by the Bureau of Labor Statistics (BLS). The 2016 interim rule used 2015 BLS data, and now more current data is available from 2022. The 2016 interim rule used fiscal year filing data from FY 2005 through FY 2015, and DHS has updated this analysis by using filing data from FY 2017 through FY 2022.

DHS is increasing the time burden for Form I–765 by 4 minutes from 4 hours and 30 minutes (4.5 hours) per response to 4 hours and 34 minutes (4.56 hours) to reflect the current Form I–765 estimated time burden. DHS is clarifying the Form I–765 instructions, increasing the time burden of the form, which includes the time for reviewing instructions, gathering the required documentation, and completing and submitting the request.

4. Costs, and Benefits of the Final Rule

(a) Bona Fide Determination Process

Although an extensive BFD process was codified in the 2016 IFR, such a process has not been consistently implemented in the last decade outside of litigation cases due to resource constraints. After this rule takes effect, on a routine basis USCIS will review an applicant's filing for completeness and conduct background checks to determine if the application is bona fide. If an applicant has not already filed a Form I–765, they will be notified that they may do so. Adjudicators will then consider whether an applicant warrants deferred action as a matter of discretion. This process will benefit the applicants with bona fide filings, as they will be invited to apply for an EAD when they receive their bona fide determination letter. Applicants may also choose to apply for an EAD at the same time they submit their Form I–914. USCIS plans to implement a process concurrently with this rule (*see* new 8 CFR 214.205 on the Bona Fide Determination Process) taking effect under which future applicants may file Form I–765 at the same time as their Form I–914. This will benefit the applicants because they will be more likely to apply for an EAD simultaneously and therefore be eligible to work sooner than they would have previously. This concurrent Form I–765 policy could be paused if, in the future, USCIS is able to process Form I–914 from intake to approval within a time frame that obviates the need for employment while the application is being adjudicated.

USCIS estimates that 100 percent of applicants will file Form I–765 concurrently with their Form I–914, so they may receive employment authorization quickly if USCIS determines that their T visa application is bona fide, that they warrant a favorable exercise of discretion to be granted deferred action, and that they warrant a discretionary grant of employment authorization, rather than waiting for USCIS to make a bona fide determination and inviting them to submit a Form I–765. DHS does not expect material impacts to the U.S. labor market from this final rule. DHS believes these impacts would accrue as benefits to the T visa applicants who apply for an EAD and their families.

Table 8 shows that the average adjudication timeframe from FY 2017 through 2022 was around 458 days from the time an applicant submits their T visa application, to the time they receive a final decision. The goal of this rule is that all applicants will apply for their BFD-based EAD at the same time they apply for their T visa. This will allow the applicants with bona fide filings to begin working earlier than they would have previously. DHS uses the 6-year annual average because it typically takes 1.25 years [55] for an adjudicative decision.[56]

Table 8. Average Number of Days for Form I-914 Application to Notice of Decision of Approval or Denial, FY 2017 through FY 2022.

FY	Form I-914	Form I-914A	Average
2017	430	457	444
2018	625	615	620
2019	547	498	523
2020	359	309	334
2021	486	514	500
2022	303	347	325
6-year Total	**2,750**	**2,740**	**2,746**
6-year Annual Average	**458**	**457**	**458**

Source: USCIS, Office of Policy and Strategy (OP&S), Policy Research Division (PRD), Claims 3 database. June 07, 2023 & USCIS Analysis.

This new process would not add a large cost to the government because the process has been in place since 2002, when USCIS began adjudicating Form I–914. However, this change could add additional time to review cases. DHS cannot estimate how many additional applications would take additional time to review. DHS anticipates any particular case requiring additional time should not take more than an additional 15 to 30 minutes. This additional time will be a cost to USCIS.

As a part of the BFD process, if the statutory cap prevents further grants of T–1 nonimmigrant status, all BFD recipients will be placed on a waiting list. USCIS is unable to determine if, when, or for what duration T visa approvals will grow to exceed the annual statutory cap, but recent volumes depicted in Chart 1 suggest this occurrence is possible in the future. Past growth in the number of T visa approvals alone is not indicative of continued growth. While DOJ's Bureau of Justice Statistics collects data and reports statistics on human trafficking, they do not forecast trends.[57] Consequently, DHS cannot predict the contribution of growing T visa awareness to future volumes. The placement of individuals on the waiting list results in nominal cost to USCIS, as BFD recipients are simply moved to the waiting list once the cap is reached. In addition, applicants with a favorable BFD may be considered for deferred action and may request employment authorization based on a grant of deferred action. This change will benefit

[55] Calculation: 458 days/365 days in a year = 1.25 years.

[56] This analysis also assumes that the adjudication timeframe for Form I–914 will continue to require several months for the foreseeable future and thus not remove the incentive for simultaneous filing of Form I–765 that the faster EAD provides.

[57] *See* Bureau of Justice Statistics, U.S. Dep't of Justice, ''Human Trafficking Data Collection Activities, 2022,'' *https://bjs.ojp.gov/sites/g/files/xyckuh236/files/media/document/htdca22.pdf* (last visited Sept. 27, 2023).

applicants because if they are unable to be approved for a T visa they may now receive deferred action and have the possibility to request employment authorization, allowing them to stay and lawfully work in the United States.

(b) Additional Time Burden for Form I–765

The revised BFD process allows T visa applicants the opportunity to apply for their BFD EAD concurrently with their T visa application. Under the revised BFD process, USCIS will review an applicant's file for completeness and complete background checks to determine if the applicant is bona fide. If an applicant has not already filed a Form I–765, they will be invited to do so. T visa applicants did not previously file Form I–765 for employment authorization incident to T nonimmigrant status. DHS estimates that all T–1 visa applicants will now apply for a BFD-based EAD with their T visa application. Although T–1 visa applicants pay no fee to file Form I–765, DHS estimates the current public reporting time burden is 4 hours and 30 minutes (4.5 hours) for paper submissions, which includes the time for reviewing instructions, gathering the required documentation and information, completing the application, preparing statements, attaching necessary documentation, and submitting the application.[58] DHS acknowledges that T visa applicants filing Form I–765 may elect to acquire legal representation.

Table 9 shows the total receipts received for Form I–914 for FY 2017 through FY 2022. The table also shows the number of Form I–914 receipts filed with an attorney or accredited representative using Form G–28. The number of Form G–28 submissions allows USCIS to estimate the number of Forms I–765 that are filed by an attorney or accredited representative and thus estimate the opportunity costs of time for an applicant, attorney, or accredited representative to file each form. Based on a 6-year annual average, DHS estimates the annual average receipts of Form I–765 to be 2,909, with 92 percent of applications filed by an attorney.

Table 9. Total Form I-914 and Form I-914 Supplement A Receipts with and without Form G-28, FY 2017 through FY 2022.

FY	Form G-28 Receipts Received without a Form I-914 and Form I-914 Supplement A	Form G-28 Receipts Received with a Form I-914 and Form I-914 Supplement A	Total Form I-914 and Form I-914 Supplement A Receipts	Percentage of Forms I-914 and Form I-914 Supplement A filed with Form G-28
2017	191	2,128	2,319	92%
2018	415	2,516	2,931	86%
2019	164	2,101	2,265	93%
2020	135	2,010	2,145	94%
2021	166	2,617	2,783	94%
2022	343	4,667	5,010	93%
6-year Total	**1,414**	**16,039**	**17,453**	**92%**
6-year Annual Average	**236**	**2,673**	**2,909**	**92%**

Source: USCIS, Office of Policy and Strategy (OP&S), Policy Research Division (PRD), Claims 3 database. June 07, 2023 & USCIS Analysis.

Table 10 shows the total receipts received for Form I–914 for FY 2017 through FY 2022 for only the T–1 classification. The table also shows the number of Form I–914 receipts filed with an attorney or accredited representative using Form G–28. The number of Form G–28 submissions allows USCIS to estimate the number of Form I–765 that are filed by an attorney or accredited representative and thus estimate the opportunity costs of time for an applicant, attorney, or accredited representative to file each form. Based on a 6-year annual average, DHS estimates the annual average receipts of Form I–765 to be 1,664, with 92 percent of applications filed by an attorney.

In order to estimate the opportunity costs of time for completing and filing Form I–765, DHS assumes that an applicant will use an attorney or accredited representative to prepare Form I–765s or will prepare Form I–765 themselves. DHS estimates the opportunity cost of time for attorneys or accredited representatives using an average hourly wage rate of $78.74 for lawyers to estimate the opportunity cost of the time for preparing and submitting Form I–765.[59]

However, average hourly wage rates do not account for worker benefits such as paid leave, insurance, and retirement. DHS accounts for worker benefits when estimating the opportunity cost of time by calculating a benefits-to-wage multiplier using a Department of Labor (DOL), Bureau of Labor Statistics (BLS) report detailing average compensation for all civilian workers in major occupational groups and industries. DHS estimates the benefits-to-wage multiplier is 1.45.[60] DHS calculates the average total rate of compensation as 114.17 [61] per hour for a lawyer.

To estimate the new opportunity costs of time, USCIS uses an average total rate of compensation based on the effective minimum wage. DHS assumes that T visa applicants have limited work experience/education and would therefore have lower wages. The Federal minimum wage is currently $7.25 per hour,[62] but many states have implemented higher minimum wage rates.[63] However, the Federal Government does not track a nationwide population-weighted minimum wage estimate. Individuals in the population of interest for an analysis could be located anywhere within the United States and may be subject to a range of minimum wage rates depending on the state or city in which they live.

For this final rule, DHS uses the most recent wage data from DOL, BLS National Occupational Employment and Wage Estimates. More specifically, we use the 10th percentile hourly wage estimate for all occupations as a reasonable proxy for the effective minimum wage when estimating the opportunity cost of time for individuals in populations of interest who are likely to earn an entry-level wage.[64] We also use the 10th percentile hourly wage estimate for individuals who are unemployed, or for individuals who cannot, or choose not to, participate in the labor market as these individuals incur opportunity costs, assign valuation in deciding how to allocate their time, or both.

Due to the wide variety of unpaid activities an individual could pursue, such as childcare, housework, or other activities without paid compensation, it is difficult to estimate the value of that time. Even when an individual is not working for wages, their time has value. In addition, using a percentile of the hourly wage estimate for all occupations allows DHS the flexibility to adjust its estimates, when necessary, depending on the population(s) of interest for regulatory impact analyses. Moreover, BLS estimates account for changes in wages across the United States labor market, which includes any future changes to state minimum wage rates. DHS will continue to evaluate the most appropriate wage assumptions for the populations of interest in its regulatory impact analyses.

The 10th percentile hourly wage estimate for all occupations is currently $13.14, not accounting for worker benefits. DHS accounts for worker benefits when estimating the opportunity cost of time by calculating a benefits-to-wage multiplier. The benefits-to-wage multiplier is calculated using the most recent BLS report detailing average total employee compensation for all civilian U.S. workers.[65] DHS estimates the benefits-to-wage multiplier to be 1.45, which incorporates employee wages and salaries and the full cost of benefits,

[59] *See* Bureau of Labor Stat., U.S. Dep't of Labor, ''Occupational Employment Statistics, May 2022, Lawyers,'' *https://www.bls.gov/oes/2022/may/oes231011.htm* (last visited May. 11, 2023).

[60] The benefits-to-wage multiplier is calculated as follows: (Total Employee Compensation per hour)/(Wages and Salaries per hour) ($42.48 Total Employee Compensation per hour)/($29.32 Wages and Salaries per hour) = 1.44884 = 1.45 (rounded). *See* Bureau of Labor Stat., U.S. Dep't of Labor, Economic News Release, ''Employer Costs for Employee Compensation—December 2022,'' ''Table 1. Employer Costs for Employee Compensation by ownership [Dec. 2022],'' *https://www.bls.gov/news.release/archives/ecec_03172023.htm* (last updated Mar. 17, 2023). The Employer Costs for Employee Compensation measures the average cost to employers for wages and salaries and benefits per employee hour worked.

[61] Calculation: $78.74 * 1.45 = $114.17 total wage rate for lawyer.

[62] *See* U.S. Dep't of Labor, ''Minimum Wage,'' *https://www.dol.gov/general/topic/wages/minimumwage* (last visited May 17, 2023).

[63] *See* U.S. Dep't of Labor, ''State Minimum Wage Laws,'' *https://www.dol.gov/agencies/whd/minimum-wage/state* (last visited May 17, 2023).

[64] *See* Bureau of Labor Stat., U.S. Dep't of Labor, ''Occupational Employment Statistics,'' *https://www.bls.gov/oes/2022/may/oes_nat.htm#00-0000* (last visited May 15, 2023). The 10th, 25th, 75th and 90th percentile wages are available in the downloadable XLS file link.

[65] *See* Bureau of Labor Stat., U.S. Dep't of Labor, Economic News Release, ''Employer Costs for Employee Compensation—December 2022,'' ''Table 1. Employer costs for employer compensation by ownership,'' *https://www.bls.gov/news.release/archives/ecec_03172023.pdf* (last updated Mar. 17, 2023).

such as paid leave, insurance, and retirement.[66] Therefore, using the benefits-to-wage multiplier, DHS calculates the total rate of compensation for individuals as $19.05 per hour for this final rule, where the 10th percentile hourly wage estimate is $13.14 per hour and the average benefits are $5.91 per hour.[67]

DHS uses the historical Form G–28 filings of 92 percent by attorneys or accredited representatives accompanying T visa applications as a proxy for how many may accompany Form I–765 applications. The remaining 8 percent [68] of T visa applications are filed without a Form G–28. DHS estimates that a maximum of 1,528 applications annually would be filed with a Form G–28 and 136 applications would be filed by the applicant.

To estimate the opportunity cost of time to file Form I–765, DHS applies the newly estimated time burden 4 hours and 34 minutes (4.56 hours) for to the newly eligible population and compensation rate of who may file the form. Therefore, for those newly eligible, as shown in table 11, DHS estimates the total annual opportunity cost of time to applicants completing and filing Form I–765 applications are estimated to be $795,500 for lawyers and estimates the cost to be $11,814 for applicants who submit their own application. DHS estimates the total additional cost for completing and filing Form I–765 are expected to be $807,314 annually.

Table 11. Average Annual Opportunity Costs of Time to Newly Eligible Form I-914 Applicants applying for Form I-765

	Affected Population	Time Burden to Complete Form I-765 (Hours)	Cost of Time (Hourly)	Annual Opportunity Cost
	A	B	C	D=(AxBxC)
Attorney- Paper Form	1,528	4.56	$114.17	**$795,500**
Applicant- Paper Form	136	4.56	$19.05	**$11,814**
Total	**1,664**			**$807,314**
Source: USCIS Analysis				

(c) Clarifying Eligibility Requirements To Reduce RFEs

DHS is codifying the evidentiary standard and standard of proof that apply to the adjudication of a T visa. For T nonimmigrants, this rule retains the standard that applicants may submit any credible evidence relating to their T applications for USCIS to consider. This expression in the evidentiary standard and standard of proof could affect the number of requests for evidence (RFE) that USCIS must send for Form I–914. DHS is also making clarifications to eligibility requirements. USCIS estimates that there will be a reduction in RFEs. Table 12 shows the total number of requests for evidence (RFE) for FY 2017 through FY 2022. Based on a 6-year annual average, DHS estimates the annual requests for information to be 1,107.

Table 12. Form I-914 Receipts with additional Requests for Evidence (RFEs), FY 2017 through FY 2022.

Reported Fiscal Year	Non-RFE Count	RFE Count	Total
2017	1,343	976	2,319
2018	1,330	1,601	2,931
2019	1,037	1,228	2,265
2020	1,128	1,017	2,145
2021	2,262	521	2,783
2022	3,709	1,301	5,010
6- year Total	**10,809**	**6,644**	**17,453**
6year Annual Average	**1,802**	**1,107**	**2,909**
Source: USCIS, Office of Policy and Strategy (OP&S), Policy Research Division (PRD)/ Data Analysis Branch, Claims 3 database. June 07, 2023 & USCIS Analysis.			

[66] The benefits-to-wage multiplier is calculated as follows: (Total Employee Compensation per hour)/(Wages and Salaries per hour) = $42.48/$29.32 = 1.45 (rounded). *See* Bureau of Labor Stat., U.S. Dep't of Labor, Economic News Release, ''Employer Costs for Employee Compensation—December 2022,'' ''Table 1. Employer costs for employer compensation by ownership,'' *https://www.bls.gov/news.release/archives/ecec_03172023.pdf* (last updated Mar. 17, 2023).

[67] The calculation of the benefits-weighted 10th percentile hourly wage estimate: $13.14 per hour * 1.45 benefits-to-wage multiplier = $19.053 = $19.05 (rounded) per hour.

[68] Calculation: 100 percent—92 percent filing with Form G–28 = 8 percent only filing Form I–914.

Based on the additional information expected to be provided with the initial Form I–914 filing USCIS estimates that there will be a reduction in RFEs. This change will also reduce the burden on applicants because they will be better aware of the evidentiary requirements from the outset, and they will not have to take the time to search for additional information subsequent to the submission of their application. DHS cannot estimate the amount of time each applicant takes to search for additional information. This would then allow the applicant to receive their employment authorization document earlier and allow them to work sooner. The reduction in RFEs will also save USCIS adjudicators time because they will not have to return to a particular application a second time once USCIS receives the additional required evidence. This change will make the overall process faster for applicants and USCIS.

(d) Technical Changes, Clarifying Definitions, and Other Qualitative Impacts in This Final Rules

The remaining changes in this final rule do not add quantifiable implications beyond those already discussed in the 2016 IFR. This rule moves the regulations for T nonimmigrant status to a separate subpart of 8 CFR part 214 to reduce the length and density of part 214, while making it easier to locate specific provisions. In addition to the renumbering and redesignating of paragraphs, the rule has reorganized and reworded some sections to improve readability, such as in new 8 CFR 214.204(d)(1) (discussing the law enforcement agency (LEA) declaration) and 8 CFR 214.208(e)(1) (discussing the trauma exception to the general requirement of compliance with any reasonable law enforcement requests for assistance).

The rule also divides overly long paragraphs into smaller provisions to improve the organization and understanding of the regulations. The reorganization of the rule does not impact the analysis provided in the 2016 IFR. DHS also added clarifying language to support current eligibility and application requirements in response to public comments. These changes are consistent with the Immigration and Nationality Act and the Trafficking Victims Protection Act. The primary benefit of these changes is to make it clearer and easier for T visa applicants to understand and apply for T nonimmigrant status.

DHS is also amending 8 CFR 214.11(k) (redesignated here as 8 CFR 214.211) implementing section 101(a)(15)(T)(ii)(III) of the INA, 8 U.S.C. 1101(a)(15)(T)(ii)(III), to clarify that, USCIS will evaluate any credible evidence demonstrating the derivative applicant's present danger of retaliation in cases where the LEA has not investigated the acts of trafficking after the applicant reported the crime. This revision benefits the applicant, because it provides greater clarity on the evidence USCIS will consider in determining their eligibility. The ''any credible evidence'' standard also encompasses evidence originating from a family member's home country; however, DHS has clarified that evidence may be from the United States or any country in which an eligible family member faces retaliation. 8 CFR 214.211(g). This flexibility is shown as an unquantified benefit the applicant to provide additional credible evidence in order to establish eligibility.

DHS has also clarified in the preamble that the ''continued victimization'' criteria referenced at 8 CFR 214.207(b)(1) does not require that the applicant is currently a ''victim of a severe form of trafficking in persons,'' but instead may include ongoing victimization that directly results from either ongoing or past trafficking. This will allow applicants who were victims of a severe form of trafficking in persons in the past, departed the United States, and reentered as a result of their continued victimization to establish that they meet the physical presence eligibility requirement without demonstrating that they are currently victims of a severe form of trafficking in persons. DHS cannot estimate how many victims may now be able to establish that they meet the physical presence eligibility requirement due to this change. This clarification benefits applicants who may be able to satisfy the physical presence requirement if their reentry into the United States was the result of continued victimization tied to ongoing or past trafficking.

(e) Alternatives Considered

Where possible, DHS has considered, and incorporated alternatives to maximize net benefits under the rule. For example, DHS considered multiple different elements and the operational considerations for implementing a BFD review. DHS considered conducting a fully electronic T visa BFD review with extremely limited background checks and conducting physical file review with limited background checks. However, DHS chose an approach that accommodated public comments, preserves a good faith review of the initial filing, removes barriers to the immigration process, and prioritizes efficient T visa BFD review. This protects the integrity of the BFD review by requiring review of initial required evidence and assessment of routine background checks.

5. Final Costs of the Final Rule

(a) Undiscounted Costs

Table 13 details the annual costs of this final rule. DHS estimates the annual additional cost for completing and filing Form I–765 are expected to be $807,314.

Table 13. Summary of Costs

Description	**Annual Cost**
Changes to BFD Process	$807,314
Source: USCIS Analysis	

(b) Discounted Costs

Table 14 shows the total cost over the 10-year implementation period of this final rule. DHS estimates the total annualized costs to be $807,314 discounted at 3 and 7 percent.

Table 14. Total Undiscounted and Discounted Costs of this Final Rule Using the Post-IFR Baseline.		
FY	Total Estimated Costs	
	$807,314 (Undiscounted)	
	Discounted at 3 percent	Discounted at 7 percent
2023	$783,800	$754,499
2024	$760,971	$705,139
2025	$738,807	$659,009
2026	$717,288	$615,896
2027	$696,396	$575,604
2028	$676,113	$537,947
2029	$656,420	$502,755
2030	$637,301	$469,864
2031	$618,739	$439,125
2032	$600,717	$410,398
10-year Total	**$6,886,552**	**$5,670,236**
Annualized Cost	**$807,314**	**$807,314**

B. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121, (Mar. 29, 1996), requires Federal agencies to consider the potential impact of regulations on small businesses, small governmental jurisdictions, and small organizations during the development of their rules. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, or governmental jurisdictions with populations of less than 50,000. This final rule does not mandate any actions or requirements for small entities. This final rule regulates individuals and individuals are not defined as a ''small entities'' by the RFA.[69] DHS did not receive any comments on small entities during the previous comment period. A regulatory flexibility analysis is not required when a rule is exempt from notice and comment rulemaking. The changes made in the interim rule were determined to not require advance notice and opportunity for public comment, because they are (1) required by various legislative revisions, (2) exempt as procedural under 5 U.S.C. 553(b)(A), (3) logical outgrowths of the 2002 interim rule, or (4) exempt from public comment under the ''good cause'' exception to notice-and-comment under 5 U.S.C. 553(b)(B). 81 FR 92288. Therefore, a regulatory flexibility analysis is not required for this rule. Nonetheless, USCIS examined the impact of this rule on small entities under the Regulatory Flexibility Act, 5 U.S.C. 601(6). The individual victims of trafficking and their derivative family members to whom this rules applies are not small entities as that term is defined in 5 U.S.C. 601(6).

C. Small Business Regulatory Enforcement Fairness Act of 1996 (Congressional Review Act)

This final rule is not a major rule as defined by section 804 of Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA). This final rule likely will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

D. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (UMRA) is intended, among other things, to curb the practice of imposing unfunded Federal mandates on State, local, and tribal governments. Title II of UMRA requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed rule, or final rule for which the agency published a proposed rule, that includes any Federal mandate that may result in a $100 million or more expenditure (adjusted annually for inflation) in any one year by State, local, and tribal governments, in the aggregate, or by the private sector. This rule is exempt from the written statement requirement because DHS did not publish a notice of proposed rulemaking for this rule.

In addition, the inflation-adjusted value of $100 million in 1995 is approximately $192 million in 2022 based on the Consumer Price Index for All Urban Consumers (CPI–U).[70] This proposed rule does not contain a Federal mandate as the term is defined under UMRA.[71] The requirements of title II of UMRA, therefore, do not apply, and DHS has not prepared a statement under UMRA.

