FEDERAL REGISTER

Vol. 89 Wednesday,
No. 85 May 1, 2024

Pages 34945–35684

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Presidential Documents

Title 3—

The President

Proclamation 10733 of April 26, 2024

National Small Business Week, 2024

By the President of the United States of America

A Proclamation

Small businesses are the engine of our economy and the heart and soul of our communities. They employ nearly half of all private sector workers and contribute to every industry. Getting them what they need to grow is one of the best investments our country can make. During National Small Business Week, we celebrate the grit and strength of every entrepreneur who has chased a dream and put in the hard work each day to see their business and our Nation thrive.

When I took office, the pandemic was raging, and our economy was reeling. Hundreds of thousands of small businesses had closed forever, and millions more hung on by a thread. Too many families faced the possibility of losing not only their life's work but also their hopes of leaving something behind for their kids. But we turned that around. My Administration reformed the landmark Paycheck Protection Program, which got quick help to thousands of small businesses so they could keep paying their workers. We delivered $450 billion in relief to help 6 million small businesses cover their bills and stay afloat. I signed the American Rescue Plan, which provided additional support to 100,000 restaurants and to 225,000 child care centers, which so many parents rely on to be able to work themselves.

Three years later, America is in the midst of a historic small business boom. Americans have filed a record 17 million new business applications—and every one of them is an act of hope. The share of Black-owned businesses has more than doubled between 2019 and 2022, and Latino business ownership is growing at the fastest pace in at least a decade, generating new jobs and new wealth in local communities. In all, our economy has added 15 million new jobs since I took office. Growth is strong, wages are rising, and inflation is down. We are witnessing a small business boom. Across the country, we are experiencing a great comeback story—and small businesses are playing a key part.

From day one, they have been at the heart of my plan to grow our economy from the middle out and bottom up. That is why—as my Bipartisan Infrastructure Law makes the biggest investment in our Nation's infrastructure in generations, rebuilding roads, bridges, ports, public transit, and more—we are relying on America's Main Street entrepreneurs to help us rebuild. We set a goal of awarding $37 billion in these investments to small businesses so they can benefit from these projects and create good-paying jobs. We are making sure every home and business in America has access to affordable, high-speed internet by the end of the decade so entrepreneurs everywhere can access more customers and have a fair shot. We passed the CHIPS and Science Act to expand semiconductor manufacturing and ensure industries of the future are Made in America, creating tens of thousands of jobs, strengthening supply chains, and supporting small suppliers and businesses across the country. As our Inflation Reduction Act makes the most significant investment in fighting climate change ever in the world, it is creating new markets for small clean-energy companies. Altogether, my Investing in America Agenda has attracted $688 billion in private-sector investments from companies that are bringing jobs back to America where they

belong, helping to rebuild our economy, our supply chains, and our small businesses.

To help small businesses grow, we are also expanding access to capital and to markets by using the power of the Federal Government as both a lender and customer. Mom and pop businesses with only a handful of employees often need small loans of $100,000 or less, but not all banks offer them. That is why the Small Business Administration (SBA) is expanding access to low-cost small-dollar loans and increasing the number of lenders that offer affordable guaranteed loans. The SBA finalized rules that will provide rural and minority-, women-, and veteran-owned small businesses with more affordable loan options by authorizing more non-traditional lenders, like Community Development Financial Institutions, to offer guaranteed loans. Because the Federal Government buys more goods and services than any entity in the world, we set a goal of increasing the share of Federal contracting dollars that must go to small disadvantaged businesses from less than 10 percent before I took office to 15 percent. Last year, we awarded a record-setting $76 billion to these businesses, helping level the playing field and close the racial wealth gap.

Meanwhile, we invested $10 billion in State-level small-business programs, which will catalyze tens of billions in private investments to expand access to capital for small businesses and entrepreneurs. Further, my Administration has invested nearly $70 million in the Women's Business Centers network, which is designed to promote and support women-owned businesses and can now be found in all 50 States, the District of Columbia, and Puerto Rico.

Small businesses may only employ a few people instead of thousands, but together they make up 40 percent of our economy and 99.9 percent of all American businesses. They are the glue that helps hold our Nation together. In their dedication to their communities and in their courage, hope, sweat, and drive, small business owners embody the spirit of America and our boundless possibilities. This week, we recommit to making that future real and leaving no one behind.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim April 28 through May 4, 2024, as National Small Business Week. I call upon all Americans to recognize the contributions of small businesses to the American economy, continue supporting them, and honor the occasion with programs and activities that highlight these important businesses.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of April, in the year of our Lord two thousand twenty-four, and of the Independence of the United States of America the two hundred and forty-eighth.

Presidential Documents

Proclamation 10734 of April 26, 2024

Workers Memorial Day, 2024

By the President of the United States of America

A Proclamation

A job is about more than a paycheck—it is about dignity and respect. Our Nation's workers built this country, and we need to have their backs. On the most basic level, that means every worker in this Nation deserves to be safe on the job. Too many still risk their lives or well-being in unsafe work conditions or dangerous roles. On Workers Memorial Day, we honor our fallen and injured workers and recommit to making sure every worker has the peace of mind of knowing that they are protected at work and can return home safe to their families every night.

I am proud to be the most pro-labor President in history, and from day one, my Administration has fought to make workplaces safer and fairer. Our American Rescue Plan invested $200 million into keeping workers safe during the pandemic and guaranteeing that workers had sick leave available if they got COVID–19. We also used the full power of the Defense Production Act to deliver personal protective equipment to workers who needed it. We vaccinated 230 million Americans so they could return to offices, stores, factory floors, and more without worrying about their health.

Strong unions are at the core of all of this work. Every major law that protects workers' safety passed because unions fought for it. That is why, as my Administration makes the biggest investment in our Nation's infrastructure in generations, we are also incentivizing companies to hire union workers, pay prevailing wages, and support pre-apprenticeships and Registered Apprenticeships that help workers learn how to safely do the job. At the same time, my Administration finalized a rule requiring Project Labor Agreements for most large-scale Federal construction projects, helping ensure these projects are completed safely, efficiently, and on time.

I am proud of my work standing up for unions, from being the first sitting President to walk a picket line to nominating union advocates to the National Labor Relations Board, which has helped protect the right to organize. I also signed Executive Orders restoring and expanding collective bargaining rights for the Federal workforce, and I re-established labor-management forums at Federal agencies to ensure Federal workers on the job are heard. I signed the Butch Lewis Act, protecting the pensions that millions of Americans worked their whole lives for. I have expanded coverage through the Affordable Care Act and slashed prescription drug prices, making health care more affordable for millions of working families.

At the same time, the Department of Labor has also made it easier for whistleblowers to report unsafe working conditions, regardless of their immigration status, and are hiring and training hundreds of workplace inspectors to ensure employers are meeting health and safety requirements. Last year, my Administration issued the first-ever heat Hazard Alert to protect millions of farm, construction, and other workers who spend their days outside in increasingly extreme heat. We also finalized a new rule to limit miners' exposure to toxic silica dust—protecting more than 250,000 from its harmful effects. The Department of Labor has also ramped up the enforcement of heat-safety rules, conducting more than 4,000 heat inspections in the past 2 years. They have also completed over 65,000 workplace safety and health

inspections since 2022, helping keep workers in high-risk industries safe. Further, my Administration published a rule that allows workers to choose a representative to accompany an Occupational Safety and Health Administration official during a workplace inspection, ensuring workers are being heard. The Department of Labor is working to develop a national standard to protect indoor and outdoor workers from extreme heat that can be hazardous to their health.

We are also fighting for the courageous first responders who routinely run toward danger to protect the rest of us. The Department of Labor proposed a rule that would strengthen safety standards for emergency responder equipment, training, and vehicle operations for the first time in more than 40 years. These new standards would transform many current industry best practices to requirements and could prevent thousands of injuries for more than one million brave first responders across the country. I was also proud to sign the Federal Firefighters Fairness Act, which boosted pay for over 10,000 Federal firefighters to help recruit more to the job, because I know that nothing keeps firefighters safe like more firefighters. We are also committed to protecting firefighters from the harmful effects of toxic ''forever chemicals'', which are still too often found in firefighting equipment and fire suppression agents. I signed legislation extending the Public Safety Officers' Benefits Program to firefighters who are permanently disabled and to families of firefighters who die after experiencing trauma like PTSD—it will not bring their loved ones back, but we owe them.

Today, our Nation is in the midst of a great comeback. Our economy is growing, wages are rising, and inflation is down. We have created a record 15 million jobs. On Workers Memorial Day, we recommit to making sure that every worker in this country is safe on the job. We honor those who lost their lives or have been injured on the job; we stand by their families; and we stand with the labor unions that are fighting to guarantee every worker safety, dignity, and respect.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim April 28, 2024, as Workers Memorial Day. I call upon all Americans to observe this day with appropriate service, community, and education programs and ceremonies in memory of those killed or injured due to unsafe working conditions.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of April, in the year of our Lord two thousand twenty-four, and of the Independence of the United States of America the two hundred and forty-eighth.

Rules and Regulations

Federal Register
Vol. 89, No. 85
Wednesday, May 1, 2024

INTERNATIONAL DEVELOPMENT FINANCE CORPORATION

2 CFR Chapter XVI

Nonprocurement Suspension and Debarment

AGENCY: U.S. International Development Finance Corporation.

ACTION: Final rule.

SUMMARY: The U.S. International Development Finance Corporation (DFC) is issuing a final rule to implement its nonprocurement debarment and suspension regulations. With this regulatory action, DFC adopts Office of Management and Budget (OMB) regulations with some agency specific additions and clarifications. This final rule states what contracts are covered under this regulation, identifies the official authorized to grant exceptions to an excluded persons list, and states the person responsible for communicating requirements to both first and second tier program participants. Elements not addressed in this regulation are covered by the Governmentwide sections in the common rule.

DATES: This rule is effective May 30, 2024.

FOR FURTHER INFORMATION CONTACT: Agency Submitting Officer: Deborah Papadopoulos, (202) 357–3979, *Email: fedreg@dfc.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Executive Order 12549 (51 FR 6370, February 18, 1986) established a Governmentwide debarment and suspension system covering the full range of Federal procurement and nonprocurement activities, and established procedures for debarment and suspension from participation in Federal nonprocurement programs. Section 6 of the Executive order authorized OMB to issue guidelines to Executive departments and agencies that govern which programs and activities are covered by the Executive order, prescribe Governmentwide criteria and Governmentwide minimum due process procedures, and set forth other related details for the effective administration of the guidelines. Section 3 directed agencies to issue implementing regulations that are consistent with OMB guidelines.

OMB issued an interim final guidance that implemented a common rule for Governmentwide Debarment and Suspension (Nonprocurement). This common rule is codified in part 180 of title 2 of the Code of Federal Regulations (70 FR 51864, August 31, 2005). In addition to restating and updating its guidance on nonprocurement debarment and suspension, the interim final guidance requires all Federal agencies to adopt a new approach to Federal agency implementation of the guidance. OMB requires each agency to issue a brief rule that: (1) Adopts the guidance, giving it regulatory effect for that agency's activities; and (2) states any agency-specific additions, clarifications, and exceptions to the Governmentwide policies and procedures contained in the guidance.

Under this system, a person who is debarred or suspended is excluded from Federal financial and nonfinancial assistance and benefits under Federal programs and activities. Debarment or suspension of a participant in a program by one agency is registered with the General Services Administration (GSA)-maintained System for Award Management (SAM) exclusion list and has Governmentwide, reciprocal effect on that participant's ability to obtain procurement and nonprocurement contracts.

DFC published its proposed rule regarding nonprocurement suspension and debarment on January 5, 2024 (89 FR 714). During the public comment period, we received two comments, which are addressed in §§ 1600.220 and 1600.890 (see the corrections published on January 22, 2024 (89 FR 3896), and March 8, 2024 (89 FR 16701)).

Regulatory Analysis

Executive Order 12866

DFC is an independent agency and is not subject to Executive Order 12866.

Regulatory Flexibility Act of 1980 (5 U.S.C. 605(b))

This regulatory action will not have a significant adverse impact on a substantial number of small entities.

Unfunded Mandates Act of 1995

This regulatory action does not contain a Federal mandate that will result in the expenditure by State, local, and Tribal governments, in aggregate, or by the private sector of $100 million or more in any one year.

Paperwork Reduction Act of 1995

This rule does not impose any additional reporting or recordkeeping requirements under the Paperwork Reduction Act.

Federalism (Executive Order 13132)

This regulatory action does not have federalism implications, as set forth in Executive Order 13132. It will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government.

List of Subjects in 2 CFR Part 1600

Administrative practice and procedure, Assistance programs, Debarment and suspension, Reporting and recordkeeping requirements.

■ For the reasons set forth in the preamble, under the authority at 2 CFR 180.30, the United States International Development Finance Corporation adds 2 CFR chapter XVI, consisting of parts 1600 through 1699, to read as follows:

Chapter XVI—US International Development Finance Corporation

PART 1600—NONPROCUREMENT DEBARMENT AND SUSPENSION

PARTS 1601–1699 [RESERVED]

PART 1600—NONPROCUREMENT DEBARMENT AND SUSPENSION

Sec.

Authority: Sec. 2455, Pub. L. 103–355, 108 Stat. 3327 (31 U.S.C. 6101 note); E.O. 12549, 51 FR 6370, 3 CFR, 1986 Comp., p. 189; E.O. 12689, 54 FR 34131, 3 CFR, 1989 Comp., p. 235.

§ 1600.10 What does this part do?

This part adopts the Office of Management and Budget (OMB) guidance in subparts A through I of 2 CFR part 180, as supplemented by this part, as the U.S. International Development Finance Corporation (DFC) regulations for non-procurement debarment and suspension. It thereby gives regulatory effect for DFC to the OMB guidance as supplemented by this part. This part satisfies the requirements in section 3 of Executive Order 12549, ''Debarment and Suspension'' (3 CFR, 1986 Comp., p. 189); Executive Order 12689, ''Debarment and Suspension'' (3 CFR, 1989 Comp., p. 235); and section 2455 of the Federal Acquisition Streamlining Act of 1994, Public Law 103–355 (31 U.S.C. 6101 note).

§ 1600.20 Does this part apply to me?

This part and, through this part, pertinent portions of the OMB guidance in subparts A through I of 2 CFR part 180 (see table at 2 CFR 180.100(b)) apply to you if you are a—

(a) Participant or principal in a ''covered transaction'' (see 2 CFR part 180, subpart B, and the definition of ''non-procurement transaction'' at 2 CFR 180.970);

(b) Respondent in a DFC suspension or debarment action;

(c) DFC suspending or debarring official; and

(d) DFC investment, guarantee, insurance or grant official authorized to enter into any type of non-procurement transaction that is a covered transaction.

§ 1600.30 What regulations must I follow?

The DFC regulations that you must follow are the regulations specified in each applicable section of the OMB guidance in subparts A through I of 2 CFR part 180 as that section is supplemented by the section in this part with the same section number or by additional provisions with no corresponding section number. For any section of OMB guidance in subparts A through I of 2 CFR part 180 that has no corresponding section in this part, DFC regulations are those in the OMB guidance.

Subpart A—General

§ 1600.137 Who in DFC may grant an exception to let an excluded person participate in a covered transaction?

The Chief Executive Officer (CEO) of DFC or designee may grant an exception permitting an excluded person to participate in a particular covered transaction. If the CEO of DFC or designee grants an exception, the exception must be in writing and state the reason(s) for deviating from the Governmentwide policy in Executive Order 12549.

Subpart B—Covered Transactions

§ 1600.215 Which nonprocurement transactions are not covered transactions?

In addition to the nonprocurement transactions which are not covered transactions under 2 CFR 180.215, any nonprocurement transaction entered into under a primary tier nonprocurement transaction that does not require DFC explicit prior consent is not a covered transaction under 2 CFR 180.215(g)(2).

§ 1600.220 What contracts and subcontracts are covered transactions?

First-tier procurements (*i.e.,* primary contracts) under a covered nonprocurement transaction are covered transactions. Although the OMB guidance at 2 CFR 180.220(c) allows a Federal agency to do so (see also optional lower tier coverage in the figure in the appendix to 2 CFR part 180), DFC does not extend coverage of nonprocurement suspension and debarment requirements beyond first-tier procurement under a covered nonprocurement transaction. Moreover, for purposes of determining whether a procurement contract is included as a covered transaction, the threshold in 2 CFR 180.220(b) is increased from $25,000 to the ''simplified acquisition threshold'' as defined in 48 CFR 2.101.

Subpart C—Responsibilities of Participants Regarding Transactions

§ 1600.332 What requirements must I pass down to persons at lower tiers with whom I intend to do business?

You, as a participant, must include a term or condition in lower-tier transactions that are covered transactions, requiring lower-tier participants to comply with the OMB guidance in 2 CFR part 180, subpart C, as supplemented by this subpart.

Subpart D—Responsibilities of Federal Agency Officials Regarding Transactions

§ 1600.437 What method do I use to communicate to a participant the requirements for participating in a covered transaction?

To communicate to a participant the requirements described in 2 CFR 180.435, you must include provisions in the contractual documentation of the transaction to ensure compliance with 2 CFR part 180, subpart C, as supplemented by subpart C of this part. The provisions must also require the participant to include similar terms or conditions of compliance in lower-tier covered transactions.

Subparts E–F [Reserved]

Subpart G—Suspension

§ 1600.765 How may I request reconsideration of my DFC suspension?

(a) If the DFC suspending official issues a decision under 2 CFR 180.755 to continue your suspension after you present information in opposition to that suspension under 2 CFR 180.720, you can ask the suspending official to reconsider the decision for material errors of fact or law that you believe will change the outcome of the matter.

(b) A request for review under this section must be in writing; state the specific findings you believe to be in error; and include the reasons or legal bases for your position.

(c) The suspending official must notify you of their decisions under this section, in writing, using the notice procedures at 2 CFR 180.615 and 180.975.

Subpart H—Debarment

§ 1600.890 How may I request reconsideration of my DFC debarment?

(a) If the DFC debarring official issues a decision under 2 CFR 180.870 to debar

you after you present information in opposition to a proposed debarment under 2 CFR 180.815, you can ask the debarring official to reconsider the decision for material errors of fact or law that you believe will change the outcome of the matter.

(b) A request for review under this section must be in writing; state the specific findings you believe to be in error; and include the reasons or legal bases for your position.

(c) DFC may debar a person or entity for refusing to engage in efforts to remediate identified environmental, social, and human rights harm stemming from their activities, including harm that may be identified through a DFC Office of Accountability complaints process.

(d) The debarring official must notify you of their decisions under this section, in writing, using the notice procedures at 2 CFR 180.615 and 180.975.

Subpart I—Definitions

§ 1600.930 Debarring official.

The debarring official for DFC is the Vice President & Chief Administrative Officer, Office of Administration, or designee as delegated in Agency policy.

§ 1600.1010 Suspending official.

The suspending official for DFC is the Vice President & Chief Administrative Officer, Office of Administration, or designee as delegated in Agency policy.

PARTS 1601–1699 [RESERVED]

Dated: April 10, 2024.

Lisa Wischkaemper,

Assistant General Counsel, Office of the General Counsel, U.S. International Development Finance Corporation.

7 CFR Parts 1719, 1738, 1739, 1774, 1775, 3570, 4274, 4279, 4280, and 4288

[Docket Number: RHS–22–ADMIN–0025]

Rural Development Regulations With the Unique Entity Identifier (UEI) for Federal Awards

AGENCY: Rural Business-Cooperative Service, Rural Housing Service, Rural Utilities Service, USDA.

ACTION: Final rule.

SUMMARY: The Rural Business-Cooperative Service (RBCS), Rural Housing Service (RHS), and Rural Utilities Services (RUS), agencies in the United States Department of Agriculture (USDA) Rural Development (RD) Mission area, are issuing a final rule to update RD program regulations by removing references to the Data Universal Numbering System (DUNS) numbers and replacing them with the new Unique Entity Identifier (UEI) as the primary means of identifying entities registered for Federal awards government-wide in the System for Award Management (SAM).

DATES: Effective date: May 1, 2024.

FOR FURTHER INFORMATION CONTACT: Lauren Cusick, Rural Development Innovation Center—Regulations Management Division, United States Department of Agriculture, 1400 Independence Avenue SW, South Building, Washington, DC 20250–1522. Telephone: (202) 720–1414. Email: *lauren.cusick@usda.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

RD is a mission area within USDA comprised of RBCS, RHS, and RUS that strives to increase economic opportunity and improve the quality of life for all rural Americans. RD invests in rural America with loan, grant, and loan guarantee programs to help drive economic security and prosperity. These programs help expand access to high-speed internet, electric, telecommunications, and transportation infrastructure as well as support business growth, healthcare, education, housing, and other community essentials.

In 2016, the Federal Government revised both the Federal Acquisition Regulation (FAR) and title 2 of the Code of Federal Regulations (CFR) to remove any proprietary references to the DUNS. On July 10, 2019, the General Services Administration (GSA) published a notice in the **Federal Register** at 84 FR 32916, announcing a public meeting that was held on July 25, 2019. During this meeting, GSA presented information on replacing the DUNS with a governmentwide UEI. A universal identifier is required under titles 2 and 48 of the CFR for all applicants (non-individuals), recipients, and subrecipients of Federal agency awards.

