FEDERAL REGISTER

Vol. 89 Tuesday,

No. 84 April 30, 2024

Pages 34071–34944

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

The President

Memorandum of April 12, 2024

Delegation of Authority Under Section 506(a)(2) of the Foreign Assistance Act of 1961

Memorandum for the Secretary of State

By the authority vested in me as President by the Constitution and the laws of the United States of America, including section 621 of the Foreign Assistance Act of 1961 (FAA), I hereby delegate to the Secretary of State:

(1) the authority under section 506(a)(2) of the FAA to direct the drawdown of up to $60 million in articles and services from the inventory and resources of any agency of the United States Government and military education and training from the Department of Defense for the purposes and under the authorities of chapter 8 of part I of the FAA to provide anti-crime and counternarcotics assistance to countries that contribute personnel to the Multinational Security Support Mission for Haiti and to the Haitian National Police; and

(2) the authority to make the determination required under such section to direct such a drawdown.

You are authorized and directed to publish this memorandum in the *Federal Register*.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 120

RIN 3206–AO63

Guidance Procedures

AGENCY: Office of Personnel Management (OPM).

ACTION: Final rule.

SUMMARY: This final rule removes existing regulations concerning procedures applicable to the issuance of OPM's guidance documents. OPM is taking this action because President Biden revoked the authority for the regulations in an Executive order (E.O.) on January 20, 2021. Furthermore, OPM finds that the current procedures are impracticable and lack the flexibility needed for issuing guidance internally.

DATES: This final rule is effective on May 30, 2024.

FOR FURTHER INFORMATION CONTACT: Kirsten J. Moncada, Executive Director, Office of the Executive Secretariat, Privacy, and Information Management at 202–936–0251.

SUPPLEMENTARY INFORMATION:

I. Background

Pursuant to E.O. 13891, ''Promoting the Rule of Law Through Improved Agency Guidance Documents,'' OPM published a final rule (85 FR 65651, October 16, 2020) that established the procedures and requirements regarding the issuance, revision, and withdrawal of guidance documents codified at 5 CFR part 120. On January 20, 2021, President Biden issued E.O. 13992, ''Revocation of Certain Executive Orders Concerning Federal Regulation'' (86 FR 7049, January 25, 2021), which revoked several E.O.s, including E.O. 13891, and directed agencies to take the necessary steps to rescind regulations implemented pursuant to E.O. 13891. This rule fulfills that requirement. In accordance with E.O. 13992, OPM is removing 5 CFR part 120 from the Code of Federal Regulations.

In addition to the procedural requirements established at 5 CFR part 120, OPM created a ''Guidance'' web page at *https://www.opm.gov/guidance* pursuant to E.O. 13891. OPM has found that it is impracticable to maintain a single, comprehensive, and up-to-date collection of guidance documents. In fact, most of OPM's website at *https://www.opm.gov* consists of guidance for prospective, current, and former employees; retirees and annuitants; and agencies. Very little of that guidance was issued as stand-alone documents susceptible to the processes set forth in 5 CFR part 120. Therefore, after consideration and review, OPM has concluded that the existing regulations create unnecessary burden for the agency and deprive the agency of necessary flexibility to determine how best to issue public guidance.

Accordingly, OPM rescinds 5 CFR part 120 in its entirety and will remove the Guidance web page. As has been OPM's practice predating the rule, OPM will continue to make guidance available to the public on its website at *https://www.opm.gov.*

II. Waiver of Notice of Proposed Rulemaking

Under the Administrative Procedure Act, an agency may waive the normal notice and comment procedures if the action is a rule of ''agency organization, procedure, or practice.'' *See* 5 U.S.C. 553(b)(A). The Civil Service Reform Act's additional provisions for rulemaking by OPM incorporate this exception. *See* 5 U.S.C. 1105. Since, like the rule it is rescinding, this rule is not a substantive rule but a rule of agency procedure, notice and comment are not necessary.

III. Expected Impact of This Rule

This rule removes regulations pertaining to OPM's internal procedures on issuing guidance documents. As such, they were for the use of OPM personnel only and did not create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its agencies or other entities, its officers or employees, or any other person. 5 CFR 120.12. Accordingly, we expect the economic impact of removing those regulations, if any, to be minimal.

IV. Procedural Issues and Regulatory Review

A. Regulatory Review

OPM has examined the impact of this rule as required by Executive Orders 12866, 13563, and 14094, which direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public, health, and safety effects, distributive impacts, and equity). OMB has determined this rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12866, as amended by Executive Order 14094.

B. Regulatory Flexibility Act

A Regulatory Flexibility Analysis is not required for this final rule because OPM is not required to publish a general notice of proposed rulemaking for this matter. *See* 5 U.S.C. 601(2), 604(a).

C. Federalism

OPM has examined this rule in accordance with Executive Order 13132, ''Federalism,'' and has determined that this rule will not have any negative impact on the rights, roles and responsibilities of State, local, or Tribal governments. Therefore, in accordance with Executive Order 13132, ''Federalism,'' OPM has determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

D. Civil Justice Reform

This regulation meets the applicable standards set forth in Executive Order 12988.

E. Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100 million or more in any year and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

F. Paperwork Reduction Act of 1995

This rule will not impose any reporting or recordkeeping requirements

subject to the Paperwork Reduction Act, 44 U.S.C. 3501–3521.

G. Congressional Review Act

This action pertains to agency organization, procedure, or practice, and does not substantially affect the rights or obligations of non-agency parties. Accordingly, it is not a ''rule'' as that term is used in the Congressional Review Act, 5 U.S.C. 804(3)(C), and the reporting requirement of 5 U.S.C. 801 does not apply.

List of Subjects in 5 CFR Part 120

Administrative practice and procedure.

PART 120 [REMOVED AND RESERVED]

■ For the reasons stated in the preamble, and under the authority of 5 U.S.C. 301 and E.O. 13992, OPM removes and reserves 5 CFR part 120.

Office of Personnel Management.

Kayyonne Marston,

Federal Register Liaison.

BILLING CODE 6325–67–P

DEPARTMENT OF ENERGY

10 CFR Part 1021

[DOE–HQ–2023–0063]

RIN 1990–AA48

National Environmental Policy Act Implementing Procedures

AGENCY: Office of the General Counsel, Department of Energy.

ACTION: Final rule.

SUMMARY: The U.S. Department of Energy (DOE or the Department) is revising its National Environmental Policy Act (NEPA) implementing procedures (regulations) to add a categorical exclusion for certain energy storage systems and revise categorical exclusions for upgrading and rebuilding powerlines and for solar photovoltaic systems, as well as to make conforming changes to related sections of DOE's NEPA regulations. These changes will help ensure that DOE conducts an appropriate and efficient environmental review of proposed projects that normally do not result in significant environmental impacts.

DATES: This rule is effective May 30, 2024.

ADDRESSES: Documents relevant to this rulemaking are posted at *www.regulations.gov* (*Docket: DOE–HQ–2023–0063*). These documents include: the notice of proposed rulemaking, public comments, this final rule, and DOE's Technical Support Document, which provides additional information regarding the changes and a redline/strikeout version of affected sections of the DOE NEPA regulations indicating the changes made by this rule.

FOR FURTHER INFORMATION CONTACT: For information regarding DOE's NEPA regulations, contact Ms. Carrie Abravanel, Deputy Director, Office of NEPA Policy and Compliance, at *carrie.abravanel@hq.doe.gov* or 202–586–4798.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction and Background

The National Environmental Policy Act, as amended, (42 U.S.C. 4321 *et seq.*) requires Federal agencies to provide a detailed statement regarding the environmental impacts of proposals for major Federal actions significantly affecting the quality of the human environment. The Council on Environmental Quality (CEQ) regulations implementing NEPA (40 CFR parts 1500–1508) require agencies to develop their own NEPA implementing procedures to apply the CEQ regulations to their specific programs and decision-making processes (40 CFR 1507.3). DOE promulgated its regulations entitled ''National Environmental Policy Act Implementing Procedures'' (10 CFR part 1021) on April 24, 1992 (57 FR 15122), revised these regulations on five subsequent occasions,[1] and now revises these regulations again with this rule.

NEPA establishes three types of environmental review for Federal proposed actions—environmental impact statement, environmental assessment, and categorical exclusion—each involving different levels of information and analysis. An environmental impact statement is a detailed analysis of reasonably foreseeable environmental effects prepared for a major Federal action significantly affecting the quality of the human environment (42 U.S.C. 4332(2)(C) and 40 CFR part 1502 and section 1508.1(j)). An environmental assessment is a concise public document prepared by a Federal agency to set forth the basis for its finding of no significant impact or its determination that an environmental impact statement is necessary (42 U.S.C. 4336(b)(2) and 40 CFR 1501.5, 1501.6, and 1508.1(h)). A categorical exclusion is a category of actions that the agency has determined, as established in its agency NEPA procedures, normally does not have a significant effect on the human environment and therefore does not require preparation of an environmental assessment or environmental impact statement (40 CFR 1501.4, 1507.3(e)(2)(ii), and 1508.1(d)). DOE's procedures for applying categorical exclusions require the Department to consider several conditions (described in section II of this document), including whether extraordinary circumstances exist such that a normally excluded action may have a significant environmental effect.

II. Establishment and Use of Categorical Exclusions

CEQ issued guidance in 2010 on establishing, applying, and revising categorical exclusions under NEPA (75 FR 75628; December 6, 2010). CEQ explained, ''Categorical exclusions are

[1] July 9, 1996 (61 FR 36222), December 6, 1996 (61 FR 64603), August 27, 2003 (68 FR 51429), October 13, 2011 (76 FR 63764), and December 4, 2020 (85 FR 78197).

not exemptions or waivers of NEPA review; they are simply one type of NEPA review. To establish a categorical exclusion, agencies determine whether a proposed activity is one that, on the basis of past experience, normally does not require further environmental review. Once established, categorical exclusions provide an efficient tool to complete the NEPA environmental review process for proposals that normally do not require more resource intensive [environmental assessments or environmental impact statements]. The use of categorical exclusions can reduce paperwork and delay, so that [environmental assessments or environmental impact statements] are targeted toward proposed actions that truly have the potential to cause significant environmental effects.''

DOE establishes and revises categorical exclusions pursuant to a rulemaking, such as this one, for defined classes of actions that the Department determines are supported by a record showing that the actions normally do not have significant environmental impacts, individually or cumulatively. To establish the record in this rulemaking, DOE evaluated environmental assessments prepared by DOE and by other Federal agencies, categorical exclusions established by DOE and by other Federal agencies, categorical exclusion determinations, technical reports, applicable requirements, industry practices, and other publicly available information. DOE summarized this information in the preamble to the notice of proposed rulemaking and in a Technical Support Document that was issued alongside the notice of proposed rulemaking (88 FR 78681; November 16, 3023). DOE provided the public with an opportunity to review and comment on DOE's proposed changes. DOE reviewed all comments received on the notice of proposed rulemaking, added information to the Technical Support Document, revised the categorical exclusions addressed in this rule (section III of this document), and prepared responses to public comments (section IV of this document).

In addition to developing a substantiation record to support the establishment or revision of a categorical exclusion, DOE also conducts a project-specific environmental review when determining whether one or more categorical exclusions applies to a proposed action. This entails evaluation of a proposed action against several requirements included in DOE's NEPA regulations. DOE must determine on a case-by-case basis, in accordance with 10 CFR 1021.410(b), that: (1) the proposed action fits within a categorical exclusion listed in appendix A or B to subpart D of part 1021, including (in the case of categorical exclusions listed in appendix B) the integral elements set forth in appendix B; (2) there are no extraordinary circumstances [2] related to the proposal that may affect the significance of the environmental impacts of the proposed action and require preparation of an environmental assessment or environmental impact statement, consistent with 40 CFR 1501.4(b)(1) and (b)(2); and (3) the proposal has not been improperly segmented [3] to meet the definition of a categorical exclusion, there are no connected or related actions with cumulatively significant impacts, and the proposed action is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 as an impermissible interim action.

As part of its determination of whether the proposed action fits within a categorical exclusion, DOE evaluates whether the proposed action satisfies conditions included within the text of the individual categorical exclusion. These conditions are discussed generally in this section and in more detail in section III of this document, which describes the changes that DOE is making in this final rule. For example, each of the categorical exclusions included in this rulemaking contains requirements that the proposed action incorporate applicable standards and follow best management practices. These standards and practices can vary by technology and location. Also, they change over time to reflect lessons learned and to address emerging technologies and practices. The Technical Support Document provides links to and summarizes information on some of the relevant standards and best management practices for the categorical exclusions that are included in this rulemaking. As another example, the changes included in this rulemaking specify conditions regarding siting proposed actions on previously disturbed or developed land. DOE defines previously disturbed or developed as ''land that has been changed such that its functioning ecological processes have been and remain altered by human activity. The phrase encompasses areas that have been transformed from natural cover to non-native species or a managed state, including, but not limited to, utility and electric power transmission corridors and rights-of-way, and other areas where active utilities and currently used roads are readily available'' (10 CFR 1021.410(g)(1)). As DOE explained in a 2011 notice of proposed rulemaking, ''In DOE's experience, the potential for certain types of actions to have significant impacts on the human environment is generally avoided when that action takes place within a previously disturbed or developed area, *i.e.,* land that has been changed such that the former state of the area and its functioning ecological processes have been altered'' (76 FR 218; January 3, 2011). DOE's experience reviewing proposed projects across the United States since 2011 supports this same conclusion. As another example, in categorical exclusion B4.14 for certain energy storage systems, DOE allows siting within a small area contiguous to a previously disturbed or developed area. DOE also has more than a decade of experience implementing categorical exclusions that allow construction on land that is contiguous to previously disturbed or developed areas. The area of contiguous land affected would be small as discussed in 10 CFR 1021.410(g)(2). Any proposed use of contiguous land is subject to review against all the conditions relevant to the categorical exclusion, including the integral elements that require consideration of effects on threatened and endangered species and their habitat, historic properties, and other environmentally sensitive resources. The Technical Support Document includes summaries of environmental assessments for projects proposed on previously disturbed or developed land and on contiguous land.

As previously noted, DOE's NEPA regulations also include ''integral elements'' that apply to all categorical exclusions listed in appendix B to subpart D of part 1021 (appendix B, paragraphs (1) through (5)). Although the integral elements are not repeated for each categorical exclusion, they are part of the definition of each categorical exclusion listed in appendix B, and DOE must consider them as part of its determination whether the proposed action fits within a categorical exclusion (10 CFR 1021.410(b)(1)). Integral elements require that, to fit within a categorical exclusion, the proposed action must not threaten a violation of applicable environment, safety, and

[2] DOE defines extraordinary circumstances as ''unique situations presented by specific proposals, including, but not limited to, scientific controversy about the environmental effects of the proposal; uncertain effects or effects involving unique or unknown risks; and unresolved conflicts concerning alternative uses of available resources.'' (10 CFR 1021.410(b)(2))

[3] Segmentation can occur when a proposal is broken down into smaller parts in order to avoid the appearance of significance of the total action. (10 CFR 1021.410(b)(3))

health requirements; require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities; disturb hazardous substances, pollutants, or contaminants that preexist in the environment such that there would be uncontrolled or unpermitted releases; have the potential to cause significant impacts on environmentally sensitive resources; or involve governmentally designated noxious weeds or invasive species, unless certain conditions are met.[4] DOE defines ''environmentally sensitive resource'' as a resource that has typically been identified as needing protection through Executive order, statute, or regulation by Federal, state, or local government, or a federally recognized Indian tribe. Environmentally sensitive resources include historic properties, threatened and endangered species or their habitat, floodplains, and wetlands, among others (10 CFR part 1021, subpart D, appendix B).

In determining whether a proposed action fits within a categorical exclusion, DOE may review information provided by an applicant, in its application and during follow-up requests; information from systems maintained by DOE, another Federal agency, or external party (*e.g.,* geographic information systems); information from site visits; information from discussions or consultations with Federal, state, local, or tribal governments; and information from other sources as needed. At any point during this review, DOE can determine that additional information is needed to make a categorical exclusion determination or decide to prepare an environmental assessment or environmental impact statement.

Only if DOE determines that all the applicable requirements and conditions of the categorical exclusion (including the integral elements, as applicable) have been met will it proceed to review the proposed action for extraordinary circumstances, and potentially proceed to issue a categorical exclusion determination. DOE regularly posts its categorical exclusion determinations at *www.energy.gov/nepa/doe-categorical-exclusion-cx-determinations.*

III. Changes Made in This Final Rule

A. Overview

In this final rule, DOE adds a categorical exclusion for certain energy storage systems and revises categorical exclusions for upgrading and rebuilding powerlines and for solar photovoltaic (PV) systems. DOE also makes conforming changes to other categorical exclusions, to a class of actions normally requiring an environmental assessment, and to a class of actions normally requiring an environmental impact statement (10 CFR part 1021, subpart D, appendices B, C, and D). DOE's process for developing the proposed changes is described in the notice of proposed rulemaking. The final changes, including differences from what was included in the notice of proposed rulemaking, are discussed in sections III.B through III.D of this final rule. These changes do not require any changes to or otherwise affect categorical exclusion determinations completed prior to the effective date of this final rule.

In addition, the notice of proposed rulemaking mistakenly included the text of paragraph (b) of categorical exclusion B5.1, Actions to conserve energy or water, and a new paragraph at B5.1(c). DOE did not intend to include that regulatory text in the notice of proposed rulemaking and has removed it from this final rule. DOE is not making changes to categorical exclusion B5.1 paragraph (b) or adding paragraph (c) at this time but may propose such changes in a future rulemaking.

B. Changes to Categorical Exclusion B4.13 for Upgrading and Rebuilding Existing Powerlines and Related Provisions

Powerlines are a critical component of the electric grid that move electricity from facilities that generate electricity to our communities, businesses, and factories. Upgrading and rebuilding[5] powerlines extends their useful life. Upgrades and rebuilds also can help reduce the need for new powerlines and can allow the replacement of components with newer, more efficient and resilient technology.

One example is reconductoring. Conductors are the wires that carry electricity. Most of the existing electric grid uses conductors with a steel core for strength surrounded by aluminum for the electrical current. More recently, conductor designs (referred to as advanced conductors) with composite or carbon cores, in place of steel, have come into use. Advanced conductors provide a variety of benefits including increased capacity. By increasing the capacity of powerlines it is possible to integrate renewable energy and other sources of electricity into the grid without the need to build new powerlines. Use of advanced conductors reduces line losses (*i.e.,* power lost during transmission and distribution of electricity) relative to traditional conductors, thereby improving efficiency.[6] Improvements to capacity and efficiency can help to ensure reliability, reduce costs to consumers, and reduce greenhouse gas (GHG) emissions associated with electricity generation, transmission, and distribution.

Upgrading and rebuilding powerlines also can avoid or reduce adverse environmental impacts, such as by relocating small[7] segments of the existing line to avoid a sensitive environmental resource. Upgrading and rebuilding powerlines also can enhance resilience. For example, an upgrade or rebuild project might convert segments of existing overhead powerlines to underground lines or replace old powerline poles to ensure continued safe operations.

Categorical exclusion B4.13 currently applies to upgrading or rebuilding ''approximately 20 miles in length or less'' of existing powerlines and allows for minor relocations of small segments of powerlines. With this final rule, DOE removes the mileage limitation, adds options for relocating within an existing right-of-way or within otherwise previously disturbed or developed lands, specifies conditions for widening a right-of-way under this categorical exclusion to comply with applicable electrical standards, and adds new conditions.

The potential significance of environmental impacts from upgrading or rebuilding powerlines is more related to local environmental conditions than to the length of the powerlines. For example, the presence of environmentally sensitive resources along the existing right-of-way is more pertinent than the length of the existing powerlines to be upgraded or rebuilt. DOE reviewed environmental assessments for powerline upgrades and rebuilds of various lengths. (*See*

[4] This is a summary description of the integral elements. *See* 10 CFR part 1021, subpart D, appendix B for the full text.

[5] A transmission line rebuild is typically a replacement of conductor and equipment without increasing capacity. Transmission line design and new materials and equipment would meet current standards and electrical clearance requirements. A transmission line upgrade is typically a replacement of conductor and equipment, or the addition of sensors or other advanced technology, to increase the line's capacity, such as by increasing the operating voltage or increasing the temperature rating.

[6] Grid Strategies, LLC, ''Advanced Conductors on Existing Transmission Corridors to Accelerate Low Cost Decarbonization,'' March 2022, available at: *https://acore.org/wp-content/uploads/2022/03/Advanced_Conductors_to_Accelerate_Grid_Decarbonization.pdf.*

[7] *See* 10 CFR 1021.410(g)(2) for a discussion of ''small'' in the context of determining the applicability of a DOE categorical exclusion.

Technical Support Document, p. 2.) The length of the projects is based on the endpoints, which are commonly substations (*e.g.,* rebuild the powerline from substation A to substation B). Environmental assessments and other information summarized in the Technical Support Document, as well as DOE's experience with powerline upgrades and rebuilds, do not indicate a particular mileage limit that would mark a threshold for significant impacts. DOE's experience comes from operating transmission systems for more than 50 years that currently include more than 25,000 miles of powerlines.

In this final rule, DOE clarifies options for relocating powerlines within the scope of categorical exclusion B4.13. Relocating segments of a powerline can improve resilience, avoid sensitive resources, or serve other purposes. (*See* Technical Support Document, p. 13, DOE/EA–1967 for an example of relocation to avoid a rock fall and landslide area, thereby moving the powerline to a more stable area.) The prior version of B4.13 encompassed ''minor relocations of small segments of the powerlines.'' This final rule makes the change included in the notice of proposed rulemaking to delete ''minor'' because it is unnecessary to qualify ''relocations of small segments'' with ''minor.'' Also, DOE is revising B4.13 to specify that small segments of powerlines may be relocated ''within an existing powerline right of way or within otherwise previously disturbed or developed lands.'' The prior version of B4.13 did not include this limitation. In addition, DOE is making three clarifying changes in response to public comment on the notice of proposed rulemaking (discussed in section IV.B of this document). In this final rule, DOE adds ''powerline'' before ''right-of-way'' such that B4.13 now specifies that the categorical exclusion applies to projects ''within an existing powerline right-of way.'' The final rule also specifies that upgrading or rebuilding powerlines might include widening of an existing right-of-way to comply with electrical standards (*e.g.,* increasing voltage may require a wider clearance to either side of the powerline to avoid fires or other accidents).

Commenters sought clarification regarding whether and how B4.13 includes widening of a right-of-way. A right-of-way may need to be widened to meet electrical standards due to a variety of factors associated with powerline upgrades and rebuilds such as changes in voltage, type of conductor (wires carrying the electrical current), and span length (distance between poles or towers). This widening keeps the area around a powerline clear of vegetation and other potential hazards to reduce risk of fires, power outages, and other accidents. (*See* Technical Support Document, p. 36.) Widening a right-of-way was part of the scope of the version of categorical exclusion B4.13 in effect prior to this final rule. (*See,* Technical Support Document, p. 18, Categorical Exclusion Determination for the Palisades-Swan Valley Transmission Line Rebuild for a project requiring widening in some areas of the rebuild project.) In this final rule, DOE has added to categorical exclusion B4.13 that, ''Upgrading or rebuilding existing electric powerlines also may involve widening an existing powerline right-of-way to meet current electrical standards if the widening remains within previously disturbed or developed lands and only extends into a small area beyond such lands as needed to comply with applicable electrical standards.''

Finally, DOE clarifies that the ''categorical exclusion does not apply to underwater powerlines.'' These changes in the final rule better state DOE's intention for the changes included in the notice of proposed rulemaking.

The revisions to categorical exclusion B4.13 included in this final rule provide additional flexibility for powerline upgrade and rebuild projects consistent with the requirements for a categorical exclusion. While DOE has removed the mileage limit, DOE will continue to apply the conditions, including integral elements, described in section II of this document when deciding whether a particular proposed action qualifies for categorical exclusion B4.13. This review includes consideration of extraordinary circumstances and integral elements, such as the potential for significant impacts on environmentally sensitive resources, amongst other considerations. At any point during the review of a proposed action, DOE may determine that it must prepare an environmental assessment or environmental impact statement, rather than apply categorical exclusion B4.13 to the proposed action. In other words, inclusion of the revised categorical exclusion B4.13 in DOE's regulations does not bring all powerline upgrade or rebuild projects within the scope of the revised categorical exclusion.

DOE's review of environmental assessments and other information in preparing this rulemaking revealed that proposals to upgrade or rebuild powerlines normally incorporate practices that avoid or reduce potential land disturbance, erosion, disturbance of environmentally sensitive resources, and take other measures to protect the environment in the project area. To account for this, DOE has added a condition requiring that, to qualify for the categorical exclusion, the proposed project be in accordance with applicable requirements and incorporate appropriate design and construction standards, control technologies, and best management practices. This condition, together with the integral elements and consideration of extraordinary circumstances (described in section II of this document), will help to ensure that a proposed upgrade or rebuild of an existing powerline would be sited and designed appropriately.

DOE also is making a conforming change to its class of action, C4, that normally requires an environmental assessment for upgrading and rebuilding existing powerlines more than approximately 20 miles in length. That conforming change removes the reference to powerline length and, instead, clarifies that an environmental assessment normally would be prepared when the proposed action does not qualify for categorical exclusion B4.13.

C. New Categorical Exclusion B4.14 for Certain Energy Storage Systems and Related Provisions

For purposes of this rulemaking, an energy storage system is a device or group of devices assembled together, capable of storing energy in order to supply electrical energy at a later time. Energy storage can be used to integrate renewable energy (such as wind and solar energy) into the electric grid, help generation facilities operate at optimal levels to meet customer demand, and reduce the use of less efficient generating units that would otherwise run only at peak times. An energy storage system also provides protection from power interruptions and serves as reserve power in case of power outages or fluctuations. The most familiar type of energy storage system is a group of electrochemical batteries and associated equipment referred to as a battery energy storage system. Another form uses a flywheel, which converts excess electricity from the grid to kinetic energy in a fast-spinning rotor. As needed, the stored energy is converted back to electricity and returned to the grid or put to other use.

DOE and others have been developing large-scale energy storage systems for decades. Deployment of these systems has increased over the past decade. Today, energy storage systems support the operation of electric transmission facilities, microgrids, energy generation

facilities, and commercial and industrial facilities.[8]

In this rule, DOE establishes a new categorical exclusion, B4.14, for the construction, operation, upgrade, or decommissioning of an electrochemical-battery or flywheel energy storage system within a previously disturbed or developed area or within a small area contiguous to a previously disturbed or developed area. Section II of this document includes discussion of DOE's definition of previously disturbed or developed area and DOE's experience referring to contiguous areas in its categorical exclusions. The total acreage used for an energy storage system will be defined by the needs of the proposed project. Based on past experience, DOE anticipates that energy storage systems typically require 15 acres or less and would be sited close to energy, transmission, or industrial facilities. (*See* Technical Support Document, p. 41.) Consistent with this expectation and because contiguous land might be undisturbed and undeveloped, DOE proposed that siting outside a previously disturbed or developed area be limited to a ''small'' contiguous area. DOE would determine whether a contiguous area is small, based on the criteria discussed in 10 CFR 1021.410(g)(2), ''in the context of the particular proposal, including its proposed location. In assessing whether a proposed action is small, in addition to the actual magnitude of the proposal, DOE considers factors such as industry norms, the relationship of the proposed action to similar types of development in the vicinity of the proposed action, and expected outputs of emissions or waste. When considering the physical size of a proposed facility, for example, DOE would review the surrounding land uses, the scale of the proposed facility relative to existing development, and the capacity of existing roads and other infrastructure to support the proposed action.'' In addition, the notice of proposed rulemaking included conditions that the proposed project be in accordance with applicable requirements (such as land use[9] and zoning requirements) and incorporate appropriate design and construction standards, control technologies, and best management practices. For this final rule, DOE includes those conditions and, in response to public comment, adds a condition that the proposed project also incorporate appropriate ''safety standards (including the current National Fire Protection Association 855, Standard for the Installation of Stationary Energy Storage Systems).'' (*See* section IV.C of this document and Technical Support Document, p. 56.) In addition, DOE would ensure that the proposed project satisfies the integral elements and review the proposal for extraordinary circumstances, as described in section II of this document. This review ensures that DOE considers the potential environmental effects of a proposed energy storage system prior to determining whether categorical exclusion B4.14 applies. In proposing this categorical exclusion, DOE evaluated environmental assessments and findings of no significant impact prepared by DOE and other Federal agencies, categorical exclusion determinations made by DOE, and other information. In response to public comment on the notice of proposed rulemaking, DOE also reviewed additional information on accidents, fires, and other safety considerations, including guidance to improve safety and minimize the risk of fires. (*See* Technical Support Document, p. 41.)

For consistency with the new categorical exclusion B4.14, DOE made changes to three related categorical exclusions. Based on its past experience with energy storage systems, in 2011, DOE added ''power storage (such as flywheels and batteries, generally less than 10 MW)'' as an example of conservation actions in categorical exclusion B5.1, Actions to conserve energy or water. DOE also added ''load shaping projects (such as the installation and use of flywheels and battery arrays)'' to the list of example actions in categorical exclusion B4.6, Additions and modifications to transmission facilities. In this final rule, DOE has deleted ''power storage (such as flywheels and batteries, generally less than 10 MW)'' from the examples in B5.1. DOE does not include the 10 MW (megawatt) limit in new categorical exclusion B4.14 because capacity, whether denominated in megawatts as a measure of instantaneous output or megawatt-hours as a measure of the total amount of energy capable of being stored, is not a reliable indicator of potential environmental impacts. Including a capacity limit within the categorical exclusion could mean that technology improvements resulting in more power storage within the same physical footprint may not qualify for the categorical exclusion even though the potential environmental impacts have not changed. DOE also deleted the example of flywheels and battery arrays from B4.6 but retained the reference to ''load shaping projects'' and added ''reducing energy use during periods of peak demand'' as a new example. DOE added a note to B4.6 that energy storage systems are addressed in B4.14. DOE also added this note to categorical exclusion B4.4, Power marketing services and activities, which was established in 1992 and lists storage and load shaping as examples. These conforming changes will avoid confusion over which categorical exclusion and associated conditions apply to energy storage systems.

D. Changes to Categorical Exclusion B5.16 for Solar Photovoltaic Systems and Related Provisions

Solar PV technology converts sunlight into electrical energy. Individual PV cells, which may produce only 1 or 2 watts of electricity, are connected together to form modules (otherwise known as panels). The modules are combined with other components (*e.g.,* to convert electricity from direct current (DC) to alternating current (AC)) to create a solar PV system. These systems can be located in a wide variety of locations and sized for an individual home or business up to utility-scale, generating hundreds of megawatts.[10]

Solar PV systems do not release GHGs while operating, though, as with any industrial activity, manufacturing and installing solar PV systems can release GHGs. The U.S. Energy Information Administration reports that, ''Studies conducted by a number of organizations and researchers have concluded that PV systems can produce the equivalent amount of energy that was used to manufacture the systems within 1 to 4 years. Most PV systems have operating lives of up to 30 years or more.'' [11] Thus, on a life-cycle basis, solar PV systems provide many years of electricity generation without GHG emissions.

DOE established categorical exclusion B5.16, Solar photovoltaic systems, in 2011 to include the installation,

[8] The U.S. Energy Information Administration published information about large-scale energy storage for electricity generation (*www.eia.gov/energyexplained/electricity/energy-storage-for-electricity-generation.php*) and market trends for battery storage (*www.eia.gov/analysis/studies/electricity/batterystorage/*). Also, DOE published an energy storage market report in 2020 (*www.energy.gov/sites/prod/files/2020/12/f81/Energy%20Storage%20Market%20Report%202020_0.pdf*).

[9] On DOE sites and in other locations, land use planning may be documented in a site land use plan, or be subject to siting processes or other comparable systems. Use of land use and zoning requirements is inclusive of these processes.

[10] DOE's Solar Energy Technologies Office has a website that describes solar PV technologies (*www.energy.gov/eere/solar/solar-photovoltaic-technology-basics*).

[11] U.S. Energy Information Administration ''Solar explained'' available at *www.eia.gov/energyexplained/solar/solar-energy-and-the-environment.php;* retrieved March 21, 2024.

modification, operation, and removal of solar PV systems located on a building or other structure or, if located on land, within a previously disturbed or developed area generally comprising less than 10 acres. In this final rule, DOE changes ''removal'' of a solar PV system to ''decommissioning.'' Decommissioning encompasses recycling and other types of actions that occur when a facility is taken out of service. DOE also removes the acreage limitation for proposed projects. Based on DOE's experience, acreage is not a reliable indicator of potential environmental impacts. As discussed in section II of this document, the potential significance of environmental impacts is more related to local environmental conditions than to acreage. DOE's review of various environmental assessments indicate that an acreage limit would not serve as an appropriate indicator of significant impacts. This conclusion is illustrated, for example, by environmental assessments for solar PV projects larger than 1,000 acres on previously disturbed or developed land that would not result in significant environmental impacts. (*See* Technical Support Document, p. 74.)

The nature and significance of environmental impacts is determined by a proposed project's proximity to and potential effects on environmentally sensitive resources and other conditions that are accounted for in categorical exclusion B5.16, including in the integral elements and in extraordinary circumstances, as described in section II of this document. DOE will consider the integral elements and the presence of any extraordinary circumstances when reviewing a proposed solar PV project's eligibility for this categorical exclusion. This review would ensure that DOE considers potential environmental impacts of a proposed solar PV system prior to determining whether categorical exclusion B5.16 applies. For example, in preparing the Technical Support Document, DOE observed that some large solar PV systems have been proposed for agricultural land. While integrating solar PV systems with farms may provide a variety of economic and environmental benefits to farmers,[12] doing so also raises questions about land use and the protection of important farmlands. One of the integral elements requires that the project must not be one that would have the potential to cause significant impacts on environmentally sensitive resources, including on prime or unique farmland, or other farmland of statewide or local importance (10 CFR part 1021, appendix B, paragraph (4)(v)). The requirement to consider extraordinary circumstances also will help ensure that DOE considers potential impacts on farmland and surrounding communities when deciding whether to apply the categorical exclusion.

Public comments raised concern about impacts of solar PV systems on wildlife and habitat. (*See* section IV.D.2 of this document.) In response to those concerns and to clarify DOE's intent, DOE has added a condition that the proposed project be ''consistent with applicable plans for the management of wildlife and habitat, including plans to maintain habitat connectivity.'' Further, one of the integral elements applicable to categorical exclusion B5.16 requires that the project must not be one that would have the potential to cause significant impacts on environmentally sensitive resources, including threatened or endangered species or their habitat (10 CFR part 1021, appendix B, paragraph (4)(ii)). The conditions added to B5.16 better ensure that solar PV systems are installed and operated in a manner that is protective of all species and their habitat.

DOE also has made conforming changes in appendix C, Classes of Actions that Normally Require EAs but not Necessarily EISs, and in appendix D, Classes of Actions that Normally Require EISs. These appendices each include a class of actions, C7 and D7, that associates the level of NEPA review for interconnection requests and power acquisition with the power output of the electric generation resource. In 2011, DOE proposed for C7 that an environmental assessment normally would be required for the interconnection of, or acquisition of power from, new generation resources that are equal to or less than 50 average megawatts ''and that would not be eligible for categorical exclusion under 10 CFR part 1021'' (76 FR 233; January 3, 2011). DOE did not receive public comment on the proposed addition regarding categorical exclusion eligibility. In the 2011 final rule, DOE did not include the condition regarding eligibility for a categorical exclusion. DOE explained this decision by stating ''to improve clarity, DOE is removing the previously proposed condition that the new generation resource 'would not be eligible for categorical exclusion under this part.' DOE normally would not prepare an environmental assessment when a categorical exclusion would apply. Therefore, the condition is unnecessary and potentially confusing'' (76 FR 63784; October 13, 2011). DOE's practice continues to be that it ''normally would not prepare an environmental assessment when a categorical exclusion would apply.'' However, in light of the change to B5.16—which removes the acreage restriction for solar PV systems, thereby allowing the categorical exclusion to apply to systems generating up to hundreds of megawatts—DOE believes that including a condition in C7 is appropriate and helpful. It will clarify DOE's practice that an environmental assessment is normally required ''unless the generation resource is eligible for a categorical exclusion.'' DOE did not propose a similar condition in 2011 for D7, which applies to new generation resources greater than 50 average megawatts. DOE has added the same condition to both C7 and D7 for the reasons previously described. For D7, DOE also specifies that an environmental impact statement is not required when an environmental assessment was prepared that resulted in a finding of no significant impact. This is standard practice, and DOE added this text only to avoid any potential confusion.

IV. Comments Received and DOE's Responses

DOE published a Request for Information (RFI) in the **Federal Register** on November 15, 2022 (87 FR 68385), to help DOE identify activities associated with clean energy projects and clean energy infrastructure that should be considered for new or revised categorical exclusions. Thirty-three individuals or entities responded to the Request for Information.[13] DOE responded to those comments relevant to this rulemaking in the notice of proposed rulemaking and does not repeat those responses here.

The notice of proposed rulemaking (88 FR 78681; November 16, 3023) announced a public review period ending on January 2, 2024. In response to public requests, DOE subsequently extended the public review period through January 16, 2024 (88 FR 88854; December 26, 2023). DOE received approximately 115 comment submittals from individuals, industry trade groups, environmental and community organizations, state, Tribal, and local governments, and other entities. DOE has considered the comments on the proposed rulemaking received during the public comment period as well as all late comments. DOE has incorporated

[12] U.S. Energy Information Administration ''Solar explained'' available at *www.eia.gov/energyexplained/solar/solar-energy-and-the-environment.php;* retrieved March 21, 2024.

[13] The Request for Information and public comments are available at *www.regulations.gov/docket/DOE-HQ-2023-0002/comments.*

some revisions suggested in these comments into the final rule. The following discussion describes the comments received, provides DOE's response to the comments, and describes changes to the rule resulting from public comments. Section IV.A of this document includes comment summaries and responses that address DOE's proposed revisions collectively or address related topics such as NEPA implementation. Sections IV.B, IV.C, and IV.D include comment summaries and DOE's responses regarding powerline upgrades and rebuilds, energy storage systems, and solar photovoltaic systems, respectively.

A. General Comments on Proposed Amendments

DOE received comments that expressed support for the rulemaking, as well as comments in opposition to the proposed rulemaking. DOE appreciates the commenters adding their perspectives to the rulemaking process. DOE responds to those comments that included detailed feedback on the proposed rulemaking.

1. Comments Supporting An Expansion of the Rulemaking

Some commenters requested that DOE expand this rulemaking to add additional categorical exclusions for clean energy technologies, electricity transmission, and related programs. These comments include suggestions to add categorical exclusions for carbon capture, utilization, and storage, including the installation of direct air capture technologies; geothermal exploration, permitting, and development; hydrogen pipelines, production, and combustion; adding capacity and making improvements to existing water power facilities; energy generation projects that qualify for investment or production tax credits under the Inflation Reduction Act; small-scale, renewable natural gas projects; small-scale nuclear power reactors (generally less than 350 megawatts); wind power; and other clean energy projects. Comments also suggested that DOE add categorical exclusions for interstate and interregional transmission lines; high-voltage direct current transmission lines; and microgrids. In addition, comments suggested that DOE add new categorical exclusions for vegetation management and expand the list of examples included in DOE's existing categorical exclusion for actions to conserve energy or water (B5.1).

DOE considered each of these comments and decided not to modify this rule to include these suggested new or revised categorical exclusions. DOE currently lacks sufficient technical support to determine whether the suggested activities normally do not result in significant environmental impact. Also, DOE noted that several of the suggestions overlap with DOE's existing categorical exclusions. For example, DOE has applied its existing categorical exclusions to microgrid projects and vegetation management, and DOE's existing categorical exclusions for powerline projects apply to high-voltage direct current lines and alternating current lines. DOE would need to evaluate whether changes to the scope of its existing categorical exclusions would be appropriate. DOE will retain the comments for further consideration in any future rulemaking regarding DOE's NEPA procedures.

2. Comments Regarding NEPA and Other Environmental Requirements

Commenters noted that implementation of DOE's proposed changes may be affected by the pending Phase 2 revisions of the CEQ NEPA Implementing Regulations.[14] Some commenters recommended coordination with CEQ on this rulemaking to ensure consistency, while other commenters requested that this rulemaking not proceed until CEQ has promulgated its final rule. DOE consulted with CEQ while preparing this rule consistent with consultation requirements in the CEQ regulations (40 CFR 1507.3(b). This consultation included consideration of whether DOE's changes are consistent with the CEQ regulations.

Other commenters stated that clear environmental regulations and guidelines for the different technologies are still needed and therefore this rulemaking is premature. DOE recognizes that environmental requirements and practices will continue to change as technology advances and awareness increases about potential impacts and ways to avoid or lessen those impacts. DOE's categorical exclusions, including the ones addressed in this rulemaking, require projects to incorporate the requirements and best practices applicable at the time that DOE is considering whether to apply the categorical exclusion to a particular proposed action. In addition, DOE regularly reviews its categorical exclusions to determine whether they continue to be appropriate in light of new information and requirements.

Commenters recommended that DOE evaluate whether the proposed rulemaking could affect coastal uses or resources in states or territories with a Coastal Zone Management Program pursuant to the Coastal Zone Management Act. Commenters recommended that DOE adopt internal procedures to ensure compliance with the Coastal Zone Management Act regardless of the level of NEPA review. DOE recognizes that compliance with the Coastal Zone Management Act is an independent responsibility regardless of the level of NEPA review. DOE will continue its practice of coordinating with the relevant state agency to ensure compliance with the Coastal Zone Management Act, when applicable.

3. Comments Regarding Public Engagement

Some commenters expressed concern that the public comment periods on the Request for Information and notice of proposed rulemaking overlapped with the winter holiday season. DOE appreciates that there are competing schedule demands and that these may fall hardest on small organizations and community members. DOE provided an initial 45-day comment period for the Request for Information and reopened that public comment period for an additional 30 days, and DOE extended the 45-day comment period for the notice of proposed rulemaking by 14 days to provide interested individuals and organizations additional time to provide comments. DOE received comments from a broad range of organizations and individuals who raised many substantive issues.

Commenters emphasized the importance of public involvement in decision-making, expressing that under NEPA, affected communities must be able to voice their concerns about projects, especially on public lands. Some commenters stated that creating a categorical exclusion removes safeguards for communities and investigation of adverse impacts, including cumulative impacts. Other commenters stated that the applicability criteria of the proposed rule would require substantive review by DOE to identify a project's eligibility for a categorical exclusion followed by DOE's consideration of the individual conditions in the categorical exclusion, which would deprive DOE of anticipated efficiencies at the expense of public participation. Commenters requested that DOE provide public comment opportunities for categorical exclusion determinations. While DOE may choose to provide opportunities for public comment at any time, DOE's normal practice is not to request public comment before making a categorical exclusion determination. This is

[14] *See* CEQ's notice of proposed rulemaking published on July 31, 2023 (88 FR 49924).

consistent with CEQ and DOE NEPA regulations.

Commenters asked DOE to post categorical exclusion determinations (including sufficient information to demonstrate proper use) that rely on the proposed categorical exclusions on the DOE website in a timely fashion for public review. DOE's practice is to post categorical exclusion determinations for actions listed in appendix B of its NEPA regulations, which includes all of the categorical exclusions included in this rulemaking, on the DOE website generally within two weeks of the determination (10 CFR 1021.410(e) and *www.energy.gov/nepa/doe-categorical-exclusion-cx-determinations*). A categorical exclusion determination includes a description of the proposed action, the categorical exclusion(s) applied, and confirmation that conditions associated with the categorical exclusion(s) were satisfied.

4. Comments Regarding Tribal Resources

A federally recognized Indian Tribe expressed concern about the potential impacts of DOE's proposed rule on its treaty reserved rights and cultural resources and practices. As explained in section II of this document, DOE conducts an environmental review at both the stage of establishing or revising a categorical exclusion and at the stage of determining whether one or more categorical exclusions applies to a proposed action. This final rule establishes and revises categorical exclusions in DOE's NEPA procedures; this final rule will not result in environmental impacts and is not a proposal to apply any categorical exclusion to particular proposed actions. When determining whether one or more categorical exclusions applies to a proposed action, DOE conducts a project-specific environmental review. This review includes consideration of extraordinary circumstances and integral elements, including the potential for significant impacts on environmentally sensitive resources, amongst other considerations. ''An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive order, statute, or regulation by Federal, state, or local government, or a federally recognized Indian Tribe'' (10 CFR part 1021, appendix B, paragraph (4)). Environmentally sensitive resources include ''(i) Property (such as sites, buildings, structures, and objects) of historic, archeological, or architectural significance designated by a Federal, state, or local government, Federally recognized Indian tribe, or Native Hawaiian organization, or property determined to be eligible for listing on the National Register of Historic Places'', among others (10 CFR part 1021, subpart D, appendix B).

B. Comments Regarding Upgrading and Rebuilding Powerlines

1. Comments Requesting Clarifications Regarding Categorical Exclusion B4.13

Commenters asked DOE to clarify that categorical exclusion B4.13 would apply to projects that receive Federal loans or grants and not only to transmission lines that impact Federal land. Other commenters requested clarification that categorical exclusion B4.13 covers all types of powerlines, including powerlines that feed into a Federal electric transmission system. DOE clarifies here that categorical exclusion B4.13 could apply to proposals for DOE financial assistance, including loans and grants, as well as any other DOE action subject to NEPA, so long as the proposed action satisfies all conditions of the categorical exclusion.

Commenters asked DOE to clarify whether the scope of categorical exclusion B4.13 includes improvements to existing maintenance and repair access roads that are not used for powerline upgrades or rebuilds. Commenters noted that existing access roads may not be suitable for the types of heavy construction equipment associated with rebuilding powerlines and that use of large construction equipment for rebuild projects may require improving existing access roads, such as widening roads, clearing surrounding trees, and adding gravel for stability to allow work under varying weather conditions. DOE responds that categorical exclusion B4.13 could include improvements to, and reconstruction of, access roads, laydown areas, and related work that are part of the proposed action and would take place within the existing right-of-way or relocation area. DOE also could consider whether categorical exclusion B1.13, Pathways, short access roads, and rail lines, would be appropriate for certain needed access roads. Consistent with DOE's NEPA regulations, the full scope of the proposed action must satisfy all conditions of DOE's categorical exclusions, including the integral elements (10 CFR part 1021, subpart D, appendix B) and consideration of extraordinary circumstances, segmentation, and cumulative impacts (10 CFR 1021.410(b)). DOE also notes that where access roads are not suitable for heavy equipment, replacement poles and other equipment sometimes are delivered to the project site by helicopter.

Commenters requested that categorical exclusion B4.13 include use of existing transportation rights-of-way, including those owned by railroads and highways managed on the public's behalf. DOE recognizes that highway and railroad rights-of-way may be appropriate locations for new powerlines. However, different criteria were used to establish highway and railroad rights-of-way than would be used for new powerlines, and DOE does not have sufficient information at this time to support a categorical exclusion for such projects. DOE will retain the comment for potential consideration in a future NEPA rulemaking. Commenters also requested that DOE designate existing transportation rights-of-way as National Interest Electric Transmission Corridors (NIETCs) pursuant to Section 216 of the Federal Power Act. DOE appreciates this suggestion, but designating NIETCs is beyond the scope of this rulemaking.

Commenters asked that DOE ensure that use of categorical exclusion B4.13 be as transparent and clear as possible. Commenters requested that DOE clarify definitions of the applicable conditions, parameter language, and extraordinary circumstances that would determine applicability of the categorical exclusion. DOE responds that to provide transparency in the use of categorical exclusions, DOE began posting categorical exclusion determinations online in 2009. DOE will continue to regularly post categorical exclusion determinations for B4.13 and other categorical exclusions listed in appendix B of DOE's NEPA regulations (10 CFR part 1021, subpart D) at *www.energy.gov/nepa/doe-categorical-exclusion-cx-determinations.* DOE has added discussion of the conditions that apply to categorical exclusions in sections II, III, and IV of this final rule.

The proposed changes to categorical exclusion B4.13 included relocation of small segments of powerlines within an existing right-of-way or within otherwise previously disturbed or developed lands. Commenters requested that DOE narrow the categorical exclusion, such as by including only actions within the powerline's existing right-of-way, within a minor widening of the existing right-of-way within otherwise previously disturbed or developed lands, or within another existing utility or electric power transmission corridor or right-of-way where active utilities and currently used roads are readily available. DOE appreciates these suggestions but finds that they would limit flexibility to

relocate small sections of powerlines to previously disturbed or developed lands that are outside an existing powerline right-of-way and to widen a right-of-way as needed to meet electrical standards, including when the widening extends to a small area beyond previously disturbed or developed lands. Such relocation consistent with the conditions placed on the use of categorical exclusion B4.13 normally would not pose a potential for significant environmental impacts. (*See* Technical Support Document, p. 2.) Moreover, such relocation may allow improvements to environmental protection by moving small sections of a powerline around a sensitive resource.

Commenters requested clarification on whether the limitation that small segments of powerlines may be relocated within an existing right-of-way or within previously disturbed land encompasses rights-of-way other than that of the powerline being relocated. DOE intends this language to encompass other powerline rights-of-way so long as safety, reliability and other conditions are met. To help clarify this point, DOE added ''powerline'' so that the wording in this final rule is ''within an existing powerline right-of-way.'' Commenters asked that DOE clarify what is considered to be a right-of-way and pointed, as an example, to the Department of Transportation's definition of existing right-of-way for highway projects (23 CFR 771.117(c)(22)). The meaning of right-of-way varies by context. The right-of-way for a powerline may be defined through an agreement, such as an easement, with a private landowner, permit from a land management agency, or other mechanism conveying rights to construct and maintain the powerline and associated facilities. For purposes of this rulemaking, DOE is referring to the cleared right-of-way, *i.e.,* the right-of-way where vegetation management and other practices are necessary for safety reasons (*e.g.,* to avoid the potential to cause fire). The width of that cleared right-of-way is based on design criteria (*e.g.,* line voltage). (*See* Technical Support Document, p. 36.)

Commenters explained that when upgrading powerlines to a higher voltage, current electrical standards may require wider rights-of-way than were established when powerlines were built. Commenters recommended that categorical exclusion B4.13 include expansion of an existing right-of-way to meet current electrical standards and that DOE revise the categorical exclusion to state that small segments of powerlines may be relocated ''within or adjacent to'' an existing right-of-way. Commenters also expressed concern about the risk of fire being started by overhead powerlines. DOE includes in this final rule that categorical exclusion B4.13 encompasses widening of the cleared right-of-way to meet current electrical standards. As discussed in section III of this document, the categorical exclusion may only apply when such widening ''remains within previously disturbed or developed lands and only extends into a small area beyond such lands as needed to comply with applicable electrical standards.'' There are existing rights-of-way that are not bounded entirely by previously disturbed or developed lands. In such locations, it may be necessary to extend part of the right-of-way into undisturbed land in order to meet the applicable electrical code for the entire length of the powerline upgrade or rebuild project. It is common for the widening to be only about 40 feet or less (*i.e.,* 20 feet or less on each side of the right-of-way). Before deciding whether to apply categorical exclusion B4.13 for such widening, DOE would review the proposed action against all the conditions applicable to categorical exclusion B4.13, including integral elements and the consideration of extraordinary circumstances.

2. Comments Regarding Effects on Wildlife and Habitat

Some commenters stated that powerline projects may fragment or reduce habitat or otherwise adversely affect wildlife by removing trees, widening the right-of-way, creating greater barriers to animal movement, and in other ways. Commenters stated that some of the environmental assessments included in DOE's Technical Support Document involved projects that would remove hundreds of trees. These commenters suggested that DOE had overlooked the potential for significant environmental impacts from these effects on habitat and that an environmental assessment may be better able to account for these impacts. They referred to research linking habitat loss with declines in wildlife populations and to the deaths of birds by collision with powerlines and from electrocution.

Commenters recommended that relocating powerlines avoid bird travel routes and consider alternative designs and structures, visual cues, and other methods to avoid or reduce impacts to birds and other species and their habitats. DOE responds that these are common considerations in planning upgrades and rebuilds of existing powerlines, including relocating or widening rights-of way. DOE's integral elements require that the project must not be one that would have the potential to cause significant impacts on environmentally sensitive resources, including threatened or endangered species or their habitat or species protected under the Migratory Bird Treaty Act (10 CFR part 1021, appendix B, paragraph (4)(ii)). Categorical exclusion B4.13 also requires projects to incorporate appropriate design and construction standards, control technologies, and best management practices, which may include measures to reduce effects on birds. In addition, applicants must comply with all applicable state and Federal laws, including applicable requirements imposed by state wildlife agencies or Federal land management agencies, including to identify potential high-risk bird strike areas, identify shifts in bird flight patterns, and develop marking plans and design features to reduce associated risks. These requirements ensure that projects covered by categorical exclusion B4.13 will not have significant effects on birds.

Other commenters stated that managed lands in forested areas, including transmission line corridors, can provide early successional habitat for native bees and other pollinators, substantially improving species richness and abundance of bees relative to adjacent forest areas. Commenters also stated that transmission corridors can benefit some species of birds, deer, and plants. The ability of these corridors to provide areas for food, nesting, and shelter are enhanced with habitat management practices (such as leaving habitat trees, planting low-growing native vegetation, and removing invasive plant species), which typically accompany transmission development.

DOE recognizes that a combination of adverse and beneficial impacts can accompany upgrades and rebuilds of existing electric powerlines. As described in section II of this document, the terms of categorical exclusion B4.13, including the integral elements, ensure that projects would not have a significant effect on species and habitat. If a project does not satisfy these elements, or extraordinary circumstances exist that make significant effects likely, DOE must prepare an environmental assessment or environmental impact statement, rather than apply a categorical exclusion.

3. Comments Regarding Sulfur Hexafluoride

Commenters stated that transmission lines leak sulfur hexafluoride, a greenhouse gas 26,000 more times potent than carbon dioxide. For this final rule, DOE supplemented the

Technical Support Document with information regarding sulfur hexafluoride, a potent greenhouse gas that has a high global warming potential. Sulfur hexafluoride is used in gas-insulated switchgears, breakers, and lines in the transmission sector. Transmission operators follow manufacturer guidelines, state requirements, and federal handling and reporting requirements, including the Greenhouse Gas Reporting Program under the Clean Air Act, as applicable, for use and handling of sulfur hexafluoride. Improved engineering and equipment design, advances in leak detection and repair, and alternative insulating gases with lower global warming potentials have resulted in the reduction of sulfur hexafluoride emissions from the electric power sector over time. Further, upgrading and rebuilding powerlines with newer equipment that requires less or no sulfur hexafluoride or has reduced leakage rates and improved monitoring further contribute to a reduction in sulfur hexafluoride emissions across the electric transmission sector. (*See* Technical Support Document, p. 40.)

4. Comments Regarding Endangered Species Act Section 7 Consultations

Commenters stated the DOE could encourage programmatic Endangered Species Act Section 7 consultations for specific regions and cited the programmatic biological assessment prepared by DOE's Western Area Power Administration for wind energy development and interconnection requests in the Upper Great Plains Region as a relevant example. DOE responds that the referenced programmatic biological assessment analyzed information and identified a list of conservation measures for 28 species of concern. Western Area Power Administration and the U.S. Fish and Wildlife Service developed a review and approval system based on consistency forms and checklists of conservation measures for each species. If a wind project developer commits to implement the applicable conservation measures, Western Area Power Administration's consultation responsibilities under Section 7 of the Endangered Species Act are concluded when Western Area Power Administration and the U.S. Fish and Wildlife Service review and sign the consistency forms; no separate Section 7 consultation is required unless the particular project involves a listed species, critical habitat, or an effect that was not addressed in the programmatic biological assessment. DOE supports using programmatic consultations and similar approaches to improve the efficiency of implementing the Endangered Species Act, the National Historic Preservation Act, and other laws. These requirements are separate from the requirements of NEPA, and reliance on a categorical exclusion for NEPA compliance does not affect DOE's obligations under other laws.

5. Comments Regarding Effects on Communities

Commenters stated that, by affecting land previously unused as transmission line right-of-way, rerouting transmission lines may affect local land use, affect people's relation with their environment, and impact neighborhoods and communities. DOE recognizes that these are considerations in developing a proposal to reroute powerlines and relies on the terms of categorical exclusion B4.13, including the integral elements, and the consideration of extraordinary circumstances to ensure that projects would not have a significant effect on communities.

6. Comments Regarding Technical Support for Revisions to Categorical Exclusion B4.13

Commenters stated that the environmental assessments included in the Technical Support Document for the notice of proposed rulemaking were prepared for projects in the Bonneville Power Administration and Western Are Power Administration systems. However, the categorical exclusion could be applied to projects in any region of the United States. In response to this comment, DOE reviewed seven additional environmental assessments and findings of no significant impact prepared by other Federal agencies for powerline upgrade or rebuild projects in Kentucky, Minnesota, Mississippi, Missouri, North Dakota, and Wisconsin. These NEPA documents support DOE's determination that powerline upgrade and rebuild projects normally do not pose a potential for significant environmental impacts. DOE added these seven environmental assessments to the Technical Support Document for this final rule.

Commenters also pointed to the environmental assessment for Midway Benton No. 1 Rebuild Project as an example of where project changes were needed to lower potential environmental impacts. DOE included a wide and diverse range of environmental assessments in the Technical Support Document. These environmental assessments and findings of no significant impact demonstrate that, in the aggregate, these types of projects normally do not pose a potential for significant environmental impact and, thus, are appropriate for a categorical exclusion. DOE stated in the Technical Support Document for the notice of proposed rulemaking that, ''Inclusion of these environmental assessments does not mean that the proposed projects would have qualified for any categorical exclusion as proposed in this rulemaking. That determination would be made on a case-by-case basis.'' (*See* Technical Support Document, p. 1.) DOE did not intend to indicate that it had determined that a categorical exclusion would have been appropriate for that project. Rather, DOE found that consideration of the environmental assessment for the Midway Benton No. 1 Rebuild Project, along with other information in the Technical Support Document, helped DOE understand whether the proposed revisions to categorical exclusion B4.13 are appropriate. DOE will continue to consider each proposed project on its own merits in deciding whether to apply a categorical exclusion or prepare an environmental assessment or environmental impact statement.

7. Comments Regarding Underwater Powerlines

Commenters stated that the scope of categorical exclusion B4.13 should not include upgrading and rebuilding existing offshore, underwater powerlines. These commenters referred to potential adverse environmental impacts resulting from the propellers on boats used during upgrade and rebuild projects, trenching, turbidity, boulder relocation, and electric fields. DOE did not intend that categorical exclusion B4.13 would include underwater powerlines. DOE has added a statement in this final rule specifying that the categorical exclusion does not apply to underwater powerlines.

8. Comments Regarding NEPA Implementation

One commenter recommended that DOE consider NEPA efficiencies, such as utilizing programmatic regional reviews for transmission projects. The commenter also recommended that DOE streamline NEPA processes to support designation of transmission corridors and financial assistance for transmission projects. DOE supports taking steps to improve the efficiency of NEPA and other environmental review requirements, without undermining the purposes of these processes, to support timely and effective decision making.

Some commenters stated that a categorical exclusion is inappropriate for transmission line upgrade or rebuild

projects. DOE responds that these comments express a misunderstanding of the purpose of categorical exclusions and how categorical exclusions are applied to particular proposed actions. For example, some commenters stated that a categorical exclusion determination does not require any environmental documentation beyond that a proposed action belongs in a specific category. As explained in section II of this document, to qualify for the categorical exclusion, a proposed action must satisfy all the conditions in the categorical exclusion, including integral elements, and DOE must evaluate for any extraordinary circumstances. Some commenters pointed to one environmental assessment included in the Technical Support Document that considered impacts on cultural resources and suggested that such analysis would not have been required under a categorical exclusion. In fact, for all categorical exclusions listed in appendix B of its NEPA regulations (10 CFR part 1021), DOE requires consideration of whether the proposed action would violate any applicable environmental requirements and whether the proposed action would have the potential to cause significant impacts on environmentally sensitive resources, including ''Property (such as sites, buildings, structures, and objects) of historic, archeological, or architectural significance designated by a Federal, state, or local government, Federally recognized Indian tribe, or Native Hawaiian organization, or property determined to be eligible for listing on the National Register of Historic Places'' (10 CFR part 1021, subpart D, appendix B, paragraph (4)(i)). In addition, DOE's responsibility to comply with the National Historic Preservation Act is independent of its NEPA responsibilities. With the revised categorical exclusion B4.13, DOE would have considered the potential impacts on cultural resources before making a decision and could determine that an environmental assessment is more appropriate than applying a categorical exclusion.

Some commenters described the purpose of a categorical exclusion in an overly limiting way, for example, as for actions that are benign or have no adverse effect whatsoever. CEQ, however, defines a categorial exclusion as ''a category of actions that the agency has determined, in its agency NEPA procedures (§ 1507.3 of this chapter), normally do not have a significant effect on the human environment'' (40 CFR 1508.1(d)). The categorical exclusions included in this rulemaking are consistent with CEQ's regulations.

Some commenters questioned whether additional NEPA review would be necessary for powerlines that already have been reviewed under NEPA. In general, a proposed project in which DOE is financing, undertaking, or providing other support for the upgrade or rebuild of a powerline has the potential to cause environmental effects. The NEPA review process provides methods for DOE to evaluate the potential significance of those impacts. Any documentation from past NEPA or other environmental reviews can inform, and potentially simplify, the required environmental review of the currently proposed project.

C. Comments Regarding Energy Storage Systems

1. Comments Regarding Accidents at Battery Energy Storage Systems

Commenters expressed concern regarding the safety of lithium-ion battery energy storage systems, including risks associated with a thermal runaway event. Commenters stated that DOE's Technical Support Document did not address risks from thermal runaway.

A thermal runaway event is when lithium-ion batteries become unstable, potentially resulting in high temperatures, battery failure, venting of gas or particulates, smoke, or fire. As one way to help control the impacts of such an event, a battery energy storage system is comprised of modules that physically isolate and control thermal runaway events from the larger battery energy storage system. Government agencies, including DOE, and standard setting organizations such as the National Fire Protection Association conduct research on thermal runaway events and other accident scenarios involving lithium-ion and other battery technologies. These organizations recommend practices and develop standards to lessen the likelihood and consequence of such events, and to respond to thermal runaway events and other accidents if they occur. For example, to stay current with best practices and knowledge, the National Fire Protection Association updates its standards every three to five years.

Commenters stated that fires at battery energy storage systems are challenging to extinguish and must be allowed to burn out for days. Commenters also stated that fires can emit large volumes of toxic gases, such as hydrogen fluoride, hydrogen cyanide, and hydrogen chloride. Commenters stated that these releases of toxic fumes can result in large plumes that necessitate evacuations of nearby populations and that there is insufficient time to implement a shelter-in-place approach because there is no mechanism to communicate quickly enough to surrounding communities. Commenters further stated that safety standards in the Technical Support Document for the notice of proposed rulemaking did not consider the public health risk of toxic gas released during a battery energy storage system fire.

DOE has supplemented the Technical Support Document in response to these comments. DOE reviewed and added information on hazard consequences analyses that address toxic gas plume dispersion modeling in the event of a battery energy storage system fire or thermal runaway event, including characterization of those toxic gases and potential health effects. These analyses evaluated toxic gas dispersion, including hydrogen fluoride, hydrogen cyanide, and carbon monoxide, using site-specific factors to determine the maximum distance that may result in a level of concern for nearby residents or first responders. These analyses identified the endpoint distances as 30, 51, and 210 feet from the release point. The maximum airborne concentration estimated at these distances is such that nearly all individuals could be exposed to for up to one hour without experiencing or developing irreversible or other serious health effects or symptoms that could impair an individual's ability to take protective action. The analyses indicated that assumptions were chosen that tended to overstate the expected consequences. A hazard consequence analysis is a site-specific analysis, and the examples provided in the Technical Support Document indicate that a safety incident at a battery energy storage facility would generally not result in adverse health impacts beyond the facility's property line. (*See* Technical Support Document, p. 63.) Further, DOE notes that battery energy storage facilities that qualify for the new categorical exclusion would be required to incorporate appropriate safety standards including the current National Fire Protection Association 855 Standard. National Fire Protection Association Standard 855 requires the development of emergency response plans.

Commenters also stated that toxic chemicals could be used to put out battery energy storage system fires. Commenters expressed concern about runoff from fire suppression water or fire retardant, the lack of containment systems for this runoff, the resulting risk of soil and groundwater pollution, and

potential impacts to water resources. Commenters stated that fire-extinguishing water used at the East Hampton Energy Storage Center in East Hampton, NY, contaminated a sole-source aquifer used for drinking water with toxic chemicals. Commenters stated that fighting battery energy storage system fires could require up to 2 million gallons of water over a three-day period and that there are no spill containment systems in place at battery energy storage systems to catch fire water suppression runoff.

DOE has supplemented the Technical Support Document to include best management practices regarding spill control plans from individual projects as well as requirements from National Fire Protection Association Standard 855 to minimize spill risk during normal operation and in the event of a fire. (*See* Technical Support Document, p. 41.) Site-specific spill prevention plans are typically developed for individual projects as a standard best practice. DOE further notes that the emerging consensus in the firefighting community is that water should be used sparingly in responding to battery energy storage system fires to minimize potential risk of contamination to water resources.

Commenters stated that there is a lack of appropriate training for emergency responders in the event of an incident at a battery energy storage system and that available training and resources are limited. National Fire Protection Association Standard 855 requires the development of emergency response plans, mandates initial and annual training, and recommends inclusion of emergency response personnel in these trainings. The Technical Support Document also includes recommendations from the American Clean Power Association and the New York Battery and Energy Storage Technology Consortium and Fire and Risk Alliance for the development of emergency response plans and pre-incident planning and incident response.

Commenters stated that the chance of fire at a utility-scale battery energy storage system is 1 in 30 to 1 in 50 and that the average age of a battery that catches fire is 18 months. Several commenters pointed to past battery energy storage system fires including those in Surprise, AZ, Chandler, AZ, Moss Landing, CA, and in New York State. DOE responds that a recent Pacific Northwest National Laboratory report [15] noted that the Electric Power Research Institute's (EPRI's) database identifies 14 fires involving large, grid-connected battery energy storage systems in the U.S. ''To place that number in context, there were 491 large, utility-scale projects in the U.S. as of April 2023, for a fire incidence rate of about 2.9 percent. No [battery energy storage system] fire in the U.S. has resulted in loss of life, and many of the affected facilities were able to resume operation.'' DOE acknowledges that battery energy storage facilities present safety risks if not managed properly and have resulted in past safety incidents. DOE reviewed the U.S. fires reported in the EPRI database and confirmed that few if any injuries occurred, apart from the 2019 Surprise, AZ, incident that involved multiple severe injuries. Lessons learned from that 2019 event have since led to improvements in safety standards and first responder training. The battery energy storage systems that qualify for categorical exclusion B4.14 would be built and operated using the most current safety standards, including those identified in the National Fire Protection Association 855 Standard.

Commenters stated that DOE's Technical Support Document included small-scale projects (less than 10 megawatts) and mobile facilities and thus did not consider that the risk of thermal runaway increases with the number of battery cells and facility size. DOE notes that the Technical Support Document for the notice of proposed rulemaking also included environmental assessments for battery energy storage systems ranging from approximately 20 megawatts up to 225 megawatts storage capacity. For this final rule, DOE supplemented the Technical Support Document with information to clarify that appropriate battery energy storage system designs can prevent fire risk from increasing with facility size. Energy storage system failures are designed to be contained to the unit of origin, for example, by providing sufficient spacing between modules or enclosures to avoid a fire from spreading. Systems also may include fire suppression, smoke detectors, sprinkler systems, and fire barriers, as applicable to the design. Because of these safety features, the risk of a fire incident at a battery energy storage project does not increase with project size; the two are decoupled in a well-designed system that prevents a fire in one unit from spreading to neighboring units. (*See* Technical Support Document, p. 56.)

Commenters stated that DOE's Technical Support Document was inadequate because the battery energy storage systems included have not been built, and operational safety has not yet been proven. Commenters also asserted that design standards and best management practices cited in the Technical Support Document, such as UL 9540A, are not sufficient to mitigate the risk of thermal runaway. DOE notes that battery energy storage systems have experienced rapid growth in recent years. According to the U.S. Energy Information Administration, currently planned and operational U.S. utility-scale battery capacity totaled around 16 gigawatts at the end of 2023. (*See* Technical Support Document, p. 41.) This growth in deployment of battery energy storage systems provides real-world information on design and operation that feeds into efforts to continuously improve the safety of these facilities, such as through the ongoing development and revision of applicable safety standards.

DOE is aware that battery energy storage facilities present a risk of safety incidents, including the risk of a thermal runaway event that may result in fire. To ensure that battery energy storage systems are designed and operated using layers of protection, current best practices, and the most up-to-date standards, categorical exclusion B4.14 may only be used for proposed battery energy storage systems that comply with appropriate safety standards, including the current National Fire Protection Association Standard 855. The requirements and depth of National Fire Protection Association Standard 855 would ensure that battery energy storage systems are designed using current best practices to minimize the potential for a safety incident that could result in a thermal runaway. Also, the National Fire Protection Association Standard 855 requires the development of a hazard mitigation analysis, which is a method to evaluate potential failure modes and their cause and effects, in order to develop methods to prevent failure during system operation. Further, the National Fire Protection Association updates its standards every 3 to 5 years, ensuring that its standards continue to reflect current best practices.

Commenters stated that meeting the including UL 9540A standard cited in DOE's Technical Support Document would not prevent a thermal runaway event once started. DOE notes that in a UL 9540A test a thermal runaway event is intentionally created to better understand how the cell performs under failure, which helps to design fire safety

[15] Energy Storage in Local Zoning Ordinances (Pacific Northwest National Laboratory, 2023): *www.pnnl.gov/main/publications/external/technical_reports/PNNL-34462.pdf.*

features to limit the propagation of fire from one cell to another, in the event of a failure. Systems that meet UL 9540A, in addition to all the other requirements included in the National Fire Protection Association Standard 855 would ensure layers of protection to prevent accidents and mitigate safety risk. (*See* Technical Support Document, p. 56.)

Commenters also stated that DOE's Technical Support Document should not include information from the American Clean Power Association because a lobbyist organization is not an appropriate source for safety standards. DOE includes three reference documents from the American Clean Power Association in the Technical Support Document: a compilation of relevant codes and standards for battery energy storage systems prepared by other organizations, guidelines for first responders in the event of an accident, and a summary of information related to battery energy storage systems. DOE has reviewed these documents and finds them helpful in explaining useful information about the safe operation of battery energy storage systems.

Commenters also requested that DOE issue a new policy that addresses how the public safety risks posed by lithium-based battery energy storage systems should be accounted for in future NEPA actions. DOE will consider whether there is a need for guidance on the consideration of battery energy storage systems in NEPA reviews. However, that is outside the scope of this rulemaking.

Commenters also stated that battery energy storage systems should have sensors that provide information on the presence of flammable gases onsite and that information should be available to emergency responders. DOE has supplemented the Technical Support Document to include information that battery energy storage systems contain fire and gas detection systems. Further, DOE notes that the current National Fire Protection Association Standard 855 contains a variety of provisions related to gas detection; fire control and suppression, measures to prevent explosions and safely contain fires, hazard mitigation analysis, emergency response plans, and requirements for initial and annual training. (*See* Technical Support Document, p. 56.)

Commenters requested that DOE investigate whether these energy storage systems emit toxins or carcinogens during normal operation. DOE has supplemented the Technical Support Document with additional information explaining that energy storage systems do not leak chemicals or emit toxic or carcinogenic gases during normal operation. (*See* Technical Support Document, p. 41.)

2. Comments Regarding Siting of Battery Energy Storage Systems

Commenters stated that battery energy storage systems should not be sited near earthquake fault zones, sole-source aquifers, residential areas, densely populated areas, schools, daycare facilities, hospitals, nursing homes, threatened and endangered species, recreational areas, or transportation corridors. Commenters stated that battery energy storage systems should be sited only in desolate areas. Commenters expressed concern that battery energy storage systems would be sited in fire-prone landscapes and that sparks from a fire originating at a battery energy storage system would spread to nearby areas. Commenters stated that disruption to nearby communities should be mitigated, and expressed concern that without adequate planning and siting, important emergency routes, such as to and from hospitals and between nursing homes and hospitals, could be disrupted. Commenters requested that DOE include measures to ensure energy storage systems are not sited on areas of prime or sensitive habitat. DOE incorporates siting considerations into its decision whether to apply categorical exclusion B4.14 to any proposed action. This includes conditions within the categorical exclusion regarding the type of land on which the proposed project may be located, the requirement to be in accordance with land use and zoning requirements, and the integral elements that include the requirement not to pose a significant impact to environmentally sensitive resources. Categorical exclusion B4.14 also requires that, to apply it to a particular proposed project, the proposed action must incorporate safety standards and other specified conditions that reduce the risk of accidents. As noted in the Pacific Northwest National Laboratory's October 2023 report, *Energy Storage in Local Zoning Ordinances,* there is variation in local siting and zoning considerations for energy storage systems. This report notes that safety is frequently the most important concern expressed in local zoning proceedings for energy storage projects and identifies several case studies for how local planners have mitigated impacts from various jurisdictions. (*See* Technical Support Document, p. 59.) At any point during DOE's review of whether categorical exclusion B4.14 applies, DOE can determine that additional information is needed to make a categorical exclusion determination or decide to prepare an environmental assessment or environmental impact statement.

Commenters stated that a battery energy storage system should never be sited in an undeveloped area. Other commenters expressed concern that siting battery energy storage systems on undisturbed land could significantly impact the environment and surrounding communities and requested additional support for DOE's inclusion of undisturbed areas contiguous to previously disturbed or developed areas. Commenters stated that DOE's supporting information relied on an environmental assessment for the Vonore Project that included mitigation measures to reach a finding of no significant impact. DOE responds that, as explained in section III.C of this document, based on past experience, DOE anticipates that energy storage systems typically require 15 acres or less and would be sited close to energy, transmission, or industrial facilities. Consistent with this expectation and because contiguous land might be undisturbed and undeveloped, siting outside a previously disturbed or developed in the new categorical exclusion would be limited to a ''small'' contiguous area. DOE would consider whether a contiguous area is small, based on the criteria discussed in 10 CFR 1021.410(g)(2)). DOE has revised its Technical Support Document to clarify that there are three EAs and FONSIs that evaluate battery energy storage systems ranging in size up to 225 megawatts located on sites contiguous to previously disturbed and developed areas. (*See* Technical Support Document, p. 42.) Further, DOE reviewed the Vonore Project that the commenter suggested relied on mitigation measures in an environmental assessment to reach a finding of no significant impact and notes that the Tennessee Valley Authority indicated that two ''non-routine measures would be applied during the construction, operation, and maintenance of the proposed Vonore [battery energy storage system], transmission lines, and access roads to reduce the potential for adverse environmental effects'', not that those measures were necessary to reach a finding of no significant impact. (*See* Technical Support Document, p. 50.) Commenters stated that DOE's supporting information included an environmental assessment tiered from a programmatic environmental impact statement. DOE removed this environmental assessment from the Technical Support Document.

5. Comments Regarding Siting Contiguous to a Previously Disturbed or Developed Area

Commenters stated that DOE should not limit the categorical exclusion to a ''small'' or 15-acre area contiguous to previously disturbed or developed areas and that DOE should clarify that there would be no acreage limitation. Commenters stated that DOE's supporting information did not accurately reflect the acreage required and that 25 MW per acre is a more accurate assumption for battery energy storage systems. Commenters also stated that an acreage limitation could result in more densely packed battery energy storage systems with greater risk of thermal runaway. Similarly, other commenters recommended that DOE remove reference to specific acreages that were included in the preamble to DOE's Notice of Proposed Rulemaking and instead use the definition of ''small'' in 10 CFR 1021.410(g)(2). DOE responds that section II of this document includes discussion of DOE's definition of previously disturbed or developed area and DOE's experience referring to contiguous areas in its categorical exclusions. The total acreage used for an energy storage system will be defined by the needs of the proposed project. Based on past experience, DOE anticipates that energy storage systems typically require 15 acres or less and would be sited close to energy, transmission, or industrial facilities. However, this recognition of that past experience does not indicate an acreage limit on the scope of categorical exclusion B4.14. (*See* Technical Support Document, p. 41.) As previously explained, DOE would consider whether a contiguous area is small, based on the criteria discussed in 10 CFR 1021.410(g)(2).

Other commenters stated that 15 acres or less should be added as a numeric limit in the categorical exclusion. DOE considered this suggestion but has concluded that an acreage limit is not an appropriate method for determining whether a project normally would result in significant environmental effects. Rather, the terms of categorical exclusion B4.14, including the integral elements and need to consider extraordinary circumstances, provide a reasoned basis for the categorical exclusion.

Commenters stated that areas contiguous to previously disturbed or developed land may have particular conservation values or be more likely to be located in communities that have historically experienced disproportionate impacts. Commenters requested that DOE require that contiguous areas be evaluated separately under a land use plan, a programmatic environmental impact statement or environmental analysis, or other equivalent decisions that provide detailed analysis and opportunity for public engagement. Similarly, another commenter requested that DOE revise the categorical exclusion conditions to include limitations regarding site dimensions, land use history, and proximate uses and resources to indicate a preference for siting locations where fewer impacts would be expected to occur. Commenters requested that DOE include measures to ensure energy storage systems are not sited on areas of prime or sensitive habitat. Because contiguous land might be undisturbed and undeveloped, DOE proposes that siting outside a previously disturbed or developed area be limited to a ''small'' contiguous area. DOE would consider whether a contiguous area is small, based on the criteria discussed in 10 CFR 1021.410(g)(2)), ''in the context of the particular proposal, including its proposed location. In assessing whether a proposed action is small, in addition to the actual magnitude of the proposal, DOE considers factors such as industry norms, the relationship of the proposed action to similar types of development in the vicinity of the proposed action, and expected outputs of emissions or waste. When considering the physical size of a proposed facility, for example, DOE would review the surrounding land uses, the scale of the proposed facility relative to existing development, and the capacity of existing roads and other infrastructure to support the proposed action.'' In addition, the proposed project must be ''in accordance with applicable requirements (such as land use and zoning requirements) in the proposed project area and the integral elements listed at the start of appendix B of this part, and would incorporate appropriate safety standards (including the current National Fire Protection Association 855, Standard for the Installation of Stationary Energy Storage Systems), design and construction standards, control technologies, and best management practices.''

4. Comments Regarding Other Potential Impacts of Energy Storage Systems

Commenters stated battery energy storage systems would result in noise and light pollution and visual impacts for nearby residents. Commenters expressed concern about adverse socioeconomic impacts of battery energy storage systems, stating that the risk of fire, toxic chemical releases, and emergency lockdowns would negatively affect home values, quality of life, and the local economy. DOE has supplemented the Technical Support Document to include additional information regarding potential noise and light pollution impacts from proposed projects. (*See* Technical Support Document, p. 41).

Commenters expressed concern regarding disposal of batteries at the end of their useful life and questioned if the batteries would be recycled or taken to hazardous waste landfills. Commenters stated that battery energy storage systems should not be categorically excluded due to the associated environmental impact of rare earth mining for battery materials, as well as the transport of hazardous materials to and from the facility upon decommissioning. Commenters stated that battery energy storage systems are waste-generating facilities with large quantities of hazardous, flammable materials stored onsite. DOE has supplemented the Technical Support Document to include additional information regarding waste management and decommissioning plans for proposed projects. For example, a decommissioning plan should be prepared during project planning that details what will happen when a battery energy storage system reaches its end of life. Decommissioning plans generally should include removal of all structures; recycling of equipment to the greatest extent possible; the proper disposal of non-recyclable equipment in accordance with manufacturer specifications and applicable local, state, and Federal requirements; and re-establishment of vegetation and restoration of the project site. (*See* Technical Support Document, p. 41.) In addition, National Fire Protection Association Standard 855 mandates a decommissioning plan for removing and disposing of the system at the end of its useful life.

Commenters stated that a battery energy storage system operating as a new entrant to the electrical grid introduces security vulnerabilities that could adversely affect the electrical grid. DOE has supplemented the Technical Support Document to include additional information regarding the North American Electric Reliability Corporation Critical Infrastructure Protection security requirements for system integrators of certain battery energy storage equipment, including cyber systems, asset categorization, and security system management. DOE also notes that the use of energy storage systems has increased substantially in recent years. This has demonstrated

through real world experience that energy storage systems can be safely integrated into the electrical grid and provides experience that is used to improve related guidance and practices. (*See* Technical Support Document, p. 56.)

Commenters recommended that if categorical exclusion B4.14 is applied to a proposed project that is within or would affect a state's coastal zone, DOE continue to comply with relevant requirements of the Coastal Zone Management Act. DOE recognizes its responsibility to comply with the Coastal Zone Management Act and will continue to do so. DOE also notes that one of the conditions, or integral elements, for applying categorical exclusion B4.14 to a proposed action is that the proposed action would not ''Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders'' (10 CFR part 1021, subpart D, appendix B). This condition includes compliance with relevant requirements of the Coastal Zone Management Act.

5. Comments Regarding Public Scoping and Alternatives Analysis

Commenters explained that DOE's categorical exclusion for battery energy storage systems removes transparency for communities and explained that there is a lack of public outreach for proposed battery energy storage systems when applying a categorical exclusion. Some commenters specified that communities should have public review and comment for proposed battery energy storage systems, including for example, potential environmental and safety risks, evacuation plans, and mitigation strategies. DOE responds that to provide transparency in the use of categorical exclusions, DOE began posting categorical exclusion determinations online in 2009. DOE will continue to regularly post categorical exclusion determinations for B4.14 and other categorical exclusions listed in appendix B of DOE's NEPA regulations (10 CFR part 1021, subpart D) at *www.energy.gov/nepa/doe-categorical-exclusion-cx-determinations.*

Commenters further stated that an alternatives analysis should be required to compare alternatives to battery energy storage system technology, as well as alternative siting locations. DOE considers alternatives, as appropriate, in NEPA reviews and in its decision making. Whether DOE evaluates alternatives for a particular proposed action, and the nature of those alternatives, depends on several factors including the potential for significant impacts and the purpose and need for DOE's action.

6. Comments Requesting That DOE Expand Categorical Exclusion B4.14

In explaining why categorical exclusion B4.14 is limited to electrochemical-battery and flywheel energy storage systems, DOE stated in the notice of proposed rulemaking that, ''At this time, DOE has not identified sufficient information to conclude that compressed air energy storage, thermal energy storage (*e.g.,* molten salt storage), or other technologies normally do not present the potential for significant environmental impacts. DOE welcomes comments that provide analytic support for whether these other energy storage technologies meet the requirements for a categorical exclusion.'' Commenters recommended that DOE expand categorical exclusion B4.14 to include any energy storage system that is technologically feasible or was developed either by a DOE laboratory or with financial support from the Federal Government. Commenters also recommended expansion of categorical exclusion B4.14 to include specific energy storage technologies, including above-ground compressed air energy storage; thermal energy storage, including molten salt storage; solid-state thermal batteries; pumped storage hydropower; gravity storage; underground hydrogen storage. DOE appreciates these suggestions, including the rationale provided by the commenters. DOE has determined, however, that it does not currently have sufficient information to determine that these technologies normally do not pose a potential for significant impacts. DOE will retain the comments for consideration in a future rulemaking.

Commenters recommended that categorical exclusion B4.14 include the use of iron-air batteries. Iron-air batteries are a type of electrochemical battery and, therefore, included within the scope of categorical exclusion B4.14.

Commenters suggested that DOE add a new categorical exclusion for combined battery and solar projects. DOE may apply more than one categorical exclusion to a proposed action so long as the potential effects of the total project are analyzed and the proposed action fulfills all the conditions, including integral elements, of each categorical exclusion applied. For example, it could be appropriate to apply categorical exclusions B4.14, Construction and operation of electrochemical-battery or flywheel energy storage systems, and B5.16, Solar photovoltaic systems, to the same proposed action, depending on project- and site-specific conditions. Given this practice, the commenters' suggested addition is unnecessary.

7. Comments Regarding Specific Energy Storage System Projects

Commenters expressed opposition to specific battery energy storage system projects including those in Morro Bay, CA, East Hampton, NY, Warwick, NY, Holtsville, NY, Covington, WA, and in Eldorado near Santa Fe, NM. Commenters requested to be informed of all future battery energy storage systems. This rulemaking does not involve decisions or actions related to any particular proposed battery energy storage system. As described in section II of this document, before DOE may apply categorical exclusion B4.14 to a particular proposed action, DOE must conduct a project-specific environmental review to determine whether all conditions applicable to the categorical exclusion are met. DOE does not review or have a decision-making role regarding all battery energy storage systems and has no mechanism to inform local residents of all future battery energy storage systems.

D. Comments Regarding Solar Photovoltaic Systems

1. Comments Regarding the Lake Effect Hypothesis (LEH)

There is a potential that birds, particularly waterfowl, perceive large solar PV facilities as water bodies. Underlying this lake effect hypothesis is the possibility that solar panels and water polarize light in a similar way. This might cause birds to try to land or feed on solar PV panels, which could cause bird fatalities and other harms. Some commenters raised this concern and stated that birds may mistake solar panels for water bodies and be stranded, injured, or killed. Commenters requested that best management practices, such as non-reflective coating, increased panel spacing, and vertical positioning of the panels at night for panels on rotating axes, be incorporated into solar facilities to minimize this risk. Other commenters added that certain mitigation measures may depend on the species of bird and other animal being affected, and that mitigation is best addressed in an environmental impact statement. DOE is aware of this potential impact and is one of the Federal agencies sponsoring research to better understand whether birds mistake solar panels for water, whether that might affect behavior, and what effective mitigation is available. (*See* Technical Support Document, p. 103.)

Categorical exclusion B5.16 includes conditions that require that the proposed project not have significant effects on protected species. At any point in its environmental review of a particular project, DOE can decide to prepare an environmental assessment or environmental impact statement rather than relying on a categorical exclusion.

2. Comments Regarding Wildlife and Habitat

Commenters stated that insect populations may be at risk from solar PV facilities and that PV panels produce polarized light that may confuse insects seeking water for feeding or breeding purposes, potentially leading to reproductive failure and possible ecosystem effects. DOE has supplemented the Technical Support Document to include research that summarizes the potential for negative impacts, including potential light pollution that may adversely impact aquatic insect breeding, as well as the positive impacts of solar PV systems on insect populations. (*See* Technical Support Document, p. 103.) The Technical Support Document summarizes research regarding siting considerations that demonstrate that use of previously disturbed or developed lands, such as former agricultural fields, is preferable to siting on undisturbed land. In addition, use of native mixes of flowering plants and grasses during revegetation can improve the biodiversity of both plant and insect populations, including pollinators, as the habitat matures post-construction. Proper siting of proposed solar PV systems and revegetation plans that use diverse, pollinator-friendly seed mixes would ensure that adverse impacts to insect populations are not significant. Categorical exclusion B5.16 includes conditions that require that the proposed project not have significant effects on protected species. At any point in its environmental review of a particular project, DOE can decide to prepare an environmental assessment or environmental impact statement rather than relying on a categorical exclusion.

Commenters stated that habitat fragmentation and the spread of non-native, invasive species could result from building solar projects along linear corridors such as utility rights-of-way, particularly in cases where the projects are fully fenced. These commenters further stated that land and wildlife managers must assess current wildlife habitat connectivity in the proposed project area, as well as future connectivity needs in light of climate change. DOE appreciates commenters raising concerns about habitat connectivity. DOE's integral elements and consideration of extraordinary circumstances would ensure consideration of these impacts. Nonetheless, to better highlight potential effects on habitat, in this final rule, DOE added conditions to categorical exclusion B5.16 to ensure that proposed solar PV projects would be consistent with applicable plans for management of wildlife and habitat, including plans to maintain habitat connectivity.

Commenters stated that the Wild Springs Solar Project included in the Technical Support Document is not a typical design because the fencing encloses blocks of panels, rather than surrounding the entire project. These commenters stated that the project was designed and sited to avoid prairie dog colony areas. These commenters asserted that if a categorical exclusion had been applied to this project, these protective measures are unlikely to have been taken. Categorical exclusion B5.16 requires that the proposed project not have significant effects on species, habitat, and other local environmental conditions, as well as the use of best management practices. DOE disagrees with the assertion that the protective design elements would not have been included in the project if a categorical exclusion would have been used for NEPA review.

3. Comments Regarding Various Environmental Effects

Commenters expressed concerns regarding impacts from toxic dust during construction, visual impacts, lower property values, harm to tourism economies, and a heat island effect. Commenters expressed concern over water use during construction and for dust control and the cumulative impact of dust emissions, both during construction and operation. Commenters stated that categorical exclusion B5.16 must include provisions for effective dust control in desert and dry, wind-prone areas. DOE is aware of these concerns. Dust control and limitations on other effects are encompassed in the requirement that the proposed project be in ''accordance with applicable requirements (such as land use and zoning requirements) in the proposed project area and the integral elements listed at the start of appendix B of this part, and would be consistent with applicable plans for the management of wildlife and habitat, including plans to maintain habitat connectivity, and incorporate appropriate control technologies and best management practices.''

One individual expressed concern about fire risk due to electrical lines associated with solar energy systems. DOE responds that any electrical lines associated with a solar PV system would be required to meet all applicable standards for vegetation management, system design, and other conditions to prevent the lines from causing fires.

4. Comments Regarding Cumulative Effects

Commenters expressed concern over the cumulative effects of removing the 10-acre size limit for solar PV systems in categorical exclusion B5.16, suggesting that the impacts could extend to tens of thousands of acres in a concentrated area. Commenters also stated that the categorical exclusion must not apply to utility-scale solar developments larger than 500 acres because of cumulative impacts. DOE considers cumulative impacts in determining whether to apply a categorical exclusion to a proposed action. DOE's regulations list conditions that must be met before making a categorical exclusion determination. Among these conditions is a requirement to consider ''connected and cumulative actions, that is, the proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), [and] is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)).'' DOE might also consider cumulative impacts in the context of extraordinary circumstances, integral elements, or other conditions such as consistency with applicable plans for the management of wildlife and habitat, including plans to maintain habitat connectivity. In regard to the suggested 500-acre limit for the categorical exclusion, as explained in section II of this document, DOE does not have a basis for identifying a particular acreage limit for categorical exclusion B5.16. Local conditions are the appropriate basis for assessing the significance of environmental impacts for a particular proposed project.

5. Comments Regarding the Need for Additional Guidance and Regulation

Commenters identified a need for further guidance on responsible solar buildout, particularly regarding critical wildlife habitats and productive agricultural lands. DOE appreciates this recommendation and expects that guidance and best practices will continue to improve as the technology advances. Categorical exclusion B5.16 includes flexibility to accommodate these changes (*e.g.,* by providing for

consideration of the best practices relevant at the time the proposed action is reviewed).

Other commenters stated that categorical exclusion B5.16 requires that actions ''would be in accordance with applicable requirements (such as land use and zoning requirements)'' but noted that not all jurisdictions have current planning and zoning that expressly addresses siting of large-scale solar PV projects. Commenters asserted that a large-scale PV solar project, therefore, could be permitted in a corridor or right-of-way without meaningful NEPA review simply because it is not prohibited in those areas under the current zoning and planning requirements. DOE disagrees with this characterization. As explained in section II of this document and in response to comments, DOE must consider several conditions related to environmental impacts before deciding whether to apply categorical exclusion B5.16 to a particular proposed action. In an area without applicable land use and zoning requirements, DOE still would consider whether the proposed project location is on previously disturbed or developed land, applicable requirements and plans for the management of wildlife and habitat, including plans to maintain habitat connectivity, whether the proposed project incorporates appropriate control technologies and best management practices, the integral elements listed in DOE's regulations, and other conditions required of every categorical exclusion, such as consideration of any extraordinary circumstances.

6. Comments Regarding the Definition of Previously Disturbed or Developed Lands

Some commenters proposed edits to narrow DOE's definition of ''previously disturbed or developed lands.'' DOE considered these suggestions and concluded that the changes are unnecessary. DOE has successfully applied the current definition over more than a decade for a variety of projects involving several DOE categorical exclusions that use the phrase ''previously disturbed or developed.'' This phrase and definition are only part of the criteria that must be met to use categorical exclusion B5.16. As described in section II of this document and in response to other comments, the use of the categorical exclusion is dependent upon successfully satisfying several conditions related to environmental effects.

7. Comments Regarding Scope

Commenters suggested that DOE extend categorical exclusion B5.16 to include agricultural lands, especially where the project developers agree to follow certain practices to protect native habitats and manage stormwater. DOE considers agricultural land potentially within the scope of categorical exclusion B5.16 so long as the proposed action meets all applicable conditions. Those conditions include avoiding significant impacts on habitat and following applicable plans for the management of wildlife and habitat, including plans to maintain habitat connectivity, among others.

Commenters stated that large, solar PV power plants built on water decrease photosynthesis and primary productivity and may have adverse ecosystem effects. Categorical exclusion B5.16 does not apply to solar PV projects proposed to be located on water. In DOE's NEPA regulations, the term '' 'previously disturbed or developed' refers to land'' (10 CFR 1021.410(g)(1)).

8. Comments Regarding Solar Panel Production and Decommissioning

Commenters expressed concern about environmental impacts of solar panel production, citing the environmental effects and carbon emissions of raw material sourcing, mining, smelting, and refining. The effects of solar panel production are not within DOE's control or responsibility and are therefore outside the scope of DOE's NEPA review for solar PV systems. The scope of categorical exclusion B5.16 includes of installation, modification, and decommissioning of solar PV systems, and the related environmental effects are within the scope of DOE's NEPA review.

Commenters stated that use of the categorical exclusion would prevent public review of materials used in solar panels with potential to leach into landfills and impact water quality. Commenters stated that potential carcinogens such as PFAS (per- and polyfluoroalkyl substances) and metals such as silver, cadmium, and tellurium may be used in solar PV panels. DOE has supplemented the Technical Support Document regarding the safe operation and maintenance of solar PV panels. PV panels are sealed and do not leach chemicals during normal operation. Maintenance and repair of PV panels ensures that broken or cracked PV panels do not leach metals or other potentially hazardous contaminants. Recycling PV panels keeps PV panels out of landfills. (*See* Technical Support Document, p. 52.)

Commenters stated that consideration has not been given to the safe decommissioning and recycling of PV panels. DOE conducts research on the safe decommissioning and recycling of PV panels. Categorical exclusion B5.16 includes decommissioning of a solar PV system, and the environmental effects of decommissioning are considered as part of this rulemaking. (*See* Technical Support Document, p. 74.) DOE has supplemented the Technical Support Document to include additional information regarding waste management and decommissioning plans for proposed projects. For example, a decommissioning plan should be prepared during project planning and best practices for what will happen when the solar PV project reaches its end of life. Decommissioning plans generally should include removal of all structures, including solar panels and all related equipment; recycling of PV panels and related equipment to the greatest extent possible; the proper disposal of non-recyclable equipment in accordance with manufacturer specifications and applicable local, state, and Federal requirements; and re-establishment of vegetation and restoration of the project site. (*See* Technical Support Document, p. 74.) In addition, National Fire Protection Association Standard 855 mandates a decommissioning plan for removing and disposing of the system at the end of its useful life.

V. Procedural Issues and Regulatory Review

A. Review Under Executive Orders 12866, 13563, and 14094

Executive Order (''E.O.'') 12866, ''Regulatory Planning and Review,'' as supplemented and reaffirmed by E.O. 13563, ''Improving Regulation and Regulatory Review,'' 76 FR 3821 (Jan. 21, 2011) and amended by E.O. 14094, ''Modernizing Regulatory Review,'' 88 FR 21879 (April 11, 2023), requires agencies, to the extent permitted by law, to (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits (including

potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity); (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fees or marketable permits, or providing information upon which choices can be made by the public. DOE emphasizes as well that E.O. 13563 requires agencies to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible. In its guidance, the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget (OMB) has emphasized that such techniques may include identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes. Many benefits and costs associated with this final rule are not quantifiable. The direct benefits include reduced cost and time for environmental analysis incurred by DOE, project proponents, and the public. Indirect benefits are expected to include deployment of technologies that improve the reliability and resilience of the Nation's electric grid and that expand electricity generation capacity while reducing emissions of GHGs. For the reasons stated in this preamble, this regulatory action is consistent with these principles.

This regulatory action has been determined not to be ''a significant regulatory action'' under E.O. 12866, ''Regulatory Planning and Review,'' 58 FR 51735 (October 4, 1993). Accordingly, this action is not subject to review under that Executive Order by OIRA of OMB.

B. Review Under Executive Orders 12898 and 14096

E.O. 12898, ''Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations,'' as supplemented and amended by E.O. 14096, ''Revitalizing Our Nation's Commitment to Environmental Justice for All,'' requires each Federal agency, consistent with its statutory authority, to make achieving environmental justice part of its mission. E.O. 14096 directs Federal agencies to carry out environmental reviews under NEPA in a manner that ''(A) analyzes direct, indirect, and cumulative effects of Federal actions on communities with environmental justice concerns; (B) considers best available science and information on any disparate health effects (including risks) arising from exposure to pollution and other environmental hazards, such as information related to the race, national origin, socioeconomic status, age, disability, and sex of the individuals exposed; and (C) provides opportunities for early and meaningful involvement in the environmental review process by communities with environmental justice concerns potentially affected by a proposed action, including when establishing or revising agency procedures under NEPA.'' DOE provided opportunities for public engagement in this rulemaking, including opportunities for communities with environmental justice concerns, and DOE considered and responded to comments raising environmental justice concerns (section IV of this document). Also, in determining whether the categorical exclusions apply to a future proposed action, DOE will consider whether the proposed action threatens a violation of these Executive Orders, consistent with the first integral element listed in appendix B of DOE's NEPA procedures.

C. Review Under National Environmental Policy Act

The Department's NEPA procedures assist the Department in fulfilling its responsibilities under NEPA and the CEQ regulations but are not themselves final determinations of the level of environmental review required for any proposed action. The CEQ regulations do not direct agencies to prepare an environmental assessment or environmental impact statement before establishing agency procedures that supplement the CEQ regulations to implement NEPA (40 CFR 1507.3). In establishing a new categorical exclusion and making other changes as described in this final rule, DOE followed the requirements of CEQ's procedural regulations, which include publishing the notice of proposed rulemaking in the **Federal Register** for public review and comment, considering public comments, and consulting with CEQ regarding conformity with NEPA and the CEQ regulations (40 CFR 1507.3(b)).

In this final rule, DOE finalizes amendments that establish, modify, and clarify procedures for considering the environmental effects of DOE actions within DOE's decisionmaking process, thereby enhancing compliance with the letter and spirit of NEPA. DOE has determined that this final rule qualifies for categorical exclusion under 10 CFR part 1021, subpart D, appendix A6, because it is a strictly procedural rulemaking, and no extraordinary circumstances exist that require further environmental analysis. Therefore, DOE has determined that promulgation of these amendments is not a major Federal action significantly affecting the quality of the human environment within the meaning of NEPA, and does not require an environmental assessment or an environmental impact statement.

D. Review Under Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. As required by E.O. 13272, ''Proper Consideration of Small Entities in Agency Rulemaking,'' 67 FR 53461 (Aug. 16, 2002), DOE published procedures and policies on February 19, 2003, to ensure that the potential impacts of its rules on small entities are properly considered during the rulemaking process (68 FR 7990). DOE has made its procedures and policies available on the Office of the General Counsel's website: *https://energy.gov/gc* under Resources.

DOE has reviewed this rule under the provisions of the Regulatory Flexibility Act and the procedures and policies published on February 19, 2003. The revisions to 10 CFR part 1021 streamline the environmental review for proposed actions, resulting in a decrease in burdens associated with carrying out such reviews. For example, the revisions to DOE's categorical exclusions are expected to reduce the number of environmental assessments that applicants would need to pay to have prepared for DOE's consideration. Applicants may sometimes incur costs in providing environmental information that DOE requires when making a categorical exclusion determination. The Government Accountability Office found in 2014 that there is little data available on the costs for preparing NEPA reviews and that agencies ''generally do not reports costs that are 'paid by the applicant' because these costs reflect business transactions between applicants and their contractors and are not available to agency officials.'' [16] In 2011, DOE estimated the cost of preparing

[16] GAO–14–369, NATIONAL ENVIRONMENTAL POLICY ACT: Little Information Exists on NEPA Analyses, April 2014, available at *www.gao.gov/assets/gao-14-369.pdf.*

environmental assessments over the prior decade at an average of $100,000 and a median of $65,000.[17] DOE does not have more current cost data. The costs of making a categorical exclusion determination are less than those to prepare an EA. Although DOE does not have data on what percentage of EAs were funded by applicants that qualified as small entities, a beneficial cost impact is expected to accrue to entities of all sizes.

Based on the foregoing, DOE certifies that this final rule will not have a significant economic impact on a substantial number of small entities. Accordingly, DOE has not prepared a regulatory flexibility analysis for this rulemaking. DOE's certification and supporting statement of factual basis will be provided to the Chief Counsel for Advocacy of the Small Business Administration pursuant to 5 U.S.C. 605(b).

E. Review Under Paperwork Reduction Act

This rulemaking imposes no new information or record-keeping requirements. Accordingly, OMB clearance is not required under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) and the procedures implementing that Act (5 CFR 1320.1 *et seq*).

F. Review Under Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act (UMRA) of 1995 (Pub. L. 104–4) requires each Federal agency to assess the effects of Federal regulatory actions on state, local, and tribal governments, in the aggregate, or to the private sector, other than to the extent such actions merely incorporate requirements specifically set forth in a statute. Section 202 of UMRA requires a Federal agency to perform a detailed assessment of the anticipated costs and benefits of any rule that includes a Federal mandate which may result in costs to State, local, or Tribal governments, or to the private sector, of $100 million or more in any one year (adjusted annually for inflation) (2 U.S.C. 1532(a) and (b)). Section 204 of UMRA requires each agency that proposes a rule containing a significant Federal intergovernmental mandate to develop an effective process for obtaining meaningful and timely input from elected officers of State, local, and Tribal governments (2 U.S.C. 1534).

This final rule amends DOE's existing regulations governing compliance with NEPA to better align DOE's regulations, including its categorical exclusions, with its current activities and recent experiences. This final rule will not result in the expenditure by State, local, and Tribal governments in the aggregate, or by the private sector, of $100 million or more in any one year. Accordingly, no assessment or analysis is required under the UMRA.

G. Review Under Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any proposed rule that may affect family well-being. This final rule will not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOE has concluded that it is not necessary to prepare a Family Policymaking Assessment.

H. Review Under Executive Order 13132

E.O. 13132, ''Federalism,'' 64 FR 43255 (Aug. 4, 1999), imposes certain requirements on agencies formulating and implementing policies or regulations that preempt state law or that have federalism implications. Agencies are required to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the states and carefully assess the necessity for such actions. DOE has examined this final rule and has determined that it will not preempt state law and will not have a substantial direct effect on the states, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. No further action is required by E.O. 13132.

I. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of E.O. 12988, ''Civil Justice Reform,'' 61 FR 4729 (Feb. 7, 1996), imposes on Executive agencies the general duty to adhere to the following requirements: (1) eliminate drafting errors and ambiguity; (2) write regulations to minimize litigation; and (3) provide a clear legal standard for affected conduct rather than a general standard and promote simplification and burden reduction. With regard to the review required by section 3(a), section 3(b) of E.O. 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any; (2) clearly specifies any effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction; (4) specifies the retroactive effect, if any; (5) adequately defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of E.O. 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met, or it is unreasonable to meet one or more of them. DOE has completed the required review and determined that, to the extent permitted by law, this final rule meets the relevant standards of E.O. 12988.

J. Review Under Treasury and General Government Appropriations Act, 2001

The Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516 note) provides for agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB.

OMB's guidelines were published at 67 FR 8452 (Feb. 22, 2002), and DOE's guidelines were published at 67 FR 62446 (Oct. 7, 2002). DOE has reviewed this final rule under the OMB and DOE guidelines and has concluded that it is consistent with applicable policies in those guidelines.

K. Review Under Executive Order 13211

Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use,'' 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare and submit to OMB a Statement of Energy Effects for any proposed significant energy action. A ''significant energy action'' is defined as any action by an agency that promulgated or is expected to lead to promulgation of a final rule, and that: (1)(i) is a significant regulatory action under E.O. 12866, or any successor order, and (ii) is likely to have a significant adverse effect on the supply, distribution, or use of energy; or (2) is designated by the Administrator of OIRA as a significant energy action. For any proposed significant energy action, the agency must give a detailed statement of any adverse effects on energy supply, distribution, or use should the proposal be implemented, and of reasonable alternatives to the action and their expected benefits on energy supply, distribution, and use. This regulatory action does not have a

[17] 76 FR 237, January 3, 2011.

significant adverse effect on the supply, distribution, or use of energy, and is therefore not a significant energy action. Accordingly, DOE has not prepared a Statement of Energy Effects.

L. Review Under Executive Order 12630

DOE has determined pursuant to E.O. 12630, ''Governmental Actions and Interference with Constitutionally Protected Property Rights,'' 53 FR 8859 (Mar. 18, 1988), that this final rule would not result in any takings that might require compensation under the Fifth Amendment to the United States Constitution.

M. Congressional Notification

As required by 5 U.S.C. 801, DOE will report to Congress on the promulgation of this rule prior to its effective date. The report will state that the Office of Information and Regulatory Affairs has determined that this action meets the criteria set forth in 5 U.S.C. 804(2).

VI. Approval of the Office of the Secretary

The Secretary of Energy has approved publication of this notice of final rulemaking.

List of Subjects in 10 CFR Part 1021

Environmental impact statements.

Signing Authority

This document of the Department of Energy was signed on April 24, 2024, by Samuel T. Walsh, General Counsel, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on April 24, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

For the reasons stated in the preamble, DOE amends part 1021 of chapter X of title 10, Code of Federal Regulations, as set forth below:

PART 1021—NATIONAL ENVIRONMENTAL POLICY ACT IMPLEMENTING PROCEDURES

■ 1. The authority citation for part 1021 continues to read as follows:

Authority: 42 U.S.C. 7101 *et seq.*; 42 U.S.C. 4321 *et seq.*; 50 U.S.C. *et seq.*

■ 2. Appendix B of subpart D of part 1021 is amended by:
■ a. Revising B4.4, B4.6, and B4.13;
■ b. Adding B4.14; and
■ c. Revising B5.1 and B5.16.

The revisions and addition read as follows:

Appendix B to Subpart D of Part 1021—Categorical Exclusions Applicable to Specific Agency Actions

* * * * *

B4. * * *

* * * * *

B4.4 Power Marketing Services and Activities

Power marketing services and power management activities (including, but not limited to, storage, load shaping and balancing, seasonal exchanges, and other similar activities), provided that the operations of generating projects would remain within normal operating limits. (*See* B4.14 of this appendix for energy storage systems.)

* * * * *

B4.6 Additions and Modifications To Transmission Facilities

Additions or modifications to electric power transmission facilities within a previously disturbed or developed facility area. Covered activities include, but are not limited to, switchyard rock grounding upgrades, secondary containment projects, paving projects, seismic upgrading, tower modifications, load shaping projects (such as reducing energy use during periods of peak demand), changing insulators, and replacement of poles, circuit breakers, conductors, transformers, and crossarms. (See B4.14 of this appendix for energy storage systems.)

* * * * *

B4.13 Upgrading and Rebuilding Existing Powerlines

Upgrading or rebuilding existing electric powerlines, which may involve relocations of small segments of the powerlines within an existing powerline right-of-way or within otherwise previously disturbed or developed lands (as discussed at 10 CFR 1021.410(g)(1)). Upgrading or rebuilding existing electric powerlines also may involve widening an existing powerline right-of-way to meet current electrical standards if the widening remains within previously disturbed or developed lands and only extends into a small area beyond such lands as needed to comply with applicable electrical standards. Covered actions would be in accordance with applicable requirements, including the integral elements listed at the start of appendix B of this part; and would incorporate appropriate design and construction standards, control technologies, and best management practices. This categorical exclusion does not apply to underwater powerlines. As used in this categorical exclusion, ''small'' has the meaning discussed at 10 CFR 1021.410(g)(2).

B4.14 Construction and Operation of Electrochemical-Battery or Flywheel Energy Storage Systems

Construction, operation, upgrade, or decommissioning of an electrochemical-battery or flywheel energy storage system within a previously disturbed or developed area or within a small (as discussed at 10 CFR 1021.410(g)(2)) area contiguous to a previously disturbed or developed area. Covered actions would be in accordance with applicable requirements (such as land use and zoning requirements) in the proposed project area and the integral elements listed at the start of appendix B of this part, and would incorporate appropriate safety standards (including the current National Fire Protection Association 855, Standard for the Installation of Stationary Energy Storage Systems), design and construction standards, control technologies, and best management practices.

* * * * *

B5. * * *

B5.1 Actions To Conserve Energy or Water

(a) Actions to conserve energy or water, demonstrate potential energy or water conservation, and promote energy efficiency that would not have the potential to cause significant changes in the indoor or outdoor concentrations of potentially harmful substances. These actions may involve financial and technical assistance to individuals (such as builders, owners, consultants, manufacturers, and designers), organizations (such as utilities), and governments (such as state, local, and tribal). Covered actions include, but are not limited to weatherization (such as insulation and replacing windows and doors); programmed lowering of thermostat settings; placement of timers on hot water heaters; installation or replacement of energy efficient lighting, low-flow plumbing fixtures (such as faucets, toilets, and showerheads), heating, ventilation, and air conditioning systems, and appliances; installation of drip-irrigation systems; improvements in generator efficiency and appliance efficiency ratings; efficiency improvements for vehicles and transportation (such as fleet changeout); transportation management systems (such as traffic signal control systems, car navigation, speed cameras, and automatic plate number recognition); development of energy-efficient manufacturing, industrial, or building practices; and small-scale energy efficiency and conservation research and development and small-scale pilot projects. Covered actions include building renovations or new structures, provided that they occur in a previously disturbed or developed area. Covered actions could involve commercial, residential, agricultural, academic, institutional, or industrial sectors. Covered

actions do not include rulemakings, standard-settings, or proposed DOE legislation, except for those actions listed in B5.1(b) of this appendix.

* * * * *

B5.16 Solar Photovoltaic Systems

(a) The installation, modification, operation, or decommissioning of commercially available solar photovoltaic systems:

(1) Located on a building or other structure (such as rooftop, parking lot or facility, or mounted to signage, lighting, gates, or fences); or

(2) Located within a previously disturbed or developed area.

(b) Covered actions would be in accordance with applicable requirements (such as land use and zoning requirements) in the proposed project area and the integral elements listed at the start of appendix B of this part, and would be consistent with applicable plans for the management of wildlife and habitat, including plans to maintain habitat connectivity, and incorporate appropriate control technologies and best management practices.

■ 3. Amend Appendix C of subpart D of part 1021 by revising C4 and C7 to read as follows:

Appendix C to Subpart D of Part 1021—Classes of Actions That Normally Require EAs But Not Necessarily EISs

* * * * *

C4 Upgrading, Rebuilding, or Construction of Powerlines

(a) Upgrading or rebuilding existing powerlines when the action does not qualify for categorical exclusion B4.13; or construction of powerlines:

(1) More than approximately 10 miles in length outside previously disturbed or developed powerline or pipeline rights-of-way; or

(2) more than approximately 20 miles in length within previously disturbed or developed powerline or pipeline rights-of-way.

* * * * *

C7 Contracts, Policies, and Marketing and Allocation Plans for Electric Power

(a) Establishment and implementation of contracts, policies, and marketing and allocation plans related to electric power acquisition that involve:

(1) The interconnection of, or acquisition of power from, new generation resources that are equal to or less than 50 average megawatts, unless the generation resource is eligible for a categorical exclusion;

(2) Changes in the normal operating limits of generation resources equal to or less than 50 average megawatts; or

(3) Service to discrete new loads of less than 10 average megawatts over a 12-month period.

* * * * *

■ 4. Amend Appendix D to subpart D of part 1021 by revising D7 to read as follows:

Appendix D to Subpart D of Part 1021—Classes of Actions That Normally Require EISs

* * * * *

D7 Contracts, Policies, and Marketing and Allocation Plans for Electric Power

(a) Establishment and implementation of contracts, policies, and marketing and allocation plans related to electric power acquisition that involve:

(1) The interconnection of, or acquisition of power from, new generation resources greater than 50 average megawatts, unless the generation resource is eligible for a categorical exclusion or was evaluated in an environmental assessment resulting in a finding of no significant impact;

(2) Changes in the normal operating limits of generation resources greater than 50 average megawatts; or

(3) Service to discrete new loads of 10 average megawatts or more over a 12-month period.

Criminal Justice Reviews for the SBA Business Loan Programs, Disaster Loan Programs, and Surety Bond Guaranty Program

AGENCY: U.S. Small Business Administration.

ACTION: Final rule.

SUMMARY: On September 15, 2023 the U.S. Small Business Administration (SBA or Agency) published a notice of proposed rulemaking (''NPRM'' or ''proposed rule'') to amend regulations governing SBA's business loan programs (7(a) Loan Program, 504 Loan Program, Microloan Program, Intermediary Lending Pilot Program (ILP), Surety Bond Guarantee Program, and the Disaster Loan Program (except for the COVID–19 Economic Injury Disaster Loan (EIDL) Program) for criminal background reviews. The proposed rule introduced amendments to improve equitable access based on criminal background review of applicants seeking to participate in one or more of these programs. This final rule implements proposed regulatory changes and addresses comments SBA received.

DATES: This final rule is effective May 30, 2024.

FOR FURTHER INFORMATION CONTACT: Alejandro C. Contreras, Acting Director, Office of Financial Assistance, Small Business Administration, at (202) 205–6436 or *alejandro.contreras@sba.gov.*

SUPPLEMENTARY INFORMATION:

I. Background Information

The mission of SBA is to ''aid, counsel, assist and protect'' the interests of small business concerns to ''preserve free competitive enterprise'' and ''maintain and strengthen the overall economy of our nation.'' 15 U.S.C. 631(a). SBA accomplishes this mission, in part, through Capital Access programs that bridge the financing gap in the private market and help businesses of all sizes to recover from disasters. Further, 15 U.S.C. 636(a)(1)(B) states that the Administrator may verify the criminal background of the applicant, which grants SBA the flexibility to determine whether and how to consider criminal history in the context of issuing loan guarantees, so long as the loans are of sound value. Congress provided SBA with authority to promulgate rules to carry out these provisions. See 15 U.S.C. 634(b)(6).

SBA has comprehensively reviewed its capital programs' current policies on individuals with criminal history records to ensure that the policies promote SBA's statutory mandates that recognize the importance of small business development in general as well as the responsibility to increase opportunities for certain groups that may not historically have had equitable opportunities for small business ownership. See 15 U.S.C. 631(a), 636(a)(1)(B), 636(b)(1)(A), 636(l), 636(m), 694(b), and 695. It is SBA's position that this final rule supports these Federal statutory mandates. The final rule also supports and reflects changing conditions in how State and local governments and the private sector have broadened access to business capital for qualified people with certain criminal history records and Federal laws and policies, including bipartisan legislation, such as the Second Chance Act of 2008 and the First Step Act of 2018, that have reduced barriers to successful reentry in order to reduce the risk of future criminal justice system involvement. This final rule helps facilitate employment opportunities for individuals with criminal history records and is supported by data and empirical research demonstrating the public safety and economic benefits of doing so.

Based on its review of SBA capital programs' current policies on individuals with criminal history records, SBA recognizes the need to update regulations to reduce barriers to participation in these programs for equitable support for qualified small

business owners with certain criminal history records and issued a proposed rule for public comment. As the SBA expands access to capital to more qualified entrepreneurs, it continues to implement additional reforms to mitigate the risk of fraud in its traditional capital programs, including front-end detection protocols conducted by SBA. These safeguards are in addition to ones set and implemented by lenders and local, State, and Federal laws. Currently, the ILP Intermediary Program considers as ineligible businesses with an Associate (as defined by 13 CFR 109.20) that is incarcerated, on parole or probation, or that has been indicted but not convicted for a felony or a crime of moral turpitude; for the Surety Bond Guaranty Program, SBA considers an applicant ineligible if any of the Principals (as defined by 13 CFR 115.10) are under indictment but not convicted, previously convicted of a felony or have received civil judgment regarding business transactions; for the 7(a) and 504 business loan programs, SBA considers an applicant ineligible if the business has an Associate who is incarcerated, on probation, on parole, or is under indictment for a felony or any crime involving or relating to financial misconduct or a false statement, and for Microloans, in addition to an Associate who is incarcerated, an Associate who is on probation or parole for an offense involving fraud or dishonesty; and for the Disaster Loan Program in 13 CFR 123.101(i) (adopted by reference in 13 CFR 123.201 and 123.301) and 123.502(c), SBA considers ineligible any principal owners of the damaged property that are currently incarcerated, or on probation or parole following conviction for a serious criminal offense, with additional specific restrictions for Immediate Disaster Assistance Program (IDAP) loans, that include presently being under indictment, on parole or probation; charged with, arrested for, convicted, placed on pretrial diversion, and/or placed on any form of probation (including adjudication withheld pending probation) for any criminal offense other than a minor motor vehicle violation (including offenses which have been dismissed, discharged, or not prosecuted).

Although the original intent of these restrictions was to protect the performance of SBA's capital programs against a presumed higher likelihood of default, data and research refute the concerns that may have animated SBA's initial rationale. Importantly, SBA reviewed the relevant research and found no evidence of a negative impact on repayment for qualified individuals with criminal history records in any American business loan program. This lack of data demonstrates that continuing to rely on this restriction for that purpose would contradict the available evidence and although the restrictions may have been originally put in place with the goal of protecting program performance, the lack of data suggests continuing to rely on this restriction would reflect an outdated, inaccurate regulatory barrier against individuals with criminal history records. Specifically, research demonstrates that employment increases success during reentry, decreases the risk of recidivism, and strengthens both public safety and economic opportunity. Research also demonstrates that entrepreneurship provides an important and distinct avenue for economic stability given persistent stigma from employers who may decline to hire people with criminal history records. Notably, SBA found several studies showing the difficulty of obtaining employment for formerly incarcerated people (see for example, *Investigating Prisoner Reentry: The Impact of Conviction Status on the Employment Prospects of Young Men;*[1] from the Department of Justice's National Institute of Justice Grant) and a positive link between employment and successful reentry, including preventing recidivism (see for example, *Local Labor Markets and Criminal Recidivism*[2] in the Journal of Public Economics). Moreover, because individuals with criminal history records may face barriers in obtaining employment, entrepreneurship can be a productive option, and SBA found several studies showing the potential for entrepreneurship among individuals with criminal records (see for example *From Prison to Entrepreneurship*[3] in the American Academy of Political and Social Science).

After conducting its review of SBA capital programs' current policies on people with certain criminal history records, SBA posted a proposed rule for public comment. Given the lack of data suggesting program performance issues and the breadth of research indicating the benefits, SBA is removing unnecessary restrictions that limit access to capital for qualified people with certain criminal history records. Furthermore, the proposed rule sought to provide employment opportunities for qualified people with certain criminal history records because expanding access to entrepreneurship strengthens individual and community economic opportunity and growth while also strengthening public safety by facilitating successful reentry and thereby reducing the risk of future criminal justice system involvement.

The Agency received 19 comments on all aspects of the revisions in the proposed rule and on any related issues affecting the 7(a) Loan, 504 Loan, Microloan, ILP, Surety Bond Guarantee Program, and Disaster Loan Programs. (88 FR 63534) There were 17 comments received from separate individuals or entities as follows: three Community Development Companies (CDCs), one trade association, one government entity, seven advocacy non-profit groups, six individuals, and the **Federal Register** posting itself which tallies as a comment. There was one invalid comment received which was not posted to *regulations.gov*. The comments received are tallied by each proposal in the section-by-section analysis below. SBA has reviewed and considered those comments and is now issuing a final rule to implement those changes. Throughout this final rule, ''currently incarcerated'' means ''a person who is currently serving a sentence of imprisonment imposed upon an adjudication of guilt.''

Pursuant to its statutory authority to promulgate rules to carry out its mandate, and after considering public comments, SBA is revising several regulatory provisions. See 15 U.S.C. 634(b)(6). SBA is updating the 7(a), 504, Microloan, ILP, Surety Bond Guarantee Program, and Disaster Loan Program regulations requiring criminal background reviews. Specifically, SBA is revising 13 CFR 109.400(b)(15) on ''Eligible Small Business Concerns''; 13 CFR 115.13(a)(2)(i) on ''Eligibility of Principal''; 13 CFR 120.110(n) on ''What businesses are ineligible for SBA business loans?''; 13 CFR 120.707(a) on ''What conditions apply to loans by Intermediaries to Microloan borrowers?''; 13 CFR 123.101(i) on ''When am I not eligible for a home disaster loan?''; 13 CFR 123.502(c) on ''Under what circumstances is your business ineligible to be considered for a Military Reservist Economic Injury Disaster Loan?''; and 13 CFR 123.702(c)(1) and (2) on ''Character requirements.''

[2] *Local Labor Markets and Criminal Recidivism,* ScienceDirect, Journal of Public Economics, Volume 147, March 2017, Pages 16–29

[3] *From Prison to Entrepreneurship: Can Entrepreneurship be a Reentry Strategy for Justice-Impacted Individuals?, https://doi.org/10.1177/00027162221115378,* Sage Journals, Volume 701, Issue 1, September 14, 2022.

SBA is revising 13 CFR 109.400(b)(15) for ILP loans to small businesses to remove the restrictions on Associates of an applicant who are on probation or parole; 13 CFR 115.13(a)(2)(i) for surety bond applicants to remove restrictions on a Principal bidding for a contract (as defined in 13 CFR 115.10) who has been previously convicted of a felony or received civil judgment regarding business transactions; 13 CFR 120.110(n) for 7(a) and 504 loans to remove restrictions on businesses with an Associate who is on probation or on parole; 13 CFR 120.707(a) for Microloans to remove restrictions on businesses with an Associate who is currently on probation or parole for an offense involving fraud or dishonesty; and 13 CFR 123.101(i) for physical and economic injury and 13 CFR 123.502(c) for military reservist economic injury disaster loans to remove restrictions regarding principal owners of damaged property who are on probation or parole following conviction for a serious criminal offense.

Further, regarding IDAP loans, in 13 CFR 123.702(c)(1) and (2), SBA will remove restrictions for businesses with an Associate who is presently on parole or probation; that has ever been charged with, arrested for, convicted, placed on pretrial diversion, and/or placed on any form of probation (including adjudication withheld pending probation) for any criminal offense other than a minor motor vehicle violation (including offenses which have been dismissed, discharged, or not prosecuted).

SBA has determined that reducing barriers to these programs for otherwise qualified applicants where one or more of their associates has the criminal justice system involvement described above is necessary to ensure equity and expand economic opportunities. These changes will further the goals of SBA's statutory mandates. SBA believes that modernizing the character requirements regarding consideration of the criminal history records of SBA loan applicants and Associates of business loan applicants is timely and appropriate to reflect changes in the public and private sector that have reduced unnecessary barriers to access to capital and successful reentry. Doing so also promotes equitable consideration for applicants who are ineligible for Federal assistance in SBA's programs due to prior convictions that have been adjudicated and terms of incarceration that have been served. These changes create the opportunity for formerly incarcerated individuals to participate in SBA's loan and surety bond programs and engage in entrepreneurial endeavors that research shows statistically decrease recidivism based on employment and continued engagement within their communities, thereby strengthening public safety.[4] These changes will enable SBA programs to provide capital in the form of Surety Bonds, 7(a), 504, Microloan, ILP, and Disaster loans to more qualified small businesses and disaster survivors, which will strengthen our economy. SBA did not remove or change 13 CFR 120.110(q) regarding ineligibility due to prior default and loss to the Federal Government. Finally, SBA will continue the practices it recently implemented to access certain public data to perform fraud checks prior to approval of any 7(a), 504, or Disaster loans.

II. Comments That Apply to Every Section

SBA received comments requesting modifications for each section of the proposed rule. As the same modifications were repeated for each section, they are addressed in this overview rather than in the section-by-section analysis. Each of the requested modifications or requests and the reason for accepting or not accepting the modification or request is provided below:

(1) SBA should consider retaining the ability to conduct criminal background checks of program applicants and allow additional time to review the information contained therein for the expanded categories of individuals. SBA considered but did not accept the modification proposed by these comments. As SBA noted in the preamble of the final rule Lenders, CDCs, and Microlender Intermediaries may continue background checks if it is in their lending policies to do so. The final rule makes clear that, as the SBA expands access to capital to more qualified entrepreneurs, SBA continues to implement additional reforms to mitigate the risk of fraud in its traditional capital programs, including front-end detection protocols conducted by SBA, and these additional SBA front-end safeguards are in addition to ones set and implemented by lenders and local, State, and Federal laws.

(2) SBA should consider expanding access to capital to small business owners with criminal convictions only if ten years or more have elapsed since the last conviction. SBA considered but did not accept the modification suggested by these comments because (a) the comment did not provide any empirical support as to why a ten-year period (as opposed to another period of time) would strengthen either public safety or economic opportunity; (b) the comment did not provide any empirical support as to why other fact-specific and individualized indicia of rehabilitation and success during reentry in a shorter timespan after conviction should not be given more weight by SBA and the lender than an arbitrary number of years after conviction; (c) SBA determined that a categorial ten-year bar would undermine SBA's ability, through this rulemaking, to honor and incorporate the statutory mandates of 15 U.S.C. 631 that recognize the importance of small business development in general as well as the responsibility to increase opportunities for certain groups that may not historically have had equitable opportunities for small business ownership; and (d) small business applicants commented, and SBA agrees, that this ten-year categorical bar would be overburdensome for compliance. Requiring an additional waiting period for loan eligibility delays access to capital.

(3) SBA should provide additional guidance to lenders, beyond the proposed rule, on how exclusions for criminal convictions may cause a broad disparate impact for persons of color. SBA considered but did not accept this request because the research and analysis proposed by the commenter goes beyond the scope of SBA's authority in this regulatory rulemaking. This final rule is limited to improving equitable access based on criminal background review of applicants seeking to participate in one or more of the programs addressed by this rule.

(4) SBA should develop and issue guidance on this final rule in order to provide clarity to lenders to ensure that they implement its provisions with fidelity. Although enforcement goes beyond the scope of this regulatory rulemaking, SBA will provide future guidance on compliance in Standard Operating Procedures and training by specific programs.

(5) The SBA should work with lenders to reassess their underwriting standards to mirror changes to proposed rule. SBA does not accept this request because SBA does not have authority to mandate changes to lenders' safeguards and standards, and lenders are not obligated to adopt the changes SBA proposed. Lenders' authority to set and implement safeguards and standards is

[4] Providing Another Chance: Resetting Recidivism Risk in Criminal Background Checks | RAND Bushway, Shawn D., Brian G. Vegetabile, Nidhi Kalra, Lee Remi, and Greg Baumann, Providing Another Chance: Resetting Recidivism Risk in Criminal Background Checks. Santa Monica, CA: RAND Corporation, 2022.

independent, which SBA recognizes and respects.

III. Section-by-Section Analysis

Section 109.400(b)(15) Eligible Small Business Concerns

The current § 109.400(b)(15) for the ILP Program states that ineligible businesses are those with an Associate who is currently incarcerated, on probation, on parole, or has been indicted but not convicted of a felony or crime of moral turpitude. SBA is revising this regulation to remove those barriers while maintaining the prohibition against only those businesses with an Associate who is currently incarcerated or who is indicted but not convicted of a felony or crime of moral turpitude. SBA considered removing the prohibitions related to Associates under indictment in the NPRM. However, upon reconsideration based on its evaluation of public and interagency comments, SBA has decided to retain the existing language related to indictments. This revision is therefore narrowly tailored to reduce barriers to access for qualified formerly incarcerated small business owners who may be eligible to receive a loan through the ILP Program from an existing Intermediary with remaining funds to lend. The proposed rule received a total of 17 public comments of which nine or 53 percent were in support, 5 or 29 percent were in support with modifications and 3 or 18 percent were neutral and did not comment this on proposed rule specifically. The summary overview explains why the modifications were not incorporated into the final rule. SBA is finalizing the rule as proposed while retaining current prohibitions against businesses with an Associate indicted for certain crimes.

Section 115.13(a)(2)(i) Eligibility of Principal

The current § 115.13(a)(2)(i) for the Surety Bond program states that ineligible businesses are those with a Principal who is under indictment but is not convicted, or has been previously convicted of a felony, or a final civil judgment has been entered stating that such Person has committed a breach of trust or has violated a law or regulation protecting the integrity of business transactions or business relationships. Through this final rule, SBA is removing those barriers while maintaining the prohibition against only those businesses with a Principal who is currently incarcerated or who is under indictment for a felony. SBA considered removing the prohibitions related to Principals under indictment in the NPRM. However, upon reconsideration based on its evaluation of public and interagency comments, SBA has decided to retain the existing language related to indictments. This revision is narrowly tailored to reduce barriers to access for qualified small business owners with certain criminal history records to compete for Federal and other contract opportunities by obtaining guarantees for surety bid and final payment and/or performance bonds. The proposed rule change received a total of 17 public comments of which 9 or 53 percent were in support, 5 or 29 percent supported with modification and 3 or 18 percent were neutral or did not comment on the proposed rule. The summary overview explains why the modifications were not incorporated into the final rule. SBA is finalizing the rule as proposed while retaining current prohibitions against businesses with an Associate indicted for certain crimes.

Section 120.110(n) What businesses are ineligible for SBA business loans?

The current § 120.110(n) for the 7(a), 504, and Microloan programs states that ineligible businesses are those with an Associate who is currently incarcerated, on probation, on parole, or is under indictment but not convicted for a felony or any crime involving or relating to financial misconduct or a false statement. Through this final rule, SBA is revising this regulation to address the challenges people on probation or on parole have accessing capital while maintaining the prohibition against businesses with an Associate who is currently incarcerated or who is under indictment for a felony or any crime involving or relating to financial misconduct or a false statement. SBA considered removing the prohibitions related to Associates under indictment in the NPRM. However, upon reconsideration based on its evaluation of public and interagency comments, SBA has decided to retain the existing language related to indictments. This revision is narrowly tailored to reduce barriers to access for qualified small business owners with certain criminal history records. Under 15 U.S.C. 636(a)(1)(B), the SBA may verify an applicant's criminal history background, but it does not require such verification, nor does it prohibit loans for people with criminal history records. Lenders, CDCs, and Microloan Intermediaries make risk-based lending decisions. SBA's final rule revision does not impact a Lender's, a CDC's or a Microloan Intermediary's ability to conduct a criminal history background check, in accordance with their own policies, provided they do so in a manner that complies with the Equal Credit Opportunity Act and other relevant laws and does not result in an unjustified discriminatory effect on a protected class group. Lenders can continue to deny loans, for example, where criminal history, when considered along with other information, presents an unacceptable credit risk. The proposed rule received a total of 17 public comments, of which 12 or 71 percent were in support, and 5 or 29 percent support with modifications. No commenters opposed. The summary overview explains why the modifications were not incorporated into the final rule SBA is finalizing the rule as proposed.

Section 120.707(a) What conditions apply to loans by Intermediaries to Microloan borrowers?

SBA proposed to revise § 120.707(a) to increase access to capital to businesses with an Associate who is on probation or parole for an offense involving fraud or dishonesty while maintaining the prohibition against a business with an Associate who is incarcerated. For public safety reasons, however, SBA will retain the prohibition against making a loan to a childcare business, where an Associate is on probation or parole for an offense against children. This change will closely align with the revised requirements for all business loan programs regarding the determination that an applicant with a Principal or Associate that is currently incarcerated is ineligible for assistance and support the flexibility and access to capital for qualified business owners with criminal history records. The proposed rule received a total of 17 public comments, of which 9 or 53 percent were in support, 5 or 29 percent were in support with modifications, 3 or 18 percent were neutral/did not comment and none were opposed. The summary overview explains why the modifications were not incorporated into the final rule. SBA is finalizing the rule as proposed.

Section 123.101(i) When am I not eligible for a home disaster loan?

The current § 123.101(i) for the Disaster Loan Program states that SBA considers ineligible any principal owners of the damaged property that are presently incarcerated, or on probation or parole following conviction for a serious criminal offense. In this final rule, SBA revises § 123.101(i) to state that the applicant is ineligible to receive a disaster loan when any principal owner of a home that sustained damage is currently incarcerated. The eligibility requirements in § 123.101 are cross

referenced in §§ 123.201 and 123.301; therefore, this final rule change will also apply to business property loans as well as economic injury loans. Notwithstanding SBA's final rule change, in accordance with statutory provisions that bar loans to those with certain convictions, SBA will maintain its existing prohibition where such prohibition is required by law. This final rule will align the requirements for all SBA loan programs regarding currently incarcerated applicants and support the flexibility and access to capital for qualified disaster survivors with criminal history records. The proposed rule received a total of 17 public comments, of which 9 or 53 percent were in support, 5 or 29 percent were in support with modifications, and 3 or 18 percent were neutral/did not comment. The summary overview explains why the modifications were not incorporated into the final rule. SBA is finalizing the rule as proposed.

Section 123.502(c) Under what circumstances is your business ineligible to be considered for a Military Reservist Economic Injury Disaster Loan?

The current § 123.502(c) for the Disaster Loan Program states that SBA considers ineligible any principal owners of the damaged property who are presently incarcerated, or on probation or parole following conviction for a serious criminal offense. In this final rule, SBA revises § 123.502(c) to state that for Military Reservist Economic Injury Disaster loans (MREIDL), the applicant is ineligible to receive a disaster loan when an Associate of a business that sustained damage is currently incarcerated. Notwithstanding SBA's final rule changes for disaster loans, in accordance with statutory provisions that bar loans to those with certain convictions, SBA will continue to consider as ineligible applicants whose eligibility is prohibited by law. This final rule change will align the requirements proposed for all SBA loan programs regarding individuals currently incarcerated and support the flexibility and access to capital for qualified small business owners with criminal history records. The proposed rule received a total of 17 public comments, of which 9 or 53 percent were in support, 5 or 29 percent were in support with modifications, 3 or 18 percent were neutral/did not comment and none were opposed. The summary overview explains why the modifications were not incorporated into the final rule. SBA is finalizing the rule as proposed.

Section 123.702(c)(1) and (2) What are the eligibility requirements for any IDAP loan?

The current § 123.702(c)(1) and (2) for IDAP loans state that SBA considers ineligible any applicant business that has an Associate that who is presently under indictment but not convicted, on parole or probation; charged with, arrested for, convicted, placed on pretrial diversion, and/or placed on any form of probation (including adjudication withheld pending probation) for any criminal offense other than a minor motor vehicle violation (including offenses which have been dismissed, discharged, or not prosecuted). In the final rule, SBA revises § 123.702(c)(1) and (2) to state that the applicant is ineligible to receive an IDAP loan when any principal owner of a home or business that sustained damage is currently incarcerated. SBA will continue to consider as ineligible applicants who are presently under indictment or whose eligibility is prohibited by law. SBA considered removing the prohibitions related to applicants under indictment in the NPRM. However, upon reconsideration based on its evaluation of public and interagency comments, SBA has decided to retain the existing language related to indictments.

Policy Discussion

In addition to applicants in all programs certifying to having no owners or Associates that are currently incarcerated, SBA will access certain external and widely acceptable and reliable databases to verify eligibility regarding incarceration and criminal history status. While the implementation of the final rule will expand access and thereby increase loan volume, SBA believes that these changes do not compromise the credit quality and performance of the loan portfolios. For example, the Microloan and Surety Bond Guaranty programs have permitted loans to businesses with individuals on parole or probation at no negative impact to overall program performance.

As published in June 2021, The RAND Research Brief[5] estimated that over 200,000 small businesses were affected or disqualified from participating in the Paycheck Protection Program (PPP) due to SBA's rules regarding current indictments and incarceration, and prior criminal convictions and criminal justice system involvement. Predictably, the survival rate of legitimate small businesses that did not receive assistance during the pandemic is lower than those that did receive support. There are several key distinctions between the PPP program and the SBA loan and surety programs at issue here. For example, PPP loans were forgivable while loans in the other SBA loan programs are not, and SBA has developed and implemented additional front-end detection protocols to strengthen program integrity since PPP. This RAND study is useful to highlight the number of otherwise qualified applicants who were ineligible to apply but required SBA assistance in order to survive.

Due to significant barriers to employment for individuals with criminal history records, self-employment and entrepreneurship are often vital avenues to successful reentry and employment. In fact, 28 percent of individuals with criminal history records are self-employed.[6] SBA's general and targeted loan programs should be a resource that provides options that support economic success and growth for individuals and communities, from basic self-employment to becoming employers within communities, and that support successful reentry outcomes, thereby strengthening public safety. Research is clear that reducing barriers to employment reduces recidivism and supports successful reentry, leading to better outcomes for individuals and communities[7]—all of which underscore the necessity for SBA to revisit and update these regulations to remove barriers to small-business employment and business ownership.

Under the final rule, for each program, SBA, Lenders, CDCs, Microloan Intermediaries, Sureties, and ILP Intermediaries, must consider the applicant business ineligible based on criminal history record when there is an Associate or Principal who is currently incarcerated or, depending on the program, under indictment.

SBA's final rule also streamlines SBA's lending criteria by reducing the number of factors that are required to be applied in determining eligibility based on criminal history records of small business owners. Lenders, CDCs, and Microloan Intermediaries make risk-based lending decisions as part of their

[5] The Prevalence of Criminal Records Among Small Business Owners | RAND *How Many Business Owners, Businesses, and Employees Are Affected by PPP Restrictions?*

[6] *https://onlinelibrary.wiley.com/doi/10.1002/pam.22438. Criminal Justice Involvement, Self-employment, and Barriers in Recent Public Policy. Journal of Policy Analysis and Management, 42*(1),11–4.

[7] Providing Another Chance: Resetting Recidivism Risk in Criminal Background Checks | RAND.

existing and continuing protocols. Some lenders include conducting criminal history background checks and others do not. SBA's final rule revision does not impact a Lender's, CDC's or Microloan Intermediary's authority or ability to continue to do so, in accordance with their own policies, provided that they do so in a manner that complies with the Equal Credit Opportunity Act and other relevant laws. This proposed rule received a total of 17 public comments, of which 9 or 53 percent were in support, 5 or 29 percent were in support with modifications, 3 or 18 percent were neutral or did not comment on this section and none were opposed. The summary overview explains why the modifications were not incorporated into the final rule. SBA is finalizing the rule as proposed.

IV. Severability

One comment recommended that SBA include in this rule an express provision addressing the effect of a judicial declaration of invalidity as to any section or portion of this rule or to parts 109, 115, 120 and 123. The question of severability addresses whether a judicial finding of a provision's invalidity should extend to other provisions or applications or whether it should be limited to the invalid provision or application, leaving in effect the remainder of the rule.

Like the entirety of parts 109, 115, 120 and 123, this rule seeks to implement, to the maximum extent possible, the stated congressional purposes of the Small Business Act and the Small Business Investment Act—*i.e.,* ''to . . . aid, counsel, assist, and protect, insofar as is possible, the interests of the small-business concerns in order to preserve free competitive enterprise'' and ''to foster economic development and to create or preserve job opportunities in both urban and rural areas by providing long-term financing for small business concerns.'' *See* 15 U.S.C. 631 and 695.

This rule includes numerous enhancements to the ILP Program, the Surety Bond Guaranty Program the Business Loan Programs, and the Disaster Loan Programs. The individual sections added or modified in this rule, and those which remain in parts 109, 115, 120 and 123 from prior rulemakings, shall operate independently in service of the stated congressional purposes and the objectives set forth above for this rule.

Accordingly, in the event that any portion or application of the rule is declared invalid or unenforceable as applied to any person or circumstance, SBA intends for the provision to be construed so as to continue to give the maximum effect to the provision permitted by law, including as applied to persons not similarly situated or to dissimilar circumstances, unless such holding is that the provision of these paragraph is invalid and unenforceable in all circumstances. Further, SBA intends that the various other provisions and applications of parts 109, 115, 120 and 123, including those added or modified in this rule, be severable from the unlawful portion, unless such declaration of invalidity renders another section or provision meaningless or deprives that other section or provision of its functionality though only in such circumstances. Moreover, such collateral invalidity is intended only to the extent required by logic or loss of functionality.

As an illustration, if a court were to find unlawful this rule's revisions to the criminal background provisions in the Business Loan Programs (§ 120.110), such finding would have no effect upon this rule's revisions to the criminal background provisions in the Intermediary Lending Pilot (§ 109.400), the Surety Bond Guarantee (§ 115.3) and the Disaster Loan (§§ 123.101, 123.502 and 123.702) Programs, or various other provisions which in no way are dependent upon the criminal background provisions. To further this illustration, if a court were to find unlawful this rule's revisions to the criminal background provisions in the Business Loan Programs (§ 120.110), such finding would have no effect upon any of the other provisions and applications of parts 109, 115, 120 and 123 (*e.g.,* Eligible uses of proceeds as set forth in 13 CFR 120.120). The foregoing are merely examples and do not express an intent that any other provision be considered non-severable. SBA reiterates that where any provision of this part is declared invalid, any collateral invalidity is intended to the least extent necessary, in order to advance program objectives to the maximum extent possible. Such provisions would help mitigate uncertainty that may result from future court decisions if a lawsuit occurs.

Compliance With Executive Orders 12866, 12988, 13132, and 13563, the Congressional Review Act (5 U.S.C. §§ 801–808), the Paperwork Reduction Act (44 U.S.C., Ch. 35), and the Regulatory Flexibility Act (5 U.S.C. §§ 601–612)

Executive Order 12866

The Office of Management and Budget has determined that this rule is a ''significant regulatory action'' under Executive Order 12866, as amended by Executive Order 14094. SBA included in the proposed rule and presents in the final rule a Regulatory Impact Analysis for the public's information in the next section. Each section begins with a core question.

A. Regulatory Objective of the Proposal

Is there a need for this regulatory action?

In accordance with statutory mandates of 15 U.S.C. 631(a), 636(a)(1)(B), 636(b)(1)(A), 636(l), 636(m), 694(b), and 695, the Agency believes it needs to reduce regulatory restrictions for applicants with Associates or Principals based on criminal histories for the SBA Disaster, 7(a), 504, Microloan, ILP and Surety Bond Guaranty programs by reducing the requirement for criminal history records consideration to only applicants with a Principal or Associate currently incarcerated or, depending on the program, under indictment, in the manner proposed above. Many formerly incarcerated persons experience significant barriers in accessing employment and capital and credit often necessary to start a business. The revisions in SBA's final rule will remove barriers to access capital and employment for qualified applicants. SBA will reduce the administrative burden on applicants as well as the need for fingerprints by providing a single succinct directive that SBA determines any applicant with a Principal or Associate that is currently incarcerated or, depending on the program, under indictment, to be ineligible with no further requirements for disclosure of prior criminal history records.

B. Benefits and Costs of the Rule

What are the potential benefits and costs of this regulatory action?

SBA does not anticipate significant additional costs or impact on the subsidy to operate the 7(a), 504, Microloan, ILP, Surety Bond Guaranty and Disaster Loan Programs under these proposed regulations because all loans submitted must always meet Loan Program Requirements. In general, the final rule benefits otherwise qualified entrepreneurs who would not otherwise be eligible to apply for these programs due to outdated restrictions that were not evidence-informed, and therefore it strengthens our economy and our public safety.

SBA does not receive information from lenders on how many applicants they decline for 7(a), 504, and Microloans. SBA has received substantial feedback and research from

stakeholders that its current rules have presented broad barriers to otherwise qualified individuals with criminal history records that seek financing to start, run, or expand small businesses. This final rule aligns with the statutory mandates in 15 U.S.C. 631 and supports the inference that reducing or removing barriers will result in additional applications from those otherwise qualified small business owners with criminal history records who may have been deterred from applying due to the current prohibitions related to criminal history records.

In the 7(a) and 504 programs, for formerly incarcerated individuals and people not on parole or probation, out of more than 50,000 loans made annually, SBA lenders have submitted to SBA for review approximately 586 Character determination requests containing information on criminal history records involving felonies. SBA declines on average only 17–23 of the requests per year due to the nature of the offense or incomplete judicial records. SBA's Disaster Loan Program has declined 93 individuals for criminal history record background checks between 2018 and 2022, with an additional 1,026 files withdrawn by applicants prior to review during the same period. Microloan Intermediaries do not submit loans to SBA for approval, so SBA does not have data for criminal history records of Microloan applicants. SBA's final rule provides clarity for borrowers who might have otherwise withdrawn their application based on eligibility concerns. Finally, Lenders, CDCs, and Microloan Intermediaries make risk-based lending decisions. The statistics above do not account for any checks conducted by lenders or any resultant applications being withdrawn. Some lenders include conducting criminal history background checks and others do not. SBA's proposed revision does not impact a lender's ability to continue to do so, in accordance with their own policies, provided that they do so in a manner that complies with the Equal Credit Opportunity Act and other relevant laws.

C. Alternatives

What alternatives have been considered?

SBA considered the impact of maintaining the current rules that deem as ineligible businesses with Principals or Associates currently incarcerated, on parole or probation or convicted of certain financial and other crimes. This would result in continuing barriers for small businesses owned by individuals with criminal history records. Instead, SBA's final rule balances that concern against the risk to SBA of making guarantees and loans to businesses whose Principals or Associates lack the ability to manage and execute day-to-day business operations due to their current incarceration. SBA's final rule also supports disaster survivors during recovery with increased equal access to capital.

Congressional Review Act

The Office of Management and Budget's (OMB) Office of Information and Regulatory Affairs has determined that this rule is not a major rule under Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act), 5 U.S.C. 804(2). The annual effect on the economy is less than $100 million.

Executive Order 12988

This action meets applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden. The action does not have preemptive effect or retroactive effect.

Executive Order 13132

This final rule does not have federalism implications as defined in Executive Order 13132. It will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in the Executive order. As such it does not warrant the preparation of a Federalism Assessment.

Executive Order 13563

A description of the need for this regulatory action and benefits and costs associated with this action, including possible distributional impacts that relate to Executive Order 13563, are included above in the Regulatory Impact Analysis under Executive Order 12866.

Paperwork Reduction Act, 44 U.S.C. Ch. 35

SBA has determined that this final rule would require that the following forms be revised: SBA Form 1919, ''Borrower Information Form,'' SBA Form 1244, ''Application for Section 504 Loans,'' SBA Form 5, ''Disaster Business Loan Application,'' SBA Form 5C, ''Disaster Home/Sole Proprietor Loan Application,'' and SBA Form 994, ''Application for Surety Bond Guarantee Assistance''.

SBA Form 1919 is approved under OMB Control number 3245–0348. SBA Form 1244 is approved under OMB Control number 3245–0071. SBA Form 5 is approved under OMB Control number 3245–0017 and SBA Form 5C is approved under OMB Control number 3245–0018. SBA Form 994 is approved under OMB Control number 3245–0007.

SBA will revise SBA Form 1919, and SBA Form 1244 to conform to the eligibility change at 13 CFR 120.110(n). When small businesses apply for 7(a) or 504 loans, the estimated hour burden for applicants and lenders will decrease because the criminal history analysis and collection of data will no longer be required.

SBA will revise SBA Form 5 and 5C to conform to the eligibility change at 13 CFR 123.101(i). When disaster survivors apply for disaster loans, the estimated hour burden for applicants will decrease because the criminal history record analysis and collection of data will be reduced.

SBA will revise SBA Form 994 to conform to the eligibility change at 13 CFR 115. 13(a)(2)(i). When small businesses apply for surety bond guarantees, the estimated hour burden for applicants will decrease because the criminal history record analysis and collection of data will no longer be required.

Regulatory Flexibility Act, 5 U.S.C. 601–612

When an agency issues a rulemaking, the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612, requires the agency to ''prepare and make available for public comment an initial regulatory analysis'' which will ''describe the impact of the proposed rule on small entities.'' Although the rulemaking may potentially impact a small percentage of loans reviewed by 7(a) Lenders, CDCs, Microloan Intermediaries, ILP Intermediaries, the 44 Sureties that participate in the Surety Bond Guaranty Program, and SBA regarding the disaster loans, SBA does not believe the impact will be significant because this rule streamlines regulatory burdens. However, there may be impacts due to increased loans for businesses with Principals or Associates that have a criminal history record but are not currently incarcerated or under indictment.

SBA reviews approximately 586 Character determination requests annually and declines 3 or 4 percent, or 17 to 23 requests, due to the nature of the offense or incomplete judicial records. The revisions to § 120.110(n) will eliminate the need for 100 percent of these character determination

reviews. SBA Form 1919, ''SBA 7a Borrower Information Form,'' is the application form for the 7(a) Loan Program. SBA Form 1244, ''Application for Section 504 Loans,'' is the application form for the 504 Loan Program. Each application includes 3 questions that Associates of the applicant must answer regarding their criminal history records. Under the final rule revisions, SBA will eliminate the three current questions and replace them with one new question regarding incarceration or being under indictment. SBA estimates that all applicants for the 7(a) Loan Program and 504 Loan Program will save 5 minutes completing the applications due to these revisions. Intermediaries for the Microloan Program use their own applications for Microloan borrowers, but it is reasonable to assume similar time savings. The 7(a) Loan Program, 504 Loan Program, and Microloan Program make approximately 68,677 loans per year. Saving 5 minutes for each application will result in total time savings of 5,723 hours annually.

List of Subjects

13 CFR Part 109

Community development, Loan programs-business, Reporting and recordkeeping requirements, Small businesses.

13 CFR Part 115

Claims, Reporting and recordkeeping requirements, Small businesses, Surety bonds.

13 CFR Part 120

Community development, Loan programs-business, Reporting and recordkeeping requirements, Small businesses.

13 CFR Part 123

Disaster assistance, Loan programs-business, Reporting and recordkeeping requirements, Small businesses.

For the reasons stated in the preamble, SBA amends 13 CFR parts 109, 115, 120 and 123 as follows:

PART 109—INTERMEDIARY LENDING PILOT PROGRAM

■ 1. The authority citation for 13 CFR part 109 continues to read as follows:

Authority: 15 U.S.C. 634(b)(6), (b)(7), and 636(l).

■ 2. Add § 109.15 to read as follows:

§ 109.15 Severability.

Any provision of this part held to be invalid or unenforceable as applied to any person, entity, or circumstance shall be construed so as to continue to give the maximum effect to such provision as permitted by law, including as applied to persons or entities not similarly situated or to dissimilar circumstances, unless such holding is that the provision of this part is invalid and unenforceable in all circumstances, in which event the provision shall be severable from the remainder of this part and shall not affect the remainder thereof.

■ 3. Amend § 109.400 by revising paragraph (b)(15) to read as follows:

§ 109.400 Eligible Small Business Concerns.

* * * * *

(b) * * *

(15) Businesses with an Associate who is currently incarcerated, serving a sentence of imprisonment imposed upon adjudication of guilty, or is under indictment for a felony or a crime of moral turpitude;

* * * * *

PART 115—SURETY BOND GUARANTEE

■ 4. The authority citation for 13 CFR part 115 continues to read as follows:

Authority: 5 U.S.C. app 3; 15 U.S.C. 636i, 687b, 687c, 694a, and 694b note.

■ 5. Add § 115.3 to read as follows:

§ 115.3 Severability.

Any provision of this part held to be invalid or unenforceable as applied to any person, entity, or circumstance shall be construed so as to continue to give the maximum effect to such provision as permitted by law, including as applied to persons or entities not similarly situated or to dissimilar circumstances, unless such holding is that the provision of this part is invalid and unenforceable in all circumstances, in which event the provision shall be severable from the remainder of this part and shall not affect the remainder thereof.

■ 6. Amend § 115.13 by revising paragraph (a)(2)(i) to read as follows:

§ 115.13 Eligibility of Principal.