E. Congressional Review Act

The Office of Information and Regulatory Affairs has determined that this final rule is not a major rule, as defined by 5 U.S.C. 804, for purposes of congressional review of agency rulemaking pursuant to the Congressional Review Act, Public Law 104–121, sec. 251, 110 Stat. 868, 873 (codified at 5 U.S.C. 804). This rule will

[69] *See* Public Law 104–121, tit. II, 110 Stat. 847 (5 U.S.C. 601 note). A small business is defined as any independently owned and operated business not dominant in its field that qualifies as a small business per the Small Business Act. *See* 15 U.S.C. 632(a)(1).

[70] *See* Bureau of Labor Stat., U.S. Dep't of Labor, ''Historical Consumer Price Index for All Urban Consumers (CPI–U): U.S. city average, all items, by month,'' *www.bls.gov/cpi/tables/supplemental-files/historical-cpi-u-202212.pdf* (last visited Jan. 19, 2023). Calculation of inflation: (1) Calculate the average monthly CPI–U for the reference year (1995) and the current year (2022); (2) Subtract reference year CPI–U from current year CPI–U; (3) Divide the difference of the reference year CPI–U and current year CPI–U by the reference year CPI–U; (4) Multiply by 100 = [(Average monthly CPI–U for 2022—Average monthly CPI–U for 1995)/(Average monthly CPI–U for 1995)]*100 = [(292.655 − 152.383)/152.383]*100 = (140.272/152.383)*100 = 0.92052263*100 = 92.05 percent = 92 percent (rounded). Calculation of inflation-adjusted value: $100 million in 1995 dollars*1.92 = $192 million in 2022 dollars.

[71] The term ''Federal mandate'' means a Federal intergovernmental mandate or a Federal private sector mandate. *See* 2 U.S.C. 1502(1), 658(6).

not result in an annual effect on the economy of $100 million or more. DHS has complied with the reporting requirements of and has sent this final rule to Congress and to the Comptroller General as required by 5 U.S.C. 801(a)(1). While the Congressional Review Act requires a delay in the effective date of 30 days, this rule has a delayed effective date of 120 days, to provide DHS time to comply with the Paperwork Reduction Act as explained later in this preamble.

F. Executive Order 13132 (Federalism)

This final rule will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. DHS does not expect this rule would impose substantial direct compliance costs on State and local governments or preempt State law. As stated above, neither the proposed rule nor this final rule modifies the extent of State involvement set by statute.

G. Executive Order 12988 (Civil Justice Reform)

This final rule meets the applicable standards set forth in section 3(a) and (b)(2) of E.O. 12988.

H. Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments)

This final rule does not have ''tribal implications'' because it does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. Accordingly, E.O. 13175, Consultation and Coordination with Indian Tribal Governments, requires no further agency action or analysis.

I. Family Assessment

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. Agencies must assess whether the regulatory action: (1) impacts the stability or safety of the family, particularly in terms of marital commitment; (2) impacts the authority of parents in the education, nurture, and supervision of their children; (3) helps the family perform its functions; (4) affects disposable income or poverty of families and children; (5) financially impacts families, and whether those impacts are justified; (6) may be carried out by State or local government or by the family; and (7) establishes a policy concerning the relationship between the behavior and personal responsibility of youth and the norms of society. If the determination is affirmative, then the agency must prepare an impact assessment to address criteria specified in the law. As discussed in the interim final rule, DHS assessed this action in accordance with the criteria specified by section 654(c)(1). This final rule will continue to enhance family well-being by aligning the regulation more closely with the statute. This rule will also enhance family well-being by encouraging vulnerable individuals who have been victims of a severe form of trafficking in persons to report the criminal activity and by providing critical assistance and immigration benefits. Additionally, this regulation allows certain family members to obtain T nonimmigrant status once the principal applicant has received status.

J. National Environmental Policy Act

DHS analyzes actions to determine whether the National Environmental Policy Act (NEPA) applies to them and, if so, what degree of analysis is required. DHS Directive 023–01, Revision 01, ''Implementation of the National Environmental Policy Act,'' and DHS Instruction Manual 023–01–001–01, Revision 01, ''Implementation of the National Environmental Policy Act (NEPA)'' (Instruction Manual), establish the procedures DHS and its components use to comply with NEPA and the Council on Environmental Quality (CEQ) regulations for implementing NEPA codified at 40 CFR parts 1500 through 1508.

The CEQ regulations allow Federal agencies to establish, with CEQ review and concurrence, categories of actions (''categorical exclusions'') that experience has shown do not individually or cumulatively have a significant effect on the human environment and, therefore, do not require an Environmental Assessment or Environmental Impact Statement. 40 CFR 1501.4 and 1507.3(e)(2)(ii). The DHS categorical exclusions are listed in Appendix A of the Instruction Manual. For an action to be categorically excluded, it must satisfy each of the following three conditions: (1) the entire action clearly fits within one or more of the categorical exclusions; (2) the action is not a piece of a larger action; and (3) no extraordinary circumstances exist that demonstrate, or create the potential for, significant environmental impacts. Instruction Manual, section V.B(2)(a–c).

This action amends existing regulations governing requirements and procedures for victims of severe forms of trafficking in persons seeking T Nonimmigrant Status. The amended regulations codify and clarify eligibility criteria and will have no impact on the overall population of the United States and will not increase the number of immigrants allowed into the United States.

DHS analyzed the proposed amendments and has determined that this action clearly fits within categorical exclusion A3(a) in Appendix A of the Instruction Manual because the regulations being promulgated are of a strictly administrative or procedural nature. DHS has also determined that this action clearly fits within categorical exclusion A3(d) because it amends existing regulations without changing their environmental effect. This final rule is not part of a larger action and presents no extraordinary circumstances creating the potential for significant environmental effects. Therefore, this final rule is categorically excluded from further NEPA review.

K. Paperwork Reduction Act

Under the Paperwork Reduction Act (PRA) of 1995, as amended, 44 U.S.C. 3501–3521, all Departments are required to submit to OMB, for review and approval, any reporting requirements inherent in a rule. In this final rule, DHS is addressing the public comments received on the revised information collections in the interim rule and also amending the application requirements and procedures that the interim rule provided for individuals to receive T nonimmigrant status. Therefore, DHS is revising Form I–914, Form I–914, Supplement A, Form I–914, Supplement B, and Form I–765, as well as the associated form instructions to conform with the new regulations. These forms are information collections under the PRA.

When DHS published the 2016 interim rule, it revised Form I–914, Form I–914, Supplement A, Form I–914, Supplement B, and the associated form instructions (OMB Control Number 1615–0099). DHS published two versions of the forms and associated instructions for public comment, the first version on December 20, 2016, and the second version on January 20, 2017. *See* DHS Docket No. USCIS–2011–0010 at *www.regulations.gov.* Once OMB approved the forms and the rule became effective, DHS published a final version of the forms and associated instructions, which were dated February 27, 2017.

On December 2, 2021, OMB approved and USCIS issued a revised Form I–914,

Form I–914, Supplement A, Form I–914, Supplement B, with additional changes. The December 2, 2021, changes were independent of the interim rule that is being finalized by this rule, but the changes made in that revision may obviate or address some of the public comments on the information collection requirements for the interim rule. *See* DHS Docket No. USCIS–2006–0059. In this final rule, USCIS is requesting comments for 60 days on this information collection by July 1, 2024. When submitting comments on the information collection, your comments should address one or more of the following four points:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, such as permitting electronic submission of responses.

Table 15 Information Collections, below, lists the information collections that are part of this rulemaking.

Table 15. Information Collections

OMB Control No.	Form No.	Form Name	Type of PRA Action
1615-0099	I-914	Application for Derivative T Nonimmigrant Status, and Declaration for Trafficking Victim	Revision of a Currently Approved Collection
1615-0040	I-765	Application for Employment Authorization	Revision of a Currently Approved Collection
1615-0013	I-539	Application to Extend/Change Nonimmigrant Status	No material change/Non-substantive change to a currently approved collection
1615-0023	I-485	Application to Register Permanent Residence or Adjust Status	No material change/Non-substantive change to a currently approved collection

This final rule requires non-substantive edits to the forms listed above where the Type of PRA Action column states, ''No material change/ Non-substantive change to a currently approved collection.'' USCIS has submitted a Paperwork Reduction Act Change Worksheet, Form OMB 83–C, and amended information collection instruments to OMB for review and approval in accordance with the PRA.

USCIS Form I–914; Form I–914, Supplement A; Form I–914, Supplement B (OMB Control Number 1615–0099)

Overview of information collection:

(1) *Type of Information Collection:* Revision of a currently approved collection.

(2) *Title of Form/Collection:* Application for T Nonimmigrant Status, Application for Derivative T Nonimmigrant Status, and Declaration for Trafficking Victim.

(3) *Agency form number, if any, and the applicable component of DHS sponsoring the collection:* Form I–914, Form I–914, Supplement A, and Form I–914, Supplement B; USCIS.

(4) *Affected public who will be asked or required to respond:* Individuals or households. Form I–914 permits victims of a severe form of trafficking in persons and certain eligible family members to demonstrate that they qualify for temporary nonimmigrant status pursuant to the Victims of Trafficking and Violence Protection Act of 2000, and to receive temporary immigration benefits.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* Form I–914, 1,310 responses at 2.63 hours per response; Form I–914, Supplement A, 1,120 responses at 1.083 hours per response; Form I–914, Supplement B (section that officer completes), 459 responses at 3.58 hours per response; Form I–914, Supplement B (section that respondent completes), 459 responses at .25 hours per response.

Biometric processing 2,430 respondents requiring Biometric Processing at an estimated 1.17 hours per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 9,261 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated annual cost burden associated with this collection of information is $2,532,300.

USCIS Form I–765; I–765WS (OMB Control Number 1615–0040)

Overview of information collection:

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Application for Employment Authorization; I–765 Worksheet.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–765; I–765WS; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or households. USCIS uses Form I–765 to collect information needed to determine if a noncitizen is eligible for an initial EAD, a new replacement EAD, or a subsequent EAD upon the expiration of a previous EAD under the same eligibility category. Noncitizens in many immigration statuses are required to possess an EAD as evidence of work authorization.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–765 paper filing is 1,830,347 and the estimated hour burden per response is 4.56 hours; the estimated total number of respondents for the information collection I–765 online filing is 455,653 and the estimated hour burden per response is 4.00 hours; the estimated total number of respondents for the information collection I–765WS is 302,000 and the estimated hour burden per response is 0.5 hours; the estimated total number of respondents for the information collection biometrics submission is 302,535 and the estimated hour burden per response is 1.17 hours; the estimated total number of respondents for the information collection passport photos is 2,286,000 and the estimated hour burden per response is 0.5 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 11,816,960 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $400,895,820.

1. Comments on the Information Collection Changes to Form I–914 and Related Forms and Instructions Published With the 2016 Interim Rule

Comment: Two commenters on the 2016 interim rule also provided comments on the forms and associated instructions. One of the commenters had a general comment that applied to all the forms and instructions. The commenter wrote that although DHS published a table of changes for each of the forms, advocates and community members had not been able to review the actual forms and instructions with the final changes included. The commenter requested that the proposed forms and instructions with all planned changes be made available to the community and that DHS extend the comment period for the proposed forms to allow the community an opportunity to comment fully.

Response: DHS understands that the table of changes must be used in comparison with the previous versions of the form and instructions to determine the precise impact the changes have on the form and agrees that this comparison requires some effort. Nonetheless, the table of changes clearly indicated where the changes were being made or proposed to a sufficient extent to determine the effects on the form and the changes to the information collection burden.

Commenters also suggested specific revisions to the forms and associated instructions. DHS responds to those recommendations for each form, supplement, or instructions. Following this discussion, DHS explains the changes it is making on its own initiative for legal accuracy, consistency with the 2016 interim rule and the final rule, and enhanced clarity.

Form I–914

Comment: One commenter provided many recommendations to revise Form I–914. The commenter appears to have suggested edits to the version of Form I–914 labeled, ''Form I–914, Application for T Nonimmigrant Status 10.20.16'' published on December 20, 2016, with the 2016 interim rule. Thus, all the commenter's references to content of the form relate to that version. In discussing final changes all references are to the version of the forms published in connection with this final rule.

The commenter recommended that DHS amend the question on page 1, part B, ''General Information About You'' requesting applicants to choose whether their gender is male or female. The commenter suggested including a blank space in which applicants could write in their gender identity. The commenter wrote that an increasing number of its clients who are survivors of trafficking identify as lesbian, gay, bisexual, transgender, queer, and intersex (LGBTQI+) and may identify as non-binary or gender non-conforming. The commenter stated that these clients face heightened vulnerabilities to trafficking and requiring applicants to select from a binary answer option may deter them from representing their preferred gender expression and perpetuate their marginalization.

Response: DHS notes that components across the Department are reviewing forms to pursue more inclusive sex and gender markers that accommodate non-binary and transgender individuals.[72] This will improve DHS's ability to verify identity, as well as to expand access to accurate identity documents, thereby reducing the risk of future harm to LGBTQI+ persons. DHS is also reviewing policy guidance, training materials, and website content to ensure they provide accurate guidance and consistently use appropriate terminology. To support these Department-wide efforts, DHS will revise the forms to include a third gender option, ''Another Gender Identity.'' Including a third option on Form I–914, Form I–914, Supplement A, and Form I–914, Supplement B supports Executive Order 14012 (Restoring Faith in Our Legal Immigration Systems and Strengthening Integration and Inclusion Efforts for New Americans) to promote inclusion and identify barriers that impede access to immigration benefits.

Comment: Regarding questions related to T nonimmigrant status eligibility requirements in part C (now designated part 3), the commenter suggested that the questions be reordered to match the order that the requirements appear in the statute to facilitate completing and adjudicating the form.

[72] ''Interagency Report on the Implementation of the Presidential Memorandum on Advancing the Human Rights of LGBTQI+ Persons Around the World,'' (2022) *https://www.state.gov/wp-content/uploads/2022/04/Interagency-Report-on-the-Implementation-of-the-Presidential-Memorandum-on-Advancing-the-Human-Rights-of-Lesbian-Gay-Bisexual-Transgender-Queer-and-Intersex-Persons-Around-the-World-2022.pdf.*

Response: DHS understands the commenter's stated rationale, but the commenter did not explain why reordering would make the form easier to complete. Neither adjudicators nor other stakeholders have reported any challenges with the ordering of the questions. DHS believes the suggested change is not essential enough to warrant the burden of reprogramming USCIS Form I–914 related computer systems.

Comment: On page 3, part C, ''Additional Information,'' (now titled ''Part 3. Additional Information About your Application'') the commenter recommended deleting the question regarding whether the applicant's most recent entry was on account of the trafficking that forms the basis for the applicant's claim and requests that the applicant explain the circumstances of their most recent arrival. The commenter stated that to qualify for T nonimmigrant status, an applicant need only show physical presence in the United States on account of trafficking, and there is no requirement an applicant's most recent entry be on account of trafficking.

Response: The commenter is correct with respect to the statutory eligibility requirements; however, including this question does not mean that an applicant must show their last entry was related to their trafficking. *See* INA sec. 101(a)(15)(T), 8 U.S.C. 1101(a)(15)(T). The question (now located at part 3, question 9) helps provide information to adjudicators about the general circumstances of the applicant's most recent arrival, whether related to the trafficking or not, and information regarding the applicant's immigration history. All this information assists adjudicators in understanding the full history and facts of an applicant's claim. Accordingly, DHS declines to delete the question.

Comment: The form at part D, ''Processing Information,'' question 1(a) (now part 4, question 1.A) asked whether the applicant has ever committed a crime or offense for which the applicant has not been arrested. The commenter suggested that DHS clarify the meaning of the question, noting that the question is broadly written and would include even minor criminal activity and behavior (such as jaywalking) that has no effect on the applicant's eligibility for T nonimmigrant status.

Response: DHS will maintain this question as it is useful for adjudicators in gathering relevant information related to determining admissibility and assessing the applicant's truthfulness. In addition, in DHS's experience, answers to the question have provided information relevant to the applicant's trafficking experiences.

Comment: The commenter requested that DHS revise part D ''Processing Information,'' question 3(a) (Now at part 4, question 2.A), regarding whether the applicant has engaged in prostitution or procurement of prostitution or intends to engage in prostitution or procurement of prostitution. The commenter stated that although the referenced conduct renders an applicant inadmissible under section 212(a)(2)(D) of the INA, 8 U.S.C. 1182(a)(2)(D), DHS should explicitly exclude acts of prostitution that occurred during trafficking and should clarify that this question does not apply to sex trafficking. The commenter also stated that this question causes confusion and anxiety for many of its clients who are victims of sex trafficking. The commenter suggested rephrasing the question to read: ''Have you engaged in prostitution that was not related to being a victim of trafficking?''

Response: DHS declines to make the specific suggested change. The question is appropriate as written because engaging in prostitution is a ground of inadmissibility, regardless of whether it is connected to the victimization. If the applicant has engaged in this conduct and the prostitution was connected to the trafficking, the applicant can request a waiver but must still answer the question so that USCIS can assess whether the inadmissibility ground applies in the first instance, and thus whether a waiver is needed. USCIS will examine all the evidence submitted and decide on a case-by-case basis whether to grant any waiver request.

Comment: The commenter requested that DHS revise part D, ''Processing Information,'' question 8, regarding whether the applicant has, ''during the period of March 23, 1933, to May 8, 1945, in association with either the Nazi Government of Germany or any organization or government associated or allied with the Nazi Government of Germany, ever ordered, incited, assisted, or otherwise participated in the persecution of any person because of race, religion, nationality, membership in a particular social group, or political opinion[.]'' The commenter suggested that DHS delete the question entirely or preface it with the question: ''Were you born before May 8, 1945?,'' followed by ''If no, proceed to the next question.'' The commenter stated that, given the temporal limits, this question applies to an extremely limited number of applicants, and the question as written is confusing and time-consuming to explain to applicants.

Response: DHS declines to make the suggested revision. DHS appreciates the suggestion and will take it under consideration for future revision efforts, but will retain the question as is, to collect information about specific conduct that constitutes a ground of inadmissibility under section 212(a)(3)(E) of the INA, 8 U.S.C. 1182(a)(3)(E).

Comment: The form at part D, ''Processing Information,'' question 8 (now part 4, question 8), asked whether the applicant has ever been present or nearby when a person was: ''(a) intentionally killed, tortured, beaten or injured?; (b) displaced or moved from their residence by force, compulsion, or duress?; or (c) in any way compelled or forced to engage in any kind of sexual contact or relations?.'' The commenter requested that DHS delete the question, and indicated that the question was vague, led to confusion among attorneys and applicants, and did not relate to any particular ground of inadmissibility in section 212(a) of the INA, 8 U.S.C. 1182(a).

Response: DHS declines to delete the question. Although it does not relate to a specific ground of inadmissibility, the question tends to yield information helpful to adjudicators in understanding the details of both the victimization and the applicant's conduct, which are relevant to the adjudication of the claim for T nonimmigrant status.

The following suggestions have already been resolved by revisions to the Form I–914 and are maintained in the version of the form published with this final rule:

- Page 2, part C, ''Additional Information,'' insert a question that allows an applicant to invoke the ''trauma exception'' for cooperation with law enforcement codified in section 101(a)(15)(T)(i)(III)(bb) of the INA, 8 U.S.C. 1101(a)(15)(T)(i)(III)(bb);
- Page 2, part C, ''Additional Information,'' delete the question related to whether the applicant is submitting an LEA declaration on Form I–914, Supplement B and if not, to explain why;
- Page 4, part D, ''Processing Information,'' delete question 2 on whether the applicant has ever received public assistance given that the 2016 interim rule indicates USCIS intends to remove this question on both Form I–914 and Form I–914, Supplement A; and
- Page 10, part H, ''Checklist'':
- Insert language in second box allowing applicants to indicate that they are asserting an exception to the compliance with reasonable law

enforcement requests requirement based on trauma;

- Delete checkbox indicating the applicant has included three photographs of the applicant; and
- Delete checkbox indicating the principal applicant has included three photographs of each family member for whom they are applying.
- DHS has deleted the checklist with the version of the Form I–914 and associated instructions published with this final rule because the instructions are sufficiently clear without the checklist, and it added unnecessary length to the forms. There is a checklist and other filing tips on the Form I–914 forms landing page.

Form I–914, Supplement A

DHS received suggestions from two commenters to revise Form I–914, Supplement A. One commenter proposed edits to the version of the supplemental form entitled, ''Form I–914A, Supplement A, Application for Family Member of T–1 Recipient 10.20.16'' published on December 20, 2016, with the 2016 interim rule. This commenter made several of the same suggestions it made on the Form I–914 in relation to the following questions, which DHS declines for the same reasons discussed above:

- Part E, ''Processing Information,'' delete the question asking whether the family member has committed any offense for which they have not been arrested;
- Part E, ''Processing Information,'' delete or simplify question 8 related to whether the family member has ever engaged in persecutory conduct between March 23, 1933, and May 8, 1945, in association with either the Nazi Government of Germany or any organization or government associated or allied with the Nazi Government of Germany;
- Part E, ''Processing Information,'' delete question 9 on whether the applicant has ever been present or nearby during certain conduct.

The commenter also made suggestions that have already been resolved by revisions to Form I–914, Supplement A, and remain resolved with the publication of the Form I–914, Supplement A published with this final rule:

- Page 1, part A (now part 1), ''Family Member Relationship to You,'' insert a box to include the T–6 derivative-of-derivative category; and
- Part E, ''Processing Information,'' delete the question about whether the family member has ever received public assistance.

The other commenter proposed edits to the version of the supplemental form entitled, ''(I–914A) Supplement A, Application for Family Member of T–1 Recipient 1.11.2017.''

Comment: The commenter recommended that on page 1, part B, DHS remove the new additional heading ''Part B. Family Member Relationship to Your Derivative'' and combine the additional checkboxes related to the T–6 derivative category with the existing ''Part A. Family Member Relationship to You.'' The commenter wrote that the new part B heading made it appear as though both parts A and B of Form I–914, Supplement A would need to be completed for all derivatives. The commenter wrote that combining the boxes in one heading would more clearly distinguish how the family member is related to the principal applicant.

Response: To address this concern, DHS has edited the form so that it is no longer divided into two parts with separate headings. The new form includes one part, labeled part 1, which has two items numbered 1 and 2, but do not contain further headings. DHS is removing the parenthetical ''(the derivative)'' in the title to previous part D (renumbered part 3), ''Information About Your Family Member'' consistent with the changes to new part 1. DHS amends the Form I–914 Instructions, as discussed in the next section, to provide further clarification on the questions in new part 1 and the form's references to family members.

Form I–914 Instructions

Commenters provided several comments on the Form I–914 Instructions. With respect to one of the commenters, it is not clear which version of the instructions its comments refer to, as some of the suggestions were already resolved by both versions of the form published in the docket with the 2016 interim rule. The other commenter's proposed edits relate to the version of the instructions entitled, ''(I–914) Instructions for Application for T Nonimmigrant Status 1.11.2017.'' In discussing both commenters' proposed edits, DHS will use references to the January 11, 2017, version.[73]

Comment: One commenter suggested adding the statutory citation of section 103 of the TVPA, as amended, 22 U.S.C. 7102, for the definition of ''a severe form of trafficking in persons'' when explaining that to qualify for T nonimmigrant status, an applicant must meet that definition at page 1, Point 1(A), ''Who May File This Form?''. The commenter explained that including the citation would easily refer applicants and advocates to review the statutory definition of ''a severe form of trafficking in persons.'' *See* 22 U.S.C. 7102. The commenter mentioned that the instructions to Form I–918, Petition for U Nonimmigrant Status, provide references to the relevant designation of qualifying crimes.

Response: DHS agrees that the term ''a severe form of trafficking in persons'' has a specific legal meaning and that applicants may not readily understand the term. DHS has added language at new page 1, ''What Is the Purpose of Form I–914?,'' to refer applicants to the language of the definition of ''a severe form of trafficking'' included in the section ''Evidence to Establish T Nonimmigrant Status,'' which derives from the language in TVPA section 103, the citation suggested by the commenter.[74] This approach will provide applicants with easy reference to the actual definition.