On April 4, 2022, the universal identifier used across the Federal Government transitioned from using the DUNS number to the UEI, which is now the official identifier for doing business with the Federal Government. UEIs are required in accordance with 2 CFR part 25, and this transition has resulted in the UEI being issued by the Federal Government through SAM which is a government-wide registry for any entity doing business with the Federal Government, from securing Federal contracts to receiving Federal financial assistance. SAM centralizes information in conducting the acquisition and financial assistance which includes grants and cooperative agreements processes and provides a central location for Federal award recipients to change organizational information. The use of an UEI means entities no longer rely on a third party to obtain an identifier which has allowed the government to streamline the entity identification and validation process, making it easier and less burdensome for entities to do business with the Federal Government.

The Administrative Procedures Act exempts from prior notice any actions ''relating to agency management or personnel or to public property, loans, grants, benefits, or contracts'' (5 U.S.C. 553(b)(A)): therefore, RD is issuing this action as a final rule.

II. Summary of Changes

This final rule will update the remaining RBCS, RHS, and RUS regulations that are still using a DUNS number reference and replace it with the UEI. This change will make it clear that the UEI will be required, unless exempt, when applying for Federal awards from RD. The following is a summary, by regulation, of the changes made:

1. *7 CFR part 1719.* Section 1719.5(b)(2)(ii) was updated to replace the requirement for a DUNs number with the UEI.

2. *7 CFR part 1738.* Section 1738.202 was updated to remove paragraph (b) that addressed the DUNs number, the remaining paragraphs were redesignated, and the new paragraph (b) was updated to incorporate the UEI with the SAM registration information and the reference to a commercial and Government Entity (CAGE) code in paragraph (c) was removed as that is no longer required.

3. *7 CFR part 1739.* Section 1739.10 was updated to remove paragraph (c) that addressed the DUNs number, paragraph (d) was redesignated as paragraph (c) and the new paragraph (c)(1) was updated to incorporate the UEI with the SAM registration information.

4. *7 CFR part 1774.* Section 1774.2 was updated to remove the definition of

DUNS number and § 1774.10(a) was updated to replace the DUNS number information with UEI.

5. *7 CFR part 1775.* Section 1775.2 was updated to remove the definition of DUNS number and § 1775.10, paragraphs (b)(3) and (c) were updated to replace the DUNS number information with the UEI.

6. *7 CFR part 3570.* Section 3570.252 was updated to remove the definition of DUNS number and § 3570.267(b) was updated to replace the DUNS number information with the UEI.

7. *7 CFR part 4274.* Section 4274.352(a)(4)(i) was updated to replace the DUNS number with the UEI.

8. *7 CFR part 4279.* The introductory text for §§ 4279.161 and 4279.261(i) were updated to replace the DUNS number with the UEI.

9. *7 CFR part 4280.* Section 4280.416(c)(3) was updated to replace the DUNS number with the UEI.

10. *7 CFR part 4288.* Section 4288.20(b) was updated to replace the DUNS number with the UEI.

III. Executive Orders

Paperwork Reduction Act

This final rule contains no reporting or recordkeeping provisions requiring Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35).

E-Government Act Compliance

RD is committed to the E-Government Act, which requires Government agencies in general to provide the public the option of submitting information or transacting business electronically to the maximum extent possible and to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

Executive Order 12372—Intergovernmental Consultation

This final rule is not subject to the requirements of Executive Order 12372, ''Intergovernmental Review of Federal Programs,'' as implemented under USDA's regulations at 2 CFR part 415, subpart C.

Executive Order 12866

This final rule is exempt from OMB review for purposes of Executive Order 12866 and, therefore, has not been reviewed by OMB.

Executive Order 13132—Federalism

The policies contained in this rule do not have any substantial direct effect on States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Nor does this rule impose substantial direct compliance costs on State and local governments. Therefore, consultation with the States is not required.

Congressional Review Act

This rule is not subject to the Congressional Review Act (''CRA'') (5 U.S.C. 801 *et seq.*), as the CRA provides an exemption for any rule relating to agency management or personnel and for rules relating to agency organization, procedure, or practice that does not substantially affect the rights or obligations of non-agency parties.

Regulatory Flexibility Act Certification

The Regulatory Flexibility Act (5 U.S.C. 601–602) (RFA) generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act (''APA'') or any other statute. The Administrative Procedures Act exempts from notice and comment requirements rules ''relating to agency management or personnel or to public property, loans, grants, benefits, or contracts'' (5 U.S.C. 553(a)(2)), so therefore an analysis has not been prepared for this rule.

Unfunded Mandates Reform Act

This final rule contains no Federal Mandates (under the regulatory provision of title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. chapter 25) for State, local, and tribal governments, or the private sector. Thus, this final rule is not subject to the requirements of sections 202 and 205 of the Unfunded Mandates Reform Act of 1995.

National Environmental Policy Act

In accordance with the National Environmental Policy Act of 1969, Public Law 91–190, this final rule has been reviewed in accordance with 7 CFR part 1970 (''Environmental Policies and Procedures''). The Agency has determined that: (i) This action meets the criteria established in 7 CFR 1970.53(f); (ii) No extraordinary circumstances exist; and (iii) The action is not ''connected'' to other actions with potentially significant impacts, is not considered a ''cumulative action'' and is not precluded by 40 CFR 1506.1. Therefore, the Agency has determined that the action does not have a significant effect on the human environment, and therefore neither an Environmental Assessment nor an Environmental Impact Statement is required.

Executive Order 13175—Consultation and Coordination With Indian Tribal Governments

This Executive order imposes requirements on RBCS, RHS and RUS (the Agencies) in the development of regulatory policies that have tribal implications or preempt tribal laws. The Agencies have determined that the final rule does not have a substantial direct effect on one or more Indian tribe(s) or on either the relationship or the distribution of powers and responsibilities between the Federal Government and Indian tribes. Thus, this final rule is not subject to the requirements of Executive Order 13175. If Tribal leaders are interested in consulting with the Agencies on this final rule, they are encouraged to contact USDA's Office of Tribal Relations or RD's Native American Coordinator at: *AIAN@usda.gov* to request such a consultation.

Assistance Listing Number (Formally Known as the Catalog of Federal Domestic Assistance)

The Assistance Listing Numbers assigned to the programs affected by this final rule are: 10.351—Rural Business Development Grants, 10.751—Rural Energy Savings Program, 10.759—Special Evaluation Assistance for Rural Communities and Households, 10.761—Technical Assistance and Training Grants, 10.762—Solid Waste Management Grants, 10.766—Community Facilities Training and Technical Assistance Grants, 10.767 Intermediary Relending Program, 10.768—Business and Industry Loans, 10.863—Community Connect Grants, 10.865—Biorefinery Assistance Program, 10.867—Bioenergy Program for Advanced Biofuels, and 10.886—Rural Broadband Access Loan and Loan Guarantee Program. The Assistance Listings are available at *SAM.gov.*

Civil Rights Impact Analysis

RD has reviewed this final rule in accordance with USDA Regulation 4300–4, Civil Rights Impact Analysis, to identify any major civil rights impacts the rule might have on program participants on the basis of age, race, color, national origin, sex, disability, marital or familial status. Based on the review and analysis of the rule and all available data, issuance of this final rule is not likely to negatively impact low and moderate-income populations, minority populations, women, Indian tribes or persons with disability, by

virtue of their age, race, color, national origin, sex, disability, or marital or familial status. No major civil rights impact is likely to result from this final rule.

USDA Non-Discrimination Statement

In accordance with Federal civil rights laws and USDA civil rights regulations and policies, the USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (*e.g.,* Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; or the 711 Relay Service.

To file a program discrimination complaint, a complainant should complete a Form AD–3027, USDA Program Discrimination Complaint Form, which can be obtained online at *www.usda.gov/sites/default/files/documents/ad-3027.pdf,* from any USDA office, by calling (866) 632–9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD–3027 form or letter must be submitted to USDA by:

(1) *Mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410; or

(2) *Fax:* (833) 256–1665 or (202) 690–7442; or

(3) *Email: Program.Intake@usda.gov.*

List of Subjects

7 CFR Part 1719

Electric power, Grant programs—energy, Loan programs—energy, Reporting and recordkeeping requirements, Rural areas.

7 CFR Part 1738

Loan programs—communications, Rural areas, Telecommunications, Telephone.

7 CFR Part 1739

Grant programs—communications, Rural areas, Telecommunications, Telephone.

7 CFR Part 1774

Community development, Grant programs, Reporting and recordkeeping requirements, Rural areas, Waste treatment and disposal, Water supply.

7 CFR Part 1775

Business and industry, Community development, Community facilities, Grant programs—housing and community development, Reporting and recordkeeping requirements, Rural areas, Waste treatment and disposal, Water supply, Watersheds.

7 CFR Part 3570

Administrative practice and procedure, Fair housing, Grant programs—housing and community development, Housing, Low and moderate income housing, Reporting and recordkeeping requirements, Rural areas.

7 CFR Part 4274

Community development, Loan programs—business, Reporting and recordkeeping requirements, Rural areas.

7 CFR Part 4279

Community development, Energy, Energy conservation, Fees, Grant programs, Loan programs—business, Loan programs—housing and community development, Renewable energy, Reporting and recordkeeping requirements, Rural areas.

7 CFR Part 4280

Business and industry, Energy, Grant programs—business, Loan programs—business, Rural areas.

7 CFR Part 4288

Administrative practice and procedure, Biobased products, Energy, Reporting and recordkeeping requirements.

Accordingly, for the reasons set forth in the preamble, the Agency amends 7 CFR parts 1719, 1738, 1739, 1774, 1775, 3570, 4274, 4279, 4280 and 4288 as follows:

PART 1719—RURAL ENERGY SAVINGS PROGRAM

■ 1. The authority citation for part 1719 continues to read as follows:

Authority: 7 U.S.C. 8107a (Section 6407).

Subpart B—Application, Submission and Administration of RESP Loans

■ 2. Amend § 1719.5 by revising paragraph (b)(2)(ii) to read as follows:

§ 1719.5 Application process and required information.

* * * * *

(b) * * *

(2) * * *

(ii) The Applicant's tax identification number, SAM Managed Identifier (SAMMI), Unique Entity Identifier, and such similar information as it may be subsequently amended or required for Federal funding.

* * * * *

PART 1738—RURAL BROADBAND LOANS, LOAN/GRANT COMBINATIONS, AND LOAN GUARANTEES

■ 3. The authority citation for part 1738 continues to read as follows:

Authority: 7 U.S.C. 901 *et seq.*

Subpart E—Loan and Loan/Grant Combination Application Review and Underwriting

■ 4. Amend § 1738.202 by:

■ a. Removing paragraph (b);

■ b. Redesignating paragraphs (c) through (e) as paragraphs (b) through (d), respectively; and

■ c. Revising newly redesignated paragraph (b).

The revision reads as follows:

§ 1738.202 Elements of a complete application.

* * * * *

(b) *SAM registration.* Prior to submitting an application, all Applicants requesting loan/grant combination funds must register in the System for Award Management (SAM) at *https://sam.gov/* and provide a Unique Entity Identifier as part of the application. SAM registration must be active with current data at all times, from the application review throughout the active Federal Award. To maintain the required registration in the SAM database, annual renewal is required with a review and update of all information. The Applicant must ensure that the information in the database is current, accurate, and complete.

* * * * *

PART 1739—BROADBAND GRANT PROGRAM

■ 5. The authority citation for part 1739 continues to read as follows:

Authority: 7 U.S.C. 901 *et seq.*

Subpart A—Community Connect Grant Program

■ 6. Amend § 1739.10 by:
■ a. Removing paragraph (c);
■ b. Redesignating paragraph (d) as paragraph (c); and
■ c. Revising newly redesignated paragraph (c)(1).

The revision reads as follows:

§ 1739.10 Eligible applicant.

* * * * *

(c) * * *

(1) At the time of application, whether applying electronically or by paper, each applicant must have a Unique Entity Identifier (UEI) and an active registration in SAM before submitting its application in accordance with 2 CFR part 25. Instructions for obtaining the UEI are available at *https://sam.gov/.*

* * * * *

PART 1774—SPECIAL EVALUATION ASSISTANCE FOR RURAL COMMUNITIES AND HOUSEHOLDS PROGRAM (SEARCH)

■ 7. The authority citation for part 1774 continues to read as follows:

Authority: 7 U.S.C. 1926(a)(2)(C).

Subpart A—General Provisions

§ 1774.2 [Amended]

■ 8. Amend § 1774.2 by removing the definition of ''DUNS Number''.

Subpart B—Grant Application Processing

■ 9. Amend § 1774.10 by revising paragraph (a) introductory text to read as follows:

§ 1774.10 Applications.

(a) To file an application, an organization must provide their Unique Entity Identifier (UEI) in accordance with 2 CFR part 25. Instructions for obtaining the UEI are available at *https://sam.gov/.* To file a complete application, the following should be submitted:

* * * * *

PART 1775—TECHNICAL ASSISTANCE GRANTS

■ 10. The authority citation for part 1775 continues to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1989; 16 U.S.C. 1005.

Subpart—A General Provisions

§ 1775.2 [Amended]

■ 11. Amend § 1775.2 by removing the definition of ''DUNS Number''.

Subpart B—Grant Application Processing

■ 12. Amend § 1775.10 by revising paragraphs (b)(3) and (c) introductory text to read as follows:

§ 1775.10 Applications.

* * * * *

(b) * * *

(3) Electronic applications will be accepted prior to the filing deadline through the Federal Government's eGrants website (*Grants.gov*) at *https://www.grants.gov.* Applicants should refer to instructions found on the *Grants.gov* website to submit an electronic application. A Unique Entity Identifier (UEI) from the System for Award Management and a Central Contractor Registry (CCR) registration is required prior to electronic submission. The sign-up procedures, required by *Grants.gov,* may take several business days to complete.

(c) *Application requirements.* To file an application, an organization must provide their UEI in accordance with 2 CFR part 25. Instructions for obtaining the UEI are available at *https://sam.gov/.* To file a complete application, the following information should be submitted:

* * * * *

PART 3570—COMMUNITY PROGRAMS

■ 13. The authority citation for part 3570 continues to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1989.

Subpart F—Community Facilities Technical Assistance and Training Grants

§ 3570.252 [Amended]

■ 14. Amend § 3570.252 by removing the definition of ''DUNS''.

■ 15. Amend § 3570.267 by revising paragraph (b) introductory text to read as follows:

§ 3570.267 Applications.

* * * * *

(b) *Application requirements.* To file an application, an organization must provide their Unique Entity Identifier (UEI) in accordance with 2 CFR part 25. Instructions for obtaining the UEI are available at *https://sam.gov/.* To file a complete application the following information must be submitted:

* * * * *

PART 4274—DIRECT AND INSURED LOANMAKING

■ 16. The authority citation for part 4274 continues to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1932 note; 7 U.S.C. 1989.

Subpart D—Intermediary Relending Program (IRP)

■ 17. Amend § 4274.352 by revising paragraph (a)(4)(i) to read as follows:

§ 4274.352 Loan documentation for ultimate recipients.

* * * * *

(a) * * *

(4) * * *

(i) Name, address, Unique Entity Identifier, Federal ID number, and North American Classification System (NAICS) Code of the ultimate recipient;

* * * * *

PART 4279—GUARANTEED LOANMAKING

■ 18. The authority citation for part 4279 continues to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1989; 7 U.S.C. 1932(a); and Public Law 116–136, Division B, Title I.

Subpart B—Business and Industry Loans

■ 19. Amend § 4279.161 by revising the introductory text to read as follows:

§ 4279.161 Filing preapplications and applications.

Borrowers and lenders are encouraged to file preapplications and obtain Agency comments before completing an application. However, if they prefer, borrowers and lenders may file a complete application without filing a preapplication. The Agency will neither accept nor process preapplications and applications unless a lender has agreed to finance the proposal. For borrowers other than individuals, a Unique Entity Identifier (UEI) is required. Instructions for obtaining the UEI are available at *https://sam.gov/.* Guaranteed loans exceeding $600,000 must be submitted under the requirements specified in paragraph (b) of this section. However, guaranteed loans of $600,000 and less may be submitted under the requirements of either paragraph (b) or (c) of this section.

* * * * *

Subpart C—Biorefinery, Renewable Chemical, and Biobased Product Manufacturing Assistance Loans

■ 20. Amend § 4279.261 by revising paragraph (i) to read as follows:

§ 4279.261 Application for loan guarantee content.

* * * * *

(i) *Unique Entity Identifier (UEI).* For Borrowers other than individuals, a UEI, which can be obtained online at *https://sam.gov/.*

* * * * *

PART 4280—LOANS AND GRANTS

■ 21. The authority citation for part 4280 continues to read as follows:

Authority: 7 U.S.C. 1989(a), 7 U.S.C. 2008s.

Subpart E—Rural Business Development Grants

■ 22. Amend § 4280.416 by revising paragraph (c)(3) to read as follows:

§ 4280.416 Applicant eligibility.

* * * * *

(c) * * *

(3) Provide its Unique Entity Identifier (UEI) in each application it submits to the Agency. The UEI is included on the Standard Form (SF) 424, ''Application for Federal Assistance.''

* * * * *

PART 4288—PAYMENT PROGRAMS

■ 23. The authority citation for part 4288 continues to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1989.

Subpart A—Repowering Assistance Payments to Eligible Biorefineries

■ 24. Amend § 4288.20 by revising paragraph (b) introductory text to read as follows:

§ 4288.20 Submittal of applications.

* * * * *

(b) *Content and form of submission.* Applicants must submit a signed original and one copy of an application containing the information specified in this section. The applicant must also furnish the Agency the required documentation identified in Form RD 4288–4, ''Repowering Assistance Program Application,'' to verify compliance with program provisions before acceptance into the program. Note that applicants are required to have a Unique Entity Identifier (UEI) (unless the applicant is an individual). Instructions for obtaining the UEI are available at *https://sam.gov/.* Applicants must submit to the Agency the documents specified in paragraphs (b)(1) through (6) of this section.

BILLING CODE 3410–XY–P

DEPARTMENT OF AGRICULTURE

Rural Housing Service

Rural Business-Cooperative Service

Rural Utilities Service

7 CFR Parts 1780 and 1940

[Docket No. RUS–24–AGENCY–0004]

Update to Methodology and Formulas for Allocation of Loan and Grant Program Funds

AGENCY: Rural Business-Cooperative Service, Rural Housing Service, and Rural Utilities Service, USDA.

ACTION: Final rule.

SUMMARY: The Rural Business-Cooperative Service, Rural Housing Service, and Rural Utilities Service (RBCS, RHS, RUS, or collectively referred to as the Agency), of the Rural Development (RD) mission area within the U.S. Department of Agriculture (USDA), is issuing this final rule to update the data it uses to determine a State's percentage of national nonmetropolitan unemployment income. The Agency is amending two regulations to correct the source for the data and provide transparency on its process of determining state funding allocations for various Agency programs.

DATES: The effective date of this final rule is May 1, 2024.

FOR FURTHER INFORMATION CONTACT: John Delaney at *john.delaney@usda.gov,* Senior Policy Advisor, Rural Development Innovation Center, USDA, 1400 Independence Avenue SW, Mail Stop 0793, Room 6138-South, Washington, DC 20250–0793; or call (202) 720–9705.

SUPPLEMENTARY INFORMATION:

Background

Rural Development is a mission area within USDA comprised of RBCS, RHS and RUS. Rural Development's mission is to increase economic opportunity and improve the quality of life for all rural Americans and RD meets its mission by providing loans, grants, loan guarantees, and technical assistance through a multitude of programs aimed at creating and improving businesses, housing and infrastructure throughout rural America.

The Agency receives funding through the annual appropriations process. Several programs under the Agency apply a formula to determine how much each state should receive in a funding allocation for a given fiscal year. Where applicable, the formulas have multiple components that include a state's percentage of the national nonmetropolitan unemployment income figure. The regulations that are part of this rulemaking currently cite the Bureau of Labor Statistics (BLS) as the source for the national nonmetropolitan unemployment information, but this data is not publicly available. The Agency is changing the cited data source to the Census Bureau's American Community Survey (ACS).

The Agency is amending the regulations associated with this rulemaking to make the source of data clear. This amendment is not changing a current process or procedure.

Summary of Changes

7 CFR 1780

1. Section 1780.18(c)(2)(ii)(C) was amended to change the Bureau of Labor Statistics to 5-year income data from the ACS to correctly cite the source of data used as part of the allocation calculation.

7 CFR 1940

2. Sections 1940.585(b)(2), 1940.588(a)(2)(ii)(C), and 1940.591(b)(2) were amended to show that the 5-year income data from the ACS should be used for nonmetropolitan unemployment income and not BLS. These changes were made to correctly cite the source of data.

Executive Orders/Acts

Executive Order 12866—Classification

This rule is not subject to the provisions of Executive Order 12866 because it has no impact on borrowers or other members of the public. It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comments, notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. The action, however, is not published for proposed rulemaking because it involves only internal agency management and publication for comment is unnecessary.

Congressional Review Act

This rule is not subject to the Congressional Review Act (''CRA'', 5 U.S.C. 801 *et seq.*) as the CRA provides an exemption for any rule relating to agency management or personnel and for rules relating agency organization, procedure, or practice that does not substantially affect the rights or obligations of non-agency parties.

Assistance Listing Number (Formally Known as the Catalog of Federal Domestic Assistance)

The amendments in this final rule apply to an interagency process and are not directly tied to a funding program where an Assistance Listing Number is required.

Executive Order 12372—Intergovernmental Consultation

This final rule is amending incorrect citations for an interagency process and is not subject to the requirements of Executive Order 12372, ''Intergovernmental Review of Federal Programs''.