(a) * * *

(2) * * *

(i) The Person is currently incarcerated, serving a sentence of imprisonment imposed upon adjudication of guilty, or under indictment for a felony; or

* * * * *

PART 120—BUSINESS LOANS

■ 7. The authority citation for 13 CFR part 120 continues to read as follows:

Authority: 15 U.S.C. 634(b)(6), (b)(7), (b)(14), (h), and note, 636(a), (h) and (m), 650, 687(f), 696(3) and (7), and 697(a) and (e); sec. 521, Pub. L. 114–113, 129 Stat. 2242; sec. 328(a), Pub. L. 116–260, 134 Stat. 1182.

■ 8. Add § 120.4 to read as follows:

§ 120.4 Severability.

Any provision of this part held to be invalid or unenforceable as applied to any person, entity, or circumstance shall be construed so as to continue to give the maximum effect to such provision as permitted by law, including as applied to persons or entities not similarly situated or to dissimilar circumstances, unless such holding is that the provision of this part is invalid and unenforceable in all circumstances, in which event the provision shall be severable from the remainder of this part and shall not affect the remainder thereof.

■ 9. Amend § 120.110 by revising paragraph (n) to read as follows:

§ 120.110 What businesses are ineligible for SBA business loans?

* * * * *

(n) Businesses with an Associate who is currently incarcerated, serving a sentence of imprisonment imposed upon adjudication of guilty, or is under indictment for a felony or any crime involving or relating to financial misconduct or a false statement;

* * * * *

■ 10. Amend § 120.707 by revising paragraph (a) to read as follows:

§ 120.707 What conditions apply to loans by Intermediaries to Microloan borrowers?

(a) *General.* Except as otherwise provided in this paragraph (a), an Intermediary may only make Microloans to small businesses eligible to receive financial assistance under this part. A borrower may also use Microloan proceeds to establish a nonprofit childcare business. An Intermediary may not make Microloans to businesses with an Associate who is currently incarcerated, serving a sentence of imprisonment imposed upon adjudication of guilty, or to childcare businesses with an Associate who is currently on probation or parole for an offense against children. Proceeds from Microloans may be used only for working capital and acquisition of materials, supplies, furniture, fixtures, and equipment. SBA does not review Microloans for creditworthiness.

* * * * *

PART 123—DISASTER LOAN PROGRAM

■ 11. The authority citation for 13 CFR part 123 continues to read as follows:

Authority: 15 U.S.C. 632, 634(b)(6), 636(b), 636(d), 657n, and 9009.

■ 12. Add § 123.22 to read as follows:

§ 123.22 Severability.

Any provision of this part held to be invalid or unenforceable as applied to any person, entity, or circumstance shall be construed so as to continue to give the maximum effect to such provision as permitted by law, including as applied to persons or entities not similarly situated or to dissimilar circumstances, unless such holding is that the provision of this part is invalid and unenforceable in all circumstances, in which event the provision shall be severable from the remainder of this part and shall not affect the remainder thereof.

■ 13. Amend § 123.101 by revising paragraph (i) to read as follows:

§ 123.101 When am I not eligible for a home disaster loan?

* * * * *

(i) You or other principal owners of the damaged property are currently incarcerated, serving a sentence of imprisonment imposed upon adjudication of guilty;

* * * * *

■ 14. Amend § 123.502 by revising paragraph (c) to read as follows:

§ 123.502 Under what circumstances is your business ineligible to be considered for a Military Reservist Economic Injury Disaster Loan?

* * * * *

(c) Any of your business' principal owners is currently incarcerated, serving a sentence of imprisonment imposed upon adjudication of guilty;

* * * * *

■ 15. Amend § 123.702 by:

■ a. Revising paragraph (c)(1);

■ b. Removing paragraph (c)(2); and

■ c. Redesignating paragraphs (c)(3) through (5) as paragraphs (c)(2) through (4).

The revision read as follows:

§ 123.702 What are the eligibility requirements for an IDAP loan?

* * * * *

(c) * * *

(1) is currently incarcerated, serving a sentence of imprisonment imposed upon adjudication of guilty, or is presently under indictment;

* * * * *

Isabella Casillas Guzman,

Administrator.

[FR Doc. 2024–09009 Filed 4–29–24; 8:45 am]

BILLING CODE 8026–09–P

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1461

[Docket No. CPSC–2022–0017]

Portable Fuel Container Safety Act Regulation

AGENCY: Consumer Product Safety Commission.

ACTION: Direct final rule.

SUMMARY: In August 2023, the Consumer Product Safety Commission (CPSC or Commission) accepted ASTM F3429/F3429M–23 for prefilled portable fuel containers as the mandatory standard under the Portable Fuel Container Safety Act of 2020 (PFCSA). In January 2024, ASTM notified the Commission that ASTM F3429/F3429M–23 had been revised. The Commission has evaluated revised ASTM F3429/F3429M–24 and finds that the revisions to the standard carry out the purposes of the PFCSA. Accordingly, ASTM F3429/F3429M–24 will be incorporated into the mandatory standard for portable fuel containers.

DATES: The rule is effective on July 27, 2024, unless CPSC receives a significant adverse comment by May 30, 2024. If CPSC receives such a comment, it will publish a notice in the **Federal Register** withdrawing this direct final rule before its effective date. The incorporation by reference of the publication listed in this rule is approved by the Director of the Federal Register as of July 27, 2024.

ADDRESSES: You can submit comments, identified by Docket No. CPSC–2022–0017, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: *www.regulations.gov.* Follow the instructions for submitting comments. Do not submit through this website: confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. CPSC typically does not accept comments submitted by email, except as described below.

Mail/Hand Delivery/Courier/Confidential Written Submissions: CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal. You may, however, submit comments by mail, hand delivery, or courier to: Office of the Secretary, Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone: (301) 504–7479. If you wish to submit confidential business information, trade secret information, or other sensitive or protected information that you do not want available to the public, you may submit such comments by mail, hand delivery, courier, or you may email them to: *cpsc-os@cpsc.gov.*

Instructions: All submissions must include the agency name and docket number. CPSC may post all comments without change, including any personal identifiers, contact information, or other personal information provided, to: *www.regulations.gov.* Do not submit to this website: confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. If you wish to submit such information, please submit it according to the instructions for mail/hand delivery/courier/confidential written submissions.

Docket: For access to the docket to read background documents or comments received, go to: *www.regulations.gov,* and insert the docket number, CPSC–2022–0017, into the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Will Cusey, Small Business Ombudsman, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone (301) 504–7945 or (888) 531–9070; email: *sbo@cpsc.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The PFCSA [1] requires the Commission to promulgate a final rule to require flame mitigation devices (FMDs) in portable fuel containers that impede the propagation of flame into the container. 15 U.S.C. 2056d(b)(1)–(2). However, the Commission is not required to promulgate a final rule for a class of portable fuel containers within the scope of the PFCSA if the Commission determines that:

- there is a voluntary standard for flame mitigation devices for those containers that impedes the propagation of flame into the container;

[1] Portable Fuel Container Safety Act of 2020, codified at 15 U.S.C. 2056d, as stated Public Law 116–260, div. FF, title IX, section 901, available at: *www.govinfo.gov/content/pkg/PLAW-116publ260/pdf/PLAW-116publ260.pdf.*

• the voluntary standard is or will be in effect not later than 18 months after the date of enactment of the PFCSA; and

• the voluntary standard is developed by ASTM International or such other standard development organization that the Commission determines to have met the intent of the PFCSA.

15 U.S.C. 2056d(b)(3)(A).

If the Commission determines that any voluntary standard meets these requirements, it must publish the determination in the **Federal Register**, and the requirements of such a voluntary standard ''shall be treated as a consumer product safety rule.'' 15 U.S.C. 2056d(b)(4). Under this authority, on January 13, 2023, the Commission published a notice determining that three voluntary standards for portable fuel containers meet the requirements of the PFCSA and would be treated as consumer product safety rules: ASTM F3429/F3429M–20 (pre-filled containers); ASTM F3326–21 (containers sold empty); and section 18 of UL 30:2022 (safety cans). 88 FR 2206.

Portable fuel containers sold pre-filled are within the scope of ASTM F3429/F3429M, *Standard Specification for Performance of Flame Mitigation Devices Installed in Disposable and Pre-Filled Flammable Liquid Containers.* ASTM lists the standard as a dual standard in inch-pound units (F3429 designation) and metric units (F3429M designation). ASTM F3429/F3429M was first published in 2020. ASTM published a revised version of ASTM F3429/F3429M–23 in May 2023, as ASTM F3429/F3429M–23. On August 22, 2023, the Commission determined that the 2023 revisions met the requirements of section 2056d(b)(3)(A) of the PFCSA.[2] Accordingly, ASTM F3429/F3429M–23 is the current mandatory consumer product safety rule for pre-filled-portable fuel containers. On October 31, 2023, the Commission published a direct final rule creating 16 CFR part 1461 for portable fuel containers to incorporate by reference the revised ASTM F3429/F3429M–23, as well as ASTM F3326–21 and section 18 of UL 30:2022. 88 FR 74342.

Under section (b)(5) of the PFCSA, if the requirements of a voluntary standard that meet the requirements of section (b)(3) are subsequently revised, the organization that revised the standard shall notify the Commission after the final approval of the revision. 15 U.S.C. 2056d(b)(5)(A). Any such revision to the voluntary standard shall become enforceable as the new consumer product safety rule not later than 180 days after the Commission is notified of a revised voluntary standard that meets the conditions of section (b)(3) (or such later date as the Commission determines appropriate), unless the Commission determines, within 90 days after receiving the notification, that the revised voluntary standard does not meet the requirements described in section (b)(3) of the PFCSA. 15 U.S.C. 2056d(b)(5)(B).

On January 29, 2024, ASTM notified the Commission that it has revised ASTM F3429/F3429M–23 with the publication of ASTM F3429/F3429M–24. On February 9, 2024, the Commission published a notice of availability and request for comment regarding ASTM F3429/F3429M–24. 89 FR 9078. The Prefilled Fuel Container Industry Association and the Household & Commercial Products Association submitted comments in support of the revisions in ASTM F3429/F3429M–24. Both commenters noted that the various revisions to the standard are important revisions that will improve consumer safety, and thus they support the Commission adopting ASTM F3429/F3429M–24 as the mandatory standard for prefilled portable fuel containers.

As discussed in section II of this preamble, the Commission determines that the revisions in ASTM F3429/F3429M–24 meet the requirements of section 2056d(b)(3)(A) of the PFCSA. 15 U.S.C. 2056d(b)(3)(A). Accordingly, ASTM F3429/F3429M–24 shall be treated as a consumer product safety rule promulgated under section 9 of the Consumer Product Safety Act (CPSA) effective July 27, 2024, which is 180 days after ASTM's notification. This direct final rule[3] updates the incorporation by reference in the Commission's rule under the PFCSA to reflect ASTM F3429/F3429M–24 as the mandatory standard for prefilled portable fuel containers.

II. Revisions to ASTM F3429/F3429M

ASTM F3429/F3429M–23 is the current mandatory standard for prefilled portable fuel containers under the PFCSA and has been revised twice since the original publication in 2020. The ASTM F15.72 subcommittee for Pre-Filled Containers of Flammable and Combustible Liquids developed the standard. The standard requires two performance tests of the container's FMD. The first is an endurance test, in which the container is subjected to an external and stationary 2.5-inch flame at the mouth of the container for 30 seconds. The second test is a flashback test, in which the container is subjected to an external flash fire near the container's mouth. The container passes each test if the contents of the container do not catch fire or otherwise ignite in each of five consecutive trials. The two tests determine whether the FMD impedes the propagation of two different types of ignition sources, a stationary flame and a moving flame.

Substantive revisions in ASTM F3429/F3429M–24 are described below and include an FMD retention test, a new option for some rigid containers to test using a different test gas, clarification of the requirements for certifying a ''family of containers,'' and clarification of existing testing procedures. There are also non-substantive revisions. As discussed below, the Commission concludes that the revisions in ASTM F3429/F3429M–24 meet the requirements of section 2056d(b)(3)(A) of the PFCSA. Thus, the Commission is allowing ASTM F3429/F3429M–24 to become the mandatory consumer product safety rule for pre-filled portable fuel containers pursuant to section 2056d(b)(5) of the PFCSA.

A. Substantive Revisions to ASTM F3429/F3429M

1. New Retention Test

ASTM F3429/F3429M–24 adds a new retention requirement to section 5.6 and a new retention test method as section 11. The new retention requirement and test ensures that an FMD installed in a prefilled portable fuel container is not easily removed by the consumer. The new retention test requires the FMD to resist a 15-lb push force, a 15-lb pull force, and a 25 in-lb torque in each direction. This revision improves safety because it reduces the likelihood that consumers will remove FMDs installed in prefilled portable fuel containers. The Commission therefore concludes that these revisions to the voluntary standard satisfy the requirements of section 2056d(b)(3)(A) of the PFCSA.

2. Change to Permissible Test Gas

ASTM F3429/F3429M–24 revises requirements in section 5.2 for adjusting the gas flow calculation procedures in sections 7.3 and 7.5.2, and it adds a new squeeze test method as section 12 to the standard to permit some rigid containers to be tested with propane or ethane as acceptable test gases in addition to ethylene. Sections 5.2 and 7 detail how the gas flow is calculated; sections 5.2, 7.3, and 7.5.2 add calculation values for propane and ethylene; and section 7.5.2

[2] The Record of Commission Action is available here: *www.cpsc.gov/s3fs-public/RCAASTMsRevisedStandardforPrefilledContainersandDirectFinalRuleUnderthePortableFuelContainerSafetyActof2020.pdf?VersionId=2bvaQho_RlirJo.xyAFUZXyFS2.7Qw7R.*

[3] The Commission voted 5–0 to publish this notification.

also corrects a mathematical error with the ethylene value given.

For a container to be tested with propane or ethane, it must: (1) be determined to be rigid or not squeezable by the new squeezing test method (section 12); and (2) the liquid fuel within the container must have a Maximum Experimental Safe Gap (MESG) [4] above a prescribed value respective of the test gas MESG. This revision allows use of a larger mesh-size FMD for such rigid containers which still provides sufficient protection for these rigid containers while also preventing splashing problems and reducing the likelihood of consumers removing the FMD to achieve better fuel flow. Manufacturers reported that focus-group testing indicated that consumers were likely to try to remove or alter the FMD if the flow of liquid contents was not smooth. In non-rigid containers, consumers can squeeze the container to help dispense the liquid contents, but consumers cannot do this with rigid containers. Testing with propane or ethane results in slightly larger hole sizes in the FMD that allows the liquid contents to better pour from a container that cannot be squeezed, and therefore, reduces the likelihood of consumers trying to remove the FMD. This revision improves safety by reducing the likelihood of consumers removing safety features, while ensuring that the safety features still provide the necessary protection. The Commission therefore concludes that these revisions to the voluntary standard satisfy the requirements of section 2056d(b)(3)(A) of the PFCSA.

3. Family of Container Clarification

ASTM F3429/F3429M–24 clarifies the requirements of section 5.8 for certifying a container with the same FMD as another compliant container. ASTM F3429/F3429M–23 does not provide any requirements, guidance, or information regarding the construction of the two containers. In ASTM F3429/F3429M–24, a statement was added to section 5.8 explaining that the different containers must be ''made from similar material with a similar wall thickness.'' This revision ensures that a container using the same FMD as another but not made from the same material and similar wall thickness requires its own certification test. The change in section 5.8 allows a manufacturer to certify a family of containers with similar designs and wall thicknesses and only variations in sizes with a single certification test but does not allow a manufacturer to certify any container that shares the same FMD with another container certified to F3429–24. This change improves safety by ensuring that FMDs are not accepted when tested on dissimilar containers. The Commission therefore concludes that these changes to the voluntary standard satisfy the requirements of section 2056d(b)(3)(A) of the PFCSA.

4. Revisions to Testing Procedures

ASTM F3429/F3429M–24 revises three test procedures from the 2023 edition of the standard. The first revision applies to the procedures for sample preparation in section 6.1.1.5, clarifying that if the bottom portion of the container is removed for testing, then the FMD and the portion of the container or closure the FMD attaches to shall remain intact.

The second revision to the test procedure is found in a new section 7.5.5 for gas flow calculations under section 7 which clarifies the procedure for flowing gaseous fuel and air into the container. ASTM F3429/F3429M–23 allowed for an increased flow rate of gaseous fuel and air to establish the correct gaseous fuel and air ratio in the container before the test but did not specify when to reduce the flow. The revised standard requires the flow to be reduced 30 seconds before the test starts. This revision ensures the pilot flame outside the container mouth is not affected by an increased outflow used to prepare the container before testing and thus improves consistency in testing from one testing laboratory to another.

The third test procedure revisions are in the endurance test method in section 8 and the flashback test method in section 9, which makes the test procedures in the two test methods consistent with each other. ASTM F3429/F3429M–23 allows the flow rate to be increased in the flashback test but did not include that provision for the endurance test. This change in section 9.4.5.1 of ASTM F3429/F3429M–24 allows the flow rate of gaseous fuel and air to be increased in the endurance test too. As with the endurance test, section 9.4.7 specifies that the flow must be reduced 30 seconds prior to the start of the test. This revision improves the efficiency of the testing laboratory by removing the possibility of testing laboratories confusing inconsistent procedures for the two test methods.

The Commission concludes that these revisions improve safety by facilitating reliable compliance testing.

B. Non-Mandatory Changes to the Standard

The revised standard also made several changes to the non-mandatory sections of the standard, such as adding a reference to new appendix information in the scope, adding a discussion to the definition of FMD, indicating that a FMD may be an assembly comprised of several components, removing the term ''reserved'' from the functional test, and adding information that a functional test is not required, but best practices are included in the appendix. ASTM F3429–23 did not include a functional test but left a ''reserved'' section as a future possible requirement with non-mandatory practices in the appendix. This ''reserved'' section confused users of the standard, and this change removes the possibility for such confusion. The Commission concludes that with these non-substantive changes, the standard still satisfies the requirements of section 2056d(b)(3)(A) of the PFCSA.

Sections 1461.3(a) and 1461.4(a)(2) have been amended to incorporate by reference ASTM F3429/F3429M–24 as the new mandatory standard for prefilled portable fuel containers to reflect the Commission's acceptance of revised ASTM F3429/F3429M–24 under the PFCSA.

III. Direct Final Rule Process

The Commission is issuing this rule as a direct final rule. Although the Administrative Procedure Act (APA; 5 U.S.C. 551–559) generally requires agencies to provide notice of a rule and an opportunity for interested parties to comment on it, section 553 of the APA provides an exception when the agency ''for good cause finds'' that notice and comment are ''impracticable, unnecessary, or contrary to the public interest.'' *Id.* 553(b)(B).

The purpose of this direct final rule is to codify in the Code of Federal Regulations (CFR) revised ASTM F3429/F3429M–24 as a mandatory consumer product safety rule. Because the Commission has determined that this revision meets the requirements of the PFCSA, it becomes effective by operation of law under the PFCSA 180 days after the Commission was notified of the revision. 15 U.S.C. 2056d(b)(5). Public comments would not alter whether ASTM F3429/F3429M–24 is considered a mandatory consumer product safety rule under the PFCSA. The Commission concludes that when it merely updates the codification of the incorporation by reference for a voluntary standard that is already a

[4] MESG is a standardized measurement of how easily a gas flame will pass through a narrow gap bordered by heat-absorbing metal. MESG is used to classify gaseous in a variety of applications where explosion protection is required.

mandatory consumer product safety rule by statute under the PFCSA, notice and comment are unnecessary.

In its Recommendation 95–4, the Administrative Conference of the United States (ACUS) endorses direct final rulemaking as an appropriate procedure to expedite rules that are noncontroversial and not expected to generate significant adverse comments. *See* 60 FR 43108 (Aug. 18, 1995). ACUS recommends that agencies use the direct final rule process when they act under the ''unnecessary'' prong of the good cause exemption in 5 U.S.C. 553(b)(3)(B). Consistent with the ACUS recommendation, the Commission is publishing this rule as a direct final rule, because CPSC does not expect any significant adverse comments.

Unless CPSC receives a significant adverse comment by May 30, 2024, this rule will become effective on July 27, 2024—the end of the 180-day period specified in the PFCSA. In accordance with ACUS's recommendation, the Commission considers a significant adverse comment to be ''one where the commenter explains why the rule would be inappropriate,'' including an assertion challenging ''the rule's underlying premise or approach,'' or a claim that the rule ''would be ineffective or unacceptable without a change.'' 60 FR 43108, 43111 (Aug. 18, 1995). As noted, this rule merely codifies ASTM F3429/F3429M–24 in the CFR as the mandatory consumer product safety rule under the PFCSA; thus, public comments would not change that circumstance.

If the Commission does receive a significant adverse comment, the Commission will withdraw this direct final rule. Depending on the comment and other circumstances, the Commission may then incorporate the adverse comment into a subsequent direct final rule or publish a notice of proposed rulemaking, providing an opportunity for public comment.

IV. Incorporation by Reference

Section 1461.4(a)(2) of the direct final rule incorporates by reference ASTM F3429/F3429M–24. The Office of the Federal Register (OFR) has regulations regarding incorporation by reference. 1 CFR part 51. Under these regulations, agencies must discuss in the preamble to a final rule, ways in which the material the agency incorporates by reference is reasonably available to interested parties and how interested parties can obtain the material. In addition, the preamble to the final rule must summarize the material. 1 CFR 51.5(b).

In accordance with the OFR regulations, section II of this preamble summarizes the major provisions of ASTM F3429/F3429M–24 that the Commission incorporates by reference into 16 CFR part 1461. The standard is reasonably available to interested parties. Until the direct final rule takes effect, a read-only copy of ASTM F3429/F3429M–24 is available for viewing, at no cost, on ASTM's website at: *www.astm.org/CPSC.htm.* Once the rule takes effect, a read-only copy of ASTM F3429/F3429M–24 will be available for viewing, at no cost, on the ASTM website at: *www.astm.org/READINGLIBRARY/.* Interested parties can purchase a copy of ASTM F3429/F3429M–24 from ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, PA 19428–2959 USA; telephone: (610) 832–9500; *www.astm.org.*

Interested parties can also schedule an appointment to inspect a copy of ASTM F3429/F3429M–24 at CPSC's Office of the Secretary, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814, telephone: (301) 504–7479; email: *cpsc-os@cpsc.gov.*

V. Effective Date

Section 2056d(b)(5)(B) of the PFCSA provides that not later than 180 days after the Commission is notified of a revised voluntary standard (or such later date as the Commission determines appropriate), such revised voluntary standard shall become enforceable as a consumer product safety rule promulgated under 15 U.S.C. 2058, in place of the prior version, unless within 90 days after receiving the notice the Commission determines that the revised voluntary standard does not meet the requirements in section 2056d(b)(3)(A) of the PFCSA. 15 U.S.C. 2056d(b)(5)(B). Unless the Commission receives a significant adverse comment by May 30, 2024, the rule will become effective on July 27, 2024. This direct final rule's effective date of July 27, 2024, which is the effective date of the ASTM F3429/F3429M–24 revision as a mandatory safety standard, does not alter the previously established effective date of July 12, 2023, for ASTM F3326–21 and section 18 of UL 30:2022 under the PFCSA. Products subject to the requirements of those standards are already required to meet those standards.

VI. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA; 5 U.S.C. 601–612) generally requires agencies to review proposed and final rules for their potential economic impact on small entities, including small businesses, and prepare regulatory flexibility analyses. 5 U.S.C. 603, 604. The RFA applies to any rule that is subject to notice and comment procedures under section 553 of the APA. *Id.* As discussed in section III of this preamble, the Commission has determined that notice and the opportunity to comment are unnecessary for this rule. Therefore, the RFA does not apply. CPSC also notes the limited nature of this document, which merely updates the incorporation by reference for ASTM F3429/F3429M in the CFR to reflect ASTM F3429/F3429M–24 as the mandatory standard for prefilled containers under the PFCSA.

VII. Environmental Considerations

The Commission's regulations provide a categorical exclusion for the Commission's rules from any requirement to prepare an environmental assessment or an environmental impact statement where they ''have little or no potential for affecting the human environment.'' 16 CFR 1021.5(c). This rule falls within the categorical exclusion, so no environmental assessment or environmental impact statement is required.

VIII. Preemption

Section 26(a) of the CPSA provides that where a consumer product safety standard is in effect and applies to a product, no state or political subdivision of a state may either establish or continue in effect a requirement dealing with the same risk of injury unless the state requirement is identical to the federal standard. 15 U.S.C. 2075(a). Section 26(c) of the CPSA also provides that states or political subdivisions of states may apply to CPSC for an exemption from this preemption under certain circumstances. 15 U.S.C. 2075(c). The PFCSA deems rules issued under that statute to be a ''consumer product safety rule.'' Therefore, once a rule issued under the PFCSA takes effect, it will preempt in accordance with section 26(a) of the CPSA.

IX. Congressional Review Act

The Congressional Review Act (CRA; 5 U.S.C. 801–808) states that before a rule can take effect, the agency issuing the rule must submit the rule and certain related information, to each House of Congress and the Comptroller General. 5 U.S.C. 801(a)(1). The CRA submission must indicate whether the rule is a ''major rule.'' The CRA states that the Office of Information and

Regulatory Affairs (OIRA) determines whether a rule qualifies as a ''major rule.''

Pursuant to the CRA, OIRA has determined that the rule does not qualify as a ''major rule,'' as defined in 5 U.S.C. 804(2). To comply with the CRA, CPSC will submit the required information to each House of Congress and the Comptroller General.

List of Subjects in 16 CFR Part 1461

Consumer protection, Incorporation by reference, Portable Fuel Containers, Safety.

For the reasons discussed in the preamble, the Commission amends 16 CFR chapter II as follows:

PART 1461—PORTABLE FUEL CONTAINER SAFETY ACT REGULATION

■ 1. The authority citation for part 1461 continues to read as follows:

Authority: 15 U.S.C. 2056d.

■ 2. Amend § 1461.3 by revising paragraph (a) to read as follows:

§ 1461.3 Requirements for flame mitigation devices on portable fuel containers.

* * * * *

(a) * * *

Containers sold pre-filled. Portable fuel containers sold pre-filled with a flammable liquid to the consumer must comply with the requirements of ASTM F3429/F3429M–24 (incorporated by reference, see § 1461.4).

* * * * *

■ 3. Amend § 1461.4 by revising paragraph (a)(2) to read as follows:

§ 1461.4 Incorporation by reference.

* * * * *

(a) * * *

(2) ASTM F3429/F3429M–24, *Standard Specification for Performance of Flame Mitigation Devices Installed in Disposable and Pre-Filled Flammable Liquid Containers,* approved on January 15, 2024.

* * * * *

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

29 CFR Part 2510

RIN 1210–AC16

Definition of ''Employer''—Association Health Plans

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Final rule, rescission.

SUMMARY: This document rescinds the Department of Labor's (Department or DOL) 2018 rule entitled ''Definition of Employer Under Section 3(5) of ERISA—Association Health Plans'' (2018 AHP Rule). The 2018 AHP Rule established an alternative set of criteria from those set forth in the Department's pre-2018 AHP Rule (pre-rule) guidance for determining when a group or association of employers is acting ''indirectly in the interest of an employer'' under section 3(5) of the Employee Retirement Income Security Act of 1974 (ERISA) for purposes of establishing an association health plan (AHP) as a multiple employer group health plan. The 2018 AHP Rule was a significant departure from the Department's longstanding pre-rule guidance on the definition of ''employer'' under ERISA. This departure substantially weakened the Department's traditional criteria in a manner that would have enabled the creation of commercial AHPs functioning effectively as health insurance issuers. The Department now believes that the core provisions of the 2018 AHP Rule are, at a minimum, not consistent with the best reading of ERISA's statutory requirements governing group health plans.

DATES: *Effective date:* This rule is effective on July 1, 2024.

FOR FURTHER INFORMATION CONTACT: Suzanne Adelman, Office of Regulations and Interpretations, Employee Benefits Security Administration, U.S. Department of Labor, (202) 693–8500 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Executive Summary

This document rescinds the Department's 2018 rule entitled ''Definition of Employer Under Section 3(5) of ERISA—Association Health Plans.'' The 2018 AHP Rule established an alternative set of criteria from those set forth in the Department's pre-rule guidance for determining when a group or association of employers is acting ''indirectly in the interest of an employer'' under section 3(5) of ERISA for purposes of establishing an AHP as a multiple employer group health plan. The 2018 AHP Rule was a significant departure from the Department's longstanding pre-rule guidance on the definition of ''employer'' under ERISA. This departure substantially weakened the Department's traditional criteria in a manner that would have enabled the creation of commercial AHPs functioning effectively as health insurance issuers. The 2018 AHP Rule's alternative criteria were, in large part, held invalid by the U.S. District Court for the District of Columbia in *New York* v. *United States Department of Labor.* The district court found the bona fide association and working owner provisions in the 2018 AHP Rule were based on an unreasonable interpretation of ERISA that was inconsistent with congressional intent that ERISA applies to employment-based benefit relationships. The Department, after further review of the relevant statutory language, judicial decisions, and longstanding pre-rule guidance, and further consideration of ERISA's statutory purposes and related policy goals, as well as the public comments received on the Department's proposed rule, now rescinds in full the 2018 AHP Rule in order to resolve and mitigate any uncertainty regarding the status of the criteria that were set under the 2018 AHP Rule, allow for a reexamination of the criteria for a group or association of employers to be able to sponsor an AHP, and ensure that guidance being provided to the regulated community is in alignment with ERISA's text, purposes, and policies. The Department now believes that the provisions of the 2018 AHP Rule that the district court held invalid are, at a minimum, not consistent with the best reading of ERISA's statutory requirements governing group health plans.

II. Background

A. Definition of Employer Under Section 3(5) of ERISA

ERISA regulates ''employee benefit plans'' (classified as ''employee welfare benefit plans'' and ''employee pension benefit plans''), and generally preempts State laws that relate to or have a connection with such plans, subject to certain exceptions. An ''employee welfare benefit plan'' is defined in section 3(1) of ERISA to include, among other arrangements, ''any plan, fund, or program . . . established or maintained by an employer or by an employee organization, or by both, to the extent that such plan, fund or program was established or is maintained for the purpose of providing for its participants, or their beneficiaries, through the purchase of insurance or otherwise . . . medical, surgical, or hospital care or benefits, or benefits in the event of sickness, accident, disability, [or] death.'' Thus, to be an employee welfare benefit plan, the plan, fund, or program must, among other criteria, be established or maintained by an employer, an employee organization, or both an employer and an employee organization.

Section 3(5) of ERISA generally defines the term ''employer'' as ''any person acting directly as an employer, or indirectly in the interest of an employer, in relation to an employee benefit plan.'' Thus, ERISA defines the term ''employer'' to include the ''direct'' (or common-law) employer of the covered employees or ''any person acting . . . indirectly in the interest of'' the common-law employer, in relation to an employee benefit plan. Section 3(5) of ERISA also expressly identifies ''a group or association of employers acting for an employer in such capacity'' as falling within the definition of ''employer.'' A group or association may establish an employee welfare benefit plan only when it is acting as an ''employer'' within the meaning of section 3(5) of ERISA. The Department's regulation at 29 CFR 2510.3–5, published in its 2018 AHP Rule,[1] which is the subject of this rescission, sought to define circumstances under which a group or association of employers constitutes an ''employer'' within the meaning of section 3(5) of ERISA with respect to sponsorship of a group health plan and the provision of health benefits.

B. Historical Guidance Prior to the 2018 AHP Rule—''Bona Fide'' Group or Association of Employers

Based on definitions in Title I of ERISA, and because Title I's overall structure contemplates employment-based benefit arrangements, the Department has long recognized that, even absent the involvement of an employee organization, a group or association of employers may sponsor a single ''multiple employer'' plan if certain criteria are satisfied. If a group or association satisfies these criteria, then it is generally referred to as a ''bona fide'' employer group or association according to the Department's pre-rule guidance first issued more than forty years ago.[2] Under that pre-rule guidance, health coverage sponsored by a bona fide employer group or association can be structured as a single, multiple employer plan covered by ERISA. The criteria specified in the pre-rule guidance are intended to distinguish bona fide groups or associations of employers that provide coverage to their employees and the families of their employees from arrangements that more closely resemble State-regulated private health insurance coverage.The Department's pre-rule guidance is consistent with the criteria articulated and applied by every Federal appellate court, in addition to several Federal district courts, that have considered whether an organization was acting in the interests of employer members.[3] Moreover, to the Department's knowledge, no court has found, or even suggested, that the pre-rule guidance criteria too narrowly construed the meaning of acting ''indirectly in the interest of an employer'' under section 3(5) of ERISA.

Historically, the Department has taken a facts-and-circumstances approach to determine whether a group or association of employers is a bona fide employer group or association that may sponsor an ERISA group health plan on behalf of its employer members. The Department's longstanding pre-rule guidance, largely taking the form of a collection of advisory opinions issued over more than four decades, has expressed the Department's view regarding whether, based on individual circumstances, a particular group or association was able to sponsor a multiple employer welfare plan.[4] While the language in the Department's pre-rule advisory opinions was tailored to the issues presented in the specific arrangements involved, the Department's interpretive guidance has consistently focused on three criteria: (1) whether the group or association has business or organizational purposes and functions unrelated to the provision of benefits (the ''business purpose'' standard); (2) whether the employers share a commonality of interest and genuine organizational relationship unrelated to the provision of benefits (the ''commonality'' standard); and (3) whether the employers that participate

[1] 83 FR 28912 (June 21, 2018). The 2018 AHP Rule included an amendment to the Department's regulation at 29 CFR 2510.3–3, which excludes ''plans without employees'' from the definition of employee benefit plans covered by Title I of ERISA. Under the amendment, a working owner with no common law employees would have been treated as both an ''employer'' member of the employer group or association *and* an ''employee'' participant in the AHP, notwithstanding the lack of any employment relationship with any other person. This amendment to 29 CFR 2510.3–3 is also rescinded by this final rule.

[2] An information letter from the Employee Benefits Security Administration (EBSA)—previously known as the Pension and Welfare Benefits Administration (PWBA)—explained that ''[t]he question of whether or not an association is an employer within the meaning of section 3(5) rests upon the dual questions of whether or not a bona fide employer association exists and, if so, whether it is acting in the interest of an employer in relation to an employee benefit plan,'' and also noted that ''a number of factors must be considered'' to determine ''whether a bona fide employer association exists.'' Letter from Helene Benson, PWBA, to David Peters, 1979 WL 169912 (Aug. 22, 1979); Advisory Opinion No. 80–15A (March 14, 1980) (''The Department has taken the position that, in order for any group or association to satisfy this definition [association acting for its employer members], it must be a bona fide association of employers, subject, in both form and substance, to the control of its employer members.'')

in a benefit program, either directly or indirectly, exercise control over the program, both in form and substance (the ''control'' standard).

A variety of factors were set forth in the Department's longstanding pre-rule guidance as relevant when applying these three general criteria to a particular group or association. These factors include how members are solicited; who is entitled to participate and who actually participates in the group or association; the process by which the group or association was formed; the purposes for which it was formed; the preexisting relationships, if any, of its members; the powers, rights, and privileges of employer members that exist by reason of their status as employers; who actually controls and directs the activities and operations of the benefit program; and the extent of any employment-based common nexus or other genuine organizational relationship unrelated to the provision of benefits.[5]

C. Association Coverage Under the Public Health Service Act

The Public Health Service Act (PHS Act) establishes health coverage requirements in Title XXVII that generally apply to group health plans and health insurance issuers offering group or individual health insurance coverage. The provisions of Title XXVII of the PHS Act have been amended by the Affordable Care Act (ACA)[6] and other Federal laws. These PHS Act provisions are administered by the Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services (CMS). With respect to health insurance issuers, States are the primary enforcers of these PHS Act provisions, and if a State fails to substantially enforce them, CMS enforces them.

Under Title XXVII of the PHS Act, ''individual market coverage'' is any health insurance coverage that is not offered in connection with a group health plan.[7] Conversely, the term ''group health insurance coverage'' refers to health insurance coverage offered in connection with a group health plan.[8] The PHS Act derives its definitions of ''group health plan'' and ''employer'' from the ERISA definitions of ''employee welfare benefit plan'' and ''employer.''[9] Thus, reference to ERISA is needed when determining whether a group health plan exists for PHS Act purposes and determining whether an ERISA-covered health arrangement is properly treated as a single plan operating on behalf of multiple employers or, instead, a collection of separate and discrete employer-sponsored plans.

In guidance issued in 2002 and 2011, CMS explained how the requirements of Title XXVII of the PHS Act apply to health insurance coverage sold to or through associations.[10] Specifically, as stated in the guidance, the test for determining whether association coverage[11] is individual or group market coverage for purposes of Title XXVII of the PHS Act is the same test as that applied to health insurance coverage offered directly to individuals or employers. In other words, CMS will generally ignore—''look through''—the association to determine whether each association member must receive coverage that complies with the requirements arising out of its status as an individual, small employer, or large employer.

Consequently, coverage that is issued to or through an association, but not in connection with a group health plan, is not considered group health insurance coverage for purposes of the PHS Act. Under the PHS Act, such coverage is considered coverage in the individual market, regardless of whether it is considered group coverage under State law.[12]

In situations involving employment-based association coverage where coverage is offered in connection with a group health plan, the coverage is considered group health insurance coverage under the PHS Act. In cases where an association is not considered an employer under ERISA, each employer member of the association is considered to sponsor its own group health plan under the PHS Act. In those cases where an association is determined to be an employer that is ''acting indirectly in the interest of its employer members'' and sponsors a plan under ERISA, the association coverage is considered a single group health plan under the PHS Act.

Under the PHS Act, the number of employees of the employer sponsoring the group health plan determines whether the employer is a small employer[13] or large employer[14] and thus whether health insurance coverage provided in connection with a group health plan sponsored by the employer falls into the small group market or large group market. In the situation where each employer member of the association is considered to sponsor its own group health plan, the size of each employer participating in the association determines whether that employer's coverage is subject to the small group market or large group market rules. In those instances where the group or association of employers is, in fact, sponsoring the group health plan and the association itself is deemed the ''employer,'' the number of employees employed by all the employers participating in the association determines whether the coverage is subject to the small group market or large group market rules. Accordingly, the status of an association as a single ''employer'' within the meaning of section 3(5) of ERISA, and of the AHP as a single plan has important legal consequences. As a general matter, small group and individual market coverage is subject to Federal protections not applicable to large group market coverage, such as the ACA's premium rating requirements, single risk pool, and essential health benefit (EHB) requirements. Thus, to the extent the arrangement is not a single plan, but rather an aggregation of individual plans (or individuals), the participants covered by the arrangement are subject

[11] For this purpose, the term ''association coverage'' means health insurance coverage offered to collections of individuals and/or employers through entities that may be called associations, trusts, multiple employer welfare arrangements, purchasing alliances, or purchasing cooperatives.

[12] *See* 45 CFR 144.102(c).

[13] The term ''small employer'' generally means an employer who employed an average of at least 1 but not more than 50 employees on business days during the preceding calendar year, and who employed at least 1 employee on the first day of the plan year. Section 2791(e)(4) of the PHS Act.

[14] The term ''large employer'' generally means an employer who employed an average of at least 51 employees on business days during the preceding calendar year and who employs at least 2 employees on the first day of the plan year. Section 2791(e)(2) of the PHS Act.

to these more robust protections applicable to plans in the small group market (or to individual coverage, when the insured parties are simply individuals purchasing insurance coverage outside the group market).[15] [16]

D. The 2018 AHP Rule

On June 21, 2018, the Department published the 2018 AHP Rule,[17] which was intended to broaden the types of employer groups and associations that may sponsor a single group health plan under ERISA. The Department issued the 2018 AHP Rule in response to a 2017 Executive Order (E.O.) that was rescinded in 2021.[18] Relative to the longstanding pre-rule guidance, the 2018 AHP Rule substantially loosened the requirements for groups or associations to be considered bona fide groups or associations that were eligible to establish employee welfare benefit plans or to otherwise meet the definition of ''employer'' under section 3(5) of ERISA.[19] As published, the 2018 AHP Rule altered many of the guardrails in pre-rule guidance, which had been intended to distinguish bona fide employer associations united by common employment-based relationships from mere commercial ventures aimed at marketing insurance to employers and individuals.

Thus, paragraph (b)(1) of the 2018 AHP Rule abandoned the requirement in pre-rule guidance that the group or association acting as an employer must *exist* for purposes *other than* providing health benefits. Instead, the 2018 AHP Rule only required that the group or association must have at least one substantial business purpose unrelated to offering and providing health coverage or other employee benefits to its employer members and their employees. In a significant departure from pre-rule guidance, the rule specifically stated that ''the primary purpose of the group or association'' could be ''to offer and provide health coverage to its employer members and their employees.'' [20]

Similarly, paragraph (c) of the 2018 AHP Rule provided for a looser commonality standard than the pre-rule guidance, which had insisted on a genuine commonality of interests between employer members. Under the 2018 AHP Rule, a group or association of employers satisfied the commonality of interest requirement if either: (1) its employer members were in the same trade or business; or (2) the principal places of business for its employer members were located within a region that did not exceed the boundaries of the same State or metropolitan area, such as the Washington Metropolitan Area of the District of Columbia (which also includes portions of Maryland and Virginia). No other common interests were required.[21] Under the pre-rule guidance, geography alone would not have been sufficient to establish commonality between businesses. For example, barbers, mechanics, and lawyers would not have been treated as having the requisite commonality of interest merely because they all have a principal place of business in the State of New York.

In a particularly striking departure from ERISA's employment-based structure, paragraph (e) of the 2018 AHP Rule specifically allowed working owners without any common-law employees to participate in AHPs, stating that the working owner would be treated as both an ''employer'' and ''employee'' for purposes of participating in, and being covered by, an AHP, notwithstanding the absence of any employment relationship with any common-law employees.[22] Under the pre-rule guidance, working owners without common-law employees generally were not permitted to be treated as employers for the purpose of participating in a bona fide employer group or association,[23] or as employees who could be participants in an ERISA-covered employee welfare benefit plan.

In part because the 2018 AHP Rule had relaxed the standards for treating arrangements as single group plans—making it easier for small employers and working owners to purchase coverage in the large group market which is not subject to all the legal protections applicable to coverage in the individual and small group markets—the 2018 AHP Rule expressly added nondiscrimination standards as an additional safeguard against abuse.[24] These standards aimed to reduce the danger that the new AHPs would abuse their status by cherry-picking groups of relatively healthy participants, such as by charging one participating business more for premiums than it charges other members because that business employs several individuals with chronic illness, and excluding others at the expense of the broader insurance market, which would cover a relatively sicker and more expensive population. In particular, the 2018 AHP Rule incorporated and adapted existing health nondiscrimination provisions already applicable to group health plans, including AHPs, under the Health Insurance Portability and Accountability Act of 1996 (HIPAA).[25]

In applying the HIPAA health nondiscrimination rules for defining similarly situated individuals under the 2018 AHP Rule, the group or association could not treat employer members as distinct groups of similarly situated individuals if it wished to qualify as a bona fide group or association for purposes of sponsoring an AHP.[26] For example, a group or association could not separately experience-rate each employer member of the association based on the health factors of their employees and meet the criteria to be a bona fide group or association of employers under the 2018 AHP Rule. The pre-rule guidance does not incorporate nondiscrimination requirements in the definition of employer, although plans must comply with all applicable laws, including the

[15] There are other provisions of the PHS Act that apply to individual but not large group market coverage. For example, section 2746 of the PHS Act requires health insurance issuers offering individual health insurance coverage or short-term limited duration insurance coverage to make disclosures to enrollees in such coverage and provide reports to the Secretary of HHS regarding direct and indirect compensation provided by the issuer to an agent or broker associated with enrolling individuals in such coverage.

[16] *See* section 2701 of the PHS Act (premium rating), section 1312(c) of the ACA (single risk pool), and section 2707(a) of the PHS Act (EHB requirements). The ACA requires non-grandfathered health plans in the individual and small group markets to cover EHBs, which include items and services in the following ten benefit categories: (1) ambulatory patient services; (2) emergency services; (3) hospitalization; (4) maternity and newborn care; (5) mental health and substance use disorder services including behavioral health treatment; (6) prescription drugs; (7) rehabilitative and habilitative services and devices; (8) laboratory services; (9) preventive and wellness services and chronic disease management; and (10) pediatric services, including oral and vision care. 42 U.S.C. 18022(b).

[17] 83 FR 28912, 28962 (June 21, 2018).

[18] E.O. 13813, 82 FR 48385 (rescinded by E.O. 14009, 86 FR 7793 (Jan. 28, 2021)).

[19] *See generally* 83 FR 28912 (June 21, 2018). But the Department expressly noted in the 2018 AHP Rule that the rule ''does not invalidate any existing advisory opinions, or preclude future advisory opinions, from the Department under section 3(5) of ERISA that address other circumstances in which the Department will view a person as able to act directly or indirectly in the interest of direct employers in sponsoring an employee welfare benefit plan that is a group health plan.'' 83 FR 28912, 28962 (June 21, 2018).

[20] 83 FR 28912, 18 (June 21, 2018).

HIPAA nondiscrimination rules. As the Department noted in the preamble to the 2018 AHP Rule, the HIPAA nondiscrimination rules apply to group health plans, including AHPs, and therefore AHPs, like any other group health plan, cannot discriminate in eligibility, benefits, or premiums against an individual within a group of similarly situated individuals based on a health factor.

E. Decision Finding Core Provisions of the 2018 AHP Rule Invalid

In July 2018, eleven States and the District of Columbia (collectively, the States) sued the Department in the U.S. District Court for the District of Columbia. They argued that the 2018 AHP Rule violates the Administrative Procedure Act (APA), 5 U.S.C. 551 *et seq.,* because it exceeds the Department's statutory authority and is arbitrary or capricious. The States moved for summary judgment, and the Department moved to dismiss the lawsuit for lack of standing and cross-moved in the alternative for summary judgment. On March 28, 2019, the Federal district court denied the Department's motions and granted the States' motion for summary judgment. In granting the States' motion, the district court held invalid the 2018 AHP Rule's definition of bona fide group or association of employers and the language permitting working owners without common-law employees to be treated as employees when participating in an AHP.[27] Specifically, the district court concluded that the 2018 AHP Rule's criteria for establishing AHPs unreasonably construed ERISA's requirement that the association act ''indirectly in the interest of an employer'' because the 2018 AHP Rule's ''substantial business purpose'' and ''geographic commonality'' requirements were not drawn narrowly enough to limit AHPs to those that act in the interest of employers, thus unreasonably expanding the definition of ''employer.''[28] In addition, the district court ruled that the 2018 AHP Rule's expansion of the term ''employer'' under ERISA to include working owners without common-law employees (when members of an association) was unreasonable because it was contrary to ERISA's text and central purpose of regulating employment-based relationships.[29] Regarding ERISA's text and purpose, the district court held that Congress did not intend for working owners without common-law employees to be included within ERISA—either as individuals or when joined in an employer association.[30] In conclusion, the district court held that the 2018 AHP Rule was inconsistent with ERISA and the APA because the provisions unlawfully failed to limit bona fide associations to those acting ''in the interest of'' their employer members, within the meaning of ERISA, thus exceeding the Department's statutory authority.[31] The district court remanded the 2018 AHP Rule to the Department to consider how the severability provision of the 2018 AHP Rule affects any of its remaining provisions.[32] The Department's longstanding pre-rule guidance was not affected by the district court's decision.

In 2019, the Department appealed the district court's decision.[33] Thereafter, the U.S. Court of Appeals for the District of Columbia Circuit granted the Department's request to stay the appeal.[34] Subsequently, the Department informed the appeals court that it would undertake notice and comment rulemaking on a proposal to rescind the 2018 AHP Rule. The appeal pending before the D.C. Circuit remains stayed.

The Department considered the severability clause issue raised by the district court and concluded that, without the core provisions that the district court found invalid, the 2018 AHP Rule could not be operationalized and would provide no meaningful guidance. To minimize consequences of the district court's decision on AHP participants, the Department announced a temporary safe harbor from enforcement on April 29, 2019.[35] Specifically, the Department announced that it would not pursue enforcement actions against parties for potential violations stemming from actions taken prior to the district court's decision and in good faith reliance on the 2018 AHP Rule, as long as parties met their responsibilities to association members and the AHP's participants and beneficiaries to pay health benefit claims as promised.[36] In addition, the Department announced that it would not take action against existing AHPs for continuing, through the remainder of the applicable plan year or contract term that was in force at the time of the district court's decision, to provide health benefits to members who enrolled in good faith reliance on the 2018 AHP Rule before the district court's order.[37] Because the 2018 AHP Rule ceased being an alternative pathway for entities to be treated as bona fide employer groups or associations after the district court's decision in 2019, the Department anticipated that parties who established AHPs in reliance on the 2018 AHP Rule would wind them down and that no new AHPs would be formed in reliance on the 2018 AHP rule until the judicial process ended. The Department's temporary safe harbor from enforcement expired long ago, and the Department is not aware of any AHPs that currently exist in reliance on the 2018 AHP Rule.[38]

III. Rescission of 2018 AHP Rule

This final rule rescinds the 2018 AHP Rule in its entirety. Accordingly, the 29 CFR 2510.3–5 regulation established by the 2018 AHP Rule and the related amendment to the 29 CFR 2510.3–3 regulation made by the 2018 AHP Rule are rescinded.

The 2018 AHP Rule reflected a substantial departure from the Department's longstanding pre-rule guidance on the definition of ''employer'' under ERISA. The 2018 AHP Rule struck the wrong balance between ensuring a sufficient

[36] *Id.*

[37] In addition, as explained in the April 29, 2019 statement, HHS had advised the Department that HHS would not pursue enforcement against nonfederal governmental plans or health insurance issuers for potential violations of Title XXVII of the PHS Act caused by actions taken before the district court's decision in good faith reliance on the rule's validity, through the remainder of the applicable plan year or contract term that was in force at the time of the district court's decision. HHS had also advised the Department that HHS would not consider States to be failing to substantially enforce applicable requirements under Title XXVII of the PHS Act in cases where the State adopted a similar approach with respect to health insurance coverage issued within the State. *Id.*

[38] The non-enforcement policy ended at the end of the plan year or contract term that was in effect at the time of the district court's decision on March 28, 2019. *Id.* at 38.

employment nexus and enabling the creation of AHPs. The employment relationship is at the heart of what makes an entity a bona fide group or association of employers capable of sponsoring an AHP, and of what separates bona fide employer associations from commercial ventures aimed at selling insurance to unrelated individuals and employers. The approach taken in the 2018 AHP Rule does not comport with the better reading of the statute because it goes too far in disregarding ERISA's focus on employment-based relationships. The pre-rule guidance rightly insisted on the existence of an employment relationship and on a common employment nexus between entities participating in a bona fide employer association. By departing from these standards, in the 2018 AHP Rule, the Department undermined ERISA's employment-based focus and wrongly treated as ''employers'' entities whose primary purpose was the marketing of health benefits to unrelated employers and individuals.

As explained in detail below, the Department is no longer of the view that the business purpose standard, geography-based commonality standard, and working owner provision in the 2018 AHP Rule, even as bolstered by the nondiscrimination standards in paragraph (d)(4), are sufficient to distinguish between meaningful employment-based relationships and commercial insurance-type arrangements whose purpose is principally to market benefits, and to identify and manage risk. The Department's rescission of the 2018 AHP Rule makes clear that this significant departure from pre-rule guidance no longer represents the Department's interpretation of when a group or association can constitute an ''employer'' for purposes of sponsoring a group health plan under ERISA. The rescission leaves in place the longstanding pre-rule guidance that has been consistently supported and relied upon in numerous judicial decisions because it fosters a sufficient employer-employee nexus and proper oversight of AHPs, while remaining consistent with ERISA's text and purpose.

A. Authority To Define ''Employer'' in Section 3(5) of ERISA

Congress tasked the Department with administering ERISA.[39] The Department has clear authority to interpret the term ''employer,'' including defining when a ''group or association of employers'' may act ''indirectly in the interest of an employer'' in establishing an employee benefit plan, and has done so in numerous advisory opinions.[40] The courts and the Department have consistently stressed that ERISA's definition of ''employee benefit plan,'' including the definition's reference to arrangements ''established or maintained by an employer or employee organization, or both,'' envisions employment-based arrangements. No court decision or guidance from the Department, including the 2018 AHP Rule, has suggested the ''employer group or association'' provision in the section 3(5) of ERISA definition of ''employer'' extends the concept of an ''employee benefit plan'' to commercial insurance-type arrangements.

As described above, the Department's longstanding pre-rule guidance, as expressed in advisory opinions, has traditionally applied a facts-and-circumstances approach to determine whether a group or association of employers is a bona fide employer group or association capable of sponsoring an ERISA plan on behalf of its employer members. This pre-rule guidance focuses on three general criteria: (1) whether the group or association has business or organizational purposes and functions unrelated to the provision of benefits; (2) whether the employers share some commonality of interest and genuine organizational relationship unrelated to the provision of benefits; and (3) whether the employers that participate in a benefit program, either directly or indirectly, exercise control over the program, both in form and substance. While there are many organizations of employers, the Department's pre-rule guidance makes clear that only certain entities consisting of more than one employer meet the definition of a bona fide group or association of employers under ERISA.

Before the 2018 AHP Rule, the Department's approach to these determinations had consistently focused on employment-based arrangements, as contemplated by ERISA, rather than commercial insurance-type arrangements that lack the requisite connection to the employment relationship.[41] The Department's longstanding pre-rule guidance had also been informed by its extensive experience with unscrupulous promoters, marketers, and operators of multiple employer welfare arrangements (MEWAs).[42] AHPs generally qualify as MEWAs under ERISA. Although MEWAs can provide valuable coverage, historically MEWAs, particularly self-funded MEWAs, have disproportionately suffered from financial mismanagement or abuse, leaving participants and providers with unpaid benefits and bills and putting small businesses at financial risk.[43] Because of this history of abuse by MEWA promoters falsely claiming ERISA coverage and protection from State regulation, Congress amended ERISA in 1983 to provide an exception to ERISA's broad preemption provisions

[39] 29 U.S.C. 1135 (delegating authority to the Secretary of Labor to ''prescribe such regulations as he finds necessary or appropriate to carry out the provisions of [ERISA]''); *see Black & Decker Disability Plan* v. *Nord,* 538 U.S. 822, 831 (2003) (deferring to the Department's interpretation of an ERISA provision).

[40] *See* Advisory Opinions Nos. 94–07A (Mar. 14, 1994), 95–01A (Feb. 13, 1995), 96–25A (Oct. 31, 1996), 2001–04A (Mar. 22, 2001), 2003–13A (Sept. 30, 2003), 2003–17A (Dec. 12, 2003), 2007–06A (Aug. 16, 2007), 2012–04A (May 25, 2012), and 2019–01A (July 8. 2019); *see also* 2018 AHP Rule, 83 FR 28912, 28914 (June 21, 2018) and *New York* v. *United States Department of Labor,* 363 F. Supp. 3d 109, 128 (D.D.C. 2019) (recognizing the Department's authority to interpret ERISA).

[41] This focus is supported by courts' interpretation of the term ''employee benefit plan.'' *See, e.g., Wisconsin Educ. Ass'n Ins. Trust* v. *Iowa State Bd. of Public Instruction,* 804 F.2d 1059, 1063–64 (8th Cir. 1986) (concluding that ''the statute and legislative history will [not] support the inclusion of what amounts to commercial products within the umbrella of the definition'' of ''employee benefit plan'' (citing H.R. Rep. No. 1785, 94th Cong., 2d Sess. 48 (1977)).

[42] Section 3(40)(A) of ERISA (defining MEWAs).

[43] For discussions of this history, *see:* (1) U.S. Gov't Accountability Office, GAO–92–40, ''States Need Labor's Help Regulating Multiple Employer Welfare Arrangements.'', March 1992, at *https://www.gao.gov/assets/220/215647.pdf;* (2) U.S. Gov't Accountability Office, GAO–04–312, ''Employers and Individuals Are Vulnerable to Unauthorized or Bogus Entities Selling Coverage.'' for the regulation of plan and non-plan MEWAs[44] under State insurance laws.[45]

Employees and their dependents have too often become financially responsible for medical claims they were promised would be covered by the plan after paying premiums to fraudulent or mismanaged MEWAs, which could include AHPs. Because these entities often become insolvent, individuals and families bear the risk, and the impact can be devastating as participants are left with large unpaid medical bills or even lose access to critical medical services.[46] Even when such MEWAs are not insolvent, employees and their dependents may still become financially responsible for health claims where the AHP failed to adequately disclose the benefit limitations and exclusions under the plan.[47] The Department is concerned about the potential uptake and expansion of fraudulent and mismanaged MEWAs.

ERISA's overarching purpose is to protect participants and beneficiaries. The provisions of Title I of ERISA were initially enacted primarily to address public concern that funds of private pension plans were being mismanaged and abused. Over time, however, ERISA's protections have dramatically expanded with respect to private group health plans as well. Both Federal regulators and State insurance regulators have devoted substantial resources to detecting and correcting mismanagement and abuse, and in some cases, prosecuting wrongdoers. Even the 2018 AHP Rule expressed concern about departing too dramatically from its traditional interpretation of the term ''employer.'' [48] While the Department sought to expand the scope of covered entities, it recognized the danger that too broad an expansion could result in ''associations'' masquerading as bona fide employer groups or associations merely to promote the commercial sale of insurance. For that reason, the Department in the 2018 AHP Rule adopted and clarified the pre-rule guidance condition that the employers who participate in the AHP must control the group or association and the plan and added an express nondiscrimination requirement as a counterweight to abuse.

Because oversight resources are extremely limited and fraudulent operations often resist detection until claims go unpaid, significant damage can be done before State and Federal governmental entities even receive a complaint about an arrangement, making it difficult for regulators to mitigate damage and stop bad actors. The vulnerability of the participants, beneficiaries, and employers whose employees receive benefits through an AHP is further heightened when the standard for becoming a bona fide group or association is weakened. A weakened standard also can hinder efforts by States to regulate MEWAs, including AHPs, within their borders.[49]

The preamble of the 2018 AHP Rule implies as much in explaining the importance of incorporating the nondiscrimination provision in paragraph (d)(4) of the 2018 AHP Rule. As noted above, paragraph (d)(4) of the 2018 AHP Rule sought to prohibit AHPs from treating member employers as distinct groups in an effort to distinguish AHPs from commercial insurance issuers. In discussing the importance of a requisite connection or commonality to lessen concerns about fraud, the preamble of the 2018 AHP Rule explained that because the final rule relaxed the Department's pre-rule guidance on the groups or associations that may sponsor a single ERISA-covered group health plan, paragraph (d)(4) was especially important in the context of the new, broader arrangements to distinguish a group or association-sponsored AHP from commercial insurance-type arrangements, which lack the requisite connection to the employment relationship and whose purpose was, instead, principally to sell health coverage and to identify and manage risk on a commercial basis.[50]

The Department continues to be mindful of the unique potential harms to participants, beneficiaries, small employers, and health care providers in the context of AHPs and any other form of MEWAs. These concerns underscore the need to limit ERISA-covered AHPs to true employee benefit plans that are the product of a genuine employment relationship and not artificial structures marketed as employee benefit plans, often with an objective of attempting to sidestep otherwise applicable insurance regulations or misdirect State insurance regulators. Such artificial vehicles are not ''employee benefit plans'' as defined in section 3(3) of ERISA, nor, as explained above, would it be consistent with the purpose of the statute to treat them as such. In sum, upon further evaluation and consistent with the sound administration of ERISA, the Department has concluded that it should rescind the 2018 AHP Rule from the Code of Federal Regulations (CFR). The Department now believes that the provisions of the 2018 AHP Rule that the district court found inconsistent with the APA and in excess of the Department's statutory authority under ERISA are, at a minimum, not consistent

[44] A ''MEWA'' is a ''multiple employer welfare arrangement'' as defined in ERISA section 3(40). A MEWA can be a single ERISA-covered plan (''plan MEWA''), or an arrangement comprised of multiple ERISA-covered plans, each sponsored by unrelated employer members that participate in the arrangement (''non-plan MEWA''). An AHP is a plan MEWA. If an ERISA-covered plan is a MEWA, States may apply and enforce their State insurance laws with respect to the plan to the extent provided by ERISA section 514(b)(6)(A)—the extent to which depends on whether the MEWA that is an ERISA-covered plan is fully insured. If a MEWA is determined not to be an ERISA-covered plan, the persons who operate or manage the MEWA may nonetheless be subject to ERISA's fiduciary responsibility provisions if such persons are responsible for, or exercise control over, the assets of ERISA-covered plans. In both situations, the Department would have concurrent jurisdiction with the State(s) over the MEWA. *See* Department of Labor Publication, Multiple Employer Welfare Arrangements Under ERISA, A Guide to Federal and State Regulation, *http://www.dol.gov/sites/dolgov/files/ebsa/about-ebsa/our-activities/resource-center/publications/mewa-under-erisa-a-guide-to-federal-and-state-regulation.pdf.*

[45] Section 514(b)(6) of ERISA, 29 U.S.C. 1144(b)(6).

[46] Based on the Department's enforcement data, since 2001, the Department has taken civil and criminal enforcement action, as reflected in criminal indictments, civil complaints, temporary restraining orders, and cease and desist orders involving 108 fraudulent and mismanaged MEWAs and their operators. Just since 2018, the Department was forced to take civil and criminal enforcement action against 21 MEWAs in order to protect participants and beneficiaries from fraud or mismanagement. Further, the Department has civilly recovered over $95 million from mismanaged or fraudulent MEWAs in the last five years alone. *See* EBSA National Enforcement Project—Health Enforcement Initiatives at *www.dol.gov/agencies/ebsa/about-ebsa/our-activities/enforcement#national-enforcement-projects;* U.S. Department of Labor Files Complaint to protect Participants and Beneficiaries of failing Medova MEWA operating in 38 states, available at *https://www.dol.gov/newsroom/releases/ebsa/ebsa20201218;* Federal Court Appoints Independent Fiduciary as Claims Administrator of Medova Arrangement, available at *https://www.dol.gov/newsroom/releases/ebsa/ebsa20210412;* Federal Court Orders Kentucky Bankers Association to Pay $1,561,818 In Losses to Benefits Plan After U.S. Department of Labor Finds Violations, available at *https://www.dol.gov/newsroom/releases/ebsa/ebsa20201015;* MEWA Enforcement Fact Sheet, available at *https://www.dol.gov/sites/dolgov/files/EBSA/about-ebsa/our-activities/resource-center/fact-sheets/mewa-enforcement.pdf.*

with the best reading of ERISA's statutory requirements governing group health plans.

B. Discussion of Decision To Rescind

Under Supreme Court precedent, an agency has the discretion to change a policy position provided that the agency acknowledges changing its position, the new policy is permissible under the governing statute, there are good reasons for the new position, the agency believes that the new policy is better, as evidenced by the agency's conscious action to change its policy, and the agency takes into account any serious reliance interests in the prior policy.[51]

The Department has further reviewed the relevant statutory language, judicial decisions, and pre-rule guidance, and further considered ERISA's statutory purposes and related policy goals. The Department has also closely considered the comments submitted on the proposed rescission. Based on this review, the Department has concluded it is appropriate to rescind the regulatory provisions adopted in the 2018 AHP Rule.[52] The rescission will ensure that the guidance being provided to the regulated community is in alignment with ERISA's text and purpose. In addition, the rescission aims to resolve and mitigate any uncertainty regarding the status of the standards that were set under the 2018 AHP Rule, and also to facilitate a reexamination of the criteria required for a group or association of employers to be able to sponsor an AHP. In reaching the decision to rescind the regulation, the Department has also been mindful of the fact that the 2018 AHP Rule was only briefly in effect, it represented a significant departure from longstanding guidance, which the Department is leaving in place, and that no commenter presented any claims of ongoing reliance on it. As a result, the net effect of rescission is the continued implementation of the Department's longstanding positions on the proper analysis of the status of employer associations under ERISA, which positions are also consistent with the district court's opinion in *New York* v. *United States Department of Labor.*

Part of the 2018 AHP Rule's purpose was to permit small employers and working owners to purchase health coverage that did not have to comply with the protections applicable to the small group and individual markets. In this manner, the rule aimed to promote the formation of AHPs for small employers and certain self-employed individuals. As noted in the Regulatory Impact Analysis (RIA) below, the 2018 AHP Rule hypothesized that small employers and their plan participants would potentially benefit from the ability to band together to offer less generous, and less costly, benefits. At the same time, however, many comments on the proposed recission of the 2018 AHP Rule expressed concerns that echoed public comments provided to the Department during the 2018 AHP rulemaking process, which indicated that implementation of the 2018 AHP Rule would increase adverse selection against the individual and small group markets by drawing healthier, younger people into AHPs, thus increasing premiums for those remaining in those markets.[53] The economic analysis for the 2018 AHP Rule projected that those employers and participants that remained in the small-group and individual markets could face premium increases between 0.5 and 3.5 percent, resulting in an increase in the number of uninsured individuals caused by those that exited the individual market due to higher premiums.

Concerns about such adverse impacts on the health markets were echoed in many comments submitted on the proposed rescission. As AHPs tend to be large group plans, they generally are not subject to Federal benefit mandates that apply to the individual and small group markets, such as the requirement to cover EHBs. Consequently, AHPs can potentially tailor plan benefits so that individuals with preexisting conditions, or those who are otherwise anticipated to have higher health care costs, are discouraged from joining AHPs (or are not offered AHPs), causing further adverse selection, market segmentation, and higher premiums in the individual and small group markets.[54] The Department acknowledged in the 2018 AHP Rule that the rule's ''increased regulatory flexibility'' would necessarily result in some segmentation of risk that favors AHPs over individual and small group markets and some premium increases for individuals and other small businesses remaining in the individual and small group markets. The Department concluded at that time, however, that practical considerations and Federal nondiscrimination rules would limit such segmentation, and that States could further limit risk segmentation through regulation of AHPs as MEWAs. The Department also assumed some premium protection for subsidy-eligible taxpayers with household incomes at or below 400 percent of the Federal poverty level purchasing coverage on Exchanges.

In the proposed rescission, however, the Department expressed the view that it was appropriate to give greater attention to the long-term impacts on market risk introduced by the 2018 AHP Rule, especially in the small group and individual markets. After close review of the comments, discussed below, the Department affirms its view that rescission of the 2018 AHP Rule is warranted, not only because of these market risks, but because the 2018 AHP Rule did not reflect the best interpretation of section 3(5) of ERISA.

Additionally, as commenters noted, health insurance coverage offered through AHPs in the large group markets is not subject to the requirement to offer EHBs, which means that individuals who join these AHPs may become underinsured if their AHP does not cover benefits that non-grandfathered small group and individual market health insurance coverage are required to cover, such as emergency services, prescription drug benefits, or even inpatient hospital

[51] *Encino Motorcars, LLC* v. *Navarro,* 579 U.S. 211, 220–23 (2016); *see id.* at 225 (Ginsburg, J., concurring) (restating the rule governing an agency's reversal in policy, as articulated in *F.C.C.* v. *Fox Television Stations, Inc.,* 556 U.S. 502, 515 (2009)).

[52] Section 2(c) of Executive Order 14070, ''Continuing to Strengthen Americans' Access to Affordable, Quality Health Coverage,'' provides that ''agencies . . . with responsibilities related to Americans' access to health coverage shall review agency actions to identify ways to continue to expand the availability of affordable health coverage, to improve the quality of coverage, to strengthen benefits, and to help more Americans enroll in quality health coverage. As part of this review, the heads of such agencies shall examine . . . policies or practices that improve the comprehensiveness of coverage and protect consumers from low-quality coverage.'' 87 FR at 20689, 20690. This rescission comports with E.O. 14070 because it acknowledges that health insurance coverage offered through AHPs in the large group markets, or health coverage offered through a self-insured AHP, is not subject to the ACA's EHB requirements; consequently, individuals and small employers who receive such coverage in lieu of individual and small group market coverage subject to the ACA market reforms face the risk of becoming underinsured if their AHP offers less than comprehensive coverage. In addition, the rescission also acknowledges commenters' assertions that the 2018 AHP Rule would have negatively affected the small group and individual markets.

[53] *See* 83 FR 28957 (June 21, 2018). By increasing premiums for individual coverage, the expansion of AHPs may increase federal spending on premium tax credits for coverage offered through an Exchange but may be offset by reduced federal spending through displacement of some Medicaid coverage for individuals who would have transferred into AHPs under the 2018 AHP Rule.

[54] The American Medical Association noted that AHPs could exclude benefits like coverage of insulin, maternity care, mental health services and rehabilitative services that are particularly important to certain workers in blue-collar professions. *See, e.g.,* Brief for American Medical Association and Medical Society of the State of New York as Amici Curiae in Support of Plaintiffs' Motion for Summary Judgment, at *16, *New York* v. *U.S. Department of Labor,* 363 F. Supp. 3d 109 (D.D.C. 2019) (No. 1:18–CV–01747–JDB).

coverage. Because AHPs generally can offer less than comprehensive coverage, they are cheaper to purchase, but there is a significantly greater likelihood that they will cover less than expected or needed. As discussed in this final rule, the 2018 AHP Rule made it easier for small employers, and possible for working owners, to band together to avoid the requirements on small group and individual health insurance coverage by qualifying as a single group health plan to purchase coverage in the large group market. Such an AHP could offer significantly less comprehensive plans, including ones that fail to cover EHBs, resulting in participants and beneficiaries being vulnerable to high out-of-pocket costs and potentially not having access to benefits for care when they most need it.[55]

The Department is also concerned that the 2018 AHP Rule could interfere with the goal of increasing affordable, quality coverage because the rule increases the possibility that individuals who join AHPs will be subject to mismanaged plans. As noted above, ERISA generally classifies AHPs as MEWAs. Historically, MEWAs, especially self-funded MEWAs, have disproportionately suffered from financial mismanagement or abuse, leaving participants and providers with unpaid benefits and bills.[56]

The 2018 AHP Rule reflected a significant departure from the Department's longstanding pre-rule guidance. The Department's rescission of the 2018 AHP Rule makes clear that this significant departure from pre-rule guidance no longer represents the Department's interpretation of when a group or association can constitute an ''employer'' for purposes of sponsoring a group health plan under ERISA. The rescission leaves in place the longstanding pre-rule guidance that has been consistently supported and relied upon in numerous judicial decisions because it fosters a sufficient employer-employee nexus and proper oversight of AHPs, while remaining consistent with ERISA's text and purpose.

As explained further below, the rescission also reflects a reexamination of the 2018 AHP Rule's ''business purpose'' standard and viability safe harbor,[57] the geography-based commonality alternative, and the working-owner provisions, including the potential those provisions have for encouraging abusive health care arrangements, especially self-insured programs, that sell low quality or otherwise unreliable health insurance products through MEWAs to unsuspecting employers, particularly small businesses. Further, the Department does not believe that there is a basis for reliance on the 2018 AHP Rule, given that the temporary safe harbor from enforcement announced by the Department immediately following the district court's decision has long expired.[58] The Department has thus concluded that it is appropriate to rescind the 2018 AHP Rule.

1. Business Purpose Standard

The courts of appeals have uniformly interpreted ERISA's definition of ''employer'' to require common interests other than the provision of welfare benefits, independent of any deference to the Department's historical guidance.[59] The decision of the Eighth Circuit Court of Appeals in *WEAIT* is instructive; there, the court held that ''[t]he definition of an employee welfare benefit plan is grounded on the premise that the entity that maintains the plan and the individuals that benefit from the plan are tied by a common economic or representation interest, *unrelated to the provision of benefits.*'' [60]

This requirement is reflected in longstanding pre-rule guidance focusing on whether the group or association of employers has business or organizational purposes and functions unrelated to the provision of benefits. Although neither the courts nor the Department's pre-rule guidance defined the outer limits of what could count as a sufficient purpose, the employer groups or associations that have been treated as ''employer'' sponsors have well developed business purposes that are unrelated to the provision of benefits.[61] The pre-rule guidance

[55] The Department notes concerns expressed by commenters that low barriers to entry to become an AHP could result in groups or associations with less of a connection to the member employer's community and unscrupulous operators siphoning off members by limiting their membership to healthier groups and offering lower rates for health coverage to their members. Commenters to the 2018 AHP notice of proposed rulemaking (NPRM) also expressed the concern that it could fragment the individual and small group markets, resulting in increased premiums. Commenters further communicated that organizations that form on the basis of offering health benefits could increase the prevalence of unscrupulous promoters that do not have strong incentives to maintain a credible reputation. *See* 83 FR 28912, 28917, and 28943 (June 21, 2018).

[56] The 2018 AHP Rule acknowledged this risk. *See* 83 FR 28951, 28953 (June 21, 2018) (''[T]he Department anticipates that the increased flexibility afforded AHPs under this rule will introduce increased opportunities for mismanagement or abuse, in turn increasing oversight demands on the Department and State regulators.'') *See* 83 FR 28951, 28953 (June 21, 2018).

[57] The business purpose standard of the 2018 AHP Rule required that a group or association must have at least one ''substantial'' business purpose unrelated to offering and providing health coverage or other employee benefits to its employer members and their employees, even if the primary purpose of the group or association is to offer such coverage to its members. While the 2018 AHP Rule did not include a definition of ''substantial,'' it did provide a safe harbor for an association that would be a ''viable entity'' without sponsoring a health plan (''viability safe harbor''). 83 FR 28912, 28956 (June 21, 2018).

Ass'n of Soil Conservation Dists.,* 841 F. Supp. 350, 353 (D. Colo. 1993) (rejecting claim that association was an ''employer'' under ERISA because the association

uniformly emphasized that a purpose unrelated to the provision of benefits is a critical factor for any group or association of employers to be treated as a bona fide group or association that can act as an ''employer'' within the meaning of section 3(5) of ERISA.

While paragraph (b) of the 2018 AHP Rule also contained a business purpose standard, it departed from the substance and intent of prior guidance by providing both that the primary purpose of the group or association could be to offer benefit coverage to the group's members,[62] and that an unrelated purpose would be sufficiently substantial ''if the group or association would be a viable entity in the absence of sponsoring an employee benefit plan.'' [63] For the reasons described in the proposal, the Department has concluded that the business purpose standard and accompanying viability safe harbor are too loose to ensure that the group or association sponsoring the AHP is actually acting in the employers' interest or to effectively differentiate an employee health benefit program offered by such an association from a commercial insurance venture.[64] Although the 2018 AHP Rule provided that the unrelated business purpose had to be ''substantial'' and that the entity should be independently viable, the preamble discussion suggested that few posited purposes would be treated as too insubstantial to pass muster. For example, the preamble suggested that merely ''offering classes or educational materials on business issues of interest to members'' was *per se* sufficient to qualify as substantial.[65]

In the preamble to the 2018 AHP rule, the Department posited that this relaxation of the standard would nonetheless work to differentiate employer groups or associations from commercial insurance ventures because the rule's control requirement and its new nondiscrimination requirement would ensure that only bona fide associations become AHPs. But even if the possibility of employer control and nondiscrimination were sufficient to warrant treating an *entity* as an employer association for purposes of section 3(5) of ERISA, the rule treated *individual working owners* as ''employers'' for this purpose even though they neither employed nor were employed by anybody else. In addition, under the rule's terms, promoters could set up arrangements with separate contribution rates for ''employer'' members (including working owners) based on a variety of non-health factors that correlate with health risks, such as industry, occupation, or geography, in ways that would make the arrangement look strikingly similar to a commercial insurance venture, looking to minimize exposure to less healthy risk pools.[66] Indeed, the economic analysis for the rule projected that, as a result of such risk selection, those employers and participants that remained in the larger small group and individual markets could face premium increases between 0.5 and 3.5 percent.[67]

The Department has concluded that the 2018 AHP Rule's test does not sufficiently ensure a business purpose that advances the interest of employer members of the group or association, nor does it prevent abuse. Part of the rationale for insisting on a common business purpose unrelated to the provision of benefits is to ensure that the entity is a bona fide association acting in the interest and on behalf of employer members, rather than merely a promoter of a commercial arrangement with competing financial interests. Bona fide associations with a common purpose and shared bonds unrelated to the provision of benefits can serve as strong advocates for their employer members and ensure that those members ultimately receive the benefits of the association's advocacy for their common interests. The 2018 AHP Rule's test falls short of providing that the employer members or their association are united by much more than a common desire to obtain health benefits and therefore does not ensure that associations act in the interest of, or as strong advocates for, employer members.

In the Department's view, based on its long and significant experience in this area as well as current concerns about abuse, the 2018 AHP Rule does not establish conditions that appropriately distinguish an employer group sponsoring an employee benefit plan from a commercial insurance venture. Under the rule's test, there is little to distinguish the association from any other commercial benefits promoter, except that, unlike commercial insurers, the AHP would be subject to less stringent state regulations and safeguards. As a result, the Department is concerned that the rule will unduly expose participants, beneficiaries, and unsuspecting small employers to unscrupulous operators looking to market health benefits without the protective structure and supports that apply to state-regulated insurance, such as funding and solvency requirements.[68] As noted elsewhere in this preamble, even under the current more stringent standards, MEWAs, especially self-funded MEWAs, have been frequent subjects of abuse, and in the worst cases have left participants and beneficiaries with large unpaid claims or denials of treatment.[69] These considerations reinforce the Department's conclusion that it should not have departed from its previous approach to interpreting the statutory text and its previous insistence on a strong common purpose unrelated to the provision of benefits.

2. Geographic Commonality

There is a substantial body of case law interpreting ERISA's definition of ''employer'' to require common interests other than the provision of welfare benefits, independent of any deference to the Department's historical pre-rule guidance. For example, in *WEAIT*, the Eighth Circuit concluded that ''[t]he definition of an employee welfare benefit plan is grounded on the premise that the entity that maintains the plan and the individuals that benefit from the plan are tied by a common economic or representation interest, *unrelated to the provision of benefits.*'' [70] The court further explained that ''[o]ur decision is premised on ERISA's language and Congress' intent'' and that ''[t]here [wa]s no need to resort to the Department of Labor's interpretations.'' [71] Like the commonality of interest requirement articulated by the Eighth Circuit in *WEAIT*—a requirement that court explained was grounded in ERISA—in *MDPhysicians,* the Fifth Circuit likewise found that ERISA required a commonality of interest among employer members.[72]

was open to any person who paid the association fee).

Continued

The Department's pre-rule guidance requires a genuine commonality of interests between employer members. Paragraph (c) of the 2018 AHP Rule altered this standard by setting forth alternative ways an association could be treated as having the requisite commonality of interest necessary to constitute a bona fide group or association of employers. The employers who participate in the group or association could have had ''industry commonality,'' which means they were in the same trade, industry, line of business, or profession. Alternatively, the 2018 AHP Rule provided that participating employers could have ''geographic commonality'' if each employer had a principal place of business in the same geographic region that did not exceed the boundaries of a single State or metropolitan area (even if the metropolitan area included more than one State). This represented a significant departure from the Department's longstanding pre-rule guidance because it treated otherwise unrelated employers in multiple unrelated trades, industries, lines of business, or professions as having the requisite commonality, simply because they resided within the same geographic locale.[73]

The preamble of the 2018 AHP Rule focused on the desired goal of the rule to spur AHP formation, but it did not adequately address the fundamental question of how geography alone, without any other common business nexus, could provide the requisite commonality of interest. The preamble to the 2018 AHP Rule did not dispute the importance of commonality. Indeed, the 2018 AHP Rule rejected suggestions that commonality could be established by shared ownership characteristics (all women-owned businesses; all minority-owned businesses; all veteran-owned businesses), shared business models (for example, all non-profit businesses), shared religious/moral convictions, or shared business size.[74] The Department rejected such broad categories as falling within the common nexus standard because it had concluded that a standard this lax would be ''impossible to define or limit'' and would ''eviscerate'' the commonality requirement.[75] The 2018 AHP Rule concluded that, as a policy matter, these line-drawing concerns did not apply to groups with geographic commonality. However, the discussion in the 2018 AHP Rule was, at best, incomplete because it focused mostly on the benefits of having more AHPs but did not explain how geographic commonality was an employment-based commonality that was different from the shared ownership, shared business models, shared religious/moral convictions, and shared business size criteria that the Department rejected.

As explained in the proposal, the Department is now of the view that a commonality requirement based on common geography alone (same State or multi-State area) does not adequately establish commonality.[76] The same reasons why the Department rejected other expansions of the commonality requirement militate against adopting geographic commonality as well. There is little basis for treating disparate employers engaged in disparate enterprises with disparate interests in different urban or rural settings as having a sufficient common nexus merely because they are all in the same State.[77]

While the Department acknowledges that employers within the same geographic locale can share other common interests that result in a sufficient common economic and representational interest, the Department is now concerned that the 2018 AHP Rule did not articulate an appropriate basis for treating common geography alone as a shared interest with respect to the employment relationship. Just as would be the case for associations consisting of employers whose membership is based on common business size, the Department is concerned that recognizing under section 3(5) of ERISA an association composed of unrelated employers all operating in any specific State or multi-State area with no other commonality also would not sufficiently respect the genuine commonality of interest requirement under ERISA, which is intended to ensure that AHPs are operating in the interest of employers and are not merely operating as traditional health insurance issuers in all but name.

3. Working Owners

The 2018 AHP Rule allowed certain self-employed persons without any common-law employees to participate in AHPs as ''working owners.'' [78] The 2018 AHP Rule established wage, hours of service, and other conditions for when a working owner would be treated as both an ''employer'' and ''employee'' for purposes of participating in, and being covered by, an AHP.[79] The 2018 AHP Rule treated these self-employed persons as employers even though they had no employment relationship with anybody other than themselves. Thus, a group or association could become an employer by virtue of its working owner members being classified as both an employer and an employee, even though the working owners had no employees and were not employed by another person or entity.

The Department now believes that the 2018 AHP Rule gave too little weight to ERISA's focus on the employment relationship in treating working owners as both employees and employers notwithstanding the absence of any employment relationship with anybody. While the 2018 AHP Rule's approach promoted the creation of plan MEWAs, it came at the expense of the better reading of the statute's references to employers and employees. ERISA applies when there is an employer-employee relationship. This relationship, as suggested by the very

which courts and litigants may properly resort for guidance.' '') (citation omitted); *id.* at 185–87 (holding that a MEWA that made health coverage available to '' 'employers at large' in the Texas panhandle'' did not have sufficient common economic or representational interest).

[73] *But see* Advisory Opinion No. 2008–07A (Sept. 26, 2008) (''In the Department's view, however, the Bend Chamber [of Commerce]'s structure is not the type of connection between employer members that the Department requires for a group or association of employers to sponsor a single 'multiple employer plan.' Rather, the Department would view the employers that use the Bend Chamber's arrangement as each having established separate employee benefit plans for their employees. Although we do not question the Bend Chamber's status as a genuine regional chamber of commerce with legitimate business and associational purposes, the primary economic nexus between the member employers is a commitment to private business development in a common geographic area. This would appear to open membership in the Bend Chamber, and in turn participation in the proposed health insurance arrangement, to virtually any employer in the region. The other factors the Bend Chamber cites do not directly relate to a connection between the member employers, the association, and the covered employees; instead, such factors are characteristics that evidence the reliability of the Bend Chamber's operations (*e.g.,* cash assets of $100,000 or more, physical office space, years in operation, etc.).'').

[74] 83 FR 28912, 28926 (June 21, 2018). The preamble of the 2018 AHP Rule explained that a test that would treat all nationwide franchises, all nationwide small businesses, or all nationwide minority-owned businesses, as having a common employment-based nexus—no matter the differences in their products, services, regions, or lines of work—would not be sufficient to establish commonality of interest for a national group or association because it would be impossible to define or limit (*e.g.,* business owners who support democracy) and, ''in the Department's view, would effectively eviscerate the genuine commonality of interest required under ERISA.''

[75] *Id.*

[76] 88 FR 87968, 76–77 (Dec. 20, 2023).

[77] In recent years, the case for relying on geography as a basis for commonality has likely been further reduced by the adoption of remote workplace flexibilities and virtual office technologies, which reduce the tie between the worker and any particular geographic location.

[78] 29 CFR 2510.3–5(e).

[79] *See id.* at § 2510.3–3(c).

title of the Act (the *Employee* Retirement Income Security Act), and the Act's reliance on ''employer'' and ''employee'' to define what counts as an ERISA-covered plan, is central to the statutory framework. ERISA generally regulates employment-based relationships, not the sale of insurance to individuals outside such relationships. This employer-employee nexus is the heart of what makes an entity a bona fide group or association of employers capable of sponsoring an AHP and is meant to reflect *genuine* employment relationships. The Department is now of the view that ERISA calls for a higher standard for determining what constitutes a bona fide group or association of employers than is evidenced in the 2018 AHP Rule. In the ERISA context, the bona fide group or association of employers consists of actual employers who, as of the time they join the group or association, hire, and pay wages or salaries to other people who are their common-law employees working for them. Under the 2018 AHP Rule, although working owners had to meet requirements related to the number of hours devoted to providing personal services to the trade or business or the amount of income earned from the trade or business in order to participate in an AHP, these requirements related to differentiating self-employed individuals from individuals engaged in hobbies that generate income or other de minimis commercial activities.[80] These requirements did not, however, reflect the existence of a *genuine* employer-employee relationship, as in the exchange between an employee and an employer of personal services for wages and other compensation (such as health benefits offered through a group health plan) that would be expected in a common-law employment relationship.

Upon further reflection, the Department is now concerned that, by removing the prior (and more stringent) employer-employee nexus requirement, the 2018 AHP Rule departs too far from ERISA's essential purpose and fails to take appropriate account of the underlying basis for the bona fide group or association of employers standard. As stated previously, upholding the purpose of the statute requires drawing appropriate distinctions between employers and associations acting ''in the interest of an employer'' on the one hand, and entrepreneurial insurance-type ventures on the other. A strong employer-employee nexus condition also helps reduce the vulnerability of MEWAs to fraudulent behavior and mismanagement. Routinely treating people as ''employers'' when they have no employees risks converting ERISA from an employment-based statute, as Congress intended, to one that regulates the sale of insurance to individuals, without regard to an employment relationship.

The Department, upon further review of relevant Supreme Court and circuit court judicial decisions, and consistent with the Department's reconsidered view of working owners (without common-law employees) for purposes of section 3(5) of ERISA, has concluded that the better interpretation of such case law is that a working owner may act as an employer for purposes of participating in a bona fide employer group or association under circumstances where there are also common-law employees of the working owner. In *Raymond B. Yates, M.D., P.C. Profit Sharing Plan* v. *Hendon,* the Supreme Court held that a working owner and spouse were eligible to participate in the corporation's ERISA plan, provided that at least one common-law employee of the corporation participated in its plan.[81] Several circuit court opinions also emphasize the existence of an employment relationship when determining if an owner is an employer and/or employee. As the Eleventh Circuit stated in *Donovan* v. *Dillingham,* ''[t]he gist of ERISA's definitions of employer, employee organization, participant, and beneficiary is that a plan, fund, or program falls within the ambit of ERISA only if the plan, fund, or program covers ERISA participants because of their employee status *in an employment relationship* . . . .'' [82] In *Meredith* v. *Time Insurance Company,* the Fifth Circuit held that the Department could reasonably decline to treat a sole proprietor both as an employer and employee under section 3(5) of ERISA because the ''employee-employer relationship is predicated on the relationship between two different people.'' [83] Similarly, in *Marcella* v. *Capital Districts Health Plan, Inc.,* the Second Circuit found that working owners without common-law employees are not employers.[84] Further, as indicated in *Donovan,* just as the statutory definition of ''employer'' under ERISA requires an employee, the statutory definition of ''employee'' under ERISA requires the employee to work for another.[85] These holdings are consistent with the Department's traditional interpretation of ''employee'' in 29 CFR 2510.3–3(b) and (c).[86]

C. Alternatives To Complete Rescission of the 2018 AHP Rule

As part of its deliberations as to whether to rescind the 2018 AHP Rule, the Department considered several alternatives to this rulemaking. The Department contemplated removing only certain provisions of the 2018 AHP Rule. For example, the Department considered rescinding the working owner provision, which represents a significant departure from the pre-rule guidance. Similarly, the Department considered removing the geographic commonality provision, which also represents a dramatic departure from the pre-rule guidance. However, the Department decided against a rescission of only the specific provisions invalidated by the district court. The

[82] *Donovan* v. *Dillingham,* 688 F.2d 1367, 1371 (11th Cir. 1982) (emphasis added).

[83] *Meredith* v. *Time Ins. Co.,* 980 F.2d 352, 358 (5th Cir. 1993); *id.* (''When the employee and employer are one and the same, there is little need to regulate plan administration. . . . It would appear axiomatic that the employee-employer relationship is predicated on the relationship between two different people. . . . We conclude that the power to so define the scope of ERISA has been delegated by Congress to the Department of Labor, and find no reason to disturb the Department's conclusion that ERISA does not intend to treat the spouse of a sole proprietor as an employee.'').

[84] *Marcella* v. *Capital Dists. Health Plan, Inc.,* 293 F.3d 42, 48 (2d Cir. 2002); *id.* at 49 (holding that ''a group or association . . . that contains non-employers cannot be an 'employer' within the meaning of ERISA'').

[85] *Baucom* v. *Pilot Life Ins. Co.,* 674 F. Supp. 1175, 1180 (M.D.N.C. 1987). In *Baucom,* ''[r]eturning to ERISA's language, the court observe[d] that, despite its limitations, the statutory definition of 'employee' mandates that an employee must work for another.'' *Id.* (citation omitted).

[86] In 1996, HIPAA added provisions of ERISA and the PHS Act, which specified that for purposes of part 7 of Title I of ERISA and Title XXVII of the PHS Act ''[a]ny plan, fund, or program which would not be (but for this subsection) an employee welfare benefit plan and which is established or maintained by a partnership, to the extent that such plan, fund, or program provides medical care . . . to present or former partners in the partnership . . . shall be treated (subject to paragraph (2)) as an employee welfare benefit plan which is a group health plan.'' Section 732(d) of ERISA; Section 2722(d) of PHS Act. For a group health plan, the term employee also includes any bona fide partner. 26 CFR 54.9831–1(d)(2); 29 CFR 2590.732(d)(2); 45 CFR 146.145(c)(2).

Department is concerned that the provisions that would remain in the 2018 AHP Rule would not provide an adequate definition of ''employer'' that properly reflect the limits of ERISA's definition of ''employer'' in section 3(5) and Congress' focus on employment-based arrangements, as opposed to the ordinary commercial provision of insurance outside the employment context, and, for the reasons discussed above, would be missing key elements necessary for a comprehensive framework for a group or association to demonstrate that it is acting ''indirectly in the interest of an employer'' within the meaning of section 3(5) of ERISA.[87] Without the core provisions held invalid by the district court, the 2018 AHP Rule could not be operationalized and would provide no meaningful guidance.

The Department also considered rescinding the 2018 AHP Rule and codifying the pre-rule guidance. The Department recognizes that there could be benefits to codifying its longstanding pre-rule guidance. The pre-rule guidance is largely in the form of advisory opinions, which do not have the same authority as regulations and technically are not precedential.[88] Application of the Department's pre-rule guidance thus requires interested parties to compare their specific circumstances to various opinions the Department issued to determine whether the Department has addressed analogous facts and circumstances. Nonetheless, the Department concluded that it would be better to seek comment from interested parties on whether the Department should first propose a rule either codifying the pre-rule guidance or creating alternative criteria and then consider that input as part of a comprehensive reevaluation of the definition of ''employer'' in the AHP context. As discussed further below, the Department received comments on the proposed rescission supporting codifying the pre-rule guidance, supporting codifying the pre-rule guidance with modifications, and opposing codification of the pre-rule guidance. The Department is proceeding to fully rescind the 2018 AHP Rule without proposing any additional guidance at this time. The Department takes the comments on potential future guidance under advisement, and such comments will inform the Department's decision regarding any future efforts on this matter.

IV. Requests for Public Comments

In the proposal, the Department requested comments from interested parties on all aspects of the proposal to rescind the 2018 AHP Rule in its entirety. In the Department's view, ERISA's statutory purposes are better served by rescinding the 2018 AHP Rule and removing it from the published CFR while the Department considers alternatives and engages with interested parties. In addition to comments on rescission of the 2018 AHP Rule, the Department also asked for comments on whether the Department should propose a rule for group health plans that codifies and replaces the pre-rule guidance, issue additional guidance clarifying the application of the Department's longstanding pre-rule guidance as it relates to group health plans (including, for example, the HIPAA nondiscrimination rule's application to AHPs), propose revised alternative criteria for multiple employer association-based group health plans, or pursue some combination of those or other alternative steps. The Department received 58 comment letters, all of which are posted on the Department's website and on *Regulations.gov*.[89] An overwhelming majority of commenters support rescission of the 2018 AHP Rule in whole or in part. Comments are discussed below in Section V. Our evaluation focused on ensuring that the Department's regulatory policy and actions in this area honor the Department's long held view, reiterated in the preamble to the 2018 AHP Rule, that Congress did not intend to treat commercial health insurance products marketed by private entrepreneurs, who lack the close economic or representational ties to participating employers and employees, as ERISA-covered employee welfare benefit plans.[90]

V. Discussion of Public Comments on NPRM

A. The 2018 AHP Rule and the Affordable Care Act

Many comments focused on the impact of the 2018 AHP Rule on the ACA. These comments largely fell into two categories: (1) whether AHPs formed under the 2018 AHP Rule (which generally were not subject to the ACA's requirement to cover EHBs) would offer less comprehensive coverage[91] to working owners and small employers than coverage in the individual and small group markets; and (2) whether the 2018 AHP Rule would have affected the ACA individual and small group market risk pools through risk segmentation. Other commenters noted that the 2018 AHP Rule's working owner provision conflicted with the ACA's protections for individuals enrolling in individual market plans[92] and with the definition of ''employer'' in the ACA.[93]

With respect to comments raising the issue of AHPs offering less comprehensive coverage, commenters stated that AHPs operating under the 2018 AHP Rule, unlike individual and small group market insurance coverage that must offer certain benefits under the ACA, would not have been required to provide EHBs, including emergency services, prescription drug benefits, or

[87] *See, e.g., Gruber* v. *Hubbard Bert Karla Weber, Inc.,* 159 F.3d 780, 787 (3d Cir. 1988) (''[T]o qualify as an 'employer' for ERISA purposes, an employer group or association must satisfy both the commonality of interest and control requirements.'').

[88] Advisory opinions are issued pursuant to ERISA Procedure 76–1, which in Section 10 describes the effect of advisory opinions as follows: ''An advisory opinion is an opinion of the department as to the application of one or more sections of the Act, regulations promulgated under the Act, interpretive bulletins, or exemptions. The opinion assumes that all material facts and representations set forth in the request are accurate and applies only to the situation described therein. Only the parties described in the request for opinion may rely on the opinion, and they may rely on the opinion only to the extent that the request fully and accurately contains all the material facts and representations necessary to issuance of the opinion and the situation conforms to the situation described in the request for opinion.''

[89] To directly access the rulemaking docket, *see https://www.regulations.gov/docket/EBSA-2023-0020.*

[90] 83 FR 28912, 28928 (June 21, 2018); Advisory Opinions Nos. 94–07A (Mar. 14, 1994), available at *www.dol.gov/agencies/ebsa/employers-and-advisers/guidance/advisory-opinions/1994-07a,* and 2001–04A (Mar. 22, 2001), available at *www.dol.gov/agencies/ebsa/employers-andadvisers/guidance/advisory-opinions/2001-04a.*

[91] Health plans that do not include benefits that non-grandfathered small group and individual market health insurance coverage are required to cover, such as emergency services or prescription drug benefits, or even inpatient hospital coverage, are sometimes referred to as ''less comprehensive coverage'' plans.

[92] *See supra* notes 15, 16.

[93] According to one commenter, under the 2018 AHP Rule, an AHP could be comprised of participants who are common-law employees, common-law employees and working owners, or comprised of only working owners. In all cases, the working owner could be treated as an employee and the business as the individual's employer for purposes of being an employer member of the association and an employee participant in the AHP which, according to the commenter, violates both the ACA and ERISA. The commenter believes that coverage offered to ''working owners'' fits squarely within the ACA's and PHS Act's definition of ''individual health insurance coverage'' and, therefore, coverage consisting of only working owners cannot be considered group health insurance coverage. *See* comment from Timothy Stoltzfus Jost (Feb. 15, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00011.pdf.*

even inpatient hospital care. Because an AHP is generally self-funded or funded through large group market insurance coverage and therefore not subject to EHB requirements, several of these commenters stated that AHPs could impose benefit design and association eligibility rules to ''cherry pick'' healthier individuals. Other commenters countered this assertion, stating that AHPs before the 2018 AHP Rule, as well as those that briefly existed under it, covered many (if not all) of the ACA's EHBs voluntarily if they were self-insured plans, or under State law insurance mandates if they were insured plans. These commenters also pointed to other Federal laws that would have restricted the ability of AHPs formed under the 2018 AHP Rule to offer less than comprehensive coverage.[94]

Many commenters stated that the 2018 AHP Rule would have negatively affected the health insurance markets. These commenters argued that AHPs, which generally—as previously noted—are self-funded or funded through large group market insurance coverage, would be permitted to use rating factors such as age, gender, and industry that are prohibited in the small group and individual markets.[95] These commenters asserted that the use of these rating factors would negatively impact the individual and small group market risk pools. They stated that AHPs formed under the 2018 AHP Rule would offer lower premiums to healthier and younger enrollees, drawing those individuals away from the small group and individual markets, thereby increasing premiums for the individuals remaining in those markets, and eventually reducing the availability of plan choices in those markets.[96]

Some commenters disputed that the 2018 AHP Rule would have resulted in adverse selection and market segmentation. These commenters stated that AHPs faced various restrictions or operated within various parameters that would have prevented them from marketing coverage only to healthier individuals, including that (1) AHP coverage is employer-based, which means that AHPs could not seek out only healthy individuals; (2) AHPs could not base plan rates on individual health status or pre-existing conditions; (3) government subsidies would have shielded most participants from any increases in individual health insurance coverage costs; and (4) AHPs would have covered new lives rather than draw individuals away from existing small group or individual market plans.

After careful consideration of public comments on the proposal, the Department acknowledges that health insurance coverage offered through AHPs in the large group markets, or health coverage offered through a self-insured AHP, is not subject to the ACA's EHB requirements; consequently, individuals and small employers who receive such coverage in lieu of individual and small group market coverage subject to the ACA market reforms face the risk of becoming underinsured if their AHP offers less than comprehensive coverage.[97] In addition, the Department also acknowledges the strength of arguments that the 2018 AHP Rule could have negatively affected the small group and individual markets.[98]

At the same time, however, this rescission is ultimately based on the Department's interpretation of ERISA, not the ACA. Also, because the district court held certain provisions of the 2018 AHP Rule invalid, the agency does not have strong data on the number and nature of AHPs formed under the 2018 AHP Rule. Irrespective of these possible negative impacts, however, the Department is rescinding the 2018 AHP Rule based on its view that the geographic commonality, business purpose and working owner provisions of the 2018 AHP Rule were inconsistent with the best interpretation of the statutory language in section 3(5) of ERISA.

B. Geographic Commonality

The 2018 AHP Rule provided that an association could be treated as having the requisite commonality of interest necessary to constitute a bona fide group or association of employers where the employers share ''geographic commonality,'' defined as each employer having a principal place of business in the same geographic region that does not exceed the boundaries of a single State or metropolitan area (even if the metropolitan area included more than one State).

One commenter disagreed with the proposal's rejection of the 2018 AHP Rule's geography-based commonality standard.[99] This commenter argued that the proposal failed to offer good reasons for rejecting this standard and that geography-based business groups have been a feature of the American economy for many generations. The commenter stated that businesses often share an interest in the existence of prosperity, safety, a thriving economy, and a skilled and abundant workforce within their shared State or urban area. While the proposal mostly critiques the reasoning of the 2018 AHP Rule, according to this commenter, in order to make this affirmative change, the Department must offer its own reasons why

[94] The Federal laws mentioned include HIPAA, the Women's Health and Cancer Rights Act of 1998, the Genetic Information Nondiscrimination Act of 2008, and Title X of the Consolidated Omnibus Budget Reconciliation Act of 1985, as amended (''COBRA'').

[95] Section 2701 of the PHS Act, as added by the ACA, implemented at 45 CFR 147.102, restricts variation in premium rates based on age to a 3:1 ratio.

[96] One commenter representing a State Exchange painted a more severe outcome. This commenter stated that the 2018 AHP Rule would have eventually caused the collapse of the private health insurance markets across the nation, leading to higher premiums for small businesses and individuals, leaving people who need comprehensive coverage with no private options, and forcing people to become uninsured. *See* comment from the District of Columbia Health Benefit Exchange Authority (Feb. 20, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00033.pdf.*

[97] The Department is also cognizant that the district court in *New York* v. *United States Department of Labor,* 363 F. Supp. 3d 109, 117–18 (D.D.C. 2019), referred to former President Trump's Executive Order 13813 and comments by then Secretary of Labor Alexander Acosta as evincing an intent—by way of the 2018 AHP Rule—to sidestep major elements of the ACA. On October 12, 2017, President Trump issued Executive Order 13813, ''Promoting Healthcare Choice and Competition Across the United States,'' stating, in relevant part, that ''[e]xpanding access to AHPs will also allow more small businesses to avoid many of the PPACA's costly requirements.'' Executive Order 13813, 82 FR 48385 (Oct. 17, 2017). In remarks to the National Federation of Independent Businesses, President Trump further stated: ''Alex [Acosta] and the Department of Labor are taking a major action that's been worked on for four months now—and now it's ready—to make it easier for small businesses to band together to negotiate lower prices for health insurance and *escape some of Obamacare's most burdensome mandates through association health plans.*'' *See* Remarks by President Trump at the National Federation of Independent Businesses 75th Anniversary Celebration, June 19, 2018 (emphasis added), available at *www.trumpwhitehouse.archives.gov/briefings-statements/remarks-president-trump-national-federation-independent-businesses-75th-anniversary-celebration/.* In a Wall Street Journal op-ed, then Secretary of Labor Alex Acosta wrote: ''Companies with 50 or fewer employees are subject to the law's benefit mandates and rating restrictions, while large companies are not. This is backward. Small businesses should face the same regulatory burden as large companies, if not a lighter one. AHPs will help level the playing field.'' *See* Alexander Acosta, ''A Health Fix For Mom and Pop Shops,'' June 18, 2018, available at *www.wsj.com/articles/a-health-fix-for-mom-and-pop-shops-1529363643.*

[98] *See supra* note 52 (discussing the President's directive to Federal agencies in E.O. 14070 ''to identify ways to continue to expand the availability of affordable health coverage, to improve the quality of coverage, to strengthen benefits, and to help more Americans enroll in quality health coverage'').

[99] *See* comment from Paul J. Ray (Dec. 22, 2023) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00001.pdf.*

geographic commonality does not create the requisite commonality.

Conversely, many commenters on this issue supported the rescission of the geography-based commonality standard, with several of these commenters noting that this standard is so broad that employers with no common interests whatsoever, other than existing within the same boundaries, could participate in an AHP, making such an AHP indistinguishable from commercial insurance arrangements. These commenters, for example, argued that mere shared existence within a service area does not meaningfully correspond to a sufficient, or necessarily any, employment-based nexus of the caliber required by ERISA. In stark contrast, the commonality standards recognized in the Department's longstanding pre-rule guidance (such as commonality based on industry, trade, or occupation) effectively ensure common bonds that mitigate the danger of discriminatory (and commercial) rating practices, asserted the commenters.

Similarly, another commenter observed that the geography-based commonality standard in the 2018 AHP Rule essentially allowed an AHP to operate like an insurance company, rather than an association acting ''in the interest of'' participating employer members, except that self-funded AHPs would not be subject to the protective insurance market rules, including certain rating rules, that commercial insurance is required to comply with.[100] The commenter argued that this outcome not only may negatively impact many consumers but is also hard to square with the widely held view that ERISA requires a genuine employment relationship to sponsor an AHP. Yet another commenter observed that the 2018 AHP Rule would permit ''agglomerations of wildly dissimilar businesses with different or even potentially conflicting needs and priorities,'' whereas what is needed and required by ERISA is commonality of interest among members to assure that the association will act, employer-like, in the interest of the people whose coverage it is sponsoring.[101] Finally, many commenters expressed concern that the inclusion of the State-based geography standard for commonality would create uncertainty in enforcement for AHPs operating across State lines; more specifically, these commenters asserted that loosening the commonality standard in the way permitted by the rule (*e.g.,* permitting an AHP to establish commonality based on its employer members all operating in a common metropolitan area that crosses State lines) likely would lead to more fraud, abuse, and insolvencies.

The Department shares the concerns of these commenters that the geographic commonality test in the 2018 AHP Rule has significant shortcomings in terms of meaningfully restricting coverage to associations of employers with a sufficient employment nexus. Although the Department acknowledges that employers within the same geographic locale can share other factors that rise to the level of sufficient economic and representational interest, the Department does not believe that the 2018 AHP Rule articulated a sufficient basis for treating common geography *alone* as a shared interest with respect to the employment relationship. Just as would be the case for associations consisting of employers whose membership is based on common business size, recognizing an AHP as an association composed of unrelated employers all operating in any specific State, with no other commonality, does not go far enough in ensuring that AHPs are operating in the interest of employers and are not merely operating as traditional health insurance issuers in all but name without having to meet the state regulatory standards that traditional health issuers are subject to.[102] Plumbers, social workers, seed companies, yoga instructors, and mining companies are unlikely to share any special common interest or bond merely because they are all located in a single State like New York, California, or Pennsylvania (or in a single metropolitan multi-state area).

Accordingly, after considering all of the comments, the view of the Department in this final rule is that a commonality requirement based on common geography alone (same State or multi-State area) does not represent the best approach to interpreting the statutory definition of employer because such commonality does not ensure that the AHP is not a commercial health insurance entity in practice. Although it may be one relevant factor to consider along with other factors, the Department's reconsidered view is that geography alone should not be the sole test for commonality under section 3(5) of ERISA.

C. Business Purpose Standard

The ''business purpose'' standard of the 2018 AHP Rule provided, in relevant part, that a group or association of employers must have at least one ''substantial'' business purpose unrelated to offering and providing health coverage or other employee benefits to its employer members and their employees, even if the primary purpose of the group or association is to offer such coverage to its members. While the 2018 AHP Rule did not include a definition of ''substantial,'' it did provide a safe harbor for an association that would be a ''viable entity'' without sponsoring a health plan. Without addressing substantiality, it also clarified that ''a business purpose'' includes promoting common economic interests in a given trade or employer community and is not required to be a for-profit activity. Thus, regardless of the safe harbor, associations that merely sponsor conferences or offer classes or educational materials on business issues of interest to the association members would be deemed to pass the business purpose test.

Several commenters explicitly supported the rescission of this standard. One commenter argued that the 2018 AHP Rule's definition of ''employer'' is at odds with the text and purpose of ERISA, by ''hollowing out'' the longstanding business purpose standard under pre-rule guidance such that the business purpose standard and viability safe harbor would fail to ensure a sufficient employment nexus.[103] A State insurance regulator emphasized that an AHP rule should contain a requirement that ties employer members together for business reasons other than health care coverage, and eligibility should be legitimately employment-based.[104]

[100] *See* comment from the Center on Budget and Policy Priorities (Feb. 20, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00035.pdf.*

[101] *See* comment from the Partnership to Protect Coverage (Feb. 20, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00044.pdf.*

[102] The preamble of the 2018 AHP Rule states, ''[A] test that would treat all nationwide franchises, all nationwide small businesses, or all nationwide minority-owned businesses, as having a common employment-based nexus—no matter the differences in their products, services, regions, or lines of work—would not be sufficient to establish commonality of interest for a national group or association and AHP because it would be impossible to define or limit (*e.g.,* business owners who support democracy) and, in the Department's view, would effectively eviscerate the genuine commonality of interest required under ERISA.'' 83 FR 28912, 28926 (June 21, 2018).

[103] *See* comment from the Partnership to Protect Coverage (Feb. 20, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00044.pdf.*

[104] *See* comment from the Pennsylvania Insurance Department (Feb. 20, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00045.pdf.*

A number of commenters strongly objected to the provision in the 2018 AHP Rule explicitly allowing the primary purpose of the group or association to consist of offering health coverage to its members. According to these commenters, this provision makes AHPs functionally indistinguishable from health insurance issuers, invites unscrupulous promoters to enter the market with mismanaged and inadequately funded AHPs, and could increase the prevalence of fraudulent and abusive practices. They registered their concern that permitting an AHP to be created for the primary purpose of offering health coverage is equivalent to setting up an insurance company, but without the standards that apply to insurance issuers to ensure that promises are kept, bills are paid, and consumers are protected. One commenter [105] argued that such an outcome contradicts congressional intent articulated with the addition to ERISA of section 514(b)(6) (referred to as the ''Erlenborn amendment''): ''[C]ertain entrepreneurs have undertaken to market insurance products to employers and employees at large, claiming these products to be ERISA covered plans. For instance, persons whose primary interest is in the profiting from the provision of administrative services are establishing insurance companies and related enterprises. . . . They are no more ERISA plans than any other insurance policy sold to an employee benefit plan.'' [106]

While no commenter explicitly defended the 2018 AHP Rule's business purpose standard, one commenter suggested it could be revised to require that members have a ''shared business and economic purpose,'' provided the group or association was organized for purposes unrelated to the provision of benefits.[107] Examples provided include ''a common interest in promoting a vibrant local economy'' or having ''a common interest in local, state, and federal regulations of business practices.'' [108]

The Department shares the commenters' concerns that the business purpose standard and accompanying viability safe harbor are too loose to ensure that the group or association sponsoring the AHP is actually acting in the employers' interest or to effectively differentiate an employee health benefit program offered by such an association from a commercial insurance venture. Although the rule provided that a business purpose had to be ''substantial,'' the preamble's discussion of what counts as ''substantial'' was confusing and in some tension with the word's ordinary meaning. At one point, the preamble suggested that merely ''offering classes or educational materials on business issues of interest to members'' was *per se* sufficient to qualify as substantial.[109] In addition, a weakened business purpose standard also can hinder efforts by States to regulate MEWAs, including AHPs, within their borders. On reexamination, the Department's reconsidered view is that the 2018 AHP Rule's relaxed business purpose test, especially when combined with the rule's other loosened standards on commonality of interest and working owners, cannot be counted on to sufficiently differentiate bona fide employer groups or associations acting as an employer from commercial insurance ventures despite the rule's control and nondiscrimination standards.

D. Working Owners

The 2018 AHP Rule allowed certain self-employed persons without any common-law employees to participate in AHPs as ''working owners.'' It did this by establishing wage, hours of service, and other conditions for when a working owner would be treated as both an ''employer'' and ''employee'' for purposes of participating in, and being covered by, an AHP.[110] Commenters on the proposed recission of the 2018 AHP Rule disagreed on whether to rescind the ''working owner'' provision, with most commenters in favor of rescission.

Commenters opposing the rescission offered little reasoning as to why the working owner provision, specifically, should be retained. One commenter suggested that the provision should be retained and clarified to include interns and apprentices of trades regardless of whether such individuals work a full-time schedule or are paid for their work.[111]

Most commenters on the working owner provision, however, supported its full rescission. Several commenters, for example, pointed to the inclusion of ''working owners'' in an AHP comprised only of working owners as clearly inconsistent with ERISA. One of these commenters added that such inclusion also is inconsistent with court decisions interpreting the terms ''employer'' and ''employee'' under ERISA. Further, according to the commenter, the Department's regulation at 29 CFR 2510.3–3, which provides that an ERISA plan does not include a program under which no employees are participants covered under the plan, and the decision in *Yates* v. *Hendon,* recognize the longstanding position of Federal agencies that an ERISA plan must have at least one employee participant other than the owner to be a group health plan.[112] Indeed, a couple of commenters observed that one person cannot be in an employment relationship with themselves, and that AHPs should not include working owners that do not have common-law employees. Some commenters stated that allowing an AHP comprised only of sole proprietors will necessarily lead to more fraud and insolvencies. Acknowledging that the 2018 AHP Rule included some ''minimal standards'' for AHPs—for example, that AHPs have a formal organizational structure, and that participating employers have some level of control over the AHP—one of the commenters argued that sole proprietors are not in a position to exert meaningful control over an AHP because they are not in a position to determine whether the person setting up and running the AHP has the needed skills and

[105] *See* comment from the District of Columbia Health Benefit Exchange Authority (Feb. 20, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00033.pdf.*

[106] House Committee on Education and Labor, Activity Report of Pension Task Force (94th Congress 2d Session, 1977) quoted in Cong. Rec. (daily ed. May 21, 1982) (statement of Rep. Erlenborn). States, prior to 1983, were effectively precluded by ERISA's broad preemption provisions from regulating any employee benefit plan covered by Title I of ERISA. As a result, a State's ability to regulate MEWAs was often dependent on whether the particular MEWA was not an ERISA-covered plan. In an effort to address this problem, the U.S. Congress amended ERISA in 1983 (Sec. 302(b), Pub. L. 97–473, 96 Stat. 2611, 2613 (29 U.S.C. 1144(b)(6); ''Erlenborn-Burton Amendment'') to establish an exception to ERISA's preemption provisions for MEWAs. This exception was intended to eliminate claims of ERISA-plan status and Federal preemption as an impediment to State regulation of MEWAs by permitting States certain regulatory authority over MEWAs that are ERISA-covered employee welfare benefit plans.

experience or to provide adequate oversight of the AHP's operations.[113]

The Department has reexamined the 2018 AHP Rule's treatment of working owners and determined, as suggested by many commenters, that ERISA's text, fundamental purpose, and pre-rule guidance counsel against the appropriateness of the alternative criteria codified by the 2018 AHP Rule. In this regard, the Department has concluded that the better reading of the statute requires a consistent focus on employment-based relationships, as distinct from commercial ventures formed to market health benefits to unrelated parties, including individuals who are not even in an employment relationship. The pre-rule guidance rightly insisted on the existence of an employment relationship and on a common employment nexus between entities participating in a bona fide employer association. By departing from these standards, the 2018 AHP Rule undermined ERISA's employment-based focus and wrongly treated as ''employers'' entities whose primary purpose was the marketing of health benefits to unrelated employers and individuals.

E. Total Rescission Versus Partial Rescission

An overwhelming majority of commenters support rescission of the 2018 AHP Rule in some fashion. A few commenters discussed whether, if the Department decides to rescind the 2018 AHP Rule, the Department should rescind the rule in whole or in part. One commenter asserted that the Department should not rescind the entire 2018 AHP Rule, but instead should rescind only the provisions that the court held invalid.[114] This commenter suggested that a total rescission would provide a less comprehensive framework than a partial rescission. Further, this commenter argued that a total rescission would cause a reversion to the prior body of applicable law, composed entirely of guidance documents issued over many decades and restricted by their terms to the parties and specific factual scenarios at issue. A different commenter suggested that the rule should stand at least with respect to AHPs meeting the same trade, industry, line of business or profession test.[115] Another commenter urged the Department not to rescind the rule but rather work to improve it.[116]

By contrast, many commenters favored a total rescission of the 2018 AHP Rule. Some reasoned that the rule would be nonsensical if codified without the sections that were held invalid by the district court. Others reasoned that the remaining portions would not be sufficient to prevent mismanagement, underinsurance, and potential harm to consumers. A number of commenters argued that only a full rescission would restore the *status quo ante,* which aligns with judicial precedent, is supported by State regulatory infrastructure, respects the ACA, and has created an effective regulatory framework to support legitimate AHPs for the past 30 years.

The Department agrees that a full rescission, as proposed, is the best course of action. If the Department simply eliminated the provisions that the district court held invalid in its decision in *New York* v. *United State Department of Labor,* the provisions remaining would not provide an adequate definition of ''employer'' that properly reflects the limits of ERISA's definition of ''employer'' in section 3(5) and Congress' focus on employment-based arrangements, as opposed to the ordinary commercial provision of insurance outside the employment context. The remaining provisions also would be missing key elements necessary for a comprehensive framework for a group or association to demonstrate that it is acting ''indirectly in the interest of an employer'' within the meaning of section 3(5) of ERISA. Following the district court's decision, described above, the Department considered the severability clause issue raised by the district court and concluded that, without the core provisions that the district court held invalid, the 2018 AHP Rule could not be operationalized and would provide no meaningful guidance.

Even if considered imperfect to some commenters, the pre-rule guidance establishes criteria intended to distinguish bona fide groups or associations of employers that provide coverage to their employees and the families of their employees from arrangements that more closely resemble State-regulated private health insurance coverage. This rescission does not affect the ability to operate or form an AHP pursuant to the pre-rule guidance. The Department's pre-rule guidance is consistent with the criteria articulated and applied by every appellate court, in addition to several Federal district courts, that considered whether an organization was acting in the interests of employer members.[117] Moreover, to the Department's knowledge, no court has found, or even suggested, that its longstanding pre-rule guidance criteria too narrowly construe the meaning of acting ''indirectly in the interest of an employer'' under section 3(5) of ERISA.

F. Defense of the 2018 AHP Rule in Court

A few commenters in favor of the 2018 AHP Rule asserted that the Department should abandon or withdraw the proposed rescission, leave the 2018 AHP Rule in place, and defend the rule in the U.S. Court of Appeals for the D.C. Circuit. However, the Department is no longer of the view that the business purpose standard, geography-based commonality standard, and working owner provision in the 2018 AHP Rule, even as bolstered by the nondiscrimination standards in paragraph (d)(4) and the control requirements, are sufficient to distinguish between meaningful employment-based relationships and commercial insurance-type arrangements whose purpose is principally to market benefits and identify and manage risk. The Department continues to be mindful of the unique risks to individuals, small employers, and health care providers in the context of AHPs and any other form of MEWAs. These concerns underscore the need to limit ERISA-covered AHPs to true employee benefit plans that are the product of a genuine employment relationship and not artificial structures marketed as employee benefit plans, often with an objective of attempting to sidestep otherwise applicable insurance regulations or Federal law applicable to the individual and small group markets. Such arrangements are not ''employee benefit plans'' as defined in section 3(3) of ERISA, nor, as explained above, would it be consistent with the purpose of the statute to treat them as such.

In sum, upon further evaluation and consistent with the sound administration of ERISA, the Department has concluded that it

[113] *See* comment from the District of Columbia Health Benefits Exchange Authority (Feb. 20, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00033.pdf.*

[114] *See* comment from Paul J. Ray (Dec. 22, 2023) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00001.pdf.*

[115] *See* comment from Bernstein, Shur, Sawyer & Nelson, P.A. (Feb. 20, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00041.pdf.*

[116] *See* comment from the Council for Affordable Health Coverage and Health Benefits Institute (Feb. 20, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00037.pdf.*

[117] *See supra* note 2.

should rescind the 2018 AHP Rule in its entirety. The Department now believes that the provisions of the 2018 AHP Rule that the district court found inconsistent with the APA and in excess of the Department's statutory authority under ERISA are, at a minimum, not consistent with the best reading of section 3(5) of ERISA. As the court noted in *Wisconsin Educ. Ass'n Ins. Trust* v. *Iowa State Board of Public Instruction,* ''[t]he definition of an employee welfare benefit plan is grounded on the premise that the entity that maintains the plan and the individuals that benefit from the plan are tied by a common economic or representation interest, unrelated to the provision of benefits.'' [118]

G. Effect of Rescission on the 2019 Association Retirement Plan Rule

The proposal addressed only the 2018 AHP Rule. It did not solicit comments on whether to simultaneously rescind the Department's final rule on association retirement plans (2019 ARP Rule).[119] However, the proposal acknowledged the existence of the 2019 ARP Rule; that it was issued after the 2018 AHP Rule and after the district court decision in *New York* v. *United States Department of Labor;* and that it includes commonality, business purpose, and working owner provisions that parallel the provisions in the 2018 AHP Rule.[120] The proposal also acknowledged that ERISA has parallel language in the definitions of pension and welfare plan and does not explicitly provide a basis for distinguishing between the AHP and ARP rules.[121] However, the proposal stated that because there are specific retirement plan considerations that involve issues beyond the scope of the proposed rescission, the Department decided not to address the 2019 ARP Rule in the proposal.

A couple of commenters disagreed with this decision, asserting that it would be arbitrary and capricious not to address the 2019 ARP Rule given that the same applicable statutory text, the definition of ''employer'' in section 3(5) of ERISA, is the subject of both rules. In support of this position, one of the commenters quoted the Department's reasoning from the preamble to the 2019 ARP Rule, which stated as follows: ''It makes sense to have consistent provisions for AHPs and [ARPs], because the Department is interpreting the same definitional provisions in both contexts and because many of the same types of groups or associations of employers that sponsor AHPs for their members will also want to sponsor [ARPs].'' [122] Noting some take-up success under the 2019 ARP Rule, one of the commenters implied that the Department is being arbitrary and capricious by ignoring the possibility of a similar level of success for AHPs absent the rescission.[123]

That the Department has deliberately decided to proceed with the rescission of the 2018 AHP Rule, while reserving judgment on the 2019 ARP Rule, is neither probative nor suggestive of an arbitrary and capricious process either in the case of this final rule or with respect to future action, if any, taken on the 2019 ARP Rule. In much the same way that the Department exercised its discretion to promulgate the two rules on separate timelines, it has similar discretion to undertake additional regulatory action with respect to the 2019 ARP Rule on a different timeline. Moreover, unlike the 2018 AHP Rule, the 2019 ARP Rule extends coverage to ''bona fide professional employer organization'' arrangements in addition to association retirement plans. Given the different scope, provisions, and policy considerations associated with the two rules, and the fact that only the AHP Rule has been held invalid in judicial proceedings, the Department believes it is appropriate to initially proceed with rescission of the 2018 AHP Rule, and to reserve judgment on any additional action with respect to the 2019 ARP Rule for a separate rulemaking effort.

Also, as the Department explained in the preamble to the proposal, retirement plans raise different issues from group health plans. Retirement plans and group health plans are subject to an array of different laws, regulators, and market forces. As just one example highlighted by commenters on the proposal, group health plans generally are subject to the ACA and retirement plans are not. Additionally, multiple employer retirement plans do not have a history of financial mismanagement or abuse to the same extent as multiple employer group health plans.[124]

Although this final rule rescinds the 2018 AHP Rule, the Department has made no decision on whether to rescind or modify the 2019 ARP Rule, which was promulgated through a separate notice and comment process. However, if the Department decides to make changes to the 2019 ARP Rule, it will do so separately and through a notice-and-comment rulemaking process as was done with the final rule being adopted today.

H. Effect of Rescission on Access to Health Coverage Through Association Health Plans

Commenters are concerned that rescinding the 2018 AHP Rule will undermine the use of AHPs as a means of gaining access to health benefits. One commenter asserted that after the 2018 AHP Rule went into effect, small businesses created new associations and offered health coverage at premium rates significantly lower than previous small-group plans.[125] This commenter, however, did not address whether any of the purported savings attributed to newly formed AHPs resulted from AHPs that were formed following the 2018 AHP Rule but in accordance with pre-rule guidance, from AHPs formed pursuant to the alternative criteria under the 2018 AHP Rule, or some combination thereof, or whether any AHPs formed pursuant to the alternative criteria would have also satisfied the pre-rule criteria (and therefore could have continued to operate under the pre-rule guidance, regardless of the decision in *New York* v. *United States Department of Labor*). This commenter also asserted that newly created AHPs produced savings of nearly 30 percent for some employers. However, the Department is unable to independently validate the savings asserted by this commenter, or the extent to which those savings, if any, were attributable to less generous benefits, risk selection or other practices that were potentially harmful to the larger market for health benefits, or individuals being covered by low-quality, limited plans.[126]

[125] *See* comment from the Opportunity Solutions Project (Feb. 2, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00003.pdf.*

[126] The savings reported by the commenter was based on a 2019 study of 28 newly formed, active AHPs established under the 2018 AHP Rule provisions. The savings claims are described as ''the maximum savings'' though the term is not defined. The study compares each business's current non-AHP plan to the business's AHP plan options (the study also reported that the average number of plan options (*e.g.* PPO, HMO, HDHP) was 11). The ''average maximum savings'' of the 4 self-funded AHPs was 29 percent, and the average maximum

Continued

The Department recognizes that a number of AHPs were established and briefly existed as a result of the 2018 AHP Rule. However, after the district court's decision holding the 2018 AHP Rule invalid, and the Department's subsequent guidance that parties should cease establishing AHPs (under the alternative criteria pursuant to the 2018 AHP Rule) and to wind down any that were in existence, commercial AHPs permitted under the 2018 AHP Rule halted by the end of 2019. Therefore, the rescission itself has no effect independent of the effects of the district court's opinion and the expiration of the winding-down period provided in the Department's long expired temporary safe harbor from enforcement.

I. Costs of Rescinding the 2018 AHP Rule

A couple of commenters discussed potential costs associated with rescinding the 2018 AHP Rule. One commenter stated that the proposal does not acknowledge certain costs that such a rescission would entail.[127] This commenter suggests that the proposal overlooks the investments made in dozens of new AHPs organized under the 2018 AHP Rule and how their rescission ''materializes losses from investments with delayed returns.'' This commenter also asserted that the rescission limits the AHP market to AHPs established pursuant to the Department's pre-rule guidance and suggested the uncertainties attendant to that guidance may discourage new investments in AHP-related technology and ventures, stifling innovations and the savings they might produce. This commenter also suggested that the rescission systemically reinforces higher than necessary health insurance costs for small businesses, money that might otherwise be spent on new hiring or raises. The commenter further suggested that higher premiums, in turn, discourage small businesses from offering coverage, increasing the Government's cost as more people must rely on ACA premium tax credits. But a different commenter was of the view that, because AHPs established under the 2018 AHP Rule had little opportunity to exist due to the district court's opinion, there is little real-world evidence of the effect the 2018 AHP Rule would have had on the market.[128] In addition, a significant number of commenters articulated a preference for the pre-rule guidance.

After the district court invalidated the 2018 AHP Rule, the Department gave AHPs established under the rule a temporary safe harbor from enforcement to allow such existing AHPs to wind down and announced that new AHPs should not be established in reliance on the rule. That temporary safe harbor from enforcement has long expired, and the Department is not aware of any AHPs that currently exist under the framework of the 2018 AHP Rule. Because the 2018 AHP Rule was never fully implemented and any AHPs established in reliance on the rule have long since terminated, the Department is unable to definitively determine any costs and benefits that would have been incurred in response to the approach taken in the 2018 AHP Rule.

J. Need for Future Rulemaking

In addition to comments on rescission of the 2018 AHP Rule, the proposal also solicited comments on whether the Department should propose a rule for group health plans that codifies and replaces the pre-rule guidance. This solicitation included a request for views on whether to issue additional guidance clarifying the application of the Department's longstanding pre-rule guidance as it relates to group health plans (including, for example, the HIPAA nondiscrimination rule application to AHPs), propose revised alternative criteria for multiple employer association-based group health plans, or pursue some combination of those or other alternative steps. The intent was that the public comments would inform the Department's decision on whether to finalize the proposal to rescind the 2018 AHP Rule and would also assist the Department in determining if it should engage in future rulemaking on AHPs under section 3(5) of ERISA. Overall, comments were mixed on whether future rulemaking is necessary or appropriate, with no clear consensus.

Many commenters expressed a preference for rescission but no future rulemaking on AHPs under section 3(5) of ERISA. These commenters suggested that the facts-and-circumstances approach of the pre-rule guidance (buttressed with State regulatory infrastructure) is adequate, has worked well to honor ERISA's employment-based nexus, and that no formal notice-and-comment rulemaking is needed.[129] Some of these commenters were concerned that a future rulemaking effort might negatively impact existing bona fide AHPs.[130] Others cautioned that the Department should not engage in rulemaking to create new and separate requirements around rating practices within the AHP market, suggesting that rulemaking of that type would be reaching beyond the Department's statutory authority.

Other commenters, however, recommended that the Department give serious consideration to codifying the core principles in the Department's pre-rule guidance into the CFR through notice-and-comment rulemaking following this rescission. These commenters focused on the benefits and efficiencies of transparency and streamlining access to these principles.

Still others suggested that future rulemaking could both incorporate and expand upon the core principles in the Department's pre-rule guidance. Ideas for expansion included provisions on more effective MEWA enforcement, mandatory benefit levels (incorporating provisions that mirror the ACA small group market requirements into any future rulemaking), enhanced financial reporting by AHPs, restrictions on alternative coverage arrangements that undermine and threaten progress under the ACA, and disclosures by AHPs to participating employers and enrollees regarding the extent to which the AHP coverage includes the ACA's essential health benefits.

savings for the 24 fully insured AHPs was 23 percent. Association Health Plans, *First Phase of New Association Health Plans Revealing Promising Trends. www.associationhealthplans.com/reports/new-ahp-study/* accessed on March 12, 2024. This finding is not the average savings across all employers in the AHPs and does not account for differences in insurance coverage richness.

[127] *See* comment from Paragon Health Institute (Feb. 17, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00015.pdf.*

[128] *See* comment from AHIP (Feb. 20, 2024) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00043.pdf.*

[129] New rulemaking could, according to these commenters, undermine the best practices built by employers over decades under the pre-rule guidance and disrupt the balance upon which bona fide associations, employers, and insurers rely. Some of these commenters noted that attempting to codify pre-rule guidance issued over several decades would likely result in gaps and ambiguities, creating more confusion for small employers. One of these commenters further asserted that the lengthy, formal rulemaking process would hinder the Department from contemporaneously responding to industry trends while also restricting industry exploration of new arrangements that could pool employers' resources more efficiently to maximize the healthcare benefits available to employees and their dependents.

[130] Several commenters argued that any future codification of the pre-rule guidance must preserve the structure of existing MEWAs that were set up in good faith in accordance with pre-rule guidance, including the ability to use experience ratings of their employer members consistent with State insurance law (which they say is essential for them to offer affordable and comprehensive coverage), without adding any new requirements that would necessitate expensive restructuring of these MEWAs.

Other ideas for regulatory expansions in a future rulemaking project under section 3(5) of ERISA included strong nondiscrimination protections, provisions on working owners (some commenters recommended prohibitions on working owners being able to join AHPs, but others recommended including them), provisions requiring associations to disclose compensation they receive from the AHPs they sponsor or from the participating employers or enrollees obtaining coverage, provisions delineating concurrent State and Federal enforcement roles, and provisions codifying and enforcing the CMS ''look-through rule.'' [131]

The commenters' ideas and suggestions on a potential future rulemaking project involving AHPs are not directly relevant to the Department's rescission of the 2018 AHP Rule. Moreover, some of their ideas for expansion are beyond the scope of a rulemaking project defining ''employer'' under section 3(5) of ERISA. However, the Department will take the recommendations for future rulemaking under advisement.

VI. Regulatory Impact Analysis

A. Relevant Executive Orders for Regulatory Impact Analyses

Executive Orders (E.O.s) 12866 [132] and 13563 [133] direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects; distributive impacts; and equity). E.O. 13563 emphasizes the importance of quantifying costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. E.O. 13563 directs agencies to propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs; tailor their regulations to impose the least burden on society, consistent with obtaining regulatory objectives; and select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits. E.O. 13563 recognizes that some benefits are difficult to quantify and provides that, where appropriate and permitted by law, agencies may consider and discuss qualitatively values that are difficult or impossible to quantify, including equity, human dignity, fairness, and distributive impacts.

Under E.O. 12866 (as amended by E.O. 14094), the Office of Management and Budget's (OMB) Office of Information and Regulatory Affairs determines whether a regulatory action is significant and, therefore, subject to the requirements of the E.O. and review by OMB. As amended by E.O. 14094, section 3(f) of E.O. 12866 defines a ''significant regulatory action'' as a regulatory action that is likely to result in a rule that may: (1) have an annual effect on the economy of $200 million or more; or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, Territorial, or Tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees or loan programs or the rights and obligations of recipients thereof; or (4) raise legal or policy issues for which centralized review would meaningfully further the President's priorities or the principles set forth in the Executive order.

OMB has designated this action a ''significant regulatory action'' within the meaning of section 3(f)(1) of E.O. 12866, as amended, and reviewed the final rule in accordance with E.O. 12866. Key to this designation is that the Department is rescinding a rule that was itself significant under section 3(f)(1).

It should be noted that the 2018 AHP Rule was never fully implemented.[134] While the Department gave AHPs established under the 2018 AHP Rule a temporary safe harbor from enforcement after the district court's March 28, 2019 decision holding invalid the core provisions of the 2018 AHP Rule, that time has long expired, and the Department is not aware of any AHPs that currently exist under the framework of the 2018 AHP Rule.

Consequently, any costs and benefits that would have been anticipated in response to the approach taken in the 2018 AHP Rule were never fully experienced and have long since lapsed for those plans that formed and briefly existed pursuant to the 2018 AHP Rule. The 2018 AHP Rule hypothesized that plans serving small employers and their participants potentially would have benefitted from the ability to band together to offer tailored plans that omit certain benefits, and thus reduce their costs. At the same time, however, other plans and participants were assumed to bear the costs, with the 2018 AHP Rule's economic analysis projecting that those employers and participants that remained in the small-group and individual markets could face premium increases between 0.5 and 3.5 percent, resulting in an increase in the number of uninsured individuals caused by those that exited the individual market due to higher premiums.

The Department's regulatory impact analysis accompanying the 2018 AHP Rule did not encompass the litigation or the district court's decision, which largely nullified the assumed costs and benefits. Accordingly, the Department assumes that the costs of this rulemaking, the rescission of the 2018 AHP Rule, would effectively be zero, while the benefits would be limited to settling any uncertainty caused by the litigation surrounding the regulation and the Department's reexamination of the appropriate criteria for a group or association of employers to sponsor an AHP.

The Department, in response to the proposal, received a comment arguing that in assessing the cost of the rulemaking, the Department should have used partial implementation of the 2018 AHP Rule as its baseline.[135] The commenter argued that the Department should have implemented those parts of the 2018 AHP Rule that the district court did not hold invalid. The cost of rescinding the 2018 AHP Rule would then be the foregone benefits for individuals who would have relied on a scaled-down version of the 2018 AHP Rule.

The Department has explained why it determined that full rescission of the 2018 AHP Rule was appropriate, as discussed above in Section V.E. Because of the district court's decision, and the fact that parties are not relying on the 2018 AHP Rule to operate AHPs, the costs and benefits of the 2018 AHP Rule assessed against the baseline suggested by the commenter would be especially uncertain. Accordingly, the Department's analysis mostly reflects the fact that the 2018 AHP Rule was

[131] *Supra* note 9.

[132] 58 FR 51735 (Oct. 4, 1993).

[133] 76 FR 3821 (Jan. 21, 2011).

[134] Consistent with the applicability date provision in the 2018 AHP Rule, fully insured plans could begin operating under the rule on September 1, 2018, existing self-insured AHPs could begin operating under the rule on January 1, 2019, and new self-insured AHPs could begin operating under the rule on April 1, 2019. The preamble explained that this phased approach was intended to allot some additional time for the Department and State authorities to address concerns about self-insured AHPs' vulnerability to financial mismanagement and abuse. *See* 83 FR 28912, 28953 (June 21, 2018).

[135] *See* comment from Paul J. Ray (Dec. 22, 2023) last accessed at *https://www.dol.gov/sites/dolgov/files/ebsa/laws-and-regulations/rules-and-regulations/public-comments/1210-AC16/00001.pdf.*

never fully implemented and the Department, therefore, reiterates that the costs of this rulemaking, the rescission of the 2018 AHP Rule, would effectively be zero relative to the baseline projected from current prevailing conditions, while the benefits would be limited to settling any uncertainty caused by the litigation surrounding the 2018 AHP Rule and the Department's reexamination of the appropriate criteria for a group or association of employers to sponsor an AHP. Additionally, as observed in Section II.E. above, the district court held invalid the core provisions of the 2018 AHP Rule. Without the stricken provisions, the 2018 AHP Rule could not be operationalized and would provide no meaningful guidance.

B. Background

An AHP is a health plan formed by a group or association of employers to provide health care coverage for their employees. AHPs have been in existence for some time and are a subset of MEWAs. Under the pre-rule guidance, to qualify as a bona fide employer group or association capable of establishing a single group health plan under ERISA, the group or association had to satisfy the business purpose standard, commonality standard, and control standard, which, along with factors that may be considered in applying these standards, are described above in Section II.B. of this preamble. If these standards are not satisfied, a health care arrangement offered by the group or association is not treated as a single group health plan, and the group or association is disregarded in determining whether health insurance coverage offered to an individual or employer member of the association is individual, small group, or large group market coverage for purposes of Title XXVII of the PHS Act. The scope of these standards, additional nondiscrimination and working owner provisions, and how treatment of AHPs is different under the 2018 AHP Rule are discussed in Section II.D. of the preamble.

As noted in Section II.E. of this preamble, on March 28, 2019, the U.S. District Court for the District of Columbia held invalid the 2018 AHP Rule's definition of bona fide employer groups or associations and the working owner provisions. In response, the Department announced its temporary enforcement policy designed to minimize undue consequences of the district court's decision on AHP participants.[136]

C. Need for Regulatory Action

As discussed in Section II.E. of this preamble, the district court held invalid the 2018 AHP Rule as inconsistent with ERISA's definition of persons ''acting indirectly in the interest of an employer.'' The district court concluded that the 2018 AHP Rule's standards for determining ''employer'' status were overbroad and inconsistent with Congress' intent to draw a distinction between employment-based arrangements, on the one hand, and commercial entities marketing benefits to unrelated employers, on the other.[137] After further consideration, the Department has concluded that the 2018 AHP Rule does not comport with the best interpretation of ERISA's text and animating purposes and should be rescinded while the Department reconsiders its specific provisions and possible different regulatory approaches. The Department's rescission of the 2018 AHP Rule in its entirety also provides clarity to entities that wish to sponsor an AHP with respect to the need to rely upon the criteria in the Department's longstanding pre-rule guidance and court decisions on the ERISA section 3(5) definition, as opposed to the terms of the 2018 AHP Rule.

D. Affected Entities

The Department does not believe that any entities currently rely upon the 2018 AHP Rule, given that the district court has held invalid most of the 2018 AHP Rule and the temporary enforcement policy period has long expired. Rescinding the 2018 AHP Rule simply maintains the status quo. At the time the Department first promulgated the 2018 AHP Rule, the Department identified 153 entities as potential ''early adopters'' that had signaled their intent to form an AHP under the 2018 AHP Rule. Of these early adopters, 112 of these entities ultimately submitted the required Form M–1,[138] one other entity advised the Department that it intended to file a Form M–1, two indicated they were not required to file a Form M–1, 15 told the Department that they were not pursuing an AHP, one was under investigation for reasons unrelated to the early adopter program, and the remainder were unresponsive to further Department outreach.

E. Benefits

The final rule rescinds the 2018 AHP Rule and provides clarity to parties about the continuing unavailability of the 2018 AHP Rule as an alternative to the Department's longstanding pre-rule guidance. At the time the 2018 AHP Rule was finalized, the Department also anticipated that it would have to increase dramatically its MEWA enforcement efforts and enhance its coordination with State regulators because of the anticipated increase in the number of AHPs attributable to the new 2018 AHP Rule. Because the 2018 AHP Rule was held invalid by the district court, the Department has not had to address a dramatic increase in the number of insolvent MEWAs, although existing fraudulent and mismanaged MEWAs remain a significant challenge to the agency.

F. Costs

Although the 2018 AHP Rule was finalized, it was never fully implemented, and no parties appear to currently rely on the 2018 AHP Rule, given the district court's decision and the expiration of the Department's temporary enforcement policy. As a result, the Department does not believe that rescinding the 2018 AHP Rule would result in any costs.

VII. Paperwork Reduction Act

The 2018 AHP Rule was not subject to the requirements of the Paperwork Reduction Act of 1995 [139] because it did not contain a collection of information as defined in 44 U.S.C. 3502(3). Accordingly, this final rule to rescind the 2018 AHP Rule also does not contain an information collection as defined in 44 U.S.C. 3502(3).

VIII. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) [140] imposes certain requirements on rules subject to the notice and comment requirements of section 553(b)

[136] *See supra* note 31.

[137] *See supra* at Section II.E. of this preamble for a discussion of the decision in *New York* v. *United States Department of Labor.*

[138] The Form M–1 is a report for MEWAs and Certain Entities Claiming Exception (ECEs) that offer medical benefits, including AHPs. MEWAs are required to file annual reports with the Department, as well as special filings associated with certain events. In particular, all MEWAs that provide medical benefits, including AHPs that intend to begin operating, are required to file an initial registration Form M–1 at least 30 days before engaging in any activity. Such activities include, but are not limited to, marketing, soliciting, providing, or offering to provide medical care benefits to employers or employees who may participate in the AHP. This filing alerts the Department and State insurance regulators to new entrants into insurance markets, which can give States and regulators time to communicate with these new entities before they begin operation. For additional information on the Form M–1 *see https://www.dol.gov/sites/dolgov/files/EBSA/employers-and-advisers/plan-administration-and-compliance/reporting-and-filing/forms/m1-2023.pdf.*

[139] 44 U.S.C. 3501 *et seq.*

[140] 5 U.S.C. 601 *et seq.*

of the APA or any other law.[141] Under section 604 of the RFA, agencies must submit a final regulatory flexibility analysis (FRFA) of a final rule that is likely to have a significant economic impact on a substantial number of small entities, such as small businesses, organizations, and governmental jurisdictions. However, because the 2018 AHP Rule was never fully implemented and the Department is not aware of any existing AHP that was formed in reliance on the rule, this rescission of the 2018 AHP Rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to section 605(b) of the RFA, the Assistant Secretary of the Employee Benefits Security Administration hereby certifies that the final rule will not have a significant economic impact on a substantial number of small entities. As discussed above, at the time the Department first promulgated the 2018 AHP Rule, the Department identified only 153 entities as potential ''early adopters'' that had signaled their intent to form an AHP under the 2018 AHP Rule. Ultimately, 112 of these entities submitted the required Form M–1, one other entity advised the Department that it intended to file a Form M–1, two indicated they were not required to file a Form M–1, 15 told the Department that they were not pursuing an AHP, one was under investigation for reasons unrelated to the early adopter program, and the remainder were unresponsive to further Department outreach. Since the district court held invalid the 2018 AHP Rule and the temporary enforcement policy period has expired, any AHPs that formed before the decision in reliance on the 2018 AHP Rule should have wound down, and the Department is not aware of any new AHPs that have formed in reliance on the 2018 AHP Rule. Accordingly, rescission of the 2018 AHP Rule will not have an impact on existing AHPs formed in accordance with the pre-rule guidance.

IX. Unfunded Mandates

Title II of the Unfunded Mandates Reform Act of 1995 requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final agency rule that may result in an expenditure of $100 million or more (adjusted annually for inflation with the base year 1995) in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector.[142] In 2024, that threshold is approximately $183 million. For purposes of the Unfunded Mandates Reform Act, this final rule does not include any Federal mandate that the Department expects would result in such expenditures by State, local, or Tribal governments, or the private sector.[143]

X. Federalism

E.O. 13132 outlines the fundamental principles of federalism. It also requires Federal agencies to adhere to specific criteria in formulating and implementing policies that have ''substantial direct effects'' on the States, the relationship between the National Government and States, or on the distribution of power and responsibilities among the various levels of government. Federal agencies promulgating regulations that have these federalism implications must consult with State and local officials and describe the extent of their consultation and the nature of the concerns of State and local officials in the preamble to the proposal. The preamble to the 2018 AHP Rule included a discussion of federalism implications of the rule, which largely focused on and confirmed that the 2018 AHP Rule did not modify State authority under section 514(b)(6) of ERISA, which gives the Department and State insurance regulators joint authority over MEWAs, including AHPs, to ensure appropriate regulatory and consumer protections for employers and employees relying on an AHP for health care coverage. Because the 2018 AHP Rule was never fully implemented and the Department is not aware of any entities currently relying on the 2018 AHP Rule, the Department does not believe its rescission will have a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government that were discussed in the 2018 AHP Rule. Nonetheless, the Department notes that the level and type of State regulation of MEWAs vary widely. The Department is aware that some States have enacted or are considering State laws modeled on the 2018 AHP Rule that are intended to recognize AHPs as employee benefit plans for purposes of State regulation.[144]

XI. Congressional Review Act

Pursuant to Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act, 5 U.S.C. 801 *et seq.*) OIRA has determined that this rule meets the criteria set forth in 5 U.S.C. 804(2). Accordingly, this rule has been transmitted to the Congress and the Comptroller General for review.

List of Subjects in 29 CFR Part 2510

Employee benefit plans, Pensions.

For the reasons stated in the preamble, the Department of Labor amends 29 CFR part 2510 as follows:

PART 2510—DEFINITIONS OF TERMS USED IN SUBCHAPTERS C, D, E, F, G, AND L OF THIS CHAPTER

■ 1. The authority citation for part 2510 is revised to read as follows:

Authority: 29 U.S.C. 1002(1), 1002(2), 1002(3), 1002(5), 1002(16), 1002(21), 1002(37), 1002(38), 1002(40), 1002(42), 1002(43), 1002(44), 1031, and 1135; and Secretary of Labor's Order No. 1–2011, 77 FR 1088. Secs. 2510.3–101 and 2510.3–102 also issued under sec. 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. App. (E.O. 12108, 44 FR 1065, 3 CFR, 1978 Comp., p. 275) and 29 U.S.C. 1135 note.

■ 2. Section 2510.3–3 is amended by revising paragraph (c) introductory text to read as follows:

§ 2510.3–3 Employee benefit plan.

* * * * *

(c) *Employees.* For purposes of this section and except as provided in § 2510.3–55(d):

* * * * *

§ 2510.3–5 [Removed and Reserved]

■ 3. Remove and reserve § 2510.3–5.

Signed at Washington, DC, this 22nd day of April, 2024.

Lisa M. Gomez,

Assistant Secretary, Employee Benefits Security Administration, U.S. Department of Labor.

[143] 58 FR 58093 (Oct. 28, 1993).

[144] For example, CMS, on behalf of HHS, issued a final determination pursuant to section 2723(a)(2) of the PHS Act, section 1321(c)(2) of the ACA, and 45 CFR 150.219 that the Commonwealth of Virginia has not corrected the failure to substantially enforce certain Federal market reforms with respect to issuers offering health insurance coverage through an association of real estate salespersons under Virginia State law, specifically section 38.2–3521.1 G of the Code of Virginia, as enacted by HB 768/SB 335 (2022). The CMS letter, dated September 6, 2023, is available at *www.cms.gov/files/document/letter-virginia-governor-and-insurnace-commissioner-hb-768sb-335-2022-final-determination.pdf.*

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2024–0347]

Special Local Regulations; Marine Events Within the Fifth Coast Guard District

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce special local regulations for certain waters of the Choptank River. This action is necessary to provide for the safety of life on these navigable waters located at Cambridge, MD, during a high-speed power boat demonstration event on May 18, 2024, and May 19, 2024. This regulation prohibits persons and vessels from entering the regulated area unless authorized by the Captain of the Port, Sector Maryland-National Capital Region or the Coast Guard Event Patrol Commander.

DATES: The regulations for the Cambridge Classic Powerboat Race, in Table 2 to paragraph (i))(2) to 33 CFR 100.501, will be enforced from 10 a.m. until 6:30 p.m., each day from May 18, 2024, through May 19, 2024.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notification of enforcement, call or email MST2 Hollie Givens, U.S. Coast Guard Sector Maryland—National Capital Region; telephone 410–576–2596, email *MDNCRMarineEvents@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce special local regulations in Table 2 to paragraph (i)(2) of 33 CFR 100.501 for the Cambridge Classic Powerboat Race regulated area from 10 a.m. to 6:30 p.m. on May 18 and for the same hours on May 19, 2024. This action is being taken to provide for the safety of life on navigable waterways during this 2-day event. Our regulation for marine events within the Fifth Coast Guard District, § 100.501, specifies the location of the regulated area for the Cambridge Classic Powerboat Race which encompasses portions of the Choptank River and its branches. During the enforcement periods, as reflected in § 100.501(c), if you are the operator of a vessel in the regulated area you must comply with directions from the Patrol Commander or any Official Patrol displaying a Coast Guard ensign.

In addition to this notification of enforcement in the **Federal Register**, the Coast Guard plans to provide notification of this enforcement period via the Local Notice to Mariners and Broadcast Notice to Mariners over VHF–FM marine band radio.

Dated: April 24, 2024.

David E. O'Connell,

Captain, U.S. Coast Guard, Captain of the Port, Sector Maryland-National Capital Region.

[FR Doc. 2024–09182 Filed 4–29–24; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2024–0246]

Special Local Regulations; Annual Marine Events Within the Eighth Coast Guard District; Riverfest Power Boat Races

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce special local regulations for the RiverFest Power Boat Races on the Neches River in Port Neches, TX, from May 3, 2024 through May 5, 2024, to provide for the safety of life on navigable waterways during this event. Our regulation for annual marine events within the Eighth Coast Guard District identifies the regulated area for this event in Port Neches, TX. During the enforcement periods, the operator of any vessel in the regulated area must comply with directions from the Patrol Commander.

DATES: The regulations in 33 CFR 100.801, Table 3, Line 4 will be enforced from 2 through 6 p.m. on May 3, 2024, and from 8:30 a.m. through 6 p.m. on May 4 and 5, 2024.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notification of enforcement, call or email LCDR Kimberly Gates, Marine Safety Unit Port Arthur, U.S. Coast Guard; 571–610–1924, email *Kimberly.M.Gates@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce special local regulations in 33 CFR 100.801 Table 3, Line 4, for the RiverFest Power Boat Races from 2 through 6 p.m. on May 3, 2024, and from 8:30 a.m. through 6 p.m. on May 4 and May 5, 2024. This action is being taken to provide for the safety of life on navigable waterways during this three-day event. Our regulations for marine events within the Eighth Coast Guard District, § 100.801, specifies the location of the regulated areas for the RiverFest Power Boat Races which encompasses portions of the Neches River adjacent to Port Neches Park. During the enforcement period, as reflected in § 100.80,1 if you are the operator of a vessel in the regulated area you must comply with directions from the designated Patrol Commander.

In addition to this notice of enforcement in the **Federal Register,** the Coast Guard plans to provide notification of the enforcement periods via Local Notice to Mariners, Marine Safety Information Bulletin, and Vessel Traffic Service Advisory.

Dated: April 24, 2024.

Anthony R. Migliorini,

Captain, U.S. Coast Guard, Captain of the Port Marine Safety Zone Port Arthur.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2024–0343]

RIN 1625–AA11

Safety Zone; Lower Mississippi River, Natchez, MS

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for navigable waters on the Lower Mississippi River from mile marker 364.5 to mile marker 365.5. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards created by waterborne fireworks display with a fallout zone of approximately 560 feet around the barge. Entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port, Sector Lower Mississippi River.

DATES: This rule is effective on June 15, 2024, from 8:30 p.m. to 9:15 p.m.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov,* type USCG–2024–0343 in the search box and click ''Search.'' Next, in the Document Type column, select ''Supporting & Related Material.''

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call

or email MST1 Peter Buczakowski, U.S. Coast Guard; telephone 206–820–5297, email *Peter.L.Buczakowski@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule under authority in 5 U.S.C. 553(b)(B). This statutory provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' The Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it's impracticable. The NPRM process would delay the establishment of the safety zone until after the date of the event and compromise public safety. We must establish this temporary safety zone by June 15, 2024, and lack of sufficient time to provide reasonable comment period and then consider those comments before issuing the rule.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034. The Captain of the Port Sector Lower Mississippi River (COTP) has determined that potential hazards associated with waterborne fireworks display will be a safety concern for anyone located on the Lower Mississippi River mile marker 364.5 to mile marker 365.5. This rule is needed to protect personnel, vessels, and the marine environment in the navigable waters within the temporary safety zone during the operation of the waterborne fireworks display.