Comment: The commenter recommended changing the description of family members who may be eligible for T nonimmigrant status based on facing a danger of retaliation at page 2, Point 2(C)(3), ''Who May File This Form?'' and at page 4, part B, ''Completing Form I–914, Supplement A, Application for Family Member of T–1 Recipient.'' The commenter requested DHS use the term ''your sibling's children'' rather than the phrase ''niece or nephew,'' which could have a more expansive definition than the regulations have intended. The commenter also recommended using the term ''your parent's adult child'' rather than ''your sibling,'' explaining that the term sibling could include all siblings of a T–1 applicant, which it believed was a broader category than that of the adult or minor children of the parent.

Response: DHS disagrees with the commenter's reasoning. The terms suggested by the commenter would exclude some eligible family members who Congress intended to include in the statute. INA sec. 101(a)(15)(T)(ii)(III), 8 U.S.C. 1101(a)(15)(T)(ii)(III), provides that the ''adult or minor child'' of a

[73] Although it is not clear which version of the forms one commenter reviewed, the commenter's suggestions are consistent with the version dated January 11, 2017.

[74] The page numbers and section headings of the forms and instructions are provided in these comment responses to permit the commenter to find and review precisely how their comment was addressed. However, text may have shifted during final development and publication and DHS does not guarantee that the page numbers in the final version of the form will correspond to the page numbers cited here or as they existed on the forms when they were published for the interim rule or on January 10, 2018.

derivative of the principal who faces a present danger of retaliation may obtain derivative T nonimmigrant status. DHS interprets the term ''adult or minor child'' to encompass both the ''son or daughter'' and ''child'' immigration definitions; therefore, persons of any age and any marital status can be ''adult or minor children.'' *See* USCIS Policy Memorandum, *New T Nonimmigrant Derivative Category and T and U Nonimmigrant Adjustment of Status for Applicants from the Commonwealth of the Northern Mariana Islands* (Oct. 30, 2014).[75] Because the term ''child'' is a legal term of art defined as an unmarried person who is under the age of 21, *see* INA sec. 101(b)(1), 8 U.S.C. 1101(b)(1), using the phrase ''your parent's child'' would only include unmarried children under age 21 of the principal's derivative parents. The term ''your parent's child'' would not include the adult children of the principal's derivative parents, or the married children of any age of the principal's derivative parents. The phrase ''your sibling's children'' would be similarly restrictive.

However, as discussed above, to provide greater clarity on the family relationship of the category of adult or minor children who may be eligible for T nonimmigrant status based on facing a danger of retaliation, DHS has revised Form I–914, Supplement A (*see* new page 1, part 1, item 2) and the Form I–914 Instructions (*see* new page 4, ''Completing Form I–914, Supplement A, Application for Derivative T Nonimmigrant Status'').

Comment: The commenter suggested changes to page 2, ''General Instructions,'' part B, ''General Information About You,'' item 1, and page 5, part D, ''Information About Your Family Member (the derivative),'' item 1. Both sections explained that the questions requesting the applicant's or family member's name refer to the name as shown on the individual's ''birth certificate or legal name change document.'' The commenter requested DHS delete these explanations because some trafficking survivors do not have access to identity documents with the applicant's legal name, and such a requirement could create an evidentiary barrier for victims.

Response: It is important to maintain similar language as it provides clear instruction on the name that DHS is requesting. It is essential for DHS to know the name of the applicant or their family member as it appears on official identification documents so that DHS can conduct proper background checks and ensure there is no confusion about the identity of the person receiving the status, if approved. Neither this explanation nor the questions on the form indicate that evidence of a specific document is a requirement to obtaining status. Furthermore, the requirement does not in any way impact an applicant's evidentiary burden. However, DHS has changed the phrasing to ''birth certificate, passport, or other legal document'' to provide more clarity. *See* new part 4, ''Information About your Family Member,'' item 1.

Comment: Regarding the instruction at part D, ''Information About Your Family Member,'' item 3, the commenter opposed the collection of the family member's intended physical street address because the 2016 interim rule states that DHS is allowed to disclose an applicant's information to a law enforcement agency with the authority to detect, investigate, or prosecute severe forms of trafficking in persons. The commenter wrote that disclosing the applicant's physical street address could jeopardize the victim's safety and recommended adding language to clarify that an applicant should only provide this information if it was safe to do so and could instead provide an alternate safe mailing address.

Response: DHS declines to make the change. The request for the applicant's physical street address is distinct from the request for the applicant's mailing address used to provide official correspondence. DHS allows applicants to provide an alternative mailing address if they do not feel it is safe to receive mail at their residence as noted on previous editions of the form as well as at new page 5, part 4, item 4. This provision is to protect against perpetrators having access to USCIS correspondence with the applicant. DHS requests the applicant's physical street address for internal information purposes and consistent with requirements that individuals applying for visas register their presence. *See* INA secs. 221(b), 261, 265, 8 U.S.C. 1201(b), 1301, 1305. Furthermore, while DHS appreciates the commenter's concern that sharing address information with law enforcement agencies could jeopardize an applicant's safety, that authority exists for the purpose of promoting investigation and prosecution of traffickers, not to put victims of trafficking at risk.

Comment: The commenter made a general recommendation that DHS clarify on page 2, ''Completing Form I–914,'' part B, number 3, that an applicant's home address will not be used to contact an applicant if the applicant provides an address in the ''safe mailing address'' space on the Form I–914.

Response: DHS believes that the explanation of the safe mailing address is clear on this point. The language explains that if an applicant does not feel secure in receiving correspondence regarding their application at the applicant's home address, the applicant should provide a safe mailing address. DHS maintains this language in the Form I–914 Instructions. *See* new page 3, part 3, ''General Information About You,'' item 4, and new page 4, ''Completing Form I–914, Supplement A, Application for Derivative T Nonimmigrant Status,'' part 4, item 4, for instructions regarding the safe mailing address.

Comment: The commenter also requested that the instructions at page 3, ''Completing Form I–914,'' part B, number 6, include a clarification that the applicant's home telephone number will not be used to contact an applicant if they provide a telephone number in the ''safe daytime telephone number'' blank on the Form I–914.

Response: Again, DHS believes the explanation of the safe telephone number in the instruction at part 6 is clear and already explains that an applicant may include a safe daytime phone number if they wish. *See* new page 4, part 6, ''Applicant's Statement, Contact Information, Declaration, Certification, and Signature'' and new page 6, part 6, ''Applicant's Statement, Contact Information, Declaration, Certification, and Signature'' for instructions regarding the safe telephone number.

Comment: The other commenter requested DHS add an instruction to the section, ''General Instructions,'' that applicants represented by an attorney should include on the Notice of Entry of Appearance as Attorney or Accredited Representative (Form G–28) to be filed with Form I–914 that the attorney also represents the applicant with respect to the Form I–765. The commenter reported that attorneys have experienced difficulty communicating with USCIS regarding the status of Employment Authorization Documents (EADs) for approved T–1 nonimmigrants when the attorney has submitted a Form G–28 in connection with the Form I–914.

Response: DHS agrees with the commenter's recommendation. Because USCIS has codified a new, streamlined Bona Fide Determination process, DHS believes it would be helpful for

[75] ''T Derivative Memo,'' *https://www.uscis.gov/sites/default/files/document/memos/Interim_PM-602-0107.pdf.*

attorneys or representatives to include all forms covered by their representation on the Form G–28.

Comment: The commenter requested that in the ''Evidence to Establish T Nonimmigrant Status'' section of the Instructions, DHS delete the phrase ''You must demonstrate that you were brought to the United States'' and replace it with either ''You must demonstrate that you were a victim of a severe form of trafficking as defined by 22 U.S.C. 7102'' or with the full definition of the term ''a severe form of trafficking in persons.'' The other commenter also suggested adding the statutory reference for the definition of ''a severe form of trafficking in persons'' so applicants could easily review the statutory definition.

Response: DHS declines to include the statutory citation but, as recommended, already included the actual language of the definition from 22 U.S.C. 7102 in the revisions to the Form I–914 Instructions published on December 2, 2021, and February 27, 2017, in conjunction with the 2016 interim rule. To provide an even more complete definition, DHS also added further detail from the definition of sex trafficking included at 22 U.S.C. 7102. *See* new page 8, ''Evidence to Establish T Nonimmigrant Status,'' second items 1–2.

Comment: One commenter suggested adding language to the section ''Evidence of Cooperation with Reasonable Requests from Law Enforcement.'' The commenter recommended adding after the statement that USCIS makes the decision of whether the applicant meets the eligibility requirements for T nonimmigrant status: ''regardless of whether LEA chooses to investigate or prosecute the trafficking crime.'' The commenter wrote that the proposed language would further clarify that USCIS makes the final determination about whether an applicant is eligible for T nonimmigrant status and provide additional reassurance to law enforcement agencies that their declarations are not determinations of an individual's eligibility to obtain T nonimmigrant status.

Response: In DHS's view, the proposed language does not achieve the commenter's goal, and DHS believes the existing language is sufficient on this point; therefore, DHS declines to adopt this recommendation.

Comment: One of the commenters recommended deleting from the ''Evidence to Establish T Nonimmigrant Status'' section, language instructing applicants to describe their attempts to obtain a Form I–914, Supplement B if one was not included with their Form I–914. The commenter wrote that there is no requirement in statute or the 2016 interim rule regulations requiring this information and that this instruction is inconsistent with the 2016 interim rule's clarification that Form I–914, Supplement B Declarations will be given ''no special weight.''

Response: This suggestion was resolved by revisions to the Form I–914 Instructions published on February 27, 2017, in conjunction with the 2016 interim rule. To provide additional clarity, however, DHS is adding guidance to the Form I–914 Instructions at new page 8, ''Evidence of Cooperation with Reasonable Requests from Law Enforcement,'' that applicants are not required but may choose to provide evidence of their reasons for not submitting or attempting to obtain a Form I–914, Supplement B. In DHS's experience, if applicants choose to include this information, it can be helpful to adjudicators in understanding the full details of an applicant's claim and their engagement with law enforcement.

Comment: One commenter requested DHS update items 10–11, which directed applicants to discuss the harm or mistreatment they fear if removed from the United States and the reasons for the fear. The commenter stated that the factors detailed in 8 CFR 214.11(a) (redesignated here as 8 CFR 214.201) are broader than ''harm'' or ''mistreatment'' and that the current instructions fail to detail the types of extreme hardship involving unusual and severe harm contemplated by the 2016 interim rule.

Response: DHS acknowledges that this item's phrasing could be revised to ensure that applicants do not believe that USCIS only considers extreme hardship factors related to feared harm or mistreatment. Accordingly, DHS is revising the form to direct applicants to include information on the hardship that they believe they would suffer, including harm or mistreatment as examples. For conciseness, DHS has also combined items 10 and 11. DHS has also revised the other factors for consistency with the new regulatory text, discussed further below. *See* new page 9, ''Personal Statement,'' item 3.

The following suggestions were resolved by subsequent revisions to the Form I–914 Instructions:

- Page 1, ''Who May File this Form?,'' item 1(C), next to ''under the age of 18:'' insert the following text: ''or is asserting an exception due to physical or psychological trauma;''
- Page 1, ''Who May File this Form?,'' number 2, insert language to reflect T–6 classification;
- Page 1, ''Who May File This Form?,'' add language to the heading to clarify that principal applicants can file for their eligible family members at any time after the initial T–1 application has been filed and that the principal applicant need not be granted T–1 nonimmigrant status before they can file for their eligible family members;
- Page 7, ''Initial Evidence'' and throughout the form, delete references to a requirement to submit passport photos;
- Page 7, ''Evidence to Establish T Nonimmigrant Status,'' section 1, delete ''You must demonstrate that you were brought to the United States . . .'';
- Page 8, ''Evidence of Cooperation with Reasonable Requests from Law Enforcement,'' add language that if an applicant does not provide Form I–914, Supplement B, they must provide additional evidence, which can be in the form of a declaration to show victimization and attempted cooperation with law enforcement;
- Page 8, ''Personal Statement,'' delete item 2 that directed applicants to provide information on ''the purpose for which [they] were brought to the United States'';
- Page 8, ''Personal Statement,'' delete item 6 requesting information on the length of time the applicant was detained by the traffickers because there is no requirement that the victim be detained in order to qualify for T nonimmigrant status;
- Page 8, ''Personal Statement,'' delete item 9, instructing applicants to indicate why they were unable to leave the United States after being separated from the traffickers;
- Regarding the discussion of privacy in the instructions, add examples of the entities to which an applicant's information could be disclosed under 8 U.S.C. 1367;
- Throughout the instructions, delete distinctions between primary and secondary evidence, consistent with 2016 interim rule's elimination of this distinction; and
- Throughout the instructions, insert language to include the T–6 classification.

Form I–914, Supplement B

One commenter provided suggested revisions to the Form I–914, Supplement B. It is not clear which version of the form the commenter refers to in its suggestions. In discussing the commenter's proposed edits, DHS will use references to the version of the Form I–914, Supplement B entitled, ''(I–914B) Supplement B, Declaration of Law Enforcement Officer for Victim of Trafficking in Persons 1.9.2017'' in the

rulemaking docket. The commenter made the same request it made with respect to Form I–914 and Form I–914, Supplement A to expand the options for answering the question on gender on page 1, part A, ''Victim Information.'' DHS will make the suggested revision to the question about gender for the same reasons discussed above in DHS's response to comments to Form I–914.

Comment: The commenter recommended that at page 3, part E, ''Family Members Implicated in Trafficking,'' in the question regarding whether the applicant believes that their family members were involved in the applicant's trafficking to the United States, DHS delete the phrase ''to the United States.'' The commenter noted that the statutory requirement for eligibility is that the victim be physically present on account of trafficking and that there is no requirement that the trafficker trafficked the victim to the United States or brought the person to the United States for the purpose of trafficking.

Response: DHS agrees with the comment and is revising the question accordingly. *See* new page 4, part 5, ''Family Members Implicated in Trafficking,'' question 1.

The following suggestion was resolved by subsequent revisions to the Form I–914, Supplement B and is maintained in the form revision published with this rule:

- Page 2, part C, ''Statement of Claim,'' item 1, add the words ''patronizing, or soliciting'' after ''obtaining'' to reflect statutory changes made by the JVTA to the definition of sex trafficking codified at 22 U.S.C. 7102 and reflected in the definition of sex trafficking in the 2016 interim rule at 8 CFR 214.11(a).

Form I–914, Supplement B Instructions

One commenter made several requests to revise the Form I–914, Supplement B Instructions to the version entitled, ''(I–914B) Instructions for Supplement B, Declaration of Law Enforcement Officer for Victim of Trafficking in Persons 1.9.2017.''

Commenter: Regarding the first paragraph included on page 1, in the section, ''What is the Purpose of this Form?,'' the commenter recommended DHS add language that ''a formal investigation or prosecution is not required in order for a LEA to complete an endorsement.'' The commenter also suggested that DHS move to the beginning of the second paragraph under this heading the language that USCIS, not the LEA, makes the decision regarding whether the applicant meets the eligibility requirements for T nonimmigrant status. The commenter wrote that some law enforcement officers believed that criminal charges or convictions were needed before Form I–914, Supplement B could be signed and that signing a Supplement B would lead to the automatic approval of an immigration benefit.

Response: The commenter's first suggestion was resolved by revisions to the Form I–914, Supplement B Instructions published on February 27, 2017, in conjunction with the 2016 interim rule. The instructions on page 1 in the third paragraph under the heading, ''When Should I Use Form I–914, Supplement B?'' clearly state that a formal investigation is not a requirement for an LEA to sign the form. The instructions also state in the first paragraph that a formal investigation or prosecution is not required for an LEA to complete the form. DHS declines to make the commenter's recommendation to move the language about USCIS' role in the adjudication process. DHS believes it is appropriate to describe the purpose of Form I–914, Supplement B before clarifying the respective roles of USCIS and the LEA signing the form. *See* new page 1, ''When Should I Use Form I–914, Supplement B?''.

Comment: At page 1 ''When Should I Use Form I–914, Supplement B,'' and at page 2, part C, ''Statement of the Claim,'' item 1, the commenter suggested adding the statutory citation for the definition of ''a severe form of trafficking in persons'' when explaining that to qualify for T nonimmigrant status, an applicant must meet that definition. *See* TVPA 103, 22 U.S.C. 7102. The commenter wrote that some officers interpret ''severe'' as extremely cruel or egregious activity or to mean the length of time in trafficking. The commenter wrote, for example, that a law enforcement officer had stated that 2 months of involuntary servitude was ''not severe enough'' to be trafficking. Other officers, the commenter continued, have stated that human trafficking means sex trafficking and have not recognized labor trafficking survivors as victims.

Response: DHS agrees it is important for LEAs to understand the term but declines to include the statutory citation to TVPA section 103, 22 U.S.C. 7102. The instructions refer the reader to the ''Statement of Claim'' section to read a definition, which includes a plain language definition that incorporates relevant text from the statute. *See* new page 2, part 3, ''Statement of Claim,'' item 1.

Comment: The commenter suggested at page 2, ''General Instructions,'' part A, ''Victim Information,'' number 1, that DHS remove from the instructions the text, ''as shown on his or her birth certificate or legal name change document,'' for the same reasons discussed above in the section on the Form I–914 Instructions.

Response: DHS has revised the language in a similar manner as the Form I–914 Instructions. The language now refers to a ''birth certificate, passport, or other legal document.'' As discussed above in the context of the same suggestion with respect to Form I–914 Instructions, it is important to provide clear instruction on what name USCIS is requesting. Neither this explanation nor the question on Form I–914, Supplement B indicate that the applicant must submit a specific document to obtain T nonimmigrant status or for law enforcement to sign a Form I–914, Supplement B. *See* new page 2, part 1, ''Victim Information,'' item 1.

Comment: The commenter suggested that at page 2, part B, ''Agency Information,'' number 1, DHS revise the discussion of certifying agencies to mirror language in the preamble to the 2016 interim rule and to include other agencies, such as the U.S. Department of Labor, that have the authority to provide a Form I–914, Supplement B.

Response: DHS agrees that the language in this section is inconsistent with the definition of LEA at 8 CFR 214.201 (previously 8 CFR 214.11(a)). Although DHS did not include every example of a certifying agency, DHS revised the Form I–914, Supplement B Instructions for consistency with the language in new 8 CFR 214.201 and included a cite to the new regulation. *See* new page 2, part 2, ''Agency Information,'' item 1.

The following suggestions were resolved by revisions to the Form I–914, Supplement B Instructions published on February 27, 2017, in conjunction with the 2016 interim rule, and/or in the December 2, 2021, publication:

- Page 3, part C.1.D, ''Statement of Claim,'' delete the option for law enforcement officers to certify that they believe the individual is not a victim of trafficking.

- Page 3, part D, ''Cooperation of Victim,'' add language clarifying that if an applicant is unable to cooperate with LEA requests due to physical or psychological trauma or age, ''the applicant must provide additional evidence.''

2. Comments on Information Collection Changes to Form I–914, Application for T Nonimmigrant Status, and Related Forms and Instructions Published With Final Rule (60 Day Notice)

DHS received several comments on the January 10, 2018, **Federal Register** notice, many of which suggested revisions to the forms and associated instructions. DHS responds to those recommendations for each form, supplement, or instructions. DHS does not respond to comments outside the scope of the information collection.

Form I–914

Comment: A few commenters requested that on page 1, part 2, ''U.S. Physical Address,'' the form include instructions informing applicants that they could provide a safe mailing address instead of their physical address. The commenters stated many victims of trafficking are involved in multiple legal systems and are often required to provide the T nonimmigrant status application to the trafficker as part of the criminal or civil discovery process. Additionally, they stated that under this rule, DHS may disclose an applicant's information to an LEA that may be required to share this information with the trafficker to comply with constitutional requirements during criminal prosecution, potentially jeopardizing the applicant's safety. The commenters further suggested that DHS could instruct them to provide just the ZIP code of their physical address to ensure that applicants can have their biometrics appointments scheduled at the nearest ASC.

Response: DHS shares the commenters' goal of ensuring the safety of applicants for T nonimmigrant status; however, DHS declines to make these changes. As discussed previously, DHS requests the applicant's physical street address for internal information purposes and consistent with requirements that individuals applying for visas register their presence. *See* INA secs. 221(b), 261, 265, 8 U.S.C. 1201(b), 1301, 1305. Although DHS appreciates the concern regarding information provided to law enforcement agencies, that authority exists for the purpose of promoting investigation and prosecution of traffickers, not to put victims of trafficking at risk. If law enforcement is obligated to turn over a T nonimmigrant status application in the context of a criminal prosecution, law enforcement and the prosecutor should take steps to ensure the victim's safety.

Comment: The same commenters recommended adding an instruction at page 2, part 2, ''Other Information,'' question 9, for applicants to check the box corresponding to the gender with which they identify. The commenters mentioned USCIS' policy to change the gender on official immigration documents, such as employment authorization cards and documentation of immigration status, if the individual can provide specifically enumerated evidence verifying a change in gender.

Response: DHS appreciates the sensitivity that surrounds the issue of gender identity. Although DHS declines to make universal changes at this time to questions and data collections regarding sex, gender, male, female, mother, father, sister, brother, and other gender-related terms, as discussed above, DHS will add a third gender identity option to the Form I–914 and related forms.

Comment: On page 3, part 4, ''Additional Information About Your Application,'' questions 3.b. and 4.b., commenters suggested changes to the instruction to provide an explanation and supporting documentation for the answers to the questions. The commenters recommended deleting language indicating that the applicant should attach documents in support of their claim to be a victim of a severe form of trafficking in persons and the specific facts supporting the claim. The commenters also suggested deleting instructions in 3.b. and 4.b. to use extra space on the form to provide explanations for affirmative answers to questions regarding the physical presence requirement and the extreme hardship requirement. Finally, they recommended adding an instruction that the personal narrative statement describing the trafficking also address each eligibility requirement for T nonimmigrant status.

Both commenters stated the current language appears to suggest that a one-sentence explanation will be sufficient evidence of the physical presence and extreme hardship eligibility requirements. They also expressed that the recommended additional language would help ensure that the personal narrative sufficiently addresses all eligibility requirements. One of the commenters stated it has observed an increase in RFEs for lack of sufficient information in the initial T visa application on these two eligibility requirements. The commenter stated that the additional language could reduce the number of RFEs and delays in processing time.

Response: DHS agrees that it is important for applicants to provide sufficient information regarding their eligibility for T nonimmigrant status in their initial application. DHS already deleted the instruction included in 3.b. and 4.b., which it agrees may not have encouraged applicants to provide sufficient information as to the physical presence and extreme hardship eligibility requirements. DHS also already included an instruction to address the eligibility requirements in the personal narrative statement. DHS has deleted the instructions in questions 1, 3, and 4 requested the applicant attach evidence or documentation; instead, DHS has included in the introductory paragraph that the applicant should attach evidence and documents to support their claim if they answer ''Yes'' to questions 1–4. The applicant bears the burden of establishing their eligibility for T nonimmigrant status and available documentation corroborating the applicant's claim should be provided.

Comment: About page 3, part 4, ''Additional Information About Your Application,'' question 5, which asks whether the applicant has reported the crime they claim to have suffered, one commenter suggested DHS change the word ''crime'' to ''trafficking.'' The commenter stated this change will clarify that applicants must report a crime that includes trafficking as at least one central reason for the commission of the crime.

Response: DHS agrees and has already changed the wording to ''trafficking crime,'' which is more specific and appropriate, given the requirement that the applicant be a victim of ''a severe form of trafficking in persons'' and comply with any reasonable law enforcement requests for assistance in an investigation or prosecution of a crime involving acts of trafficking in persons. *See* INA sec. 101(a)(15)(T)(i)(I), (III), 8 U.S.C. 1101(a)(15)(T)(i)(I), (III).