Paperwork Reduction Act

This final rule contains no new reporting or recordkeeping burdens that would require approval under the Paperwork Reduction Act.

National Environmental Policy Act

In accordance with the National Environmental Policy Act of 1969, Public Law 91–190, this final rule has been reviewed in accordance with 7 CFR part 1970 (''Environmental Policies and Procedures''). The Agency has determined that (i) this action meets the criteria established in 7 CFR 1970.53(f); (ii) no extraordinary circumstances exist; and (iii) the action is not ''connected'' to other actions with potentially significant impacts, is not considered a ''cumulative action'' and is not precluded by 40 CFR 1506.1. Therefore, the Agency has determined that the action does not have a significant effect on the human environment, and therefore neither an Environmental Assessment nor an Environmental Impact Statement is required.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601–602) (RFA) generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act (''APA'') or any other statute. The Administrative Procedures Act exempts from notice and comment requirements rules ''relating to agency management or personnel or to public property, loans, grants, benefits, or contracts'' (5 U.S.C. 553(a)(2)), so therefore an analysis has not been prepared for this rule.

Executive Order 12988—Civil Justice Reform

This final rule is amending incorrect citations for an interagency process and is not subject to the requirement of Executive Order 12988.

Unfunded Mandates Reform Act (UMRA)

This rule contains no Federal mandates (under the regulatory provisions of title II of the UMRA) for State, local, and Tribal governments or for the private sector. Therefore, this rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Executive Order 13132—Federalism

The policies contained in this rule do not have any substantial direct effect on States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Nor does this rule impose substantial direct compliance costs on state and local governments. Therefore, consultation with the States is not required.

Executive Order 13175—Consultation and Coordination With Indian Tribal Governments

This final rule is amending incorrect citations for an interagency process and is not subject to the requirement of Executive Order 13175.

E-Government Act Compliance

Rural Development is committed to the E-Government Act, which requires Government agencies in general to provide the public the option of submitting information or transacting business electronically to the maximum extent possible and to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

Civil Rights Impact Analysis

Rural Development has reviewed this rule in accordance with USDA Regulation 4300–4, Civil Rights Impact Analysis, to identify any major civil rights impacts the rule might have on program participants on the basis of age, race, color, national origin, sex, disability, marital or familial status. Based on the review and analysis of the rule and all available data, issuance of this final rule is not likely to negatively impact low and moderate-income populations, minority populations, women, Indian tribes or persons with disability, by virtue of their age, race, color, national origin, sex, disability, or marital or familial status. No major civil rights impact is likely to result from this final rule.

USDA Non-Discrimination Statement

In accordance with Federal civil rights laws and USDA civil rights regulations and policies, the USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (*e.g.,* Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; or the 711 Relay Service.

To file a program discrimination complaint, a complainant should complete a Form AD–3027, *USDA Program Discrimination Complaint Form,* which can be obtained online at *https://www.usda.gov/sites/default/files/documents/ad-3027.pdf* from any USDA office, by calling (866) 632–9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD–3027 form or letter must be submitted to USDA by:

a. *Mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410; or

b. *Fax:* (833) 256–1665 or (202) 690–7442; or

c. *Email: program.intake@usda.gov.*

List of Subjects

7 CFR Part 1780

Community development, Community facilities, Grant programs—housing and community development, Loan programs—housing and community development, Reporting and recordkeeping requirements, Rural areas, Waste treatment and disposal, Water supply, Watersheds.

7 CFR Part 1940

Administrative practice and procedure, Agriculture, Environmental protection, Flood plains, Grant programs—agriculture, Grant programs—housing and community development, Loan programs—agriculture, Loan programs—housing and community development, Low and moderate income housing, Reporting and recordkeeping requirements, Rural areas, Truth in lending.

Accordingly, for the reasons discussed in the preamble, the Agency amends 7 CFR parts 1780 and 1940 as follows:

PART 1780—WATER AND WASTE LOANS AND GRANTS

■ 1. The authority citation for part 1780 continues to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1989; 16 U.S.C. 1005.

Subpart A—General Policies and Requirements

■ 2. Amend § 1780.18 by revising paragraphs (c)(2)(ii)(B) and (C) to read as follows:

§ 1780.18 Allocation of program funds.

* * * * *

(c) * * *

(2) * * *

(ii) * * *

(B) For the criterion specified in paragraph (b)(2)(i)(B) of this section, 5-year income data from the American Community Survey (ACS).

(C) For the criterion specified in paragraph (b)(2)(i)(C) of this section, the 5-year data from the ACS.

* * * * *

PART 1940—GENERAL

■ 3. The authority citation for part 1940 continues to read as follows:

Authority: 5 U.S.C. 301; 7 U.S.C. 1989; and 42 U.S.C. 1480.

Subpart L—Methodology and Formulas for Allocation of Loan and Grant Program Funds

■ 4. Amend § 1940.585 by revising paragraph (b)(2) to read as follows:

§ 1940.585 Community Facility loans.

* * * * *

(b) * * *

(2) The data source for the first criterion is the most recent decennial Census data. The data source for the second and third criteria is the 5-year data from the American Community Survey (ACS). Each criterion is assigned a specific weight according to its relevance in determining need. The percentage representing each criterion is multiplied by the weight factor and summed to arrive at a State factor (SF). The SF cannot exceed 0.05.

Equation 1 to Paragraph (b)

SF = (criterion (b)(1)(i) × 50 percent) + (criterion (b)(1)(ii) × 25 percent) + (criterion (b)(1)(iii) × 25 percent)

* * * * *

■ 5. Amend § 1940.588 by revising paragraph (a)(2)(ii)(C) to read as follows:

§ 1940.588 Business and Industry Guaranteed and Direct Loans, Rural Business Development Grants, and Intermediary Relending Program.

* * * * *

(a) * * *

(2) * * *

(ii) * * *

(C) For the criterion specified in paragraph (a)(2)(i)(C) of this section, the 5-year data from the ACS.

* * * * *

■ 6. Amend § 1940.591 by revising paragraph (b)(2) to read as follows:

§ 1940.591 Community Program Guaranteed loans.

* * * * *

(b) * * *

(2) The data source for the first criterion is the most recent decennial Census data. The data source for the second and third criteria is the 5-year data from the American Community Survey (ACS). Each criterion is assigned a specific weight according to its relevance in determining need. The percentage representing each criterion is multiplied by the weight factor and summed to arrive at a State factor (SF). The SF cannot exceed 0.05.

Equation 1 to Paragraph (b)

SF = (criterion (b)(1)(i) × 50 percent) + (criterion (b)(1)(ii) × 25 percent) + (criterion (b)(1)(iii) × 25 percent)

* * * * *

Basil I. Gooden,

Under Secretary, USDA, Rural Development.

[FR Doc. 2024–09446 Filed 4–30–24; 8:45 am]

BILLING CODE 3410–15–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–2139; Project Identifier MCAI–2023–00435–T; Amendment 39–22713; AD 2024–06–08]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc., Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Bombardier, Inc., Model BD–700–2A12 airplanes. This AD was prompted by reports from the supplier that some overheat detection sensing elements of the bleed air leak detection system were manufactured with insufficient salt fill, which can result in an inability to detect hot bleed air leaks. This AD requires maintenance records verification, and if an affected part is installed, prohibits the use of certain Master Minimum Equipment List (MMEL) items under certain conditions by requiring revising the operator's existing Minimum Equipment List (MEL). This AD also requires testing the overheat detection sensing elements, marking each serviceable sensing element with a witness mark, and replacing each nonserviceable part with a serviceable part. This AD also prohibits the installation of affected parts under certain conditions. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective June 5, 2024.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of June 5, 2024.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–2139; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket

contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For Bombardier service information identified in this final rule, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email: *ac.yul@aero.bombardier.com;* website: *bombardier.com*.
- For Liebherr-Aerospace Toulouse SAS service information identified in this final rule, contact Liebherr-Aerospace Toulouse SAS, 408, Avenue des Etats-Unis—B.P.52010, 31016 Toulouse Cedex, France; telephone +33 (0)5.61.35.28.28; fax +33 (0)5.61.35.29.29; email: *techpub.toulouse@liebherr.com;* website: *www.liebherr.aero.*
- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th Street, Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket at *regulations.gov* under Docket No. FAA–2023–2139.

FOR FURTHER INFORMATION CONTACT: Steven Dzierzynski, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain Bombardier, Inc., Model BD–700–2A12 airplanes. The NPRM published in the **Federal Register** on November 8, 2023 (88 FR 77044). The NPRM was prompted by AD CF–2023–18, dated March 9, 2023, issued by Transport Canada, which is the aviation authority for Canada (Transport Canada AD CF–2023–18) (also referred to as the MCAI). The MCAI states that Bombardier received reports from the supplier of the overheat detection sensing elements of a manufacturing quality escape. Some of the sensing elements of the bleed air leak detection system were manufactured with insufficient salt fill. This condition can result in an inability to detect hot bleed air leaks, which can cause damage to surrounding structures and systems and prevent continued safe flight and landing.

In the NPRM, the FAA proposed to require maintenance records verification, and if an affected part is installed, prohibit the use of certain MMEL items under certain conditions by requiring revising the operator's existing MEL. The NPRM also proposed to require testing the overheat detection sensing elements, marking each serviceable sensing element with a witness mark, and replacing each nonserviceable part with a serviceable part. The NPRM also proposed to prohibit the installation of affected parts under certain conditions. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2023–2139.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from NetJets. The following presents the comment received on the NPRM and the FAA's response to the comment.

Request for Clarification on Location of Date of Manufacture

NetJets requested a statement be added to paragraph (h) of the proposed AD indicating that the date of manufacture can be found in the aircraft maintenance logbook, in addition to the identification plate of the airplane on certain airplanes. This information is stated in Transport Canada AD CF–2023–18, Part II, paragraph A. NetJets further stated that Bombardier no longer stamps a date on the airframe data plate.

The FAA agrees the date of manufacture can be found either on the identification plate of certain airplanes or in the aircraft maintenance logbook. The FAA has amended paragraph (h) of this AD to specify the two locations where the date of manufacture can be found.

Conclusion

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered the comment received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on this product. Except for minor editorial changes, and any other changes described previously, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Liebherr Service Bulletin CFD–F1958–26–01, dated May 6, 2022, which specifies part numbers for affected sensing elements.

The FAA reviewed Bombardier Service Bulletin 700–36–7503, dated December 23, 2022, which specifies procedures for testing each leak detection loop (LDL) sensing element installed on the airplane, marking each serviceable sensing element with a witness mark, and replacing each nonserviceable part with a serviceable part.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 19 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Up to 214 work-hours × $85 per hour = Up to $18,190	$0	Up to $18,190	Up to $345,610.

The FAA has received no definitive data on which to base the cost estimates for the on-condition actions specified in this AD. The FAA estimates it takes up to 1.5 hours to replace a sensing element.

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2024–06–08 Bombardier, Inc.: Amendment 39–22713; Docket No. FAA–2023–2139; Project Identifier MCAI–2023–00435–T.

(a) Effective Date

This airworthiness directive (AD) is effective June 5, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Bombardier, Inc., Model BD–700–2A12 airplanes, certificated in any category, having serial numbers 70005 and subsequent.

(d) Subject

Air Transport Association (ATA) of America Code: 36, Pneumatic.

(e) Unsafe Condition

This AD was prompted by reports that some overheat detection sensing elements of the bleed air leak detection system were manufactured with insufficient salt fill. The FAA is issuing this AD to address non-conforming sensing elements of the bleed air leak detection system. The unsafe condition, if not addressed, could result in an inability to detect hot bleed air leaks and consequent damage to surrounding structures and systems, which could prevent continued safe flight and landing.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

For the purpose of this AD, the definitions specified in paragraphs (g)(1) and (2) of this AD apply.

(1) An affected part is a sensing element marked with a date code before A2105 and having an LTS/Kidde part number specified in Liebherr Service Bulletin CFD–F1958–26–01, dated May 6, 2022, unless that sensing element meets the criteria specified in paragraph (g)(1)(i) or (ii) of this AD.

(i) The sensing element has been tested as specified in Section 3 of the Accomplishment Instructions of Kidde Aerospace and Defense Service Bulletin CFD–26–1, Revision 6, dated February 28, 2022, or earlier revisions, and has been found to be serviceable; and the sensing element has been marked on one face of its connector hex nut and packaged as specified in Section 3.C. of the Accomplishment Instructions of Kidde Aerospace and Defense Service Bulletin CFD–26–1, Revision 6, dated February 28, 2022, or earlier revisions.

(ii) The sensing element has been tested and found to be serviceable as specified in paragraph (j) of this AD; and the sensing element has been marked on one face of one connector hex nut with one green mark, as specified in Figure 33 of Bombardier Service Bulletin 700–36–7503, dated December 23, 2022, as applicable (the figure is representative for all sensing elements).

(2) A serviceable part is a sensing element that is not an affected part.

(h) Maintenance Records Verification

For airplane serial numbers 70097 and subsequent whose airplane date of manufacture, as identified on the identification plate of the airplane or in the aircraft maintenance logbook, is on or before the effective date of this AD: Within 60 days after the effective date of this AD, examine the airplane maintenance records to verify whether any affected part has been installed since the airplane date of manufacture, as identified on the identification plate of the airplane or in the aircraft maintenance logbook.

(1) If the maintenance records confirms that an affected part has been installed, or if it cannot be confirmed that an affected part has not been installed, paragraphs (i) and (j) of this AD must be complied with within the compliance time specified in paragraphs (i) and (j) of this AD.

(2) If the maintenance records confirm that no affected parts have been installed since airplane date of manufacture, then paragraphs (i) and (j) of this AD are not applicable.

(i) Minimum Equipment List (MEL) Revision

For all airplanes: Within 90 days after the effective date of this AD, revise the operator's existing MEL by incorporating the information specified in figures 1 through 7 to paragraph (i) of this AD, as applicable. This may be done by inserting a copy of this information into the operator's existing MEL.

Figure 1 to Paragraph (i)—MMEL Item 21–0425

BILLING CODE 4910–13–P

MMEL Item 21-0425

Crew Alerting System (CAS) Message	1. Repair Category	2. Dispatch Consideration
21 AIR COND / PRESS – TRIM LOOP ONE ELEMENT INOP	C	(O) May be displayed provided none of the following messages are displayed: – 21 AIR COND / PRESS – IASC 1B INOP – 21 AIR COND / PRESS – IASC 2B INOP – 21 AIR COND / PRESS – IASC 1B FAULT – 21 AIR COND / PRESS – IASC 2B FAULT

1. OPERATIONS (O)

Before each flight:

(1) Make sure that the airplane is not powered on and that engines and APU are OFF.

a. Connect electrical power to the airplane as follows:

Note: Do not use a Jet Airstart Cart or High Pressure Ground Cart.

i. Connect external AC power, OR

ii. Start the APU as follows:

1. On the ELECTRICAL control panel, set the MAIN BATT and APU BATT switches to ON.

2. On the BLEED/AIR COND control panel, make sure that the APU BLEED switch is set to OFF.

3. On the APU control panel, turn the APU switch to START.

b. When external AC power is on or APU is running, wait a minimum of 6 minutes.

c. After 6 minutes, check for the 21 AIR COND / PRESS – TRIM LOOP ONE ELEMENT INOP info message as follows:

i. If the 21 AIR COND / PRESS – TRIM LOOP ONE ELEMENT INOP info message shows – DISPATCH IS PERMITTED.

Note: The INFO message confirms it is not heat related and therefore cannot be a potential leak in the presence of an affected part.

ii. If the 21 AIR COND / PRESS – TRIM LOOP ONE ELEMENT INOP info message does not show – DISPATCH IS NOT PERMITTED.

Note: No INFO message confirms that it is heat related and therefore could be a potential leak in the presence of an affected part.

d. If required, remove external AC power from the airplane.

e. If required, set APU BLEED to AUTO.

(2) On the INFO synoptic page, make sure that the messages that follow do not show:

Note: Confirm the airplane has electrical power to activate the synoptic page.

b. When external AC power is on or APU is running, wait a minimum of 6 minutes.

c. After 6 minutes, check for the 30 ICE PROT – R WING LOOP ONE ELEMENT INOP info message as follows:

i. If the 30 ICE PROT – R WING LOOP ONE ELEMENT INOP info message shows – DISPATCH IS PERMITTED.

Note: The INFO message confirms it is not heat related and therefore cannot be a potential leak in the presence of an affected part.

ii. If the 30 ICE PROT – R WING LOOP ONE ELEMENT INOP info message does not show – DISPATCH IS NOT PERMITTED.

Note: No INFO message confirms that it is heat related and therefore could be a potential leak in the presence of an affected part.

d. If required, remove external AC power from the airplane.

e. If required, set APU BLEED to AUTO.

(2) On the INFO synoptic page, make sure that the messages that follow do not show:

Note: Confirm the airplane has electrical power to activate the synoptic page.

MMEL Item 30-0095

CAS Message	1. Repair Category	2. Dispatch Consideration
30 ICE PROT – R WIPS LOOP ONE ELEMENT INOP	C	(O) May be displayed provided none of the following messages are displayed: – 21 AIR COND / PRESS – IASC 1B INOP – 21 AIR COND / PRESS – IASC 2B INOP – 21 AIR COND / PRESS – IASC 1B FAULT – 21 AIR COND / PRESS – IASC 2B FAULT

1. OPERATIONS (O)

Before each flight:

(1) Make sure that the airplane is not powered on and that engines and APU are OFF.

a. Connect electrical power to the airplane as follows:

Note: Do not use a Jet Airstart Cart or High Pressure Ground Cart.

i. Connect external AC power, OR

ii. Start the APU as follows:

1. On the ELECTRICAL control panel, set the MAIN BATT and APU BATT switches to ON.

2. On the BLEED/AIR COND control panel, make sure that the APU BLEED switch is set to OFF.

3. On the APU control panel, turn the APU switch to START.

b. When external AC power is on or APU is running, wait a minimum of 6 minutes.

c. After 6 minutes, check for the 30 ICE PROT – R WIPS LOOP ONE ELEMENT INOP info message as follows:

i. If the 30 ICE PROT – R WIPS LOOP ONE ELEMENT INOP info message shows – DISPATCH IS PERMITTED.

Note: The INFO message confirms it is not heat related and therefore cannot be a potential leak in the presence of an affected part.

ii. If the 30 ICE PROT – R WIPS LOOP ONE ELEMENT INOP info message does not show – DISPATCH IS NOT PERMITTED.

Note: No INFO message confirms that it is heat related and therefore could be a potential leak in the presence of an affected part.

d. If required, remove external AC power from the airplane.

e. If required, set APU BLEED to AUTO.

BILLING CODE 4910–13–C

(j) Testing and Replacement of Affected Overheat Detection Sensing Elements

For airplane serial numbers 70005 and subsequent: Within 3,500 flight hours or 120 months, whichever occurs first, from the effective date of this AD, test the overheat detection sensing elements to determine if they are serviceable, in accordance with the Accomplishment Instructions of Bombardier Service Bulletin 700–36–7503, dated December 23, 2022.

(1) For each sensing element that is serviceable, before further flight, mark the sensing element with a witness mark in accordance with the Accomplishment Instructions of Bombardier Service Bulletin 700–36–7503, dated December 23, 2022.

(2) For each sensing element that is not serviceable, before further flight, replace the sensing element with a serviceable part in accordance with the Accomplishment Instructions of Bombardier Service Bulletin 700–36–7503, dated December 23, 2022.

(k) Parts Installation Prohibition

As of the effective date of this AD, no person may install, on any airplane, any affected part unless it is a serviceable part.

(l) No Reporting Requirement

Although Bombardier Service Bulletin 700–36–7503, dated December 23, 2022, specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(m) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to ATTN: Program Manager, Continuing Operational Safety, at the address identified in paragraph (n)(2) of this AD or email to: *9-avs-nyaco-cos@faa.gov.* If mailing information, also submit information by email. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or Bombardier, Inc.'s Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(n) Additional Information

(1) Refer to Transport Canada AD CF–2023–18, dated March 9, 2023, for related information. This Transport Canada AD may be found in the AD docket at *regulations.gov* under Docket No. FAA–2023–2139.

(2) For more information about this AD, contact Steven Dzierzynski, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.*

(o) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Bombardier Service Bulletin 700–36–7503, dated December 23, 2022.

(ii) Liebherr Service Bulletin CFD–F1958–26–01, dated May 6, 2022.

(3) For Bombardier service information identified in this AD, contact Bombardier Business Aircraft Customer Response Center, 400 Côte-Vertu Road West, Dorval, Québec H4S 1Y9, Canada; telephone 514–855–2999; email: *ac.yul@aero.bombardier.com;* website: *bombardier.com.*

(4) For Liebherr-Aerospace Toulouse SAS service information identified in this AD, contact Liebherr-Aerospace Toulouse SAS, 408, Avenue des Etats-Unis—B.P.52010, 31016 Toulouse Cedex, France; telephone +33 (0)5.61.35.28.28; fax +33 (0)5.61.35.29.29; email: *techpub.toulouse@liebherr.com;* website: *www.liebherr.aero.*

(5) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th Street, Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(6) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on March 18, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–2240; Project Identifier MCAI–2023–00936–T; Amendment 39–22717; AD 2024–06–12]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2021–24–20, which applied to all Airbus SAS Model A350–941 and –1041 airplanes, and AD 2023–03–05, which applied to certain Airbus SAS Model A350–941 and –1041 airplanes. AD 2021–24–20 required repetitive water drainage and plug cleaning of the left- and right-hand slat geared rotary actuators (SGRAs) having a certain part number installed on slat 5 track 12 with certain functional item numbers. AD 2023–03–05 required revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. This AD continues to require certain actions in AD 2021–24–20 and AD 2023–03–05 and requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is

issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective June 5, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of June 5, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of March 23, 2023 (88 FR 10011, February 16, 2023).