IV. Discussion of the Rule

This rule establishes a safety zone from 8:30 p.m. until 9:15 p.m. on June 15, 2024. The safety zone will cover all navigable waters on the Lower Mississippi River from mile marker 364.5 to mile marker 365.5. The duration of the zone is intended to protect personnel, vessels, and the marine environment in these navigable waters during the operations of the waterborne fireworks display. No vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a ''significant regulatory action,'' under section 3(f) of Executive Order 12866, as amended by Executive Order 14094 (Modernizing Regulatory Review). Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, and duration of the temporary safety zone. This temporary safety zone will temporarily restrict navigation on the Lower Mississippi River from mile marker 364.5 to mile marker 365.5 in the vicinity of Natchez, MS, on June 15, 2024, from 8:30 p.m. until 9:15 p.m. Moreover, the Coast Guard will issue a Broadcast Notice to Mariners, Local Notice to Mariners, and/or Marine Safety Information Bulletins, as appropriate.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the temporary safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of

$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a temporary safety zone lasting approximately one hour that will prohibit entry on the Lower Mississippi River from mile marker 364.5 to mile marker 365.5. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine Safety, Navigation, Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Add § 165.T08–0343 to read as follows:

§ 165.T08–0343 Safety Zone; Lower Mississippi River, Natchez, MS

(a) *Location.* The following area is a safety zone: All navigable waters on the Lower Mississippi River from mile marker 364.5 to mile marker 365.5 in the vicinity of Natchez, MS.

(b) *Definitions.* As used in this section, *designated representative* means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port Sector Lower Mississippi River (COTP) in the enforcement of the safety zone.

(c) *Regulations.* (1) Under the general safety zone regulations in subpart C of this part, you may not enter the temporary safety zone described in paragraph (a) of this section unless authorized by the COTP or the COTP's designated representative.

(2) To seek permission to enter, contact the COTP or the COTP's representative by VHF–FM channel 16 or by telephone at 314–269–2332. Those in the temporary safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP's designated representative.

(d) *Enforcement period.* This section will be subject to enforcement from 8:30 p.m. to 9:15 p.m. on June 15, 2024.

Dated: April 24, 2024.

Kristi L. Bernstein,

Captain, U.S. Coast Guard, Captain of the Port Sector Lower Mississippi River.

33 CFR Part 165

[Docket No. USCG–2024–0247]

Annual Fireworks Displays and Other Events in the Eighth Coast Guard District Requiring Safety Zones; Riverfest Fireworks Display

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce a safety zone for the Riverfest Fireworks display on the Neches River in Port Neches, TX from 8:30 through 10 p.m. on May 4, 2024, to provide for the safety of life on navigable waterways during this event. Our regulation for fireworks displays and other events within the Eighth Coast Guard District identifies the regulated area for this event in Port Neches, TX. During the enforcement period, the operator of any vessel in the regulated area must comply with directions from the Captain of the Port or designated representative.

DATES: The regulations in 33 CFR 165.801, Table 3, Line 1 will be enforced from 8:30 through 10 p.m. on May 4, 2024, or in the event of postponement due to rain, 8:30 through 10 p.m. on May 5, 2024.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notification of enforcement, call or email LCDR Kimberly Gates, Marine Safety Unit Port Arthur, U.S. Coast Guard; 571–610–1924, email *Kimberly.M.Gates@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce safety zone regulations in 33 CFR 165.801 Table 3, Line 1, for the Port Neches Riverfest fireworks display from 8:30 through 10 p.m. on May 4, 2024, or in the event of rain, on May 5, 2024 for the same time period. This action is being taken to provide for the safety of life on navigable waterways before, during, and after a pyrotechnics display. Our annual fireworks displays and other events in the Eighth Coast Guard District requiring safety zones, § 165.801, specifies the location of the safety zone for the Riverfest fireworks display which encompasses a 500-yard radius around the fireworks barge anchored on the Neches River in approximate position 29°59′51″ N 093°57′06″ W (NAD83). During the enforcement period, as reflected in § 165.801, if you are the operator of a vessel in the regulated area you must comply with directions from the Captain of the Port or designated representative.

In addition to this notice of enforcement in the **Federal Register**, the Coast Guard plans to provide notification of the enforcement periods via Local Notice to Mariners, Marine Safety Information Bulletin and Vessel Traffic Service Advisory.

Dated: April 24, 2024.

Anthony R. Migliorini,

Captain, U.S. Coast Guard, Captain of the Port Marine Safety Zone Port Arthur.

[Docket Number USCG–2024–0224]

RIN 1625–AA00

Safety Zone; Sabine River, Orange, TX

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for certain navigable waters of the Sabine River, extending the entire width of the river adjacent to the public boat ramp located in Orange, TX. The safety zone is necessary to protect persons and vessels from hazards associated with a high-speed drag boat race competition in Orange, TX. Entry of vessels or persons into this zone is prohibited unless authorized by the Captain of the Port Marine Safety Unit Port Arthur or a designated representative.

DATES: This rule is effective from 9 a.m. on May 4, 2024, through 6 p.m. on May 5, 2024.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov,* type USCG–2024–0224 in the search box, and click ''Search.'' Next, in the Document Type column, select ''Supporting & Related Material.''

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call or email Lieutenant Sean Yanez, Marine Safety Unit Port Arthur, U.S. Coast Guard; telephone 409–723–5027, email *Sean.P.Yanez@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

BNM Broadcast Notice to Mariners
CFR Code of Federal Regulations
COTP Captain of the Port Marine Safety Unit Port Arthur
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule under authority in 5 U.S.C. 553(b)(B). This statutory provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' The Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is impracticable. It is impracticable to publish an NPRM because we must establish this temporary safety zone by May 4, 2024 and lack sufficient time to provide a reasonable comment period and consider those comments before issuing the rule.

Also, under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be impracticable because establishing the safety zone by May 4, 2024, is necessary to protect all waterway users during scheduled race events.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034. The Captain of the Port Marine Safety Unit Port Arthur (COTP) has determined that the potential hazards associated with high-speed drag boat races are a safety concern for persons and vessels operating on the Sabine River. Possible hazards include risks of injury or death from near or actual contact among participant vessels and spectators or mariners traversing through the safety zone. This rule is needed to protect all waterway users, including event participants and spectators, before, during, and after the scheduled event.

IV. Discussion of the Rule

This rule establishes a temporary safety zone from 9 a.m. on May 4, 2024, through 6 p.m. on May 5, 2024, and will be enforced each day from 9 a.m. through 6 p.m.. The safety zone covers all navigable waters of the Sabine River, extending the entire width of the river, adjacent to the public boat ramp located in Orange, TX, bounded on the north by the Orange Municipal Wharf at latitude 30°05′50″ N and to the south at latitude 30°05′33″ N. The duration of the safety zone is intended to protect participants, spectators, and other persons and vessels in the navigable waters of the Sabine River during high-speed drag boat races and will include breaks and opportunities for vessels to transit through the regulated area. No vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below, we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a ''significant regulatory action,'' under section 3(f) of Executive Order 12866, as amended by Executive Order 14094 (Modernizing Regulatory Review). Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, and duration of the safety zone. This safety zone encompasses a less than half-mile stretch of the Sabine River that will be enforced for eight hours on two consecutive days. Moreover, the Coast Guard will issue Broadcast Notice to Mariners (BNMs) via VHF–FM marine channel 16 about the zone. Daily enforcement periods will include breaks that will provide an opportunity for vessels to transit through the regulated area, and the rule allows vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule may affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance,

please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small businesses. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone that is effective for eight hours on each of two days that will prohibit entry on less than a one-half-mile stretch of the Sabine River. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREA AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Add § 165.T08–0224 to read as follows:

§ 165.T08–0224 Safety Zone; Sabine River, Orange, Texas.

(a) *Location.* The following area is a safety zone: All navigable waters of the Sabine River, extending the entire width of the river, adjacent to the public boat ramp located in Orange, TX, bounded on the north by the Orange Municipal Wharf at latitude 30°05′50″ N and to the south at latitude 30°05′33″ N.

(b) *Definition.* As used in this section, designated representative means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port Marine Safety Unit Port Arthur (COTP) in the enforcement of the safety zone. Furthermore, ''official patrol vessel'' means a vessel, including any Coast Guard, state, or local law enforcement and sponsor provided vessels assigned or approved by the COTP or a designated representative, that is designated to patrol the regulated area.

(c) *Regulations.* (1) In accordance with the general regulations in § 165.23 of this part, all persons and vessels, including spectator vessels, are prohibited from entering, transiting through, anchoring in, or remaining with the regulated area during the effective dates and times, unless authorized by the COTP or a designated representative. The COTP or their designated representative may be contacted on VHF–FM channel 13 or 16 or by telephone at 409–719–5070.

(2) All persons and vessels not registered with the sponsor as participants or official patrol vessels are considered spectators or spectator vessels.

(3) Spectator vessels desiring to transit the regulated area may do so only with approval from the COTP or a designated representative, and when so directed by that officer, will be operated at a minimum safe navigation speed in a manner that will not endanger participants in the regulated area or any other vessels.

(4) Any spectator vessel may anchor outside the regulated area but may not anchor in, block, or loiter in a navigable channel. Spectator vessels may be moored to a waterfront facility within the regulated area in such a way that they shall not interfere with the progress of the event. Such mooring must be complete at least 30 minutes prior to the establishment of the regulated area and remain moored through the duration of the event.

(5) The COTP or a designated representative may forbid and control the movement of all vessels in the regulated area. When hailed or signaled by an official patrol vessel, a vessel shall come to an immediate stop and comply with the directions given. Failure to do so may result in expulsion from the area, citation for failure to comply, or both.

(6) The COTP or a designated representative may terminate the event or the operation of any vessel at any time it is deemed necessary for the protection of life or property.

(d) *Enforcement periods.* This section will be enforced from 9 a.m. through 6 p.m. on May 4, 2024, and May 5, 2024. Breaks in the racing will occur during the enforcement periods, which will allow for vessels to pass through the safety zone. The COTP or a designated representative will provide notice of enforcement appropriate per paragraph.

(e) *Informational broadcasts.* The COTP or a designated representative will inform the public of the effective period for the safety zone as well as any changes in the dates and times of enforcement through Local Notice to Mariners (LNMs), Broadcast Notices to Mariners (BNMs), and/or Marine Safety Information Bulletins (MSIBs) as appropriate.

Dated: April 24, 2024.

Anthony R. Migliorini,

Captain, U.S. Coast Guard, Captain of the Port, Marine Safety Unit Port Arthur.

BILLING CODE 9110–04–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 17

RIN 2900–AR55

CHAMPVA Coverage of Audio-Only Telehealth, Mental Health Services, and Cost Sharing for Certain Contraceptive Services and Contraceptive Products Approved, Cleared, or Granted by FDA

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) adopts as final, with changes, a proposed rule to amend its medical regulations regarding Civilian Health and Medical Program of the Department of Veterans Affairs (CHAMPVA) coverage to remove the exclusion for audio-only telehealth, remove current quantitative limitations on mental health/substance use disorder coverage, remove the current requirement for pre-authorization for outpatient mental health visits in excess of 23 per calendar year and/or more than two (2) sessions per week, and exempt certain contraceptive services and prescription and nonprescription contraceptive products that are approved, cleared, or granted by the U.S. Food and Drug Administration (FDA) from cost sharing requirements.

DATES: This rule is effective May 30, 2024.

FOR FURTHER INFORMATION CONTACT: Joseph Duran, Director, Policy, Office of Integrated Veteran Care (OIVC), Veterans Health Administration (VHA), Department of Veterans Affairs, Ptarmigan at Cherry Creek, Denver, CO 80209; 303–370–1637 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: On October 24, 2022, VA published a proposed rule in the **Federal Register** (87 FR 64190) that would amend CHAMPVA exclusions to allow coverage of telephonic (audio-only) medical visits. VA also proposed removing specified quantitative limits on coverage for inpatient and outpatient mental health/substance use disorder (SUD) care appointments, *i.e.,* inpatient and outpatient mental health services, residential treatment, institutional services for partial hospitalization, substance withdrawal management in a hospital setting or rehabilitation facility, outpatient SUD services, and family therapy for SUD. This would align the delivery of CHAMPVA mental health/SUD care with the Department of Defense (DoD) TRICARE program, current standards of practice in mental health and SUD care, and the goals of the Mental Health Parity and Addiction Equity Act of 2008. 87 FR at 64193. VA also proposed removing the current preauthorization requirement for outpatient mental health visits in excess of 23 per calendar year and/or more than two (2) sessions per week. In addition, VA proposed removing cost sharing requirements for certain contraceptive services and prescription or nonprescription contraceptive products that are approved, cleared, or granted by the FDA.

VA provided a 30-day comment period, which ended on November 23, 2022. VA received 14 comments on the proposed rule, of which 7 comments were supportive and did not suggest changes or clarifications from the proposed rule. Commenters generally expressed support for all the proposed changes, but we received substantive comments with recommendations for change on audio telehealth coverage as well as the cost sharing exemption for contraceptives. We address these substantive comments below. Based on these comments, VA adopts the proposed rule as final, with changes.

Audio-Only Telehealth

VA proposed amending its regulations to remove the exclusion of audio-only telehealth for CHAMPVA beneficiaries for services provided on or after May 12, 2020. As proposed, the amendment would apply retroactively and allow reimbursement of medically necessary audio-only telehealth services for CHAMPVA beneficiaries dating back to the date TRICARE published a similar interim final rulemaking (85 FR 27927 May 12, 2020). CHAMPVA beneficiaries would be required to file a claim for reimbursement within 180 days of the effective date of a final rulemaking.

One commenter suggested VA publish guidance to providers and patients related to the retroactive reimbursement period notice. The commenter suggested VA send text alerts notifying beneficiaries on how to file a claim for reimbursement. VA thanks the commenter for the suggestion and VA will take it into consideration, but utilization of specific communication methods for outreach is outside the scope of this rulemaking. However, we note that VA does have a communications plan in place to alert potential beneficiaries as well as providers of this retroactive change in audio-only telehealth coverage. We make no changes based on this comment.

The remaining six comments suggested changes to the proposed rule. All of the comments recommended changes related to the coverage and cost sharing requirements for contraceptive services and products.

Before addressing these comments, we first correct an erroneous statement we made at the proposed rule stage. When we proposed amending § 17.272(a)(28) to provide for CHAMPVA coverage of nonprescription contraceptives used as emergency contraceptives we incorrectly indicated in the proposed rule that TRICARE does not provide coverage for nonprescription contraceptives used as emergency contraception. In accordance with 10 U.S.C. 1074g(a)(2)(F), as implemented by 32 CFR 199.21(h)(5), the TRICARE Pharmacy Benefits Program covers over the counter Levonorgestrel 1.5 mg tablet (*e.g.,* Plan B One-Step) as emergency contraception at no cost if obtained at a military medical treatment facility or retail pharmacy (not home delivery).

Comments That Suggested That CHAMPVA Should Expand Coverage for Nonprescription Contraceptives and Exempt Nonprescription Contraceptives From Cost Sharing Requirements

VA proposed amending § 17.274 to exempt contraceptive services, and contraceptive products approved, cleared, or granted by FDA from cost

sharing requirements. We proposed amending § 17.274 by adding a new paragraph (f) to state that cost sharing and annual deductible requirements under 38 CFR 17.274(a) and (b) do not apply to: (1) surgical insertion, removal, and replacement of intrauterine systems and contraceptive implants; (2) measurement for, and purchase of, contraceptive diaphragms or similar FDA approved, cleared, or granted medical devices, including remeasurement and replacement; (3) prescription contraceptives, and prescription or nonprescription contraceptives used as emergency contraceptives; (4) surgical sterilization; and (5) outpatient care or evaluation associated with provision of services listed in proposed paragraph (f)(1) through (4). We also proposed amending § 17.272(a)(28) to state that nonprescription contraceptives are excluded from CHAMPVA coverage, except those non-prescription contraceptives used as emergency contraceptives.

All six substantive comments suggested that CHAMPVA coverage of contraceptives should include all nonprescription contraceptives. Most of these comments generally suggested that VA should expand coverage to all nonprescription contraceptives. We note that the Department of Health and Human Services (HHS), the Department of the Treasury, and the Department of Labor have historically interpreted the ACA as not requiring coverage of contraceptives without cost-sharing unless the individual has a prescription for the preventive product.

Other commenters provided additional reasons for providing coverage for the additional nonprescription contraceptives. For instance, one commenter explained that nonprescription contraceptives are an important option, especially for those who face barriers to care such as living in rural areas or are without reliable transportation. Another commenter explained that it was critical to provide nonprescription contraceptives because there are barriers to obtaining prescription-only contraception and the FDA is considering allowing certain prescription daily birth control pills to become over the counter instead of prescription-based. Another commenter stated that every individual is different and has different contraceptive needs and therefore all options should be covered without cost sharing.

One commenter noted that any cost associated with contraception, even a small amount, could be a barrier for individuals to access needed contraception. This commenter suggested specific changes to the regulatory text to reflect their suggested changes. The commenter suggested that VA: remove that language in proposed § 17.272(a)(28) that would have excluded coverage of nonprescription contraceptives; revise the language in § 17.272(a)(75) to include coverage for nonprescription contraceptives; and revise § 17.274(f)(3) to exempt all nonprescription contraceptives from cost sharing requirements. The commenter stated that these changes would effectively allow CHAMPVA coverage for both prescription and nonprescription contraceptives and exempt them all from cost sharing requirements.

We make no changes based on comments suggesting that VA should expand coverage to all nonprescription contraceptives. TRICARE does not cover over the counter contraceptives such as condoms, nonprescription spermicidal foams, jellies or sprays. CHAMPVA similarly excludes these items from plan coverage. We note that the ACA does not currently require private health insurers or Medicaid plans to cover these items without cost sharing and without a prescription. We also note that VA is required under 38 U.S.C. 1781(b) to provide CHAMPVA care in the same or similar manner to TRICARE, not the ACA.

We agree with commenters that any cost associated with contraception could be a barrier for individuals to access contraception. Similar concerns are seen with copayment obligations for health care and medication. The issue is not exclusive to CHAMPVA beneficiaries. As noted, TRICARE excludes coverage for prophylactics (condoms), spermicidal foams, jellies, and sprays not requiring a prescription.

In addition, we note here that in July 2023 the FDA has approved an oral contraceptive Opill (norgestrel) for nonprescription use to prevent pregnancy—the first daily oral contraceptive approved for use in the U.S. without a prescription. Opill is now commercially available for purchase without a prescription at pharmacies, convenience stores and grocery stores, as well as online. While VA makes no changes in this rulemaking regarding cost sharing for non-emergency contraceptives not requiring a prescription, VA will consider further amendments to facilitate access to certain family planning options including daily oral contraceptives approved, granted, or cleared by the FDA not requiring a prescription, such as Opill.

We stated in the proposed rule that TRICARE currently requires cost sharing for certain family planning care and services not provided by a military medical treatment facility (87 FR 64194), but did not specify how the proposed rule differed from TRICARE relative to cost sharing for contraceptives and family planning. Currently TRICARE covers reversible medical contraceptives with no cost-share as a preventive health benefit. TRICARE is also covering tubal sterilization procedures with no cost-shares for certain TRICARE-enrolled beneficiaries when the care is sought and delivered by a network provider as a clinical preventive service. By law, applicable cost sharing still applies to oral contraceptives and other prescription pharmaceutical agents dispensed through the TRICARE Pharmacy Benefit Program.

As background, the law directs VA to provide CHAMPVA beneficiaries with medical care ''in the same *or similar* manner and subject to the same *or similar* limitations as medical care'' furnished to DoD TRICARE Select beneficiaries. 38 U.S.C. 1781(b) (emphases added). That text recognizes differences may exist between the two programs' respective beneficiary populations and their needs. Further, CHAMPVA beneficiaries (unlike TRICARE beneficiaries) include family caregivers of veterans, not just eligible dependents. 38 U.S.C. 1720G(a)(3)(A)(ii)(IV). Congress did not require that CHAMPVA coverage be identical to that provided under TRICARE. VA has previously regulated to provide CHAMPVA benefits beyond those benefits offered by TRICARE if providing such health care would better promote the long-term health of CHAMPVA beneficiaries. Thus, consistent with the statute's plain meaning, VA provides CHAMPVA beneficiaries certain care that is ''similar,'' but not necessarily identical, to care provided to beneficiaries of TRICARE.

The distinctions made by TRICARE relative to copayment obligations are based on whether the service is prescribed or provided by a military medical treatment facility or a network provider, and in a few cases, the TRICARE plan in which the sponsor is enrolled. Several factors are weighed by VA when determining if a specific type of CHAMPVA benefit coverage should differ from that under TRICARE, including the makeup of the beneficiary population eligible for CHAMPVA (see 38 CFR 17.271(a), as well as agency priorities and policy considerations.

Eligibility for TRICARE is broader than that for CHAMPVA. CHAMPVA eligibility categories include the spouse

or child of a veteran who has been adjudicated by VA as having a permanent and total service-connected disability; the surviving spouse or child of a veteran who died as a result of an adjudicated service-connected condition(s); or who at the time of death was adjudicated permanently and totally disabled from a service-connected condition(s); the surviving spouse or child of a person who died on active military service and in the line of duty and not due to such person's own misconduct; certain individuals designated as a Primary Family Caregiver; and, an eligible child who is pursuing a course of instruction approved under 38 U.S.C. chapter 36, and who incurs a disabling illness or injury while pursuing such course of instruction. By contrast, TRICARE eligibility categories include active duty service members and their family members; retirees and their families; family members of activated Guard/Reserve members; non-activated Guard/Reserve members and their families who qualify for care under the Transitional Assistance Management Program; retired Guard/Reserve members at age 60 and their families; certain survivors; Medal of Honor recipients and their families; and, qualified former spouses. As noted, cost sharing obligations for certain types of contraceptive care or services under TRICARE is dependent on whether the patient is active duty or whether the care or service is prescribed by a network provider.

VA's motto is ''to fulfill President Lincoln's promise to care for those who have served in our nation's military and for their families, caregivers, and survivors.'' We do not believe TRICARE's statutorily required copayment obligations for these listed contraceptive and family planning services and products compels VA to follow suit. As explained above, those eligible for CHAMPVA are the spouse, surviving spouse, child, and caregiver of a qualifying veteran sponsor which in most cases is either a VA rated permanently and totally disabled veteran or a veteran that died of a VA rated service-connected condition, and not otherwise eligible for TRICARE. We note that removing the cost sharing obligation alleviates any further financial burden on such households. VA believes that exempting the services and products listed in § 17.274(f) from cost sharing will benefit CHAMPVA beneficiaries and will retain that exemption in the final rule, with changes as explained below.

Comments That Requested Other Changes From the Proposed Rule

In addition to the issues above related to coverage and cost sharing for nonprescription contraceptives, two of the six commenters raised other issues. One of the commenters also suggested that language in proposed § 17.274(f) was not clear as to whether CHAMPVA coverage of contraceptives would include only those contraceptive methods and services expressly listed in paragraph (f), or also include ''similar'' contraceptive methods and services and FDA-approved, cleared, or granted products. This commenter stated that, without clarification, § 17.274(f) as proposed could be read to not cover those products that might be approved, cleared, or granted by the FDA in the future, and specifically stated that VA should ensure the inclusion of injectable contraceptives as an express type of contraceptive to be covered. The commenter suggested revising § 17.274(f)(1) as proposed to remove the word ''[S]urgical'' at the beginning of paragraph (f)(1) and adding at the end of the paragraph language that reads ''or similar FDA approved, granted, or cleared contraceptives that require insertion, removal, and replacement by a health care provider.'' This commenter also suggested adding a new paragraph (f)(3) to ensure explicit coverage of injectable contraceptives or similar FDA approved, granted, or cleared contraceptives that require administration by a health care provider. In adding a new paragraph (f)(3), the commenter lastly suggested that a renumbered paragraph (f)(4) (pertaining to exempting prescription contraceptives, and nonprescription contraceptives used as emergency contraceptives) should include at the end language that qualifies such contraceptives be those ''approved, granted, or cleared by the FDA.''

VA agrees with the commenter's suggestions and makes the following changes accordingly. VA revises § 17.274(f)(1) as proposed to remove the word ''[S]urgical'' from the beginning of the paragraph and, at the end of the paragraph, add language to ensure that similar FDA approved, granted, or cleared contraceptives requiring insertion, removal and replacement by a health care provider would be covered. VA will also add a new § 17.274(f)(3) to ensure that injectable contraceptives or similar FDA approved, granted, or cleared contraceptives that require administration by a health care provider would be covered. By adding a new § 17.274(f)(3), we will renumber paragraphs (f)(3) through (f)(5) as proposed to be paragraphs (f)(4) through (f)(6), respectively, and will revise renumbered paragraph (f)(4) to add language that clarifies all prescription, or nonprescription contraceptives used as emergency contraceptives, must otherwise be ''approved, granted, or cleared by the FDA.''

Finally, another commenter suggested that VA policy be amended to allow a prescription for up to 13-month supply of combined hormonal methods of contraceptives to improve contraceptive continuation. We do not make changes from the proposed rule based on this comment as it relates to a clinical practice matter beyond the scope of the proposed rule. We note that a patient's condition may change over time, requiring an adjustment of medication. In addition, a 12-month duration of a prescription corresponds to the scheduling of annual comprehensive care visits. VA policy permits a 12-month supply of combined hormonal methods of contraceptives, and a VA medical facility may have standard operating procedures in place allowing extension of fills greater than 12 months in certain circumstances.

Current VHA Directive 1108.07(1), General Pharmacy Service Requirements, establishes that prescriptions must generally be filled for no more than a maximum three-month (90-day) supply of medication at a time, although exceptions can be made for non-controlled medications and supplies and for oral contraceptives. Therefore, VA pharmacies are already authorized to fill a longer term of this medication when requested by the CHAMPVA beneficiary and the health care provider under the CHAMPVA In-house Treatment Initiative (CITI) program. For CHAMPVA services furnished by non-VA providers, VA does cover such prescriptions for a maximum 90-day supply of medication per fill with three refills if prescribed by the non-VA health care provider and filled by the non-VA pharmacy. See CHAMPVA Operational Policy Manual chapter 2, section 22.1. VA intends to amend this section of the operational manual to allow for an exception for oral contraceptives.

Based on the rationale set forth here and in the supplementary information to the proposed rule, VA adopts the proposed rule as final, with changes.

Executive Orders 12866, 13563, and 14094

Executive Order 12866 (Regulatory Planning and Review) directs agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select

regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages; distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 14094 (Executive Order on Modernizing Regulatory Review) supplements and reaffirms the principles, structures, and definitions governing contemporary regulatory review established in Executive Order 12866 of September 30, 1993 (Regulatory Planning and Review), and Executive Order 13563 of January 18, 2011 (Improving Regulation and Regulatory Review). The Office of Information and Regulatory Affairs has determined that this rulemaking is a significant regulatory action under Executive Order 12866, as amended by Executive Order 14094. The Regulatory Impact Analysis associated with this rulemaking can be found as a supporting document at *www.regulations.gov.*

Regulatory Flexibility Act

The Secretary hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (5 U.S.C. 601–612). The factual basis for this certification is that this regulation updates CHAMPVA coverage to remove the exclusion for audio-only telehealth, removes limitations on outpatient mental health visits, and exempts certain contraceptive services and contraceptive products that are approved, cleared, or granted by the FDA from cost sharing requirements. It also removes the exclusion of CHAMPVA coverage for nonprescription contraception used in an emergency. The changes to the regulation only affect individuals who are CHAMPVA beneficiaries. Absent this rulemaking, health care providers who may be small entities would still receive payment for services, the payment would be from the CHAMPVA beneficiary and not from VA. Therefore, pursuant to 5 U.S.C. 605(b), the initial and final regulatory flexibility analysis requirements of 5 U.S.C. 603 and 604 do not apply.

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, or Tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year. This rule will have no such effect on State, local, or Tribal governments, or on the private sector.

Paperwork Reduction Act

This rule includes provisions constituting a revision to a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) that require approval by OMB. Accordingly, under 44 U.S.C. 3507(d), VA has submitted a copy of this rulemaking action to OMB for review and approval.

OMB assigns control numbers to collections of information it approves. VA may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. In this case, OMB previously assigned OMB Control Number 2900–0219 to an information collection that will be revised through this regulation. The information collection under 2900–0219 has a current Paperwork Reduction Act (PRA) clearance that expires on October 31, 2024. If OMB does not approve the revision to this collection of information, as requested, VA will immediately remove the provisions containing the collection of information or take such other action as is directed by OMB.

The collection of information associated with this rulemaking contained in 38 CFR 17.272 addresses only the revised number of respondents attributable to this rulemaking. OMB previously approved the part of the information collection under 2900–0219 related to filing of CHAMPVA health benefits claims using VA Form 10–7959a for a total of 9,167 burden hours, based on an estimate of 55,000 respondents annually. Section 17.272(a)(44) would remove the exclusion of CHAMPVA benefits coverage for audio-only telehealth. Previously denied claims for audio-only telehealth would have to be resubmitted by the provider, or by the CHAMPVA beneficiary if the beneficiary has already paid for that medical service, using VA Form 10–7959a with supporting evidence. VA anticipates that the number of respondents submitting claims will increase as a result of this rulemaking. Applying the anticipated increase to 74,914 annual respondents, at 10 minutes per response, VA estimates an increase in the annual burden to 12,486 hours for respondents submitting claims using VA Form 10–7959a.

Estimated cost to respondents per year: VA estimates the annual cost to respondents to be $371,583.36. This is based on Bureau of Labor Statistics mean hourly wage data for BLS wage code ''00–0000 All Occupations'' of $29.76 per hour × 12,486 hours.

A notice of this revision to the information collection under 2900–0219 was published in the proposed rule on October 24, 2022, at 87 FR pages 64190–64196. VA did not receive any public comments related to the increase in the burden hours for the revised information collection.

Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as not a major rule, as defined by 5 U.S.C. 804(2).

List of Subjects in 38 CFR Part 17

Administrative practice and procedure, Claims, Health care, Health facilities, Health professions, Health records, Medical devices, Mental health programs, Veterans.

Signing Authority

Denis McDonough, Secretary of Veterans Affairs, approved this document on April 17, 2024, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

Consuela Benjamin,

Regulations Development Coordinator, Office of Regulation Policy & Management, Office of General Counsel, Department of Veterans Affairs.

For the reasons stated in the preamble, the Department of Veterans Affairs (VA) amends 38 CFR part 17 as follows:

PART 17—MEDICAL

■ 1. The general authority citation for part 17 continues to read as follows:

Authority: 38 U.S.C. 501, and as noted in specific sections.

* * * * *

■ 2. Amend § 17.272 by:
■ a. Revising paragraphs (a)(28) and (a)(44);
■ b. Removing paragraphs (a)(57) through (62);
■ c. Redesignating paragraphs (a)(63) through (83) as paragraphs (a)(57) through (77), respectively.

The revisions read as follows:

§ 17.272 Benefits limitations/exclusions.

(a) * * *

(28) Nonprescription contraceptives, except those non-prescription contraceptives used as emergency contraceptives.

* * * * *

(44) Telephone Services, with the following exceptions:

(i) Services or advice rendered by telephone (audio only) on or after May 12, 2020, are not excluded when the services are otherwise covered CHAMPVA services provided through this modality and are medically necessary and appropriate.

(ii) A diagnostic or monitoring procedure which incorporates electronic transmission of data or remote detection and measurement of a condition, activity, or function (biotelemetry) is covered when:

(A) The procedure, without electronic data transmission, is a covered benefit;

(B) The addition of electronic data transmission or biotelemetry improves the management of a clinical condition in defined circumstances; and

(C) The electronic data or biotelemetry device has been classified by the U.S. Food and Drug Administration, either separately or as part of a system, for use consistent with the medical condition and clinical management of such condition.

* * * * *

§ 17.273 [Amended]

■ 3. Amend § 17.273 by removing paragraph (c), and redesignating paragraphs (d) through (f) as paragraphs (c) through (e), respectively.

■ 4. Amend § 17.274 by adding paragraph (f) to read as follows:

§ 17.274 Cost sharing.

* * * * *

(f) Cost sharing and annual deductible requirements under paragraphs (a) and (b) of this section do not apply to:

(1) Insertion, removal, and replacement of intrauterine systems, contraceptive implants, or similar FDA approved, granted, or cleared contraceptives that require insertion, removal, and replacement by a health care provider;

(2) Measurement for, and purchase of, contraceptive diaphragms or similar FDA approved, cleared, or granted medical devices, including remeasurement and replacement;

(3) Administration of injectable contraceptives or similar FDA approved, granted, or cleared contraceptives that require administration by a health care provider;

(4) Prescription contraceptives, and prescription or nonprescription contraceptives used as emergency contraceptives, approved, granted, or cleared by the FDA;

(5) Surgical sterilization; and

(6) Outpatient care or evaluation associated with provision of family planning services listed in paragraphs (f)(1) through (5) of this section.

[FR Doc. 2024–09072 Filed 4–29–24; 8:45 am]

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R01–OAR–2023–0188; FRL–11025–03–R1]

Air Plan Approval; New Hampshire; Reasonable Available Control Technology for the 2008 and 2015 Ozone Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving State Implementation Plan (SIP) revisions submitted by the State of New Hampshire. The revisions establish NO_X reasonably available control technology (RACT) requirements for coal-fired cyclone boilers located in the state, portions of New Hampshire's NO_X RACT certifications for the 2008 and 2015 ozone standards that pertain to requirements for coal-fired cyclone boilers, and withdrawal from the SIP of two previously issued RACT orders. This action is being taken in accordance with the Clean Air Act (CAA).

DATES: This rule is effective on May 30, 2024.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R01–OAR–2023–0188. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *i.e.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available at *https://www.regulations.gov* or at the U.S. Environmental Protection Agency, EPA Region 1 Regional Office, Air and Radiation Division, 5 Post Office Square—Suite 100, Boston, MA. EPA requests that if at all possible, you contact the contact listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding legal holidays and facility closures due to COVID–19.

FOR FURTHER INFORMATION CONTACT: Bob McConnell, Environmental Engineer, Air and Radiation Division (Mail Code 5–MD), U.S. Environmental Protection Agency, Region 1, 5 Post Office Square, Suite 100, Boston, Massachusetts, 02109–3912; (617) 918–1046; *mcconnell.robert@epa.gov*.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever ''we,'' ''us,'' or ''our'' is used, we mean EPA.

Table of Contents

I. Background and Purpose

On July 10, 2023 (88 FR 43483), EPA published a Notice of Proposed Rulemaking (NPRM) for the State of New Hampshire. The NPRM proposed to determine that the State has adopted regulations meeting the requirements for reasonably available control technology (RACT) for the 2008 and 2015 ozone national ambient air quality standards (NAAQS), to approve amendments to a related regulation that New Hampshire revised as part of its RACT certifications for these two NAAQS, to approve a revision to the State's definition of emergency generator, and removal from the SIP of two previously issued RACT orders affecting coal-fired cyclone boilers operated by Merrimack Station located in Bow, New Hampshire. EPA received a comment letter from the Sierra Club dated August 9, 2023, that opposed New Hampshire's NO_X RACT limits applicable to coal-fired cyclone boilers. We approved the portions of the proposal unaffected by this comment letter in a final rule published on September 6, 2023 (88 FR 60893). In this final rule, we are approving the remaining portions of these SIP revisions, which include requirements within New Hampshire's Env-A 1300 establishing RACT requirements for coal-fired electrical cyclone boilers, the portions of New Hampshire's NO_X RACT certifications for the 2008 and 2015 ozone standards that pertain to requirements for coal-fired cyclone boilers, and we are taking final action to withdraw from the New Hampshire SIP two RACT orders that contain less stringent requirements for cyclone boilers. Please see our July 10, 2023 proposed rule for additional background

and a more detailed explanation of our proposed action.

II. Response to Comments

As mentioned, we received one comment letter on our July 10, 2023 proposed approval, which was from the Sierra Club and expressed opposition to the proposed approval of New Hampshire's (NH's) NO_X RACT requirements applicable to the coal-fired cyclone boilers operated by Granite Shore Power at its Merrimack Station electrical generating facility located in Bow. Our responses to the comments raised by Sierra Club appear below.

Comment: Sierra Club commented that the emission rate of 0.22 lbs/MMBtu for two coal-fired cyclone boilers at Merrimack Station, herein referred to as units MK1 and MK2, is inadequate as RACT. Sierra Club commented that, since 2018, MK1 and MK2 consistently demonstrated the ability to meet a 24-hour average emission rate at or below 0.20 lbs/MMBtu, which is 10% lower than NH's emissions limit of 0.22 lbs/MMBtu, and thereby asserted that the state's limit is too lenient.

Response: New Hampshire developed its NO_X RACT emissions limits for MK1 and MK2 in consideration of a number of factors. One such factor was the observation that the selected emissions limit of 0.22 lbs NO_X/MMBtu represented emission reductions of 83% and 91% from uncontrolled levels for MK1 and MK2, respectively,[1] which is a high level of control. Given MK2's larger size and emissions, the emissions weighted average reduction from uncontrolled levels for both units combined is 88% based on emissions data for 2022. This level of control is near the upper end of the emission reduction capability of selective catalytic reduction (SCR) control systems as noted within EPA control technology explanatory materials, such as the agency's fact sheet on SCR NO_X control technology, which indicates a control range of between 70–90% is achievable from such systems.[2] Additionally, correspondence dated May 25, 2018 from the facility owner, Granite Shore Power, to the New Hampshire DES indicated that a more restrictive normal operating mode emission rate of 0.20 lbs/MMBtu on a 24-hr basis that was originally considered by NH DES was beyond the original emission reduction control capability of the units when they were newly installed. Granite Shore Power reiterated this point in a January 17, 2020 correspondence to the New Hampshire DES concerning regional haze requirements in which they note that the revised NO_X RACT limits ''represent the most effective use of the SCR, given that the system must be operated year round at or above its design capacity to demonstrate compliance.''

In 2018 as New Hampshire was developing its NO_X RACT emissions limit for MK1 and MK2, the state reviewed the emissions data from the continuous emissions monitoring systems (CEMS) on the units collected in 2000, when the equipment was newly installed, through 2007. Merrimack Station installed a second SCR control unit in 1999 due to the Ozone Transport Region (OTC) NO_X budget program. Previously only one of the Merrimack Station units had SCR, installed circa 1995. This period of time coincides with the period of time that Electric Generating Units (EGUs) in New Hampshire had new emission control obligations under the OTC's NO_X Budget program.[3] This program began in 1999 and continued through 2002, at which point most of the EGUs transitioned to the EPA's first ozone season NO_X control program, that being the NO_X SIP Call.[4] Although EGUs in New Hampshire were not required to participate in the EPA's NO_X SIP Call program, New Hampshire maintained, as an anti-backsliding measure, the OTC NO_X Budget program's ozone season cap for sources located in the state, including MK1 and MK2, beyond 2002. EPA facilitated oversight of New Hampshire's post-2002 NO_X Budget program by creating a separate account referred to as the ''NH NO_X Program'' on its Clean Air Markets Program Data (CAMPD) website.[5]

New Hampshire's selection of 0.22 lbs NO_X/MMBtu, to be met on a 24-hour averaging time basis, is reasonable from a statistical perspective. The emissions limit New Hampshire chose corresponds to the emissions rate representative of the 95th percentile emissions rate for days of operation without a startup or shutdown event. In other words, MK1 and MK2 operated at or below an emission rate of 0.22 lbs NO_X/MMBtu 95 percent of the time between 2000 and 2007, which as mentioned above coincided with the time period when the SCR controls were newly installed and MK1 and MK2 were subject to the requirements of the OTC's NO_X budget program that began in 1999.

The data Sierra Club show in Table 2 of their comment letter are based on monthly averages, whereas the limits being approved herein for Merrimack Station are short term, 24-hour averages. Shorter term limits are harder to meet and require that the control system be consistently and effectively run. Conversely, a 30-day average can be met despite days on which the controls are not run effectively, or perhaps not run at all, as long as there are enough days of operation below the emission limit to average this out. If the short-term emissions limit NH requires for MK1 and MK2 were set at a lower rate, such as 0.20 or below as Sierra Club suggests, there would be many days with violations due to minor fluctuations in the rate of the chemical reaction that occurs between the catalyst system, ammonia, and oxygen, which accomplishes the reduction in NO_X emissions in the effluent from the equipment. NH reviewed historic data and identified periods of time when the facility's controls produced low daily emissions rates. Importantly, during those past time periods, the facility was not required to meet a 24-hour emissions rate. By imposing a new, 24-hour emissions limit, NH had to choose an emissions rate that was feasible, given the normal fluctuations in the boiler and control system operations, that the facility could reasonably be expected to meet every day. Although historic data showed the facility could meet a 0.22 rate 95% of the time, that also means that it did not meet that rate 5% of the time. It now will be required to meet that rate 100% of the time. A description of how SCR control systems operate and the various aspects of the induced chemical reaction that occurs to change the nitrogen oxides released from the combustion process to elemental nitrogen and water vapor is contained within the SCR Air Pollution Control Fact Sheet included in the docket for this final rule.

New Hampshire also considered limits adopted by other states for similar equipment in making its NO_X RACT determination, but could not find reasonable comparisons based on coal type, boiler design type, boiler age, and control technology. This point is discussed in further detail below. Lastly, we note that the SCR control systems operated by Merrimack Station

[1] NH based its emission reduction calculations on the uncontrolled levels observed during stack tests for MK1 and MK2.

[3] EPA approved the program New Hampshire developed to comply with the OTC's NO_X Budget program into the NH SIP on November 14, 2000 (see 65 FR 68078).

[4] See EPA's October 27, 1998, (63 FR 57356) final rulemaking action known as the NO_X SIP Call.

[5] The NO_X emissions data for the New Hampshire's EGU's, including MK1 and MK2, are still maintained on the CAMPD website by retrieving data under the program name ''NH NO_X Program''.

were amongst the first such units installed on coal-fired electric utility boilers in the U.S., with MK2's SCR being installed in 1995, and MK1's in 1999. Despite the age of the control equipment, the overall NO_X control efficiency as noted above remains at a high level. Additionally, as explained further in the TSD accompanying this final action, by observing the hourly emissions rate data available from EPA's Clean Air Markets Program Database (CAMPD) website it can be clearly seen that achievement of this rate on a 24-hour averaging time basis requires the continuous operation of the SCR controls, as even one or two hours of operation without the controls engaged while heat input is high would jeopardize achievement of the short term, 0.22 lbs/MMBtu emission limit.

Comment: Sierra Club commented that other coal-fired cyclone boilers are required to meet lower emissions limits and included data for other cyclone boilers to support its claim. Sierra Club also provided data on NO_X emission rates at Merrimack Station and asserted that lower NO_X emission rates are achievable and should be required by RACT.

Response: EPA agrees that there are other coal-fired cyclone boilers that are required to meet lower emissions limits. However, EPA's review of the characteristics of the coal-fired cyclone boilers identified as such within its Clean Air Markets and National Electric Energy Data System (NEEDS) databases and operating since 2009 indicates that only two units, the now closed Dallman units 31 and 32 in Illinois, have technical specifications similar to the Merrimack units in that they were bituminous coal fired cyclone boilers whose NO_X emissions were controlled solely by SCR. However, those units are not directly comparable to MK1 and MK2 for a number of reasons, including their smaller size, newer age of the SCR control equipment, and for comparison to MK2, that unit's inordinately high uncontrolled emission rate of 2.4 lbs. NO_X/MMBtu, which is considerably higher than the average emission rate for bituminous coal-fired cyclone boilers of 1.3 lbs/MMBtu as documented within Table 1.1–3 of section 1.1 of EPA's emissions factors reference document, AP–42. Although we did identify several other bituminous coal-fired cyclone boilers within EPA databases, those boilers operated additional NO_X control equipment not used by MK1 and MK2, most often overfire air (OFA) systems. The boilers located at the New Madrid and Thomas Hill facilities in Missouri noted by Sierra Club also operate OFA systems in addition to the SCR control system. Granite Shore Power (GSP), Merrimack Station's owner, recently evaluated the feasibility of retrofitting its cyclone boilers with additional NO_X emission control equipment including an overfire air system as part of a technical analysis it performed at the request of the New Hampshire Air Resources Division (NH–ARD). The state made this request as it developed its SIP revision for the Regional Haze program. As New Hampshire notes within its May 5, 2022, Regional Haze Plan, GSP concludes that retrofitting MK1 and MK2 was not feasible for the following reason:

''*OFA would result in reduced boiler performance, potential boiler modifications to boiler surface areas, increased fouling, boiler tube erosion, and cyclone wear. Any installation is complicated by, if not impossible, due to the engineering and design challenges of the windbox configuration and screen tubes at Merrimack. In addition, the installation of an OFA system after the installation of an SCR is likely to produce little to no improvement in NO_X reductions. Any of these changes would also have the potential to negatively impact the removal capability of the FGD (flue gas desulfurization)*[6] *and the collection capability of the ESPs (electrostatic precipitators*[7]*).*'' As documented within section 4.2.9 of its May 5, 2022, Regional Haze Plan Periodic Comprehensive Revision, New Hampshire reviewed and agreed with Granite Shore Power's assessment that NO_X emissions from the coal-fired boilers at Merrimack Station are well controlled and subject to appropriate NO_X emissions limits. Large boilers like these vary considerably in their design and operational characteristics, and so retrofits possible for some equipment may not be possible elsewhere.

EPA has reviewed New Hampshire's assessment of the information provided by GSP and agrees with the state's conclusion that requiring installation of new equipment at the Merrimack units, such as OFA, is not economically feasible for purposes of RACT. The facility is scheduled to permanently cease coal-fired boiler operations no later than June 1, 2028 as indicated by a recent agreement between Granite Shore Power, the EPA, the Sierra Club, and the Conservation Law Foundation.[8] Leading up to this cessation in operations, there is a declining need for output from the facility by the region's electrical grid operator, ISO-New England; there has been limited or non-acceptance of offers to produce electricity from this facility in the forward capacity auctions conducted by ISO-New England.[9] Given this limited remaining use of these units, combined with the fact that the facility's current SCR NO_X control systems already achieve a high level of control, the cost of new controls per ton of emission reduction achieved is not economically feasible for purposes of RACT.

Comment: Sierra Club commented that other states require lower emissions limits for coal-fired power plants. In its comments, Sierra Club asserted that several other states, including Pennsylvania, New Jersey, Maryland, and Delaware, impose lower emission limits at coal-fired power plants.

Response: EPA agrees that other states require lower emissions limits for coal-fired cyclone boilers. However, as noted above, New Hampshire and EPA have not identified coal-fired boilers that offer an appropriate or equivalent comparison to the units at Merrimack Station. Sierra Club points to lower short-term emission limits adopted by other states for coal-fired boilers, such as Delaware's 0.125 lbs/MMBtu limit based on a 24-hour averaging time, and Maryland's 0.10 lbs/MMBtu limit which is also based on a 24-hour averaging time and includes all modes of operation. However, none of the coal-fired boilers in these states match the type of boiler and fuel type of Merrimack Station's boilers, which as mentioned are bituminous fueled cyclone boilers operating only SCR controls that were installed many years ago. The only coal-fired electric utility boiler in Delaware is located at the Indian River Generating Station in Dagsboro and is a dry-bottom, turbo-fired boiler. Regarding Maryland, the coal-fired boiler located at the AES Warrior Run Cogeneration facility in Cumberland is an atmospheric circulating fluidized bed boiler, the two coal boilers at Brandon Shores are both dry bottom boilers with circular wall burners, and the coal boiler at Wagner Station is a supercritical steam boiler. Therefore, EPA concludes from a technical perspective that limits deemed RACT for these specific units in New

[6] FGD systems are used to reduce emissions of sulfur dioxide and mercury.

[7] ESP systems are used to reduce emissions of particulate matter.

[8] A copy of the press releases from Conservation Law Foundation, Sierra Club, and Granite Shore Power announcing the closure agreement is included in the docket for the rule.

[9] The results of ISO New England's 17th Forward Capacity Auction, which is for the time period June 1, 2026 through May 31, 2027, indicates that bids to offer power to the New England grid from MK1 and MK2 were not accepted for this time period. See: *https://www.iso-ne.com/static-assets/documents/2023/03/fca_17_results_filing.pdf.*

Hampshire [10] should be higher than limits in Delaware and Maryland.

Sierra Club also points to RACT limits for coal-fired boilers located in Pennsylvania that EPA recently finalized with a Federal Implementation Plan published in the **Federal Register** on August 31, 2022,[11] as an example of more restrictive emissions limits in other states relative to what New Hampshire has required for the coal units at Merrimack Station. A number of factors differentiate the units at Merrimack Station compared with those located in Pennsylvania. For example, none of the Pennsylvania units are of the high-emitting, cyclone boiler configuration as both units at Merrimack Station. Additionally, the Merrimack Station boilers are much smaller than the Pennsylvania units. Most of the units addressed in the Pennsylvania RACT FIP are between 600 and 900 MW, whereas the Merrimack units are around 100 MW and 300 MW. As a result of their smaller size, the Merrimack units have considerably lower annual emissions. Over the past five years (2019 through 2023), the total annual NO_X emissions from both Merrimack units ranges from 175 to 500 tons/year. As a point of comparison, the Keystone and Conemaugh facilities in Pennsylvania each had average annual NO_X emissions over 4500 tpy since 2019. The low annual emissions at Merrimack combined with their very low utilization and required stop of use in 2028 leads to any additional controls at Merrimack being not economically feasible for purposes of RACT.

Comment: Sierra Club commented that recent air pollution transport rules such as the Revised Cross-State Air Pollution Rule Update (RCU) for the 2008 ozone NAAQS and the Good Neighbor Plan (GNP) for the 2015 ozone standard contain more restrictive emission rates than what New Hampshire requires for NO_X limits for MK1 and MK2.

Response: The requirements within EPA's transport rules do not offer legitimate comparisons to the emission limits New Hampshire has set as RACT limits for Merrimack Station's coal-fired cyclone boilers for a number of reasons. First, regarding the RCU, EPA did not establish short term emission limits for coal-fired EGU boilers within that rule, but rather only imposed ozone season,[12] mass-based emissions budgets. These budgets were based in part on a statistical analysis showing that coal-fired EGUs equipped with existing SCR are capable of achieving an emissions rate of 0.08 lbs/MMBtu *on a fleetwide average and over an entire ozone season.* Additionally, the RCU allows a facility to remain in compliance if the facility holds sufficient emissions allowances to cover the amount of emissions produced. *See* 86 FR 23056, 23090 (April 30, 2021). New Hampshire's RACT emissions limits are structured much differently, requiring that the facility meet a NO_X emissions rate of 0.22 lbs/MMBtu on a short-term, 24-hour averaging time basis. Additionally, the historical data New Hampshire analyzed for these particular units indicate that this is near the limit of what SCR at these units is capable of achieving. As explained elsewhere in this notice, emissions limits with short averaging times are more difficult to meet because there is less time to offset emissions that occur while operating above the emissions limit with emissions produced during times of operation below the limit.

Regarding comparisons to the NO_X reductions required of electric utility boilers subject to the GNP, a statistical analysis similar to the RCU of fleetwide emissions performance over an entire ozone season informed the identification of emissions rates used to set state-level EGU budgets. Thus, similar to the RCU as mentioned above, these rates do not offer a good comparison to the short-term limits New Hampshire requires for MK1 and MK2. Although the GNP, unlike the RCU, adds an additional, short term, 24-hour average backstop daily rate of 0.14 lbs NO_X/MMBtu for coal-fired boilers with SCR,[13] there are substantial differences in how EPA established and will implement that backstop rate within the trading program versus how New Hampshire established and implements its NO_X RACT limits for Merrimack Station's coal-fired boilers. First, we note that the GNP's 24-hour backstop rate will only apply to emissions during the ozone season that exceed by more than 50 tons a daily average NO_X emissions rate of 0.14 lb/MMBtu. New Hampshire's limits apply year-round and do not excuse the first 50 tons, or any amount of emissions, that exceed its emissions limits.[14] Furthermore, the GNP's 24-hour backstop rate, if exceeded beyond the 50 ton exemption mentioned above, can be complied with via the surrender of emissions allowances at a 3 for 1 surrender ratio; New Hampshire's limits do not offer this type of compliance option. Additionally, we note that EPA determined its 24-hour backstop daily rate based on a review of the average emitting characteristics of most coal fired boilers in operation during 2021. New Hampshire determined the NO_X RACT emission rates for the Merrimack Station boilers based on the emitting and operational characteristics of these specific units. In the GNP, the EPA observed that even units considered to be running their controls optimally had some days (most often less than 5% of days) where the rates were higher. However, the emission increases on these days were minimal. EPA used a similar methodology in employing the 95th percentile of observed daily operating emissions rates in selecting the backstop daily emissions rate for SCR-controlled coal boilers in the GNP.[15] As an example, for a unit with a seasonal rate of 0.08 lbs NO_X/MMBtu, EPA determined that it would be expected that, on average, about 4.7% of the daily rate values would be higher than 0.14 lb/MMBtu.

Comment: Sierra Club commented that NH's emissions limits for a different coal-fired electrical generating facility in the state, Schiller Station, are only slightly higher than those for Merrimack Station, despite the fact that the Schiller Station units controlled by SNCR, a less effective control strategy, inferring that Merrimack Station's more capable SCR controls are not being as effectively run as they should be.

Response: EPA agrees that New Hampshire has imposed NO_X emissions limits on the coal-fired boilers at Schiller Station of 0.25 lbs/MMBtu that are only slightly higher than the limits imposed on the Merrimack Station units, despite the latter operating SCR controls, and the former operating less effective SNCR controls. However, this is not indicative of unduly lax

[10] RACT is defined, in part, as ''the lowest emissions limitation a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility'' (44 FR 53762; September 17, 1979).

[11] See 87 FR 53381.

[12] The ozone season encompasses the 153-day period from May 1 to September 30.

[13] See footnote 3.

[14] As will be discussed later in this document, New Hampshire imposed separate, mass-based emissions limits for days with a startup or shutdown event.

[15] See 88 FR 36654, 36792 (June 5, 2023). We note that in contrast to the derivation of the GNP's daily limits, wherein EPA concluded that SCR optimized units (*i.e.,* units that were running their SCR controls effectively) were those able to achieve a 0.08 lbs/MMBtu ozone season emission rate, NH's NO_X RACT evaluation points to the high percent reduction from uncontrolled levels as an indicator of effective operation of SCR controls. Using a 0.08 ozone season emission rate as a basis for setting emissions limits for MK1 and MK2 would have been inappropriate because of their much higher uncontrolled emission levels relative to the units governed by the GNP.

requirements for units MK1 and MK2 relative to the Schiller units, but rather, points to the higher uncontrolled NO_X emission rates for the Merrimack Station units relative to the Schiller units. According to Table 1.1–3 of AP–42, the uncontrolled NO_X emissions rate for Merrimack Station's bituminous fueled cyclone boilers is 33 lbs of NO_X per ton of coal burned, which is the highest emission rate for any type of coal fired boiler listed within the table.[16] Schiller Station operates two dry-bottom, wall-fired coal boilers, which AP–42 indicates have an uncontrolled emissions rate of 22 lbs of NO_X per ton of coal burned, and a fluidized bed boiler, which AP–42 indicates has an uncontrolled emissions rate of between 5.0 to 15.2 lbs of NO_X per ton of coal burned. Given the differences in uncontrolled emission rates and NO_X control technology of the coal-fired boilers at these facilities, comparisons of the NO_X emissions rates do not offer an effective means of gauging the stringencies of the applicable emissions rates. The Merrimack Station units operate the more costly, more effective NO_X control equipment compared to what the Schiller Station units run; technical resources that describe the control effectiveness of various NO_X emission reduction control techniques rank SCR control systems higher than SNCR control systems.[17]

Comment: Sierra Club commented that in light of recent information showing that SCR control systems can be operated at low-temperature levels that occur during periods of startup and shutdown with no detriment to control efficacy or longevity, New Hampshire does not need to allow the units to emit more on days when these operating modes occur by providing daily emission limits of 4.0 and 11.5 tons per day for MK1 and MK2, respectively.

Response: In the aforementioned response to comments received on its proposed Regional Haze SIP, New Hampshire notes that approximately one fourth of the operating hours in the year prior to the establishment of the NO_X RACT emission rates in question were hours spent in startup or shutdown modes when operating conditions, in particular temperature, did not permit the operation of the SCR control systems. The state therefore concluded that setting one overall emissions limit that combined the hours spent in startup and shutdown mode, during which the SCR controls would not operate, with the hours spent in steady state operation, during which the SCR controls would operate, would have necessitated issuance of an all-encompassing emissions limit higher than the limit New Hampshire ultimately decided upon for times of steady state operation. By choosing to adopt separate limits for these operating modes, New Hampshire's emissions rate structure requires that MK1 and MK2 meet a lower emissions rate for the majority of the time it is operating, that being operation under steady state conditions with the SCR control equipment functioning. A separate alternate emission limit (AEL) applicable during startup and shutdown modes ensures that the emissions that occur during those times are also subject to an emissions cap as well as recordkeeping requirements to document the dates and time spent in startup or shutdown mode. As noted within the update to section 2 of the technical support document included within the docket for this action, the AEL in conjunction with requirements contained within Env-A 1300 and the facility's Title V operating permit mean that the SCRs must be turned on expeditiously once high levels of coal loading begin in order to avoid exceeding the tons/calendar day limit of the AEL.

Sierra Club refers to a sorbent injection technology that can reduce the operating temperature range of the SCR and potentially reduce NO_X emissions at low loads. NHDES reviewed the provided references, which describe the technology as allowing the coal-fired boilers operated by Duke Power's Gibson facility to operate its SCRs at a lower temperature than would otherwise be possible, and also enable the coal boilers to run at low loads while still minimizing emissions. NHDES notes, however, that MK1 and MK2 SCRs are not designed to operate at lower temperatures, nor are the boilers intended to operate at low electrical output loads, and so even if modifications were made such that the SCR control equipment could function at lower temperature there would be little benefit, from an emissions reduction perspective, to installing additional controls to enable this. The small benefit in emissions reductions for operating the SCR at lower temperatures is partially due to the level and averaging period of the AEL, which significantly limits the time that these boilers can operate with high fuel input without the SCRs, and therefore limits the amount of total emissions because the units would exceed the 4 tons per day emission limit if they operated with high fuel input without the SCRs in operation.[18] Therefore, NHDES concluded that a lowering of the temperature at which the SCR controls could operate during startup and shutdown would not justify the significant capital costs it would take to install the new control technology Sierra Club mentions. New Hampshire notes that in 2021, MK1 and MK2 operated for approximately 2,155 hours and were started up approximately 26 times. Assuming that the sorbent injection technology mentioned in Sierra Club's comments could lower the temperature at which MK1 and MK2 could operate their SCR controls such that they could be used for an additional hour during startup, this would have resulted in a relatively minor, incremental emission reductions[19] by allowing 26 additional hours of SCR operating time out of 2,155 overall boiler operating hours.

We have reviewed Sierra Club's comment that additional emissions control technology be required for startup and shutdown operations, and New Hampshire's rationale for not requiring it, and agree with the state's conclusion that the additional cost of evaluating, installing, and operating control technology to limit emissions during startup and shutdown is unlikely to be economically feasible given the minimal amount of emissions it would curtail. Furthermore, the recordkeeping and reporting requirements of New Hampshire's NO_X RACT regulation enable the state to effectively oversee operations at the facility, including operations during startup and shutdown. For example, the state's oversight requirements recently led to the issuance of an August 23, 2023 letter requesting more information regarding four exceedances of the startup emissions limit that occurred between December 8, 2021, and July 7, 2023.[20] A

[16] See Table 1.1–3, Emission Factors for SO_X, NO_X, and CO From Bituminous and Subbituminous Coal Combustion, within section 1.1 of AP–42: *https://www.epa.gov/sites/default/files/2020-09/documents/1.1_bituminous_and_subbituminous_coal_combustion.pdf.*

[17] See, for example, Table 1.1–2, NO_X Control Options for Coal-fired Boilers within Section 1.1, Bituminous and Subbituminous Coal Combustion, of AP–42, and EPA's Air Pollution Control Technology Fact Sheets for SNCR and SCR control systems, included within the docket for this action.

[18] For a further explanation and example of this behavior, see the TSD that accompanies this final action.

[19] EPA reviewed the difference in emissions between the last hour of non-SCR operation and the first hour of SCR operation and found that if MK1 could have begun SCR controls 1 hour earlier during each startup in 2021, 3.4 tons of NO_X would have been prevented, and for MK2, 8.6 tons would have been prevented.

[20] A copy of New Hampshire's August 23, 2023 letter to Granite Shore Power is included in the docket for this action.

total of 16.4 tons of excess emissions occurred on these days, and the state is currently evaluating the appropriate enforcement response to these violations.

Comment: Sierra Club also commented that New Hampshire's requirements are not sufficient for regional haze purposes.

Response: This comment is not germane to the subject matter of this action which pertains to New Hampshire's NO_X RACT requirements for coal-fired cyclone boilers and does not address regional haze requirements. Therefore, EPA is not addressing this comment here.

III. Final Action

EPA is approving RACT requirements limiting NO_X emissions from coal-fired cyclone boilers powering electrical generating units that are codified within New Hampshire Air Pollution Control Regulation Env-A 1300: Nitrogen Oxides (NO_X) RACT, portions of New Hampshire's NO_X RACT certifications for the 2008 and 2015 ozone standards that pertain to requirements for coal-fired cyclone boilers, and withdrawal from the SIP of two previously issued RACT orders containing emission limits for this equipment that are less stringent than what is contained within the provisions of Env-A 1300 that we are approving within this action.

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of portions of New Hampshire Air Pollution Control Regulation Env-A 1300, Nitrogen Oxides (NO_X) RACT; specifically, incorporating by reference Env-A 1303.06(b) and (c) pertaining to the coal-fired cyclone boilers at Merrimack Station, as described in the amendments to 40 CFR part 52 set forth below. The EPA has made, and will continue to make, these documents generally available through *https://www.regulations.gov* and at the EPA Region 1 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by EPA for inclusion in the State implementation plan, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.[21]

EPA is also finalizing the removal of provisions within Table (d) of 52.1520 pertaining to these coal-fired cyclone boilers by removing Permits ''Order ARD–97–001: Source specific NO_X RACT Order for Public Service of New Hampshire, Bow, NH; state effective date 4/14/1997'' and ''Order ARD–98–001: Source-specific NO_X RACT order and discrete emission reduction protocols for Public Service of New Hampshire; state effective date 7/17/1998'' as described in the amendments to 40 CFR part 52 set forth below.

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. EPA defines environmental justice (EJ) as ''the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.'' EPA further defines the term fair treatment to mean that ''no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.''

The New Hampshire Department of Environmental Services did not evaluate environmental justice considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. EPA did not perform an EJ analysis and did not consider EJ in this action. Due to the nature of the action being taken here, this action is expected to have a neutral to positive impact on the air quality of the affected area. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of E.O. 12898 of achieving environmental justice for people of color, low-income populations, and Indigenous peoples.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a

[21] 62 FR 27968 (May 22, 1997).

copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 1, 2024. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Nitrogen dioxide, Ozone.

Dated: April 18, 2024.

David Cash,

Regional Administrator, EPA Region 1.

Part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart EE—New Hampshire

■ 2. In § 52.1520:

■ a. Amend the table in paragraph (c) by revising the entry for ''Env-A 1300'';

■ b. Amend the table in paragraph (d) by removing the entries for ''Source specific NO_X RACT order for Public Service of New Hampshire, Bow, NH'' and ''Source-specific NO_X RACT order and discrete emission reduction protocols for Public Service of New Hampshire''; and

■ c. Amend the table in paragraph (e) by revising the entry for ''Certifications for RACT for the 2008 and 2015 ozone standards''.

The revisions read as follows:

§ 52.1520 Identification of plan.

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Indian Health Service

42 CFR Part 136

RIN 0917–AA24

Removal of Outdated Regulations

AGENCY: Indian Health Service, Department of Health and Human Services.

ACTION: Final rule.

SUMMARY: The Indian Health Service (IHS) of the Department of Health and Human Services (HHS or ''the Department'') is issuing this final rule to remove outdated regulations that do not align with the current statutory text.

DATES: This final rule is effective May 30, 2024.

FOR FURTHER INFORMATION CONTACT: Joshuah Marshall, Senior Advisor to the Director, Indian Health Service, 5600 Fishers Lane, Rockville, MD 20857, email: *joshuah.marshall@ihs.gov,* telephone: 301–443–7252.

SUPPLEMENTARY INFORMATION:

I. Background

On January 27, 1982, the IHS published regulations imposing restrictions on the use of Federal funding for certain abortions, currently codified at 42 CFR 136.51 through 136.57.[1] These regulations implementing IHS program authority pursuant to 25 U.S.C. 13 and 42 U.S.C. 2001 allowed the use of IHS funds for abortions only when a physician certified that ''the life of the mother would be endangered if the fetus were carried to term.'' This restriction was to be consistent with a provision in the annual appropriations legislation for the Departments of Labor, Health and Human Services, and Education, sometimes referred to as the ''Hyde Amendment,'' that restricted the use of Federal funds for certain abortions, which did not automatically apply to IHS funding.[2] The purpose of these IHS regulations was specifically ''to conform IHS practice to that of the rest of the Department [of Health and Human Services] in accordance with the applicable congressional guidelines.'' [3] In 1988, Congress enacted 25 U.S.C. 1676, explicitly extending any limitations on the use of funds included in HHS appropriations laws with respect to the performance of abortions to apply to funds appropriated to IHS. As such, IHS became subject to the Hyde Amendment as included in annual appropriations legislation.

Since the IHS promulgated these regulations in 1982, Congress has repeatedly revised annual restrictions related to the use of Federal funds for certain abortions. In fiscal year 1994, for instance, Congress revised the Hyde Amendment to include additional exceptions to the general prohibition on the use of Federal funds for abortions, including in instances in which a pregnancy is the result of an act of rape or incest.[4] Similarly, in fiscal year 1998, Congress also altered the standards for when the ''life of the mother'' may be considered an exception.[5] As relevant here, the Hyde Amendment currently provides that no covered funds ''shall be expended for any abortion'' or ''for health benefits coverage that includes coverage of abortion,'' except ''if the pregnancy is the result of an act of rape or incest; or . . . in the case where a woman suffers from a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would, as certified by a physician, place the woman in danger of death unless an abortion is performed.'' [6]

The current IHS regulations do not align with the current text of the Hyde Amendment or with 25 U.S.C. 1676. The IHS has complied with, and will continue to comply with, the statutory exceptions; has clarified its compliance with the statutory limitations through policy directives; [7] and now removes these outdated regulations in their entirety.[8] Doing so will eliminate any potential confusion regarding these outdated regulations and will ensure alignment with the applicable congressional restrictions governing HHS given Congress's enactment of 25 U.S.C. 1676, which independently aligns relevant restrictions applicable to the IHS and HHS. Regulations on this subject are not necessary to implement the IHS's authority. Nor are they necessary to comply with statutory directives. Moreover, amending the regulations to reflect the current Hyde Amendment could cause additional confusion in the future if Congress changes the annual appropriations language, as it has in the past.

II. Development of Rule

The IHS published a notice of proposed rulemaking in the **Federal Register** on January 8, 2024 (89 FR 896), with a sixty-day comment period, which closed on March 8, 2024. Notification regarding a Tribal consultation session was sent via a Dear Tribal Leader Letter on January 17, 2024. The consultation session was conducted virtually on February 27, 2024. The IHS has reviewed public comments it received and addresses them below.

III. Comments

The IHS received six written comments.[9] Two of the written comments were generally in favor of the removal. These two written comments were submitted by: (1) an individual and (2) a group of 20 individuals and advocacy organizations. Four of the written comments were generally opposed to the removal. These four comments were submitted by advocacy organizations. At the Tribal Consultation session, the IHS received three oral comments from representatives of Indian Tribes. Each of these three oral comments were generally in favor of the removal or non-germane to the removal.

After reviewing both written comments and those comments received orally through the Tribal consultation session, the IHS is finalizing this rule as proposed. Accordingly, this final rule will remove the current IHS Hyde regulations in their entirety, by removing and reserving subpart F, consisting of 42 CFR 136.51 through 136.57. Below, IHS summarizes and

[1] Final Rule, *Provision of Abortion Services by the Indian Health Service,* 47 FR 4016 (Jan. 27, 1982).

[2] Continuing Appropriations for FY 1981, Public Law 96–369 (1980); Continuing Appropriations Act for FY 1982, Public Law 97–92 (1981).

[3] Final Rule, *Provision of Abortion Services by the Indian Health Service,* 47 FR 4016 (Jan. 27, 1982).

[4] Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1994, Public Law 103–112, 509, 107 Stat. 1082, 1113 (1993).

[5] Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1998, Public Law 105–78, 509(b), 111 Stat. 1467, 1516 (1997).

[6] Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2024, Public Law 118–47, secs. 506–507, title V of Division D, 138 Stat. 703 (2024).

[7] Indian Health Service Circular No. 22–15, Use of Indian Health Service Funds for Abortions (Jun. 30, 2022), *https://www.ihs.gov/ihm/circulars/2022/use-of-indian-health-service-funds-for-abortions/.*

[8] The regulations also speak to recordkeeping requirements and confidentiality of information. However, these provisions are unnecessary to maintain, because recordkeeping and confidentiality of information are independently required by other laws and regulations that will remain in effect. See, *e.g.,* 45 CFR parts 160, 164 (Standards for Privacy of Individually Identifiable Health Information (The Privacy Rule)).

[9] *See generally,* public comments posted in response to Docket ID # IHS–2024–0001, *https://www.regulations.gov/document/IHS-2024-0001-0001/comment.*

addresses all substantive topics raised in comments.

A. Comments Supporting the Removal

One commenter in the consultation session supported removal of the regulations. That commenter additionally suggested as a policy matter that the IHS consider allowing a nurse practitioner or licensed practitioner other than a physician to certify an abortion in cases in which certification is required. Under the current version of the Hyde Amendment, the IHS cannot make the requested change.

The current version of the Hyde Amendment, made applicable to IHS funding by 25 U.S.C. 1676(a), includes an exception in cases ''where a woman suffers from a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would, *as certified by a physician,* place the woman in danger of death unless an abortion is performed.'' Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2024, Public Law 118–47, secs. 506–507, title V of Division D, 138 Stat. 703 (2024) (emphasis added). The IHS' removal of the outdated regulations cannot affect the separate statutory requirement that the certification be made by a physician. Therefore, the IHS has not made changes based on this comment.

Another commenter in the consultation session supported removal of the regulations and asked the IHS whether it intends to replace these regulations at a later time. While the IHS appreciates this question, regulations on this subject are not necessary to implement IHS' authority, nor are they necessary to comply with statutory directives. Moreover, amending the regulations to reflect the current Hyde Amendment could cause additional confusion in the future if Congress changes the annual appropriations language, as it has in the past. Therefore, the IHS has not made changes based on this comment. However, the IHS retains the discretion to promulgate regulations at a later date.

The IHS received an additional comment during the consultation session about what Tribes are permitted to do with their own, non-Federal funds. While the IHS appreciates the comment, it is outside the scope of this action. The regulations at issue apply only to IHS' operations as a healthcare provider and payer. Therefore, the IHS has not made changes based on this comment.

One commenter [10] supported removal of the regulations, based on the justifications provided in the notice of proposed rulemaking. The commenter opined that it was common sense to eliminate the regulations, since the IHS is required by 25 U.S.C. 1676 to follow the Hyde Amendment. The commenter also believes that removal would reduce confusion. In addition to agreeing with the justifications provided in the notice of proposed rulemaking, this commenter explained that the outdated regulations could lead to violations of the Equal Protection Clause of the Constitution if enforced. The commenter argued that if the regulation were enforced, American Indian and Alaska Native (AI/AN) people seeking abortions funded by the IHS would be treated differently than other individuals seeking abortions funded by HHS in other circumstances because only the second group would be able to take advantage of all of the exceptions included in the current Hyde Amendment. This comment requires no change to the proposed rule.

One comment,[11] submitted on behalf of a group of individuals, supported the removal but recommended that the IHS address disparate reproductive health outcomes for AI/AN people, including in urban areas, through activities outside of this rulemaking. The comment also recommended that the IHS improve its capacity for abortions consistent with the Hyde Amendment, and provide additional information, education, and engagement with AI/AN people about permitted abortions. This comment also discussed the commenters' opposition to the scope and impact of the Hyde Amendment itself. These comments are outside of the scope of the rulemaking.

B. Comments Recommending Retaining the Regulations as Written

Several commenters asked that the IHS retain the regulations as written, specifically 42 CFR 136.53 and 136.54 (the two sections that describe the limitations on the use of IHS funding for abortions). These commenters stated that the Hyde Amendment does not require, only permits, the use of IHS funding for abortion in cases of rape or incest. Therefore, the commenters opined that the IHS regulations are not outdated or in conflict with the current law, and also expressed their belief that abortions should not be provided when a pregnancy is the result of rape or incest. One commenter [12] also expressed concern that, should the Hyde Amendment not be included in the annual appropriations act and these regulations are removed, the IHS would be able to further expand access to abortions.

Congress has intentionally broadened the exceptions to the limitation on the use of Federal funds for abortion to include instances of rape or incest, and has specifically made the current scope of the Hyde Amendment applicable to IHS, via 25 U.S.C. 1676(a). Removing the outdated and unnecessary provisions of 42 CFR 136.53 and 136.54 simply aligns IHS regulations with congressional action. Comments about the substance and application of the Hyde Amendment itself are outside of the scope of this rulemaking.

Should Federal law regarding the use of Federal funds for abortion change in the future, the IHS could consider whether regulatory provisions should be proposed. But this final rule will ensure that the IHS follows applicable statutory provisions at any given time. Therefore, the IHS has not made changes based on these comments.

Two commenters [13] stated that removing the regulations is inconsistent with the IHS mission and authority under the Snyder Act, 25 U.S.C. 13, to provide care and assistance for the ''conservation of health,'' claiming that providing abortions in the case of rape or incest is not healthcare, and that abortion in general does not conserve the health of the fetus. The IHS has determined that removing 42 CFR 136.53 and 136.54 clearly aligns with congressional action, and this regulatory action simply removes outdated and unnecessary regulations. Comments about the substance and application of the Hyde Amendment itself are outside of the scope of this rulemaking. Therefore, the IHS has not made changes based on these comments.

One commenter [14] stated that providing abortions in the cases of rape or incest is not consistent with the trust relationship between the Federal Government and Tribes, and asserted that it infringes on Tribal sovereignty. The IHS has determined that removing 42 CFR 136.53 and 136.54 clearly aligns with congressional action, and this

[10] Docket ID # IHS–2024–0001, Comment ID # IHS–2024–0001–0003, *https://www.regulations.gov/comment/IHS-2024-0001-0003.*

[11] Docket ID # IHS–2024–0001, Comment ID # IHS–2024–0001–0007, *https://www.regulations.gov/comment/IHS-2024-0001-0007.*

[12] Docket ID # IHS–2024–0001, Comment ID # IHS–2024–0001–0005, *https://www.regulations.gov/comment/IHS-2024-0001-0005.*

[13] Docket ID # IHS–2024–0001, Comment ID # IHS–2024–0001–0005, *https://www.regulations.gov/comment/IHS-2024-0001-0005,* Comment ID # IHS–2024–0001–0006, *https://www.regulations.gov/comment/IHS-2024-0001-0006.*

[14] Docket ID # IHS–2024–0001, Comment ID # IHS–2024–0001–0005, *https://www.regulations.gov/comment/IHS-2024-0001-0005.*

regulatory action simply removes outdated and unnecessary regulations. Comments about the substance of the Hyde Amendment itself are outside of the scope of this rulemaking. The use of IHS funds for certain abortions does not infringe on Tribal sovereignty. The IHS' clinicians and patients work together to determine the most appropriate treatment in an individual case. Moreover, this action does not affect a Tribe's right to self-determination or self-governance, nor does it impact any Tribe's choice to administer IHS health care programs itself. This action applies only to IHS operations as a healthcare provider and payer. The current regulations also do not reflect a determination that considerations surrounding Tribal sovereignty or the trust relationship forecloses funding for abortions in cases of rape or incest. *See* 46 FR 22617; 47 FR 4017–18. Therefore, the IHS has not made changes based on this comment.

One commenter [15] suggested that an exception to provide abortions in the cases of rape or incest is inappropriate. Removing the outdated regulations, however, would merely align IHS policy, via 25 U.S.C. 1676, with whatever limitations Congress has imposed at any given time, and with that of the rest of HHS. Comments about the substance of the Hyde Amendment itself are outside of the scope of this rulemaking. Therefore, the IHS has not made changes based on this comment.

C. Comments recommending amending the regulations

Several commenters suggested, as an alternative to retaining the regulations as written, that the IHS consider amending 42 CFR 136.54. Two commenters [16] suggested amending 42 CFR 136.54 to align with the Hyde Amendment. One of these commenters [17] recommended options to incorporate a reference to the Hyde Amendment, or to include a qualifier that, if the limitations in the Hyde Amendment change, the regulations will as well, or to cross reference the Hyde Amendment without describing the exceptions currently contained in that language. One of these commenters [18] explained its view that removing the regulations would cause more confusion to providers, and described problematic historical practices as an example of why clear IHS rules are needed. The IHS finds that these recommendations would merely restate Federal law, and are therefore unnecessary. The IHS disagrees that removal will cause more confusion. To the contrary, amending the regulations to reflect the current Hyde Amendment could cause additional confusion in the future if Congress changes the annual appropriations language, as it has in the past. Since 25 U.S.C. 1676 already applies the Hyde Amendment to IHS by law, regulations reflecting the Hyde Amendment are superfluous. The IHS has also clarified its compliance with the statutory limitations through policy directives and will continue to provide clear guidance to its staff. Therefore, the IHS has not made changes based on these comments.

One commenter [19] recommended amending 42 CFR 136.54 to state that Federal funds are available when a physician has found and certified that, on the basis of his or her professional judgment, ''a statutory condition for such funding, referenced in 25 U.S.C. 1676, is satisfied.'' The IHS does not view this change as necessary, since 25 U.S.C. 1676 is applicable to the IHS as a matter of law. In addition, the language recommended by the commenter is unclear, because there are no statutory conditions in 25 U.S.C. 1676 itself. This statute instead applies certain other Federal limitations on the use of funds for the performance of abortions to the IHS. Therefore, the IHS has not made changes based on this comment.

One commenter [20] stated that the IHS must publish a supplemental notice of proposed rulemaking to explain why it is removing and not replacing the regulations. The IHS clearly outlined its reasoning for removing the regulations in the proposed rule.[21] Therefore, the IHS has not made changes based on this comment.

One commenter [22] also offered edits to 42 CFR 136.55 (''Drugs and devices and termination of ectopic pregnancies'') to suggest that Federal funds cannot be used for some treatments for ectopic pregnancy. The IHS does not agree and, consistent with these regulations that are now being withdrawn, reaffirms the policy stated in current 42 CFR 136.55 that Federal funds are available for medical procedures necessary for the termination of an ectopic pregnancy. The IHS has existing broad authority under 25 U.S.C. 13 and 42 U.S.C. 2001 to provide healthcare. Accordingly, a regulation stating that funds are available for medical treatments for ectopic pregnancy is unnecessary and the IHS has not made changes based on this comment.

One commenter [23] stated that the certification requirement in 42 CFR 136.54 should be retained, even if other portions were changed or moved, to ensure compliance with Congress's funding limitations. The IHS believes retaining this section of the regulation is unnecessary. The language in the Hyde Amendment, already made applicable to the IHS via 25 U.S.C. 1676(a), currently contains a physician certification requirement. Retaining that language in the regulation could cause confusion in the future if Congress changes the annual appropriations language, as it has in the past. Therefore, the IHS has not made changes based on this comment.

Some commenters also stated that the remaining sections in subpart F should be retained. These commenters stated that the IHS did not provide justification as to why it was removing the entire section, and not just 42 CFR 136.54. As stated in the notice of proposed rulemaking,[24] the sections on recordkeeping and confidentiality of information (42 CFR 136.56, 136.57) are unnecessary to maintain because these requirements are independently required by other laws and regulations that will remain in effect. See, *e.g.,* 45 CFR parts 160, 164 (Standards for Privacy of Individually Identifiable Health Information (The Privacy Rule)); 44 U.S.C. 31 (The Federal Records Act).

Other commenters similarly requested that the sections on recordkeeping and confidentiality of information be maintained, stating that doing so would ensure accountability, confidentiality, and patient safety. The IHS agrees that recordkeeping and confidentiality requirements serve those important purposes. However, the IHS has sufficient safeguards in place for recordkeeping already required by other

[23] Docket ID # IHS–2024–0001, Comment ID # IHS–2024–0001–0002, *https://www.regulations.gov/comment/IHS-2024-0001-0002.*

[24] 89 FR 897.

Federal laws and regulations, and therefore retaining these regulations is unnecessary. The definition of ''physician'' in 42 CFR 136.52 is also unnecessary as the meaning of ''physician'' is well-established in practice and law. See, *e.g.,* 42 U.S.C. 1395x(r).

As acknowledged by a different commenter,[25] certain sections (§§ 136.51 (''Applicability''), 136.53 (''General rule'')) only exist in relation to other sections of subpart F, and thus are superfluous upon the removal of 42 CFR 136.54. Finally, the IHS has existing broad authority under 25 U.S.C. 13 and 42 U.S.C. 2001 to provide healthcare; accordingly, and as described above, 42 CFR 136.55 is unnecessary. Therefore, the IHS has not made changes based on these comments.

D. Other Comments

One commenter [26] stated that, as a policy matter, the IHS should not use Federal funds for drugs or devices to prevent implantation of the fertilized ovum. The IHS disagrees with this assertion and the removal of 42 CFR 136.55 makes no changes to IHS' existing authority to use Federal funds for the purposes described in the regulatory language being removed. The IHS' broad authority under 25 U.S.C. 13 and 42 U.S.C. 2001 authorizes the IHS to use Federal funds for necessary medical care such as contraception and therefore the IHS does not accept the commenter's policy suggestion to limit the use of funds for this purpose. Therefore, the IHS has not made changes based on this comment.

One commenter [27] explained its view that abortion harms AI/AN people, and recounted some of the history of maltreatment of AI/ANs. These comments are outside of the scope of this action, which merely aligns IHS regulation with statutory text. Therefore, the IHS has not made changes based on this comment.

One commenter [28] made suggestions for changing IHS policy, including statements in IHS policy about the impact of State law on IHS activities, but recognizes that these policy matters are separate from this rulemaking. The IHS also considers these comments outside of the scope of the rulemaking, and therefore has not made changes based on that discussion.

Another commenter [29] stated that the IHS failed to conduct a federalism analysis pursuant to Executive Order 13132, suggesting that IHS clarify whether ''its regulations can preempt state law and, if so, address the federalism implications of its rule.'' The IHS complied with the requirements of Executive Order 13132.[30] Removing these outdated and unnecessary regulations does not impose a substantial direct requirement or cost on State or local governments, as they apply only to IHS operations as a healthcare provider and payer. This action to remove outdated and unnecessary regulations does not have any preemptive effect. Therefore, the IHS has not made changes based on this comment.

Two commenters [31] stated that the IHS should focus its efforts on services for victims of sexual assault, and improving maternal and infant health, instead of removing the outdated rules. The IHS notes that it has a detailed Sexual Assault policy and a robust Maternal and Child Health Program, which will not be affected by the removal of the outdated regulations. The comment is thus outside of the scope of this action, which merely removes outdated and unnecessary regulations. Therefore, the IHS has not made changes based on these comments.

E. Required Determinations

Executive Orders 12866, 13563, and 14094

Executive Order 12866, as amended by Executive Order 14094, and Executive Order 13563 direct agencies to assess all costs and benefits of available regulatory alternatives. Section 3(f) of Executive Order 12866, as amended by Executive Order 14094, defines a ''significant regulatory action'' as any regulatory action that is likely to result in a rule that may: (1) have an annual effect on the economy of $200 million or more (adjusted every 3 years by the Administrator of the Office of Information and Regulatory Affairs (OIRA) for changes in gross domestic product); or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, territorial, or Tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise legal or policy issues for which centralized review would meaningfully further the President's priorities or the principles set forth in the Executive order, as specifically authorized in a timely manner by the Administrator of OIRA in each case. OIRA has determined that this final rule is a significant regulatory action as defined by Executive Order 12866, section 3(f).

Regulatory Flexibility Act

This action will not have a significant economic impact on Indian health programs. Therefore, the regulatory flexibility analysis provided for under the Regulatory Flexibility Act is not required.

Executive Order 13132 (Federalism)

Executive Order 13132, ''Federalism,'' establishes certain requirements that an agency must meet when it promulgates a rule that imposes substantial direct requirement costs on State and local governments or has federalism implications. HHS has determined that this final rule, which removes outdated regulations, does not impose such costs or have any federalism implications.

Executive Order 13175

This rule does not have a substantial direct effect on one or more Indian Tribes under Executive Order 13175, because it only removes outdated regulations that do not align with the current statutory text of the Hyde Amendment, with 25 U.S.C. 1676, or with current IHS practice.

National Environmental Policy Act

HHS has determined that this final rule does not have a significant impact on the environment.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires the IHS to consider the impact of paperwork and other information collection burdens it imposes on the public. The IHS has determined no new requirement for information collection is associated with this final rule. This action does not affect any information collections.

Congressional Review Act

Pursuant to Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act, 5 U.S.C 801 *et seq.*), OIRA has determined that this rule does not meet the criteria set forth in 5 U.S.C. 804(2).

Unfunded Mandates Reform Act of 1995

We have examined the impacts of this rule as required by section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA; March 22, 1995; Pub. L. 104–4). Section 202 of UMRA requires that a covered agency prepare a budgetary impact statement before promulgating a rule that includes any Federal mandate that may result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year (adjusted for inflation). In 2024, that threshold is approximately $183 million (in 2023 dollars). If a covered agency must prepare a budgetary impact statement, section 205 further requires that it select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with the statutory requirements. In addition, section 203 requires a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule. Based on information currently available, we expect the combined impact on State, local, or Tribal governments and the private sector does not meet the UMRA definition of unfunded mandate.

List of Subjects in 42 CFR Part 136

Employment, Government procurement, Healthcare, Health facilities, Indians, Penalties, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Department of Health and Human Services amends 42 CFR part 136 as follows:

PART 136—INDIAN HEALTH

■ 1. The authority citation for part 136 continues to read as follows:

Authority: 25 U.S.C. 13; sec. 3, 68 Stat. 674 (42 U.S.C., 2001, 2003); Sec. 1, 42 Stat. 208 (25 U.S.C. 13); 42 U.S.C. 2001, unless otherwise noted.

Subpart F—[Removed and Reserved]

■ 2. Remove and reserve subpart F, consisting of §§ 136.51 through 136.57.

Dated: April 24, 2024.

Xavier Becerra,

Secretary, Department of Health and Human Services.

[FR Doc. 2024–09152 Filed 4–29–24; 8:45 am]

BILLING CODE 4166–14–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 1, 2, 9, and 25

[GN Docket No. 23–65, IB Docket No. 22–271; FCC 24–28; FR ID 210313]

Single Network Future: Supplemental Coverage From Space; Space Innovation

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (FCC or Commission) adopts rules to facilitate the deployment of supplemental coverage from space (SCS) in an effort to serve several important public interest goals for the Nation and expand the reach of communications services, particularly emergency services, so that connectivity and assistance is available in more remote places. In this document, to allow satellite communications on spectrum previously allocated only to terrestrial services, the Commission modifies the United States Table of Frequency Allocations to authorize bi-directional, secondary mobile-satellite service operations in certain spectrum bands that have no primary, non-flexible-use legacy incumbents, Federal or non-Federal. For these bands, we authorize SCS only where one or more terrestrial licensees—together holding all licenses on the relevant channel throughout a defined geographically independent area—lease access to their spectrum rights to a participating satellite operator, whose license reflects these frequencies and the geographically independent area in which they will offer SCS. In recognition that this new offering has the potential to bring life-saving connectivity to remote areas, the Commission also applies interim 911 call and text routing requirements to ensure that help is available to those who need it today while we work toward enabling automatic location-based routing of all emergency communications whether or not there is a terrestrial connection available.

DATES: The rules are effective May 30, 2024, except for the amendments to §§ 1.9047(d)(2) (amendatory instruction 3), 9.10(t)(3) through (5) (amendatory instruction 8), and 25.125(b)(1) and (2) and (c) (amendatory instruction 16), which are indefinitely delayed. The Federal Communications Commission will publish a document in the **Federal Register** announcing the effective date of these rule sections.

FOR FURTHER INFORMATION CONTACT: For additional information on this proceeding, contact Jon Markman of the Mobility Division, Wireless Telecommunications Bureau, at *Jonathan.Markman@fcc.gov* or (202) 418–7090, or Merissa Velez of the Space Bureau Satellite Programs and Policy Division, at *Merissa.Velez@fcc.gov* or (202) 418–0751. For information regarding the Paperwork Reduction Act of 1995 (PRA) information collection requirements contained in this document, contact Cathy Williams, Office of Managing Director, at (202) 418–2918 or *Cathy.Williams@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of Commission's *Report and Order*, in GN Docket No. 23–65 and IB Docket No. 22–271; FCC 24–28, adopted and released on March 15, 2024. The full text of this document is available for public inspection online at *https://docs.fcc.gov/public/attachments/FCC-24-28A1.pdf.* The *Report and Order* was corrected by an erratum released on April 18, 2024. The changes made by the erratum are included in this document.

Synopsis

1. In the *Report and Order*, the Commission adopts a regulatory framework—the first of its kind in the world—to enable collaborations between satellite operators and terrestrial service providers to offer ubiquitous connectivity directly to consumer handsets using spectrum previously allocated only to terrestrial service. We anticipate that supplemental coverage from space, or SCS, will enable consumers in areas not covered by terrestrial networks to be connected using their existing devices via satellite-based communications.

2. In the *Report and Order*, to allow satellite communications on spectrum previously allocated only to terrestrial services, the Commission modifies the United States Table of Frequency Allocations to authorize bi-directional, secondary mobile-satellite service (MSS) operations in certain spectrum bands that have no primary, non-flexible-use legacy incumbents, Federal or non-Federal. Accordingly, the list of bands that will be available for the provision of SCS (the SCS Bands) is as follows:

• 600 MHz: 614–652 MHz and 663–698 MHz;
• 700 MHz: 698–769 MHz, 775 MHz–799 MHz, and 805–806 MHz;
• 800 MHz: 824–849 MHz and 869–894 MHz;
• Broadband PCS: 1850–1915 MHz and 1930–1995 MHz; and
• AWS–H Block: 1915–1920 MHz and 1995–2000 MHz.

3. For these bands, the Commission finds it in the public interest to limit SCS authorizations to the following geographically independent areas (GIAs): (1) the contiguous United States (CONUS); (2) Alaska; (3) Hawaii; (4) American Samoa; (5) Puerto Rico/U.S. Virgin Islands; and (6) Guam/Northern Mariana Islands. Given the novel technical challenges at play when introducing satellite communications to terrestrial spectrum, we believe that a GIA restriction is necessary in the initial SCS framework because it minimizes the risk of potential interference to geographically-adjacent, co-channel license areas. For these bands, the Commission authorizes SCS only where one or more terrestrial licensees—together holding all licenses on the relevant channel throughout a defined geographically independent area—lease access to their spectrum rights to a participating satellite operator, whose part 25 license reflects these frequencies and the geographically independent area in which they will offer SCS.

4. In the *Report and Order*, the Commission also adopts entry criteria that non-geostationary satellite orbit (NGSO) and geostationary satellite orbit (GSO) operators must meet in order to apply for or modify an existing part 25 license to operate satellites in the SCS Bands in the United States and its territories. Specifically, we establish an SCS framework allowing satellite operators to apply to modify a current part 25 license to include SCS where: (1) the satellite operator has one or more leasing notification(s) or application(s), or in the case of FirstNet, a Form 601, on file with the Commission to access the spectrum allocated for MSS provision of SCS from a single terrestrial licensee or multiple licensees that hold, collectively or individually, all co-channel licenses throughout a GIA; (2) the current part 25 space station licensee or part 25 grantee of market access for NGSO or GSO satellite operation seeks modification of authority to provide SCS in the same geographic areas covered in the relevant GIA; and (3) the terrestrial devices involved in SCS qualify as ''licensed by rule'' earth stations under the new provisions of part 25. Similarly, satellite operators may apply for an initial part 25 license with authority to provide SCS if they meet requirements (1) and (3) above, and if in their part 25 application, those operators seek to provide SCS in the same geographic areas covered in the relevant GIA.

5. Our actions to facilitate the deployment of SCS will serve several important public interest goals for the Nation. First, the SCS framework will expand the reach of communications services, particularly emergency services, so that connectivity and assistance is available in more remote places. Second, the SCS framework will spur advancements in cutting-edge, space-based technologies that will position the United States as a global leader in this arena. And third, the SCS framework will continue our efforts to promote the innovative and efficient use of our Nation's spectrum resources in ways that foster creative collaborations among users.

6. In crafting this new framework, it is essential that we balance the desire to accelerate innovative SCS operations that will serve these critical public interest goals with the need to retain service quality of terrestrial networks, protect spectrum usage rights, and minimize the risk of harmful interference, both domestically and internationally. Accordingly, the framework we adopt in the *Report and Order* represents an initial step to encourage the development of SCS while minimizing the risks of harmful interference to existing terrestrial and satellite networks that support non-Federal and Federal users. In the future, as the marketplace for SCS develops, we plan to build on the framework we adopt in the *Report and Order*, to enable deployment of SCS in additional bands and scenarios. We will also continue to monitor the nascent SCS marketplace to consider modifications and address proposals that do not fit neatly within our framework by waiver.

7. In addition, the Commission considered a framework for authorizing terrestrial devices to communicate with a space station in the SCS context. In the *Report and Order*, the Commission adopts a license by rule approach for terrestrial devices as earth stations communicating with a satellite network for the purposes of SCS. Specifically, so long as the terrestrial devices connecting to the SCS network are doing so pursuant to an effective part 1 leasing arrangement or agreement and are operating within the existing technical parameters of their Office of Engineering and Technology (OET) equipment authorization, the terrestrial licensee's license parameters, and applicable part 22, 24, or 27 rules, then those devices will be licensed as earth stations by rule without the need to file a part 25 earth station application for additional authority.

8. In recognizing the importance of 911 service to emergency response and disaster preparedness, we adopt interim 911 text and call routing requirements for terrestrial providers that use SCS arrangements to extend coverage areas. Specifically, we require terrestrial providers to transmit all 911 voice calls and texts to a Public Safety Answering Point (PSAP) using location-based routing or an emergency call center. Terrestrial providers must also transmit location information and the user's phone number to facilitate dispatch and callback capabilities at the receiving PSAP. We also require terrestrial providers that use SCS to file annual reports with the Commission, submit a privacy certification, and provide consumer disclosures regarding SCS 911 connectivity.

9. Under the SCS framework, satellite operators and terrestrial licensees providing SCS must comply with existing satellite and terrestrial rules to avoid harmful interference into radio astronomy and related services. The Commission also amended some of its technical rules as they apply to SCS. In addition, the new MSS allocations will remain subject to the United States' international obligations under treaties, bilaterial or multilateral agreements, the International Radio Regulations, and other instruments of the International Telecommunication Union (ITU).

Procedural Matters

Paperwork Reduction Act

10. The requirements in §§ 1.9047(d)(2), 9.10(t)(3) through (5), and 25.125(b)(1) and (2) and (c) constitute new or modified collections subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. They will be submitted to the Office of Management and Budget (OMB) for review under section 3507(d) of the PRA. OMB, the general public, and other Federal agencies will be invited to comment on the new or modified information collection requirements contained in this proceeding. In addition, the Commission notes that, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the Commission previously sought, but did not receive, specific comment on how the Commission might further reduce the information collection burden for small business concerns with fewer than 25 employees. The Commission describes impacts that

might affect small businesses, which includes more businesses with fewer than 25 employees, in the Final Regulatory Flexibility Analysis.

Final Regulatory Flexibility Analysis

11. The Regulatory Flexibility Act (RFA) requires that an agency prepare a regulatory flexibility analysis for notice and comment rulemakings, unless the agency certifies that ''the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.'' Accordingly, the Commission has prepared a Final Regulatory Flexibility Analysis (FRFA) concerning the possible impact of the rule changes contained in the *Report and Order* on small entities. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), an Initial Regulatory Flexibility Analysis (IRFA) was incorporated in the *Notice of Proposed Rulemaking (NPRM)* released in March 2023 in this proceeding (88 FR 21944, Mar. 16, 2023). The Commission sought written public comment on the proposals in the *NPRM* including comments on the IRFA. No comments were filed addressing the IRFA. This present Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA.

Congressional Review Act

12. The Commission will send a copy of the *Report and Order* in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A).

Final Regulatory Flexibility Analysis

13. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), an Initial Regulatory Flexibility Analysis (IRFA) was incorporated in the *NPRM* released in March 2023. The Federal Communications Commission (Commission) sought written public comment on the proposals in the *NPRM*, including comment on the IRFA. No comments were filed addressing the IRFA. This Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA.

A. Need for, and Objectives of, the Report and Order

14. In the *Report and Order*, the Commission takes a major step toward harnessing the power of hybrid satellite-terrestrial networks to connect people to modern communications services. To accomplish this objective, the Commission adopts a regulatory framework to enable collaborations between satellite operators and terrestrial service providers to offer ubiquitous connectivity directly to consumer handsets using spectrum previously allocated only to terrestrial service. Supplemental coverage from space (SCS) will enable consumers in areas not covered by terrestrial infrastructure to be connected using their existing devices via satellite-based communications. The framework the Commission adopts in the *Report and Order* balances the desire to accelerate innovative SCS operations that will serve these critical public interest goals with the need to retain service quality of terrestrial networks, protect spectrum usage rights, and minimize the risk of harmful interference, both domestically and internationally. The objectives of the framework include facilitating ubiquitous wireless coverage across the Nation, expanding the availability of emergency communications to consumers and the geographic range of first responders to provide emergency services, and promoting competition in the provision of wireless services to consumers.

15. In the *Report and Order*, to allow satellite communications on spectrum previously allocated only to terrestrial services, the Commission modifies the United States Table of Frequency Allocations (U.S. Table) to authorize bi-directional, secondary mobile-satellite service (MSS) operations in certain spectrum bands that have no primary, non-flexible-use legacy incumbents, Federal or non-Federal. For these bands, the Commission authorizes SCS only where one or more terrestrial licensees—together holding all licenses on the relevant channel throughout a defined geographically independent area (GIA)—lease access to their spectrum rights to a participating satellite operator, whose part 25 license reflects these frequencies and the GIA in which they will offer SCS. The list of bands (SCS Bands) that will be available for the provision of SCS is as follows:

- 600 MHz: 614–652 MHz and 663–698 MHz;
- 700 MHz: 698–769 MHz, 775 MHz–799 MHz, and 805–806 MHz;
- 800 MHz: 824–849 MHz and 869–894 MHz;
- Broadband PCS: 1850–1915 MHz and 1930–1995 MHz; and
- AWS–H Block: 1915–1920 MHz and 1995–2000 MHz.

16. In an effort to realize the public interest benefits of SCS as soon as possible, while minimizing the risk of harmful interference, the Commission adopts the proposal to limit SCS authorizations to the following GIAs: (1) the contiguous United States (CONUS); (2) Alaska; (3) Hawaii; (4) American Samoa; (5) Puerto Rico/U.S. Virgin Islands; and (6) Guam/Northern Mariana Islands.

17. Additionally, in the *Report and Order*, the Commission adopts rules requiring a part 25 license as a necessary component of an SCS authorization that must be obtained prior to commencing SCS. The Commission also adopts entry criteria that non-geostationary satellite orbit (NGSO) and geostationary satellite orbit (GSO) operators must meet to apply for or modify an existing part 25 license to operate satellites in SCS Bands. The Commission adopts rules to establish a license by rule approach for terrestrial devices as earth stations communicating with a satellite network for the purposes of SCS. Furthermore, the *Report and Order* authorizes SCS based on a lease arrangement or agreement between one or more terrestrial licensees and one or more satellite operators, subject to the restrictions adopted. The Commission also adopts limited amendments to the service rules governing satellite and terrestrial licensees to enable the provision of SCS.

18. Similarly, the Commission adopts certain technical rules, including requiring terrestrial device equipment authorization grantees to modify existing, or obtain new, equipment authorizations for previously certified terrestrial devices and also grants a limited waiver of certain rules. The Commission also addresses international coordination, stating that SCS will be authorized pursuant to a secondary MSS allocation in the U.S. Table. These operations may not cause harmful interference to—and shall not claim protection from—any station operating in accordance with ITU provisions, whether in the United States or internationally. Finally, the Commission clarifies that the SCS framework is limited to operations performed in the bands designated in the *Report and Order* for SCS and remains separate from the service rules for MSS systems. Consequently, the rules the Commission adopts in the *Report and Order* represent an initial step to encourage the development of SCS while minimizing the risks of harmful interference to existing terrestrial and satellite networks that support non-Federal and Federal users.

B. Summary of Significant Issues Raised by Public Comments in Response to the IRFA

19. Parties that filed comments did not specifically reference the IRFA in their comments; however, some commenters, some of which include small entities, expressed concerns that the proposal in the *NPRM* in which a single terrestrial licensee must hold all co-channel licenses in a given GIA

would either limit SCS to large carriers with nationwide authority over a block of spectrum, or, at a minimum, exclude smaller or regional terrestrial operators from participation in the framework. These concerns are discussed in greater detail in section F of this FRFA.

C. Response to Comments by the Chief Counsel for Advocacy of the Small Business Administration

20. Pursuant to the Small Business Jobs Act of 2010, which amended the RFA, the Commission is required to respond to any comments filed by the Chief Counsel for Advocacy of the Small Business Administration (SBA), and to provide a detailed statement of any change made to the proposed rules as a result of those comments.

21. The Chief Counsel did not file any comments in response to the proposed rules or policies in this proceeding.

D. Description and Estimate of the Number of Small Entities to Which the Rules Will Apply

22. The RFA directs agencies to provide a description of, and where feasible, an estimate of, the number of small entities that may be affected by the rules adopted herein. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. A ''small business concern'' is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

23. *Small Businesses, Small Organizations, Small Government Jurisdictions.* Our actions, over time, may affect small entities that are not easily categorized at present. We therefore describe, at the outset, three broad groups of small entities that could be directly affected herein. First, where there are industry specific size standards for businesses that are used in the regulatory flexibility analysis, according to data from the Small Business Administration's (SBA) Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States, which translates to 33.2 million businesses.

24. Next, the type of small entity described as a ''small organization'' is generally ''any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.'' The Internal Revenue Service (IRS) uses a revenue benchmark of $50,000 or less to delineate its annual electronic filing requirements for small exempt organizations. Nationwide, for tax year 2020, there were approximately 447,689 small exempt organizations in the U.S. reporting revenue of $50,000 or less according to the registration and tax data for exempt organizations available from the IRS.

25. Finally, the small entity described as a ''small governmental jurisdiction'' is defined generally as ''governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.'' U.S. Census Bureau data from the 2017 Census of Governments indicate there were 90,075 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number, there were 36,931 general purpose governments (county, municipal, and town or township) with populations of less than 50,000 and 12,040 special purpose governments—independent school districts with enrollment populations of less than 50,000. Accordingly, based on the 2017 U.S. Census of Government data, we estimate that at least 48,971 entities fall into the category of ''small government jurisdictions.''

26. *Satellite Telecommunications.* This industry comprises firms ''primarily engaged in providing telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications.'' Satellite telecommunications service providers include satellite and earth station operators. The SBA small business size standard for this industry classifies a business with $38.5 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 275 firms in this industry operated for the entire year. Of this number, 242 firms had revenue of less than $25 million. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 65 providers that reported they were engaged in the provision of satellite telecommunications services. Of these providers, the Commission estimates that approximately 42 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, a little more than half of these providers can be considered small entities.

27. *Wireless Telecommunications Carriers (except Satellite).* This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular services, paging services, wireless internet access, and wireless video services. The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Additionally, based on Commission data in the 2021 Universal Service Monitoring Report, as of December 31, 2020, there were 797 providers that reported they were engaged in the provision of wireless services. Of these providers, the Commission estimates that 715 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

28. *600 MHz Band.* These wireless communications services are radiocommunication services licensed in the 617–652 MHz and 663–698 MHz frequency bands that can be used for fixed and mobile flexible uses. 600 MHz Band services fall within the scope of the Wireless Telecommunications Carriers (except Satellite) industry where the SBA small business size standard classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

29. Based on Commission data as of November 2021, there were approximately 3,327 active licenses in the 600 MHz Band service. The Commission's small business size standards with respect to 600 MHz Band services involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For purposes of bidding credits, the Commission defined ''small business'' as an entity with average gross revenues not exceeding $55 million for each of the three preceding years, and a ''very small business'' as an entity with average gross revenues not exceeding

$20 million for each of the three preceding years for the 600 MHz band auction. Pursuant to these definitions, 15 bidders claiming small business status won 290 licenses.

30. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

31. *Lower 700 MHz Band Licenses.* The lower 700 MHz band encompasses spectrum in the 698–746 MHz frequency bands. Permissible operations in these bands include flexible fixed, mobile, and broadcast uses, including mobile and other digital new broadcast operation; fixed and mobile wireless commercial services (including frequency division duplex (FDD)- and time division duplex (TDD)-based services); as well as fixed and mobile wireless uses for private, internal radio needs, two-way interactive, cellular, and mobile television broadcasting services. Wireless Telecommunications Carriers (*except* Satellite) is the closest industry with a SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

32. According to Commission data as of December 2021, there were approximately 2,824 active Lower 700 MHz Band licenses. The Commission's small business size standards with respect to Lower 700 MHz Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For auctions of Lower 700 MHz Band licenses the Commission adopted criteria for three groups of small businesses. A very small business was defined as an entity that, together with its affiliates and controlling interests, has average annual gross revenues not exceeding $15 million for the preceding three years, a small business was defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding $40 million for the preceding three years, and an entrepreneur was defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding $3 million for the preceding three years. In auctions for Lower 700 MHz Band licenses seventy-two winning bidders claiming a small business classification won 329 licenses, twenty-six winning bidders claiming a small business classification won 214 licenses, and three winning bidders claiming a small business classification won all five auctioned licenses.

33. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

34. *Upper 700 MHz Band Licenses.* The upper 700 MHz band encompasses spectrum in the 746–806 MHz bands. Upper 700 MHz D Block licenses are nationwide licenses associated with the 758–763 MHz and 788–793 MHz bands. Permissible operations in these bands include flexible fixed, mobile, and broadcast uses, including mobile and other digital new broadcast operation; fixed and mobile wireless commercial services (including FDD- and TDD-based services); as well as fixed and mobile wireless uses for private, internal radio needs, two-way interactive, cellular, and mobile television broadcasting services. Wireless Telecommunications Carriers (*except* Satellite) is the closest industry with a SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

35. According to Commission data as of December 2021, there were approximately 152 active Upper 700 MHz Band licenses. The Commission's small business size standards with respect to Upper 700 MHz Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For the auction of these licenses, the Commission defined a ''small business'' as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding $40 million for the preceding three years, and a ''very small business'' an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than $15 million for the preceding three years. Pursuant to these definitions, three winning bidders claiming very small business status won five of the twelve available licenses.

36. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

37. *Cellular Radiotelephone Service.* This service is radio service in which licensees are authorized to offer and provide cellular service for hire to the general public and was formerly titled Domestic Public Cellular Radio Telecommunications Service. Cellular Radiotelephone Service falls within the scope the Wireless Telecommunications Carriers (except Satellite) industry, where the SBA small business size standard classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission

estimates that a majority of licensees in this industry can be considered small.

38. Based on Commission data, as of November 2021, there were approximately 1,908 active licenses in this service. The Commission's small business size standards with respect to Cellular Radiotelephone Services involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For purposes of bidding credits, the Commission has defined ''small business'' as an entity that either (1) together with its affiliates and controlling interests has average gross revenues of not more than $3 million for each of the three preceding years, or (2) together with its affiliates and controlling interests has average gross revenues of not more $15 million for each of the three preceding years.

39. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

40. *Advanced Wireless Services (AWS)—(1710–1755 MHz and 2110–2155 MHz bands (AWS–1); 1915–1920 MHz, 1995–2000 MHz, 2020–2025 MHz and 2175–2180 MHz bands (AWS–2); 2155–2175 MHz band (AWS–3); 2000–2020 MHz and 2180–2200 MHz (AWS–4)).* Spectrum is made available and licensed in these bands for the provision of various wireless communications services. Wireless Telecommunications Carriers (except Satellite) is the closest industry with a SBA small business size standard applicable to these services. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

41. According to Commission data as December 2021, there were approximately 4,472 active AWS licenses. The Commission's small business size standards with respect to AWS involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For the auction of AWS licenses, the Commission defined a ''small business'' as an entity with average annual gross revenues for the preceding three years not exceeding $40 million, and a ''very small business'' as an entity with average annual gross revenues for the preceding three years not exceeding $15 million. Pursuant to these definitions, 57 winning bidders claiming status as small or very small businesses won 215 of 1,087 licenses. In the most recent auction of AWS licenses 15 of 37 bidders qualifying for status as small or very small businesses won licenses.

42. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

43. *All Other Telecommunications.* This industry is comprised of establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Providers of Internet services (*e.g.* , dial-up ISPs) or voice over Internet protocol (VoIP) services, via client-supplied telecommunications connections are also included in this industry. The SBA small business size standard for this industry classifies firms with annual receipts of $35 million or less as small. U.S. Census Bureau data for 2017 show that there were 1,079 firms in this industry that operated for the entire year. Of those firms, 1,039 had revenue of less than $25 million. Based on this data, the Commission estimates that the majority of ''All Other Telecommunications'' firms can be considered small.

E. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

44. While the Commission sought to minimize compliance burdens where practicable, the SCS framework adopted in the *Report and Order* will impose new or additional reporting, recordkeeping, and/or other compliance obligations on small entities. In addition, while it sought comment from concerned parties regarding costs related to those obligations, the record does not contain a detailed cost/benefit analysis that would allow us to quantify such related costs to small entities. The rules adopted in the *Report and Order* encompass a broad range of leasing, licensing, and technical compliance requirements that are summarized in further detail below.

45. *Part 25 License Entry Criteria.* The *Report and Order* effectuates SCS in certain flexible-use bands previously allocated solely for terrestrial use by the adoption of rules to authorize satellite-to-terrestrial (uplink and downlink) operations in these bands whereby a NGSO or GSO satellite operator may apply for a new or modify an existing part 25 authorization when that entity meets certain prerequisites, or ''entry criteria.'' The ''entry criteria'' requires the satellite operator intending to modify its existing part 25 application in order to provide SCS to include a certification that provides the following information: (1) the satellite operator has one or more leasing notification(s) or application(s), or in the case of FirstNet, a Form 601, on file with the Commission to access the spectrum allocated for MSS provision of SCS from a single terrestrial licensee or multiple licensees that hold, collectively or individually, all co-channel licenses throughout a GIA; (2) the current part 25 space station licensee or part 25 grantee of market access for NGSO or GSO satellite operation seeks modification of authority to provide SCS in the same geographic areas covered in the relevant GIA; and (3) the terrestrial devices involved in SCS qualify as ''licensed by rule'' earth stations under the new provisions of part 25. Similarly, satellite operators may apply for an initial part 25 license with authority to provide SCS if it shows that it meets requirements (1) and (3) above, and if in their part 25 application, those operators request to provide SCS in in the same geographic areas covered in the relevant GIA.

46. In its adopted rules, the Commission maintains its existing part

25 rules for obtaining and modifying a license and applies them to the SCS framework. Under this framework, meeting the proposed entry criteria would allow small and other entities to apply to modify its existing satellite authorization. However, all related applications—including those seeking modification, lease applications, and earth station equipment certifications—must first be granted to provide SCS. Thus, the *Report and Order's* requirements are in addition to the existing underlying reporting, recordkeeping, and compliance requirements. We further note, however, that due to the significant costs involved in SCS development and deployment, we anticipate that few satellite operators affected by this rulemaking would qualify under the definition of ''small entity.''

47. *Part 1 Leasing.* In the *Report and Order*, the Commission adopts a framework authorizing SCS by amending its part 1 leasing rules to permit terrestrial licensees to lease terrestrial spectrum rights to satellite operators for the purpose of providing SCS. In order to properly comply, the adopted rules require applicants for and current licensees of the authorized SCS bands to provide the following information using the current FCC Form 608: (1) a certification that the parties are entering into the leasing arrangement for the purpose of fulfilling the part 25 entry criteria; (2) a description of which method, single or multiple terrestrial licensee, the parties are utilizing to meet the part 25 entry criteria; and (3) if the parties are utilizing the spectrum leasing arrangement under the multiple terrestrial licensee method, the parties must: (a) describe the nature of the leasing arrangement(s); and (b) demonstrate how the entirety of the GIA is covered by the lease arrangement(s). The Commission believes that this requirement will improve the level of interference protection licensees receive in the band; and will create a more predictable and transparent spectrum environment for any current and future users of the band(s). This process also utilizes the Commission's current application approval and notification processing procedures because it will remove unnecessary delay by utilizing the procedures that are already in place. Further, in light of these limited changes to the current application procedures, the Commission does not believe that small entities will have to hire professionals to comply with the *Report and Order*.

48. *Part 25 Automatic Termination.* In the *Report and Order*, the Commission retains the current part 25 rules regarding automatic termination of station authorizations to satellite licensees seeking to provide SCS jointly with a terrestrial operator, and adds a rule whereby the termination of any lease(s) that allow for the use of specific terrestrial spectrum for SCS is a trigger for automatic termination of the part 25 license. This requirement utilizes and applies the Commission's current part 25 automatic termination process. In light of these limited changes to the current procedures, the Commission does not believe that small entities will have to hire professionals to comply with the *Report and Order*.

49. *911 Call Transmission Requirements.* In the *Report and Order*, the Commission establishes on an interim basis that terrestrial providers must transmit all SCS 911 calls and texts to a PSAP using either an emergency call center or location-based routing. Terrestrial providers must also transmit location information and the user's phone number to facilitate dispatch and callback capabilities at the receiving PSAP. This interim step will balance the need for SCS 911 voice calls and texts to be routed to the appropriate PSAP with the need for terrestrial providers to have flexibility in their implementation of SCS. Under this approach, terrestrial providers must either: (1) use information regarding the location of a device, including but not limited to device-based location information, and transmit the phone number of the device used to send the SCS 911 voice call or SCS 911 text message and available information to an appropriate PSAP; or (2) use an emergency call center, at which emergency call center personnel must determine the emergency caller's phone number and location and then transfer or otherwise direct the SCS voice call or SCS text message to an appropriate PSAP. In addition, the Commission requires terrestrial providers that use SCS to file an SCS 911 report with the Commission on an annual basis, by October 15th of each year, that explains how their SCS deployments have supported 911 call/text routing to the geographically appropriate PSAP with sufficient location information. Terrestrial providers that utilize SCS to extend coverage must maintain records of SCS 911 voice calls and 911 text messages received under their SCS arrangements and received at their emergency centers. The Commission finds that these reporting and location-based routing requirements represent minimally burdensome requirements when weighed against the necessity of 911 service for emergency response and disaster preparedness. Further, while these recordkeeping and reporting requirements present new obligations for small entities, we note that these measures will promote the Commission's objectives regarding transparency and accountability in routing SCS voice calls and 911 text messages and provide useful data. Additionally, to advance consumer awareness of the extent to which SCS is used to provide connectivity to 911, the Commission adopts consumer disclosure requirements for terrestrial providers to inform their subscribers of the limitations when using SCS to contact 911. Finally, there is a one-time requirement that, prior to use of SCS location information to meet the Commission's 911 rules, terrestrial providers must certify that neither they nor any third party they rely on to obtain SCS location information will use that information or associated data for any non-911 purpose, except with prior express consent or as otherwise permitted or required by law. The certification also must state that terrestrial providers and any third party they rely on to obtain SCS location information will implement measures sufficient to safeguard the privacy and security of the information.

50. *Market Area Boundary Limits.* In the *Report and Order*, the Commission maintains the existing market area boundary limits in parts 22, 24, and 27 of the Commission's rules. Noting that SCS partners should be expected to coordinate regarding the technical parameters necessary to avoid co-channel interference with one another's operations. Although the introduction of SCS into spectrum licensed for terrestrial networks should have no impact to other radio systems operating in the band within the same or nearby geographical areas, the Commission adopts a rule to limit the signal levels from SCS at and beyond the terrestrial operator's licensed area to be the same as those defined for terrestrial operation in each respective band. More specifically, the Commission maintains the existing market area boundary limits established in parts 22, 24, and 27 of the Commission's rules. These limits have also been used and shown to be feasible for operations similar to SCS. SCS can therefore only be deployed on the condition that stations using these frequencies will not cause harmful interference to, or claim protection from harmful interference caused by, an international station operating in accordance with the provisions of the

Constitution, the Convention, and the Radio Regulations of the ITU.

51. The Commission recognizes that managing time varying signal levels from SCS space stations, which may be moving and utilizing multibeam transmissions, will require careful and dynamic management of power level and beams for small and other entities. Satellite operators must also account for multiple overlapping and changing satellites or beams covering the same areas, as well as leakage and interference from side beams. Therefore, the power limit for interference protection at any given point or area should be applied to aggregation of power received across all visible beams and satellites at all times as they move over any given point or area. In addition, operators may need to cease beam transmissions in zones to allow for signal degradation from the edge of SCS coverage. Given that the size of such zones depends on target services, satellite and beamforming configuration, and power management solutions which may improve over time, the Commission does not set a limit on the zone size as long as the receive power limits are met.

52. *Out of Band Emission (OOBE) Limits.* In the *Report and Order* the Commission adopted a uniform OOBE limit of −120 dBW/m2/MHz for SCS operation across the SCS Bands expressed as a terrestrial power flux-density (PFD) limit. To ensure those adjacent band devices are protected from the risk of harmful interference, we find that both OOBE limits are warranted, and given the nature of SCS, that these limits should be measured and enforced on the ground. In setting these limits, we recognize that different factors may affect the potential for harmful interference due to the inherent difference in propagation effects when the signal is generated from a multibeam satellite constellation compared to when it is transmitted from a terrestrial base station. As a result, we therefore adopt limits that constitute a reasonable middle ground between existing terrestrial OOBE limits and satellite-based limits.

53. The existing OOBE limits for base stations vary across different radio services, and these services are governed by different parts of the Commission's rules (*e.g.,* parts 22, 24, 27). Although different OOBE limits apply across individual SCS Bands, we believe adopting a uniform PFD limit for supplemental satellite coverage across the various bands is reasonable and provides a simple requirement for satellite operator compliance. To provide a uniform limit across the various SCS Bands, the Commission considers some balancing of these effects for PFD limits that are normalized to both ''per MHz'' and ''per square meter''-*i.e.,* dBW/m2/MHz. We also specify that this PFD limit will apply at 1.5 meters above ground level, a height frequently associated with handset usage that has been used by the Commission when developing interference protection criteria for other wireless services. We believe that this limit represents an equitable- and technologically feasible-balance between the positions expressed in the record and will effectively protect adjacent band operations across the SCS Bands. Further, given that the Commission is breaking new ground in permitting satellite operations to not only operate in bands allocated for terrestrial systems, but permitting them to be fully integrated into those systems, we believe that it is in the public interest to require that those satellites protect terrestrial systems commensurate with the protections they are afforded from terrestrial-only systems. While the out-of-band PFD limits the Commission adopted may require more stringent attenuation than the emission limits specified in § 25.202(f) for satellite operation, the Commission believes that these stricter limits are both necessary and technologically feasible for small and other satellite operators providing SCS.

54. *Equipment Authorization for SCS.* The adopted rules in the *Report and Order* also require terrestrial device equipment authorization grantees to modify existing, or obtain new, equipment authorizations for previously certified terrestrial devices to reflect those devices' approval to operate under a part 25 MSS allocation and applicable SCS rules. New applicants should include a request for part 25 on future certification applications for equipment that is capable of operation in an SCS mode. This requirement does introduce a new administrative burden for equipment authorization grantees and applicants, especially as it relates to already certified equipment. The Commission's existing procedures through the permissive change process which enable electrical or mechanical changes to certified equipment when those changes do not affect the characteristics required to be reported to the Commission do not apply here where the only change being made to the certification is adding authorization for part 25. Under the Commission's existing rules, ''a change other than a permissive change'' requires a grantee to file a new application for certification accompanied by the information specified in part 2 of the Commission's rules. The Commission believes there is good reason to provide grantees a way to effectuate the necessary changes to their equipment authorization grants under the Commission's rules that also minimizes the administrative burdens associated with a new equipment certification application by waiving relevant rule provisions to provide a simplified process for existing grantees to modify their certifications to reflect part 25 authorization for SCS.

55. In granting a limited waiver of its rules, the Commission aims to minimize the burden on small and other equipment certification holders, while ensuring tracking and accountability for devices capable of SCS, and compliance with its prohibition on the authorization of covered equipment. Similarly, for new equipment authorizations, terrestrial devices need only show compliance with the terrestrial technical rules for the rule parts under which they will operate; no additional tests are needed for part 25 SCS capability. Thus, seeking to have the part 25 SCS designation on the equipment certification only requires the applicant to request such a designation pursuant to the SCS rules.

56. *International Coordination.* In the *Report and Order*, the adopted rules require that SCS operations that may occur in bands not allocated for such services in the International Table must be consistent with ITU Radio Regulation No. 4.4 and finds that it would serve the public interest to include express conditions in the SCS licenses to ensure that the Commission's obligations are met as the ITU notifying administration for U.S. licensed space station operations. In these cases, the Commission will require additional assurances from SCS licensees that while operating outside of the United States, pursuant to an authorization from another country, the satellite operations will not cause harmful interference into a nearby country. Prior to conducting any communications with earth stations outside the United States, a satellite operator licensed to provide SCS, or applicant for a license to provide SCS, must certify to Space Bureau and the Office of International Affairs (OIA) that it has obtained all necessary authorizations from the relevant country prior to initiation of communications with earth stations in that country. The certification must include steps that were taken to address harmful interference concerns and that these SCS operations will not result in harmful interference to operations that are in conformity with the ITU Radio Regulations in neighboring or nearby

countries. The certification must also be accompanied by a demonstration specifying the measures that the U.S. licensee or applicant will take to eliminate any harmful interference immediately, in the event that it is notified of harmful interference resulting from such SCS operations. These requirements are consistent with existing Commission rules, thereby limiting the compliance burden for small and other entities.

F. Steps Taken To Minimize the Significant Economic Impact on Small Entities and Significant Alternatives Considered

57. The RFA requires an agency to provide, ''a description of the steps the agency has taken to minimize the significant economic impact on small entities . . . including a statement of the factual, policy, and legal reasons for selecting the alternative adopted in the final rule and why each one of the other significant alternatives to the rule considered by the agency which affect the impact on small entities was rejected.

58. As discussed above, the Report and Order adopts an SCS framework that allows, through a collaboration between a terrestrial mobile service provider and satellite operator, transmissions directly from satellites to terrestrial devices on spectrum that was previously allocated and licensed exclusively on a terrestrial basis. In the discussion of the issues, the initial NPRM sought comment on, the Commission raised alternatives and sought input such as a cost and benefit analyses from small and other entities. By requesting such information, the Commission gave small entities the opportunity to broaden the scope of the Commission's understanding of impacts which may not be readily apparent, and offer alternatives not already considered that could minimize the economic impact on small entities.

59. *Waiver-Based Approach.* The Commission declines to adopt a waiver-based approach to enable SCS, opting instead to enable SCS on a variety of bands in all parts of the United States through generally-applicable rules. Some commenters argued for a waiver-based approach instead, but the Commission believes a generally-applicable rules approach allows the Commission to better serve the public by allowing it to more carefully consider the entire landscape of an issue as well as make more comprehensive policy decisions. However, because there are particular SCS implementations that do not perfectly align with this framework, in order to not discourage or delay other innovative solutions for SCS, the Commission will continue to consider on a case-by-case basis filings for waiver or special temporary authority (STA) made by interested parties for SCS. Permitting case-by-case filings for waiver or STA will allow more flexibility for smaller entities who do not have the resources that larger entities have to participate in providing SCS.

60. *Geographically Independent Area (GIA).* In the initial *NPRM*, the Commission proposed to limit the provision of SCS ''to instances where a single terrestrial licensee holds all co-channel licenses in the relevant band throughout one of the six GIAs.'' In the *Report and Order*, the Commission adopted the proposal to limit SCS authorizations to the following GIAs: (1) CONUS; (2) Alaska; (3) Hawaii; (4) American Samoa; (5) Puerto Rico/U.S. Virgin Islands; and (6) Guam/Northern Mariana Islands. The Commission adopted its original proposal to limit SCS to GIAs at this time, and acknowledges that this decision does not foreclose the ability for parties with proposals for providing SCS that do not satisfy the framework from applying to the Commission and demonstrating that they will not cause harmful interference. Some commenters, some of which include small entities, suggested this proposal would limit SCS to large carriers with nationwide authority over a block of spectrum, or otherwise exclude smaller or regional terrestrial operators from participation in the framework. Because of these concerns, the Commission has taken the step of expanding its entry criteria so that multiple terrestrial service providers may work with a satellite operator to provide SCS, as long as together those service providers hold all the licenses in the relevant channel throughout a GIA. These more expansive entry criteria help provide an opportunity for broader deployment of SCS both spectrally and geographically and allows additional licensees to participate, while still minimizing the risk of harmful interference.

61. *Part 25 License Entry Criteria.* In the *Report and Order*, the Commission adopted rules to authorize satellite-to-terrestrial (uplink and downlink) operations in certain bands whereby a NGSO or GSO satellite operator may apply for a new or modify an existing part 25 authorization where that entity meets certain prerequisites, or ''entry criteria.'' This approach will significantly expand and enhance secondary markets in a manner that aligns with the Commission's public interest objectives in order to permit spectrum to flow more freely among users and uses in response to economic demand. The Commission believes that by allowing spectrum to be utilized in this way, it will encourage small entities to become more involved in this process and collaborate with larger providers.

62. Furthermore, in the *Report and Order*, the Commission declined to require part 25 blanket earth station licensing because the comments in the record reflected that blanket licensing would be unnecessarily burdensome to small and other entities. In the initial *NPRM*, the Commission proposed that a terrestrial licensee seeking to collaborate with a satellite operator to offer SCS must apply for and obtain a blanket earth station license for all of its subscribers' terrestrial devices that will be transmitting to space stations for SCS operations. The Commission sought comment on this approach as well as any other approaches that would be consistent with statutory and international obligations. However, commenters raised significant concerns regarding blanket licensing, and, thus, the Commission instead adopts a license by rule approach for terrestrial devices as earth stations communicating with a satellite network for the purposes of SCS. By not requiring providers to apply for and obtain a blanket earth station license, the Commission removes a barrier that was potentially unnecessarily burdensome, in particular for small entities with limited resources.

63. *Part 1 Leasing.* The Commission adopts a framework authorizing SCS by amending its part 1 leasing rules to permit terrestrial licensees to lease terrestrial spectrum rights to satellite operators for the purpose of providing SCS. These requirements are consistent with existing Commission part 1 leasing rules, and the Commission will require applicants for and current licensees of the authorized SCS bands to provide the necessary information using current FCC Form 608. This process will benefit small entities by saving time and resources, as it utilizes the Commission's current application approval and notification processing procedures, and it will remove unnecessary delay by utilizing the procedures that are already in place. Additionally, the Commission considered, but declined, to adopt an approach where a lease was not initially required. Some commenters advocated for the adoption of a ''two-step'' licensing model in response to the *NPRM*, which would have involved a deployment grant that would not have required a lease initially. However, the Commission believes that a two-step part 25 licensing process would require

a duplicative and inefficient use of staff resources that could create a significant economic burden to small entities.

64. *Part 25 Automatic Termination.* The Commission retains the current part 25 rules regarding automatic termination of station authorizations to satellite licensees seeking to provide SCS jointly with a terrestrial operator and adds a rule whereby the termination of any lease(s) that allow for the use of specific terrestrial spectrum for SCS is a trigger for automatic termination of the part 25 license. The new rule that triggers the current part 25 automatic termination requirement is consistent with the current automatic termination rules. By retaining the current part 25 rules regarding automatic termination, small and other entities will not have to become acquainted with a new set of rules, thus reducing their compliance burden.

65. *911 Call Transmission Requirements.* The Commission establishes on an interim basis that terrestrial providers must transmit all SCS 911 calls and texts to a PSAP using either an emergency call center or location-based routing. Terrestrial providers must also transmit location information and the user's phone number to facilitate dispatch and callback capabilities at the receiving PSAP. This interim step will balance the need for SCS 911 voice calls and texts to be routed to the appropriate PSAP with the need for entities to have flexibility in their implementation of SCS. The Commission implements this interim step because some terrestrial 911 requirements may not be feasible at this time and, thus, balanced feasibility with the vital importance of 911 services. In connection with this interim requirement, terrestrial providers that use SCS to extend coverage must maintain records of SCS 911 voice calls and text messages received on their network and emergency call centers. In addition, the adopted rules require terrestrial providers to file an SCS 911 report with the Commission on an annual basis, which will provide critical information regarding SCS 911 connectivity to the Commission while accomplishing it in a manner that does not create a severe burden for entities required to file. The Commission concluded that extending and adapting the existing MSS 911 reporting and location-based routing requirements are minimally burdensome. While these requirements do present new obligations for small entities, these measures will promote transparency and accountability in routing SCS voice calls and provide useful data. In addition, the concurrently adopted *Further Notice of Proposed Rulemaking*, published elsewhere in this issue of the **Federal Register**, will also provide an ample record in which the Commission may consider any additional concerns regarding SCS 911-related issues.

66. The *Report and Order* also establishes disclosure requirements for terrestrial providers to inform their subscribers of the limitations resulting from the use of SCS to contact 911. This disclosure requirement is consistent with the disclosure requirement the Commission adopted for interconnected Voice Over Internet Protocol (VoIP) service providers, demonstrating that it will be familiar to entities and not cause a significant economic impact. While this is a new requirement for providers, it will provide vital information to consumers about the limitations of SCS when contacting 911. The Commission also adopts a rule requiring terrestrial providers to file with the Commission a one-time certification regarding safeguarding the privacy and security of SCS location information. These obligations are consistent with the Commission's existing rules that apply to z-axis and dispatchable location data, as well as location information used for location-based routing; therefore, it will be familiar to terrestrial providers and not create an additional costly burden on small entities.

67. *Market Area Boundary Limits.* The Commission maintains the existing market area boundary limits in parts 22, 24, and 27 of the Commission's rules, noting that SCS partners should be expected to coordinate regarding the technical parameters necessary to avoid co-channel interference with one another's operations. Although the existing market area boundary limits remain, the Commission states that certain limits may be necessary and applicable to the boundaries of the GIA, including at international borders or boundaries extending into water. Therefore, the Commission adopts a rule to limit the signal levels from SCS at and beyond the terrestrial operator's licensed area to be the same as those defined for terrestrial operation in each respective band.

68. *Out of Band Emission (OOBE) Limits.* The Commission adopts a uniform OOBE limit for SCS operation across the SCS Bands expressed as a terrestrial PFD limit. The Commission declined to apply the existing OOBE limits for base stations; instead, after the perspective of commenters who expressed mixed views on which OOBE limits to apply, the Commission adopts a uniform PFD limit for SCS, which provides an equitable- and technologically feasible-compromise between the positions expressed in the record and will also effectively protect adjacent band operations across the SCS Bands. Further, by adopting a uniform OOBE limit for SCS operations, entities will not have to become knowledgeable about several different limitations, which will save much needed time and resources for small entities. We note that even though the out-of-band PFD limits adopted may require more stringent attenuation than the emission limits specified in § 25.202(f) for satellite operation, the Commission believes these stricter limits are both necessary and technologically feasible for satellite operators providing SCS.

69. *Equipment Authorization for SCS.* In the *Report and Order*, the Commission requires terrestrial device equipment authorization grantees to modify existing, or obtain new, equipment authorizations for previously certified terrestrial devices to reflect those devices' approval to operate under a part 25 MSS allocation and applicable SCS rules. This requirement does introduce a new administrative burden for equipment authorization grantees and applicants, especially as it relates to already certified equipment. The Commission's existing procedures through the permissive change process which enable electrical or mechanical changes to certified equipment when those changes do not affect the characteristics required to be reported to the Commission do not apply here where the only change being made to the certification is adding authorization for part 25. Under the Commission's existing rules, ''a change other than a permissive change'' requires a grantee to file a new application for certification accompanied by the information specified in part 2 of the Commission's rules. While the Commission believes there is good reason to provide grantees a way to effectuate the necessary changes to their equipment authorization grants under the Commission's rules that also minimizes the administrative burdens associated with a new equipment certification application. The Commission therefore waives relevant provisions to provide a simplified process for existing grantees to modify their certifications to reflect part 25 authorization for SCS. In providing this limited waiver to existing rules, the Commission aims to minimize the burden on equipment certification holders, while ensuring tracking and accountability for devices capable of SCS, and compliance with our prohibition on the authorization of covered equipment. Similarly, for new equipment authorizations, terrestrial

devices need only show compliance with the terrestrial technical rules for the rule parts under which they will operate; no additional tests are needed for part 25 SCS capability.

70. *International Coordination.* In the *Report and Order*, the Commission requires that SCS operations in bands not allocated for such services in the International Table must be consistent with ITU Radio Regulation No. 4.4 and finds it would serve the public interest to include express conditions in the SCS licenses to ensure that the Commission's obligations are met as the ITU notifying administration for U.S. licensed space station operations. In these cases, the Commission will require additional assurances from SCS licensees that while operating outside the United States, pursuant to an authorization from another country, the satellite operations will not cause harmful interference. Prior to conducting any communications with earth stations outside the United States, a satellite operator licensed to provide SCS, or applicant for a license to provide SCS, must certify to the Space Bureau and OIA that it has obtained all necessary authorizations from the relevant country prior to initiation of communications with earth stations in that country.

71. *ECIP Program.* The initial *NPRM* sought comment on eligibility for the Enhanced Competition Incentive Program (ECIP), which the Commission established in July 2022 to facilitate new opportunities for small carriers and Tribal nations to increase access to spectrum, while incorporating provisions to ensure against program waste, fraud and abuse. Given that the framework is primarily intended to facilitate provision of SCS to existing consumer handsets, and ECIP was adopted with requirements tailored specifically towards provision of service through terrestrial base stations, the Commission considered whether to make SCS participants, necessarily engaged in leasing arrangements, eligible for ECIP benefits which could reduce the economic impacts for small carriers and Tribal nations. In the *Report and Order*, the Commission declines to extend ECIP benefits to stakeholders that presently intend to enter into leasing arrangements for the provision of SCS. The Commission highlights that the provisions of SCS do not align with the goals or entry criteria of the ECIP program and believes it is in the public interest to allow the SCS marketplace and the ECIP program to further develop before determining whether it is appropriate for these two new Commission efforts to support one another.

G. Report to Congress

72. The Commission will send a copy of the *Report and Order*, including the FRFA, in a report to Congress pursuant to the Congressional Review Act. In addition, the Commission will send a copy of the *Report and Order*, including the FRFA, to the Chief Counsel for Advocacy of the SBA. A copy of the *Report and Order* and FRFA (or summaries thereof) will also be published in the **Federal Register.**

Ordering Clauses

73. Accordingly, *it is ordered* that, pursuant to the authority found in sections 1, 4(i), 157, 301, 303, 307, 308, 309, and 310 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 157, 301, 303, 307, 308, 309, and 310, that the *Report and Order* and *Further Notice of Proposed Rulemaking is hereby adopted*.

74. *It is further ordered* that the *Report and Order shall be effective* 30 days after publication in the **Federal Register,** with the exception of revisions to §§ 1.9047(d)(2), 9.10(t)(3) through (5), and 25.125(b)(1) and (2) and (c) of the Commission's rules, 47 CFR 1.9047(d)(2), 9.10(t)(3) through (5), and 25.125(b)(1) and (2) and (c), which may contain new or modified information collection requirements and will not be effective until after the Office of Management and Budget completes any review the Wireless Telecommunications Bureau and the Space Bureau determine is required under the Paperwork Reduction Act and provide an effective date by subsequent Public Notice.

75. *It is further ordered* that, pursuant to section 4(i) of the Communications Act, as amended, 47 U.S.C. 154(i), and § 1.3 of the Commission's rules, 47 CFR 1.3, the following rules are waived, effective immediately upon adoption of the *Report and Order* and extending until the date that is six months following the effective date announced in the Public Notice issued pursuant to paragraph 268 in the *Report and Order*, to the limited extent and as described herein: §§ 2.1043(c) and 2.911(c) and (e) of the Commission's rules, 47 CFR 2.1043(c) and 2.911(c) and (e). This temporary waiver is granted only for the purpose of adding a part 25 designation to equipment certifications granted on or before the 60th day after a summary of the Report and Order is published in the **Federal Register.**

76. *It is further ordered* that the Commission's Office of the Secretary, SHALL SEND a copy of the *Report and Order* and *Further Notice of Proposed Rulemaking*, including the Final Regulatory Flexibility Analysis and the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

77. *It is further ordered* that the Commission *shall send* a copy of the *Report and Order* in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

List of Subjects

47 CFR Part 1

Practice and procedure, Reporting and recordkeeping requirements, Telecommunications, Wireless radio services.

47 CFR Part 2

Communications, Satellites, Telecommunications.

47 CFR Part 9

Communications common carriers, Communications equipment, Radio.

47 CFR Part 25

Administrative practice and procedure, Satellites.

Federal Communications Commission.

Marlene Dortch,

Secretary.

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR parts 1, 2, 9, and 25 as follows:

PART 1—PRACTICE AND PROCEDURE

■ 1. The authority citation for part 1 continues to read as follows:

Authority: 47 U.S.C. chs. 2, 5, 9, 13; 28 U.S.C. 2461 note; 47 U.S.C. 1754, unless otherwise noted.

■ 2. Effective May 30, 2024, add § 1.9047 to read as follows:

§ 1.9047 Special provisions relating to spectrum leasing arrangements involving terrestrial spectrum rights for supplemental coverage from space.

(a) *Supplemental coverage from space.* For purposes of this section, *supplemental coverage from space (SCS)* has the same meaning as in § 25.103 of this chapter.

(b) *Geographically independent area (GIA).* For purposes of this section, *geographically independent area (GIA)* has the same meaning as in § 25.103 of this chapter.

(c) *Part 25 SCS Entry Criteria.* For purposes of this section, part 25 SCS Entry Criteria refers to the requirements

outlined in § 25.125(a) and (b) of this chapter.

(d) *Scope.* Under this section, a licensee may enter into a spectrum manager (*see* § 1.9020) or *de facto* transfer (see §§ 1.9030 and 1.9035) leasing or subleasing arrangement with a spectrum lessee in only the bands identified in § 2.106(d)(33)(i) of this chapter for the purpose of meeting the part 25 SCS Entry Criteria.

(1) The licensee seeking to engage in spectrum leasing under this section may do so under the following parameters:

(i) A single licensee that holds all co-channel licenses on the relevant band in a GIA may enter into a leasing arrangement with one or more satellite operators.

(ii) If there are multiple co-channel licensees that collectively hold all co-channel licenses in a particular band throughout one of six GIAs, the licensees may enter into spectrum leasing arrangements only under one of the following conditions:

(A) One licensee holding a license in the GIA must enter into an individual spectrum leasing arrangement with each of the other co-channel licensees in that GIA. The licensee may then enter into a leasing arrangement with one satellite operator; or

(B) One satellite operator may enter into individual leasing arrangements with each of the relevant co-channel licensees that together hold all co-channel licenses on the relevant band in the GIA.

(2) [Reserved]

(e) *FirstNet.* In order for the First Responder Network Authority (FirstNet), as defined in 47 U.S.C. 1424, to fulfill the part 25 SCS Entry Criteria, FirstNet must file an FCC Form 601 in the Universal Licensing System (ULS) that:

(1) Describes the manner in which FirstNet has conveyed to its satellite partner an authorization to utilize the 758–769/788–799 MHz band or portions of the band;

(2) Identifies and describes the geographic area(s) and nature of the proposed SCS operations; and

(3) Demonstrates how, under the agreement, the rights and responsibilities of the satellite operator partner are substantively the same as those of a lessee under this part.

(f) *Subleasing.* Notwithstanding the provisions of §§ 1.9020(l) and 1.9030(k), an SCS spectrum lessee may sublease spectrum usage rights subject to the following condition.

(1) Satellite operators may not enter into a spectrum subleasing arrangement where there are multiple terrestrial licensees jointly leasing their co-channel rights in a given GIA pursuant to paragraph (d)(1)(ii) of this section.

(2) [Reserved]

(g) *Construction/performance requirements.* Notwithstanding the provisions of §§ 1.9020(d)(5)(i) and 1.9030(d)(5)(i), a licensee may not attribute to itself the build-out or performance activities of its SCS spectrum lessee(s) for purposes of complying with any applicable performance or build-out requirement.

■ 3. Delayed indefinitely, further amend § 1.9047 by adding paragraph (d)(2) to read as follows:

§ 1.9047 Special provisions relating to spectrum leasing arrangements involving terrestrial spectrum rights for supplemental coverage from space.

* * * * *

(d) * * *

(2) The spectrum lessee or sublessee seeking to engage in spectrum leasing under this section must provide within the FCC Form 608:

(i) A certification that the parties are entering into the leasing arrangement for the purpose of fulfilling the part 25 Entry Criteria;

(ii) A description of which method, single or multiple terrestrial licensee, the parties are utilizing to meet the part 25 Entry Criteria; and

(iii) If the parties are utilizing the spectrum leasing arrangement outlined in paragraph (d)(1)(ii) of this section, the parties must:

(A) Describe the nature of the leasing arrangement(s); and

(B) Demonstrate how the entirety of the GIA is covered by the lease arrangement(s).

* * * * *

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

■ 4. The authority citation for part 2 continues to read as follows:

Authority: 47 U.S.C. 154, 302a, 303, and 336, unless otherwise noted.

■ 5. Effective May 30, 2024, amend § 2.106 by:

■ a. Revising pages 30, 36, 37, and 38 in paragraph (a); and

■ b. Adding paragraph (d)(33)(i) and reserved paragraph (d)(33)(ii).

The revisions and additions read as follows:

§ 2.106 Table of Frequency Allocations.

PART 9—911 REQUIREMENTS

■ 6. The authority citation for part 9 continues to read as follows:

Authority: 47 U.S.C. 151–154, 152(a), 155(c), 157, 160, 201, 202, 208, 210, 214, 218, 219, 222, 225, 251(e), 255, 301, 302, 303, 307, 308, 309, 310, 316, 319, 332, 403, 405, 605, 610, 615, 615 note, 615a, 615b, 615c, 615a–1, 616, 620, 621, 623, 623 note, 721, and 1471, and Section 902 of Title IX, Division FF, Pub. L. 116–260, 134 Stat. 1182, unless otherwise noted.

■ 7. Effective May 30, 2024, amend § 9.10 by revising paragraph (a) introductory text and adding paragraph (t) to read as follows:

§ 9.10 911 Service.

(a) *Scope of section.* Except as described in paragraph (r) of this section, the following requirements of paragraphs (a) through (t) of this section are only applicable to CMRS providers, excluding mobile satellite service (MSS) operators, to the extent that they:

* * * * *

(t) *Interim 911 requirements for supplemental coverage from space*—(1) *Supplemental coverage from space.* For purposes of this paragraph (t), *supplemental coverage from space (SCS)* has the same meaning as in part 25, subpart A, of this chapter; *SCS 911 calls* are 911 calls (as defined in § 9.3) that are carried over satellite facilities pursuant to a CMRS provider's SCS arrangement; and an *SCS 911 text message* is a 911 text message (as defined in paragraph (q)(9) of this section) that is carried over satellite facilities pursuant to a CMRS provider's SCS arrangement.

(2) *Call Transmission requirements.* For purposes of delivering SCS 911 voice calls and SCS 911 text messages, CMRS providers must either:

(i) Use information regarding the location of a device, including but not limited to device-based location information, to route SCS 911 voice calls and SCS 911 text messages to an appropriate PSAP and transmit the phone number of the device used to send the SCS 911 voice call or SCS 911 text message and available location information to an appropriate PSAP; or

(ii) Use an emergency call center, at which emergency call center personnel must determine the emergency caller's phone number and location and then transfer or otherwise direct the 911 caller to an appropriate PSAP.

■ 8. Delayed indefinitely, further amend § 9.10 by adding paragraphs (t)(3) through (5) to read as follows:

§ 9.10 911 Service.

* * * * *

(t) * * *

(3) *Reporting.* Each CMRS provider that utilizes SCS arrangements to expand its coverage areas for providing service to its end-user subscribers must maintain records of all SCS 911 voice calls and SCS 911 text messages received on its network and received at its emergency call center. By October 15 of each year, each CMRS provider that utilizes SCS arrangements to expand its coverage areas for providing service to its end-user subscribers must submit a report to the Commission regarding SCS 911 voice calls and 911 text messages, and its emergency call center data, current as of September 30 of that year. CMRS providers that utilize SCS arrangements to expand their coverage areas for providing service to their end-user subscribers must submit this certification in the Commission's Electronic Comment Filing System. These reports must include, at a minimum, the following:

(i) The name and address of the CMRS provider, the address of that CMRS provider's emergency call center, and the contact information of the emergency call center;

(ii) The aggregate number of SCS 911 voice calls and SCS 911 text messages received by the network of the CMRS provider that provides SCS service to its end-user subscribers during each month during the relevant reporting period;

(iii) The aggregate number of SCS 911 voice calls and SCS 911 text messages received by the emergency call center each month during the relevant reporting period;

(iv) The aggregate number of SCS 911 voice calls and SCS 911 text messages received by the emergency call center each month during the relevant reporting period that required forwarding to a PSAP and how many did not require forwarding to a PSAP;

(v) The aggregate number of SCS 911 voice calls that were routed using location information that met the timeliness and accuracy thresholds defined in paragraphs (s)(3)(i)(A) and (B) of this section;

(vi) The aggregate number of SCS 911 voice calls and SCS 911 text messages that were routed using location information that did not meet the timeliness and accuracy thresholds defined in paragraphs (s)(3)(i)(A) and (B) of this section; and

(vii) An explanation of how the SCS deployment, including network architecture, systems, and procedures, will support routing SCS 911 voice calls and SCS 911 text messages to the geographically appropriate PSAP with sufficient location information in compliance with paragraph (t)(2) of this section.

(4) *Certification.* CMRS providers that utilize SCS arrangements to expand their coverage areas for providing service to their end-user subscribers must certify on a one-time basis that neither they nor any third party they rely on to obtain location information or associated data used for compliance with paragraph (t)(2)(i) or (ii) of this section will use such location information or associated data for any non-911 purpose, except with prior express consent or as otherwise permitted or required by law. The certification must state that the CMRS provider and any third parties it relies on to obtain location information or associated data used for compliance with paragraph (t)(2)(i) or (ii) have implemented measures sufficient to safeguard the privacy and security of such location information or associated data. CMRS providers that utilize SCS arrangements to expand their coverage areas for providing service to their end-user subscribers must submit this one-time certification in the Commission's Electronic Comment Filing System on the due date of the first report made under paragraph (t)(3) of this section.

(5) *Subscriber notification.* Each CMRS provider that utilizes SCS arrangements to expand its coverage areas for providing service to its end-user subscribers shall specifically advise every subscriber, both new and existing, in writing prominently and in plain language, of the circumstances under which 911 service for all SCS 911 calls, or SCS 911 text messages may not be available via SCS or may be in some way limited by comparison to traditional enhanced 911 service.

PART 25—SATELLITE COMMUNICATIONS

■ 9. The authority citation for part 25 continues to read as follows:

Authority: 47 U.S.C. 154, 301, 302, 303, 307, 309, 310, 319, 332, 605, and 721, unless otherwise noted.

■ 10. Effective May 30, 2024, amend § 25.103 by adding definitions for ''Geographically independent area (GIA)'', ''SCS earth stations'', and ''Supplemental coverage from space (SCS)'' in alphabetical order to read as follows:

§ 25.103 Definitions.

* * * * *

Geographically independent area (GIA). Any of the following six areas:

(1) CONUS;

(2) Alaska;

(3) Hawaii;

(4) American Samoa;

(5) Puerto Rico/U.S. Virgin Islands; and

(6) Guam/Northern Mariana Islands.

* * * * *

SCS earth stations. Any earth station used for the provision of supplemental coverage from space consistent with § 25.115(q).

* * * * *

Supplemental coverage from space (SCS). The provision of coverage to terrestrial wireless subscribers through an arrangement or agreement (see § 1.9047 of this chapter) between one or more NGSO or GSO operator(s) and one or more terrestrial wireless licensee(s), involving transmissions between space stations and SCS earth stations. NGSO and GSO operators and terrestrial wireless service licensees seeking to provide SCS must be authorized in compliance with § 25.125.

* * * * *

■ 11. Effective May 30, 2024, amend § 25.109 by adding paragraph (f) to read as follows:

§ 25.109 Cross-reference.

* * * * *

(f) Space and SCS earth stations providing SCS are subject to technical rules in parts 2, 22, 24, and 27 of this chapter where applicable.

■ 12. Effective May 30, 2024, amend § 25.114 by adding paragraph (a)(4) to read as follows:

§ 25.114 Applications for space station authorizations.

(a) * * *

(4) For an application filed pursuant to the SCS procedure in § 25.125, the filing must be submitted on FCC Form 312, Main Form and Schedule S, with attached exhibits as required by paragraph (d) of this section, and must constitute a comprehensive proposal.

* * * * *

■ 13. Effective May 30, 2024, amend § 25.115 by adding paragraph (q) to read as follows:

§ 25.115 Applications for earth station authorizations.

* * * * *

(q) *SCS earth stations.* An applicant seeking to use SCS earth stations to provide SCS must comply with § 25.125.

(1) A satellite operator licensed under § 25.125 to provide SCS is permitted to communicate with all terrestrial wireless licensee(s)-associated SCS earth stations that have been approved for such use under part 2 of this chapter.

(i) Such earth stations must show compliance with this part and at least one of either part 22, 24, or 27 of this chapter to provide SCS within the technical parameters and provisions associated with the device certification.

(ii) The device certification must show compliance with the licensed parameters of the terrestrial wireless license(s) and at least one of either part 22, 24, or 27 of this chapter, as applicable.

(2) An earth station may be used for the provision of SCS when:

(i) The satellite operator licensed under § 25.125 is a party to a valid and approved spectrum leasing arrangement or agreement pursuant to § 1.9047 of this chapter with at least one terrestrial wireless licensee(s) licensed under one of either part 22, 24, or 27 of this chapter; and

(ii) That terrestrial wireless licensee(s) has met and operates within all conditions associated with the relevant terrestrial wireless license(s).

(3) A satellite operator authorized to provide SCS under § 25.125 is authorized under paragraph (q)(1) of this section to communicate with SCS earth stations for any period during which each of the following apply:

(i) The service is provided during the valid duration of any spectrum leasing arrangement or agreement pursuant to § 1.9047 of this chapter between the terrestrial wireless licensee(s) and satellite operator;

(ii) The devices to which service is provided are certified under part 2 of this chapter; and

(iii) The terrestrial wireless licensee(s) is a valid licensee(s) under part 22, 24, or 27 of this chapter.

(4) A satellite operator with SCS authorization via a market access grant can avail itself of the provisions of this paragraph (q) but, in addition to the parameters established in paragraphs (q)(1) and (2) of this section, must also comply with any additional parameters included in the satellite operator's space station market access grant.

(5) A satellite operator operating in conformance with the parameters established in this part does not need a separate earth station authorization for the provision of SCS under this part.

■ 14. Effective May 30, 2024, amend § 25.117 by adding paragraph (j) to read as follows:

§ 25.117 Modification of station license.

* * * * *

(j) An application for modification of a space station authorization to provide SCS must comply with § 25.125.

■ 15. Effective May 30, 2024, add § 25.125 to read as follows:

§ 25.125 Applications for supplemental coverage from space (SCS).

(a) *SCS entry criteria.* This section applies only to applicants seeking to provide SCS. An applicant for SCS space station authorization must hold either an existing NGSO or GSO license or grant of U.S. market access under this part, or must be seeking a NGSO or GSO license or grant of U.S. market access under this part, and must have a lease arrangement(s) or agreement pursuant to § 1.9047 of this chapter with one or more terrestrial wireless licensee(s) that hold, collectively or individually, all co-channel licenses throughout a GIA in a band identified in § 2.106(d)(33)(i) of this chapter. Applicants for SCS space stations must comply with the requirements set forth in paragraph (b) of this section.