Commenter: Regarding page 3, part 4, ''Additional Information About Your Application,'' commenters suggested adding the parenthetical ''(if any)'' after the question requesting the criminal case number. The commenters stated that the recommended language would provide clarification that a police report case number is not required and that it would reinforce that a law enforcement declaration or documentation of criminal investigation is not required to file for a T visa. One of the commenters stated it frequently encounters the misconception that a law enforcement declaration is required to apply for a T visa, causing some survivors and advocates to unnecessarily delay filing their application until a law enforcement report is made or a

criminal investigation is instigated. The commenters also suggested deleting the request for an explanation if the applicant did not report to law enforcement. They instead suggested adding in an instruction to provide the explanation in the applicant's personal narrative. Two commenters stated that question 7 suggests that the explanation of why the survivor has not reported the trafficking crime can be achieved by a brief sentence and makes it appear as if reporting to law enforcement is optional rather than reinforcing the need for the applicant to raise either the trauma-based exception or age-based exemption to the requirement to comply with reasonable law enforcement requests.

Response: DHS agrees with the commenters' suggestion regarding the case number and has already revised the form to state that the applicant should indicate ''the case number assigned, if any.'' *See* new page 3, part 3, question 5. However, DHS declines to remove the requirement that an applicant explain why they did not report the crime. The current form indicates that an applicant should explain the circumstances. Applicants have the option to either provide an explanation on the form or in their personal narrative statement. DHS does not see the need to further specify where the explanation is included.

Comment: Regarding page 3, part 4, ''Additional Information About Your Application,'' questions 8 and 9 (now questions 6 and 7), two commenters recommended deleting the instruction for minors under 18 years of age to skip question 9.b. (now question 7) related to whether the minor reported their trafficking to law enforcement. The commenters stated that although minors are exempt from the general requirement to comply with reasonable law enforcement requests for assistance in the investigation or prosecution of acts of trafficking, many minor applicants do report their trafficking victimization to law enforcement and do not need to skip the question. The commenters further stated that forcing minors to skip question 9.b. regarding cooperation with law enforcement may jeopardize their opportunity to adjust status to lawful permanent residence early based on the criminal investigation or prosecution having been completed. The commenters also stated the language creates unnecessary confusion that only those who are minors at the time of filing Form I–914 are eligible for an exemption to the requirement to comply with reasonable law enforcement requests when USCIS has stated that minors under 18 at the time of the victimization can meet this exemption.

Response: DHS agrees with the commenter's stated rationale and has deleted this instruction.

Comment: At page 4, part 4, ''Additional Information About Your Application (continued),'' questions 14.a.–14.b. (now question 9), commenters suggested deleting both questions regarding the circumstances of the applicant's most recent entry. Two commenters stated that question 3.a. (now question 3) already sufficiently addressed the physical presence eligibility requirement and question 14.a. confuses the physical presence eligibility requirement and reinforces existing physical presence misconceptions. The first misconception is that an applicant's latest entry must be based on the trafficking and does not recognize that there are other alternative exceptions to satisfy the physical presence requirement when the latest entry is not related to the trafficking. Commenters wrote that question 14.a. also reinforces the misconception that a victim of severe form of trafficking in persons is required to be trafficked across the United States border. One commenter stated that question 14.a. misstates the physical presence eligibility requirement. Neither the statutory language nor the regulatory language requires that an applicant's last entry be related to the trafficking.

Response: As discussed previously in response to comments on Form I–914 published with the IFR, the commenters are correct with respect to the statutory eligibility requirements, *see* INA sec. 101(a)(15)(T), 8 U.S.C. 1101(a)(15)(T); however, including these questions does not mean that an applicant must show their last entry was related to the trafficking suffered. The questions help provide information to adjudicators about the general circumstances of the applicant's most recent arrival, whether related to the trafficking or not, and information regarding the applicant's immigration history. All this information assists adjudicators in understanding the full history and facts of an applicant's claim. Accordingly, DHS declines to delete the questions; however, DHS has combined the two into a new question at new page 4, part 3, item 9.

Comment: At page 4, part 5, ''Processing Information,'' the introductory paragraph instructs applicants to answer affirmatively any question that applies even if their records were sealed, otherwise cleared or the applicants have been told they no longer have a record. Commenters requested DHS add an instruction that applicants could answer ''no'' to questions 1.b. through 1.f. and ''n/a'' to questions 2–5 regarding their criminal history if they had been granted vacatur. The commenter stated that vacatur is a form of relief for trafficking survivors who were forced to commit illegal acts by their traffickers and that, unlike expungement, vacatur is the recognition from the criminal justice system that a mistake was made, that the accused was wrongfully accused and in fact is a victim, and that the arrest or conviction should never have occurred. The commenters expressed that vacatur completely eradicates a survivor's criminal history as if the arrest and conviction had not occurred, instead of excusing criminal behavior; vacatur also recognizes that victims who did not have the requisite *mens rea* to commit the criminal act should not be penalized. They also stated that the current instructions are confusing and may lead to the inadvertent or illegal disclosure of state court records where state confidentiality laws may prevent disclosure of juvenile state court files without a court order. One of these commenters also requested that DHS delete instructions to answer each question about the applicant's criminal history regardless of whether the criminal records were sealed or otherwise cleared.

Response: DHS recognizes that victims of human trafficking may be forced to commit illegal acts at the hands of their traffickers; however, DHS declines to make the requested changes because having all information relevant to an applicant's trafficking experience is helpful to the adjudication. Applicants have an opportunity to explain in their personal statement and through their supporting evidence, the circumstances of any criminal activity. As the instructions state, answering ''yes'' to the questions regarding criminal conduct and inadmissibility will not necessarily lead to a denial of the application.

Comment: Another commenter requested DHS add an instruction that applicants could answer questions in the negative if their response related to prostitution that they were forced to engage in by their trafficker. The commenter stated the question could lead to filing unnecessary inadmissibility waivers, fee waivers, and additional explanations.

Response: DHS responded to a similar comment above. As discussed above, the question is appropriate as written because engaging in prostitution is a ground of inadmissibility, whether or not connected to victimization. If the

applicant has engaged in this type of conduct and the prostitution was connected to the trafficking, the applicant can request a waiver but must still answer the question to address possible inadmissibility. USCIS will examine all the evidence submitted and decide on a case-by-case basis whether to grant any waiver request.

Comment: Regarding page 4, part 5, ''Processing Information,'' question 1.a., one commenter requested DHS delete the question which asks whether the applicant has ever committed a crime or offense for which the applicant has not been arrested. The commenter stated the question was vague and overbroad and goes beyond the statutory grounds of inadmissibility at section 212(a)(2) of the INA, 8 U.S.C. 1182(a)(2). The commenter further stated that the question would encompass very minor criminal infractions as well as serious criminal activity, and that the question assumes applicants have sufficient legal knowledge to answer accurately.

Response: DHS declines to delete the question. As discussed previously in response to a similar comment above, answers to this question are useful for adjudicators in gathering relevant information related to determining admissibility and assessing the applicant's truthfulness. In addition, in DHS's experience, answers to the question have provided information relevant to the applicant's trafficking experiences.

Comment: One commenter stated that DHS's changes to the inadmissibility questions dramatically expand the scope of information sought without identifying the need for the expansion. According to the commenter, these changes appear intended to bolster an adjudicator's ability to deny applications on attenuated discretionary grounds. The commenter stated that this was especially troubling given that several of these expanded queries relate to potential inadmissibility grounds or other discretionary concerns that are often incidental to the trafficking or the victim's attendant vulnerabilities that helped precipitate the trafficking victimization.

Response: DHS will not change the wording or delete any of the inadmissibility questions as a result of this comment. The changes to these questions do not change the meaning of any of the statutory grounds of inadmissibility but were meant to make the questions less legalistic and use plain language to facilitate greater understanding of their meaning. The changes were also made to promote consistency with changes to questions on admissibility used in other USCIS forms.

Comment: Regarding page 5, part 5, ''Processing Information,'' question 7, one commenter suggested making a change to the inadmissibility question related to whether the applicant ever imported prostitutes. The commenter stated that the phrase ''imported prostitutes'' was dehumanizing and insensitive, especially because many victims who suffered sex trafficking will be using this form and suggested, in the alternative, the phrase ''prostituted persons'' or ''persons in prostitution.''

Response: DHS declines to make this change. The question uses the statutory language from section 212(a)(2)(D) of the INA, 8 U.S.C. 1182(a)(2)(D) and is not meant to ascribe any characteristics to the people referenced.

Comment: At page 8, part 7, ''Applicant's Statement, Contact Information, Declaration, Certification, and Signature,'' commenters requested DHS add to the paragraph on the authorization of release of information that ''any disclosure shall be in accordance with the VAWA confidentiality provisions at 8 U.S.C. 1367 and 8 CFR 214.14(e).'' One commenter stated this inclusion would clarify and reinforce the applicability of these confidentiality provisions.

Response: DHS agrees that it is important that applicants understand that their release of information is subject to the confidentiality provisions at 8 U.S.C. 1367 and is adding in language regarding these provisions.

Comment: One commenter requested DHS not restrict the forms from editing to allow users to make comments directly on the form. The commenter is a national technical assistance provider and uses forms to provide training and technical assistance by creating comments and guidance on how to complete specific sections of the forms.

Response: DHS declines to make any changes in response to the comment. Nevertheless, stakeholders can obtain an unlocked version of the form for training purposes by contacting the information contact for this rule.

The following suggestion was resolved by subsequent revisions to the Form I–914:

- Page 2, part 2, ''General Information About You (Victim),'' ''Information About Your Last Arrival in the United States,'' questions: 14.b.–14.f, add the parenthetical ''(if any)'' after the requests for recent passport or travel document information.

Form I–914, Supplement A

DHS received several comments on Form I–914, Supplement A, some of which were duplicative of comments received on Form I–914. For the following comments, DHS declines to make the requested change for the same rationale stated in response to suggestions to revise Form I–914:

- Page 1, part 2, U.S. Physical Address, 2.a.–2.e, include instructions informing applicants they could provide a safe mailing address instead of their physical address;
- Page 2, part 3, ''Current or Intended U.S. Physical Address,'' 4.a.–4.e., include instructions informing applicants they could provide a safe mailing address instead of their family member's physical address;
- One commenter made a general comment about DHS's proposed changes to the inadmissibility questions, stating that the changes dramatically expand the scope of information sought without identifying the need for the expansion;
- One commenter requested DHS not restrict the forms from editing to allow users to have the capability to make comments directly on the form.

Comment: Two commenters repeated their comment on the Form I–914 that DHS should add language at page 8, ''Applicant's Statement, Contact Information, Declaration, Certification, and Signature,'' to the paragraph on the authorization of release of information that ''any disclosure shall be in accordance with the VAWA confidentiality provisions at 8 U.S.C. 1367 and 8 CFR 214.14(e).''

Response: For the reason discussed above, DHS agrees to add language referencing the confidentiality protections included in 8 U.S.C. 1367.

The following suggestions were resolved by subsequent revisions to the Form I–914, Supplement A:

- Page 3, part 3, ''Information About Your Family Member,'' question 16 (asked for ''Your Current Immigration Status or Category''), change the question to add ''Family Member's'' after ''Your'' and delete the reference to ''Category'';
- Page 4, part 3, ''Additional Information About Your Family Member,'' question 37 directs the applicant to answer questions 38–40.g. if the applicant answers question 37 affirmatively and to skip to item 41.a. if the applicant answers question 37 negatively. One commenter stated that it was not clear whether applicants who respond affirmatively to the question must answer question 41.b;
- Page 4, part 3, ''Additional Information About Your Family Member,'' question 41.b., add a space to write that the family member is currently in removal proceedings;

• Page 5, part 4, ''Processing Information,'' question 15 regarding whether the family member has ever ''illicitly (illegally) trafficked or benefited from the trafficking of any controlled substance, such as chemicals, illegal drugs, or narcotics?,'' remove the reference to illegal drugs;

• Page 8, Part 5, ''Applicant's Statement, Contact Information, Declaration, Certification, and Signature,'' item 8.a., remove requirement of a signature from an applicant's family members who are not in the United States.

Form I–914 Instructions

DHS received several comments on the Form I–914 Instructions, many of which were duplicative of comments received on the Form I–914. For the following comments, DHS declines to make the requested changes for the same rationale discussed in response to comments on Form I–914:

• Page 4, part 2, ''General Information About You (Victim),'' items 4.a.–4.e., ''U.S. Physical Address,'' and items 5.a.–5.f., ''Safe Mailing Address;'' page 7, ''Specific Instruction for Form I–914, Supplement A,'' part 2, ''General Information About You (Principal Applicant (Victim)),'' items 2.a.–3.e., ''U.S. Physical Mailing Address'' and items 3.a.–3.f., ''Safe Mailing Address,'' commenters requested DHS include instructions informing applicants that could provide a safe mailing address in lieu of their physical address and just provide the ZIP code of their physical address to ensure a biometrics appointment near their physical location.

DHS provides individualized responses to the remaining comments.

Comment: Commenters recommended several changes to the description of the adult or minor children at page 2, item 2.C.3 including deleting the parenthetical phrase specifying the relationship of the adult or minor children to the applicant's family members. The commenters made a similar recommendation at page 14, ''Evidence to Establish T Nonimmigrant Status For Your Family Member,'' item 3.C. The commenters stated that applicants and advocates often struggle with understanding the ''derivative of a derivative'' category and stated that removing this language will simplify the description and avoid confusion.

Response: DHS appreciates the complex nature of this category of eligible family members and the value of simplifying instructions but believes the additional information could be helpful to applicants in confirming the meaning of the description of the eligible family members.

Comment: At page 4, part 2, ''General Information About You (Victim),'' items 1.a.–1.c., ''Your Full Legal Name,'' and page 7, part 2, ''General Information About You (Principal Applicant (Victim)),'' items 1.a.–1.c., ''Your Full Legal Name,'' commenters recommended DHS delete its request for the applicant's and family member's legal name as shown on the individual's ''birth certificate or legal name change document.'' The commenter stated that some trafficking survivors do not have access to identity documents with the applicant's legal name and that the current text could create an evidentiary barrier for victims who do not have these documents.

Response: As discussed previously in response to this same comment to the Form I–914 instructions published on December 20, 2016, it is essential for DHS to know the name of the applicant or their family member as it appears on official identification documents so that DHS can conduct proper background checks and ensure there is no confusion about the identity of the person receiving the status, if approved. Neither this explanation nor the questions on the form indicate that evidence of a birth certificate or legal name change document is a requirement to obtain status. DHS has already amended the language to state ''birth certificate, passport, or other legal document.'' Furthermore, the requirement does not in any way impact an applicant's evidentiary burden.

Comment: At page 4, part 2, ''General Information About You (Victim),'' item 9, which requests the applicant's gender, commenters consistent with comments to Form I–914 and Form I–914, Supplement A, requested an instruction regarding an additional checkbox for applicants who identify as transgender or, as one commenter stated, ''a non-binary option for LGBTQI applicants.'' Another commenter also made a similar comment at page 8, part 3, ''Information about Your Family Member,'' item 8, ''Gender.''

Response: For the rationale discussed above in response to similar comments on Form I–914, DHS will make this change.

Comment: At page 5, items 14.a.–14.f., ''Passport and Travel Document Numbers,'' commenters suggested making changes to this instruction on providing passport and travel document information to take into account the fact that trafficking survivors often do not have these documents and that having a passport is not required to apply for T nonimmigrant status. One of the commenters made a similar comment at page 10, ''Specific Instructions for Form I–914, Supplement A.''

Response: DHS agrees that many trafficking victims may lack access to passports or travel documentation, and, therefore, adds to the instructions at both pages for applicants to provide the passport and travel document information ''if applicable and if known.''

Comment: One commenter requested that DHS add a similar instruction in relation to questions about the applicant's last arrival into the United States and the applicant's current immigration status or category at page 5, item 15.–16.b., ''Information About Your Last Arrival in the United States'' and item 17, ''Current Immigration Status or Category.''

Response: DHS declines to adopt this recommendation. This information should be reasonably available to the applicant, as it does not require the applicant to have particular documents in their possession. If an applicant does not know the information, the applicant can write ''unknown'' and provide an explanation.

Comment: About page 6, part 5, ''Processing Information,'' commenters requested DHS delete instructions to answer each question about the applicant's criminal history regardless of whether the criminal records were sealed or otherwise cleared. One of the commenters also made this suggestion in reference to page 10, ''Specific Instructions for Form I–914, Supplement A,'' part 4, ''Processing Information,'' items 1.a.–44.c. Both commenters stated the language was unduly burdensome, confusing to trafficking survivors, and assumes applicants have sufficient legal knowledge to respond accurately. One of the commenters also recommended deleting the instruction at page 6, part 5, ''Processing Information,'' for applicants to answer affirmatively to the questions about their conduct, regardless of whether the actions or offenses occurred in the United States or anywhere in the world. Another commenter requested DHS add an instruction at page 6, part 5, ''Processing Information,'' that applicants could answer questions about their conduct in the negative if their conduct involved prostitution that they were forced to engage in by their trafficker.

Response: DHS declines to delete any language from these instructions. All of an applicant's prior conduct is relevant to the adjudication of their application and DHS can consider any extenuating circumstances such as forced criminal conduct or other circumstances that

may have led to the applicant's records being sealed or criminal history being cleared.

Comment: At page 7, ''Specific Instructions for Form I–914, Supplement A,'' one commenter recommended throughout that DHS replace the use of the pronouns ''his'' and ''hers'' with ''family member'' or ''derivative'' to provide more clarity to the applicant.

Response: DHS has revised the use of pronouns to be gender neutral throughout but declines to adopt this suggestion because DHS believes the use of pronouns is clear.

Comment: At page 11, ''Specific Instructions for Form I–914, Supplement B,'' one commenter suggested adding an instruction that if applicants do not submit the Form I–914, Supplement B, they should provide alternative evidence to show victimization and cooperation with law enforcement. Another commenter suggested that DHS add a similar instruction but recommended that it state that applicants ''must'' provide additional evidence to show victimization and cooperation with law enforcement. The commenters also suggested referring applicants to the section of the Form I–914, Supplement B Instructions on ''Evidence of Cooperation with Reasonable Requests from Law Enforcement'' for additional information. The commenters expressed that the language would clarify that the I–914 Supplement B is not required and is no longer considered primary evidence and would prompt applicants to consider providing alternate evidence.

Response: DHS had already included an instruction that applicants may provide other evidence and directs applicants to the relevant portion of the Form I–914, Supplement B Instructions; however, to emphasize that applicants must provide evidence to show victimization and cooperation with law enforcement, DHS has revised the language to state that an applicant ''must'' provide other evidence.

Comment: At page 11, ''What Evidence Must You Submit?,'' commenters suggested that the initial paragraph state that applicants may submit ''any credible evidence'' in accordance with 8 CFR 214.11(d)(2)(ii) (new 8 CFR 214.204). In addition, the commenters suggested adding language that the application may not be denied for failure to submit particular evidence, but only if the evidence that was submitted was not credible or otherwise failed to establish eligibility and that the ''any credible evidence'' standard is discretionary. Commenters also suggested including mention of the ''any credible evidence'' standard in the ''General Instructions'' at page 2.

Response: DHS agrees that it is important to mention the ''any credible evidence'' standard and has added language in the form instructions to describe the standard. DHS is not adding language on the standard in the ''General Instructions'' at page 2 as one mention should be sufficient.

Comment: At page 12, ''Evidence of Cooperation with Reasonable Requests from Law Enforcement,'' in the introductory paragraph, commenters requested DHS amend the sentence specifying that it is USCIS' role to decide whether the applicant meets the eligibility requirements for T nonimmigrant status. The commenter suggested DHS include the phrase ''regardless of whether [the] LEA choose[s] to investigate or prosecute the trafficking crime.'' Commenters stated that the proposed language would further clarify that USCIS has the final determination of whether an applicant is eligible for T nonimmigrant status and that this determination is not dependent on a declaration from law enforcement. One commenter added that this proposed language will provide clarity to applicants that an LEA's unwillingness to sign a Form I–914, Supplement B should not be a deterrent to filing the application for T nonimmigrant status and to provide additional reassurance to LEAs that the Form I–914, Supplement B is not a determination of an individual's eligibility to obtain T nonimmigrant status.

Response: DHS declines the suggested change. The introductory paragraph clearly states that Form I–914, Supplement B is not required, and states that eligibility for T nonimmigrant status is not dependent upon whether the LEA pursues an investigation or prosecution. It also already states that USCIS determines whether an applicant meets the eligibility requirements.

Comment: At page 16, ''Waiver of Grounds of Inadmissibility,'' commenters suggested the inclusion of the standards that USCIS uses in determining whether an applicant or their family member is eligible for a waiver of inadmissibility. The commenters stated this addition will provide clarity that the applicant may be eligible to receive a waiver and provides additional guidance on when USCIS will use its discretion to waive grounds of inadmissibility.

Response: DHS declines to make this change. The suggested language conflates two different waiver standards included in section 212(d)(3) and (d)(13) of the INA, 8 U.S.C. 1182(d)(3), (d)(13). The ''Waiver of Grounds of Inadmissibility'' section was added for contextual information. The standards and requirements for a waiver are discussed in detail on the separate inadmissibility waiver application forms. The standards and requirements that apply are too detailed and complex to include in these form instructions.

Comment: At page 16, ''What is the Filing Fee?,'' the Instructions state that there is no fee for the Form I–914 and commenters recommended adding a discussion of fees for other related forms, available fee waivers and where to find more information on these topics, to provide clear guidance on where more information can be obtained.

Response: DHS appreciates the suggestions but declines to adopt them. The information provided on fees and fee waivers for all related forms is sufficiently specified through vehicles such as the USCIS website or Form G–1055, Fee Schedule.

Comment: One commenter requested DHS include information earlier in the ''General Instructions'' on the 8 U.S.C. 1367 protections related to disclosure and to the prohibitions on using information provided solely by a perpetrator. The commenter also requested DHS include information on which agency the applicant should contact with questions or concerns about confidentiality violations.

Response: DHS believes the Instructions only need to mention the 8 U.S.C. 1367 protections once. DHS does not believe it is necessary to include information on which agency to contact if the applicant has questions or concerns about confidentiality violations because that is outside the scope of instructions for completing a form. In addition, USCIS provides information on its website on how to make a complaint about employee misconduct.

The following suggestions were resolved by subsequent revisions to the Form I–914 Instructions:

- Page 1, ''Principal Applicant,'' question 1.C., add language about enforcement agencies with the authority to detect or investigate trafficking crimes.
- Page 1, ''Who May File Form I–914?,'' item 2, ''Principal Applicant Filing for Eligible Family Members at the Same Time,'' delete the phrase ''at the same time'' from this title and the instruction, and add an instruction that the applicant may file a Supplement A with an initial application or at a later time;

• Page 3, ''General Instructions,'' ''Copies,'' delete the statement that USCIS may destroy original documents that are submitted when not required or requested;

• Page 10, part 5, ''Applicant's Statement, Contact Information, Declaration, Certification, and Signature,'' ''NOTE;'' page 11, ''Initial Evidence,'' item 4; page 11, ''Initial Evidence,'' second item 1, remove requirement that all eligible family members sign the Supplement A;

• Page 10, part 5, ''Applicant's Statement, Contact Information, Declaration, Certification, and Signature,'' ''Note;'' page 11, ''Initial Evidence,'' delete the instruction that all family members must sign Form I–914, Supplement A;

• Page 11, ''What Evidence Must You Submit?,'' delete the first two sentences of the initial paragraph, which instruct applicants to submit all evidence requested in the Instructions and warns that a failure to provide required evidence could result in a rejection or denial of the application;

• Page 15, ''Unavailable Documents,'' delete language that suggests applicants can provide secondary evidence if a required document is not available and that USCIS may require a certification from an appropriate civil authority if a necessary document is unavailable;

• Page 17, ''Processing Information,'' ''Confidentiality,'' add examples of the entities to which an applicant's information could be disclosed under 8 U.S.C. 1367.