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of January 27, 2022 (86 FR 72838, December 23, 2021).

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–2240; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For material incorporated by reference in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket at *regulations.gov* under Docket No. FAA–2023–2240.

FOR FURTHER INFORMATION CONTACT: Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email *9-avs-nyaco-cos@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2021–24–20, Amendment 39–21841 (86 FR 72838, December 23, 2021) (AD 2021–24–20) and AD 2023–03–05, Amendment 39–22330 (88 FR 10011, February 16, 2023) (AD 2023–03–05). AD 2021–24–20 applied to all Airbus SAS Model A350–941 and –1041 airplanes. AD 2021–24–20 required repetitive water drainage and plug cleaning of the left- and right-hand SGRAs having a certain part number installed on slat 5 track 12 with certain functional item numbers. The FAA issued AD 2021–24–20 to address SGRA jams, which could result in reduced control of the airplane.

AD 2023–03–05 applied to certain Airbus SAS Model A350–941 and –1041 airplanes. AD 2023–03–05 required revising the existing maintenance or inspection program, as applicable, to incorporate additional new or more restrictive airworthiness limitations. The FAA issued AD 2023–03–05 to address an unsafe condition.

The NPRM published in the **Federal Register** on December 15, 2023 (88 FR 86840). The NPRM was prompted by AD 2023–0157, dated July 31, 2023, issued by EASA, which is the Technical Agent for the Member States of the European Union (EASA AD 2023–0157) (also referred to as the MCAI). The MCAI states that new or more restrictive airworthiness limitations have been developed.

In the NPRM, the FAA proposed to continue to require certain actions in AD 2021–24–20 and AD 2023–03–05 and proposed to require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in EASA AD 2023–0157. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2023–2240.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from Air Line Pilots Association, International, who supported the NPRM without change.

The FAA received additional comments from Delta Air Lines (DAL). The following presents the comments received on the NPRM and the FAA's response.

Request for Clarification of Applicability to Newly Delivered Airplanes

DAL requested whether airplanes with an original airworthiness certificate or original export certificate of airworthiness issued after June 1, 2023, must continue to comply with AD 2019–20–01, Amendment 39–19754 (84 FR 55495, October 17, 2019) (AD 2019–20–01), and AD 2021–24–20, Amendment 39–21841 (86 FR 72838, December 23, 2021) (AD 2021–24–20), since the new AD does not apply to those airplanes.

The FAA agrees to clarify. For airworthiness limitation ADs, applicability is limited to airplanes that are certificated without the new airworthiness limitation document and thus do not apply to airplanes in production. Hence the AD identifies airplanes that were certificated on or before the publication date of the new airworthiness limitation document (for most manufacturers). In this case, the new airworthiness limitation document was published on June 1, 2023. In the preamble of the NPRM, the FAA explained ''Airplanes with an original airworthiness certificate or original export certificate of airworthiness issued after June 1, 2023, must comply with the airworthiness limitations specified as part of the approved type design and referenced on the type certificate data sheet; this proposed AD therefore does not include those airplanes in the applicability.'' Thus, those airplanes are no longer required to comply with AD 2019–20–01 or AD 2021–24–20 after the effective date of this AD because those operators are complying with the new airworthiness limitation document as part of the approved type design, which addresses the unsafe condition identified in AD 2019–20–01 and AD 2021–24–20. The FAA has not changed this AD in this regard.

Conclusion

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered the comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on this product. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Related Service Information Under 1 CFR Part 51

The FAA requires EASA AD 2023–0157. This service information specifies new or more restrictive airworthiness limitations for airplane structures and safe life limits.

This AD also requires EASA AD 2022–0127, dated June 28, 2022, which

the Director of the Federal Register approved for incorporation by reference as of March 23, 2023 (88 FR 10011, February 16, 2023).

This AD also requires EASA AD 2021–0130R1, dated June 10, 2021, which the Director of the Federal Register approved for incorporation by reference as of January 27, 2022 (86 FR 72838, December 23, 2021).

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 30 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR RETAINED ACTIONS FROM AD 2021–24–20

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Retained actions from AD 2021–24–20	4 work-hours × $85 per hour = $340	$0	$340	$10,200

The FAA estimates the total cost per operator for the retained actions from AD 2023–03–05 to be $7,650 (90 work-hours × $85 per work-hour).

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate.

The FAA estimates the total cost per operator for the new actions to be $7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2021–24–20, Amendment 39–21841 (86 FR 72838, December 23, 2021); and AD 2023–03–05, Amendment 39–22330 (88 FR 10011, February 16, 2023); and

■ b. Adding the following new AD:

2024–06–12 Airbus SAS: Amendment 39–22717; Docket No. FAA–2023–2240; Project Identifier MCAI–2023–00936–T.

(a) Effective Date

This airworthiness directive (AD) is effective June 5, 2024.

(b) Affected ADs

(1) This AD replaces AD 2021–24–20, Amendment 39–21841 (86 FR 72838, December 23, 2021) (AD 2021–24–20); and AD 2023–03–05, Amendment 39–22330 (88 FR 10011, February 16, 2023) (AD 2023–03–05).

(2) This AD affects AD 2019–20–01, Amendment 39–19754 (84 FR 55495, October 17, 2019) (AD 2019–20–01).

(c) Applicability

This AD applies to Airbus SAS Model A350–941 and –1041 airplanes, certificated in any category, with an original airworthiness certificate or original export certificate of airworthiness issued on or before June 1, 2023.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Unsafe Condition

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address hazardous or catastrophic airplane system failures.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Requirements of AD 2021–24–20, With No Changes

This paragraph restates the requirements of paragraph (g) of AD 2021–24–20, with no changes. Except as specified in paragraph (h) of this AD, comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2021–0130R1, dated June 10, 2021 (EASA AD 2021–0130R1). Accomplishing the revision of the existing maintenance or inspection program required by paragraph (m) of this AD terminates the requirements of this paragraph.

(h) Retained Exceptions to EASA AD 2021–0130R1, With No Changes

This paragraph restates the exceptions specified in paragraph (h) of AD 2021–24–20, with no changes.

(1) Where EASA AD 2021–0130R1 refers to ''the effective date of the original issue of this [EASA] AD,'' this AD requires using January 27, 2022 (the effective date of AD 2021–24–20).

(2) The ''Remarks'' section of EASA AD 2021–0130R1 does not apply to this AD.

(i) Retained No Reporting for EASA AD 2021–0130R1, With No Changes

This paragraph restates the no reporting requirement of paragraph (i) of AD 2021–24–20, with no changes. Although the service information referenced in EASA AD 2021–0130R1 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Retained Revision of the Existing Maintenance or Inspection Program, With No Changes

This paragraph restates the requirements of paragraph (j) of AD 2023–03–05, with no changes. For airplanes with an original airworthiness certificate or original export certificate of airworthiness issued on or before May 2, 2022: Except as specified in paragraph (k) of this AD, comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2022–0127, dated June 28, 2022 (EASA AD 2022–0127). Accomplishing the revision of the existing maintenance or inspection program required by paragraph (m) of this AD terminates the requirements of this paragraph.

(k) Retained Exceptions to EASA AD 2022–0127, With No Changes

This paragraph restates the exceptions specified in paragraph (k) of AD 2023–03–05, with no changes.

(1) The requirements specified in paragraphs (1) and (2) of EASA AD 2022–0127 do not apply to this AD.

(2) Paragraph (3) of EASA AD 2022–0127 specifies to revise ''the AMP'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after March 23, 2023 (the effective date of AD 2023–03–05).

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2022–0127 is at the applicable ''limitations'' as incorporated by the requirements of paragraph (3) of EASA AD 2022–0127, or within 90 days after March 23, 2023 (the effective date of AD 2023–03–05), whichever occurs later.

(4) The provisions specified in paragraphs (4) and (5) of EASA AD 2022–0127 do not apply to this AD.

(5) The ''Remarks'' section of EASA AD 2022–0127 does not apply to this AD.

(l) Retained Restrictions on Alternative Actions and Intervals With a New Exception

This paragraph restates the requirements of paragraph (l) of AD 2022–0127, with a new exception. Except as required by paragraph (m) of this AD, after the existing maintenance or inspection program has been revised as required by paragraph (j) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2022–0127.

(m) New Revision of the Existing Maintenance or Inspection Program

Except as specified in paragraph (n) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2023–0157, dated July 31, 2023 (EASA AD 2023–0157). Accomplishing the revision of the existing maintenance or inspection program required by this paragraph terminates the requirements of paragraphs (g) and (j) of this AD.

(n) Exceptions to EASA AD 2023–0157

(1) This AD does not adopt the requirements specified in paragraphs (1) and (2) of EASA AD 2023–0157.

(2) Paragraph (3) of EASA AD 2023–0157 specifies revising ''the AMP'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA 2023–0157 is at the applicable ''limitations'' and ''associated thresholds'' as incorporated by the requirements of paragraph (3) of EASA AD 2023–0157, or within 90 days after the effective date of this AD, whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraphs (4) and (5) of EASA AD 2023–0157.

(5) This AD does not adopt the ''Remarks'' section of EASA AD 2023–0157.

(o) New Provisions for Alternative Actions and Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (m) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2023–0157.

(p) Terminating Action for Certain Tasks Required by AD 2019–20–01

After the maintenance or inspection program has been revised as required by paragraph (j) or (m) of this AD, the repetitive greasing specified in EASA AD 2018–0234R1, dated November 13, 2018, and EASA AD 2018–0234R2, dated September 17, 2019, as required by AD 2019–20–01, is terminated for thrust reverser actuators, having part number (P/N) 351D9908–689, P/N 351D9908–691 or P/N 351D9908–693.

(q) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the International Validation Branch, send it to the attention of the person identified in paragraph (r) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(r) Additional Information

For more information about this AD, contact Dat Le, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email *9-avs-nyaco-cos@faa.gov.*

(s) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on June 5, 2024.

(i) European Union Aviation Safety Agency (EASA) AD 2023–0157, dated July 31, 2023.

(ii) [Reserved]

(4) The following service information was approved for IBR on March 23, 2023 (88 FR 10011, February 16, 2023).

(i) EASA AD 2022–0127, dated June 28, 2022.

(ii) [Reserved]

(5) The following service information was approved for IBR on January 27, 2022 (86 FR 72838, December 23, 2021).

(i) EASA AD 2021–0130R1, dated June 10, 2021.

(ii) [Reserved]

(6) For EASA ADs 2021–0130R1, 2022–0127, and 2023–0157, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu.* You may find these EASA ADs on the EASA website at *ad.easa.europa.eu.*

(7) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(8) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on March 22, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

14 CFR Part 39

[Docket No. FAA–2024–0031; Project Identifier MCAI–2022–01307–T; Amendment 39–22729; AD 2024–07–08]

RIN 2120–AA64

Airworthiness Directives; MHI RJ Aviation ULC (Type Certificate Previously Held by Bombardier, Inc.) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain MHI RJ Aviation ULC Model CL–600–2C10 (Regional Jet Series 700, 701 & 702); CL–600–2C11 (Regional Jet Series 550); CL–600–2D15 (Regional Jet Series 705); and CL–600–2D24 (Regional Jet Series 900) airplanes. This AD was prompted by a determination that a potential crack of the tombstone fitting lug cannot be detected as the bushings remain in place during accomplishment of the special detailed inspection (SDI) required by a certain airworthiness limitation (ALI) task. This AD requires inspecting the tombstone fitting lug with a new SDI sub-surface ultrasound procedure when accomplishing the ALI task, as specified in a Transport Canada AD, which is incorporated by reference. This AD also requires corrective actions if necessary. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective June 5, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of June 5, 2024.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–0031; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For material incorporated by reference in this AD, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca;* website *tc.canada.ca/en/aviation.*
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket at *regulations.gov* under Docket No. FAA–2024–0031.

FOR FURTHER INFORMATION CONTACT: Yaser Osman, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email *9-avs-nyaco-cos@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain MHI RJ Aviation ULC Model CL–600–2C10 (Regional Jet Series 700, 701 & 702); CL–600–2C11 (Regional Jet Series 550); CL–600–2D15 (Regional Jet Series 705); and CL–600–2D24 (Regional Jet Series 900) airplanes. The NPRM published in the **Federal Register** on January 16, 2024 (89 FR 2517). The NPRM was prompted by Transport Canada AD CF–2022–54R1, dated October 4, 2022, issued by Transport Canada, which is the aviation authority for Canada (Transport Canada AD CF–2022–54R1) (also referred to as the MCAI). Transport Canada AD CF–2022–54R1 superseded Transport Canada AD CF–2022–54, dated September 13, 2022, to correct a reference to an incorrect maintenance requirements manual number. The MCAI states that MHI RJ discovered that the MHI RJ Non-Destructive Testing Manual (NDTM) Part 6, Procedure 53–61–121–250, associated with ALI Task 53–61–121, is not adequate to detect a potential crack of the tombstone fitting lug before the critical crack size is reached as the bushings remain in place during the SDI. Transport Canada AD CF–2022–54R1 mandates the use of new ultrasonic MHI RJ NDTM Part 4, Procedure 53–61–121–270, in conjunction with NDTM Part 6, Procedure 53–61–121–250, during accomplishment of the SDIs required by ALI Task 53–61–121.

In the NPRM, the FAA proposed to require inspecting the tombstone fitting lug with a new SDI sub-surface ultrasound procedure when accomplishing the ALI task, as specified in Transport Canada AD CF–2022–54R1. The NPRM also proposed to require corrective actions (repairing cracks) if necessary. The FAA is issuing this AD to address the undetected cracking of the tombstone fitting lug. If the crack is not detected, the tombstone fitting lug will eventually fail. The failure will cause a transfer of load to other engine attachment points, which will then be overloaded and compromised in their structural integrity. This can lead to a rapid failure mode, potentially resulting in the loss of the engine.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2024–0031.

Discussion of Final Airworthiness Directive

Comments

The FAA received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on this product. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Related Service Information Under 1 CFR Part 51

Transport Canada AD CF–2022–54R1 specifies procedures for accomplishing a special detailed inspection for cracks of the engine forward support frame's tombstone top and bottom fitting lugs at frame fuselage station (FS) 1051.30, during the accomplishment of the SDIs required by ALI Task 53–61–121. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 597 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product (per interval)	Cost on U.S. operators (per interval)
2 work-hours × $85 per hour = $170 (per interval)	$0	$170	$101,490

The FAA has received no definitive data on which to base the cost estimates for the repairs specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2024–07–08 MHI RJ Aviation ULC (Type Certificate Previously Held by Bombardier, Inc.): Amendment 39–22729; Docket No. FAA–2024–0031; Project Identifier MCAI–2022–01307–T.

(a) Effective Date

This airworthiness directive (AD) is effective June 5, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to MHI RJ Aviation ULC (Type Certificate Previously Held by Bombardier, Inc.) Model CL–600–2C10 (Regional Jet Series 700, 701 & 702); CL–600–2C11 (Regional Jet Series 550); CL–600–2D15 (Regional Jet Series 705); and CL–600–2D24 (Regional Jet Series 900) airplanes, certificated in any category, as identified in Transport Canada AD CF–2022–54R1, dated October 4, 2022 (Transport Canada AD CF–2022–54R1).

(d) Subject

Air Transport Association (ATA) of America 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by a determination that the MHI RJ Non-Destructive Testing Manual (NDTM) Part 6, Procedure 53–61–121–250, associated with Airworthiness Limitations (ALI) Task 53–61–121, is not adequate to detect a potential crack of the tombstone fitting lug as the bushings remain in place during the special detailed inspection (SDI). The FAA is issuing this AD to address the undetected cracking of the tombstone fitting lug. If the crack is not detected, the tombstone fitting lug will eventually fail. The failure will cause a transfer of load to other engine attachment points, which will then be overloaded and compromised in their structural integrity. This can lead to a rapid failure mode, potentially resulting in the loss of the engine.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as required by paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, Transport Canada CF–2022–54R1.

(h) Exceptions To Transport Canada CF–2022–54R1

(1) Where Transport Canada AD CF–2022–54R1 refers to the effective date of AD CF–2022–54 (September 27, 2022), this AD requires using the effective date of this AD.

(2) Where paragraph A. of Transport Canada AD CF–2022–54R1 specifies inspecting ''For aeroplanes that, as of the effective date of AD CF–2022–54 (27 September 2022), have not been inspected as required by MRM CSP B–053 Part 2 ALI Task 53–61–121,'' this AD requires replacing that text with ''For all airplanes.''

(3) This AD does not adopt paragraph B. of Transport Canada AD CF–2022–54R1.

(4) Where paragraph A. of Transport Canada AD CF–2022–54R1 specifies inspecting ''within the intervals in MRM CSP B–053 Part 2 for ALI Task 53–61–121,'' for this AD, the initial compliance time for the task is within the ''threshold'' specified in the service information identified in paragraph A. of Transport Canada AD CF–2022–54R1 or within 90 days after the effective date of this AD, whichever occurs later.

(i) Crack Repair

If any cracking is found during the actions required by paragraph (g) of this AD, repair the cracking before further flight using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or MHI RJ Aviation ULC's Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DOA-authorized signature.

(j) No Reporting Requirement

Although the service information referenced in Transport Canada AD CF–2022–54R1 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(k) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation

Branch, mail it to the address identified in paragraph (l) of this AD. Information may be emailed to: *9-AVS-NYACO-COS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or MHI RJ Aviation ULC's Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(l) Additional Information

For more information about this AD, contact Yaser Osman, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email *9-avs-nyaco-cos@faa.gov.*

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Transport Canada AD CF–2022–54R1, dated October 4, 2022.

(ii) [Reserved]

(3) For Transport Canada AD CF–2022–54R1, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca.* You may find this Transport Canada AD on the Transport Canada website at *tc.canada.ca/en/aviation.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on April 2, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain The Boeing Company Model 757–200, 757–200CB, and 757–300 airplanes. This AD was prompted by cracks on both sides of the airplane in the station (STA) 1640 frame web between S–14 and S–15. This AD requires an inspection or maintenance records check for existing liner holes in the STA 1640 frame web between S–14 and S–15, and applicable on-condition actions. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective June 5, 2024.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of June 5, 2024.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–1214; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For Boeing material, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com.*
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* under Docket No. FAA–2023–1214.

FOR FURTHER INFORMATION CONTACT: Wayne Ha, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: 562–627–5238; email: *Wayne.Ha@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain The Boeing Company Model 757–200, 757–200CB, and 757–300 airplanes. The NPRM published in the **Federal Register** on July 21, 2023 (88 FR 47090). The NPRM was prompted by cracks on both sides of the airplane at certain stringers. In the NPRM, the FAA proposed to require an inspection or a maintenance records check for existing liner holes at certain stringers, and applicable on-condition actions. The FAA is issuing this AD to address liner holes that could create a stress concentration around the hole and lead to cracks, which could result in the inability of a structural element to sustain limit load and could adversely affect the structural integrity of the airplane.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from the Air Line Pilots Association, International, who supported the NPRM without change, and additional comments from Aviation Partners Boeing (APB), Boeing, Delta Air Lines, FedEx, and United Airlines. The following presents the comments received on the NPRM and the FAA's response to each comment.

Request to Clarify Location of Crack Findings

Boeing requested that the **SUMMARY** section of the NPRM be revised to clarify the location of the cracks by replacing the phrase ''at certain stringers'' with ''in the STA 1640 frame web between S–14 and S–15'' in two places. Boeing stated that cracks were not detected at the stringer locations, but rather in the frame web between S–14 and S–15.

The FAA concurs with the change and has revised this final rule accordingly.

Request To Clarify Applicable On-Condition Actions

Boeing requested a revision to the NPRM section ''Related Service Information Under 1 CFR part 51'' to clarify that all on-condition actions depend on the airplane configuration and may include a combination of the actions.

The FAA concurs with the request and has revised this final rule accordingly.

Request To Clarify Required Actions

Paragraph (e) of the proposed AD stated that the AD would address ''unplugged liner holes'' that could create a stress concentration around ''the unplugged hole'' and lead to cracks. Boeing requested that the word ''unplugged'' be removed in both locations. Boeing stated that although the primary concern is unplugged liner holes, the proposed AD would also require actions for certain plugged holes.

The FAA agrees with the request and has changed paragraph (e) of this AD accordingly.

Request To Change Grouping for Certain Airplanes

FedEx stated that all its airplanes affected by the NPRM are Model 757–200 airplanes, and all of these airplanes are currently considered to be Group 1 airplanes, as defined by Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022. FedEx added that its Model 757–200 airplanes were converted to a configuration similar to Boeing Model 757–200SF airplanes (special freighter airplanes with supplemental type certificate (STC) ST00916WI–D) per VT Mobile Aerospace Engineering STC ST03562AT, and therefore its airplanes are no longer configured as passenger airplanes. Because the inspection areas for its airplanes have been modified by STC ST03562AT, FedEx stated that the inspection areas specified for Group 1 airplanes are no longer applicable. FedEx therefore requested that Group 1 airplanes modified by STC ST03562AT be considered Group 3 airplanes, and required to follow all inspections, methods, and compliance times for Group 3 airplanes. FedEx requested this change to avoid the need for an alternative method of compliance (AMOC) for its airplanes when the AD becomes effective.