(b) *SCS space station application requirements.* An applicant seeking a space station authorization to provide SCS must either submit an application requesting modification of a current NGSO or GSO license or grant of U.S. market access under this part, or an application seeking a new NGSO or GSO license or grant of U.S. market access under this part.

(1)–(2) [Reserved]

(3) Applications to modify an authorization under this part to provide SCS and applications seeking to provide SCS in the bands identified in § 2.106(d)(33)(i) of this chapter will not be subject to the processing round procedures or first-come, first-served procedures in §§ 25.137, 25.157, and 25.158.

(c) [Reserved]

(d) *Effective date and continued operation of SCS authorization.* SCS authorization will be deemed effective in the Commission's records and for purposes of the application of the rules set forth in this section after each of the following requirements is satisfied:

(1) Grant of:

(i) A modification application under this part or request for modification of a grant of market access; or

(ii) An application to launch and operate or market access;

(2) Approval of a leasing arrangement(s) or agreement(s) under part 1 of this chapter (*see* § 1.9047 of this chapter); and

(3) Grant of a valid SCS earth station equipment certification under part 2 of this chapter.

(e) *SCS earth station equipment certification requirements.* Applicants for certification for SCS earth stations for use with a satellite system must meet all requirements for equipment certification and equipment test data necessary to demonstrate compliance with pertinent standards under part 22, 24, or 27 of this chapter as applicable.

■ 16. Delayed indefinitely, further amend § 25.125 by adding paragraphs (b)(1) and (2) and (c) to read as follows:

§ 25.125 Applications for supplemental coverage from space (SCS).

* * * * *

(b) * * *

(1) The application must include a certification that:

(i) A lease notification(s) or application(s), pursuant to § 1.9047 of this chapter, where a single terrestrial wireless licensee holds or multiple co-channel licensees collectively hold all co-channel licenses within the relevant GIA in the bands identified in § 2.106(d)(33)(i) of this chapter, or as it pertains to FirstNet, an agreement, is on file with the Commission;

(ii) The current space station licensee under this part or grantee of market access for NGSO or GSO satellite operation under this part seeks modification of authority to provide SCS in the same geographic areas covered in the relevant GIA, or the applicant for a space station license under this part or grant of market access for NGSO or GSO satellite operation under this part seeks to provide SCS in the same geographic areas covered in the relevant GIA; and

(iii) SCS earth stations will qualify as ''licensed by rule'' earth stations under § 25.115(q).

(2) The application must include a comprehensive proposal for the prospective SCS system on FCC Form 312, Main Form and Schedule S, as described in § 25.114, together with the certification described in paragraph (b)(1) of this section and include a list of the file and identification numbers associated with the relevant leasing notification(s) under part 1 of this chapter, application(s), and FCC Form 601(s), with a brief description of the coverage areas that will be served, domestically and internationally.

* * * * *

(c) *Equipment authorization for SCS earth stations.* Each SCS earth station used to provide SCS under this section must meet the equipment authorization requirements under paragraph (e) of this section and all equipment authorization requirements for all intended uses of the device pursuant to the procedures specified in part 2 of this chapter and the requirements of at least one of part 22, 24, or 27 of this chapter.

* * * * *

■ 17. Effective May 30, 2024, amend § 25.137 by revising paragraphs (b) and (f) to read as follows:

§ 25.137 Requests for U.S. market access through non-U.S.-licensed space stations.

* * * * *

(b) Any request pursuant to paragraph (a) of this section must be filed electronically through the International Communications Filing System and must include an exhibit providing legal and technical information for the non-U.S.-licensed space station of the kind that § 25.114, § 25.122, § 25.123, or § 25.125 would require in a license application for that space station, including but not limited to information required to complete Schedule S. An applicant may satisfy the requirement in this paragraph (b) by cross-referencing a pending application containing the requisite information or by citing a prior grant of authority to communicate via the space station in question in the same frequency bands to provide the same type of service.

* * * * *

(f) A non-U.S.-licensed space station operator that has been granted access to the United States market pursuant to a declaratory ruling may modify its U.S. operations under the procedures set forth in §§ 25.117(d), (h), and (j) and 25.118(e).

* * * * *

■ 18. Effective May 30, 2024, amend § 25.161 by adding paragraph (e) to read as follows:

§ 25.161 Automatic termination of station authorization.

* * * * *

(e) The failure to provide any SCS on all or some of the SCS authorized frequencies for more than 90 days. In this instance, the authorization will be terminated in whole or in part with respect to the relevant frequencies on which SCS has not been operational for more than 90 days in the United States, unless specific authority is requested.

■ 19. Effective May 30, 2024, amend § 25.202 by adding paragraph (k) read as follows:

§ 25.202 Frequencies, frequency tolerance, and emission limits.

* * * * *

(k) Space station downlinks operating as SCS under the provisions of § 25.125 and § 2.106(d)(33)(i) of this chapter are subject to the following rules.

(1) *Out of band emission limits.* Notwithstanding the emission limitations of paragraph (f) of this section, the aggregation of all space station downlink emissions outside a licensee's SCS frequency band(s) of operation shall not exceed a power flux density of −120 dBW/m²/MHz at 1.5 meters above ground level.

(2) *Interference caused by out of band emissions.* If any emission from a transmitter operating in the SCS service results in harmful interference to users of another radio service, the FCC may require a greater attenuation of the emission than specified in this section.

■ 20. Effective May 30, 2024, amend § 25.204 by revising the section heading and adding paragraph (g) to read as follows:

§ 25.204 Power and out-of-band emission limits for earth stations.

* * * * *

(g) SCS earth stations providing SCS pursuant to §§ 25.125 and 25.115 shall comply with the power requirements and out-of-band emission limits corresponding to devices operating in part 22, 24, or 27 of this chapter (*e.g.*, § 22.913, § 24.232, or § 27.50), as required for their operating frequencies.

■ 21. Effective May 30, 2024, amend § 25.208 by revising the section heading and adding paragraph (w) to read as follows:

§ 25.208 Power flux-density and in-band field strength limits.

* * * * *

(w) The aggregate field strength at the earth's surface produced by all visible beams and satellites within each satellite constellation providing SCS service as they move over any given point or area in bands authorized by NG33A in the United States Table of Frequency Allocations and § 25.125 must meet:

(1) 40 dBμV/m for the 600 MHz, 700 MHz, and 800 MHz bands; and

(2) 47 dμV/m for the AWS and PCS bands; and

(3) Licensees must comply with all applicable provisions and requirements of treaties and other international agreements between the United States Government and the governments of other countries, including Canada and Mexico. Absent specific international agreements regarding SCS, licensees must comply with the limited provided

in paragraphs (w)(1) and (2) of this section.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 240424–0118]

RIN 0648–BM63

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Fishery Management Plans of Puerto Rico, St. Croix, and St. Thomas and St. John; Framework Amendment 2

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues regulations to implement management measures described in Framework Amendment 2 to each of the Puerto Rico, St. Croix, and St. Thomas and St. John Fishery Management Plans (FMPs). This final rule modifies annual catch limits (ACLs) for spiny lobster in the U.S. Caribbean exclusive economic zone (EEZ) around Puerto Rico, St. Croix, and St. Thomas and St. John. The purpose of this final rule is to update management reference points for spiny lobster under the FMPs, consistent with the best scientific information available to prevent overfishing and achieve optimum yield (OY).

DATES: This final rule is effective on May 30, 2024.

ADDRESSES: An electronic copy of Framework Amendment 2, which includes an environmental assessment, a regulatory impact review, and a Regulatory Flexibility Act analysis, may be obtained from the Southeast Regional Office website at *https://www.fisheries.noaa.gov/action/generic-framework-amendment-2-updates-spiny-lobster-overfishing-limit-acceptable-biological.*

FOR FURTHER INFORMATION CONTACT: Sarah Stephenson, NMFS Southeast Regional Office, telephone: 727–824–5305, *sarah.stephenson@noaa.gov.*

SUPPLEMENTARY INFORMATION: The Puerto Rico, St. Croix, and St. Thomas and St. John fisheries target spiny lobster, and are managed under their respective FMPs. The FMPs were prepared by the Caribbean Fishery Management Council (Council) and NMFS. NMFS implements the FMPs through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On January 31, 2024, NMFS published a proposed rule to implement management measures described in Framework Amendment 2 and requested public comment (89 FR 6085). The proposed rule and Framework Amendment 2 describe the rationale for the actions contained in this final rule. A summary of the management measures described in Framework Amendment 2 and implemented by this final rule is provided below.

All weights described in this final rule are in round weight.

Background

The Magnuson-Stevens Act requires NMFS and regional fishery management councils to prevent overfishing and to achieve, on a continuing basis, the OY from federally managed fish stocks to ensure that fishery resources are managed for the greatest overall benefit to the Nation, particularly with respect to providing food production and recreational opportunities, and protecting marine ecosystems.

For Puerto Rico and the U.S. Virgin Islands, NMFS, with the advice of the Council, manages fisheries under the Puerto Rico, St. Croix, and St. Thomas and St. John FMPs. The FMPs contain management measures applicable for Federal waters off the respective island group. Federal waters around Puerto Rico extend seaward from 9 nautical miles [nmi; 16.7 kilometers (km)] from shore to the offshore boundary of the EEZ. Federal waters around St. Croix, and St. Thomas and St. John extend seaward from 3 nmi (5.6 km) from shore to the offshore boundary of the EEZ.

For spiny lobster in the U.S. Caribbean EEZ, only commercial landings data are collected. Because recreational landings data are not available, the ACLs for spiny lobster are based on commercial landings and apply to all harvest for the stock, whether commercial or recreational.

In 2019, the Southeast Data, Assessment, and Review (SEDAR) completed three separate assessments for spiny lobster for the Puerto Rico, St. Croix, and St. Thomas and St. John management areas (SEDAR 57). In response to SEDAR 57 and recommendations from their Scientific and Statistical Committee (SSC), the Council prepared Framework Amendment 1 to the FMPs to update the overfishing limits (OFLs), acceptable biological catch (ABCs), ACLs, and accountability measures (AMs) for spiny lobster. NMFS published the final rule that implemented Framework Amendment 1 on March 16, 2023 (88 FR 16194).

After NMFS implemented the final rule for Framework Amendment 1, the Council requested that the NMFS Southeast Fisheries Science Center (SEFSC) conduct an update to SEDAR 57 to provide OFL and ABC estimates for spiny lobster for each island group for 2024 to 2026, which were not included in SEDAR 57. The SEFSC presented results of the 2022 Update Assessment to SEDAR 57 (SEDAR 57 Update) to the Council's SSC at its November–December 2022 meeting. The SSC accepted the SEDAR 57 Update and OFLs and ABCs for spiny lobster under each FMP.

Consistent with the SEDAR 57 Update, and recommendations from the SSC, the Council developed Framework Amendment 2 to prevent overfishing of spiny lobster and achieve OY for each stock, consistent with the requirements of the Magnuson-Stevens Act. For each FMP, the Council recommended ACLs for spiny lobster equal to 95 percent of the ABCs recommended by the SSC, which reflects the Council's management uncertainty buffer.

Management Measures Contained in This Final Rule

For spiny lobster, this final rule revises the ACLs in the EEZ around Puerto Rico, St. Croix, and St. Thomas and St. John based on the SEDAR 57 Update.

For the EEZ around Puerto Rico, the ACL for spiny lobster will decrease from the current ACL of 366,965 pounds (lb) or 166,452 kilograms (kg) to 357,629 lb (162,218 kg).

For the EEZ around St. Croix, the ACL for spiny lobster will increase from the current ACL of 120,830 lb (54,807 kg) to 137,254 lb (62,257 kg).

For the EEZ around St. Thomas and St. John, the ACL for spiny lobster will increase from the current ACL of 126,089 lb (57,193 kg) to 133,207 lb (60,422 kg).

Measures in Framework Amendment 2 Not Codified in This Final Rule

In addition to the ACLs described in this final rule, Framework Amendment 2 specifies the OFL and ABC for spiny lobster for Puerto Rico, St. Croix, and St. Thomas and St. John.

For the Puerto Rico FMP, the OFL for spiny lobster will decrease from 438,001 lb (198,673 kg) to 426,858 lb (193,620 kg) and the ABC for spiny lobster would

decrease from 386,279 lb (175,213 kg) to 376,452 lb (170,756 kg).

For the St. Croix FMP, the OFL for spiny lobster will increase from 144,219 lb (65,416 kg) to 163,823 lb (74,309 kg) and the ABC for spiny lobster would increase from 127,189 lb (57,691 kg) to 144,478 lb (65,534 kg).

For the St. Thomas and St. John FMP, the OFL for spiny lobster will increase from 150,497 lb (68,264 kg) to 158,993 lb (75,118 kg) and the ABC for spiny lobster would increase from 132,725 lb (60,203 kg) to 140,218 (63,602 kg).

Comments and Responses

NMFS received two comment submissions on the proposed rule implementing Framework Amendment 2. One comment received was in support of the proposed rule and one was opposed. The comment in opposition included multiple points, which are stated below in three separate comments, along with NMFS' responses. The commenter also noted the need for more research on spiny lobster, which was outside the scope of the proposed rule. There have been no changes to the proposed rule as a result of public comment.

Comment 1: If the purpose of the proposed rule implementing Framework Amendment 2 is to achieve OY and address overfishing, it will not do this.

Response 1: NMFS disagrees that the regulations it has proposed would not achieve OY. These regulations implement Framework Amendment 2, which the Council developed to update OFLs, ABCs, and ACLs for spiny lobster stocks based on the best scientific information available (the SEDAR 57 Update) to prevent overfishing and achieve OY. NMFS has determined that Framework Amendment 2 is based on the best scientific information available, consistent with the Magnuson-Stevens Act.

Comment 2: The action should expand beyond the Caribbean EEZ into other areas where spiny lobsters are fished like Florida.

Response 2: Under the Magnuson-Stevens Act, the Caribbean Council does not have the authority to decide on management measures for areas beyond the range of the Caribbean island management areas. 16 U.S.C. 1852(a)(1)(D). This comment is also beyond the scope of the proposed rule.

Comment 3: In the most recent seasons, Puerto Rico did not come remotely close to exceeding their ACL, so it does not make sense to decrease their ACL. It also does not make sense to increase St. Croix, St. Thomas and St. John's ACL considering they have been significantly under the ACL for years. Additionally, NMFS states that the stocks are not overfished. Therefore, localized management by the proposed action does not make sense, especially considering its skewed effect on fishing in Puerto Rican waters.

Response 3: As described in Framework Amendment 2 and the proposed rule, the SEDAR 57 Update included spiny lobster stocks in Puerto Rico, St. Croix, and St. Thomas and St. John, and updated the OFLs and ABCs for spiny lobster for each island management area. The Council recommended ACLs for spiny lobster in each FMP based on the updated ABCs. Reference points derived from stock assessments help fishery managers determine the level of catch that can be removed from the population each year. If the catch levels used in the stock assessment model are well below the sustainable population level (*i.e.,* maximum sustainable yield) estimated for the species, then the resulting catch targets (OFL, ABC, and ACL) could increase and fishermen would be able to catch fish that were previously left in the water. This scenario explains the increase in spiny lobster ACLs for St. Croix and St. Thomas and St. John. Conversely, if catch levels used in the stock assessment model are above, or are projected to be above, the sustainable population level estimated for the species, then the resulting catch targets (OFL, ABC, and ACL) could decrease, as is the scenario for Puerto Rico spiny lobster.

SEDAR 57 included landings data through 2016, and the SEDAR 57 Update included landings data through 2021. Catch of spiny lobster in Puerto Rico from 2017 through 2019 increased substantially, requiring accountability-based seasonal closures in fishing years 2021 (86 FR 40787, July 29, 2021) and 2022 (87 FR 38008, June 27, 2022). The next stock assessments for spiny lobster, SEDAR 91, are scheduled to begin in late-summer or early-fall of 2024, and would use updated information for the species.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this final rule is consistent with Framework Amendment 2, the FMPs, other provisions of the Magnuson-Stevens Act, and other applicable laws.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Magnuson-Stevens Act provides the legal basis for this final rule. No duplicative, overlapping, or conflicting Federal rules have been identified. In addition, no new reporting and record-keeping requirements are introduced by this final rule. A description of this final rule, why it is being considered, and the purposes of this final rule are contained in the **SUMMARY** and **SUPPLEMENTARY INFORMATION** sections of this final rule.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis was not required and none was prepared.

This final rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

List of Subjects in 50 CFR Part 622

Caribbean, Fisheries, Fishing, Spiny lobster.

Dated: April 24, 2024.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 50 CFR part 622 as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 622.440, revise paragraph (c)(1) to read as follows:

§ 622.440 Annual catch limits (ACLs), annual catch targets (ACTs), and accountability measures (Ams).

* * * * *

(c) * * *

(1) The ACL is 357,629 lb (162,218 kg), round weight.

* * * * *

■ 3. In § 622.480, revise paragraph (c)(1) to read as follows:

§ 622.480 Annual catch limits (ACLs), annual catch targets (ACTs), and accountability measures (Ams).

* * * * *

(c) * * *

(1) The ACL is 137,254 lb (62,257 kg), round weight.

* * * * *

■ 4. In § 622.515, revise paragraph (c)(1) to read as follows:

§ 622.515 Annual catch limits (ACLs), annual catch targets (ACTs), and accountability measures (AMs).

* * * * *

(c) * * *

(1) The ACL is 133,207 lb (60,422 kg), round weight.

* * * * *

Proposed Rules

Federal Register
Vol. 89, No. 84
Tuesday, April 30, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2024–0775; Airspace Docket No. 24–ASW–6]

RIN 2120–AA66

Establishment of Class E Airspace; Lubbock, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to establish Class E airspace at Lubbock, TX. The FAA is proposing this action to support new instrument procedures at this airport.

DATES: Comments must be received on or before June 14, 2024.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–0775 and Airspace Docket No. 24–ASW–6 using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instruction for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11H, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/*. You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish Class E airspace extending upward from 700 feet above the surface at Lubbock Exec Airpark, Lubbock, TX, to support instrument flight rule (IFR) operations at this airport.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or dely. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov* as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at *www.dot.gov/privacy*.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates

would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing to amend 14 CFR part 71 by:

Establishing Class E airspace extending upward from 700 feet above the surface within a 6.7-mile radius of Lubbock Exec Airpark, Lubbock, TX.

This action is to support new instrument procedures and IFR operations at this airport.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ASW TX E5 Lubbock, TX [Establish]

Lubbock Exec Airpark, TX
(Lat 33°29′01″ N, long 101°48′49″ W)

That airspace extending upward from 700 feet above the surface within a 6.7-mile radius of Lubbock Exec Airpark.

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would establish Class E airspace extending upward from 700 feet above the surface at 4D Ranch, Utopia, TX, to support instrument flight rule (IFR) operations at this airport.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically

invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or dely. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov* as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at *www.dot.gov/privacy.*

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing to amend 14 CFR part 71 by:

Establishing Class E airspace extending upward from 700 feet above the surface within a 10-mile radius of 4D Ranch, Utopia, TX.

This action is to support new instrument procedures and IFR operations at this airport.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ASW TX E5 Utopia, TX [Establish]

4D Ranch, TX
(Lat 29°42′49″ N, long 99°32′44″ W)

That airspace extending upward from 700 feet above the surface within a 10-mile radius of 4D Ranch.

* * * * *

Issued in Fort Worth, Texas, on April 22, 2024.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket Number USCG–2024–0361]

RIN 1625–AA08

Special Local Regulation; Back River, Baltimore County, MD

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to establish special local regulations to provide for the safety of life on certain waters of the Back River, in Baltimore County, MD. These regulations would be enforced during a high-speed power boat event and air show which will be held annually, on the 2nd, 3rd or 4th weekend (Friday, Saturday, and Sunday) in July. This proposed rulemaking would prohibit persons and vessels from being in the regulated area unless authorized by the Captain of the Port, Maryland-National Capital Region,

or the Coast Guard Event Patrol Commander. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before May 30, 2024.

ADDRESSES: You may submit comments identified by docket number USCG–2024–0361 using the Federal Decision-Making Portal at *https://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments. This notice of proposed rulemaking with its plain-language, 100-word-or-less proposed rule summary will be available in this same docket.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email Petty Officer Hollie Givens, U.S. Coast Guard Sector Maryland-National Capital Region; telephone 410–576–2596, email *MDNCRMarineEvents@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port, Sector Maryland-National Capital Region
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
PATCOM Patrol Commander
§ Section
SLR Special Local Regulations
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

Coast Guard regulations define ''regatta or marine parade'' as an organized water event of limited duration which is conducted according to a prearranged schedule. 33 CFR 100.05(a). And, as explained in 33 CFR 100.15, Coast Guard requires that an organization planning to hold a regatta or marine event apply for a permit if the event, by its nature, circumstances, or location, will introduce extra or unusual hazards to the safety of life on the navigable waters of the United States. These permits may be approved by the Coast Guard, or by the state in which the event is to take place, if there is a Coast Guard-State agreement in place. See 33 CFR 100.10. Upon the approval of an application, the Captain of the Port, Sector Maryland-National Capital Region (COTP) may promulgate such ''Special Local Regulations'' (SLR's) as he or she deems necessary to insure safety of life on the navigable waters immediately prior to, during, and immediately after the event. *See* 33 CFR 100.35(a).

Tiki Lee's Dock Bar of Sparrows Point, MD has submitted permit applications for two separate but concurrently held annual events in previous years. These events are ''Tiki Lee's Shootout on the River High Speed Power Boat'' event, and ''Tiki Lee's Shootout on the River Air Show.'' In the past, the Coast Guard has created temporary SLR's (which expire after a particular year's events have taken place) for the events. Because Tiki Lee's Dock Bar has indicated that it intends to continue to submit applications annually to hold these events (on the 2nd, 3rd or 4th, Friday, Saturday, and Sunday in July), however, we are proposing to incorporate the SLR into a permanent rule for these recurring events (33 CFR 100.501). Such permanent rule would not expire, but it would only be subject to enforcement during periods when the events are taking place. The Coast Guard would supplement the rule each year, when an application for the current year's events is approved, with a Notification of Enforcement providing specifics about enforcement times.

In ''Tiki Lee's Shootout on the River High Speed Power Boat'' event, approximately 40 participants compete with one another, completing individually-timed power boat speed runs on a designated, marked, linear course. The course is located in Baltimore County, Maryland, on the Back River, between Porter Point, to the south, and Stansbury Point, to the north. Both the power boat event and the air show are being held adjacent to Tiki Lee's Dock Bar, 4309 Shore Road, Sparrows Point, in Baltimore County, MD, but the speed power boat course area is different from the air show's aerobatic box. Among the hazards the high-speed power boat event pose are the chance that collisions will occur between event participants operating within, or adjacent to the navigation channel designated for the event, and non-participants traveling through that channel, or within approaches to local marinas, boat facilities and waterfront residential communities.

In ''Tiki Lee's Shootout on the River Air Show,'' civilian and military aircraft perform an air show flying low, and at high speeds. Air show performers operate within a designated, marked aerobatics box located on the Back River, between Lynch Point, to the south, and Walnut Point, to the north. Hazards from the air show which would threaten people in vessels traveling in the area if such vessels were allowed to do so without restriction include risks of injury or death resulting from aircraft accidents, being hit by dangerous projectiles or falling debris, and the chance that spectators and through traffic distracted by the air show would collide. Hazards to the environment in the event of a collision include hazardous materials spills.

The COTP Maryland-National Capital Region has determined that the potential hazards associated with the high-speed power boat event and air show would be a safety concern for anyone intending to participate in this event and for vessels that operate within specified waters of the Back River. The purpose of this rulemaking is to protect event participants, non-participants, and transiting vessels before, during, and after the scheduled event. The Coast Guard is proposing this rulemaking under authority in 46 U.S.C. 70041.

III. Discussion of Proposed Rule

The COTP proposes to establish special local regulations which may be subject to enforcement in a particular year on the 2nd, 3rd or 4th weekend (Friday, Saturday, and Sunday) in July. The regulated area for both events would cover all navigable waters of the Back River within an area which is approximately 4,200 yards in length and 1,200 yards in width. It is described with particularity in the draft regulatory text, below. The regulated area is Within the regulated area, specific zones would be designated as a ''Course Area,'' a ''Buffer zone,'' an ''Aerobatics Box,'' and three ''Spectator Areas,'' the ''East Spectator Fleet Area,'' the ''Northwest Spectator Fleet Area,'' and the Southwest Spectator Fleet Area.'' These are defined in the draft regulatory text, below. We have filed chartlets in the docket which depict these areas visually to aid commenters, but only the language of the draft regulatory text would be included in the regulation. To access documents mentioned as being available in the docket, go to section V of this document (''Public Participation and Request for Comments'').

While there are two separate events and while both are held on the same weekends, the two events will not necessarily occur at the same time, or on the same days. Historically, the air show has occurred on Friday, Saturday, and Sunday, while the high-speed power boat runs have occurred on Saturday, with a rain date of Sunday. On Saturday, when both events occur, the high-speed power boat runs have been halted at 2 p.m. to accommodate the air show. The speed runs then have then resumed at 3 p.m. and continue until they have finished.

The proposed enforcement periods and and the size of the regulated area were chosen to ensure the safety of life

on these navigable waters before, during, and after activities associated with the high-speed power boat event and air show. As is now provided in 33 CFR 10.501(a), the Coast Guard would publish an annual notification of enforcement (identifying the overall enforcement periods and periods of enforcement of particular zones within the regulated area) in the **Federal Register**, provide notice in the Fifth Coast Guard District Local Notice to Mariners, and issue a marine information broadcast on VHF–FM marine band radio announcing specific event dates and times.

Consistent with 33 CFR 100.35(a), the COTP and the Coast Guard Event PATCOM would have authority to forbid or control the movement of all vessels and persons, including event participants, in the regulated area. When hailed or signaled by an official patrol, a vessel or person in the regulated area would be required to immediately comply with the directions given by the COTP or Event PATCOM, as is now provided in 33 CFR 100.501(d). If a person or vessel fails to follow such directions, the Coast Guard may expel them from the area, issue them a citation for failure to comply, or both.

Only participant vessels would be allowed to enter the course area and aerobatics box. Except for Tiki Lee's Shootout on the River participants and vessels already at berth, a vessel or person would be required to get permission from the COTP or Event PATCOM before entering the regulated area. Vessel operators would be able to request permission to enter and transit through the regulated area by contacting the Event PATCOM on VHF–FM channel 16. Operators of vessels already at berth desiring to move those vessels when the event is subject to enforcement would be required to obtain permission before doing so.

If permission is granted by the COTP or Event PATCOM, a person or vessel would be allowed to enter the regulated area or pass directly through the regulated area as instructed. Vessels would be required to operate at a safe speed that minimizes wake while within the regulated area in a manner that would not endanger event participants or any other craft.

A person or vessel not registered with the event sponsor as a participant or assigned as official patrols would be considered a spectator. A spectator vessel must not loiter within the navigable channel while within the regulated area. Official patrol vessels would direct spectators to the designated spectator area. Official Patrols are any vessel assigned or approved by the Commander, Coast Guard Sector Maryland-National Capital Region with a commissioned, warrant, or petty officer onboard and displaying a Coast Guard ensign. Official Patrols enforcing this regulated area can be contacted on VHF–FM channel 16 and channel 22A.

This proposed rule would modify 33 CFR 100.501 by listing a new recurring marine event in Table 2 to Paragraph (i)(2), which covers the Coast Guard Sector Maryland-National Capital Region COTP Zone. The Coast Guard is proposing this rulemaking under authority in 46 U.S.C. 70041.

The regulatory text we are proposing appears at the end of this document.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This NPRM has not been designated a ''significant regulatory action,'' under section 3(f) of Executive Order 12866, as amended by Executive Order 14094 (Modernizing Regulatory Review). Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size and duration of the regulated area, which would impact a small, designated area of Back River. This waterway supports mainly recreational vessel traffic, which at its peak, occurs during the summer season. Although this regulated area extends across the entire width of the waterway, the rule would allow vessels and persons to seek permission to enter the regulated area, and vessel traffic would be able to transit the regulated area as instructed by Event PATCOM. Such vessels must operate at safe speed that minimizes wake and not loiter within the navigable channel while within the regulated area. Moreover, the Coast Guard would issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 about the status of the regulated area.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the regulated area may be small entities, for the reasons stated in section IV.A above, this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132 (Federalism), if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments) because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the potential effects of this proposed rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves implementation of regulations within 33 CFR part 100 applicable to organized marine events on the navigable waters of the United States that could negatively impact the safety of waterway users and shore side activities in the event area. Normally such actions are categorically excluded from further review under paragraph L61 of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments through the Federal Decision-Making Portal at *https://www.regulations.gov.* To do so, go to *https://www.regulations.gov,* type USCG–2024–0361 in the search box and click ''Search.'' Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If you cannot submit your material by using *https://www.regulations.gov,* call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this proposed rule for alternate instructions.

Viewing material in docket. To view documents mentioned in this proposed rule as being available in the docket, find the docket as described in the previous paragraph, and then select ''Supporting & Related Material'' in the Document Type column. Public comments will also be placed in our online docket and can be viewed by following instructions on the *https://www.regulations.gov* Frequently Asked Questions web page. Also, if you click on the Dockets tab and then the proposed rule, you should see a ''Subscribe'' option for email alerts. The option will notify you when comments are posted, or a final rule is published.

We review all comments received, but we will only post comments that address the topic of the proposed rule. We may choose not to post off-topic, inappropriate, or duplicate comments that we receive.

Personal information. We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the docket in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard is proposing to amend 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for part 100 continues to read as follows:

Authority: 46 U.S.C. 70041; 33 CFR 1.05–1.

■ 2. In § 100.501 amend table 4 to paragraph (i)(2) by adding a new entry in alphabetical order to read as follows:

§ 100.501 Special Local Regulations; Marine Events Within the Fifth Coast Guard District.

* * * * *

(i) * * *

(2) * * *

TABLE 2 TO PARAGRAPH (i)(2)

Event	Regulated area	Enforcement period(s)	Sponsor
*	* * *	* *	*
Tiki Lee's Shootout on the River High Speed Power Boat Event and Air Show.	*Regulated area.* All navigable waters of Back River, within an area bounded by a line connecting the following points: from the shoreline at Lynch Point at latitude 39°14′46″ N, longitude 076°26′23″ W, thence northeast to Porter Point at latitude 39°15′13″ N, longitude 076°26′11″ W, thence north along the shoreline to Walnut Point at latitude 39°17′06″ N, longitude 076°27′04″ W, thence southwest to the shoreline at latitude 39°16′41″ N, longitude 076°27′31″ W, thence south along the shoreline to and terminating at the point of origin. The course area, aerobatics box and spectator areas are within the regulated area. *Course Area.* The course area is a polygon in shape measuring approximately 1,400 yards in length by 50 yards in width. The area is bounded by a line commencing at position latitude 39°16′14.98″ N, longitude 076°26′57.38″ W, thence east to latitude 39°16′15.36″ N, longitude 076°26′55.56″ W, thence south to latitude 39°15′33.40″ N, longitude 076°26′49.70″ W, thence west to latitude 39°15′33.17″ N, longitude 076°26′51.60″ W, thence north to and terminating at the point of origin. *Buffer Zone.* The buffer zone is a polygon in shape measuring approximately 100 yards in east and west directions and approximately 150 yards in north and south directions surrounding the entire course area described in the preceding paragraph of this section. The area is bounded by a line commencing at position latitude 39°16′18.72″ N, longitude 076°27′01.74″ W, thence east to latitude 39°16′20.36″ N, longitude 076°26′52.39″ W, thence south to latitude 39°15′29.27″ N, longitude 076°26′45.36″ W, thence west to latitude 39°15′28.43″ N, longitude 076°26′54.94″ W, thence north to and terminating at the point of origin. *Aerobatics Box.* The aerobatics box is a polygon in shape measuring approximately 5,000 feet in length by 1,000 feet in width. The area is bounded by a line commencing at position latitude 39°16′01.2″ N, longitude 076°27′05.7″ W, thence east to latitude 39°16′04.7″ N, longitude 076°26′53.7″ W, thence south to latitude 39°15′16.9″ N, longitude 076°26′35.2″ W, thence west to latitude 39°15′13.7″ N, longitude 076°26′47.2″ W, thence north to and terminating at the point of origin. *East Spectator Fleet Area.* The area is a polygon in shape measuring approximately 2,200 yards in length by 450 yards in width. The area is bounded by a line commencing at position latitude 39°15′20.16″ N, longitude 076°26′17.99″ W, thence west to latitude 39°15′17.47″ N, longitude 076°26′27.41″ W, thence north to latitude 39°16′18.48″ N, longitude 076°26′48.42″ W, thence east to latitude 39°16′25.60″ N, longitude 076°26′27.14″ W, thence south to latitude 39°15′40.90″ N, longitude 076°26′31.30″ W, thence south to and terminating at the point of origin.	This section will be enforced on the 2nd, 3rd or 4th, Friday, Saturday, and Sunday in July. A Notification of Enforcement will be published 30 days prior to the event dates with specified enforcement times.	Tiki Lee's Dock Bar of Sparrows Point, MD.

TABLE 2 TO PARAGRAPH (i)(2)—Continued

Event	Regulated area	Enforcement period(s)	Sponsor
	Northwest Spectator Fleet Area. The area is a polygon in shape measuring approximately 750 yards in length by 150 yards in width. The area is bounded by a line commencing at position latitude 39°16′01.64″ N, longitude 076°27′11.62″ W, thence south to latitude 39°15′47.80″ N, longitude 076°27′06.50″ W, thence southwest to latitude 39°15′40.11″ N, longitude 076°27′08.71″ W, thence northeast to latitude 39°15′45.63″ N, longitude 076°27′03.08″ W, thence northeast to latitude 39°16′01.19″ N, longitude 076°27′05.65″ W, thence west to and terminating at the point of origin. *Southwest Spectator Fleet Area.* The area is a polygon in shape measuring approximately 400 yards in length by 175 yards in width. The area is bounded by a line commencing at position latitude 39°15′30.81″ N, longitude 076°27′05.58″ W, thence south to latitude 39°15′21.06″ N, longitude 076°26′56.14″ W, thence east to latitude 39°15′21.50″ N, longitude 076°26′52.59″ W, thence north to latitude 39°15′29.75″ N, longitude 076°26′56.12″ W, thence west to and terminating at the point of origin.

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2024–0100; FRL–11790–01–R09]

Air Quality Plans; California; San Diego County Air Pollution Control District; Permit Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a permitting rule which provides specific permit exemptions for sources otherwise requiring a permit, submitted as a revision to the San Diego County Air Pollution Control (APCD or ''District'') portion of the California State Implementation Plan (SIP). The proposed revisions would expand an existing provision that exempts tub grinders and trommel screens that process green material from permit requirements to include horizontal grinders and the processing of mixtures of green material and food material. The revisions also add a definition for ''food material.'' This action is being taken pursuant to the Clean Air Act (CAA or ''Act'') and its implementing regulations. We are taking comments on this proposal and plan to follow with a final action.

DATES: Comments must be received on or before May 30, 2024.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2024–0100 at *https://www.regulations.gov.* For comments submitted at *Regulations.gov,* follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider Confidential Business Information (CBI) or other information the disclosure of which is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www.epa.gov/dockets/commenting-epa-dockets.* If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Camille Cassar, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105 or by email at *cassar.camille@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us,'' and ''our'' refer to the EPA.

Table of Contents

I. The State's Submittal

A. What rule did the State submit?

Table 1 lists the rule addressed by this proposal with the dates it was amended

by the District and submitted by the California Air Resources Board (CARB).

TABLE 1—SUBMITTED RULE

Rule No.	Rule title	Amended date	Submitted date
11	Exemptions From Rule 10 Permit Requirements	10/13/2022	05/11/2023

On November 11, 2023, the submittal for Rule 11 was deemed by operation of law to meet the completeness criteria in 40 CFR part 51 Appendix V, which must be met before formal EPA review.

B. Are there other versions of this rule?

The SIP-approved version of the submitted rule is identified in Table 2.

TABLE 2—SIP APPROVED RULE

Rule No.	Rule title	SIP approval date	**Federal Register** citation
11	Exemptions from Rule 10 Permit Requirements	09/28/2022	87 FR 58729

If the EPA finalizes the action proposed herein, this rule will be replaced in the SIP by the submitted rule listed in Table 1.

C. What is the purpose of the submitted rule revision?

The rule revision expands the exemption for tub grinders and trommel screens processing green material to include horizontal grinders and the processing of mixtures of green material and food material. A definition of the term ''food material'' has also been added to the rule.

II. The EPA's Evaluation and Action

A. How is the EPA evaluating the rule?

Under 40 CFR 51.160(e), a permit program must identify the types and sizes of facilities, buildings, structures, or installations that will be subject to review. A new source review (NSR) permitting program may exempt some new sources or modifications that are inconsequential to attainment or maintenance of the national ambient air quality standards (NAAQS), considering local air quality concerns.

Section 110(l) of the Act prohibits the EPA from approving SIP revisions that would interfere with any applicable requirement concerning attainment and reasonable further progress (RFP) or any other applicable requirement of the CAA. Section 193 of the Act prohibits the modification of a SIP-approved control requirement in effect before November 15, 1990, in a nonattainment area, unless the modification ensures equivalent or greater emission reductions of the relevant pollutant(s). With respect to procedures, CAA sections 110(a) and 110(l) require that a state conduct reasonable notice and public hearing before adopting a SIP revision.

B. Does the rule meet the evaluation criteria?

Subsection (d)(10)(v) of Rule 11 currently exempts tub grinders and trommel screens processing green material from permit requirements. As a result of a recent California organic waste landfill diversion mandate, State of California Senate Bill (SB) 1383, San Diego County residents and businesses are now recycling food material along with yard waste. Consequently, composting facilities are now receiving, and processing, green material mixed with food material. Additionally, due to technological advancements, tub grinders are being replaced with more efficient horizontal grinders that are safer to operate. The rule revisions expand the existing exemption to include horizontal grinders and the processing of mixtures of green material and food material. A definition of the term ''food material'' has also been added to the rule.

The emissions from tub grinders and horizontal grinders are related to the throughput of materials; therefore horizontal grinders do not produce emissions that are measurably different from those from a tub grinder. Therefore, we find this expanded exemption provision acceptable. The definition for the term ''food material'' is clear and provides clarification of the type of materials that can be processed in the exempt equipment. Therefore, we find this new definition acceptable.

The submitted rule complies with the substantive and procedural requirements of CAA section 110(l). With respect to the procedural requirements, based on our review of the public process documentation included with the submitted rule, we find that the District has provided sufficient evidence of public notice and opportunity for comment and public hearings prior to submittal of this SIP revision and has satisfied the procedural requirements under CAA section 110(l).

With respect to the substantive requirements of CAA section 110(l), we have determined that our approval of the submitted rule would not interfere with the area's ability to attain or maintain the NAAQS or with any other applicable requirements of the CAA. Similarly, we find that the submitted rule is approvable under section 193 of the Act because it does not modify any control requirement in effect before November 15, 1990, without ensuring equivalent or greater emission reductions.

For the reasons stated above and explained further in our technical support document, we find that the submitted San Diego County APCD Rule 11 satisfies the applicable CAA and regulatory requirements for nonattainment NSR permit programs at 40 CFR 51.160 through 51.165 and other applicable requirements.

C. Proposed Action and Public Comment

As authorized in section 110(k)(3) of the Act, the EPA is proposing approval of San Diego County APCD Rule 11. We are proposing this action based on our determination that the submitted rule satisfies the applicable statutory and regulatory provisions governing regulation of stationary sources at 40 CFR 51.160 through 51.165. In support of our proposed action, we have concluded that our approval would comply with sections 110(l) and 193 of the Act because the amended rule will not interfere with continued attainment

of the NAAQS in San Diego County and does not relax control technology and offset requirements.

We will accept comments from the public on this proposal until May 30, 2024. If finalized, this action would incorporate the submitted rule into the SIP and our action would be codified through revisions to 40 CFR 52.220, ''Identification of plan—in part.''

III. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference San Diego County APCD Rule 11, ''Exemptions From Rule 10 Permit Requirements,'' amended October 13, 2022, which provides specific permit exemptions for sources otherwise requiring a permit. The EPA has made, and will continue to make, these materials available through *https://www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes to approve state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it proposes to approve a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rules do not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. The EPA defines environmental justice (EJ) as ''the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.'' The EPA further defines the term fair treatment to mean that ''no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.''

The air agency did not evaluate environmental justice considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. The EPA did not perform an EJ analysis and did not consider EJ in this action. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of E.O. 12898 of achieving environmental justice for people of color, low-income populations, and Indigenous peoples.

List of Subjects in 40 CFR Part 52

Environmental protection, Administrative practice and procedure, Air pollution control, Carbon oxides, Incorporation by reference, Intergovernmental relations, Nitrogen oxides, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: April 22, 2024.

Martha Guzman Aceves,

Regional Administrator, Region IX.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 1, 9, and 25

[GN Docket No. 23–65, IB Docket No. 22–271; FCC 24–28; FR ID 210325]

Single Network Future: Supplemental Coverage From Space; Space Innovation

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission (Commission) seeks comment on ways in which it can improve 911 service for supplemental coverage from space (SCS) connections. Specifically, the Commission seeks comment on how it can propel the industry toward a truly ubiquitous automatic location-based routing of all 911 calls to accelerate connections between first responders and those who need help, regardless of their location. Next, in recognition of the importance of safeguarding radio astronomy, the Commission seeks further comment on ways to improve the coordination process between Federal and non-Federal stakeholders in the SCS context and on whether additional rule changes or policies are necessary to avoid harmful interference to radio astronomy and related services beyond the SCS licensing process the Commission adopts today.

DATES: Interested parties may file comments on or before May 30, 2024; and reply comments on or before July 1, 2024.

ADDRESSES: You may submit comments, identified by GN Docket No. 23–65 and IB Docket No. 22–271, by any of the following methods:

• *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: *http://apps.fcc.gov/ecfs/.*

• *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing.

• Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

• Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.

• U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.

• Effective March 19, 2020, and until FNPRM, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. See FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy, Public Notice, DA 20–304 (March 19, 2020). *https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy.*

People with Disabilities: To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

FOR FURTHER INFORMATION CONTACT: For additional information on this proceeding, contact Jon Markman of the Mobility Division, Wireless Telecommunications Bureau, at *Jonathan.Markman@fcc.gov* or (202) 418–7090, or Merissa Velez of the Space Bureau Satellite Programs and Policy Division, at *Merissa.Velez@fcc.gov* or (202) 418–0751.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's further notice of proposed rulemaking (*FNPRM*) in GN Docket No. 23–65 and IB Docket No. 22–271; FCC 24–28, adopted and released on March 14, 2024. The full text of this document is available for public inspection online at *https://docs.fcc.gov/public/attachments/FCC-24-28A1.pdf.*

Synopsis

1. *Improving Public Safety Communications Over SCS.* In the further notice of proposed rulemaking (*FNPRM*), the Commission seeks comment on how and whether it should modify requirements for routing SCS 911 voice calls and 911 text messages, including whether we should require the use of location-based routing to route 911 SCS voice calls directly to an appropriate Public Safety Answering Point (PSAP), if technically feasible. In light of the Commission's existing requirement that Commercial Mobile Radio Service (CMRS) providers deploy and use location-based routing for wireless 911 voice calls and real-time text (RTT) communications to 911 when available location information meets certain requirements for accuracy and timeliness, it also seeks comment on how such a requirement would impact the availability of location-based routing for terrestrial wireless providers that use SCS to extend their coverage areas.

2. In the *Report and Order,* published elsewhere in this issue of the **Federal Register**, the Commission establishes on an interim basis that terrestrial providers must route all SCS 911 voice calls to a PSAP using either location-based routing or an emergency call center. In light of the ongoing deployment and continued innovation of SCS, the Commission seeks any new and updated information regarding technological or other developments in routing SCS 911 voice calls since the last round of filings. The Commission also asks whether there are any improvements to the 911 rules that apply to such terrestrial providers when using SCS to extend their coverage. Further, in recognizing that the technology likely used to identify the precise location of the device may be different when a terrestrial provider uses SCS to extend its coverage, as opposed to when it is using only terrestrial networks, it seeks comment on any such technological differences.

3. Furthermore, it seeks comment on whether there are other threshold requirements that the Commission should consider when requiring location-based routing, beyond accuracy and timeliness of available location information. Specifically, it seeks comment on the availability, reliability, and accuracy of the location information that terrestrial providers currently have access to when using location-based routing for SCS 911 voice calls. In addition, it seeks comment on how the Commission should address any potential inconsistencies between the 911 call routing requirements of terrestrial providers and satellite operators as SCS evolves.

4. Next, in the context of how SCS can function as an extension of a terrestrial network, the Commission noted that a satellite can be considered as a bi-directional ''bent pipe,'' receiving and forwarding signaling and user payload to and from a user's device to a terrestrial network (*e.g.,* 5G base station (gNB), 5G core network (5GC), and other terrestrial network elements). A satellite can also play a more active role in the network, connecting directly to the 5GC on the ground. In other words, the gNB and 5GC can belong to and be operated by either the terrestrial provider or the satellite operator. Regardless of deployment model, the SCS satellite should be able to send and receive the 5G signaling information needed for placing an emergency call between the user equipment (UE) and 5G network along with the caller location information needed for call routing and dispatch. Given that 911 calls and texts would typically be placed outdoors with the user device having view of the Global Positioning System (GPS) satellites in the sky, and given that user devices typically have GPS receivers, user devices should be able to determine their location, and for Assisted GPS (A–GPS), SCS should be able to provide the needed assistance information. The Commission seeks comment on this tentative analysis and asked whether there are any existing or new standards that should apply.

5. The Commission in the *FNPRM* also seeks comment on establishing rules around interconnectivity between terrestrial providers and satellite operators in the context of SCS 911 connections. Specifically, it seeks comment on the standards currently in place related to this topic, and whether any future standards work is anticipated, or required, to enable disparate networks and systems to interconnect for the purpose of enabling SCS 911 connectivity. It also seeks information on satellite data capacities, satellite link budget, and optimization schemes for the initial SCS deployments and the impact on device-to-satellite connectivity as they relate to SCS 911 connectivity and functionality, including time for obtaining a location fix for automatic location-based routing of 911 calls. Regarding privacy and security, the Commission asks whether there should be an explicit requirement for satellite operators to protect customer proprietary network information of terrestrial provider subscribers when customers make 911 calls and texts, and disclose security breaches.

6. Given that typically a 911 caller would abandon the 911 call if it is not connected within a certain time period, the Commission asks how long should

the network selection take before a 911 call is eventually attempted via SCS. Also, given the possibility that a 911 caller may be mobile and moving in and out of terrestrial network and SCS coverage, the Commission seeks comment on how the handoff between these networks should be handled to guarantee seamless call continuity and successful callback. In addition, the Commission understands that SCS is to be supplemental to terrestrial networks, including traditional terrestrial call paths, such as roaming, and additional technologies, such as Wi-Fi. However, in order to ensure that 911 calls utilize the best available path for delivery of both the message and location information, it seeks comment on how terrestrial providers intend to select the order in which networks are selected.

7. Since the delivery of SCS 911 voice calls includes the possibility of using third party emergency call centers, to promote awareness and transparency, the Commission asks whether we should mandate that terrestrial providers conduct outreach to PSAPs, and, if so, what would such a mandate look like. In addition, it seeks comment on what the planned outreach to the PSAP community entails. For 911 calls that are delivered directly to PSAPs, rather than via an emergency call center, it seeks comment on how terrestrial providers envision delivering those calls with regard to current classes of service. Specifically, it asks how location will be represented to the PSAP, *e.g.,* geodetic information, will there be confidence and uncertainty factors for that location, and are terrestrial providers considering a new class of service for SCS, and, if so, are terrestrial providers working with the public safety community presently.

8. *Radio Astronomy Considerations.* In the *Report and Order,* the Commission examined the record regarding whether existing rules addressing the protection of radio astronomy and space science services would be sufficient in the SCS context. Rather than adopt new SCS rules with respect to the protection of radio astronomy and space sciences, the Commission determined that it is in the public interest to address these concerns based on the facts of specific proposals. The Commission encourages SCS applicants to work with appropriate Federal agencies in advance, including conducting analyses of potential impacts to radio astronomy systems, and we direct applicants to contact the National Science Foundation (NSF) for more information to facilitate this coordination. The Commission expects that such advance engagement will facilitate the Commission's review of SCS applications.

9. While the Commission finds in the *Report and Order* that—at this stage—new rules to ensure protection of radio astronomy and space sciences are not required, the Commission recognizes the importance of ensuring effective and efficient coordination among Federal and non-Federal stakeholders related to SCS applications. In this *FNPRM,* the Commission seeks comment on whether there are additional ways to encourage and improve coordination among Federal and non-Federal stakeholders with respect to the coexistence of radio astronomy and SCS and whether we should make any changes to our rules to facilitate this coordination.

10. Of particular importance on this question, on February 16, 2024, National Telecommunications and Information Administration (NTIA) filed a white paper prepared by NSF in this proceeding in which NSF describes the potential impacts from SCS on current and planned radio astronomy and other space science operations, particularly from satellite downlinks—SCS transmissions in the space-to-Earth direction—and suggests potential mitigations. In the white paper, NSF states that, in addition to the National Radio Quite Zone (NRQZ), additional sites have been chosen for radio astronomy facilities, and that such ''facilities primarily employ remote locations, rather than allocated spectrum, to enable access to the relevant spectrum . . . .'' The white paper describes several locations of existing and planned radio astronomy observatories which NSF identifies as having potential to be impacted by SCS operations in bands identified for consideration for SCS in the *Notice* and describes technical details about the receivers at each facility. The white paper also identifies concerns related to impacts from SCS operations on radio astronomy, and potential recommendations to address those concerns.

11. While the Commission anticipates that the part 25 licensing process will provide an opportunity for the Commission to address concerns related to protecting radio astronomy in the context of specific SCS applications, it also plans to continue to evaluate our procedures as SCS—and the technology enabling it—evolves. To that end, the Commission seeks comment on whether the unique nature of SCS may warrant additional consideration, including rule changes, related to the protection of radio astronomy. The Commission asks that commenters provide as much specificity as possible. For example, should we consider rule changes to part 1, part 25, or another rule part that would require coordination of SCS applications? Section 1.924 of the Commission's rules—along with the NTIA Manual of Regulations and Procedures for Federal Radio Frequency Management—set forth procedures regarding coordination of certain applications within identified Quite Zones, including the NRQZ, the Arecibo Observatory, and other sites. The Commission asks commenters whether it would be appropriate to consider changes to § 1.924, to require a coordination process with regard to SCS applications. The Commission seeks comment only on whether to consider changes to § 1.924 related to SCS applications, and note that rule changes regarding other radio services are not a part of the SCS implementations which are the focus of this proceeding. If the Commission were to consider rule changes specific to SCS, should coordination requirements apply only to SCS transmissions into the NRQZ, or also to SCS transmissions into other locations with sensitive scientific facilities and, if we should include other facilities, which should be included? For example, we note that in its white paper, NSF identified several locations of existing and planned radio astronomy observatories and the details of the receiver bands at each facility. Should any changes to our rules be band-specific or should they apply to all SCS operations? In lieu of or in addition to adopting new rules, are there other incentives the Commission could implement to encourage coordination and coexistence of radio astronomy operations and SCS?

12. The Commission notes that, while we are not adopting requirements for SCS applicants to coordinate with potentially-affected Federal users at this time, some stakeholders have already engaged in coordination efforts related to SCS applications and radio astronomy. For example, in a filing opposing SpaceX's application to modify its authorization for its Gen2 NGSO satellite system to add SCS, the National Radio Astronomy Observatory (NRAO) nonetheless notes ''with appreciation SpaceX's continuing cooperation in coordination and field-testing their Ku-band [fixed-satellite service] operations.'' SpaceX also points out that it has been working closely with NRAO to coordinate and ''looks forward to continuing its precedent-setting coordination discussions with NRAO that are finding ways to allow consumers to benefit from this new service, while coexisting with radio

astronomy.'' To this end, the Commission notes that in its transmittal accompanying the NSF white paper, NTIA states that the white paper ''highlights the value of early coordination efforts between potential applicants for such [SCS] authority and affected Federal spectrum users, ideally prior to applicants finalizing their system designs.'' The Commission seeks comment on whether such early coordination efforts by stakeholders are and can be successful to enable the coexistence of SCS and radio astronomy, and if so, under what circumstances. How can such early coordination efforts facilitate review and consideration of part 25 SCS license applications by Federal agencies? Would submission of other technical information by SCS applicants regarding the protection of radio astronomy operations—in addition to Monte Carlo analyses—be helpful in these coordination efforts?

Procedural Matters

Paperwork Reduction Act

13. The *FNPRM* may contain new or modified information collection(s) subject to the Paperwork Reduction Act of 1995. If the Commission adopts any new or modified information collection requirements, they will be submitted to the Office of Management and Budget (OMB) for review under section 3507(d) of the PRA. OMB, the general public, and other Federal agencies are invited to comment on the new or modified information collection requirements contained in this proceeding. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, the Commission seeks specific comment on how we might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

Regulatory Flexibility Act

14. The Regulatory Flexibility Act of 1980, as amended (RFA), requires that an agency prepare a regulatory flexibility analysis for notice and comment rulemakings, unless the agency certifies that ''the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.'' Accordingly, the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) concerning potential rule and policy changes contained in the *FNPRM.* The IRFA is contained in appendix D of the *FNPRM.*

Initial Regulatory Flexibility Analysis

15. As required by the Regulatory Flexibility Act (RFA), the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in the *FNPRM.* The Commission requests written public comments on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines provided on the first page of the *FNPRM.* The Commission will send a copy of the *FNPRM,* including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the *FNPRM* and IRFA (or summaries thereof) will be published in the **Federal Register**.

A. Need for, and Objectives of, the Proposed Rules

16. Building on the interim 911 call and text routing requirements established in the *Report and Order,* the *FNPRM* will help the Commission move toward its objective of enabling automatic location-based routing of all emergency communications regardless of whether or not there is a terrestrial connection available. As discussed in the *Report and Order,* the Commission takes a major step towards facilitating ubiquitous connectivity, by adopting rules that enable partnerships between terrestrial network operators and satellite operators, who will then utilize terrestrial spectrum to fill coverage gaps, thereby enabling communications with existing and future wireless devices without the need for hardware changes. This regulatory framework serves as a first step, focusing on particular supplemental coverage from space (SCS) implementations which present less complex legal and technical challenges in order to foster the rapid deployment and development of these exciting networks. Given the primary importance of emergency communications over SCS networks in the short term, the Commission seeks to further develop the record in the *FNPRM* on improving 911 service for SCS connections. The Commission seeks comment on a number of ways in which it can propel industry stakeholders towards achieving truly ubiquitous automatic location-based routing of all 911 calls to accelerate connection between first responders and those who need help, regardless of their location.

17. Further, the Commission seeks input from interested parties as to how and whether it should modify requirements for routing SCS 911 voice calls and 911 text messages, including whether it should require the use of location-based routing to route 911 SCS voice calls directly to an appropriate Public Safety Answering Point (PSAP), if technically feasible. The Commission also seeks to expand upon a number of technical issues relating to extending E911 rules to SCS that it sought comment on in the initial NPRM, 88 FR 21944 (April 12, 2023), from this proceeding. Additionally, in light of the Commission's existing requirement that Commercial Mobile Radio Service (CMRS) providers deploy and use location-based routing for wireless 911 voice calls and real-time text communications to 911 when available location information meets certain requirements for accuracy and timeliness, the Commission also seeks updated responses to the questions raised in the initial NPRM due to new requirements for CMRS providers to deploy and use location-based routing in certain situations.

18. Through its adopted rules in the *Report and Order,* the Commission establishes on an interim basis that terrestrial providers must route all SCS 911 calls to a PSAP using either location-based routing or an emergency call center. This approach will balance the need for SCS 911 voice calls and text messages to be routed to the appropriate PSAP with the need for terrestrial providers to have flexibility in their implementation of SCS. Because of the ongoing deployment and continued innovation of SCS, the *FNPRM* requests any new and updated information regarding technological or other developments in routing SCS 911 voice calls since the last rounds of filing. In addition, the Commission seeks comment on improvements to the 911 rules that apply to such terrestrial providers when using SCS to extend their coverage.

19. In the *FNPRM,* the Commission also addresses direct-to-satellite connectivity, and acknowledges that a satellite can play a more active role in the network, by connecting directly to the 5G core network. Because 911 calls and texts would typically be placed outdoors with the user device having view of the Global Positioning System (GPS) satellites in the sky and because user devices typically have GPS receivers, user devices should be able to determine their location, and for Assisted GPS, SCS should be able to provide the needed assistance information. In the *FNPRM,* the Commission seeks comment on this tentative analysis. The Commission also seeks comment on establishing rules regarding interconnectivity between terrestrial providers and satellite operators as well as information on satellite data capacities, and satellite link budget, and optimization schemes

for the initial SCS deployments and their impact on device-to-satellite connectivity, including time for obtaining a location fix for automatic location-based routing of 911 calls. The Commission also seeks comment on questions related to network selection and roaming in the *FNPRM,* focusing on a situation where a 911 caller would discontinue the 911 call if it is not connected within a certain time period. Finally, in the initial NPRM, the Commission asked whether terrestrial partners engaged in or planned any outreach or coordination with public safety entities in advance of implementation. Because the delivery of SCS 911 voice calls includes the possibility of using third party emergency call centers, to promote awareness and transparency, the Commission requests comment via the *FNPRM* regarding issues concerning PSAP outreach.

20. Finally, in recognition of the concerns raised by the National Telecommunications and Information Association (NTIA) and the National Science Foundation (NSF) related to potential impacts from SCS on radio astronomy the Commission seeks further comment on the coordination process between Federal and non-Federal stakeholders in the SCS context and on whether additional rule changes or policies are necessary to avoid harmful interference to radio astronomy beyond the part 25 SCS licensing process adopted in the *Report and Order.*

B. Legal Basis

21. The proposed action is authorized pursuant to sections 1, 4(i), 157, 301, 303, 307, 308, 309, and 310 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 301, 303, 307, 308, 309, and 310.

C. Description and Estimate of the Number of Small Entities to Which the Proposed Rules Will Apply

22. The RFA directs agencies to provide a description of, and where feasible, an estimate of, the number of small entities that may be affected by the proposed rules, if adopted. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. A ''small business concern'' is one that: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

23. *Small Businesses, Small Organizations, Small Governmental Jurisdictions.* Our actions, over time, may affect small entities that are not easily categorized at present. We therefore describe here, at the outset, three broad groups of small entities that could be directly affected herein. First, while there are industry specific size standards for small businesses that are used in the regulatory flexibility analysis, according to data from the Small Business Administration's (SBA) Office of Advocacy, in general a small business is an independent business having fewer than 500 employees. These types of small businesses represent 99.9% of all businesses in the United States, which translates to 33.2 million businesses.

24. Next, the type of small entity described as a ''small organization'' is generally ''any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.'' The Internal Revenue Service (IRS) uses a revenue benchmark of $50,000 or less to delineate its annual electronic filing requirements for small exempt organizations. Nationwide, for tax year 2020, there were approximately 447,689 small exempt organizations in the U.S. reporting revenues of $50,000 or less according to the registration and tax data for exempt organizations available from the IRS.

25. Finally, the small entity described as a ''small governmental jurisdiction'' is defined generally as ''governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand.'' U.S. Census Bureau data from the 2017 Census of Governments indicate that there were 90,075 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number there were 36,931 general purpose governments (county, municipal and town or township) with populations of less than 50,000 and 12,040 special purpose governments—independent school districts with enrollment populations of less than 50,000. Accordingly, based on the 2017 U.S. Census of Governments data, we estimate that at least 48,971 entities fall into the category of ''small governmental jurisdictions.''

26. *Satellite Telecommunications.* This industry comprises firms ''primarily engaged in providing telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications.'' Satellite telecommunications service providers include satellite and earth station operators. The SBA small business size standard for this industry classifies a business with $38.5 million or less in annual receipts as small. U.S. Census Bureau data for 2017 show that 275 firms in this industry operated for the entire year. Of this number, 242 firms had revenue of less than $25 million. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 65 providers that reported they were engaged in the provision of satellite telecommunications services. Of these providers, the Commission estimates that approximately 42 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, a little more than half of these providers can be considered small entities.

27. *Wireless Telecommunications Carriers (except Satellite).* This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves. Establishments in this industry have spectrum licenses and provide services using that spectrum, such as cellular services, paging services, wireless internet access, and wireless video services. The SBA size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms in this industry that operated for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Additionally, based on Commission data in the 2022 Universal Service Monitoring Report, as of December 31, 2021, there were 594 providers that reported they were engaged in the provision of wireless services. Of these providers, the Commission estimates that 511 providers have 1,500 or fewer employees. Consequently, using the SBA's small business size standard, most of these providers can be considered small entities.

28. *600 MHz Band.* These wireless communications services are radiocommunication services licensed in the 617–652 MHz and 663–698 MHz frequency bands that can be used for fixed and mobile flexible uses. 600 MHz Band services fall within the scope of the Wireless Telecommunications Carriers (except Satellite) industry where the SBA small business size

standard classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

29. Based on Commission data as of November 2021, there were approximately 3,327 active licenses in the 600 MHz Band service. The Commission's small business size standards with respect to 600 MHz Band services involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For purposes of bidding credits, the Commission defined ''small business'' as an entity with average gross revenues not exceeding $55 million for each of the three preceding years, and a ''very small business'' as an entity with average gross revenues not exceeding $20 million for each of the three preceding years for the 600 MHz band auction. Pursuant to these definitions, 15 bidders claiming small business status won 290 licenses.

30. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

31. *Lower 700 MHz Band Licenses.* The lower 700 MHz band encompasses spectrum in the 698–746 MHz frequency bands. Permissible operations in these bands include flexible fixed, mobile, and broadcast uses, including mobile and other digital new broadcast operation; fixed and mobile wireless commercial services (including FDD- and TDD-based services); as well as fixed and mobile wireless uses for private, internal radio needs, two-way interactive, cellular, and mobile television broadcasting services. Wireless Telecommunications Carriers (except Satellite) is the closest industry with a SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

32. According to Commission data as of December 2021, there were approximately 2,824 active Lower 700 MHz Band licenses. The Commission's small business size standards with respect to Lower 700 MHz Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For auctions of Lower 700 MHz Band licenses the Commission adopted criteria for three groups of small businesses. A very small business was defined as an entity that, together with its affiliates and controlling interests, has average annual gross revenues not exceeding $15 million for the preceding three years, a small business was defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding $40 million for the preceding three years, and an entrepreneur was defined as an entity that, together with its affiliates and controlling interests, has average gross revenues not exceeding $3 million for the preceding three years. In auctions for Lower 700 MHz Band licenses seventy-two winning bidders claiming a small business classification won 329 licenses, twenty-six winning bidders claiming a small business classification won 214 licenses, and three winning bidders claiming a small business classification won all five auctioned licenses.

33. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

34. *Upper 700 MHz Band Licenses.* The upper 700 MHz band encompasses spectrum in the 746–806 MHz bands. Upper 700 MHz D Block licenses are nationwide licenses associated with the 758–763 MHz and 788–793 MHz bands. Permissible operations in these bands include flexible fixed, mobile, and broadcast uses, including mobile and other digital new broadcast operation; fixed and mobile wireless commercial services (including FDD- and TDD-based services); as well as fixed and mobile wireless uses for private, internal radio needs, two-way interactive, cellular, and mobile television broadcasting services. Wireless Telecommunications Carriers (except Satellite) is the closest industry with a SBA small business size standard applicable to licenses providing services in these bands. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of that number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

35. According to Commission data as of December 2021, there were approximately 152 active Upper 700 MHz Band licenses. The Commission's small business size standards with respect to Upper 700 MHz Band licensees involve eligibility for bidding credits and installment payments in the auction of licenses. For the auction of these licenses, the Commission defined a ''small business'' as an entity that, together with its affiliates and controlling principals, has average gross revenues not exceeding $40 million for the preceding three years, and a ''very small business'' an entity that, together with its affiliates and controlling principals, has average gross revenues that are not more than $15 million for the preceding three years. Pursuant to these definitions, three winning bidders claiming very small business status won five of the twelve available licenses.

36. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission

does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

37. *Cellular Radiotelephone Service.* This service is radio service in which licensees are authorized to offer and provide cellular service for hire to the general public and was formerly titled Domestic Public Cellular Radio Telecommunications Service. Cellular Radiotelephone Service falls within the scope the Wireless Telecommunications Carriers (except Satellite) industry, where the SBA small business size standard classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

38. Based on Commission data, as of November 2021, there were approximately 1,908 active licenses in this service. The Commission's small business size standards with respect to Cellular Radiotelephone Services involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For purposes of bidding credits, the Commission has defined ''small business'' as an entity that either (1) together with its affiliates and controlling interests has average gross revenues of not more than $3 million for each of the three preceding years, or (2) together with its affiliates and controlling interests has average gross revenues of not more $15 million for each of the three preceding years.

39. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

40. *Advanced Wireless Services (AWS)—(1710–1755 MHz and 2110–2155 MHz bands (AWS–1); 1915–1920 MHz, 1995–2000 MHz, 2020–2025 MHz and 2175–2180 MHz bands (AWS–2); 2155–2175 MHz band (AWS–3); 2000–2020 MHz and 2180–2200 MHz (AWS–4)).* Spectrum is made available and licensed in these bands for the provision of various wireless communications services. Wireless Telecommunications Carriers (except Satellite) is the closest industry with a SBA small business size standard applicable to these services. The SBA small business size standard for this industry classifies a business as small if it has 1,500 or fewer employees. U.S. Census Bureau data for 2017 show that there were 2,893 firms that operated in this industry for the entire year. Of this number, 2,837 firms employed fewer than 250 employees. Thus, under the SBA size standard, the Commission estimates that a majority of licensees in this industry can be considered small.

41. According to Commission data as of December 2021, there were approximately 4,472 active AWS licenses. The Commission's small business size standards with respect to AWS involve eligibility for bidding credits and installment payments in the auction of licenses for these services. For the auction of AWS licenses, the Commission defined a ''small business'' as an entity with average annual gross revenues for the preceding three years not exceeding $40 million, and a ''very small business'' as an entity with average annual gross revenues for the preceding three years not exceeding $15 million. Pursuant to these definitions, 57 winning bidders claiming status as small or very small businesses won 215 of 1,087 licenses. In the most recent auction of AWS licenses 15 of 37 bidders qualifying for status as small or very small businesses won licenses.

42. In frequency bands where licenses were subject to auction, the Commission notes that as a general matter, the number of winning bidders that qualify as small businesses at the close of an auction does not necessarily represent the number of small businesses currently in service. Further, the Commission does not generally track subsequent business size unless, in the context of assignments or transfers, unjust enrichment issues are implicated. Additionally, since the Commission does not collect data on the number of employees for licensees providing these services, at this time we are not able to estimate the number of licensees with active licenses that would qualify as small under the SBA's small business size standard.

43. *All Other Telecommunications.* This industry is comprised of establishments primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Providers of internet services (*e.g.,* dial-up ISPs) or voice over internet protocol (VoIP) services, via client-supplied telecommunications connections are also included in this industry. The SBA small business size standard for this industry classifies firms with annual receipts of $35 million or less as small. U.S. Census Bureau data for 2017 show that there were 1,079 firms in this industry that operated for the entire year. Of those firms, 1,039 had revenue of less than $25 million. Based on this data, the Commission estimates that the majority of ''All Other Telecommunications'' firms can be considered small.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

44. The *FNPRM* may impose new or additional reporting or recordkeeping and/or other compliance obligations on small entities if rules discussed therein are adopted. For example, small and other entities are likely to be subject to the requirement of routing SCS 911 voice calls and 911 text messages, including the use of location-based routing to route 911 SCS voice calls directly to an appropriate PSAP, if technically feasible. Additionally, those entities are also likely to be subject to compliance rules concerning the proposed requirement that all devices utilizing SCS should be able to determine their location. For Assisted GPS (A–GPS), SCS should be able to provide the needed assistance information for 911 calls and texts, if adopted. In addition, small and other entities could be subject to coordination requirements or required to submit additional technical information related to the protection of radio astronomy.

45. The Commission also seeks comment on questions regarding improvements in location-based routing, device-to-satellite connectivity, interconnectivity between terrestrial providers and satellite operators, network selection and roaming, and PSAP outreach. Because of the ongoing deployment and continued innovation

of SCS, the Commission seeks any new and updated information regarding technological or other developments in routing SCS 911 voice calls since the last rounds of filing. Entities should report any additional information regarding routing SCS 911 voice calls since their last filings.

46. The Commission also seeks comment on whether there are additional ways to encourage and improve coordination among Federal and non-Federal stakeholders with respect to the coexistence of radio astronomy and SCS and whether the Commission should make any changes to its rules to facilitate this coordination. If such rules are adopted, operators could be required to provide reports regarding coordination efforts or additional technical information in addition to the existing underlying reporting, recordkeeping, and compliance requirements adopted in the *Report and Order.*

47. At this time, the record does not include a detailed cost/benefit analysis that would allow us to quantify the costs of compliance for small entities, including whether it will be necessary for small entities to hire professionals in order for them to comply with the rules proposed in the *FNPRM,* should they be adopted. The Commission invites comment on the costs and burdens of the proposals in the *FNPRM* and expects the information received in comments including, where requested, cost and benefit analyses, to help the Commission identify and evaluate relevant compliance matters for small entities, including compliance costs and other burdens that may result if the proposals and associated requirements discussed in the *FNPRM* are adopted.

E. Steps Taken To Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered

48. The RFA requires an agency to describe any significant, specifically small business, alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): ''(1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rule for such small entities; (3) the use of performance rather than design standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities.''

49. In the initial NPRM, the Commission took steps to minimize significant economic impact to small and other entities by obtaining information from interested parties on a number of technical issues relating to extending E911 rules to SCS, and it expands upon those actions in the *FNPRM.* In the *FNPRM,* the Commission considered how best to improve our 911 rules that apply to terrestrial providers when using SCS to extend their coverage. The Commission also considered whether it should require terrestrial providers to use location-based routing for SCS 911 voice calls when information about the location of the device is available to the CMRS provider's network at the time of routing. Alternatively, the Commission considered whether it should require terrestrial providers to use location-based routing for SCS 911 voice calls only when location information meets certain thresholds for accuracy and timeliness. The information obtained from commenters could provide the Commission with opportunities to ultimately adopt threshold-related rules that serve to lessen the burden on small providers.

50. The Commission also considered whether threshold requirements should be changed when requiring location-based routing, beyond accuracy and timeliness of available location information and, if changes are needed, what form they should take. Given the nature of SCS to extend coverage, cell tower information is unlikely to be available as a fallback when location-based routing does not meet whatever threshold requirements should be in place for using location-based routing. Therefore, the Commission requests comment on several questions involving what threshold requirements should be considered for SCS 911. In considering changes to the threshold requirements, we will consider the potential economic impact to small entities.

51. Additionally, in the *FNPRM,* the Commission seeks comment on ways to establish rules around interconnectivity between terrestrial providers and satellite operators within the context of SCS 911 connections. The rules that are ultimately adopted could lessen the compliance requirements for small and other entities. The *FNPRM* requests information involving both the current standards and anticipated future standards. These standards will be important to consider for informing discussions of future advances to SCS 911 connections and requires consideration of alternatives that take into account the potential impact of the adopted rules on small entities. Lastly, the Commission asked how long the network selection should take before a 911 call is eventually attempted via SCS. The Commission acknowledges that SCS is to be supplemental to terrestrial networks, including traditional terrestrial call paths, such as roaming, and additional technologies, such as Wi-Fi. The Commission seeks comment on ways to minimize the economic burden on small providers.

52. Furthermore, the Commission seeks comment on what, if any, coordination requirements should be adopted. In the alternative, to possibly lessen the compliance burdens on entities, the Commission asks if there are other incentives the Commission could implement to encourage coordination and coexistence of radio astronomy operations and SCS. Likewise, the Commission asks about the effectiveness of early coordination efforts when considering whether to adopt additional requirements and whether the submission of additional technical information would be helpful in these coordination efforts. While the Commission does not explicitly propose that additional coordination requirements be adopted, the Commission inquires as to whether additional requirements would be necessary given existing coordination efforts and the unique nature of SCS as the information obtained from commenters could provide the Commission with opportunities to ultimately adopt threshold-related rules that serve to lessen the burden on small providers.

53. The Commission is hopeful that the comments it receives will specifically address matters impacting small entities and include data and analyses relating to these matters. Further, while the Commission believes the rules that are eventually adopted in this proceeding should benefit small entities, the Commission expects to more fully consider the economic impact and alternatives for small entities following the review of comments filed in response to the *FNPRM.* The Commission's evaluation of this information will shape the final alternatives it considers, the final conclusions it reaches, and any final actions it ultimately takes in this proceeding to minimize any significant economic impact that may occur on small entities.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

54. None.

Federal Communications Commission.

Marlene Dortch,

Secretary.

[FR Doc. 2024–06668 Filed 4–29–24; 8:45 am]

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 660

[Docket No. 240423–0117]

RIN 0648–BM85

Magnuson-Stevens Act Provisions; Fisheries off West Coast States; Pacific Coast Groundfish Fishery; 2024 Harvest Specifications for Pacific Whiting, and 2024 Pacific Whiting Tribal Allocation

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS issues this proposed rule for the 2024 Pacific whiting fishery under the authority of the Pacific Coast Groundfish Fishery Management Plan, the Magnuson-Stevens Fishery Conservation and Management Act, the Pacific Whiting Act of 2006 (Whiting Act), and other applicable laws. This proposed rule would establish the domestic 2024 harvest specifications for Pacific whiting including the 2024 tribal allocation for the Pacific whiting fishery, the non-tribal sector allocations, and set-asides for incidental mortality in research activities and non-groundfish fisheries. The proposed measures are intended to help prevent overfishing, achieve optimum yield, ensure that management measures are based on the best scientific information available, and provide for the implementation of tribal treaty fishing rights.

DATES: Comments on this proposed rule must be received no later than May 15, 2024.

ADDRESSES: A plain language summary of this proposed rule is available at *https://www.regulations.gov/docket/NOAA-NMFS-2024-0044.* You may submit comments on this document, identified by NOAA–NMFS–2024–0044, by any of the following methods:

Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal. Visit *https://www.regulations.gov* and type ''NOAA–NMFS–2024–0044'' in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *https://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, *etc.*), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Background information for this action and analytical documents for the Regulatory Flexibility Act (RFA), and National Environmental Policy Act (NEPA) are available at the NMFS West Coast Region website at: *https://www.fisheries.noaa.gov/action/2024-harvest-specifications-pacific-whiting-and-2024-tribal-allocation.*

NEPA documents for West Coast groundfish actions are also available at: *https://www.fisheries.noaa.gov/west-coast/laws-and-policies/groundfish-actions-nepa-documents.*

Additional background information for the Pacific Hake/Whiting Treaty can be found at: *https://www.fisheries.noaa.gov/west-coast/laws-policies/pacific-hake-whiting-treaty.*

SUPPLEMENTARY INFORMATION:

Background

This proposed rule announces the adjusted coastwide whiting Total Allowable Catch (TAC) of 555,000 metric tons (mt), the adjusted U.S. TAC of 410,034 mt, and proposes domestic 2024 Pacific whiting harvest specifications, including the 2024 tribal allocation of 71,755.95 mt, announces the preliminary allocations for three non-tribal commercial whiting sectors, and proposes set-asides for incidental mortality in research activities and the state-managed pink shrimp (non-groundfish) fishery. The non-tribal Pacific whiting fishery opens on May 1 of each year. The tribal and non-tribal allocations for Pacific whiting, as well as set-asides, would be effective until December 31, 2024.

Pacific Whiting Agreement

The transboundary stock of Pacific whiting is managed through the Agreement Between the Government of the United States of America and the Government of Canada on Pacific Hake/Whiting of 2003 (Agreement). The Agreement establishes bilateral management bodies to implement the terms of the Agreement, including the Joint Management Committee (JMC), which recommends the annual catch level for Pacific whiting.

In addition to the JMC, the Agreement establishes several other bilateral management bodies to set whiting catch levels: the Joint Technical Committee (JTC), which conducts the Pacific whiting stock assessment; the Scientific Review Group (SRG), which reviews the stock assessment; and the Advisory Panel (AP), which provides stakeholder input to the JMC.

The Agreement establishes a default harvest policy of F–40 percent, which means a fishing mortality rate that would reduce the spawning biomass to 40 percent of the estimated unfished level. The Agreement also allocates 73.88 percent of the Pacific whiting TAC to the United States and 26.12 percent of the TAC to Canada. Based on recommendations from the JTC, SRG, and AP, the JMC determines the overall Pacific whiting TAC by March 25th of each year. NMFS, under the delegation of authority from the Secretary of Commerce, in consultation with the Secretary of State, has the authority to accept or reject this recommendation.

2024 Stock Assessment and Scientific Review

The JTC completed a stock assessment for Pacific whiting in February 2024. The assessment was reviewed by the SRG during a 4-day meeting held in person and online in Nanaimo, British Columbia, on February 6–9, 2024 (see **ADDRESSES** for the report; Status of the Pacific hake (whiting) stock in U.S. and Canadian waters in 2024). The SRG considered the 2024 assessment report and appendices to represent the best scientific information available for Pacific hake/whiting.

The stock assessment model for 2024 has the same population dynamics structure as the 2023 model. The model is fit to an acoustic survey index of biomass (abundance), a relative index of 1-year aged fish, annual commercial catch data, and age-composition data from the survey and commercial fisheries. Acoustic surveys are conducted every two years. The most recent survey occurred in 2023 and yielded the third lowest index of Pacific whiting abundance in the time series of surveys from 1995 to 2023.

Within the assessment model, the median estimate of female spawning

biomass at the start of 2024 is 1,884,950 mt. This is an upward shift from the most recent estimate for the 2023 female spawning biomass of 1,335,485 mt.

The median estimate of the 2024 relative spawning biomass (female spawning biomass at the start of 2024 divided by that at unfished equilibrium) is 99 percent, but is highly uncertain. After declining from 2018 to 2022, the median relative spawning biomass increased in 2023 and 2024, due to the estimated above average, but uncertain, size of the 2020 and 2021 age cohorts entering maturity.

The estimated probability that the spawning biomass at the start of 2024 is below the Agreement's F–40 percent default harvest rate (40 percent of unfished levels), is 1.3 percent, and the probability that relative fishing intensity exceeded the spawning potential ratio at 40 percent unfished levels in 2023 is 0.4 percent. The joint probability that the relative spawning stock biomass is both below 40 percent of unfished levels, and that fishing mortality is above the relative fishing intensity of the Agreement's F–40 percent default harvest rate is 0.2 percent.

The 2024 stock assessment indicated that despite estimates of a healthy Pacific whiting stock status, low abundance from the 2023 acoustic survey and low fishery catch in Canada (14.4 percent attainment) suggest a population structure not conducive to fully achieving harvest allocations in recent years.

2024 Pacific Whiting Coastwide and U.S. TAC Recommendation

The AP and JMC met in Lynnwood, Washington February 27–29, 2024, to develop advice on a 2024 coastwide TAC. The AP provided its 2024 TAC recommendation to the JMC on February 29, 2024. The JMC reviewed the advice of the JTC, the SRG, and the AP, and agreed on a TAC recommendation for transmittal to the United States and Canadian Governments.

The Agreement directs the JMC to base the catch limit recommendation on the default harvest rate unless scientific evidence demonstrates that a different rate is necessary to sustain the offshore Pacific whiting resource. After consideration of the 2024 stock assessment and other relevant scientific information, the JMC did not use the default harvest rate, and instead agreed on a more conservative approach. There were two primary reasons for choosing a TAC well below the level of F–40 percent: first, uncertainty regarding the size of the 2020 and 2021 year-classes led the JMC to conclude that using the default harvest rate could be too risky if these cohorts are smaller than estimated; and second, the fact that the survey biomass was the third-lowest in the survey time series. The JMC concluded that both of these factors warranted setting the coastwide TAC below the 2023 value of 625,000 mt, and lower than the level that would result from application of the default harvest rate. This conservative approach was endorsed by the AP, and is consistent with Article II(5)(b) of the Agreement.

The Agreement allows an adjusted TAC when either country's catch exceeds or is less than its TAC in the prior year. If the catch is in excess of the country's TAC, the amount of the overage is deducted from that country's TAC in the following year. If catch falls short of the country's TAC, a portion of the shortfall, is carried over and added to the country's TAC for the following year. Under the Agreement, carryover adjustments cannot not exceed 15 percent of a party country's unadjusted TAC for the year in which the shortfall occurred. In 2023, both countries did not fully attain their respective TACs; the percentage of the U.S. TAC attained for 2023 is detailed in the Initial Regulatory Flexibility Analysis (see the **ADDRESSES** section), which is summarized in the **CLASSIFICATION** section below. For the 2024 whiting fishery, the JMC recommended a coastwide TAC of 473,513 mt prior to adjustment. Based on Article III(2) of the Agreement, the 73.88 percent U.S. share of the unadjusted coastwide TAC is 349,831 mt. Consistent with Article II(5)(b) of the Agreement, a carryover of 60,203 mt was added to the U.S. share for an adjusted U.S. TAC of 410,034 mt. The 26.12 percent Canadian share of the unadjusted coastwide TAC, consistent with Article III(2) of the Agreement, is 123,681 mt, and a carryover of 21,285 mt was added to the Canadian share, for an adjusted Canadian TAC of 144,966 mt. The total coastwide adjusted TAC is 555,000 mt for 2024.

This recommendation is consistent with the best available scientific information, and provisions of the Agreement and the Whiting Act. The recommendation was transmitted via letter to the United States and Canadian Governments on March 05, 2024. NMFS, under delegation of authority from the Secretary of Commerce, approved the TAC recommendation of 410,034 mt for U.S. fisheries on March 29, 2024.

Tribal Allocation

The regulations at 50 CFR 660.50(d) identify the procedures for implementing the treaty rights that Pacific Coast treaty Indian tribes have to harvest groundfish in their usual and accustomed fishing areas in U.S. waters. Tribes with treaty fishing rights in the area covered by the Pacific Coast Groundfish Fishery Management Plan (FMP) request allocations, set-asides, or regulations specific to the tribes during the Council's biennial harvest specifications and management measures process. The regulations state that the Secretary will develop tribal allocations and regulations in consultation with the affected tribe(s) and, insofar as possible, with tribal consensus.

NMFS allocates a portion of the U.S. TAC of Pacific whiting to the tribal fishery, following the process established in 50 CFR 660.50(d). The tribal allocation is subtracted from the U.S. Pacific whiting TAC before allocation to the non-tribal sectors.

Four Washington coastal treaty Indian tribes—the Makah Indian Tribe, the Quileute Indian Tribe, the Quinault Indian Nation, and the Hoh Indian Tribe (collectively, the ''Treaty Tribes'')—can participate in the tribal Pacific whiting fishery. Tribal allocations of Pacific whiting have been based on discussions with the Treaty Tribes regarding their intent for those fishing years. The Hoh Tribe has not expressed an interest in participating in the Pacific whiting fishery to date. The Quileute Tribe and the Quinault Indian Nation have expressed interest in beginning to participate in the Pacific whiting fishery at a future date. To date, only the Makah Tribe has prosecuted a tribal fishery for Pacific whiting, and has harvested Pacific whiting since 1996 using midwater trawl gear. Table 1 below provides a recent history of U.S. TACs and annual tribal allocation in metric tons (mt).

TABLE 1—U.S. TOTAL ALLOWABLE CATCH AND ANNUAL TRIBAL ALLOCATION IN METRIC TONS (mt)

Year	U.S. TAC [1] (mt)	Tribal allocation (mt)
2010	193,935	49,939
2011	290,903	66,908
2012	186,037	48,556
2013	269,745	63,205
2014	316,206	55,336
2015	325,072	56,888
2016	367,553	64,322

[1] Beginning in 2012, the United States started using the term Total Allowable Catch, or TAC, based on the Agreement between the Government of the United States of America and the Government of Canada on Pacific Hake/Whiting. Prior to 2012, the terms Optimal Yield (OY) and Annual Catch Limit (ACL) were used.

TABLE 1—U.S. TOTAL ALLOWABLE CATCH AND ANNUAL TRIBAL ALLOCATION IN METRIC TONS (mt)—Continued

Year	U.S. TAC [1] (mt)	Tribal allocation (mt)
2017	441,433	77,251
2018	441,433	77,251
2019	441,433	77,251
2020	424,810	74,342
2021	369,400	64,645
2022	402,646	70,463
2023	461,750	80,806

In 2009, NMFS, the states of Washington and Oregon, and the Treaty Tribes started a process to determine the long-term tribal allocation for Pacific whiting. However, they have not yet determined a long-term allocation. This rule proposes the 2024 tribal allocation of Pacific whiting. This allocation does not represent a long-term allocation and is not intended to set precedent for future allocations.

In exchanges between NMFS and the Treaty Tribes during September 2023, the Makah Tribe indicated their intent to participate in the tribal Pacific whiting fishery in 2024. The Quinault Indian Nation, the Quileute Indian Tribe and the Hoh Indian Tribe informed NMFS in November and December 2023 that they will not participate in the 2024 fishery. NMFS proposes a tribal allocation that accommodates the tribal request, specifically 17.5 percent of the U.S. TAC. The proposed 2024 adjusted U.S. TAC is 410,034 mt, and therefore the proposed 2024 tribal allocation is 71,755.95 mt. NMFS has determined that the current scientific information regarding the distribution and abundance of the coastal Pacific whiting stock indicates the 17.5 percent is within the range of the tribal treaty right to Pacific whiting.

Non-Tribal Research and Bycatch Set-Asides

The U.S. non-tribal whiting fishery is managed under the Council's Pacific Coast Groundfish FMP. Each year, the Council recommends a set-aside to accommodate incidental mortality of Pacific whiting in research activities and the state-managed pink shrimp fishery, based on estimates of scientific research catch and estimated bycatch mortality in non-groundfish fisheries. At its November 2023 meeting, the Council recommended an incidental mortality set-aside of 750 mt for 2024. This set-aside is unchanged from the 750 mt set-aside amount for incidental mortality in 2023. This rule proposes the Council's recommendations.

Non-Tribal Harvest Guidelines and Allocations

In addition to the tribal allocation, this proposed rule establishes the fishery harvest guideline (HG), also called the non-tribal allocation. The proposed 2024 fishery HG for Pacific whiting is 337,528.05 mt. This amount was determined by deducting the 71,755.95 mt tribal allocation and the 750 mt allocation for scientific research catch and fishing mortality in non-groundfish fisheries from the U.S. adjusted TAC of 410,034 mt. Federal regulations further allocate the fishery HG among the three non-tribal sectors of the Pacific whiting fishery: the catcher/processor (C/P) Co-op Program, the Mothership (MS) Co-op Program, and the Shorebased Individual Fishing Quota (IFQ) Program. The C/P Co-op Program is allocated 34 percent (114,759.53 mt for 2024), the MS Co-op Program is allocated 24 percent (81,006.73 mt for 2024), and the Shorebased IFQ Program is allocated 42 percent (141,761.78 mt for 2024). The fishery south of 42° N lat. may not take more than 7,088 mt (5 percent of the Shorebased IFQ Program allocation) prior to May 1, the start of the primary Pacific whiting season north of 42° N lat.

TABLE 2—2024 PROPOSED PACIFIC WHITING ALLOCATIONS IN METRIC TONS

Sector	2024 Pacific whiting allocation (mt)
Tribal	71,755.95
Catcher/Processor (C/P) Co-op Program	114,759.53
Mothership (MS) Co-op Program	81,006.73
Shorebased IFQ Program	141,761.78

This proposed rule would be implemented under the statutory and regulatory authority of sections 304(b) and 305(d) of the Magnuson-Stevens Act, the Pacific Whiting Act of 2006, the regulations governing the groundfish fishery at 50 CFR 660.5–660.360, and other applicable laws. Additionally, with this proposed rule, NMFS would ensure that the fishery is managed in a manner consistent with treaty rights of the four Treaty Tribes to fish in their ''usual and accustomed grounds and stations'' in common with non-tribal citizens. *United States* v. *Washington,* 384 F. Supp. 313 (W.D. 1974).

Classification

NMFS notes that the public comment period for this proposed rule is 15 days. Finalizing the Pacific whiting harvest specifications close to the start of the Pacific whiting fishing season on May 1st provides the industry with more time to plan and execute the fishery and gives them earlier access to the finalized allocations of Pacific whiting. Given the considerably short timeframe between the JMC meeting in late February—early March and the start of the primary whiting season on May 1, NMFS has determined there is good cause for a 15-day comment period to best balance the interest in allowing the public adequate time to comment on the proposed measures with the benefits of implementing the set-aside management measures, and Pacific whiting allocations in a timely manner. Timely implementation of this action will ensure the tribal and non-tribal commercial fishery sectors receive their full Pacific whiting allocations with sufficient time to maximize catch attainment within their respective fisheries during the 2024 whiting season. The NMFS Assistant Administrator has determined that this proposed rule is consistent with the Pacific Coast Groundfish FMP, other provisions of the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment. In making its final determination, NMFS will take into account the complete record, including comments received during the comment period for this proposed rule.

Pursuant to Executive Order 13175, this proposed rule was developed after meaningful consultation and collaboration with tribal officials from the area covered by the Pacific Coast Groundfish FMP. Under the Magnuson-Stevens Act at 16 U.S.C. 1852(b)(5), one of the voting members of the Pacific Council must be a representative of an Indian tribe with federally recognized fishing rights from the area of the Council's jurisdiction. In addition, regulations implementing the Pacific Coast Groundfish FMP establish a procedure by which the tribes with treaty fishing rights in the area covered by the Pacific Coast Groundfish FMP request allocations or regulations specific to the Tribes, in writing, before the first of the two meetings at which the Council considers groundfish management measures. The regulations at 50 CFR 660.50(d) further state that the Secretary will develop tribal allocations and regulations under this paragraph in consultation with the affected tribe(s) and, insofar as possible, with tribal consensus. The tribal management measures in this proposed rule have been developed following these procedures.

The Office of Management and Budget has determined that this proposed rule

is not significant for purposes of Executive Order 12866.

A range of potential total harvest levels for Pacific whiting has been considered in the Final Environmental Impact Statement for Harvest Specifications and Management Measures for 2015–2016 and Biennial Periods thereafter (2015/16 FEIS), and in the Environmental Assessment (EA) and the Regulatory Impact Review (RIR) included in the analytical document for Amendment 30 to the Pacific Coast Groundfish Fishery Management Plan and 2023–2024 Harvest Specifications and Management Measures. These documents are available from NMFS (see **ADDRESSES**). The 2015/16 FEIS examined the harvest specifications and management measures for 2015–16 and gave 10-year projections for routinely adjusted harvest specifications and management measures. The 10-year projections were produced to evaluate the impacts of the ongoing implementation of harvest specifications and management measures and to evaluate the impacts of the routine adjustments that are the main component of each biennial cycle. The EA for the 2023–24 cycle builds on the 2015/16 FEIS and focuses on the harvest specifications and management measures that were not within the scope of the 10-year projections in the 2015/16 FEIS.

An Initial Regulatory Flexibility Analysis (IRFA) was prepared for this action, as required by section 603 of the Regulatory Flexibility Act (RFA). The IRFA describes the economic impact this proposed rule, if adopted, would have on small entities. A description of the action, why it is being considered, and the legal basis for this action is contained in the **SUMMARY** section and at the beginning of the **SUPPLEMENTARY INFORMATION** section of the preamble. A summary of the IRFA follows. Copies of the IRFA are available from NMFS (See **ADDRESSES**).

Under the RFA, the term ''small entities'' includes small businesses, small organizations, and small governmental jurisdictions. For purposes of complying with the RFA, NMFS has established size criteria for entities involved in the fishing industry that qualify as small businesses. A business involved in fish harvesting is a small business if it is independently owned and operated and not dominant in its field of operation (including its affiliates) and if it has combined annual receipts not in excess of $11 million for all its affiliated operations worldwide (80 FR 81194, December 29, 2015; 50 CFR part 200). In addition, the Small Business Administration has established size criteria for other entities that may be affected by this proposed rule. A wholesale business servicing the fishing industry is a small business if it employs 100 or fewer persons on a full time, part time, temporary, or other basis, at all its affiliated operations worldwide. A small organization is any nonprofit enterprise that is independently owned and operated and is not dominant in its field. A seafood processor is a small business if it is independently owned and operated, not dominant in its field of operation, and employs 750 or fewer persons on a full time, part time, temporary, or other basis, at all its affiliated operations worldwide (See NAICS 311710 at 13 CFR 121.201). For purposes of rulemaking, NMFS is also applying the seafood processor standard to C/Ps because whiting C/Ps earn the majority of the revenue from processed seafood product.

Description and Estimate of the Number of Small Entities to Which the Rule Applies, and Estimate of Economic Impacts by Entity Size and Industry

This proposed rule affects how Pacific whiting is allocated to the following sectors/programs: Tribal, Shorebased IFQ Program Trawl Fishery, MS Co-op Program Whiting At-sea Trawl Fishery, and C/P Co-op Program Whiting At-sea Trawl Fishery. The amount of Pacific whiting allocated to these sectors is based on the U.S. TAC, which is developed and approved through the process set out in the Agreement and the Whiting Act.

We expect one tribal entity, the Makah Tribe, to fish for Pacific whiting in 2024. Tribes are not considered small entities for the purposes of RFA. Impacts to tribes are nevertheless considered in this analysis.

This proposed rule directly affects the C/P Co-op Program, composed of 10 C/P endorsed permits owned by three companies that have formed a single co-op. These co-ops are considered large entities both because they have participants that are large entities and because they have in total more than 750 employees worldwide including affiliates.

This proposed rule also directly affects the Shorebased IFQ Program. As of March 2024, the Shorebased IFQ Program is composed of 163 Quota Share permits/accounts (122 of which were allocated whiting quota pounds), and 48 licensed first receiver sites, of which 16 sites are owned by 10 companies that receive whiting. Of these companies that receive whiting, none are considered small entities.

This proposed rule also directly affect participants in the MS Co-op Program, the limited access program that applies to eligible harvesters and processors in the MS sector of the Pacific whiting at-sea trawl fishery. This program consists of six MS processor permits, and a catcher vessel fleet currently composed of a single co-op, with 34 Mothership/Catcher Vessel (MS/CV) endorsed permits (with three permits each having two catch history assignments).

Although there are three non-tribal sectors (the C/P Co-op Program, the Shorebased IFQ Program, and the MS Co-op Program), many companies participate in two sectors and some participate in all three sectors, as well as other non-whiting groundfish fisheries. As part of the permit application processes for the non-tribal fisheries, NMFS asks permit applicants if they considered themselves a small business based on a review of the Small Business Administration size criteria, and asks each permit applicant to provide detailed ownership information. Data on employment worldwide, including affiliates, are not available for these companies, which generally operate in Alaska as well as on the West Coast in non-whiting groundfish fisheries, and which may have operations in other countries, as well. NMFS requests that limited entry permit holders self-report their size status. For 2024, all 10 C/P permits reported that they are not small businesses, as did 8 mothership catcher vessels. There is substantial, but not complete, overlap between permit ownership and vessel ownership so there may be a small number of additional small entity vessel owners who will be impacted by this rule. After accounting for cross-fishery participation, multiple Quota Share account holders, and affiliation through ownership, NMFS estimates that there are 103 non-tribal entities directly affected by these proposed regulations, 89 of which are considered small entities.

This rule will allocate Pacific whiting between tribal and non-tribal harvesters (a mixture of small and large businesses). Tribal fisheries consist of a mixture of fishing activities that are similar to the activities that non-tribal fisheries undertake. Tribal harvests may be delivered to both shoreside plants and motherships for processing. These processing facilities also process fish harvested by non-tribal fisheries. The effect of the tribal allocation on non-tribal fisheries will depend on the level of tribal harvests relative to their allocation and the reapportionment process. If the tribes do not harvest their

entire allocation, there are opportunities during the year to reapportion unharvested tribal amounts to the non-tribal fleets. For example, in 2023 NMFS reapportioned 45,000 mt of the original 80,806 mt tribal allocation (88 FR 75238, November 2, 2023). This reapportionment was based on conversations with the tribes and the best information available at the time, which indicated that this amount would not limit tribal harvest opportunities for the remainder of the year. The reapportioning process allows unharvested tribal allocations of Pacific whiting to be fished by the non-tribal fleets, benefitting both large and small entities. The revised Pacific whiting allocations for 2023 following the reapportionment were: Tribal 35,806 mt, C/P Co-op 144,566 mt; MS Co-op 102,047 mt; and Shorebased IFQ Program 178,581 mt.

The prices for Pacific whiting are largely determined by the world market because most of the Pacific whiting harvested in the United States is exported. The U.S. Pacific whiting TAC is highly variable, as is subsequent attainment of sector allocations, and ex-vessel revenues. For the years 2013 to 2023, the U.S. non-tribal commercial fishery sectors averaged harvests of approximately 271,392 mt, and revenues of $54.1 million annually. The 2023 U.S. non-tribal commercial fishery sectors attained a Pacific whiting catch of approximately 239,665 mt out of a harvest guideline of 380,194 mt (63 percent attainment), resulting in a total revenue of $46.6 million. The tribal fishery landed less than 1,000 mt out of the 2023 tribal allocation of 80,806 mt.

Impacts to the U.S. non-tribal fishery are measured with an estimate of ex-vessel revenue. The proposed adjusted coastwide TAC of 555,000 mt would result in an adjusted U.S. TAC of 410,034 mt and, after deduction of the tribal allocation and the incidental catch set-aside, a U.S. non-tribal harvest guideline of 337,528.05 mt. Using the 2023 weighted-average non-tribal price of $194.74 per metric ton, the proposed 2024 adjusted U.S. TAC is estimated to result in a potential ex-vessel revenue of $65.7 million for the U.S. non-tribal fishing fleet if fully harvested (100 percent attainment).

Impacts to tribal catcher vessels who elect to participate in the tribal fishery are measured with an estimate of ex-vessel revenue. In lieu of more complete information on tribal deliveries, total ex-vessel revenue is estimated with the 2023 average ex-vessel price of Pacific whiting, which was $194.74 per mt. At that price, the proposed 2024 tribal allocation of 71,755.95 mt would potentially have an ex-vessel value of $13.97 million if fully harvested.

A Description of any Significant Alternatives to the Proposed Rule That Accomplish the Stated Objectives of Applicable Statutes and That Minimize any Significant Economic Impact of the Proposed Rule on Small Entities

For the allocations to the non-tribal commercial sectors, the Pacific whiting tribal allocation, and set-asides for research and incidental mortality NMFS considered two alternatives: the ''No Action'' alternative and the ''Proposed Action'' alternative.

For allocations to non-tribal commercial sectors, the No Action alternative would mean that NMFS would not implement allocations to the non-tribal sectors based on the JMC recommended U.S. TAC, and this would not fulfill NMFS' responsibility to manage the U.S. fishery. This is contrary to the Whiting Act and the Agreement, both of which require sustainable management of the Pacific whiting resource. Therefore, the No Action alternative for allocations to non-tribal commercial sectors received no further consideration.

For set-asides for research and incidental mortality, the No Action alternative would mean that NMFS would not implement the set-aside amount of 750 mt recommended by the Council. Not implementing set-asides of the US whiting TAC would mean incidental mortality of the fish in research activities and non-groundfish fisheries would not be accommodated. This would be inconsistent with the Council's recommendation, the Pacific Coast Groundfish Fishery Management Plan, the regulations setting the framework governing the groundfish fishery, and NMFS' responsibility to manage the fishery. Therefore, the No Action alternative for set-asides received no further consideration.

NMFS did not consider a broader range of alternatives to the proposed tribal allocation because the tribal allocation is a percentage of the U.S. TAC and is based primarily on the requests of the Tribes. These requests reflect the level of participation in the fishery that will allow the Tribes to exercise their treaty right to fish for Pacific whiting. Under the Proposed Action alternative, NMFS proposes to set the tribal allocation percentage at 17.5 percent, as requested by the Tribes. This would yield a tribal allocation of 71,755.95 mt for 2024. Consideration of a percentage lower than the tribal request of 17.5 percent is not appropriate in this instance. As a matter of policy, NMFS has historically supported the harvest levels requested by the Tribes. Based on the information available to NMFS, the tribal request is within their tribal treaty rights. A higher percentage would arguably also be within the scope of the treaty right. However, a higher percentage would unnecessarily limit the non-tribal fishery.

Under the No Action alternative, NMFS would not make an allocation to the tribal sector. This alternative was considered, but the regulatory framework provides for a tribal allocation on an annual basis only. Therefore, the No Action alternative would result in no allocation of Pacific whiting to the tribal sector in 2024, which would be inconsistent with NMFS' responsibility to manage the fishery consistent with the Tribes' treaty rights. Given that there is a tribal request for allocation in 2024, this No Action alternative for allocation to the tribal sector received no further consideration.

Regulatory Flexibility Act Determination of No Significant Impact

NMFS has preliminarily determined this proposed rule would not have a significant economic impact on small entities. This rule is similar to previous rulemakings concerning Pacific whiting. In the context of an internationally set TAC, this rule concerns the amount of the U.S. TAC that should be allocated to the tribal fishery and a set-aside for research and bycatch in non-groundfish fisheries, and announces Pacific whiting allocations for the non-tribal fishery for 2024. Pacific whiting allocations to the non-tribal sectors provide additional economic opportunity to the entities considered in this analysis to prosecute a quota species within a multi-species groundfish catch share program. In addition, the reapportioning process allows unharvested tribal allocations of Pacific whiting, fished by small entities, to be fished by the non-tribal fleets, potentially providing economic benefits to both large and small entities. NMFS believes this rule will not adversely affect small entities. Thus, as discussed above, this action would not have a significant economic impact on small entities. Nonetheless, NMFS has prepared an IRFA and is requesting comments on this conclusion.

NMFS has prepared the IRFA, as described above, and is requesting comments on this conclusion. See **ADDRESSES.**

This proposed rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

No Federal rules have been identified that duplicate, overlap, or conflict with this action.

List of Subjects in 50 CFR Part 660

Fisheries, Fishing, Indian Fisheries.

Dated: April 24, 2024

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 660 is proposed to be amended as follows:

PART 660–FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.,* 16 U.S.C. 773 *et seq.,* and 16 U.S.C. 7001 *et seq.*

■ 2. In § 660.50, revise paragraph (f)(4) to read as follows:

§ 660.50 Pacific Coast treaty Indian fisheries.

* * * * *

(f) * * *

(4) *Pacific whiting.* The tribal allocation for 2024 is 71,755.95 mt.

* * * * *

■ 3. Revise Table 2a to part 660, subpart C–2024, to read as follows:

TABLE 2a TO PART 660, SUBPART C—2024, SPECIFICATIONS OF OFL, ABC, ACL, ACT AND FISHERY HARVEST GUIDELINES (WEIGHTS IN METRIC TONS)

[Capitalized stocks are overfished]

Stocks	Area	OFL	ABC	ACL [a]	Fishery HG [b]

[a] Annual catch limits (ACLs), annual catch targets (ACTs) and harvest guidelines (HGs) are specified as total catch values.

[b] Fishery HGs means the HG or quota after subtracting Pacific Coast treaty Indian tribes allocations and projected catch, projected research catch, deductions for fishing mortality in non-groundfish fisheries, and deductions for EFPs from the ACL or ACT.

[c] Yelloweye rockfish. The 53.3 mt ACL is based on the current rebuilding plan with a target year to rebuild of 2029 and an SPR harvest rate of 65 percent. 10.7 mt is deducted from the ACL to accommodate the Tribal fishery (5 mt), EFP fishing (0.12 mt), research catch (2.92 mt), and incidental open access mortality (2.66 mt) resulting in a fishery HG of 42.6 mt. The non-trawl HG is 39.2 mt. The combined non-nearshore/nearshore HG is 8.2 mt. Recreational HGs are: 10 mt (Washington); 9.1 mt (Oregon); and 11.8 mt (California). In addition, the non-trawl ACT is 30.7, and the combined non-nearshore/nearshore ACT is 6.4 mt. Recreational ACTs are: 7.9 mt (Washington), 7.2 (Oregon), and 9.3 mt (California).

[d] Arrowtooth flounder. 2,094.98 mt is deducted from the ACL to accommodate the Tribal fishery (2,041 mt), research catch (12.98 mt) and incidental open access mortality (41 mt), resulting in a fishery HG of 12,083 mt.

[e] Big skate. 59.8 mt is deducted from the ACL to accommodate the Tribal fishery (15 mt), research catch (5.49 mt), and incidental open access mortality (39.31 mt), resulting in a fishery HG of 1,207.2 mt.

[f] Black rockfish (California). 2.26 mt is deducted from the ACL to accommodate EFP fishing (1.0 mt), research catch (0.08 mt), and incidental open access mortality (1.18 mt), resulting in a fishery HG of 326.6 mt.

[g] Black rockfish (Washington). 18.1 mt is deducted from the ACL to accommodate the Tribal fishery (18 mt) and research catch (0.1 mt), resulting in a fishery HG of 270.5 mt.

[h] Bocaccio south of 40°10′ N lat. Bocaccio are managed with stock-specific harvest specifications south of 40°10′ N lat. and within the Minor Shelf Rockfish complex north of 40°10′ N lat. 48.12 mt is deducted from the ACL to accommodate EFP fishing (40 mt), research catch (5.6 mt), and incidental open access mortality (2.52 mt), resulting in a fishery HG of 1,779.9 mt. The California recreational fishery south of 40°10′ N lat. has an HG of 749.7 mt.

[i] Cabezon (California). 1.63 mt is deducted from the ACL to accommodate EFP fishing (1 mt), research catch (0.02 mt), and incidental open access mortality (0.61 mt), resulting in a fishery HG of 169.4 mt.

[j] California scorpionfish south of 34°27′ N lat. 3.89 mt is deducted from the ACL to accommodate research catch (0.18 mt) and incidental open access mortality (3.71 mt), resulting in a fishery HG of 248 mt.

[k] Canary rockfish. 68.91 mt is deducted from the ACL to accommodate the Tribal fishery (50 mt), EFP fishing (6 mt), research catch (10.08 mt), and incidental open access mortality (2.83 mt), resulting in a fishery HG of 1,227.4 mt. The combined nearshore/non-nearshore HG is 122.4 mt. Recreational HGs are: 41.8 mt (Washington); 62.9 mt (Oregon); and 112.9 mt (California).

[l] Chilipepper rockfish south of 40°10′ N lat. Chilipepper are managed with stock-specific harvest specifications south of 40°10′ N lat. and within the Minor Shelf Rockfish complex north of 40°10′ N lat. 97.7 mt is deducted from the ACL to accommodate EFP fishing (70 mt), research catch (14.04 mt), incidental open access mortality (13.66 mt), resulting in a fishery HG of 2,023.4 mt.

[m] Cowcod south of 40°10′ N lat. Cowcod are managed with stock-specific harvest specifications south of 40°10′ N lat. and within the Minor Shelf Rockfish complex north of 40°10′ N lat. 11.17 mt is deducted from the ACL to accommodate EFP fishing (1 mt), research catch (10 mt), and incidental open access mortality (0.17 mt), resulting in a fishery HG of 67.8 mt.

[n] Darkblotched rockfish. 23.76 mt is deducted from the ACL to accommodate the Tribal fishery (5 mt), EFP fishing (0.5 mt), research catch (8.46 mt), and incidental open access mortality (9.8 mt) resulting in a fishery HG of 758.7 mt.

[o] Dover sole. 1,597.11 mt is deducted from the ACL to accommodate the Tribal fishery (1,497 mt), research catch (50.84 mt), and incidental open access mortality (49.27 mt), resulting in a fishery HG of 48,402.9 mt.

[p] English sole. 259.52 mt is deducted from the ACL to accommodate the Tribal fishery (200 mt), research catch (17 mt), and incidental open access mortality (42.52 mt), resulting in a fishery HG of 8,700.5 mt.

[q] Lingcod north of 40°10′ N lat. 279.63 mt is deducted from the ACL for the Tribal fishery (250 mt), research catch (17.71 mt), and incidental open access mortality (11.92 mt) resulting in a fishery HG of 3,574.4 mt.

[r] Lingcod south of 40°10′ N lat. 15.5 mt is deducted from the ACL to accommodate EFP fishing (4 mt), research catch (3.19 mt), and incidental open access mortality (8.31 mt), resulting in a fishery HG of 706.5 mt.

[s] Longnose skate. 251.3 mt is deducted from the ACL to accommodate the Tribal fishery (220 mt), and research catch (12.46 mt), and incidental open access mortality (18.84 mt), resulting in a fishery HG of 1,408.7 mt.

[t] Longspine thornyhead north of 34°27′ N lat. 53.71 mt is deducted from the ACL to accommodate the Tribal fishery (30 mt), research catch (17.49 mt), and incidental open access mortality (6.22 mt), resulting in a fishery HG of 2,108.3 mt.

[u] Longspine thornyhead south of 34°27′ N lat. 2.24 mt is deducted from the ACL to accommodate research catch (1.41 mt) and incidental open access mortality (0.83 mt), resulting in a fishery HG of 680.8 mt.

[v] Pacific cod. 506 mt is deducted from the ACL to accommodate the Tribal fishery (500 mt), research catch (5.47 mt), and incidental open access mortality (0.53 mt), resulting in a fishery HG of 1,094 mt.

[w] Pacific ocean perch north of 40°10′ N lat. Pacific ocean perch are managed with stock-specific harvest specifications north of 40°10′ N lat. and within the Minor Slope Rockfish complex south of 40°10′ N lat. 145.48 mt is deducted from the ACL to accommodate the Tribal fishery (130 mt), EFP fishing, research catch (5.39 mt), and incidental open access mortality (10.09 mt), resulting in a fishery HG of 3,297.5 mt.

[x] Pacific hake/whiting. The 2024 OFL of 747,588mt is based on the 2024 assessment with an F40 percent of FMSY proxy. The 2024 coastwide adjusted Total Allowable Catch (TAC) is 555,000 mt. The U.S. TAC is 73.88 percent of the coastwide TAC. The 2024 adjusted U.S. TAC is 410,034 mt. From the U.S. TAC, 71,755.95 mt is deducted to accommodate the Tribal fishery, and 750 mt is deducted to accommodate research and bycatch in other fisheries, resulting in a 2024 fishery HG of 337,528.05 mt. The TAC for Pacific whiting is established under the provisions of the Agreement between the Government of the United States of America and the Government of Canada on Pacific Hake/Whiting of 2003 and the Pacific Whiting Act of 2006, 16 U.S.C. 7001–7010, and the international exception applies. Therefore, no ABC or ACL values are provided for Pacific whiting.

[y] Petrale sole. 386.24 mt is deducted from the ACL to accommodate the Tribal fishery (350 mt), EFP fishing (1 mt), research catch (24.14 mt), and incidental open access mortality (11.1 mt), resulting in a fishery HG of 2,898.8 mt.

[z] Sablefish north of 36° N lat. The sablefish coastwide ACL value is not specified in regulations. The sablefish coastwide ACL value is apportioned north and south of 36° N lat., using the rolling 5-year average estimated swept area biomass from the NMFS NWFSC trawl survey, with 77.9 percent apportioned north of 36° N lat. and 22.1 percent apportioned south of 36° N lat. The northern ACL is 7,730 mt and is reduced by 773 mt for the Tribal allocation (10 percent of the ACL north of 36° N lat.). The 773 mt Tribal allocation is reduced by 1.7 percent to account for discard mortality. Detailed sablefish allocations are shown in table 1c.

[aa] Sablefish south of 36° N lat. The ACL for the area south of 36° N lat. is 2,193 mt (22.1 percent of the calculated coastwide ACL value). 27.4 mt is deducted from the ACL to accommodate research catch (2.40 mt) and the incidental open access fishery (25 mt), resulting in a fishery HG of 2,165.6 mt.

[bb] Shortspine thornyhead north of 34°27′ N lat. 78.3 mt is deducted from the ACL to accommodate the Tribal fishery (50 mt), research catch (10.48 mt), and incidental open access mortality (17.82 mt), resulting in a fishery HG of 1,249.7 mt for the area north of 34°27′ N lat.

[cc] Shortspine thornyhead south of 34°27′ N lat. 6.71 mt is deducted from the ACL to accommodate research catch (0.71 mt) and incidental open access mortality (6 mt), resulting in a fishery HG of 695.3 mt for the area south of 34°27′ N lat.

[dd] Spiny dogfish. 351.48 mt is deducted from the ACL to accommodate the Tribal fishery (275 mt), EFP fishing (1 mt), research catch (41.85 mt), and incidental open access mortality (33.63 mt), resulting in a fishery HG of 1,055.5 mt.

[ee] Splitnose rockfish south of 40°10′ N lat. Splitnose rockfish in the north is managed in the Slope Rockfish complex and with stock-specific harvest specifications south of 40°10′ N lat. 18.42 mt is deducted from the ACL to accommodate EFP fishing (1.5 mt), research catch (11.17 mt), and incidental open access mortality (5.75 mt), resulting in a fishery HG of 1,534.3 mt.

[ff] Starry flounder. 48.28 mt is deducted from the ACL to accommodate the Tribal fishery (2 mt), research catch (0.57 mt), and incidental open access mortality (45.71 mt), resulting in a fishery HG of 343.7 mt.

[gg] Widow rockfish. 238.32 mt is deducted from the ACL to accommodate the Tribal fishery (200 mt), EFP fishing (18 mt), research catch (17.27 mt), and incidental open access mortality (3.05 mt), resulting in a fishery HG of 11,243.7 mt.

[hh] Yellowtail rockfish north of 40°10′ N lat. Yellowtail rockfish are managed with stock-specific harvest specifications north of 40°10′ N lat. and within the Minor Shelf Rockfish complex south of 40°10′ N lat. 1,027.55 mt is deducted from the ACL to accommodate the Tribal fishery (1,000 mt), research catch (20.55 mt), and incidental open access mortality (7 mt), resulting in a fishery HG of 4,263.3 mt.

[ii] Black rockfish/Blue rockfish/Deacon rockfish (Oregon). 1.82 mt is deducted from the ACL to accommodate research catch (0.08 mt), and incidental open access mortality (1.74 mt), resulting in a fishery HG of 592.2 mt.

[jj] Cabezon/kelp greenling (Washington). 2 mt is deducted from the ACL to accommodate the Tribal fishery, resulting in a fishery HG is 15 mt.

[kk] Cabezon/kelp greenling (Oregon). 0.79 mt is deducted from the ACL to accommodate research catch (0.05 mt) and incidental open access mortality (0.74 mt), resulting in a fishery HG of 179.2 mt.

[ll] Nearshore Rockfish north of 40°10′ N lat. 3.27 mt is deducted from the ACL to accommodate the Tribal fishery (1.5 mt), research catch (0.47 mt), and incidental open access mortality (1.31 mt), resulting in a fishery HG of 87.7 mt. State-specific HGs are 17.2 mt (Washington), 30.9 mt (Oregon), and 39.9 mt (California). The ACT for copper rockfish (California) is 6.99 mt. The ACT for quillback rockfish (California) is 0.96 mt.

[mm] Nearshore Rockfish south of 40°10′ N lat. 4.54 mt is deducted from the ACL to accommodate research catch (2.68 mt) and incidental open access mortality (1.86 mt), resulting in a fishery HG of 886.5 mt. The ACT for copper rockfish is 87.73 mt. The ACT for quillback rockfish is 0.97 mt.

[nn] nn/Other Fish. The Other Fish complex is comprised of kelp greenling off California and leopard shark coastwide. 21.24 mt is deducted from the ACL to accommodate research catch (6.29 mt) and incidental open access mortality (14.95 mt), resulting in a fishery HG of 201.8 mt.

[oo] Other Flatfish. The Other Flatfish complex is comprised of flatfish species managed in the PCGFMP that are not managed with stock-specific OFLs/ABCs/ACLs. Most of the species in the Other Flatfish complex are unassessed and include: butter sole, curlfin sole, flathead sole, Pacific sanddab, rock sole, sand sole, and rex sole. 220.79 mt is deducted from the ACL to accommodate the Tribal fishery (60 mt), research catch (23.63 mt), and incidental open access mortality (137.16 mt), resulting in a fishery HG of 4,653.2 mt.

[pp] Shelf Rockfish north of 40°10′ N lat. 70.94 mt is deducted from the ACL to accommodate the Tribal fishery (30 mt), research catch (15.32 mt), and incidental open access mortality (25.62 mt), resulting in a fishery HG of 1,207.1 mt.

[qq] Shelf Rockfish south of 40°10′ N lat. 132.77 mt is deducted from the ACL to accommodate EFP fishing (50 mt), research catch (15.1 mt), and incidental open access mortality (67.67 mt) resulting in a fishery HG of 1,331.4 mt.

[rr] Slope Rockfish north of 40°10′ N lat. 65.39 mt is deducted from the ACL to accommodate the Tribal fishery (36 mt), research catch (10.51 mt), and incidental open access mortality (18.88 mt), resulting in a fishery HG of 1,450.6 mt.

[ss] Slope Rockfish south of 40°10′ N lat. 38.94 mt is deducted from the ACL to accommodate EFP fishing (1 mt), research catch (18.21 mt), and incidental open access mortality (19.73 mt), resulting in a fishery HG of 658.1 mt. Blackgill rockfish has a stock-specific HG for the entire groundfish fishery south of 40°10′ N lat. set equal to the species' contribution to the 40–10-adjusted ACL. Harvest of blackgill rockfish in all groundfish fisheries south of 40°10′ N lat. counts against this HG of 169.9 mt.

Notices

Federal Register
Vol. 89, No. 84
Tuesday, April 30, 2024

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are required regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by May 30, 2024 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Farm Service Agency

Title: County Committee Election.

OMB Control Number: 0560–0229.

Summary of Collection: This information collection is necessary to effectively allow farmers and ranchers to nominate potential candidates using the form FSA–669A for the FSA county committee election in accordance with the requirements as authorized by the Soil Conservation and Domestic Allotment Act, as amended. Specifically, FSA uses the information provided by the nominee annually or, if needed, throughout the year for special elections to create ballots for FSA county committee elections. Elections for FSA county committees are held each year; therefore, nominations for eligible nominees are requested each year. Any individual who meets the qualifications mentioned in form FSA–669A may be nominated by another person or by themselves. The form FSA–669A is used to collect the information for nominations; it requires the name and address of the nominee and the signatures of both the nominee and the person nominating the individual to be a nominee (only one signature is required for self-nominated individuals). Nominee must be eligible to vote in the designated FSA county committee election, eligible to hold the office of FSA county committee member, and willing to serve, if elected. For more information about FSA county committees, including elections, nominations, eligible voters, eligibility, and other related information, see the regulations in *7 CFR part 7.* In addition, the form also includes a voluntary request for race, ethnicity, and gender information from the nominee. FSA is also using the form FSA–669A–3, Nomination Form for Urban Agriculture FSA Committee Election, to establish Urban Agriculture FSA County Committees in some cities. Completion of the form is voluntary.

Need and Use of the Information: FSA will collect information on race, ethnicity and gender of each nominee as provided through the voluntary self-identification of each nominee agreeing to run for a position. The information will be sent to FSA (Kansas City) for preparation of the upcoming election. FSA will review the information annually. If the information is not collected in any given year, FSA would not be able to prepare the report as required by the regulations.

Description of Respondents: Individuals or households.

Number of Respondents: 10,500.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 2,625.

Rachelle Ragland-Greene,

Acting Departmental Information Collection Clearance Officer.

BILLING CODE 3410–05–P

DEPARTMENT OF AGRICULTURE

Forest Service

Rio Grande National Forest Over Snow Travel Management Project

AGENCY: Forest Service, Agriculture (USDA).

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service, U.S. Department of Agriculture, will prepare an environmental impact statement (EIS) to inform a decision about the designation of roads, trails, and areas of the Rio Grande National Forest (RGNF) which would be open to motorized over-snow use. The environmental impact statement will inform a decision about the classes of vehicles and times of year for which motorized over-snow use will be allowed on designated roads, trails, and areas. Roads, trails, and areas designated for motorized over-snow vehicle (OSV) use will be identified on an Over-Snow Vehicle Use Map which will specify the classes of vehicles and time of year for which use is designated on the Rio Grande National Forest. An additional map displaying the Desired Winter Recreation Opportunity Spectrum (ROS) settings will also be produced. The RGNF anticipates this travel management analysis based on the proposed action as presently described and the resulting decision may require an amendment to the Land Management Plan for the Forest.

DATES: Comments concerning the scope of the analysis must be received by June 14, 2024. The draft environmental impact statement is expected in the fall of 2025, and the final environmental impact statement is expected in the fall of 2026.

ADDRESSES: Send written comments to the Rio Grande National Forest, 1055 9th Street, Del Norte, Colorado 81132. Comments may also be sent electronically to *https://cara.fs2c.usda.gov/Public/CommentInput?project=65529* or via facsimile to 719–657–5280.

FOR FURTHER INFORMATION CONTACT: Judi Perez, Forest Planner, by phone at 719–872–4008 or by email at *judith.perez@usda.gov.* Individuals who use telecommunications devices for the hearing impaired may call 711 to reach the Telecommunications Relay Service, 24 hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION:

Purpose and Need for Action

There is a need to provide a manageable, designated system of National Forest System roads, National Forest System trails, and areas for OSV use across the Rio Grande National Forest that is consistent with and achieves the purposes of the Forest Service Travel Management Rule at 36 CFR part 212.

The purpose of this project is to effectively manage OSV use on the Rio Grande National Forest to:

- Provide high quality over-snow access and experiences.
- Ensure that OSV use occurs when there is adequate snow to protect underlying resources.
- Promote the safety of all Forest visitors and users.
- Enhance public enjoyment.
- Minimize impacts to natural and cultural resources.
- Minimize conflicts among the various uses.
- Identify roads and trails where the Forest Service or its contractors would conduct snow grooming for OSV use.

Proposed Action

The Rio Grande National Forest proposes to designate roads, trails, and areas on National Forest System land for public OSV use. These designations would be consistent with the requirements of the Travel Management Rule at 36 CFR 212 and will specifically address the requirements of Subpart C of those regulations.

The proposed action includes the following:

- Approximately 1,342,162 acres (73 percent) of the Rio Grande National Forest lands are proposed to be designated for public cross-country over-snow vehicle use.
- Approximately 260 miles of currently permitted groomed motorized routes are proposed for designation.
- Approximately 23 miles of non-motorized trail groomed for Nordic skiing using motorized equipment are proposed for designation.
- To reduce potential damage to resources, an unpacked minimum snow depth of 12 inches is required for OSV use on designated roads, trail,s and areas.
- Grooming on permitted routes may occur on unpacked snow depths equal to or greater than 18 inches.
- Grooming designated roads and trails will occur using a variety of methods including but not limited to special use permits, partnerships, and/or grants and agreements.
- Public OSV use in Special Designation Management Areas (MA) is restricted. This includes MA 4.1—Special Designation-Special Interest Areas, MA 4.2—Special Designation-Research Natural Areas, and MA 4.8—Ski-Based Areas. Some of these areas are currently permitted for over-snow use. Depending on the project decision, existing permits could be adjusted following completion of this analysis.
- Existing Forest Closure Orders in or around Wolf Creek Pass and Cumbres Pass are incorporated into the proposed action, as is the restriction of motorized use in congressionally designated wilderness.

A more detailed version of the proposed action and draft ROS maps are available on the RNGF website at *https://www.fs.usda.gov/detail/riogrande/landmanagement/planning/?cid=fseprd1154726.*

Minimization Criteria

Travel Management Regulations (36 CFR 212.55(b)) require the development of project specific minimization criteria. These minimization criteria will be developed and applied to each National Forest System Road, trail, and area designated for OSV use.

Desired Recreational Opportunity Spectrum

Recreation on national forests encompasses more than just the activities. The range of opportunities, access, use, and setting is the Recreation Opportunity Spectrum (ROS). Recreation Opportunity Spectrum describes the settings available across a landscape and the attributes associated with those settings. Initial winter ROS maps were developed as part of the proposal and are available on the Rio Grande National Forest website at: *https://www.fs.usda.gov/detail/riogrande/landmanagement/planning/?cid=fseprd1154726.*

Expected Impacts

Anticipated impacts could include the following:

(1) Reduce adverse resource impacts caused by unauthorized vehicle use and illegal travel off designated routes and areas.

(2) Reduce disturbance to wildlife caused by OSV use in important or critical wildlife habitat and disturbance during critical lifecycle period.

(3) Potential loss of recreational opportunity should existing routes be closed to motorized travel.

(4) Potential conflicts in accommodating increasing numbers and types of motorized users.

Responsible Official

The Responsible Official is Andrew Kelher, Deputy Forest Supervisor of the Rio Grande National Forest.

Scoping Comments and the Objection Process

This Notice of Intent initiates the formal scoping process that guides the development of the environmental impact statement. In this process the Forest Service is requesting comments on potential alternatives and impacts, and identification of any relevant information, studies, or analyses of any kind concerning impacts affecting the quality of the human environment. Additional public engagement opportunities will be held and will be announced on the RGNF website at *https://www.fs.usda.gov/detail/riogrande/landmanagement/planning/?cid=fseprd1154726.*

It is important that reviewers provide their comments at such times and in such manner that they are useful to the Forest Service's preparation of the final EIS; therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.Commenting during scoping and any other designated opportunity to comment provided by the Responsible Official as prescribed by the applicable regulations will also govern eligibility to object once the final EIS and draft Record of Decision have been published.Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered; however, they will not be used to establish eligibility for the objection process.

Any decision about this project may be subject to 36 CFR 218 and/or 36 CFR 219 pre-decisional review (objection).

Issues raised in objections must be based on previously submitted timely, specific written comments regarding the proposed project unless based on new information arising after designated opportunities.

Nature of Decision To Be Made

The project will designate National Forest System roads, trails, and areas where OSV use is permitted; these will be documented on an Over-snow Vehicle Use Map. This map will also specify the classes of vehicles and the time of year for which the use is designated. A map displaying the Desired Winter ROS settings will also be produced.

Dated: April 22, 2024.

Troy Heithecker,

Associate Deputy Chief, National Forest System.

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Forest Service

Black Hills National Forest Advisory Board

AGENCY: Forest Service, Agriculture USDA.

ACTION: Notice of meeting.

SUMMARY: The Black Hills National Forest Advisory Board will hold a public meeting according to the details shown below. The committee is authorized under the Forest and Rangeland Renewable Resources Planning Act of 1974, the National Forest Management Act of 1976, the Federal Public Lands Recreation Enhancement Act, and operates in compliance with the Federal Advisory Committee Act (FACA). The purpose of the Committee is to provide advice and recommendations on a broad range of forest issues such as: forest plan revisions or amendments, forest health including fire, insect and disease, travel management, forest monitoring and evaluation, recreation fees, and site-specific projects having forest-wide implications.

DATES: An in-person meeting will be held on May 15, 2024, 1:00 p.m.–4:30 p.m. Mountain Standard Time (MST).

Written and Oral Comments: Anyone wishing to provide in-person oral comments must pre-register by 11:59 p.m. MST on May 10, 2024. Written public comments will be accepted by 11:59 p.m. MST on May 10, 2024. Comments submitted after this date will be provided to the Agency, but the Committee may not have adequate time to consider those comments prior to the meeting.

All board meetings are subject to cancellation. For status of the meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: This meeting will be held in person, at the U.S. Forest Service, Mystic Ranger District Office, 8221 Mount Rushmore Road, Rapid City, South Dakota 57702. Board information and meeting details can be found at the following website: *https://www.fs.usda.gov/main/blackhills/workingtogether/advisorycommittees* or by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

Written Comments: Written comments must be sent by email to *scott.j.jacobson@usda.gov* or via mail (postmarked) to Scott Jacobson, 8221 Mount Rushmore Road, Rapid City, South Dakota 57702. The Forest Service strongly prefers comments be submitted electronically.

Oral Comments: Persons or organizations wishing to make oral comments must pre-register by 11:59 p.m. MST, May 10, 2024, and speakers can only register for one speaking slot. Oral comments must be sent by email to *scott.j.jacobson@usda.gov* or via mail (postmarked) to Scott Jacobson, 8221 Mount Rushmore Road, Rapid City, South Dakota 57702.

FOR FURTHER INFORMATION CONTACT: Shawn Cochran, Designated Federal Officer (DFO), by phone at 605–673–9201, or email at *shawn.cochran@usda.gov,* or Scott Jacobson, Committee Coordinator at 605–440–1409 or email at *scott.j.jacobson@usda.gov.*

SUPPLEMENTARY INFORMATION: The meeting agenda will include:

1. Fire Season Preparedness;
2. Recreation and Tourism Economics; and
3. Forest Plan Revision update.

The agenda will include time for individuals to make oral statements of three minutes or less. Individuals wishing to make an oral statement should make a request in writing at least three days prior to the meeting date to be scheduled on the agenda. Written comments may be submitted to the Forest Service up to 7 days after the meeting date listed under **DATES**.

Please contact the person listed under **FOR FURTHER INFORMATION CONTACT**, by or before the deadline, for all questions related to the meeting. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received upon request.

Meeting Accommodations: The meeting location is compliant with the Americans with Disabilities Act, and the USDA provides reasonable accommodation to individuals with disabilities where appropriate. If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpretation, assistive listening devices, or other reasonable accommodation to the person listed under the **FOR FURTHER INFORMATION CONTACT** section or contact USDA's TARGET Center at (202) 720–2600 (voice and TTY) or USDA through the Federal Relay Service at (800) 877–8339. Additionally, program information may be made available in languages other than English.

USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Equal opportunity practices in accordance with USDA's policies will be followed in all appointments to the Committee. To ensure that the recommendations of the Committee have taken into account the needs of the diverse groups served by USDA, membership shall include to the extent possible, individuals with demonstrated ability to represent minorities, women, and person with disabilities. USDA is an equal opportunity provider, employer, and lender.

Dated: April 4, 2024.

Cikena Reid,

USDA Committee Management Officer.

2,4-Dichlorophenoxyacetic Acid From the People's Republic of China and India: Initiation of Less-Than-Fair-Value Investigations

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable April 23, 2024.

FOR FURTHER INFORMATION CONTACT: Alexander Cipolla (the People's Republic of China (China)) at (202) 482–4956; and Melissa Porpotage (India) at (202) 482–1413; AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Petitions

On March 14, 2024, the U.S. Department of Commerce (Commerce) received antidumping duty (AD) petitions concerning imports of 2,4-dichlorophenoxyacetic acid (2,4-D) from China and India filed in proper form on behalf of Corteva Agriscience LLC (the petitioner) [1] a domestic producer of 2,4-D. These AD Petitions were accompanied by countervailing duty (CVD) petitions concerning imports of 2,4-D from China and India.[2] On April 3, 2024, after considering comments regarding industry support, Commerce extended the initiation deadline by 20 days to further examine the issue of industry support, because it was not clear from the Petitions whether the industry support criteria had been met.[3]

Between March 18 and April 4, 2024, Commerce requested supplemental information pertaining to certain aspects of the Petitions in separate supplemental questionnaires.[4] The petitioner filed responses to the supplemental questionnaires between March 20 and April 9, 2024.[5]

In accordance with section 732(b) of the Tariff Act of 1930, as amended (the Act), the petitioner alleges that imports of 2,4-D from China and India are being, or are likely to be, sold in the United States at less than fair value (LTFV) within the meaning of section 731 of the Act, and that imports of such products are materially injuring, or threatening material injury to, the 2,4-D industry in the United States. Consistent with section 732(b)(1) of the Act, the Petitions were accompanied by information reasonably available to the petitioner supporting its allegations.

Commerce finds that the petitioner filed the Petitions on behalf of the domestic industry, because the petitioner is an interested party, as defined in section 771(9)(C) of the Act. Commerce also finds that the petitioner demonstrated sufficient industry support for the initiation of the requested LTFV investigations.[6]

Periods of Investigation

Because the Petitions were filed on March 14, 2024, pursuant to 19 CFR 351.204(b)(1), the period of investigation (POI) for the India LTFV investigation is January 1, 2023, through December 31, 2023. Because China is a non-market economy (NME) country, pursuant to 19 CFR 351.204(b)(1), the POI for the China LTFV investigation is July 1, 2023, through December 31, 2023.

Scope of the Investigations

The product covered by these investigations is 2,4-D from China and India. For a full description of the scope of these investigations, *see* the appendix to this notice.

Comments on the Scope of the Investigations

Between March 18 and April 4, 2024, Commerce requested information and clarification from the petitioner regarding the proposed scope to ensure

[1] *See* Petitioner's Letter, ''Petitions for the Imposition of Antidumping and Countervailing Duties,'' dated March 14, 2024 (the Petitions).

[6] *See* ''Determination of Industry Support for the Petitions'' section, *infra.*

that the scope language in the Petitions is an accurate reflection of the products for which the domestic industry is seeking relief.[7] Between March 20 and April 9, 2024, the petitioner provided clarifications and/or revised the scope.[8] The description of merchandise covered by these investigations, as described in the appendix to this notice, reflects these clarifications.

As discussed in the *Preamble* to Commerce's regulations, we are setting aside a period for interested parties to raise issues regarding product coverage (*i.e.,* scope).[9] Commerce will consider all scope comments received from interested parties and, if necessary, will consult with interested parties prior to the issuance of the preliminary determinations. If scope comments include factual information,[10] all such factual information should be limited to public information. To facilitate preparation of its questionnaires, Commerce requests that scope comments be submitted by 5:00 p.m. Eastern Time (ET) on May 13, 2024, which is 20 calendar days from the signature date of this notice.[11] Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on May 23, 2024, which is 10 calendar days from the initial comment deadline.

Commerce requests that any factual information that parties consider relevant to the scope of these investigations be submitted during that period. However, if a party subsequently finds that additional factual information pertaining to the scope of the investigations may be relevant, the party must contact Commerce and request permission to submit the additional information. All scope comments must be filed simultaneously on the records of the concurrent LTFV and CVD investigations.

Filing Requirements

All submissions to Commerce must be filed electronically via Enforcement and Compliance's Antidumping Duty and Countervailing Duty Centralized Electronic Service System (ACCESS), unless an exception applies.[12] An electronically filed document must be received successfully in its entirety by the time and date it is due.

Comments on Product Characteristics

Commerce is providing interested parties an opportunity to comment on the appropriate physical characteristics of 2,4-D to be reported in response to Commerce's AD questionnaires. This information will be used to identify the key physical characteristics of the subject merchandise in order to report the relevant factors of production (FOP) or cost of production (COP) accurately, as well as to develop appropriate product comparison criteria.

Interested parties may provide any information or comments that they feel are relevant to the development of an accurate list of physical characteristics. Specifically, they may provide comments as to which characteristics are appropriate to use as: (1) general product characteristics; and (2) product comparison criteria. We note that it is not always appropriate to use all product characteristics as product comparison criteria. We base product comparison criteria on meaningful commercial differences among products. In other words, although there may be some physical product characteristics utilized by manufacturers to describe 2,4-D, it may be that only a select few product characteristics take into account commercially meaningful physical characteristics. In addition, interested parties may comment on the order in which the physical characteristics should be used in matching products. Generally, Commerce attempts to list the most important physical characteristics first and the least important characteristics last.

In order to consider the suggestions of interested parties in developing and issuing the AD questionnaires, all product characteristics comments must be filed by 5:00 p.m. ET on May 13, 2024, which is 20 calendar days from the signature date of this notice.[13] Any rebuttal comments must be filed by 5:00 p.m. ET on May 23, 2024, which is 10 calendar days from the initial comment deadline. All comments and submissions to Commerce must be filed electronically using ACCESS, as explained above, on the record of each of the LTFV investigations.

Determination of Industry Support for the Petitions

Section 732(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 732(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) at least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 732(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, Commerce shall: (i) poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers as a whole of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs Commerce to look to producers and workers who produce the domestic like product. The U.S. International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both Commerce and the ITC must apply the same statutory definition regarding the domestic like product,[14] they do so for different purposes and pursuant to a separate and distinct authority. In addition, Commerce's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[15]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an

investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the petition).

With regard to the domestic like product, the petitioner does not offer a definition of the domestic like product distinct from the scope of the investigations.[16] Based on our analysis of the information submitted on the record, we have determined that 2,4-D, as defined in the scope, constitutes a single domestic like product, and we have analyzed industry support in terms of that domestic like product.[17]

In determining whether the petitioner has standing under section 732(c)(4)(A) of the Act, we considered the industry support data contained in the Petitions, and supplements thereto, with reference to the domestic like product as defined in the ''Scope of the Investigations,'' in the appendix to this notice. To establish industry support, the petitioner provided its own production of the domestic like product in 2023 and compared this to the estimated total production of the domestic like product for the entire domestic industry.[18] We relied on data provided by the petitioner for purposes of measuring industry support.[19]

On March 29, 2024, we received comments on industry support from Nufarm Americas Inc. (Nufarm), a U.S. importer and converter of 2,4-D.[20] On April 2, 2024, the petitioner responded to the letter from Nufarm.[21] On April 11, 2024, we received comments on industry support from Drexel Chemical Company (Drexel), a U.S. importer and converter of 2,4-D.[22]

Our review of the data provided in the Petitions, the First General Issues Supplement, the Second General Issues Supplement, the letters from Nufarm and Drexel, the Petitioner's Response, the Industry Support Supplement, and other information readily available to Commerce indicates that the petitioner has established industry support for the Petitions.[23] First, the Petitions established support from domestic producers (or workers) accounting for more than 50 percent of the total production of the domestic like product and, as such, Commerce is not required to take further action in order to evaluate industry support (*e.g.,* polling).[24] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(i) of the Act because the domestic producers (or workers) who support the Petitions account for at least 25 percent of the total production of the domestic like product.[25] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(ii) of the Act because the domestic producers (or workers) who support the Petitions account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petitions.[26] Accordingly, Commerce determines that the Petitions were filed on behalf of the domestic industry within the meaning of section 732(b)(1) of the Act.[27]

Allegations and Evidence of Material Injury and Causation

The petitioner alleges that the U.S. industry producing the domestic like product is being materially injured, or is threatened with material injury, by reason of the imports of the subject merchandise sold at LTFV. In addition, the petitioner alleges that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[28]

The petitioner contends that the industry's injured condition is illustrated by a significant and increasing volume of subject imports; underselling and price depression and/or suppression; declining profitability; declines in volume of production and capacity utilization; lost sales and revenues; lost market share; and the magnitude of the alleged dumping margins.[29] We assessed the allegations and supporting evidence regarding material injury, threat of material injury, causation, as well as negligibility, and we have determined that these allegations are properly supported by adequate evidence and meet the statutory requirements for initiation.[30]

Allegations of Sales at LTFV

The following is a description of the allegations of sales at LTFV upon which Commerce based its decision to initiate LTFV investigations of imports of 2,4-D from China and India. The sources of data for the deductions and adjustments relating to U.S. price and normal value (NV) are discussed in greater detail in the Country-Specific AD Initiation Checklists.

U.S. Price

For China and India, the petitioner based export price (EP) on the average unit values derived from official import statistics for imports of 2,4-D from these countries into the United States during the POI.[31] For each country, the petitioner made certain adjustments to U.S. price to calculate a net ex-factory U.S. price, where applicable.[32]

Normal Value[33]

For India, the petitioner stated that it was unable to obtain home market or third country pricing information for 2,4-D to use as a basis for NV.[34] Therefore, for India, the petitioner calculated NV based on CV.[35] For further discussion of CV, *see* the section

[16] *See* Petitions at Volume I (pages 11–16 and Exhibits I–5, I–6 and I–9); *see also* First General Issues Supplement at 3–6.

[32] *Id.*

[33] In accordance with section 773(b)(2) of the Act, for the India investigation, Commerce will request information necessary to calculate the constructed value (CV) and COP to determine whether there are reasonable grounds to believe or suspect that sales of the foreign like product have been made at prices that represent less than the COP of the product.

[34] *See* India AD Initiation Checklist.

[35] *Id.*

''Normal Value Based on Constructed Value,'' below.

Commerce considers China to be an NME country.[36] In accordance with section 771(18)(C)(i) of the Act, any determination that a foreign country is an NME country shall remain in effect until revoked by Commerce. Therefore, we continue to treat China as an NME country for purposes of the initiation of these investigations. Accordingly, we base NV on FOPs valued in a surrogate market economy country, in accordance with section 773(c) of the Act.

The petitioner claims that Türkiye is an appropriate surrogate country for China because it is a market economy that is at a level of economic development comparable to that of China and is a significant producer of comparable merchandise.[37] The petitioner provided publicly available information from Türkiye to value all FOPs.[38] Based on the information provided by the petitioner, we believe it is appropriate to use Türkiye as a surrogate country for China to value all FOPs for initiation purposes.

Interested parties will have the opportunity to submit comments regarding surrogate country selection and, pursuant to 19 CFR 351.301(c)(3)(i), will be provided an opportunity to submit publicly available information to value FOPs within 30 days before the scheduled date of the preliminary determination.

Factors of Production

Because information regarding the volume of inputs consumed by Chinese producers/exporters was not reasonably available, the petitioner used product-specific consumption rates from a U.S. producer of 2,4-D as a surrogate to value Chinese manufacturers' FOPs.[39] Additionally, the petitioner calculated factory overhead, selling, general, and administrative expenses (SG&A), and profit based on the experience of a Turkish producer of comparable merchandise for China.[40]

Normal Value Based on Constructed Value

As noted above for India, the petitioner stated that it was unable to obtain home market or third-country prices for 2,4-D to use as a basis for NV. Therefore, for India, the petitioner calculated NV based on CV.[41]

Pursuant to section 773(e) of the Act, the petitioner calculated CV as the sum of the cost of manufacturing, SG&A, financial expenses, and profit.[42] In calculating the cost of manufacturing, the petitioner relied on the production experience and input consumption rates of a U.S. producer of 2,4-D, valued using publicly available information applicable to India.[43] In calculating SG&A, financial expenses, and profit ratios, the petitioner relied on the 2022–2023 financial statements of a producer of identical merchandise in India.[44]

Fair Value Comparisons

Based on the data provided by the petitioner, there is reason to believe that imports of 2,4-D from China and India are being, or are likely to be, sold in the United States at LTFV. Based on comparisons of EP to NV in accordance with sections 772 and 773 of the Act, the estimated dumping margins for 2,4-D for the countries covered by this initiation are as follows: (1) China—127.21 percent; and (2) India—36.41 percent.[45]

Initiation of LTFV Investigations

Based upon the examination of the Petitions and supplemental responses, we find that they meet the requirements of section 732 of the Act. Therefore, we are initiating LTFV investigations to determine whether imports of 2,4-D from China and India are being, or are likely to be, sold in the United States at LTFV. In accordance with section 733(b)(1)(A) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determinations no later than 140 days after the date of these initiations.

Respondent Selection

India

In the Petitions, the petitioner identified four companies in India as producers/exporters of 2,4-D.[46] Following standard practice in LTFV investigations involving market economy countries, in the event Commerce determines that the number of companies is large and it cannot individually examine each company based upon Commerce's resources, where appropriate, Commerce intends to select mandatory respondents based on U.S. Customs and Border Protection (CBP) data for imports under the appropriate Harmonized Tariff Schedule of the United States (HTSUS) subheading(s) listed in the ''Scope of the Investigations,'' in the appendix.

On March 29, 2024, Commerce released CBP data on imports of 2,4-D from India under administrative protective order (APO) to all parties with access to information protected by APO and indicated that interested parties wishing to comment on CBP data and/or respondent selection must do so within three business days of the publication date of the notice of initiation of these investigations.[47] Comments must be filed electronically using ACCESS. An electronically filed document must be received successfully in its entirety via ACCESS by 5:00 p.m. ET on the specified deadline. Commerce will not accept rebuttal comments regarding the CBP data or respondent selection.

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305(b). Instructions for filing such applications may be found on Commerce's website at *https://www.trade.gov/administrative-protective-orders.*

China

In the Petitions, the petitioner named 12 companies in China as producers and/or exporters of 2,4–D.[48] Our standard practice for respondent selection in AD investigations involving NME countries is to select respondents based on quantity and value (Q&V) questionnaires in cases where it has determined that the number of companies is large and it cannot individually examine each company based upon its resources. Therefore, considering the number of producers and/or exporters identified in the Petitions, Commerce will solicit Q&V information that can serve as a basis for

[36] *See, e.g., Certain Freight Rail Couplers and Parts Thereof from the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value and Preliminary Affirmative Determination of Critical Circumstances,* 88 FR 15372 (March 13, 2023), and accompanying Preliminary Decision Memorandum at 5, unchanged in *Certain Freight Rail Couplers and Parts Thereof from the People's Republic of China: Final Affirmative Determination of Sales at Less-Than-Fair Value and Final Affirmative Determination of Critical Circumstances,* 88 FR 34485 (May 30, 2023); and *Certain Frozen Fish Fillets from the Socialist Republic of Vietnam: Final Results, and Final Results of No Shipments of the Antidumping Duty Administrative Review; 2016–2017,* 84 FR 18007 (April 29, 2019).

selecting exporters for individual examination in the event that Commerce determines that the number is large and decides to limit the number of respondents individually examined pursuant to section 777A(c)(2) of the Act. Because there are 12 Chinese producers and/or exporters identified in the Petitions, Commerce has determined that it will issue Q&V questionnaires to each potential respondent for which the petitioner has provided a complete address.

Commerce will post the Q&V questionnaire along with filing instructions on Commerce's website at *https://www.trade.gov/ec-adcvd-case-announcements.* Producers/exporters of 2,4-D from China that do not receive Q&V questionnaires may still submit a response to the Q&V questionnaire and can obtain a copy of the Q&V questionnaire from Commerce's website. Responses to the Q&V questionnaire must be submitted by the relevant Chinese producers/exporters no later than 5:00 p.m. ET on May 7, 2024, which is two weeks from the signature date of this notice. All Q&V questionnaire responses must be filed electronically via ACCESS. An electronically filed document must be received successfully, in its entirety, by ACCESS no later than 5:00 p.m. ET on the deadline noted above.

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305(b). As stated above, instructions for filing such applications may be found on Commerce's website at *https://www.trade.gov/administrative-protective-orders.*

Separate Rates

In order to obtain separate rate status in an NME investigation, exporters and producers must submit a separate rate application. The specific requirements for submitting a separate rate application in an NME investigation are outlined in detail in the application itself, which is available on Commerce's website at *https://access.trade.gov/Resources/nme/nme-sep-rate.html.* The separate rate application will be due 30 days after publication of this initiation notice. Exporters and producers must file a timely separate rate application if they want to be considered for individual examination. Exporters and producers who submit a separate rate application and have been selected as mandatory respondents will be eligible for consideration for separate rate status only if they respond to all parts of Commerce's AD questionnaire as mandatory respondents. Commerce requires that companies from China submit a response both to the Q&V questionnaire and to the separate rate application by the respective deadlines to receive consideration for separate rate status. Companies not filing a timely Q&V questionnaire response will not receive separate rate consideration.

Use of Combination Rates

Commerce will calculate combination rates for certain respondents that are eligible for a separate rate in an NME investigation. The Separate Rates and Combination Rates Bulletin states:

> {w}hile continuing the practice of assigning separate rates only to exporters, all separate rates that {Commerce} will now assign in its NME investigation will be specific to those producers that supplied the exporter during the period of investigation. Note, however, that one rate is calculated for the exporter and all of the producers which supplied subject merchandise to it during the period of investigation. This practice applies both to mandatory respondents receiving an individually calculated separate rate as well as the pool of non-investigated firms receiving the {weighted average} of the individually calculated rates. This practice is referred to as the application of ''combination rates'' because such rates apply to specific combinations of exporters and one or more producers. The cash-deposit rate assigned to an exporter will apply only to merchandise both exported by the firm in question *and* produced by a firm that supplied the exporter during the period of investigation.[49]

Distribution of Copies of the Petitions

In accordance with section 732(b)(3)(A) of the Act and 19 CFR 351.202(f), copies of the public version of the Petitions have been provided to the governments of China and India via ACCESS. To the extent practicable, we will attempt to provide a copy of the public version of the Petitions to each exporter named in the Petitions, as provided under 19 CFR 351.203(c)(2).

ITC Notification

Commerce will notify the ITC of our initiation, as required by section 732(d) of the Act.

Preliminary Determinations by the ITC

Typically, the ITC will preliminarily determine, within 45 days after the date on which the Petitions were filed, whether there is a reasonable indication that subject imports are materially injuring, or threatening material injury to, a U.S. industry.[50] Here, due to Commerce's extension of the initiation decision deadline to further examine the issue of industry support for the Petitions, the ITC has extended the time for issuance of its preliminary determination for imports of 2,4-D from China and India. At this time, the ITC has indicated it will make its preliminary determination on or about May 20, 2024. A negative ITC determination for either country will result in the investigation being terminated with respect to that country.[51] Otherwise, these LTFV investigations will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by Commerce; and (v) evidence other than factual information described in (i)–(iv). Section 351.301(b) of Commerce's regulations requires any party, when submitting factual information, to specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted [52] and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct.[53] Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Interested parties should review the regulations prior to submitting factual information in these investigations.

Particular Market Situation Allegation

Section 773(e) of the Act addresses the concept of particular market situation (PMS) for purposes of CV, stating that ''if a particular market situation exists such that the cost of materials and fabrication or other processing of any kind does not accurately reflect the cost of production in the ordinary course of trade, the administering authority may use another calculation methodology under this subtitle or any other calculation methodology.'' When an interested

[49] *See* Enforcement and Compliance's Policy Bulletin No. 05.1, regarding, ''Separate-Rates Practice and Application of Combination Rates in Antidumping Investigation involving NME Countries,'' (April 5, 2005) at 6 (emphasis added), available on Commerce's website at *https://access.trade.gov/Resources/policy/bull05-1.pdf.*

[50] *See* section 733(a) of the Act.

[51] *Id.*

[52] *See* 19 CFR 351.301(b).

[53] *See* 19 CFR 351.301(b)(2).

party submits a PMS allegation pursuant to section 773(e) of the Act (*i.e.,* a cost-based PMS allegation), Commerce will respond to such a submission consistent with 19 CFR 351.301(c)(2)(v). If Commerce finds that a cost-based PMS exists under section 773(e) of the Act, then it will modify its margin calculations appropriately.

Neither section 773(e) of the Act, nor 19 CFR 351.301(c)(2)(v), set a deadline for the submission of cost-based PMS allegations and supporting factual information. However, in order to administer section 773(e) of the Act, Commerce must receive PMS allegations and supporting factual information with enough time to consider the submission. Thus, should an interested party wish to submit a cost-based PMS allegation and supporting new factual information pursuant to section 773(e) of the Act, it must do so no later than 20 days after submission of a respondent's initial section D questionnaire response.

We note that a PMS allegation filed pursuant to sections 773(a)(1)(B)(ii)(III) or 773(a)(1)(C)(iii) of the Act (*i.e.,* a sales-based PMS allegation) must be filed within 10 days of submission of a respondent's initial section B questionnaire response, in accordance with 19 CFR 301(c)(2)(i) and 19 CFR 351.404(c)(2).

Extensions of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351.301, or as otherwise specified by Commerce. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under 19 CFR 351.301, or as otherwise specified by Commerce.[54] For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. ET on the due date.[55] Under certain circumstances, Commerce may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, we will inform parties in a letter or memorandum of the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, standalone submission; under limited circumstances we will grant untimely filed requests for the extension of time limits, where we determine, based on 19 CFR 351.302, that extraordinary circumstances exist. Parties should review Commerce's regulations concerning the extension of time limits and the *Time Limits Final Rule* prior to submitting factual information in these investigations.[56]

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[57] Parties must use the certification formats provided in 19 CFR 351.303(g).[58] Commerce intends to reject factual submissions if the submitting party does not comply with the applicable certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. Parties wishing to participate in these investigations should ensure that they meet the requirements of 19 CFR 351.103(d) (*e.g.,* by filing the required letter of appearance). Note that Commerce has modified certain of its requirements for serving documents containing business proprietary information and has made additional clarifications and corrections to its AD/CVD regulations.[59]

This notice is issued and published pursuant to sections 732(c)(2) and 777(i) of the Act and 19 CFR 351.203(c).