Form I–914, Supplement B

DHS received three comments on Form I–914, Supplement B, two of which are similar to comments made on Form I–914 and Form I–914, Supplement A regarding questions about the gender of applicants and family members at page 1, part 1, ''Victim Information,'' ''Other Information About Victim,'' question 8. For the same reasons discussed above, DHS will instruct that responses to questions about the applicant's gender on Form I–914, Supplement B reflect the gender with which the applicant identifies.

The following suggestion was resolved by subsequent revisions to the Form I–914, Supplement B:

• Page 2, part 3, ''Statement of Claim,'' ''Type of Trafficking,'' question 1.e., remove the option for law enforcement to indicate a belief that the applicant is not a victim of trafficking.

Form I–914, Supplement B Instructions

Comment: For page 1, ''What is the Purpose of Form I–914, Supplement B?,'' ''Description,'' commenters suggested DHS move to the beginning of the second paragraph under this heading the language that USCIS, not the LEA, makes the decision regarding whether the applicant meets the eligibility requirements for T nonimmigrant status and add a phrase that signing a Supplement B does not lead to automatic approval of the T visa application. The commenters wrote that the changes would correct the misconception that criminal charges or convictions were needed before Form I–914, Supplement B could be signed and that signing a Supplement B would lead to the automatic approval of an immigration benefit. Another commenter suggested adding language that officers can sign the Form I–914, Supplement B even if there is no investigation opened. That commenter stated that the existing language in the Form I–914, Supplement B Instructions has not been sufficient to empower some law enforcement agents to sign the Form I–914, Supplement B if a prosecuting authority decides not to open a case. The commenter also suggested DHS add detailed language about the compliance with reasonable law enforcement requests requirement to give examples of sufficient cooperation and include language that there is a presumption of compliance for applicants who reported the trafficking incident and had not denied any reasonable requests for assistance.

Response: For reasons discussed previously in response to similar suggestions when the Form I–914, Supplement B Instructions were published on December 20, 2016, DHS declines to make these changes. The instructions on page 1 in the third paragraph under the heading, ''When Should I Use Form I–914, Supplement B?'' clearly state that a formal investigation is not a requirement for an LEA to sign the form. DHS does not believe it is necessary to provide more detail regarding the compliance with reasonable law enforcement requests requirement. Law enforcement decides at its own discretion whether to provide a Form I–914, Supplement B, and an applicant does not have to submit Form I–914, Supplement B to receive T nonimmigrant status. The regulations do not include a presumption of compliance with reasonable law enforcement requests, and DHS declines to include language to that effect in the Form I–914, Supplement B Instructions.

DHS also declines to adopt the recommendation to move the language about USCIS' role in the adjudication process. DHS believes it is appropriate to describe the purpose of Form I–914, Supplement B before clarifying the respective roles of USCIS and the LEA signing the form. DHS also does not believe it is necessary to add a phrase that signing does not lead to automatic approval of the application for T nonimmigrant status. The Form I–914, Supplement B Instructions already state that by providing a Supplement B, the LEA is not giving an immigration benefit.

Comment: For page 1, ''When Should I Use Form I–914, Supplement B?,'' one commenter requested that DHS not use the phrase ''on account of'' but ''as a result of'' when describing the physical presence on account of trafficking eligibility requirement. The commenter stated that the phrase is a legal term of art that will generate confusion and will dissuade law enforcement agents from signing a Form I–914, Supplement B.

Response: DHS agrees with the commenter and has changed this language for consistency.

Comment: Regarding page 3, part 1, ''Victim Information,'' items 1.a.–1.c., ''Full Legal Name of Victim,'' commenters repeated a request made in connection with the Form I–914 and the Form I–914, Supplement A to delete instructions to provide the applicant's name as shown on their birth certificate or legal name change document.

Response: As discussed previously, DHS declines to make this change, but has revised the question to include ''other legal documents.''

Comment: Regarding page 3, part 1, ''Victim Information,'' item 8, ''Gender,'' commenters provided similar suggestions to those made on Form I–914 and Form I–914, Supplement A regarding providing additional options to respond to the question about the applicant's gender.

Response: For the same reasons discussed previously, DHS will instruct that the response reflect the gender with which the applicant identifies.

Comment: For page 4, ''General Instructions,'' items 10.–12.b., one commenter stated that asking for the case number, case status, and, if applicable, the FBI Universal Control Number or State Identification Number is likely to dissuade LEAs from signing a Form I–914 Supplement B because they will believe they need to have an identifying case number associated with the investigation. The commenter suggested adding language that to sign a Form I–914, Supplement B, an investigation consisting of an initial report is sufficient, and no case number is required.

Response: DHS does not believe that asking for this information will dissuade LEAs from providing a Form I–914,

Supplement B. The ''General Instructions'' at page 2 make it clear that if the LEA does not have certain information, the LEA can leave the field blank. The Form I–914, Supplement B Instructions at page 1 clarify that the LEA does not necessarily need to formally launch an investigation or file charges to provide a Form I–914, Supplement B. In addition, the instructions indicate this information should be filled out only if applicable. DHS will retain the question because the case identifying information is helpful if USCIS needs to inquire further with the LEA about the case.

Comment: About page 4, part 3, ''Statement of Claim,'' items 1.a.–1.e., ''Type of Trafficking,'' one commenter stated that the options available to LEAs to choose which type of trafficking occurred do not account for sex or labor trafficking that did not result in a completed sex act or completed labor/service.

Response: DHS agrees and has added a statement clarifying that victims of attempted labor or sex trafficking can be considered victims of a severe form of trafficking in persons.

Comment: Regarding page 4, part 3, ''Statement of Claim,'' item 2, ''Victimization Description,'' LEAs are instructed to identify the relationship between the victimization and the crime under investigation or prosecution. One commenter requested the instructions clarify that the LEA's own investigation independently satisfies the threshold and that a separate investigation opened by a prosecutor is not required.

Response: DHS feels that the Instructions do not suggest the need for a separate investigation or prosecution and do not need to be changed.

Comment: At page 4, part 3, ''Statement of Claim,'' items 3.a.–3.b., ''Fear of Retaliation or Revenge,'' the instruction asks LEAs to indicate whether the applicant has expressed any fear of retaliation or revenge if removed from the United States. One commenter stated that it was unlikely that many victims will feel comfortable enough to provide much detail to LEAs about why they fear returning to their home country but did not recommend any specific changes.

Response: DHS does not believe any change is necessary. In some cases, trafficking victims may share information with LEAs about what they fear will happen to them if removed from the United States. In other cases, as the commenter stated, they may not. The instruction asks for the information if it exists and, if it is shared, it can help adjudicators understand the full facts of a case. If the LEA has no information about this topic and applicants want to show they have such a fear, they can submit other relevant credible evidence.

Comment: Regarding page 5, part 5, ''Family Members Implicated in Trafficking,'' one commenter expressed that requiring LEAs to include the names of family members ''who they believe to be affected by the trafficking may instill fear and uncertainty in a survivor's mind.'' The commenter stated that applicants may not want to disclose this information initially, and it could come out later creating the appearance of an inconsistency and affect their credibility.

Response: DHS understands trafficking victims may be hesitant to admit that a family member was involved in their trafficking; however, DHS will maintain this question. Again, the Form I–914, Supplement B Instructions do not require this information, and whether the information exists does not directly impact an applicant's eligibility for T nonimmigrant status. However, if an LEA has this information, it can help USCIS understand the full facts of an applicant's victimization. The information may also be relevant to the family member's eligibility for derivative T nonimmigrant status, as section 214(o)(1) of the INA, 8 U.S.C. 1184(o)(1), provides that an individual is ineligible for admission to the United States as a T nonimmigrant if there is substantial reason to believe they have committed an act of a severe form of trafficking in persons. If the family member is an immigrant USCIS may be able to use the information provided to deny or revoke immigration status if appropriate.

The following suggestions were resolved by subsequent revisions to the Form I–914, Supplement B Instructions:

- Page 1, ''What is the Purpose of Form I–914, Supplement B?,'' ''Description,'' add language that ''a formal investigation or prosecution is not required in order for a LEA to complete an endorsement'';
- Page 3, part 1, ''Victim Information,'' items 4–6, add that LEAs should provide this information if known;
- Page 4, part 3, ''Statement of Claim,'' items 1.a.-1.e., ''Type of Trafficking,'' remove the option for an LEA to indicate that the applicant for T nonimmigrant status is not a victim of trafficking;
- Page 4, part 4, ''Cooperation of the Victim,'' add that the victim must provide additional evidence if they claim they are unable to cooperate with law enforcement requests for assistance.

3. Changes to Form I–914, Form I–765, and Related Forms and Instructions Published With Final Rule

a. Discretionary and Technical Changes to Form I–914 Package

i. Overarching Changes

To improve readability, DHS made non-substantive edits to questions, headings and narrative in the forms and the associated instructions. DHS revised all forms and associated instructions to use gender neutral language. DHS has also updated all references to the regulations.

Throughout the forms and instructions, DHS has revised the reference to law enforcement officials to match the new definition found at new 8 CFR 214.201.

On the Form I–914 and Form I–914, Supplement A, in the ''For USCIS Use Only'' section, DHS changed its reference from ''Conditional Approval'' to ''Waitlisted,'' which is a more accurate descriptor for this internal process.

ii. Specific Form Changes

Form I–914

At new page 3, part 3, ''Additional Information,'' item 6, DHS has revised the question to read that the applicant *was* under 18 years of age at the time at least one of the acts of trafficking occurred, and as discussed above, has removed the parenthetical instructing the applicant to skip item 7 if they answered yes to item 6. The relevant inquiry is the applicant's age at the time at least one of the acts of trafficking occurred, not at the time of filing, as clarified in the Preamble and the regulations. Similarly, in item 7, DHS has added that an explanation of why an individual did not comply with reasonable requests for assistance is only required if the individual was over the age of 18 at the time one of the acts of trafficking occurred.

At new page 7, part 5, ''Information About Your Family Members,'' DHS has added ''Information About Your Spouse'' to item 1 to clarify that the information being requested (date of birth, country of birth, etc.) is for the applicant's spouse. DHS has also renumbered the items, and under ''Information About Your Children,'' has deleted ''relationship,'' as the relationship should always be ''child.''

DHS deleted language at the end of part 5 of Form I–914 regarding completion of Form I–914, Supplement A. This language is unnecessary to include in the form as the Form I–914 Instructions provide clear guidance on the topic.

As previously discussed, in updating standard language at new page 9, ''Applicant's Declaration and Certification,'' DHS added language so that the applicant understands that any disclosure will be in accordance with the confidentiality protections contained in 8 U.S.C. 1367 and new 8 CFR 214.216.

At new page 11, part 9, ''Additional Information,'' DHS has added ''if any'' after A-Number and instructed the applicant to sign and date each additional sheet of paper included with the application. These additions will help ensure the integrity of additional sheets included with the application.

Form I–914, Supplement A

DHS has revised the name of the Supplement A to ''Application for Derivative T Nonimmigrant Status,'' as the prior title incorrectly implied that the application could only be filed by family members of T–1 recipients, rather than T–1 applicants *or* recipients.

As discussed above, DHS has combined part 1 and part 2, such that they both are now under new part 1, ''Family Members for Whom You Are Filing,''

At new page 2, part 4, ''Information About Your Family Member,'' DHS has revised item 2, ''Other Names Used'' to state that the applicant should provide any other names ''your family member has used'' rather than ''you have used.'' This clarifies the information being sought.

At new page 5, part 5, ''Processing Information,'' DHS has revised the first paragraph for clarity.

DHS made the same additions in the Form I–914, Supplement A regarding release of information to new page 9, ''Applicant's Declaration and Certification'' that it made to the same section in Form I–914 and for the same reasons as discussed in the previous section discussing changes to Form I–914. In the same section, at the end of the paragraph just prior to the signature, DHS has added a note stating that if a family member is in the United States, they must verify the information in Supplement A and sign the Supplement A. Stakeholders had indicated confusion over who was required to sign the form. Finally, in the Applicant's signature block, DHS included ''(if any)'' after the ''Safe Phone Number'' field to indicate the field is not required, and revised item 7, to clarify that the signature is for the family member for whom the applicant is filing (rather than using the less clear terminology of ''derivative'').

Form I–914 Instructions

As noted previously, DHS has added language at new page 1, ''What Is the Purpose of Form I–914?,'' to refer applicants to the language of the definition of ''a severe form of trafficking'' included in the section ''Evidence to Establish T Nonimmigrant Status,'' to provide easy reference to the definition.

DHS added a note regarding filing for adult or minor children of eligible family members at new page 2, ''Who May File Form I–914,'' item 2(C)(3) to clarify that although applications for all eligible family members can be filed concurrently, USCIS will not approve the application for an adult or minor child unless the application for derivative T nonimmigrant status for their parent has already been approved, consistent with existing policy. USCIS Policy Memorandum, *New T Nonimmigrant Derivative Category and T and U Nonimmigrant Adjustment of Status for Applicants from the Commonwealth of the Northern Mariana Islands* (Oct. 30, 2014). DHS also added this note at new page 4, ''Completing Form I–914, Supplement A, Application for Derivative T Nonimmigrant Status,'' ''Part 1. Family Member For Whom You Are Filing.''

At new page 2, ''General Instructions,'' DHS has added a note for applicants with attorneys who wish to receive communication from USCIS about filings related to the I–914, they should include those additional form numbers on the Form G–28, Notice of Entry of Appearance as Attorney or Accredited Representative.

At new page 3, part 5, ''Information about Your Family Members,'' DHS clarified its guidance that all children regardless of age or marital status should be included, which is consistent with the change made to the Form I–914, Supplement A.

DHS had already included an instruction that applicants may provide other evidence and directs applicants to the relevant portion of the Form I–914, Supplement B Instructions; however, to emphasize that applicants must provide evidence to show victimization and cooperation with law enforcement, DHS has revised the language at new page 7, ''Completing Form I–914, Supplement B, Declaration of Law Enforcement Officer for Victim of Trafficking in Persons to state that an applicant ''must'' provide other evidence.

At new page 7, ''Initial Evidence,'' DHS deleted the instruction to submit a copy of the principal applicant's Form I–914 with a Form I–914, Supplement A, due to enhanced processing procedures. DHS has also added an instruction that an applicant must include all evidence at the time of filing, and that any credible evidence can be submitted.

At new page 8, ''Evidence to Establish T Nonimmigrant Status,'' item 2, DHS has replaced ''as a result of'' with ''on account of,'' as discussed above, for consistency with the regulation. DHS has also added a grant of Continued Presence as a type of evidence that can be submitted to establish that an individual is or has been a victim of trafficking. DHS has also added a note that an applicant may explain why they did not provide or attempt to obtain a Supplement B (even though it is not required). In addition, DHS has added a list of evidence that an applicant may submit to establish tier claim that they were unable to cooperate with requests from law enforcement due to trauma, or due to their age.

At new page 9, ''Personal Statement,'' DHS has revised the list of what the applicant's personal statement should include, due to changes in the regulations relating the contents of the statement at new 8 CFR 214.204(c).

At new page 11, DHS has included a personal statement from the principal applicant or a derivative family member as an example of credible evidence describing the danger of retaliation, due to changes in the regulations at new 8 CFR 214.211(f)(3). DHS has also changed the section on this page from ''Unavailable Documents'' to ''Required Evidence.'' DHS has removed any reference to secondary evidence, as well as the list of secondary evidence, and instead instructs that applicants may submit any credible evidence, consistent with the evidentiary standard USCIS applies.

At new page 12, ''Initial Processing,'' DHS has added that a Form I–914 may also be rejected if the form's *required fields* are not completely filled out or the forms do not include *required* initial evidence. This will support timely applicant notification if USCIS determines that they are missing critical information that would otherwise delay processing or result in a denial of their request. As a result, applicants will have an opportunity to resolve the issue(s) with their filing sooner than if USCIS accepted the filing and ultimately issued a Request for Additional Evidence or Notice of Intent to Deny. Additionally, this will allow USCIS to focus its limited resources on cases that are properly completed and filed.

At new page 12, DHS has added a section titled ''Bona Fide Determination Process'' to describe the new, streamlined bona fide determination

process codified at 8 CFR 214.205. At the same page, DHS has also revised ''Employment Authorization'' to include reference to the bona fide determination process.

Form I–914, Supplement B and Form I–914, Supplement B Instructions

DHS has changed the title of Form I–914, Supplement B to ''Declaration for Trafficking Victim'' for simplicity and for ease of reference.

DHS has revised Form I–914, Supplement B at new page 2, part 3, ''Statement of Claim,'' ''Note:'' to reference the correct regulatory provision because USCIS is redesignating these provisions in the final rule. DHS has removed the language from part 3, ''Statement of Claim'' requesting the LEA attach the results of any name or database inquiry, as well as any relevant reports and findings, because this requirement was removed from the regulations.

DHS clarified at new page 4, part 6, ''Attestation,'' that the officer signing Form I–914, Supplement B is certifying their belief that the individual has been a victim of a severe form of trafficking in persons and is not certifying that it is an established fact that the individual is a victim.

DHS has added a new part 7, ''Additional Information,'' and included references throughout Form I–914, Supplement B and its Instructions to use the new part 7 if extra space is needed to complete any section. DHS has revised ''law enforcement officer'' to ''certifying official'' in recognition of the fact that many individuals who complete Supplement B may not consider themselves law enforcement officials.

On new page 2 of the Instructions in the section, ''General Instructions,'' DHS has included guidance to leave a field blank if the answer to a question is unknown. DHS also added a new section below entitled ''Specific Instructions.''

DHS has clarified at new page 3, part 3, ''Statement of Claim,'' item 1, that the official signing the Form I–914, Supplement B should base their analysis as to whether an individual is or has been a victim of a severe form of trafficking in persons based on the practices to which the victim was subjected (as listed in new 8 CFR 214.201), rather than any criminal violations or prosecutions.

At new page 3, part 5, ''Family Members Implicated in Trafficking,'' DHS added a ''NOTE:'' and replaced the word ''principal applicant'' with ''victim'' based on regulatory changes to terminology.

Also at new page 3, ''How Can I Provide Further Information at a Later Date?,'' DHS has replaced the term ''revoke'' with ''withdraw or disavow'' to mirror a change in the wording of the regulations.

At new page 4, under ''DHS Privacy Notice,'' ''PURPOSE:'' and ''DISCLOSURE,'' DHS replaced ''you'' with ''the applicant,'' because Supplement B is filled out by someone other than the applicant. This clarifies that the purpose is to determine the applicant's eligibility, and that failure to provide the applicant's information could result in denial of their application.

Form I–765 Instructions

DHS has revised the Form I–765 Instructions to include a section titled ''Bona Fide Determination Process for T Nonimmigrant Status Principal Applicants and Eligible Family Members.'' This change describes the bona fide determination process, including how to obtain work authorization, codified at new 8 CFR 214.205.

List of Subjects

8 CFR Part 212

Administrative practice and procedure, Aliens, Immigration, Passports and visas, Reporting and recordkeeping requirements.

8 CFR Part 214

Administrative practice and procedure, Aliens, Cultural exchange program, Employment, Foreign officials, Health professions, Reporting and recordkeeping requirements, Students.

8 CFR Part 245

Aliens, Immigration, Reporting and recordkeeping requirements.

8 CFR Part 274a

Administrative practice and procedure, Aliens, Cultural exchange program, Employment, Penalties, Reporting and recordkeeping requirements, Students.

Accordingly, DHS amends chapter I of title 8 of the Code of Federal Regulations as follows:

PART 212—DOCUMENTARY REQUIREMENTS: NONIMMIGRANTS; WAIVERS; ADMISSION OF CERTAIN INADMISSIBLE ALIENS; PAROLE

■ 1. The authority citation for part 212 continues to read as follows:

Authority: 6 U.S.C. 111, 202(4) and 271; 8 U.S.C. 1101 and note, 1102, 1103, 1182 and note, 1184, 1185 note (section 7209 of Pub. L. 108–458, 118 Stat. 3638), 1187, 1223, 1225, 1226, 1227, 1255, 1359; 8 CFR part 2. Section 212.1(q) also issued under section 702, Pub. L. 110–229, 122 Stat. 754, 854.

■ 2. Revise § 212.16 to read as follows:

§ 212.16 Applications for exercise of discretion relating to T nonimmigrant status.

(a) *Requesting the waiver.* An applicant requesting a waiver of inadmissibility under section 212(d)(3)(A)(ii) or (d)(13) of the Act must submit an Application for Advance Permission to Enter as a Nonimmigrant, or successor form as designated by USCIS in accordance with 8 CFR 103.2.

(b) *Treatment of waiver request.* USCIS, in its discretion, may grant a waiver request based on section 212(d)(13) of the Act of the applicable ground(s) of inadmissibility, except USCIS may not waive a ground of inadmissibility based on section 212(a)(3), (a)(10)(C), or (a)(10)(E) of the Act. An applicant for T nonimmigrant status is not subject to the ground of inadmissibility based on section 212(a)(4) of the Act (public charge) and is not required to file a waiver form for the public charge ground. Waiver requests are subject to a determination of national interest and connection to victimization as follows.

(1) *National interest.* USCIS, in its discretion, may grant a waiver of inadmissibility request if it determines that it is in the national interest to exercise discretion to waive the applicable ground(s) of inadmissibility.

(2) *Connection to victimization.* An applicant requesting a waiver under section 212(d)(13) of the Act on grounds other than the health-related grounds described in section 212(a)(1) of the Act must establish that the activities rendering them inadmissible were caused by, or were incident to, the victimization described in section 101(a)(15)(T)(i)(I) of the Act.

(3) *Criminal grounds.* In exercising its discretion, USCIS will consider the number and seriousness of the criminal offenses and convictions that render an applicant inadmissible under the criminal and related grounds in section 212(a)(2) of the Act. In cases involving violent or dangerous crimes, USCIS will only exercise favorable discretion in extraordinary circumstances, unless the criminal activities were caused by, or were incident to, the victimization described under section 101(a)(15)(T)(i)(I) of the Act.

(c) *No appeal.* There is no appeal of a decision to deny a waiver request. Nothing in this section is intended to prevent an applicant from re-filing a

request for a waiver of a ground of inadmissibility in appropriate cases.

(d) *Revocation.* USCIS, at any time, may revoke a waiver previously authorized under section 212(d) of the Act. There is no appeal of a decision to revoke a waiver.

PART 214—NONIMMIGRANT CLASSES

■ 3. The authority citation for part 214 continues to read as follows:

Authority: 6 U.S.C. 202, 236; 8 U.S.C. 1101, 1102, 1103, 1182, 1184, 1186a, 1187, 1221, 1281, 1282, 1301–1305, 1357 and 1372; sec. 643, Pub. L. 104–208, 110 Stat. 3009–708; Pub. L. 106–386, 114 Stat. 1477–1480; section 141 of the Compacts of Free Association with the Federated States of Micronesia and the Republic of the Marshall Islands, and with the Government of Palau, 48 U.S.C. 1901 note, and 1931 note, respectively; 48 U.S.C. 1806; 8 CFR part 2; Pub. L. 115–218, 132 Stat. 1547 (48 U.S.C. 1806).

§§ 214.1 through 214.15 [Designated as Subpart A]

■ 4. Designate §§ 214.1 through 214.15 as subpart A and add a heading for subpart A to read as follows:

Subpart A—Classes A through S

■ 5. Revise § 214.11 to read as follows:

§ 214.11 Former regulations for noncitizen victims of severe forms of trafficking in persons.

For DHS and USCIS regulations governing Noncitizen Victims of Severe Forms of Trafficking in Persons, see subpart C of this part.

Subpart B—[Added and Reserved]

■ 6. Add and reserve subpart B.

■ 7. Add subpart C to read as follows:

Subpart C—Noncitizen Victims of Severe Forms of Trafficking in Persons

Sec.

§ 214.200 Scope of this subpart.

This subpart governs the submission and adjudication of an Application for T Nonimmigrant Status, including a request by a principal applicant on behalf of an eligible family member for derivative status.

§ 214.201 Definitions.