The FAA agrees that airplanes modified in accordance with STC ST03562AT are no longer Group 1 airplanes, as identified in Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022, and are now Group 3. Paragraph (h)(4) of this AD has been added to specify that Group 1 airplanes that have been converted from a passenger to freighter configuration with STC ST03562AT must do the applicable actions specified for Group 3 airplanes.

Request To Extend Compliance Time

FedEx requested an extension of the initial compliance time to 3,000 flight cycles for actions in Tables 13 through 16 of Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022. FedEx reported that not all of its airplanes will be scheduled for a heavy maintenance visit within the proposed compliance time, and that a 3,000-flight-cycle compliance time would match the Model 757–200SF heavy maintenance schedule. FedEx added that any compliance time requirement sooner than 3,000 flight cycles would force FedEx to schedule airplanes at inopportune times and locations, and would become an even bigger burden to repair any cracking found during the inspections.

The FAA does not agree to change the compliance time. In developing an appropriate compliance time for this action, the FAA considered the recommendations of the manufacturer, the urgency associated with the subject unsafe condition, and the practical aspect of compliance with the AD within a period of time that corresponds to the normal scheduled maintenance for most affected operators. In consideration of these items, the FAA determined that the compliance time, as proposed, will ensure an acceptable level of safety. The FAA has not changed this AD as a result of this comment. However, under the provisions of paragraph (i) of this AD, the FAA will consider requests for approval of alternative compliance times if sufficient data are submitted to substantiate that the change would provide an acceptable level of safety.

Request To Clarify Compliance Times for Airplanes With STC

Delta reported that it operates a number of Boeing Model 757 airplanes with STC ST01518SE installed but without winglets–a configuration approved under STC ST01518SE. Delta noted that paragraph (h)(3) of the proposed AD did not address this configuration. Delta requested that the proposed AD be revised to clarify whether the reduced compliance time specified in paragraph (h)(3) of this AD applies only to airplanes with winglets installed.

The FAA provides the following clarification. A compliance time for airplanes with STC ST01518SE but without winglets has not been evaluated; therefore, that compliance-time requirement applies to all configurations with the STC ST01518SE modification. For clarification, paragraph (h)(3) of this AD has been revised to specify that the reduced compliance time applies to airplanes modified in accordance STC ST01518SE, with or without blended or scimitar blended winglets installed. However, as specified in paragraph (i) of this AD, the FAA will consider requests for approval of alternative compliance times if sufficient data are submitted to substantiate that the change would provide an acceptable level of safety.

Request To Require Different Service Information

APB requested that the proposed AD be revised to require using Aviation Partners Boeing Service Bulletin AP757–53–004, Revision 1, dated February 15, 2023, for airplanes on which APB blended or scimitar blended winglets are installed by STC ST01518SE. APB provided no justification for this request.

Delta requested that paragraph (h)(3) of the proposed AD be revised, for airplanes with STC ST01518SE, to provide the less restrictive compliance times and methods than those specified in the proposed AD by using Aviation Partners Boeing Service Bulletin AP757–53–004, Revision 1, dated February 15, 2023. Delta stated that the conservative compliance times and repeat intervals specified in paragraph (h)(3) of the proposed AD would impose a great operational burden on Delta. Delta reported that it would be unable to accomplish the inspection in a regularly scheduled check environment within the proposed 1,000-flight-cycle compliance time. Delta added that the subject inspections require significant access procedures, which would result in extended unscheduled ground time, and could similarly affect all operators. Delta stated that APB, in its comments on the NPRM, reported that APB Service Bulletin AP757–53–004, Revision 1, dated February 15, 2023, had been independently reviewed by a designated engineering representative (DER) and recommended for FAA approval.

The FAA disagrees with the requests. The FAA has not reviewed nor approved the APB service bulletin. And given the urgency of the identified unsafe condition, the FAA has determined that delaying this AD while this service bulletin is reviewed and approved would be inappropriate. However, under the provisions of paragraph (i) of this AD, the FAA will consider requests for approval of alternative actions and compliance times if sufficient data are submitted to substantiate that the change would provide an acceptable level of safety. The FAA has not changed this AD as a result of this comment.

Conclusion

The FAA reviewed the relevant data, considered the comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, and any other changes described previously, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022. This service information specifies procedures for a general visual inspection or maintenance records check of the STA 1640 fuselage frame web between S–14 and S–15, left and right sides, for an existing liner hole, and applicable on-condition actions. Depending on the airplane configuration, on-condition actions include repetitive surface high frequency eddy current (HFEC) inspections for cracks of the web around the fastener (plug), zero-timing the liner hole, plugging the liner hole, repetitive open-hole HFEC inspections of the web for cracks, and crack repair, or some combination of these actions. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

Costs of Compliance

The FAA estimates that this AD affects 419 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	69 work-hours × $85 per hour = $5,865	$0	$5,865	$2,457,435

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on the results of the inspection. The agency has no way of determining the number of aircraft that might need these on-condition actions:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
HFEC inspections, plugging the liner hole, zero-timing of plugged liner hole.	2 work-hours × $85 per hour = $340	$5	$345

The FAA has received no definitive data on which to base the cost estimates for the crack repair specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2024–07–05 The Boeing Company: Amendment 39–22726; Docket No. FAA–2023–1214; Project Identifier AD–2023–00181–T.

(a) Effective Date

This airworthiness directive (AD) is effective June 5, 2024.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 757–200, 757–200CB, and 757–300 airplanes, certificated in any category, as identified in Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by cracks on both sides of the airplane in the station (STA) 1640 frame web between stringer S–14 and S–15. The FAA is issuing this AD to address liner holes that could create a stress concentration around the holes and lead to cracks. The unsafe condition, if not addressed, could result in the inability of a structural element to sustain limit load and could adversely affect the structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified by paragraph (h) of this AD: At the applicable times specified in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022. Actions identified as terminating action in Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022, terminate the applicable required actions of this AD, provided the terminating action is done in accordance with the Accomplishment Instructions of Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by this AD can be found in Boeing Alert Service Bulletin 757–53A0120, dated January 17, 2022, which is referred to in Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022.

(h) Exceptions to Service Information Specifications

(1) Where the Compliance Time columns of the tables in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022, refer to the original issue date of Requirements Bulletin 757–53A0120 RB, this AD requires using the effective date of this AD.

(2) Where Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022, specifies contacting Boeing for repair instructions: This AD requires doing the repair before further flight using a method approved in accordance with the procedures specified in paragraph (i) of this AD.

(3) For airplanes that have been modified in accordance with supplemental type certificate (STC) ST01518SE, with or without blended or scimitar blended winglets installed: This AD requires all compliance times and repetitive intervals required by this AD, as specified in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022, to be divided by a factor of 2.

(4) For airplanes identified as Group 1 in Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022, that have been converted from a passenger to freighter configuration with VT Mobile Aerospace Engineering (MAE) STC ST03562AT: This AD requires compliance with all applicable actions and compliance times specified for Group 3 airplanes.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j)(1) of this AD. Information may be emailed to *AMOC@FAA.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR–520, Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(j) Related Information

(1) For more information about this AD, contact Wayne Ha, Aviation Safety Engineer, FAA, 2200 South 216th Street, Des Moines, WA 98198; phone: 562–627–5238; email: *Wayne.Ha@faa.gov.*

(2) Service information identified in this AD that is not incorporated by reference is available at the address specified in paragraph (k)(3) of this AD.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Requirements Bulletin 757–53A0120 RB, dated January 17, 2022.

(ii) [Reserved]

(3) For Boeing material, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on March 29, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

COMMODITY FUTURES TRADING COMMISSION

17 CFR Parts 23 and 37

RIN 3038–AF34

Swap Confirmation Requirements for Swap Execution Facilities

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission (Commission or CFTC) is amending its swap execution facility (SEF) regulations related to uncleared swap confirmations, and making associated technical and conforming changes.

DATES: This rule is effective May 31, 2024.

FOR FURTHER INFORMATION CONTACT: Roger Smith, Associate Chief Counsel, (202) 418–5344, *rsmith@cftc.gov,* Division of Market Oversight, Commodity Futures Trading Commission, 77 West Jackson Blvd., Suite 800, Chicago, Illinois 60604.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Background

A. Regulatory History: The Part 37 Rules

The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) amended the Commodity Exchange Act (CEA or Act) by adding section 5h, which establishes registration requirements and core principles for SEFs.[1] The Commission implemented CEA section 5h by adopting part 37 of its regulations, which, among other things, sets forth operational requirements for SEFs and establishes various requirements for the trading of swaps on SEFs.[2] As part of the implementing SEF regulations, the Commission adopted § 37.6(b), which requires a SEF to provide each counterparty to a swap transaction that is entered into on or pursuant to the rules of the SEF—whether cleared or uncleared—with a written record of all of the terms of the transaction, ''which shall legally supersede any previous agreement and serve as a confirmation of the transaction.'' [3] Pursuant to § 37.6(b), the confirmation of all terms of the transaction must take place at the same time as execution, subject to a limited exception for certain information related to accounts included in bunched orders.[4]

In November 2018, the Commission issued a comprehensive proposal to amend the SEF regulatory framework.[5] In the 2018 SEF Proposal, the Commission proposed to amend § 37.6(b) to establish separate swap transaction documentation requirements for cleared and uncleared swaps.[6] For uncleared swap transactions, the Commission proposed to amend § 37.6(b) to require a SEF to provide the counterparties to the transaction with a ''trade evidence record'' that would memorialize the terms of the transaction agreed upon between the counterparties on the SEF.[7] Under the 2018 SEF Proposal, a ''trade evidence record'' was defined as a legally binding written documentation (electronic or otherwise) that memorializes the terms of a swap transaction agreed upon by the counterparties and legally supersedes any conflicting term in any previous agreement (electronic or otherwise) that relates to the swap transaction between the counterparties.[8] In 2021, the Commission withdrew the unadopted portions of the 2018 SEF Proposal,[9] including the proposed amendments to § 37.6, from further consideration.[10]

Pursuant to section 731 of the Dodd-Frank Act, which added section 4s(i) to the CEA,[11] the Commission has adopted regulations to prescribe documentation standards for swap dealers (SDs) and major swap participants (MSPs) related to the timely and accurate confirmation, processing, netting, documentation, and valuation of swaps. The Commission adopted § 23.501 to specifically address swap confirmation requirements for SDs and MSPs, including for those swaps executed on a SEF or designated contract market (DCM).[12] Among other things, § 23.501 provides that any swap transaction executed on a SEF or DCM shall be deemed to satisfy the swap confirmation requirements set forth in § 23.501, provided that the rules of the SEF or DCM establish that confirmation of all terms of the transaction shall take place at the same time as execution.[13]

B. Summary of Amendments to § 37.6

During the implementation of part 37, SEFs informed the Commission that the confirmation requirement for uncleared swaps under § 37.6(b) was operationally and technologically difficult and impractical to implement. As discussed more fully below, Commission staff from the Division of Market Oversight (DMO) acknowledged these technological and operational challenges and provided no-action positions for SEFs with respect to certain provisions of the Commission's regulations related to uncleared swap confirmations.[14] In particular, DMO most recently issued CFTC No-Action Letter No. 17–17 (NAL No. 17–17), which provides a no-action position with respect to the obligation to obtain copies of underlying, previously negotiated agreements between the counterparties, as discussed in greater detail below, for a SEF that seeks for uncleared swaps to satisfy the confirmation requirement in § 37.6(b) by incorporating by reference terms of such underlying agreements.[15]

On August 25, 2023, the Commission released a proposal [16] to amend its SEF regulations related to uncleared swap confirmations to address issues which have been addressed in staff no-action letters, including most recently NAL No. 17–17. In particular, the Commission proposed to amend § 37.6(b) to enable SEFs to incorporate terms of underlying, previously negotiated agreements between the counterparties by reference in an uncleared swap confirmation without being required to obtain such underlying, previously negotiated agreements. Further, the Commission proposed to amend § 37.6(b), which currently requires confirmation of all terms of a swap transaction to ''take place at the same time as execution,'' to require such confirmation to take place ''as soon as technologically practicable'' after the execution of the swap transaction on the SEF for both cleared and uncleared swap transactions. The Commission also proposed to amend § 37.6(b) to make clear that the SEF-provided confirmation under § 37.6(b) shall legally supersede any *conflicting terms* in a previous agreement, rather than the entire agreement. In addition, the Commission proposed to make conforming amendments to

[14] NAL No. 17–17, Re: Extension of No-Action Relief for Swap Execution Facility Confirmation and Recordkeeping Requirements under Commodity Futures Trading Commission Regulations 37.6(b), 37.1000, 37.1001, 45.2, and 45.3(a) (Mar. 24, 2017). NAL No. 17–17 extended the no-action position previously provided by Commission staff. *See* CFTC Letter No. 16–25, Re: Extension of No-Action Relief for Swap Execution Facility Confirmation and Recordkeeping Requirements under Commodity Futures Trading Commission Regulations 37.6(b), 37.1000, 37.1001, 45.2, and 45.3(a) (Mar. 14, 2016) (NAL No. 16–25); CFTC Letter 15–25, Re: Extension of No-Action Relief for SEF Confirmation and Recordkeeping Requirements under Commission Regulations 37.6(b), 37.1000, 37.1001, and 45.2, and Additional Relief for Confirmation Data Reporting Requirements under Commission Regulation 45.3(a) (Apr. 22, 2015) (NAL No. 15–25); and CFTC Letter No. 14–108, Staff No-Action Position Regarding SEF Confirmations and Recordkeeping Requirements under Certain Provisions Included in Regulations 37.6(b) and 45.2 (Aug. 18, 2014) (NAL No. 14–108). *See also* CFTC Letter No. 13–58, Time-Limited No-Action Relief to Temporarily Registered Swap Execution Facilities from Commission Regulation 37.6(b) for Non-Cleared Swaps in All Asset Classes (Sept. 30, 2013) (NAL No. 13–58).

[15] *See* NAL No. 17–17. Upon the effective date of the amendments set forth herein, NAL No. 17–17 will expire pursuant its terms. In particular, NAL No. 17–17 states that the no-action position ''shall expire on the effective date of any changes [to § 37.6(b)].'' *See Id.* at 5.

[16] Swap Confirmation Requirements for Swap Execution Facilities, 88 FR 58145 (Aug. 25, 2023) (the Proposal).

§ 23.501(a)(4)(i) to correspond with the proposed amendments to § 37.6(b). Finally, the Commission proposed to make certain non-substantive amendments to § 37.6(a) and (b) to enhance clarity.

The Commission received four relevant comment letters regarding the Proposal.[17] After considering the comments, the Commission is adopting the rule amendments described herein as proposed. The Commission believes the amendments will reduce administrative burdens for SEFs and market participants, address technological and operational challenges, reduce the cost of SEFs' compliance with the confirmation requirement in § 37.6(b), and lead to a more effective regulatory framework for SEF swap confirmations.

C. Consultation With Other U.S. Financial Regulators

In developing these rule amendments, the Commission has consulted with the Securities and Exchange Commission (SEC), pursuant to section 712(a)(1) of the Dodd-Frank Act.[18]

II. Amended Regulations

A. § 37.6—Enforceability

1. § 37.6(b)(1)—Uncleared Swap Confirmations: Incorporation by Reference of Underlying Previously Negotiated Agreements

a. Proposed Regulations

Section 37.6(b) requires a SEF to provide each counterparty to a swap transaction that is entered into on or pursuant to the rules of the SEF, whether cleared or uncleared, with a ''confirmation''—a written record that contains all of the terms of the transaction—at the time of execution.[19] The terms of a swap transaction include economic terms that are specific to the transaction, *e.g.,* swap product, price, and notional amount, and can also include non-specific ''relationship terms'' that generally govern all transactions between two counterparties—including, for example, relationship-level default, margin, or governing law provisions.

For uncleared swap transactions,[20] the Commission is aware that many relationship terms that may govern certain aspects of the transaction are often negotiated and agreed upon in written documentation between the counterparties prior to execution.[21] The Commission previously stated that, for purposes of satisfying the requirements of § 37.6(b), a SEF's confirmation terms for uncleared swap transactions may incorporate by reference relevant terms set forth in such underlying agreements, as long as those agreements have been submitted to the SEF prior to execution.[22] As applied, § 37.6(b) requires that the SEF incorporate this documentation by reference into the issued confirmation, which is intended in part to provide SEF participants with legal certainty with respect to the terms of uncleared swap transactions.[23]

The requirement that the underlying agreements be submitted to the SEF prior to execution has, however, created impractical burdens for SEFs. Based upon feedback from SEFs, the Commission understands that SEFs have encountered many issues in trying to comply with the requirement, including high financial, administrative, and logistical burdens in order to collect and maintain bilateral transaction agreements from many individual counterparties. SEFs have stated that they are unable to develop a cost-effective method to request, accept, and maintain a library of every relevant previous agreement between counterparties.[24] SEFs have also noted that the potential number of previous agreements is considerable, given that SEF counterparties often enter into agreements with many other parties and may have multiple agreements for different asset classes.[25]

Commission staff from DMO has acknowledged these technological and operational challenges and has accordingly granted no-action positions, most recently in NAL No. 17–17.[26] Based on these no-action positions, many SEFs have incorporated by reference applicable relationship terms from previously negotiated underlying agreements between counterparties in confirmations for uncleared swaps, without obtaining copies of these agreements prior to the execution of a swap and without maintaining copies of such underlying agreements on an ongoing basis.[27]

Based on its experience with the part 37 implementation, in the Proposal the Commission acknowledged that cleared and uncleared swap transactions raise different issues with respect to

[17] The following entities submitted relevant comment letters: Bloomberg SEF LLC (BSEF); Cboe SEF, LLC (Cboe SEF); the International Swaps and Derivatives Association (ISDA); and the Wholesale Markets Brokers' Association, America (WMBAA).

[18] Dodd-Frank Act, Public Law 111–203, tit. VII, section 712(a)(1), 124 Stat. 1376 (2010). On November 2, 2023, the SEC adopted final rules for security-based swap execution facilities (SB SEFs). *See* Security-Based Swap Execution and Registration and Regulation of Security-Based Swap Execution Facilities, 88 FR 87156 (December 15, 2023) (SEC SB SEF Final Rules). As part of the SEC SB SEF Final Rules, the SEC adopted SEC rule 242.812 (SB SEF Rule 812), which was modelled after existing § 37.6 with some modifications. In particular, SB SEF Rule 812 will require an SB SEF to as soon as technologically practicable after the time of execution of a transaction entered into on or pursuant to the rules of the facility, provide a written record to each counterparty of all of the terms of the transaction that were agreed to on the facility, which shall legally supersede any previous agreement regarding such terms. *Id.* at 87294. WMBAA in its comment letter on the Proposal encouraged the SEC to adopt the changes the Commission had proposed in the Proposal. WMBAA at 3. The Commission notes that the SEC SB SEF rules are outside of the scope of this rulemaking. As such, WMBAA's comment is not addressed further in this rulemaking.

[19] 17 CFR 37.6(b). *See also* 17 CFR 23.500(c) (providing a similar definition of ''confirmation'' that is applicable to SDs and MSPs).

[20] The Commission notes that swap trading relationship documentation is not required for swaps cleared by a derivatives clearing organization. *See* 17 CFR 23.504(a)(1).

[21] SEF Core Principles Final Rule at 33491, n.195. *See* Confirmation, Portfolio Reconciliation, Portfolio Compression, and Swap Trading Relationship Documentation Requirements for Swap Dealers and Major Swap Participants, 77 FR 55904, 55906 (Sept. 11, 2012) (noting that swap counterparties have typically relied on the use of industry-standard legal documentation to document their swap trading relationships. This documentation, such as the ISDA Master Agreement and related Schedule and Credit Support Annex (ISDA Agreement), as well as related documentation specific to particular asset classes, offers a framework for documenting uncleared swap transactions between counterparties); *see also* 17 CFR 23.504(b) (for uncleared swap transactions, § 23.504(b) requires written swap trading relationship documentation that includes all terms governing the trading relationship between an SD or MSP and its counterparty).

[22] SEF Core Principles Final Rule at 33491, n.195. While the Commission's statement specifically referenced the incorporation by reference of previously negotiated terms from ''a freestanding master agreement,'' the Commission recognizes that other previously negotiated freestanding agreements similarly may contain terms that are relevant to an uncleared swap confirmation. *Id.*

[23] To ensure that the SEF confirmation provides legal certainty, the Commission has stated that counterparties choosing to execute a swap transaction on or pursuant to the rules of a SEF must have all terms, including possible long-term credit support arrangements, agreed to no later than execution, such that the SEF can provide a written confirmation inclusive of those terms. *See* SEF Core Principles Final Rule at 33491.

[24] Many of these agreements are maintained in paper form or as scanned PDF files that are difficult to quickly digitize in a cost-effective manner. *See* WMBAA, Request for Extended Relief from Certain Requirements under Parts 37 and 45 Related to Confirmations and Recordkeeping for Swaps Not Required or Intended to be Cleared at 3 (Mar. 1, 2016). Further, some SEFs have cited the considerable resource cost of obtaining the number of different agreements that exist to accommodate different types of counterparties and asset classes. *Id.*

[25] *Id.*

[26] *See supra* note 14.