Dated: April 23, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Investigations

The merchandise covered by these investigations is 2,4-dichlorophenoxyacetic acid (2,4-D) and its derivative products, including salt and ester forms of 2,4-D. 2,4-D has the Chemical Abstracts Service (CAS) registry number of 94–75–7 and the chemical formula C_8H_6 Cl_2O_3.

Salt and ester forms of 2,4-D include 2,4-D sodium salt (CAS 2702–72–9), 2,4-D diethanolamine salt (CAS 5742–19–8), 2,4-D dimethyl amine salt (CAS 2008–39–1), 2,4-D isopropylamine salt (CAS 5742–17–6), 2,4-D tri-isopropanolamine salt (CAS 3234180–3), 2,4-D choline salt (CAS 1048373–72–3), 2,4-D butoxyethyl ester (CAS 1929–733), 2,4-D 2-ethylhexylester (CAS 1928–43–4), and 2,4-D isopropylester (CAS 94–11–1). All 2,4-D, as well as the salt and ester forms of 2,4-D, is covered by the scope irrespective of purity, particle size, or physical form.

The conversion of a 2,4-D salt or ester from 2,4-D acid, or the formulation of nonsubject merchandise with the subject 2,4-D, its salts, and its esters in the country of manufacture or in a third country does not remove the subject 2,4-D, its salts, or its esters from the scope. For any such formulations, only the 2,4-D, 2,4-D salt, and 2,4-D ester components of the mixture is covered by the scope of the investigations. Formulations of 2,4-D are products that are registered for end-use applications with the Environmental Protection Agency and contain a dispersion agent.

The country of origin of any 2,4-D derivative salt or ester is determined by the country in which the underlying 2,4-D acid is produced. 2,4-D, its salts, and its esters are classified under Harmonized Tariff Schedule of the United States (HTSUS) subheading 2918.99.2010. Subject merchandise, including the abovementioned formulations, may also be classified under HTSUS subheadings 2922.12.0001, 2921.11.0000, 2921.19.6195, 2922.19.9690, 3808.93.0050, and 3808.93.1400. The HTSUS subheadings and CAS registry numbers are provided for convenience and customs purposes. The written description of the scope of the investigations is dispositive.

DEPARTMENT OF COMMERCE

International Trade Administration

[C–570–161, C–533–923]

2,4-Dichlorophenoxyacetic Acid From the People's Republic of China and India: Initiation of Countervailing Duty Investigations

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable April 23, 2024.

FOR FURTHER INFORMATION CONTACT: Claudia Cott (the People's Republic of China) and Frank Schmitt (India), AD/CVD Operations, Offices I and VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482- 4270 and (202) 482–4880, respectively.

SUPPLEMENTARY INFORMATION:

The Petitions

On March 14, 2024, the U.S. Department of Commerce (Commerce) received countervailing duty (CVD) petitions concerning imports of 2,4-dichlorophenoxyacetic acid (2,4-D) from the People's Republic of China (China) and India filed in proper form on behalf of Corteva Agriscience LLC (the petitioner),[1] a domestic producer of 2,4-D. The CVD petitions were accompanied by antidumping duty (AD) petitions concerning imports of 2,4-D from China and India.[2] On April 3, 2024, after considering comments regarding industry support, Commerce extended the initiation deadline by 20 days to further examine the issue of industry support, because it was not clear from the Petitions whether the industry support criteria had been met.[3]

Between March 18 and April 4, 2024, Commerce requested supplemental information pertaining to certain aspects of the Petitions.[4] Between March 20 and April 9, 2024, the petitioner filed responses to these requests for additional information.[5]

In accordance with section 702(b)(1) of the Tariff Act of 1930, as amended (the Act), the petitioner alleges that the Government of China (GOC) and the Government of India (GOI) are providing countervailable subsidies, within the meaning of sections 701 and 771(5) of the Act, to producers of 2,4-D from China and India, respectively, and that such imports are materially injuring, or threatening material injury to, the domestic industry producing 2,4-D in the United States. Consistent with section 702(b)(1) of the Act and 19 CFR 351.202(b), for those alleged programs on which we are initiating CVD investigations, the Petitions are supported by information reasonably available to the petitioner.

Commerce finds that the petitioner filed the Petitions on behalf of the domestic industry because the petitioner is an interested party as defined in section 771(9)(C) of the Act. Commerce also finds that the petitioner demonstrated sufficient industry support with respect to the initiation of the requested CVD investigations.[6]

Periods of Investigation

Because the Petitions were filed on March 14, 2024, the periods of investigation (POI) for China and India are January 1, 2023, through December 31, 2023.[7]

Scope of the Investigations

The product covered by these investigations is 2,4-D from China and India. For a full description of the scope of these investigations, *see* the appendix to this notice.

Comments on Scope of the Investigations

Between March 18 and April 4, 2024, Commerce requested information from the petitioner regarding the proposed scope to ensure that the scope language in the Petitions is an accurate reflection of the products for which the domestic industry is seeking relief.[8] Between March 20 and April 9, 2024, the petitioner provided clarifications and/or revised the scope language.[9] The description of merchandise covered by these investigations, as described in the appendix to this notice, reflects these clarifications.

As discussed in the *Preamble* to Commerce's regulations, we are setting aside a period for parties to raise issues regarding product coverage (*i.e.,* scope).[10] Commerce will consider all scope comments received from interested parties and, if necessary, will consult with interested parties prior to the issuance of the preliminary determinations. If scope comments include factual information, all such factual information should be limited to public information.[11] To facilitate preparation of its questionnaires, Commerce requests that scope comments be submitted by 5:00 p.m. Eastern Time (ET) on May 13, 2024, which is 20 calendar days from the signature date of this notice. Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on May 23, 2024, which is ten calendar days from the initial comment deadline.

Commerce requests that any factual information that the parties consider relevant to the scope of the investigations be submitted during that time period. However, if a party subsequently finds that additional factual information pertaining to the scope of the investigations may be relevant, the party may contact Commerce and request permission to submit the additional information. All scope comments must also be filed on the record of each of the concurrent AD and CVD investigations.

Filing Requirements

All submissions to Commerce must be filed electronically via Enforcement and Compliance's Antidumping Duty and Countervailing Duty Centralized Electronic Service System (ACCESS), unless an exception applies.[12] An electronically filed document must be received successfully in its entirety by the time and date it is due.

Consultations

Pursuant to sections 702(b)(4)(A)(i) and (ii) of the Act, Commerce notified the GOC and the GOI of the receipt of the Petitions and provided each an opportunity for consultations with respect to the Petitions.[13] Commerce held consultations with the GOC and

the GOI, on March 26, and 28, 2024, respectively.[14]

Determination of Industry Support for the Petitions

Section 702(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 702(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) at least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 702(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, Commerce shall: (i) poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers as a whole of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs Commerce to look to producers and workers who produce the domestic like product. The U.S. International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both Commerce and the ITC apply the same statutory definition regarding the domestic like product,[15] they do so for different purposes and pursuant to a separate and distinct authority. In addition, Commerce's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[16]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the petition).

With regard to the domestic like product, the petitioner does not offer a definition of the domestic like product distinct from the scope of the investigations.[17] Based on our analysis of the information submitted on the record, we have determined that 2,4-D, as defined in the scope, constitutes a single domestic like product, and we have analyzed industry support in terms of that domestic like product.[18]

In determining whether the petitioner has standing under section 702(c)(4)(A) of the Act, we considered the industry support data contained in the Petitions, and supplements thereto, with reference to the domestic like product as defined in the ''Scope of the Investigations,'' in the appendix to this notice.

To establish industry support, the petitioner provided its own production of the domestic like product in 2023 and compared this to the estimated total production of the domestic like product for the entire domestic industry.[19] We relied on data provided by the petitioner for purposes of measuring industry support.[20]

On March 29, 2024, we received comments on industry support from Nufarm Americas Inc. (Nufarm), a U.S. importer and converter of 2,4-D.[21] On April 2, 2024, the petitioner responded to the letter from Nufarm.[22] On April 11, 2024, we received comments on industry support from Drexel Chemical Company (Drexel), a U.S. importer and converter of 2,4-D.[23]

Our review of the data provided in the Petitions, the First General Issues Supplement, the Second General Issues Supplement, the letters from Nufarm and Drexel, the Petitioner's Response, the Industry Support Supplement, and other information readily available to Commerce indicates that the petitioner has established industry support for the Petitions.[24] First, the Petitions established support from domestic producers (or workers) accounting for more than 50 percent of the total production of the domestic like product and, as such, Commerce is not required to take further action in order to evaluate industry support (*e.g.,* polling).[25] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(i) of the Act because the domestic producers (or workers) who support the Petition account for at least 25 percent of the total production of the domestic like product.[26] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(ii) of the Act because the domestic producers (or workers) who support the Petitions account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petitions.[27] Accordingly, Commerce determines that the Petitions were filed on behalf of the domestic industry within the meaning of section 702(b)(1) of the Act.[28]

Injury Test

Because China and India are ''Subsidies Agreement Countries'' within the meaning of section 701(b) of the Act, section 701(a)(2) of the Act applies to these investigations. Accordingly, the ITC must determine whether imports of the subject merchandise from China and/or India materially injure, or threaten material injury to, a U.S. industry.

Allegations and Evidence of Material Injury and Causation

The petitioner alleges that imports of the subject merchandise are benefitting from countervailable subsidies and that such imports are causing, or threaten to cause, material injury to the U.S. industry producing the domestic like product. In addition, the petitioner alleges that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[29]

The petitioner contends that the industry's injured condition is illustrated by a significant and increasing volume of subject imports; underselling and price depression and/or suppression; declining profitability; declines in volume of production and capacity utilization; lost sales and revenues; and lost market share.[30] We assessed the allegations and supporting evidence regarding material injury, threat of material injury, causation, as well as negligibility, and we have determined that these allegations are properly supported by adequate evidence and meet the statutory requirements for initiation.[31]

Initiation of CVD Investigations

Based upon the examination of the Petitions and supplemental responses, we find that they meet the requirements of section 702 of the Act. Therefore, we are initiating CVD investigations to determine whether imports of 2,4-D from China and India benefit from countervailable subsidies conferred by the GOC and the GOI, respectively. In accordance with section 703(b)(1) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determinations no later than 65 days after the date of these initiations.

China

Based on our review of the Petitions, we find that there is sufficient information to initiate a CVD investigation on six of the nine programs alleged by the petitioner. For a full discussion of the basis for our decision to initiate an investigation of each program, *see* the China CVD Initiation Checklist. A public version of the initiation checklist for this investigation is available on ACCESS.

India

Based on our review of the Petitions, we find that there is sufficient information to initiate a CVD investigation on 34 of the 35 programs alleged by the petitioner. For a full discussion of the basis for our decision to initiate an investigation of each program, *see* the India CVD Initiation Checklist. A public version of the initiation checklist for this investigation is available on ACCESS.

Respondent Selection

The petitioner identified 12 companies in China and four companies in India as producers and/or exporters of 2,4-D.[32] Commerce intends to follow its standard practice in CVD investigations and calculate company-specific subsidy rates in these investigations. In the event that Commerce determines that the number of companies is large, and it cannot individually examine each company based upon Commerce's resources, Commerce intends to select mandatory respondents based on U.S. Customs and Border Protection (CBP) data for U.S. imports of 2,4-D from China and India during the POI under the appropriate Harmonized Tariff Schedule of the United States subheading(s) listed in the ''Scope of the Investigations'' in the appendix.

On April 1, 2024, Commerce released CBP data on imports of 2,4-D from China and India under administrative protective order (APO) to all parties with access to information protected by APO and indicated that interested parties wishing to comment on CBP data and/or respondent selection must do so within three business days of the publication date of the notice of initiation of these investigations.[33] Comments must be filed electronically using ACCESS. An electronically filed document must be received successfully in its entirety via ACCESS by 5:00 p.m. ET on the specified deadline. Commerce will not accept rebuttal comments regarding the CBP data or respondent selection.

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305(b). Instructions for filing such applications may be found on Commerce's website at *https://www.trade.gov/administrative-protective-orders.*

Distribution of Copies of the Petitions

In accordance with section 702(b)(4)(A) of the Act and 19 CFR 351.202(f), a copy of the public version of the Petitions has been provided to the GOC and the GOI via ACCESS. Furthermore, to the extent practicable, Commerce will attempt to provide a copy of the public version of the Petitions to each exporter named in the Petitions, as provided under 19 CFR 351.203(c)(2).

ITC Notification

Commerce will notify the ITC of its initiation, as required by section 702(d) of the Act.

Preliminary Determination by the ITC

Typically, the ITC will preliminarily determine, within 45 days after the date on which the Petitions were filed, whether there is a reasonable indication that subject imports are materially injuring, or threatening material injury to, a U.S. industry.[34] Here, due to Commerce's extension of the initiation decision deadline to further examine the issue of industry support for the Petitions, the ITC has extended the time for issuance of its preliminary determination for imports of 2,4-D from India and China. At this time, the ITC has indicated it will make its preliminary determination on or about May 20, 2024. A negative ITC determination for either country will result in the investigation being terminated with respect to that country.[35] Otherwise, these CVD investigations will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by Commerce; and (v) evidence other than factual information described in (i)–(iv). Section 351.301(b) of Commerce's regulations requires any party, when submitting factual information, to specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted[36] and, if the information is submitted to rebut,

[29] *See* Petitions at Volume I (page 17 and Exhibit I–11); *see also* First General Issues Supplement at 6 and Exhibit S–I–16.

[30] *See* Petitions at Volume I (pages 17–27 and Exhibits I–10 through I–19); *see also* General Issues Supplement at 6 and Exhibits S–I–16 and S–I–17.

[31] *See* Country-Specific CVD Initiation Checklists at Attachment III, Analysis of Allegations and Evidence of Material Injury and Causation for the Antidumping and Countervailing Duty Petitions Covering 2,4-Dichlorophenoxyacetic Acid from the People's Republic of China and India (Attachment III).

[32] *See* Petitions at Volume I (page 9 and Exhibit I–2); *see also* First General Issues Supplement at 1 and Exhibit S–I–2.

[33] *See* Memorandum, ''Release of Data from U.S. Customs and Border Protection,'' dated April 1, 2024.

[34] *See* section 703(a)(1) of the Act.

[35] *Id.*

[36] *See* 19 CFR 351.301(b).

clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct.[37] Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Interested parties should review the regulations prior to submitting factual information in these investigations.

Extensions of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351.301, or as otherwise specified by Commerce. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under 19 CFR 351.301.[38] For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. ET on the due date. Under certain circumstances, Commerce may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, Commerce will inform parties in a letter or memorandum of the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, stand-alone submission; Commerce will grant untimely filed requests for the extension of time limits only in limited cases where we determine, based on 19 CFR 351.302, that extraordinary circumstances exist. Parties should review Commerce's regulations concerning factual information prior to submitting factual information in these investigations.[39]

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[40] Parties must use the certification formats provided in 19 CFR 351.303(g).[41] Commerce intends to reject factual submissions if the submitting party does not comply with the applicable certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under administrative protective order in accordance with 19 CFR 351.305. Parties wishing to participate in these investigations should ensure that they meet the requirements of 19 CFR 351.103(d), *e.g.,* by filing the required letters of appearance. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[42]

This notice is issued and published pursuant to sections 702 and 777(i) of the Act and 19 CFR 351.203(c).

Dated: April 23, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Investigations

The merchandise covered by these investigations is 2,4-dichlorophenoxyacetic acid (2,4-D) and its derivative products, including salt and ester forms of 2,4-D. 2,4-D has the Chemical Abstracts Service (CAS) registry number of 94–75–7 and the chemical formula $C_8H_6Cl_2O_3$.

Salt and ester forms of 2,4-D include 2,4-D sodium salt (CAS 2702–72–9), 2,4-D diethanolamine salt (CAS 5742–19–8), 2,4-D dimethyl amine salt (CAS 2008–39–1), 2,4-D isopropylamine salt (CAS 5742–17–6), 2,4-D tri-isopropanolamine salt (CAS 32341–80–3), 2,4-D choline salt (CAS 1048373–72–3), 2,4-D butoxyethyl ester (CAS 1929–73–3), 2,4-D 2-ethylhexylester (CAS 1928–43–4), and 2,4-D isopropylester (CAS 94–11–1). All 2,4-D, as well as the salt and ester forms of 2,4-D, is covered by the scope irrespective of purity, particle size, or physical form.

The conversion of a 2,4-D salt or ester from 2,4-D acid, or the formulation of nonsubject merchandise with the subject 2,4-D, its salts, and its esters in the country of manufacture or in a third country does not remove the subject 2,4-D, its salts, or its esters from the scope. For any such formulations, only the 2,4-D, 2,4-D salt, and 2,4-D ester components of the mixture is covered by the scope of the investigations. Formulations of 2,4-D are products that are registered for end-use applications with the Environmental Protection Agency and contain a dispersion agent.

The country of origin of any 2,4-D derivative salt or ester is determined by the country in which the underlying 2,4-D acid is produced. 2,4-D, its salts, and its esters are classified under Harmonized Tariff Schedule of the United States (HTSUS) subheading 2918.99.2010. Subject merchandise, including the abovementioned formulations, may also be classified under HTSUS subheadings 2922.12.0001, 2921.11.0000, 2921.19.6195, 2922.19.9690, 3808.93.0050 and 3808.93.1400. The HTSUS subheadings and CAS registry numbers are provided for convenience and customs purposes. The written description of the scope of the investigation is dispositive.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD910]

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council (Council) will hold a meeting of the Scientific and Statistical Committee (SSC).

DATES: The meeting will be held on Tuesday, May 14, 2024, starting at 9:30 a.m. and continue through 12:30 p.m. on Wednesday, May 15, 2024. See **SUPPLEMENTARY INFORMATION** for agenda details.

ADDRESSES: This will be an in-person meeting with a virtual option. SSC members, other invited meeting participants, and members of the public will have the option to participate in person at the Royal Sonesta Harbor Court (550 Light Street, Baltimore, MD) or virtually via Webex webinar. Webinar connection instructions and briefing materials will be available at: *www.mafmc.org/ssc.*

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; website: *www.mafmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: During this meeting, the SSC will review the most recent survey and fishery data and the previously recommended 2025 Acceptable Biological Catch (ABC) for Longfin Squid, *Illex* Squid, and Chub Mackerel. The SSC will also receive an introductory overview of the recently peer reviewed Black Sea Bass, Golden Tilefish, and Applying State-Space Models research track stock assessments. The SSC will receive an update on the results of the 2023 South Atlantic Deepwater Longline Survey and the Mid-Atlantic Golden Tilefish Longline Survey. The SSC will have an initial discussion about the Recreational Measures Setting Process Framework/Addenda and the work plan of the SSC sub-group that was formed to provide feedback on this management action to the Council. The SSC will also make recommendations for Council consideration regarding updates to the SSC overfishing limit (OFL) coefficient of variation (CV) guidance document. The SSC may take up any other business as necessary.

A detailed agenda and background documents will be made available on the Council's website (*www.mafmc.org*) prior to the meeting.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to Shelley Spedden, (302) 526–5251, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 24, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of web conference.

SUMMARY: The North Pacific Fishery Management Council (Council) Scientific and Statistical Committee meeting will be held on May 17, 2024.

DATES: The meeting will be held on Friday, May 17, 2024, from 9 a.m. to 12 p.m., Alaska Time.

ADDRESSES: The meeting will be a web conference. Join online through the link at *https://meetings.npfmc.org/Meeting/Details/3045.*

Council address: North Pacific Fishery Management Council, 1007 W 3rd Ave, Suite 400, Anchorage, AK 99501–2252; telephone: (907) 271–2809. Instructions for attending the meeting via video conference are given under **SUPPLEMENTARY INFORMATION**, below.

FOR FURTHER INFORMATION CONTACT: Diana Evans, Council staff; phone: (907) 271–2809; email: *diana.evans@noaa.gov.* For technical support, please contact our admin Council staff, email: *npfmc.admin@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Agenda

Friday, May 17, 2024

The SSC will meet to recommend research priorities. The agenda is subject to change, and the latest version will be posted at *https://meetings.npfmc.org/Meeting/Details/3045* prior to the meeting, along with meeting materials.

Connection Information

You can attend the meeting online using a computer, tablet, or smart phone; or by phone only. Connection information will be posted online at: *https://meetings.npfmc.org/Meeting/Details/3045.* The meeting will be recorded and a link to the recording will be posted on the eAgenda once the meeting concludes.

Public Comment

Public comment letters will be accepted in advance of the meeting and should be submitted electronically to *https://meetings.npfmc.org/Meeting/Details/3045.* The deadline to submit public comments is on May 15, 2024, at 5 p.m., Alaska Time.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 25, 2024.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD908]

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public webinar of its Risk Policy Working Group to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). This meeting will be held in-person with a webinar option. Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Wednesday, May 15, 2024, at 9 a.m.

ADDRESSES: Webinar registration URL information: *https://nefmc-org.zoom.us/meeting/register/tJEocuqgqToiHNAle9lccIP9ylkpw416yoJC.*

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Cate O'Keefe, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Risk Policy Working Group (RPWG) will address Term of Reference 2 by continuing to develop a revised Risk Policy Concept. The RPWG will discuss input provided by the Council during the RPWG Report on April 17, 2024. They will review and evaluate a comprehensive list of factors that can be considered as part of the Council's revised Risk Policy. They plan to refine the work plan and consider Terms of Reference for the upcoming meeting with the SSC on June 12, 2024. Other business will be discussed, if necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to

take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Cate O'Keefe, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 24, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Coral Reef Conservation Program

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. This notice pertains to a revision and extension of the approved collection of information for the Coral Reef Conservation Program. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before July 1, 2024.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at *NOAA.PRA@noaa.gov.* Please reference OMB Control Number 0648–0448 in the subject line of your comments. Written comments NOAA receives are considered part of the public record, and the entirety of the comment, including the name of the commenter, email address, attachments, and other supporting materials, will be publicly accessible. Sensitive personally identifiable information, such as account numbers and Social Security numbers or Confidential Business Information, should not be included with the comment.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Craig Reid, Grant Coordinator, Coral Reef Conservation Program, NOAA National Ocean Service, 1305 East West Highway, 10th Floor, Silver Spring, MD 20910, 202–240–5332, and *Craig.A.Reid@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision and extension to an approved collection of information under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.,* and implementing regulations at 5 CFR part 1320. The Coral Reef Conservation Act of 2000, 16 U.S.C. 6401 *et seq.,* has been amended since the last approval and the revised requirements for information collection are outlined below.

The Coral Reef Conservation Act was enacted to conserve and restore the condition of United States coral reef ecosystems challenged by natural and human-accelerated changes; to promote the science-based management and sustainable use of coral reef ecosystems to benefit local communities and the Nation; to develop sound scientific information on the condition of coral reef ecosystems, continuing and emerging threats to such ecosystems, and the efficacy of innovative tools, technologies, and strategies to mitigate stressors and restore such ecosystems; to assist in the preservation of coral reefs by supporting science-based, consensus-driven, and community-based coral reef management by covered States (Florida, Hawaii, and the territories of American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the United States Virgin Islands) and covered Native entities (an Indian Tribe, the Department of Hawaiian Home Lands, the Office of Hawaiian Affairs, or a Native Hawaiian organization with interests in a coral reef ecosystem); to provide financial resources, technical assistance, and scientific expertise to supplement, complement, and strengthen community-based management programs and conservation and restoration projects of non-Federal reefs; to establish a formal mechanism for collecting and allocating monetary donations from the private sector to be used for coral reef conservation and restoration projects; to support rapid, effective, and science-based assessment and response to exigent circumstances that pose immediate and long-term threats to coral reefs; and to serve as a model for advancing similar international efforts to monitor, conserve, and restore coral reef ecosystems.

Under section 6406 of the Act (Block Grants), covered States are responsible for documenting and reporting the State's use of Federal funds received under the Act; and expenditures of non-Federal funds made in furtherance of coral reef management and restoration as the NOAA Administrator (Administrator) deems appropriate. The Administrator is responsible for providing guidance on the proper documentation of expenditures.

Under section 6410 of the Act (Ruth D. Gates Coral Reef Conservation Grant Program), the NOAA Administrator, and subject to the availability of appropriations, is authorized to provide up to $3,500,000 annually (per section 6414(c)) in grants for coral reef conservation projects.

Collection activities for this program are outlined below and include: 1. Collection and submission of covered States' non-Federal expenditures under the block grants section; 2. Applicant development and submission of a proposal package to a Notice of Funding Opportunity under the Ruth D. Gates Coral Reef Conservation Grant Program; and 3. If selected and awarded funding, submission of performance progress reports, to include a standard program-specific performance progress report template with a new indicator tracking report for all financial assistance recipients.

NOAA anticipates the first block grants will be awarded in fiscal year 2025 and NOAA is currently drafting guidance for the covered States for the annual collection of their non-Federal expenditures. NOAA expects to supply a simple form to each covered State for an aggregated, high-level report of each covered State's Non-Federal expenditures from the previous fiscal year. NOAA expects the same performance (technical) reports required by 2 CFR 200.329 for all recipients of non-construction Federal financial assistance awards described in detail below will be sufficient to document and report the State's use of Federal funds.

As per section 6410(b) of the Act, NOAA will require that each proposal package submitted to a Ruth D. Gates Coral Reef Conservation Program Notice of Funding Opportunity at minimum include: 1. The name of the individual or entity responsible for conducting the project; 2. A description of the qualifications of the individual or entity; 3. A succinct statement of the purposes of the project; 4. An estimate of the funds and time required to complete the project; 5. Evidence of support for the project by appropriate representatives of States or other government jurisdictions in which the project will be conducted; 6. Information regarding the source and amount of matching funding available to the applicant; 7. A description of how the project meets one or more of the priorities listed in the announcement; and 8. In the case of a proposal submitted by a coral reef stewardship partnership, a description of how the project aligns with the applicable coral reef action plan in effect under section 6404 of this title. Additionally, Federal funds for any coral conservation financial assistance project may not exceed 50 percent of the total cost. However, the Administrator may waive all or part of the matching requirement if the Administrator determines that no reasonable means are available through which an applicant can meet the matching requirement with respect to a coral reef project and the probable benefit of the project outweighs the public interest in the matching requirement. The applicant may choose to also submit a request for this non-Federal matching requirement, if full or in part, at their discretion.

Per 2 CFR 200.329, all recipients of non-construction Federal financial assistance awards are required to provide performance (technical) reports to the agency at intervals no less frequently than annually and no more frequently than quarterly in order for the agency to properly monitor the award and meet oversight responsibilities. The awarding agency must use OMB-approved common forms for this purpose or seek permission for program-specific forms that will collect the required data elements. The Coral Reef Conservation Program obtained OMB approval to revise this information collection to require use of a program-specific form for semi-annual reporting and an annual form for tracking specific indicators but has not been implemented. These indicators align with the new Coral Reef Conservation Program Strategic Plan (2018; *https://www.coris.noaa.gov/activities/strategic_plan2018*) and were to be used to track national progress toward these strategic goals through 2040, however section 6403 of the Act now requires the creation of National Coral Resilience Strategy by December, 2024, and the form may need to be revised to track any changes in indicators. The program-specific form for semi-annual reporting will be a revised version of what is currently approved and will standardize reporting across projects.

II. Method of Collection

Information will be collected electronically via the Department of Commerce's grant management system, eRA Commons, for performance (technical) reports, *Grants.gov* for non-Federal match waiver requests, and email for covered States' submissions of expenditures of non-Federal funds. In the event that electronic submission is not available for non-Federal match waiver requests, paper submissions may be allowable pursuant to the Notice of Funding Opportunity.

III. Data

OMB Control Number: 0648–0448.

Form Number(s): SF–424 series.

Type of Review: Regular (Revision and extension of current information collection).

Affected Public: Business or other for-profit organizations; nonprofit, nongovernmental, and not-for-profit institutions; State or local government; and regional fishery management councils established under the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*).

Estimated Number of Respondents: 42.

Estimated Time per Response: Block grant report of non-Federal expenditures of covered States: to be determined; Ruth D. Gates Grant Program proposal package development and submission: 46.5 hours; performance progress report and indicator report submission: 6 hours.

Estimated Total Annual Burden Hours: 937 hours.

Estimated Total Annual Cost to Public: No cost for electronic responses.

Respondent's Obligation: Required to obtain or retain benefits.

Legal Authority: Coral Reef Conservation Act of 2000, 16 U.S.C. 6401 *et seq.*

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this information collection request. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

Council Coordination Committee Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Caribbean Fishery Management Council (CFMC) will host a meeting of the Council Coordination Committee (CCC) consisting of eight Regional Fishery Management Council (RFMC) chairs, vice chairs, and executive directors and its subcommittees from May 21 to May 23, 2024. The intent of this meeting is to discuss issues of relevance to the Councils and NMFS, including issues related to the implementation of the Magnuson-Stevens Fishery Conservation and Management Reauthorization Act (MSA), other topics

of concern to the RFMC, and decisions and follow-up activities.

DATES: The meeting will be held from Tuesday, May 21, 2024 to Thursday, May 23, 2024. Registration for the meeting will be from 9 a.m. to 5 p.m., AST on Monday, May 20, 2024. The meeting will begin at 9 a.m. AST on Tuesday, May 21, 2024, and recess at 5 p.m. or when business is complete. There will be a closed session on May 22, 2024, from 8 a.m. to 8:30 a.m., AST. The meeting will reconvene at 9 a.m. AST, and recess at 5 p.m. or when business is complete. The meeting will reconvene on the final day at 9 a.m. AST on Thursday, May 23, 2024, and adjourn by 12 p.m., AST or when business is complete.

ADDRESSES:

Meeting address: The meeting will take place at the Caribe Hilton Hotel, 1 San Geronimo Street San Juan, Puerto Rico 00901; telephone: (787) 721–0303.

You may join the meeting via Zoom, from a computer, tablet or smartphone by entering the following address:

Find your local number: *https://us02web.zoom.us/u/kcXP2b3XGB*

FOR FURTHER INFORMATION CONTACT: Miguel Rolón, Executive Director, Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico 00918–1903, telephone: (787) 398–3717.

SUPPLEMENTARY INFORMATION: The Magnuson-Stephens Fishery Conservation and Management Act (MSA) and 2007 Reauthorization Act (MSRA) established the CCC by amending section 302 (16 U.S.C. 1852) of the MSA. The Committee consists of the chairs, vice-chairs, and executive directors of each of the eight Regional Fishery Management Councils authorized by the MSA, or their proxies, other Council members or staff. All sessions are open to the public and time will be set aside for public comments at the end of each day and after specific sessions at the discretion of the meeting Chair. The meeting Chair will announce public comment times and instructions to provide comment at the start of each meeting day. There will be opportunities for public comments to be provided in-person and remotely via webinar. Updates to this meeting, briefing materials, public comment instructions and additional information will be posted when available at *http://www.fisherycouncils.org/ccc-meetings/may-2024.*

Proposed Agenda

Monday, May 20, 2024

9 a.m.–5 p.m.: Meeting Registration—Gran Salón Los Rosales

Tuesday, May 21, 2024

9 a.m.: CCC Convenes

I. *9 a.m.–9:10 a.m.:* Welcome and Introductions—*Mr. Carlos F. Farchette*
- Adoption of Agenda

II. *9:10 a.m.–9:30 a.m.:* Opening Remarks and FY24/25 Priorities—*Ms. Janet Coit*

III. *9:30 a.m.–10:45 a.m.:* NOAA Fisheries Update and FY 24/25 Priorities—*Mr. Sam Rauch/Ms. Emily Menashes*
- Confidentiality Rule Update
- CEQ NEPA Regulations
- National Seafood Strategy
- America the Beautiful/30x30 & Marine and Coastal Area-Based Management Federal Advisory Committee (FAC) Update
- Sanctuary Regulations and Guidance

—— Break 10:45 a.m.–11 a.m. ——

IV. *11 a.m.–12:15 p.m.:* NOAA Fisheries Science Updates
- CEFI Regional Implementation: Results From the 1st Summit—*Dr. Cisco Werner*
- Marine Recreational Information Program (MRIP) & Fishing Effort Survey (FES)—*Dr. Evan Howell*

—— Lunch *12:15 p.m.–1:45 p.m.* ——

V. *1:45 p.m.–2:45 p.m.:* ESA/MSA Integration Policy Draft
- ESA/MSA Integration Policy Draft—*Mr. Sam Rauch*

VI. *2:45 p.m.–3:15 p.m.:* MSA 304(f) Policy—*Ms. Kelly Denit*

—— Break *3:15 p.m.–3:30 p.m.* ——

VII. *3:30 p.m.–4:15 p.m.:* National Standards 4, 8, and 9—*Ms. Kelly Denit*

VIII. *4:15 p.m.–4:45 p.m.:* Public Comments—*Mr. Carlos F. Farchette*

—— Recess ——

Wednesday, May 22, 2024

8 a.m.–8:30 a.m. CLOSED SESSION

IX. *9 a.m.–10 a.m.:* Budget
- 2024 Outlook, Including 5-year Administrative Awards—*Ms. Emily Menashes*
- Long Term Funding for Council Operation

X. *10 a.m.–10:30 a.m.:* Anti-Harassment Policies and Addressing Unprofessional Behavior—*Mr. Merrick J. Burden*

—— Break *10:30 a.m.–10:45 a.m.* ——

XI. *10:45 a.m.–11 a.m.:* Caribbean Fishery Management Highlights—*Mr. Carlos F. Farchette*

XII. *11 a.m.–11:15 a.m.:* 8th Scientific Coordination Subcommittee (SCS) 2024, Planning Report—*Dr. Lisa Kerr*

XIII. *11:15 a.m.–11:30 a.m.:* CMOD Planning Update—*Ms. Diana Evans*

XIV. *11:30 a.m.–12 p.m.:* International Fisheries Issues—*Mr. Carlos F. Farchette*

—— Lunch *12 p.m.–1:30 p.m.* ——

XV. *1:30 p.m.–2:45 p.m.:* Inflation Reduction Act (IRA) Climate-Ready Fishery Funding
- Update on IRA Funding Overall—*Dr. Evan Howell*
- Council-specific Funding Update—*Ms. Kelly Denit*

XVI. *2:45 p.m.–3:45 p.m.:* National Academies of Sciences (NAS) Equity Report and Equity and Environmental Justice (EEJ) Regional Strategic Plans—*Mr. Sam Rauch*

—— Break *3:45 p.m.–4 p.m.* ——

XVII. *4 p.m.–4:30 p.m.:* Legislative Outlook—*Mr. Dave Whaley*

XVIII. *4:30 p.m.–5 p.m.:* Public Comments—*Mr. Carlos F. Farchette*

—— Recess ——

Thursday, May 23, 2024

XIX. *9 a.m.–10 a.m.:* CCC Workgroups/ Subcommittees

9 a.m.–9:15 a.m.

- Communications Committee Councils MSA 50-year Anniversary Update

9:15 a.m.–9:30 a.m.

- Habitat Working Group—*Dr. Lisa Hollensead/Dr. Graciela García-Moliner*

9:30 a.m.–9:45 a.m.

- NEPA Working Group Report—*Dr. Graciela García-Moliner*

9:45 a.m.–10:15 a.m.

- EEJ Working Group Report—*Mr. Zach Yamada/Dr. Graciela García-Moliner*

—— Break *10:15 a.m.–10:30 a.m.* ——

XX. 10:30 a.m.–11 a.m.: Public Comments—*Mr. Carlos F. Farchette*

XXI. 11 a.m.–11:15 a.m.: 2025 CCC Meetings—*Dr. Cate O'keefe*

XXII. *11:15 a.m.–12 p.m.:* Other Business and Wrap-Up—*Mr. Carlos F. Farchette*

- CCC Outcomes and Action Items

—— ADJOURN ——

The timing and order in which agenda items are addressed may change as required to effectively address the issues. The CCC will meet as late as necessary to complete scheduled business.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305 (c) of the Magnuson-Stephens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Diana Martino, Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico, 00918–1903, telephone: (787) 226–8849, at least 5 working days prior to the meeting.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 24, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD881]

Taking and Importing Marine Mammals; Taking Marine Mammals Incidental to Geophysical Surveys Related to Oil and Gas Activities in the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of modification to expiration date of letter of authorization.

SUMMARY: In accordance with the Marine Mammal Protection Act (MMPA), as amended, its implementing regulations, and NMFS' MMPA Regulations for Taking Marine Mammals Incidental to Geophysical Surveys Related to Oil and Gas Activities in the Gulf of Mexico (GOM), notification is hereby given that NMFS has modified the expiration date of a Letter of Authorization (LOA) issued to WesternGeco for the take of marine mammals incidental to geophysical survey activity in the GOM.

DATES: This LOA is effective through July 31, 2024.

ADDRESSES: The LOA, LOA request, and supporting documentation are available online at: *https://www.fisheries.noaa.gov/marine-mammal-protection/issued-letters-authorization-oil-and-gas-industry-geophysical-survey.* In case of problems accessing these documents, please call the contact listed below (**FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Jenna Harlacher, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth. NMFS has defined ''negligible impact'' in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

Except with respect to certain activities not pertinent here, the MMPA defines ''harassment'' as: any act of pursuit, torment, or annoyance which: (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

On January 19, 2021, we issued a final rule with regulations to govern the unintentional taking of marine mammals incidental to geophysical survey activities conducted by oil and gas industry operators, and those persons authorized to conduct activities on their behalf (collectively ''industry operators''), in U.S. waters of the GOM over the course of 5 years (86 FR 5322, January 19, 2021). The rule was based on our findings that the total taking from the specified activities over the 5-year period will have a negligible impact on the affected species or stock(s) of marine mammals and will not have an unmitigable adverse impact on the availability of those species or stocks for subsistence uses. The rule became effective on April 19, 2021.

Our regulations at 50 CFR 217.180 *et seq.* allow for the issuance of LOAs to industry operators for the incidental take of marine mammals during geophysical survey activities and prescribe the permissible methods of taking and other means of effecting the least practicable adverse impact on marine mammal species or stocks and their habitat (often referred to as mitigation), as well as requirements pertaining to the monitoring and

reporting of such taking. Under 50 CFR 217.186(e), issuance of an LOA shall be based on a determination that the level of taking will be consistent with the findings made for the total taking allowable under these regulations and a determination that the amount of take authorized under the LOA is of no more than small numbers.

NMFS issued a LOA to WesternGeco on October 17, 2023, for the take of marine mammals incidental to a three-dimensional ocean bottom node survey in the Green Canyon and Walker Ridge protraction areas, including approximately 795 lease blocks, effective October 16, 2023, through April 30, 2024. Please see the **Federal Register** notice of issuance (88 FR 72739, October 23, 2023) for additional detail regarding the LOA and the survey activity.

WesternGeco has requested a modification of the April 30, 2024, expiration date, extending it to July 31, 2024, due to survey delays. There are no other changes to WesternGeco's planned activity.

Authorization

NMFS has changed the expiration date of the LOA from April 30, 2024, to July 31, 2024. There are no other changes to the LOA as described in the October 23, 2023, **Federal Register** notice of issuance (88 FR 72739): the specified survey activity; estimated take by incidental harassment; and small numbers analysis and determination remain unchanged and are incorporated here by reference.

Dated: April 23, 2024.

Kimberly Damon-Randall,

Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD902]

Fisheries of the Exclusive Economic Zone Off Alaska; Cook Inlet Salmon; Public Outreach Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Meeting notice.

SUMMARY: NMFS will hold two in person public meetings and one webinar regarding Amendment 16 to the Fishery Management Plan for the Salmon Fisheries in the Exclusive Economic Zone (EEZ) Off Alaska (Salmon FMP). Amendment 16 establishes Federal management for the salmon fishery in the Federal (*i.e.,* EEZ) waters of upper Cook Inlet.

DATES: The first meeting will take place on May 15, 2024, in Kenai, Alaska, starting at 5:30 p.m. AKDT and concluding no later than 7:30 p.m. AKDT. The second public meeting will take place on May 16, 2024, in Homer, Alaska, starting at 5:30 p.m. AKDT and concluding no later than 7:30 p.m. AKDT. The webinar will take place on May 22, 2024, starting at 10 a.m. AKDT and concluding no later than 12 p.m. AKDT.

ADDRESSES:

- May 15, 2024: Kenai, Alaska
  - Quality Inn—Conference room
  - 10352 Kenai Spur Highway
- May 16, 2024: Homer, Alaska
  - Best Western Bidarka Inn—Upstairs conference room
  - 575 Sterling Highway
- May 22, 2024: Webinar
  - Cook Inlet Public Webinar
  - Wednesday, May 22 · 10:00 a.m.–12:00 p.m.
  - Time zone: America/Anchorage
  - Google Meet joining info
  - Video call link: *https://meet.google.com/qbp-wpqo-mkw*
  - Or dial: (US) +1 929–324–9506 PIN: 148 365 993#

FOR FURTHER INFORMATION CONTACT: Amy Hadfield, 907–586–7376.

SUPPLEMENTARY INFORMATION: Public meetings will be held in Kenai, Homer and via webinar to discuss the permitting, recordkeeping and reporting requirements for commercial drift gillnet salmon fishing in the federally managed Cook Inlet drift EEZ salmon fishery.

In response to a 2016 decision of the Ninth Circuit of Appeals and the 2022 summary judgment opinion of the U.S. District Court for the District of Alaska in *United Cook Inlet Drift Association* v. *NMFS,* beginning in 2024 NMFS is establishing Federal management over all salmon fishing in the EEZ waters of upper Cook Inlet, consistent with all Magnuson-Stevens Fishery Conservation and Management Act requirements. Because NMFS has not previously managed salmon fishing in the Cook Inlet EEZ, NMFS is conducting public meetings to explain the regulatory requirements for fishermen, processors and fish transporter participants and answer questions pertaining to these requirements.

Staff will provide information and the public will have the opportunity to ask questions. The schedule is as follows:

- Wednesday, May 15, 2024, in-person at 5:30 p.m., located at the following address: Kenai Quality Inn, 10352 Kenai Spur Highway, Kenai, Alaska.
- Thursday, May 16, 2024, in-person at 5:30 p.m., located at the following address: Best Western Bidarka Inn, 575 Sterling Highway, Homer, Alaska.
- Wednesday May 22, 2024, virtual webinar at 10 a.m., located at the following address: *https://meet.google.com/qbp-wpqo-mkw.* Registration is not required.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Amy Hadfield, 907–586–7376, at least 5 working days prior to the meeting date.

Dated: April 25, 2024.

Everett Wayne Baxter,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; National Marine Sanctuary Nominations

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. This notice pertains to a requested renewal of the approved collection of information for national marine sanctuary nominations. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before July 1, 2024.

ADDRESSES: Interested persons are invited to submit written comments to

Adrienne Thomas, NOAA PRA Officer, at *NOAA.PRA@noaa.gov.* Please reference OMB Control Number 0648–0682 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Jessica Kondel, National Oceanic and Atmospheric Administration, 1305 East-West Highway, Silver Spring, (240) 533–0647, or *Jessica.Kondel@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for extension of an existing information collection.

National marine sanctuary regulations provide that the public can submit areas of the marine and Great Lakes environments for consideration by NOAA as a national marine sanctuary through the sanctuary nomination process (15 CFR part 922). Persons wanting to submit nominations for consideration should submit information on the qualifying criteria and management considerations for the site to be nominated. The Office of National Marine Sanctuaries reviews the submissions, which could result in the nomination being added to an inventory of areas that NOAA may consider for sanctuary designation at some point in the future. Sanctuary designation is a separate public process that would be conducted pursuant to the requirements of the National Marine Sanctuaries Act, and all other applicable laws. This proposed information collection is for national marine sanctuary nominations received pursuant to NOAA regulations that provide that the public may nominate special places of the marine environment through the sanctuary nomination process (15 CFR part 922).

II. Method of Collection

Electronic applications submitted via email and paper nominations submitted via regular mail.

III. Data

OMB Control Number: 0648–0682.

Form Number(s): None.

Type of Review: Regular submission, extension of a current information collection.

Affected Public: Individuals or households; Business or other for-profit organizations; Not-for-profit institutions; State, Local, or Tribal government; Federal government.

Estimated Number of Respondents: 7.

Estimated Time per Response: 115 hours.

Estimated Total Annual Burden Hours: 591.

Estimated Total Annual Cost to Public: $120.

Respondent's Obligation: Required to Obtain or Retain Benefits.

Legal Authority: 16 U.S.C. 1431 *et seq.*

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

[FR Doc. 2024–09313 Filed 4–29–24; 8:45 am]

BILLING CODE 3510–NK–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD909]

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The New England Fishery Management Council's is convening its Scientific and Statistical Committee (SSC) via webinar to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This webinar will be held on Tuesday, May 14, 2024, beginning at 9 a.m.

ADDRESSES:

Webinar Registration information: https://nefmc-org.zoom.us/webinar/register/WN_xtQ5ngK_RHmKIliFk8HgTw.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Cate O'Keefe, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Scientific and Statistical Committee will meet to review roles and responsibilities of the SSC. Review SSC work plan for 2024. They will comment on the update to the Council's research priorities and data needs. They plan to receive an update on and discuss plans for the 8th national workshop of the Scientific Coordination Subcommittee. Also, receive update on and discuss the Council's Atlantic Cod Management Transition Plan. They will discuss other business as necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Cate O'Keefe, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 24, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The MAFMC will hold a public meeting (webinar) of its Mackerel, Squid, and Butterfish (MSB) Monitoring Committee. See **SUPPLEMENTARY INFORMATION** for agenda details.

DATES: The meeting will be held on Thursday, May 16, 2024, from 2:30 p.m. to 4 p.m.

ADDRESSES: Webinar connection information will be posted to the MAFMC's website calendar prior to the meeting, at *www.mafmc.org.*

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; *www.mafmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The main purpose of the meeting is for the MSB Monitoring Committee to develop recommendations for future MSB specifications to ensure that annual catch limits are not exceeded. Public comments will also be taken.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to Shelley Spedden, (302) 526–5251, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

[Docket No. PTO–P–2023–0044]

Request for Comments Regarding the Impact of the Proliferation of Artificial Intelligence on Prior Art, the Knowledge of a Person Having Ordinary Skill in the Art, and Determinations of Patentability Made in View of the Foregoing

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Request for comments.

SUMMARY: The United States Patent and Trademark Office (USPTO or Office) seeks public comments regarding the impact of the proliferation of artificial intelligence (AI) on prior art, the knowledge of a person having ordinary skill in the art (PHOSITA), and determinations of patentability made in view of the foregoing. The increasing power and deployment of AI has the potential to provide tremendous societal and economic benefits and foster a new wave of innovation and creativity while also posing novel challenges and opportunities for intellectual property (IP) policy. Through the AI and Emerging Technologies Partnership (AI/ET Partnership), the USPTO has been actively engaging with the innovation community and AI experts on IP policy in view of AI. To build on these efforts, the USPTO is requesting written public comments on how the proliferation of AI could affect certain evaluations made by the Office, including what qualifies as prior art, the assessment of the level of skill of a PHOSITA, and determinations of patentability made in view of these evaluations. The USPTO expects that the responses received will help the Office evaluate the need for further guidance on these matters, aid in the development of any such guidance, and help inform the USPTO's work in the courts and in providing technical advice to Congress.

DATES: Written comments must be received on or before July 29, 2024, to ensure consideration.

ADDRESSES: Comments must be submitted through the Federal eRulemaking Portal at *www.regulations.gov.* To submit comments via the portal, enter docket number PTO–P–2023–0044 on the homepage and click ''Search.'' The site will provide a search results page listing all documents associated with this docket. Find a reference to this document and select the ''Comment'' icon, complete the required fields, and enter or attach your comments. Attachments to electronic comments will be accepted in ADOBE® portable document format (PDF) or Microsoft Word® format. Because comments will be made available for public inspection, information that the submitter does not desire to make public, such as an address or phone number, should not be included in the comments.

Visit the Federal eRulemaking Portal for additional instructions on providing comments via the portal. If electronic submission of comments is not feasible due to a lack of access to a computer and/or the internet, please contact the USPTO using the contact information below for special instructions.

FOR FURTHER INFORMATION CONTACT: Steven J. Fulk, Legal Advisor, at 571–270–0072; Nalini Mummalaneni, Senior Legal Advisor, at 571–270–1647; or Matthew Sked, Senior Legal Advisor, at 571–272–7627, all with the Office of Patent Legal Administration, Office of the Deputy Commissioner for Patents.

SUPPLEMENTARY INFORMATION:

I. Background

The USPTO has held several stakeholder interaction sessions and has issued requests for comments (RFCs) to seek public feedback regarding AI's impact on patent policy issues.[1] In August 2019, the USPTO issued an RFC on patenting AI inventions.[2] Among the various policy questions raised in this previous RFC, the USPTO requested comments on AI's impact on a PHOSITA and prior art considerations unique to AI inventions.[3] In October 2020, the USPTO published a report titled ''Public Views on Artificial Intelligence and Intellectual Property Policy,'' which provided a comprehensive look at the stakeholder feedback received in response to the questions posed in the August 2019 RFC.[4] That report explained that stakeholders had varying views on how AI would impact obviousness determinations and how to assess a PHOSITA's level of skill.[5] Some commenters stated that AI machines are not ''persons,'' and therefore, AI would

[1] See USPTO Artificial Intelligence web page at *www.uspto.gov/initiatives/artificial-intelligence.*

[2] Request for Comments on Patenting Artificial Intelligence Inventions, 84 FR 44889 (August 27, 2019). Question 1 of this RFC noted, ''Inventions that utilize AI, as well as inventions that are developed by AI, have commonly been referred to as 'AI inventions.' ''

[3] *Id.*

[4] The full report is available at *www.uspto.gov/sites/default/files/documents/USPTO_AI-Report_2020-10-07.pdf* (October 2020 AI Report).

[5] October 2020 AI Report at 11–13.

not affect the PHOSITA assessment.[6] Additional commenters believed the present framework for assessing a PHOSITA's level of skill is sufficient to determine the impact of AI in a particular field.[7] Many commenters agreed that the increasing use of AI would affect how the USPTO and the courts assess the legal hypothetical standard of a PHOSITA.[8] Others indicated ''the level of skill in any art has traditionally grown over time based on the introduction of new technologies and that 'once conventional AI systems become widely available . . . such accessibility would be expected to enhance the abilities of a [PHOSITA].' '' [9] However, some commenters noted that ''such wide prevalence of AI systems has not yet permeated all fields and counseled against declaring that all fields of innovation are now subject to the application of 'conventional AI.' '' [10] Additionally, while most commenters believed there were no prior art considerations unique to AI, some commenters indicated there may be some unique considerations, such as the difficulty in finding prior art related to the AI technology itself (*e.g.,* finding source code for AI technology) and the proliferation of AI-generated prior art.[11] Overall, commenters confirmed that more engagement with the USPTO was needed regarding how AI impacts prior art and the level of skill of a PHOSITA.

In June 2022, the USPTO launched the AI/ET Partnership.[12] At the June 29, 2022, inaugural AI/ET Partnership meeting,[13] panelists commented that the level of skill of a PHOSITA for obviousness determinations would be higher in view of the availability of AI.[14] One panelist argued that it may be appropriate to raise the bar for the level of skill of a PHOSITA particularly where the use of AI is common practice. That panelist also noted that AI might be able to make use of prior art from fields that humans may not have been expected to find or use, and that the universe of prior art would expand as AI advances. Another panelist commented that obviousness is always determined in view of prior art references and that the extent to which AI developments should affect the obviousness standard was unclear. After this June 2022 inaugural event, the Office held several additional AI/ET Partnership events in 2022 and 2023.[15]

In February 2023, the USPTO issued an RFC on AI and inventorship.[16] This request focused on questions of inventorship, but it also asked what other areas of focus the USPTO should prioritize in future engagements. Many commenters indicated that the USPTO should investigate how AI impacts obviousness determinations and the PHOSITA assessment.[17] For example, some commenters stated that an invention developed with the use of AI should not render that invention obvious or more likely to be obvious.[18] Conversely, other commenters indicated that AI contributions to an invention should be *per se* obvious or that the AI contribution should have a rebuttable presumption of obviousness.[19] Commenters also indicated that AI has the potential to generate a vast amount of prior art, which may have an impact on the Office's anticipation and obviousness determinations.[20]

The increasing power and deployment of AI has the potential to provide tremendous societal and economic benefits and foster a new wave of innovation and creativity while also posing novel challenges and opportunities for IP policy. Based on the feedback that the USPTO has received from our stakeholders on the importance of AI's impact on prior art, on the knowledge of a PHOSITA, and on other patentability considerations, the Office plans to more deeply engage with stakeholders and is requesting further comments in these areas. This RFC builds on the USPTO's recent AI-related efforts associated with Executive Order 14110,[21] including the ''Inventorship Guidance for AI-Assisted Inventions'' [22] published on February 13, 2024.

Section II of this notice provides an overview of prior art considerations and discusses some concerns relevant to AI-generated prior art. Section III discusses the current PHOSITA assessment as it is applied by the USPTO and the courts. Sections II and III are intended only to provide context for the questions presented in this notice. This RFC is not a guidance document and does not announce any new Office practice or procedure. Section IV presents questions to the public on the impact of AI on prior art and the PHOSITA assessment.

II. Considerations for the Impact of AI on Prior Art

''A claimed invention may be rejected under 35 U.S.C. 102 when the invention is anticipated (or is 'not novel') over a disclosure that is available as prior art. To reject a claim as anticipated by a [prior art] reference, the disclosure must teach every element required by the claim under its broadest reasonable interpretation.'' [23] Under 35 U.S.C. 102(a)(1), a person is not entitled to a patent if the claimed invention was disclosed—including being patented; described in a printed publication; or in public use, on sale, or otherwise available to the public—before the effective filing date of the claimed invention (*i.e.,* the disclosure is a ''prior art disclosure''). Under 35 U.S.C. 102(a)(2), a person is not entitled to a patent if ''the claimed invention was described in a patent issued under [35 U.S.C. 151], or in an application for patent published or deemed published under [35 U.S.C. 122(b)], in which the patent or application, as the case may be, names another inventor and was effectively filed before the effective filing date of the claimed invention.'' A disclosure that is a prior art reference under 35 U.S.C. 102 may also serve as a basis for obviousness under 35 U.S.C. 103.[24]

To qualify as a ''printed publication'' under 35 U.S.C. 102(a)(1), a prior art reference must have been publicly accessible, *i.e.,* ''available to the extent that persons interested and ordinarily skilled in the subject matter or art, exercising reasonable diligence, can

locate [the reference].'' [25] AI may be used to create vast numbers of disclosures that may have been generated without any human contribution, supervision, or review. Because a PHOSITA is ''a hypothetical person who is presumed to have known the relevant art at the relevant time,'' [26] the proliferation of AI-generated disclosures may question the soundness of presuming that a PHOSITA knew of relevant AI-generated art when the vast amount of AI-generated disclosures was never reviewed by a human. Further, as suggested by stakeholders, there is a question whether AI-generated disclosures, especially those with no human input, review, or validation, should qualify as prior art disclosures and potentially preclude human-created inventions from being patented.

Additionally, ''[w]hen the [prior art] reference relied on expressly anticipates or makes obvious all of the elements of the claimed invention, the reference is presumed to be operable,'' regardless of the type of prior art (*e.g.,* patent, printed publication, or other prior art disclosure), and the burden is on the applicant to rebut the presumption of operability.[27] The presumption is that a public disclosure provides a description that enables the public to make and use the disclosure. The presumption does not (at least currently) distinguish between who or what made the disclosure, which prompts the question whether AI-generated disclosures (that have not been prepared and reviewed by a human) should be afforded the same rebuttable presumption that they are operable and enabled. In view of the above issues, the proliferation of AI-generated prior art raises questions on which the Office seeks input from stakeholders.

III. Considerations for the Impact of AI on the Knowledge of a PHOSITA

''A patent for a claimed invention may not be obtained . . . if the differences between the claimed invention and the prior art are such that the claimed invention as a whole would have been obvious before the effective filing date of the claimed invention *to a person having ordinary skill in the art to which the claimed invention pertains.*'' [28] Thus, obviousness is to be determined with regard to a PHOSITA.[29] As reiterated by the Supreme Court in *KSR International Co.* v. *Teleflex Inc.*[30] (*KSR*), obviousness is a question of law based on underlying factual inquiries established in *Graham* v. *John Deere Co.* (*Graham*).[31] The *Graham* factual inquiries are: (1) determining the scope and content of the prior art, (2) ascertaining the differences between the claimed invention and the prior art, (3) resolving the level of ordinary skill in the art, and (4) evaluating any objective evidence of nonobviousness.[32] Once these factual findings are made, a determination of obviousness should focus on ''what a person of ordinary skill in the pertinent art would have known at the relevant time, and on what such a person would have reasonably expected to have been able to do in view of that knowledge.'' [33]

Likewise, a patent ''specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any *person skilled in the art to which it pertains* . . . to make and use the same.'' [34] The courts have analyzed written description and enablement issues from the vantage point of a PHOSITA.[35] However, the role of a PHOSITA goes beyond these statutory considerations for obviousness under 35 U.S.C. 103 and the requirements under 35 U.S.C. 112. For example, claim terms are construed in the manner in which a PHOSITA would understand them.[36] Additionally, claims can be anticipated by prior art inherently if ''the missing descriptive matter is necessarily present in the thing described in the reference, and that it would be so recognized by persons of ordinary skill.'' [37]

The Court of Appeals for the Federal Circuit has identified several factors to consider when determining a PHOSITA's level of skill, including the type of problems encountered in the art, prior art solutions to those problems, the rapidity with which innovations are made, the sophistication of the technology, and the education level of active workers in the field.[38] Each case may vary, not every one of the aforementioned factors may be present, and one or more factors may predominate the analysis.[39]

Accordingly, it is often critical in a patentability inquiry to assess the PHOSITA's level of skill in the relevant art,[40] including for claim construction, anticipation, obviousness, written description, and enablement. In view of the above issues, the proliferation of AI as a tool for a PHOSITA raises questions on which the Office seeks input.

IV. Questions for Public Comment

The questions enumerated below should not be taken as an indication that the USPTO has taken a position on or is predisposed to any particular views. The USPTO welcomes comments from the public on any issues that are relevant to this topic, and is particularly interested in answers to the following questions:

A. The Impact of AI on Prior Art

1. In what manner, if any, does 35 U.S.C. 102 presume or require that a prior art disclosure be authored and/or published by humans? In what manner, if any, does non-human authorship of a disclosure affect its availability as prior art under 35 U.S.C. 102?

2. What types of AI-generated disclosures, if any, would be pertinent to patentability determinations made by the USPTO? How are such disclosures currently being made available to the public? In what other ways, if any, should such disclosures be made available to the public?

3. If a party submits to the Office a printed publication or other evidence that the party knows was AI-generated, should that party notify the USPTO of this fact, and if so, how? What duty, if any, should the party have to determine whether a disclosure was AI-generated?

4. Should an AI-generated disclosure be treated differently than a non-AI-

[25] MPEP 2128, subsection I (quoting *In re Wyer,* 655 F.2d 221, 210 USPQ 790 (C.C.P.A. 1981) (quoting *I.C.E. Corp.* v. *Armco Steel Corp.,* 250 F. Supp. 738, 743, 148 USPQ 537, 540 (SDNY 1966))).

[26] MPEP 2141.03, subsection I.

[27] MPEP 2121, subsections I and II. Note, however, ''[e]ven if a reference discloses an inoperative device, it is prior art for all that it teaches'' and ''may qualify as prior art for the purpose of determining obviousness under 35 U.S.C. 103.'' MPEP 2121.01, subsection II.

[40] MPEP 2141.03.

generated disclosure for prior art purposes? For example:

a. Should the treatment of an AI-generated disclosure as prior art depend on the extent of human contribution to the AI-generated disclosure?

b. How should the fact that an AI-generated disclosure could include incorrect information (*e.g.,* hallucinations) affect its consideration as a prior art disclosure?

c. How does the fact that a disclosure is AI-generated impact other prior art considerations, such as operability, enablement, and public accessibility?

5. At what point, if ever, could the volume of AI-generated prior art be sufficient to create an undue barrier to the patentability of inventions? At what point, if ever, could the volume of AI-generated prior art be sufficient to detract from the public accessibility of prior art (*i.e.,* if a PHOSITA exercising reasonable diligence may not be able to locate relevant disclosures)?

B. The Impact of AI on a PHOSITA

6. Does the term ''person'' in the PHOSITA assessment presume or require that the ''person'' is a natural person, *i.e.,* a human? How, if at all, does the availability of AI as a tool affect the level of skill of a PHOSITA as AI becomes more prevalent? For example, how does the availability of AI affect the analysis of the PHOSITA factors, such as the rapidity with which innovations are made and the sophistication of the technology?

7. How, if at all, should the USPTO determine which AI tools are in common use and whether these tools are presumed to be known and used by a PHOSITA in a particular art?

8. How, if at all, does the availability to a PHOSITA of AI as a tool impact:

a. Whether something is well-known or common knowledge in the art?

b. How a PHOSITA would understand the meaning of claim terms?

9. In view of the availability to a PHOSITA of AI as a tool, how, if at all, is an obviousness determination affected, including when:

a. Determining whether art is analogous to the claimed invention, given AI's ability to search across art fields? Does the ''analogous'' art standard still make sense in view of AI's capabilities?

b. Determining whether there is a rationale to modify the prior art, including the example rationales suggested by *KSR* (MPEP 2143, subsection I) (*e.g.,* ''obvious to try'') or the scientific principle or legal precedent rationales (MPEP 2144)?

c. Determining whether the modification yields predictable results with a reasonable expectation of success (*e.g.,* how to evaluate the predictability of results in view of the stochasticity (or lack of predictability) of an AI system)?

d. Evaluating objective indicia of obviousness or nonobviousness (*e.g.,* commercial success, long felt but unsolved needs, failure of others, simultaneous invention, unexpected results, copying, etc.)?

10. How, if at all, does the recency of the information used to train an AI model or that ingested by an AI model impact the PHOSITA assessment when that assessment may focus on an earlier point in time (*e.g.,* the effective filing date of the claimed invention for an application examined under the First-Inventor-to-File provisions of the America Invents Act)?

11. How, if at all, does the availability to a PHOSITA of AI as a tool impact the enablement determination under 35 U.S.C. 112(a)? Specifically, how does it impact the consideration of the *In re Wands* factors (MPEP 2164.01(a)) in ascertaining whether the experimentation required to enable the full scope of the claimed invention is reasonable or undue?

C. The Implications of AI That Could Require Updated Examination Guidance and/or Legislative Change

12. What guidance from the USPTO on the impact of AI on prior art and on the knowledge of a PHOSITA, in connection with patentability determinations made by the Office, would be helpful?

13. In addition to the considerations discussed above, in what other ways, if any, does the proliferation of AI impact patentability determinations made by the Office (*e.g.,* under 35 U.S.C. 101, 102, 103, 112, etc.)?

14. Are there any laws or practices in other countries that effectively address any of the questions above? If so, please identify them and explain how they can be adapted to fit within the framework of U.S. patent law.

15. Should title 35 of the U.S. Code be amended to account for any of the considerations set forth in this notice, and if so, what specific amendments do you propose, and why?

Katherine K. Vidal,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

BILLING CODE 3510–16–P

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID: USA–2024–HQ–0003]

Submission for OMB Review; Comment Request

AGENCY: U.S. Army Corps of Engineers (USACE), Department of the Army, Department of Defense (DoD).

ACTION: 30-Day information collection notice.

SUMMARY: The DoD has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by May 28, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Reginald Lucas, (571) 372–7574, *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Flood and Coastal Storm Damage Surveys; OMB Control Number 0710–0017.

Type of Request: Extension.

Number of Respondents: 3,000.

Responses per Respondent: 1.

Annual Responses: 3,000.

Average Burden per Response: 23 minutes.

Annual Burden Hours: 1,150.

Needs and Uses: Information collection via the survey instruments is necessary to formulate and evaluate alternative water resources development plans in accordance with the Principles and Guidelines for Water Related Land Resources Implementation Studies (PR&G), promulgated by the U.S. Water Resources Council, 1983, which specifically identifies personal interviews as a method of gathering primary flood damage data. The PR&G were most recently updated in 2013 at the direction of Section 2031 of the Water Resources Development Act of 2007 (Pub. L. 110–114). The information collection is also needed to determine the effectiveness and evaluate the impacts of Army Corps of Engineers projects (Pub. L. 74–738); and, in the

case of flood damage mitigation, obtain information on flood damages incurred, whether or not a project is being considered or exists (Pub. L. 74–738). The information to be gathered under this collection also supports the mandate from the Flood Control Act of 1936 (Pub. L. 74–734), which established the criterion for Federal action that ''the benefits, to whomsoever they may accrue are in excess of the estimated costs.'' The Engineer Regulation (ER) 1105–2–100, Planning Guidance Notebook (April, 2000) defines benefits for the project under consideration, with flood damages avoided comprising the primary category of benefits used in project justification. Secondary benefits include reductions in emergency costs, unrecoverable and non-transferrable income losses, clean-up and other costs associated with flooding.

The U.S. Army Corps of Engineers (USACE) provides flood risk management structural and nonstructural mitigation, planning and tech services to communities, residents, and businesses at risk of flooding. Flood damage surveys are administered by USACE and its contractors to determine the impacts and potential impacts of flooding and to determine how communities, residents, and businesses respond to flooding. The data are used for estimating damage for factors such as depth of flooding, construction types, and different occupancies of use, which influences project formulation and budgeting. Damage estimation models are then calculated and used to estimate the cost of flooding and to evaluate the benefits of alternative flood mitigation plans, which are critical to determining the feasibility of flood risk management projects. Results of surveys will help communities to better determine and communicate their flood risks. The models are also used for programmatic evaluation of the Army Corps of Engineers' National Flood Risk Management Program.

Affected Public: Business or other for-profit; individuals or households; not-for-profit institutions; State, local, or Tribal government.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Mr. Matthew Oreska.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Fast Track Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery—the Interactive Customer Evaluation System; OMB Control Number: 0704–0420.

Type of Request: Revision.

Number of Respondents: 500,000.

Responses per Respondent: 1.

Annual Responses: 500,000.

Average Burden per Response: 3 minutes.

Annual Burden Hours: 25,000.

Needs and Uses: The proposed information collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences, and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative, and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The solicitation of feedback will target areas such as: Timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable. The Agency will only submit a collection for approval under this generic clearance if it meets the following conditions:

• The collections are voluntary.

• The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government.

• The collections are non-controversial and do not raise issues of concern to other Federal agencies.

• Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future.

• Personally identifiable information is collected only to the extent necessary and is not retained.

• Information gathered will be used only internally for general service improvement and program management purposes and is not intended for release outside of the agency.

• Information gathered will not be used for the purpose of substantially informing influential policy decisions; and

• Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study.

Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

Affected Public: Individuals and households.

Frequency: As needed.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Ms. Jasmeet Seehra.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, Docket ID number, and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

DOD Clearance Officer: Mr. Reginald Lucas.

Requests for copies of the information collection proposal should be sent to Mr. Lucas at *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

Dated: April 16, 2024.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Renewal of Department of Defense Federal Advisory Committees—Defense Advisory Committee on Military Personnel Testing

AGENCY: Department of Defense (DoD).

ACTION: Renewal of Federal advisory committee.

SUMMARY: The DoD is publishing this notice to announce that it is renewing the Defense Advisory Committee on Military Personnel Testing (DAC–MPT).

FOR FURTHER INFORMATION CONTACT: Jim Freeman, DoD Advisory Committee Management Officer, 703–692–5952.

SUPPLEMENTARY INFORMATION: The DAC–MPT is being renewed in accordance with chapter 10 of title 5 United States Code (U.S.C.) commonly known as the Federal Advisory Committee Act (FACA) (5 U.S.C., App.)) and 41 CFR 102–3.50(d). The charter and contact information for the DAC–MPT's Designated Federal Officer (DFO) are found at *https://www.facadatabase.gov/FACA/apex/FACAPublicAgencyNavigation.*

The DAC–MPT provides the Secretary of Defense and Deputy Secretary of Defense independent advice and recommendations on matters and policies related to the military personnel testing for selection and classification. The DAC–MPT provided advice on issues related to the research, development, implementation, and maintenance of enlisted and officer accession tests and career exploration programs. Technical issues addressed include, but are not limited to, processes and policies related to administration and security of testing and theoretical development of constructs, measurement precision, validity, reliability, equating, efficiency, fairness, and other operational and policy considerations.

The DAC–MPT shall consist of no more than seven members, appointed in accordance with DoD policy and procedures and who are eminent authorities in the fields of educational and psychological testing and career development. Members must have expertise in the following, or similar areas, psychometrics, test development, statistical measurement, big-data analytics, industrial/organization psychology, selection and classification, educational measurement, career development and counseling, and diversity and inclusion.

The appointment of DAC–MPT members shall be approved by the Secretary of Defense or the Deputy Secretary of Defense (''the DoD Appointing Authority''), for a term of service of one-to-four years, with annual renewals, in accordance with DoD policy and procedures. No member, unless approved by the DoD Appointing Authority, may serve more than two consecutive terms of service on the DAC–MPT, to include its subcommittees, or serve on more than two DoD Federal advisory committees at one time.

DAC–MPT members who are not full-time or permanent part-time Federal civilian officers or employees, or active duty members of the Uniformed Services, shall be appointed as experts or consultants pursuant to 5 U.S.C. 3109 to serve as special government employee members. DAC–MPT members who are full-time or permanent part-time Federal civilian officers or employees, or active duty members of the Uniformed Services, shall be appointed pursuant to 41 CFR 102–3.130(a) to serve as regular government employee members.

The DoD Appointing Authorities shall appoint the DAC–MPT's leadership from among the membership previously approved to serve on the DAC–MPT in accordance with DoD policy and procedures, for a term of service of one-to-two years, with annual renewal, which shall not exceed the member's approved DAC–MPT appointment.

All DAC–MPT members are appointed to exercise their own best judgment on behalf of the DoD, without representing any particular points of view, and to discuss and deliberate in a manner that is free from conflicts of interest. With the exception of reimbursement of official DAC–MPT-related travel and per diem, DAC–MPT members serve without compensation.

The public or interested organizations may submit written statements to the DAC–MPT membership about the DAC–MPT's mission and functions. Written statements may be submitted at any time or in response to the stated agenda of planned meeting of the DAC–MPT. All written statements shall be submitted to the DFO for the DAC–MPT, and this individual will ensure that the written statements are provided to the membership for their consideration.

Dated: April 23, 2024.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2024–09245 Filed 4–29–24; 8:45 am]

BILLING CODE 6001–FR–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Renewal of Department of Defense Federal Advisory Committees—Defense Advisory Committee on Women in the Services

AGENCY: Department of Defense (DoD).

ACTION: Federal advisory committee renewal.

SUMMARY: The DoD is publishing this notice to announce that it is renewing the charter of the Defense Advisory Committee on Women in the Services (DACOWITS).

FOR FURTHER INFORMATION CONTACT: Jim Freeman, Advisory Committee Management Officer for the Department of Defense, 703–692–5952.

SUPPLEMENTARY INFORMATION: The DACOWITS charter is being renewed in accordance with chapter 10 of title 5, United States Code (U.S.C.) (commonly known as the ''Federal Advisory Committee Act'' or ''FACA''). The charter and contact information for the DACOWITS' Designated Federal Officer (DFO) are found at *https://www.facadatabase.gov/FACA/apex/FACAPublicAgencyNavigation.*

The DACOWITS provides independent advice and recommendations on matters and policies relating to recruitment, retention, employment, integration, well-being, and treatment of servicewomen in the Armed Forces of the United States. All DACOWITS work, including subcommittee work, is in response to written terms of reference or taskings approved by the Secretary of Defense or the Deputy Secretary of Defense (''the DoD Appointing Authority''), or the Under Secretary of Defense for Personnel and Readiness unless otherwise provided by statute or Presidential directive.

The DACOWITS is composed of no more than 20 members who have prior experience in the military or with women-related workforce issues. Members will include leaders with diverse and inclusive backgrounds, experience, and thought relating to the recruitment and retention, the employment and integration, and the well-being and treatment of women. These members will come from varied backgrounds including academia, industry, private and public sector, and other professions.

The appointment of DACOWITS members is approved by the DoD Appointing Authority for a term of service of one-to-four years, with annual renewals, in accordance with DoD policy and procedures. No member, unless approved by the DoD Appointing Authority, may serve more than two consecutive terms of service on the DACOWITS, to include its subcommittees, or serve on more than two DoD Federal Advisory Committees at one time. DACOWITS members who are not full-time or permanent part-time Federal civilian officers or employees, or active-duty members of the Uniformed Services, are appointed as experts or consultants pursuant to 5 U.S.C. 3109 to serve as special government employee members. DACOWITS members who are full-time or permanent part-time Federal civilian officers or employees, or active-duty members of the Uniformed Services, are appointed pursuant to 41 CFR 102–3.130(a) to serve as regular government employee members. The DoD Appointing Authority appoints the DACOWITS' leadership from among the membership previously appointed in accordance with DoD policy and procedures, for a term of service of one-to-two years, with annual renewal, not to exceed the member's approved appointment.

All members of the DACOWITS are appointed to exercise their own best judgment, without representing any particular point of view, and to discuss and deliberate and in a manner that is free from conflict of interest. With the exception of reimbursement of official DACOWITS-related travel and per diem, DACOWITS members serve without compensation.

The public or interested organizations may submit written statements to the DACOWITS membership about the DACOWITS' mission and functions. Written statements may be submitted at any time or in response to the stated agenda of planned meeting of the DACOWITS.

All written statements shall be submitted to the DFO for the DACOWITS, and this individual will ensure that the written statements are provided to the membership for their consideration.

Dated: April 24, 2024.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6001–FR–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2023–SCC–0063]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Early Childhood Longitudinal Study, Kindergarten Class of 2023–24 (ECLS–K:2024) April 2024 Materials Revision Request

AGENCY: Institute of Education Sciences (IES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before May 30, 2024.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Carrie Clarady, 202–245–6347.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the

following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Early Childhood Longitudinal Study, Kindergarten Class of 2023–24 (ECLS–K:2024) April 2024 Materials Revision Request.

OMB Control Number: 1850–0750.

Type of Review: A revision of a currently approved ICR.

Respondents/Affected Public: Individuals and Households.

Total Estimated Number of Annual Responses: 157,586.

Total Estimated Number of Annual Burden Hours: 84,093.

Abstract: The Early Childhood Longitudinal Study (ECLS) program, conducted by the National Center for Education Statistics (NCES) within the Institute of Education Sciences (IES) of the U.S. Department of Education (ED), draws together information from multiple sources to provide rich, descriptive data on child development, early learning, and school progress. The ECLS program studies deliver national data on children's status at birth and at various points thereafter; children's transitions to nonparental care, early care and education programs, and school; and children's experiences and growth through the elementary grades. The Early Childhood Longitudinal Study, Kindergarten Class of 2023–24 (ECLS–K:2024) is the fourth cohort in the series of early childhood longitudinal studies. The study will advance research in child development and early learning by providing a detailed and comprehensive source of current information on children's early learning and development, transitions into kindergarten and beyond, and progress through school. The ECLS–K:2024 will provide data about the population of children who will be kindergartners in the 2023–24 school year. The ECLS–K:2024 will focus on children's early school experiences continuing through the fifth grade, and will include collection of data from children, parents, teachers, and school administrators.

The request to conduct the first three national data collection rounds for the ECLS–K:2024 was approved in April 2023 (OMB# 1850–0750 v.26). Revisions to procedures and materials for the first two rounds of data collection were approved in subsequent revisions (OMB# 1850–0750 v.27–29). The ECLS–K:2024 fall kindergarten data collection was conducted August 2023 to January 2024. It will be followed by the spring (March–July 2024) kindergarten round, and the spring (March–July 2025) first-grade round. Each of these rounds of data collection will involve advance school contacts, for example to conduct student sampling activities, collect teacher and school information, and locate families whose children may have moved schools. Future OMB packages are planned for the third-and fifth-grade field test (to be conducted in March–July 2026), as well as for all future currently-planned rounds.

This current revision request (accompanied by 30 days of public comment) is to update study respondent materials, web surveys, and website designs that will be used in the spring 2025 first-grade data collection activities. Many of the revisions in this package were made based on analyses of the fall 2022 field test data (OMB# 1850–0750 v.25), as well as additional discussions with design experts. Other changes occurred after further discussion on operational procedures. An additional revision request will be submitted to OMB in August 2024 for revisions to the spring first-grade materials as the surveys and study website move into programming. Additionally, this August 2024 revision request will address the new federal statistical standard for race/ethnicity items (Statistical Policy Directive No. 15: Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity (SPD 15)). NCES is at work on its action plan for compliance with the new SPD15 standards, and early discussions suggest that implementation of these standards will be particularly complex and delicate in data collections where race and ethnicity data is reported both by individuals about themselves and also provided by third parties. Compliance for ECLS involves revising multiple race/ethnicity items *e.g.,* adult self-reports, adult reports of others, school reports of the school composition, teacher reports of the classroom composition, field staff collection of school reports of sampled children.

The requested changes in this revision request do not affect the approved total cost to the federal government for conducting this study but do result in a small increase in respondent burden.

Dated: April 25, 2024.

Juliana Pearson,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2024–SCC–0035]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Annual Report on Appeals Process (RSA–722)

AGENCY: Office of Special Education and Rehabilitative Services (OSERS), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing an extension without change of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before May 30, 2024.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Caneshia McAlister, 202–987–1927.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner;

(3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Annual Report on Appeals Process (RSA–722).

OMB Control Number: 1820–0563.

Type of Review: An extension without change of a currently approved ICR.

Respondents/Affected Public: State, local, and Tribal governments.

Total Estimated Number of Annual Responses: 78.

Total Estimated Number of Annual Burden Hours: 156.

Abstract: Pursuant to Subsection 102(c)(8)(A) and (B) of the Rehabilitation Act of 1973, as amended by title IV of the Workforce Innovation and Opportunity Act, the RSA–722 is needed to meet specific data collection requirements on the number of requests for mediations, hearings, administrative reviews, and other methods of dispute resolution requested and the manner in which they were resolved. The information collected is used to evaluate the types of complaints made by applicants and eligible individuals of the vocational rehabilitation program and the final resolution of appeals filed. Respondents are State agencies that administer the Federal/State Program for Vocational Rehabilitation.

Dated: April 24, 2024.

Juliana Pearson,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Extension of the Application Deadline Dates; Applications for New Awards; School-Based Mental Health Services Grant Program and Mental Health Service Professional Demonstration Grant Program

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

SUMMARY: On March 1, 2024, we published in the **Federal Register** a notice inviting applications (NIA) for the fiscal year (FY) 2024 School-Based Mental Health Services (SBMH) Grant Program competition, Assistance Listing Number (ALN) 84.184H, and the Mental Health Service Professional (MHSP) Demonstration Grant Program competition, ALN 84.184X. The NIA established a deadline date for the transmittal of applications of April 30, 2024 for the SBMH program and May 15, 2024 for the MHSP program. This notice extends the deadline date for transmittal of applications for all eligible applicants for both programs until May 31, 2024 and extends the date of intergovernmental review until July 30, 2024.

DATES:

Deadline for Transmittal of Applications: May 31, 2024.

Deadline for Intergovernmental Review: July 30, 2024.

FOR FURTHER INFORMATION CONTACT: For the SBMH program, contact Amy Banks, U.S. Department of Education, 400 Maryland Avenue SW, 4th Floor, Washington, DC 20202–6450. Telephone: (202) 453–6704. Email: *OESE.School.Mental.Health@ed.gov.*

For the MHSP program, contact Nicole White, U.S. Department of Education, 400 Maryland Avenue SW, 4th Floor, Washington, DC 20202–6450. Telephone: (202) 453–6729. Email: *Mental.Health@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION: On March 1, 2024, we published the NIAs for the FY 2024 SBMH and MHSP competitions in the **Federal Register** (89 FR 15173 and 89 FR 15180, respectively). The NIAs established a deadline of April 30, 2024, for eligible applicants to submit applications for the SBMH competition and a deadline of May 15, 2024, for eligible applicants to submit applications for the MHSP competition. We are extending the deadline for transmittal of applications for all eligible applicants under both competitions until May 31, 2024. We are extending the deadline in order to allow all applicants more time to prepare and submit their applications. Applicants that have already submitted applications under these competitions may resubmit applications, but are not required to do so. If a new application is not submitted, the Department will use the application that was submitted by the original deadline. If a new application is submitted, the Department will consider the application that is last submitted and timely received.

Note: All information in the NIAs, including eligibility criteria, remains the same, except for the deadlines for the transmittal of applications and the deadlines for intergovernmental review.

Information about SBMH and MHSP is available on the Department's website at *https://oese.ed.gov/offices/office-of-formula-grants/safe-supportive-schools/school-based-mental-health-services-grant-program/* and *https://oese.ed.gov/offices/office-of-formula-grants/safe-supportive-schools/mental-health-service-professional-demonstration-grant-program/.*

Program Authority: 20 U.S.C. 7281.

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, Braille, large print, audiotape, or compact disc or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Authorization of Subgrants for the Congressionally Funded Community Projects for Fiscal Year 2024

AGENCY: Office of Elementary and Secondary Education and Office of

Postsecondary Education, Department of Education.

ACTION: Notice.

SUMMARY: Pursuant to the Education Department General Administrative Regulations, the Department of Education (Department) authorizes grantees receiving awards under the Congressionally Funded Community Projects (CFCP) (Assistance Listing Numbers 84.116Z, 84.215K) to make subgrants, subject to the limitations described in this notice.

DATES: This authorization is effective April 30, 2024.

FOR FURTHER INFORMATION CONTACT: For K–12 Earmarks: Erin Shackel, U.S. Department of Education, 400 Maryland Avenue SW, 4th Floor, Washington, DC 20202. Telephone: (202) 453–6423. Email: *k12earmarks@ed.gov.*

For Higher Education Earmarks: Candace Lee, U.S. Department of Education, 400 Maryland Avenue SW, 5th Floor, Washington, DC 20202. Telephone: (202) 453–5787. Email: *CongressionallyDirectedGrants-OPE@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION: *Purpose of Program:* Title III of Division D of the Further Consolidated Appropriations Act, 2024 authorizes funding for CFCP. The funds will support identified organizations throughout the country to conduct community project activities. The list of identified organizations may be found in Book II of the March 22, 2024 issue of the Congressional Record of the House of Representatives.

Subgrant Authorization: The Department's regulations in 34 CFR 75.708(a) prohibit subgranting, in the absence of statutory authority, unless authorized by a notice in the **Federal Register**. The Department has determined that to effectively conduct some of the Congressionally Funded Community Projects and meet the purposes of the program, subgrants may be appropriate and necessary. Accordingly, through this notice, we authorize the fiscal year 2024 CFCP grantees to make subgrants on the terms outlined in this notice.

Under 34 CFR 75.708(b), if the grantee uses this subgranting authority, the grantee has the authority to award subgrants only to eligible entities, and the subgrants must be used only to directly carry out project activities described in the grantee's approved application and be consistent with the purpose of the program, which is described in the Further Consolidated Appropriations Act, 2024. CFCP grantees may make subgrants to the following eligible entities: a local educational agency, an educational service agency, an institution of higher education, or a nonprofit organization as defined in 34 CFR 77.1.

Further, under 34 CFR 75.708(d), grantees must ensure that (1) subgrants are awarded on the basis of the approved budget that is consistent with the grantee's approved application and all applicable Federal statutory, regulatory, and other requirements; (2) every subgrant includes all conditions required by Federal statutes and Executive orders and their implementing regulations; and (3) subgrantees are aware of the requirements of Federal statutes and regulations, including the Federal anti-discrimination laws listed in 34 CFR 75.500, enforced by the Department. Additionally, as is true with any expenditures incurred under the Department's grant programs, CFCP expenditures must satisfy the Federal cost principles in 2 CFR part 200, subpart E. Therefore, any subgrant and subgrantee expenditures must comply with the Federal cost principles, and grantees, as pass-through entities, must comply with the procedures for making subawards described in 2 CFR 200.332.

Note: This notice does not solicit applications.

Program Authority: Title III of Division D of the Further Consolidated Appropriations Act, 2024 (Pub. L. 118–47).

Accessible Format: On request to one of the program contact persons listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF). BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Carbon Dioxide Capture, Utilization, and Sequestration Federal Lands Permitting Task Force Carbon Dioxide Capture, Utilization, and Sequestration Non-Federal Lands Permitting Task Force

AGENCY: Office of Fossil Energy and Carbon Management, Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces a joint meeting of the Carbon Dioxide Capture, Utilization, and Sequestration Federal Lands Permitting Task Force and the Carbon Dioxide Capture, Utilization, and Sequestration Non-Federal Lands Permitting Task Force (CCUS Permitting Task Forces). The Federal Advisory Committee Act (FACA) requires that public notice of these meetings be announced in the **Federal Register**.

DATES: Tuesday, May 21, 2024: 9 a.m.–4:30 p.m. ET; Wednesday, May 22, 2024: 9 a.m.–12 p.m. ET.

ADDRESSES: This joint meeting of the CCUS Permitting Task Forces will be held in person at the U.S. Geologic Survey National Center, 12201 Sunrise Valley Drive, Reston, Virginia 20192, with the option of virtual attendance. Members of the public are encouraged to participate virtually, as physical space to attend onsite is limited to members. The website for the CCUS Permitting Task Forces will be updated with announcements about the meeting, including instructions for registering to attend virtually: *https://www.energy.gov/fecm/use-it-act-carbon-dioxide-capture-utilization-and-sequestration-ccus-permitting-task-forces.*

FOR FURTHER INFORMATION CONTACT: Christina Waldron, Designated Federal Officer, Fossil Energy and Carbon

Management, U.S. Department of Energy, Washington, DC 20585; Telephone: (771) 217–0877 or Email: *doe.ccus.permitting.task.force@hq.doe.gov.*

SUPPLEMENTARY INFORMATION:

In April 2024, Department of Energy (DOE) and the Council on Environmental Quality (CEQ) chartered and appointed members for the two new CCUS Permitting Task Forces as required by the USE IT Act and in accordance with FACA. The purpose of each Task Force is the same, but the scope is to differ by geographical area—one Task Force will focus on Federal lands and the Outer Continental Shelf, and the other will focus on non-Federal lands.

Purpose of the Committee: The purpose of the Task Forces is to identify permitting and other challenges and successes that permitting authorities and project developers and operators face in permitting projects in an efficient, orderly, and responsible manner; and improve the performance of the permitting process and regional coordination for the purpose of promoting the efficient, orderly, and responsible development of carbon capture, utilization, and sequestration projects and carbon dioxide pipelines.

To accomplish these objectives, the USE IT Act requires each Task Force to undertake the following activities with respect to its geographic scope: (1) inventory existing or potential Federal and State approaches to facilitate reviews associated with the deployment of carbon capture, utilization, and sequestration projects and carbon dioxide pipelines, including best practices that avoid duplicative reviews to the extent permitted by law, engage stakeholders early in the permitting process, and make the permitting process efficient, orderly, and responsible; (2) develop common models for State-level carbon dioxide pipeline regulation and oversight guidelines that can be shared with States in the geographical area covered by the Task Force; (3) provide technical assistance to States in the geographical area covered by the Task Force in implementing regulatory requirements and any models developed under (b) above; (4) inventory current or emerging activities that transform captured carbon dioxide into a product of commercial value, or as an input to products of commercial value; (5) identify any priority carbon dioxide pipelines needed to enable efficient, orderly, and responsible development of carbon capture, utilization, and sequestration projects at increased scale; (6) identify gaps in the current Federal and State regulatory framework and in existing data for the deployment of carbon capture, utilization, and sequestration projects and carbon dioxide pipelines; (7) identify Federal and State financing mechanisms available to project developers; and (8) develop recommendations for relevant Federal agencies on how to develop and research technologies that can capture carbon dioxide and would be able to be deployed within the region covered by the Task Force, including any projects that have received technical or financial assistance for research under paragraph (6) of section 103(g) of the Clean Air Act (42 U.S.C. 7403(g)).

In carrying out these activities to support the efficient, effective, and responsible permitting of CCUS projects, the Task Forces shall also consider and develop recommendations to address community concerns regarding the climate benefits and environmental justice implications, including public health and safety, of CCUS. In the development of these recommendations, the Task Forces shall consider and identify recommended mechanisms to ensure just treatment and meaningful involvement of impacted communities.

Tentative Agenda

- Opening remarks
- Ethics briefing
- Presentations relevant to the USE IT Act duties
- Public comment period

To view the final agenda when available, or for additional information about the Task Forces and the meeting, see the CCUS Permitting Task Forces website at: *https://www.energy.gov/fecm/use-it-act-carbon-dioxide-capture-utilization-and-sequestration-ccus-permitting-task-forces.*

Public Participation: The two-day meeting is open to the public via webcast using Zoom. The website will be updated with instructions and links to register for the meeting. All attendees are required to register in advance. If you would like to file a written statement with either Task Force, you may do so either before or after the meeting. If you would like to make oral statements regarding any of the items on the agenda, please send an email request to Christina Waldron at *doe.ccus.permitting.task.force@hq.doe.gov.* You must make your request for an oral statement by Tuesday, May 14, 2024 at 11:59 a.m. ET. Reasonable provision will be made to include the scheduled oral statements on the agenda. Time allotted per speaker will depend on the number who wish to speak but is not expected to exceed three minutes. The Chairpersons of the Task Forces will conduct the meeting to facilitate the orderly conduct of business.

Minutes: The minutes of this meeting will be available for public review within 45 days at the website of the CCUS Permitting Task Forces at: *https://www.energy.gov/fecm/use-it-act-carbon-dioxide-capture-utilization-and-sequestration-ccus-permitting-task-forces.* They can also be obtained by contacting Ms. Christina Waldron using the contact information above.

Signing Authority: This document of the Department of Energy was signed on April 24, 2024, by Alyssa Petit, Alternate Deputy Committee Management Officer, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on April 25, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2445–028]

Green Mountain Power Corporation of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a subsequent license to continue to operate and maintain the Center Rutland Hydroelectric Project No. 2445 (project). The project is located on Otter Creek in Rutland County, Vermont. Commission staff has prepared an Environmental Assessment (EA) for the project.

The EA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the internet through the Commission's Home Page (*http://www.ferc.gov/*), using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* or toll-free at (866) 208–3676, or for TTY, (202) 502–8659.

You may also register online at *https://ferconline.ferc.gov/FERCOnline.aspx* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov*.

Any comments should be filed within 45 days from the date of this notice.

The Commission strongly encourages electronic filing. Please file comments using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support. In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket number P–2445–028.

If you have process questions, contact Steve Kartalia at (202) 502–6131 or by email at *stephen.kartalia@ferc.gov.*

Dated: April 24, 2024.

[Docket No. RM98–1–000]

Records Governing Off-the-Record Communications; Public Notice

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding,

to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the eLibrary link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP23–87–001]

WBI Energy Transmission, Inc.; Notice of Request for Extension of Time

Take notice that on April 11, 2024, WBI Energy Transmission, Inc. (WBI Energy) requested that the Federal Energy Regulatory Commission (Commission) grant an extension of time, until October 1, 2024, to construct and place into service its Line Section 15 Expansion Project (Project) located in Butte, Lawrence, Meade, and Pennington Counties, South Dakota. On March 14, 2023, the Commission issued a Notice of Request Under Blanket Authorization, which established a 60-day comment period, ending on May 15, 2023, to file protests. No protests were filed during the comment period, and accordingly the project was authorized on May 15, 2023 and by Rule should have been completed within one year.

In its 2023 Extension of Time Request, WBI Energy states that it will not be able to complete all the work associated with the Project by the May 15, 2024, deadline. As of November 12, 2023, the commissioning of all Project facilities was complete except for remaining work on the 500-foot Yellow Mainline Extension from the existing Krebs Station to the new Krebs Station.[1] At that time, Montana-Dakota Utilities Co. (Montana-Dakota), a Project shipper, had yet to complete its required work downstream of the new Krebs Station and WBI Energy utilized a minor temporary pipeline reconfiguration to allow natural gas to continue to flow to the existing Krebs Station as reported in the weekly construction reports. Currently, Montana-Dakota is scheduled to complete its required work downstream of the new Krebs Station by the end of August 2024. After Montana-Dakota completes its work, WBI Energy can finish the remaining work on the Yellow Mainline Extension and complete necessary tie-ins to deliver gas to Montana-Dakota through the new Krebs Station. Accordingly, WBI Energy requests an extension of time until October 1, 2024, to complete construction of project facilities and

[1] WBI Energy is reporting in its weekly construction reports that the extensions of the Red and Yellow Mainlines at the Krebs Station are 98 percent complete with the remaining 2 percent of work associated with the Yellow Mainline Extension.

begin providing service to Montana-Dakota through the new Krebs Station.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on WBI Energy's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (NGA) (18 CFR 157.10).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for NGA facilities when such requests are contested before order issuance. For those extension requests that are contested,[2] the Commission will aim to issue an order acting on the request within 45 days.[3] The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.[4] The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act (NEPA).[5] At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.[6] The Director of the Office of Energy Projects, or his or her designee, will act on all of those extension requests that are uncontested.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

The Commission strongly encourages electronic filings of comments in lieu of paper using the ''eFile'' link at *http://www.ferc.gov.* In lieu of electronic filing, you may submit a paper copy which must reference the Project docket number.

To file via USPS: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

[Project No. 1061–103]

Pacific Gas and Electric Company; Notice of Availability of Final Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a new license to continue to operate and maintain the Phoenix Hydroelectric Project. The project is located on the South Fork Stanislaus River in Tuolumne County, California. Commission staff has prepared a final Environmental Assessment (EA) for the project. The project would occupy 26.99 acres of federal land administered by the U.S. Forest Service and 0.59 acre of federal land administered by the Bureau of Land Management.

The final EA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the final EA via the internet through the Commission's Home Page (*http://www.ferc.gov/*), using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. Federal Energy Regulatory Commission

[Project No. 13272–007]

Alaska Village Electric Cooperative, Inc., Alutiiq Tribe of Old Harbor; Notice of Application of Transfer of License and Soliciting Comments, Motions To Intervene, and Protests

On February 22, 2024, Alaska Village Electric Cooperative, Inc., (transferor) filed an application for a transfer of license of the 262-kilowatt Old Harbor Hydroelectric Project No. 13272. The project is located on Mountain Creek in Kodiak Island Borough, Alaska. The project occupies federal land within the Kodiak National Wildlife Refuge administered by the U.S. Fish and Wildlife Service.

Pursuant to 16 U.S.C. 801, the applicant seeks Commission approval to transfer the license for the project from Alaska Village Electric Cooperative, Inc. to Alutiiq Tribe of Old Harbor (transferee). The transferee will be required by the Commission to comply with all the requirements of the license as though it were the original licensee.

Applicants Contact: William R. Stamm, Alaska Village Electric Cooperative, Inc, 4831 Eagle Street, Anchorage, AK 99503, *bstamm@avec.org.*

Jeff Peterson, Alutiiq Tribe of Old Harbor, P.O. Box 62, Old Harbor, AK 99643.

FERC Contact: Steven Sachs, Phone: (202) 502–8666, Email: *Steven.Sachs@ferc.gov.*

Deadline for filing comments, motions to intervene, and protests: 30 days from the date that the Commission issues this notice. The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY).

In lieu of electronic filing, you may submit a paper copy. Submissions sent via U.S. Postal Service must be addressed to, Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to, Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket number P–13272–007. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502–6595 or *OPP@ferc.gov.*

Dated: April 23, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RD24–2–000]

Commission Information Collection Activities (FERC–725E); Comment Request; Revision and Extension

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice for revision and extension of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the revision and extension to the information collection, FERC–725E (Mandatory Reliability Standards for the Western Electric Coordinating Council), which will be submitted to the Office of Management and Budget (OMB) for review. No Comments were received on the 60-day notice that was published on February 6, 2024.

DATES: Comments on the collection of information are due May 30, 2024.

ADDRESSES: Send written comments on FERC 725E to OMB through *www.reginfo.gov/public/do/PRAMain.* Attention: Federal Energy Regulatory Commission Desk Officer. Please identify the OMB Control Number (1902–0246) in the subject line of your comments. Comments should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.*

Please submit copies of your comments to the Commission. You may submit copies of your comments (identified by Docket No. RD24–2–000) by one of the following methods: Electronic filing through *https://www.ferc.gov,* is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.
- For those unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery.

○ *Mail via U.S. Postal Service Only:* Addressed to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

○ *Hand (including courier) delivery:* Deliver to: Federal Energy Regulatory Commission, Secretary of the Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Instructions: OMB submissions must be formatted and filed in accordance with submission guidelines at *www.reginfo.gov/public/do/PRAMain.* Using the search function under the ''Currently Under Review'' field, select Federal Energy Regulatory Commission; click ''submit,'' and select ''comment'' to the right of the subject collection.

FERC submissions must be formatted and filed in accordance with submission guidelines at *https://www.ferc.gov/ferc-online/overview.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *https://www.ferc.gov/ferc-online/overview.*

FOR FURTHER INFORMATION CONTACT: Jean Sonneman may be reached by email at *DataClearance@FERC.gov,* telephone at (202) 502–6362.

SUPPLEMENTARY INFORMATION:

Title: FERC–725E, Mandatory Reliability Standards for the Western Electric Coordinating Council (WECC).

OMB Control No.: 1902–0246.

Type of Request: Revision and extension to the FERC–725E information collection requirements.

Abstract: FERC–725E is the information collection that is required to implement the statutory provisions of section 215 of the Federal Power Act (FPA) (16 U.S.C. 824o). Section 215 of the FPA buttresses the Commission's efforts to strengthen the reliability of the interstate grid through the grant of new authority by providing for a system of mandatory Reliability Standards developed by the Electric Reliability Organization (ERO). Reliability Standards that the ERO proposes to the Commission may include Reliability Standards that are proposed to the ERO by a Regional Entity.[1] A Regional Entity is an entity that has been approved by the Commission to enforce Reliability Standards under delegated authority from the ERO.[2] On June 8, 2008, the Commission approved eight regional Reliability Standards submitted by the ERO that were proposed by WECC.[3]

WECC promotes bulk electric system reliability in the Western Interconnection. WECC is the Regional Entity responsible for compliance monitoring and enforcement. In addition, WECC provides an environment for the development of Reliability Standards and the coordination of the operating and planning activities of its members as set forth in the WECC Bylaws.

There are several regional Reliability Standards in the WECC region. These regional Reliability Standards generally require entities to document compliance with substantive requirements, retain documentation, and submit reports to WECC. In RD24–2–000, standard VAR–501–WECC–3.1 is being updated for syntax and the proposed changes have been deemed non-substantive. The currently approved VAR–501–WECC–3.1 is being replaced by VAR–501–WECC–4. The changes include updates to document numbering, the removal and replacement of obsolete language, and removal of redundant language.

For the purposes of the extension, the following standards will remain unchanged:

- BAL–002–WECC–3 (Contingency Reserve)[4] requires balancing authorities and reserve sharing groups to document compliance with the contingency reserve requirements described in the standard.
- BAL–004–WECC–3 (Automatic Time Error Correction)[5] requires balancing authorities to document that time error corrections and primary inadvertent interchange payback were conducted according to the requirements in the standard.
- FAC–501–WECC–2 (Transmission Maintenance)[6] requires transmission owners with certain transmission paths to have a transmission maintenance and inspection plan and to document maintenance and inspection activities according to the plan.
- IRO–006–WECC–3 (Qualified Transfer Path Unscheduled Flow (USF) Relief)[7] requires balancing authorities and reliability coordinators to document actions taken to mitigate unscheduled flow.
- VAR–501–WECC–4 (Power System Stabilizers (PSS)) requires the Western Interconnection is operated in a coordinated manner under normal and abnormal conditions by establishing the performance criteria for WECC power system stabilizers.

Type of Respondents: Balancing authorities, reserve sharing groups, transmission owners, reliability coordinators, transmission operators, generator operators and generator owners.

Estimate of Annual Burden:[8] We provide the tables below with burden estimates which show the current burden estimates which include the ongoing burden associated with reporting and recordkeeping requirements, which are not changing in RD24–2–000. Further, the change in RD24–2–000 is considered non-substantive, therefore, the Commission is estimating that there is no change in the burden estimates from the currently approved estimates.

In Table 1, the Commission highlights the burden estimates for the VAR–501–WECC–4 (updated in Docket No. RD24–2–000). In Table 2, the Commission estimates the total estimated burden for the entirety of the FERC 725E collection.

TABLE 1—BURDEN ESTIMATES FOR VAR–501–WECC–4, AS UPDATED IN DOCKET NO. RD24–2–000, FERC–725E, MANDATORY RELIABILITY STANDARDS FOR THE WESTERN ELECTRIC COORDINATING COUNCIL, CHANGES IN DOCKET NO. RD24–2–000

Entity	Number of respondents[9]	Annual number of responses per respondent	Annual number of responses	Average burden hrs. & cost[10] per response ($)	Total annual burden hours & total annual cost ($)	Cost per respondent ($)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1) = (6)
Standard VAR–501–WECC–4						
Reporting Requirements						
Generator Owners and/or Operators annual ...	311	2	622	1 hr.; $91.81	622 hrs.; $57,105.82	$183.62

[1] 16 U.S.C. 824o(e)(4).

[2] 16 U.S.C. 824o(a)(7) and (e)(4).

[3] *N. Am. Electric Reliability Corp.,* 119 FERC ¶ 61,260 (2007).

[4] BAL–002–WECC–2 is included in the OMB-approved inventory for FERC–725E. On November 9, 2016, NERC and WECC submitted a joint petition for approval of an interpretation of BAL–002–WECC–2, to be designated BAL–002–WECC–2a. BAL–002–WECC–2a was approved by order in Docket No. RD17–3–000 on January 24, 2017. The Order determined: ''The proposed interpretation provides clarification regarding the types of resources that may be used to satisfy Contingency Reserve requirements in regional Reliability Standard BAL–002–WECC–2.'' BAL–002–WECC–2a did not trigger the Paperwork Reduction Act and did not affect the burden estimate. BAL–002–WECC–2a is being included in this Notice and the Commission's submittal to OMB as part of the FERC–725E. BAL–002–WECC–3 became effective June 28, 2021, under docket RM19–20–000 in Order No. 876, replacing BAL–002–WECC–2a.

[5] BAL–004–WECC–3 was approved under docket RD18–2–000 on May 30, 2018.

[6] FAC–501–WECC–2 was approved under docket RD18–5–000 on May 30, 2018.

[7] On December 20, 2013, NERC and WECC submitted a joint petition for approval of IRO–006–WECC–2 and retirement of IRO–006–WECC–1. IRO–006–WECC–2 was approved by order in Docket No. RD14–9–000 on May 13, 2014. IRO–006–WECC–3 was approved by order in Docket No. RD19–4–000 on May 10, 2019. Because the reporting burden for IRO–006–WECC–3 did not increase for entities that operate within the Western Interconnection, FERC submitted the order to OMB for information only. The burden related to IRO–006–WECC–3 does not differ from the burden of IRO–006–WECC–2, which is included in the OMB-approved inventory. IRO–006–WECC–3 is being included in this Notice and the Commission's submittal to OMB as part of FERC–725E.

[8] Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 Code of Federal Regulations 1320.3.

TABLE 1—BURDEN ESTIMATES FOR VAR–501–WECC–4, AS UPDATED IN DOCKET NO. RD24–2–000, FERC–725E, MANDATORY RELIABILITY STANDARDS FOR THE WESTERN ELECTRIC COORDINATING COUNCIL, CHANGES IN DOCKET NO. RD24–2–000—Continued

Entity	Number of respondents [9]	Annual number of responses per respondent	Annual number of responses	Average burden hrs. & cost [10] per response ($)	Total annual burden hours & total annual cost ($)	Cost per respondent ($)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1) = (6)
Recordkeeping Requirements						
Generator Owners and/or Operators annual ...	311	2	622	0.5 hrs.; $28.07	311 hrs.; $17,459.54	56.14
Burden Annual for VAR–501–WECC–4	.....	.....	.....	.....	933 hrs.; $74,565.36	.....

Net Burden for FERC–725E, for Submittal to OMB. The table below describes the new and continuing information collection requirements and the associated burden for FERC–725E. (The burden in Table 2 refers to burden associated with VAR–501–WECC–4, BAL–002–WECC–3, BAL–004–WECC–3, FAC–501–WECC–2, and IRO–006–WECC–3).

TABLE 2—NET BURDEN FOR FERC–725E, FERC–725E, MANDATORY RELIABILITY STANDARDS FOR THE WESTERN ELECTRIC COORDINATING COUNCIL

[Continuing Information Collection Requirements]

Entity	Number of respondents [11]	Annual number of responses per respondent	Annual number of responses	Average burden hrs. & cost per response ($)	Total annual burden hours & total annual cost ($)	Cost per respondent ($)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1) = (6)
Reporting Requirements						
Balancing Authorities	34	1	34	21 hrs., $1,928.01	714 hrs., $65,552.34	$1,928.01
Transmission Owners that operate qualified transfer paths	5	3	15	40 hrs., $3,672.40	600 hrs., $55,086.00	11,017.20
Reliability Coordinators	2	1	2	1 hr., $91.81	2 hr., $183.62	91.81
Reserve Sharing Group	2	1	2	1 hr., $91.81	2 hrs., $183.62	91.81

Total Annual Reporting Requirements for FERC–725E	.....	.....	1,940 hrs.; $178,111.40	.....		
Recordkeeping Requirements						
Balancing Authorities	34	1	34	2.1 hrs., $117.89	71.4 hrs., $4,008.40	117.89
Balancing Authorities (IRO–006)	34	1	34	1 hr., $56.14	34 hrs., $1,908.76	56.14
Reliability Coordinator	2	1	2	1 hr.; $56.14	2 hr.; $112.28	56.14
Generator Owners and/or Operators annual for VAR–501–WECC–4	311	2	622	0.5 hrs.; $28.07	311 hrs.; $17,459.54	56.14
Total Annual Recordkeeping for FERC–725E	.....	.....	.....	.....	418.4 hrs.; $23,488.98	.....
Total Annual Burden for FERC–725E	.....	.....	.....	.....	2,358.4 hrs.; $201,600.38	.....

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: April 24, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

[FR Doc. 2024–09283 Filed 4–29–24; 8:45 am]

BILLING CODE 6717–01–P

[9] The number of respondents is derived from the NERC Compliance Registry as of December 15, 2023.

[10] For VAR–501–WECC–4, the 2023 hourly cost (for salary plus benefits) uses the figures from the Bureau of Labor Statistics for three positions involved in the reporting and recordkeeping requirements. These figures include salary (*http://bls.gov/oes/current/naics2_22.htm*) and benefits (*http://www.bls.gov/news.release/ecec.nr0.htm*) and are:

1. Manager: $106.33/hour;
2. Engineer: $77.29/hour;
3. Information and Record Clerk: $56.14/hour.

The hourly cost for the reporting requirements ($91.81) is an average of the cost of a manager and engineer. The hourly cost for recordkeeping requirements uses the cost of an Information and Record Clerk ($56.14/hour).

[11] The number of respondents is derived from the NERC Compliance Registry as of December 15, 2023, and represent unique U.S. register entities in the WECC regional area.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RD23–5–000]

Commission Information Collection Activities (FERC–725G); Comment Request; Revision

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on proposed revisions of the currently approved information collection, FERC–725G, (Mandatory Reliability Standards for the Bulk-Power System), approval of PRC–023–6.

DATES: Comments on the collection of information are due July 1, 2024.

ADDRESSES: You may submit copies of your comments (identified by Docket No. RD23–5–000) by one of the following methods:

Electronic filing through *http://www.ferc.gov,* is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.
- For those unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery:
  - *Mail via U.S. Postal Service Only:* Addressed to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.
  - *Hand (including courier) delivery:* Deliver to: Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

SUPPLEMENTARY INFORMATION:

Title: FERC–725G (Mandatory Reliability Standards for the Bulk-Power System: Approval of PRC Reliability Standard PRC–023–6.

OMB Control No.: 1902–0252.

Type of Request: Approval of FERC–725G information collection requirements associated with proposed PRC Reliability Standard PRC–023–6.

Abstract: This Notice pertains to the FERC–725G information collection requirements associated Reliability Standard PRC–023–6 (Transmission Relay Load ability), the associated proposed implementation plan, and violation risk factors and violation severity levels. On March 2, 2023, the North American Electric Reliability Corporation (NERC) filed a petition seeking approval of proposed Reliability Standard PRC–023–6 (Transmission Relay Load ability), the associated proposed implementation plan, and violation risk factors and violation severity levels.[1] NERC also requested the Commission's approval of the retirement of the version of Reliability Standard PRC–023 that would be in effect (*i.e.,* currently effective Reliability Standard PRC–023–4 or the approved but not yet effective Reliability Standard PRC–023–5).[2]

NERC explains that the proposed Reliability Standard would advance Bulk-Power System reliability by removing certain redundant and unnecessary language from the Standard related to the setting of out-of-step blocking relays. To achieve this, NERC proposes to retire the Reliability Standard's Requirement R2 related to setting out-of-step blocking schemes to allow tripping of phase protective relays and remove the Attachment A, Item 2.3 exclusion for protection systems intended for protection during stable power swings.[3] NERC states that Requirement R2 is redundant because the fault condition addressed by Requirement R2 is addressed by Requirement R1 and requires the same compliance activity by the entity.[4] NERC explains, thus, that Requirement R2 is not needed for reliability. Further, NERC explains that the exclusion in Attachment A, Item 2.3 is no longer necessary due to system changes.[5]

On October 10, 2023, the Office of Electric Reliability issued a letter requesting that NERC provide additional information to explain how Requirement R2 of Reliability Standard PRC–023 is redundant to Requirement R1 and confirm whether the existing obligations in Requirement R2 would be enforced and audited under Requirement R1.[6] NERC filed its amended petition on November 3, 2023. In its amended petition, NERC confirms that because Requirement R2 is redundant to Requirement R1, any entity noncompliance with existing obligations of Requirement R2 would be assessed under Requirement R1.[7]

The petition was noticed on March 22, 2023, with interventions, comments, and protests due on or before April 21, 2023. No interventions, comments, or protests were filed.

Due to NERC's confirmation that any entity noncompliance with existing obligations under Requirement R2 (*i.e.,* the proper setting out out-of-step blocking relays) can be assessed under

[1] NERC Petition at 1.
[2] NERC Petition at 1–2.
[3] NERC Petition at 4.
[4] NERC Petition at 21.
[5] NERC Petition at 25–26.
[6] RFI at 2.
[7] NERC Amended Petition at 25.

Requirement R1 if R2 is retired, NERC's uncontested filing is hereby approved pursuant to the relevant authority delegated to the Director, Office of Electric Reliability under 18 CFR 375.303, effective as of the date of this order.

This action shall not be construed as approving any other application, including proposed revisions of Electric Reliability Organization or Regional Entity rules or procedures pursuant to 18 CFR 375.303(a)(2)(i). Such action shall not be deemed as recognition of any claimed right or obligation associated therewith and such action is without prejudice to any findings or orders that have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against the Electric Reliability Organization or any Regional Entity.

This order constitutes final agency action. Requests for rehearing by the Commission may be filed within 30 days of the date of issuance of this order, pursuant to 18 CFR 385.713. The revisions to PRC–023–6 will result in a change in how relay settings will be assessed under Requirement R1 of out-of-step blocking elements but will not result in reporting or recordkeeping requirements or burden. As of February 2024, there are 324 transmission owner, 1,173 generator owners, 371 distribution providers and 62 planning coordinators registered with NERC. These registered entities will have to comply requirements in the proposed Reliability Standard PRC–023–6.

PROPOSED CHANGES DUE TO ORDER IN DOCKET NO. RD23–5–000

Reliability standard & requirement	Type[8] and number of entity	Number of annual responses per entity	Total number of responses	Average number of burden hours per response[9]	Total burden hours
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)
FERC–725G					
PRC–023–6					
TO	324	1	324	16 hrs. $1,067.52	5,184 hrs. $345,876.48.
GO	1,173	1	1,173	16 hrs. $1,067.52	18,768 hrs. $1,252,200.96.
DP	371	1	371	8 hrs. $533.76	2,968 hrs. $198,024.96.
PC	62	1	62	8 hrs. $533.76	496 $33,093.12.
Total for PRC–023–6.			1,930	48 hrs. $3,202.56	27,416 hrs. $1,829,195.52.
One Time Estimate—Years 1 and 2.					

The one-time burden of 27,416 hours that only applies for Year 1 and 2 will be averaged over three years (27,416 hours ÷ 3 = 9,138.67 (9,138.67–rounded) hours/year over three years). The number of responses is also averaged over three years (1,930 responses ÷ 3 = 643.33 (643.33–rounded) responses/year).

The responses and burden hours for Years 1–3 will total respectively as follows for Year 1 one-time burden:

Year 1: 643.33 responses; 9,138.67 hours
Year 2: 643.33 responses; 9,138.67 hours
Year 3: 643.33 responses; 9,138.67 hours

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: April 23, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

[FR Doc. 2024–09196 Filed 4–29–24; 8:45 am]

BILLING CODE 6717–01–P

[8] TO = Transmission Owner, GO = Generator Owner, DP = Distribution Provider and PC = Planning Coordinator.

[9] The estimated hourly cost (salary plus benefits) derived using the following formula: Burden Hours per Response * $/hour = Cost per Response. Based on the Bureau of Labor Statistics (BLS), as of August 1, 2023, of an Electrical Engineer (17–2071)—$77.29, and for Information and Record Clerks (43–4199) $56.14, The average hourly burden cost for this collection is [($77.29 + $56.14)/2 = $66.715)] rounded to $66.72 an hour.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2407–179]

Alabama Power Company; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Application Type:* Temporary Variance from Reservoir Elevation.

b. *Project No.:* 2407–179.

c. *Date Filed:* February 15, 2024.

d. *Applicant:* Alabama Power Company.

e. *Name of Project:* Yates and Thurlow Project.

f. *Location:* The Yates and Thurlow Project is located on the Tallapoosa River in Elmore County, Alabama, and Tallapoosa County, Alabama.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791 (a)–825(r).

h. *Applicant Contact:* David K. Anderson, Hydro Licensing Specialist, 600 North 18th Street, Hydro Services 16N–8180, Birmingham, AL 35203, (205) 257–1398, *dkanders@southernco.com.*

i. *FERC Contact:* Greg Morris, (202) 502–8116, *gregory.morris@ferc.gov.*

j. *Cooperating agencies:* With this notice, the Commission is inviting federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, that wish to cooperate in the preparation of any environmental document, if

applicable, to follow the instructions for filing such requests described in item m below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. See 94 FERC ¶ 61,076 (2001).

k. *Deadline for filing comments, motions to intervene, and protests:* 30 days from the issuance date of this notice by the Commission.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/doc-sfiling/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include the docket number P–2407–179. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request:* The applicant requests Commission approval for a temporary variance from the reservoir elevation requirements at Thurlow Reservoir. The applicant is proposing to lower the Thurlow Reservoir by approximately six feet for four weeks in 2024. Specifically, the applicant will operate the Thurlow development so that its maximum drawdown does not exceed one foot below a pool elevation of 282.7 feet from September 8, 2024, through October 5, 2024. The purpose of the proposed drawdown is twofold. First, a group of homeowners on Thurlow Reservoir requested to conduct a drawdown so they can perform maintenance on their shoreline structures. Because the Thurlow Reservoir is typically operated with a one-foot fluctuation, a drawdown of six feet will allow maintenance of structures that are normally below the water line. Second, the drawdown will allow the applicant to perform a needed inspection and potential repairs within the draft tube at the upstream Yates development. The drawdown will not affect the Thurlow minimum flow required by Article 401 of the Project license.

m. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

o. *Comments, Motions to Intervene, or Protests:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

p. *Filing and Service of Responsive Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

q. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502–6595 or *OPP@ferc.gov.*

Dated: April 24, 2024.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC24–15–000]

Commission Information Collection Activities (FERC–587); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection FERC–587, Land Description: Public Land States/Non-Public Land States, OMB Control Number 1902–0145.

DATES: Comments on the collections of information are due July 1, 2024.

ADDRESSES: You may submit copies of your comments (identified by Docket No. IC24–15–000 and the specific FERC collection number (FERC–587) by one of the following methods:

Electronic filing through *http://www.ferc.gov,* is preferred.

• *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.

• For those unable to file electronically, comments may be filed by USPS mail or by other delivery services:

○ *Mail via U.S. Postal Service Only:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

○ *All other delivery services:* Federal Energy Regulatory Commission, Secretary of the Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at *https://www.ferc.gov/ferc-online/overview.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at (866) 208–3676 (toll-free).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *https://www.ferc.gov/ferc-online/overview.*

FOR FURTHER INFORMATION CONTACT: Jean Sonneman may be reached by email at *DataClearance@FERC.gov,* or telephone at (202) 502–6362.

SUPPLEMENTARY INFORMATION:

Title: FERC–587, Land Description: Public Land States/Non-Public Land States.

OMB Control No.: 1902–0145.

Type of Request: Three-year extension of the FERC–587 information collection requirements with no changes to the current reporting requirements.

Abstract: Section 24 of the Federal Power Act (FPA) [1] requires the Commission to conduct this collection of information, which pertains to applications proposing hydropower projects, or changes to existing hydropower projects, within ''lands of the United States.'' FERC Form 587 [2] consolidates the required information, including a description of the applicable U.S. lands and identification of hydropower project boundary maps associated with the applicable U.S. lands. An applicant must send FERC Form 587 both to the Commission and to the Bureau of Land Management (BLM) [3] state office where the project is located. The information consolidated in FERC Form 587 facilitates the reservation of U.S. lands as hydropower sites and the withdrawal of such lands from other uses.

Type of Respondents: Applicants proposing hydropower projects, or changes to existing hydropower projects, within lands of the United States.

Estimate of Annual Burden: The Commission estimates the average annual burden [4] and cost [5] for this information collection as follows.

A. Number of respondents	B. Annual number of responses per respondent	C. Total number of responses (Column A × Column B)	D. Average hour burden & cost per response	E. Total annual burden hours & total annual cost (Column C × Column D)	F. Cost per respondent ($) (Column E ÷ Column A)
70	1	70	1 hour; $100.00	70 hours; $7,000	$100.00

Comments: Comments are invited on: (1) whether the collections of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collections of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collections; and (4) ways to minimize the burden of the collections of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: April 23, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC24–72–000.

Applicants: Morongo Transmission LLC, Axium Coachella Holdings LLC.

Description: Joint Application for Authorization Under Section 203 of the Federal Power Act of Morongo Transmission LLC, et al.

Filed Date: 4/23/24.

Accession Number: 20240423–5211.

Comment Date: 5 p.m. ET 5/14/24.

Docket Numbers: EC24–73–000.

Applicants: Orsted DevCo, LLC, Orsted DevCo II, LLC, Eversource Investment LLC, Sunrise Wind LLC.

Description: Application for Authorization Under Section 203 of the Federal Power Act of Sunrise Wind LLC.

Filed Date: 4/22/24.

Accession Number: 20240422–5369.

Comment Date: 5 p.m. ET 5/13/24.

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG24–167–000.

Applicants: Markum Solar Farm, LLC.

Description: Markum Solar Farm, LLC submits Notice of Self-Certification of Exempt Wholesale Generator Status.

Filed Date: 4/24/24.

Accession Number: 20240424–5066.

Comment Date: 5 p.m. ET 5/15/24.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER10–1982–017.

Applicants: Consolidated Edison Company of New York, Inc.

Description: Notice of Non-Material Change in Status of Consolidated Edison Company of New York, Inc., et al.

Filed Date: 4/19/24.

Accession Number: 20240419–5289.

Comment Date: 5 p.m. ET 5/10/24.

Docket Numbers: ER17–923–002.

[1] 16 U.S.C. 818.

[2] Form 587 can be found at *https://cms.ferc.gov/media/ferc-587.*

[3] The Bureau of Land Management is within the U.S. Department of the Interior.

[4] Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collections burden, reference 5 CFR 1320.3.

[5] The Commission staff estimates that the average respondent for FERC–587 is similarly situated to the Commission, in terms of salary plus benefits. Based on FERC's current annual average of $207,786 (for salary plus benefits), the average hourly cost is $100/hour.

Applicants: Ashley Energy LLC.

Take notice that the Commission received the following public utility holding company filings:

Docket Numbers: PH24–9–000.
Applicants: CAES, LLC, Electrodes Holdings, LLC, Watt Battery Holdings, LLC, Battery Storage Holdings, LLC, Sparks Battery Holdings, LLC, Sparks Battery Holdings 2, LLC.
Description: Joint Waiver Notification of CAES, LLC, et al. FERC 65–B Waiver Notification.
Filed Date: 4/22/24.
Accession Number: 20240422–5366.
Comment Date: 5 p.m. ET 5/13/24.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to

contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: April 24, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2017–0750; FRL–11907–01–OCSPP]

Pesticide Registration Review; Proposed Decisions for Several Pesticides; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of EPA's proposed interim decisions (PIDs) and amended PIDs for the following pesticides: Acephate, Captan, Ferbam, Thiram, and Ziram. EPA is opening a 60-day public comment period for these proposed interim registration review decisions.

DATES: Comments must be received on or before July 1, 2024.

ADDRESSES: Submit your comments through *https://www.regulations.gov* using the docket identification (ID) number for the pesticide of interest as identified in Table 1 of Unit I. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Additional instructions on commenting and visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT:

For pesticide specific information: The Chemical Review Manager for the pesticide of interest is identified in Table 1 of Unit I.

For general information: Melanie Biscoe, Pesticide Re-Evaluation Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–0701; email address: *biscoe.melanie@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. What action is the Agency taking?

Pursuant to 40 CFR 155.58(a), this notice announces the availability of EPA's proposed interim and proposed registration review decisions for the pesticides shown in table 1 and opens a 60-day public comment period on the proposed interim registration review decisions.

TABLE 1—PROPOSED INTERIM REGISTRATION REVIEW DECISIONS

Registration review case name and No.	Docket ID No.	Chemical review manager and contact information
Acephate Case Number 0042	EPA–HQ–OPP–2008–0915.	Kent Fothergill, *fothergill.kent@epa.gov,* (202) 566–1943.
Captan (Amended) Case Number 0120	EPA–HQ–OPP–2013–0296.	Christina Scheltema, *scheltema.christina@epa.gov,* (202) 566–2272.
Ferbam (Amended) Case Number 8000	EPA–HQ–OPP–2015–0567.	DeMariah Koger, *koger.demariah@epa.gov,* (202) 566–2288.
Thiram (Amended) Case Number 0122	EPA–HQ–OPP–2015–0433.	DeMariah Koger, *koger.demariah@epa.gov,* (202) 566–2288.
Ziram (Amended) Case Number 8001	EPA–HQ–OPP–2015–0568.	DeMariah Koger, *koger.demariah@epa.gov,* (202) 566–2288.

II. What is the Agency's authority for taking this action?

EPA is conducting its registration review of the chemicals listed in the table 1 of unit I pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 3(g) (7 U.S.C. 136a(g)) and the Procedural Regulations for Registration Review at 40 CFR part 155, subpart C. FIFRA section 3(g) provides, among other things, that pesticide registrations are to be reviewed every 15 years. Consistent with 40 CFR 155.57, in its final registration review decision, EPA will ultimately determine whether a pesticide continues to meet the registration standard in FIFRA section 3(c)(5) (7 U.S.C. 136a(c)(5)). As part of the registration review process, the Agency has completed a proposed interim or proposed decision for each of the pesticides listed in Table 1 of Unit I.

The registration review docket for a pesticide includes documents related to the registration review case. Among other things, these documents describe EPA's rationales for conducting additional risk assessments for the registration review of the pesticides included in Table 1 of Unit I, as well as the Agency's subsequent risk findings and consideration of possible risk mitigation measures. The proposed interim and proposed registration review decisions are supported by the rationales included in those documents.

Consistent with 40 CFR 155.58(a), EPA provides for at least a 60-day public comment period on proposed interim and proposed registration review decisions. This comment period is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the proposed decision.

For additional background on the registration review program, see: *https://www.epa.gov/pesticide-reevaluation.*

III. Does this action apply to me?

This notice is directed to the public in general and may be of interest to a wide range of stakeholders including environmental, human health, farm worker, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the Chemical Review Manager for the pesticide of interest identified in table 1 of unit I.

IV. What should I consider as I prepare my comments for EPA?

In submitting a comment to EPA, please consider the following:

1. *Submitting CBI.* Do not submit this information to EPA through *regulations.gov* or email. Clearly mark the part or all the information that you claim to be CBI. For CBI information on a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM

as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at: *https://www.epa.gov/dockets/commenting-epa-dockets.*

3. *Environmental justice.* EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low-income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticides discussed in this document, compared to the general population.

All comments should be submitted using the methods in **ADDRESSES** and must be received by EPA on or before the closing date. These comments will become part of the docket for the pesticides included in Table 1 in Unit I. The Agency will consider all comments received by the closing date and may respond to comments in a ''Response to Comments Memorandum'' in the docket and/or in any subsequent interim or final registration review decision, as appropriate.

Authority: 7 U.S.C. 136 *et seq.*

Dated: April 23, 2024.

Timothy Kiely,

Acting Director, Pesticide Re-Evaluation Division, Office of Pesticide Programs.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0636; FR ID 216233]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written PRA comments should be submitted on or before July 1, 2024. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

OMB Control Number: 3060–0636.

Title: Sections 2.906, 2.909, 2.1071, 2.1074, 2.1077 and 15.37, Equipment Authorizations—Supplier's Declaration of Conformity (SDoC).

Form No.: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 8,500 respondents; 17,000 responses.

Estimated Time per Response: 1–18 hours (average).

Frequency of Response: One-time reporting requirement, recordkeeping requirement and third party disclosure requirements.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 154(i), 301, 302a, 303, 309(j), 312, 403, 503, and the Secure Equipment Act of 2021, Public Law 117–55, 135 Stat. 423.

Total Annual Burden: 161,500 hours.

Total Annual Cost: $17,000,000.

Needs and Uses: The Commission will submit this revised information collection to the Office of Management and Budget (OMB) after this 60 day comment period in order to obtain the full three year clearance from them.

In 2022, the Supplier's Declaration of Conformity (SDOC) procedure were revised in a Report and Order, FCC 22–84 (88 FR 7592, February 6, 2023). Revisions to the information collection included amendments to rule sections 2.906 and 2.909 as reported herein, therefore, the eligibility restrictions resulted in fewer applicants but the continued growth in participation in the program resulted in a re-adjustment of applicants which supports program changes and adjustments.

§ 2.906 Supplier's Declaration of Conformity

(a) Supplier's Declaration of Conformity (SDoC) is a procedure where the responsible party, as defined in § 2.909, makes measurements or completes other procedures found acceptable to the Commission to ensure that the equipment complies with the appropriate technical standards and other applicable requirements. Submittal to the Commission of a sample unit or representative data demonstrating compliance is not required unless specifically requested pursuant to § 2.945.

(b) Supplier's Declaration of Conformity is applicable to all items subsequently marketed by the manufacturer, importer, or the responsible party that are identical, as defined in § 2.908, to the sample tested and found acceptable by the manufacturer.

(c) The responsible party may, if it desires, apply for Certification of a device subject to the Supplier's Declaration of Conformity. In such cases, all rules governing certification will apply to that device.

(d) Notwithstanding other parts of this section, equipment otherwise subject to the Supplier's Declaration of Conformity process that is produced by any entity

identified on the Covered List, established pursuant to § 1.50002 of this chapter, as producing covered communications equipment is prohibited from obtaining equipment authorization through that process. The rules governing certification apply to authorization of such equipment.

§ 2.909 Responsible Party

(a) In the case of equipment that requires the issuance of a grant of certification, the party to whom that grant of certification is issued is responsible for the compliance of the equipment with the applicable technical and other requirements. If any party other than the grantee modifies the radio frequency equipment and that party is not working under the authorization of the grantee pursuant to § 2.929(b), the party performing the modification is responsible for compliance of the product with the applicable administrative and technical provisions in this chapter.

(b) For equipment subject to Supplier's Declaration of Conformity the party responsible for the compliance of the equipment with the applicable standards, who must be located in the United States (see § 2.1077), is set forth as follows:

(1) The manufacturer or, if the equipment is assembled from individual component parts and the resulting system is subject to authorization under Supplier's Declaration of Conformity, the assembler.

(2) If the equipment by itself, or, a system is assembled from individual parts and the resulting system is subject to Supplier's Declaration of Conformity and that equipment or system is imported, the importer.

(3) Retailers or original equipment manufacturers may enter into an agreement with the responsible party designated in paragraph (b)(1) or (b)(2) of this section to assume the responsibilities to ensure compliance of equipment and become the new responsible party.

(4) If the radio frequency equipment is modified by any party not working under the authority of the responsible party, the party performing the modifications, if located within the U.S., or the importer, if the equipment is imported subsequent to the modifications, becomes the new responsible party.

(c) If the end product or equipment is subject to both certification and Supplier's Declaration of Conformity (*i.e.,* composite system), all the requirements of paragraphs (a) and (b) apply.

(d) If, because of modifications performed subsequent to authorization, a new party becomes responsible for ensuring that a product complies with the technical standards and the new party does not obtain a new equipment authorization, the equipment shall be labeled, following the specifications in § 2.925(d), with the following: ''This product has been modified by [insert name, address and telephone number or internet contact information of the party performing the modifications].''

(e) In the case of transfer of control of equipment, as in the case of sale or merger of the responsible party, the new entity shall bear the responsibility of continued compliance of the equipment.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

[FR Doc. 2024–09214 Filed 4–29–24; 8:45 am]

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0804; FR ID 216172]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written PRA comments should be submitted on or before July 1, 2024. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

OMB Control Number: 3060–0804.

Title: Universal Service—Rural Health Care Program.

Form Numbers: FCC Forms 460, 461, 462, 463, 465, 466, 467, and 469.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit; Not-for-profit institutions; Federal Government; and State, Local, or Tribal governments.

Number of Respondents and Responses: 12,854 unique respondents; 117,071 responses.

Estimated Time per Response: 0.30–17 hours.

Frequency of Response: On occasion, one-time, annual, and monthly reporting requirements.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in sections 1–4, 201–205, 214, 254, 303(r), and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 151–*154, 201–205, 214, 254, 303(r),* and *403,* unless otherwise noted.

Total Annual Burden: 442,389 hours.

Total Annual Cost: No Cost.

Needs and Uses: The Commission seeks OMB approval of a revision of this information collection as a result of the *2023 Promoting Telehealth Third Report and Order,* FCC 23–110, rel. December 14, 2023 (*2023 Third Report and Order*) (89 FR 1834, January 11, 2024). This collection is utilized for the RHC support mechanism of the Commission's universal service fund (USF). The collection of this information is necessary so that the Commission and the Universal Service Administrative Company (USAC) will have sufficient information to determine if entities are eligible for funding

pursuant to the RHC universal service support mechanism, to determine if entities are complying with the Commission's rules, and to promote program integrity. This information is also necessary in order to allow the Commission to evaluate the extent to which the RHC Program is meeting the statutory objectives specified in section 254(h) of the 1996 Act, and the Commission's performance goals for the RHC Program.

This information collection is being revised to: (1) extend some of the existing information collection requirements for the Healthcare Connect Fund and Telecom Programs; (2) revise some of the information collection requirements for the Healthcare Connect Fund and Telecom Programs as a result of the *2023 Third Report and Order;* and (3) add a new information collection requirement for the Healthcare Connect Fund and Telecom Programs as a result of the *2023 Third Report and Order.* As part of this information collection, the Commission is also revising the FCC Form 460 Template, the FCC Form 461 Template, the FCC Form 465 Template, the FCC Form 466 Template, and the Post-Commitment Template. We propose to make changes to the Post-Commitment Template effective funding year 2024. We propose to make changes to the FCC Form 460 Template, the FCC Form 461 Template, the FCC Form 465 Template, and the FCC Form 466 Template effective funding year 2025. The FCC Form 467 and Telecom Invoice Form will not be used after funding year 2023.

As part of this information collection, the Commission is harmonizing the RHC Program eligibility determination process by using the FCC Form 460 for eligibility determinations in both the Telecom Program and the HCF Program, eliminating the eligibility determination portion from FCC Form 465, which was previously used for eligibility determinations in the Telecom Program. The FCC Form 460 will also be amended to seek information applicable to conditional approvals of eligibility, which will enable health care providers to engage in competitive bidding and request funding (but not receive disbursements) before they become eligible. Additionally, the FCC Form 466 will be amended effective to reflect a streamlined process for calculating urban rates. Finally, the information collection will be updated to allow health care providers to update the time period covered by evergreen contract designations.

The Healthcare Connect Fund Program currently includes FCC Forms 460, 461, 462, and 463. Effective funding year 2024, the Telecom Program includes FCC Forms 465, 466, and 469 and will include the FCC Form 460 starting in funding year 2025. The information on the FCC Form templates is a representative description of the information to be collected via an online portal and is not intended to be a visual representation of what each applicant or service provider will see, the order in which they will see information, or the exact wording or directions used to collect the information. Where possible, information already provided by applicants from previous filing years or that was pre-filed in the system portal will be carried forward and auto-generated into the form to simplify the information collection for applicants.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Sunshine Act Meetings

TIME AND DATE: 10:00 a.m. on April 25, 2024.

PLACE: The meeting was held in the FDIC Board Room, 550 17th Street NW, Washington, DC, and was webcast to the public.

MATTERS TO BE CONSIDERED: Pursuant to the provisions of the ''Government in the Sunshine Act'' (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors met in open session at 10:00 a.m. on Thursday, April 25, 2024, to consider the following matters:

Summary Agenda: Disposition of Minutes of a Board of Directors' Meeting Previously Distributed.

Report of actions taken pursuant to authority delegated by the Board of Directors.

Discussion Agenda: Memorandum re: Deposit Insurance Fund Restoration Plan Semiannual Update.

Memorandum and resolution re: Proposals Related to Change in Bank Control Act.

CONTACT PERSON FOR MORE INFORMATION: Requests for further information concerning the meeting may be directed to Debra A. Decker, Executive Secretary of the Corporation, at 202–898–8748.

Dated at Washington, DC, on April 25, 2024.

Federal Deposit Insurance Corporation.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the applications are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than May 15, 2024.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690–1414. Comments can also be sent electronically to *Comments.applications@chi.frb.org:*

1. *Kathryn Paige Duncan, John Robert Duncan, D. Todd Duncan, Clara Summers Stokes Sukovaty, Amelia Stokes, Kathryn Duncan, the Summers*

Stokes Irrevocable Trust, Union Bank & Trust, as trustee, and Clara Summers Stokes Sukovaty, as beneficiary, the Amelia Stokes Irrevocable Trust, Union Bank & Trust, as trustee, and Amelia Stokes, as beneficiary, and a Minor Child's Irrevocable Trust, Union Bank & Trust, as trustee; all of Lincoln, Nebraska; Carol Dianne Thomas and Drew Duncan Thomas, both of Miami, Florida; Brian Sean Thomas, London, United Kingdom; Blake Alan Thomas, Omaha, Nebraska; Ian Duncan Thompson, Los Angeles, California; and Dr. Eric Michael Thompson, Chicago, Illinois; a group acting in concert, to form the Duncan Family Control Group, to retain voting shares of Bank Iowa Corporation, and thereby indirectly retain voting shares of Bank Iowa, both of West Des Moines, Iowa.

B. Federal Reserve Bank of San Francisco (Joseph Cuenco, Assistant Vice President, Formations & Transactions) 101 Market Street, San Francisco, California 94105–1579. Comments can also be sent electronically to *sf.fisc.comments.applications@sf.frb.org:*

1. *Michael Harland Giles, Vancouver, Washington;* to acquire voting shares of Pacific West Bancorp, and thereby indirectly acquire voting shares of Pacific West Bank, both of West Linn, Oregon.

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice, request for comment.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) invites comment on a proposal to extend for three years, with revision, the Application for a Foreign Organization to Acquire a U.S. Bank or Bank Holding Company (FR Y–3F; OMB No. 7100–0119).

DATES: Comments must be submitted on or before July 1, 2024.

ADDRESSES: You may submit comments, identified by FR Y–3F, by any of the following methods:

- *Agency Website: https://www.federalreserve.gov/.* Follow the instructions for submitting comments at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Email: regs.comments@federalreserve.gov.* Include the OMB number or FR number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Federal Reserve Board of Governors, Attn: Ann E. Misback, Secretary of the Board, Mailstop M–4775, 2001 C St. NW, Washington, DC 20551.

All public comments are available from the Board's website at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx* as submitted, unless modified for technical reasons or to remove personally identifiable information at the commenter's request. Accordingly, comments will not be edited to remove any confidential business information, identifying information, or contact information. Public comments may also be viewed electronically or in paper in Room M–4365A, 2001 C St. NW, Washington, DC 20551, between 9:00 a.m. and 5:00 p.m. on weekdays, except for Federal holidays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.

Additionally, commenters may send a copy of their comments to the Office of Management and Budget (OMB) Desk Officer for the Federal Reserve Board, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, *nuha.elmaghrabi@frb.gov,* (202) 452–3884.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

During the comment period for this proposal, a copy of the proposed PRA OMB submission, including the draft reporting form and instructions, supporting statement (which contains more detail about the information collection and burden estimates than this notice), and other documentation, will be made available on the Board's public website at *https://www.federalreserve.gov/apps/reportingforms/home/review* or may be requested from the agency clearance officer, whose name appears above. Final versions of these documents will be made available at *https://www.reginfo.gov/public/do/PRAMain,* if approved.

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following:

a. Whether the proposed collection of information is necessary for the proper performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal.

Proposal Under OMB Delegated Authority To Extend for Three Years, With Revision, the Following Information Collection

Collection title: Application for a Foreign Organization to Acquire a U.S. Bank or Bank Holding Company.

Collection identifier: FR Y–3F.

OMB control number: 7100–0119.

General description of collection: Under the Bank Holding Company Act of 1956 (BHC Act), any company,

including a company organized under the laws of a foreign country, that seeks to acquire a U.S. bank or bank holding company must receive approval from the Board prior to doing so. The Federal Reserve uses the information collected by the FR Y–3F to determine whether to approve an application for prior approval and, subsequently, to carry out its supervisory responsibilities with respect to the foreign banking organization's operations in the United States.

Proposed revisions: The Board proposes to revise the FR Y–3F to add a question regarding the integration of the target into the applicant; update or add certain citations and references; remove the sample publication from the instructions; and add a clarifying footnote regarding the Interagency Biographical and Financial Reports (IBFRs).

Frequency: Event-generated.

Respondents: Any company organized under the laws of a foreign country that seeks to acquire a U.S. bank or bank holding company.

Total estimated number of respondents: 1.

Estimated average hours per response: 92.

Total estimated change in burden: 0.

Total estimated annual burden hours: 92.[1]

Board of Governors of the Federal Reserve System, April 25, 2024.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)).

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than May 30, 2024.

A. Federal Reserve Bank of Boston (Prabal Chakrabarti, Senior Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02210–2204. Comments can also be sent electronically to *BOS.SRC.Applications.Comments@bos.frb.org:*

1. *Hometown Financial Group, MHC, and Hometown Financial Group, Inc., both of Easthampton, Massachusetts;* to acquire North Shore Bancorp, and thereby indirectly acquire North Shore Bank, both of Peabody Massachusetts.

Board of Governors of the Federal Reserve System.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE P

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice, request for comment.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) invites comment on a proposal to extend for three years, with revision, the Bank Holding Company Applications and Notifications (FR Y–3, FR Y–3N, and FR Y–4; OMB No. 7100–0121).

DATES: Comments must be submitted on or before July 1, 2024.

ADDRESSES: You may submit comments, identified by FR Y–3, FR Y–3N, and FR Y–4, by any of the following methods:

- *Agency Website: https://www.federalreserve.gov/.* Follow the instructions for submitting comments at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Email: regs.comments@federalreserve.gov.* Include the OMB number or FR number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Federal Reserve Board of Governors, Attn: Ann E. Misback, Secretary of the Board, Mailstop M–4775, 2001 C St NW, Washington, DC 20551.

All public comments are available from the Board's website at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx* as submitted, unless modified for technical reasons or to remove personally identifiable information at the commenter's request. Accordingly, comments will not be edited to remove any confidential business information, identifying information, or contact information. Public comments may also be viewed electronically or in paper in Room M–4365A, 2001 C St NW, Washington, DC 20551, between 9:00 a.m. and 5:00 p.m. on weekdays, except for Federal holidays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.

Additionally, commenters may send a copy of their comments to the Office of Management and Budget (OMB) Desk Officer for the Federal Reserve Board, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, *nuha.elmaghrabi@frb.gov,* (202) 452–3884.

[1] More detailed information regarding this collection, including more detailed burden estimates, can be found in the OMB Supporting Statement posted at *https://www.federalreserve.gov/apps/reportingforms/home/review.* On the page displayed at the link, you can find the OMB Supporting Statement by referencing the collection identifier, FR Y–3F.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

During the comment period for this proposal, a copy of the proposed PRA OMB submission, including the draft reporting form and instructions, supporting statement (which contains more detail about the information collection and burden estimates than this notice), and other documentation, will be made available on the Board's public website at *https://www.federalreserve.gov/apps/reportingforms/home/review* or may be requested from the agency clearance officer, whose name appears above. Final versions of these documents will be made available at *https://www.reginfo.gov/public/do/PRAMain,* if approved.

Request for Comment on Information Collection Proposals

The Board invites public comment on the following information collections, which are being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following:

a. Whether the proposed collections of information are necessary for the proper performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collections, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal.

Proposal Under OMB Delegated Authority To Extend for Three Years, With Revision, the Following Information Collections

Collection title: Bank Holding Company Applications and Notifications.

Collection identifier: FR Y–3, FR Y–3N, and FR Y–4.

OMB control number: 7100–0121.

General description of collection: These filings collect information on proposals by Bank Holding Companies (BHCs) involving formations, acquisitions, mergers, and nonbanking activities. The Board requires the submission of these filings for regulatory and supervisory purposes and to allow the Board to fulfill its statutory obligations under the Bank Holding Company Act of 1956 (the BHC Act). The Board uses this information to evaluate each individual transaction with respect to financial and managerial factors, permissibility, competitive effects, financial stability, net public benefits, and impact on the convenience and needs of affected communities.

Proposed revisions: The Board proposes to revise the FR Y–3, FR Y–3N, and FR Y–4 forms and instructions to update or add certain citations and references; delete language that requires an explanation of the assumptions used in financial projections only if the projections deviate from historical performance; remove the sample publication from the instruction; add questions regarding groups acting in concert, individuals who would own 10 percent or more of the applicant, and companies that would own five percent or more of the applicant; add a requirement that applicants provide a breakdown of pro forma equity; add a requirement that applicants identify any management official of the applicant who is also a management official at another depository institution; and add a question regarding the integration of the target into the applicant.

Frequency: Event-generated.

Respondents: BHCs and a company seeking to become a BHC.

Total estimated number of respondents: 335.

Total estimated change in burden: 388.

Total estimated annual burden hours: 7,603.[1]

[1] More detailed information regarding this collection, including more detailed burden estimates, can be found in the OMB Supporting Statement posted at *https://www.federalreserve.gov/apps/reportingforms/home/review.* On the page displayed at the link, you can find the OMB Supporting Statement by referencing the collection identifier, FR Y–3, FR Y–3N, and FR Y–4.

Board of Governors of the Federal Reserve System, April 25, 2024.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–3463–PN]

Medicare Program; Application by the Community Health Accreditation Partner (CHAP) for Continued CMS Approval of Its Home Infusion Therapy (HIT) Accreditation Program

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice with request for comment.

SUMMARY: This notice acknowledges the receipt of an application from the Community Health Accreditation Partner (CHAP) for continued approval by the Centers for Medicare & Medicaid Services (CMS) of CHAP's national accrediting organization program for suppliers providing home infusion therapy (HIT) services and that wish to participate in the Medicare or Medicaid programs. The statute requires that within 60 days of receipt of an organization's complete application, CMS will publish a notice that identifies the national accrediting body making the request, describes the nature of the request, and provides at least a 30-day public comment period.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, by May 30, 2024.

ADDRESSES: In commenting, refer to file code CMS–3463–PN.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–3463–PN, P.O. Box 8016, Baltimore, MD 21244–8010.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–3463–PN, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Shannon Freeland, (410) 786–4348.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *https://www.regulations.gov.* Follow the search instructions on that website to view public comments. We will not post on *Regulations.gov* public comments that make threats to individuals or institutions or suggest that the individual will take actions to harm the individual. We continue to encourage individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments.

I. Background

Home infusion therapy (HIT) is a treatment option for Medicare beneficiaries with a wide range of acute and chronic conditions. Section 5012 of the 21st Century Cures Act (Pub. L. 114–255, enacted December 13, 2016) added section 1861(iii) to the Social Security Act (the Act), establishing a new Medicare benefit for HIT services. Section 1861(iii)(1) of the Act defines ''home infusion therapy'' as professional services, including nursing services; training and education not otherwise covered under the Durable Medical Equipment (DME) benefit; remote monitoring; and other monitoring services. HIT must be furnished by a qualified HIT supplier and furnished in the individual's home. The individual must:

- Be under the care of an applicable provider (that is, physician, nurse practitioner, or physician assistant); and
- Have a plan of care established and periodically reviewed by a physician in coordination with the furnishing of home infusion drugs under Part B, that prescribes the type, amount, and duration of infusion therapy services that are to be furnished.

Section 1861(iii)(3)(D)(i)(III) of the Act requires that a qualified HIT supplier be accredited by an accrediting organization (AO) designated by the Secretary in accordance with section 1834(u)(5) of the Act. Section 1834(u)(5)(A) of the Act identifies factors for designating AOs and in reviewing and modifying the list of designated AOs. These statutory factors are as follows:

- The ability of the organization to conduct timely reviews of accreditation applications.
- The ability of the organization to take into account the capacities of suppliers located in a rural area (as defined in section 1886(d)(2)(D) of the Act).
- Whether the organization has established reasonable fees to be charged to suppliers applying for accreditation.
- Such other factors as the Secretary determines appropriate.

Section 1834(u)(5)(B) of the Act requires the Secretary to designate AOs to accredit HIT suppliers furnishing HIT no later than January 1, 2021. Section 1861(iii)(3)(D)(i)(III) of the Act requires a ''qualified home infusion therapy supplier'' to be accredited by a CMS-approved AO, pursuant to section 1834(u)(5) of the Act.

On March 1, 2019, we published a solicitation notice entitled, ''Medicare Program; Solicitation of Independent Accrediting Organizations to Participate in the Home Infusion Therapy Supplier Accreditation Program'' (84 FR 7057). This notice informed national AOs that accredit HIT suppliers of an opportunity to submit applications to participate in the HIT supplier accreditation program. We stated that complete applications would be considered for the January 1, 2021 designation deadline if received by February 1, 2020. Regulations for the approval and oversight of AOs for HIT organizations are located at 42 CFR part 488, subpart L. The requirements for HIT suppliers are located at 42 CFR part 486, subpart I.

II. Approval of Deeming Organization

Section 1834(u)(5) of the Act and regulations at 42 CFR 488.1010 require that our findings concerning review and approval of a national accrediting organization's requirements consider, among other factors, the applying accrediting organization's requirements for accreditation; survey procedures; resources for conducting required surveys; capacity to furnish information for use in enforcement activities; monitoring procedures for provider entities found not in compliance with the conditions or requirements; and ability to provide CMS with the necessary data.

Our rules at 42 CFR 488.1020(a) require that we publish, after receipt of an organization's complete application, a notice that identifies the national accrediting body making the request, describes the nature of the request, and provides at least a 30-day public comment period. Pursuant to our rules at 42 CFR 488.1010(d), we have 210 days from the receipt of a complete application to publish notice of approval or denial of the application.

The purpose of this proposed notice is to inform the public of the Community Health Accreditation Partner's (CHAP's) request for CMS' continued recognition of its HIT accreditation program. This notice also solicits public comment on whether CHAP's requirements meet or exceed the Medicare requirements of participation for HIT services.

III. Evaluation of Deeming Authority Request

In the April 27, 2020 **Federal Register**, we published CHAP's initial application for recognition as an accreditation organization for HIT (85 FR 23364). On September 25, 2020, we published notification of their approval as such an organization, effective September 25, 2020 through September 25, 2024 (85 FR 60469). CHAP has since submitted all the necessary materials to enable us to make a determination concerning its request for continued recognition of its HIT accreditation program. This application was determined to be complete on February 28, 2024. Under section 1834(u)(5) of the Act and 42 CFR 488.1010 (Application and re-application procedures for national home infusion therapy accrediting organizations), our review and evaluation of CHAP will be conducted in accordance with, but not necessarily limited to, the following factors:

- The equivalency of CHAP's standards for HIT as compared with CMS' HIT requirements for participation in the Medicare program.
- CHAP's survey process to determine the following:

++ The composition of the survey team, surveyor qualifications, and the ability of the organization to provide continuing surveyor training.

++ The comparability of CHAP's to CMS' standards and processes, including survey frequency, and the ability to investigate and respond

appropriately to complaints against accredited facilities.

++ CHAP's processes and procedures for monitoring a HIT supplier found out of compliance with CHAP's program requirements.

++ CHAP's capacity to report deficiencies to the surveyed facilities and respond to the facility's plan of correction in a timely manner.

++ CHAP's capacity to provide CMS with electronic data and reports necessary for effective assessment and interpretation of the organization's survey process.

++ The adequacy of CHAP's staff and other resources, and its financial viability.

++ CHAP's capacity to adequately fund required surveys.

++ CHAP's policies with respect to whether surveys are announced or unannounced, to ensure that surveys are unannounced.

++ CHAP's agreement to provide CMS with a copy of the most current accreditation survey together with any other information related to the survey as CMS may require (including corrective action plans).

++ CHAP's policies and procedures to avoid conflicts of interest, including the appearance of conflicts of interest, involving individuals who conduct surveys, audits or participate in accreditation decisions.

++ CHAP's agreement or policies for voluntary and involuntary termination of HIT suppliers.

++ CHAP's agreement or policies for voluntary and involuntary termination of the HIT AO program.

IV. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping, or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

V. Response to Comments

Because of the large number of public comments, we normally receive on **Federal Register** documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the **DATES** section of this preamble, and, when we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

The Administrator of the Centers for Medicare & Medicaid Services (CMS), Chiquita Brooks-LaSure, having reviewed and approved this document, authorizes Trenesha Fultz-Mimms, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Trenesha Fultz-Mimms,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–10788]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by *May 30, 2024.*

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Prescription Drug and Health Care Spending; *Use:* On December 27, 2020, the Consolidated Appropriations Act, 2021 (CAA) was signed into law. Section 204 of Title II of Division BB of the CAA added parallel provisions at section 9825 of the Internal Revenue Code (the Code), section 725 of the Employee Retirement Income Security Act (ERISA), and section 2799A–10 of the Public Health Service Act (PHS Act) that require group health plans and health insurance issuers offering group or individual health insurance coverage to annually report to the Department of the Treasury, the Department of Labor (DOL), and the Department of Health and Human Services (HHS) (collectively, ''the Departments'') certain information about prescription drug and health care spending, premiums, and enrollment under the plan or coverage. This information will support the

development of public reports that will be published by the Departments on prescription drug reimbursements for plans and coverage, prescription drug pricing trends, and the role of prescription drug costs in contributing to premium increases or decreases under the plans or coverage. The 2021 interim final rules, ''Prescription Drug and Health Care Spending'' (2021 interim final rules), issued by the Departments and the Office of Personnel Management (OPM) implement the provisions of section 9825 of the Code, section 725 of ERISA, and section 2799A–10 of the PHS Act, as enacted by section 204 of Title II of Division BB of the CAA. OPM joined the Departments in issuing the 2021 interim final rules, requiring Federal Employees Health Benefits (FEHB) carriers to report information about prescription drug and health care spending, premiums, and plan enrollment in the same manner as a group health plan or health insurance issuer offering group or individual health insurance coverage.