Where applicable, USCIS will apply the definitions provided in section 103 and 107(e) of the Trafficking Victims Protection Act (TVPA), 22 U.S.C. 7102, and 8 U.S.C. 1101, 1182(d), and 1184, with due regard for the definitions and application of these terms in 28 CFR part 1100 and the provisions of 18 U.S.C. 77. As used in this section the term:

Abuse or threatened abuse of the legal process means the use or threatened use of a law or legal process whether administrative, civil, or criminal, in any manner or for any purpose for which the law was not designed, in order to exert pressure on another person to cause that person to take some action or refrain from taking some action.

Application for Derivative T Nonimmigrant Status means a request by a principal applicant on behalf of an eligible family member for derivative T–2, T–3, T–4, T–5, or T–6 nonimmigrant status on an Application for T Nonimmigrant Status.

Application for T Nonimmigrant Status means a request by a principal applicant for T–1 nonimmigrant status on the form designated by USCIS for that purpose.

Child means a person described in section 101(b)(1) of the Act.

Coercion means threats of serious harm to or physical restraint against any person; any scheme, plan, or pattern intended to cause a person to believe that failure to perform an act would result in serious harm to or physical restraint against any person; or the abuse or threatened abuse of the legal process.

Commercial sex act means any sex act on account of which anything of value is given to or received by any person.

Debt bondage means the status or condition of a debtor arising from a pledge by the debtor of their personal services or those of a person under their control as a security for debt, if the value of those services as reasonably assessed is not applied toward the liquidation of the debt or the length and nature of those services are not respectively limited and defined.

Derivative T nonimmigrant means an eligible family member who has been granted T–2, T–3, T–4, T–5, or T–6 derivative status. A family member outside of the United States is not a derivative T nonimmigrant until they are issued a T–2, T–3, T–4, T–5, or T–6 visa by the Department of State and they are admitted to the United States in derivative T nonimmigrant status.

Eligible family member means:

(1) A family member eligible for derivative T nonimmigrant status based on their relationship to a principal applicant or T–1 nonimmigrant and, if required, upon a showing of a present danger of retaliation;

(2) In the case of a principal applicant or T–1 nonimmigrant who is 21 years of age or older, the spouse and children of such applicant;

(3) In the case of a principal applicant or T–1 nonimmigrant under 21 years of age, the spouse, children, unmarried siblings under 18 years of age, and parents of such applicant; and

(4) Regardless of the age of a principal applicant or T–1 nonimmigrant, any parent or unmarried sibling under 18 years of age, or adult or minor child of a derivative of such principal applicant or T–1 nonimmigrant where the family member faces a present danger of retaliation as a result of the principal applicant or T–1 nonimmigrant's escape from a severe form of trafficking in persons or cooperation with law enforcement.

Involuntary servitude, for the purposes of this part:

(1) Means a condition of servitude induced by means of any scheme, plan, or pattern intended to cause a person to believe that, if the person did not enter into or continue in such condition, that person or another person would suffer serious harm or physical restraint; or a condition of servitude induced by the abuse or threatened abuse of legal process; and

(2) Includes a condition of servitude in which the victim is forced to work for the trafficker by the use or threat of physical restraint or physical injury, or by the use or threat of coercion through the law or the legal process. This definition encompasses those cases in which the trafficker holds the victim in servitude by placing the victim in fear of such physical restraint or injury or legal coercion.

Law Enforcement Agency (LEA) means a Federal, State, Tribal, or local law enforcement agency, prosecutor, judge, labor agency, children's protective services agency, adult protective services agency, or other

authority that has the responsibility and authority for the detection, investigation, and/or prosecution of severe forms of trafficking in persons under any administrative, civil, criminal, or Tribal laws. Federal LEAs include but are not limited to the following: Department of Justice (including U.S. Attorneys' Offices, Civil Rights Division, Criminal Division, U.S. Marshals Service, Federal Bureau of Investigation (FBI)); U.S. Immigration and Customs Enforcement (ICE), U.S. Customs and Border Protection (CBP); Department of State (including Diplomatic Security Service); Department of Labor (DOL); Equal Employment Opportunity Commission (EEOC); National Labor Relations Board (NLRB); Offices of Inspectors General (OIG); Bureau of Indian Affairs (BIA) Police, and Offices for Civil Rights and Civil Liberties.

Law Enforcement Agency (LEA) declaration means an official LEA declaration submitted on the Declaration for Trafficking Victim.

Law enforcement involvement, for purposes of establishing physical presence, means law enforcement action beyond receiving the applicant's reporting and may include the LEA interviewing the applicant or otherwise becoming involved in detecting, investigating, or prosecuting the acts of trafficking.

Peonage means a status or condition of involuntary servitude based upon real or alleged indebtedness.

Principal applicant means a noncitizen who has filed an Application for T Nonimmigrant Status.

Request for assistance means a request made by an LEA to a victim to assist in the detection, investigation, or prosecution of the acts of trafficking in persons or the investigation of a crime where acts of trafficking are at least one central reason for the commission of that crime. The reasonableness of the request is assessed using the factors delineated at § 214.208(c).

Serious harm means any harm, whether physical or nonphysical, including psychological, financial, or reputational harm, that is sufficiently serious, under all the surrounding circumstances, to compel a reasonable person of the same background and in the same circumstances to perform or to continue performing labor or services in order to avoid incurring that harm.

Severe form of trafficking in persons means sex trafficking in which a commercial sex act is induced by force, fraud, or coercion, or in which the person induced to perform such act is under the age of 18 years; or the recruitment, harboring, transportation, provision, or obtaining of a person for labor or services through the use of force, fraud, or coercion for the purpose of subjection to involuntary servitude, peonage, debt bondage, or slavery.

Sex trafficking means the recruitment, harboring, transportation, provision, obtaining, patronizing, or soliciting of a person for the purpose of a commercial sex act.

T–1 nonimmigrant means the victim of a severe form of trafficking in persons who has been granted T–1 nonimmigrant status.

United States means the fifty States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, Guam, and the Commonwealth of the Northern Mariana Islands.

Victim of a severe form of trafficking in persons (victim) means a noncitizen who is or has been subjected to a severe form of trafficking in persons.

§ 214.202 Eligibility for T–1 nonimmigrant status.

An applicant is eligible for T–1 nonimmigrant status under section 101(a)(15)(T)(i) of the Act if they demonstrate all of the following, subject to section 214(o) of the Act:

(a) *Victim.* The applicant is or has been a victim of a severe form of trafficking in persons, according to § 214.206.

(b) *Physical presence.* The applicant is physically present in the United States, American Samoa, the Commonwealth of the Northern Mariana Islands, or at a port-of-entry thereto, according to § 214.207.

(c) *Compliance with any reasonable request for assistance.* The applicant has complied with any reasonable request for assistance from law enforcement or meets one of the conditions described below. The reasonableness of the request is assessed using the factors delineated at § 214.208(c).

(1) *Exemption for minor victims.* An applicant who was under 18 years of age at the time at least one act of trafficking occurred is not required to comply with any reasonable request for assistance.

(2) *Exception for trauma.* An applicant who, due to physical or psychological trauma, is unable to cooperate with a reasonable request for assistance from law enforcement is not required to comply with such reasonable request.

(d) *Hardship.* The applicant would suffer extreme hardship involving unusual and severe harm upon removal, according to § 214.209.

(e) *Prohibition against traffickers in persons.* No applicant will be eligible to receive T nonimmigrant status if there is substantial reason to believe that the applicant has committed an act of a severe form of trafficking in persons.

§ 214.203 Period of admission.

(a) *T–1 Principal.* T–1 nonimmigrant status may be approved for a period not to exceed 4 years, except as provided in section 214(o)(7) of the Act.

(b) *Derivative family members.* A derivative family member who is otherwise eligible for admission may be granted T–2, T–3, T–4, T–5, or T–6 nonimmigrant status for an initial period that does not exceed the expiration date of the initial period approved for the T–1 principal applicant, except as provided in section 214(o)(7) of the Act.

(c) *Notice.* At the time an applicant is approved for T nonimmigrant status or receives an extension of T nonimmigrant status, USCIS will notify the applicant when their T nonimmigrant status will expire. USCIS also will notify the applicant that the failure to apply for adjustment of status to lawful permanent resident during the period of T nonimmigrant status, as set forth in 8 CFR 245.23, will result in termination of the applicant's T nonimmigrant status in the United States at the end of the 4-year period or any extension.

§ 214.204 Application.

(a) *Jurisdiction.* USCIS has sole jurisdiction over all applications for T nonimmigrant status.

(b) *Filing an application.* An applicant seeking T–1 nonimmigrant status must submit an Application for T Nonimmigrant Status on the form designated by USCIS in accordance with 8 CFR 103.2 and with the evidence described in paragraph (c) of this section.

(1) *Applicants in pending immigration proceedings.* (i) An applicant in removal proceedings under section 240 of the Act, or in exclusion or deportation proceedings under former sections 236 or 242 of the Act (as in effect prior to April 1, 1997), and who wishes to apply for T–1 nonimmigrant status must file an Application for T Nonimmigrant Status directly with USCIS.

(ii) In its discretion, ICE may exercise prosecutorial discretion, as appropriate, while USCIS adjudicates the Application for T Nonimmigrant Status, including applications for derivatives.

(2) *Applicants with final orders of removal, deportation, or exclusion.* An applicant subject to a final order of removal, deportation, or exclusion may file an Application for T Nonimmigrant Status directly with USCIS.

(i) The filing of an Application for T Nonimmigrant Status has no effect on DHS authority or discretion to execute a final order of removal, although the applicant may request an administrative stay of removal pursuant to 8 CFR 241.6(a).

(ii) If the applicant is in detention pending execution of the final order, the period of detention (under the standards of 8 CFR 241.4) reasonably necessary to bring about the applicant's removal will be extended during the period the stay is in effect.

(iii) If USCIS subsequently determines under the procedures in § 214.205 that the application is bona fide, the final order of removal, deportation, or exclusion will be automatically stayed, and the stay will remain in effect until a final decision is made on the Application for T Nonimmigrant Status.

(3) *Referral of applicants for removal proceedings.* USCIS generally will not refer an applicant for T nonimmigrant status for removal proceedings while the application is pending or following denial of the application, absent serious aggravating circumstances, such as the existence of an egregious criminal history, a threat to national security, or where the applicant is complicit in committing an act of trafficking.

(4) *Minor applicants.* When USCIS receives an application from a principal applicant under the age of 18, USCIS will notify the Department of Health and Human Services to facilitate the provision of interim assistance.

(c) *Initial evidence.* An Application for T Nonimmigrant Status must include:

(1) A detailed, signed personal statement from the applicant, in their own words, addressing:

(i) The circumstances surrounding the applicant's victimization, including:

(A) The nature of the victimization; and

(B) To the extent possible, the following:

(*1*) When the victimization occurred;

(*2*) How long the trafficking lasted;

(*3*) How and when they escaped, were rescued, or otherwise became separated from the traffickers;

(*4*) The events surrounding the trafficking;

(*5*) Who was responsible for the trafficking; and

(*6*) The circumstances surrounding their entry into the United States, if related to the trafficking;

(ii) How the applicant's physical presence in the United States relates to the trafficking; (iii) The hardship, including harm or mistreatment the applicant fears if they are removed from the United States; and

(iv) Whether they have complied with any reasonable law enforcement request for assistance and whether any criminal, civil or administrative records relating to the acts of trafficking exist, if known, (or if applicable, why the age exemption or trauma exception applies); and

(2) Any credible evidence that supports any of the eligibility requirements set out in §§ 214.206 through 214.208.

(d) *Inadmissible applicants.* If an applicant is inadmissible to the United States, they must submit a request for a waiver of inadmissibility on the Application for Advance Permission to Enter as a Nonimmigrant, or successor form as designated by USCIS accordance with 8 CFR 103.2, in accordance with form instructions and 8 CFR 212.16, and accompanied by supporting evidence.

(e) *Evidence from law enforcement.* An applicant may wish to submit evidence from an LEA to help establish eligibility, including victimization and the compliance with reasonable requests for assistance. An LEA declaration:

(1) Is optional evidence;

(2) Is not given any special evidentiary weight;

(3) Does not grant an immigration benefit and does not lead to automatic approval of the Application for T Nonimmigrant Status;

(4) Must be submitted on the ''Declaration for Trafficking Victim,'' and must be signed by a supervising official responsible for the detection, investigation, or prosecution of severe forms of trafficking in persons;

(5) Is completed at the discretion of the certifying official; and

(6) Does not require that a formal investigation or prosecution be initiated.

(f) *Any credible evidence.* All evidence demonstrating cooperation with law enforcement will be considered under the any credible evidence standard.

(g) *USCIS determination.* USCIS, not the LEA, will determine if the applicant was or is a victim of a severe form of trafficking in persons, and otherwise meets the eligibility requirements for T nonimmigrant status.

(h) *Disavowed or withdrawn LEA declaration.* An LEA may disavow or withdraw the contents of a previously submitted declaration and should provide a detailed explanation of its reasoning in writing. After disavowal or withdrawal, the LEA declaration generally will no longer be considered as evidence of the applicant's compliance with requests for assistance in the LEA's detection, investigation, or prosecution, but may be considered for other purposes.

(i) *Continued Presence.* An applicant granted Continued Presence under 28 CFR 1100.35 should submit documentation of the grant of Continued Presence. If revoked, the grant of Continued Presence will generally no longer be considered as evidence of the applicant's compliance with requests for assistance in the LEA's investigation or prosecution but may be considered for other purposes.

(j) *Other evidence.* An applicant may also submit any evidence regarding entry or admission into the United States or permission to remain in the United States. An applicant may also note that such evidence is contained in their immigration file.

(k) *Biometric services.* All applicants for T–1 nonimmigrant status must submit biometrics in accordance with 8 CFR 103.16.

(l) *Evidentiary standards, standard of proof, and burden of proof.* (1) The burden is on the applicant to demonstrate eligibility for T–1 nonimmigrant status by a preponderance of the evidence. The applicant may submit any credible evidence relating to a T nonimmigrant application for consideration by USCIS.

(2) USCIS will conduct a review of all evidence and may investigate any aspect of the application.

(3) Evidence previously submitted by the applicant for any immigration benefit request or relief may be used by USCIS in evaluating the eligibility of an applicant for T–1 nonimmigrant status. USCIS will not be bound by previous factual determinations made in connection with a prior application or petition for any immigration benefit or relief. USCIS will determine, in its sole discretion, the evidentiary value of previously or concurrently submitted evidence.

(4) USCIS will consider the totality of the evidence the applicant submitted and other evidence available to USCIS in evaluating an Application for T Nonimmigrant Status.

(m) *Bona fide determination.* Once an applicant submits an Application for T Nonimmigrant Status or Application for Derivative T Nonimmigrant Status, USCIS will conduct an initial review to determine if the application is bona fide under the provisions of § 214.205. USCIS will conduct an initial review of an eligible family member's Application for Derivative T Nonimmigrant Status to determine if the application is bona fide if the principal's Application for T Nonimmigrant Status has been deemed bona fide.

(n) *Decision.* After completing its review of the application and evidence, USCIS will issue a decision approving

or denying the application in accordance with 8 CFR 103.3.

(o) *Approval.* If USCIS determines that the applicant is eligible for T–1 nonimmigrant status, USCIS will approve the application and grant T–1 nonimmigrant status, subject to the annual limitation as provided in § 214.210. USCIS will provide the applicant with evidence of T–1 nonimmigrant status. USCIS may also notify other parties and entities of the approval as it determines appropriate, including any LEA providing an LEA declaration and the Department of Health and Human Service's Office of Refugee Resettlement, consistent with 8 U.S.C. 1367.

(1) *Applicants with an outstanding order of removal, deportation, or exclusion issued by DHS.* For an applicant who is the subject of an order of removal, deportation, or exclusion issued by DHS, the order will be deemed cancelled by operation of law as of the date of the USCIS approval of the application.

(2) *Applicants with an outstanding order of removal, deportation, or exclusion issued by the Department of Justice.* An applicant who is the subject of an order of removal, deportation or exclusion issued by an immigration judge or the Board of Immigration Appeals (Board) may seek rescission of such order by filing a motion to reopen and terminate removal proceedings with the immigration judge or the Board. ICE may agree, as a matter of discretion, to join such motion to overcome any applicable time and numerical limitations of 8 CFR 1003.2 and 1003.23.

(3) *Employment authorization.* An individual granted T–1 nonimmigrant status is authorized to work incident to status. An applicant does not need to file a separate Application for Employment Authorization to be granted employment authorization. USCIS will issue an initial Employment Authorization Document (EAD) to such T–1 nonimmigrants for the duration of the T–1 nonimmigrant status. An applicant granted T–1 nonimmigrant status seeking to replace an EAD that was lost, stolen, or destroyed must file an Application for Employment Authorization in accordance with form instructions.

(p) *Travel abroad.* In order to return to the United States after travel abroad and continue to hold T–1 nonimmigrant status, a T–1 nonimmigrant must be granted advance parole pursuant to section 212(d)(5) of the Act prior to departing the United States.

(q) *Denial.* Upon denial of an application, USCIS will notify the applicant in accordance with 8 CFR 103.3. USCIS may also notify any LEA providing an LEA declaration and the Department of Health and Human Service's Office of Refugee Resettlement. If an applicant appeals a denial in accordance with 8 CFR 103.3, the denial will not become final until the administrative appeal is decided.

(1) *Effect on bona fide determination.* Upon denial of an application, any benefits derived from a bona fide determination will automatically be revoked when the denial becomes final.

(2) *Applicants previously in removal proceedings.* In the case of an applicant who was previously in removal proceedings that were terminated on the basis of a pending Application for T Nonimmigrant Status, once a denial becomes final, DHS may file a new Notice to Appear to place the individual in removal proceedings again.

(3) *Applicants subject to an order of removal, deportation, or exclusion.* In the case of an applicant who is subject to an order of removal, deportation, or exclusion that had been stayed due to the pending Application for T Nonimmigrant Status, the stay will be automatically lifted as of the date the denial becomes final.

§ 214.205 Bona fide determination.

(a) *Bona fide determinations for principal applicants for T nonimmigrant status.* If an Application for T Nonimmigrant Status is submitted after August 28, 2024, USCIS will conduct an initial review to determine if the application is bona fide.

(1) *Request for evidence.* If an Application for T Nonimmigrant Status was pending as of August 28, 2024, and additional evidence is required to establish eligibility for principal T nonimmigrant status, USCIS will issue a request for evidence, and conduct a bona fide review based on available evidence.

(2) *Initial review criteria.* After initial review, USCIS will deem an Application for T Nonimmigrant Status bona fide if:

(i) The applicant has submitted a properly filed and complete Application for T Nonimmigrant Status;

(ii) The applicant has submitted a signed personal statement; and

(iii) The results of initial background checks are complete, have been reviewed, and do not present national security concerns.

(3) *Secondary review criteria.* If initial review does not establish an Application for T Nonimmigrant Status is bona fide, USCIS will conduct a full T nonimmigrant status eligibility review. An Application for T Nonimmigrant Status that meets all eligibility requirements will be approved, or if the statutory cap has been reached, will receive a bona fide determination.

(b) *Bona fide determinations for eligible family members in the United States.* Once a principal applicant's application has been deemed bona fide, USCIS will conduct an initial review for any eligible family members in the United States who have filed an Application for Derivative T Nonimmigrant Status to determine whether their applications are bona fide.

(1) If an Application for Derivative T Nonimmigrant Status was pending as of August 28, 2024, and additional evidence is required to establish eligibility for derivative T nonimmigrant status, USCIS will issue a request for evidence and conduct a bona fide review based on available evidence.

(2) After initial review, USCIS will determine an Application for Derivative T Nonimmigrant Status is bona fide if:

(i) The eligible family member is in the United States at the time of the bona fide determination;

(ii) The principal applicant or T–1 nonimmigrant has submitted a properly filed and complete Application for Derivative T Nonimmigrant Status;

(iii) The Application for Derivative T Nonimmigrant Status is supported by credible evidence that the derivative applicant qualifies as an eligible family member; and

(iv) Initial background checks are complete, have been reviewed, and do not present national security concerns.

(3) If initial review does not establish an Application for Derivative T Nonimmigrant Status is bona fide, USCIS will conduct a full T nonimmigrant status eligibility review. An Application for Derivative T Nonimmigrant Status that meets all eligibility requirements during this secondary review will be approved, or if the statutory cap has been reached, will receive a bona fide determination.

(c) *Notice of USCIS determination.* If USCIS determines that the Application for T Nonimmigrant Status or Application for Derivative T Nonimmigrant Status is bona fide under this section, USCIS will issue written notice of that determination, and inform the applicant that they may be considered for deferred action and may file an Application for Employment Authorization if they have not already filed one. The notice will also inform the applicant that any final order of removal, deportation, or exclusion is automatically stayed as set forth in paragraph (g) of this section. An

application will be treated as a bona fide application as of the date of the notice.

(d) *Not considered bona fide.* If an application is incomplete or presents national security concerns, it will not be considered bona fide. There are no motion or appeal rights for a bona fide determination upon initial review under this section.

(1) For applications found not to be bona fide upon initial review, USCIS will proceed to full T nonimmigrant status eligibility review as described in paragraphs (a)(3) and (b)(3) of this section, generally in order of application receipt date.

(2) If an application is found through this review not to establish eligibility for T nonimmigrant status, the application will be denied in accordance with § 214.204(q).

(e) *Exercise of discretion.* (1) Once USCIS deems an Application for T Nonimmigrant Status or Application for Derivative T Nonimmigrant Status bona fide, USCIS may consider the applicant for deferred action.

(2) If, after review of the available information including background checks, USCIS determines that deferred action is warranted in a particular case as an exercise of enforcement discretion, USCIS will then proceed to adjudication of the Application for Employment Authorization, if one has been filed.

(3) There are no motion or appeal rights for the exercise of enforcement discretion under this section.

(f) *Bona fide determinations for applicants in removal proceedings.* This section applies to applicants whose Applications for T Nonimmigrant Status or Applications for Derivative T Nonimmigrant Status have been deemed bona fide and who are in removal proceedings under section 240 of the Act, or in exclusion or deportation proceedings under former sections 236 or 242 of the Act (as in effect prior to April 1, 1997). In such cases, ICE may exercise prosecutorial discretion, as appropriate, while USCIS adjudicates an Application for Derivative T Nonimmigrant Status.

(g) *Stay of final order of removal, deportation, or exclusion.* (1) If USCIS determines that an application is bona fide it automatically stays the execution of any final order of removal, deportation, or exclusion.

(2) This administrative stay will remain in effect until any adverse decision becomes final.

(3) Neither an immigration judge nor the Board has jurisdiction to adjudicate an application for a stay of removal, deportation, or exclusion on the basis of the filing of an Application for T Nonimmigrant Status or Application for Derivative T Nonimmigrant Status.

§ 214.206 Victim of a severe form of trafficking in persons.

(a) *Evidence.* The applicant must submit evidence that demonstrates:

(1) That they are or have been a victim of a severe form of trafficking in persons. Except in instances of sex trafficking involving victims under 18 years of age, severe forms of trafficking in persons must involve both a particular means (force, fraud, or coercion) and a particular end or a particular intended end (sex trafficking, involuntary servitude, peonage, debt bondage, or slavery); or

(2) If an applicant has not performed labor or services, or a commercial sex act, they must establish that they were recruited, transported, harbored, provided, or obtained for the purposes of subjection to sex trafficking, involuntary servitude, peonage, debt bondage, or slavery, or patronized or solicited for the purposes of subjection to sex trafficking.

(3) The applicant may satisfy the requirements under paragraph (a)(1) or (2) of this section by submitting:

(i) The applicant's personal statement, which should describe the circumstances of the victimization suffered. For more information regarding the personal statement, see § 214.204(c).