[27] *Id.* As a condition of staff's no-action positions, a SEF has been required to have a rule in its rulebook that requires its participants to provide copies of the underlying agreements to the SEF on request, as well as a rule in its rulebook that requires the SEF to (i) request from a participant an underlying agreement upon request from the Commission, and (ii) to furnish such agreement to the Commission as soon as it is available.

confirmation requirements [28] and that the current § 37.6(b) requirements create difficulties for the latter type of swap transaction. As such, the Commission proposed to amend § 37.6(b) by adding § 37.6(b)(1) to permit SEFs to incorporate relevant terms from underlying, previously negotiated agreements by reference in a confirmation for an uncleared swap transaction without obtaining such incorporated agreements.[29]

b. Public Comments

All of the relevant comments the Commission received supported the proposal to permit SEFs to incorporate relevant terms from underlying, previously negotiated agreements by reference in a confirmation for an uncleared swap transaction without obtaining such incorporated agreements.[30]

WMBAA commended the Commission for ''recognizing the practical complexities faced by market participants with respect to complying with'' the requirement that the underlying agreements be submitted to the SEF prior to execution.[31] WMBAA stated that it believes that codifying the relevant no-action position in NAL No. 17–17 ''into the regulatory framework through the [Proposal] is a prudent and necessary step forward.'' [32] Further, WMBAA stated that the Proposal ''will not only provide legal clarity but also maintain the integrity and efficiency of the uncleared swap market.'' [33] WMBAA also stated that ''codifying the no-action relief will align the regulatory framework with the industry's current practices, promoting consistency and reducing compliance burdens.'' [34]

ISDA stated that it ''strongly support[s] the Commission's proposal to codify its current no-action position that relieves [SEFs] of the obligation to obtain copies of underlying, previously negotiated agreements between trade counterparties, and that enables SEFs to incorporate such terms by reference when issuing swap confirmations.'' [35]

In support of the Proposal, Cboe SEF noted that ''[c]ollecting underlying, previously negotiated agreements is operationally and technologically difficult and impractical—nor is there any benefit to doing so when a SEF and the Commission may request those documents from SEF participants at any time.'' [36]

WMBAA specifically expressed support for not incorporating certain conditions of NAL No. 17–17 into § 37.6(b), in particular the conditions requiring ''(1) participants to provide copies of the underlying previously negotiated freestanding agreements to the SEF on request; and (2) the SEF to request from participants the underlying previously negotiated freestanding agreements on request from the CFTC and requiring the SEF to furnish such documents to the CFTC as soon as they are available.'' [37]

Question 1 of the Proposal asked whether the Commission should ''allow a SEF to issue a confirmation for an uncleared swap transaction that does not . . . include all the terms of the transaction, for example by only including in the confirmation the terms agreed to on the SEF?'' [38] In response to this question, Cboe SEF stated its belief ''that the Commission's current practice (as codified in the Proposal) is the best manner for providing confirmations for an uncleared swap transaction.'' [39] In particular, Cboe SEF explained that it lists foreign-exchange non-deliverable forwards [40] and that ''[g]iven the over-the-counter nature of the FX NDF market, it is critical to be able to incorporate by reference such industry definitions, templates, etc. as well as the

[28] *See supra* note 20.

[29] In addition to stating that DMO will not recommend enforcement action if a SEF incorporates by reference relevant terms from underlying, previously negotiated agreements in confirmations for uncleared swap transactions, without obtaining copies of such agreements, which the Commission codifies in this release, NAL No. 17–17 also provides no-action positions with respect to the requirement to maintain copies of such agreements in order to comply with SEF recordkeeping obligations under §§ 37.1000, 37.1001, and 45.2. Among other things, these requirements obligate a SEF to maintain ''records of all activities relating to the business of'' the SEF. The Commission believes that allowing a SEF to incorporate by reference relevant terms from the underlying, previously negotiated agreements without obtaining such agreements will rectify the compliance issues posed with respect to §§ 37.1000, 37.1001, and 45.2. As a SEF would no longer be required to obtain the underlying, previously negotiated agreements, the Commission believes that these agreements would not, as a general category, constitute records relating to the SEF's business for purposes of §§ 37.1000, 37.1001, and 45.2. The Commission notes, however, that if a SEF did obtain such an underlying, previously negotiated agreement, including at the request of the Commission or its staff or in connection with the fulfillment of the SEF's regulatory obligations, the SEF would, with respect to such agreement, need to comply with its recordkeeping obligations under §§ 37.1000, 37.1001, and 45.2. NAL No. 17–17 also provides a no-action position with respect to the swap data reporting requirements that apply to a SEF under § 45.3(a). In November 2020, the Commission amended its swap data reporting regulations, which amendments included the removal of the terms ''primary economic terms'' and ''confirmation data'' from § 45.3(a). *See* Swap Data Recordkeeping and Reporting Requirements, 85 FR 75503 (Nov. 25, 2020) (Amended Part 45 Rules). Currently, SEFs are required to report as specified in the technical specification published on the Commission's website, *available at https://www.cftc.gov/LawRegulation/DoddFrankAct/Rulemakings/DF_18_RealTimeReporting/index.htm.* As relevant in this context, the technical specification sets out the required validations and message types, including when, for swap data reporting purposes, specific data fields are mandatory, conditional, or optional. For example, the technical specification distinguishes between transaction, collateral, and valuation reporting. In general, SEFs will report transaction message types and not valuation and collateral message types. Those data elements in the technical specification relevant to on-SEF transactions that are contained in the transaction message type are readily available for a SEF to fulfil its reporting obligations under Commission regulations in part 45. As further evidence of this, the defined term ''confirmation data'' no longer exists in § 45.3(a). Therefore, the no-action position stated in NAL No. 17–17 that ''the Division will not recommend that the Commission take enforcement action against a SEF for failure to report certain confirmation data pursuant to Commission Regulation 45.3(a) . . .'', *see* NAL No. 17–17 at 3–4, has not been in effect since the implementation of the Commission's Amended Part 45 Rules. Commission staff have not received a related, updated request for a no-action position with respect to SEF reporting requirements. The Commission believes the Amended Part 45 Rules and the associated technical specification requirements eliminate the need for the no-action position related to § 45.3(a) in NAL No. 17–17. Finally, in the Proposal the Commission did not propose to codify certain conditions from NAL No. 17–17, including conditions that require a SEF to have rules in its rulebook that (i) require a SEF confirmation to state, where applicable, that it incorporates by reference the terms of the underlying previously negotiated freestanding agreements between the counterparties, and (ii) state that in the event of any inconsistency between a SEF confirmation and the underlying previously negotiated freestanding agreements, the terms of the SEF confirmation legally supersede any contradictory terms and that require the SEF's confirmations to state the same. The Commission believes that the amendments adopted herein clarify the requirements for uncleared swap confirmations issued by SEFs in a manner that obviates the need to codify these conditions. *See also* the discussion, *infra,* of those conditions in NAL No. 17–17 that address the SEF's ability to obtain, upon request, copies of the underlying previously negotiated freestanding agreements that have been incorporated by reference into an uncleared swap confirmation.

[40] Cboe SEF explained that it issues confirmations that ''incorporate by reference the terms of the underlying previously-negotiated freestanding agreements (including, without limitation, master agreement, master confirmation agreement and incorporated industry definitions) between the parties governing the Transaction (Master Agreement).'' Further, Cboe SEF explained that the confirmations it issues ''incorporate by reference the terms set forth on the Template Terms for Non-Deliverable FX Transactions in respect of the relevant CCY Pair as recommended by the Emerging Markets Traders Association and in effect as of the Trade Date of the Transaction (NDF Template Terms).'' Finally, Cboe SE noted that its rulebook ''provides that in the event of any inconsistency between the NDF Template Terms and the terms of the Master Agreement, the terms of the Master Agreement will prevail.'' Cboe SEF at 1–2.

counterparties' separately negotiated underlying agreements.''[41] Therefore, Cboe SEF stated its belief that ''it is best for the Commission to not permit uncleared swap confirmations to exclude terms from underlying, previously-negotiated freestanding agreements.''[42]

c. Commission Determination

The Commission is adopting, as proposed and as supported by commenters, new § 37.6(b)(1) to permit SEFs to incorporate relevant terms from underlying, previously negotiated agreements by reference in a confirmation for an uncleared swap transaction without obtaining such incorporated agreements.[43] The Commission believes, following staff's observation of SEFs and market participants operating under the existing no-action position in NAL No. 17–17 and precursor no-action letters, that new § 37.6(b)(1) would not compromise the legal certainty of confirmations issued by SEFs for uncleared swap transactions, as the previously negotiated agreements that are referred to in the confirmation are in effect at the time of the trade. Therefore, § 37.6(b)(1) is an appropriate alternative for SEFs to comply with the confirmation requirement under § 37.6(b), as it applies to uncleared swaps.

The Commission believes that § 37.6(b)(1) will address technological and operational challenges that have prevented SEFs from fully complying with § 37.6(b), as it will permit SEFs to incorporate relevant terms from underlying, previously negotiated agreements by reference in a confirmation for an uncleared swap transaction without obtaining such incorporated agreements before execution. The Commission believes that § 37.6(b)(1) will reduce logistical, administrative, and financial burdens for SEFs, who will not be required to obtain and maintain a library of every relevant previously negotiated agreement between counterparties, and will also reduce such burdens for market participants themselves, who will not be required to submit to a SEF all of their relevant underlying documentation with other potential counterparties on the SEF.

The Commission agrees with WMBAA that adopting § 37.6(b)(1), which codifies the existing no-action position in NAL No. 17–17, will align the regulatory framework for swap confirmations with the market's current practices, promoting consistency and reducing compliance burdens.[44] As more fully discussed below, the Commission expects that § 37.6(b)(1) will reduce the cost of SEFs' compliance with the confirmation requirement in § 37.6(b).

The Commission agrees with Cboe SEF that uncleared swap confirmations should not exclude terms from underlying, previously-negotiated agreements.[45] As such, the Commission is not changing the existing standard in § 37.6(b) that the confirmation include all of the terms of the transaction, including the terms from underlying, previously-negotiated agreements that are incorporated by reference into the confirmation.

In order to avail themselves of the no-action position under NAL No. 17–17, SEFs must have rules in their rulebooks that, among other things, require:[46] (1) participants to provide copies of the underlying previously negotiated freestanding agreements to the SEF on request; and (2) the SEF to request from participants the underlying previously negotiated freestanding agreements on request from the Commission and the SEF to furnish such documents to the Commission as soon as they are available.[47] The Commission believes that the existing requirements for SEFs under the CEA and the Commission's part 37 regulations sufficiently account for these conditions of NAL No. 17–17, such that these conditions do not need to be incorporated as specific conditions of new § 37.6(b)(1).

In particular, SEF Core Principle 5 and the implementing part 37 regulations require, among other things, that a SEF establish and enforce rules that will allow the SEF to obtain any necessary information to perform any of the functions described in section 5h of the Act; establish and enforce rules that will allow the SEF to have the ability and authority to obtain sufficient information to allow it to fully perform its operational, risk management, governance, and regulatory functions and any requirements under part 37; have rules that allow for its examination of books and records kept by the market participants on its facility; and provide information to the Commission on request.[48] The Commission believes that, pursuant to these requirements and as necessary to carry out its statutory and regulatory functions, a SEF has the ability and authority to request copies of the underlying agreements that are incorporated by reference into a confirmation for an uncleared swap transaction and to provide such agreements to the Commission upon request.[49] The Commission notes that this position is supported by public comment.[50]

Therefore, for the reasons stated above, the Commission is adopting as proposed new § 37.6(b)(1) to permit SEFs to incorporate underlying, previously negotiated agreements between counterparties by reference in a confirmation for an uncleared swap transaction without obtaining such incorporated agreements.[51]

2. Amendment to § 37.6(b)—Timing of Swap Transaction Confirmation

a. Proposed Regulations

Section 37.6(b) requires that confirmation of all the terms of a swap transaction entered into on or pursuant to the rules of a SEF must take place at the same time as execution, except for a limited exception for certain information related to accounts included in bunched orders.[52] The Commission proposed to amend this timing requirement and instead require confirmation of all the terms of a swap transaction ''as soon as technologically practicable'' after the execution of the swap transaction on the SEF.

b. Public Comments

Commenters supported amending § 37.6(b) to require confirmation of all the terms of a swap a transaction ''as soon as technologically practicable'' after the execution of the swap transaction on the SEF.[53] WMBAA

[49] Further the Commission also has the ability to request information from the SEF under 17 CFR 37.5(a), which requires a SEF to file with the Commission information related to its business as a SEF upon the Commission's request. *See* 17 CFR 37.5.

[50] *See* WMBAA at 2–3 and Cboe SEF at 1. For example, Cboe SEF notes that ''[c]ollecting underlying, previously negotiated agreements is operationally and technologically difficult and impractical—nor is there any benefit to doing so when a SEF and the Commission may request those documents from SEF participants at any time.''

[51] As noted above, upon the effective date of the rules contained herein, NAL No. 17–17 will expire per its terms. *See supra* note 15.

[52] 17 CFR 37.6(b). Specific customer identifiers for accounts included in bunched orders involving swaps need not be included in confirmations provided by a SEF if the applicable requirements of § 1.35(b)(5) are met. *See* 17 CFR 1.35(b)(5), which provides that specific customer identifiers for accounts included in bunched orders executed on DCMs or SEFs need not be recorded at time of order placement or upon report of execution if the requirements set forth in § 1.35(b)(5)(i)–(v) are met.

[53] ISDA at 2 and WMBAA at 2.

stated that it believed that this amendment ''acknowledges the need for flexibility in the uncleared swap confirmation process, while accommodating technological constraints.'' [54]

Similarly, ISDA noted that this amendment, as ''correctly pointed out by the Commission,'' is ''necessary to account for block trades that are executed outside of the SEF's trading system or platform, but pursuant to the rules of the SEF—and the SEF is therefore unaware of the execution until the counterparties report the trade of the SEF.'' [55]

BSEF stated that it supports the Commission clarifying the timing for confirmations of block trades.[56]

c. Commission Determination

The Commission agrees with commenters and, as proposed, is amending § 37.6(b) to require confirmation of all the terms of a swap transaction ''as soon as technologically practicable'' after the execution of the swap transaction on the SEF.[57] The Commission believes that the amended standard—''as soon as technologically practicable'' after execution—will continue to promote the Commission's goals of providing swap counterparties with legal certainty in a prompt manner, while also being consistent with other Commission requirements related to swap confirmations.[58]

For a block trade that is executed ''away from'' a SEF,—*i.e.,* outside of the SEF's trading system or platform, but still ''pursuant to the rules'' of the SEF for purposes of the § 37.6(b) confirmation requirement—a SEF would be unaware of the execution of the trade until the counterparties report the trade details to the SEF. From a temporal perspective, the SEF would consequently be unable to confirm all terms of the block trade at the same time as execution. The Commission agrees with ISDA that amending the timing standard in § 37.6(b) will account for block trades that are executed outside of the SEF's trading system or platform, but pursuant to the rules of the SEF.[59]

The Commission believes that the amended standard reflects existing SEF capabilities while maintaining the Commission's goal of providing swap counterparties with legal certainty for transactions. Given the Commission's understanding that SEFs are complying with the ''at the same time as execution'' timing standard in existing § 37.6(b) for non-block swap transactions or block transactions executed on the SEF, the Commission expects that the impact of the ''as soon as technologically practicable'' timing standard for confirmations for such swap transactions will not be substantive.[60] Rather, the amendment will take into account practical realities for confirming block trades executed away from the SEF but pursuant to the rules of the SEF, while ensuring that confirmation for all SEF-executed trades takes place in as prompt a manner as possible.

Therefore, the Commission is adopting, as proposed, amendments to the timing standard in § 37.6 to require a SEF to confirm the terms of a swap transaction ''as soon as technologically practicable'' after the execution of the swap transaction on the SEF.

3. Proposed Amendment to § 37.6(b)—Conflicting Terms

a. Proposed Regulations

The Commission proposed to amend § 37.6(b) to make clear that the terms of a swap confirmation issued by a SEF shall legally supersede *any conflicting terms of* a previous agreement (*emphasis added*).[61]

b. Public Comments

Commenters generally supported amending § 37.6(b) to make clear that the terms of a swap confirmation issued by a SEF shall legally supersede *any conflicting terms* of a previous agreement (*emphasis added*).[62]

ISDA was ''supportive of the Commission's proposal to make clear that SEF-provided confirmations shall legally supersede any conflicting terms in a previous agreement, rather than the entire agreement.'' [63] ISDA stated that it believes that ''[s]uch an approach strikes the right balance between ensuring that the terms agreed to on the SEF are enforceable, while at the same time, also acknowledging the various documentation and agreements that underlie swap agreements.'' [64]

WMBAA stated that it ''supports the amendment to regulation 37.6(b) to clarify that the SEF-provided confirmation shall legally supersede any conflicting terms in a previous agreement. This clarification appears essential in maintaining certainty in swap transactions, reducing legal uncertainties, and streamlining the confirmation process.'' [65]

While BSEF stated that it believes that ''[t]he proposed amendment to 37.6(b) is sufficiently clear that the terms of a swap confirmation issued by a SEF shall legally supersede any conflicting terms of a previous agreement,'' BSEF stated that ''the Commission should also clarify that the rules of the SEF shall also legally supersede, with respect to the transaction, any conflicting terms of a previous agreement, whether or not specifically addressed in the confirmation.'' [66]

Specifically, BSEF stated that ''to the extent there is anything in the rules of the SEF that conflicts with the terms of any previous agreement, the SEF rulebook would govern the transaction and supersede the previous agreement.'' [67] BSEF stated that it believes that such an approach ''provides additional clarity that both the rules of the SEF and the specific terms stated in the swap confirmation issued by a SEF govern the terms of the trade and supersede any conflicting terms of a previous agreement.'' [68]

Finally, in response to Question 9 in the Proposal,[69] BSEF stated its belief

[54] WMBAA at 2.

[55] ISDA at 2.

[56] BSEF at 1.

[57] The Commission notes that in the context of real-time public reporting, it has defined ''as soon as technologically practicable'' to mean as soon as possible, taking into consideration the prevalence, implementation, and use of technology by *comparable market participants* (*emphasis added*). 17 CFR 43.2. The meaning of this term, in amended § 37.6(b), would be consistent with this definition, except applying to *comparable SEFs.* For example, for purposes of taking into consideration the prevalence, implementation and use of technology by comparable SEFs, the Commission would expect that fully electronic SEFs would be comparable to one another, while SEFs that utilize more manual processes, such as voice processes, would be comparable to each other.

[58] For example, § 23.501(a)(1) and (2) require that an SD or MSP issue a confirmation or acknowledgement for a swap transaction (as applicable) to its counterparty ''as soon as technologically practicable. . . .'' *See* 17 CFR 23.501(a)(1)–(2). Further, the Commission notes that the amended standard is consistent with the SEC's standard for SB SEFs in SB SEF Rule 812. *See* SEC SB SEF Final Rules at 87294.

[59] ISDA at 2.

[60] *See supra* note 57.

[61] While this amendment will apply with respect to both cleared and uncleared swap transactions executed on or pursuant to the rules of the SEF, the Commission notes that swap trading relationship documentation is not required for swaps cleared by a derivatives clearing organization. *See* 17 CFR 23.504(a)(1).

[62] BSEF at 1–2, Cboe SEF at 1, ISDA at 2, WMBAA at 2.

[63] ISDA at 2.

[64] *Id.*

[65] WMBAA at 2.

[66] BSEF at 2. BSEF's comment was specifically in response to Question 8 of the Proposal which asked, ''(1) Does the proposed amendment provide sufficient legal certainty with respect to any contradictory terms that may be contained within previous agreements that are incorporated into an uncleared swap confirmation by reference?''

[67] *Id.*

[68] *Id.*

[69] Question 9 of the Proposal asked whether, ''[f]or uncleared swaps, to avoid any conflict

''that the Commission should require that a SEF's confirmation specifically state that the terms of the confirmation legally supersede any conflicting terms in underlying previously negotiated agreements that have been incorporated by reference.'' [70] BSEF pointed out that a condition of relying on the no-action position in NAL No. 17–17 is that a SEF must have rules that require its confirmations to state that, in the event of any inconsistency between a SEF confirmation and the underlying previously-negotiated freestanding agreements, the terms of the SEF confirmation legally supersede any contradictory terms.[71] BSEFs stated that the Commission should require the specified statement in the SEF's confirmation.[72]

c. Commission Determination

The Commission is adopting, as proposed, amendments to § 37.6(b), making it clear that the terms of a swap confirmation issued by a SEF shall legally supersede *any conflicting terms of* a previous agreement (*emphasis added*).

Under the rules adopted in this final rulemaking, SEFs will be able to incorporate underlying, previously negotiated agreements by reference into confirmations for uncleared swap transactions. This amendment will help ensure legal certainty with respect to the terms of such transactions, and will also clarify the continuing applicability of those terms in the underlying agreements that do not conflict with the confirmation and that may, for example, govern the counterparties' non-SEF transactions.[73] Taking into account comments received on the Proposal, the Commission agrees with ISDA that this approach strikes the right balance between ensuring that the terms agreed to on the SEF are enforceable, while at the same time, acknowledging the various documentation and agreements that underlie swap transactions.[74]

As a condition of relying on the no-action position in NAL No. 17–17, SEFs must have rules which require its confirmations to state that, in the event of any inconsistency between a SEF confirmation and the underlying previously negotiated freestanding agreements, the terms of the SEF confirmation legally supersede any contradictory terms.[75] The amendment to § 37.6(b) reflects the substance of this condition, providing the benefit of continuing to allow SEFs that relied on NAL No. 17–17 to maintain market practices previously established under the no-action position in complying with amended § 37.6(b).[76] To this end, BSEF recommended that the Commission codify the condition of NAL No. 17–17.[77] The Commission notes that SEFs have reasonable discretion, subject to their obligations under the Act and Commission regulations, to establish rules and procedures for their markets. The Commission believes, and BSEF concedes, that the amendment to § 37.6(b) makes clear that in the event of any inconsistency between a SEF confirmation and underlying previously negotiated agreements, the terms of the SEF confirmation legally supersede any contradictory terms. Accordingly, the Commission does not believe that it needs to require the SEF's confirmation to state as such; however, the Commission believes that there is nothing that would preclude a SEF from having rules or procedures that include such a statement in the confirmations it issues.