The 2023 Prescription Drug Data Collection (RxDC) Reporting Instructions reflect changes for the 2023 reference year and beyond. As a result of removing first-year implementation costs and burdens that were incurred prior to 2024, it is estimated that there will be a decrease in total three-year average annual burden from 1,684,080 to 668,952. *Form Number:* CMS–10788 (OMB Control Number: 0938–1407); *Frequency:* Annually; *Affected Public:* Private Sector; *Number of Respondents:* 356; *Number of Responses:* 356; *Total Annual Hours:* 668,952. (For policy questions regarding this collection contact Christina Whitefield at 202–536–8676.)

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for Office of Management and Budget (OMB) Review; Generic Clearance for the Comprehensive Child Welfare Information System (CCWIS) Technical Assistance and Review Process (OMB #: 0970–0568)

AGENCY: Children's Bureau, Administration for Children and Families, U.S. Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Children's Bureau (CB), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS) is requesting a 3-year extension of the Generic Clearance for the Comprehensive Child Welfare Information System (CCWIS) Technical Assistance (TA) and Review Process, (OMB #0970–0568, expiration 4/30/2024) and all approved information collections under this generic. There are no changes requested to the terms of the umbrella generic or to the currently approved information collections.

DATES: *Comments due within 30 days of publication.* OMB must make a decision about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. You can also obtain copies of the proposed collection of information by emailing *infocollection@acf.hhs.gov.* Identify all emailed requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: The CCWIS Technical Assistance and Review information collection includes two components.

- The CCWIS Assessment Review (CAR) Process.
- TA tools for title IV–E agencies to self-assess their conformity to CCWIS project and design requirements at 45 CFR 1355.52–3.

The CCWIS requirements at 45 CFR 1355.55 require the review, assessment, and inspection of the planning, design, development, installation, operation, and maintenance of each CCWIS project on a continuing basis. The Advance Planning Document (APD) regulations at 45 CFR 95.621 require periodic reviews of state and local agency methods and practices to ensure information systems, including CCWIS, are utilized for purposes consistent with proper and efficient administration.

This request is for an extension with no changes to the umbrella generic and all currently approved information collections, which can be found here: *https://www.reginfo.gov/public/do/PRAICList?ref_nbr=202311-0970-010.*

Respondents: Title IV–E agencies under the Social Security Act.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–D–1243]

Safety Testing of Human Allogeneic Cells Expanded for Use in Cell-Based Medical Products; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft document entitled ''Safety Testing of Human Allogeneic Cells Expanded for Use in Cell-Based Medical Products; Draft Guidance for Industry.'' Allogeneic cells of human origin may be expanded in culture to manufacture medical products consisting of live cells, inactivated cells, cell lysates, or other cell-based materials such as cell-derived particles. The draft guidance document provides sponsors of allogeneic cell-based medical products recommendations for determining the appropriate cell safety testing to support an investigational new drug application (IND) or a biologics license application (BLA). Cell safety testing should be based on a risk analysis that considers the expansion potential of the cells, the reagents that are used to expand the cells in culture, and the number of individuals the cell-based medical product is capable of treating.

DATES: Submit either electronic or written comments on the draft guidance by July 29, 2024 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–D–1243 for ''Safety Testing of Human Allogeneic Cells Expanded for Use in Cell-Based Medical Products; Draft Guidance for Industry.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist the office in processing your requests. The draft guidance may also be obtained by mail by calling CBER at 1–800–835–4709 or 240–402–8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Tami Belouin, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft document entitled ''Safety Testing of Human Allogeneic Cells Expanded for Use in Cell-Based Medical Products; Draft Guidance for Industry.'' Allogeneic cells of human origin may be expanded in culture to manufacture medical products consisting of live cells, inactivated cells, cell lysates, or other cell-based materials such as cell-derived particles. The draft guidance document provides sponsors of allogeneic cell-based medical products recommendations for determining the appropriate cell safety testing to support an IND or a BLA. Cell safety testing should be based on a risk analysis that considers the expansion potential of the cells, the reagents that are used to expand the cells in culture, and the number of individuals the cell-based medical product is capable of treating. This guidance does not address the measurement or analysis of cell characteristics that may be relevant to biological activity.

Viral and microbial contamination is a potential risk for all cell-based medical products, especially when the cells are cultured extensively during manufacturing. Contamination may be present in the source cells, or the cells may become contaminated with adventitious agents during manufacturing. In addition, genomic changes that result in tumorigenic cells can occur during extensive culture.

The purpose of this draft guidance is to provide guidance on safety testing to assist manufacturers in addressing the requirements of 21 CFR 610.18(c)(1) and 312.23(a)(7), and other relevant regulations, as applicable, with respect to human allogeneic cells expanded for use in cell-based medical products. FDA's recommendations for cell safety testing reflect a risk-based approach that takes into consideration both the specific characteristics of the cells and their proposed use.

The recommendations in this draft guidance apply to cultured allogeneic cells, including cell banks, that are sources of the intended constituents of the final drug product, as well as combination products that contain an allogeneic cell or cell-based biologic constituent part in combination with a drug and/or device. The recommendations in this draft guidance also apply to genetically modified allogeneic cells that have been transduced with viral and/or plasmid vectors, and cells that have undergone genome editing. This guidance does not apply to cell substrates that are used during manufacturing of non-cell-based products such as viruses, gene therapy vectors, or recombinant proteins.

The draft guidance, when finalized, is intended to supplement the following two final guidances: ''Chemistry, Manufacturing, and Control (CMC) Information for Human Gene Therapy Investigational New Drug Applications (INDs); Guidance for Industry'' dated January 2020, and ''Guidance for FDA Reviewers and Sponsors: Content and Review of Chemistry, Manufacturing, and Control (CMC) Information for Human Somatic Cell Therapy Investigational New Drug Applications (INDs)'' dated April 2008.

Elsewhere in this issue of the **Federal Register**, FDA is announcing the availability of another human gene therapy final guidance document entitled ''Considerations for the Use of Human-and Animal-Derived Materials and Components in the Manufacture of Cell and Gene Therapy and Tissue-Engineered Medical Products; Draft Guidance for Industry.''

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''Safety Testing of Human Allogeneic Cells Expanded for Use in Cell-Based Medical Products.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this draft guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information in 9 CFR 113.47 and 113.53 have been approved under OMB control number 0579–0013; the collections of information in 21 CFR part 312 have been approved under OMB control number 0910–0014; the collections of information in 21 CFR part 601 have been approved under OMB control number 0910–0338; the collections of information in 21 CFR part 610 have been approved under OMB control number 0910–0139; and the collections of information in 21 CFR part 1271 have

been approved under OMB control number 0910–0543.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at *https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics/biologics-guidances,https://www.fda.gov/regulatory-information/search-fda-guidance-documents*, or *https://www.regulations.gov.*

Dated: April 25, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–D–1244]

Considerations for the Use of Human- and Animal-Derived Materials and Components in the Manufacture of Cell and Gene Therapy and Tissue-Engineered Medical Products; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft document entitled ''Considerations for the Use of Human- and Animal-Derived Materials and Components in the Manufacture of Cell and Gene Therapy and Tissue-Engineered Medical Products; Draft Guidance for Industry.'' The draft guidance document provides manufacturers of cellular and gene therapy (CGT) and tissue-engineered medical products (TEMPs) with recommendations regarding assuring the safety, quality, and identity of materials of human and animal origin used in the manufacture of these products. In addition, recommendations are provided regarding the chemistry, manufacturing, and control (CMC) information submitted in an investigational new drug application (IND) relating to the use of human- and animal-derived materials.

DATES: Submit either electronic or written comments on the draft guidance by July 29, 2024 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–D–1244 for ''Considerations for the Use of Human- and Animal-Derived Materials and Components in the Manufacture of Cell and Gene Therapy and Tissue-Engineered Medical Products; Draft Guidance for Industry.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist the office in processing your requests. The draft guidance may also be obtained by mail by calling CBER at 1–800–835–4709 or 240–402–8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Tami Belouin, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301,

Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft document entitled ''Considerations for the Use of Human- and Animal-Derived Materials and Components in the Manufacture of Cell and Gene Therapy and Tissue-Engineered Medical Products; Draft Guidance for Industry.'' The use of human- and animal-derived materials to manufacture CGT products and TEMPs raises several key issues to consider, including transmission of adventitious agents, material lot-to-lot consistency, and material identity, as well as general material qualification considerations. The draft guidance document provides manufacturers of CGT products and TEMPs with recommendations regarding assuring the safety, quality, and identity of materials of human and animal origin used in the manufacture of these products. In addition, recommendations are provided regarding the CMC information submitted in an IND relating to the use of human- and animal-derived materials.

Human- and animal-derived materials may be used directly during manufacturing of a drug substance and a drug product. In addition, human- and animal-derived materials may be used in the manufacture of reagents or substrates used in manufacturing, such as cell banks, viral stocks, antibodies, and other proteins. Some common examples of human- and animal-derived materials include human or animal blood, antibodies produced in sera from animal hybridoma cells, and cytokines produced in insect cell lines.

Use of human- and animal-derived materials during product manufacturing may increase risks of infectious disease transmission, and raises potential safety concerns, such as the possible introduction of adventitious agents or other impurities into CGT products and TEMPs. Human- and animal-derived materials can also contribute to product variability by affecting the reproducibility of the manufacturing process or the quality of the final product.

The draft guidance, when finalized, is intended to supplement the following two final guidances: ''Chemistry, Manufacturing, and Control (CMC) Information for Human Gene Therapy Investigational New Drug Applications (INDs); Guidance for Industry'' dated January 2020, and ''Guidance for FDA Reviewers and Sponsors: Content and Review of Chemistry, Manufacturing, and Control (CMC) Information for Human Somatic Cell Therapy Investigational New Drug Applications (INDs)'' dated April 2008.

Elsewhere in this issue of the **Federal Register**, FDA is announcing the availability of another human gene therapy final guidance document entitled ''Safety Testing of Human Allogeneic Cells Expanded for Use in Cell-Based Medical Products; Draft Guidance for Industry.''

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''Considerations for the Use of Human- and Animal-Derived Materials and Components in the Manufacture of Cell and Gene Therapy and Tissue-Engineered Medical Products.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information in 21 CFR part 312 pertaining to the submission of investigational new drug applications have been approved under OMB control number 0910–0014. The collections of information in 21 CFR part 211 pertaining to current good manufacturing practice for finished pharmaceuticals have been approved under OMB control number 0910–0139. The collections of information in 21 CFR part 601 pertaining to biologics license applications have been approved under OMB control number 0910–0338. The collections of information in 21 CFR parts 610, 630, and 640 pertaining to current good manufacturing practice for blood and blood components have been approved under OMB control number 0910–0116. The collections of information in 21 CFR part 1271 pertaining to human cells, tissues, and cellular and tissue-based products have been approved under OMB control number 0910–0543. The collections of information in FDA's guidance entitled ''Formal Meetings Between the FDA and Sponsors or Applicants'' have been approved under OMB control number 0910–0001. The collections of information in FDA's guidance entitled, ''PHS Guideline on Infectious Disease Issues in Xenotransplantation'' have been approved under OMB control number 0910–0456.

III. Electronic Access

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–1809]

Listening Session: Optimizing the Food and Drug Administration's Use of and Processes for Advisory Committees; Public Meeting; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public meeting; request for comments.

SUMMARY: The Food and Drug Administration (FDA, the Agency, or we) is announcing the following virtual public meeting entitled ''Listening Session: Optimizing FDA's Use of and Processes for Advisory Committees.'' The purpose of the listening session is to solicit feedback on the Agency's use of and processes for its advisory committee system.

DATES: The virtual listening session will be held on June 13, 2024, from 9 a.m. to 4 p.m. Eastern Daylight Time (EDT) or until after the last public commenter has spoken, whichever occurs first. Submit requests to make oral presentations at the listening session by 3 p.m. EDT, May 13, 2024. Electronic or written comments on this listening session must be submitted to the docket by August 13, 2024. See the **SUPPLEMENTARY INFORMATION** section for registration date and information.

ADDRESSES: Additional details, such as registration information, are available at: *https://www.fda.gov/news-events/fda-meetings-conferences-and-workshops/public-meeting-optimizing-fdas-use-*

and-processes-advisory-committees-06132024.

FDA is establishing a public docket for this listening session. You may submit comments as follows. Please note that late, untimely filed comments may not be considered. Electronic comments must be submitted on or before August 13, 2024. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. EDT on August 13, 2024. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2024–N–1809 for ''Listening Session: Optimizing FDA's Use of and Processes for Advisory Committees.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Jill Wasserman, Stakeholder Engagement Staff, Office of External Affairs, Office of the Commissioner, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 5367, Silver Spring, MD 20993, 240–623–6945, (this is not a toll-free number), email: *ACfeedback@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Advisory committees comprised of external advisors support FDA's mission of protecting and promoting the public health by providing us with independent advice on scientific, technical, and policy matters. FDA makes the final decisions on any matters considered by an advisory committee.

Committees are either mandated by statute or established at FDA's discretion. Advisory committees must meet the requirements set forth in the Federal Advisory Committee Act (5 U.S.C. 1001 *et seq.*). General procedures for FDA advisory committees are included in FDA's regulations at 21 CFR part 14.

The products that FDA regulates can impact the daily lives of the American public, and advisory committee are an important part of FDA's regulatory processes. While the Agency hears frequently from certain groups about advisory committees, we are interested in more broadly hearing from all parties interested in the advisory committee process and how advisory committees inform FDA's decisions. We are hosting this virtual public meeting to give an open and transparent platform for feedback on advisory committees.

II. Topics for Comment at the Public Meeting

We have listed the specific topics on which FDA is seeking input below. Input may be provided orally, during the virtual public meeting on June 13, 2024, or via written comments to the docket referenced above. In all cases, FDA encourages respondents to provide the specific rationale and basis for their comments, including any available supporting data and information. Respondents need not address all topics listed. Please identify your answers as responses to a specific topic.

A. Topic 1: Composition of Advisory Committees

1. The membership of a committee, which is set by each committee's charter, typically varies depending on the focus of the committee and topics for particular meetings. In some cases, the composition of a particular committee may be set by law.[1] To the extent there is flexibility in determining the composition of a committee or the expertise present at particular meetings:

a. What are the categories of expertise, viewpoints, or voices that are particularly important for representation on advisory committees?

[1] *E.g.,* 21 U.S.C. 387q (detailing requirements for composition of the Tobacco Products Scientific Advisory Committee).

b. What are the categories of expertise, viewpoints, or voices that may not be relevant given the topic or product type that is the focus of the committee?

2. Are there ways that FDA can better ensure that a variety of diverse perspectives and experiences are incorporated into advisory committee meetings, and if so, how?

3. In some cases, there is a legal requirement to include a consumer or patient representative on advisory committees. In other cases, the charter of an advisory committee may allow for there to be a consumer or patient representative who is a voting member of the committee. Consumers and patients may also participate in the open public hearing or submit written comments to the docket for a particular advisory committee meeting. Are there ways that FDA can better incorporate the consumer or patient voice into advisory committee meetings, and if so, how?

B. Topic 2: Service on an Advisory Committee as a Special Government Employee (SGE)

4. Service on an advisory committee as an SGE gives individuals an opportunity to provide advice and recommendations on decisions that are often critical to protecting public health, but we understand that administrative burdens (*e.g.,* amount of onboarding paperwork and processing time) are sometimes a deterrent to SGE service. FDA is exploring ways to streamline the administrative requirements on SGEs for initial hiring and meeting preparation. While FDA must remain in compliance with federal laws around federal service, how might we mitigate administrative barriers to service for SGEs?

5. How can FDA otherwise improve the experience of advisory committee members?

C. Topic 3: Public Perception and Understanding of Advisory Committees

6. What do you perceive to be the public's awareness and understanding of the role of FDA advisory committees?

7. What steps can FDA take to improve public awareness and understanding of advisory committees and their role in providing advice and recommendations for FDA to consider in its decision-making?

8. How can FDA better communicate with the public about advisory committee meetings?

9. FDA's regulatory decisions are often, but not always, aligned with advisory committee recommendations. What steps can FDA take to clarify for the public that its regulatory decisions take the committee's recommendation into account, but that the committee's recommendations are only one of several factors considered?

10. There appears to be a persistent misconception that advisory committee votes are the final decision of the Agency on the matter considered by the committee. Is there a way that FDA could adjust the processes for discussion and/or voting that would improve public understanding of how FDA receives external advice through the exchange of information at advisory committee meetings, and the ultimate import of the advisory committee's discussion?

III. Participating in the Public Meeting

Registration: To register for the free public meeting, please visit the following website: *https://www.fda.gov/news-events/fda-meetings-conferences-and-workshops/public-meeting-optimizing-fdas-use-and-processes-advisory-committees-06132024.* Non-speaking attendees may register any time before or during the listening session. Individuals who wish to make presentations at the public meeting must register by the deadline described below.

Registration is free and based on space availability, with priority given to early registrants. Persons interested in making an oral presentation at this public meeting must register by 3 p.m. EDT on May 13, 2024. Early registration is recommended. FDA may limit the number of participants from each organization due to technology constraints on the total number of participants. Registrants will receive confirmation when they have been accepted.

Information on requests for special accommodations due to a disability will be provided during registration.

Requests for Oral Presentations: During online registration you may indicate if you wish to present during the listening session and which topic(s) you wish to address. We will do our best to accommodate requests to make public comments. Individuals and organizations with common interests are urged to consolidate or coordinate their presentations and request time for a joint presentation. Following the deadline to register to make an oral presentation, we will determine the amount of time allotted to each presenter (which we expect to be approximately 5 minutes), the approximate time each oral presentation is to begin, and will select and notify participants by June 3, 2024. All requests to make oral presentations must be received by May 13, 2024, at 3 p.m. EDT. If selected for presentation, any presentation materials must be emailed to *ACfeedback@fda.hhs.gov* (see **FOR FURTHER INFORMATION CONTACT**) no later than June 7, 2024. No commercial or promotional material will be permitted to be presented or distributed at the public meeting.

Dated: April 23, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2023–N–4066]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Food and Drug Administration Recall Regulations

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Submit written comments (including recommendations) on the collection of information by May 30, 2024.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be submitted to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. The OMB control number for this information collection is 0910–0249. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Domini Bean, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–5733, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed

collection of information to OMB for review and clearance.

FDA Recall Regulations—21 CFR Part 7

OMB Control Number 0910–0249—Extension

This information collection helps support implementation of section 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 371) pertaining to product recalls, and regulations in 21 CFR part 7, subpart C (21 CFR 7.40 through 7.59) promulgated to clarify and explain associated practices and procedures by FDA. Sections 7.49, 7.50, and 7.59 (21 CFR 7.49, 7.50, and 7.59) of the regulations apply specifically to product recalls, which may be undertaken voluntarily and at any time by manufacturers and distributors, or at the request of the Agency.

Recalls are terminated when all reasonable efforts have been made to remove or correct the product in accordance with the recall strategy. The regulations also provide for corrective actions to be taken regarding violative products and establish specific guidelines that enable us to monitor and assess the effectiveness of a firm's efforts in this regard. The provisions include reporting to FDA on the initiation and termination of a recall, as well as submitting recall status reports and making required communication disclosures. The regulations also permit FDA to evaluate whether a recall has been completed in a manner which assures that unreasonable risk of substantial harm to the public health has been eliminated and that violative products have been corrected or removed from the market. Specific guidance regarding recalls is set forth in § 7.59, although product-specific guidance documents may also be developed to assist respondents to the information collection. Agency guidance documents are issued in accordance with our good guidance regulations in 21 CFR 10.115, which provide for public comment at any time.

Consistent with § 7.50, all recalls monitored by FDA are included in an ''Enforcement Report'' once they are classified and may be listed prior to classification when FDA determines the firm's removal or correction of a marketed product(s) meets the definition of a recall. Recall data in the Enforcement Report can be accessed through the weekly report publication, the quick and advanced search functionalities, and an Application Programming Interface (API). Instructions for navigating the report, accessing and using the API, and definitions of the report contents are found at *https://www.fda.gov/safety/enforcement-reports/enforcement-report-information-and-definitions.*

In the **Federal Register** of October 13, 2023, (88 FR 70995), we published a 60-day notice requesting public comment on the proposed collection of information. One comment was received offering general support for the information collection. The comment also suggested that reporting might be enhanced through the use of automated technology and that FDA monitor and utilize such technology to track improvement. Finally, the comment questioned the rationale for our estimate of the time necessary for preparing and submitting recall reports. Based on experience with compiling and submitting a report along with its attachments, the commenter communicated that less time was likely needed.

We appreciate this feedback and will continue to monitor burden associated with product recall activity. We also continue to look for ways to enhance our IT systems as our limited resources allow and public health priorities require. With regard to our current estimates, we note that our figures reflect what we believe to be the average burden incurred among more than 2,000 respondents, and in conjunction with more than 30,000 reports, annually, and therefore we have made no adjustment in our assumptions at this time.

We estimate the burden of the information collection as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Activity; 21 CFR section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Firm initiated recall; § 7.46	2,309	1	2,309	25	57,725
Termination of recall; § 7.55	2,128	1	2,128	10	21,280
Recall status reports; § 7.53	2,309	13	30,017	10	300,170
Total			34,454		379,175

[1] There are no capital or operating and maintenance costs associated with this collection.

A review of Agency data shows that 6,928 recall events were conducted during fiscal years 2020 through 2022, for an average of 2,309 recalls annually. We assume an average of 25 hours is needed to submit the requisite notification to FDA, for a total annual burden of 57,725 hours. Similarly, during the same period, 6,385 recalls were terminated, for an average of 2,128 recall terminations annually, and we assume an average of 10 hours is needed for the corresponding information collection activity. To determine burden associated with recall status reports, we multiplied the average number of annual respondents (2,309) by the average number of status reports per recall (13), producing the number annual submissions (30,017), which, assuming 10 hours per response, results in a burden of 300,170 hours annually.

TABLE 2—ESTIMATED THIRD-PARTY DISCLOSURE BURDEN [1]

Activity; 21 CFR section	Number of respondents	Number of disclosures per respondent	Total annual disclosures	Average burden per disclosure	Total hours
Recall communications; § 7.49	2,309	1,108	2,559,200	0.05 (3 minutes)	127,960

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

To determine burden associated with recall communication disclosures described in § 7.49, we calculated an average of 1,108 disclosures per recall and attribute 3 minutes for each disclosure, resulting in 127,960 burden hours annually. We provide no estimate for recordkeeping in § 7.59 as these activities are provided as guidance only, and we regard them to be usual and customary to these respondents.

Cumulatively, these adjustments reflect an overall decrease in our estimate, which we attribute to a corresponding decrease in FDA-regulated product recalls since our last evaluation of the information collection.

Dated: April 24, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute on Deafness and Other Communication Disorders; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel; Research Opportunities for New Investigators to Promote Workforce Diversity.

Date: May 23, 2024.

Time: 1:00 p.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852 (Virtual Meeting).

Contact Person: Andrea B. Kelly, Ph.D., Scientific Review Officer, National Institute on Deafness and Other Communication Disorders, National Institutes of Health, 6001 Executive Boulevard, Room 8351, Bethesda, MD 20892, (301) 451–6339, *kellya2@nih.gov.*

Name of Committee: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel; U01 Cooperative Agreement for Clinical Trials in Hearing Disorders.

Date: May 28, 2024.

Time: 11:30 a.m. to 1:30 p.m.

Agenda: To review and evaluate cooperative agreement applications.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852 (Virtual Meeting).

Contact Person: Sonia Elena Nanescu, Ph.D., Scientific Review Officer, Division of Extramural Activities, NIDCD, NIH, 6001 Executive Blvd., Suite 8300, Bethesda, MD 20892, (301) 496–8683, *sonia.nanescu@nih.gov.*

Name of Committee: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel; R25 Education Grant Review.

Date: May 29, 2024.

Time: 1:00 p.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852 (Virtual Meeting).

Contact Person: Andrea B. Kelly, Ph.D., Scientific Review Officer, National Institute on Deafness and Other Communication Disorders, National Institutes of Health, 6001 Executive Boulevard, Room 8351, Bethesda, MD 20892, (301) 451–6339, *kellya2@nih.gov.*

Name of Committee: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel; NIDCD Cooperative Agreement for Clinical Trials in Communication Disorders.

Date: May 31, 2024.

Time: 11:30 a.m. to 1:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852 (Virtual Meeting).

Contact Person: Sonia Elena Nanescu, Ph.D., Scientific Review Officer, Division of Extramural Activities, NIDCD, NIH, 6001 Executive Blvd., Suite 8300, Bethesda, MD 20892, (301) 496–8683, *sonia.nanescu@nih.gov.*

Name of Committee: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel; Inner Ear Imaging RFA.

Date: June 6, 2024.

Time: 1:30 p.m. to 3:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852 (Virtual Meeting).

Contact Person: Kausik Ray, Ph.D., Scientific Review Officer, National Institute on Deafness and Other Communication Disorders, National Institutes of Health, 6001 Executive Blvd., Rockville, MD 20852, 301–402–3587, *rayk@nidcd.nih.gov.*

Name of Committee: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel; Hearing and Balance Fellowships Review.

Date: June 12, 2024.

Time: 10:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852 (Virtual Meeting).

Contact Person: Kausik Ray, Ph.D., Scientific Review Officer, National Institute on Deafness and Other Communication Disorders, National Institutes of Health, 6001 Executive Blvd., Rockville, MD 20852, 301–402–3587, *rayk@nidcd.nih.gov.*

Name of Committee: Communication Disorders Review Committee.

Date: June 13–14, 2024.

Time: 8:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hyatt Regency, Bethesda, One Bethesda Metro Center, Bethesda, MD 20814 (In-Person and Virtual).

Contact Person: Katherine Shim, Ph.D., Scientific Review Officer, Division of Extramural Activities, NIDCD, NIH, 6001 Executive Blvd., Bethesda, MD 20892, 301–496–8683, *shimk@nidcd.nih.gov.*

Name of Committee: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel; Chemosensory Fellowship Review.

Date: June 17, 2024.

Time: 1:00 p.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852 (Virtual Meeting).

Contact Person: Andrea B. Kelly, Ph.D., Scientific Review Officer, National Institute on Deafness and Other Communication Disorders, National Institutes of Health, 6001 Executive Boulevard, Room 8351, Bethesda, MD 20892, (301) 451–6339, *kellya2@nih.gov.*

Name of Committee: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel; Voice, Speech, and Language Fellowship Review.

Date: June 18, 2024.

Time: 12:00 p.m. to 4:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852 (Virtual Meeting).

Contact Person: Sonia Elena Nanescu, Ph.D., Scientific Review Officer, Division of Extramural Activities, NIDCD, NIH, 6001 Executive Blvd., Suite 8300, Bethesda, MD 20892, (301) 496–8683, *sonia.nanescu@nih.gov.*

Name of Committee: National Institute on Deafness and Other Communication Disorders Special Emphasis Panel; NIDCD Clinical Research Center Grant (P50) Review.

Date: June 26, 2024.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Office of the Secretary, Muscular Dystrophy Coordinating Committee Call for Committee Membership Nominations

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The Office of the Secretary of the Department of Health and Human Services (HHS) is seeking nominations for one individual to serve as a non-Federal public member on the Muscular Dystrophy Coordinating Committee.

DATES: Nominations are due by 5:00 p.m. ET on May 31, 2024.

ADDRESSES: Nominations must be sent to Glen Nuckolls, Ph.D., by email to *nuckollg@ninds.nih.gov.*

FOR FURTHER INFORMATION CONTACT: Glen Nuckolls, Ph.D., by email to *nuckollg@ninds.nih.gov* or (301) 496–5745.

SUPPLEMENTARY INFORMATION: The Muscular Dystrophy Coordinating Committee (MDCC) is a Federal advisory committee established in accordance with the Muscular Dystrophy Community Assistance, Research, and Education Amendments of 2001 (MD–CARE Act; Pub. L. 107–84). The MD–CARE Act was reauthorized in 2008 by Public Law 110–361, and again in 2014 by Public Law 113–166. The MD–CARE Act specifies that the committee membership be composed of ⅔ governmental agency representatives and ⅓ public members. We are seeking nominations for one non-Federal public member at this time, due to turnover of committee membership. Nominations will be accepted until 5:00 p.m. ET on May 31, 2024.

Who is Eligible: Nominations are encouraged for new or reappointment of non-Federal public members who can provide the public and/or patient perspectives to discussions of issues considered by the Committee. Self-nominations and nominations of other individuals are both permitted. Only one nomination per individual is required. Multiple nominations for the same individual will not increase likelihood of selection. Non-Federal public members may be selected from the pool of submitted nominations or other sources as needed to meet statutory requirements and to form a balanced committee that represents the diversity within the muscular dystrophy communities. Nominations are especially encouraged from leaders or representatives of muscular dystrophy research, advocacy, or service organizations, as well as individuals with muscular dystrophy or their parents or guardians. In accordance with White House Office of Management and Budget guidelines (FR Doc. 2014–19140), federally-registered lobbyists are not eligible.

Committee Composition: The Department strives to ensure that the membership of HHS Federal advisory committees is fairly balanced in terms of points of view represented and the committee's function. Every effort is made to ensure that the views of all genders, all ethnic and racial groups, and people with disabilities are represented on HHS Federal advisory committees and, therefore, the Department encourages nominations of qualified candidates from these groups. The Department also encourages geographic diversity in the composition of the Committee. Appointment to this Committee shall be made without discrimination on the basis of age, race, ethnicity, gender, sexual orientation, disability, and cultural, religious, or socioeconomic status. Requests for reasonable accommodation to enable participation on the Committee should be indicated in the nomination submission.

Member Terms: Non-Federal public members of the Committee serve for a term of three years and may serve for an unlimited number of terms if reappointed. Members may serve after the expiration of their terms, until their successors have taken office.

Meetings and Travel: As specified by Public Law 113–166, the MDCC ''shall meet no fewer than two times per calendar year.'' Travel expenses are provided for non-Federal public Committee members to facilitate attendance at in-person meetings. Members are expected to make every effort to attend all full committee meetings, twice per year, either in person or via remote access. Participation in relevant subcommittee, working and planning group meetings, and workshops, is also encouraged.

Submission Instructions and Deadline: Nominations are due by 5:00 p.m. ET on May 31, 2024, and should be sent to Glen Nuckolls, Ph.D., by email to *nuckollg@ninds.nih.gov.* Nominations must include contact information for the nominee, a current curriculum vitae or resume of the nominee, and a paragraph describing the qualifications of the person to represent some portion(s) of the muscular dystrophy research, advocacy, and/or patient care communities.

More information about the MDCC is available at *https://mdcc.nih.gov/.*

Dated: April 24, 2024.

The information collection is published in

the **Federal Register** to obtain comments from the public and affected agencies.

DATES: Comments are encouraged and must be submitted (no later than May 30, 2024) to be assured of consideration.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Please submit written comments and/or suggestions in English. Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional PRA information should be directed to Seth Renkema, Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection, Office of Trade, Regulations and Rulings, 90 K Street NE, 10th Floor, Washington, DC 20229–1177, Telephone number 202–325–0056 or via email *CBP_PRA@cbp.dhs.gov.* Please note that the contact information provided here is solely for questions regarding this notice. Individuals seeking information about other CBP programs should contact the CBP National Customer Service Center at 877–227–5511, (TTY) 1–800–877–8339, or CBP website at *https://www.cbp.gov/.*

SUPPLEMENTARY INFORMATION: CBP invites the general public and other Federal agencies to comment on the proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). This proposed information collection was previously published in the **Federal Register** (89 FR 14672) on February 28, 2024, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.8. Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Regulations Relating to Copyrights and Trademarks.

OMB Number: 1651–0123.

Form Number: N/A.

Current Actions: Revision.

Type of Review: Revision.

Affected Public: Businesses.

Abstract: Title 19 of the United States Code section 1526(e) prohibits the importation of articles that bear a mark that is a counterfeit of a trademark that has been registered with the United States Patent and Trademark Office (USPTO) and subsequently recorded with U.S. Customs and Border Protection (CBP) through the e-Recordation Program. *https://iprr.cbp.gov/s/.* Pursuant to 15 U.S.C. 1124, the importation of articles that bear a mark that infringes a trademark or trade name that has been recorded with CBP is restricted pursuant to 19 U.S.C. 1595a(c)(2)(C). Likewise, under 17 U.S.C. 602 and 17 U.S.C. 603, the importation of articles that constitute a piratical copy of a registered copyrighted work that has subsequently been recorded with CBP is also prohibited. Both 15 U.S.C. 1124 and 17 U.S.C. 602 authorize the Secretary of the Treasury to prescribe by regulation the recordation of trademarks, trade names and copyrights with CBP. Additional rulemaking authority in this regard is conferred by CBP's general rulemaking authority as found in 19 U.S.C. 1624.

CBP officers enforce recorded trademarks, trade names and copyrights at all U.S. Ports of Entry. The information that respondents must submit in order to seek the assistance of CBP to protect against infringing imports is specified for trademarks under 19 CFR 133.2 and 133.3, and the information to be submitted for copyrights is specified under 19 CFR 133.32 and 133.33. Trademark, trade name, and copyright owners seeking border enforcement of their intellectual property rights provide information to CBP beyond that which they submitted to either the U.S. Patent and Trademark Office or the U.S. Copyright Office to obtain their registration. This revision adds the new e-Recordation online application, located at *https://iprr.cbp.gov/.*

E-Recordation applicants may provide as much additional information as they would like that would aid CBP in authenticating their genuine merchandise and distinguishing it from non-genuine merchandise, such as a Product Identification or Authentication Guides, lists of licensees and authorized manufacturers, and Applicants can supplement their application with additional information at any time by emailing the e-Recordation team at *IPRRQuestions@cbp.dhs.gov.* All information provided to CBP is housed in a secure database that can be viewed by CBP and Homeland Security Investigations personnel with a need to know. Limited information regarding the recorded trademark, trade name or copyright is published online to inform the public of which registrations are receiving border enforcement. *https://iprs.cbp.gov/s/.*

On December 15, 2017, CBP published a final rule in the **Federal Register** (82 FR 59511) regarding Donations of Technology and Related Support Services to Enforce Intellectual Property Rights. The final rule added 19 CFR 133.61 in a Subpart H to the CBP regulations which authorizes CBP to accept donations of hardware, software, equipment, and similar technologies, as well as related support services and training, from private sector entities, for the purpose of assisting CBP in enforcing intellectual property rights (IPR). A donation offer must be submitted to CBP either via email, to *dap@cbp.dhs.gov,* or mailed to the attention of the Executive Assistant Commissioner, Office of Field Operations, or his/her designee.

The donation offer must describe the proposed donation in sufficient detail to enable CBP to determine its compatibility with existing CBP technologies, networks, and facilities (*e.g.* operating system or similar requirements, power supply requirements, item size and weight, *etc.*). The donation offer must also include information pertaining to the donation's scope, purpose, expected benefits, intended use, costs, and attached conditions, as applicable, that is sufficient to enable CBP to evaluate the donation and make a determination as to whether to accept it. CBP will notify the donor, in writing, if additional information is requested or if CBP has determined that it will not accept the donation. If CBP accepts a donation, CBP will enter into a signed, written agreement with an authorized representative of the donor. The agreement must contain all applicable terms and conditions of the donation.

The respondents to this information collection are members of the trade community who are familiar with CBP regulations.

Type of Information Collection: IPR Recordation Application.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[OMB Control Number 1651–0111]

Agency Information Collection Activities; Revision; Arrival and Departure Record and Electronic System for Travel Authorization (ESTA)

AGENCY: U.S. Customs and Border Protection (CBP), Department of Homeland Security.

ACTION: 30-Day notice and request for comments.

SUMMARY: The Department of Homeland Security, U.S. Customs and Border Protection (CBP) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). The information collection is published in the **Federal Register** to obtain comments from the public and affected agencies.

DATES: Comments are encouraged and must be submitted (no later than May 30, 2024) to be assured of consideration.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Please submit written comments and/or suggestions in English. Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Requests for additional PRA information should be directed to Seth Renkema, Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection, Office of Trade, Regulations and Rulings, 90 K Street NE, 10th Floor, Washington, DC 20229–1177, Telephone number 202–325–0056 or via email *CBP_PRA@cbp.dhs.gov.* Please note that the contact information provided here is solely for questions regarding this notice. Individuals seeking information about other CBP programs should contact the CBP National Customer Service Center at 877–227–5511, (TTY) 1–800–877–8339, or CBP website at *https://www.cbp.gov/.*

SUPPLEMENTARY INFORMATION: CBP invites the general public and other Federal agencies to comment on the proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). This proposed information collection was previously published in the **Federal Register** (89 FR 14083) on February 26, 2024, allowing for a 60-day comment period. This notice allows for an additional 30 days for public comments. This process is conducted in accordance with 5 CFR 1320.8. Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Arrival and Departure Record (I–94/I–94W) and Electronic System for Travel Authorization (ESTA).

OMB Number: 1651–0111.

Form Number: I–94, I–94W.

Current Actions: Revision.

Type of Review: Revision.

Affected Public: Individuals.

Abstract: CBP is implementing a new capability within CBP One™ to allow nonimmigrants who are subject to Form I–94 (''I–94'') requirements, and who are departing the United States, to voluntarily provide biographic data, facial images, and geolocation to provide evidence of that departure. This collection is a part of CBP's critical efforts in fulfilling DHS's mandate to collect biometric information from departing nonimmigrants and CBP's plans to fully automate I–94 information collection. This capability will close the information gap on nonimmigrant entries and exits by making it easier for nonimmigrants subject to I–94 requirements to report their exit to CBP after their departure from the United States. It will also create a biometrically confirmed, and thereby more accurate, exit record for such nonimmigrants leaving the United States.

Certain nonimmigrants subject to I–94 requirements may voluntarily submit their facial images using the CBP One™ mobile application (the app) in order to report their exit from the United States.

Nonimmigrants may use the app to voluntarily submit their biographic information from their passports, or other traveler documents after they have exited the United States.

Nonimmigrants will then use the app to take a ''selfie'' picture. CBP will utilize geolocation services to confirm that the nonimmigrant is outside the United States as well as run ''liveness detection'' software to determine that the selfie photo is a live photo, as opposed to a previously uploaded photo. The app will then compare the live photo to facial images for that person already retained by CBP to confirm the exit biometrically.

CBP will utilize this information to help reconcile a nonimmigrant's exit with that person's last arrival. The report of exit will be recorded as a biometrically confirmed departure in the Arrival and Departure Information System (ADIS) maintained by CBP. Nonimmigrants may utilize this information as proof of departure, which is most relevant in the land border environment, but may be utilized for departures via air and sea if desired.

As it pertains to the land environment, there is no requirement for nonimmigrants leaving the United States to report their departure to CBP. However, as described further below, CBP encourages nonimmigrants to report their departure to CBP when they exit, so that CBP can record their exit from the United States.

Although CBP routinely collects biometric data from nonimmigrants entering the United States, there currently is no comprehensive system in place to collect biometrics from nonimmigrants departing the country. Collecting biometrics at both arrival and departure will thus enable CBP and DHS to know with better accuracy whether nonimmigrants are departing the country when they are required to depart. Further, collecting biometric data will help to reduce visa or travel document fraud and improve CBP's ability to identify criminals and known or suspected terrorists. CBP has been testing various options to collect biometrics at departure in the land and air environments since 2004.

At the same time, CBP is also now working to fully automate all I–94 processes. Currently CBP issues electronic I–94s to most nonimmigrants entering the United States at land border ports of entry.

Currently CBP does not routinely staff exit lanes at land border ports of entry, nor does CBP possess a single process for nonimmigrants subject to I–94 requirements to voluntarily report their departure. Nonimmigrants can currently report their departure by any one of the following means: (1) stopping at a land border port of entry and presenting a printed copy of their electronic I–94 to a CBP officer; (2) stopping at a land border port of entry and placing a printed copy of their electronic I–94 in a drop box provided by the port where available; (3) if exiting by land on the northern U.S. border, by turning in a paper copy of their electronic I–94 to the Canadian Border Services Agency (CBSA) when entering Canada (CBSA will then return the form to CBP); or (4) mailing a copy of their electronic I–94 and other proof of departure to CBP.

The current options are burdensome and, in many cases, impractical or inconvenient due to the location and design of the ports. They also lead to haphazard record keeping and inaccurate data collection with respect to the nonimmigrants leaving the country. Most land border ports of entry provide limited access to the port for vehicles exiting the United States and have minimal parking available to the public. For this reason, most nonimmigrants do not report their departure when exiting at land border ports of entry. In those cases, CBP has no way to confirm that a nonimmigrant has exited the United States at the time of departure. CBP often discovers that a nonimmigrant has previously left the United States at a later date, when that same nonimmigrants attempts to re-enter the United States. Having proof of an exit via the CBP One™ app would provide nonimmigrants some information for CBP officers to consider in the event the officer is unsure whether a nonimmigrant complied with the I–94 requirements provided upon their previous entry.

In additonal, CBP intends to update the ESTA application website to require applicants to provide a photograph of their face, or ''selfie'', in addition to the photo of the passport biographical page. These photos would be used to better ensure that the applicant is the rightful possessor of the document being used to obtain an ESTA authorization.

Currently, applicants are allowed to have a third party apply for ESTA on their behalf. While this update would not remove that option, third parties, such as travel agents or family members, would be required to provide a photograph of the ESTA applicant.

The ESTA Mobile application currently requires applicants to take a live photograph of their face, which is compared to the passport photo collected during the ESTA Mobile application process. This change will better align the application processes and requirements of ESTA website and ESTA Mobile applicants.

BILLING CODE 9111–14–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_ES_FRN_MO4500178579]

Notice of Intent To Prepare an Environmental Impact Statement and To Initiate Scoping for Federal Coal Lease Applications for Two Leases To Expand Operations at the Warrior Met Coal Mines, Tuscaloosa County, Alabama

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: In compliance with the National Environmental Policy Act of 1969, as amended (NEPA), the Bureau of Land Management (BLM) Southeastern States District Office, Flowood, Mississippi, intends to prepare an Environmental Impact Statement (EIS) to consider the effects of offering two Federal coal leases by holding a competitive lease sale for each respective Lease By Application (LBA) received from Warrior Met Coal, Inc. This notice is announcing the beginning of the scoping process to solicit public comments and identify issues.

DATES: This notice initiates the public-scoping process for the EIS. The BLM requests that the public submit comments concerning the scope of the analysis, potential alternatives, and identification of relevant information, and studies by May 30, 2024. To give the BLM enough time to consider comments in the Draft EIS, please ensure your comments are received by BLM before the close of the 30-day scoping period or 15 days after the last public meeting, whichever is later.

ADDRESSES: You may submit comments related to the Warrior Met Coal Mines EIS by any of the following methods:

- *Website: https://eplanning.blm.gov/eplanning-ui/project/2031600/510.*
- *Mail:* Bureau of Land Management, Attn: Warrior Met Coal Mines EIS, 273 Market Street, Flowood, MS 39232.

Documents pertinent to this proposal may be examined online at *https://eplanning.blm.gov/eplanning-ui/home* and by mail at the BLM Southeastern States District Office: 273 Market Street, Flowood, MS 39232.

FOR FURTHER INFORMATION CONTACT: Bob Swithers, BLM Southeastern States District Manager, telephone: 601–919–4696; address: 273 Market Street, Flowood, MS 39232; email: *rswithers@blm.gov.* Contact Mr. Swithers to have your name added to our mailing list. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Mr. Swithers. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The BLM Southeastern States District Office received two Federal LBAs to expand current mining operations located in Tuscaloosa County, Alabama. Warrior Met Coal Mining, LLC, proposes to expand Mine No. 4 (ALES–055797), and Warrior Met Coal BC, LLC, proposes to expand Blue Creek Mine No. 1 (ALES–056519). Warrior Met Coal Mining, LLC, and Warrior Met Coal BC, LLC, are subsidiaries of Warrior Met Coal, Inc., and will henceforth be referred to collectively as ''Warrior Met Coal.''

The LBA for the Mine No. 4 expansion (ALES–055797) consists of approximately 5,720 acres of private surface lands (*i.e.,* split-estate lands) with an estimated 24 million short tons of recoverable Federal coal. The LBA for the Blue Creek Mine No. 1 expansion (ALES–056519) consists of approximately 8,320 acres of split-estate lands with an estimated 33.5 million short tons of recoverable Federal coal. The combined proposed lease area for both applications includes approximately 14,040 acres of split-estate lands. Warrior Met Coal is seeking to obtain leases for the extraction of metallurgical coal resources by means of underground longwall mining techniques.

The BLM initially began preparing an environmental assessment to evaluate the LBA for Mine No. 4. Upon further review of the potential effects of the proposed action for Mine No. 4 expansion and, given the proximity to the Blue Creek Mine No. 1 expansion LBA, the BLM determined that an EIS is warranted, and that both LBAs would be evaluated under a single EIS. This notice of intent initiates the EIS process to evaluate both LBAs and terminates the environmental assessment process evaluating the LBA for Mine No. 4.

Purpose and Need for the Proposed Action

The purpose of the project is to provide for responsible development of coal resources in the Warrior Basin by responding to two Federal coal LBAs submitted by Warrior Met Coal to access a total of approximately 14,040 acres of Federal minerals underlying split-estate lands in Tuscaloosa County, Alabama. The applications propose to extract approximately 57.5 million tons of recoverable Federal metallurgical coal reserves.

The need is established by the BLM's responsibility under the Mineral Leasing Act of 1920, as amended; the Mineral Leasing Act for Acquired Lands of 1947, as amended; and the Federal Coal Leasing Amendments Act of 1976, as amended, to respond to two Federal coal LBAs submitted by Warrior Met Coal (ALES–055797 and ALES–056519) which seek to expand two existing underground mines.

Preliminary Proposed Action, and Alternatives

The proposed action is to offer for lease approximately 5,720 acres of Federal minerals for Mine No. 4 (ALES–055797) and 8,320 acres of Federal minerals for Blue Creek Mine No. 1 (ALES–056519) with the intent of allowing for the proposed extraction of a combined estimated 57.5 million tons of metallurgical coal reserves by means of underground longwall mining techniques. The surface of the lands identified in both LBAs are privately owned. Implementation of the proposed action would result in the BLM holding two competitive lease sales, one for each LBA.

The BLM will also evaluate the no action alternative under which the BLM would deny the two LBAs and the land would not be offered for lease. The BLM welcomes comments on all preliminary alternatives as well as suggestions for additional alternatives.

Summary of Expected Impacts

The proposed action would authorize approximately 57.5 million tons of Federal metallurgical coal to be leased. A decision to lease the proposed lands would not provide the successful bidder with an authorization to engage in mining activities. However, mining is a logical extension of leasing the Federal coal reserves. Potential impacts of the proposed action include, but are not limited to, impacts to air quality, including greenhouse gas emissions; impacts on populations with environmental justice concerns; impacts from potential subsidence from underground mining; and impacts to groundwater and surface water quality.

Anticipated Permits and Authorizations

If the proposed action is approved, the BLM would hold two competitive lease sales, one for each LBA, as outlined in 43 CFR part 3420—Competitive Leasing. Upon completion of each competitive lease sale, the BLM would award the leases to the successful bidder(s). Once a lease is issued, the Alabama Surface Mining Commission (ASMC) would be responsible for permitting the mining operations. The ASMC would determine whether to issue a permit and, if so, what terms and conditions to apply, in accordance with relevant policies and authorities. The Office of Surface Mining Reclamation and Enforcement (OSMRE) would prepare a mine plan decision document and make a recommendation to the Assistant Secretary for Land and Minerals Management regarding whether to approve, approve with conditions, or disapprove the mine plan.

Schedule for the Decision-Making Process

The BLM will provide additional opportunities for public participation consistent with the NEPA process, including a 45-day comment period on the Draft EIS. The Draft EIS is anticipated to be available for public review in autumn 2024, and the Final EIS is anticipated to be released in summer 2025 with a Record of Decision in early 2026.

Public Scoping Process

This notice of intent initiates the scoping period. The BLM requests that the public submit comments concerning the scope of the analysis, potential alternatives, and identification of relevant information, and studies by May 30, 2024. The BLM does not intend to hold any public meetings, in-person or virtual, during the public scoping period. If the BLM later determines that it will hold public meetings, the specific date(s) and location(s) of any meeting will be announced in advance through the ePlanning project page (see **ADDRESSES**) and local media.

Cooperating Agencies

OSMRE and the ASMC are cooperating agencies.

Responsible Official

The BLM Eastern States Director is the deciding official on the LBAs submitted by Warrior Met Coal.

Nature of Decision To Be Made

The responsible official will determine whether to offer lands identified in the LBAs ALES–055797 and ALES–056519 for Federal coal leasing and, if approved, what special stipulations to apply to the coal lease(s).

Additional Information

The BLM will identify, analyze, and consider mitigation to address the reasonably foreseeable impacts to resources from the proposed action and all analyzed reasonable alternatives and, in accordance with 40 CFR 1502.14(e), include appropriate mitigation measures not already included in the proposed action or alternatives. Mitigation may include avoidance, minimization, rectification, reduction or elimination over time, and compensation; and it may be considered at multiple scales, including the landscape scale.

The BLM will use and coordinate the NEPA process to help support compliance with applicable procedural requirements under the Endangered Species Act (16 U.S.C. 1536) and Section 106 of the National Historic Preservation Act (54 U.S.C. 306108), as provided in 36 CFR 800.2(d)(3), including public involvement requirements of Section 106. The information about historic and cultural resources and threatened and endangered species within the area potentially affected by the proposed project will assist the BLM in identifying and evaluating impacts to such resources.

The BLM will consult with Indian Tribal Nations on a government-to-government basis in accordance with Executive Order 13175, BLM Manual Section 1780, and other Departmental policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State, and local agencies, along with Indian Tribal Nations and stakeholders that may be interested in or affected by the two proposed LBAs for Federal coal that the BLM is evaluating, are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM to participate in the development of the environmental analysis as a cooperating agency.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NRNHL–DTS#–37865; PPWOCRADI0, PCU00RP14.R50000]

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting electronic comments on the significance of properties nominated before April 20, 2024, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted electronically by May 15, 2024.

ADDRESSES: Comments are encouraged to be submitted electronically to *National_Register_Submissions@nps.gov* with the subject line ''Public Comment on <property or proposed district name, (County) State>.'' If you have no access to email, you may send them via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C Street NW, MS 7228, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Sherry A. Frear, Chief, National Register of Historic Places/National Historic Landmarks Program, 1849 C Street NW, MS 7228, Washington, DC 20240, *sherry_frear@nps.gov,* 202–913–3763.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before April 20, 2024. Pursuant to Section 60.13 of 36 CFR part 60, comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we

cannot guarantee that we will be able to do so.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

Office of Natural Resources Revenue

[Docket No. ONRR–2011–0025; DS63644000 DR2000000.CH7000 234D1113RT, OMB Control Number 1012–0003]

Agency Information Collection Activities: 30 CFR Parts 1227, 1228, and 1229, Delegated and Cooperative Activities With States and Indian Tribes

AGENCY: Office of Natural Resources Revenue (''ONRR''), Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (''PRA''), ONRR is proposing to renew an information collection. ONRR uses the information collected in this Information Collection Request (''ICR'') to: (1) review and approve delegation proposals from States seeking to perform royalty management functions, and (2) prepare a cooperative agreement with a State or Indian Tribe seeking to perform royalty audits.

DATES: Interested persons are invited to submit comments on or before July 1, 2024.

ADDRESSES: All comment submissions must (1) reference ''OMB Control Number 1012–0003'' in the subject line; (2) be sent to ONRR before the close of the comment period listed under **DATES**; and (3) be sent through the following method:

Electronically via the Federal eRulemaking Portal: Please visit https://www.regulations.gov. In the Search Box, enter the Docket ID Number for this ICR renewal (''ONRR–2011–0025'') and click ''search'' to view the publications associated with the docket folder. Locate the document with an open comment period and click the ''Comment Now!'' button. Follow the prompts to submit your comment prior to the close of the comment period.

Docket: To access the docket folder to view the ICR **Federal Register** publications, go to *https://www.regulations.gov* and search ''ONRR–2011–0025'' to view renewal notices recently published in the **Federal Register**, publications associated with prior renewals, and applicable public comments received for this ICR. ONRR will make the comments submitted in response to this notice available for public viewing at *https://www.regulations.gov.*

OMB ICR Data: You may also view information collection review data for this ICR, including past OMB approvals, at *https://www.reginfo.gov/public/do/PRASearch.* Under the ''OMB Control Number'' heading enter ''1012–0003'' and click the ''Search'' button located at the bottom of the page. To view the ICR renewal or OMB approval status, click on the latest entry (based on the most recent date). On the ''View ICR—OIRA Conclusion'' page, check the box next to ''All'' to display all available ICR information provided by OMB.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, please contact Mr. Peter Hanley, State and Tribal Royalty Audit Committee, ONRR, by email to *Peter.Hanley@onrr.gov* or by telephone at (303) 231–3721.

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make

international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: Pursuant to the PRA, 44 U.S.C. 3501, *et seq.,* and 5 CFR 1320.5, all information collections, as defined in 5 CFR 1320.3, require approval by OMB. ONRR may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

As part of ONRR's continuing effort to reduce paperwork and respondent burdens, ONRR is inviting the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information in accordance with the PRA and 5 CFR 1320.8(d)(1). This helps ONRR to assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand ONRR's information collection requirements and provide the requested data in the desired format.

ONRR is especially interested in public comments addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of ONRR's estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. ONRR will include or summarize each comment in its request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, ONRR cannot guarantee that it will be able to do so.

Abstract: (a) General Information: The Secretary of the United States Department of the Interior (''Secretary'') is responsible for mineral resource development on Federal and Indian lands and the Outer Continental Shelf. Laws pertaining to Federal and Indian mineral leases are posted at *https://onrr.gov/references/statutes.* Pursuant to the Federal Oil and Gas Royalty Management Act of 1982 (''FOGRMA'') and other laws, the Secretary's responsibilities include maintaining a comprehensive inspection, collection, and fiscal and production accounting and auditing system that: (1) accurately determines mineral royalties, interest, and other payments owed, (2) collects and accounts for such amounts in a timely manner, and (3) disburses the funds collected. *See* 30 U.S.C. 1701 and 1711. ONRR performs these royalty and revenue management responsibilities for the Secretary. *See* Secretarial Order No. 3306.

Congress enacted FOGRMA, in part, ''to effectively utilize the capabilities of the States and Indian Tribes in developing and maintaining an efficient and effective Federal royalty management system.'' 30 U.S.C. 1701(b)(5). Relevant to this ICR, FOGRMA provides the Secretary with authority to: (1) review and approve delegation proposals from states seeking to perform royalty management functions, and (2) prepare a cooperative agreement with a State or Indian Tribe seeking to perform royalty audits. 30 U.S.C. 1732 and 1735. Under 30 U.S.C. 1735, the Secretary can delegate all or part of the authority and responsibility to: ''(1) conduct inspections, audits, and investigations; (2) receive and process production and financial reports; (3) correct erroneous reporting data; (4) perform automated verification; and (5) issue demands, subpoenas, and orders to perform restructured accounting, for royalty management enforcement purposes . . . to any State with respect to all Federal land within the State.'' 30 U.S.C. 1735(a)(1)–(5).

Through cooperative agreements, pursuant to 30 U.S.C. 1732, oil or gas royalty management information is shared, allowing a State or Indian Tribe to carry out certain inspection, auditing, investigation, and limited enforcement activities in cooperation with the Secretary. Several States and Indian Tribes are working partners with ONRR and are an integral part of the overall onshore and offshore compliance effort. Through the Appropriations Act of 1992 (Pub. L. 102–154), codified at 30 U.S.C. 196, the Secretary's authority for oil and gas leases was extended to other energy and mineral leases, including coal, geothermal steam, and leases subject to 43 U.S.C. 1337(g) of the Outer Continental Shelf Lands Act (''OCSLA'') as discussed further below.

(b) Information Collections: This ICR covers the paperwork requirements under 30 CFR parts 1227, 1228, and 1229. This collection of information is necessary for States and Indian Tribes to conduct audits and related investigations of Federal and Indian oil, gas, coal, other solid minerals, and geothermal royalty revenues from Federal and Tribal leased lands. ONRR uses the information collected to: (1) review and approve delegation proposals from States seeking to perform royalty management functions, and (2) prepare a cooperative agreement with a State or Indian Tribe seeking to perform royalty audits. The requirements of 30 CFR parts 1227, 1228, and 1229 are:

(1) 30 CFR part 1227—Delegation to States. Part 1227 governs the delegation of certain Federal royalty management functions to a State under 30 U.S.C. 1735, for Federal oil and gas leases covering Federal lands within the State. This part also governs the delegation of audit and investigative functions to a State for Federal geothermal leases or solid mineral leases covering Federal lands within the State (30 U.S.C. 196), or leases covering lands offshore of the State subject to section 8(g) of the OCSLA (43 U.S.C. 1337(g)). To be considered for such delegation, a State must submit a written proposal to ONRR, which ONRR must approve. Following the delegation process, 30 CFR part 1227 outlines State responsibilities, compensation, performance reviews, and the process for terminating a delegation.

(2) 30 CFR part 1228—Cooperative Activities with States and Indian Tribes. FOGRMA (30 U.S.C. 1732) authorizes the Secretary to enter into a cooperative agreement with a State or Indian Tribe to share oil and gas royalty management information, and to carry out inspection, audit, investigation, and enforcement activities on Federal and Indian lands. 30 CFR part 1228 implements this provision and set forth the requirements and procedures for entering into a cooperative agreement, the terms of such agreements, and subsequent responsibilities that must be carried out under the cooperative agreement. Through the Secretary's delegation of the authority contained in 30 CFR 1228.5(a), a State or Indian Tribe may enter into a cooperative agreement with ONRR's Director to carry out audits and related investigations of their respective leased lands. To enter into a cooperative agreement, a State or Indian Tribe must submit a written proposal to ONRR. The proposal must outline the activities that

the State or Indian Tribe will undertake and must present evidence that the State or Indian Tribe can meet the standards of the Secretary to conduct these activities. The State or Indian Tribe also must submit an annual work plan and budget, as well as quarterly reimbursement vouchers.

(3) 30 CFR part 1229—Delegation to States. Part 1229 governs delegations to a State to conduct audits and related investigations for Federal lands within the State, and for Indian lands for which the State has received permission from the respective Indian Tribes or allottees to carry out audit activities delegated to the State under 30 U.S.C. 1735. 30 CFR 1229.4. Under 30 CFR part 1229 the State must receive the Secretary's delegation of authority and submit annual audit work plans detailing its audits and related investigations, annual budgets, and quarterly reimbursement vouchers. The State also must maintain records.

Title of Collection: 30 CFR parts 1227, 1228, and 1229, Delegated and Cooperative Activities with States and Indian Tribes.

OMB Control Number: 1012–0003.

Bureau Form Number: None.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: States and Indian Tribes.

Total Estimated Number of Annual Respondents: 9 States and 6 Indian respondents.

Total Estimated Number of Annual Responses: 210.

Estimated Completion Time per Response: 79.51 hours.

Total Estimated Number of Annual Burden Hours: 16,697 hours.

The average completion time is 79.51 hours per response. The average completion time is calculated by dividing the estimated annual burden hours (16,697) by the annual responses (210) to obtain the total annual burden hours (79.51).

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: Annual.

Total Estimated Annual Non-Hour Burden Cost: ONRR identified no ''non-hour cost'' burden associated with this collection of information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the PRA (44 U.S.C. 3501, *et seq.*).

Howard M. Cantor,

Director, Office of Natural Resources Revenue.

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

Notice on Outer Continental Shelf Oil and Gas Lease Sales

AGENCY: Bureau of Ocean Energy Management, Interior.

ACTION: List of restricted joint bidders.

SUMMARY: Pursuant to the Energy Policy and Conservation Act of 1975 and the Bureau of Ocean Energy Management's (BOEM) regulatory restrictions on joint bidding, BOEM is publishing this list of restricted joint bidders. Each entity within one of the following groups is restricted from bidding with any entity in any of the other groups listed below at Outer Continental Shelf oil and gas lease sales held during the bidding period of May 1, 2024, through October 31, 2024.

DATES: This list of restricted joint bidders covers the bidding period of May 1, 2024, through October 31, 2024, and succeeds all prior published lists.

SUPPLEMENTARY INFORMATION:

Group I

BP America Production Company
BP Exploration & Production Inc.

Group II

Chevron Corporation
Chevron U.S.A. Inc.
Chevron Midcontinent, L.P.
Unocal Corporation
Union Oil Company of California
Pure Partners, L.P.

Group III

Eni Petroleum Co. Inc.
Eni Petroleum US LLC
Eni Oil US LLC
Eni Marketing Inc.
Eni BB Petroleum Inc.
Eni US Operating Co. Inc.
Eni BB Pipeline LLC

Group IV

Equinor ASA
Equinor Gulf of Mexico LLC
Equinor USA E&P Inc.

Group V

Exxon Mobil Corporation
ExxonMobil Exploration Company

Group VI

Petroliam Nasional Berhad (PETRONAS)
Progress Resources USA Ltd.
Progress Resources Gulf of Mexico LLC

Group VII

Shell Oil Company
Shell Offshore Inc.
SWEPI LP
Shell Frontier Oil & Gas Inc.
SOI Finance Inc.
Shell Gulf of Mexico Inc.

Group VIII

Total E&P USA, Inc.

Even if an entity does not appear on the above list, BOEM may disqualify and reject certain joint or single bids submitted by an entity if that entity is chargeable for the prior production period with an average daily production in excess of 1.6 million barrels of crude oil, natural gas, and natural gas liquids. *See* 30 CFR 556.512.

Authority: 42 U.S.C. 6213; and 30 CFR 556.511–556.515.

Elizabeth Klein,

Director, Bureau of Ocean Energy Management.

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–722–725 and 731–TA–1690–1693 (Preliminary)]

Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled Into Modules, From Cambodia, Malaysia, Thailand and Vietnam; Institution of Antidumping and Countervailing Duty Investigations and Scheduling of Preliminary Phase Investigations

AGENCY: International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase antidumping and countervailing duty investigation Nos. 701–TA–722–725 and 731–TA–1690–1693 (Preliminary) pursuant to the Tariff Act of 1930 (''the Act'') to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of crystalline silicon photovoltaic cells, whether or not assembled into modules, from

Cambodia, Malaysia, Thailand and Vietnam, provided for in statistical reporting numbers 8541.42.0010, and 8541.43.0010 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value and alleged to be subsidized by the Governments of Cambodia, Malaysia, Thailand and Vietnam. Crystalline silicon photovoltaic cells, whether or not assembled into modules, may also be imported under HTS subheadings 8501.71, 8501.72, and 8501.80 and statistical reporting number 8507.20.8010. Unless the Department of Commerce (''Commerce'') extends the time for initiation, the Commission must reach a preliminary determination in antidumping and countervailing duty investigations in 45 days, or in this case by June 10, 2024. The Commission's views must be transmitted to Commerce within five business days thereafter, or by June 17, 2024.

DATES: April 24, 2024.

FOR FURTHER INFORMATION CONTACT: Julie Duffy (202–708–2579), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted, pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)), in response to a petition filed on April 24, 2024, by the American Alliance for Solar Manufacturing Trade Committee.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

Participation in the investigations and public service list.—Persons (other than petitioner) wishing to participate in the investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping duty and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these investigations available to authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigations under the APO issued in the investigations, provided that the application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference.—The Office of Investigations will hold a staff conference in connection with the preliminary phase of these investigations beginning at 9:30 a.m. on Wednesday, May 15, 2024. Requests to appear at the conference should be emailed to *preliminaryconferences@usitc.gov* (DO NOT FILE ON EDIS) on or before 5:15 p.m. on Monday, May 13, 2024. Please provide an email address for each conference participant in the email. Information on conference procedures, format, and participation, including guidance for requests to appear as a witness via videoconference, will be available on the Commission's Public Calendar (Calendar (USITC) | United States International Trade Commission). A nonparty who has testimony that may aid the Commission's deliberations may request permission to participate by submitting a short statement.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Written submissions.—As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before 5:15 p.m. on May 20, 2024, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties shall file written testimony and supplementary material in connection with their presentation at the conference no later than noon on Tuesday, May 14. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with these investigations must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that any information that it submits to the Commission during these investigations may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of these or related investigations or reviews, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.12 of the Commission's rules.

By order of the Commission.

Issued: April 25, 2024.

Lisa Barton,

Secretary to the Commission.

Written submissions.—As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before 5:15 p.m. on May 17, 2024, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties shall file written testimony and supplementary material in connection with their presentation at the conference no later than noon on May 13, 2024. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with these investigations must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that any information

that it submits to the Commission during these investigations may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of these or related investigations or reviews, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.12 of the Commission's rules.

By order of the Commission.

Issued: April 24, 2024.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2024–09183 Filed 4–29–24; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Mechanical Power Presses Standard

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Occupational Safety & Health Administration (OSHA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before May 30, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Nicole Bouchet by telephone at 202–693–0213, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: The inspection and certification records required by the Standard on Mechanical Power Presses are intended to ensure that mechanical power presses are in safe operating condition, and that all safety devices are working properly. The failure of these safety devices could cause serious injury or death to a worker. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on February 15, 2024 (89 FR 11872).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–OSHA.

Title of Collection: Mechanical Power Presses Standard.

OMB Control Number: 1218–0229.

Affected Public: Private Sector—Businesses or other for-profits.

Total Estimated Number of Respondents: 104,035.

Total Estimated Number of Responses: 62,421.

Total Estimated Annual Time Burden: 20,807 hours.

Total Estimated Annual Other Costs Burden: $0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Nicole Bouchet,

Certifying Official.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2006–0042]

CSA Group Testing & Certification Inc.: Applications for Expansion of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the applications of CSA Group & Testing Certification Inc., for expansion of the recognition as a Nationally Recognized Testing Laboratory (NRTL) and presents the agency's preliminary finding to grant the applications.

DATES: Submit comments, information, and documents in response to this notice, or requests for an extension of time to make a submission, on or before May 15, 2024.

ADDRESSES: Comments may be submitted as follows:

Electronically: You may submit comments, including attachments, electronically at *http://www.regulations.gov,* the Federal eRulemaking Portal. Follow the online instructions for submitting comments.

Instructions: All submissions must include the agency's name and the docket number for this rulemaking (Docket No. OSHA–2006–0042). All comments, including any personal information you provide, are placed in the public docket without change and may be made available online at *https://www.regulations.gov.* Therefore, OSHA cautions commenters about submitting information they do not want made available to the public, or submitting materials that contain personal information (either about themselves or others), such as Social Security numbers and birthdates.

Docket: To read or download comments or other material in the docket, go to *http://www.regulations.gov.* Documents in the docket (including this **Federal Register** notice) are listed in the *http://www.regulations.gov* index; however, some information (*e.g.,* copyrighted material) is not publicly available to read or download through the website.

All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

Extension of comment period: Submit requests for an extension of the comment period on or before May 15, 2024 to the Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Room N–3653, Washington, DC 20210, or by fax to (202) 693–1644.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, phone: (202) 693–1999 or email: *meilinger.francis2@dol.gov.*

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, phone: (202) 693–1911 or email: *robinson.kevin@dol.gov.*

SUPPLEMENTARY INFORMATION:

I. Notice of the Applications for Expansion

OSHA is providing notice that CSA Group Testing & Certification Inc. (CSA), is applying for expansion of the current recognition as a NRTL. CSA requests the addition of ten test standards, and one new testing site, to the NRTL scope of recognition.

OSHA recognition of a NRTL signifies that the organization meets the requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within the scope of recognition. Each NRTL's scope of recognition includes: (1) the type of products the NRTL may test, with each type specified by the applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes applications by a NRTL for initial recognition and for an expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding. In the second notice, the agency provides a final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including CSA, which details the NRTL's scope of recognition. These pages are available from the OSHA website at *http://www.osha.gov/dts/otpca/nrtl/index.html.*

CSA currently has twenty-one facilities (sites) recognized by OSHA for product testing and certification, with the headquarters located at: CSA Group Testing & Certification Inc., 178 Rexdale Boulevard, Etobicoke, Ontario, M9W 1R3, Canada. A complete list of CSA's scope of recognition is available at *https://www.osha.gov/nationally-recognized-testing-laboratory-program/csa.*

II. General Background on the Application

CSA submitted two applications to OSHA for expansion of the NRTL scope of recognition. The first application, received on January 18, 2022 (OSHA–2006–0042–0037), requested the addition of four standards to the NRTL scope of recognition. The second application, received on July 28, 2022 (OSHA–2006–0042–0038), requested the addition of six standards to the NRTL scope of recognition, as well as the recognition of an additional testing site on the CSA Cleveland Ohio campus. The additional test facility is located at 8801 East Pleasant Valley Road, Cleveland, Ohio 44131. This expansion notice covers the ten standards included in both applications as well as the additional recognized site. OSHA staff performed a detailed analysis of the application packets and reviewed other pertinent information. OSHA performed an on-site review of the additional Cleveland, Ohio site from May 16–17, 2023, in which assessors found some nonconformances with the requirements of 29 CFR 1910.7. CSA addressed these issues sufficiently, and OSHA staff has preliminarily determined that OSHA should grant the applications for test standard expansion and recognition of the additional testing site.

Table 1, below, lists the appropriate test standards found in CSA's applications for expansion for testing and certification of products under the NRTL Program.

TABLE 1—PROPOSED APPROPRIATE TESTS STANDARDS FOR INCLUSION IN CSA'S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
UL 6A	Electrical Rigid Metal Conduit-Aluminum, Red Brass, and Stainless Steel.
UL 60079–25	Explosive Atmospheres—Part 25: Intrinsically Safe Electrical Systems.
UL 60079–30–1	Explosive Atmospheres—Part 30–1: Electrical Resistance Trace Heating—General and Testing Requirements.
UL 60947–4–1	Low-Voltage Switchgear and Controlgear—Part 4–1: Contactors and Motor-Starters—Electromechanical Contactors and Motor-Starters.
UL 60947–5–1	Low-Voltage Switchgear and Controlgear—Part 5–1: Control Circuit Devices and Switching Elements—Electromechanical Control Circuit Devices.
UL 60947–5–2	Low-Voltage Switchgear and Controlgear—Part 5–2: Control Circuit Devices and Switching Elements—Proximity Switches.
UL 61730–1	Photovoltaic (PV) Module Safety Qualification—Part 1: Requirements for Construction.
UL 61730–2	Photovoltaic (PV) Module Safety Qualification—Part 2: Requirements for Testing.
UL 5085–2	Low Voltage Transformers—Part 2: General Purpose Transformers.
UL 60335–2–8	Household and Similar Electrical Appliances, Part 2: Particular Requirements for Electric Shavers, Hair Clippers and Similar Appliances.

III. Preliminary Findings on the Applications

CSA submitted acceptable applications for expansion of the scope of recognition. OSHA's review of the application files and pertinent documentation indicates that CSA has met the requirements prescribed by 29 CFR 1910.7 for expanding the recognition to include the addition of the ten test standards for NRTL testing and certification listed in Table 1. In addition, CSA has met the requirements for recognition of the additional testing site. This preliminary finding does not constitute an interim or temporary approval of CSA's applications.

OSHA seeks comment on this preliminary determination.

IV. Public Participation

OSHA welcomes public comment as to whether CSA meets the requirements of 29 CFR 1910.7 for expansion of recognition as a NRTL. Comments should consist of pertinent written documents and exhibits.

Commenters needing more time to comment must submit a request in writing, stating the reasons for the request by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer time period. OSHA may deny a request for an extension if it is not adequately justified.

To review copies of the exhibits identified in this notice, as well as comments submitted to the docket, contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor. These materials also are generally available online at *https://www.regulations.gov* under Docket No. OSHA–2006–0042 (for further information, see the ''*Docket*'' heading in the section of this notice titled **ADDRESSES**).

OSHA staff will review all comments to the docket submitted in a timely manner. After addressing the issues raised by these comments, staff will make a recommendation to the Assistant Secretary of Labor for Occupational Safety and Health on whether to grant CSA's application for expansion of the scope of recognition. The Assistant Secretary will make the final decision on granting the application. In making this decision, the Assistant Secretary may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of the final decision in the **Federal Register**.

V. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8–2020 (85 FR 58393, Sept. 18, 2020), and 29 CFR 1910.7.

Signed at Washington, DC.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2010–0056]

Notice of Alleged Safety and Health Hazards (OSHA–7 Form); Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comments.

SUMMARY: OSHA solicits public comments concerning the proposal to extend the Office of Management and Budget's (OMB) approval of the information collection requirements specified in the Notice of Alleged Safety and Health Hazards (OSHA–7 Form).

DATES: Comments must be submitted (postmarked, sent, or received) by July 1, 2024.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at *https://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Docket: To read or download comments or other material in the docket, go to *https://www.regulations.gov.* Documents in the docket are listed in the *https://www.regulations.gov* index; however, some information (*e.g.,* copyrighted material) is not publicly available to read or download through the websites. All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

Instructions: All submissions must include the agency name and OSHA docket number (OSHA–2010–0056) for the Information Collection Request (ICR). OSHA will place all comments, including any personal information, in the public docket, which may be made available online. Therefore, OSHA cautions interested parties about submitting personal information such as social security numbers and birthdates.

For further information on submitting comments, see the ''Public Participation'' heading in the section of this notice titled **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Seleda Perryman, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor; telephone (202) 693–2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.,* employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it. The purpose of these requirements is the agency uses the information collected on the OSHA–7 Form to determine whether or not reasonable grounds exist to conduct an inspection of the workplace. The

description of the hazards, including the number of exposed employees, allows the agency to assess the severity and probability of the hazards and the need to expedite the inspection. The completed form also provides an employer with notice of the complaint and may serve as the basis for obtaining a search warrant if an employer denies the agency access to the workplace.

The agency has translated the form into a number of languages other than English and Spanish. The agency intends to submit those translations to OMB for approval via non-material change at a later time.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in Notice of Alleged Safety and Health Hazards (OSHA–7 Form). The agency is requesting an adjustment increase in burden hours 21,171 to 35,783 hours, a difference of 14,612 hours. This increase is due to the increase in the number of the number of estimated OSHA–7 complaint forms submitted from 68,896 to 94,529.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

Title: Notice of Alleged Safety and Health Hazards (OSHA–7 Form).

OMB Control Number: 1218–0064.

Affected Public: Business or other for-profits.

Number of Respondents: 94,529.

Number of Responses: 120,183.

Frequency of Responses: On occasion.

Average Time per Response: Varies.

Estimated Total Burden Hours: 35,783.

Estimated Cost (Operation and Maintenance): $1,705.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) electronically at *https://www.regulations.gov,* which is the Federal eRulemaking Portal; or (2) by facsimile (fax), if your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at (202) 693–1648. All comments, attachments, and other material must identify the agency name and the OSHA docket number for the ICR (Docket No. OSHA–2010–0056). You may supplement electronic submission by uploading document files electronically.

Comments and submissions are posted without change at *https://www.regulations.gov.* Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and dates of birth. Although all submissions are listed in the *https://www.regulations.gov* index, some information (*e.g.,* copyrighted material) is not publicly available to read or download from this website. All submission, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the *https://www.regulations.gov* website to submit comments and access the docket is available at the website's ''User Tips'' link.

Contact the OSHA Docket Office at (202) 693–2350, (TTY (877) 889–5627) for information about materials not available from the website, and for assistance in using the internet to locate docket submissions.

V. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 8–2020 (85 FR 58393).

Signed at Washington, DC, on April 23, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. 2024–09189 Filed 4–29–24; 8:45 am]

Hazardous Energy Control Standard (Lockout/Tagout); Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comments.

SUMMARY: OSHA solicits public comments concerning the proposal to extend the Office of Management and Budget's (OMB) approval of the information collection requirements specified in the Hazardous Energy Control Standard (Lockout/Tagout).

DATES: Comments must be submitted (postmarked, sent, or received) by July 1, 2024.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at *https://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Docket: To read or download comments or other material in the docket, go to *https://www.regulations.gov.* Documents in the docket are listed in the *https://www.regulations.gov* index; however, some information (*e.g.,* copyrighted material) is not publicly available to read or download through the websites. All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

Instructions: All submissions must include the agency name and OSHA docket number (OSHA–2011–0033) for the Information Collection Request (ICR). OSHA will place all comments, including any personal information, in the public docket, which may be made available online. Therefore, OSHA cautions interested parties about submitting personal information such as social security numbers and birthdates.

For further information on submitting comments, see the ''Public Participation'' heading in the section of this notice titled ''**SUPPLEMENTARY INFORMATION**.''

FOR FURTHER INFORMATION CONTACT: Seleda Perryman, Directorate of

Standards and Guidance, OSHA, U.S. Department of Labor; telephone (202) 693–2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.,* employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it. The purpose of these requirements is to control the release of hazardous energy while workers service, maintain, or repair machines or equipment when activation, start up, or release of energy from an energy source is possible; proper control of hazardous energy prevents death or serious injury among these workers.

Energy Control Procedure (paragraph (c)(4)(i)). With limited exception, employers must document the procedures used to isolate from its energy source and render inoperative, any machine or equipment prior to servicing, maintenance, or repair by workers. These procedures are necessary when activation, start up, or release of stored energy from the energy source is possible, and such release could cause injury to the workers.

Paragraph (c)(4)(ii) states that the required documentation must clearly and specifically outline the scope, purpose, authorization, rules, and techniques workers are to use to control hazardous energy, and the means to enforce compliance. The document must include at least the following elements: a specific statement regarding the use of the procedure; detailed procedural steps for shutting down, isolating, blocking, and securing machines or equipment to control hazardous energy; detailed procedural steps for placing, removing, and transferring lockout or tagout devices, including the responsibility for doing so; and requirements for testing a machine or equipment to determine and verify the effectiveness of lockout or tagout devices, as well as other energy control measures.

Protective Materials and Hardware (paragraphs (c)(5)(ii)(D) and (c)(5)(iii)). Paragraph (c)(5)(ii)(D) requires that lockout and tagout devices indicate the identity of the employee applying it. Paragraph (c)(5)(iii) requires that tags warn against hazardous conditions if the machine or equipment is energized. In addition, the tag must include a legend such as one of the following: Do Not Start; Do Not Open; Do Not Close; Do Not Energize; Do Not Operate.

Periodic Inspection Certification Records (paragraph (c)(6)(ii)). Under paragraph (c)(6)(i), employers are to conduct inspections of energy control procedures at least annually. An authorized worker (other than an authorized worker using the energy control procedure that is the subject of the inspection) is to conduct the inspection and correct any deviations or inadequacies identified. For procedure involving either lockout or tagout, the inspection must include a review, between the inspector and each authorized worker, of that worker's responsibilities under the procedure; for procedures using tagout systems, the review also involves affected workers, and includes an assessment of the workers' knowledge of the training elements required for these systems. Paragraph (c)(6)(ii) requires employers to certify the inspection by documenting the date of the inspection and identifying the machine or equipment inspected, the workers included in the inspection, and the worker who performed the inspection.

Training Certification Records (paragraph (c)(7)(iv)). Under paragraph (c)(7)(iv), employers are to certify that workers completed the required training, and that this training is up-to-date. The certification is to contain each worker's name and the training date. Written certification of the training assures the employer that workers receive the training specified by the standard.

Notification of Employees (paragraph (c)(9)). This provision requires the employer or authorized worker to notify affected workers prior to applying, and after removing, a lockout or tagout device from a machine or equipment.

Off-site Personnel (Contractors, etc.) (paragraph (f)(2)(i)). When the on-site employer uses an off-site employer (*e.g.,* a contractor) to perform the activities covered by the scope and application of the standard, the two employers must inform each other regarding their respective lockout or tagout procedures.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Hazardous Energy Control Standard (Lockout/Tagout). The agency is requesting an adjustment increase in burden hours from 2,622,912 hours to 2,732,064 hours, a difference of 109,152 hours. This increase is due to the increase in the number of establishments from 773,209 to 806,890.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

Title: Hazardous Energy Control Standard (Lockout/Tagout).

OMB Control Number: 1218–0150.

Affected Public: Business or other for-profits.

Number of Respondents: 806,890.

Number of Responses: 73,530,405.

Frequency of Responses: On occasion.

Average Time per Response: Varies.

Estimated Total Burden Hours: 2,732,064.

Estimated Cost (Operation and Maintenance): $1,442,985.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) electronically at *https://www.regulations.gov,* which is the Federal eRulemaking Portal; or (2) by facsimile (fax), if your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at 202–693–1648. All comments, attachments, and other material must identify the agency name and the OSHA docket number for the ICR (Docket No. OSHA–2011–0033). You may supplement electronic submission by uploading document files electronically.

Comments and submissions are posted without change at *https://www.regulations.gov.* Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and dates of birth. Although all submissions are listed in the *https://www.regulations.gov* index, some information (*e.g.,* copyrighted material) is not publicly available to read or download from this website. All submission, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the *https://www.regulations.gov* website to submit comments and access the docket is available at the website's ''User Tips'' link. Contact the OSHA Docket Office at (202) 693–2350, (TTY (877) 889–5627) for information about materials not available from the website, and for assistance in using the internet to locate docket submissions.

V. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 8–2020 (85 FR 58393).

Signed at Washington, DC, on April 23, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–24–0010; NARA–2024–031]

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice of certain Federal agency requests for records disposition authority (records schedules). We publish notice in the **Federal Register** and on *regulations.gov* for records schedules in which agencies propose to dispose of records they no longer need to conduct agency business. We invite public comments on such records schedules.

DATES: We must receive responses on the schedules listed in this notice by June 17, 2024.

ADDRESSES: To view a records schedule in this notice, or submit a comment on one, use the following address: *https://www.regulations.gov/docket/NARA-24-0010/document.* This is a direct link to the schedules posted in the docket for this notice on *regulations.gov.* You may submit comments by the following method:

- *Federal eRulemaking Portal: https://www.regulations.gov.* On the website, enter either of the numbers cited at the top of this notice into the search field. This will bring you to the docket for this notice, in which we have posted the records schedules open for comment. Each schedule has a 'comment' button so you can comment on that specific schedule. For more information on *regulations.gov* and on submitting comments, see their FAQs at *https://www.regulations.gov/faq.*

If you are unable to comment via *regulations.gov,* you may email us at *request.schedule@nara.gov* for instructions on submitting your comment. You must cite the control number of the schedule you wish to comment on. You can find the control number for each schedule in parentheses at the end of each schedule's entry in the list at the end of this notice.

FOR FURTHER INFORMATION CONTACT: Kimberly Richardson, Strategy and Performance Division, by email at *regulation_comments@nara.gov* or at 301–837–2902. For information about records schedules, contact Records Management Operations by email at *request.schedule@nara.gov* or by phone at 301–837–1799.

SUPPLEMENTARY INFORMATION:

Public Comment Procedures

We are publishing notice of records schedules in which agencies propose to dispose of records they no longer need to conduct agency business. We invite public comments on these records schedules, as required by 44 U.S.C. 3303a(a), and list the schedules at the end of this notice by agency and subdivision requesting disposition authority.

In addition, this notice lists the organizational unit(s) accumulating the records or states that the schedule has agency-wide applicability. It also provides the control number assigned to each schedule, which you will need if you submit comments on that schedule. We have uploaded the records schedules and accompanying appraisal memoranda to the *regulations.gov* docket for this notice as ''other'' documents. Each records schedule contains a full description of the records at the file unit level as well as their proposed disposition. The appraisal memorandum for the schedule includes information about the records.

We will post comments, including any personal information and attachments, to the public docket unchanged. Because comments are public, you are responsible for ensuring that you do not include any confidential or other information that you or a third party may not wish to be publicly posted. If you want to submit a comment with confidential information or cannot otherwise use the *regulations.gov* portal, you may contact *request.schedule@nara.gov* for instructions on submitting your comment.

We will consider all comments submitted by the posted deadline and consult as needed with the Federal agency seeking the disposition authority. After considering comments, we may or may not make changes to the proposed records schedule. The schedule is then sent for final approval by the Archivist of the United States. After the schedule is approved, we will post on *regulations.gov* a ''Consolidated Reply'' summarizing the comments, responding to them, and noting any changes we made to the proposed schedule. You may elect at *regulations.gov* to receive updates on the docket, including an alert when we post the Consolidated Reply, whether or not you submit a comment. If you have a question, you can submit it as a comment, and can also submit any concerns or comments you would have

to a possible response to the question. We will address these items in consolidated replies along with any other comments submitted on that schedule.

We will post schedules on our website in the Records Control Schedule (RCS) Repository, at *https://www.archives.gov/records-mgmt/rcs,* after the Archivist approves them. The RCS contains all schedules approved since 1973.

Background

Each year, Federal agencies create billions of records. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval. Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. The records schedules authorize agencies to preserve records of continuing value in the National Archives or to destroy, after a specified period, records lacking continuing administrative, legal, research, or other value. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

Agencies may not destroy Federal records without the approval of the Archivist of the United States. The Archivist grants this approval only after thorough consideration of the records' administrative use by the agency of origin, the rights of the Government and of private people directly affected by the Government's activities, and whether or not the records have historical or other value. Public review and comment on these records schedules is part of the Archivist's consideration process.

Schedules Pending

1. Department of Defense, Defense Contract Audit Agency, Learning Management System (DAA–0372–2024–0002).

2. Department of Energy, Agency-wide, Budgeting Records (DAA–0434–2021–0003).

3. Department of Energy, Agency-wide, Grant, Cooperative Agreement and Technology Transfer Records (DAA–0434–2021–0002).

4. Department of Health and Human Services, Administration for Strategic Preparedness and Response, National Veterinary Response Team Records (DAA–0611–2023–0010).

5. Department of Health and Human Services, Office of the Assistant Secretary for Preparedness and Response, Recovery Operations Records (DAA–0468–2022–0002).

6. Department of Health and Human Services, Health Resources and Services Administration, Injury Compensation Programs (DAA–0512–2024–0002).

7. Department of Justice, Executive Office for United States Trustees, Credit Counseling and Debtor Education Records (DAA–0060–2023–0001).

8. Department of Transportation, Federal Aviation Administration, FAA Safety Team website (DAA–0237–2024–0009).

9. Department of Transportation, Federal Aviation Administration, Forensic Toxicology Case Files (DAA–0237–2023–0003).

10. Department of Transportation, Federal Aviation Administration, Quality Assurance Reporting System (DAA–0237–2024–0008).

11. Department of Transportation, Pipeline and Hazardous Materials Safety Administration, Drug and Alcohol Management Information System (DAMIS) Annual Reports (DAA–0571–2024–0003).

12. Department of Transportation, Pipeline and Hazardous Materials Safety Administration, Training and Qualification Records (DAA–0571–2024–0001).

13. Administrative Office of the United States Courts, Circuit Courts of Appeals, Office of the Clerk, Standing Orders (DAA–0276–2023–0001).

14. American Battle Monuments Commission, Office of the General Counsel, Legal Function and Counsel Records (DAA–0117–2023–0008).

15. Federal Energy Regulatory Commission, Agency-wide, Web Content and Social Media Records (DAA–0138–2024–0007).

16. National Aeronautics and Space Administration, Agency-wide, Mishap Investigation Records (DAA–0255–2023–0001).

17. National Archives and Records Administration, Research Services, Internal Disposal for RG 0431 (N2–431–2017–0001).

18. Office of Personnel Management, Agency-wide, White House Fellows (WHF) Records (DAA–0478–2024–0002).

Laurence Brewer,

Chief Records Officer for the U.S. Government.

BILLING CODE 7515–01–P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Institute of Museum and Library Services

Notice of Proposed Information Collection Request: National Museum Survey

AGENCY: Institute of Museum and Library Services, National Foundation on the Arts and the Humanities.

ACTION: Notice, request for comments, collection of information.

SUMMARY: The Institute of Museum and Library Services (IMLS), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act. This pre-clearance consultation program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The purpose of this Notice is to request a three-year clearance for the National Museum Survey (NMS). The NMS will be a voluntary collection that seeks to measure and understand the scope and scale of the role that the nation's diverse museums play in American society. IMLS will use the data collected through the NMS to provide museum practitioners, the public, and policymakers with essential baseline statistics regarding the museum sector. A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **ADDRESSES** section of this Notice.

DATES: Written comments on this notice must be submitted to the office listed in the Addresses section below on or before June 28, 2024.

ADDRESSES: Send comments to Julie Balutis, Director of Grants Policy and Management, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW, Suite 4000, Washington, DC 20024–2135. Ms. Balutis can be reached by telephone: 202–653–4645, email: *jbalutis@imls.gov.* Office hours are from 8:30 a.m. to 5 p.m., E.T., Monday through Friday, except federal holidays. Persons who are deaf or hard of hearing (TTY users) can contact IMLS at 202–207–7858 via 711 for TTY-Based Telecommunications Relay Service.

FOR FURTHER INFORMATION CONTACT: Jake Soffronoff, Survey Methodologist, Office of Research and Evaluation, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW, Suite 4000, Washington, DC 20024–2135. Mr. Soffronoff can be reached by telephone: 202–653–4648, email: *jsoffronoff@imls.gov.* Persons who are deaf or hard of hearing (TTY users) can contact IMLS at 202–207–7858 via 711 for TTY-Based Telecommunications Relay Service.

SUPPLEMENTARY INFORMATION: IMLS is particularly interested in public comments that help the agency to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques, or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

I. Background

The United States is home to tens of thousands of museums. Together, they steward living and non-living collections and, through their programs and services, contribute to the cultural health, economic vitality, and social well-being of the communities they serve. A regular sector-wide data-gathering effort is needed to better understand the museum sector and the services it provides.

IMLS is exercising its authority under 20 U.S. Code § 9108 to conduct a new survey that fills this need: the National Museum Survey (NMS). The NMS will be a voluntary survey of museums that aims to capture the scope and scale of museums' presence and reach within the United States over time. The survey will collect foundational, high-level data directly from museums to inform policymakers, the museum field, and the public about the role that the nation's diverse museums play in American society.

II. Current Actions

Intent to seek approval for a new information collection.

Agency: Institute of Museum and Library Services.

Title: National Museum Survey.

OMB Control Number: 3137–NEW.

Expiration Date: Not applicable.

Agency Number: 3137.

Respondents/Affected Public: IMLS plans to conduct a census of all U.S. museums representing a broad range of museum disciplines, including zoos, aquariums, botanical gardens, and arboretums; nature and science centers; history museums and historic sites; art museums; children's museums; natural history museums; and general and specialized museums. Institutions must meet all the following criteria to be eligible for selection:

- Be a unit of federal, state, local, or tribal government, or a not-for-profit institution.
- Serve the public in a physical location it owns or operates.
- Provide exhibitions and programs.
- Primarily function to house, display, and care for animate or inanimate objects that form the core of its exhibitions, programs, and research.
- Under normal circumstances, be open to the public 90 days or more per year, either through specific hours of operation or by appointment
- Have at least one staff member, or the full-time equivalent, whether paid or unpaid IMLS will request that a senior administrator at each institution be responsible for the completion of the survey at their institution.

Total Estimated Number of Annual Respondents: The survey's expected response rate is 35 percent, leading to approximately 7,500 completed cases.

Frequency of Response: Once per request.

Estimated Average Burden per Response: 1 hour.

Total Estimated Number of Annual Burden Hours: 7,500.

Total Annual Cost Burden: The estimated cost burden for respondents is $431,775 (7,500 hrs × $57.57/hr). $57.57 represents a simple average of hourly mean wage figures for government, academic, and company/enterprise managers (*https://www.bls.gov/oes/current/oes113012.htm*).

Total Annual Federal Costs: $794,580.49.

Public Comments Invited: Comments submitted in response to this Notice will be summarized and/or included in the request for OMB's clearance of this information collection.

Dated: April 25, 2024.

Suzanne Mbollo,

Grants Management Specialist, Institute of Museum and Library Services.

BILLING CODE 7036–01–P

NATIONAL SCIENCE FOUNDATION

Sunshine Act Meetings

The National Science Board (NSB), the NSB Committee on Strategy (CS), and the Committee on Awards and Facilities (A&F) hereby give notice of the scheduling of meetings for the transaction of National Science Board business pursuant to the National Science Foundation Act and the Government in the Sunshine Act.

TIME AND DATE: Wednesday, May 1, 2024, from 8:30 a.m.–3:40 p.m. and Thursday, May 2, 2024, from 8:30 a.m.–2:30 p.m. Eastern.

PLACE: These meetings will be held at NSF headquarters, 2415 Eisenhower Avenue, Alexandria, VA 22314, and by videoconference. If the COVID status for Alexandria, Virginia goes to ''high,'' please fill out and bring OMB's certification of vaccination form with you. All open sessions of the meeting will be webcast live on the NSB YouTube channel.

May 1, 2024: https://youtube.com/live/LqwL3CFVG8I?feature=share.

May 2, 2024: https://youtube.com/live/LbXG5bYTzGA?feature=share.

STATUS: Parts of these meetings will be open to the public. The rest of the meetings will be closed to the public. See full description below.

MATTERS TO BE CONSIDERED:

Wednesday, May 1, 2024

Plenary Board Meeting

Open Session: 8:30 a.m.–12:00 p.m.

- NSB Chair's Opening Remarks
  - Welcome
  - Agenda Preview
  - Chair's Activities and Updates
- NSF Director's Opening Remarks
  - Highlights of NSF Thematic Priorities
  - Engagements
  - Senior Staff introductions
- NSB External Panel on Artificial Intelligence, The Future is Now: Harnessing AI for Good
- Approval of February 2024 Open Meeting Minutes
- NSB Committee Reports
  - Committee on External Engagement
    - Highlights of engagement initiatives
    - Reflections and road ahead
  - Committee on Science and Engineering Policy
    - *Indicators 2024*
    - *Indicators 2026* and Vote
    - National Security Team
    - Talent Development Team
    - Reflections and road ahead
  - Committee on Oversight
    - Research misconduct

- NSF FY 2023 Financial Statement
- Chief Financial Officer report highlights
- Reflections and road ahead
- Committee on Strategy
- Reflections and road ahead
- Subcommittee on Technology, Innovation, and Partnerships
- Closing reflections and road ahead

Plenary Board Meeting

Closed Session: 12:00–12:50 p.m.

- NSB Chair's remarks
- Approval of Feb 2024 closed meeting minutes
- Committee Reports
  - Committee on Strategy report
  - Update on FY 24 current plan implications
  - Long-term planning and FY 26 development
  - Subcommittee on Technology, Innovation and Partnerships
  - TIP Roadmap update
- Vote to Enter Executive Closed Session

Executive Closed Session: 1:35–3:40 p.m.

- NSB Chair's Remarks
- Approval of February 2024 Executive Plenary Closed Minutes
- Director's Remarks
  - Organizational updates
- Board Elections
  - Chair, Vice Chair, and EC seat if applicable
- NSB Chair's closing remarks

Thursday, May 2, 2024

Plenary Board Meeting

Open Session: 8:30–11:40 a.m.

- NSB Chair's Opening Remarks
- Farewell to Members
  - Chair's remarks, NSB accomplishments and road ahead
  - Member recognition, Chair and Director
- Q&A with the 2024 NSB Vannevar Bush, Science & Society, and Waterman Awardees
- Committee Report
  - NSB–NSF Commission on Merit Review
  - Preliminary policy recommendations

Plenary Board Meeting

Closed Session: 11:40 a.m.–12:40 p.m.

- Committee Report
  - NSB–NSF Commission on Merit Review
  - Preliminary policy recommendations discussion

Plenary Board

Closed Session: 1:10 p.m.–1:35 p.m.

- Committee Report
- Committee on Awards and Facilities
  - Action Item: National Solar Observatory Operations & Maintenance Award
  - Information Item: Planning for future major facilities

A&F Committee

Open Session: 1:35–2:10 p.m.

- Chair's Remarks
- Reflection and road ahead
- Update on Antarctic Science and Engineering Support Contract
- Information Item: NSF's Decision Process for the USELT Program

A&F Committee

Closed Session: 2:10–2:30 p.m.

- Information Item: NSF's Decision Process for the USELT Program

Meeting Adjourns: 2:30 p.m.

Portions Open to the Public

Wednesday, May 1, 2024

8:30 a.m.–12:00 p.m. Plenary NSB

Thursday, May 2, 2024

8:30 a.m.–11:40 a.m. Plenary NSB
1:35 p.m.–2:10 p.m. Committee on Awards and Facilities (A&F)

Portions Closed to the Public

Wednesday, May 1, 2024

12:00 p.m.–12:50 p.m. Plenary NSB
1:35 p.m.–3:40 p.m. Plenary executive

Thursday, May 2, 2024

11:40 a.m.–12:40 p.m. Plenary NSB
1:10 p.m.–1:35 p.m. Plenary NSB
2:10 p.m.–2:30 p.m. A&F

Members of the public are advised that the NSB provides some flexibility around start and end times. A session may be allowed to run over by as much as 15 minutes if the Chair decides the extra time is warranted. The next session will start no later than 15 minutes after the noticed start time. If a session ends early, the next meeting may start up to 15 minutes earlier than the noticed start time. Sessions will not vary from noticed times by more than 15 minutes.

CONTACT PERSON FOR MORE INFORMATION: The NSB Office contact is Christopher Blair, *cblair@nsf.gov,* 703–292–7000. The NSB Public Affairs contact is Nadine Lymn, *nlymn@nsf.gov,* 703–292–2490. Please refer to the NSB website for additional information: *https://www.nsf.gov/nsb.*

Ann E. Bushmiller,

Senior Legal Counsel to the National Science Board.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–289, 72–77, 50–245, 50–336, 50–423, 72–47, 50–324, 50–325, 72–06, 50–334, 50–412, 72–1043, 50–397, 72–35, 50–382, 72–75, 50–335, 50–389, 72–61, 50–331, 72–32, 50–387, 50–388, 72–28, 50–346, 72–14, 50–440 and 72–69; NRC–2024–0084]

Issuance of Multiple Exemptions Regarding Security Notifications, Reports, and Recording Keeping

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemptions; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing a single notice to announce the issuance of 11 exemptions in response to requests from ten licensees. These exemptions were requested as a result of a change to NRC's regulations published in the **Federal Register** on March 14, 2023.

DATES: During the period from March 1, 2024, to March 31, 2024, the NRC granted 11 exemptions in response to requests submitted by ten licensees from November 6, 2023, to January 15, 2024.

ADDRESSES: Please refer to Docket ID NRC–2024–0084 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2024–0084. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the ''Availability of Documents'' section.
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please

send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Ed Miller, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2481, email: *Ed.Miller@nc.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

During the period from March 1, 2024, to March 31, 2024, the NRC granted 11 exemptions in response to requests submitted by the following licensees: Constellation Energy Generation, LLC; Dominion Energy Nuclear Connecticut, Inc.; Duke Energy; Energy Harbor Nuclear Corp.; Energy Northwest; Entergy Operations Inc.; Florida Power and Light; Nextera Energy Duane Arnold, LLC.; Susquehanna Nuclear, LLC; and Vistra Operations Company LLC.

These exemptions temporarily allow the licensee to deviate from certain requirements of part 73 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Physical Protection of Plants and Materials,'' subpart T, ''Security Notifications, Reports, and Recordkeeping.'' In support of its exemption requests, the licensees agreed to effect site-specific administrative controls that maintain the approach to complying with 10 CFR part 73 in effect prior to the NRC's issuance of a final rule, ''Enhanced Weapons, Firearms Background Checks, and Security Event Notifications,'' which was published in the **Federal Register** on March 14, 2023, and became effective on April 13, 2023 (88 FR 15864).

II. Availability of Documents

The tables in this notice provide transparency regarding the number and type of exemptions the NRC has issued and provide the facility name, docket number, document description, document date, and ADAMS accession number for each exemption issued. Additional details on each exemption issued, including the exemption request submitted by the respective licensee and the NRC's decision, are provided in each exemption approval listed in the following tables. For additional directions on accessing information in ADAMS, see the **ADDRESSES** section of this document.

Document description	ADAMS accession No.	Document date
Constellation Energy Generation, LLC.; Three Mile Island Nuclear Station, Unit 1; Docket Nos. 50–289 and 72–77		
Three Mile Island Nuclear Station, Unit 1—Request for Exemption from Enhanced Weapons, Firearms Background Checks, and Security Event Notifications Implementation.	ML23326A010	November 22, 2023.
Three Mile Island Nuclear Station, Unit 1—Exemption from Select Requirements of 10 CFR part 73 (EPID L–2023–LLE–0061 [Security Notifications, Reports, and Recordkeeping and Suspicious Activity Reporting]).	ML24052A060	March 20, 2024.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 72–53, 50–254, and 50–265; NRC–2024–0074]

Constellation Energy Generation, LLC; Quad Cities Nuclear Power Station, Units 1 and 2; Independent Spent Fuel Storage Installation; Environmental Assessment and Finding of No Significant Impact

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an environmental assessment (EA) and a finding of no significant impact (FONSI) for an exemption request submitted by Constellation Energy Generation, LLC (Constellation) that would permit the Quad Cities Nuclear Power Station (QCNPS) to load four new 68M multi-purpose canisters (MPC) with continuous basket shims (CBS) beginning June 2024 in the HI–STORM 100 Cask System at its QCNPS Units 1 and 2 independent spent fuel storage installation (ISFSI) in a storage condition where the terms, conditions, and specifications in the Certificate of Compliance (CoC) No. 1014, Amendment No. 8, Revision No. 1, are not met.

DATES: The EA and FONSI referenced in this document are available on April 30, 2024.

ADDRESSES: Please refer to Docket ID NRC–2024–0074 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2024–0074. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the ''Availability of Documents'' section.
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Yen-Ju Chen, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555; telephone: 301–415–1018; email: *Yen-Ju.Chen@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is reviewing an exemption request from Constellation, dated March 15, 2024. Constellation is requesting an exemption, pursuant to section 72.7 of title 10 of the *Code of Federal Regulations* (10 CFR), in paragraphs 72.212(a)(2), 72.212(b)(3), 72.212(b)(5)(i), 72.212(b)(11), and 72.214 that require Constellation to comply with the terms, conditions, and specifications of the CoC No. 1014, Amendment No. 8, Revision No. 1. If approved, the exemption would allow Constellation to load four MPC–68M–CBS beginning June 2024 in the HI–STORM 100 Cask System at the QCNPS ISFSI in a storage condition where the terms, conditions, and specifications in the CoC No. 1014, Amendment No. 8, Revision No. 1, are not met.

II. Environmental Assessment

Background

QCNPS is located 32 kilometers (20 miles) northeast of the Quad Cities Metropolitan Area of Davenport and Bettendorf, Iowa, and Rock Island, Moline and East Moline, Illinois. The site is on the east bank of Pool 14 of the Mississippi River, between Lock and Dams 13 and 14 and approximately 810 kilometers (506 miles) upstream from its confluence with the Ohio River. Both Units 1 and 2 began operating in 1973. Constellation has been storing spent fuel in an ISFSI at QCNPS under a general license as authorized by 10 CFR part 72, subpart K, ''General License for Storage of Spent Fuel at Power Reactor Sites.'' Constellation currently uses the HI–STORM 100 Cask System under CoC No. 1014, Amendment No. 8, Revision No. 1, for dry storage of spent nuclear fuel in a specific MPC (*i.e.,* MPC–68M) at the QCNPS ISFSI.

Description of the Proposed Action

The CoC is the NRC approved design for each dry cask storage system. The proposed action would exempt the applicant from the requirements of 10 CFR 72.212(a)(2), 72.212(b)(3), 72.212(b)(5)(i), 72.212(b)(11), and 72.214 only as these requirements pertain to the use of the MPC–68M–CBS in the HI–STORM 100 Cask System for the near-term planned loading of the systems. The exemption would allow Constellation to load four MPC–68M–CBS in the HI–STORM 100 Cask System at the QCNPS ISFSI beginning June 2024, despite the MPC–68M–CBS in the HI–STORM 100 Cask System not being in compliance with the terms, conditions, and specifications in the CoC No. 1014, Amendment No. 8, Revision No. 1.

The HI–STORM 100 Cask System CoC provides the requirements, conditions, and operating limits necessary for use of the system to store spent fuel. Holtec International (Holtec), the designer and manufacturer of the HI–STORM 100 Cask System, developed a variant of the design with continuous basket shims (CBS) for the MPC–68M, known as MPC–68M–CBS. Holtec originally implemented the CBS variant design under the provisions of 10 CFR 72.48, which allows licensees to make changes to cask designs without a CoC amendment under certain conditions (listed in 10 CFR 72.48(c)). After evaluating the specific changes to the cask designs, the NRC determined that Holtec erred when it implemented the CBS variant design under 10 CFR 72.48, as this was not the type of change allowed without a CoC amendment. For this reason, the NRC issued three Severity Level IV violations to Holtec. Constellation plans to load four MPC–68M–CBS in the HI–STORM 100 Cask System beginning in June 2024. This exemption considers the near-term planned loading of the four canisters with the CBS variant basket design.

Need for the Proposed Action

Constellation requested this exemption in order to allow QCNPS to load four MPC–68M–CBS in the HI–STORM 100 Cask System at the QCNPS

ISFSI for the future loading campaign scheduled to begin in June 2024. Approval of the exemption request would allow Constellation to effectively manage the spent fuel pool margin and capacity to enable refueling and offloading fuel from the reactor. It would also allow Constellation to effectively manage the availability of the specialized workforce and equipment needed to support competing fuel loading and operational activities at QCNPS and other Constellation sites.

Environmental Impacts of the Proposed Action

This EA evaluates the potential environmental impacts of granting an exemption from the terms, conditions, and specifications in CoC No. 1014, Amendment No. 8, Revision No. 1. The exemption would allow four MPC–68M–CBS to be loaded in the HI–STORM 100 Cask System in the near-term loading campaign and maintained in storage at the QCNPS ISFSI.

The potential environmental impacts of storing spent nuclear fuel in NRC-approved storage systems have been documented in previous assessments. On July 18, 1990 (55 FR 29181), the NRC amended 10 CFR part 72 to provide for the storage of spent fuel under a general license in cask designs approved by the NRC. The EA for the 1990 final rule analyzed the potential environmental impacts of using NRC-approved storage casks. The EA for the HI–STORM 100 Cask System, CoC No. 1014, Amendment No. 8, Revision No. 1 (80 FR 49887), published in 2015, tiers off of the EA issued for the July 18, 1990, final rule. ''Tiering'' off earlier EAs is a standard process encouraged by the regulations implementing the National Environmental Policy Act of 1969 (NEPA) that entails the use of impact analyses of previous EAs to bound the impacts of a proposed action where appropriate. The Holtec HI–STORM 100 Cask System is designed to mitigate the effects of design basis accidents that could occur during storage. Considering the specific design requirements for the accident conditions, the design of the cask would prevent loss of containment, shielding, and criticality control. If there is no loss of containment, shielding, or criticality control, the environmental impacts would not be significant.

The exemptions requested by Constellation at the QCNPS site as they relate to CoC No. 1014, Amendment No. 8, Revision No. 1, for the HI–STORM 100 Cask System are limited to the use of the CBS variant basket design only for the near-term planned loading of four canisters utilizing the CBS variant basket design. The staff has determined that this change in the basket will not result in either radiological or non-radiological environmental impacts that significantly differ from the environmental impacts evaluated in the environmental assessment supporting the issuance of CoC No. 1014, Amendment No. 8, Revision No. 1. If the exemption is granted, there will be no significant change in the types or amounts of any effluents released, no significant increase in individual or cumulative public or occupational radiation exposure, and no significant increase in the potential for or consequences from radiological accidents. Accordingly, the Commission concludes that there would be no significant environmental impacts associated with the proposed action.

Alternative to the Proposed Action

The staff considered the no-action alternative. The no-action alternative (denial of the exemption request) would require Constellation to delay the near-term planned future loading of four MPC–68M–CBS in the HI–STORM 100 Cask System. Not allowing the planned future loading campaign could affect Constellation's ability to manage pool capacity, reactor fuel offloading, and refueling. It could also pose challenges to spent fuel heat removal and impact the availability of the specialized workforce and equipment needed to support competing fuel loading and operational activities at QCNPS and other Constellation sites. The NRC has determined that the no-action alternative would result in undue potential human health and safety impacts that could be avoided by proceeding with the proposed exemption, especially given that the staff has concluded in the NRC's Safety Determination Memorandum, issued with respect to the enforcement action against Holtec regarding these violations, that fuel can be stored safely in the MPC–68M–CBS canisters.

Agencies Consulted

The NRC provided the Illinois Emergency Management Agency and Office of Homeland Security (IL–IEMA–OHS) a copy of this draft EA for review by an email dated April 15, 2024. On April 23, 2024, the IL–IEMA–OHS provided its concurrence by email.

III. Finding of No Significant Impact

The environmental impacts of the proposed action have been reviewed in accordance with the requirements in 10 CFR part 51, which implement NEPA. Based upon the foregoing environmental assessment, the NRC finds that the proposed action of granting the exemption from the regulations in 10 CFR 72.212(a)(2), 72.212(b)(3), 72.212(b)(5)(i), 72.212(b)(11) and 72.214, which require the licensee to comply with the terms, conditions, and specifications of the CoC, in this case limited to the specific future loading of four canisters with the CBS variant basket design beginning June 2024, would not significantly impact the quality of the human environment. Accordingly, the NRC has determined that a FONSI is appropriate, and an environmental impact statement is not warranted.

IV. Availability of Documents

The documents identified in the following table are available to interested persons through ADAMS, as indicated.

Document description	ADAMS accession No. or **Federal Register** notice
Constellation's request for exemption, dated March 15, 2024	ML24075A001.

[Docket Nos. 72–0028, 50–387, and 50–388; NRC–2024–0068]

Susquehanna Nuclear, LLC; Susquehanna Steam Electric Station, Units 1 and 2; Independent Spent Fuel Storage Installation; Exemption

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) issued an exemption to Susquehanna Nuclear, LLC, permitting Susquehanna Steam Electric Station to load six new 89 multi-purpose canisters (MPC) with continuous basket shims in the HI–STORM Flood/Wind MPC Storage System at its Susquehanna Steam Electric Station, Units 1 and 2 independent spent fuel storage installation in a storage condition where the terms, conditions, and specifications in the Certificate of Compliance No. 1032, Amendment No. 5, are not met.

DATES: The exemption was issued on April 22, 2024.

ADDRESSES: Please refer to Docket ID NRC–2024–0068 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2024–0068. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' Chief, Storage and Transportation Licensing Branch, Division of Fuel Management, Office of Nuclear Material Safety, and Safeguards.

Attachment—Exemption

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 72–0028, 50–387, and 50–388]

Susquehanna Nuclear, LLC; Susquehanna Steam Electric Station Units 1 and 2; Independent Spent Fuel Storage Installation

I. Background

Susquehanna Nuclear, LLC (Susquehanna) is the holder of Renewed Facility Operating License Nos. NPF–14 and NPF–22, which authorize operation of the Susquehanna Steam Electric Station (SSES), Units 1 and 2 in Salem Township, Luzerne County, PA (70 miles northeast of Harrisburg, PA), pursuant to Part 50 of Title 10 of the *Code of Federal Regulations* (10 CFR), ''Domestic Licensing of Production and Utilization Facilities.'' The licenses provide, among other things, that the facility is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (NRC) now or hereafter in effect.

Consistent with 10 CFR part 72, subpart K, ''General License for Storage of Spent Fuel at Power Reactor Sites,'' a general license is issued for the storage of spent fuel in an Independent Spent Fuel Storage Installation (ISFSI) at power reactor sites to persons authorized to possess or operate nuclear power reactors under 10 CFR part 50. Susquehanna is authorized to operate nuclear power reactors under 10 CFR part 50 and holds a 10 CFR part 72 general license for storage of spent fuel at the SSES ISFSI. Under the terms of the general license, Susquehanna stores spent fuel at its SSES ISFSI using the HI–STORM Flood/Wind (FW) Multi-Purpose Canister (MPC) Storage System in accordance with Certificate of Compliance (CoC) No. 1032, Amendment No. 5.

II. Request/Action

By a letter dated March 19, 2024 (Agencywide Documents Access and Management System [ADAMS] Accession No. ML24079A070) and supplemented on March 21, 2024 (ML24081A335), Susquehanna requested an exemption from the requirements of 10 CFR 72.212(a)(2), 72.212(b)(3), 72.212(b)(5)(i), 72.212(b)(11), and 72.214 that requires SSES to comply with the terms, conditions, and specifications of the CoC No. 1032, Amendment No. 5 (ML20163A701). If approved, Susquehanna's exemption request would accordingly allow SSES to load MPCs with continuous basket shims (CBS) (*i.e.,* MPC–89–CBS), an unapproved variant basket design, in the HI–STORM FW MPC Storage System, and thus, to load the systems in a storage condition where the terms, conditions, and specifications in the CoC No. 1032, Amendment No. 5, are not met.

Susquehanna currently uses the HI–STORM FW MPC Storage System under CoC No. 1032, Amendment No. 5, for dry storage of spent nuclear fuel at the SSES ISFSI. Holtec International (Holtec), the designer and manufacturer of the HI–STORM FW MPC Storage

System, developed a variant of the MPC–89 design with CBS, known as MPC–89–CBS. Holtec performed a non-mechanistic tip-over analysis with favorable results and implemented the CBS variant design under the provisions of 10 CFR 72.48, ''Changes, tests, and experiments,'' which allows licensees to make changes to cask designs without a CoC amendment under certain conditions (listed in 10 CFR 72.48(c)). After evaluating the specific changes to the cask designs, the NRC determined that Holtec erred when it implemented the CBS variant design under 10 CFR 72.48, as this is not the type of change allowed without a CoC amendment. For this reason, the NRC issued three Severity Level IV violations to Holtec (ML24016A190).

Susquehanna's near-term loading campaign for the SSES ISFSI includes plans to load six MPC–89–CBS in the HI–STORM FW MPC Storage System beginning in August 2024. While Holtec was required to submit a CoC amendment to the NRC to seek approval of the CBS variant design, such a process will not be completed in time to inform decisions for this near-term loading campaign. Therefore, Susquehanna submitted this exemption request to allow for future loading of six MPC–89–CBS beginning in August 2024 at the SSES ISFSI. This exemption is limited to the use of MPC–89–CBS in the HI–STORM FW MPC Storage System only for the specific near-term planned loading of six new canisters using the MPC–89–CBS variant basket design.

III. Discussion

Pursuant to 10 CFR 72.7, ''Specific exemptions,'' the Commission may, upon application by any interested person or upon its own initiative, grant such exemptions from the requirements of the regulations of 10 CFR part 72 as it determines are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest.

A. The Exemption Is Authorized by Law

This exemption would allow Susquehanna to load six new MPC–89–CBS in the HI–STORM FW MPC Storage System, beginning in August 2024, at its SSES ISFSI in a storage condition where the terms, conditions, and specifications in the CoC No. 1032, Amendment No. 5, are not met. Susquehanna is requesting an exemption from the provisions in 10 CFR part 72 that require the licensee to comply with the terms, conditions, and specifications of the CoC for the approved cask model it uses. Section 72.7 allows the NRC to grant exemptions from the requirements of 10 CFR part 72. This authority to grant exemptions is consistent with the Atomic Energy Act of 1954, as amended, and is not otherwise inconsistent with NRC's regulations or other applicable laws. Additionally, no other law prohibits the activities that would be authorized by the exemption. Therefore, the NRC concludes that there is no statutory prohibition on the issuance of the requested exemption, and the NRC is authorized to grant the exemption by law.

B. The Exemption Will Not Endanger Life or Property or the Common Defense and Security

This exemption would allow Susquehanna to load six new MPC–89–CBS in the HI–STORM FW MPC Storage System, beginning in August 2024, at the SSES ISFSI in a storage condition where the terms, conditions, and specifications in the CoC No. 1032, Amendment No. 5, are not met. In support of its exemption request, Susquehanna asserts that issuance of the exemption would not endanger life or property because a tip-over or handling event is administratively controlled, and that the containment boundary would be maintained in such an event. Susquehanna relies, in part, on the approach in the NRC's Safety Determination Memorandum (ML24018A085). The NRC issued this Safety Determination Memorandum to address whether, with respect to the enforcement action against Holtec regarding this violation, there was any need to take an immediate action for the cask systems that were already loaded with non-compliant basket designs. The Safety Determination Memorandum documents a risk-informed approach concluding that, during the design basis event of a non-mechanistic tip-over, the fuel in the basket in the MPC–89–CBS remains in a subcritical condition.

Susquehanna also provided site-specific technical information, as supplemented, including information explaining why the use of the approach in the NRC's Safety Determination Memorandum is appropriate for determining the safe use of the CBS variant baskets at the SSES ISFSI. Specifically, Susquehanna described that the analysis of the tip-over design basis event that is relied upon in the NRC's Safety Determination Memorandum, which demonstrates that the MPC confinement barrier is maintained, is documented in the updated final safety analysis report (UFSAR) for the HI–STORM FW MPC Storage System CoC No. 1032, Amendment 5, that is used at the SSES site. In addition, the handling procedures utilized by Susquehanna comply with the requirements of Appendix A of CoC No. 1032, Amendment No. 5, including a single failure proof lifting system and redundant drop protection features in accordance with applicable codes and standards.

Additionally, Susquehanna referenced specific information from SSES's 72.212 Evaluation Report, Revision 0, that demonstrated the combined dose produced by the storage systems on the SSES ISFSI will not result in annual doses at the ISFSI controlled area boundary in excess of the limits specified in 10 CFR 72.104(a), ''Criteria for radioactive materials in effluents and direct radiation from an ISFSI or MRS,'' during normal and anticipated operational occurrences, or in excess of the limits specified in 72.106, ''Controlled area of an ISFSI or MRS,'' during design bases accidents. Specifically, Susquehanna described that, in the highly unlikely event of a tip-over, any potential fuel damage from a non-mechanistic tip-over event would be localized, the confinement barrier would be maintained, and the shielding material would remain intact. Susquehanna concluded that there is no adverse effect on the shielding or confinement functions since there is no effect on occupational or public exposures as a result of this accident condition.

The NRC staff reviewed the information provided by Susquehanna and concludes that issuance of the exemption would not endanger life or property because the administrative controls Susquehanna has in place at the SSES ISFSI sufficiently minimize the possibility of a tip-over or handling event, and that the containment boundary would be maintained in such an event. The staff confirmed that these administrative controls comply with the technical specifications and UFSAR for the HI–STORM FW MPC Storage System CoC No. 1032, Amendment No. 5, that is used at the SSES site. In addition, the staff confirmed that the information provided by Susquehanna regarding SSES's 72.212 Evaluation Report, Revision 0, demonstrates that the consequences of normal and accident conditions would be within the regulatory limits of the 10 CFR 72.104 and 10 CFR 72.106. The staff also determined that the requested exemption is not related to any aspect of the physical security or defense of the SSES ISFSI; therefore, granting the exemption would not result in any potential impacts to common defense and security.

For these reasons, the NRC staff determined that under the requested exemption, the storage system will continue to meet the safety requirements of 10 CFR part 72 and the offsite dose limits of 10 CFR part 20 and, therefore, will not endanger life or property or the common defense and security.

C. The Exemption Is Otherwise in the Public Interest

The proposed exemption would allow Susquehanna to load six new MPC–89–CBS in the HI–STORM FW MPC Storage System beginning in August 2024, at the SSES ISFSI, even though the CBS variant basket design is not part of the approved CoC No. 1032, Amendment No. 5. According to Susquehanna, the exemption is in the public interest because not being able to load fuel into dry storage in the future loading campaign would adversely impact Susquehanna's ability to maintain full core offload capability, consequently increasing risk and challenges to continued safe reactor operation.

Susquehanna stated that to delay the future loading would impact the ability to maintain a healthy margin in the spent fuel pools in support of a full core discharge for one reactor unit with a goal of providing a full core discharge for both reactor units. Susquehanna also stated that the inability to utilize the MPC–89 canister containing the CBS basket in the 2024 Spent Fuel Storage campaign significantly impacts the ability to effectively manage margin for full core discharge capability, because margin reduction results in increased inventory in the spent fuel pool that would likely require additional fuel moves and an increased reactivity management risk due to increased fuel handling operations. Additionally, Susquehanna notes that there are logistical concerns that the availability of the specialized equipment and personnel resources, which are secured years in advance of scheduled campaigns, would have a cascading impact on all other scheduled activities that utilize these specialized resources. Any delay would lead to a reduction in the margin to capacity in the spent fuel pool. Once the spent fuel pool capacity is reached, the ability to refuel the operating reactor is limited, thus affecting continued reactor operations.

For the reasons described by Susquehanna in the exemption request, the NRC agrees that it is in the public interest to grant the exemption. If the exemption is not granted, to comply with the CoC, SSES would have to keep spent fuel in the spent fuel pool if it is not permitted to be loaded into casks in a future loading, thus impacting Susquehanna's ability to effectively manage the margin for full core discharge capacity. As explained by Susquehanna, increased inventory of fuel in the spent fuel pool could result in the need for additional fuel moves and, therefore, an increase in worker doses and the potential for fuel handling accidents that accompany increased fuel handling operations. Moreover, should spent fuel pool capacity be reached, the ability to refuel an operating reactor unit is challenged, thus potentially impacting continued reactor operations.

Therefore, the staff concludes that approving the exemption is in the public interest.

Environmental Consideration

The NRC staff also considered whether there would be any significant environmental impacts associated with the exemption. For this proposed action, the NRC staff performed an environmental assessment pursuant to 10 CFR 51.30. The environmental assessment concluded that the proposed action would not significantly impact the quality of the human environment. The NRC staff concluded that the proposed action would not result in any changes in the types or amounts of any radiological or non-radiological effluents that may be released offsite, and there would be no significant increase in occupational or public radiation exposure because of the proposed action. The environmental assessment and the finding of no significant impact was published on April 22, 2024 (89 FR 29369).

IV. Conclusion

Based on these considerations, the NRC has determined that, pursuant to 10 CFR 72.7, the exemption is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the public interest. Therefore, the NRC grants Susquehanna an exemption from the requirements of §§ 72.212(a)(2), 72.212(b)(3), 72.212(b)(5)(i), 72.212(b)(11), and 72.214 with respect to the future loading in the HI–STORM FW MPC Storage System of six new MPC–89–CBS beginning in August 2024.

This exemption is effective upon issuance.

Dated: April 22, 2024.

For the Nuclear Regulatory Commission.

/RA/

Yoira Diaz-Sanabria,

Chief, Storage and Transportation Licensing Branch, Division of Fuel Management, Office of Nuclear Material Safety, and Safeguards.

BILLING CODE 7590–01–P

NUCLEAR WASTE TECHNICAL REVIEW BOARD

Board Meeting

The U.S. Nuclear Waste Technical Review Board will hold a hybrid (in-person/virtual) public meeting on May 21–22, 2024.

Board meeting: May 21–22, 2024—*The U.S. Nuclear Waste Technical Review Board will hold a hybrid (in-person/virtual) public meeting in Knoxville, TN, to review information on the U.S. Department of Energy's (DOE) research and development (R&D) activities (a) related to non-site-specific disposal of spent nuclear fuel and high-level radioactive waste in crystalline host rocks and (b) on corrosion of commercial SNF after disposal.*

Pursuant to its authority under section 5051 of Public Law 100–203, Nuclear Waste Policy Amendments Act (NWPAA) of 1987, the U.S. Nuclear Waste Technical Review Board will hold a hybrid (in-person/virtual) meeting in Knoxville, TN, on Tuesday, May 21, 2024, and Wednesday, May 22, 2024, to review information on the U.S. Department of Energy's (DOE) research and development (R&D) activities (a) related to non-site-specific disposal of spent nuclear fuel (SNF) and high-level radioactive waste (HLW) in crystalline host rocks and (b) on corrosion of commercial SNF after disposal.

The hybrid (in-person/virtual) meeting will be held at the Hilton Downtown Knoxville Hotel at 501 West Church Avenue in Knoxville, Tennessee. The hotel telephone number is 865–523–2300. The hotel website is *https://www.hilton.com/en/hotels/knxkhhf-hilton-knoxville/.* On Tuesday, May 21, the meeting will begin at 80 a.m. eastern daylight time (EDT) and is scheduled to adjourn at approximately 5 p.m. EDT. On Wednesday, May 22, the hybrid meeting will begin at 8 a.m. EDT and conclude at 12 p.m. EDT. On the first day, the initial speakers will provide an overview of DOE's SNF and HLW disposal research programs. Additional speakers representing the national laboratories conducting the work for DOE will report on R&D activities to advance the understanding of long-term waste disposal in crystalline rocks. They will also discuss

R&D efforts related to the corrosion of commercial SNF. This includes the development of a corrosion model capable of accounting for complex physical and chemical processes for a wide range of repository conditions. Speakers from Finland and Canada will present information on their countries' disposal programs. A detailed meeting agenda will be available on the Board's website at *www.nwtrb.gov* approximately one week before the meeting.

The meeting will be open to the public, and there will be an opportunity for public comment at the end of the meeting each day. Those attending the meeting in person and wishing to provide oral comments are encouraged to sign-in using the Public Comment Register at the check-in table near the entrance to the meeting room. Oral commenters will be taken in the order in which they signed in. Public comments may also be submitted during the meeting via the online meeting viewing platform, using the ''Comment for the Record'' form. Comments submitted online during the day of the meeting may be read into the record by Board staff during the public comment period if time allows. Depending on the number of speakers and online comments, a time limit on individual remarks may be set. Written comments of any length may be submitted to the Board staff by mail or electronic mail. Comments received in writing will be included in the meeting record, which will be posted on the Board's website. An archived recording of the meeting will be available on the Board's website following the meeting, and a transcript of the meeting will be available on the website by July 31, 2024.

The Board is an independent federal agency in the Executive Branch. It was established in the Nuclear Waste Policy Amendments Act of 1987 (Pub. L. 100–203) to perform ongoing evaluation of the technical and scientific validity of U.S. Department of Energy activities related to developing and implementing a program for the management and disposal of spent nuclear fuel and high-level radioactive waste, in accordance with the terms of the Nuclear Waste Policy Act of 1982. Board members serve part-time and are appointed by the President from a list of nominees submitted by the National Academy of Sciences. The Board reports its findings, conclusions, and recommendations to Congress and the Secretary of Energy. Board reports, correspondence, congressional testimony, meeting transcripts, and related materials are posted on the Board's website.

For information regarding the meeting, contact Mr. Christopher Burk at *burk@nwtrb.gov,* or by phone at 703–235–4486, or Ms. Chandrika Manepally at *manepally@nwtrb.gov,* or by phone at 703–235–4489. For information on meeting logistics, contact Davonya Barnes at *barnes@nwtrb.gov,* or by phone at 703–235–9141. All three may be reached by mail at 2300 Clarendon Boulevard, Suite 1300, Arlington, VA 22201–3367; or by fax at 703–235–4495.

Dated: April 22, 2024.

Daniel G. Ogg,

Executive Director, U.S. Nuclear Waste Technical Review Board.

BILLING CODE 6820–AM–P

OFFICE OF PERSONNEL MANAGEMENT

Submission for Review: 3206–0228, CSRS/FERS Documentation in Support of Disability Retirement Application, Standard Form 3112

AGENCY: Office of Personnel Management.

ACTION: 30-Day notice and request for comments.

SUMMARY: The Office of Personnel Management (OPM), Retirement Services, offers the general public and other Federal agencies the opportunity to comment on an expiring information collection request (ICR): CSRS/FERS Documentation in Support of Disability Retirement Application, Standard Form 3112.

DATES: Comments are encouraged and will be accepted until May 30, 2024.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503, Attention: Desk Officer for the Office of Personnel Management or sent via electronic mail to: *oira_submission@omb.eop.gov* or faxed to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: A copy of this ICR with applicable supporting documentation may be obtained by contacting the Retirement Services Publications Team, Office of Personnel Management, 1900 E Street NW, Room 3316–L, Washington, DC 20415, Attention: Cyrus S. Benson, or sent via electronic mail to *Cyrus.Benson@opm.gov* or faxed to (202) 606–0910 or via telephone at (202) 936–0401.

SUPPLEMENTARY INFORMATION: As required by the Paperwork Reduction Act of 1995, OPM is soliciting comments for this collection. The information collection (OMB No. 3206–0228) was previously published in the **Federal Register** on May 3, 2023, at 88 FR 27931, allowing for a 60-day public comment period. No comments were received.

The Office of Management and Budget is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Standard Form 3112, CSRS/FERS Documentation in Support of Disability Retirement Application, collects information from applicants for disability retirement so that OPM can determine whether to approve a disability retirement under 5 U.S.C. 8337 and 8455. The applicant will only complete Standard Form 3112A and 3112C. The applicant must obtain information from a physician as part of Standard Form 3112C. Standard Forms 3112B, 3112D and 3112E will be completed by the immediate supervisor and the employing agency of the applicant.

Analysis

Agency: Retirement Operations, Retirement Services, Office of Personnel Management.

Title: CSRS/FERS Documentation in Support of Disability Retirement.

OMB Number: 3206–0228.

Frequency: On occasion.

Affected Public: Individuals or Households.

Number of Respondents: 36,300 total respondents [12,100 (SF 3112A), 12,100 (SF 3112B) and 12,100 (SF 3112C)].

Estimated Time per Respondent: 30 minutes (SF 3112A) and 60 minutes (SF 3112C).

Total Burden Hours: 30,250 total hours [6,050 hours (SF 3112A), 12,100 (SF 3112B), and 12,100 hours (SF 3112C)].

Form RI 92–22, Annuity Supplement Earnings Report, is used to annually obtain the earned income of Federal Employees Retirement System (FERS) annuitants receiving an annuity supplement. The annuity supplement is paid to eligible FERS annuitants who are not retired on disability and are not yet age 62. The supplement approximates the portion of full career Social Security benefits earned while under FERS and ends at age 62. Like

Social Security benefits, the annuity supplement is subject to an earnings limitation.

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2024–248 and CP2024–254; MC2024–249 and CP2024–255]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* May 2, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the Market Dominant or the Competitive product list, or the modification of an existing product currently appearing on the Market Dominant or the Competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern Market Dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3030, and 39 CFR part 3040, subpart B. For request(s) that the Postal Service states concern Competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3040, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* MC2024–248 and CP2024–254; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 61 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* April 24, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Christopher C. Mohr; *Comments Due:* May 2, 2024.

2. *Docket No(s).:* MC2024–249 and CP2024–255; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 62 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* April 24, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Christopher C. Mohr; *Comments Due:* May 2, 2024.

This Notice will be published in the **Federal Register**.

Erica A. Barker,

Secretary.

BILLING CODE 7710–FW–P

[1] *See* Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100022; File No SR–FICC–2024–007]

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Designation of Longer Period for Commission Action on Proposed Rule Change To Modify the GSD Rules (i) Regarding the Separate Calculation, Collection and Holding of Margin for Proprietary Transactions and That for Indirect Participant Transactions, and (ii) To Address the Conditions of Note H to Rule 15c3–3a

April 24, 2024.

On March 14, 2024, Fixed Income Clearing Corporation (''FICC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change SR–FICC–2024–007 pursuant to Section 19(b) of the Securities Exchange Act of 1934 (''Exchange Act'') [1] and Rule 19b–4 [2] thereunder to modify FICC's Government Securities Division (''GSD'') Rulebook (''GSD Rules'') to calculate, collect, and hold margin for proprietary transactions of a Netting Member separately from margin that the Netting Member submits to FICC on behalf of indirect participants and to address conditions of Note H to Rule 15c3–3a [3] [4] under the Act.[5] The Proposed Rule Change was published for public comment in the **Federal Register** on March 28, 2024.[6] The Commission has received comments

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Notice of Filing *infra* note 5, at 89 FR 21363.

[4] *See* Securities Exchange Act Release No. 99149 (Dec. 13, 2023), 89 FR 2714 (Jan. 16, 2024) (S7–23–22) (''Adopting Release,'' and the rules adopted therein). *See also* 17 CFR 240.15c3–3a.

[5] *See* Notice of Filing *infra* note 6, at 89 FR 21363.

[6] Securities Exchange Act Release No. 99844 (March 22, 2024), 89 FR 21603 (March 28, 2024) (File No. SR–FICC–2024–007) (''Notice of Filing'').

regarding the substance of the changes proposed in the Proposed Rule Change.[7]

Section 19(b)(2)(i) of the Exchange Act[8] provides that, within 45 days of the publication of notice of the filing of a proposed rule change, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved unless the Commission extends the period within which it must act as provided in Section 19(b)(2)(ii) of the Exchange Act.[9] Section 19(b)(2)(ii) of the Exchange Act allows the Commission to designate a longer period for review (up to 90 days from the publication of notice of the filing of a proposed rule change) if the Commission finds such longer period to be appropriate and publishes its reasons for so finding, or as to which the self-regulatory organization consents.[10]

The 45th day after publication of the Notice of Filing is May 12, 2024. In order to provide the Commission with sufficient time to consider the Proposed Rule Change, the Commission finds that it is appropriate to designate a longer period within which to take action on the Proposed Rule Change and therefore is extending this 45-day time period.

Accordingly, the Commission, pursuant to Section 19(b)(2) of the Exchange Act,[11] designates June 26, 2024, as the date by which the Commission shall either approve, disapprove, or institute proceedings to determine whether to disapprove proposed rule change SR–FICC–2024–007.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35175; 812–15524]

Venerable Insurance and Annuity Company, et al.

April 24, 2024.

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice.

Notice of an application for an order pursuant to Section 6(c) of the Investment Company Act of 1940 (the ''Act'').

SUMMARY OF APPLICATION: Applicants request an order pursuant to Section 6(c) of the Act exempting them from the provisions of Sections 2(a)(32), 22(c), and 27(i)(2)(A) of the Act and Rule 22c–1 under the Act to the extent necessary to permit Applicants, under specified circumstances, to recapture certain bonus credits applied to purchase payments with respect to certain deferred annuity contracts issued by Venerable Insurance and Annuity Company.

APPLICANTS: Venerable Insurance and Annuity Company, Separate Account EQ of Venerable Insurance and Annuity Company, and Directed Services LLC.

FILING DATES: The application was filed on November 20, 2023, and amended on March 6, 2024.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on May 20, 2024, and should be accompanied by proof of service on the Applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary.

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: J. Neil McMurdie, *neil.mcmurdie@venerable.com.*

FOR FURTHER INFORMATION CONTACT: Jill Ehrlich, Senior Counsel, or Lisa Reid Ragen, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' amended application, dated March 6, 2024, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field on the SEC's EDGAR system.

The SEC's EDGAR system may be searched at *https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html.* You may also call the SEC's Public Reference Room at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

Self-Regulatory Organizations; BOX Exchange LLC; Cboe Exchange, Inc.; MIAX International Securities Exchange LLC; MIAX PEARL LLC; Nasdaq ISE, LLC; NYSE American LLC; Order Instituting Proceedings To Determine Whether To Approve or Disapprove Proposed Rule Changes To Permit the Listing and Trading of Options on Trusts That Hold Bitcoin

April 24, 2024.

I. Introduction

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'' or ''Exchange Act'')[1] and Rule 19b–4 thereunder,[2] BOX Exchange LLC (''BOX''); Cboe Exchange, Inc. (''Cboe Options''); MIAX International Securities Exchange LLC (''MIAX''); MIAX PEARL LLC (''MIAX Pearl''); Nasdaq ISE, LLC (''ISE''); and NYSE American LLC (''NYSE American'') (collectively, the ''Exchanges'' and each an ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') proposed rule changes to list and trade options on exchange-

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

traded product (''ETP'') shares that represent interests in either a specified bitcoin trust or in any trust that holds bitcoin, as described below (each, a ''Proposal,'' and collectively, the ''Proposals''). Specifically, ISE proposed to list and trade options on shares that represent interests in the iShares Bitcoin Trust.[3] BOX, Cboe Options, MIAX, MIAX Pearl and, in a second filing, ISE, proposed to list and trade options on shares that represent interests in a trust that holds bitcoin.[4] NYSE American proposed to list and trade options on shares that represent interests in the Bitwise Bitcoin ETF, the Grayscale Bitcoin Trust, and on any trust that holds bitcoin.[5]

On January 25, 2024, the Cboe Options Proposal,[6] the ISE iShares Proposal,[7] the MIAX Proposal,[8] and the MIAX Pearl Proposal [9] were published for comment in the **Federal Register**. On March 6, 2024, pursuant to Section 19(b)(2) of the Act,[10] the Commission designated a longer period within which to approve these proposals, disapprove the proposals, or institute proceedings to determine whether to disapprove the proposals.[11] The NYSE American Proposal was published for comment in the **Federal Register** on February 29, 2024.[12] On April 8, 2024, pursuant to Section 19(b)(2) of the Act,[13] the Commission designated a longer period within which to approve the proposal, disapprove the proposal, or institute proceedings to determine whether to disapprove the NYSE American Proposal.[14] On March 25, 2024, the BOX Proposal [15] and the ISE Trust Proposal [16] were published for comment in the **Federal Register**.

The Commission received comments addressing the ISE iShares Proposal,[17] the NYSE American Proposal,[18] and the Cboe Proposal.[19] This order institutes proceedings pursuant to Section 19(b)(2)(B) of the Act [20] to determine whether to approve or disapprove the Proposals.

II. Description of the Proposals

As described in detail in the notices of their respective Proposals,[21] the Exchanges proposed to amend their rules to permit the listing and trading of options on shares that represent interests in any trust that holds spot bitcoin,[22] or options on shares that represent interests in specified trusts that hold spot bitcoin [23] (such trusts, collectively, the ''Bitcoin ETPs'').

The Exchanges stated that Bitcoin ETPs are trusts that hold spot bitcoin, and that the investment objective of a Bitcoin ETP is to reflect the performance of bitcoin (less the expenses of the trust's operations), offering investors an opportunity to gain exposure to bitcoin without the complexities of direct investment in bitcoin.[24] The Exchanges stated that the Bitcoin ETPs also would provide investors with a hedging and risk management tool to manage their exposure to the price of bitcoin and bitcoin-related products and positions.[25] Additionally, several Exchanges stated that the Proposals would provide investors with the ability to transact Bitcoin ETP options on a listed market rather than in the unregulated over-the-counter options market, which would increase market transparency and enhance the process of price discovery conducted on the Exchanges through increased order flow.[26] Several Exchanges stated that the primary substantive difference between the proposed Bitcoin ETPs and exchange-traded funds (''ETFs'') currently deemed appropriate for options trading on the Exchanges are that the ETFs may hold securities, certain financial instruments, and specified precious metals, while Bitcoin ETPs hold bitcoin.[27] The Exchanges

The Exchanges' rules use the term ''exchange traded fund'' to refer to several types of investment products. For example, BOX Rule 5020(h) provides: ''Securities deemed appropriate for options trading shall include shares or other securities (''Exchange-Traded Fund Shares'') that are traded on a national securities exchange and are defined as an ''NMS stock'' under Rule 600 of Regulation NMS and that (i) represent interests in registered investment companies (or series thereof) organized as open-end management investment companies, unit investment trusts or similar entities that hold portfolios of securities and/or financial instruments, including, but not limited to, stock index futures contracts, options on futures, options on securities and indices, equity caps, collars and floors, swap agreements, forward contracts, repurchase agreements and reverse repurchase agreements (the ''Financial Instruments'') and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the ''Money Market Instruments'') comprising or otherwise based on or representing investments in broad-based indexes or portfolios of securities and/or Financial Instruments and Money Market Instruments (or that hold securities in one or more other registered investment companies that themselves hold such portfolios of securities and/or Financial Instruments and Money Market

Continued

stated that they have not identified any issues with the continued listing and trading of any ETF or ETP options currently trading on the Exchanges, including options on ETPs that hold commodities.[28]

Bitcoin ETP options will be physically settled with American-style exercise.[29] The Exchanges stated that Bitcoin ETP options will be subject to the Exchanges' respective initial and continued listing standards.[30] The Exchanges' initial listing standards require, among other things, that the security underlying a listed option be ''characterized by a substantial number of outstanding shares that are widely held and actively traded.'' [31] The Exchanges stated that Bitcoin ETP options will trade in the same manner as other ETF options, and that Bitcoin ETP options would be subject to the Exchanges' rules that currently apply to the listing and trading of all ETF options on the Exchanges, including, for example, exchange rules governing listing criteria, expiration and exercise prices, minimum increments, position and exercise limits, margin requirements, customer accounts and trading halt procedures.[32]

The Exchanges stated that position and exercise limits for Bitcoin ETP options would be determined pursuant to the Exchanges' existing rules.[33] Under these rules, the position limit applicable to an options class depends upon the trading volume and outstanding shares of the underlying security. The Exchanges stated that the highest option position and exercise limit—250,000 option contracts on the same side of the market—would apply to options on a Bitcoin ETP with the highest trading volume and number of shares outstanding.[34] Position and exercise limits of 200,000, 75,000, 50,000 or 25,000 contracts on the same side of the market would apply to Bitcoin ETP options with lower six-month trading volumes and numbers of shares outstanding.[35]

The Exchanges represented that the surveillance procedures that they apply to other ETF options would apply to options on Bitcoin ETPs, and that their existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior that might arise from listing and trading options on ETFs.[36] In addition, several Exchanges stated that they may obtain information from contract markets that are members of the Intermarket Surveillance Group (''ISG'') related to any financial instrument that is based, in whole or in part, upon an interest in or the performance of bitcoin.[37] Each Exchange represented that it believed that both the Exchange and the Options Price Reporting Authority, LLC (''OPRA'') have the necessary systems capacity to handle the additional traffic associated with the listing of new series that may result from the introduction of options on Bitcoin ETPs.[38]

One Exchange acknowledged that options on the Bitcoin ETPs will not be available for trading until The Options Clearing Corporation (''OCC'') represents to the Exchange that it is able to clear and settle the options.[39]

III. Summary of Comments Received

The Commission received comments addressing the ISE iShares Proposal,[40] the NYSE American Proposal,[41] and both the Cboe and NYSE American Proposals.[42] Commenters stated the

Instruments); or (ii) represent interests in a trust that holds a specified non-U.S. currency deposited with the trust or similar entity when aggregated in some specified minimum number may be surrendered to the trust by the beneficial owner to receive the specified non-U.S. currency or currencies and pays the beneficial owner interest and other distributions on the deposited non-U.S. currency or currencies, if any, declared and paid by the trust (''Currency Trust Shares''); or (iii) represent commodity pool interests principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or non-U.S. currency (''Commodity Pool ETFs'') or (iv) represent interests in the SPDR® Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, the ETFS Gold Trust, the ETFS Silver trust, the ETFS Palladium Trust, the ETFS Platinum Trust or the Sprott Physical Gold Trust; provided that all of the following conditions are met. . . .'' *See also* Cboe Rules 1.1 and 4.3, Interpretation and Policy .06; ISE Options 4, Section 3(h); MIAX Rule 402(i); MIAX Pearl Rule 402(i); NYSE American Rule 915, Commentary .06. In describing the Proposals, for purposes of this Order, the terms ''exchange-traded fund'' and ''ETF'' have the meaning set forth in the Exchanges' rules.

options on spot Bitcoin ETPs would help investors hedge their positions in spot bitcoin and manage risk.[43] One commenter stated that permitting options on the iShares Bitcoin Trust would likely increase overall market liquidity, allow for arbitrage and increased market efficiency, and provide investors with additional investing tools to take exposure to spot bitcoin.[44] Other commenters stated the Commission should permit the listing of options on shares of spot bitcoin-based ETPs because options on shares of an ETF holding bitcoin futures already trade.[45] One commenter also stated that options on ETPs holding spot bitcoin and options on ETFs holding bitcoin futures are both subject to the risks presented by the spot bitcoin market,[46] and commenters further stated that options on extremely similar national market system (''NMS'') securities [47] should have the same regulatory treatment.[48] One commenter further stated that because ''the price trajectories of the spot- and futures-based bitcoin ETFs are virtually identical,'' options on these securities should have the same regulatory treatment.[49] The commenter also stated that the Commission should allow options exchanges to list options on any NMS security that meets the exchange's quantitative listing standards without filing a proposed rule change with the Commission.[50]

One commenter stated that options are an efficient risk management tool that give investors the ability to take on or reduce risk.[51] Another commenter stated that options on spot bitcoin ETPs would facilitate price discovery in the shares of the underlying ETP, improve market efficiency, and help investors achieve desired investment outcomes, such as generating income, hedging, or reducing volatility.[52] In addition, the commenter stated that approving the listing and trading of options on spot Bitcoin ETPs ''would further bring Bitcoin into the regulatory perimeter by allowing additional regulated market participants such as CFTC-regulated designated contract merchants and SEC-regulated broker-dealers to trade the products.'' [53]

IV. Proceedings To Determine Whether To Approve or Disapprove File Nos. SR–BOX–2024–07; SR–CBOE–2024–005; SR–ISE–2024–03; SR–ISE–2024–14; SR–MIAX–2024–03; SR–NYSEAMER–2024–10; and SR–PEARL–2024–03 and Grounds for Disapproval Under Consideration

The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Act [54] to determine whether the Proposals should be approved or disapproved. Institution of proceedings is appropriate at this time in view of the legal and policy issues raised by the proposed rule change, as discussed below. Institution of proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved. Rather, as described below, the Commission seeks and encourages interested persons to provide comments on the proposed rule change.

Pursuant to Section 19(b)(2)(B) of the Act,[55] the Commission is providing notice of the grounds for disapproval under consideration. The Commission is instituting proceedings to allow for additional analysis of the Proposals' consistency with Section 6(b)(5) of the Act,[56] which requires, among other things, that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

Under the Commission's Rules of Practice, the ''burden to demonstrate that a proposed rule change is consistent with the [Act] and the rules and regulations issued thereunder . . . is on the self-regulatory organization that proposed the rule change.'' [57] The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding,[58] and any failure of a self-regulatory organization to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Act and the applicable rules and regulations.[59]

As discussed above, the Exchanges' initial listing standards require, among other things, that the security underlying a listed option be ''characterized by a substantial number of outstanding shares that are widely held and actively traded.'' [60] Instituting proceedings allows for comment on whether the Proposals have demonstrated that spot Bitcoin ETP shares meet this standard. In addition, the Proposals stated that spot Bitcoin ETP options would be subject to the Exchanges' rules that currently apply to the listing of ETF options, including, among others, the Exchanges' option position and exercise limit rules.[61] Under the Exchanges' rules, options that have traded for less than six months would be subject to a position limit of 25,000 contracts on the same side of the market.[62] The Exchanges' rules provide higher position limits based on the six-month average daily volume and/or number of shares outstanding of the underlying security.[63] Instituting proceedings allows for comment on whether the Proposals have demonstrated that these position limits are appropriate for the proposed spot Bitcoin ETP options. In addition, instituting proceedings allows for comment on whether the Proposals have demonstrated that listing options on the Bitcoin ETPs would not result in adverse market impacts.

V. Procedure: Request for Written Comments

The Commission requests that interested persons provide written

University, to the Commission, dated March 10, 2024 (''Angel Letter'').

[63] *See supra* note 35.

submissions of their data, views, and arguments with respect to the issues identified above, as well as any other concerns they may have with the Proposals. In particular, the Commission invites the written views of interested persons concerning whether the proposed rule changes are consistent with Section 6(b)(5), or any other provision of the Act, or the rules and regulations thereunder. Although there do not appear to be any issues relevant to approval or disapproval which would be facilitated by an oral presentation of data, views, and arguments, the Commission will consider, pursuant to Rule 19b–4 under the Act,[64] any request for an opportunity to make an oral presentation.[65]

Interested persons are invited to submit written data, views, and arguments regarding whether the proposed rule changes should be approved or disapproved by May 21, 2024. Any person who wishes to file a rebuttal to any other person's submission must file that rebuttal by June 4, 2024. The Commission asks that commenters address the sufficiency of the Exchanges' statements in support of their respective Proposals, which are set forth in the Notices,[66] in addition to any other comments they may wish to submit about the proposed rule changes. In particular, the Commission seeks comment on the following questions and asks commenters to submit data where appropriate to support their views:

1. Whether the Proposals should include data demonstrating that the shares of each of the specified Bitcoin ETPs on which an Exchange proposes to list options are ''widely held and actively traded,'' as required by the Exchanges' rules;

2. Whether options on the specified Bitcoin ETPs should be subject to the same position limits as options on stock, and whether the available supply in the markets for bitcoin should be considered in establishing position limits for options on Bitcoin ETPs;

3. Whether the Proposals should analyze the potential impact that listing options on Bitcoin ETPs could have on bitcoin market quality and function, particularly during times of market stress, given the linkages between the options markets for Bitcoin ETPs, spot Bitcoin ETPs, and spot bitcoin;

4. Whether the Proposals should include representations regarding how the Exchanges would obtain information regarding trading in the Bitcoin ETPs from the exchanges where the Bitcoin ETPs trade; and

5. Whether the Proposals seeking to list options on any ETP that holds spot bitcoin provide an adequate basis for the Commission to find that it is consistent with Section 6(b)(5) of the Act to permit the listing of such options, rather than approving options on ETPs that hold bitcoin on a product-by-product basis.[67]

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Nos. SR–BOX–2024–07; SR–CBOE–2024–005; SR–ISE–2024–03; SR–ISE–2024–14; SR–MIAX–2024–03; SR–NYSEAMER–2024–10; SR–PEARL–2024–03 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file numbers SR–BOX–2024–07; SR–CBOE–2024–005; SR–ISE–2024–03; SR–ISE–2024–14; SR–MIAX–2024–03; SR–NYSEAMER–2024–10; SR–PEARL–2024–03. These file numbers should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule changes that are filed with the Commission, and all written communications relating to the proposed rule changes between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal offices of the Exchanges. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file numbers SR–BOX–2024–07; SR–CBOE–2024–005; SR–ISE–2024–03; SR–ISE–2024–14; SR–MIAX–2024–03; SR–NYSEAMER–2024–10; SR–PEARL–2024–03 and should be submitted by May 21, 2024. Rebuttal comments should be submitted by June 4, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[68]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100023; File No. SR–NYSEARCA–2024–06]

Self-Regulatory Organizations; NYSE Arca, Inc.; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To Amend Exchange Rule 5.3–O To Permit the Listing and Trading of Options on Commodity-Based Trust Shares

April 24, 2024.

I. Introduction

On January 16, 2024, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend NYSE Arca Rule 5.3–O(g) to permit the listing and trading of options on Commodity-Based Trust Shares.[3] The proposed rule change was published for comment in the **Federal Register** on January 25, 2024.[4] The Commission received comment letters regarding the proposed rule change.[5] On March 6, 2024, pursuant to Section 19(b)(2) of the Act,[6] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change.[7] This order institutes proceedings pursuant to Section 19(b)(2)(B) of the Act[8] to determine whether to approve or disapprove the proposed rule change.

II. Description of the Proposed Rule Change

As described in greater detail in the Notice,[9] Exchange Rule 5.3–O(g) deems appropriate for options trading certain Exchange-Traded Fund Shares (''ETFs'') that are traded on a national securities exchange and are defined as an ''NMS stock'' in Rule 600 of Regulation NMS.[10] The Exchange proposed to amend Exchange Rule 5.3–O(g) to expand the types of ETFs that may be approved for options trading to include Commodity-Based Trust Shares, as defined in Exchange Rule 8.201–E (''Commodity-Based Trust Shares'').[11] The Exchange stated that it would consider listing and trading options on Commodity-Based Trust that (1) meet the criteria for underlying securities set forth in Exchange Rule 5.3–O(a)[12]–(b),[13] or (2) are available for creation and redemption each business day as set forth in Exchange Rule 5.3–O(g)(1)(B).[14] The Exchange stated that the current continued listing standards for options on ETFs also will apply to options on Commodity-Based Trust Shares.[15] In addition, the Exchange stated that options on Commodity-Based Trust Shares would be subject to the Exchange's rules and procedures governing the trading of equity options, including margin requirements and position and exercise limits.[16]

Currently, the position limits for options on stocks and ETF shares are 25,000 contracts, 50,000 contracts, 75,000 contracts, 200,000 contracts, or 250,000 contracts on the same side of the market based on the six-month trading volume or the six-month trading volume and number of outstanding shares of the underlying security.[17] A position limit of 25,000 contracts on the same side of the market applies to

[6] 15 U.S.C. 78s(b)(2).

[7] *See* Securities Exchange Act Release No. 99683 (Mar. 6, 2024), 89 FR 17888 (Mar. 12, 2024). The Commission designated April 24, 2024, as the date by which the Commission shall approve or disapprove, or institute proceedings to determine whether to approve or disapprove, the proposed rule change.