(ii) Any other credible evidence, including but not limited to:

(A) Trial transcripts;

(B) Court documents;

(C) Police reports or other documentation from an LEA;

(D) News articles;

(E) Copies of reimbursement forms for travel to and from court;

(F) Affidavits from case managers, therapists, medical professionals, witnesses, or other victims in the same trafficking scheme;

(G) Correspondence or other documentation from the trafficker;

(H) Documents used in furtherance of the trafficking scheme such as recruitment materials, advertisements, pay stubs, logbooks, or contracts;

(I) Photographs or images;

(J) An LEA declaration as described in § 214.204(c); or

(K) Documentation of a grant of Continued Presence under 28 CFR 1100.35.

(b) [Reserved]

§ 214.207 Physical presence.

(a) *Requirement.* To be eligible for T–1 nonimmigrant status, an applicant must be physically present in the United States, American Samoa, the Commonwealth of the Northern Mariana Islands, or at a port-of-entry thereto on account of such trafficking. USCIS considers the applicant's presence in the United States at the time of application. An applicant must demonstrate that they are physically present under one of the following grounds:

(1) Are currently being subjected to a severe form of trafficking in persons;

(2) Were liberated from a severe form of trafficking in persons by an LEA, at any time prior to filing the Application for T Nonimmigrant Status;

(3) Escaped a severe form of trafficking in persons before an LEA was involved, at any time prior to filing the Application for T Nonimmigrant Status;

(4) Were subject to a severe form of trafficking in persons at some point in the past and their current presence in the United States is directly related to the original trafficking in persons, regardless of the length of time that has passed between the trafficking and filing of the Application for T Nonimmigrant Status; or

(5) Have been allowed entry into the United States for participation in the detection, investigation, prosecution, or judicial processes associated with an act or perpetrator of trafficking.

(i) An applicant will be deemed physically present under this provision regardless of where such trafficking occurred.

(ii) To demonstrate that the applicant's physical presence is for participation in an investigative or judicial process, the applicant must submit documentation to show valid entry into the United States and evidence that this valid entry is for participation in investigative or judicial processes associated with an act or perpetrator of trafficking.

(b) *Departure from the United States.* An applicant who has voluntarily departed from or has been removed from the United States at any time after the act of a severe form of trafficking in persons is deemed not to be present in the United States as a result of such trafficking in persons unless:

(1) The applicant's reentry into the United States was the result of the continued victimization of the applicant;

(2) The applicant is a victim of a new incident of a severe form of trafficking in persons;

(3) The applicant has been allowed reentry into the United States for participation in the detection, investigation, prosecution, or judicial process associated with an act or a perpetrator of trafficking. An applicant will be deemed physically present

under this provision regardless of where such trafficking occurred. To demonstrate that the applicant's physical presence is for participation in an investigative or judicial process, the applicant must submit documentation to show valid entry into the United States and evidence that this valid entry is for participation in investigative or judicial processes associated with an act or perpetrator of trafficking;

(4) The applicant's presence in the United States is on account of their past or current participation in investigative or judicial processes associated with an act or perpetrator of trafficking, regardless of where such trafficking occurred. The applicant may satisfy physical presence under this provision regardless of the length of time that has passed between their participation in an investigative or judicial process associated with an act or perpetrator of trafficking and the filing of the Application for T Nonimmigrant Status; or

(5) The applicant returned to the United States and received treatment or services related to their victimization that cannot be provided in their home country or last place of residence outside the United States.

(c) *Evidence.* The applicant must submit evidence that demonstrates that their physical presence in the United States, American Samoa, the Commonwealth of the Northern Mariana Islands, or at a port-of-entry thereto, is on account of trafficking in persons. USCIS will consider any credible evidence presented to determine the physical presence requirement, including but not limited to:

(1) A detailed personal statement describing the applicant's current presence in the United States on account of the trafficking, including:

(i) The circumstances describing the victimization, including when the events took place, the length and severity of the trafficking, how and when the applicant escaped, was rescued, or otherwise became separated from the traffickers, when the trafficking ended, and when and how the applicant learned that they were a victim of human trafficking;

(ii) An explanation of any physical health effects or psychological trauma the applicant has suffered as a result of the trafficking and a description of how this trauma impacts the applicant's life at the time of filing;

(iii) The financial impact of the victimization;

(iv) The applicant's ability to access mental health services, social services, and legal services;

(v) Any relevant description of the applicant's cooperation with law enforcement at the time of filing;

(vi) A description of how the victimization relates to the applicant's current presence in the U.S., if relevant.

(2) Affidavits, evaluations, diagnoses, or other records from the applicant's service providers (including therapists, psychologists, psychiatrists, and social workers) documenting the therapeutic, psychological, or medical services the applicant has sought or is currently accessing as a result of victimization and that describe how the applicant's life is being impacted by the trauma at the time of filing, and describing any mental health conditions resulting from the trafficking;

(3) Documentation of any stabilizing services and benefits, including financial, language, housing, or legal resources, the applicant is accessing or has accessed as a result of being trafficked. For those services and benefits not currently being accessed, the record should demonstrate how those past services and benefits related to trauma the applicant is experiencing at the time of filing;

(4) An LEA declaration as described in § 214.204(c) or other statements from LEAs documenting the cooperation between the applicant and the LEA or law enforcement involvement in liberating the applicant;

(5) Documentation of a grant of Continued Presence under 28 CFR 1100.35;

(6) Any other documentation of entry into the United States or permission to remain in the United States, such as parole under section 212(d)(5) of the Act, or a notation that such evidence is contained in the applicant's immigration file;

(7) Copies of news reports, law enforcement records, or court records; or

(8) Any other credible evidence to establish the applicant's current presence in the United States is on account of the trafficking victimization.

§ 214.208 Compliance with any reasonable request for assistance in the detection, investigation, or prosecution of an act of trafficking.

(a) *Requirement.* To be eligible for T–1 nonimmigrant status, an applicant must have complied with any reasonable request for assistance from an LEA in the detection, investigation, or prosecution of acts of trafficking or the investigation of a crime where acts of trafficking are at least one central reason for the commission of that crime, unless the applicant meets an exception or exemption described in paragraph (e) of this section.

(b) *Applicability.* An applicant must, at a minimum, contact an LEA with proper jurisdiction to report the acts of a severe form of trafficking in persons. Credible evidence documenting a single contact with an LEA may suffice. Reporting may be telephonic, electronic, or through other means. An applicant who has never had contact with an LEA regarding the acts of a severe form of trafficking in persons will not be eligible for T–1 nonimmigrant status, unless they meet an exemption or exception as described in paragraph (e) of this section.

(c) *Reasonable requests.* An applicant need only show compliance with reasonable requests made by an LEA for assistance in the investigation or prosecution of the acts of trafficking in persons. The reasonableness of the request depends on the totality of the circumstances. Factors to consider include, but are not limited to:

(1) General law enforcement and prosecutorial practices;

(2) The nature of the victimization;

(3) The specific circumstances of the victim;

(4) The victim's capacity, competency, or lack thereof;

(5) Trauma suffered (both mental and physical) or whether the request would cause further trauma;

(6) Access to support services;

(7) The safety of the victim or the victim's family;

(8) Compliance with previous requests and the extent of such compliance;

(9) Whether the request would yield essential information;

(10) Whether the information could be obtained without the victim's compliance;

(11) Whether a qualified interpreter or attorney was present to ensure the victim understood the request;

(12) Cultural, religious, or moral objections to the request;

(13) The time the victim had to comply with the request;

(14) The age, health, and maturity of the victim; and

(15) Any other relevant circumstances surrounding the request.

(d) *Evidence.* An applicant must submit evidence that demonstrates that they have complied with any reasonable request for assistance in a Federal, State, Tribal, or local detection, investigation, or prosecution of trafficking in persons, or a crime where trafficking in persons is at least one central reason for the commission of that crime. In the alternative, an applicant can submit evidence to demonstrate that they should be exempt under paragraph (e) of this section. If USCIS has any question

about whether the applicant has complied with a reasonable request for assistance, USCIS may contact the LEA. The applicant may satisfy this requirement by submitting any of the following:

(1) An LEA declaration as described in § 214.204(c);

(2) Documentation of a grant of Continued Presence under 28 CFR 1100.35; or

(3) Any other evidence, including affidavits of witnesses. In the victim's statement prescribed by § 214.204(c), the applicant should show that an LEA that has responsibility and authority for the detection, investigation, or prosecution of severe forms of trafficking in persons has information about such trafficking in persons, that the victim has complied with any reasonable request for assistance in the investigation or prosecution of such acts of trafficking, and, if the victim did not report the crime, why the crime was not previously reported.

(e) *Exception or exemption.* An applicant who has not had contact with an LEA or who has not complied with any reasonable request may be excepted or exempt from the requirement to comply with any reasonable request for assistance in an investigation or prosecution if either of the following circumstances apply:

(1) *Trauma.* The applicant is unable to cooperate with a reasonable request for assistance from an LEA in the detection, investigation, or prosecution of acts of trafficking in persons due to physical or psychological trauma. An applicant must submit credible evidence of the trauma experienced. The applicant may satisfy this exception by submitting:

(i) A personal statement describing the trauma and explaining the circumstances surrounding the trauma the applicant experienced, including their age, background, maturity, health, disability, and any history of abuse or exploitation;

(ii) A signed statement from a qualified professional, such as a medical professional, mental health professional, social worker, or victim advocate, who attests to the victim's mental state or medical condition;

(iii) Medical or psychological records documenting the trauma or its impact;

(iv) Witness statements;

(v) Photographs;

(vi) Police reports;

(vii) Court records and court orders;

(viii) Disability determinations;

(ix) Government agency findings; or

(x) Any other credible evidence.

(2) *Age.* The applicant was under 18 years of age at the time of victimization. An applicant who was under 18 years of age at the time at least one of the acts of trafficking occurred is exempt from the requirement to comply with any reasonable request for assistance in the detection, investigation, or prosecution, but they must submit evidence of their age at the time of the victimization. Where available, an applicant should include an official copy of their birth certificate, a passport, or a certified medical opinion. USCIS will also consider any other credible evidence submitted regarding the age of the applicant.

(f) *Exception or exemption established.* When an applicant has established that the exception or exemption applies, they are not required to have had any contact with law enforcement or comply with future requests for assistance, including reporting the trafficking. USCIS reserves the authority and discretion to contact the LEA involved in the case, if appropriate.

§ 214.209 Extreme hardship involving unusual and severe harm.

To be eligible for T–1 nonimmigrant status, an applicant must demonstrate that removal from the United States would subject the applicant to extreme hardship involving unusual and severe harm.

(a) *Standard.* A finding of extreme hardship involving unusual and severe harm may be based on the following factors.

(b) *Factors.* Factors that may be considered in evaluating whether removal would result in extreme hardship involving unusual and severe harm should include both traditional extreme hardship factors and factors associated with having been a victim of a severe form of trafficking in persons. These factors include, but are not limited to:

(1) The age, maturity, and personal circumstances of the applicant;

(2) Any physical or psychological issues the applicant has that necessitate medical or psychological care not reasonably available in the foreign country to which the applicant would be returned;

(3) The nature and extent of the physical and psychological consequences of having been a victim of a severe form of trafficking in persons;

(4) The impact of the loss of access to the United States courts and the criminal justice system for purposes relating to the incident of a severe form of trafficking in persons or other crimes perpetrated against the applicant, including criminal and civil redress for acts of trafficking in persons, criminal prosecution, restitution, and protection;

(5) The reasonable expectation that the existence of laws, social practices, or customs in the foreign country to which the applicant would be returned would penalize the applicant severely for having been the victim of a severe form of trafficking in persons;

(6) The likelihood of re-victimization and the need, ability, and willingness of foreign authorities to protect the applicant;

(7) The likelihood that the trafficker or others acting on behalf of the trafficker in the foreign country would cause the applicant harm;

(8) The likelihood that the applicant's individual safety would be threatened by the existence of civil unrest or armed conflict; or

(9) Current or likelihood of future economic harm.

(c) *Evidence.* (1) An applicant is encouraged to describe and document all factors that may be relevant to the case, as there is no guarantee that a particular reason(s) will satisfy the requirement.

(2) Hardship to persons other than the applicant may be considered in determining whether an applicant will suffer the requisite hardship only if the related evidence demonstrates specifically that the applicant will suffer extreme hardship upon removal as a result of hardship to persons other than the applicant.

(3) The applicant may satisfy this requirement by submitting any credible evidence regarding the nature and scope of the hardship if the applicant was removed from the United States, including evidence of hardship arising from circumstances surrounding the victimization and any other circumstances.

(4) An applicant may submit a personal statement or other evidence, including evidence from relevant country condition reports and any other public or private sources of information.

§ 214.210 Annual numerical limit.

(a) *5,000 per fiscal year.* DHS may not grant T–1 nonimmigrant status to more than 5,000 principal applicants in any fiscal year.

(b) *Waiting list.* If the numerical limit prevents further grants of T–1 nonimmigrant status, USCIS will place applicants who receive a bona fide determination pursuant to § 214.205 on a waiting list. USCIS:

(1) Will assign priority on the waiting list based on the date the application was properly filed, with the oldest applications receiving the highest priority for processing;

(2) Will in the next fiscal year, issue a number to each application on the waiting list, in the order of the highest priority; and

(3) After T–1 nonimmigrant status has been issued to eligible applicants on the waiting list, USCIS will issue any remaining T–1 nonimmigrant numbers for that fiscal year to new eligible applicants in the order the applications were filed.

(c) *Unlawful presence.* While an applicant for T nonimmigrant status in the United States is on the waiting list, the applicant will not accrue unlawful presence under section 212(a)(9)(B) of the Act.

(d) *Removal from the waiting list.* An applicant may be removed from the waiting list consistent with law and policy. Applicants on the waiting list must remain admissible to the United States and otherwise eligible for T nonimmigrant status. If at any time prior to final adjudication USCIS receives information that an applicant is no longer eligible for T nonimmigrant status, the applicant may be removed from the waiting list. USCIS will provide notice to the applicant of that decision.

§ 214.211 Application for eligible family members.

(a) *Eligibility.* Subject to section 214(o) of the Act, an applicant who has applied for or has been granted T–1 nonimmigrant status (principal applicant) may apply for the admission of an eligible family member, who is otherwise admissible to the United States, in derivative T nonimmigrant status if accompanying or following to join the principal applicant.

(1) *Principal applicant 21 years of age or older.* For a principal applicant who is 21 years of age or over, eligible family member means a T–2 (spouse) or T–3 (child).

(2) *Principal applicant under 21 years of age.* For a principal applicant who is under 21 years of age, eligible family member means a T–2 (spouse), T–3 (child), T–4 (parent), or T–5 (unmarried sibling under the age of 18).

(3) *Family member facing danger of retaliation.* Regardless of the age of the principal applicant, if the eligible family member faces a present danger of retaliation as a result of the principal applicant's escape from the severe form of trafficking or cooperation with law enforcement, in consultation with the law enforcement agency investigating a severe form of trafficking, eligible family member means a T–4 (parent), T–5 (unmarried sibling under the age of 18), or T–6 (adult or minor child of a derivative of the principal applicant). In cases where the LEA has not investigated the acts of trafficking after the applicant has reported the crime, USCIS will evaluate any credible evidence demonstrating derivatives' present danger of retaliation.

(4) *Admission requirements.* The principal applicant must demonstrate that the applicant for whom derivative T nonimmigrant status is being sought is an eligible family member of the T–1 principal applicant, as defined in § 214.201, and is otherwise eligible for that status.

(b) *Application.* (1) *Application submission.* A T–1 principal applicant may submit an Application for Derivative T Nonimmigrant Status in accordance with the form instructions.

(i) The Application for Derivative T Nonimmigrant Status for an eligible family member may be filed with the T–1 application, or separately.

(ii) T nonimmigrant status for eligible family members is dependent on the principal applicant having been granted T–1 nonimmigrant status and the principal applicant maintaining T–1 nonimmigrant status.

(iii) If a T–1 nonimmigrant cannot maintain status due to their death, the provisions of section 204(l) of the Act may apply.

(2) *Eligible family members in pending immigration proceedings.* (i) If an eligible family member is in removal proceedings under section 240 of the Act, or in exclusion or deportation proceedings under former sections 236 or 242 of the Act (as in effect prior to April 1, 1997), the principal applicant or T–1 nonimmigrant must file an Application for Derivative T Nonimmigrant Status directly with USCIS.

(ii) At the request of the eligible family member, ICE may exercise prosecutorial discretion, as appropriate, while USCIS adjudicates an Application for Derivative T Nonimmigrant Status.

(3) *Eligible family members with final orders of removal, deportation, or exclusion.* (i) If an eligible family member is the subject of a final order of removal, deportation, or exclusion, the principal applicant must file an Application for Derivative T Nonimmigrant Status directly with USCIS.

(ii) The filing of an Application for Derivative T Nonimmigrant Status has no effect on ICE's authority or discretion to execute a final order, although the applicant may file a request for an administrative stay of removal pursuant to 8 CFR 241.6(a).

(iii) If the eligible family member is in detention pending execution of the final order, the period of detention (under the standards of 8 CFR 241.4) will be extended while a stay is in effect for the period reasonably necessary to bring about the applicant's removal.

(c) *Required supporting evidence.* In addition to the form, an Application for Derivative T Nonimmigrant Status must include the following:

(1) Biometrics.

(2) Evidence demonstrating the relationship of an eligible family member, as provided in § 214.211(d).

(3) In the case of an applicant seeking derivative T nonimmigrant status based on danger of retaliation, evidence demonstrating this danger as provided in § 214.211.

(4) If an eligible family member is inadmissible based on a ground that may be waived, a request for a waiver of inadmissibility under section 212(d)(13) or section 212(d)(3) of the Act must be filed in accordance with § 212.16 of this subchapter and submitted with the completed application package.

(d) *Relationship.* Except as described in paragraph (e) of this section, the family relationship must exist at the time:

(1) The Application for T Nonimmigrant Status is filed;

(2) The Application for T Nonimmigrant Status is adjudicated;

(3) The Application for Derivative T Nonimmigrant Status is filed;

(4) The Application for Derivative T Nonimmigrant Status is adjudicated; and

(5) The eligible family member is admitted to the United States if residing abroad.

(e) *Relationship and age-out protections*—(1) *Protection for new child of a principal applicant.* If the T–1 principal applicant establishes that they have become a parent of a child after filing the application for T–1 nonimmigrant status, the child will be deemed to be an eligible family member eligible to accompany or follow to join the T–1 principal applicant.

(2) *Age-out protection for eligible family members of a principal applicant under 21 years of age.* (i) If the T–1 principal applicant was under 21 years of age when they applied for T–1 nonimmigrant status, USCIS will continue to consider a parent or unmarried sibling as an eligible family member.

(ii) A parent or unmarried sibling will remain eligible even if the principal applicant turns 21 years of age before adjudication of the application for T–1 nonimmigrant status.

(iii) An unmarried sibling will remain eligible even if the unmarried sibling is over 18 years of age at the time of

adjudication of the T–1 application, so long as the unmarried sibling was under 18 years of age at the time the T–1 application was filed.

(iv) The age of an unmarried sibling when USCIS adjudicates the T–1 application, when the principal applicant or T–1 nonimmigrant files the Application for Derivative T Nonimmigrant Status, when USCIS adjudicates the derivative application, or when the unmarried sibling is admitted to the United States does not affect eligibility.

(3) *Age-out protection for child of a principal applicant.* (i) USCIS will continue to consider a child as an eligible family member if the child was under 21 years of age at the time the principal filed the Application for T Nonimmigrant Status, but reached 21 years of age while the principal's application was still pending.

(ii) The child will remain eligible even if the child is over 21 years of age at the time of adjudication of the T–1 application.

(iii) As long as the child is under age 21 when the Application for T Nonimmigrant Status is filed and reaches age 21 while such application is pending, the age of the child when the principal applicant or T–1 nonimmigrant files the Application for Derivative T Nonimmigrant Status, when USCIS adjudicates the Application for Derivative T Nonimmigrant Status, or when the child is admitted to the United States does not affect eligibility.

(4) *Marriage of an eligible family member.* (i) An eligible family member seeking T–3 or T–5 status must be unmarried when the principal applicant files an Application for T Nonimmigrant Status, when USCIS adjudicates the Application for T Nonimmigrant Status, when the principal applicant or T–1 nonimmigrant files the Application for Derivative T Nonimmigrant Status, when USCIS adjudicates the Derivative T Nonimmigrant Status, and if relevant, when the family member is admitted to the United States.

(ii) Principal applicants who marry while their Application for T Nonimmigrant Status is pending may file an Application for Derivative T Nonimmigrant Status on behalf of their spouse, even if the relationship did not exist at the time they filed their Application for T Nonimmigrant Status.

(iii) Similarly, the principal applicant may apply for a stepparent or stepchild if the qualifying relationship was created after they filed their Application for T Nonimmigrant Status but before it was approved.

(iv) USCIS evaluates whether the marriage creating the qualifying spousal relationship or stepchild and stepparent relationship exists at the time of adjudication of the principal's application and through completion of the adjudication of the derivative's application.

(f) *Evidence demonstrating a present danger of retaliation.* A principal applicant or T–1 nonimmigrant seeking derivative T nonimmigrant status for an eligible family member on the basis of facing a present danger of retaliation as a result of the principal applicant's or T–1 nonimmigrant's escape from a severe form of trafficking or cooperation with law enforcement, must demonstrate the basis of this danger. USCIS may contact the LEA involved, if appropriate. An applicant may satisfy this requirement by submitting:

(1) Documentation of a previous grant of advance parole to an eligible family member;

(2) A signed statement from a law enforcement agency describing the danger of retaliation;

(3) A personal statement from the principal applicant or derivative applicant describing the danger the family member faces and how the danger is linked to the victim's escape or cooperation with law enforcement; and/or

(4) Any other credible evidence, including trial transcripts, court documents, police reports, news articles, copies of reimbursement forms for travel to and from court, and affidavits from other witnesses. This evidence may be from the United States or any country in which the eligible family member is facing danger of retaliation.

(g) *Biometric submission; evidentiary standards.* The provisions for biometric submission and evidentiary standards described in § 214.204(b) and (d) apply to an eligible family member's Application for Derivative T Nonimmigrant Status.

(h) *Review and decision.* USCIS will review the application and issue a decision in accordance with paragraph (d) of this section.

(i) *Derivative approvals.* A noncitizen whose Application for Derivative T Nonimmigrant Status is approved is not subject to the annual limit described in § 214.210. USCIS will not approve an Application for Derivative T Nonimmigrant Status unless and until it has approved T–1 nonimmigrant status for the principal applicant.

(1) *Approvals for eligible family members in the United States.* When USCIS approves an Application for Derivative T Nonimmigrant Status for an eligible family member in the United States, USCIS will concurrently approve T nonimmigrant status for the eligible family member. USCIS will notify the T–1 nonimmigrant of such approval and provide evidence of T nonimmigrant status to the derivative.

(2) *Approvals for eligible family members outside the United States.* When USCIS approves an application for an eligible family member outside the United States, USCIS will notify the T–1 nonimmigrant of such approval and provide the necessary documentation to the Department of State for consideration of visa issuance.

(3) *Employment authorization.* (i) A noncitizen granted derivative T nonimmigrant status may apply for employment authorization by filing an Application for Employment Authorization in accordance with form instructions.

(ii) For derivatives in the United States, the Application for Employment Authorization may be filed concurrently with the Application for Derivative T Nonimmigrant Status or at any later time.

(iii) For derivatives outside the United States, an Application for Employment Authorization based on their T nonimmigrant status may only be filed after admission to the United States in T nonimmigrant status.

(iv) If the Application for Employment Authorization is approved, the derivative T nonimmigrant will be granted employment authorization pursuant to 8 CFR 274a.12(c)(25) for the period remaining in derivative T nonimmigrant status.

(4) *Travel abroad.* In order to return to the United States after travel abroad and continue to hold derivative T nonimmigrant status, a noncitizen granted derivative T nonimmigrant status must either be granted advance parole pursuant to section 212(d)(5) of the Act and 8 CFR 223 or obtain a T nonimmigrant visa (unless visa exempt under 8 CFR 212.1) and be admitted as a T nonimmigrant at a designated port of entry.