The Commission acknowledges BSEF's comment recommending that the Commission also clarify that, to the extent that rules of the SEF conflict with the terms of a previous agreement, the rules of the SEF would govern the swap transaction and supersede the terms of the previous agreement.[78] This comment addresses matters that were not addressed in the Proposal. Therefore, the Commission declines to address BSEF's comment in the context of this rulemaking at this time.

For the reasons stated above, the Commission is adopting, as proposed, amendments to § 37.6(b), making it clear that the terms of a swap confirmation issued by a SEF shall legally supersede *any conflicting terms of* a previous agreement (*emphasis added*).

4. Clarification of § 37.6(b)

a. Proposed Regulations

Section 37.6(b) provides that a SEF shall provide each counterparty to a transaction that is entered into on or pursuant to the rules of the SEF with a written record of all of the terms of the transaction.

The Commission proposed a non-substantive amendment to § 37.6(b) to change the phrase ''entered into'' to ''executed'' in order to provide greater consistency within § 37.6(b). Existing § 37.6(b) uses ''entered into'' and ''executed'' interchangeably.

b. Public Comments

The Commission received no comments regarding the proposed non-substantive amendment to § 37.6(b) to change the phrase ''entered into'' to ''executed''.

c. Commission Determination

The Commission received no comments regarding the proposed non-substantive amendment to change the phrase ''entered into'' to ''executed,'' and is adopting this amendment to § 37.6(b) as proposed. This non-substantive amendment will, in conjunction with the non-substantive amendment to § 37.6(a) discussed below, ensure consistent use of ''executed'' throughout § 37.6.

5. Clarification of § 37.6(a)

a. Proposed Regulations

Section 37.6(a) is intended to provide market participants with legal certainty with respect to swap transactions on a SEF and generally clarifies that a swap transaction entered into on or pursuant to the rules of the SEF cannot be void, voidable, subject to rescission, otherwise invalidated, or rendered unenforceable due to a violation by the SEF of section 5h of the Act or part 37 of the Commission's regulations or any proceeding that alters or supplements a rule, term or condition that governs such swap or swap transaction.[79]

The Commission proposed a non-substantive amendment to § 37.6(a) to change the phrase ''entered into'' to ''executed'' in order to provide greater consistency within § 37.6. Currently § 37.6 uses ''entered into'' and ''executed'' interchangeably.

b. Public Comments

The Commission received no comments regarding the proposed non-

between the terms of the swap and the SEF's confirmation, . . . the Commission [should] require that the SEF's confirmation specifically state that the terms of the confirmation legally supersede any conflicting terms in underlying previously negotiated agreements that have been incorporated by reference''.

[70] BSEF at 2.

[71] *Id.*

[72] *Id.*

[73] In the SEF Core Principles Final Rule, the Commission noted that the counterparties to the uncleared swap transaction would need to ensure that nothing in the confirmation terms contradicted the standardized terms intended to be incorporated from the underlying agreement. SEF Core Principles Final Rule at 33491, n.195.

[74] ISDA at 2.

[75] *See* NAL No. 17–17 at 4. Further, as a condition of relying on NAL No. 17–17 the SEF must also have a rule that requires the SEF's confirmations to state ''that in the event of any inconsistency between a SEF confirmation and the underlying previously-negotiated freestanding agreements, the terms of the SEF confirmation legally supersede any contradictory terms''.

[76] As noted above, upon the effective date of the rules contained herein, NAL No. 17–17 will expire per its terms. *See supra* note 15.

[77] BSEF at 2.

[78] *Id.*

[79] 17 CFR 37.6(a).

substantive amendment to § 37.6(a) to change the phrase ''entered into'' to ''executed''.

c. Commission Determination

The Commission received no comments regarding the proposed non-substantive amendment to change the phrase ''entered into'' to ''executed,'' and is adopting this amendment to § 37.6(a) as proposed. This non-substantive amendment will, in conjunction with the proposed non-substantive amendment to § 37.6(b) discussed above, ensure consistent use of ''executed'' throughout § 37.6.

B. Amendments to § 23.501(a)(4)(i)

a. Proposed Regulations

The Commission proposed two amendments to § 23.501(a)(4)(i) to conform to the proposed amendments to § 37.6(b). Section 23.501(a)(4)(i) provides that a swap transaction executed on a SEF or DCM will be deemed to satisfy the swap confirmation requirements set forth for SDs and MSPs in § 23.501(a), provided that the rules of the SEF or DCM establish that confirmation of all terms of the transaction shall take place at the same time as execution. The Commission proposed to clarify that the safe harbor for SDs and MSPs in § 23.501(a)(4)(i) also applies to swap transactions executed ''pursuant to the rules'' of a SEF or DCM, *i.e.,* block trades executed away from the SEF's or DCM's trading system or platform, but pursuant to the SEF's or DCM's rules. This clarification is consistent with the definition of ''block trade'' under § 43.2.[80] To further conform to the proposed amendments to § 37.6(b), the Commission also proposed to amend § 23.501(a)(4)(i) to require confirmation of all terms of a swap transaction as soon as technologically practicable following execution.[81]

b. Public Comments

The Commission received no comments regarding the two proposed amendments to § 23.501(a)(4)(i).

c. Commission Determination

The Commission received no comments regarding the two proposed amendments to § 23.501(a)(4)(i) to conform to § 37.6(b). Therefore, the Commission is adopting these amendments to § 23.501(a)(4)(i) as proposed.

III. Effective Date

The Commission proposed as an effective date, for the rule amendments in the Proposal, the date that is 30 days after publication of final regulations in the **Federal Register**. The Commission received no comments regarding the proposed effective date. Therefore, the Commission is adopting an effective date for these rule amendments that is 30 days after publication of final regulations in the **Federal Register**. The Commission believes that such an effective date will allow SEFs and market participants sufficient time to adapt to the amended confirmation rules in an efficient and orderly manner.[82]

IV. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) requires Federal agencies to consider whether the regulations they promulgate will have a significant economic impact on a substantial number of small entities and, if so, to provide a regulatory flexibility analysis with respect to such impact.[83] The regulations finalized herein will affect SEFs and their market participants. The Commission has previously established certain definitions of ''small entities'' to be used by the Commission in evaluating the impact of its regulations on small entities in accordance with the RFA.[84] The Commission previously concluded that SEFs are not small entities for the purpose of the RFA.[85] The Commission has also previously stated its belief in the context of relevant rulemakings that SEFs' market participants, which are all required to be eligible contract participants (ECPs) [86] as defined in section 1a(18) of the CEA,[87] are not small entities for purposes of the RFA.[88] Therefore, the Chairman, on behalf of the Commission, hereby certifies, pursuant to 5 U.S.C. 605(b), that these final regulations will not have a significant economic impact on a substantial number of small entities.

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.* (PRA), imposes certain requirements on Federal agencies (including the Commission) in connection with conducting or sponsoring any ''collection of information,'' [89] as defined by the PRA. Under the PRA, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number from the Office of Management and Budget (OMB). The PRA is intended, in part, to minimize the paperwork burden created for individuals, businesses, and other persons as a result of the collection of information by federal agencies, and to ensure the greatest possible benefit and utility of information created, collected, maintained, used, shared, and disseminated by or for the federal government. The PRA applies to all information, ''regardless of form or format,'' whenever the government is ''obtaining, causing to be obtained, [or] soliciting'' information, and includes required ''disclosure to third parties or the public, of facts or opinions,'' when the information collection calls for ''answers to identical questions posed to, or identical reporting or recordkeeping requirements imposed on, ten or more persons.'' [90]

This final rulemaking affects regulations that contain collections of information for which the Commission has previously received control numbers from OMB. The titles for these collections of information are ''Swap Documentation, OMB control number 3038–0088'' and ''Core Principles and Other Requirements for Swap Execution Facilities, OMB control number 3038–0074.'' This final rulemaking will modify the information collection requirements associated with OMB control number 3038–0074, as discussed below. The Commission therefore is submitting this final rulemaking to OMB for its review in accordance with the

[80] § 43.2 defines a block trade as the following: Block trade means a publicly reportable swap transaction that: (1) Involves a swap that is listed on a swap execution facility or designated contract market; (2) Is executed on a swap execution facility's trading system or platform that is not an order book as defined in § 37.3(a)(3) of this chapter, or occurs away from the swap execution facility's or designated contract market's trading system or platform and is executed pursuant to the swap execution facility's or designated contract market's rules and procedures; (3) Has a notional or principal amount at or above the appropriate minimum block size applicable to such swap; and (4) Is reported subject to the rules and procedures of the swap execution facility or designated contract market and the rules described in this part, including the appropriate time delay requirements set forth in § 43.5. 17 CFR 43.2.

[81] The Commission notes that while DCMs may provide confirmations for swap block trades executed away from but pursuant to the rules of the DCM, DCMs do not have a regulatory obligation analogous to the current regulatory obligation under § 37.6(b) for SEFs to provide confirmations.

[82] As noted above, upon the effective date of the rules contained herein, NAL No. 17–17 will expire per its terms. *See supra* note 15.

PRA.[91] The Commission did not receive any comments regarding the PRA burden analysis contained in the Proposal.

1. OMB Collection 3038–0088—Swap Documentation

The Commission is adopting two amendments to § 23.501(a)(4)(i) to conform to § 37.6(b), as amended. Section 23.501(a)(4)(i) provides that a swap transaction executed on a SEF or DCM will be deemed to satisfy the swap confirmation requirements set forth for SDs and MSPs in § 23.501(a), provided that the rules of the SEF or DCM establish that confirmation of all terms of the transaction shall take place at the same time as execution. The Commission is amending § 23.501(a)(4)(i) to clarify that the safe harbor for SDs and MSPs in that provision also applies to swap transactions executed ''pursuant to the rules'' of a SEF or DCM, *i.e.,* block trades executed away from the SEF's or DCM's trading system or platform, but pursuant to the SEF's or DCM's rules. The Commission also is amending § 23.501(a)(4)(i) to conform to the amendments to § 37.6(b), which will require confirmation of all terms of a swap transaction as soon as technologically practicable following execution.

As explained in the Proposal, the Commission does not believe that these amendments will substantively or materially modify any existing information collection burdens. Accordingly, the Commission is retaining its existing estimates for the burden associated with the information collections under OMB Collection 3038–0088.[92]

2. OMB Collection 3038–0074—Core Principles and Other Requirements for Swap Execution Facilities

Under existing § 37.6(b), a SEF is required to provide each counterparty to a swap transaction, whether cleared or uncleared, that is entered into on or pursuant to the rules of the SEF, with a written confirmation that contains all of the terms of the transaction. With respect to an uncleared swap transaction, a SEF may comply with the requirement to include in the confirmation all of the terms of the transaction, by incorporating by reference relevant terms set forth in underlying, previously negotiated agreements between the counterparties, as long as the SEF has obtained these agreements prior to execution of the transaction.[93]

This final rulemaking adds new § 37.6(b)(1), which will permit SEFs to incorporate by reference in a confirmation relevant terms set forth in underlying, previously negotiated agreements without being required to obtain these agreements.

The Commission believes that the final rulemaking will reduce administrative burdens for SEFs, who will not be required to request, accept, and maintain a library of every relevant previously negotiated agreement between counterparties.

As a result, the Commission believes that the final rulemaking will reduce a SEF's annual recurring information collection burden for uncleared swap transactions. In the Proposal, the Commission estimated that § 37.6(b)(1) would reduce annual recurring information collection burdens by one-third from 563 hours per SEF to 375 hours per SEF.[94] The Commission received no comments related to the PRA analysis or this determination.

The aggregate annual estimates for the reporting burden associated with § 37.6(b), as amended, is as follows:

Estimated number of respondents: 21.

Estimated average burden hours per respondent: 375 hours.

Estimated total annual burden on Respondents: 7,875 hours.

Frequency of collection: On occasion.

There are no capital costs or operating and maintenance costs associated with this collection.

C. Cost-Benefit Considerations

1. Background

Section 15(a) of the CEA [95] requires the Commission to ''consider the costs and benefits'' of its actions before promulgating a regulation under the CEA or issuing certain orders. CEA section 15(a) further specifies that the costs and benefits shall be evaluated in light of five broad areas of market and public concern: (1) protection of market participants and the public; (2) efficiency, competitiveness, and financial integrity of futures markets; (3) price discovery; (4) sound risk management practices; and (5) other public interest considerations. The Commission considers the costs and benefits resulting from its discretionary determinations with respect to the CEA section 15(a) factors.

The Commission is amending certain rules in parts 23 and 37 of its regulations relating to the confirmation by CFTC-regulated exchanges, in particular SEFs, of the terms of swap transactions.

The baseline against which the Commission considers the costs and benefits of these rule amendments is the statutory and regulatory requirements of the CEA and Commission regulations now in effect, in particular CEA section 5h and certain rules in parts 23 and 37 of the Commission's regulations. The Commission, however, notes that as a practical matter many SEFs and market participants have adopted some current practices based upon a no-action position provided by Commission staff that the rule amendments generally will codify. As such, to the extent that SEFs and market participants have relied on this no-action position, the actual costs and benefits of the rule amendments as realized in the market may not be as significant.

In some instances, it is not reasonably feasible to quantify the costs and benefits to SEFs and certain market participants with respect to certain factors, for example, market integrity. Notwithstanding these types of limitations, however, the Commission otherwise identifies and considers the costs and benefits of these rule amendments in qualitative terms. The Commission did not receive any comments from commenters which quantified or attempted to quantify the costs and benefits of the Proposal.

In the following consideration of costs and benefits, the Commission first identifies and discusses the benefits and costs attributable to the rule amendments. The Commission, where applicable, then considers the costs and benefits of the rule amendments in light of the five public interest considerations set out in section 15(a) of the CEA.

The Commission notes that this consideration of costs and benefits is based on its understanding that the swaps market functions internationally with: (1) transactions that involve U.S. entities occurring across different international jurisdictions; (2) some entities organized outside of the United States that are registered with the Commission; and (3) some entities that

[91] *See* 44 U.S.C. 3507(d) and 5 CFR 1320.11.

[92] For the previously approved estimates, *see* ICR Reference No: 202204–3038–005, *available at https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202210-3038-007.*

[93] SEF Core Principles Final Rule at 33491, n.195.

[94] The Commission previously estimated that the information collections related to § 37.6 would take SEFs approximately 1.5 hours per SEF participant and that on average, a SEF has about 375 participants. For purposes of estimating the number of burden hours that the final regulations would eliminate, however, the Commission is revising its previous estimate and will assume the relevant process would take SEFs approximately 1.0 hours per SEF participant. Accordingly, 375 participants × 1.0 hour per participant = 375 estimated burden hours. For information about the Commission's previous estimate, *see* ICR Reference No. 202104–3038–001, *available at https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202104-3038-001.*

[95] 7 U.S.C. 19(a).

typically operate both within and outside the United States and that follow substantially similar business practices wherever located. Where the Commission does not specifically refer to matters of location, the discussion of costs and benefits below refers to the effects of the rule amendments on all relevant swaps activity, whether based on its actual occurrence in the United States or on its connection with activities in, or effect on, U.S. commerce.[96]

2. Amendments to § 37.6(b)

a. Benefits

Under existing § 37.6(b), a SEF is required to provide each counterparty to a swap transaction that is entered into on or pursuant to the rules of the SEF, with a written confirmation at the time of execution that contains all of the terms of the transaction. SEFs may satisfy the requirements under existing § 37.6(b) for uncleared swap transaction confirmations by incorporating by reference, in the confirmation, relevant terms set forth in underlying, previously negotiated agreements between the counterparties, as long as such agreements have been submitted to the SEF prior to execution.

Absent adoption of new § 37.6(b)(1), which will allow SEFs to incorporate relevant terms set forth in such underlying agreements without being required to obtain the agreements, SEFs would need to comply with the existing requirements under § 37.6(b) for uncleared swap confirmations, notwithstanding the significant burdens of doing so. The Commission understands that the financial, administrative, and logistical burdens to collect and maintain bilateral transaction agreements from individual counterparties would be high. SEFs have stated that they are unable to develop a cost-effective method to request, accept and maintain a library of every relevant previous agreement between counterparties.[97] SEFs have also noted that the potential number of previous agreements is considerable, given that SEF counterparties often enter into agreements with many other parties and may have multiple agreements for different asset classes.[98]

The Commission believes that the addition of § 37.6(b)(1) should benefit both SEFs and market participants by decreasing the financial, administrative, and logistical burdens to execute an uncleared swap on a SEF. Not only would a SEF not be required to expend time and resources to gather and maintain all of the underlying relationship documentation between all possible counterparties on the SEF, but market participants would also not be required to expend time and resources in gathering and submitting this documentation to the SEF, including any amendments or updates to that documentation.

The Commission notes that these benefits are currently available to SEFs and market participants through the existing no-action position provided by Commission staff in NAL No. 17–17. As such, to the extent that SEFs, and by extension market participants, have relied on the existing no-action position to avoid the above-described financial, operational and logistical burdens, they have been availing themselves of the benefits of these reduced burdens.

The Commission also recognizes that many SEFs have already expended resources to implement technological and operational changes needed to avail themselves of the no-action position under NAL No. 17–17. These rule amendments would preclude the need to expend additional resources to negate those changes.

Further, the rule amendments do not change the existing requirement for a SEF to issue a confirmation of all terms of an uncleared swap transaction that is executed on or pursuant to the rules of the SEF. If a SEF was not required to issue a confirmation that includes or incorporates by reference all of the terms of such a transaction, the counterparties to the swap might be subject to other Commission regulations that impose such obligations, and therefore, increased costs. For example, where one of the counterparties to an uncleared swap transaction is an SD or MSP, § 23.501 requires that the SD or MSP issue a confirmation for the transaction as soon as technologically practicable.[99]

SEFs should also benefit from the requirement to confirm transaction terms ''as soon as technologically'' practicable after execution, rather than at the same time as execution. As noted above, the Commission believes that this amendment to the timing standard in § 37.6(b) reflects existing SEF capabilities while continuing to promote the Commission's goals of providing swap counterparties with legal certainty in a prompt manner.

b. Costs

With respect to uncleared swaps, the addition of § 37.6(b)(1) could reduce the financial integrity of transactions on SEFs compared to the current rule. There could be a greater risk of misunderstanding between the counterparties to a swap transaction if SEFs do not provide all the terms of the transaction at the time of execution, instead incorporating certain terms by reference. Even when underlying agreements are incorporated by reference, confusion could arise from issues such as multiple versions of an agreement with the same labeling, or missing sections. However, the Commission does not expect that this risk will materially reduce the integrity of the swaps market. The Commission notes that the relevant underlying agreements usually establish relationship terms between counterparties that govern all trading between them in uncleared swaps, and do not generally concern the terms of specific transactions.

To the extent that SEFs are relying on the existing no-action position provided by Commission staff in NAL No. 17–17, they could continue to implement existing industry practice related to confirmations for uncleared swap transactions which should not impose costs on the SEFs. But to the extent that SEFs need to modify their rules or procedures in light of the rule amendments, such as by removing the SEF rules required as conditions under NAL No. 17–17, they may incur modest costs.

c. Consideration of Alternatives

The relevant no-action position set forth in NAL No. 17–17, upon which the rule amendments are based, is subject to withdrawal by Commission staff. In addressing alternatives to adopting the amendments to § 37.6(b), the Commission considered the costs and benefits associated with enforcing the requirements of existing § 37.6(b). The Commission believes that adopting the amendments to § 37.6(b), and the conforming amendments set forth in these final rules, would help to maintain the benefits previously articulated in the SEF Core Principles Final Rule, but also reduce related costs for SEFs with respect to confirmation requirements.[100]

[96] *See, e.g.,* 7 U.S.C. 2(i).

[97] *See* WMBAA, Request for Extended Relief from Certain Requirements under Parts 37 and 45 Related to Confirmations and Recordkeeping for Swaps Not Required or Intended to be Cleared, at 3 (Mar. 1, 2016).

[98] *Id.*

[99] *See* 17 CFR 23.501(a). As discussed above, subject to specified conditions, § 23.501(a)(4)(i) provides a safe harbor from this requirement when a SEF issues a confirmation for the transaction.

[100] The Commission recognized the important benefits provided by the § 37.6(b) confirmation requirements in the cost-benefit considerations to the SEF Core Principles Final Rule. With respect to those benefits, the Commission stated that the

d. Section 15(a) Factors

(1) Protection of Market Participants and the Public

The rule amendments should continue to promote the legal certainty of swap transactions executed on SEFs. The amendments to § 37.6 for uncleared swaps, and the conforming amendments set forth in these final rules, will clarify compliance requirements, consistent with the position taken by Commission staff in NAL No. 17–17, while helping to maintain the protection of market participants and the public.