[8] 15 U.S.C. 78s(b)(2)(B).

[9] *See supra* note 4.

[10] 17 CFR 242.600. *See* Notice, 89 FR at 5029. The Exchange's rules use the term ''exchange traded fund'' to refer to several types of investment products. Exchange Rule 5.3–O(g) states that ''Securities deemed appropriate for options trading shall include shares or other securities (''Exchange-Traded Fund Shares'' or ''Fund Shares'') that are traded on a national securities exchange and are defined as an ''NMS stock'' in Rule 600(b)(55) of Regulation NMS, and that (i) represent an interest in a registered investment company organized as an open-end management investment company, a unit investment trust or a similar entity which holds securities and/or financial instruments, options on securities and indices, equity caps, collars and floors, swap agreements, forward contracts, repurchase agreements and reverse repurchase agreements (the ''Financial Instruments''), and money market instruments, including, but not limited to, U.S. government securities and repurchase agreements (the ''Money Market Instruments'') constituting or otherwise based on or representing an investment in an index or portfolio of securities and/or Financial Instruments and Money Market Instruments, or (ii) represent interests in a trust or similar entity that holds a specified non-U.S. currency deposited with the trust or similar entity when aggregated in some specified minimum number may be surrendered to the trust by the beneficial owner to receive the specified non-U.S. currency and pays the beneficial owner interest and other distributions on the deposited non-U.S. currency, if any, declared and paid by the trust; or (iii) represent commodity pool interests principally engaged, directly or indirectly, in holding and/or managing portfolios or baskets of securities, commodity futures contracts, options on commodity futures contracts, swaps, forward contracts and/or options on physical commodities and/or non-U.S. currency (''Commodity Pool Units''), or (iv) represent interests in the SPDR Gold Trust, or (v) represent interests in the iShares COMEX Gold Trust, or (vi) represent interests in the iShares Silver Trust, (vii) represents an interest in a registered investment company (''Investment Company'') organized as an open-end management investment company or similar entity, that invests in a portfolio of securities selected by the Investment Company's investment adviser consistent with the Investment Company's investment objectives and policies, which is issued in a specified aggregate minimum number in return for a deposit of a specified portfolio of securities and/or a cash amount with a value equal to the next determined net asset value (''NAV''), and when aggregated in the same specified minimum number, may be redeemed at a holder's request, which holder will be paid a specified portfolio of securities and/or cash with a value equal to the next determined NAV (''Managed Fund Share''), or, (viii) represents interests in the ETFS Silver Trust or ETFS Gold Trust, or, (ix) represents interests in the ETFS Palladium Trust or ETFS Platinum Trust, provided. . . .'' In describing the proposal, for purposes of this Order, the terms ''Exchange-Traded Fund'' and ''ETF'' have the meaning set forth in the Exchange's rules.

[11] *See* Notice, 89 FR at 5030. The Exchange stated that the term ''Commodity-Based Trust Shares'' means a security (a) that is issued by a trust (''Trust'') that holds (1) a specified commodity deposited with the Trust, or (2) a specified commodity and, in addition to such specified commodity, cash; (b) that is issued by such Trust in a specified aggregate minimum number in return for a deposit of a quantity of the underlying commodity and/or cash; and (c) that, when aggregated in the same specified minimum number, may be redeemed at a holder's request by such Trust which will deliver to the redeeming holder the quantity of the underlying commodity and/or cash. *See* Notice, 89 FR at 5029, n.4, and NYSE Arca Rule 8.201–E(c)(1).

[12] The Exchange stated that NYSE Arca Rule 5.3–O(a) sets forth minimum requirements for a security underlying an option, including that the underlying security have 7,000,000 shares, 2,000 shareholders, and trading volume of 2,400,000 shares over the preceding 12 months The Exchange stated that the rule requires that the market price per share of the underlying security be at least $7.50 for the majority of business days during the three calendar months preceding the date of selection of an option class. The Exchange stated that tor underlying securities that are deemed Covered Securities, as defined under Section 18(b)(1)(A) of the Securities Act of 1933, the closing market price of the underlying security must be at least $3.00 per share for the previous three consecutive business days prior to the date of selection of an option class. *See* Notice, 89 FR at 5030, n. 8.

[13] The Exchange stated that NYSE Arca Rule 5.3–O(b) states that the underlying securities will be registered and be an ''NMS Stock'' as defined in Rule 600 of Regulation NMS under the Act. *See* Notice, 89 FR at 5030, n. 9.

[14] *See* Notice, 89 FR at 5030.

[15] *See* Notice, 89 FR at 5030.

[16] *See* Notice, 89 FR at 5031. The Exchange stated that pursuant to NYSE Arca Rule 6.8–O, Commentary .05 and .06, Commodity-Based Trust Shares would be subject to the same position limits applicable to options on stocks and ETFs. In addition, the Exchange stated that NYSE Arca Rule 6.9–O provides that exercise limits for options on stocks and other securities, including Commodity-Based Trust Shares, will be the same as the position limits applicable under NYSE Arca Rule 6.8–O. *See* Notice, 89 FR at 5031, n. 14.

[17] *See* NYSE Arca Rule 6.8–O.

options on securities that do not qualify for a higher limit.[18] To be eligible for the 50,000-contract limit, the most recent six-month trading volume of the underlying security must have totaled at least 20,000,000 shares; or the most recent six-month trading volume of the underlying security must have totaled at least 15,000,000 shares and the underlying security must have at least 40,000,000 shares currently outstanding.[19] To be eligible for the 75,000-contract limit, the most recent six-month trading volume of the underlying security must have totaled at least 40,000,000 shares; or the most recent six-month trading volume of the underlying security must have totaled at least 30,000,000 shares and the underlying security must have at least 120,000,000 shares currently outstanding.[20] To be eligible for the 200,000-contract limit, the most recent six-month trading volume of the underlying security must have totaled at least 80,000,000 shares; or the most recent six-month trading volume of the underlying security must have totaled at least 60,000,000 shares and the underlying security must have at least 240,000,000 shares currently outstanding.[21] To be eligible for the 250,000-contract limit, the most recent six-month trading volume of the underlying security must have totaled at least 100,000,000 shares; or the most recent six-month trading volume of the underlying security must have totaled at least 75,000,000 shares and the underlying security must have at least 300,000,000 shares currently outstanding.[22]

The Exchange stated that options on Commodity-Based Trust Shares would not be available for trading until The Options Clearing Corporation (''OCC'') represented to the Exchange that OCC was fully able to clear and settle such options.[23] The Exchange further stated that it had analyzed its capacity and it represented that both the Exchange and the Options Price Reporting Authority LLC (''OPRA'') have the necessary systems capacity to handle the additional traffic that would be associated with the listing of options on Commodity-Based Trust Shares.[24]

The Exchange stated that it believes that its surveillance procedures are adequate to properly monitor the trading of options on Commodity-Based Trust Shares in all trading sessions and to deter and detect violations of the Exchange's rules.[25] The Exchange stated that it would utilize its existing surveillance procedures applicable to options on ETFs (which the Exchange stated will include Commodity-Based Trust Shares) to monitor such trading.[26] In addition, the Exchange stated that it would implement any new surveillance procedures it deemed necessary to effectively monitor the trading of options on Commodity-Based Trust Shares, including adequate comprehensive surveillance sharing agreements (''CSSA'') with markets trading in non-U.S. components, as applicable.[27] The Exchange stated that it may obtain trading information via the Intermarket Surveillance Group (''ISG'') from other exchanges who are members or affiliates of the ISG.[28] The Exchange represented that these procedures would be adequate to properly monitor Exchange trading of options on Commodity-Based Trust Shares and to deter and detect violations of Exchange rules.[29]

The Exchange stated that in approving Commodity-Based Trust Shares for equities exchange trading, the Commission thoroughly considered the structure of the Commodity-Based Trust Shares, their usefulness to investors and to the markets, and the exchange rules governing their trading.[30] The Exchange stated that amending Exchange Rule 5.3–O(g) to allow the listing of options on Commodity-Based Trust Shares would allow options on Commodity-Based Trust Shares that have satisfied the generic listing standards to commence trading without the need for a public comment period and Commission approval.[31] The Exchange further stated that the proposal has the potential to significantly reduce the time frame and costs associated with bringing options on Commodity-Based Trust Shares to market, thereby reducing the burden on issuers and other market participants, while also promoting competition among options exchanges.[32]

III. Summary of Comments Received

The Commission received comment letters regarding the proposal.[33] One commenter stated that ''option trading should be automatic for any NMS security that otherwise meets an exchange's quantitative listing standards.'' [34] Another commenter stated that although NYSE Arca Rule 5.3–O(g) permits options trading for entire classes of investment products, such as open-end investment companies or unit investment trusts, the listing of options on spot commodity-based exchange-traded products is subject to review on a product-by-product basis.[35] According to this commenter, this ''result[s] in a patchwork rule wherein additional individual commodity-based ETPs are tacked on to NYSE Arca Rule 5.3–O(g) and NYSE American Rule 915, rather than being approved as a class.'' [36] This commenter characterized this product-by-product approach for commodity-based exchange-traded products (''ETPs'') as expensive and time-consuming [37] and urged the Commission to ''update its outdated historical patchwork approach to approval of options on spot commodity-based ETPs that are structured identically to those spot commodity-ETPs for which the listing and trading on a national securities exchange has been approved . . . and permit national securities exchanges to update their rules to permit the deemed approval of the listing and trading of such options.'' [38]

One commenter stated that options are an efficient risk management tool that give investors the ability to take on or reduce risk.[39] The commenter further stated that because ''the price trajectories of the spot- and futures-based bitcoin ETFs are virtually identical,'' options on these securities should have the same regulatory treatment.[40] Another commenter stated that options on spot bitcoin ETPs would facilitate price discovery in the shares of the underlying ETP, improve market efficiency, and help investors achieve desired investment outcomes, such as

generating income, hedging, or reducing volatility.[41] In addition, the commenter stated that approving the listing and trading of options on spot Bitcoin ETPs ''would further bring Bitcoin into the regulatory perimeter by allowing additional regulated market participants such as CFTC-regulated designated contract merchants and SEC-regulated broker-dealers to trade the products.[42]

IV. Proceedings To Determine Whether To Approve or Disapprove SR–NYSEARCA–2024–06 and Grounds for Disapproval Under Consideration

The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Act[43] to determine whether the proposed rule change should be approved or disapproved. Institution of proceedings is appropriate at this time in view of the legal and policy issues raised by the proposed rule change, as discussed below. Institution of proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved. Rather, as described below, the Commission seeks and encourages interested persons to provide comments on the proposed rule change.

Pursuant to Section 19(b)(2)(B) of the Act,[44] the Commission is providing notice of the grounds for disapproval under consideration. The Commission is instituting proceedings to allow for additional analysis of the proposed rule change's consistency with Section 6(b)(5) of the Act,[45] which requires, among other things, that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

Under the Commission's Rules of Practice, the ''burden to demonstrate that a proposed rule change is consistent with the [Act] and the rules and regulations issued thereunder . . . is on the self-regulatory organization that proposed the rule change.'' [46] The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding,[47] and any failure of a self-regulatory organization to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Act and the applicable rules and regulations.[48]

To date, the Commission has only approved listing rules for options on shares of spot commodity-based ETPs for specific ETPs, not classes of ETPs.[49] For example, Exchange Rule 5.3–O(g) currently permits the listing of options on securities that represent interests in the SPDR Gold Trust, the iShares COMEX Gold Trust, the iShares Silver Trust, the ETFS Silver Trust, the ETFS Palladium Trust, or ETFS Platinum Trust. The Exchange proposes to replace this product-by-product approach and amend Exchange Rule 5.3–O(g) to permit the listing of options on securities that represent interests in Commodity-Based Trust Shares, as defined in Exchange Rule 8.201–E. The proposal would allow the Exchange to list options on any Commodity-Based Trust Share without filing a proposed rule change with the Commission.[50] The Exchange stated that the Commission previously has approved generic listing standards pursuant to Rule 19b–4(e) under the Act[51] that permit the listing of options on ETFs based on indexes that consist of stocks listed on U.S. exchanges.[52] The Exchange stated that the Commission also previously has approved generic listing standards that permit the listing of options on ETFs based on international or global indexes.[53] In addition, in contrast to the product-by-product approval of options on spot-commodity-based ETPs, Exchange Rule 5.3–O(g) provides for the listing and trading of options on general groups of investment products, including, among others, open-end investment companies or unit investment trusts that may hold securities, certain financial instruments, and money market instruments.

Options on Commodity-Based Trusts could result in additional demand for creations and redemptions of shares of the underlying Commodity-Based Trust from options market makers seeking to hedge their positions. These additional creations and redemptions could increase demand for the underlying commodity. In addition, options market makers could seek to hedge their positions by transacting in the underlying commodity or using commodity derivatives. These additional demands for the underlying commodity have the potential to result in limited availability of the underlying commodity during times of market volatility which, in turn, could affect the creation and redemption process for Commodity-Based Shares. The spot markets for the underlying commodities that Commodity-Based Trusts may hold could vary significantly in terms of trading volumes, market concentration, market participants, commercial realities, and delivery practices, among other things. These dynamics raise questions as to whether, given the potentially significant differences in the spot markets for the underlying commodities, it is appropriate for the Commission to allow the Exchange to list options on any Commodity-Based Trust Share without filing a proposed rule change with the Commission, rather than continuing to review such proposals on a product-by-product basis. A product-specific approach would allow the Exchange to provide the Commission with information regarding the market for the underlying commodity that a trust holds and help to demonstrate that listing options on Commodity-Based Trust Shares representing interests in that trust would not result in adverse market impacts, such as a shortage in the supply of the underlying commodity, which, among other things, could affect the creation and redemption process for

[53] *See* Securities Exchange Act Release No. 54379 (November 9, 2006), 71 FR 66993 (November 17, 2006) (order approving File No. SR–AMEX–2006–78).

the Commodity-Based Trust Shares. In addition, the proposal states that options on Commodity-Based Trust Shares would be subject to the same position limits applicable to options on stocks and ETFs.[54] Instituting proceedings allows for comment on whether those position limits are appropriate for options on Commodity-Based Trust Shares in light of the significant differences between the underlying stock and ETF markets versus the markets for physical commodities.

V. Procedure: Request for Written Comments

The Commission requests that interested persons provide written submissions of their data, views, and arguments with respect to the issues identified above, as well as any other concerns they may have with the proposal. In particular, the Commission invites the written views of interested persons concerning whether the proposed rule change is consistent with Section 6(b)(5), or any other provision of the Act, or the rules and regulations thereunder. Although there do not appear to be any issues relevant to approval or disapproval which would be facilitated by an oral presentation of data, views, and arguments, the Commission will consider, pursuant to Rule 19b–4 under the Act,[55] any request for an opportunity to make an oral presentation.[56]

Interested persons are invited to submit written data, views, and arguments regarding whether the proposed rule change should be approved or disapproved by May 21, 2024. Any person who wishes to file a rebuttal to any other person's submission must file that rebuttal by June 4, 2024. The Commission asks that commenters address the sufficiency of the Exchange's statements in support of the proposal, which are set forth in the Notice,[57] in addition to any other comments they may wish to submit about the proposed rule change. In particular, the Commission seeks comment on the following questions and asks commenters to submit data where appropriate to support their views:

1. Whether, given the potentially significant differences in the markets for the underlying commodities, the Exchange has provided sufficient data and analysis to support a conclusion that it is not necessary for the Commission to review and approve the listing and trading of options on ETPs, including Commodity-Based Trust Shares, on a product-by-product basis;

2. Whether options on Commodity-Based Trust Shares should be subject to the same position and exercise limits as options on stock, and whether the available supply in the markets for the commodity on which the Commodity-Based Trust Shares are based is relevant in determining the position and exercise limits for options on Commodity-Based Trust Shares; and

3. Whether the listing of options on Commodity-Based Trust Shares for certain commodities should be subject to scrutiny on a product-by-product basis because of the potential differences in the underlying spot markets, such as deliverable supply, trading volumes, and the involvement of commercial or financial participants.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File No. SR–NYSEARCA–2024–06 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEARCA–2024–06. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSEARCA–2024–06 and should be submitted by May 21, 2024. Rebuttal comments should be submitted by June 4, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[58]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100021; File No. SR–MEMX–2024–13]

Self-Regulatory Organizations; MEMX LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Exchange's Fee Schedule To Adopt Connectivity and Application Session Fees for MEMX Options

April 24, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 12, 2024, MEMX LLC (''MEMX'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the Fee Schedule to: (i) apply the Exchange's current Connectivity and

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

Application Session fees to MEMX Options Users, and (ii) make an organizational change to its existing fee schedule for the Exchange's pre-existing equities market (''MEMX Equities''), in order to create a separate fee schedule for Connectivity Fees (for both MEMX Equities and MEMX Options). The Exchange proposes to implement the changes to the Fee Schedule pursuant to this proposal immediately. The text of the proposed rule change is provided in Exhibit 5.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Background

The Exchange is filing a proposal to amend the Fee Schedule to: (i) apply the Exchange's current Connectivity and Application Session fees to MEMX Options Users, and (ii) make an organizational change to its existing fee schedule for the Exchange's pre-existing equities market (''MEMX Equities''), in order to create a separate fee schedule for Connectivity Fees (for both MEMX Equities and MEMX Options). The Exchange believes that these changes will provide greater transparency to Members about how the Exchange assesses fees, as well as allowing Members to more easily validate their bills on a monthly basis. The Exchange notes that none of these changes amend any existing fee applicable to MEMX Equities. The Exchange is proposing to implement the proposal immediately. The Exchange previously filed the proposal on October 24, 2023 (SR–MEMX–2023–29) (the ''Initial Proposal''). The Exchange withdrew the Initial Proposal and replaced the proposal with SR–MEMX–2023–39 (the ''Second Proposal''). The Exchange withdrew the Second Proposal and replaced it with SR–MEMX–2024–06 (the ''Third Proposal''). The Exchange recently withdrew the Third Proposal and is replacing it with the current filing (SR–MEMX–2024–13).

As set forth below, the Exchange believes that its proposal provides a great deal of transparency regarding the cost of providing connectivity services and anticipated revenue and that the proposal is consistent with the Act and associated guidance. The Exchange is re-filing this proposal promptly following the withdrawal of the Third Proposal in order to provide additional explanations related to the Cost Analysis.

(i) Fees for Connectivity to MEMX Options

As noted above, the Exchange is proposing to apply the current fees it charges to Members and non-Members [3] for physical connectivity to the Exchange and for application sessions (otherwise known as ''logical ports'') that a Member utilizes in connection with their participation on the Exchange (together with physical connectivity, collectively referred to in this proposal as ''connectivity services'', as described in greater detail below) to both Users of MEMX Equities and MEMX Options.[4] Specifically, the Exchange will continue to charge $6,000 per month for a physical connection in the data center where the Exchange primarily operates under normal market conditions (''Primary Data Center''), and $3,000 per month for a physical connection at the geographically diverse data center, which is operated for backup and disaster recovery purposes (''Secondary Data Center''). These physical connections can be used to access both platforms, accordingly, a firm that is a Member of both MEMX Equities and MEMX Options may use a single physical connection to access its application sessions at both MEMX Equities and MEMX Options. This differs from application sessions in that a firm that is a Member of both MEMX Equities and MEMX Options would need to purchase separate application sessions for each trading platform in order to access each such trading platform. These application session fees will continue to be $450 per month for an application session used for order entry (''Order Entry Port'') and $450 per month for an application session for receipt of drop copies (''Drop Copy Port''), to the extent such ports are in the Primary Data Center. As is true today for MEMX Equities, the Exchange will not charge for Order Entry Ports or Drop Copy Ports in the Secondary Data Center. The Exchange's proposal to apply the same fees to Equities and Options stems from the same cost analysis it conducted in adopting those fees to its Equities Members,[5] which the Exchange has reviewed and updated for 2024 as detailed below. Given that the Exchange has only recently launched MEMX Options, however, and the fact that its analysis is based on projections across all potential revenue streams, the Exchange is committing to conduct a one-year review after these fees are applied. The Exchange expects that it may propose to adjust fees at that time, to increase fees in the event that revenues fail to cover costs, or to decrease fees in the event that revenue materially exceeds expectations.

In general, the Exchange believes that exchanges, in setting fees of all types, should meet very high standards of transparency to demonstrate why each new fee or fee increase meets the Exchange Act requirements that fees be reasonable, equitably allocated, not unfairly discriminatory, and not create an undue burden on competition among members and markets. In particular, the Exchange believes that each exchange should take extra care to be able to demonstrate that these fees are based on its costs and reasonable business needs.

In proposing to charge fees for connectivity services to MEMX Options, the Exchange has sought to be especially diligent in assessing those fees in a transparent way against its own aggregate costs of providing the related services, and also carefully and transparently assessing the impact on Members—both generally and in relation to other Members, *i.e.,* to assure the fee will not create a financial burden on any participant and will not have an undue impact in particular on smaller Members and competition among Members in general. The Exchange believes that this level of diligence and transparency is called for by the requirements of Section 19(b)(1) under the Act,[6] and Rule 19b–4 thereunder,[7] with respect to the types of information self-regulatory organizations (''SROs'') should provide when filing fee changes,

[3] Types of market participants that obtain connectivity services from the Exchange but are not Members include service bureaus and extranets. Service bureaus offer technology-based services to other companies for a fee, including order entry services to Members, and thus, may access application sessions on behalf of one or more Members. Extranets offer physical connectivity services to Members and non-Members.

[4] MEMX Options launched on September 27, 2023.

[5] *See* Securities Exchange Act Release No. 59846 (September 27, 2022), 87 FR 59845 (October 3, 2022) (SR–MEMX–2022–026).

[6] 15 U.S.C. 78s(b)(1).

[7] 17 CFR 240.19b–4.

and Section 6(b) of the Act,[8] which requires, among other things, that exchange fees be reasonable and equitably allocated,[9] not designed to permit unfair discrimination,[10] and that they not impose a burden on competition not necessary or appropriate in furtherance of the purposes of the Act.[11] This rule change proposal addresses those requirements, and the analysis and data in each of the sections that follow are designed to clearly and comprehensively show how they are met.[12]

As detailed below, MEMX calculated its aggregate annual costs for providing physical connectivity to both MEMX Equities and MEMX Options in 2024 at $14,970,454 and its aggregate annual costs for providing application sessions at $7,185,273. In order to cover the aggregate costs of providing connectivity to its Options and Equities Users (both Members and non-Members) going forward and to make a modest profit, as described below, the Exchange is proposing to modify its Fee Schedule, pursuant to MEMX Rules 15.1(a) and (c), to charge a fee to Options Users, as it currently does to Equities Users, of $6,000 per month for each physical connection in the Primary Data Center and of $3,000 per month for each physical connection in the Secondary Data Center. The Exchange also proposes to modify its Fee Schedule, pursuant to MEMX Rules 15.1(a) and (c), to charge a fee to Options Users, as it currently does to Equities Users, of $450 per month for each Order Entry Port and Drop Copy Port in the Exchange's Primary Data Center, as further described below.[13]

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(4).

[10] 15 U.S.C. 78f(b)(5).

[11] 15 U.S.C. 78f(b)(8).

[12] In 2019, Commission staff published guidance suggesting the types of information that SROs may use to demonstrate that their fee filings comply with the standards of the Exchange Act (''Fee Guidance''). While MEMX understands that the Fee Guidance does not create new legal obligations on SROs, the Fee Guidance is consistent with MEMX's view about the type and level of transparency that exchanges should meet to demonstrate compliance with their existing obligations when they seek to charge new fees. *See* Staff Guidance on SRO Rule Filings Relating to Fees (May 21, 2019) available at *https://www.sec.gov/tm/staff-guidancesro-rule-filings-fees.*

[13] As proposed, fees for connectivity services would be assessed based on each active connectivity service product at the close of business on the first day of each month. If a product is cancelled by a Member's submission of a written request or via the MEMX User Portal prior to such fee being assessed then the Member will not be obligated to pay the applicable product fee. MEMX will not return pro-rated fees even if a product is not used for an entire month.

Cost Analysis

Background on Cost Analysis

In February 2024, MEMX completed an updated study of its aggregate projected costs to produce market data and connectivity across both its Equities and Options platforms in 2024 (the ''Cost Analysis'').[14] The Cost Analysis required a detailed analysis of MEMX's aggregate baseline costs, including a determination and allocation of costs for core services provided by the Exchange—transaction execution, market data, membership services and trading permits, regulatory services, physical connectivity, and application sessions (which provide order entry, cancellation and modification functionality, risk functionality, ability to receive drop copies, and other functionality). MEMX separately divided its costs between those costs necessary to deliver each of these core services, including infrastructure, software, human resources (*i.e.,* personnel), and certain general and administrative expenses (''cost drivers''). Next, MEMX adopted an allocation methodology with various principles to guide how much of a particular cost should be allocated to each core service. For instance, fixed costs that are not driven by client activity (*e.g.,* message rates), such as data center costs, were allocated more heavily to the provision of physical connectivity (80%), with smaller allocations to logical ports (11%), and the remainder to the provision of transaction execution, regulatory services, and market data services (9%).[15] In contrast, costs that are driven largely by client activity (*e.g.,* message rates), were not allocated to physical connectivity at all but were allocated primarily to the provision of transaction execution and market data services (80%) with a smaller allocation to application sessions (20%). The allocation methodology was decided through conversations with senior management familiar with each area of the Exchange's operations. After adopting this allocation methodology, the Exchange then applied an estimated allocation of each cost driver to each core service, resulting in the cost allocations described below.

By allocating segmented costs to each core service, MEMX was able to estimate by core service the potential margin it might earn based on different fee models. The Exchange notes that as a non-listing venue it has four primary sources of revenue that it can potentially use to fund its operations: transaction fees, fees for connectivity services, membership and regulatory fees, and market data fees. Accordingly, the Exchange must cover its expenses from these four primary sources of revenue. The Exchange also notes that as a general matter each of these sources of revenue is based on services that are interdependent. For instance, the Exchange's system for executing transactions is dependent on physical hardware and connectivity; only Members and parties that they sponsor to participate directly on the Exchange may submit orders to the Exchange; many Members (but not all) consume market data from the Exchange in order to trade on the Exchange; and the Exchange consumes market data from external sources in order to comply with regulatory obligations. Accordingly, given this interdependence, the allocation of costs to each service or revenue source required judgment of the Exchange and was weighted based on estimates of the Exchange that the Exchange believes are reasonable, as set forth below.

Through the Exchange's extensive Cost Analysis, the Exchange analyzed every expense item in the Exchange's general expense ledger to determine whether each such expense relates to the provision of connectivity services, and, if such expense did so relate, what portion (or percentage) of such expense actually supports the provision of connectivity services, and thus bears a relationship that is, ''in nature and closeness,'' directly related to network connectivity services. In turn, the Exchange allocated certain costs more to physical connectivity and others to application sessions, while certain costs were only allocated to such services at a very low percentage or not at all, using consistent allocation methodologies as described above. Based on this analysis, MEMX estimates that the cost drivers to provide connectivity services in 2024, including both physical connections and application sessions, will result in an aggregate annual cost of $22,155,727, as further detailed below. The Exchange notes that it utilized the same principles to generate the 2021 Cost Analysis, applicable to Equities only, and at that time, the estimated annual aggregate cost to provide connectivity services

[14] The updated Cost Analysis completed in February 2024 is based on the same principles applied to the Cost Analysis completed in September 2023 that was included in the Initial Proposal but contains updated figures now that MEMX Options has been operational for several months.

[15] The Exchange notes that these allocation percentages differ from the allocations noted in the 2021 Cost Analysis, and the reasons for these differences are explained more specifically below.

was $13,724,580. The differences between such estimated costs and the overall analysis are primarily based on: (1) the addition of MEMX Options, (ii) increased, and in some cases decreased, costs projected by the Exchange, (iii) and changes made to reallocate certain costs into categories that more closely align the Exchange's audited financial statements, as further described below.

Costs Related to Offering Physical Connectivity

The following chart details the individual line-item costs considered by MEMX to be related to offering physical connectivity as well as the percentage of the Exchange's overall costs such costs represent for such area (*e.g.,* as set forth below, the Exchange allocated approximately 18% of its overall Human Resources cost to offering physical connectivity).

COSTS DRIVER	COSTS	% of ALL
Human Resources	$ 6,374,100	18%
Connectivity	$ 732,216	75%
Data Center	$ 2,824,425	80%
Technology (Hardware, Software Licenses, etc.)	$ 1,075,518	25%
Depreciation	$ 2,808,173	39%
External Market Data	$ -	0%
Allocated Shared Expenses	$ 1,156,022	15%
TOTAL	**$14,970,454**	**23.5%**

Below are additional details regarding each of the line-item costs considered by MEMX to be related to offering physical connectivity, as well as any relevant discussion of how the costs projected for 2024 differ, if any, from the Exchange's previous Cost Analysis conducted in 2021 in adopting Connectivity Fees for its Equities platform, which are the same fees the Exchange is proposing to apply for its Options platform in this filing.[16]

Human Resources

In allocating personnel (Human Resources) costs, in order to not double count any allocations, the Exchange first excluded any employee time allocated towards options regulation in order to recoup costs via the Options Regulatory Fee (''ORF'').[17] Of the remaining employee time left over, MEMX then calculated an allocation of employee time for employees whose functions include providing and maintaining physical connectivity and performance thereof (primarily the MEMX network infrastructure team, which spends most of their time performing functions necessary to provide physical connectivity) and for which the Exchange allocated 80% of each employee's time. The Exchange also allocated Human Resources costs to provide physical connectivity to a limited subset of personnel with ancillary functions related to establishing and maintaining such connectivity (such as information security and finance personnel), for which the Exchange allocated cost on an employee-by-employee basis (*i.e.,* only including those personnel who do support functions related to providing physical connectivity) and then applied a smaller allocation to such employees (30%).[18] The Exchange notes that it has fewer than 100 employees and each department leader has direct knowledge of the time spent by those spent by each employee with respect to the various tasks necessary to operate the Exchange. The estimates of Human Resources cost were therefore determined by consulting with such department leaders, determining which employees are involved in tasks related to providing physical connectivity, and confirming that the proposed allocations were reasonable based on an understanding of the percentage of their time such employees devote to tasks related to providing physical connectivity. The Exchange notes that senior level executives were only allocated Human Resources costs to the extent the Exchange believed they are involved in overseeing tasks related to providing physical connectivity. The Human Resources cost was calculated using a blended rate of compensation reflecting salary, equity and bonus compensation, benefits, payroll taxes, and 401(k) matching contributions.

In 2021, 13.8% of the Exchange's Human Resources costs were allocated towards the provision of physical connectivity, which is slightly lower than the 18% allocation in the current Cost Analysis. The Exchanges notes that this increase is due to additional hiring necessary to support network infrastructure, and that in advance of the launch of MEMX Options, this hiring started at the beginning of 2023.

Connectivity

The Connectivity cost includes external fees paid to connect to other exchanges and third parties. The Exchange notes that its connectivity to external markets is required in order to receive market data to run the Exchange's matching engine and basic operations compliant with existing regulations, primarily Regulation NMS. Approximately 75% of the Exchange's connectivity costs are allocated towards the provision of physical connectivity, which is the same percentage identified in the 2021 Cost Analysis. Of note, the 2021 Cost Analysis allocated approximately $162,000 per month of connectivity costs towards physical connectivity, which is notably higher than the $61,018[19] per month allocated under the current Cost Analysis. The Exchange notes that this is due to a substantial redesign in the Exchange's connectivity plan which achieved the cost savings noted. Additionally, in the

[16] *See supra* note 5.

[17] *See* Securities Exchange Act Release No. 99259 (January 2, 2024), 89 FR 965 (January 8, 2024) (SR–MEMX–2023–38).

[18] To reiterate, these allocations are applied to the percentage of employee time left over after the ORF allocation. As such, if 10% of an employee's time was allocated towards options regulation, the percentage of time allocated to physical connectivity in this example would apply to the 90% of the employee's time left over.

[19] This figure is arrived at by dividing the annual allocated Connectivity costs in the table on page 12 ($732,216) by 12.

2021 Cost Analysis, certain costs were included in the Connectivity category that have since been moved into the broader Technology category.

Data Center

Data Center costs include an allocation of the costs the Exchange incurs to provide physical connectivity in the third-party data centers where it maintains its equipment (such as dedicated space, security services, cooling and power). The Exchange notes that it does not own the Primary Data Center or the Secondary Data Center, but instead, leases space in data centers operated by third parties. The Exchange has allocated a high percentage of the Data Center cost (80%) to physical connectivity because the third-party data centers and the Exchange's physical equipment contained therein is the most direct cost in providing physical access to the Exchange. In other words, for the Exchange to operate in a dedicated space with connectivity of participants to a physical trading platform, the data centers are a very tangible cost, and in turn, if the Exchange did not maintain such a presence then physical connectivity would be of no value to market participants. This slight increase over the allocation of Data Center costs to physical connectivity from 2021 (75%) is due to the Exchange's determination that the Data Center is more directly linked to physical connectivity than any other core service provided by the Exchange. The Exchange notes that its Data Center costs are fixed and do not vary based upon any individual Member's or group of Members' physical connectivity. Accordingly, the Exchange believes that 80% is a more accurate representation of the percentage of costs to the Exchange in order to provide physical connectivity to market participants.

Technology

The Technology category includes the Exchange's network infrastructure, other hardware, software, and software licenses used to operate and monitor physical assets necessary to offer physical connectivity to the Exchange. Of note, certain of these costs were included in the Connectivity and a separate Hardware and Software Licenses category in the 2021 Cost Analysis; however, in order to align more closely with the Exchange's audited financial statements these costs were combined into the broader Technology category. The Exchange allocated approximately 25% of its Technology costs to physical connectivity in 2024.

Depreciation

All physical assets and software, which also includes assets used for testing and monitoring of Exchange infrastructure, were valued at cost, depreciated or leased over periods ranging from three to five years. Thus, the depreciation cost primarily relates to servers necessary to operate the Exchange, some of which are owned by the Exchange and some of which are leased by the Exchange in order to allow efficient periodic technology refreshes. As noted above, the Exchange allocated 39% of all depreciation costs to providing physical connectivity. This is a higher percentage than was allocated to providing physical connectivity in 2021 (18.5%), and this increase is due to a high amount of capital expenditures required to build the Exchange's options platform, none of which began to depreciate until the launch of options in September 2023. The Exchange notes, however, that it did not allocate depreciation costs for any internally developed software to build the Exchange's trading platforms to physical connectivity, as such software does not impact the provision of physical connectivity.

External Market Data

External Market Data includes fees paid to third parties, including other exchanges, to receive and consume market data from other markets. The Exchange notes that it did not allocate any External Market Data fees to the provision of physical connectivity as market data is not related to such services.

Allocated Shared Expenses

Finally, a limited portion of general shared expenses was allocated to physical connectivity as without these general shared costs the Exchange would not be able to operate in the manner that it does and provide physical connectivity. The costs included in general shared expenses include general expenses of the Exchange, including office space and office expenses (*e.g.,* occupancy and overhead expenses), utilities, recruiting and training, marketing and advertising costs, professional fees for legal, tax and accounting services (including external and internal audit expenses), and telecommunications costs. The Exchange notes that the cost of paying directors to serve on its Board of Directors is also included in the Exchange's general shared expenses, and thus a portion of such overall cost amounting to 7% of the overall cost for directors was allocated to providing physical connectivity.

As a final part of the Exchange's analysis related to physical connectivity, the Exchange determined the total *monthly* cost of providing physical connections, (*i.e.,* the annual cost of $14,970,454 noted in the table above divided by 12), $1,247,537.83, and projected average monthly revenue for physical connections under the proposed pricing herein of approximately $1,413,500.[20] Thus, the Exchange calculated an average monthly profit of $165,962, resulting in a physical connectivity profit margin of approximately 11.7%.[21] The Exchange notes that this projected profit margin represents an increase over the projected profit margin noted in the 2021 Cost Analysis related to physical connectivity,[22] which is in part due to certain cost savings noted above associated with a redesign in the Exchange's external connectivity plan. Nevertheless, the Exchange believes that the projected profit margin is reasonable and well within the range of where a similarly situated company would expect to be after three years of growth, especially upon launching a new trading platform that provides scale. While the Exchange does not anticipate a significant change to physical connectivity during 2024 (*i.e.,* neither a significant increase nor a significant decrease), it is possible that participants will shift the way that they connect to the Exchange and a reduction occurs or that additional connectivity is established, resulting in an increase.

Costs Related to Offering Application Sessions

The following chart details the individual line-item costs considered by MEMX to be related to offering

[20] This projection was based off of actuals earned in January and February 2024 and revenue projections for the remainder of the year based off the number of primary and secondary connections maintained as of February 1, 2024, in both Equities and Options. The Exchange notes that it previously utilized a different method to estimate potential profit, specifically by dividing the cost of providing physical connectivity by the number of physical connections maintained as of the date of proposed pricing, and then subtracting that number from the cost [sic] of the provision of physical connectivity. At this time, however, due to the complexities associated with the pricing of physical connections (*i.e.,* not all physical connections cost $6,000), and the fact that the Exchange did not begin charging for physical connections used solely for Options until March 1, 2024, the Exchange believes the method utilized in this proposal provides a more accurate estimation of projected profit and resulting profit margin.

[21] The Exchange calculated margin by dividing the total profit ($165,962) by the total revenue ($1,413,500) and multiplying by 100.

[22] The 2021 Cost Analysis projected a profit margin for physical connections of 8%.

application sessions as well as the percentage of the Exchange's overall costs such costs represent for such area (*e.g.,* as set forth below, the Exchange allocated approximately 11% of its overall Human Resources cost to offering application sessions).

COSTS DRIVER	COSTS	% of ALL
Human Resources	$ 3,664,157	11%
Connectivity	$ 36,020	4%
Data Center	$ 380,202	11%
Technology (Hardware, Software Licenses, etc.)	$ 527,533	12%
Depreciation	$ 1,000,287	14%
External Market Data	$ 367,952	20%
Allocated Shared Expenses	$ 1,209,122	15%
TOTAL	**$7,185,273**	**11.3%**

Human Resources

With respect to application sessions, MEMX calculated Human Resources cost by taking an allocation of employee time for employees whose functions include providing application sessions and maintaining performance thereof (including a broader range of employees such as technical operations personnel, market operations personnel, and software engineering personnel) as well as a limited subset of personnel with ancillary functions related to maintaining such connectivity (such as sales, membership, and finance personnel). The estimates of Human Resources cost were again determined by consulting with department leaders, determining which employees are involved in tasks related to providing application sessions and maintaining performance thereof, and confirming that the proposed allocations were reasonable based on an understanding of the percentage of their time such employees devote to tasks related to providing application sessions and maintaining performance thereof. The Exchange notes that senior level executives were only allocated Human Resources costs to the extent the Exchange believed they are involved in overseeing tasks related to providing application sessions and maintaining performance thereof. The Human Resources cost was again calculated using a blended rate of compensation reflecting salary, equity and bonus compensation, benefits, payroll taxes, and 401(k) matching contributions. As shown in the table above, for 2024, the Exchange allocated approximately 11% of its Human Resources costs to providing application sessions, which is higher than the 7.7% it allocated in 2021. This increase is again due to additional hiring needed to support the addition of MEMX Options.

Connectivity

The Connectivity cost includes external fees paid to connect to other exchanges, as described above. The Exchange allocated approximately 4% of its Connectivity costs to providing application sessions, which represents a slight increase over the 2.6% allocated in the 2021 Cost Analysis. The Exchange notes this increase reflects that application sessions require information ultimately obtained from other exchanges through such Connectivity and the Exchange's costs increased with respect to such Connectivity in order to provide Members the ability to access both MEMX Equities and MEMX Options. Thus, the Exchange believes that 4% is a more accurate reflection of the costs required to provide Members with the ability to access each platform.

Data Center

Data Center costs include an allocation of the costs the Exchange incurs to provide physical connectivity in the third-party data centers where it maintains its equipment as well as related costs (the Exchange does not own the Primary Data Center or the Secondary Data Center, but instead, leases space in data centers operated by third parties). As shown in the table, the Exchange allocated 11% of its Data Center costs to application sessions in the current Cost Analysis, which represents an increase over the 2.6% it allocated in the 2021 Cost Analysis. The Exchange believes this increased allocation is a more accurate representation of the resources in the Data Center which are used to support application sessions because Data Center costs are fixed costs and without devoting significant time and resources to maintaining the Data Center and the hardware maintained therein, Members' use of application sessions could not be properly supported.

Technology

The Technology category includes the Exchange's network infrastructure, other hardware, software, and software licenses used to monitor the health of the order entry services provided by the Exchange. The Exchange allocated 12% of its Technology costs to the provision of application sessions, which represents a slight increase over the 10.1% it allocated in the 2021 Cost Analysis.

External Market Data

External Market Data includes fees paid to third parties, including other exchanges, to receive and consume market data from other markets. The Exchange allocated 20% of External Market Data fees to the provision of application sessions as such market data is necessary to offer certain services related to such sessions, such as validating orders on entry against the National Best Bid and National Best Offer (''NBBO'') and checking for other conditions (*e.g.,* whether a symbol is halted or subject to a short sale circuit breaker). Thus, as market data from other exchanges is consumed at the application session level in order to validate orders before additional processing occurs with respect to such orders, the Exchange believes it is reasonable to allocate a small amount of such costs to application sessions. The increase in allocation of External Market Data costs to the provision of application sessions compared to the 2021 Cost Analysis, in which 7.5% of its

External Market Data costs were allocated, is due to a restructuring of the category. Specifically, in 2021, External Market Data only included those costs incurred to receive data from other exchanges, while costs to receive the SIP feeds and other non-exchange data feeds were categorized under Hardware and Software Licenses. These costs are now all categorized under External Market Data.

Depreciation

All physical assets and software, which also includes assets used for testing and monitoring of order entry infrastructure, were valued at cost, depreciated or leased over periods ranging from three to five years. Thus, the depreciation cost primarily relates to servers necessary to operate the Exchange, some of which is owned by the Exchange and some of which is leased by the Exchange in order to allow efficient periodic technology refreshes. The Exchange allocated 14% of all depreciation costs to providing application sessions, which represents an increase over the 8.3% allocated in the 2021 Cost Analysis. In contrast to physical connectivity, described above, the Exchange did allocate depreciation costs for depreciated internally developed software to build the Exchange's platforms to application sessions because such software is related to the provision of such connectivity.

Allocated Shared Expenses

Finally, a limited portion of general shared expenses was allocated to overall application session costs as without these general shared costs the Exchange would not be able to operate in the manner that it does and provide application sessions. The costs included in general shared expenses include general expenses of the Exchange, including office space and office expenses (*e.g.,* occupancy and overhead expenses), utilities, recruiting and training, marketing and advertising costs, professional fees for legal, tax and accounting services (including external and internal audit expenses), and telecommunications costs. The Exchange again notes that the cost of paying directors to serve on its Board of Directors is included in the calculation of Allocated Shared Expenses, and thus a portion of such overall cost amounting to less than 5% of the overall cost for directors was allocated to providing application sessions.

Lastly, the Exchange determined the total *monthly* cost of providing application sessions, (*i.e.,* the annual cost of $7,185,273 noted in the table above divided by 12), $598,772.75, and estimated an average monthly revenue from application sessions under the proposed pricing herein of $662,738. Thus, the Exchange calculated an average monthly profit of $63,965, resulting in an application session profit margin of approximately 9.7%.[23] This profit margin for application sessions is slightly higher than the projected profit margin noted in the 2021 Cost Analysis,[24] which the Exchange believes is reasonable and well within the range of where the Exchange would expect it to be at this time.

Cost Analysis—Additional Discussion

In conducting its Cost Analysis, the Exchange did not allocate any of its expenses in full to any core services (including physical connectivity or application sessions) and did not double-count any expenses. Instead, as described above, the Exchange allocated applicable cost drivers across its core services and used the same Cost Analysis to form the basis of this proposal and the filing it recently submitted proposing the establishment of an ORF.[25] For instance, in calculating the Human Resources expenses to be allocated to physical connections, the Exchange has a team of employees dedicated to network infrastructure and with respect to such employees the Exchange allocated network infrastructure personnel with a high percentage of the time of such personnel (80%) given their focus on functions necessary to provide physical connections. The time of those same personnel were allocated only 4% to application sessions and the remaining 16% was allocated to transactions and market data. Of note, this allocation applied only to the network infrastructure employee's time that was left over after allocating for options regulation support. The Exchange did not allocate any other Human Resources expense for providing physical connections to any other employee group outside of a smaller allocation (30%) of the employee time associated with certain specified personnel who work closely with and support network infrastructure personnel. In contrast, the Exchange allocated much smaller percentages of employee time (15% or less) across a wider range of personnel groups in order to allocate Human Resources costs to providing application sessions. This is because a much wider range of personnel are involved in functions necessary to offer, monitor and maintain application sessions but the tasks necessary to do so are not a primary or full-time function.

In total, the Exchange allocated 18% of its Human Resources costs to providing physical connections and 11% of its Human Resources costs to providing application sessions, for a total allocation of 29% of its Human Resources expense to provide connectivity services. In turn, the Exchange allocated the remaining 71% of its Human Resources expense to Regulatory Services (21%), membership (2%) and transactions and market data (48%). Thus, again, the Exchange's allocations of cost across core services were based on real costs of operating the Exchange and were not double-counted across the core services or their associated revenue streams.

As another example, the Exchange allocated depreciation expense to all core services, including physical connections and application sessions, but in different amounts. The Exchange believes it is reasonable to allocate the identified portion of such expense because such expense includes the actual cost of the computer equipment, such as dedicated servers, computers, laptops, monitors, information security appliances and storage, and network switching infrastructure equipment, including switches and taps that were purchased to operate and support the network. Without this equipment, the Exchange would not be able to operate the network and provide connectivity services to its Members and non-Members and their customers. However, the Exchange did not allocate all of the depreciation and amortization expense toward the cost of providing connectivity services, but instead allocated approximately 53% of the Exchange's overall depreciation and amortization expense to connectivity services (39% attributed to physical connections and 14% to application sessions). The Exchange allocated the remaining depreciation and amortization expense (approximately 47%) toward regulatory services (approximately 6%), and to providing transaction services and market data (approximately 41%).

Looking at the Exchange's operations holistically, the estimated total monthly costs to the Exchange for offering core services in 2024 is $5,299,754, compared to the $3,954,537 noted in the 2021 Cost Analysis. Based on its projections, the Exchange expects to collect approximately $2,076,238 on a monthly basis for connectivity services.

[23] The Exchange calculated margin by dividing the total profit ($63,965) by the total revenue ($662,738) and multiplying by 100.

[24] The 2021 Cost Analysis projected an application session profit margin of approximately 8%.

[25] See *supra* note 17.

Incorporating this amount into the Exchange's overall projected revenue, including projections related to the ORF, the Exchange anticipates monthly revenue of approximately $6,080,631 from all sources (*i.e.,* connectivity fees and membership fees, transaction fees, ORF, and revenue from market data, both through the fees adopted in April 2022 [26] and through the revenue received from the SIPs). As such, applying the Exchange's holistic Cost Analysis to a holistic view of anticipated revenues, the Exchange would earn approximately 13% margin on its operations as a whole. The Exchange believes that this amount is reasonable.

The Exchange notes that its revenue estimates are based on projections across all potential revenue streams and will only be realized to the extent such revenue streams actually produce the revenue estimated. As a new entrant to the hyper-competitive exchange environment, and an exchange focused on driving competition, the Exchange does not yet know whether such expectations will be realized. For instance, in order to generate the revenue expected from connectivity, the Exchange will have to be successful in retaining existing options clients that wish to maintain physical connectivity and/or application sessions or in obtaining new clients that will purchase such services. Similarly, the Exchange will have to be successful in retaining a positive net capture on transaction fees in order to realize the anticipated revenue from transaction pricing.

The Exchange notes that the Cost Analysis was based on the Exchange's current operations and projections for the remainder of 2024. As such, the Exchange believes that its costs will remain relatively similar in future years (as demonstrated by the comparison of the 2021 Cost Analysis to the 2024 Cost Analysis). It is possible however that such costs will either decrease or increase. To the extent the Exchange sees growth in use of connectivity services it will receive additional revenue to offset future cost increases. However, if use of connectivity services is static or decreases, the Exchange might not realize the revenue that it anticipates or needs in order to cover applicable costs. Accordingly, the Exchange is committing to conduct a one-year review after implementation of these fees. The Exchange expects that it may propose to adjust fees at that time, to increase fees in the event that revenues fail to cover costs and a reasonable mark-up of such costs. Similarly, the Exchange would propose to decrease fees in the event that revenue materially exceeds our current projections. In addition, the Exchange will periodically conduct a review to inform its decision making on whether a fee change is appropriate (*e.g.,* to monitor for costs increasing/decreasing or subscribers increasing/decreasing in ways that suggest the then-current fees are becoming dislocated from the prior cost-based analysis) and would propose to increase fees in the event that revenues fail to cover its costs and a reasonable mark-up, or decrease fees in the event that revenue or the mark-up materially exceeds our current projections. In the event that the Exchange determines to propose a fee change, the results of a timely review, including an updated cost estimate, will be included in the rule filing proposing the fee change. More generally, the Exchange believes that it is appropriate for an exchange to refresh and update information about its relevant costs and revenues in seeking any future changes to fees, and the Exchange commits to do so.

Proposed Fees

Physical Connectivity Fees

MEMX offers its Members the ability to connect to the Exchange in order to transmit orders to and receive information from the Exchange. Members can also choose to connect to MEMX indirectly through physical connectivity maintained by a third-party extranet. Extranet physical connections may provide access to one or multiple Members on a single connection. Users of MEMX physical connectivity services (both Members and non-Members)[27] seeking to establish one or more connections with the Exchange submit a request to the Exchange via the MEMX User Portal or directly to Exchange personnel. Upon receipt of the completed instructions, MEMX establishes the physical connections requested by the User. The number of physical connections assigned to each User (for both equities and options) as of October 1, 2023, ranges from one (1) to 46, depending on the scope and scale of the Member's trading activity on the Exchange as determined by the Member, including the Member's determination of the need for redundant connectivity. Separate physical connections are not required to access the Exchange's Options and Equities platforms, as such, a User could use a single connection to access both platforms. The Exchange notes that 50% of its Members do not maintain a physical connection directly with the Exchange in the Primary Data Center (though many such Members have connectivity through a third-party provider) and 21 members, or 27.6% have either one or two physical ports to connect to the Exchange in the Primary Data Center.[28] Thus, only a limited number of Members, (17 members, or 22%), maintain three or more physical ports to connect to the Exchange in the Primary Data Center.[29]

As described above, the Exchange has previously justified its pricing with respect to MEMX Equities and believes the most fair approach, absent a significant differentiation between application costs to Equities and Options, is to apply the same pricing to all participants of either platform. As such, in order to cover the aggregate costs of providing physical connectivity to Options and Equities Users and make a modest profit, as described below, the Exchange is proposing to charge a fee of $6,000 per month for each physical connection in the Primary Data Center and a fee of $3,000 per month for each physical connection in the Secondary Data Center for connections to its Options platform, as it currently charges for connections to its Equities platform. There is no requirement that any Member maintain a specific number of physical connections and a Member may choose to maintain as many or as few of such connections as each Member deems appropriate. Further, as noted above, existing Equities Members may choose to use their existing physical connection(s) to access the Exchange's Options platform.

The Exchange notes, however, that pursuant to Rule 2.4 (Mandatory Participation in Testing of Backup Systems), the Exchange does require a small number of Members to connect and participate in functional and performance testing as announced by the Exchange, which occurs at least once every 12 months. Specifically, Members that have been determined by the Exchange to contribute a meaningful percentage of the Exchange's overall volume must participate in mandatory testing of the Exchange's backup systems (*i.e.,* such Members must connect to the Secondary Data Center). The Exchange notes that designated Members are still able to use third-party providers of connectivity to access the

[26] *See* Securities Exchange Act Release No. 97130 (March 13, 2013), 88 FR 16491 (March 17, 2023) (SR–MEMX–2023–04).

[27] *See supra* note 4.

[28] Of those 21 members, four (4) have designated certain of their physical ports will be used to connect to MEMX Options.

[29] Of those 17 members, thirteen (13) have designated certain of their physical ports will be used to connect to MEMX Options.

Exchange at its Secondary Data Center, and that for its Equities platform, one of eight such designated Members does use a third-party provider instead of connecting directly to the Secondary Data Center through connectivity provided by the Exchange. Nonetheless, because some Members are required to connect to the Secondary Data Center pursuant to Rule 2.4 and to encourage Exchange Members to connect to the Secondary Data Center generally, the Exchange has proposed to charge one-half of the fee for a physical connection in the Primary Data Center for its Options platform, as it currently charges for Equities. The Exchange notes that its costs related to operating the Secondary Data Center were not separately calculated for purposes of this proposal, but instead, all costs related to providing physical connections were considered in the aggregate. The Exchange believes this is appropriate because had the Exchange calculated such costs separately and then determined the fee per physical connection that would be necessary for the Exchange to cover its costs for operating the Secondary Data Center, the costs would likely be much higher than those proposed for connectivity at the Primary Data Center because Members maintain significantly fewer connections at the Secondary Data Center. The Exchange believes that charging a higher fee for physical connections at the Secondary Data Center would be inconsistent with its objective of encouraging Members to connect at such data center and is inconsistent with the fees charged by other exchanges, which also provide connectivity for disaster recovery purposes at a discounted rate.[30]

The proposed fee will not apply differently based upon the size or type of the market participant, but rather based upon the number of physical connections a User requests, based upon factors deemed relevant by each User (either a Member, service bureau or extranet). The Exchange believes these factors include the costs to maintain connectivity, business model and choices Members make in how to participate on the Exchange, as further described below.

The proposed fee of $6,000 per month for physical connections at the Primary Data Center is designed to permit the Exchange to cover the costs allocated to providing connectivity services with a modest profit margin (approximately 11.7%), which would also help fund future expenditures (increased costs, improvements, etc.). The Exchange believes it is appropriate to charge fees that represent a reasonable markup over cost given the other factors discussed above and the need for the Exchange to maintain a highly performant and stable platform to allow Members to transact with determinism.

As noted above, the Exchange proposes a discounted rate of $3,000 per month for physical connections at its Secondary Data Center. The Exchange has proposed this discounted rate for Secondary Data Center connectivity in order to encourage Members to establish and maintain such connections. Also, as noted above, a small number of Members are required pursuant to Rule 2.4 to connect and participate in testing of the Exchange's backup systems, and the Exchange believes it is appropriate to provide a discounted rate for physical connections at the Secondary Data Center given this requirement. The Exchange notes that this rate is well below the cost of providing such services and the Exchange will operate its network and systems at the Secondary Data Center without recouping the full amount of such cost through connectivity services.

The proposed fee for physical connections is effective on filing and will become operative immediately.

Application Session Fees

Similar to other exchanges, MEMX offers its Members application sessions, also known as logical ports, for order entry and receipt of trade execution reports and order messages. Members can also choose to connect to MEMX indirectly through a session maintained by a third-party service bureau. Service bureau sessions may provide access to one or multiple Members on a single session. Users of MEMX connectivity services (both Members and non-Members)[31] seeking to establish one or more application sessions with the Exchange submit a request to the Exchange via the MEMX User Portal or directly to Exchange personnel. Upon receipt of the completed instructions, MEMX assigns the User the number of sessions requested by the User. The number of sessions assigned to each User as of February 1, 2024, ranges from one (1) to more than 300 depending on the scope and scale of the Member's trading activity on the Exchange (either through a direct connection or through a service bureau) as determined by the Member. For example, by using multiple sessions, Members can segregate order flow from different internal desks, business lines, or customers. The Exchange does not impose any minimum or maximum requirements for how many application sessions a Member or service bureau can maintain, and it is not proposing to impose any minimum or maximum session requirements for its Members or their service bureaus. The same application session cannot be used to access both MEMX Equities and MEMX Options, as such, Users will need to purchase separate application sessions for MEMX Options, which differs from physical connections.

As described above, in order to cover the aggregate costs of providing application sessions to Options Users and to make a modest profit, as described below, the Exchange is proposing to charge a fee of $450 per month for each Order Entry Port and Drop Copy Port in the Primary Data Center for Options application sessions, which is the same fee it currently charges for Equities application sessions. The Exchange notes that it does not propose to charge for: (1) Order Entry Ports or Drop Copy Ports in the Secondary Data Center, or (2) any Test Facility Ports or MEMOIR Gap Fill Ports, again, which it does not charge for Equities Users. The Exchange has proposed to continue to provide Order Entry Ports and Drop Copy Ports in the Secondary Data Center for Options free of charge in order to encourage Members to connect to the Exchange's backup trading systems. Similarly, because the Exchange wishes to encourage Members to conduct appropriate testing of their use of the Exchange, the Exchange has not proposed to charge for Test Facility Ports. With respect to MEMOIR Gap Fill ports, such ports are exclusively used in order to receive information when a market data recipient has temporarily lost its view of MEMX market data. The Exchange has not proposed charging for such ports because the costs of providing and maintaining such ports is more directly related to producing market data.

The proposed fee of $450 per month for each Order Entry Port and Drop Copy Port in the Primary Data Center is designed to permit the Exchange to cover the costs allocated to providing application sessions with a modest profit margin (approximately 9.7%), which would also help fund future expenditures (increased costs, improvements, etc.).

The proposed fee is also designed to encourage Users to be efficient with their application session usage, thereby resulting in a corresponding increase in the efficiency that the Exchange would

[30] *See, e.g.,* the BZX options fee schedule, available at: *https://www.cboe.com/us/options/membership/fee_schedule/bzx/.*

[31] *See supra* note 3.

be able to realize in managing its aggregate costs for providing connectivity services. There is no requirement that any Member maintain a specific number of application sessions and a Member may choose to maintain as many or as few of such ports as each Member deems appropriate. The Exchange has designed its platform such that Order Entry Ports can handle a significant amount of message traffic (*i.e.,* over 50,000 orders per second), and has no application flow control or order throttling. In contrast, other exchanges maintain certain thresholds that limit the amount of message traffic that a single logical port can handle.[32] As such, while several Members maintain a relatively high number of ports because that is consistent with their usage on other exchanges and is preferable for their own reasons, the Exchange believes that it has designed a system capable of allowing such Members to significantly reduce the number of application sessions maintained.

The proposed fee will not apply differently based upon the size or type of the market participant, but rather based upon the number of application sessions a User requests, based upon factors deemed relevant by each User (either a Member or service bureau on behalf of a Member). The Exchange believes these factors include the costs to maintain connectivity and choices Members make in how to segment or allocate their order flow.[33]

The proposed fee for application sessions is effective on filing and will become operative immediately.

Proposed Fees—Additional Discussion

As discussed above, the proposed fees for connectivity services do not by design apply differently to different types or sizes of Members. As discussed in more detail in the Statutory Basis section, the Exchange believes that the likelihood of higher fees for certain Members subscribing to connectivity services usage than others is not unfairly discriminatory because it is based on objective differences in usage of connectivity services among different Members. The Exchange's incremental aggregate costs for all connectivity services are disproportionately related to Members with higher message traffic and/or Members with more complicated connections established with the Exchange, as such Members: (1) consume the most bandwidth and resources of the network; (2) transact the vast majority of the volume on the Exchange; and (3) require the high-touch network support services provided by the Exchange and its staff, including network monitoring, reporting and support services, resulting in a much higher cost to the Exchange to provide such connectivity services. For these reasons, MEMX believes it is not unfairly discriminatory for the Members with higher message traffic and/or Members with more complicated connections to pay a higher share of the total connectivity services fees. While Members with a business model that results in higher relative inbound message activity or more complicated connections are projected to pay higher fees, the level of such fees is based solely on the number of physical connections and/or application sessions deemed necessary by the Member and not on the Member's business model or type of Member. The Exchange notes that the correlation between message traffic and usage of connectivity services is not completely aligned because Members individually determine how many physical connections and application sessions to request, and Members may make different decisions on the appropriate ways based on facts unique to their individual businesses. Based on the Exchange's architecture, as described above, the Exchange believes that a Member even with high message traffic would be able to conduct business on the Exchange with a relatively small connectivity services footprint.

Finally, the fees for connectivity services will help to encourage connectivity services usage in a way that aligns with the Exchange's regulatory obligations. As a national securities exchange, the Exchange is subject to Regulation Systems Compliance and Integrity (''Reg SCI'').[34] Reg SCI Rule 1001(a) requires that the Exchange establish, maintain, and enforce written policies and procedures reasonably designed to ensure (among other things) that its Reg SCI systems have levels of capacity adequate to maintain the Exchange's operational capability and promote the maintenance of fair and orderly markets.[35] By encouraging Users to be efficient with their usage of connectivity services, the proposed fee will support the Exchange's Reg SCI obligations in this regard by ensuring that unused application sessions are available to be allocated based on individual User needs and as the Exchange's overall order and trade volumes increase. Additionally, because the Exchange will charge a lower rate for a physical connection to the Secondary Data Center and will not charge any fees for application sessions at the Secondary Data Center or its Test Facility, the proposed fee structure will further support the Exchange's Reg SCI compliance by reducing the potential impact of a disruption should the Exchange be required to switch to its Disaster Recovery Facility and encouraging Members to engage in any necessary system testing with low or no cost imposed by the Exchange.[36]

(ii) Organizational Fee Schedule Changes

The Exchange is proposing to more clearly separate Connectivity Fees from the Exchange's current fee schedule. Currently, the Exchange has separate transaction fee schedules for Equities and Options, and the current Connectivity Fees appear solely on the Equities fee schedule. The Exchange proposes to remove the Connectivity Fees section from the Equities fee schedule, and add hyperlinks at the bottom of the Equities and Options fee schedules that direct the User to a single Connectivity fee schedule. The Exchange believes this format is appropriate given that the same Connectivity Fees apply to both Equities and Options Users, and separating out the fee schedule for Connectivity Fees will reduce potential confusion (*e.g.,* as to which fees a Member that participates on both MEMX Equities and MEMX

[32] *See, e.g.,* Cboe US Options BOE Specification, *available at: https://cdn.cboe.com/resources/membership/US_Options_BOE_Specification.pdf* (describing a 5,000 message per second Port Order Rate Threshold on Cboe BOE ports).

[33] The Exchange understands that some Members (or service bureaus) may also request more Order Entry Ports to enable the ability to send a greater number of simultaneous order messages to the Exchange by spreading orders over more Order Entry Ports, thereby increasing throughput (*i.e.,* the potential for more orders to be processed in the same amount of time). The degree to which this usage of Order Entry Ports provides any throughput advantage is based on how a particular Member sends order messages to MEMX, however the Exchange notes that its architecture reduces the impact or necessity of such a strategy. All Order Entry Ports on MEMX provide the same throughput, and as noted above, the throughput is likely adequate even for a Member sending a significant amount of volume at a fast pace, and is not artificially throttled or limited in any way by the Exchange.

[34] 17 CFR 242.1000–1007.

[35] 17 CFR 242.1001(a).

[36] While some Members might directly connect to the Secondary Data Center and incur the proposed $3,000 per month fee, there are other ways to connect to the Exchange, such as through a service bureau or extranet, and because the Exchange is not imposing fees for application sessions in the Secondary Data Center, a Member connecting through another method would not incur any fees charged directly by the Exchange. However, the Exchange notes that a third-party service provider providing connectivity to the Exchange likely would charge a fee for providing such connectivity; such fees are not set by or shared in by the Exchange.

Options must pay on a monthly basis to maintain connectivity to the Exchange).

The Exchange also proposes to add two additional bullet points to the new Connectivity Fee Schedule related to MEMX Options. The first will notify Members that a physical connection can be used to access MEMX Equities and/or MEMX Options. The second will clarify that an application session can only be used to access one MEMX platform, *i.e.,* MEMX Equities or MEMX Options.[37] The Exchange notes that the existing bullet points related to Connectivity and application sessions will be included on the proposed separate Connectivity Fee Schedule, (*i.e.,* detailing the Exchange's billing practices, and making clear that that the Exchange does not charge for: (1) Order Entry Ports or Drop Copy Ports in the Secondary Data Center, or (2) any Test Facility Ports or MEMOIR Gap Fill Ports.

2. Statutory Basis

The Exchange believes that the proposed fees for connectivity services to MEMX Options are reasonable, equitable and not unfairly discriminatory because, as described above, the proposed pricing for connectivity services is directly related to the relative costs to the Exchange to provide those respective services and does not impose a barrier to entry to smaller participants.

The Exchange recognizes that there are various business models and varying sizes of market participants conducting business on the Exchange. The Exchange's incremental aggregate costs for all connectivity services are disproportionately related to Members with higher message traffic and/or Members with more complicated connections established with the Exchange, as such Members: (1) consume the most bandwidth and resources of the network; (2) transact the vast majority of the volume on the Exchange; and (3) require the high-touch network support services provided by the Exchange and its staff, including network monitoring, reporting and support services, resulting in a much higher cost to the Exchange to provide such connectivity services. Accordingly, the Exchange believes the allocation of the proposed fees that increase based on the number of physical connections or application sessions is reasonable based on the resources consumed by the respective type of market participant (*i.e.,* lowest resource consuming Members will pay the least, and highest resource consuming Members will pay the most), particularly since higher resource consumption translates directly to higher costs to the Exchange.

With regard to reasonableness, the Exchange understands that when appropriate given the context of a proposal the Commission has taken a market-based approach to examine whether the SRO making the proposal was subject to significant competitive forces in setting the terms of the proposal. In looking at this question, the Commission considers whether the SRO has demonstrated in its filing that: (i) there are reasonable substitutes for the product or service; (ii) ''platform'' competition constrains the ability to set the fee; and/or (iii) revenue and cost analysis shows the fee would not result in the SRO taking supra-competitive profits. If the SRO demonstrates that the fee is subject to significant competitive forces, the Commission will next consider whether there is any substantial countervailing basis to suggest the fee's terms fail to meet one or more standards under the Exchange Act. If the filing fails to demonstrate that the fee is constrained by competitive forces, the SRO must provide a substantial basis, other than competition, to show that it is consistent with the Exchange Act, which may include production of relevant revenue and cost data pertaining to the product or service.

MEMX believes the proposed fees for connectivity services are fair and reasonable as a form of cost recovery for the Exchange's aggregate costs of offering connectivity services to Members and non-Members. The proposed fees are expected to generate monthly revenue of $2,076,238 providing cost recovery to the Exchange for the aggregate costs of offering connectivity services, based on a methodology that narrowly limits the cost drivers that are allocated cost to those closely and directly related to the particular service. In addition, this revenue will allow the Exchange to continue to offer, to enhance, and to continually refresh its infrastructure as necessary to offer a state-of-the-art trading platform. The Exchange believes that, consistent with the Act, it is appropriate to charge fees that represent a reasonable markup over cost given the other factors discussed above. The Exchange also believes the proposed fee is a reasonable means of encouraging Users to be efficient in the connectivity services they reserve for use, with the benefits to overall system efficiency to the extent Members and non-Members consolidate their usage of connectivity services or discontinue subscriptions to unused physical connectivity.

The Exchange further believes that the proposed fees, as they pertain to purchasers of each type of connectivity alternative, constitute an equitable allocation of reasonable fees charged to the Exchange's Members and non-Members and are allocated fairly amongst the types of market participants using the facilities of the Exchange.

As described above, the Exchange believes the proposed fees are equitably allocated because the Exchange's incremental aggregate costs for all connectivity services are disproportionately related to Members with higher message traffic and/or Members with more complicated connections established with the Exchange, as such Members: (1) consume the most bandwidth and resources of the network; (2) transact the vast majority of the volume on the Exchange; and (3) require the high-touch network support services provided by the Exchange and its staff, including network monitoring, reporting and support services, resulting in a much higher cost to the Exchange to provide such connectivity services.

Commission staff previously noted that the generation of supra-competitive profits is one of several potential factors in considering whether an exchange's proposed fees are consistent with the Act.[38] As described in the Fee Guidance, the term ''supra-competitive profits'' refers to profits that exceed the profits that can be obtained in a competitive market. The proposed fee structure would not result in excessive pricing or supra-competitive profits for the Exchange. The proposed fee structure is merely designed to permit the Exchange to cover the costs allocated to providing connectivity services with a modest margin (approximately 11.7% for physical connectivity and 9.7% for application sessions), which would also help fund future expenditures (increased costs, improvements, etc.). While the Fee Guidance did not establish a guideline as to what constitutes supra-competitive pricing through analyzing margin (nor does the Exchange believe it should

[37] The Initial, Second, and Third Proposals included proposed waivers of Options Connectivity Fees that have since expired, and most recently, on March 1, 2024, the Exchange filed a proposed rule change to implement a waiver of Application Session fees used solely for participation on MEMX Options until April 1, 2024. Given that the Application Session fee waiver period has passed, the Exchange is proposing to delete that language from the Options Connectivity Fee Schedule in connection with this proposal. *See* Securities Exchange Act Release No. 99699 (March 8, 2024), 89 FR 18687 (March 14, 2024) (SR–MEMX–2024–08).

[38] *See* Fee Guidance, *supra* note 13.

have), the Exchange does not believe that it would be reasonable to consider the aforementioned margins to constitute supra-competitive pricing. As noted above, the increase in margin for connectivity services is primarily driven by certain cost savings that the Exchange has been able to achieve as compared to the 2021 Cost Analysis, and the Exchange does not believe it should be penalized, and instead should be rewarded for identifying and realizing such savings. Of course, should the Exchange find opportunities to dramatically reduce costs or increase revenues such that it believes the cost it is charging for physical connections or applications sessions is inconsistent with the cost of providing such connectivity or resulting in unreasonable margin, the Exchange will seek to lower its fees in order to pass savings on to its constituents. Thus, the Exchange believes that its proposed pricing for Connectivity Fees is fair, reasonable, and equitable. Further, the Exchange notes that certain of its competitors have connectivity fees that were approved without the presentation of a cost-based analysis, but it is reasonable to assume that certain of those competitors with significantly higher fees also operate with significantly higher profit margins. Accordingly, the Exchange believes that its proposal is consistent with Section 6(b)(4) [39] of the Act because the proposed fees will permit recovery of the Exchange's costs and will not result in excessive pricing or supra-competitive profit.

The proposed fees for Options connectivity services will allow the Exchange to cover certain costs incurred by the Exchange associated with providing and maintaining necessary hardware and other network infrastructure as well as network monitoring and support services; without such hardware, infrastructure, monitoring and support the Exchange would be unable to provide the connectivity services. The Exchange routinely works to improve the performance of the network's hardware and software. The costs associated with maintaining and enhancing a state-of-the-art exchange network is a significant expense for the Exchange, and thus the Exchange believes that it is reasonable and appropriate to help offset those costs by adopting fees for connectivity services. As detailed above, the Exchange has four primary sources of revenue that it can potentially use to fund its operations: transaction fees, fees for connectivity services, membership and regulatory fees, and market data fees. Accordingly, the Exchange must cover its expenses from these four primary sources of revenue. The Exchange's Cost Analysis estimates the monthly costs to provide connectivity services at $1,846,310.58. Based on current connectivity services usage, the Exchange would generate monthly revenues of approximately $2,076,238. This represents a modest profit when compared to the cost of providing connectivity services and that profit represents a modest increase over the profit estimated in the 2021 Cost Analysis (a reasonable goal for a newly formed business, *i.e.,* growing from non-profitable, to break-even to modestly profitable).[40] Even if the Exchange earns that amount or incrementally more, the Exchange believes the proposed fees for connectivity services are fair and reasonable because they will not result in excessive pricing or supra-competitive profit, when comparing the total expense of MEMX associated with providing connectivity services versus the total projected revenue of the Exchange associated with network connectivity services.

As noted above, when incorporating the projected revenue from connectivity services into the Exchange's overall projected revenue, including projections related to recently adopted market data fees, the Exchange anticipates monthly revenue of $6,080,631 from all sources. As such, applying the Exchange's holistic Cost Analysis to a holistic view of anticipated revenues, the Exchange would earn approximately 13% margin on its operations as a whole. The Exchange believes that this amount is reasonable and is again evidence that the Exchange will not earn a supra-competitive profit.

The Exchange notes that other exchanges offer similar connectivity options to market participants and that the Exchange's fees are a discount as compared to the majority of such fees.[41] With respect to physical connections, MIAX Options (''MIAX''), MIAX Pearl, LLC (''MIAX Pearl''), MIAX Emerald, LLC (''MIAX Emerald''), each of the Nasdaq Stock Market LLC (''Nasdaq'') options exchanges,[42] NYSE American Options (''NYSE American''), NYSE Arca Options (''NYSE Arca''), Cboe Exchange, Inc. (''Cboe Options''), Cboe BZX Options (''BZX Options''), and Cboe EDGX Options (''EDGX Options'') charge between $7,000–$22,000 per month for physical connectivity at their primary data centers that is comparable to that offered by the Exchange.[43] Nasdaq, NYSE American and NYSE Arca also charge installation fees, which are not proposed to be charged by the Exchange. With respect to application sessions, BX, PHLX, GEMX, MRX, BOX Options (''BOX''), Cboe Options, BZX Options and EDGX charge between $500–$800 per month for order entry and drop ports.[44] The Exchange further notes that several of these exchanges each charge for other logical ports that the Exchange will continue to provide for free, such as application sessions for testing and disaster recovery purposes.[45] While the Exchange's proposed Options Connectivity Fees are lower than certain of the fees charged by the Nasdaq options exchanges, MIAX Options, MIAX Pearl, MIAX Emerald, NYSE American, NYSE Arca, BOX, Cboe, BZX and EDGX, MEMX believes that it offers significant value to

[39] 15 U.S.C. 78f(b)(4).

[40] Specifically, in the 2021 Cost Analysis, the Exchange estimated the total costs to provide connectivity services at $1,143,715 and estimated monthly revenues of $1,233,750.

[41] One significant differentiation between the Exchanges is that while it offers different types of physical connections, including 10Gb, 25Gb, 40Gb, and 100Gb connections, the Exchange does not propose to charge different prices for such connections. In contrast, most of the Exchange's competitors provide scaled pricing that increases depending on the size of the physical connection. The Exchange does not believe that its costs increase incrementally based on the size of a physical connection but instead, that individual connections and the number of such separate and disparate connections are the primary drivers of cost for the Exchange.

[42] Including Nasdaq PHLX (''PHLX''), Nasdaq Options Market (''NOM''), Nasdaq BX Options (''BX''), Nasdaq ISE (''ISE''), Nasdaq GEMX (''GEMX''), and Nasdaq MRX (''MRX'').

[43] *See* the MIAX fee schedule, available at: *https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX__Options__Fee__Schedule_10022023.pdf;* the MIAX Pearl fee schedule, available at: *https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Pearl_Options_Fee_Schedule_09122023.pdf;* the MIAX Emerald fee schedule, available at: *https://www.miaxglobal.com/sites/default/files/fee_schedule-files/MIAX_Emerald_Fee_Schedule_10122023_3.pdf;* the Nasdaq Options markets fee schedule, at *http://www.nasdaqtrader.com/trader.aspx?id=pricelisttrading2;* the NYSE Connectivity fee schedule, at: *https://www.nyse.com/publicdocs/Wireless_Connectivity_Fees_and_Charges.pdf;* the Cboe fee schedule, at: *https://www.cboe.com/us/options/membership/fee_schedule/cone/;* the BZX Options fee schedule, available at: *https://www.cboe.com/us/options/membership/fee_schedule/bzx/;* the EDGX Options fee schedule, available at: *https://www.cboe.com/us/options/membership/fee_schedule/edgx/,* and the BOX Options fee schedule, available at: *https://boxoptions.com/fee-schedule/.* This range is based on a review of the fees charged for 10–40Gb connections at each of these exchanges and relates solely to the physical port fee or connection charge, excluding co-location fees and other fees assessed by these exchanges. The Exchange notes that it does not offer physical connections with lower bandwidth than 10Gb and that Members and non-Members with lower bandwidth requirements typically access the Exchange through third-party extranets or service bureaus.

[44] *See id.*

[45] *See id.*

Members over these other exchanges in terms of bandwidth available over such connectivity services, which the Exchange believes is a competitive advantage, and differentiates its connectivity versus connectivity to other exchanges.[46] Additionally, the Exchange's proposed Connectivity Fees to its disaster recovery facility are within the range of the fees charged by other exchanges for similar connectivity alternatives.[47] The Exchange believes that its proposal to offer certain application sessions free of charge is reasonable, equitably allocated and not unfairly discriminatory because such proposal is intended to encourage Member connections and use of backup and testing facilities of the Exchange, and, with respect to MEMOIR Gap Fill ports, such ports are used exclusively in connection with the receipt and processing of market data from the Exchange.

In conclusion, the Exchange submits that its proposed fee structure satisfies the requirements of Sections 6(b)(4) and 6(b)(5) of the Act [48] for the reasons discussed above in that it provides for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities, does not permit unfair discrimination between customers, issuers, brokers, or dealers, and is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and in general to protect investors and the public interest, particularly as the proposal neither targets nor will it have a disparate impact on any particular category of market participant.

The Exchange believes that the proposed reorganization of its fee schedule to establish a separate fee schedule for Connectivity Fees is reasonable and equitable because it is a non-substantive change and does not involve changing any existing fees or rebates that apply to trading activity on MEMX Equities. Further, the changes are designed to make the fee schedule easier to read and for Members to validate the bills they receive from the Exchange. The Exchange also believes this reorganization is non-discriminatory because it applies uniformly to all Members. The Exchange believes the proposed fee schedule will be clearer and less confusing for Members of the Exchange and will eliminate potential Member confusion, thereby removing impediments to and perfecting the mechanism of a free and open market and a national market, and in general, protecting investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[49] the Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The Exchange does not believe that the proposed rule change to apply the same Connectivity Fees to Options Users as it does to Equities Users would place certain market participants at the Exchange at a relative disadvantage compared to other market participants because the proposed connectivity pricing is associated with relative usage of the Exchange by each market participant and does not impose a barrier to entry to smaller participants. As noted above, the Exchange has previously justified its pricing with respect to MEMX Equities and believes the most fair approach, absent a significant differentiation between application costs to Equities and Options, is to apply the same pricing to all participants of either platform. The Exchange believes its proposed pricing is reasonable and lower than what other options exchanges charge and, when coupled with the availability of third-party providers that also offer connectivity solutions, that participation on the Exchange is affordable for all market participants, including smaller trading firms. Therefore, the fees may stimulate intramarket competition by attracting additional firms to become Members of MEMX Options. As described above, the connectivity services purchased by market participants typically increase based on their additional message traffic and/or the complexity of their operations. The market participants that utilize more connectivity services typically utilize the most bandwidth, and those are the participants that consume the most resources from the network. Accordingly, the proposed fees for connectivity services do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation of the proposed Connectivity Fees reflects the network resources consumed by the various size of market participants and the costs to the Exchange of providing such connectivity services.

As it relates to the reorganization of the fee schedule, as discussed above, the Exchange does not believe that the proposed change would impose any burden on competition because such change serves to create an easier to read fee schedule to avoid any Member confusion.

Intermarket Competition

The Exchange does not believe the proposed fees for Options Connectivity place an undue burden on competition on other SROs that is not necessary or appropriate. Additionally, other exchanges have similar connectivity alternatives for their participants, but with higher rates to connect.[50] The Exchange is also unaware of any assertion that the proposed fees for connectivity services would somehow unduly impair its competition with other exchanges. As a new entrant in an already highly competitive environment for equity options trading, MEMX does not have the market power necessary to set prices for services that are unreasonable or unfairly discriminatory in violation of the Exchange Act. In sum, MEMX's proposed Connectivity Fees for Options Members are comparable to and generally lower than fees charged by other options exchanges for the same or similar services.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act [51] and Rule 19b–4(f)(2) [52] thereunder.

[46] As noted above, all physical connections offered by MEMX are at least 10Gb capable and physical connections provided with larger bandwidth capabilities will be provided at the same rate as such connections. In contrast to other exchanges, MEMX has not proposed different types of physical connections with higher pricing for those with greater capacity. *See supra* note 41. The Exchange also reiterates that MEMX application sessions are capable of handling significant amount of message traffic (*i.e.,* over 50,000 orders per second), and have no application flow control or order throttling, in contrast to competitors that have imposed message rate thresholds. *See supra* note 33 and accompanying text.

[47] *See supra* note 43.

[48] 15 U.S.C. 78f(b)(4) and (5).

[49] 15 U.S.C. 78f(b)(8).

[50] *See supra* notes 42–47 and accompanying text.

[51] 15 U.S.C. 78s(b)(3)(A)(ii).

[52] 17 CFR 240.19b–4(f)(2).

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–MEMX–2024–13 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–MEMX–2024–13. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–MEMX–2024–13 and should be submitted on or before May 21, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[53]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100020; File No. SR–MEMX–2024–06]

Self-Regulatory Organizations; MEMX LLC; Notice of Withdrawal of a Proposed Rule Change To Amend the Exchange's Fee Schedule To Adopt Connectivity and Application Session Fees for MEMX Options

April 24, 2024.

On February 15, 2024, MEMX LLC (''MEMX'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change (File No. SR–MEMX–2024–06) to adopt connectivity and application session fees for MEMX Options.[3] The proposed rule change was immediately effective upon filing with the Commission pursuant to Section 19(b)(3)(A) of the Act.[4] The proposed rule change was published for comment in the **Federal Register** on March 6, 2024.[5] On April 12, 2024, the Exchange withdrew the proposed rule change (SR–MEMX–2024–06).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

Sherry R. Haywood,

Assistant Secretary.

deficiencies that exist on NYS Route 17 between U.S. Route 209 and Interstate 87 (transportation corridor). This NOI contains a summary of the information required in the Council on Environmental Quality (CEQ) regulations. This NOI should be reviewed together with the NOI Additional Project Information document, which contains important details about the proposed project and compliments the information in this NOI. Persons and agencies who may be interested in or affected by the proposed project are encouraged to comment on the information in this NOI and the NOI Additional Project Information document. All comments received in response to this NOI will be considered and any information presented herein may be revised in consideration of the comments.

DATES: Publication of this NOI initiates a 30-day public comment period. Comments on this NOI and the NOI Additional Project Information document are to be received through the methods below by May 30, 2024.

ADDRESSES: This NOI and the NOI Additional Project Information document are also available on the project website located at *www.route17.dot.ny.gov/#/mobility-access.* The NOI Additional Project Information document will be mailed upon request. Interested parties are invited to submit comments by any of the following methods:

- For access to the documents, go to the Project website located at *www.route17.dot.ny.gov/#/mobility-access.* Follow the online instructions for submitting comments.
- *Mail:* Federal Highway Administration, New York Division, Attention: NYS Route 17 Mobility & Access Improvements Project (PIN 8065.12), Leo W. O'Brien Federal Building, 11A Clinton Avenue, Suite 719, Albany, New York 12207.
- *Mail:* New York State Department of Transportation, Region 8, Attention: NYS Route 17 Mobility & Access Improvements Project (PIN 8065.12), 4 Burnett Boulevard, Poughkeepsie, NY 12603.
- *Email: Rt17MobilityAccess@dot.ny.gov*.

A summary of the comments received during the 30-day comment period will be included in the Draft EIS (DEIS).

FOR FURTHER INFORMATION CONTACT: Richard J. Marquis, Division Administrator, Federal Highway Administration, New York Division, Leo W. O'Brien Federal Building, 11A Clinton Avenue, Suite 719, Albany, NY 12207, Telephone: (518) 431–4127, Email: *Rick.Marquis@dot.gov;* or Mark Kruk, Project Manager, New York State Department of Transportation, Region 8, 4 Burnett Boulevard, Poughkeepsie, NY 12603, Telephone: (845) 431–5749, Email: *Mark.Kruk@dot.ny.gov*.

Interested persons can also be added to the project mailing list by sending a request to the NYS Route 17 Mobility and Access Improvements Project email address referenced above.

SUPPLEMENTARY INFORMATION: The FHWA and NYSDOT are committed to public involvement for this study. The FHWA, as Federal lead agency, and the New York State Department of Transportation (NYSDOT), as joint lead agency and project sponsor, are preparing an EIS for the NYS Route 17 Mobility and Access Improvements Project located in Orange and Sullivan Counties, New York, in accordance with the requirements of the National Environmental Policy Act (NEPA) of 1969, as amended (42 U.S.C. 4321, *et seq.*), 23 U.S.C. 139, CEQ regulations implementing NEPA (40 CFR 1500–1508), FHWA regulations implementing NEPA (23 CFR 771.101–771.139) and applicable Federal, State, and local governmental laws and regulations. The Project is classified as a NEPA Class I action under 23 CFR part 771 and a State Environmental Quality Review Act (SEQRA) non-Type II action under 17 NYCRR part 15. To ensure that a full range of issues are addressed in the EIS and potential issues are identified, comments and suggestions are invited from all interested parties. The NOI Additional Project Information document provides additional details on the Purpose and Need for the proposed action, alternatives considered, and expected impacts on the human environment. The FHWA requests identification of potential alternatives, information, and analyses relevant to the proposed action. The purpose of this request is to bring relevant comments, information, and analyses to the FHWA's attention, as early in the process as possible, to enable the agency to make maximum use of this information in decision making. All public comments received in response to this NOI will be considered, and changes may be made as appropriate.

The Project is informed by the findings of the 2021 Route 17 Transportation Planning and Environment Linkage (PEL) Study; the final report is available on the project website. The intent of the PEL Study was to assess and document existing conditions, identify transportation needs, and update conceptual transportation solutions developed in prior studies of the NYS Route 17 corridor that would address existing safety and operational deficiencies in the corridor, improve mobility, enhance transit infrastructure, and support future demand on the existing transportation network, in consideration of public input received.

1. Purpose and Need for the Proposed Action

NYS Route 17 is a major State highway that extends through the Southern Tier and Downstate regions of New York. Construction of the original NYS Route 17 began in 1949 and was completed in the 1960s. The majority of the transportation corridor consists of two travel lanes while short sections include a third travel lane or auxiliary lane. The typical section generally consists of 12-foot travel lanes with 4-foot left shoulders and 10-foot right shoulders. Many of the roadway sections in the transportation corridor remain as they were originally constructed.

The purpose of the Project is to address operational mobility deficiencies that exist on NYS Route 17 between US Route 209 and Interstate 87 (transportation corridor). The objectives of the Project are to address the operational and safety deficiencies that result from the insufficient acceleration and deceleration lanes at interchange ramps and short weaving sections, address geometric design elements to achieve interstate designation, and improve congestion-related travel times during peak travel periods within the transportation corridor. Detailed project need may be reviewed in the NOI Additional Project Information document available on the project website as noted in the **ADDRESSES** section. Comments on the Purpose and Need for the Proposed Action are welcomed during the 30-day comment period on this NOI. The Purpose and Need may be revised based on consideration of public and agency comments received during the comment period for this NOI and during the Scoping process for the DEIS.

2. Preliminary Description of the Proposed Action and Alternatives the Environmental Impact Statement Will Consider

The range of reasonable alternatives for detailed study in the EIS is currently being evaluated and will be refined in consideration of agency and public comments received during the 30-day comment period on this NOI. In addition to the No Action (No Build) Alternative, potential project alternatives include construction of

operational improvements in three locations (Concept 1), construction of a peak period shoulder lane (Concept 2), and construction of a general use third lane (Concept 3). A preliminary description of these potential alternatives is provided below. Additional information on the proposed potential alternatives is included in the NOI Additional Project Information document available for review on the project website, as noted in the **ADDRESSES** section.

The No Build Alternative assumes no improvements would be made to the transportation corridor other than those already programmed for construction, those proposed by others, and routine maintenance.[1]

Concept 1 proposes the construction of operational improvements, such as auxiliary lanes and collector-distributor roads, at three locations along NYS Route 17. NYS Route 17 would remain as two mainline travel lanes in each direction. Mainline operational improvements would be constructed along NYS Route 17 in both directions from Exit 120, NYS Route 211 to Exit 122, Crystal Run Road, from Exit 122A, Fletcher Street to Exit 124, NYS Route 207, and from Exit 130, NYS Route 208 to Exit 130A, U.S. Route 6 at the eastern end of the Project in order to adequately address operational and safety needs related to the close proximity of the interchanges and the volume of entering and exiting traffic at these three locations. Interchange improvements would be included to improve the interchanges along the transportation corridor to address non-standard and non-conforming features as well as operational issues. Multimodal improvements would be assessed and considered as part of this concept.

Concept 2 proposes construction of a peak period shoulder lane in both directions of NYS Route 17 from Exit 122, Crystal Run Road, to Exit 130, NYS Route 208. Peak period shoulder lanes would provide additional mobility during periods of high traffic volume. A full-time general use third lane would be added along NYS Route 17 in both directions from Exit 120, NYS Route 211 to Exit 122, Crystal Run Road, and from Exit 130, NYS Route 208, to I–87 at the eastern end of the Project in order to adequately address operational and safety needs related to the close proximity of the interchanges and the volume of entering and exiting traffic at these two locations. Interchange improvements would be included to improve the interchanges along the transportation corridor to address non-standard and non-conforming features as well as operational issues. Multimodal improvements would be assessed and considered as part of this concept.

Concept 3 proposes construction of a continuous third general use travel lane along NYS Route 17 in each direction between Exit 120, NYS Route 211 in Wallkill to the eastern limit of the Project at I–87 in Woodbury. Interchange improvements would be included to improve the interchanges along the transportation corridor to address non-standard and non-conforming features as well as operational issues. Multimodal improvements would be assessed and considered as part of this concept.

The range of alternatives includes three Build Alternatives described above as the proposed action, and the No Build Alternative. The No Build Alternative, which assumes no improvements other than those already programmed for construction; those implemented as part of routine maintenance and to keep the roadway safe and open to traffic in the near term, and those planned by others, will be carried forward for study in the DEIS as a baseline for comparison to the Build Alternative(s).

The alternatives may be revised based on the consideration of public and agency comments. The range of reasonable alternatives to be carried forward and documented in the DEIS will be finalized after consideration of comments received during the comment period on this NOI and after conclusion of the scoping process. Comments on the range of alternatives are welcomed during the 30-day comment period on this NOI.

3. Brief Summary of Expected Impacts

The FHWA and NYSDOT have initiated data collection and agency coordination to identify the types of environmental, cultural, and socio-economic resources present in the project areas and those likely to be impacted. Potential indirect and cumulative effects of the Project will be assessed and documented in the EIS. Based on preliminary review of existing conditions within and in proximity to the transportation corridor, the implementation of the Project could result in effects to the following:

- *Environmental justice populations:* Minority or low-income (environmental justice) populations have been identified within the vicinity of the Project, specifically within the City of Middletown, Town of Palm Tree/Village of Kiryas Joel, Town of Woodbury, Village of Woodbury, Town of Wallkill, Village of Bloomingburg, Town of Mamakating, and Village of Wurtsboro. An assessment of the potential for disproportionately high and adverse effects on environmental justice populations will be conducted, as described in section 4 of the NOI Additional Project Information document.
- *Regional and local economies:* Industrial, commercial, retail, entertainment, and healthcare uses exist along the transportation corridor and serve as employment and commerce centers that are important to both the regional and local economies in the vicinity of the Project. Some of these developments include LEGOLAND, the Galleria at Crystal Run, Garnet Health Medical Center, and Woodbury Common Premium Outlets. An assessment of the Project's potential effects on regional and local economies will be conducted, as described in section 4 of the NOI Additional Project Information document.
- *Wetlands and surface waters:* State and Federal regulated freshwater wetlands and waterways are present in the vicinity of the Project, including but not limited to Orange Rockland Lake, Youngs Brook, Seely Brook, Black Meadow Creek, Otter Kill, Wallkill River, Shawangunk Kill, and Basher Kill. A surface water and wetland delineation will be conducted to identify all state-regulated wetlands and Waters of the U.S. within and adjacent to the transportation corridor. An assessment of the Project's potential effects on wetlands and surface waters will be conducted, as described in section 4 of the NOI Additional Project Information document.
- *Endangered and threatened species:* Federally and State-listed threatened and/or endangered species have the potential to occur within the vicinity of the Project. Review of the U.S. Fish and Wildlife Service's (USFWS) Information for Planning and Consultation (IPaC) system preliminarily identified the following threatened, endangered, and/or candidate species as having the potential to occur in the vicinity of the Project: Indiana bat; northern long-eared bat; tricolored bat; bog turtle; dwarf wedgemussel; monarch butterfly; and small whorled pogonia. A review of the NY Natural Heritage Program (NYNHP) database identified additional State-listed threatened and/or endangered species as having the potential to occur in the vicinity of the Project. An assessment of the Project's potential effects on threatened and endangered

[1] The NY Route 17 at Exit 122 Project (NYSDOT PIN 8065.10) is a separate action that is currently programmed for construction and lies within the limits of the NYS Route 17 Mobility and Access Improvements Project.

species will be conducted, as described in section 4 of the NOI Additional Project Information document.

- *Historic properties:* A preliminary review of the NYS Office of Parks, Recreation and Historic Preservation (OPRHP) Cultural Resource Information System (CRIS) identified properties within or immediately adjacent to the transportation corridor that are listed on or eligible for inclusion in the National Register of Historic Places. An Area of Potential Effects (APE) will be established for the Project and an assessment will be conducted to identify the potential for effects on historic properties, as described in section 4 of the NOI Additional Project Information document.
- *Visual resources:* Visually sensitive resources are present in the vicinity of the Project, including but not limited to historic properties, the Bashakill Wildlife Management Area, and Orange Heritage Trail. An assessment of the Project's potential effects on visual resources will be conducted, as described in section 4 of the NOI Additional Project Information document.
- *Air quality:* The Project lies within Orange and Sullivan counties. Sullivan County is classified as ''attainment'' for all current National Ambient Air Quality Standards (NAAQS). Orange County is classified as a maintenance area for particulate matter with a diameter smaller than or equal to 2.5 microns ($PM_{2.5}$). Orange County is classified as ''attainment'' for all other NAAQS. An assessment of the Project's potential effects on air quality will be conducted, as described in section 4 of the NOI Additional Project Information document.
- *Traffic noise:* Noise sensitive receptors, as described in 23 CFR 772, are present within the vicinity of the Project and include, but are not limited to residences, schools, medical facilities, daycare centers, hotels, restaurants, and trails. An assessment of the Project's potential effects on traffic noise will be conducted, as described in section 4 of the NOI Additional Project Information document.
- *Construction effects:* Construction of the Project has the potential to effect noise, air quality, traffic and transportation, local and regional economies, water quality, and other environmental resources. Construction effects would be temporary and would cease with the completion of construction. An assessment of the Project's potential construction-related effects will be conducted, as described in section 4 of the NOI Additional Project Information document.

The analyses and evaluations conducted for the EIS will identify the potential for construction-related (short-term) and operational (long-term) effects (direct, indirect, and cumulative); whether the anticipated effects would be adverse; and mitigation measures for adverse effects. Evaluations under section 4(f) of the USDOT Act of 1966, 23 CFR part 774, and section 6(f) of the Land and Water Conservation Fund Act of 1965, 54 U.S.C. 200302, will be prepared, and consultation under section 106 of the National Historic Preservation Act of 1966, 54 U.S.C. 300101–307108, will be undertaken concurrently with the NEPA process. Comments on the potential impacts to be assessed in the Draft EIS are welcomed during the 30-day comment period on this NOI. The identification of impacts for analysis in the DEIS may be revised due to the consideration of public comments.

4. Anticipated Permits and Other Authorizations

Anticipated Federal and State permits and authorizations for the NYS Route 17 Mobility and Access Improvements Project include:

- U.S. Army Corps of Engineers (USACE) permits under section 404 of the Clean Water Act, 33 U.S.C. 1344, for construction in the transportation corridor and potential impacts to Waters of the United States;
- U.S. Fish and Wildlife Service (USFWS) consultation under section 7 of the Endangered Species Act, 16 U.S.C. 1536, for potential impacts to federally-listed threatened and/or endangered species;
- New York State Department of Environmental Conservation (NYSDEC) Clean Water Act section 401 WQC for potential impacts to water quality resulting from discharge into waters due to construction in the transportation corridor; as well as any other relevant New York State permits.

The USACE, USFWS, United States Environmental Protection Agency (USEPA), NYSDEC, and New York State Historic Preservation Office (SHPO) at New York State Office of Parks, Recreation, and Historic Preservation (NYSOPRHP) were invited to participate as Cooperating Agencies for the Project.

Invited Participating Agencies include New York State Department of Agriculture and Markets (NYS AGM), New York Metropolitan Transportation Council (NYMTC), New York State Thruway Authority (NYSTA), Orange County Department of Planning, Sullivan County Division of Planning & Community Development, Town of Blooming Grove, Town of Chester, Town of Goshen, Town of Mamakating, Town of Monroe, Town of Palm Tree & Village of Kiryas Joel, Town of Wallkill, Town of Woodbury, Village of Bloomingburg, Village of Chester, Village of Goshen, Village of Monroe, Village of South Blooming Grove, Village of Woodbury, City of Middletown, Delaware Nation, Delaware Tribe, Saint Regis Mohawk Tribe, and Stockbridge-Munsee Community Band of Mohican Indians.

Coordination with Cooperating and Participating Agencies has begun as part of the pre-NOI scoping and will continue throughout the environmental review process. The draft Project Purpose and Need and draft Permitting Timetable were distributed to the Cooperating Agencies on February 16, 2024, for review and concurrence. The Joint Agency Coordination Plan and Public Involvement Plan were distributed to the Cooperating Agencies for review on March 14, 2024. Refer to the NOI Additional Project Information document for additional information on coordination with Cooperating and Participating Agencies.

5. Schedule for the Decision-Making Process

The Project schedule will be established as part of the requirements of the environmental review process under 23 U.S.C. 139 and will comply with 40 CFR 1501.10(b)(2), which requires that environmental reviews and authorization decisions for major projects occur within 2 years (from the date of publication of the NOI to the date of issuance of the Record of Decision [ROD]), and all necessary authorizations be issued in 90 days from the ROD, in cooperation with the FHWA. A current draft of the Joint Agency Coordination Plan and Public Involvement Plan and project schedule are included in the NOI Additional Project Information document, which is available for review on the project website as noted in the **ADDRESSES** section.

The anticipated project schedule is outlined below:

- Public Scoping Meeting (May 2024)
- Project Scoping Report Publication (August 2024)
- Notice of Availability of the Draft EIS (DEIS) (August 2025)
- Public Hearing (September 2025)
- 45-day DEIS Comment Period (begins with the Notice of Availability of the DEIS) (August–October 2025)
- Submit Final EIS (FEIS) to FHWA (December 2025)
- Publish Single FEIS and ROD (February 2026)

- Issue all Project Permits and Authorization Decisions (May 2026)

6. Description of the Public Scoping Process, Including Scoping Meetings

Scoping is an early and open process to determine the scope of issues for analysis in an EIS, including identifying the significant issues and eliminating from further study non-significant issues. During the scoping process, FHWA and NYSDOT will determine the range of reasonable alternatives to be studied in the Draft EIS for the Project, in consideration of public and agency input received. Persons and agencies who may be interested in or affected by the proposed project are encouraged to comment on the information in this NOI and the NOI Additional Project Information document during the 30-day comment period. A formal public scoping meeting will be held after publication of the NOI. Advanced notice of the date, time, and location of the public scoping meeting will be provided to the public through the Project website and in public notices published in local newspapers, as described in Attachment A of the NOI Additional Project Information document. The intent of this meeting is to provide information and gather input on the Project during this early phase of the decision-making process. Interested parties will have the opportunity to submit formal comments at the meeting.

As described in the **ADDRESSES** section, the NOI Additional Project Information document is located on the project website. The NOI Additional Project Information document includes the complete Draft Purpose and Need for the Proposed Action; Extent of Analysis for Resources; Identification of Cooperating and Participating Agencies; Permitting Timetable; Joint Agency Coordination Plan and Public Involvement Plan; Environmental Justice Public Engagement Plan; and Project Maps/Figures.

7. Request for Identification of Potential Alternatives, Information, and Analyses Relevant to the Proposed Action

With this Notice, the FHWA and NYSDOT request and encourage State, Tribal, and local government agencies, and the public, to review the NOI and NOI Additional Project Information document and submit comments. Specifically, agencies and the public are asked to identify and submit potential alternatives for consideration and information, such as anticipated significant issues or environmental impacts and analyses relevant to the proposed action, for consideration by the Lead and Cooperating Agencies in developing the Draft EIS. Any information presented herein, including the Purpose and Need, proposed potential alternatives and identification of impacts by be revised after consideration of the comments. The purpose of this request is to bring relevant comments, information, and analyses to the attention of FHWA as early in the process as possible to enable FHWA to make maximum use of this information in decision making. Comments must be received by May 30, 2024. Comments or questions concerning this proposed action, including comments relative to potential alternatives, information and analyses, should be directed to the FHWA and NYSDOT at the addresses provided in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

Authority: 42 U.S.C. 4321 *et seq.;* 23 U.S.C. 139; 23 CFR part 771.

Richard J. Marquis,

Division Administrator, Albany, NY.

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2010–0031]

Long Island Rail Road's Request To Amend Its Positive Train Control Safety Plan and Positive Train Control System

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of availability and request for comments.

SUMMARY: This document provides the public with notice that, on April 19, 2024, Long Island Rail Road (LIRR) submitted a request for amendment (RFA) to its FRA-approved Positive Train Control Safety Plan (PTCSP). As this RFA involves a request for FRA's approval of proposed material modifications to an FRA-certified positive train control (PTC) system, FRA is publishing this notice and inviting public comment on the railroad's RFA to its PTCSP.

DATES: FRA will consider comments received by May 20, 2024. FRA may consider comments received after that date to the extent practicable and without delaying implementation of valuable or necessary modifications to a PTC system.

ADDRESSES:

Comments: Comments may be submitted by going to *https://www.regulations.gov* and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name and the applicable docket number. The relevant PTC docket number for this host railroad is Docket No. FRA–2010–0031. For convenience, all active PTC dockets are hyperlinked on FRA's website at *https://railroads.dot.gov/research-development/program-areas/train-control/ptc/railroads-ptc-dockets.* All comments received will be posted without change to *https://www.regulations.gov;* this includes any personal information.

FOR FURTHER INFORMATION CONTACT: Gabe Neal, Staff Director, Signal, Train Control, and Crossings Division, telephone: 816–516–7168, email: *Gabe.Neal@dot.gov.*

SUPPLEMENTARY INFORMATION: In general, title 49 United States Code (U.S.C.) section 20157(h) requires FRA to certify that a host railroad's PTC system complies with title 49 Code of Federal Regulations (CFR) part 236, subpart I, before the technology may be operated in revenue service. Before making certain changes to an FRA-certified PTC system or the associated FRA-approved PTCSP, a host railroad must submit, and obtain FRA's approval of, an RFA to its PTCSP under 49 CFR 236.1021.

Under 49 CFR 236.1021(e), FRA's regulations provide that FRA will publish a notice in the **Federal Register** and invite public comment in accordance with 49 CFR part 211, if an RFA includes a request for approval of a material modification of a signal or train control system. Accordingly, this notice informs the public that, on April 19, 2024, LIRR submitted an RFA to its PTCSP for its Advanced Civil Speed Enforcement System II (ACSES II), which seeks FRA's approval for the release of updated onboard software modifying safety critical and non-safety critical functionality to address known software defects. That RFA is available in Docket No. FRA–2010–0031.

Interested parties are invited to comment on LIRR's RFA to its PTCSP by submitting written comments or data. During FRA's review of this railroad's RFA, FRA will consider any comments or data submitted within the timeline specified in this notice and to the extent practicable, without delaying implementation of valuable or necessary modifications to a PTC system. *See* 49 CFR 236.1021; *see also* 49 CFR 236.1011(e). Under 49 CFR 236.1021, FRA maintains the authority to approve,

approve with conditions, or deny a railroad's RFA to its PTCSP at FRA's sole discretion.

Privacy Act Notice

In accordance with 49 CFR 211.3, FRA solicits comments from the public to better inform its decisions. DOT posts these comments, without edit, including any personal information the commenter provides, to *https://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.transportation.gov/privacy.* See *https://www.regulations.gov/privacy-notice* for the privacy notice of *regulations.gov*. To facilitate comment tracking, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. If you wish to provide comments containing proprietary or confidential information, please contact FRA for alternate submission instructions.

Issued in Washington, DC.

Carolyn R. Hayward-Williams,

Director, Office of Railroad Systems and Technology.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2010–0034]

Port Authority Trans-Hudson's Request To Amend Its Positive Train Control Safety Plan and Positive Train Control System

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of availability and request for comments.

SUMMARY: This document provides the public with notice that, on April 19, 2024, Port Authority Trans-Hudson (PATH) submitted a request for amendment (RFA) to its FRA-approved Positive Train Control Safety Plan (PTCSP). As this RFA may involve a request for FRA's approval of proposed material modifications to an FRA-certified positive train control (PTC) system, FRA is publishing this notice and inviting public comment on the railroad's RFA to its PTCSP.

DATES: FRA will consider comments received by May 20, 2024. FRA may consider comments received after that date to the extent practicable and without delaying implementation of valuable or necessary modifications to a PTC system.

ADDRESSES:

Comments: Comments may be submitted by going to *https://www.regulations.gov* and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name and the applicable docket number. The relevant PTC docket number for this host railroad is Docket No. FRA–2010–0034. For convenience, all active PTC dockets are hyperlinked on FRA's website at *https://railroads.dot.gov/research-development/program-areas/train-control/ptc/railroads-ptc-dockets.* All comments received will be posted without change to *https://www.regulations.gov;* this includes any personal information.

FOR FURTHER INFORMATION CONTACT: Gabe Neal, Staff Director, Signal, Train Control, and Crossings Division, telephone: 816–516–7168, email: *Gabe.Neal@dot.gov.*

SUPPLEMENTARY INFORMATION: In general, title 49 United States Code (U.S.C.) section 20157(h) requires FRA to certify that a host railroad's PTC system complies with title 49 Code of Federal Regulations (CFR) part 236, subpart I, before the technology may be operated in revenue service. Before making certain changes to an FRA-certified PTC system or the associated FRA-approved PTCSP, a host railroad must submit, and obtain FRA's approval of, an RFA to its PTCSP under 49 CFR 236.1021.

Under 49 CFR 236.1021(e), FRA's regulations provide that FRA will publish a notice in the **Federal Register** and invite public comment in accordance with 49 CFR part 211, if an RFA includes a request for approval of a material modification of a signal or train control system. Accordingly, this notice informs the public that, on April 19, 2024, PATH submitted an RFA to its PTCSP for its Communication Based Train Control (CBTC), which seeks FRA's approval to deploy new software, including ''the release from Mid-A car function,'' and resolve known software issues identified through previous revenue service to improve CBTC system performance. That RFA is available in Docket No. FRA–2010–0034.

Interested parties are invited to comment on PATH's RFA to its PTCSP by submitting written comments or data. During FRA's review of this railroad's RFA, FRA will consider any comments or data submitted within the timeline specified in this notice and to the extent practicable, without delaying implementation of valuable or necessary modifications to a PTC system. *See* 49 CFR 236.1021; *see also* 49 CFR 236.1011(e). Under 49 CFR 236.1021, FRA maintains the authority to approve, approve with conditions, or deny a railroad's RFA to its PTCSP at FRA's sole discretion.

Privacy Act Notice

In accordance with 49 CFR 211.3, FRA solicits comments from the public to better inform its decisions. DOT posts these comments, without edit, including any personal information the commenter provides, to *https://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.transportation.gov/privacy.* See *https://www.regulations.gov/privacy-notice* for the privacy notice of *regulations.gov*. To facilitate comment tracking, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. If you wish to provide comments containing proprietary or confidential information, please contact FRA for alternate submission instructions.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

Extended Application Period; Solicitation of Application for the Award of One Tanker Security Program Operating Agreement

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Notice of application period for the Tanker Security Program (TSP).

SUMMARY: On March 1, 2024, the Maritime Administration published a notice in the **Federal Register** providing how to apply to MARAD's Tanker Security Program (TSP). By this follow-on notice, MARAD is extending the application period for eligible candidates for one TSP Operating Agreement and is republishing the same information soliciting applications. The FY21 NDAA authorized the Secretary of Transportation to establish a fleet of active, commercially viable, militarily useful, privately owned product tank vessels of the United States. The fleet will meet national defense and other

security requirements and maintain a United States presence in international commercial shipping. The FY22 NDAA made minor adjustments related to the participation of long-term charters in the TSP. This request for applications provides, among other things, application criteria and a deadline for submitting applications for the enrollment of one vessel in the TSP.

DATES: Applications for enrollment must be received no later than May 30, 2024. Applications should be submitted to the address listed in the **ADDRESSES** section below.

ADDRESSES: Applications may be submitted electronically to *sealiftsupport@dot.gov* or in hard copy to the Tanker Security Program, Maritime Administration, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590. Application forms are available upon request or may be downloaded from MARAD's website.

FOR FURTHER INFORMATION CONTACT: David Hatcher, Director, Office of Sealift Support, Maritime Administration, Telephone (202) 366–0688. For legal questions, call Joseph Click, Office of Chief Counsel, Division of Maritime Programs, Maritime Administration, (202) 366–5882.

SUPPLEMENTARY INFORMATION: Section 53402(a) of Title 46, United States Code, requires that the Secretary of Transportation (Secretary), in consultation with the Secretary of Defense (SecDef), establish a fleet of active, commercially viable, militarily useful, privately-owned product tank vessels to meet national defense and other security requirements. The TSP will provide a stipend to tanker operators of U.S.-flagged vessels that meet certain qualifications.

Congress appropriated $60,000,000 for the TSP in the Consolidated Appropriations Act of 2022, Public Law 117–269, to remain available until expended. Authorized payments to participating operators are limited to $6 million per ship, per fiscal year and are subject to annual appropriations. Participating operators will be required to make their commercial transportation resources available upon request of the SecDef during times of war or national emergency.

Application Criteria

Section 53403(b)(2)(A) of Title 46, United States Code directs the Secretary in consultation with the SecDef to consider applicant vessel qualifications as they relate to 46 CFR 294.9 and give priority to applications based on the following criteria:

(1) Vessel capabilities, as established by SecDef;

(2) Applicant's record of vessel ownership and operation of tanker vessels; and

(3) Applicant's citizenship, with preference for Section 50501 Citizens.

Vessel Requirements

Acceptable vessels for a TSP Operating Agreement must meet the requirements of 46 U.S.C. 53402(b) and 46 CFR 294.9. The Commander, USTRANSCOM, has provided vessel suitability standards for eligible TSP vessels for use during the application selection process. The following suitability standards, consistent with the requirements of 46 U.S.C. 53402(b)(5), will apply to vessel applications:

- Medium Range (MR) tankers between 30,000–60,000 deadweight tons, with fuel cargo capacity of 230,000 barrels or greater.
- Deck space and size to accept installation of Consolidation (CONSOL) stations, two on each side for a total of four stations.
- Ability to accommodate up to an additional 12 crew for CONSOL, security, and communication crew augmentation.
- Communication facilities capable of integrating secure communications equipment.
- Does not engage in commerce or acquire any supplies or services if any proclamation, Executive order, or statute administered by Office of Foreign Assets Control (OFAC), or if OFAC's implementing regulations at 31 CFR Chapter V, would prohibit such a transaction by a person subject to the jurisdiction of the United States, except as authorized by the OFAC in the Department of the Treasury.
- Operate in the Indo-Pacific region.
- Maximum draft of no more than 44 feet. Preference will be given to vessels that can transport the most fuel at the shallowest draft.
- Sustained service speed of at least 14 knots, with higher speeds preferred.
- Carry only clean refined products.
- Capable of carrying more than two separated grades of refined petroleum products with double valve protection between tanks. Additionally, the vessel must meet the standards of 46 U.S.C. 53401(4).

National Security Requirements

The applicant chosen to receive a TSP Operating Agreement will be required to enter into an Emergency Preparedness Agreement (EPA) under 46 U.S.C. 53407, or such other agreement as may be approved by the Secretaries. The current EPA approved by the Secretary and SecDef is the Voluntary Tanker Agreement (VTA), publicly available for review at 87 FR 67119 (November 7, 2022).

Documentation

A vessel chosen to receive the TSP Operating Agreement must be documented as a U.S.-flag vessel under 46 U.S.C. chapter 121 to operate under the Operating Agreement. An applicant proposing a vessel registered under the laws of a foreign country at the time of application must demonstrate the vessel owner's intent to have the vessel documented under United States law and must demonstrate that the vessel is U.S. registered by the time the applicant enters into a TSP Operating Agreement for the vessel. Proof of U.S. Coast Guard vessel documentation and inspection and all relevant charter and management agreements for a chosen vessel must be approved by MARAD before the vessel will be eligible to operate under a TSP Operating Agreement and receive TSP payments.

Vessel Operation

A vessel selected for award of a TSP Operating Agreement must be operated in foreign commerce, in mixed foreign commerce and domestic trade of the United States permitted under a registry endorsement issued under 46 U.S.C. 12111, or between U.S. ports and those points identified in 46 U.S.C. 55101(b), or in foreign-to-foreign commerce, and must not otherwise operate in the coastwise trade of the United States. Further, in accordance with the FY22 NDAA, no vessel may operate under a TSP Operating Agreement while it is also operating under charter to the United States Government for a period that, together with options, exceeds 180 continuous days.

Protection of Confidential Commercial or Financial Information

If the application includes information that the applicant considers to be a trade secret or confidential commercial or financial information, the applicant should do the following: (1) Note on the front cover that the submission ''Contains Confidential Commercial or Financial Information (CCFI)''; (2) mark each affected page ''CCFI''; and (3) highlight or otherwise denote the CCFI portions. MARAD will protect such information from disclosure to the extent allowed under applicable law. In the event MARAD receives a Freedom of Information Act (FOIA) request for the information, procedures described in the Department's FOIA regulation at 49 CFR

7.29 will be followed. Only information that is ultimately determined to be confidential under that procedure will be exempt from disclosure under FOIA.

Award of Operating Agreements

MARAD will make every effort to expedite the review of applications and an award of a TSP Operating Agreement. MARAD, however, does not guarantee the award of an TSP Operating Agreement in response to applications submitted under this Notice. If no awards are made, or an application is not selected for an award, the applicant will be provided with a written reason why the application was denied, consistent with the requirements of 46 U.S.C. 53403.

(Authority: 46 U.S.C. chapter 534, 49 CFR 1.92 and 1.93, 46 CFR 294)

By order of the Maritime Administrator.

T. Mitchell Hudson, Jr.

Secretary, Maritime Administration.

BILLING CODE 4910–81–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities: Information Collection Renewal; Submission for OMB Review; Uniform Interagency Transfer Agent Registration and Deregistration Forms

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995 (PRA). In accordance with the requirements of the PRA, the OCC may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The OCC is soliciting comment concerning the renewal of its information collection titled, ''Uniform Interagency Transfer Agent Registration and Deregistration Forms.'' The OCC also is giving notice that it has sent the collection to OMB for review.

DATES: Comments must be received by May 30, 2024.

ADDRESSES: Commenters are encouraged to submit comments by email, if possible. You may submit comments by any of the following methods:

- *Email: prainfo@occ.treas.gov.*
- *Mail:* Chief Counsel's Office, Attention: Comment Processing, Office of the Comptroller of the Currency, Attention: 1557–0124, 400 7th Street SW, Suite 3E–218, Washington, DC 20219.
- *Hand Delivery/Courier:* 400 7th Street SW, Suite 3E–218, Washington, DC 20219.
- *Fax:* (571) 293–4835.

Instructions: You must include ''OCC'' as the agency name and ''1557–0124'' in your comment. In general, the OCC will publish comments on *www.reginfo.gov* without change, including any business or personal information provided, such as name and address information, email addresses, or phone numbers. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

Written comments and recommendations for the proposed information collection should also be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* You can find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

You may review comments and other related materials that pertain to this information collection following the close of the 30-day comment period for this notice by the method set forth in the next bullet.

- *Viewing Comments Electronically:* Go to *www.reginfo.gov.* Hover over the ''Information Collection Review'' tab and click on ''Information Collection Review'' from the drop-down menu. From the ''Currently under Review'' drop-down menu, select ''Department of Treasury'' and then click ''submit.'' This information collection can be located by searching OMB control number ''1557–0124'' or ''Uniform Interagency Transfer Agent Registration and Deregistration Forms.'' Upon finding the appropriate information collection, click on the related ''ICR Reference Number.'' On the next screen, select ''View Supporting Statement and Other Documents'' and then click on the link to any comment listed at the bottom of the screen.
- For assistance in navigating *www.reginfo.gov,* please contact the Regulatory Information Service Center at (202) 482–7340.

FOR FURTHER INFORMATION CONTACT: Shaquita Merritt, Clearance Officer, (202) 649–5490, Chief Counsel's Office, Office of the Comptroller of the Currency, 400 7th Street SW, Washington, DC 20219. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501 *et seq.*), Federal agencies must obtain approval from the OMB for each collection of information that they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. The OCC asks the OMB to extend its approval of the collection in this notice.

Title: Uniform Interagency Transfer Agent Registration and Deregistration Forms.

Form Numbers: Form TA–1 & TA–W.

Estimated Frequency of Response: On occasion.

Affected Public: National banks and their subsidiaries, Federal savings associations and their subsidiaries.

OMB Control No.: 1557–0124.

Type of Review: Regular.

Form TA–1

Estimated Number of Respondents: Registrations: 1; Amendments: 17.

Estimated Average Time per Response: Registrations: 1.25 hours; Amendments: 10 minutes.

Estimated Total Annual Burden: 4 hours.

Form TA–W

Estimated Number of Respondents: Deregistrations: 5.

Estimated Average Time per Response: Deregistrations: 30 minutes.

Estimated Total Annual Burden: 2.5 hours.

Section 17A(c) of the Securities Exchange Act of 1934 (the Act) requires all transfer agents for qualifying securities registered under section 12 of the Act, as well as for securities that would be required to be registered except for the exemption from registration provided by section 12(g)(2)(B) or section 12(g)(2)(G), to file with the appropriate regulatory agency (ARA) an application for registration in such form and containing such information and documents as the ARA may prescribe as necessary or appropriate in furtherance of the purposes of this section.[1] In general, an entity performing transfer agent

[1] 15 U.S.C. 78q–1(c).

functions for a qualifying security is required to register with its ARA. The OCC's regulations at 12 CFR 9.20 implement these provisions of the Act.

To accomplish the registration of transfer agents, Form TA–1 was developed in 1975 as an interagency effort by the Securities and Exchange Commission (SEC) and the Federal banking agencies (the OCC, the Board of Governors of the Federal Reserve System, and the Federal Deposit Insurance Corporation). The agencies primarily use the data collected on Form TA–1 to determine whether an application for registration should be approved, denied, accelerated, or postponed, and they use the data in connection with their supervisory responsibilities. In addition, when a national bank or Federal savings association no longer acts as a transfer agent for qualifying securities or when the national bank or Federal savings association is no longer supervised by the OCC, *i.e.,* liquidates or converts to another form of financial institution, the national bank or Federal savings association must file Form TA–W with the OCC requesting withdrawal from registration as a transfer agent.

Forms TA–1 and TA–W are mandatory, and their collection is authorized by sections 17A(c), 17(a)(3), and 23(a)(1) of the Act, as amended (15 U.S.C. 78q–1(c), 78q(a)(3), and 78w(a)(1)). Additionally, section 3(a)(34)(B)(i) of the Act (15 U.S.C. 78c(a)(34)(B)(i)) provides that the OCC is the ARA in the case of a national banks and Federal savings associations and subsidiaries of such institutions. The registrations are public filings and are not considered confidential. The OCC needs the information contained in this collection to fulfill its statutory responsibilities. Section 17A(c)(2) of the Act (15 U.S.C. 78q–1(c)(2)), as amended, provides that all those authorized to transfer securities registered under section 12 of the Act (transfer agents) shall register by filing with the ARA an application for registration in such form and containing such information and documents as such ARA may prescribe to be necessary or appropriate in furtherance of the purposes of this section.

Comments: On February 12, 2024, the OCC published a 60-day notice for this information collection, 89 FR 9908. There were no comments received.

Comments continue to be invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Patrick T. Tierney,

Assistant Director, Office of the Comptroller of the Currency.

BILLING CODE 4810–33–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Actions

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of ten entities, three individuals, and five vessels that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons and vessels are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: See **SUPPLEMENTARY INFORMATION** section for applicable date(s).

FOR FURTHER INFORMATION CONTACT: OFAC: Bradley Smith, Director, tel.: 202–622–2490; Associate Director for Global Targeting, tel.: 202–622–2420; Assistant Director for Licensing, tel.: 202–622–2480; Assistant Director for Regulatory Affairs, tel.: 202–622–4855; or Assistant Director for Compliance, tel.: 202–622–2490.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website (*https://www.treasury.gov/ofac*).

Notice of OFAC Action(s)

On April 25, 2024, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons and vessels are blocked under the relevant sanctions authority listed below.

BILLING CODE 4810–AL–P

Individuals

1. ABDULAHI FARD, Hojat (Arabic: حجت عبدالهی فرد) (a.k.a. ABDOLLAHI FARD, Hojjat; a.k.a. ABDOLLAHIFARD, Hojat), Tehran, Iran; DOB 22 Dec 1964; nationality Iran; Gender Male; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886; National ID No. 4072184535 (Iran) (individual) [SDGT] [IFSR] [RUSSIA-EO14024] (Linked To: SAHARA THUNDER).

Dated: April 25, 2024.

Bradley T. Smith,

Director, Office of Foreign Assets Control, U.S. Department of the Treasury.

[FR Doc. 2024–09255 Filed 4–29–24; 8:45 am]

BILLING CODE 4810–AL–C

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Publication of Nonconventional Source Production Credit Reference Price for Calendar Year 2023

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice.

SUMMARY: Publication of the reference price for the nonconventional source production credit for calendar year 2023.

FOR FURTHER INFORMATION CONTACT: Alan Tilley, CC:PSI:6, Internal Revenue Service, 1111 Constitution Avenue NW, Washington, DC 20224, Telephone Number (202) 317–6853 (not a toll-free number).

SUPPLEMENTARY INFORMATION: The credit period for the nonconventional source production credit ended on December 31, 2013 for facilities producing coke or coke gas (other than from petroleum based products). However, the reference price continues to apply in determining the amount of the enhanced oil recovery credit under section 43 of title 26 of the U.S.C., the marginal well production credit under section 45I of title 26 of the U.S.C., and the applicable percentage under section 613A of title 26 of the U.S.C. to be used in determining percentage depletion in the case of oil and natural gas produced from marginal properties.

The reference price under section 45K(d)(2)(C) of title 26 of the U.S.C. for calendar year 2023 applies for purposes of sections 43, 45I, and 613A for taxable year 2024.

Reference Price: The reference price under section 45K(d)(2)(C) for calendar year 2023 is $76.10.

Christopher T. Kelley,

Special Counsel (Passthroughs and Special Industries).

Internal Revenue Service

Quarterly Publication of Individuals, Who Have Chosen To Expatriate

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice.

This notice is provided in accordance with IRC section 6039G of the Health Insurance Portability and Accountability Act (HIPAA) of 1996, as amended. This listing contains the name of each individual losing United States citizenship (within the meaning of section 877(a) or 877A) with respect to whom the Secretary received information during the quarter ending March 31, 2024. For purposes of this listing, long-term residents, as defined in section 877(e)(2), are treated as if they were citizens of the United States who lost citizenship.

DEPARTMENT OF VETERANS AFFAIRS

Department of Veterans Affairs Voluntary Service National Advisory Committee, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. ch. 10, that the VA Voluntary Service National Advisory Committee (Committee) will meet May 14–16, 2024 at the Hyatt Regency St. Louis At The Arch located at 315 Chestnut Street, St. Louis, Missouri 63102. The meeting sessions will begin and end as follows:

Meeting date(s)	Meeting time(s)
Tuesday, May 14, 2024 ..	8:30 a.m. to 7:30 p.m. Central Time (CT).
Wednesday, May 15, 2024.	8:30 a.m. to 5:00 p.m. CT.
Thursday, May 16, 2024	8:30 a.m. to 5:00 p.m. CT.

The meeting sessions are open to the public.

The Committee, comprised of 56 major Veteran, civic, and service organizations, advises the Secretary, through the Under Secretary for Health, on the coordination and promotion of volunteer activities and strategic partnerships within VA health care facilities, in the community, and on matters related to volunteerism and charitable giving.

Agenda topics will include the Committee goals and objectives; review of minutes from the April 26–28, 2023 meeting; an update on VA Center for Development and Civic Engagement (CDCE) activities; Veterans Health Administration (VHA) update; Federal Advisory Committee Act training provided by the VA Advisory Committee Management Office; subcommittee reports; review of standard operating procedures; assessment of member organization data; embracing whole health; patient advocacy; innovation for optimal patient outcomes; partnering with Veterans Canteen Service; cross committee collaboration among Federal advisory committees; extending programming into communities; equity focused implementation mapping; VHA's journey to high reliability; recognition of outstanding programs and individuals; and any new business.

The public may engage the Committee in writing or through oral presentation. To participate orally, please contact Sabrina C. Clark, Ph.D., Designated Federal Officer, VA Center for Development and Civic Engagement (15CDCE), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, or email at *Sabrina.Clark@va.gov.* Any member of the public wishing to attend the meeting or seeking additional information should contact Dr. Clark at 202–536–8603.

Dated: April 25, 2024.

Jelessa M. Burney,

Federal Advisory Committee Management Officer.

DEPARTMENT OF VETERANS AFFAIRS

Advisory Committee on Structural Safety of Department of Veterans Affairs Facilities, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under Federal Advisory Committee Act, 5 U.S.C. Ch. 10, that a meeting of the Advisory Committee on Structural Safety of Department of Veterans Affairs Facilities will be held on May 21–22, 2024. The meeting sessions will take place at Room 4E.400, 425 I Street NW, Washington, DC 20001. The meeting sessions will begin and end as follows:

Dates	Times	Open session
May 21, 2024	9:00 a.m. to 5:00 p.m. EST	Yes.
May 22, 2024	9:00 a.m. to 12:00 p.m. EST	Yes.

The meeting sessions are open to the public.

The purpose of the Committee is to advise the Secretary of Veterans Affairs on matters of structural safety in the construction and remodeling of VA facilities and to recommend standards for use by VA in the construction and alteration of its facilities.

The meeting will be hybrid, held in-person and virtual, and the Committee will receive appropriate briefings and presentations on current seismic, natural hazards, and fire safety issues that are particularly relevant to facilities owned and leased by the Department. The Committee will also discuss appropriate structural and fire safety recommendations for inclusion in VA's construction standards.

The public may engage the Committee in writing or through oral presentation. To participate orally, please contact Donald Myers, Director, Facilities Standards Service, Office of Construction & Facilities Management (003C2B), Department of Veterans Affairs, at *donald.myers@va.gov* or at 202–632–5388. In the communication, writers must identify themselves and state the organization, association, or person(s) they represent. For any members of the public that wish to attend virtually, they may use the Webex link or call in with the phone number and access code below:

May 21: https://veteransaffairs.webex.com/veteransaffairs/j.php?MTID=mf0ecb43ce5beda7d12db46f564cf9e88, Meeting number (access code): 2820 061 6231, Meeting password: cM2iGiec@43, or to join by phone (audio only): +14043971596,,28200616231## or +12122313802,,28200616231##.

May 22: https://veteransaffairs.webex.com/veteransaffairs/j.php?MTID=m1e8ddc6e6119fbaed6ce9fc75ac2d934, Meeting number (access code): 2824 298 3443, Meeting password: MNg5A8EEZ$2, or to join by phone (audio only): +14043971596,,28242983443## or +12122313802,,28242983443##.

Because the meeting is being held in a government building, a photo I.D. must be presented at the Guard's Desk as a part of the screening process. Due to an increase in security protocols, you should allow an additional 30 minutes before the meeting begins. Those seeking additional information or wishing to attend should contact Mr. Myers at the email address noted above or via phone at 202–632–5388.

Dated: April 25, 2024.

Jelessa M. Burney,

Federal Advisory Committee Management Officer.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0079]

Agency Information Collection Activity: Employment Questionnaire

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before July 1, 2024.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0079'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0079'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: 38 U.S.C. 501, 38 U.S.C. 5317, 38 CFR 3.362 and 3.343, 38 CFR 4.16.

Title: Employment Questionnaire (VA Form 21–4140).

OMB Control Number: 2900–0079.

Type of Review: Revision of a currently approved collection.

Abstract: VA Forms 21–4140 is used to gather the necessary information to determine continued entitlement to individual unemployability. 38 CFR 3.652 provides that recipients are required to certify, when requested, that the eligibility factors which established entitlement to the benefit being paid continue to exist. Individual unemployability is awarded based on a veteran's inability to be gainfully employed due to service-connected disabilities, and entitlement may be terminated if a veteran begins working. Without information about recipients' employment, VA would not be able to determine continued entitlement to individual unemployability, and overpayments would result. No changes have been made to this form. The respondent burden has increased due to the estimated number of receivables averaged over the past year.

Affected Public: Individual or households.

Estimated Annual Burden: 285 hours.

Estimated Average Burden per Respondent: 5 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 3,422 per year.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

Supplemental Nutrition Assistance Program: Program Purpose and Work Requirement Provisions of the Fiscal Responsibility Act of 2023; Proposed Rule

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 271 and 273

[FNS 2023–0058]

RIN 0584–AF01

Supplemental Nutrition Assistance Program: Program Purpose and Work Requirement Provisions of the Fiscal Responsibility Act of 2023

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the Supplemental Nutrition Assistance Program (SNAP) regulations to incorporate three provisions of the Fiscal Responsibility Act of 2023 by adding to the program purpose language assisting low-income adults in obtaining employment and increasing their earnings; updating and defining the exceptions from the able-bodied adults without dependents (ABAWD) time limit; and adjusting the number of discretionary exemptions available to State agencies each year. This proposed rule would also amend the regulations to clarify procedures for how and when State agencies must screen for exceptions to the time limit and clarify the verification requirements.

DATES: Written comments must be received on or before May 30, 2024 to be assured of consideration.

Docket: Go to the Federal eRulemaking Portal at *https://www.regulations.gov* for access to the rulemaking docket, including any background documents and the plain-language summary of the proposed rule of not more than 100 words in length required by the Providing Accountability Through Transparency Act of 2023.

ADDRESSES: The Food and Nutrition Service, USDA, invites interested persons to submit written comments on this proposed rule. Comments may be submitted in writing by one of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Send comments to Food and Nutrition Service, P.O. Box 9233, Reston, Virginia 20195. Email: *SNAPCPBRules@usda.gov.* Phone: (703) 305–2022.
- *Website:* Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *E-Mail:* Send comments to *SNAPCPBRules@usda.gov.* Include Docket ID Number [FNS–2023–0058], ''Supplemental Nutrition Assistance Program: Program Purpose and Work Requirement Provisions of the Fiscal Responsibility Act of 2023'' in the subject line of the message.
- All written comments submitted in response to this proposed rule and regulatory impact analysis will be included in the record and will be made available to the public. Please be advised that the substance of the comments and the identity of the individuals or entities submitting the comments will be subject to public disclosure. FNS will make the written comments publicly available on the internet via *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Catrina Kamau, Chief, Certification Policy Branch, Program Development Division, Food and Nutrition Service, 1320 Braddock Place, Alexandria, Virginia 22314. Email: *SNAPCPBRules@usda.gov.* Phone: (703) 305–2022.

I. Background

The Food and Nutrition Act of 2008 (the Act), as amended, establishes national eligibility standards for the Supplemental Nutrition Assistance Program (SNAP), including work requirements for certain individuals. The first of these requirements, referred to as the general work requirements, requires individuals to register for work; accept an offer of suitable employment; not voluntarily quit or reduce hours of employment below 30 hours per week, without good cause; and participate in workfare or SNAP Employment and Training (SNAP E&T) if required by the State agency. Most SNAP participants are exempt from the general work requirements because they are older adults, have disabilities, or are children, or meet another exemption from the general work requirements listed in the Act.

Individuals who are not exempt from the general work requirements may also be subject to an additional time-limit work requirement. The Act limits these individuals, referred to as able-bodied adults without dependents (ABAWDs) or time-limited participants, to receiving SNAP benefits for three months in a 36-month period unless they are meeting the work requirement, live in an area where the time limit is waived due to a lack of sufficient jobs or a high rate of unemployment, or are otherwise exempt. This is sometimes referred to as the ABAWD time limit. Individuals can continue receiving SNAP beyond the three-month time limit by working, participating in a qualifying work program, or any combination of the two, for at least 20 hours a week (averaged monthly to 80 hours a month). Individuals can also meet the time limit by participating in and complying with workfare for the number of hours assigned (equal to the result obtained by dividing a household's SNAP allotment by the higher of the applicable Federal or State minimum wage). For the purposes of the time limit, working includes unpaid or volunteer work that is verified by the State agency. These requirements are sometimes referred to as the ABAWD work requirement. For the purposes of the proposed rule, the Department will use the term ''time limit'' to refer to both the ABAWD work requirement and time limit, as this phrasing more accurately describes the requirements applied to time-limited participants.

The Act provides exceptions from the time limit based on certain individual circumstances, such as age, pregnancy, or meeting an exemption from the general work requirements. Individuals who meet an exception are not subject to the time limit. The Act also allows for waivers of the time limit in areas with an unemployment rate over 10 percent or an insufficient number of jobs to provide employment for individuals. Individuals residing in waived areas are not required to meet the time limit. Lastly, the Act also establishes an annual allotment of discretionary exemptions that State agencies may use to extend eligibility for a time-limited participant who is not meeting the requirement. Each discretionary exemption can extend eligibility for one participant for one month and there is no limit on the number of discretionary exemptions a single participant can receive.

Sec. 311 through 313 of the Fiscal Responsibility Act (FRA) of 2023 (Pub. L. 118–5) amended the Act, revising exceptions from the time limit and the allotment of discretionary exemptions, as well as the program purpose. Based on these changes, the Department is proposing to amend the regulations to reflect the requirements of the FRA.

Sec. 314 of the FRA also required the Department to publicize all available

State requests for waivers authorized by Sec. 6(o)(4)(A) of the Act, including supporting data, and all Department approvals of waivers within 30 days of enactment. The Department complied with this requirement by the statutory deadline and is not proposing rulemaking relating to this provision.[1]

The Department issued multiple memoranda for implementing the FRA changes. On June 30, 2023, the Department issued the initial implementation memorandum, ''Implementing SNAP Provisions in the Fiscal Responsibility Act of 2023'' which provided definitions for the new exceptions, detailed when and how State agencies must apply the changes to the exception criteria, and clarified the changes to discretionary exemptions. On July 27, 2023, the Department issued a Question-and-Answer memorandum, ''SNAP Provisions of the Fiscal Responsibility Act of 2023—Questions & Answers #1,'' which answered questions from State agencies and advocates to further clarify how State agencies should implement the FRA provisions. On August 25, 2023, the Department issued a second Question-and-Answer memorandum, ''SNAP Provisions of the Fiscal Responsibility Act of 2023—Questions & Answers #2,'' which further answered questions from State agencies and advocates on how to implement the FRA provisions.

II. Discussion of Rule's Provisions

7 CFR 271.1: Program Purpose

The Act provides that the purpose of SNAP is to safeguard the health and well-being of the Nation's population by raising levels of nutrition among low-income households to promote the general welfare. Sec. 313 of the FRA amends Sec. 2 of the Act and adds language to the purpose stating the program also assists low-income adults in obtaining employment and increasing their earnings. Specifically, the new language is: ''That program includes as a purpose to assist low-income adults in obtaining employment and increasing their earnings. Such employment and earnings, along with program benefits, will permit low-income households to obtain a more nutritious diet through normal channels of trade by increasing food purchasing power for all eligible households who apply for participation.'' This language recognizes that the program has long had an employment and training program component and reflects the work by the Department spanning the last few decades to invest in effective and evidence-based job training aligned with State workforce programs designed to increase opportunity and earnings through skills-based training. Program rules at 7 CFR 271.1(a) incorporate this purpose statement, excerpting the language included at Sec. 2 of the Act. The Department proposes to revise 7 CFR 271.1(a) to reflect the purpose language added by the FRA.

7 CFR 273.24(c): Exceptions From the Time Limit

Sec. 6(o)(3) of the Act provides exceptions from the time limit for certain individuals, including, but not limited to, individuals under 18 years of age, individuals who are pregnant, or individuals who are exempt from the general work requirements. If an individual meets one of the exceptions, they are not subject to the time limit and are eligible to receive SNAP benefits for more than three months subject to other program rules. Throughout this proposed rule, ''exceptions from the time limit'' refers to the list of exception criteria listed in Sec. 6(o)(3) of the Act and program rules at 7 CFR 273.24(c) that determine which individuals are not subject to the time limit, whereas ''exemptions from the general work requirements'' refers to the list of criteria in Sec. 6(d)(2) of the Act and 7 CFR 273.7(b) that exempts individuals from needing to fulfil the general work requirements.

Age-Based Exceptions

Sec. 311 of the FRA amends Sec. 6(o)(3)(A) of the Act to adjust the age-based exception from the time limit. This change gradually increases the upper age limit of this exception as follows: by September 1, 2023, increases from 50 to 51 years of age or older; starting October 1, 2023, increases from 51 to 53 years of age or older; and starting October 1, 2024, increases from 53 to 55 years of age or older. The FRA also prescribed that these changes to the age-based exception sunset on October 1, 2030, when the upper age limit will return to 50 years of age or older. The Department proposes to capture this sunset at 7 CFR 273.24(c)(10).

Prior to the FRA, the Act excepted individuals from the time limit if they are under 18 years of age or 50 years of age or older. This exception is captured at 7 CFR 273.24(c)(1). The Department proposes to amend this paragraph to increase the upper age limit to 55 years of age or older. Since State agencies will have implemented the last age increase by the anticipated publication of the final rule, the Department proposes to only amend the regulations to reflect the final age increase to 55 or older in this rulemaking.

New Exceptions

Sec. 311 of the FRA amends Sec. 6(o)(3) of the Act to add three new exceptions from the time limit. This change excepts individuals experiencing homelessness, veterans, and individuals who are 24 years of age or younger and in foster care on their 18th birthday (or higher age if the State offers extended foster care to a higher age). The FRA required State agencies to implement and apply these new exceptions by September 1, 2023. As with the changes to age-based exceptions, these new exceptions cease to have effect on October 1, 2030. The Department proposes to capture this sunset at 7 CFR 273.24(c)(10).

Prior to the FRA, the Act included existing exceptions from the time limit for individuals who are unable to work due a physical or mental limitation, are pregnant, are responsible for a dependent child, or are not subject to the general work requirements. These existing exceptions are unchanged by the FRA and captured at 7 CFR 273.24(c)(1) through (6). The Department proposes to add to the existing list the new exceptions created by the FRA for individuals experiencing homelessness, veterans, and individuals who are 24 years of age or younger and in foster care on their 18th birthday (or higher age if the State offers extended foster care to a higher age). These new exceptions are further defined in the following sections.

Individuals Experiencing Homelessness

Sec. 311 of the FRA creates an exception for a ''homeless individual''—individuals experiencing homelessness—from the time limit. To aid in implementation, the Department provided guidance to State agencies which referred State agencies to the program's longstanding definition of ''homeless individual'' at Sec. 3(l) of the Act: an individual who lacks a fixed and regular nighttime residence; or who has a primary nighttime residence that is a supervised publicly or privately operated shelter designed to provide temporary living accommodations (including a welfare hotel or congregate shelter), an institution that provides a temporary residence for individuals intended to be institutionalized, a temporary accommodation for not more than 90 days in the residence of another individual, or a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings.

[1] These waiver requests and responses are available at: *https://www.fns.usda.gov/snap/ABAWD/waivers.*

The Department proposes to include a reference to the definition for homeless individual at 7 CFR 271.2 at new paragraph 7 CFR 273.24(c)(7) for the purpose of this new exception.

The Department also proposes to update the definition of ''homeless individual'' provided at 7 CFR 271.2 to include individuals who will imminently lose their nighttime residence and will issue further sub-regulatory guidance on circumstances that may render an individual ''imminently homeless.'' This update reflects the Department's consideration that those who will imminently lose their primary nighttime residence are included in the Act's definition of a homeless individual, as a nighttime residence that will be imminently lost cannot reasonably be described as ''fixed and regular.'' It also presents an undue hardship on an individual to be subject to the time limit if that individual knows they will lose a fixed and regular nighttime residence in the near future. Individuals experiencing homelessness face greater difficulties in obtaining work due to unstable housing, transportation barriers, inconsistent access to hygiene materials or professional clothing, and other hardships related to homelessness.[2] [3] [4] Given these challenges, this proposed change is meant to encompass the diverse set of circumstances that can constitute homelessness.

Individuals do not need to meet the criteria in both paragraph (1) and (2) of 7 CFR 271.2 ''Homeless individual'' to be considered as experiencing homelessness for SNAP purposes. An individual may lack a fixed or regular nighttime residence and be considered homeless under paragraph (1), or the individual may have a nighttime residence that meets the criteria in paragraph (2), such as a supervised shelter, and be considered homeless under paragraph (2). Therefore, an individual who is considered homeless under paragraph (1) is not subject to the criteria in paragraph (2), including the time limitation for temporary housing. The Department believes these changes reflect the understanding of subject matter experts and housing and homeless organizations that work on homelessness issues and ensure that State agencies can recognize a wide range of unstably housed individuals as homeless.[5]

This proposal will amend the definition for all of SNAP, not only for purposes of the time limit. This will provide consistency throughout SNAP of the Department's updated understanding of ''homeless individual.'' The Department proposes clarifying this matter by amending the definition of ''homeless individual'' at 7 CFR 271.2.

Veterans

The FRA also updates the list of exceptions from the time limit to include veterans but does not provide a definition for or specify limits on who is considered a veteran. In FRA guidance, the Department used a definition of ''veteran'' established by Congress in Sec. 5126(f)(13)(F) of the James M. Inhofe National Defense Authorization Act for Fiscal Year 2023 (Public Law 117–263) for the purposes of a pilot program to combat food insecurity among veterans and their families. Under this statutory provision, a veteran is an individual who served in the United States Armed Forces (such as the Army, Marine Corps, Navy, Air Force, Space Force, Coast Guard, and National Guard), including an individual who served in a reserve component of the Armed Forces, and who was discharged or released therefrom, regardless of the conditions of such discharge or release.

Since the issuance of the guidance, the Department has determined that it is appropriate to include another group of individuals, defined under 38 CFR 3.7, who are considered veterans for purposes of receiving veterans' benefits: individuals who were commissioned officers of the Public Health Service, Environmental Scientific Services Administration, or the National Oceanic and Atmospheric Administration. These individuals are eligible for veterans' benefits, such as disability compensation, veterans' pensions, and educational benefits, because they are considered to have served in ''active military service'' under 38 CFR 3.7. However, this group of veterans was not included in the definition used in the implementation guidance. Including such commissioned officers in SNAP's definition ensures individuals who the VA considers veterans for VA benefits programs are eligible for the exception from the time limit.

Research shows that veterans, particularly older veterans who served between 1975 and 2001, have a 7.4 percent greater risk for food insecurity than non-veterans, adjusted for observable differences, and veterans were consistently less likely to be enrolled in SNAP.[6] [7] Food insecurity prevalence rates were also higher among disabled, unemployed, and women working-age veterans when compared to the national average for all working-age veterans.[8] Given the persistent and rising concern over food insecurity for veterans, it is critical to ensure the exception covers a broad range of veterans, including individuals with former military service who may not identify with the term ''veteran.'' The Department believes using this definition informed by the NDAA pilot and other veterans' benefits programs achieves that goal.

Therefore, the Department proposes to define veteran at 7 CFR 273.34(c)(8) as an individual who, regardless of the conditions of their discharge or release from, served in the United States Armed Forces (such as the Army, Marine Corps, Navy, Air Force, Space Force, Coast Guard, and National Guard), including an individual who served in a reserve component of the Armed Forces, or served as a commissioned officer of the Public Health Service, Environmental Scientific Services Administration, or the National Oceanic and Atmospheric Administration.

Individuals Who Were in Foster Care

Sec. 311 of the FRA also created an exception from the time limit for certain individuals previously in foster care, recognizing the particular challenges that individuals aging out of foster care face in obtaining stable employment. This exception applies to an individual

who is 24 years of age or younger and who was in foster care under the responsibility of a State on their 18th birthday or such higher age as the State has elected under Sec. 475(8)(B)(iii) of the Social Security Act. The Department notes that this definition does not require that an individual was in foster care in the State in which they are applying for or receiving SNAP benefits. The definition provided in the FRA is similar to that of the ''former foster care children'' eligibility group for Medicaid, as revised by the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act for individuals who turn 18 on or after January 1, 2023. Per section 1902(a)(10)(A)(i)(IX)(cc) of the Social Security Act and programs rules at 42 CFR 435.150, these individuals are eligible for Medicaid in this eligibility group if they are under age 26 and were in foster care under the responsibility of a State or Tribe upon attaining age 18 or such higher age as the State or such Tribe has elected for foster care assistance to end under section 475(8)(B)(iii) of the Social Security Act.

In implementing guidance, the Department clarified who may qualify for this exception, described below. The Department proposes to adopt these clarifications into the definition provided in regulations. In this guidance, the Department clarified that ''foster care under the responsibility of a State'' includes foster care programs run by Districts, Territories, or Indian Tribal Organizations.[9] The Department also clarified that the exception applies to individuals who are in foster care when they reach 18 years of age even if they elect to stay in foster care up to the State's maximum age, as well as individuals aged 18 to 24 who were in foster at the time they turned 18 years of age, even if the individual exits extended foster care before the maximum age. The Department also notes that individuals who are in foster care when they reach 18 years of age qualify for this exception regardless of their length of time in foster care or the reason for the individual's removal into foster care. Additionally, after consulting with the Department of Health and Human Services, the Department proposes to further clarify in the definition that ''foster care under the responsibility of a State'' also includes the Unaccompanied Refugee Minors Program.

These changes will help account for the variation in foster care and extended foster care operations across States. Further, the Department recognizes that individuals leaving foster care face particular barriers in obtaining suitable employment, including lower educational attainment, limited work history, and housing instability,[10] [11] and struggle with sustained employment and earnings more than their peers.[12] This definition will help to ensure these particularly vulnerable individuals are not subject to the time limit.

The Department proposes to amend the regulations at 7 CFR 273.24(c)(9) to include the revised exception definition provided in Sec. 311(a)(4) of the FRA and codify the foster care clarifications provided in the implementation guidance.

7 CFR 273.24(l): Verification of Exception Status

The FRA did not make any changes to how State agencies verify exceptions from the time limit. Program rules at 7 CFR 273.2(f) do not require State agencies to verify exception status unless the information is considered questionable. In FRA implementation guidance, the Department provided examples of verification State agencies could use if the State agency deems the information to be questionable based on the State agency's established criteria and requires further verification.[13] [14] [15] The Department reminds State agencies that program rules at 7 CFR 273.2(f)(2)(i) prohibit State agencies from setting guidelines for determining what is considered questionable information that would require verification based on race, religion, ethnic background, or national origin. The Department also reminds State agencies that the FRA provides populations exceptions in part because they are especially vulnerable and may be in unstable living situations. Placing additional and unnecessary burden on the applicants to provide verification may put these vulnerable individuals at risk. The Department encourages State agencies avoid setting guidelines for questionable information that would consider self-attestation questionable and require every individual who meets exception criteria to provide verification.

Program rules at 7 CFR 273.2(f)(5)(i) require State agencies to assist cooperating households in obtaining verification. Such assistance includes, but is not limited to, utilization of data sharing agreements with other State agencies and information received from other public assistance programs operated by the State agency. The Department proposes to clarify State agencies' responsibilities in obtaining verification of exception status, when questionable, by requiring State agencies to use all available information to verify exception status when questionable, before asking individuals to provide verification.

This proposal is based on several reasons. For example, State agencies' data sharing agreements provide additional resources to State agencies in the eligibility determination process, offering a less burdensome way to comply with the requirement to assist individuals in obtaining verification by reducing the amount of time and actions needed to verify information and minimizing the need to call contacts, send notices, and continuously re-touch a case. Further, these agreements can improve processes for screening for exceptions and proactively identify people who may be eligible for exceptions from the time limit. They also help streamline verification of exception status when the State agency determines the information is questionable by reducing the number of actions needed to verify information and decreasing time wait for the individual to provide sources of verification and for eligibility workers to verify the information. This may include agencies that support veterans

which may have information regarding an individual's prior service that can streamline verification of an individual's veteran status if the State agency finds it questionable. Similarly, State and Tribal IV–E agencies or State Medicaid agencies may have information on an individual's current or former placement in foster care that the SNAP State agency could use to verify an individual's status as a former foster youth. As a reminder, Section 475(5)(I) of the Social Security Act also requires child welfare agencies to provide any official documentation necessary to prove former foster care status to young people who have been in foster care for six or more months and exit foster care after attaining age 18. Likewise, State agencies' housing assistance programs or Continuums of Care may have information on an individual's housing status and eliminate the need for further verification to determine an individual's homelessness status and exception from the time limit. Through their participation in other programs, these vulnerable individuals have already demonstrated their status as homeless, disabled, pregnant, etc. to another program. The Department expects State agencies to avoid imposing a redundant burden on these individuals, which could impede their ability to claim an exception from the time limit, by using information available to the State agency.

Therefore, in the interest of improved efficiency and minimizing unnecessary burden on individuals, the Department proposes at 7 CFR 273.24(l) to require State agencies to assist individuals when requiring verification of exception status by using all information available to the State agency before requesting the individual provide sources of verification. The Department intends for State agencies to use existing information available in their eligibility system or through data sharing agreements. State agencies are not required to establish new data sharing agreements; however, the Department highly encourages State agencies to determine ways to collaborate with other State agencies, improving the coordination and information sharing across programs.

The Department recognizes that, when possible, State agencies likely use similar processes to support households in gathering other necessary verifications, however, it is proposing 7 CFR 273.24(l) in lieu of amending 7 CFR 273.2(f)(5)(i) for several reasons. Reducing barriers to identifying exceptions is especially important because of the impact that exception status and the time limit can have on an individual's SNAP eligibility. State agencies are more likely to already have access to information about household circumstances that except an individual from the time limit. As such, the Department is proposing this requirement at 7 CFR 273.24(l) and is not amending 7 CFR 273.2(f)(5)(i) to clarify that the requirement is specific to verification of exception status when questionable and is not intended to replace existing efforts State agencies employ to assist households in obtaining verification for other household circumstances.

7 CFR 271.2, 273.7(b)(3), and 273.24(k): Screening and Assigning Countable Months

Individuals subject to the time limit are a largely vulnerable population. An FNS study titled, ''The Impact of SNAP Able-Bodied Adults Without Dependents (ABAWD) Time Limit Reinstatement in Nine States,'' researched characteristics of individuals potentially subject to the time limit, meaning they are 18 to 49 and do not meet an exemption from the general work requirement, and do not live in a household with someone under the age of 18.[16] The study found that this population is less connected to the workforce and has higher rates of homelessness as well as mental and physical limitations, compared to other SNAP participants aged 18 to 49.

Sec. 6(o)(3) of the Act provides exceptions from the time limit to ensure certain individuals who face additional barriers to employment are not required to meet the more stringent time limits. Exceptions are provided for individuals based on certain circumstances, including those for individuals considered mentally or physically unfit for work, pregnant individuals, or those who are responsible for the care of a dependent child to name a few. As described earlier, following the passage of the FRA, individuals are also now excepted if they are experiencing homelessness, a veteran, or 24 years of age or younger who were in foster care on their 18th birthday (or higher age if the State offers extended foster care to a higher age).

In order to properly apply an exception to a case, State agencies must first evaluate individuals potentially subject to the time limit to determine if they are indeed subject to the time limit, or if they qualify for an exception. The Department refers to this process as ''screening.'' State agencies must perform a thorough screening to appropriately apply the time limit or an exception and to ensure only the appropriate individuals accrue countable months.[17] This proposed rule would address requirements for when this screening must occur and what steps State agencies must take prior to assigning countable months.