§ 214.212 Extension of T nonimmigrant status.

(a) *Eligibility.* USCIS may grant extensions of T–1 nonimmigrant status beyond 4 years from the date of approval in 1-year periods from the date the T–1 nonimmigrant status ends if:

(1) An LEA detecting, investigating, or prosecuting activity related to acts of trafficking certifies that the presence of the applicant in the United States is necessary to assist in the detection, investigation, or prosecution of such activity; or

(2) USCIS determines that an extension is warranted due to exceptional circumstances.

(b) *Application for a discretionary extension of status.* Upon application, USCIS may extend T–1 nonimmigrant status based on law enforcement need or exceptional circumstances. A T–1 nonimmigrant may apply for an extension by submitting the form designated by USCIS in accordance with form instructions. A derivative T nonimmigrant may file for an extension of status independently if the T–1 nonimmigrant remains in valid T nonimmigrant status, or the T–1 nonimmigrant may file for an extension of T–1 status and request that this extension be applied to the derivative family members in accordance with the form instructions.

(c) *Timely filing.* An applicant should file the application to extend nonimmigrant status before the expiration of T nonimmigrant status. If T nonimmigrant status has expired, the applicant must explain in writing the reason for the untimely filing. USCIS may exercise its discretion to approve an untimely filed application for extension of T nonimmigrant status.

(d) *Evidence.* In addition to the application, a T nonimmigrant must include evidence to support why USCIS should grant an extension of T nonimmigrant status. The nonimmigrant bears the burden of establishing eligibility for an extension of status and that a favorable exercise of discretion is warranted.

(e) *Evidence of law enforcement need.* An applicant may demonstrate law enforcement need by submitting evidence that comes directly from an LEA, including:

(1) A new LEA declaration;

(2) Evidence from a law enforcement official, prosecutor, judge, or other authority who can detect, investigate, or prosecute acts of trafficking, such as a letter on the agency's letterhead, email, or fax; or

(3) Any other credible evidence.

(f) *Exceptional circumstances.* (1) USCIS may, in its discretion, extend status beyond the 4-year period if it determines the extension of the period of such nonimmigrant status is warranted due to exceptional circumstances as described in section 214(o)(7)(iii) of the Act. (2) USCIS may approve an extension of status for a principal applicant, based on exceptional circumstances, when an approved eligible family member is awaiting initial issuance of a T visa by an embassy or consulate and the principal applicant's T–1 nonimmigrant status is soon to expire.

(g) *Evidence of exceptional circumstances.* An applicant may demonstrate exceptional circumstances by submitting:

(1) The applicant's affirmative statement; or

(2) Any other credible evidence, including but not limited to:

(i) Medical records;

(ii) Police or court records;

(iii) News articles;

(iv) Correspondence with an embassy or consulate; and

(v) Affidavits from individuals with direct knowledge of or familiarity with the applicant's circumstances.

(h) *Mandatory extensions of status for adjustment of status applicants.* USCIS will automatically extend T nonimmigrant status when a T nonimmigrant properly files an application for adjustment of status during the period of T nonimmigrant status, in accordance with 8 CFR 245.23. No separate application for extension of T nonimmigrant status, or supporting evidence, is required.

§ 214.213 Revocation of approved T nonimmigrant status.

(a) *Automatic revocation of derivative status.* An approved Application for Derivative T Nonimmigrant Status will be revoked automatically if the family member with an approved derivative application notifies USCIS that they will not apply for admission to the United States. An automatic revocation cannot be appealed.

(b) *Revocation on notice/grounds for revocation.* USCIS may revoke an approved Application for T Nonimmigrant Status following issuance of a notice of intent to revoke if:

(1) The approval of the application violated the requirements of section 101(a)(15)(T) of the Act or this subpart or involved error in preparation, procedure, or adjudication that led to the approval;

(2) In the case of a T–2 spouse, the applicant's divorce from the T–1 principal applicant has become final;

(3) In the case of a T–1 principal applicant, an LEA with jurisdiction to detect, investigate, or prosecute the acts of severe forms of trafficking in persons notifies USCIS that the applicant has refused to comply with a reasonable request to assist with the detection, investigation, or prosecution of the trafficking in persons and provides USCIS with a detailed explanation in writing; or

(4) The LEA that signed the LEA declaration withdraws it or disavows its contents and notifies USCIS and provides a detailed explanation of its reasoning in writing.

(c) *Procedures.* (1) USCIS may revoke an approved application for T nonimmigrant status following a notice of intent to revoke.

(i) The notice of intent to revoke must be in writing and contain a statement of the grounds for the revocation and the time period allowed for the T nonimmigrant's rebuttal.

(ii) The T nonimmigrant may submit evidence in rebuttal within 30 days of the notice.

(iii) USCIS will consider all relevant evidence in determining whether to revoke the approved application for T nonimmigrant status.

(2) If USCIS revokes approval of the previously granted T nonimmigrant status application, USCIS:

(i) Will provide written notice to the applicant; and

(ii) May notify the LEA who signed the LEA declaration, any consular officer having jurisdiction over the applicant, or the Office of Refugee Resettlement of the Department of Health and Human Services.

(3) If an applicant appeals the revocation, the decision will not become final until the administrative appeal is decided in accordance with 8 CFR 103.3.

(d) *Effect of revocation.* Revocation of T–1 nonimmigrant status will terminate the principal's status as a T nonimmigrant and result in automatic termination of any derivative T nonimmigrant status. If a derivative application is pending at the time of revocation of T–1 nonimmigrant status, such pending applications will be denied. Revocation of a T–1 nonimmigrant status or derivative T nonimmigrant status also revokes any waiver of inadmissibility granted in conjunction with such application. The revocation of T–1 nonimmigrant status will have no effect on the annual numerical limit described in § 214.210.

§ 214.214 Removal proceedings.

(a) Nothing in this section prohibits DHS from instituting removal proceedings for conduct committed after admission, or for conduct or a condition that was not disclosed prior to the granting of T nonimmigrant status, including misrepresentations of material facts in the Application for T–1 Nonimmigrant Status or in an Application for Derivative T Nonimmigrant Status, or after revocation of T nonimmigrant status.

(b) ICE will maintain a policy regarding the exercise of discretion toward all applicants for T nonimmigrant status and T nonimmigrants. This policy will address, but need not be limited to,

ICE's discretionary decision-making in proceedings before the Executive Office for Immigration Review and considerations related to ICE's immigration enforcement actions involving T visa applicants and T nonimmigrants.

§ 214.215 USCIS employee referral.

(a) Any USCIS employee who, while carrying out their official duties, comes into contact with a noncitizen believed to be a victim of a severe form of trafficking in persons and is not already working with an LEA may consult, as necessary, with the ICE officials responsible for victim protection, trafficking investigations and prevention, and deterrence.

(b) The ICE office may, in turn, refer the victim to another LEA with responsibility for detecting, investigating, or prosecuting acts of trafficking.

(c) If the noncitizen has a credible claim to victimization, USCIS may advise the individual that they can submit an Application for T Nonimmigrant Status and seek any other benefit or protection for which they may be eligible, provided doing so would not compromise the noncitizen's safety.

§ 214.216 Restrictions on use and disclosure of information relating to applicants for T nonimmigrant classification.

(a) The use or disclosure (other than to a sworn officer or employee of DHS, the Department of Justice, the Department of State, or a bureau or agency of any of those departments, for legitimate department, bureau, or agency purposes) of any information relating to the beneficiary of a pending or approved Application for T Nonimmigrant Status is prohibited unless the disclosure is made in accordance with an exception described in 8 U.S.C. 1367(b).

(b) Information protected under 8 U.S.C. 1367(a)(2) may be disclosed to Federal prosecutors to comply with constitutional obligations to provide statements by witnesses and certain other documents to defendants in pending Federal criminal proceedings.

(c) Agencies receiving information under this section, whether governmental or non-governmental, are bound by the confidentiality provisions and other restrictions set out in 8 U.S.C. 1367.

(d) DHS officials are prohibited from making adverse determinations of admissibility or deportability based on information obtained solely from the trafficker, unless the applicant has been convicted of a crime or crimes listed in section 237(a)(2) of the Act.

PART 245—ADJUSTMENT OF STATUS TO THAT OF PERSON ADMITTED FOR PERMANENT RESIDENCE

■ 8. The authority citation for part 245 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1182, 1252, 1255; Pub. L. 105–100, section 202, 111 Stat. 2160, 2193; Pub. L. 105–277, section 902, 112 Stat. 2681; Pub. L. 110–229, tit. VII, 122 Stat. 754; 8 CFR part 2.

■ 9. Revise § 245.23 to read as follows:

§ 245.23 Adjustment of noncitizens in T nonimmigrant classification.

(a) *Eligibility of principal T–1 applicants.* Except as described in paragraph (c) of this section, a noncitizen may be granted adjustment of status to that of a noncitizen lawfully admitted for permanent residence, provided the noncitizen:

(1) Applies for such adjustment.

(2) Was lawfully admitted to the United States as a T–1 nonimmigrant, as defined in 8 CFR 214.201.

(3) Continues to hold T–1 nonimmigrant status at the time of application.

(4) Has been physically present in the United States for a continuous period of at least 3 years since the date of lawful admission as a T–1 nonimmigrant, or has been physically present in the United States for a continuous period during the investigation or prosecution of acts of trafficking and the Attorney General has determined that the investigation or prosecution is complete, whichever period is less; except

(i) If the applicant has departed from the United States for any single period in excess of 90 days or for any periods in the aggregate exceeding 180 days, the applicant shall be considered to have failed to maintain continuous physical presence in the United States for purposes of section 245(l)(1)(A) of the Act; and

(ii) If the noncitizen was granted T nonimmigrant status, such noncitizen's physical presence in the CNMI before, on, or after November 28, 2009, and subsequent to the grant of T nonimmigrant status, is considered as equivalent to presence in the United States pursuant to an admission in T nonimmigrant status.

(5) Is admissible to the United States under the Act, or otherwise has been granted a waiver by USCIS of any applicable ground of inadmissibility, at the time of examination for adjustment.

(6) Has been a person of good moral character since first being lawfully admitted as a T–1 nonimmigrant and until USCIS completes the adjudication of the application for adjustment of status.

(7)(i) Has, since first being lawfully admitted as a T–1 nonimmigrant, and until the conclusion of adjudication of the application, complied with any reasonable request for assistance in the detection, investigation or prosecution of acts of trafficking, as defined in § 8 CFR 214.201; or

(ii) Would suffer extreme hardship involving unusual and severe harm upon removal from the United States, as provided in 8 CFR 214.209; or

(iii) Was younger than 18 years of age at the time of the victimization that qualified the T nonimmigrant for relief under section 101(a)(15)(T) of the Act, 8 U.S.C. 1101(a)(15)(T); or

(iv) Established an inability to cooperate with a reasonable request for assistance at the time their Application for T Nonimmigrant Status was approved, as defined in 8 CFR 214.202(c)(1) and (2).

(b) *Eligibility of derivative family members.* A derivative family member of a T–1 nonimmigrant status holder may be granted adjustment of status to that of a noncitizen lawfully admitted for permanent residence, provided:

(1) The T–1 nonimmigrant has applied for adjustment of status under this section and meets the eligibility requirements described under paragraph (a) of this section;

(2) The derivative family member was lawfully admitted to the United States in derivative T nonimmigrant status under section 101(a)(15)(T)(ii) of the Act, and continues to hold such status at the time of application;

(3) The derivative family member has applied for such adjustment; and

(4) The derivative family member is admissible to the United States under the Act, or otherwise has been granted a waiver by USCIS of any applicable ground of inadmissibility, at the time of examination for adjustment.

(5) The derivative family member does not automatically lose T nonimmigrant status when the T–1 nonimmigrant adjusts status.

(c) *Exceptions.* A noncitizen is not eligible for adjustment of status under paragraph (a) or (b) of this section if:

(1) Their T nonimmigrant status has been revoked pursuant to 8 CFR 214.213;

(2) They are described in section 212(a)(3), 212(a)(10)(C), or 212(a)(10)(E) of the Act; or

(3) They are inadmissible under any other provisions of section 212(a) of the Act and have not obtained a waiver of

inadmissibility in accordance with 8 CFR 212.18 or 214.210.

(4) Where the applicant establishes that the victimization was a central reason for their unlawful presence in the United States, section 212(a)(9)(B)(iii) of the Act is not applicable, and the applicant need not obtain a waiver of that ground of inadmissibility. The applicant, however, must submit with their application for adjustment of status evidence sufficient to demonstrate that the victimization suffered was a central reason for the unlawful presence in the United States. To qualify for this exception, the victimization need not be the sole reason for the unlawful presence but the nexus between the victimization and the unlawful presence must be more than tangential, incidental, or superficial.

(d) *Jurisdiction.* (1) USCIS shall determine whether a T–1 applicant for adjustment of status under this section was lawfully admitted as a T–1 nonimmigrant and continues to hold such status, has been physically present in the United States during the requisite period, is admissible to the United States or has otherwise been granted a waiver of any applicable ground of inadmissibility, and has been a person of good moral character during the requisite period.

(2) USCIS shall determine whether the applicant received a reasonable request for assistance in the investigation or prosecution of acts of trafficking as defined in 8 CFR 214.201 and 214.208(c), and, if so, whether the applicant complied in such request.

(3) If USCIS determines that the applicant failed to comply with any reasonable request for assistance, USCIS shall deny the application for adjustment of status unless USCIS finds that the applicant would suffer extreme hardship involving unusual and severe harm upon removal from the United States.

(e) *Application*—(1) *Filing requirements.* Each T–1 principal applicant and each derivative family member who is applying for adjustment of status must file an Application to Register Permanent Residence or Adjust Status; and

(i) Accompanying documents, in accordance with the form instructions;

(ii) A photocopy of the applicant's Notice of Action, granting T nonimmigrant status;

(iii) A photocopy of all pages of their most recent passport or an explanation of why they do not have a passport;

(iv) A copy of the applicant's Arrival-Departure Record; and

(v) Evidence that the applicant was lawfully admitted in T nonimmigrant status and continues to hold such status at the time of application. For T nonimmigrants who traveled outside the United States and returned to the United States after presenting an Advance Parole Document issued while the adjustment of status application was pending, the date that the applicant was first admitted in lawful T status will be the date of admission for purposes of this section, regardless of how the applicant's Arrival-Departure Record is annotated.

(2) *T–1 principal applicants.* In addition to the items in paragraph (e)(1) of this section, T–1 principal applicants must submit:

(i) Evidence, including an affidavit from the applicant and a photocopy of all pages of all of the applicant's passports valid during the required period (or equivalent travel document or a valid explanation of why the applicant does not have a passport), that they have been continuously physically present in the United States for the requisite period as described in paragraph (a)(2) of this section. Applicants should submit evidence described in § 245.22. A signed statement from the applicant attesting to the applicant's continuous physical presence alone will not be sufficient to establish this eligibility requirement. If additional documentation is not available, the applicant must explain why in an affidavit and provide additional affidavits from others with first-hand knowledge who can attest to the applicant's continuous physical presence by specific facts.

(A) If the applicant has departed from and returned to the United States while in T–1 nonimmigrant status, the applicant must submit supporting evidence showing the dates of each departure from the United States and the date, manner, and place of each return to the United States.

(B) Applicants applying for adjustment of status under this section who have less than 3 years of continuous physical presence while in T–1 nonimmigrant status must submit a document signed by the Attorney General or their designee, attesting that the investigation or prosecution is complete.

(ii) Evidence of good moral character in accordance with paragraph (g) of this section; and

(A) Evidence that the applicant has complied with any reasonable request for assistance in the investigation or prosecution of the trafficking as described in paragraph (f)(1) of this section since having first been lawfully admitted in T–1 nonimmigrant status and until the adjudication of the application; or

(B) Evidence that the applicant would suffer extreme hardship involving unusual and severe harm if removed from the United States as described in paragraph (f)(2) of this section.

(3) *Evidence relating to discretion.* Each applicant seeking adjustment under section 245(l) of the Act bears the burden of showing that discretion should be exercised in their favor. Where adverse factors are present, an applicant may offset these by submitting supporting documentation establishing mitigating equities that the applicant wants USCIS to consider. Depending on the nature of adverse factors, the applicant may be required to clearly demonstrate that the denial of adjustment of status would result in exceptional and extremely unusual hardship. Moreover, depending on the gravity of the adverse factors, such a showing might still be insufficient. For example, only the most compelling positive factors would justify a favorable exercise of discretion in cases where the applicant has committed or been convicted of a serious violent crime, a crime involving sexual abuse committed upon a child, or multiple drug-related crimes, or where there are security- or terrorism-related concerns.

(f) *Assistance in the investigation or prosecution or a showing of extreme hardship.* Each T–1 principal applicant must establish that since having been lawfully admitted as a T–1 nonimmigrant and up until the adjudication of the application, they complied with any reasonable request for assistance in the investigation or prosecution of the acts of trafficking, as defined in 8 CFR 214.201, or establish that they would suffer extreme hardship involving unusual and severe harm upon removal from the United States.

(1) Each T–1 applicant for adjustment of status under section 245(l) of the Act must submit evidence demonstrating that the applicant has complied with any reasonable requests for assistance in the investigation or prosecution of the human trafficking offenses during the requisite period; or

(2) In lieu of showing continued compliance with requests for assistance, an applicant may establish that they would suffer extreme hardship involving unusual and severe harm upon removal from the United States.

(i) The hardship determination will be evaluated on a case-by-case basis, in accordance with the factors described in 8 CFR 214.209.

(ii) Where the basis for the hardship claim represents a continuation of the hardship claimed in the Application for

T Nonimmigrant Status, the applicant need not re-document the entire claim, but rather may submit evidence to establish that the previously established hardship is ongoing. However, in reaching its decision regarding hardship under this section, USCIS is not bound by its previous hardship determination made under 8 CFR 214.209.

(g) *Good moral character.* A T–1 nonimmigrant applicant for adjustment of status under this section must demonstrate that they have been a person of good moral character since first being lawfully admitted as a T–1 nonimmigrant and until USCIS completes the adjudication of their applications for adjustment of status. Claims of good moral character will be evaluated on a case-by-case basis, taking into account section 101(f) of the Act and the standards of the community. The applicant must submit evidence of good moral character as follows:

(1) An affidavit from the applicant attesting to their good moral character, accompanied by a local police clearance or a state-issued criminal background check from each locality or state in the United States in which the applicant has resided for 6 or more months during the requisite period in continued presence or T–1 nonimmigrant status.

(2) If police clearances, criminal background checks, or similar reports are not available for some or all locations, the applicant may include an explanation and submit other evidence with their affidavit.

(3) USCIS will consider other credible evidence of good moral character, such as affidavits from responsible persons who can knowledgeably attest to the applicant's good moral character.

(4) An applicant who is under 14 years of age is generally presumed to be a person of good moral character and is not required to submit evidence of good moral character. However, if there is reason to believe that an applicant who is under 14 years of age may lack good moral character, USCIS may require evidence of good moral character.

(h) *Filing and decision.* An application for adjustment of status from a T nonimmigrant under section 245(l) of the Act shall be filed with the USCIS office identified in the instructions to the Application to Register Permanent Residence or Adjust Status. Upon approval of adjustment of status under this section, USCIS will record the noncitizen's lawful admission for permanent residence as of the date of such approval and will notify the applicant in writing. Derivative family members' applications may not be approved before the principal applicant's application is approved.

(i) *Denial.* If the application for adjustment of status or the application for a waiver of inadmissibility is denied, USCIS will notify the applicant in writing of the reasons for the denial and of the right to appeal the decision to the Administrative Appeals Office (AAO) pursuant to the AAO appeal procedures found at 8 CFR 103.3. Denial of the T–1 principal applicant's application will result in the automatic denial of a derivative family member's application.

(j) *Effect of Departure.* (1) If an applicant for adjustment of status under this section departs the United States, they shall be deemed to have abandoned the application, and it will be denied.

(2) If, however, the applicant is not under exclusion, deportation, or removal proceedings, and they filed an Application for Travel Document, in accordance with the instructions on the form, or any other appropriate form, and was granted advance parole by USCIS for such absences, and was inspected and paroled upon returning to the United States, they will not be deemed to have abandoned the application.

(3) If the adjustment of status application of such an individual is subsequently denied, they will be treated as an applicant for admission subject to sections 212 and 235 of the Act. If an applicant for adjustment of status under this section is under exclusion, deportation, or removal proceedings, USCIS will deem the application for adjustment of status abandoned as of the moment of the applicant's departure from the United States.

(k) *Inapplicability.* Sections 245.1 and 245.2 do not apply to noncitizens seeking adjustment of status under this section.

(l) *Annual limit of T–1 principal applicant adjustments*—(1) *General.* The total number of T–1 principal applicants whose status is adjusted to that of lawful permanent residents under this section may not exceed the statutory limit in any fiscal year.

(2) *Waiting list.* (i) All eligible applicants who, due solely to the limit imposed in section 245(l)(4) of the Act and paragraph (l)(1) of this section, are not granted adjustment of status will be placed on a waiting list. USCIS will send the applicant written notice of such placement.

(ii) Priority on the waiting list will be determined by the date the application was properly filed, with the oldest applications receiving the highest priority.

(iii) In the following fiscal year, USCIS will proceed with granting adjustment of status to applicants on the waiting list who remain admissible and eligible for adjustment of status in order of highest priority until the available numbers are exhausted for the given fiscal year.

(iv) After the status of qualifying applicants on the waiting list has been adjusted, any remaining numbers for that fiscal year will be issued to new qualifying applicants in the order that the applications were properly filed.

PART 274a—CONTROL OF EMPLOYMENT OF ALIENS

■ 10. The authority citation for part 274a continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1324a; 48 U.S.C. 1806; Pub. L. 101–410, 104 Stat. 890 (28 U.S.C. 2461 note); Pub. L. 114–74, 129 Stat. 599 (28 U.S.C. 2461 note); 8 CFR part 2.

■ 11. Amend § 274a.12 by reserving paragraphs (c)(37) through (39) and adding paragraph (c)(40) to read as follows:

§ 274a.12 Classes of aliens authorized to accept employment.

* * * * *

(c) * * *

(40) A noncitizen applicant for T nonimmigrant status, and eligible family members, who have pending, bona fide applications, and who merit a favorable exercise of discretion.

* * * * *

Alejandro N. Mayorkas,

Secretary, U.S. Department of Homeland Security.

CUSTOMER SERVICE AND INFORMATION

ELECTRONIC RESEARCH

World Wide Web

Full text of the daily Federal Register, CFR and other publications is located at: **www.govinfo.gov.**
Federal Register information and research tools, including Public Inspection List and electronic text are located at: **www.federalregister.gov.**

E-mail

FEDREGTOC (Daily Federal Register Table of Contents Electronic Mailing List) is an open e-mail service that provides subscribers with a digital form of the Federal Register Table of Contents. The digital form of the Federal Register Table of Contents includes HTML and PDF links to the full text of each document.
To join or leave, go to **https://public.govdelivery.com/accounts/USGPOOFR/subscriber/new**, enter your email address, then follow the instructions to join, leave, or manage your subscription.
PENS (Public Law Electronic Notification Service) is an e-mail service that notifies subscribers of recently enacted laws.
To subscribe, go to **http://listserv.gsa.gov/archives/publaws-l.html and select** *Join or leave the list (or change settings);* then follow the instructions.
FEDREGTOC and **PENS** are mailing lists only. We cannot respond to specific inquiries.
Reference questions. Send questions and comments about the Federal Register system to: **fedreg.info@nara.gov**
The Federal Register staff cannot interpret specific documents or regulations.

FEDERAL REGISTER PAGES AND DATE, APRIL

CFR PARTS AFFECTED DURING APRIL

At the end of each month the Office of the Federal Register publishes separately a List of CFR Sections Affected (LSA), which lists parts and sections affected by documents published since the revision date of each title.