Screening at Initial and Recertification Application

The FRA required State agencies to apply the new exception criteria at initial application and recertification application. The Department issued guidance regarding requirements to screen for the new exceptions at initial and recertification application, consistent with the FRA and existing expectations for other exceptions from the time limit.[18] [19] [20]

The need to screen for ABAWD exceptions at initial application and recertification application is not new to State agencies—prior to the FRA, screening individuals at initial and recertification application for exceptions was necessary, as the Act provides that individuals must not be subject to the time limit if they meet one of the exceptions listed in Sec. 6(o)(3) of the Act. The Department has repeatedly emphasized the importance of screening for ABAWD exceptions at initial and recertification application through

[16] U.S. Department of Agriculture. Food and Nutrition Service. *The Impact of SNAP Able-Bodied Adults Without Dependents (ABAWD) Time Limit Reinstatement in Nine States* by Laura Wheaton and et al. Washington, DC, 2021. *https://www.fns.usda.gov/snap/impact-snap-able-bodied-adults-without-dependents-abawd-time-limit-reinstatement-nine.*

[17] A countable month is a month in which a person is receiving a full SNAP benefit allotment, is not meeting the time limit, and is not otherwise exempt (*i.e.,* the person is not meeting an exception from the time limit, is not living in an area covered by a waiver, is not receiving a discretionary exemption, does not have good cause for not meeting the work requirement, or is not in the month of notification from the State agency of a ''provider determination'' (from a SNAP E&T provider)).

guidance, including in the SNAP Able-Bodied Adults Without Dependents (ABAWD) Policy Guide.[21] While a screening requirement is not explicitly included in current regulations, State agencies must already have this screening process in place in order to effectuate the ABAWD provisions.

The Department is taking this opportunity to include clear language in the regulations that State agencies must screen for all exceptions from the time limit at initial and recertification application at new section 7 CFR 273.24(k). This will codify existing practices and clarify screening requirements and ensure compliance with the statutory exceptions. By adding this section to the regulations, the Department seeks to improve consistency in program operations and provide quality customer service in line with the December 13, 2021, Executive Order on *Transforming Federal Customer Experience and Service Delivery to Rebuild Trust in Government.*

Given the necessity of screening to properly administer exceptions, the Department is also proposing to include explicit language regarding the requirement for State agencies to screen for the exemptions from the general work requirements at certification and recertification at 7 CFR 273.7(b)(3), as State agencies must screen for both exemptions from the general work requirements and exceptions from the time limit to adequately determine if an individual should be subject to the time limit.[22] Individuals are not subject to the time limit if they meet an exemption from the general work requirements, as provided at Sec. 6(o)(3)(D) of the Act. This is an important first step in evaluating which, if any, work requirements apply to an individual. The proposed change would simply codify the need to determine if an individual is exempt from the general work requirements before registering the individual for work,[23] and promote further consistency in how exceptions are identified and work requirements policy is applied.

The Department also proposes to amend the definition of screening to reflect these changes. The provision currently only refers to determining if an individual should or should not be referred to E&T. Determining whether an individual should be referred to E&T is closely intertwined with determining whether the individual is subject to the general work requirement and ABAWD time limit. For example, a decision to refer an individual to E&T can only follow a determination that the individual is subject to the general work requirement. Similarly, whether an individual is subject to the time limit may affect the E&T referral decision. Therefore, the Department also proposes amending the definition of ''screening'' at 7 CFR 271.2 to include determining if an individual meets an exemption from the general work requirements listed in Sec. 6(d)(2) of the Act or an exception from the time limit listed in Sec. 6(o)(3) of the Act.

Screening and Applying Exceptions During the Certification Period

The FRA requires the new exceptions to be applied at initial application and recertification, however, questions arose during implementation about requirements for identifying exceptions during an individual's certification period. These questions reflected confusion among State agencies on how to comply with the FRA, the Act, and program rules. Some of the uncertainties raised include how States agencies account for individuals who appear to be newly subject to the time limit due to the changes in age-based exceptions, but the State agency has not screened those individuals to determine if they meet any exception. Since these individuals were not subject to the time limit at the time of their last certification, the State agency would likely not have any information on whether the individual meets another exception. Similarly, an individual subject to the time limit before the FRA could now be excepted as a veteran, however, the State agency may not know the individual is a veteran because the information is not collected in the SNAP application. In both scenarios for ongoing households, the State agency could not properly determine if the individual should be subject to the time limit.

The Department issued implementation guidance to address questions around the requirements for screening during the certification period.[24] [25] [26] This guidance detailed expectations of State agencies to apply the exceptions for ongoing households when the State agencies were able to identify such excepted households. However, there was no requirement for State agencies to evaluate households during their certification period for the purposes of identifying or applying an exception.

Program rules also do not establish a process during the certification period that would provide the information needed for the State agency to identify if an individual is subject to the time limit, or if they meet another exception from the time limit. Beyond new challenges in FRA implementation, State agencies face ongoing challenges in properly applying exceptions or subjecting individuals to the time limit when changes occur during the certification period. Further, the Department also recognizes it may be burdensome on both the individual and the State agency to require screening during the certification period when a change in exception status occurs. As such, the proposed rule would not require State agencies to screen during the certification period.

While the Department does not propose to require screening during the certification period, if a State agency learns about a change in exception status for an individual during the certification period, the State agency must act accordingly. A State agency could learn about the change from various sources such as household reports, data sharing or shared eligibility system arrangements with other programs, or voluntary screening undertaken by a State agency during a certification period.

If a State agency determines an individual newly meets an exception, the State agency must apply the exception at that time and not subject the individual to the time limit. If a State agency learns an individual has lost an exception, the State agency must screen to see if the individual qualifies for a different exception. If the individual qualifies for a different exception, the individual is not subject to the time limit. The Department is proposing this requirement to apply to new exceptions at 7 CFR 273.24(k)(1)(ii) to ensure State agencies are clear on their responsibilities as it relates to applying the time limit and assigning countable months and complying with Sec. 6(o)(3) of the Act and program rules at 7 CFR 273.24(b)(1).

Due to the complexities of screening during the certification period and the importance of not improperly subjecting individuals to the time limit, the Department is also clarifying that if the State agency has information that an individual's excepted status has changed, then the State agency cannot assign countable months until it has screened an individual for other exceptions and determined they are subject to the time limit. If the individual does not meet another exception, the State agency must begin applying countable months in accordance with program rules at 7 CFR 273.24(b)(1) and ensure individuals are properly notified of what work requirements they are required to meet in accordance with 7 CFR 273.7(c)(1)(ii) and (iii). The Department is outlining this requirement at 7 CFR 273.24(k)(1)(i) for changes during the certification period, prohibiting State agencies from assigning countable months until it has screened and determined an individual does not meet an exception from the time limit. This prohibition on assigning countable months also applies at initial and recertification application and is outlined at 7 CFR 273.24(k).

When an individual loses an exception during the certification period, this only informs the State agency that the individual no longer meets that particular exception. It does not provide sufficient information to determine if the individual should now be subject to the time limit, as the individual may meet another exception. This is especially true given the fluid nature of some of the exceptions, such as homelessness or pregnancy, which individuals may meet only temporarily. As such, the State agency must screen to determine if the individual meets another exception in order to know if the individual should be subject to the time limit and to comply with Sec. 6(o)(3) of the Act, which requires State agencies to only subject individuals who do not meet an exception to the time limit.

For example, the State agency may be aware an individual has turned 18 during the certification period and is no longer excepted for being under the age of 18. However, this individual may qualify for another exception, such as the exception for homeless individuals or the exception for individuals 24 years of age or younger and in foster care on their 18th birthday. The State agency must not assign countable months to this individual before the State agency has screened for other exceptions and determined no other exceptions apply, either during the certification period or at the next recertification.

In the case that a State agency attempts to screen during the certification period, but is unable to do so, the State agency must not penalize individuals for not responding, require the household to come into the office per program rules at 7 CFR 273.2(e)(1), or send a request for contact (RFC). RFCs may only be sent to resolve unclear information that meets the criteria outlined at 7 CFR 273.12(c)(3). Otherwise, the State agency would wait until the next recertification to screen the individual, and then at that time, either apply another exception or begin applying the time limit.

It is also possible that individuals may meet more than one exception from the time limit. When this occurs, the Department encourages State agencies to apply the exception that will have the longest impact, minimizing the need to rescreen an individual if they lose an exception and reducing burden on both the State agency and individuals. For example, if a State agency screens an individual and determines they are a veteran who is also experiencing homelessness, the Department recommends that the State agency apply the exception for veteran, avoiding the need to rescreen the individual if they no longer qualify for the exception for individuals experiencing homelessness since the individual's veteran status will not change. While the Department highly encourages this as a best practice, the Department recognizes not all State agency eligibility systems have the same capabilities and therefore, is not proposing this as a requirement.

7 CFR 273.24(g) and (h): Discretionary Exemptions

The Act provides State agencies the ability to extend eligibility for time-limited participants who are not meeting the time limit and do not live in an area with an ABAWD waiver. This may be done through use of a discretionary exemption, and each discretionary exemption can be used to exempt up to one individual for one month. As defined by law, each State agency's allotment of discretionary exemptions is calculated annually by the Department, based on the total number of time limited participants that were ineligible in the State due to the time limit in the preceding fiscal year, known as ''covered'' individuals.

Prior to the FRA, the Act instructed the Department to calculate discretionary exemptions such that the average monthly number of exemptions do not exceed 12 percent of the number of covered individuals in the State. Sec. 312 of the FRA amends Sec. 6(o)(6) of the Act and reduces the allotment of exemptions to not exceed 8 percent of covered individuals. The Department proposes conforming edits to 7 CFR 273.24(g)(3) to reduce the allotment to not exceed 8 percent of covered individuals in the State.

Current regulations at 7 CFR 273.24(h)(2)(i) also allow State agencies to carryover all unused discretionary exemptions into the next fiscal year (FY). Sec. 312 of the FRA further amends Sec. 6(o)(6) of the Act, prohibiting State agencies from accumulating unused exemptions for more than the current fiscal year and subsequent fiscal year during FY 2024 and beyond. During FY 2024, State agencies received their allotment of discretionary exemptions, which included their historical balance of unused exemptions. The prohibition on accumulating unused exemptions allows for the carryover of this historical balance only into the subsequent fiscal year (FY 2025). Then starting in FY 2026, State agencies will only carryover unused discretionary exemptions earned for the previous fiscal year, not including historical balance. As such, the Department is proposing conforming edits to 7 CFR 273.24(h)(2)(i) to limit carryover to only unused discretionary exemptions earned for the previous fiscal year starting in FY 2026.

Procedural Matters

Executive Orders 12866, 13563, and 14094

Executive Orders 12866, 13563, and 14094 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563

emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This proposed rulemaking has been determined to be significant under section 3(f)(1) of Executive Order 12866, as amended by Executive Order 14094, and was reviewed by the Office of Management and Budget in conformance with Executive Order 12866.

Regulatory Impact Analysis Summary

As required for all rules that have been designated as significant by the Office of Management and Budget, a Regulatory Impact Analysis (RIA) was developed for this proposed rule. It follows this rule as an Appendix. The following summarizes the conclusions of the regulatory impact analysis:

The Department estimates the total increase in federal transfers (SNAP benefit spending) associated with the provisions of this proposed rule to be approximately $2.8 billion over the nine years Fiscal Year (FY) 2023–FY 2031, averaging $306.5 million per year. Over the nine-year period FY 2023–FY 2031, federal costs (not including transfers) are estimated to total approximately $252.5 million, or an annual average of $28.1 million. Total State agency administrative expenses are also estimated to be approximately $252.5 million over the nine-year period, or an annual average of $28.1 million. Costs associated with administrative burden to individual SNAP participants are estimated to be approximately $322.0 million over the nine-year period, or an annual average of $35.8 million.

This proposed rule will primarily affect SNAP participants who are subject to the time limit, which the Department estimates to be, upon full implementation of the FRA's provisions in FY 2026, approximately 9.3 percent of SNAP participants, although far fewer will lose eligibility for SNAP. Hence, most SNAP participants will not be affected by this proposed rule. The estimated net impact of the proposed rule's change in the age-based exceptions and three new exceptions is a net increase in SNAP participation of about 54,000 individuals per year when fully implemented. In FY 2026, this includes 345,000 participants losing eligibility, 369,000 participants retaining eligibility, and about 30,000 new participants.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires Agencies to analyze the impact of rulemaking on small entities and consider alternatives that would minimize any significant impacts on a substantial number of small entities. Pursuant to that review, it has been certified that this rule would not have a significant impact on a substantial number of small entities. This proposed rule would not have an impact on small entities because the changes required by the regulations are directed toward State agencies operating SNAP programs.

Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as major rule as defined by 5 U.S.C. 804(2).

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local and tribal governments and the private sector. Under section 202 of the UMRA, the Department generally must prepare a written statement, including a cost benefit analysis, for proposed and final rules with ''Federal mandates'' that may result in expenditures by State, local or tribal governments, in the aggregate, or the private sector, of $100 million or more in any one year. When such a statement is needed for a rule, Section 205 of the UMRA generally requires the Department to identify and consider a reasonable number of regulatory alternatives and adopt the most cost effective or least burdensome alternative that achieves the objectives of the rule.

This proposed rule does not contain Federal mandates (under the regulatory provisions of Title II of the UMRA) for State, local and tribal governments or the private sector of $100 million or more in any one year. Thus, the rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Executive Order 12372

This Supplemental Nutrition Assistance Program is listed in the Catalog of Federal Domestic Assistance under Number 10.551 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 2 CFR chapter IV.) Since SNAP is State-administered, FNS has formal and informal discussions with State and local officials on an ongoing basis regarding program requirements and operations. This provides USDA with the opportunity to receive regular input from program administrators and contributes to the development of feasible program requirements. For example, SNAP participated in three webinars covering FRA implementation and responded to State agency questions and concerns over implementation. SNAP also is providing ongoing technical assistance with State agencies covering implementation of the FRA and work requirements more generally.

Federalism Summary Impact Statement

Executive Order 13132 requires Federal agencies to consider the impact of their regulatory actions on State and local governments. Where such actions have federalism implications, agencies are directed to provide a statement for inclusion in the preamble to the regulations describing the agency's considerations in terms of the three categories called for under Section (6)(b)(2)(B) of Executive Order 13132. The Department has considered the impact of this rule on State and local governments and has determined that this rule does not have federalism implications. Therefore, under section 6(b) of the Executive Order, a federalism summary is not required.

Executive Order 12988, Civil Justice Reform

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is intended to have preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions or which would otherwise impede its full and timely implementation. This rule is not intended to have retroactive effect unless so specified in the Effective Dates section of the final rule. Prior to any judicial challenge to the provisions of the final rule, all applicable administrative procedures must be exhausted.

Civil Rights Impact Analysis

FNS has reviewed the proposed rule, in accordance with Departmental Regulation 4300–004, ''Civil Rights Impact Analysis,'' to identify and address any major civil rights impacts the proposed rule might have on program participants on the basis of age, race, color, national origin, sex (including gender identity and sexual orientation), or disability. We believe that the provisions of the FRA and the requirements for verification and screening will have a potential impact on certain protected groups as it relates to SNAP work requirements. However, an adverse impact analysis could not be conducted due to data limitations for the potential impact on individuals based on race, ethnicity, gender, and age that may be subject to the time limit. We

also believe that the addition of the new ABAWD exceptions will provide greater and continuous access to SNAP benefits for SNAP applicants and participants. We find that the implementation of mitigation strategies and monitoring will lessen these potential impacts.

Executive Order 13175

Executive Order 13175 requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on policies that have Tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

The Department expects this proposed rule will impact tribes to a no greater or lesser degree than other applicant or eligible SNAP households. FNS provided an opportunity for consultation on March 15, 2024. The Tribes had minimal comments, but one Tribe raised two concerns. First, the Tribe described the challenges and burden that former foster care youth face in obtaining formal documentation needed to verify that they were in foster care, especially in rural areas. FNS appreciates these concerns and the proposed requirements in this rule are intended to reduce this burden on individuals by requiring the State agency to use information already available to verify exception status. Second, the Tribe raised concerns over the decrease in the allotment of discretionary exemptions from 12 to 8 percent of the ABAWD caseload. FNS recognizes this concern, however, the decrease in discretionary exemptions is a statutory provision of the FRA and therefore, cannot be changed by this rulemaking.

If a Tribe requests further consultation in the future, FNS will work with the Office of Tribal Relations to ensure meaningful consultation is provided.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 35; 5 CFR 1320) requires the Office of Management and Budget (OMB) approve all collections of information by a Federal agency before they can be implemented. Respondents are not required to respond to any collection of information unless it displays a current valid OMB control number. The agency is requesting a revision for OMB Control Number 0584–0479 for these new, existing, and changing provisions in this rule. These changes are contingent upon OMB approval under the Paperwork Reduction Act of 1995. Additionally, when the information collection requirements have been approved, FNS will publish a separate action in the **Federal Register** announcing OMB's approval.

Comments on this proposed rule must be received by May 30, 2024. Send comments to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for FNS, Washington, DC 20503. Please also send a copy of your comments to Catrina Kamau, Chief, Certification Policy Branch, 1320 Braddock Place, 5th Floor; Alexandria, Virginia 22314. For further information, or for copies of the information collection requirements, please contact Catrina Kamau indicated above.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this document will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Title: Supplemental Nutrition Assistance Program: Work Requirements and Screening.

OMB Number: 0584–0479.

Expiration Date: 2/28/2026.

Type of Request: Revision to an existing collection.

Abstract: This proposed rule would amend SNAP regulations to implement changes made by the Fiscal Responsibility Act (FRA) of 2023. Some of the proposed changes would modify current regulations resulting in an increase in the reporting burden for State agencies, while others will result in no change.

The FRA amended the exceptions from the time limit, increasing the upper limit of the age-based exception from 50 to 55 over two years and adding three new exceptions for homeless individuals, veterans, and individuals aging out of foster care. The changes to the age-based exception will result in an increase in the number of individuals subject to the time limit, while the new exceptions will result in a decrease. The Department estimates a net increase in the number of individuals subject to the time limit. As a result, the Department estimates an increase in burden for State agencies and individuals. The Department anticipates additional burden related to verification of work hours and countable months, issuance and review of the Consolidated Work Notice, and the review of the oral explanation of the work requirements for individuals newly subject to the time limit. The Department also anticipates additional burden related to the issuance and review of the Notice of Adverse Action for individuals newly subject to the time limit who reach three countable months and become ineligible. The Department is accounting for this net increase in individuals subject to the time limit and the resulting additional burden in this information collection.

The FRA amended the SNAP program purpose to include assisting low-income individuals in obtaining employment and earnings. The Department does not anticipate any burden related to this change. The FRA also reduced the annual allotment of discretionary exemptions and reduced carryover of unused exemptions. The Department does not estimate any change in burden related to reporting of discretionary exemptions, which is covered under OMB Control Number 0584–0594 (Food Programs Reporting System (FPRS); expiration date: 09/30/2026).

In addition to implementing the provisions of the FRA, this proposed rule would also establish regulations that require State agencies to screen individuals for exemptions from the general work requirements and exceptions from the time limit. Currently, State agencies are required to screen individuals for exemptions from the general work requirements and exceptions from the time limit at initial and recertification application. However, this requirement is not captured in regulations and the related burden not captured in any existing information collection. The Department is including new burden related to screening in this information collection, which is required to ensure State agencies apply ABAWD policy correctly.

This proposed rule would also amend regulations to require State agencies to use all available information to verify exception status, when questionable, before requiring individuals to provide verification. The Department does not

anticipate a change in the burden related to the verification of questionable information, which is covered under OMB Control Number 0584–0064 (SNAP Forms: Applications, Periodic Reporting, Notices; expiration date: 02/29/2024). The Department anticipates an increase in burden related to verification of questionable exception status, which will be offset by a decrease in burden related to the verification provision of this proposed rule.

The Department also anticipates start-up burden related to the statutory and regulatory changes. State agencies will need to update their eligibility systems and notices to include the new exceptions and changes to the age-based exception. State agencies will also need to update their policy manuals and documents with the changes to ABAWD eligibility and the screening requirements. Lastly, State agencies will need to develop and provide training on the new requirements to State agency staff.

These new requirements necessitate a revision to OMB Control Number 0584–0479 (Expiration Date: 02/28/2026). The Department is seeking a renewal of OMB Control Number 0584–0479 during the Final Rule phase. OMB Control Number 0584–0479 currently covers burden related to preparation and submission of ABAWD waivers. ABAWD waivers are submitted via the Waiver Information Management System (WIMS), and the burden for this submission which is covered under OMB Control Number 0584–0083 (Operating Guidelines, Forms, Waivers, Program and Budget Summary Statement; expiration date: 9/30/2026). The proposed rule would not make changes to burden covered under OMB Control Number 0584–0083. Due to the addition of new burden items, the Department recommends changing the title of 0584–0479 to ''Supplemental Nutrition Assistance Program: Work Requirements and Screening.''

Start-Up Burden

Respondents: State Agencies.

Estimated Number of Respondents: 53 State Agencies and 107,370 eligibility workers.

Estimated Number of Respondents per Respondent: 2,029 responses.

Estimated Total Annual Burden on Respondents: 473,857 hours, an increase of 473,857 hours from current inventory of 0 hours in 0584–0479.

Ongoing Burden

Respondents: State Agencies and Individuals.

Estimated Number of Respondents: 53 State Agencies and 26,801,899.49 Individuals.

Estimated Number of Respondents per Respondent: 505,696.88 responses per State Agency and one (1) per Individual.

Estimated Total Annual Burden on Respondents: 3,617,537.24 hours (1,809,350.12 hours for State Agencies and 1,808,187.12 hours for Individuals), an increase of 3,616,374.244 hours from current inventory of 1,163 hours in 0584–0479.

The total burden for this rulemaking is 4,090,231.24 burden hours and 53,711,362.97 total annual responses. This represents an increase to the burden hours for OMB Control Number 0584–0479, resulting in a total inventory of 4,091,394.24 burden hours (4,090,231.24 new burden hours + 1,163 existing burden hours) and 53,711,362.97 responses (unchanged).

BILLING CODE 3410–30–P

E-Government Act Compliance

The Department is committed to complying with the E-Government Act of 2002, to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

List of Subjects

7 CFR Part 271

Administrative practice and procedures, Employment, Supplemental Nutrition Assistance Program.

7 CFR Part 273

Administrative practice and procedure, Able-bodied adults without dependents, Employment, Time limit, Work requirements.

Accordingly, the Food and Nutrition Service proposes to amend 7 CFR part 271 and 273 as follows:

■ 1. The authority citation for parts 271 and 273 continues to read as follows:

Authority: 7 U.S.C. 2011–2036.

PART 271—GENERAL INFORMATION AND DEFINITIONS

■ 2. In § 271.1, amend paragraph (a) by adding two sentences at the end of the paragraph to read as follows:

§ 271.1 General purpose and scope.

(a) * * * That program includes as a purpose to assist low-income adults in obtaining employment and increasing their earnings. Such employment and earnings, along with program benefits, will permit low-income households to obtain a more nutritious diet through normal channels of trade by increasing food purchasing power for all eligible households who apply for participation.

* * * * *

■ 3. In § 271.2, revise the definitions of ''homeless individual'' and ''screening'' to read as follows:

§ 271.2 Definitions

* * * * *

Homeless individual means

(1) An individual who lacks a fixed and regular nighttime residence, including, but not limited to, an individual who will imminently lose their nighttime residence; or

(2) An individual whose primary nighttime residence is:

(i) A supervised shelter designed to provide temporary accommodations (such as a welfare hotel or congregate shelter);

(ii) A halfway house or similar institution that provides temporary residence for individuals intended to be institutionalized;

(iii) A temporary accommodation for not more than 90 days in the residence of another individual; or

(iv) A public or private place not designed for, or ordinarily used, as a regular sleeping accommodation for human beings (a hallway, a bus station, a lobby, or similar places).

* * * * *

Screening means an evaluation by the eligibility worker as to whether a person meets an exemption from the general work requirements, meets an exception from the able-bodied adults without dependents time limit, or should or should not be referred for participation in an employment and training program. Screening for participation in employment and training programs is not considered an approvable E&T component.

* * * * *

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

■ 3. In § 273.7, add paragraph (b)(3) to read as follows:

§ 273.7 Work provisions.

* * * * *

(b) * * *

(3) State agencies must screen individuals to determine if they meet an exemption listed in paragraph (b)(1) of this section at certification and recertification.

* * * * *

■ 4. In § 273.24:

■ a. Amend paragraph (c)(1) by removing the number ''50'' and adding in its place ''55'';

■ b. Amend paragraph (c)(5) by removing ''or'' at the end of the paragraph;

■ c. Amend paragraph (c)(6) by removing the period and adding a semicolon in its place;

■ d. Add paragraphs (c)(7) through (10);

■ e. Amend paragraph (g)(3) by removing the number ''12'' and adding in its place ''8'';

■ f. Amend paragraph (h)(2)(i) by adding a sentence at the end; and

■ g. Add paragraphs (k) and (l).

The additions read as follows:

§ 273.24 Time Limit for able-bodied adults.

* * * * *

(c) * * *

* * * * *

(7) Homeless, as defined in § 271.2 of this chapter;

(8) A veteran, defined as an individual who, regardless of the conditions of their discharge or release from, served in the United States Armed Forces (such as Army, Marine Corps, Navy, Air Force, Space Force, Coast Guard, and National Guard), including an individual who served in a reserve component of the Armed Forces, or served as a commissioned officer of the Public Health Service, Environmental Scientific Services Administration, or the National Oceanic and Atmospheric Administration; or

(9) An individual who is 24 years of age or younger and who was in foster care under the responsibility of any State, District, U.S. Territories, Indian Tribal Organization, or Unaccompanied Refugee Minors Program on the date of attaining 18 years of age, including those who remain in extended foster care in States that have elected to extend foster care in accordance with section 475(8)(B)(iii) of the Social Security Act (42 U.S.C. 675(8)(B)(iii) or those who leave extended foster care before the maximum age.

(10) Unless otherwise changed by law, the exceptions provided at paragraphs (c)(7) through (9) of this section cease to have effect on October 1, 2030, and the age limit provided in paragraph (c)(1) of this section reverts from ''55 years of age or older'' to ''50 years of age or older'' on October 1, 2030.

* * * * *

(h) * * *

(2) * * *

(i) * * * Starting in FY 2026, FNS will increase the estimated number of exemptions allocated to the State agency for the subsequent fiscal year by the remaining balance of unused exemptions earned for the previous fiscal year.

* * * * *

(k) *Screening.* The State agency must screen individuals for exceptions from the time limit listed under paragraph (c) of this section at certification and recertification. The State agency must not assign countable months unless it has screened the individual and determined that no exception applies.

(1) Changes in exception status during the certification period.

(i) *Loss of an exception.* If during the certification period an individual has a change in circumstances that results in the loss of an exception from the time limit, the State agency cannot begin assigning countable months until it screens the individual to determine whether any other exception applies.

(ii) *Newly meeting an exception.* If during the certification period an individual subject to the time limit has a change in circumstance that results in the individual now meeting an exception, the State agency must act promptly to apply the exception and

cannot assign a countable month once the State receives information that is not questionable. If the State agency determines the information is questionable, the State agency must act promptly to verify the information. Once verified, the State agency must apply the exception and cannot assign countable months.

(l) *Verification of exceptions.* If the State agency determines an individual's exception status under paragraph (c) of this section is questionable, the State agency must first attempt to verify exception status using information available to the State agency, such as information from other public assistance programs through data sharing, before requiring individuals provide documentary evidence or other sources of verification.

Cynthia Long,

Administrator, Food and Nutrition Service.

Note: The following appendix will not appear in the Code of Federal Regulations.

Appendix A—Regulatory Impact Analysis

I. Statement of Need

This proposed rulemaking is necessary to amend Supplemental Nutrition Assistance Program (SNAP) regulations to reflect mandates within the Fiscal Responsibility Act (FRA) of 2023 (Pub. L. 118–5) establishing changes to SNAP's work requirements and time limit for several groupings of adults. The FRA also directs the U.S. Department of Agriculture (the Department) to add to the program purpose language in the Food and Nutrition Act of 2008 (the Act), as amended. The proposed rule amends SNAP regulations to incorporate several provisions of the FRA: adjust SNAP's able-bodied adult without dependents (ABAWD) work requirement and time limit on a phased-in approach to newly included individuals who are aged 50–54; establish new exceptions for individuals who are veterans, homeless, and youth aged 24 or younger who have aged out of a foster care program from SNAP's ABAWD work requirement and time limit; decrease State agencies' annual allotment of discretionary exemptions for individuals subject to the ABAWD time limit from 12 percent to 8 percent; and limit State agencies' ability to carryover unused discretionary exemptions beyond one year. The provisions outlined above will be phased in between the enactment of the legislation in June 2023, through October 2025, with several provisions sunsetting October 1, 2030. The proposed rule also makes a discretionary amendment to the regulations requiring State agencies to screen individuals for exceptions to the time limit, as well as exemptions from the general work requirement, as State agencies must screen for both to adequately determine if an individual should be subject to the time limit. The Department is proposing to amend the regulations to clarify requirements for screening to improve consistency in program operations across States and provide quality customer service.

II. Summary of Impacts

The Department estimates the net total increase in federal transfers (SNAP benefit spending) associated with the provisions of this proposed rule to be approximately $2.8 billion over the nine years Fiscal Year (FY) 2023–FY 2031, averaging $306.5 million per year. Over the nine-year period FY 2023–FY 2031,[27] this is the net result of a reduction in transfers of $6.3 billion by terminating benefits to about 2.0 million individuals and reducing the benefits of 103,000 individuals by $155.2 million, and an increase in transfers of $9.2 billion due to about 2.7 million individuals meeting exceptions from the ABAWD time limit. Over the nine-year period, federal administrative costs (not including transfers) are estimated to total $252.5 million, or an annual average of $28.1 million. Total State agency administrative expenses are also estimated to be approximately $252.5 million over the nine-year period, or an annual average of $28.1 million. Costs associated with administrative burden to individual SNAP participants are estimated to be approximately $322.0 million over the nine-year period, or an annual average of $35.8 million. See Table 1 for a year-by-year presentation of changes to transfers, federal administrative costs, State agency administrative costs, and burden costs to individual participants.

This proposed rule will primarily affect SNAP participants who are subject to the ABAWD work requirement and time limit, which the Department estimates to be approximately 9.3 percent of SNAP participants upon full implementation of the FRA's provisions in FY 2026. However, many of these participants will meet the work requirement or receive an exception, so far fewer will lose eligibility for SNAP.

The estimated net impact of the proposed rule's change in the age-based exceptions and three new exceptions is a net increase in SNAP participation of about 55,000 individuals per year when fully implemented. In FY 2026, this includes 345,000 participants losing eligibility, 369,000 participants retaining eligibility through one of the new exceptions, and about 30,000 new participants. See Table 8 for year-by-year details on additional participation and transfer impacts.

The rule is estimated to increase administrative burden for most State SNAP agencies at initial implementation, throughout the period the provisions are in effect, and at the sunset of the provisions that expire on October 1, 2030. The rule is expected to result in a one-time administrative burden of 473,857 total hours (about $10.3 million in FYs 2023 and 2024 after 50 percent federal cost reimbursement[28]) in start-up costs for State agencies. Ongoing State agency administrative burden is expected to increase annually by an average of about 1.4 million total hours for 53 State agencies (about $25.3 million annually after 50 percent federal cost reimbursement). The one-time total State agency administrative burden of sunsetting the applicable provisions within this proposed rule is estimated to be 625,024 total hours (about $15.0 million in FYs 2030 and 2031 after 50 percent federal cost reimbursement). The rule provisions will impose additional administrative burden on participants who are subject to the ABAWD work requirement, estimated to be an ongoing average annual burden of 1.4 million hours for all individuals impacted, or (about $35.3 million annually), as well as will impose a one-time burden during the sunsetting of applicable provisions of 151,167 hours (or about $4.0 million in FY 2031). In addition to the federal cost of the 50 percent reimbursement to State agencies, the rule is expected to result in a one-time administrative burden of 90 hours at implementation (or $6,760 in FY 2024) and a one-time administrative burden of 63 hours at sunset (or $5,813 in FY 2030) to the Federal Government. The impacts of the proposed rule's provisions are summarized in the following table (Table 1).

[27] A nine-year analysis period is used to align with the implementation and sunset periods established by the FRA. See discussion of baseline and time horizon of analysis for more detail.

[28] Fifty percent of State agencies' allowable SNAP administrative costs are reimbursed by the Federal Government, as defined at 7 CFR 277.4(b).

As required by OMB Circular A–4, in Table 2 below, the Department has prepared an accounting statement showing the annualized estimates of benefits, costs, and transfers associated with the provisions of this rule. Due to the primary focus on transfer

* Nominal transfer impacts are expected in FY 2023 for provisions of the FRA that went into effect September 1, 2023.

** Federal and State Administrative Costs are estimated post-50 percent federal reimbursement.

*** Totals may not add due to rounding.

effects in this near-term analysis, the Department has used a discount rate of 2 percent. Increases in SNAP benefit payments are categorized as transfers; increases in administrative burden for State agencies, households, and the Federal Government are categorized as costs.

Table 2: Accounting Statement

	Primary Estimate	Year Dollar	Discount Rate	Period Covered
Benefits – Qualitative: The new exceptions from the ABAWD time limit for veterans, individuals experiencing homelessness, and some individuals formerly in foster care will allow these vulnerable populations to retain SNAP eligibility and benefits. In turn, these individuals may not experience an increase in food insecurity or poverty which could have broader societal impacts such as reduced healthcare costs or impacts on other nutrition assistance. Additionally, the proposed rule will ensure consistent application of screening practices across State agencies.				
Annualized Monetized ($millions/year)	N/A	2023	2%	FY 2023-2031
Costs – Administrative: This proposed rule will result in one-time burdens for State agencies and the Federal Government at implementation and at sunset of the provisions within this rule. There will also be ongoing costs to State agencies, the Federal Government, and households throughout the duration of the rule's provisions. Qualitative: Increasing the age of individuals subject to the ABAWD work requirement and time limit will negatively impact those individuals who will become ineligible for SNAP and lose SNAP benefits. In turn, these individuals may experience increases in food insecurity and poverty which could have broader societal impacts such as increased healthcare costs or impacts on other nutrition assistance, such as food banks.				
Annualized Monetized ($millions/year)	$90.34	2023	2%	FY 2023-2031
Transfers – This proposed rule will increase the net amount of benefit payments to SNAP participants.				
Annualized Monetized ($millions/year)	$302.60	2023	2%	FY 2023-2031

In the discussion that follows, there is a section-by-section description of the effects of the proposed rule on SNAP participants, the Federal Government, and State agencies administering SNAP.

III. Background

A. Work Requirements in SNAP

The Food and Nutrition Act of 2008 (the Act), as amended, establishes national eligibility standards for SNAP, including work requirements for certain individuals. The first of these requirements, referred to as the general work requirement, requires individuals between the ages of 16–59 who are able to work to register for work; accept an offer of suitable employment; not voluntarily quit or reduce hours of employment below 30-hours per week, without good cause; and participate in workfare or SNAP Employment and Training (E&T) [29] if required by the State agency. Most SNAP participants are exempt from the general work requirement because they are older adults, children, have a disability, or meet another exemption from the general work requirement listed in the Act.

A subset of individuals who are subject to the general work requirement are also subject to an additional requirement, referred to as the able-bodied adult without dependents (ABAWD) work requirement. Prior to the FRA, individuals subject to the ABAWD work requirement were individuals ages 18 to 49 who do not have a child (under age 18) in their SNAP household and are not considered disabled by SNAP rules.[30] The Act limits individuals who are subject to the ABAWD work requirement and time limit, also referred to as time-limited participants,

[29] The SNAP Employment and Training (E&T) program helps SNAP participants gain skills and find work that moves them forward to self-sufficiency. Depending on whether a State agency operates a mandatory E&T program, individuals in some States may be required to participate in the State's E&T program as a condition of meeting work requirements. Federal funding for SNAP E&T was $384 million in FY 2023.

[30] In SNAP, an individual is considered disabled if they receive federal disability or blindness payments under the Social Security Act, including Supplemental Security Income (SSI), receive state disability or blindness payments based on SSI rules, receive disability retirement benefits from a governmental agency because of a permanent disability, receive an annuity under the Railroad Retirement Act and are eligible for Medicare or are considered disabled under SSI; are a veteran who is totally disabled, permanently homebound, or in need of regular aid and attendance; or are the surviving spouse or child of a veteran who is receiving VA benefits and is considered permanently disabled.

to receiving SNAP benefits for 3 months in a 36-month period (the time limit) unless they are meeting the ABAWD work requirement, live in an area where the time limit is waived due to a lack of sufficient jobs or a high unemployment rate, or are otherwise exempt. If an individual subject to the ABAWD work requirement and time limit receives SNAP benefits in a month when they did not meet the work requirement or otherwise were waived or excepted from the time limit as noted above, that month is considered a ''countable'' month and counts as 1 of the 3 months within the 36-month period where the individual may still retain SNAP eligibility. The Act provides exceptions from the ABAWD work requirement and time limit based on certain individual circumstances, such as physical or mental limitations that limit ability to work, need to care for a dependent household member, pregnancy, or meeting an exemption from the general work requirement. Individuals can meet the ABAWD work requirement by working, participating in a qualifying work program, or any combination of the two, for at least 20 hours per week (averaged monthly to 80 hours per month). Individuals can also meet the ABAWD work requirement by participating in and complying with workfare. For the purposes of meeting the ABAWD work requirement, working includes unpaid or volunteer work that is verified by the State agency.

B. Characteristics of Individuals Subject to the ABAWD Work Requirement and Time Limit

The Department estimates that in FY 2024, approximately 9 percent of SNAP participants are ages 18 to 49 and subject to the ABAWD work requirement, and 84 percent of them are in one-person SNAP households.[31] These time-limited participants have very low household gross income, averaging only 32 percent of the federal poverty line (FPL). For comparison, the average SNAP household has a gross income twice as high, or about 65 percent of the FPL. About 21 percent of time-limited participants are experiencing homelessness at the time of SNAP certification or recertification.[32] Research indicates that time-limited participants who are not meeting the ABAWD work requirement can face significant barriers to finding or increasing their employment. A 2021 USDA study in 9 States found that 5 to 12 percent of SNAP participants subject to the time limit were meeting the work requirement when those States reinstated the time limit after the Great Recession. Participants who were homeless were much less likely to meet the ABAWD work requirement. The study also found the reinstatement of the time limit substantially reduced SNAP participation among individuals subject to the time limit, with no evidence of increased employment or earnings.[33]

C. Factors That Permit Time-Limited Individuals To Continue Participating in SNAP Beyond Three Months

As previously discussed, some individuals who are subject to the ABAWD work requirement may meet an exception from the time limit. The Act also allows for waivers of the time limit in geographic areas with an unemployment rate over 10 percent or an insufficient number of jobs to provide employment for individuals, as defined at 7 CFR 273.24(f). Individuals residing in areas with a waiver of the time limit continue receiving benefits even if they are not meeting the ABAWD work requirement for more than 3 months in a 36-month period. Lastly, the Act establishes an annual allotment of discretionary exemptions that State agencies may use to extend eligibility for a time-limited participant who is not meeting the ABAWD work requirement. Each discretionary exemption can extend eligibility for one participant for one month and a single participant can receive multiple one-month discretionary exemptions. As defined by law, each State agency's allotment of discretionary exemptions is calculated annually by the Department, based on the total number of time-limited participants in the State who have exceeded three countable months due to the time limit in the preceding fiscal year, known as ''covered'' individuals. Prior to the FRA, State agencies' annual allotments of discretionary exemptions were based on 12 percent of the total number of covered individuals in the State. If a State agency did not use the exemptions, they could be carried over indefinitely.

D. FRA Legislative Updates

The FRA [34] amended the Act, revising the definition of who is subject to the ABAWD work requirement and time limit, exceptions from the time limit, procedures for the calculation and carryover of discretionary exemptions, as well as the program purpose. Based on these changes, the Department is proposing to amend the regulations to reflect the requirements of the FRA. The FRA also required the Department to publicize all available State requests for waivers authorized by Sec. 6(o)(4)(A), including supporting data, and all Department approvals of waivers within 30 days of enactment. The Department complied with this requirement and is not proposing rulemaking relating to this provision.

E. Baseline and Time Horizon of Analysis

Our baseline for measuring the costs, benefits, and transfers associated with this proposed rule is the Department's estimated SNAP participation and benefit spending for FYs 2023–2031, shown in Table 3 below. The baseline represents the Department's best estimate of SNAP participation and spending (in nominal dollars) in the absence of the provisions included in this proposed rule. All costs related to administrative burden for State agencies, the Federal Government and households are measured against currently approved burden estimates in OMB Control No. 0584–0479.

This regulatory impact analysis (RIA) uses FY 2023–FY 2031 as the timeframe for analysis because this range fully incorporates the implementation and sunsetting periods of FRA provisions. A 9-year analysis period (rather than a more typical 5-year or 10-year period) is used to align with the implementation period established by the FRA, beginning in September 2023. While some of the provisions included in the FRA and in the proposed rule will be ongoing, others are expected to sunset at the start of FY 2031. As a portion of SNAP participants will not be affected by the sunset immediately upon the start of the fiscal year, but rather at their screening that will take place during FY 2031, the Department expects there will be some continuing transfer impacts in FY 2031, as well as administrative costs associated with the sunsetting of certain provisions in FYs 2030 and 2031. Thus, the Department determined that the period FY 2023–FY 2031 is the appropriate period to assess the proposed rule's economic effects.

[31] Note: The Department estimates that individuals subject to the ABAWD work requirement are a larger share of the caseload than would be suggested by the most recent SNAP QC data available (from pre-pandemic FY 2020). This is due to the extended suspension of the ABAWD time limit during the COVID–19 Public Health Emergency by the Families First Coronavirus Response Act (FFCRA). While the pre-pandemic FY 2020 QC data suggests this group accounts for 7.3 percent of SNAP participants, the Department believes 9 percent is a more accurate estimate for the start of FY 2024. This estimate is based on caseload trends in the wake of the Great Recession when the time limit was similarly temporarily lifted by the American Recovery and Reinvestment Act of 2009.

[32] Based on tabulation of pre-pandemic FY 2020 SNAP QC data.

Table 3: Estimated SNAP Participation and Benefit Baseline[35]

	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028	FY 2029	FY 2030	FY 2031
Participation (000s)	42,390	42,925	42,092	41,703	41,377	41,026	40,666	40,161	39,538
Benefits (nominal $millions)	104,349	108,301	110,203	112,213	114,384	116,687	118,801	120,666	122,089

F. Methodology

Multiple data sources were used to estimate how the provisions in the proposed rule would affect SNAP participants, State agencies, and the Federal Government. Methodology and estimates are discussed in this section, according to the data source used. To estimate the effects of the proposed rule's provisions, the proportion of SNAP participants likely to be affected by each provision was derived from the following data sources. Those ratios were then applied to the Mid-Session Review of the FY 2024 President's Budget baseline for SNAP spending and participation to produce estimates of changes in participation and benefit spending (in nominal dollars) for future years. These were the most recent baseline inputs available at the time this analysis was prepared.

SNAP Quality Control Data

The estimates provided in this RIA are primarily based on SNAP Quality Control (QC) data from the pre-pandemic portion of FY 2020,[36] and the SNAP baseline included in Table 3. At the time of analysis, this is the most recent period for which the Department has QC data from all 53 State agencies due to interruptions in QC data collection during the COVID–19 Public Health Emergency. SNAP QC data are collected annually as part of the ongoing effort to determine the accuracy of SNAP certification actions.[37] Data are collected for a sample of SNAP households that is statistically representative at both the national and state levels. The pre-pandemic FY 2020 QC dataset includes data from 18,319 households, including information on household earnings, household composition, and participant characteristics that permit inference of ABAWD status (*e.g.,* age, disability status, presence of children in the SNAP household, and whether the individual is exempt from the SNAP general work requirement). The data also include information that can be used to infer employment status (*e.g.,* amount of monthly earned income). The sample of households included in the pre-pandemic FY 2020 dataset are weighted to be representative of the SNAP caseload during that period nationally and in each State.

Estimates derived from the QC data include:

50–54-Year-Olds Newly Subject to the ABAWD Work Requirement and Time Limit

- Share of SNAP participants that are likely to be newly subject to the ABAWD work requirement and time limit due to the FRA's change to include 50-to-54-year-olds (2.0 percent of total SNAP participants). Among this group, we estimated:
  - The share that are likely meeting the ABAWD work requirement, based on information about employment status and earnings (10.6 percent).
  - The share that are likely to increase their work hours in order to begin meeting the ABAWD work requirement, based on earnings information (2.28 percent). Specifically, this estimate is based on the share of individuals who were estimated to work 15–19 hours per week.
  - The share that are likely to be excepted from the ABAWD work requirement for reasons other than the three new exceptions temporarily established by the FRA (*e.g.,* a physical or mental limitation that limits ability to work) because they are exempt from the general work requirement for a reason other than disability (33 percent).
  - The average monthly per person benefit received by individuals in this group (26.6 percent of the Thrifty Food Plan (TFP)).

New Exception for Homelessness

- Share of time-limited participants (between the ages of 18–54) who are also experiencing homelessness (20.6 percent). Among this group, we estimated:
  - The share that are likely meeting the ABAWD work requirement, based on information about employment status and earnings (2.7 percent).
  - The share that are likely to increase their work hours in order to begin meeting the ABAWD work requirement (1 percent).[38] Because these individuals would begin meeting the ABAWD work requirement, they are removed from the pool of individuals we estimate would receive an exception from the time limit.
  - The share that are likely to be excepted from the ABAWD work requirement for reasons other than the three new exceptions temporarily established by the FRA (*e.g.,* a physical or mental limitation that limits ability to work) because they are exempt from the general work requirement for a reason other than disability (32 percent).
  - The average monthly per person benefit received by individuals in this group (29.9 percent of the TFP).

Estimation of New SNAP Participation Based on the New FRA Exceptions

- To estimate the likely increase in SNAP participation as a result of the new exceptions in place, the Department estimated a 1 percent increase in the share of childless adults without disabilities between the ages of 18 and 49 in the SNAP baseline. This modest estimate is based on the fact that the FRA provisions went into effect at a time when many areas had waivers of the time limit due to high unemployment rates that occurred during the COVID–19 pandemic. Hence, many of these individuals made eligible by the new exceptions may have already been participating in SNAP.

Changes in the Share of the Time-Limited SNAP Participants Between FY 2020 and FY 2024

- The Department believes the number of time-limited SNAP participants increased between the period for which we have SNAP QC data (pre-pandemic FY 2020) and the end of FY 2023, when the FRA's provisions began to take effect. This is due to the temporary suspension of the ABAWD time limit for the duration of the COVID–19 Public Health Emergency authorized by the Families First Coronavirus Response Act (FFCRA).
- Given that time-limited participants largely did not accrue countable months prior to July 2023 due to the temporary suspension of the ABAWD time limit during the pandemic, the Department believes time-

[35] Each year as part of the process of developing the President's Budget, the Department produces estimates of expected SNAP participation and benefit spending over a ten-year period. Estimates in this Regulatory Impact Analysis are based on Department Estimates for the Mid-Session Review of the FY 2024 President's Budget; benefit values for FY 2023 reflect certified benefit amounts (excluding emergency allotments authorized during the COVID–19 Public Health Emergency).

[36] SNAP QC data from the pre-pandemic period covers October 2019 to February 2020, as data collection after February 2020 was limited by the COVID–19 public health emergency.

[37] Detailed information on the QC review process, including sampling requirements and procedures for conducting QC reviews, can be found on the FNS website at: *http://www.fns.usda.gov/snap/quality-control.*

[38] Note: We use 1 percent for this group, rather than 2.28 percent, based on the assumption that individuals experiencing homelessness will face greater challenges in increasing their work hours due to unstable housing, transportation barriers, inconsistent access to hygiene materials or professional clothing, and other challenges related to homelessness, as described by sources such as the Urban Institute (*https://www.urban.org/urban-wire/why-it-so-hard-people-experiencing-homelessness-just-go-get-job,*), the National Alliance to End Homelessness (*https://endhomelessness.org/resource/overcoming-employment-barriers/*), and the University of Michigan School of Public Health (*https://sph.umich.edu/pursuit/2020posts/homelessness-and-job-security-challenges-and-interventions.html*).

limited participants were a larger share of total participants at the end of FY 2023 and beginning of FY 2024 than indicated by the pre-pandemic FY 2020 QC data (7.3 percent) when fewer geographic areas had waivers of the time limit.

- The Department opted to use FY 2013 SNAP QC data as a proxy estimate for increased participation by time-limited individuals. In 2009, the time limit was similarly suspended nationwide for an extended period by the American Recovery and Reinvestment Act of 2009 and most States continued to qualify for and use Statewide waivers through FY 2013 due to high unemployment rates that lingered after the Great Recession. FY 2013 SNAP QC data indicate that time-limited participants were 9.0 percent of total SNAP participants.
- Correspondingly, the Department assumed that time-limited participants ages 18–49 make up a larger share of participants (9.0 percent) at the start of FY 2024, before declining to back to 7.3 percent of participants in FY 2025 and subsequent years as was seen in pre-pandemic FY 2020 when unemployment rates were lower. This adjustment was not made to time-limited participants ages 50–54 because their share of total participants was similar in the FY 2013 and pre-pandemic FY 2020 QC data.

Veterans' Participation in SNAP and ABAWD Status From American Community Survey (ACS) Data

Given that the SNAP QC data do not include information about veteran status, the Department relied on 2022 American Community Survey (ACS) data to estimate how many individuals participating in SNAP may be subject to the ABAWD work requirement *and* are veterans. The ACS data were tabulated to determine how many individuals in the U.S. have prior military service, are between the ages of 18–54, participate in SNAP, do not have a disability,[39] and do not have a child in their household.[40] Compared to the total number of individuals reporting SNAP participation in the 2022 ACS, this resulted in an estimate that 0.22 percent of SNAP participants may be eligible for the new exception from the ABAWD time limit for veterans. Without data on how many of these veterans would be exempt from the ABAWD work requirement for reasons other than the three new exceptions temporarily established by the FRA (*e.g.,* a physical or mental limitation that limits ability to work), we assume the same share as time-limited participants ages 18 to 49 (32 percent).

Without data on average monthly per person benefits for time-limited participants who are also veterans, we assume that they receive the same average benefit as 18-to-54-year-old time-limited participants who are not working at least 20 hours per week (25.9 percent of the TFP).

Former Foster Youths' Participation in SNAP From Administration for Children and Families (ACF)

The SNAP QC data do not include information about participants that were formerly in the foster care system. The Department was unable to find a national survey that would permit it to estimate how many former foster youth between the ages of 18–24 participate in SNAP, nor to determine the share who may be considered subject to the ABAWD work requirement and time limit. In the absence of reliable data, the Department generated an estimate based on information available from the Administration for Children and Families (ACF) on how many youth age out of the foster care system each year, nationally. ACF indicates that about 20,000 youth emancipate from foster care each year,[41] resulting in a total cohort of 18–24-year-old former foster youth of up to 140,000 individuals. We adjusted the 140,000 cohort size downward to reflect the fact that about 68 percent of the U.S. population lives in States that have opted to provide foster care up to age 21,[42] so there are likely proportionally fewer 18-to-20-year-olds in the total former foster youth population. The adjustment resulted in an estimate that 99,000 former foster youth could fall into the 18–24 age group that would be eligible for the new exception from the time limit.

However, not all 99,000 individuals would participate in SNAP and be considered subject to the ABAWD work requirement. Using the best-available data and research on former foster youth outcomes, the Department assumes that approximately 65 percent of individuals in this group may be SNAP-ineligible, are already meeting the ABAWD work requirement, or are not subject to the ABAWD work requirement (for reasons that can include being a student, having a child in their household, or having a disability).[43] In the absence of precise data to inform the estimate, the Department estimated that the remaining 35 percent of this group will benefit from the new exception (about 35,000 individuals per year).

Without data on average monthly per person benefits for time-limited participants who are also former foster youth up to age 24, we assume that they receive the same average monthly benefit as 18-to-49-year-old time-limited participants who are not working at least 20 hours per week (25.7 percent of the TFP).

SNAP ABAWD Waiver Coverage and ACS Data on Low-Income Population

Waivers of the ABAWD time limit play a significant role in determining the number of participants who are subject to the time limit at any given time. The Department determined it was necessary to estimate the share of time-limited participants who are likely to live in a waived area to more accurately determine how many individuals would lose or retain eligibility annually due to the FRA. Without this adjustment, estimates would overstate both the increase in transfers associated with time-limited participants retaining SNAP eligibility because of the new exceptions, and the decrease in transfers associated with individuals ages 50–54 newly becoming subject to the ABAWD work requirement and time limit, and subsequently losing eligibility.

Internal analyses were conducted to estimate the share of participants subject to the ABAWD work requirement likely to live in a waived area at two different points in time, based on the assumption that FY 2023 would have a higher level of waiver coverage, declining to stabilize at a lower rate in FY 2026:

(1) Quarter 2 of FY 2023, to reflect a ''high'' degree of waiver coverage as FRA provisions began to go into effect, when many State agencies still had statewide waivers of the time limit due to high unemployment rates that occurred during the COVID–19 pandemic; and

(2) Quarter 1 of FY 2020, to reflect a ''low'' degree of waiver coverage that occurred in the pre-pandemic months, after an extended period of relatively low unemployment rates nationally.

To conduct these analyses, we identified the local areas covered by FNS-approved waivers[44] of the ABAWD time limit in each of the two above-noted time periods. Then, ACS data were used to determine the share of the low-income population (defined as below 125 percent of the FPL) in the U.S. that lived in those waived areas; the low-income population was used as a proxy for SNAP participants. The results of these analyses indicated that in a period of ''high'' waiver coverage, 55 percent of SNAP participants likely live in an area with a waiver of the time limit, and in periods of ''low'' waiver coverage, about 40 percent of SNAP participants likely live in an area with a waiver of the time limit. Additionally, analysis of SNAP QC data on the distribution of participants aged 50–54 indicates that the share of SNAP participants who live in an area with a waiver is about 10 percentage points lower, compared to those aged 18–49 years. Thus, we assume waiver coverage

[39] As defined in SNAP rules.

[40] The ACS variables used to create this tabulation were: DRATX (''Veteran service connected disability rating''); HUPAC_RC1 (''HH presence and age of children recode''); FS (''Yearly food stamp/Supplemental Nutrition Assistance Program (SNAP) recipiency''); MIL_RC1 (''Military service recode''); SSIP_RC1 (''Supplementary Security Income past 12 months recode''); and AGEP_RC1 (''Age recode'').

[44] All FNS-approved ABAWD Waivers are publicly-available at *https://www.fns.usda.gov/snap/ABAWD/waivers.*

among those aged 50–54 years was 10 percentage points lower than those aged 18–49 years who are subject to the ABAWD work requirement. The Department assumed that FY 2023 would have ''high'' waiver coverage and would decline each year to reach ''low'' waiver coverage in FY 2026.

State-Reported Data on Discretionary Exemption Usage

To assess the effects of the FRA's provisions limiting States agencies' discretionary exemption allotments to 8 percent of covered individuals and preventing carryover of unused exemptions beyond one fiscal year, the Department examined State agency-reported data on discretionary exemption usage. States are required to provide this data to the Department on an annual basis. The Department examined data from FY 2016–FY 2019 to understand how many exemptions States typically use. Those data indicated that State agencies typically use less than an 8 percent allotment of discretionary exemptions. The four-year period FY 2016–FY 2019 was used to represent a multi-year period during which the time limit was not lifted nationally.

Estimating the Value of State Agency, Federal, and Participant Burden

Cost estimates in this RIA account for increased burden for State agencies, the Federal Government, and SNAP participants. Hourly labor rates used to monetize burden hours in this analysis align with those presented in the proposed rule's burden table:

- *State agency program staff:* FY 2023 fully-loaded labor rate is $31.48. This is based on Bureau of Labor Statistics (BLS) May 2022 estimates of the median hourly wage rate for occupation code 21–1090, Miscellaneous Community and Social Service Specialists ($23.67) multiplied by 1.33 to represent fully-loaded wages.
- *State agency program manager:* FY 2023 fully-loaded labor rate is $51.18. This is based on BLS May 2022 estimates of the median hourly wage rate for occupation code 11–9151, Social and Community Service Managers ($38.48) multiplied by 1.33 to represent fully-loaded wages.
- *State agency computer developers:* FY 2023 fully-loaded labor rate is $52.69. This is based on BLS May 2022 estimates of the median hourly wage rate for occupation code 15–0000, Computer and Mathematical Operations ($39.62) multiplied by 1.33 to represent fully-loaded wages.
- *Federal program analyst:* FY 2023 fully-loaded labor rate is $71.38. This is based on OPM 2023 salary data for the Washington-Baltimore-Arlington, DC–MD–WV–PA locality pay region for a GS–13 Step 1 employee ($53.67) multiplied by 1.33 to represent fully-loaded wages.
- *Federal supervisory analyst*: FY 2023 fully-loaded labor rate is $84.36. This is based on OPM 2023 salary data for the Washington-Baltimore-Arlington, DC–MD–WV–PA locality pay region for a GS–14 Step 1 employee ($63.43) multiplied by 1.33 to represent fully-loaded wages.
- *Federal division director:* FY 2023 fully-loaded labor rate is $99.22. This is based on OPM 2023 salary data for the Washington-Baltimore-Arlington, DC–MD–WV–PA locality pay region for a GS–15 Step 1 employee ($74.60) multiplied by 1.33 to represent fully-loaded wages.
- *SNAP participants:* FY 2023 labor rate is $22.02. This is based on the Current Population Survey (CPS) FY 2023 median weekly wage for full-time and salary workers, ages 16 and up ($1,101/week, divided by 40 hours to produce an hourly rate of $27.525). Because burden on SNAP participants reflects activities, like completing SNAP forms, that occur outside of an employment setting, the hourly rate derived from the weekly wage is discounted by 20 percent to remove the value of taxes and other work-related costs, resulting in $22.02.

The labor rates presented above are inflated for estimates of burden costs in future years using CPI–W projections from the Office of Management and Budget's (OMB) FY 2025 President's Budget Economic Assumptions. All administrative expense estimates presented in this RIA are based on labor rates that have been inflated based on CPI–W projections.

IV. Section-by-Section Analysis

The increases and decreases in SNAP benefit transfers, administrative costs, and burden hours associated with each provision of the proposed rule are discussed separately in this section of the RIA. Throughout the section-by-section analysis, FY 2026 is used as a reference year to provide an indication of the proposed rule's effect after all provisions have been phased-in.

A. Requirement To Add Purpose Language to the Food and Nutrition Act of 2008

Discussion: This provision of the FRA requires the Department to add the following program purpose to The Act: ''That program includes as a purpose to assist low-income adults in obtaining employment and increasing their earnings. Such employment and earnings, along with program benefits, will permit low-income households to obtain a more nutritious diet through normal channels of trade by increasing food purchasing power for all eligible households who apply for participation.'' The Department proposes adding this language as an addition to 7 CFR 271.1(a), where the general purpose and scope of SNAP are defined.

Effect on SNAP Participants: As this provision is administrative, the Department expects it will not impact program participants in a quantifiable way.

Effect on State Agencies: The Department expects no State agency burden to be incurred as a direct result of this provision.

Effect on Federal Spending: The Department expects no changes in federal administrative costs or transfers to be incurred as a direct result of this provision.

B. Requirement To Update Exceptions From the ABAWD Time Limit

There are four components that comprise this provision, which expands the category of individuals subject to the ABAWD work requirement and time limit by adjusting the upper age limit from 49 to 54, on a phased-in timeline between September 2023 to October 2024, as well as creates three new categories of exceptions from the ABAWD time limit. All components of this provision will sunset on October 1, 2030, pending any future legislative changes.

Changes to Age-Based Exceptions

Discussion: This provision gradually raises the upper age limit defining who is subject to SNAP's ABAWD work requirement from age 49 to age 54, thereby expanding the group of SNAP participants who are subject to the time limit. Specifically, the upper age limit changed from age 49 to age 50 on September 1, 2023; from age 50 to age 52 on October 1, 2023; and will change from age 52 to age 54 on October 1, 2024. Upon full phase-in of these adjustments, the ABAWD time limit will apply to adults aged 18 through 54 until the sunset of this provision on October 1, 2030. This provision will sunset immediately on October 1, 2030, and is not subject to a phase-out period in FY 2031.

Only individuals aged 50 to 54 who do not qualify for an exception from the ABAWD time limit (such as a physical or mental condition that limits ability to work, need to care for a dependent household member, or meeting an exemption from the general SNAP work requirement) would be newly considered subject to the ABAWD time limit.

Effect on SNAP Participants: The Department expects the changes to the age-based exception to decrease program participation among SNAP participants ages 50 to 54 who are newly subject to the ABAWD work requirement and time limit from implementation in FY 2023 until sunset of the provision. If these individuals are not able to meet the ABAWD work requirement, the time limit will take effect and they will lose program eligibility after 3 months of SNAP participation per 36-month period unless that individual qualifies for an exception, receives a discretionary exemption, or lives in an area with a waiver of the time limit.

In FY 2026, when this provision is fully implemented, the Department (using SNAP QC data) estimates 1.8 percent of all SNAP participants, approximately 753,000 individuals (450,000 individuals ages 50 to 52, and 302,000 individuals ages 53 to 54) may be impacted by the age adjustments and be newly subject to the ABAWD work requirement and time limit because they meet the new definition of an ABAWD and are not working 20 or more hours per week.

The Department estimates that a small share (about 2.3 percent) of these individuals will be able to gain or increase their employment to at least 20 hours per month to retain SNAP eligibility. The Department based this estimate on the share of these individuals that are estimated to work at least 15 hours but less than 20 hours per week. As a result of the increased work hours, SNAP benefits for these individuals will decrease by an average of $121 per month in FY 2026. This small share of new individuals (about 17,000 people in FY 2026) subject to the ABAWD time limit will not lose SNAP eligibility because of the time limit.

The Department estimates that 33 percent of the remaining individuals will qualify for an exception from the ABAWD work requirement and time limit for reasons other

than the three new exceptions temporarily established by the FRA (*e.g.,* a physical or mental condition that limits ability to work) because they are exempt from the SNAP general work requirement for a reason other than disability.

Finally, the Department estimates that approximately 30 percent of the remaining individuals ages 50 to 54 will live in areas covered by a waiver of the time limit and, therefore, will not be subject to the time limit.

After these adjustments discussed above, in FY 2026 the Department estimates 345,000 individuals will lose SNAP eligibility and an average of $272 per month in SNAP benefits due to the change in the upper age limit. Individuals who lose eligibility due to the time limit may rejoin SNAP after the expiration of the 36-month period or sooner by meeting the ABAWD work requirement, though a 2021 USDA study on the ABAWD time limit suggests employment outcomes are unlikely to improve among those who lose eligibility due to the time limit. The primary results in the study found that the ABAWD time limit has a small, statistically significant negative impact on employment outcomes.[45] A sensitivity analysis among a smaller group of time-limited participants in this study showed no statistically significant impact of the ABAWD time limit on employment in two States and a small positive impact on employment in a third State. Therefore, the Department estimates that very few individuals who lose SNAP eligibility will be able to increase their work hours to regain SNAP eligibility within the 36-month period, particularly in light of the barriers adults over the age of 50 can face in re-entering the job market such as employer age discrimination, increased likelihood on health challenges, and lack of training opportunities, among other reasons.[46]

At full implementation in FY 2026, the Department estimates that benefit losses among 50-to-54-year-olds newly subject to the ABAWD time limit will represent a 0.94 percent reduction in total annual SNAP benefit spending (transfers), or about $1.1 billion. The Department estimates federal transfers to decrease over the nine-year analysis period of FY 2023 to FY 2031 by a total of $6.5 billion because of this provision.

In addition to the direct impacts discussed above, there are additional secondary impacts which are difficult to quantify. The individuals who will lose eligibility for SNAP benefits are likely to experience hardship through increased food insecurity or poverty. This, in turn, could have societal impacts through increased healthcare costs related to increases in food insecurity and poverty or impacts on other nutrition assistance, including food banks. The Department notes that while there are studies that describe the relationships between SNAP, food security, poverty, and health care costs, these studies do not permit estimation of potential impacts on transfers specific to the dispersed ABAWD population that might be affected by this proposed rule.

^ The age group shown in this table is no longer subject to the ABAWD time limit in FY 2031 because the provision will sunset on October 1, 2030.

BILLING CODE 3410–30–C

New Exceptions

In addition to expanding the group of individuals subject to the ABAWD work requirement and time limit, the FRA provides new exceptions from the time limit for individuals experiencing homelessness, who are veterans, or individuals through age 24 who were participating in foster care on their 18th birthday (or higher age if the State offers extended foster care to a higher age). Below each of these new exceptions is analyzed individually. The impact of the new exceptions on federal transfers and on SNAP participants will be itemized within discussion of each exception, while the aggregate impacts on transfers, federal burden, State agency burden, and SNAP participant burden will be summarized after the discussion of each new exception.

Individuals Experiencing Homelessness

Discussion: Prior to the FRA, individuals who were experiencing homelessness and not meeting the ABAWD work requirement could only continue to participate in SNAP after accruing three countable months if the State agency chose to use the State's allotment of discretionary exemptions to provide the individual with an exception from the time limit on a month-by-month basis (until the State has depleted its allotment of discretionary exemptions). A State agency may also consider an individual experiencing homeless to be ''unfit for work,'' and thereby exempt from the general work requirement and thus the ABAWD time limit.

The FRA provides exceptions from the time limit for individuals experiencing homeless. To consistently implement this provision nationwide, the Department is proposing to standardize the definition of a ''homeless individual'' at 7 CFR 271.2 as follows:

''*Homeless individual* means

(1) An individual who lacks a fixed and regular nighttime residence, including, but not limited to, an individual who will imminently lose their primary nighttime residence, provided that primary nighttime residence will be lost within 14 days, no subsequent housing has been identified and the individual lacks support networks or resources needed to obtain housing; or

(2) An individual whose primary nighttime residence is:

(i) A supervised shelter designed to provide temporary accommodations (such as a welfare hotel or congregate shelter);

(ii) A halfway house or similar institution that provides temporary residence for individuals intended to be institutionalized;

(iii) A temporary accommodation for not more than 90 days in the residence of another individual; or

(iv) A place not designed for, or ordinarily used, as a regular sleeping accommodation for human beings (a hallway, a bus station, a lobby or similar places).''

Prior to the FRA, State SNAP agencies were already required to screen for households experiencing homelessness to identify households eligible for the homeless shelter deduction. Using SNAP QC data, the Department estimates that approximately 3.2 percent of all SNAP participants experience homelessness. However, SNAP participants subject to the ABAWD time limit are much more likely to experience homelessness. In the most recent data available to the Department 20.6 percent of time-limited participants experience homelessness.[47]

In FY 2026 when this provision is fully implemented, the Department (using SNAP QC data) estimates 1.8 percent of all SNAP participants, approximately 766,000 individuals (615,000 individuals ages 18 to 49, and 151,000 individuals ages 50 to 54) experiencing homelessness may be affected by the new exception from the ABAWD work requirement and time limit because they meet the definition of a time-limited participant and are not working 20 or more hours per week.

The Department estimates that a small share (about 1 percent) of these individuals will be able to gain or increase their employment to at least 20 hours per week to retain SNAP eligibility. Compared to the general population of time-limited participants in SNAP, fewer participants who are experiencing homelessness are meeting the work requirement in the QC data. Additionally, individuals experiencing homelessness can face substantial barriers to gaining or retaining employment, including poor access to transportation, poor access to health care, and stigma against individuals experiencing homelessness. Therefore, the Department believes the share of time-limited individuals who are experiencing homelessness that will be able to increase their work hours is likely smaller than the 2.3 percent observed amongst all time-limited participants in the SNAP QC data.

The Department estimates that 32 percent of the remaining individuals will be excepted from the ABAWD work requirement and time limit for reasons other than the three new exceptions temporarily established by the FRA (*e.g.,* a physical or mental condition that limits ability to work) because they are exempt from the general work requirement for a reason other than disability. Finally, the Department estimates that approximately 40 percent of the remaining individuals will live in areas covered by a waiver of the time limit and, therefore, would not be subject to the time limit in absence of this provision.

After these adjustments discussed above, in FY 2026 the Department estimates 309,000 individuals experiencing homelessness between the ages of 18 and 54 will retain SNAP eligibility beyond 3 months in a 36-month period (averaging to 11 months of benefits gained per individual per year) and continue receiving an average of $305 per month, per person, in SNAP benefits because of the new exception for individuals experiencing homelessness. At full implementation in FY 2026, this represents a 0.92 percent increase in total annual SNAP benefit spending (transfers), or about $1.0 billion. The Department estimates federal transfers to increase over the nine-year period of FY 2023 to FY 2031 by a total of $7.3 billion because of this new exception for individuals experiencing homelessness.

BILLING CODE 3410–30–P

[47] This estimate includes 50-to-54-year-olds newly subject to the ABAWD work requirement and time limit.

BILLING CODE 3410–30–C

Veterans

Discussion: The FRA additionally provides a new exception from the ABAWD time limit for time-limited participants who are veterans. No previous unique work requirement exceptions have been applied to veterans in SNAP. To implement this change, the Department identified the need to standardize a definition of who is considered a veteran. The Department proposes to define veteran at 7 CFR 273.34(c)(8) as an individual who, regardless of the conditions of their discharge or release from, served in the United States Armed Forces (such as the Army, Marine Corps, Navy, Air Force, Space Force, Coast Guard, and National Guard), including an individual who served in a reserve component of the Armed Forces, or served as a commissioned officer of the Public Health Service, Environmental Scientific Services Administration, or the National Oceanic and Atmospheric Administration.

Effect on SNAP Participants: The Department does not collect information on SNAP applicants' and participants' military service history, so it is unable to precisely estimate how many SNAP participants may benefit from the veteran exception. Based on data from the 2022 ACS, the Department estimates 2.5 percent of SNAP participants are veterans, but a much smaller share (0.22 percent) may be veterans who are subject to the ABAWD work requirement and time limit.

In FY 2026, when the FRA's provisions are fully implemented, the Department estimates approximately 92,000 individuals (63,000 individuals between the ages of 18 and 49 and 29,000 individuals ages 50 to 54) are veterans that may be affected by the new exception to the ABAWD work requirement and time limit because they meet the definition of a time-limited participant and are likely not working 20 or more hours per week.

The Department estimates that 32 percent of these individuals will qualify for an exception from the ABAWD work requirement for reasons other than the three new exceptions temporarily established by the FRA (*e.g.,* a physical or mental condition that limits ability to work) because they are exempt from the SNAP general work requirement for a reason other than disability.

Finally, the Department estimates that approximately 40 percent of remaining individuals ages 18 to 49 and 30 percent of the remaining individuals ages 50 to 54 will live in areas covered by a geographic waiver of the time limit and, therefore, will not be subject to the time limit.

After these adjustments discussed above, in FY 2026 the Department estimates 39,000 individuals who are veterans between the ages of 18 and 54 will retain SNAP eligibility beyond 3 months in a 36-month period (averaging to 11 months of benefits gained per individual per year) and continue receiving an average of $264 per month, per person, in SNAP benefits because of the new exception from the time limit for veterans. At full implementation in FY 2026, this represents a 0.10 percent increase in total annual SNAP benefit spending (transfers), or about $115.0 million. The Department estimates federal transfers to increase over the nine-year period of FY 2023 to FY 2031 by a total of $787.6 million as a result of this new exception.

BILLING CODE 3410–30–C

Individuals Who Were in Foster Care

Discussion: The third new exception from the time limit prescribed by the FRA is for SNAP participants aged 24 and under who were in foster care on their 18th birthday or such higher age as the State has elected under Sec. 475(8)(B)(iii) of the Social Security Act. The Department notes that this definition does not require that an individual was in foster care in the State in which they are applying for or receiving SNAP benefits.

In creating the implementation guidance, the Department clarified that ''foster care under the responsibility of a State'' includes foster care programs run by Districts, Territories, or Indian Tribal Organizations. The Department also clarified that the exception applies to individuals who are in foster care when they reach 18 years of age even if they elect to stay in foster care up to the State's maximum age, as well as individuals aged 18 to 24 who were in foster care at the time they turned 18 years of age, even if the individual exits extended foster care before the maximum age.

Effect on SNAP Participants: The Department does not collect data on SNAP applicants' and participants' history in foster care, so it is unable to precisely estimate how many individuals will benefit from the new exception for former foster youth. Based on information from the Adoption and Foster Care Analysis and Reporting System (AFCARS) [48] about how many youth age out of foster care each year, the Department estimates that there are approximately 99,000 individuals between the ages of 18 and 24 who were in foster care at their 18th birthday but have since emancipated. Of those 99,000 individuals, the Department estimates that about 35,000 may be SNAP participants (0.08 percent of all SNAP participants) who are subject to the ABAWD work requirement and are not otherwise qualified for an exception. The remaining 64,000 individuals in this group are assumed to be not eligible for SNAP, already meeting the ABAWD work requirement, or not subject to the ABAWD work requirement and time limit (for reasons that can include being a student, having a child in their household, or having a disability).

In FY 2026, among these 35,000 individuals, the Department estimates that approximately 40 percent will live in areas that are covered by a geographic waiver of the time limit, and therefore will not be subject to the time limit. Therefore, the Department estimates about 21,000 individuals who are former foster youth will retain SNAP eligibility beyond 3 months in a 36-month period (averaging to 11 months of benefits gained per individual per year) and continue receiving an average of $262 per month in FY 2026 because of this new exception. In FY 2026, this represents a 0.05 percent increase in total annual SNAP benefit spending (transfers), or about $60.0 million. The Department estimates federal transfers to increase over the nine-year period of FY 2023 to FY 2031 by a total of $425.4 million as a result of this new exception.

BILLING CODE 3410–30–P

[48] Per ACF guidance to States, States must include in AFCARS all children in foster care under the responsibility for placement or care of the State title IV–B/IV–E agency, which includes Unaccompanied Refugee Minors. More detail can be found at: *https://www.acf.hhs.gov/orr/policy-guidance/clarification-unaccompanied-refugee-minor-urm-eligibility-chafee-independent.*

BILLING CODE 3410–30–C

Combined Impacts for All Changes to Exceptions—Federal Transfers

As a result of this proposed rule, the estimated net impact of the change in the age-based exceptions and the three new exceptions is an average net increase in SNAP participation of about 55,000 individuals per year when fully implemented in FY 2026. In FY 2026, this includes 345,000 participants losing eligibility, 369,000 participants retaining eligibility, and about 30,000 new participants.[49] The Department estimates that a small number of new participants (ages 18–49) will newly begin receiving SNAP benefits due to the new exceptions allowing individuals who are experiencing homelessness, are veterans, or were formerly in the foster care system to participate in SNAP who otherwise may have thought they would be ineligible due to the ABAWD work requirement and time limit. The Department estimates federal transfers to increase over the nine-year period of FY 2023 to FY 2031 by a total of $2.8 billion as a result of the change in the age-based exceptions and the new exceptions in the FRA. On an annual basis, federal transfers are estimated to increase by an average of $306.5 million.

In addition to the direct impacts discussed above, there are additional secondary impacts which are difficult to quantify. The individuals who will retain eligibility for SNAP benefits are less likely to experience increased food insecurity or poverty than if they had lost access to SNAP benefits in absence of the new exceptions provided by the FRA. This in turn could have societal impacts through decreased healthcare costs related to food insecurity and poverty or impacts on other nutrition assistance, including food banks. The Department notes that while there are studies that describe the relationships between SNAP, food security, poverty, and health care costs, these studies do not permit estimation of potential impacts on transfers specific to the dispersed ABAWD population that might be affected by this proposed rule.

BILLING CODE 3410–30–P

[49] This estimate of about 30,000 new participants assumes an increase of roughly 1 percent in the baseline number of time-limited adults ages 18 to 49. This is the Department's best estimate in the absence of better data.

BILLING CODE 3410–30–C

Combined Impacts for All Changes to Exceptions—Household Burden Costs

The Department expects there to be an increased time burden for 50-to-54-year-old SNAP participants who are newly considered to be subject to the ABAWD time limit. These individuals will be required to report work hours and review and respond to notices informing them of the ABAWD work requirement and time limit. Based on estimates provided in the burden table prepared for the proposed rule's information collection request, an estimated 366,751 individuals will experience an annual 15.5-minute burden related to these activities for total time of 94,744 hours annually and an annual cost of $2.3 million in FY 2026. In addition, 317,000 individuals within this group will also need to review and respond to Notices of Adverse Action (NOAAs) when they lose SNAP eligibility due to not meeting the work requirement, estimated to be an additional 4-minute burden per person for a time of 21,133 hours annually and a total annual cost of $502,616 in FY 2026.

Upon sunset of this provision on October 1, 2030, the upper limit of ages subject to the ABAWD work requirement will reverse to age 49 and the three new exceptions will be removed, pending any future legislative updates. Any 50-to-54-year-old participants who were subject to the time limit will stop accruing any countable months immediately at October 1, 2030. The Department expects 50-to-54-year-old participants who lost eligibility due to the time limit to return to the program gradually beginning in FY 2031.

However, the Department is unable to estimate whether some eligible individuals will not return to the program due to being unaware of changes in the work requirement rules, stigma, or any other reason. As individuals who had not been subject to the time limit during the duration of this rule due to the three new exceptions within the rule become subject to the time limit at their next recertification or screening during FY 2031, the Department estimates a one-time burden on 490,271 participants of 15.5 minutes related to work reporting administrative activities for a total of $3.4 million in FY 2031. While a portion of this group is expected to meet the work requirement, receive an exemption, or meet a different exception from the time limit, approximately 367,703 individuals are expected to have an additional 4-minute burden to review and respond to NOAAs, at a one-time total approximate cost of $653,188 in FY 2031.

Combined Impacts for All Changes to Exceptions—State Agency Administrative Costs

Implementation: State agencies began incurring administrative costs to implement the FRA's changes to exceptions from the ABAWD time limit in FY 2023 through various administrative activities, such as updating State eligibility systems; preparing for and executing worker training; updating relevant applications, notices, and forms; updating State SNAP regulations; and spending additional time with program participants to discuss program changes in relation to the individual's case.

The State administrative burden for initial implementation activities for all provisions of the proposed rule is estimated to be approximately 473,857 hours, totaling $10.3 million for start-up activities in FYs 2023 and 2024 for 53 State agencies, after 50 percent federal cost reimbursement. The Department is unable to disaggregate the portion of that cost that applies specifically to each provision of the proposed rule.

Ongoing: On an ongoing basis, State agencies will need to discuss the ABAWD work requirement, verify hours worked, and provide appropriate noticing to individuals who are newly subject to the ABAWD work requirement and time limit (estimated at 366,751 participants). This is estimated to take 15.5 minutes per individual and cost an estimated $1.6 million in FY 2026, after 50 percent federal cost reimbursement. The State agency will incur an additional 4-minute burden for each of the estimated 317,000 participants who will need to be issued Notices of Adverse Action (NOAAs) due to not meeting the work requirement for a total annual cost of $359,285 in FY 2026, after 50 percent federal cost reimbursement.

Sunsetting: For the sunsetting of this provision on October 1, 2030, the Department estimates that State agencies will again need to complete eligibility system updates; train eligibility workers; update relevant applications, notices, and forms; update State SNAP regulations; and spend time with program participants who will be impacted by this change. The sunsetting administrative costs are estimated to be a total one-time burden of 625,024 hours, equating to about $15.0 million for 53 State agencies in FYs 2030 and 2031 after 50 percent federal cost reimbursement.

Combined Impacts for All Changes to Exceptions—Federal Administrative Costs

Implementation: In addition to the federal transfer effects previously discussed, the Department expects it will take the Federal Government approximately 90 hours to make all administrative updates pertaining to implementation of this rule, resulting in an estimated one-time total expense of $6,760 in FY 2024. However, the Department is unable to disaggregate the portion of those 90 hours that apply specifically to each provision of the proposed rule. Additionally, the federal share of State agencies' administrative expenses to implement all provisions of the proposed rule is estimated to be a total one-time cost of $10.3 million for start-up activities in FYs 2023 and 2024. Similarly, the Department is unable to disaggregate the portion of that cost that applies specifically to each provision of the proposed rule.

Ongoing: To provide administrative support throughout the duration of the FRA's changes to exceptions from the ABAWD time limit, the Department estimates ongoing administrative costs to the Federal Government to be on average $32.2 million annually during years of full implementation (FY 2026–FY 2030) for the federal share of State agencies' ongoing administrative expenses.

Sunsetting: When the FRA exception provisions sunset on October 1, 2030, the Department estimates the federal administrative burden in FY 2030 to be a one-time cost of $5,813, and a one-time cost of $15.0 million in FYs 2030 and 2031 for the Federal share of State agencies' administrative expenses.

C. Requirement To Adjust the Number of Discretionary Exemptions Available to State Agencies Each Year

Discussion: The FRA reduces the allotment of discretionary exemptions State agencies will accrue in each fiscal year. Prior to the FRA, each fiscal year each State agency accrued an allotment of one-month exemptions equal to 12 percent of its at-risk time-limited participants; this FRA provision lowers that rate to 8 percent, beginning with the allotment State agencies have available for use in FY 2024. The provision also restricts each State's ability to carryover unused discretionary exemptions between fiscal years from all unused discretionary exemptions to only those allotted during the prior fiscal year. Starting in FY 2026, State agencies will only carryover unused discretionary exemptions earned for the previous fiscal year, not including historical balances.

Effect on SNAP Participants: It is difficult to predict the precise impacts of these two changes within each State, as well as across States. If a State agency was consistently using a high proportion of discretionary exemptions under the prior allotment of 12 percent, a small number of SNAP participants in that State may no longer receive a discretionary exemption and therefore lose SNAP eligibility as a result of the ABAWD time limit. If a State agency was not using a high proportion of their discretionary exemptions prior to the FRA change, this change may have no effect on SNAP participants in that State. The most recent data available to Department indicate that State agencies typically use less than an 8 percent allotment of discretionary exemptions. Between FY 2016 and FY 2019, only five instances were identified in which a State did not exceed their annual allotment, but used more exemptions than they would have earned for the fiscal year, assuming an allotment based on 8 percent of covered individuals.[50] As a result, this analysis scores the provision to lower allotments to 8 percent of covered individuals as having, at most, a nominal effect on SNAP benefit spending (transfers).

However, those State agencies that have exceeded an 8 percent allotment have tended to use many more exemptions than they had accrued for the relevant fiscal year. In other words, those States drew upon their banks of carried over exemptions. In the FY 2016–FY 2019 period, there were 33 instances of State agencies using carried over exemptions. Over those 33 instances, a total of 832,048 ''banked'' exemptions were used. Given that one exemption permits one time-limited participant to participate in SNAP for one additional month, this equates to

[50] Based on State agency-reported data on discretionary exemption usage. FY 2016–FY 2019 is used as the most recent period of data available as these are the most recent years in which State agencies used discretionary exemptions and during which the time limit was not waived nationwide by FFCRA.

approximately 69,337 individuals gaining a full year of SNAP participation (832,048 divided by 12 months) over the four-year period, or 17,334 individuals annually, on average. The Department does not have information on why States opted to use carried over exemptions in each of these cases. However, State agencies are known to use discretionary exemptions to exempt individuals from the time limit in areas that have been affected by a natural disaster or to mitigate the effects of an area losing coverage by a waiver of the time limit.

Beyond FY 2025, State agencies will no longer carryover unused exemptions indefinitely, which will reduce some State agencies' banks of available exemptions. As a result, State agencies may have reduced ability to use discretionary exemptions to extend time-limited individuals' SNAP participation in similar scenarios. However, the Department is unable to predict how many such scenarios could occur in future years and how a State agency would choose to use discretionary exemptions, nor how many individuals subject to the ABAWD time limit may be affected.

In FY 2024 and FY 2025, the Department anticipates that State agency application of discretionary exemptions could change as State agencies attempt to ''spend down'' discretionary exemptions that will otherwise expire. This ''use-or-lose'' scenario could incentivize some State agencies to use more discretionary exemptions in FYs 2024 and 2025, which could result in fewer individuals losing SNAP eligibility due to the ABAWD time limit in these two fiscal years. However, given that State agencies typically under-use the discretionary exemptions available to them, the Department does not expect measurable changes to SNAP participation or transfers to occur.

Effect on State Agencies: The implementation of this provision may require some State agencies to reconsider the State's approach to using discretionary exemptions, which could add burden hours for these State agencies. We are unable to estimate how many State agencies may be affected, but estimate the administrative burden to be nominal.

Effect on Federal Spending: The Department estimates nominal changes in federal transfers because of reductions in discretionary exemption allotments, from 12 percent to 8 percent, and restrictions on carryover of unused exemptions beyond one fiscal year.

While a decrease in available discretionary exemptions would mean a federal transfer savings if States consistently used all discretionary exemptions available to them each year prior to the reduction, State agencies' past patterns of discretionary exemption usages suggest they will not fully apply all discretionary exemptions available to them.

As previously discussed in the analysis of changes to exceptions, the Department expects it will take the Federal Government approximately 90 hours to make all administrative updates pertaining to implementation of this rule, resulting in an estimated one-time total expense of $6,760 in FY 2024. However, the Department is unable to disaggregate the portion of those 90 hours that apply specifically to each provision of the proposed rule.

Additionally, as previously discussed, the federal share of State agencies' administrative expenses to implement all provisions of the proposed rule is estimated to be a total one-time cost of $10.3 million in FYs 2023 and 2024. Similarly, we are unable to disaggregate the portion of that cost that applies specifically to each provision of the proposed rule. This provision is not expected to generate any ongoing administrative costs to the Federal Government. Finally, there are no sunsetting administrative costs pertaining to this provision, as it is enacted on a permanent basis.

D. Screening

Discussion: This provision would require State agencies to evaluate individuals to determine if they are subject to the time limit or if they qualify for an exception. This includes determining if an individual is exempt from the general work requirement, as individuals are not subject to the time limit if they meet an exemption from the general work requirement. The Department refers to this process as ''screening.'' Screening would be required at initial and recertification application and State agencies would be prohibited from assigning countable months to an individual if the State agency has not screened them for exceptions, including the new exceptions established by the FRA. If an individual subject to the time limit has a change in circumstances that result in them now meeting an exception, the State agency cannot assign a countable month if the information is not questionable. This is a longstanding expectation of State agencies that the Department proposes to outline at 7 CFR 271.2, 273,7(b)(3), and 273.24(k) to ensure countable months are not applied inappropriately.

Effect on SNAP Participants: This provision is intended to ensure that SNAP participants are not incorrectly deemed ineligible for SNAP for not meeting the ABAWD work requirement, without first requiring the State agency to determine that they are not eligible for any exceptions. The Department does not currently have information available that would permit it to estimate how many individuals may retain SNAP eligibility because of more effective screening for exceptions from the time limit and exemptions from the SNAP work requirements. Among those who do retain eligibility as a result of this provision, the Department estimates each individual will continue to receive an average of $252 in monthly SNAP benefits (25.9 percent of the TFP in FY 2024).

Aside from benefit impacts of this provision, SNAP participants are expected to bear an administrative burden due to increased screening. FNS estimates that screening for exceptions from the ABAWD work requirement and screening for exemptions from the general work requirement each require approximately 4 minutes of a participant's time. Some participants will only incur a 4-minute burden because they are only subject to the general work requirement. Individuals subject to the ABAWD work requirement are also subject to the general work requirement and therefore will incur 8 minutes of burden, per screening. In total, screening will affect approximately 19.0 million SNAP participants and equal approximately 1.7 million additional hours annually in FY 2026. This would equate to an estimated annual burden of $40.2 million across all individuals in FY 2026. Because this provision of the rule does not sunset, there are no expected burden costs of sunsetting this provision.

Effect on State Agencies: State agencies are expected to bear the administrative cost of updating their internal screening policies and practices; train workers on new procedures; and carry out any other administrative steps necessary to implement this provision. As discussed previously, the State administrative burden for initial implementation activities for all provisions of the proposed rule is estimated to be approximately 473,857 hours, totaling $10.3 million for start-up activities (including system changes) in FYs 2023 and 2024 for 53 State agencies, after 50 percent federal cost reimbursement. The Department is unable to disaggregate the portion of that administrative cost that applies specifically to each provision of the proposed rule.

Due to the additional estimated 4 or 8 minutes of time spent with participants during the screening process, explained above, the annual projected administrative burden to State agencies is 1.7 million hours, or approximately $28.8 million annually in FY 2026 after 50 percent federal cost reimbursement. Because this provision of the rule does not sunset, there are no expected administrative costs of sunsetting this provision.

Effect on Federal Spending: Federal administrative burden associated with implementing the final rule have been discussed in previous sections of the RIA. The federal share of State agencies' administrative expenses to comply with this update is estimated to be approximately $28.8 million annually in FY 2026 for 53 State SNAP agencies. There are no sunsetting administrative costs pertaining to this provision, as it is enacted on a permanent basis.

V. Distributive Impacts

A. Differences in State-Level Impacts

Effects of the FRA's provisions in the proposed rule vary by State due to differences in demographics, as well as differences in how States administer SNAP. For example, States that regularly qualify for and request waivers of the ABAWD time limit will have smaller portions of their participants affected by changes to the ABAWD work requirement. The provision to make 50-to-54-year-olds subject to the ABAWD work requirement and time limit will have slightly different effects on States' participants, depending on the share of their participants that falls into the newly expanded ABAWD age range. While 2 percent of all SNAP participants are estimated to fall into the expanded 50-to-54-year-old age range of time-limited participants, the share of each State's SNAP participants varies from 0.5 percent in Nebraska, to 4.8 percent in the U.S. Virgin Islands. See Appendix Table A for estimates for each State.

Similarly, the distribution of individuals experiencing homelessness across the U.S. is not uniform. Information available from the U.S. Department of Housing and Urban Development (HUD) indicates that the homeless population in the U.S. is concentrated in a handful of States. The January 2023 Point-in-Time estimates [51] of homeless individuals from HUD indicate that over half of all individuals experiencing homelessness in the U.S. (56.8 percent) lived in just five States: California, New York, Florida, Washington, and Texas. California, alone, accounted for 27.8 percent of all individuals experiencing homelessness.

The share of each State's SNAP participants who are experiencing homelessness, or are time-limited participants *and* experiencing homelessness, also varies. Nationally, about 3.2 percent of SNAP participants are experiencing homelessness, according to pre-pandemic FY 20 SNAP QC data. More specifically, about 1.9 percent of SNAP participants are considered subject to the ABAWD work requirement and experiencing homelessness. The State with the lowest share of time-limited participants experiencing homelessness is Mississippi (0.1 percent) and the State with the highest share is California (5.9 percent). See Appendix Table B for estimates for each State.

It should be noted that the accuracy of the estimates in this section can be affected by the size of a State's caseload. States with smaller caseloads also have smaller SNAP QC data samples, which can affect the reliability of State-level estimates based on the QC data.

B. Differences Among Subgroups

While the ABAWD work requirement and time limit do not apply to individuals who are considered disabled or elderly by SNAP rules, the Department acknowledges that some SNAP participants who are elderly or disabled may nevertheless be affected by the provisions in this proposed rule. A small share of individuals subject to the ABAWD work requirement and time limit (8.3 percent) are in a SNAP household with an elderly or disabled person. If these individuals lose eligibility because of the ABAWD time limit, their household will experience a decrease in total SNAP benefits available to the household. The provisions included in this proposed rule will not affect SNAP households with children, as individuals subject to the ABAWD work requirement, by definition, do not have children in their SNAP household.

Individuals affected by the provisions in the proposed rule are more likely to be male, when compared all adults between ages 18 and 54 in the SNAP caseload (50 percent, compared to 35 percent). While participants subject to the ABAWD work requirement and time limit between ages 18 and 54 are equally divided between males and females, those who are over age 50 are more likely to be female (54 percent) and those who experience homelessness are more likely to be male (61 percent). See Table 9, below, for estimates of the sex of SNAP participants in several subgroups affected by the proposed rule's provisions. The Department does not have data on the sex of SNAP participants who are subject to the ABAWD work requirement and time limit who are also veterans or former foster youth.

Table 9: Sex of SNAP Participants Affected by Proposed Rule's Provisions

Sex	All SNAP participants ages 18-54	Time-limited participants, ages 18-49	Time-limited participants, ages 50-54	All time-limited participants, ages 18-54	Time-limited participants, ages 18-54 experiencing homelessness
Male	35%	51%	46%	50%	61%
Female	65%	49%	54%	50%	39%
Total	100%	100%	100%	100%	100%

Data from pre-pandemic FY 2020 SNAP QC data.

The distribution of races and Hispanic ethnicity among SNAP participants affected by the proposed rule is generally similar to the distribution among all SNAP participants ages 18 to 54, with the exception of homeless time-limited participants. SNAP participants subject to the ABAWD work requirement ages 18 to 54 have roughly the same likelihood of being white or black (42 percent and 27 percent, respectively) as all SNAP participants ages 18 to 54 (42 percent and 26 percent). However, SNAP participants who are subject to the ABAWD work requirement and experiencing homeless are less likely to be white (36 percent) than SNAP participants ages 18 to 54 (42 percent), and more likely to be black or Hispanic or Latino of any race (30 percent and 17 percent, respectively) compared to all SNAP participants ages 18 to 54 (26 percent and 12 percent). It is important to note that the Department does not have data on the race or ethnicity of 14 percent of SNAP participants ages 18 to 54, which could affect these estimates. See Table 10, below, for estimates of the race and ethnicity of SNAP participants in several subgroups affected by the proposed rule's provisions. The Department does not have data on the race or ethnicity of SNAP participants who are subject to the ABAWD work requirement who are also veterans or former foster youth.

VI. Uncertainties

A. Effectiveness of Screening for New Exceptions

In this analysis, the Department assumes that all individuals subject to the ABAWD work requirement are correctly screened for qualifying exceptions. For example, we assume that all individuals who are experiencing homelessness and subject to the ABAWD work requirement are correctly excepted from the time limit. Human error is likely to result in some share of individuals not receiving an exception for which they qualify, and it is also possible that some participants will not disclose information that could lead to an exception (for example, a participant may not want to disclose their experience with the foster care system). As a result, the count of SNAP participants who lose eligibility or retain eligibility due to the proposed rule could be higher or lower in reality. However, given that the Department estimates that the share of individuals losing eligibility is very similar to the share receiving one of the three new exceptions, we do not anticipate that the overall net transfer impact of the rule would change significantly.

B. ABAWD Waiver Coverage in Future Years

The number of SNAP participants who are subject to the ABAWD time limit at any given time is affected by the extent of geographic waivers of the ABAWD time limit. In this RIA, we assume the national unemployment rate will remain low through FY 2031.

As a result, we also assume that fewer SNAP participants (about 40 percent) will live in an area covered by a waiver of the time limit than is true during economic downturns, like the Great Recession or the COVID–19 public health emergency. If a higher share of individuals live in an area where the time limit is waived, then both transfer increases and decreases will be reduced. Fewer 50-to-54-year-olds would lose eligibility due to the time limit, reducing transfer savings. Conversely, if individuals who receive an exception from the time limit due to being a veteran, homeless, or a qualifying former foster youth live in an area with a waiver of the time limit, there would be no transfer increase associated with their retaining eligibility because of an exception.

Alternatively, if a lower share of individuals live in an area where the time limit is waived, then both transfer increases and decreases would rise. However, given that the Department estimates that the share of individuals losing eligibility is very similar to the share of individuals retaining eligibility, we do not anticipate that the overall net transfer impact of the rule would change significantly.

C. Number of Individuals Who Will Be Eligible for New Exceptions for Veterans and Former Foster Youth

Unlike homelessness, the Department does not gather data on whether SNAP applicants or participants are veterans or former foster youth. Therefore, we are unable to precisely estimate how many individuals who may be subject to the ABAWD work requirement may benefit from these two new exceptions. This RIA contains the Department's best estimates of how many individuals may be affected. If the number of individuals who receive one of these two new exceptions is higher than anticipated, there would be a slight increase in transfers. If the number is lower than anticipated, there would be a slight decrease in transfers. Given that the Department believes time-limited individuals who are veterans or former foster youth up to age 24 make up a small portion of SNAP

participants (cumulatively, approximately 0.22 percent of participants), we do not expect this uncertainty to result in significant changes to the net transfer impact associated with the proposed rule.

VII. Sensitivity Analysis

Table 11, below, illustrates how the RIA's estimates might change if different assumptions regarding the uncertainties discussed above were used. Sensitivity analysis estimates were produced using the same general methodology as the primary estimates in the RIA. Alternative assumptions used for the sensitivity analysis include:

A. Assume 10 percent of estimated groups receiving a new exception are not appropriately identified during screening and do not receive the exception.

B. Assume employment outcomes are worse than anticipated and waiver coverage settles at 10 percentage points higher than projected.

C. Assume employment outcomes are better than anticipated and waiver coverage settles at 10 percentage points lower than projected.

Table 11 breaks down each scenario's impact on overall federal transfers during the first year of full implementation (FY 2026), as well as over the nine-year analysis period of this RIA, FY 2023 through FY 2031.

Table 11: Sensitivity Analysis

Estimated Change in SNAP Benefits ($Millions)	One-Year (FY 2026)	Nine-Year (FY 2023 – 2031)
In RIA as proposed	$268.1	$2,758.3
Scenario A: Assume 10% less effective screening for exceptions	$135.8	$1,835.7
Scenario B: Assume 10 percentage point increase in waiver coverage	$214.3	$2,229.1
Scenario C: Assume 10 percentage point decrease in waiver coverage	$322.0	$3,287.5

The proposed rule would result in a 0.27 percent increase in total SNAP benefit spending over the nine-year period of analysis, or $268.1 million in FY 2026 and $2.8 billion over FY 2023–FY 2031. If screening for the three new exceptions in this rule were to be conducted with only 90 percent efficacy (thereby reducing the number of those excepted by 10 percent) as demonstrated in Scenario A, total SNAP benefit spending would increase to a smaller degree, by 0.18 percent. In FY 2026, Scenario A would decrease the cost of the proposed rule by $132.2 million, compared to the primary estimates in this RIA. Over the nine-year period FY 2023–FY 2031, Scenario A would decrease the cost of the proposed rule by approximately $922.6 million, compared to the primary estimates in this RIA. The smaller increase in transfers under Scenario A is due to fewer time-limited participants retaining SNAP eligibility as a result of the FRA's three new exceptions from the time limit.

Analyses of Scenarios B and C indicate that a 10-percentage point increase or decrease to the share of individuals covered under waivers of the time limit would result in a corresponding $53.8 million increase or decrease in overall SNAP spending in reference year FY 2026 ($529.2 million over FY 2023–FY 2031) compared to the primary estimates in this RIA. This represents approximately a 0.05 percentage-point increase or decrease in transfer spending.

VIII. Alternatives

With one exception, the policy changes analyzed in this RIA were prescribed by the FRA; therefore, assessment of policy alternatives is limited. The proposed rule would implement changes to exceptions form the ABAWD work requirement and time limit in a way that closely adheres to the FRA's statutory language. In order to provide needed guidance to State agencies implementing the FRA's changes to the ABAWD work requirement, the Department has provided definitions of who qualifies for the FRA's new exceptions from the time limit for individuals experiencing homelessness, veterans, and former foster youth up to age 24 in this proposed rulemaking. However, these definitions do not expand upon the categories included in the FRA.

The Department has determined the clarification of definitions of who qualifies for the FRA's new exceptions would have limited effect on the welfare effects of the rule. The Department did not consider alternative definitions for these groups because it sought to align its definitions with the terms used in the FRA and with definitions used by federal agencies who are experts in serving those groups, to the extent allowable by the Food and Nutrition Act of 2008, as amended.

The Department is proposing one addition to the FRA's required provisions to amend the regulations to clarify requirements for screening individuals for exceptions from the work requirements and time limit. This added provision would require State agencies to screen for exceptions at initial and recertification application and prohibits them from assigning countable months to an individual if the State agency has not screened the individual for exceptions. Further, it also addresses State agency responsibilities when an individual experiences a change in circumstances during the certification period that results in a change in exception status.

The Department considered finalizing the proposed rule without this screening requirement. Omitting the screening requirement would not have a measurable effect on transfers, but would reduce State administrative expenses, household burden expenses, and federal administrative costs; the precise reduction in administrative costs for this provision alone cannot be disaggregated from the projected administrative costs.

However, in the absence of regulations clarifying screening requirements, questions from State agencies arose during FRA implementation of how and when it may identify if an individual meets one of the new exceptions from the time limit. As such, the Department determined that standardizing national screening practices was necessary to improve consistency in program operations and provide quality customer service in line with the December 13, 2021, Executive Order on *Transforming Federal Customer Experience and Service Delivery to Rebuild Trust in Government*. To effectively ensure screening practices are standard across State agencies, the Department is proposing to require State agencies to first screen for exemptions from the general work requirement, as this is an important first step in evaluating which, if any, work requirements apply to an individual, since individuals are not subject to the time limit if they meet an exemption from the general work requirement. The proposed rule therefore clarifies requirements on both screening for the

general work requirement, as well as to determine whether an individual is subject to the time limit, in order to ensure uniform national practices.

The Department did not consider any other alternatives for inclusion in the proposed rule.

No. 84 April 30, 2024

Part III

Department of Health and Human Services

Administration for Children and Families

45 CFR Part 410

Unaccompanied Children Program Foundational Rule; Final Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

45 CFR Part 410

RIN 0970–AC93

Unaccompanied Children Program Foundational Rule

AGENCY: Office of Refugee Resettlement (ORR), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: This final rule adopts and replaces regulations relating to key aspects of the placement, care, and services provided to unaccompanied children referred to the Office of Refugee Resettlement (ORR), pursuant to ORR's responsibilities for coordinating and implementing the care and placement of unaccompanied children who are in Federal custody by reason of their immigration status under the Homeland Security Act of 2002 (HSA) and the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008 (TVPRA). This final rule establishes a foundation for the Unaccompanied Children Program (UC Program) that is consistent with ORR's statutory duties, for the benefit of unaccompanied children and to enhance public transparency as to the policies governing the operation of the UC Program. This final rule implements the 1997 *Flores* Settlement Agreement (FSA). As modified in 2001, the FSA provides that it will terminate 45 days after publication of final regulations implementing the agreement. ORR anticipates that any termination of the settlement based on this final rule would only be effective for those provisions that affect ORR and would not terminate provisions of the FSA that apply to other Federal Government agencies.

DATES: *This final rule is effective:* July 1, 2024.

FOR FURTHER INFORMATION CONTACT: Toby Biswas, Director of Policy, Unaccompanied Children Program, Office of Refugee Resettlement, Administration for Children and Families, Department of Health and Human Services, Washington, DC, (202) 205–4440 or *UCPolicy-RegulatoryAffairs@acf.hhs.gov.*

UC Program—Unaccompanied Children Program

II. Executive Summary

A. Purpose of the Regulatory Action

On October 4, 2023, the Office of Refugee Resettlement (ORR) published a notice of proposed rulemaking (NPRM or proposed rule), to replace and supersede regulations at 45 CFR part 410, and to codify policies and requirements concerning the placement, care, and services provided to unaccompanied children in Federal custody by reason of their immigration status and referred to ORR.[1] The NPRM was based on statutory authorities and requirements provided under the Homeland Security Act of 2002 (HSA) [2] and the William Wilberforce Trafficking Victims Protection Reauthorization Act of 2008 (TVPRA),[3] and proposed to implement the terms of the 1997 *Flores* Settlement Agreement (FSA) that create responsibilities for HHS and ORR. ORR proposed in the NPRM that the requirements apply to all care provider facilities, including both standard programs and non-standard programs, as defined below, unless otherwise specified (88 FR 68909). ORR noted that the proposed rule was necessary to codify a uniform set of standards and procedures that will help to ensure the safety and well-being of unaccompanied children in ORR care, implement the substantive terms of the FSA, and enhance public transparency as to the policies governing the operation of the Unaccompanied Children Program (UC Program).

The proposed rule provided a 60-day public comment period, which ended on December 4, 2023. This final rule responds to comments received and adopts the proposed rule, with some changes as discussed herein. ORR thanks the public for commenting on the NPRM.

B. Summary of Select Provisions

This final rule codifies ORR policies and requirements for the placement, care, and services provided to unaccompanied children in Federal custody by reason of their immigration status and referred to ORR, as discussed in section IV of this final rule. In subpart A, ORR is finalizing its proposal to define terms that are relevant to the criteria and requirements in the NPRM and to codify the general principles that apply to the care and placement of unaccompanied children in ORR care. In subpart B, ORR is finalizing its proposals regarding the criteria and requirements that apply with respect to placement of unaccompanied children at ORR care provider facilities, including specific criteria for placement at particular types of ORR care provider facilities. In subpart C, ORR is finalizing policies and procedures regarding the release of unaccompanied children from ORR care to vetted and approved sponsors. In subpart D, ORR is finalizing the standards and services that it must meet and provide to unaccompanied children in ORR care provider facilities. In subpart E, ORR is finalizing requirements for the safe transportation of unaccompanied children while in ORR's care. In subpart F, ORR is finalizing reporting requirements for care provider facilities such that ORR may compile and maintain statistical information and other data on unaccompanied children. In subpart G, ORR is finalizing requirements and policies regarding the transfer of unaccompanied children in ORR care. In subpart H, ORR is finalizing requirements for determining the age of an individual in ORR care. In subpart I, ORR is finalizing its proposal to codify requirements for emergency or influx facilities (EIFs), which are ORR facilities

that are opened during a time of emergency or influx. In subpart J, ORR is finalizing requirements regarding the availability of administrative review of ORR decisions. Finally, in subpart K, ORR is finalizing its proposal to establish an independent ombud's office that would promote important protections for all children in ORR care.

C. Summary of Costs and Benefits

This final rule codifies current ORR requirements for compliance with the FSA, court orders, and statutes, as well as certain requirements under existing ORR policy and cooperative agreements. As discussed in section VII.A of this final rule, HHS and ORR expect these requirements to impose limited additional costs, including those costs incurred by the Federal Government to increase the provision of legal services to unaccompanied children in limited circumstances, to supplement costs incurred by grant recipients in order to comply with the finalized requirements (see below), to establish a risk determination hearing process, and to establish the Unaccompanied Children Office of the Ombuds (UC Office of the Ombuds) and other administrative staffing needs. In subpart D at § 410.1309, ORR is finalizing its proposal, to the greatest extent practicable, subject to available resources as determined by ORR, and consistent with section 292 of the Immigration and Nationality Act (INA) (8 U.S.C. 1362), that all unaccompanied children who are or have been in ORR care would have access to legal advice and representation in immigration legal proceedings or matters funded by ORR. In subpart J, ORR is finalizing the establishment of a risk determination hearing process. To facilitate this process, ORR has developed forms for use by unaccompanied children, their parents/legal guardians, or their legal representatives for which we estimate the costs of completion to range from $10,187 to $56,589 per year. In subpart K, ORR discusses the establishment of an Office of the Ombuds for the UC Program. In addition to the Ombuds position itself, ORR anticipates the need for support staff in the office. ORR estimates the annual cost of establishing and maintaining this office would be $1,718,529, which includes the cost of 10 full-time personnel, as discussed in further detail in VII.A.2 of this final rule.

ORR also notes that all care provider facilities and service providers discussed in this final rule are recipients of Federal awards (*e.g.,* cooperative agreements or contracts), and the costs of maintaining compliance with these proposed requirements are allowable costs under the Basic Considerations for cost provisions at 45 CFR 75.403 through 75.405,[4] in that the costs are reasonable, necessary, ordinary, treated consistently, and are allocable to the award. If there are additional costs associated with the policies discussed in this final rule that were not budgeted, and cannot be absorbed within existing budgets, the recipient would be able to submit a request for supplemental funds to cover the costs.

III. Background and Purpose

A. The UC Program

The purpose of this rule is to codify policies, standards, and protections for the UC Program, consistent with the HSA and TVPRA, and to implement the substantive requirements of the FSA as they pertain to ORR. On March 1, 2003, section 462 of the HSA transferred responsibilities for the care and placement of unaccompanied children from the Commissioner of the Immigration and Naturalization Service (INS) to the Director of ORR. The HSA defines certain relevant terms and establishes ORR responsibilities with respect to unaccompanied children. The HSA defines ''unaccompanied alien child,'' a term ORR uses synonymously with ''unaccompanied child,'' as ''a child who—(A) has no lawful immigration status in the United States; (B) has not attained 18 years of age; and (C) with respect to whom—(i) there is no parent or legal guardian in the United States; or (ii) no parent or legal guardian in the United States is available to provide care and physical custody.'' [5] The TVPRA, meanwhile, added requirements for other executive branch departments and agencies to expeditiously transfer unaccompanied children in their custody to ORR's care and custody once identified, and together with HHS and other specified federal agencies to establish policies and programs to ensure unaccompanied children are protected from human trafficking and other criminal activities.[6] Both statutes are described in further detail in the paragraphs below. Pursuant to these statutory requirements, the UC Program provides a safe and appropriate environment for unaccompanied children in ORR custody. In most cases, unaccompanied children enter ORR custody via transfer from DHS. When DHS immigration officials, or officials from other Federal agencies or departments, transfer an unaccompanied child in their custody to ORR, ORR promptly places the unaccompanied child in the least restrictive setting that is in the best interests of the child, taking into consideration danger to self, danger to the community, and risk of flight. ORR considers the unique nature of each child's situation, the best interest of the child, and child welfare principles when making placement, clinical, case management, and release decisions. To carry out its statutory responsibilities, and consistent with its responsibilities under the FSA, ORR currently funds residential care providers that provide temporary housing and other services to unaccompanied children in ORR custody. These care providers have been primarily State-licensed and must also meet ORR requirements to ensure a high-quality level of care. These multiple providers comprise a continuum of care for children, including placements in individual and group homes, shelter, heightened supervision, secure facilities, and residential treatment centers. While in ORR custody, unaccompanied children are provided with classroom education, healthcare, socialization/recreation, mental health services, access to religious and legal services, and case management. Unaccompanied children generally remain in ORR custody until they are released to a vetted and approved parent or other sponsor in the United States, are repatriated to their home country, obtain legal status, or otherwise no longer meet the statutory definition of an unaccompanied child (*e.g.,* turn 18). Consistent with the limits of its statutory authority, and in accordance with current ORR policy, all children who turn 18 years old while in ORR's care and custody are transferred to DHS for a custody determination. Once transferred to DHS, that agency considers placement in the least restrictive setting available after taking into account the individual's danger to self, danger to the community, and risk of flight, in accordance with applicable legal authority.

B. History and Statutory Structure

1. HSA and TVPRA

The HSA abolished the former INS and created DHS. The HSA transferred many of the immigration functions from the INS to DHS, but it transferred functions under the immigration laws of the United States with respect to the care of unaccompanied children to ORR.[7] The HSA makes the ORR Director responsible for a number of functions with respect to unaccompanied children, including coordinating and implementing their care and placement, ensuring that unaccompanied children's interests are considered in actions and

decisions relating to their care, making and implementing placement determinations, implementing policies with respect to the care and placement of children, and overseeing the infrastructure and personnel of facilities in which unaccompanied children reside.[8] The HSA also states that ORR shall not release unaccompanied children from custody upon their own recognizance, and requires ORR to consult with appropriate juvenile justice professionals and certain Federal agencies in relation to placement determinations to ensure that unaccompanied children are likely to appear at all hearings and proceedings in which they are involved; are protected from smugglers, traffickers, and others who might seek to victimize or otherwise engage them in criminal, harmful, or exploitative activity; and are placed in a setting in which they are not likely to pose a danger to themselves or others.[9] ORR notes that under its current policies, such consultation is subject to privacy protections for unaccompanied children. For example, ORR restricts sharing certain case-specific information with the Executive Office for Immigration Review (EOIR) and DHS that may deter a child from seeking legal relief. Subject to such protections, ORR provides notification of the placement decisions to U.S. Immigration and Customs Enforcement (ICE) and, if referred by U.S. Customs and Border Protection (CBP), to CBP. ORR provides the following notification information: identifying information of the unaccompanied child, ORR care provider name and address, and ORR care provider point of contact (name and telephone number).[10]

In 2008, Congress passed the TVPRA, which further elaborated duties with respect to the care and custody of unaccompanied children. The TVPRA provides that, except as otherwise provided with respect to certain unaccompanied children from contiguous countries,[11] and consistent with the HSA, the care and custody of all unaccompanied children, including responsibility for their detention, where appropriate, is the responsibility of the Secretary of HHS. The TVPRA states that each department or agency of the Federal Government must notify HHS within 48 hours upon the apprehension or discovery of an unaccompanied child or any claim or suspicion that a noncitizen individual in the custody of such department or agency is under the age of 18.[12] The TVPRA states further that, except in exceptional circumstances, any department or agency of the Federal Government that has an unaccompanied child in its custody shall transfer the custody of such child to HHS not later than 72 hours after determining such child is an unaccompanied child. Furthermore, the TVPRA requires the Secretary of HHS and other specified Federal agencies to establish policies and programs to ensure that unaccompanied children in the United States are protected from traffickers and other persons seeking to victimize or otherwise engage such children in criminal, harmful, or exploitative activity.[13] The TVPRA describes requirements with respect to safe and secure placements for unaccompanied children, safety and suitability assessments of potential sponsors for unaccompanied children, legal orientation presentations, access to counsel, and child advocates, among other requirements. HHS delegated its authority under the TVPRA to the Assistant Secretary for Children and Families, which then re-delegated the authority to the Director of ORR.[14]

2. The Flores Settlement Agreement Terms and Implementation

On July 11, 1985, four noncitizen children in INS [15] custody filed a class action lawsuit in the U.S. District Court for the Central District of California on behalf of a class of minors detained in the custody of the INS (*Flores* litigation).[16] At that time, the INS was responsible for the custody of minors entering the United States unaccompanied by a parent or legal guardian. The *Flores* litigation challenged ''(a) the [INS] policy to condition juveniles' release on bail on their parents' or legal guardians' surrendering to INS agents for interrogation and deportation; (b) the procedures employed by the INS in imposing a condition on juveniles' bail that their parents' or legal guardians' [sic] surrender to INS agents for interrogation and deportation; and (c) the conditions maintained by the INS in facilities where juveniles are incarcerated.'' [17] The plaintiffs claimed that the INS's release and bond practices and policies violated, among other things, the INA, the Administrative Procedure Act (APA), and the Due Process Clause and Equal Protection Guarantee under the Fifth Amendment.[18] After over 10 years of litigation, the U.S. Government and *Flores* plaintiffs entered into the ''*Flores* Settlement Agreement,'' which was approved by the district court as a consent decree on January 28, 1997.[19]

The FSA applies to both unaccompanied children, as defined in the HSA, and to children accompanied by their parents or legal guardians,[20] but ORR notes that this final rule is intended specifically to codify requirements regarding the care of unaccompanied children who have been transferred to the care and custody of ORR. As relevant to ORR, the FSA imposes several substantive requirements for Government custody of unaccompanied children, including requiring that they be placed in the ''least restrictive setting appropriate to the minor's age and special needs,'' [21] and establishing a general policy favoring release of unaccompanied children where it is determined that detention of the unaccompanied child is not required either to secure the child's timely appearance for immigration proceedings or to ensure the unaccompanied child's safety or that of others.[22] When release is appropriate, the FSA establishes an order of priority with respect to potential sponsors. If no sponsor is available, an unaccompanied child will be placed at a care provider facility licensed by an appropriate State agency, or, in the discretion of the Government, with another adult individual or entity seeking custody. Under the original terms of the FSA, unaccompanied children whom the former INS was unable to release upon apprehension and detention remained in INS custody, typically in a licensed program, until they could be appropriately released; currently, under the FSA, unaccompanied children who are not released remain in ORR legal custody and may be transferred or released only under the authority of ORR. The FSA also mandates that any noncitizen child who remains in Government custody for removal proceedings is entitled to a bond hearing before an immigration judge, ''unless the [child] indicates on the Notice of Custody Determination form that he or she refuses such a hearing.'' [23] The FSA contains many other provisions relating to the care of unaccompanied children, including the minimum standards required at licensed care provider facilities described in Exhibit 1.

The FSA states that within 120 days of the final district court approval of the agreement, the Government shall initiate action to publish the relevant and substantive terms of the Agreement in regulation.[24] In 1998, the INS published a proposed rule based on the substantive terms of the FSA, entitled ''Processing, Detention, and Release of Juveniles.'' [25] Over the subsequent years, that proposed rule was not finalized. The FSA originally included a termination date, but in 2001, the parties agreed to extend the agreement

and added a stipulation that terminates the FSA ''45 days following defendants' publication of final regulations implementing t[he] Agreement.'' [26] In January 2002, the INS reopened the comment period on the 1998 proposed rule,[27] but the rulemaking was ultimately terminated. Thus, as a result of the 2001 Stipulation, the FSA remains in effect. The U.S. District Court for the Central District of California has continued to rule on various motions filed in the case and oversee enforcement of the FSA.

3. The 2019 Final Rule

On September 7, 2018, DHS and HHS issued a joint proposed rule, entitled ''Apprehension, Processing, Care, and Custody of Alien Minors and Unaccompanied Alien Children'' (2018 Proposed Rule).[28] The purpose of the proposed rule was to implement the substantive terms of the FSA, and thus enable the district court to terminate the agreement. The rule proposed to adopt provisions that were intended to parallel the relevant substantive terms of the FSA, with some modifications to reflect statutory and operational changes put in place since the FSA was entered into in 1997, along with certain other changes.[29] A final rule was promulgated on August 23, 2019 (2019 Final Rule), which comprised two sets of regulations: one issued by DHS and the other by HHS. The HHS regulations addressed only the care and custody of unaccompanied children.[30] The DHS regulations addressed other provisions of the FSA that pertained to DHS, including the requirement that after DHS apprehends unaccompanied children it should transfer them to the custody of HHS.[31]

After DHS and HHS issued the 2018 Proposed Rule and before the 2019 Final Rule was published, plaintiffs in the *Flores* litigation filed a Motion to Enforce the FSA. The court deferred ruling on the Motion, ordering DHS and HHS to file a notice upon issuance of final regulations, which DHS and HHS did in August 2019. Later that month, DHS and HHS also filed a Notice of Termination and Motion in the Alternative to Terminate the FSA, while Plaintiffs filed a supplemental brief addressing their Motion to Enforce. Plaintiffs' Motion to Enforce presented the following two separate but related issues: (1) whether the 2019 Final Rule would effectively terminate the FSA, and (2) if not, to what extent the Court should enjoin the Government from implementing the 2019 Final Rule. On September 27, 2019, approximately one month after the 2019 Final Rule was published, the District Court for the Central District of California entered an Order granting Plaintiffs' Motion to Enforce insofar as it sought an order declaring that the Government failed to terminate the FSA, denied the Government's Motion to Terminate the FSA, and issued a permanent injunction consistent with its order.[32]

On December 29, 2020, in *Flores* v. *Rosen,* the U.S. Court of Appeals for the Ninth Circuit affirmed in part and reversed in part the District Court Order.[33] Regarding the HHS regulations applicable to the care and custody of unaccompanied children in the 2019 Final Rule, the Court of Appeals held that the regulations were ''largely consistent'' with the FSA, with two exceptions.[34] First, it held that the HHS regulation allowing placement of a minor in a secure facility upon an agency determination that the minor is otherwise a danger to self or others broadened the circumstances in which a minor may be placed in a secure facility, and therefore was inconsistent with the FSA. Second, it held that provisions providing a hearing to unaccompanied children held in secure or staff-secure placement only if requested was inconsistent with the FSA's opt-out process for obtaining a bond hearing. Although the Ninth Circuit held that the majority of the HHS regulations could take effect, it also held that the District Court did not abuse its discretion in declining to terminate the portions of the FSA covered by those regulations, noting that the Government moved to ''terminate the Agreement in full, not to modify or terminate it in part.'' [35] Consistent with its findings, the Ninth Circuit held that the FSA ''therefore remains in effect, notwithstanding the overlapping HHS regulations'' and that the Government, if it wished, could move to terminate those portions of the FSA covered by the valid portions of the HHS regulations.[36]

Separately, a group of states brought litigation in the District Court for the Central District of California seeking to enjoin the Government from implementing the 2019 Final Rule (*California* v. *Mayorkas*), based on other grounds including the APA.[37] The court stayed the case, given the related litigation brought by *Flores* plaintiffs, which culminated in the Ninth Circuit decision in *Flores* v. *Rosen.* After that decision, the plaintiffs in *California* v. *Mayorkas* filed a supplemental briefing requesting a narrowed preliminary injunction, alleging that several portions of the HHS provisions of the 2019 Final Rule violated the APA. Subsequently, the parties entered into settlement discussions. On December 10, 2021, the parties informed the court that HHS did not plan to seek termination of the FSA under the terms of the stipulation or to ask the court to lift its injunction of the HHS regulations. Instead, HHS would consider a future rulemaking that would more broadly address issues related to the custody of unaccompanied children by HHS and that would replace the rule being challenged in *California* v. *Mayorkas.* Based on this agreement, the court ordered that the *California* v. *Mayorkas* litigation should be placed into abeyance with regard to the Plaintiffs' claims against HHS while HHS engaged in new rulemaking to replace and supersede the HHS regulations in the 2019 Final Rule.[38] Further, among other things, HHS agreed that while it engaged in new rulemaking, it would not seek to lift the injunction of the 2019 Final Rule or seek to terminate the FSA as to HHS under the 2019 Final Rule, and that it would make best efforts to submit an NPRM to OMB by April 15, 2023, providing quarterly updates to the Court should it not meet that deadline.[39] In accord with the relevant order, ORR made best efforts to submit the NPRM to OMB, and ultimately sent the document to OMB on April 28, 2023.[40] The NPRM initiated that broader rulemaking effort, and reflected the stipulated agreement in *California* v. *Mayorkas.* The NPRM applied, as relevant, the findings of the Ninth Circuit regarding the 2019 Final Rule in *Flores* v. *Rosen.* Because the permanent injunction of the 2019 Final Rule was never lifted, and the FSA continued to remain in effect, ORR does not anticipate that any third parties would have developed reliance interests on the HHS regulations in the 2019 Final Rule. Differences between the 2019 Final Rule and this final rule are discussed in relevant portions of the preamble below.

4. Lucas R. Litigation

Another ongoing lawsuit involving ORR, filed in 2018, also has ramifications for this rule. *Lucas R.* v. *Becerra,*[41] a class action lawsuit, was filed in the U.S. District Court for the Central District of California, alleging ORR had violated the FSA, the TVPRA, the U.S. Constitution, and section 504 of the Rehabilitation Act of 1973 (section 504). Based on the plaintiffs' allegations, the court certified five plaintiff classes comprising all children in ORR custody:

(1) who are or will be placed in a secure facility, medium-secure facility, or residential treatment center (RTC), or whom ORR has continued to detain in any such facility for more than 30 days, without being afforded notice and an opportunity to be heard before a neutral and detached

decisionmaker regarding the grounds for such placement (*i.e.,* the ''step-up class'');

(2) whom ORR is refusing or will refuse to release to parents or other available custodians within 30 days of the proposed custodian's submission of a complete family reunification packet on the ground that the proposed custodian is or may be unfit (*i.e.,* ''the unfit custodian class'');

(3) who are or will be prescribed or administered one or more psychotropic medications without procedural safeguards (*i.e.,* the ''drug administration class'');

(4) who are natives of non-contiguous countries and to whom ORR is impeding or will impede legal assistance in legal matters or proceedings involving their custody, placement, release, and/or administration of psychotropic drugs (*i.e.,* the ''legal representation class''); and

(5) who have or will have a behavioral, mental health, intellectual, and/or developmental disability as defined in 29 U.S.C. [section] 705, and who are or will be placed in a secure facility, medium-secure facility, or [RTC] because of such disabilities (*i.e.,* the ''disability class'').[42]

On August 30, 2022, the U.S. District Court for the Central District of California granted preliminary injunctive relief concerning the allegations of the unfit custodian, step-up, and legal representation classes. As of October 31, 2022, ORR implemented new policies and procedures on issues identified in the Court's preliminary injunction order, which ORR is codifying in this final rule. As stated in the NPRM, as of September 2023, ORR remained in active litigation in the *Lucas R.* class action. The proposed rule stated that depending on developments in the case, ORR may incorporate additional provisions in the final rule (88 FR 68913).

On January 5, 2024, the Court issued an order preliminarily approving settlement agreements that the parties negotiated regarding the legal representation, drug administration, and disability classes.[43] A final approval hearing is scheduled for May 2024. As discussed in this final rule, ORR is finalizing some proposals from the NPRM as modified to account for developments in the *Lucas R.* litigation. As described herein, in this final rule, ORR intends to codify the requirements of the *Lucas R.* preliminary injunction. In addition, in this final rule, ORR is incorporating the terms of the anticipated legal representation settlement, among other enhancements to legal services for unaccompanied children. However, ORR is not incorporating in the final rule all of the various detailed provisions in the settlements concerning the drug administration and disability classes, although ORR is incorporating many commenters' recommendations in these areas. The drug administration and disability settlements themselves contemplate implementation over time, thereby affording ORR an opportunity to see how the terms of those settlements work in practice as they are implemented, and to assess whether changes may be needed over time due to evolving circumstances. The disability settlement in particular requires that ORR work with experts to undertake a year-long comprehensive needs assessment to evaluate the adequacy of services, supports, and resources currently in place for children with disabilities in ORR's custody across its network, and to identify gaps in the current system, which will inform the development of a disability plan and future policymaking that best address how to effectively meet the needs of children with disabilities in ORR's care and custody. Therefore, while ORR is not codifying all the terms of the anticipated disability and drug administration settlement agreements in this final rule, ORR is implementing terms in this rule that broadly reflect its commitment to ensuring that unaccompanied children are protected from discrimination and have equal access to the UC Program, as is consistent with section 504, and that psychotropic medications are administered appropriately in the best interest of the child and with meaningful oversight.

C. Statutory and Regulatory Authority

As discussed above, under the HSA and TVPRA, the ORR Director[44] is responsible for the care and placement of unaccompanied children. Under the HSA, ORR is responsible for ''coordinating and implementing the care and placement of [unaccompanied children] who are in Federal custody by reason of their immigration status,'' ''identifying a sufficient number of qualified individuals, entities, and facilities to house [unaccompanied children],'' ''overseeing the infrastructure and personnel of facilities in which [unaccompanied children reside],'' and ''conducting investigations and inspections of facilities and other entities in which [unaccompanied children] reside, including regular follow-up visits to such facilities, placements, and other entities, to assess the continued suitability of such placements.''[45] Under the TVPRA, Federal agencies are required to notify HHS within 48 hours of apprehending or discovering an unaccompanied child or receiving a claim or having suspicion that a noncitizen in their custody is under 18 years of age.[46] The TVPRA further requires that, absent exceptional circumstances, any Federal department or agency must transfer an unaccompanied child to the care and custody of HHS within 72 hours of determining that a noncitizen child in its custody is an unaccompanied child. The TVPRA requires that HHS and other specified Federal agencies establish policies and programs to ensure that unaccompanied children are protected from traffickers and other persons seeking to victimize or exploit children.[47] Among other things, it also requires HHS to place unaccompanied children in the least restrictive setting that is in the best interest of the child, and states that in making such placements it may consider danger to self, danger to the community, and risk of flight. As previously discussed, the Secretary of HHS delegated the authority under the TVPRA to the Assistant Secretary for Children and Families,[48] who in turn delegated the authority to the Director of ORR.[49] It is under this delegation of authority that ORR now issues regulations describing how ORR meets its statutory responsibilities under the HSA and TVPRA and implements the relevant and substantive terms of the FSA for the care and custody of unaccompanied children.

In addition to requirements and standards related to the direct care of unaccompanied children, HHS is establishing a new UC Office of the Ombuds to create a mechanism that allows unaccompanied children and stakeholders to raise concerns with ORR policies and practices to an independent body. The Ombuds will be tasked with fielding concerns from any party relating to the implementation of ORR regulations, policies, and procedures; reviewing individual cases, conducting site visits and publishing reports, including reports on systemic issues in ORR custody, particularly where there are concerns about access to services or release from ORR care; and following up on grievances made by children, sponsors, or other stakeholders. As stated in the NPRM, at 88 FR 68913, HHS has authority to establish this office under its authority to ''establish policies and programs to ensure that unaccompanied alien children in the United States are protected from traffickers and other persons seeking to victimize or otherwise engage such children in criminal, harmful, or exploitative activity.''[50]

D. Basis and Purpose of Regulatory Action

The purpose of this rule is to finalize a regulatory framework that (1) codifies policies and practices related to the care

and custody of unaccompanied children, consistent with ORR's statutory authorities; and (2) implements relevant provisions of the FSA. The FSA describes ''minimum'' standards for care of unaccompanied children at licensed care provider facilities, but Congress subsequently enacted legislation establishing requirements for the UC Program. This final rule implements the protections set forth in the FSA and broadens them consistent with the current legal and operational environment, which has significantly changed since the FSA was signed over 25 years ago.

E. Severability

This is a comprehensive rule containing many subparts that address many distinct aspects of the UC Program. To the extent any subpart or portion of a subpart is declared invalid by a court, ORR intends for all other subparts to remain in effect. For example, ORR expects that if a court were to invalidate Subpart B (or any of Subpart B's discrete provisions) relating to the placement of a child, all other subparts—such as Subpart C (release of the child), Subpart D (minimum standards and services), Subpart E (transportation), etc.—may continue to operate and should remain operative independently of the invalidated subpart.

Additionally, each Subpart also contains many distinct provisions, many of which may also operate independently of one another; thus, the invalidation of one particular provision within a particular subpart would not necessarily have implications for other aspects of that subpart. For example, within Subpart D, the provision of access to routine medical and dental care, and other forms of healthcare at § 410.1307 would not be impacted by the invalidation of the provision of structured leisure time activities at § 410.1302(c)(4) or provision of legal services under § 410.1309. ORR intends that if one or more provisions within a subpart are invalidated, that all other provisions of that subpart (and all other subparts of the rule) remain in effect.

IV. Discussion of Elements of the Proposed Rule, Public Comments, Responses, and Final Rule Actions

Subpart A—Care and Placement of Unaccompanied Children

ORR proposed in the notice of proposed rulemaking (NPRM) to codify requirements and policies regarding the placement, care, and services provided to unaccompanied children in ORR custody (88 FR 68914). The following provisions identify the scope of this part, the definitions used throughout this part, and principles that apply to ORR placement, care, and services decisions.

ORR received many comments on the proposed rule that were not directed at any specific proposal and will address those here.

Comment: Many commenters supported the proposed rule, stating that it improved public transparency as to the policies governing the program and provided rights and protections for unaccompanied children. Many commenters supported codifying practices based on the HSA and TVPRA and implementing and enhancing the terms of the FSA and stated that a uniform set of standards and procedures would create conformity and clarity to provide for the well-being of unaccompanied children in ORR care. Several commenters cited ORR's efforts to clarify, strengthen, and codify these requirements and ensure the consistent implementation of child welfare principles and protections for children in ORR's custody. Another commenter commended ORR on its efforts to incorporate child-centered, trauma-informed principles into the regulatory standards for the UC Program and adopting more inclusive language. Other commenters appreciated that the provisions are tailored to the individualized needs of unaccompanied children and ensure protection from individuals who seek to exploit or victimize unaccompanied children.

Response: ORR thanks the commenters for their support.

Comment: One commenter encouraged ORR to provide clarity and more specifics in areas where appropriations would impact the ability to carry out the proposed rule.

Response: ORR thanks the commenter. As discussed in Section VI, funding for UC Program services is dependent on annual appropriations from Congress. The regulations specifically mention that post-release services (PRS) and funding for legal service providers are limited to the extent appropriations are available. The availability of child advocates and the enhancement of certain services, such as the transition to a community-based care model, are also impacted by appropriations. ACF's Justification of Estimates for Appropriation Committees provides additional information regarding the impact of its requested budget.[51]

Comment: One commenter indicated that sections within this document do not align with the latest policy updates.

Response: ORR thanks the commenter and has included discussion of policy updates throughout this final rule as applicable.

Comment: Some commenters expressed that the rule would circumvent accountability, provide less transparency, and harm children.

Response: ORR thanks the commenters for their comments. ORR believes that codifying these requirements will provide more accountability and will strengthen the UC Program to better protect children. The NPRM notice and comment process provided additional transparency and provided the public an opportunity to comment on ORR's processes and policies.

Comment: Many commenters expressed opposition to the rule and cited concerns that the proposed regulations did not do enough to prevent child trafficking.

Response: ORR appreciates and shares the public's concern for the welfare of unaccompanied children that come through its care, as well as the need to mitigate and prevent human trafficking. Among other similar responsibilities, HHS, together with other specified agencies, has a duty to ''establish policies and programs to ensure that unaccompanied alien children in the United States are protected from traffickers and other persons seeking to victimize or otherwise engage such children in criminal, harmful, or exploitative activity. . . .'' [52] Accordingly, these agencies, including ORR, have developed extensive policies and procedures to protect unaccompanied children and that are memorialized in subregulatory guidance and memoranda of agreement (MOA).[53] This rule contains provisions that are consistent with HHS's statutory responsibilities, many of which codify and strengthen current policy. For example, this rule codifies ORR's historic practice of screening all unaccompanied children for potential trafficking concerns, including during intake, assessments, and sponsor assessments, and its use of Significant Incident Reports to report such concerns. The rule also codifies the requirement that ORR refer concerns of human trafficking to ACF's Office on Trafficking in Persons (OTIP) within 24 hours in accordance with reporting requirements under the Trafficking Victims Protection Act of 2008. OTIP reviews the concerns to assess whether the unaccompanied child is eligible for benefits and services. Concerns of human trafficking are also reported to OTIP by post-release service providers, the ORR National Call Center (NCC),

legal services providers, law enforcement, child welfare entities, healthcare providers, other child-serving agencies, and advocates.

Under this rule, if ORR care provider staff, such as a case manager or clinician, suspect that a child is a victim of trafficking or is at risk of trafficking at any point during their interaction with an unaccompanied child, they must make a referral to HHS's ACF OTIP and to DHS's Homeland Security Investigations Division and DHS's Center for Countering Human Trafficking for further investigation. OTIP provides further assistance to ensure that victims can access appropriate care and services. Such care is then coordinated with ORR to provide direct referrals for grant-funded comprehensive case management services, medical services, food assistance, cash assistance, and health insurance tailored to the child's individual needs. While ORR does not retain legal custody of unaccompanied children post-release, ORR considers what, if any, additional action should be taken consistent with its legal authorities, including but not limited to: reporting the matter to local law enforcement; child protective services; or state child welfare licensing authorities; providing PRS to the released child and their sponsor, if the child is still under 18; requiring corrective action to be taken against a care provider facility to remedy any failure to comply with Federal and state laws and regulations, licensing and accreditation standards; ORR policies and procedures, and child welfare standards; or providing technical assistance to the care provider facility, as needed, to ensure that deficiencies are addressed.

Comment: One commenter stated their belief that the proposed rule was subject to the National Environmental Policy Act (NEPA) and argued that ORR must conduct an environmental assessment prior to finalizing this rule or it will be in violation of NEPA. The commenter pointed to the location of a facility in a community as having an environmental impact.

Response: ORR disagrees that an environmental assessment is necessary under NEPA for two reasons. NEPA applies when there are ''major Federal actions significantly affecting the quality of the human environment.'' 42 U.S.C. 4332(C). However, in this rule, HHS is not taking any Federal action that would ''affect'' the quality of the human environment because it is essentially memorializing aspects of existing UC Program procedures in a regulation, rather than where they reside now, in a settlement agreement, statutes, and the ORR UC policy guide. Because the rule, as a general matter, does not materially change the UC Program, it does not significantly affect the quality of the human environment to implicate NEPA. With respect to the ''risk determination hearings'' described at § 410.1903, ORR notes that those hearings already occur, but at DOJ instead of at HHS, as set forth in this rule.

With respect to the creation of the Office of the Ombuds, as described in subpart K, HHS has determined that the Ombuds Office falls under a categorical exclusion as delineated in the HHS General Administration Manual,[54] which describes certain categories of actions that do not require environmental review. Specifically, the Office of the Ombuds falls under Section 30–20–40(B)(2)(g), which excludes ''liaison functions (*e.g.,* serving on task forces, ad hoc committees or representing HHS interests in specific functional areas in relationship with other governmental and non-governmental entities).'' To carry out its responsibility to confidentially and informally receive and investigate complaints and concerns related to unaccompanied children's experiences in ORR care, the Office will liaise with stakeholders in the UC Program, including both governmental and non-governmental entities, and as such it is subject to the HHS categorical exclusion.

In general, HHS has determined that the rule falls under a categorical exclusion in section 30–20–40(B)(2)(f) of the HHS General Administration Manual, which provides that environment impact statements and environmental assessments are not required for ''grants for social services (*e.g.,* support for Head Start, senior citizen programs or drug treatment programs) except projects involving construction, renovation, or changes in land use.'' The UC Program provides grants for social services. Although the commenter points to locating a facility as having environmental impact, the rule does not in any way address issues relating to site selection for ORR facilities (*i.e.,* the rule does not describe projects involving construction, renovation, or changes in land use). To the extent the UC Program going forward may engage in such activities, ORR would engage in proper environmental review for each such activity. This rule, however, does not implicate environmental review.

Comment: One commenter stated their belief that the proposed rule did not include a cost estimate or financial analysis of what the burden would be to American taxpayers, and stated that before the rule is finalized, the Office of Management and Budget should review the rule.

Response: The proposed rule, and this final rule, provide a cost estimate in the section titled Economic Analysis. The Office of Management and Budget reviewed the proposed and final rules before publication.[55]

Final Rule Action: ORR will finalize the majority of the proposals, with some changes as discussed throughout this rule.

Section 410.1000 Scope of This Part

ORR proposed in the NPRM, at § 410.1000(a), that the scope of this part pertain to the placement, care, and services provided to unaccompanied children in Federal custody by reason of their immigration status and referred to ORR (88 FR 68914). As described in section III of this final rule, ORR's care, custody, and placement of unaccompanied children is governed by the HSA and TVPRA, and ORR provides its services to unaccompanied children in accordance with the terms of the FSA. ORR also clarified that part 410 would not govern or describe the entire program. For example, part 411 (describing requirements related to the prevention of sexual abuse of unaccompanied children in ORR care) would remain in effect under this rule. ORR notes that its current policies and practices are described in the online ORR Policy Guide,[56] Field Guidance,[57] manuals describing compliance with ORR policies and procedures, and other communications from ORR to care provider facilities. ORR will continue to utilize these vehicles for its subregulatory guidance and will revise them in connection with publication of the final rule as needed to ensure compliance with the final rule. The provisions of this part would, in many cases, codify existing ORR policies and practices. Further, ORR will continue to publish subregulatory guidance as needed to clarify the application of these regulations.

ORR also proposed, at § 410.1000(b), that the provisions of this part are separate and severable from one another and that if any provision is stayed or determined to be invalid, the remaining provisions shall continue in effect (88 FR 68914). Additionally, ORR proposed in the NPRM at § 410.1000(c) that ORR does not fund or operate facilities other than standard programs, restrictive placements (which include secure facilities, including residential treatment centers, and heightened supervision facilities), or EIFs, absent a

specific waiver as described under § 410.1801(d) or such additional waivers as are permitted by law (88 FR 68914).

Comment: One commenter questioned the consistency of the level of detail used in the NPRM, stating that some parts of the proposed regulation were very detailed while other requirements were more general. The commenter suggested that the rule should include either a statement of general guiding principles from which specific policy and operational directives will be drawn or, conversely, should include all specific operational directives for all requirements, thus replacing existing or significantly modifying the existing ORR Policy Guide.

Response: ORR thanks the commenter for their comment. As clarified in the NPRM, part 410 will not govern or describe the entire program (88 FR 68914). Where the regulations contain less detail, subregulatory guidance will provide specific guidance on requirements. By keeping some of the requirements subregulatory, ORR will be able to make more frequent, iterative updates in keeping with best practices and to allow continued responsiveness to the needs of unaccompanied children and care provider facilities. The requirements codified in this rule, on the other hand, may in the future be amended only through future notice and comment rulemaking or changes in law.

Comment: One commenter stated that while they appreciated the Administration's work to codify standards, they believe it is also important to preserve ORR's ability to nimbly respond to emerging issues through updates to its policy guide, as ORR did during the COVID–19 pandemic. The commenter recommended that ORR include language making it clear that nothing in the final rule precludes ORR from updating policy and guidance to address emergent situations while prioritizing the best interests of children.

Response: ORR reiterates the clarification that part 410 will not govern or describe the entire program and that further guidance will be provided through subregulatory guidance in order to remain nimble to changing circumstances as the commenter suggests.

Final Rule Action: After consideration of public comments, ORR is finalizing § 410.1000 as proposed.

Section 410.1001 Definitions

ORR proposed in the NPRM, at § 410.1001, to codify the definitions of terms that apply to this part (88 FR 68914 through 68916). Some definitions are the same as those found in statute, or other authorities (*e.g.,* the definition of ''unaccompanied child'' is the same as the definition of ''unaccompanied alien child'' as found in the HSA, 6 U.S.C. 279(g)(2)). Notably, for purposes of this rule, ORR updated certain terms and definitions provided in the FSA (*e.g.,* the definition of ''influx''). In the NPRM, ORR provided an explanation for certain definitions, to further explain ORR's rationale when the rule applies the relevant terms. As discussed in this section, ORR is revising some of the proposed definitions.

ORR proposed in the NPRM the definition of ''care provider facility'' to generally describe any placement type for unaccompanied children, except out of network (OON) placements, and as a result is broader than the term ''standard program,'' provided below, which, for example, does not include EIFs (88 FR 68914). ORR also noted that this definition does not reference ''facilities for children with special needs,'' a term used in the definition of ''licensed program'' in the FSA and 45 CFR 411.5. ORR considered not using the term ''facilities for children with special needs'' within the part for the reasons set forth below in this section at the proposed definition of ''standard program.'' Moreover, ORR considered this definition for ''care provider facility'' to encompass any facility in which an unaccompanied child may be placed while in the custody of ORR, including any facility exclusively serving children in need of particular services and treatment.

ORR proposed in the NPRM a definition of ''disability'' that is distinct from the NPRM's proposed definition for a ''special needs unaccompanied child,'' discussed later in this section and which is derived specifically from the FSA (88 FR 68914). Although some unaccompanied children may have a disability and have special needs, the terms are not synonymous. For example, an unaccompanied child exiting ORR custody may be considered to have a disability within the definition set forth in section 504 even if the child does not require services or treatments for a mental and/or physical impairment.

ORR proposed in the NPRM a definition of ''emergency'' that differs from the definition previously finalized at 45 CFR 411.5, which defines the term as ''a sudden, urgent, usually unexpected occurrence or occasion requiring immediate action'' (88 FR 68914). ''Emergency,'' for purposes of the proposed rule, would reflect the term's usage in the context of the requirements proposed in the NPRM.

With respect to the definition of the proposed term ''EOIR accredited representative,'' ORR noted in the NPRM that DOJ refers to these individuals simply as ''accredited representatives,'' see 8 CFR 1292.1(a)(4), but for purposes of the NPRM, ORR adopted the term ''EOIR accredited representative'' (88 FR 68914).

ORR proposed in the NPRM that the definition of ''heightened supervision facility'' incorporate language consistent with the definition of ''medium secure facility'' provided in the FSA at paragraph 8 (88 FR 68914). This term replaces the term ''staff secure facility'' as used under existing ORR policies. ORR decided to change its terminology because it had become clear that the prior term was not well understood and did not effectively convey information about the nature of such facilities.

ORR proposed in the NPRM that the definition of ''influx'' would change the threshold for declaring an influx, for ORR's purposes, from the FSA standard, which ORR believes is out of date considering current migration patterns and its organizational capacity (88 FR 68914 through 68915). The FSA defines influx as ''those circumstances where the INS has, at any given time, more than 130 minors eligible for placement in a licensed program.'' ORR's definition, however, would not impact the rights, and responsibilities of other parties of the FSA. ORR believes that the proposed definition more appropriately reflects significantly changed circumstances since the inception of the FSA and provides a more realistic, fair, and workable threshold for implementing safeguards necessary in cases where a high percentage of ORR's bed capacity is in use. The 1997 standard of 130 minors awaiting placement does not reflect the realities of unaccompanied children referrals in the past decade, in which the number of unaccompanied children referrals each day typically exceeds, and sometimes greatly exceeds, 130 children. To leave this standard as the definition of influx would mean, in effect, that the program is always in influx status. Accordingly, ORR provided a more realistic and workable threshold for implementing safeguards necessary in cases where a high percentage of ORR bed capacity is in use.

With respect to the definition of ''post-release services,'' ORR noted in the NPRM that assistance linking families to educational resources may include but is not limited to, in appropriate circumstances, assisting with school enrollment; requesting an English language proficiency assessment; seeking an evaluation to determine whether the child is eligible

for a free appropriate public education (which can include special education and related services) or reasonable modifications and auxiliary aids and services under the Individuals with Disabilities Education Act or section 504; and monitoring the unaccompanied child's attendance and progress in school (88 FR 68915). ORR noted that while the TVPRA requires that follow-up services must be provided during the pendency of removal proceedings in cases in which a home study occurred, the nature and extent of those services would be subject to available resources.

ORR noted, in the NPRM, with respect to the proposed definition of ''runaway risk,'' the FSA and ORR policy currently use the term ''escape risk'' (88 FR 68915). See FSA paragraph 22 (defining ''escape risk'' as ''a serious risk that the minor will attempt to escape from custody,'' and providing a non-exhaustive list of factors ORR may consider when determining whether an unaccompanied child is an escape risk—*e.g.,* whether the unaccompanied child is currently under a final order of removal, the unaccompanied child's immigration history, and whether the unaccompanied child has previously absconded or attempted to abscond from Government custody). ORR proposed in the NPRM to update this term to ''runaway risk,'' which is a term used by state child welfare agencies and Federal agencies to describe children at risk from running away from home or their care setting (88 FR 68915). Rather than basing its determination of runaway risk solely on the factors described in the FSA, ORR proposed in the NPRM that such determinations must be made in view of a totality of the circumstances and should not be based solely on a past attempt to run away. This definition of runaway risk is consistent with how the term is used in the FSA to describe escape from ORR care, *i.e.,* from a care provider facility. ORR noted throughout the proposed rule that the TVPRA uses the term ''risk of flight,'' stating HHS ''may'' consider ''risk of flight,'' among other factors, when making placement determinations.[58] ORR understands that in the immigration law context, ''risk of flight'' refers to an individual's risk of not appearing for their immigration proceedings.[59] ORR proposed in the NPRM, with respect to its responsibilities toward unaccompanied children in its custody, to interpret ''risk of flight'' as including ''runaway risk,'' thereby adding runaway risk to the list of factors it would consider in making placement determinations. Runaway risk often overlaps with concern that an unaccompanied child may not appear for the child's immigration proceedings. ORR also noted that runaway risk may also relate to potential danger to self or the community, given the inherent risks to unaccompanied children who run away from custody (88 FR 68915).

With respect to the proposed definition of ''secure facility,'' ORR noted that the FSA uses but does not provide a definition for this term (88 FR 68915). Nevertheless, the proposed definition is consistent with the provisions of the FSA that apply to secure facilities. ORR also noted that the proposed definition differs from the definition in the 2019 Final Rule, which could have been read to indicate that any contract or cooperative agreement for a facility with separate accommodations for minors is a secure facility. Such a definition risks erroneously confusing other types of ORR placements that are not secure with secure placements and, therefore, ORR proposed in the NPRM an updated definition in the NPRM.

ORR proposed in the NPRM to change the definition of ''special needs unaccompanied child,'' to the term ''special needs minor'' as described within the FSA at paragraph 7 and by using the phrase ''intellectual or developmental disability'' instead of ''mental illness or retardation'' as used in the FSA (88 FR 68915). ORR understands that this update reflects current terminology which has superseded the terminology used in the FSA (''retardation''). Although an unaccompanied child with a disability, as defined in this section, could also be a ''special needs unaccompanied child'' as incorporated here, the definition of disability is broader and thus the terms are not synonymous. To further this clarification, ORR proposed in the NPRM a separate definition for disability earlier in this section that incorporates the meaning of the term across applicable governing statutory authorities. ORR also considered not defining and not using the term ''special needs unaccompanied child'' within the part for the reasons set forth below at proposed §§ 410.1103 and 410.1106.

ORR proposed in the NPRM a definition of ''standard program'' that reflects and updates the term ''licensed program'' at paragraph 6 of the FSA (88 FR 68915 through 68916). The FSA does not discuss situations where States discontinue licensing, or exempt from licensing, childcare facilities that contract with the Federal Government to care for unaccompanied children because such facilities provide shelter and services to unaccompanied children as has happened recently in some States.[60] ORR proposed in the NPRM a definition of ''standard program'' that is broader in scope to account for circumstances wherein licensure is unavailable in the State to programs that provide residential, group, or home care services for dependent children when those programs are serving unaccompanied children. ORR notes that most States where ORR has care provider facilities have not taken such actions, and that wherever possible standard programs would continue to be licensed consistent with current practice under the FSA. However, ORR considered substituting the term ''licensed program'' with the proposed updated term ''standard program'' in order to establish that the requirement that facilities in those States must still meet minimum standards, consistent with requirements for licensed facilities expressed in the FSA at Exhibit 1, in any circumstance in which a State will not license a facility because the facility is housing unaccompanied children.[61] ORR solicited comments on using the proposed definition of ''standard program'' in lieu of the term ''licensed program.''

ORR proposed in the NPRM a definition for ''standard program'' to encompass any program operating non-secure facilities that provide services to unaccompanied children in need of particular services and treatment or to children with particular mental or physical conditions (88 FR 68916). Given this, ORR believed the continued use of language such as ''facilities for children with special needs'' and ''facilities for special needs minors,'' as used in the FSA definition of ''licensed program,'' was unnecessary for this regulation, and potentially problematic for reasons discussed elsewhere within this section and at proposed §§ 410.1103 and 410.1106. ORR included this language to ensure consistency with the FSA, but it considered not using the term ''special needs unaccompanied child'' or specifying that facilities for special needs unaccompanied children operated by a standard program are covered by the requirements that apply to standard programs in the part. Therefore, ORR also solicited comments in this section on its proposal to not include in the definition of ''standard program'' the FSA terminology used in the term ''licensed program'' referencing facilities for special needs unaccompanied children or a facility for special needs unaccompanied children.

ORR proposed in the NPRM to define ''trauma bond'' consistent with how the Department of State's Office to Monitor and Combat Trafficking in Persons defines the term in its factsheet, Trauma

Bonding in Human Trafficking (88 FR 68916).[62]

ORR proposed in the NPRM to define ''trauma-informed,'' based upon its belief that a trauma-informed approach to the care and placement of unaccompanied children is essential to ensuring that the interests of children are considered in decisions and actions relating to their care and custody (88 FR 68916).[63] ORR interprets trauma-informed system, standard, process, or practices consistent with the 6 Guidelines To A Trauma-Informed Approach adopted by the Centers for Disease Control and Prevention (CDC) and developed by the Substance Abuse and Mental Health Services Administration (SAMHSA).

ORR received comments on the following definitions.

Attorney of Record

Comment: One commenter recommended changes to the definition of ''attorney of record.'' The commenter recommended that ORR revise the definition to specifically define an ''attorney'' as ''an individual licensed to practice law in any U.S. jurisdiction'' but then make clear that non-attorneys may represent a child in their immigration proceedings. The commenter also urged ORR to remove reference to the requirement that an attorney ''protects [unaccompanied children] from mistreatment, exploitation, and trafficking, consistent with 8 U.S.C. 1232(c)(5),'' explaining that the statute cited requires that HHS ensure counsel because that will protect unaccompanied children from mistreatment, exploitation, and trafficking, but not that counsel is required to protect the child. The commenter continued, that although in many instances having counsel will ensure a child's protection, the duty to protect, as outlined in the proposed definition, may conflict with an attorney's duty to represent the child's expressed interests as required by the rules of professional conduct.