(2) Efficiency, Competitiveness, and Financial Integrity of Markets

The amendments to § 37.6 for uncleared swaps, and the conforming amendments set forth in these final rules, will ease compliance for SEFs and market participants on a longer-term basis, *i.e.,* by providing a regulatory solution beyond the corresponding no-action position provided by Commission staff in NAL No. 17–17. This may improve the efficiency of the swap markets with respect to issuing and transmitting swap confirmations to counterparties. In particular, SEFs would attain greater operational efficiency because they would not be required to develop an infrastructure for collecting and maintaining all relevant underlying, previously negotiated agreements between counterparties transacting on the SEF.

As noted above, with respect to uncleared swaps, the addition of § 37.6(b)(1) could reduce the financial integrity of transactions on SEFs compared to the current rule. There could be a greater risk of misunderstanding between the counterparties to a swap transaction if SEFs do not provide all the terms of the transaction at the time of execution, instead incorporating certain terms by reference. Even when underlying agreements are incorporated by reference, confusion could arise from issues such as multiple versions of an agreement with the same labeling, or missing sections. However, the Commission does not expect that this risk will materially reduce the integrity of the swaps market. As noted above, the Commission notes that the relevant underlying agreements usually establish relationship terms between counterparties that govern all trading between them in uncleared swaps, and do not generally concern the terms of specific transactions. Moreover, the rule amendments could encourage financial integrity of the swap markets by, among other things, providing clarity that the terms of an uncleared swap confirmation issued by a SEF supersedes any conflicting terms in underlying agreements between the counterparties.

(3) Price Discovery

The Commission is not aware of significant effects on the price discovery process from the amendments to § 37.6, and the conforming amendments set forth in these final rules, regarding confirmations.

(4) Sound Risk Management Practices

The amendments to the confirmation requirements in § 37.6(b), and the conforming amendments set forth in these final rules, will maintain the promotion of sound risk management practices with respect to the requirement for SEFs to issue transaction confirmations, *i.e.,* by providing market participants with the certainty that transactions executed on or pursuant to the rules of a SEF will be legally enforceable with respect to all counterparties to the transaction.[101]

(5) Other Public Interest Considerations

The Commission is identifying a public interest benefit in codifying the no-action position in NAL No. 17–17, where the efficacy of that position has been demonstrated. In such a situation, the Commission believes it serves the public interest to engage in notice-and-comment rulemaking, where it seeks and considers the views of the public in amending its regulations, rather than leaving SEFs to continue to rely on a staff-provided no-action position that does not bind the Commission, provides less long-term certainty, and offers a more limited opportunity for public input.

D. Antitrust Considerations

Section 15(b) of the CEA requires the Commission to take into consideration the public interest to be protected by the antitrust laws and endeavor to take the least anti-competitive means of achieving the objectives of the CEA, in issuing any order or adopting any Commission rule or regulation.[102] The Commission does not anticipate that the amendments to parts 23 and 37 of its regulations would promote or result in anti-competitive consequences or behavior. The Commission did not receive any comments on any anti-competitive consequences or behavior.

List of Subjects

17 CFR Part 23

Confirmations, Swaps.

17 CFR Part 37

Swaps, Swap confirmations, Uncleared swap confirmations, Swap execution facilities.

For the reasons stated in the preamble, the Commodity Futures Trading Commission amends 17 CFR parts 23 and 37 to read as follows:

PART 23—SWAP DEALERS AND MAJOR SWAP PARTICIPANTS

■ 1. The authority citation for part 23 continues to read as follows:

Authority: 7 U.S.C. 1a, 2, 6, 6a, 6b, 6b–1, 6c, 6p, 6r, 6s, 6t, 9, 9a, 12, 12a, 13b, 13c, 16a, 18, 19, 21. Section 23.160 also issued under 7 U.S.C. 2(i); Sec. 721(b), Pub. L. 111–203, 124 Stat. 1641 (2010).

■ 2. In § 23.501, revise paragraph (a)(4)(i) to read as follows:

§ 23.501 Swap confirmation.

(a) * * *

(4) * * *

(i) Any swap transaction executed on or pursuant to the rules of a swap execution facility or designated contract market shall be deemed to satisfy the requirements of this section, provided that the rules of the swap execution facility or designated contract market establish that confirmation of all terms of the transaction shall take place as soon as technologically practicable after execution.

* * * * *

PART 37—SWAP EXECUTION FACILITIES

■ 3. The authority citation for part 37 continues to read as follows:

Authority: 7 U.S.C. 1a, 2, 5, 6, 6c, 7, 7a–2, 7b–3, and 12a, as amended by Titles VII and VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Pub. L. 111–203, 124 Stat. 1376.

■ 4. Revise § 37.6 to read as follows:

§ 37.6 Enforceability.

(a) A transaction executed on or pursuant to the rules of a swap execution facility shall not be void, voidable, subject to rescission, otherwise invalidated, or rendered unenforceable as a result of:

(1) A violation by the swap execution facility of the provisions of section 5h of the Act or this part;

requirements would, among other things, (i) provide legal certainty to market participants; (ii) promote accuracy for counterparties regarding exposure levels with other counterparties; and (iii) reduce costs and risks involved with resolving error trade disputes between counterparties. *See* SEF Core Principles Final Rule at 33570.

[101] *See supra* note 100.

[102] 7 U.S.C. 19(b).

(2) Any Commission proceeding to alter or supplement a rule, term, or condition under section 8a(7) of the Act or to declare an emergency under section 8a(9) of the Act; or

(3) Any other proceeding the effect of which is to:

(i) Alter or supplement a specific term or condition or trading rule or procedure; or

(ii) Require a swap execution facility to adopt a specific term or condition, trading rule or procedure, or to take or refrain from taking a specific action.

(b) A swap execution facility shall provide each counterparty to a transaction that is executed on or pursuant to the rules of the swap execution facility with a written record of all of the terms of the transaction which shall legally supersede any conflicting terms of a previous agreement and serve as a confirmation of the transaction. The confirmation of all terms of the transaction shall take place as soon as technologically practicable after execution; provided that specific customer identifiers for accounts included in bunched orders involving swaps need not be included in confirmations provided by a swap execution facility if the applicable requirements of § 1.35(b)(5) of this chapter are met.

(1) For a confirmation of an uncleared swap transaction, the swap execution facility may satisfy the requirements of this paragraph (b) by incorporating by reference terms from underlying, previously negotiated agreements governing such transaction between the counterparties, without obtaining such incorporated agreements except as otherwise necessary to fully perform its operational, risk management, governance, or regulatory functions, or any requirements under this part.

(2) [Reserved]

Issued in Washington, DC, on April 25, 2024, by the Commission.

Robert Sidman,

Deputy Secretary of the Commission.

Note: The following appendices will not appear in the Code of Federal Regulations.

Appendices to Swap Confirmation Requirements for Swap Execution Facilities—Voting Summary and Chairman's and Commissioners' Statements

Appendix 1—Voting Summary

On this matter, Chairman Behnam and Commissioners Johnson, Goldsmith Romero, Mersinger, and Pham voted in the affirmative. No Commissioner voted in the negative.

Appendix 2—Statement of Chairman Rostin Behnam

I am very pleased that the Commission voted to finalize necessary amendments to the Commission's regulations addressing longstanding issues with the uncleared swap confirmation requirements under Rule 37.6(b). During the initial implementation of part 37, SEFs informed the CFTC that the confirmation requirement for uncleared swaps was operationally and technologically difficult and impractical to implement. In light of these challenges, the Division of Market Oversight provided targeted no-action positions for SEFs with respect to certain provisions of Commission regulations throughout the last decade.[1]

As there was no workable solution that could effectuate the original language of the relevant rule, the Commission is has voted to amend Rule 37.6(b) to codify the longstanding staff no-action position. The amendment enables SEFs to incorporate terms by reference in an uncleared swap confirmation without being required to obtain the underlying, previously negotiated agreements between the counterparties. An amendment to Rule 23.501 will clarify the consistent treatment of trades executed away from a SEF or designated contract market (DCM) and permit confirmation of all terms of a swap transaction as soon as technologically practicable following execution, as opposed to requiring confirmation ''at the same time as execution.'' [2]

This final rule is an example of my continuing focus on providing market participants with clarity and certainty by, where possible, codifying existing staff no-action positions.

I would like to thank Roger Smith in our Division of Market Oversight for his work on this important final rule.

[2] Commission Rule 23.501(a)(4)(i), 17 CFR 23.501(a)(4)(i).

Appendix 3—Statement of Commissioner Kristin N. Johnson

An essential component of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) is its framework for the regulation of swaps, including central clearing and trade execution requirements, registration and comprehensive regulation of swap dealers, and recordkeeping and reporting requirements.

I vote to approve today's final rule on Swap Confirmation Requirements for Swap Execution Facilities (Final Rule), which facilitates predictability and consistency in swaps markets by codifying long-standing no-action relief into regulation, while maintaining a robust regulatory regime for swaps and swap execution facilities (SEFs).

The Dodd-Frank Act amended the Commodity Exchange Act (CEA) by adding Section 5h, which provides that a person may not operate ''a facility for the trading or processing of swaps unless the facility is registered as a [SEF] or as a designated contract market.'' [1] A SEF allows multiple participants to execute or trade swaps. As such, SEFs facilitate swap transactions in our markets by facilitating the execution of swaps between market participants. Additionally, SEFs play a critical role in price discovery and transparency and policing and reporting swap transactions in an effort to monitor systemic risk.

In 2013, the Commission adopted new rules and principles for SEFs. Under CFTC Regulation 37.6(b), a SEF must provide each counterparty to cleared and uncleared swaps with ''a written record of all of the terms of the transaction which shall legally supersede any previous agreement and serve as a confirmation of the transaction.'' [2] This confirmation is required to ''take place at the same time as execution,'' subject to certain exceptions related to bunched orders involving swaps.[3]

In the adopting release, the Commission noted that a SEF may comply with the swap confirmation requirement for uncleared swaps by incorporating terms set forth in master agreements previously negotiated by counterparties, if such agreements had been submitted to the SEF prior to execution and the counterparties ensure that nothing in the confirmation terms contradict the terms incorporated from the master agreement.[4] SEFs and market participants voiced concerns that it was operationally and technologically difficult and impracticable to obtain and store the underlying, bespoke, highly-negotiated swap agreements of SEF members for purposes of satisfying the swap confirmation requirement.

Pursuant to a no-action letter issued in March 2017, which was the last extension of a no-action letter originally issued in August 2014,[5] SEFs were permitted to incorporate by

[1] 7 U.S.C. 7b–3(a).

[4] *See* Core Principles and Other Requirements for Swap Execution Facilities, 78 FR 33,476, 33,491 n.195 (June 4, 2013).

[5] CFTC No-Action Letter 17–17 (Extension of No-Action Relief for Swap Execution Facility Confirmation and Recordkeeping Requirements

reference the terms of previously-negotiated agreements and were relieved of the obligation to: (1) obtain documents incorporated by reference in a swap confirmation and (2) report confirmation data contained in such agreements. SEFs were required to comply with certain additional conditions, including that their rulebooks require participants to provide copies of the underlying agreements to the SEF upon request.

On August 25, 2023, the Commission released a Notice of Proposed Rulemaking to codify this no-action relief (Proposed Rule) for uncleared swaps. The Commission did not incorporate the conditions in No-Action Letter 17–17 into new CFTC Regulation 37.6(b)(1). The Commission takes the view that, as noted below, the existing requirements for SEFs under the CEA, particularly Core Principle 5, and the Commission's Part 37 regulations sufficiently account for and obviate the need for these conditions.[6]

As I noted at that time, the Commission ''issued guidance and exemptive relief based on concerns that SEFs had been unable to develop a practicable and cost-effective method to request, accept, and maintain a library of the underlying previously-negotiated freestanding agreements between counterparties.'' [7]

The Final Rule approved today fully adopts the Proposed Rule. In addition to permitting SEFs to incorporate by reference terms of previously negotiated agreements between counterparties, without having to obtain a copy of such agreements, the Final Rule will amend CFTC Regulation 37.6(b) to permit confirmation of all terms of a swap transaction to take place ''as soon as technologically practicable'' after the execution of the swap transaction. Additionally, the Final Rule amends CFTC Regulation 37.6(b) to make clear that the confirmation a SEF provides under CFTC Regulation 37.6(b) legally supersedes *only conflicting terms* in a previous agreement.

Importantly, as noted above, both SEFs and the Commission will retain the ability to obtain essential information, including copies of the underlying agreements for uncleared swaps. Under SEF Core Principle 5, a SEF must ''[e]stablish and enforce rules that will allow the facility to obtain any necessary information to perform any of the functions described in section 5h of the [CEA].'' [8] The SEF must also ''[p]rovide [this] information to the Commission on request.'' [9] A SEF must also have ''the authority to examine books and records kept by [its] members and by persons under investigation.'' [10] As the Final Rule notes, given these requirements, a SEF should have ''the ability and authority to request copies of the underlying agreements that are incorporated by reference into a confirmation for an uncleared swap transaction and to provide such agreements to the Commission upon request.'' [11]

I support this Final Rule, which provides a practical approach to implementing our regulatory requirements, while maintaining robust oversight of SEFs and our markets.

Thank you to the staff of the Division of Market Oversight and Roger Smith as well as the Office of the General Counsel, the Market Participants Division, and the Office of the Chief Economist, for their hard work on this Final Rule.

Appendix 4—Statement of Commissioner Summer K. Mersinger

Workable rules are essential to maintain the confidence of the American public in the integrity of our derivatives markets. So, when we become aware that our rules are not as workable as we thought, or impose substantial operational burdens with little corresponding regulatory benefit, we should address these shortcomings promptly. Unfortunately, though, the Commission sometimes chooses to ''kick the can down the road'' by relying on staff no-action letters instead—often for many years—without tackling the root cause of the problem in the rule itself.

I have not been shy about expressing my feelings related to no-action letters during my tenure as a Commissioner. Yes, there are appropriate reasons for staff to issue no-action letters, and I do see their utility in providing flexibility when needed. However, I believe there has at times been an over-reliance on this practice at the agency, and we must move forward in a manner that respects the role of the Commissioners in agency policy-making.

My point is perfectly illustrated by Commission Rule 37.6(b) regarding confirmations for swaps executed on or pursuant to the rules of a swap execution facility (''SEF''). The rule requires that a SEF provide each counterparty to a transaction with a written record of all the terms of the transaction.[1] But things get complicated with respect to uncleared swaps, since the terms of such swaps also may include previously-negotiated agreements between the counterparties (such as an ISDA Master Agreement, and related Schedule and Credit Support Annex).

Accordingly, when the Commission adopted Rule 37.6(b) in 2013, it stated that a SEF's written confirmation of an uncleared swap can incorporate the terms of such agreements by reference, but with a catch—namely, that such agreements must be submitted to the SEF prior to execution.[2] This approach imposed on each SEF the virtually impossible (and, frankly, needless) task of building and maintaining a library of every previous bilateral agreement from counterparties to uncleared swap transactions on its platform.

Recognizing the enormous operational problems posed by the Commission's approach to SEF swap confirmations for uncleared swaps, as well as the limited value of that approach, Commission staff issued four successive no-action letters beginning in 2014.[3] Although it has taken a full decade, I am pleased that the Commission is finally adopting a permanent and practicable SEF confirmation solution. These rule amendments, among other things, will codify the existing staff no-action position that permits SEFs, in an uncleared swap confirmation, to incorporate by reference the terms of previously-negotiated counterparty agreements without obtaining the underlying agreements themselves.

But there remains more work to be done in this regard. I will continue to push the agency to act through notice-and-comment rulemaking, rather than relying on perpetual staff no-action relief, with respect to other rules that are not workable for those who must comply with them—especially where, as here, their asserted benefits are largely illusory.

Appendix 5—Statement of Commissioner Caroline D. Pham

I support the Final Rule on Swap Confirmation Requirements for Swap Execution Facilities (SEF Confirmation Final Rule) because it resolves the temporal impossibility of requiring SEF confirmations at the time of execution for block trades, which are in fact executed away from the SEF and then submitted to the SEF afterwards. I would like to thank Roger Smith, Nora Flood, and Vince McGonagle in the Division of Market Oversight for their work on the SEF Confirmation Final Rule.

Conflicting or impossible regulatory requirements can make compliance with our rules nonsensical.[1] That is clear from the years of CFTC staff no-action relief that led to the rule amendments codified today in the SEF Confirmation Final Rule.[2] I am pleased

BILLING CODE 6351–01–P

SELECTIVE SERVICE SYSTEM

32 CFR Part 1665

RIN 3240–AA05

Privacy Act Procedures

AGENCY: United States Selective Service System.

ACTION: Final rule.

SUMMARY: The Selective Service System (SSS) is finalizing revisions to its Privacy Act regulations to ensure processes and procedures for requesting access and amendments to records by electronic means and appeals from denials of request for access to or amendments of records is clearly spelled out within the SSS regulations.

DATES: This rule is effective May 31, 2024.

FOR FURTHER INFORMATION CONTACT: Daniel A. Lauretano, Sr., General Counsel, 703–605–4012, *dlauretano@sss.gov.*

SUPPLEMENTARY INFORMATION: SSS published a proposed rule on February 5, 2024 (89 FR 7655). No public comments were received and SSS is finalizing this rule without change.

A. Summary of New Regulatory Provisions and Their Impact

The revision to 32 CFR part 1665 adds clarity for how to make online inquiries, and how inquiries will be processed, allows for electronic requests, and makes several stylistic and grammatical changes.

B. Background and Legal Basis for This Rule

The Housekeeping Statute, 5 U.S.C. 301, authorizes agency heads to promulgate regulations governing ''the custody, use, and preservation of its records, papers, and property.'' The Privacy Act is a Federal statute that establishes a Code of Fair Information Practice that governs the collection, maintenance, use, and dissemination of personally identifiable information about individuals that is maintained in systems of records by Federal agencies. A system of records is a group of records under the control of an agency from which information is retrieved by the name of the individual or by some identifier assigned to the individual. The Privacy Act requires that agencies give the public notice of their systems of records by publication in the **Federal Register**. The Privacy Act prohibits the disclosure of information from a system of records absent the written consent of the subject individual unless the disclosure is pursuant to one of 12 statutory exceptions. The Act also provides individuals with a means by which to seek access to and amendment of their records and sets forth various agency record-keeping requirements. Additionally, with people granted the right to review what was documented with their name, they are also able to find out if the ''records have been disclosed'' and are also given the right to make corrections. The Privacy Act also provides an avenue for appeal from denials of request for access to or amendment of records. This final rule amends part 1665 to ensure processes and procedures for appeals from denials of request for access to or amendments of records is clearly spelled out within the SSS regulations.

C. Expected Impact of the Final Rule

This final rule will not impose any new costs. These regulations will clarify and streamline appeals from denials of request for access to or amendment of records. This revision will produce efficiency and uniformity to the public's benefit.

D. Executive Order (E.O.) 12866, ''Regulatory Planning and Review,'' E.O. 13563, ''Improving Regulation and Regulatory Review,'' and Congressional Review Act (5 U.S.C. 801–08)

E.O.s 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distribute impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Following the requirements of these E.O.s, the Office of Management and Budget (OMB) has determined that this final rule is not a significant regulatory action under section 3(f) of E.O. 12866.

E. Public Law 96–354, ''Regulatory Flexibility Act'' (5 U.S.C. 601)

SSS certifies that this final rule is not subject to the Regulatory Flexibility Act, 5 U.S.C. 601, because it would not have a significant economic impact on a substantial number of small entities. Therefore, the Regulatory Flexibility Act, as amended, does not require SSS to prepare a regulatory flexibility analysis.

F. Section 202 of Public Law 104–4, ''Unfunded Mandates Reform Act'' (2 U.S.C. 1532)

Section 202 of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1532, requires agencies to assess anticipated costs and benefits before issuing any rule whose mandates require the expenditure of $100 million or more (in 1995 dollars, adjusted annually for inflation) in any one year. This final rule will not mandate any requirements for State, local, or Tribal governments, nor will it affect private sector costs.

G. Public Law 96–511, ''Paperwork Reduction Act'' (44 U.S.C. Chapter 35)

It has been determined that 32 CFR part 1665 does not impose reporting or recordkeeping requirements under the Paperwork Reduction Act.

H. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as not a ''major rule,'' as defined by 5 U.S.C. 804(2).

E.O. 13132, ''Federalism''

E.O. 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has federalism implications. This final rule will not have a substantial effect on State and local governments.

J. Compliance With Pay-As-You-Go Act of 2023 (Fiscal Responsibility Act of 2023, Pub. L. 118–5, Div. B, Title III).

In accordance with Compliance with Pay-As-You-Go Act of 2023 (Fiscal Responsibility Act of 2023, Pub. L. 118–5, div. B, title III) and OMB Memorandum (M–23–21) dated September 1, 2023, SSS has determined that this final rule is not subject to the Act because it will not increase direct spending beyond specified thresholds.

Commission Regulations 37.6(b), 37.1000, 37.1001, 45.2, and 45.3(a) (Mar. 24, 2017).

K. E.O. 11623, Delegation of Authority & Coordination Requirements

In E.O. 11623, the President delegated to the Director of Selective Service the authority to prescribe the necessary rules and regulations to carry out the provisions of the Military Selective Service Act. In carrying out the provisions of E.O. 11623, as amended by E.O. 13286, the Director shall request the views of the Secretary of Defense, the Attorney General, the Secretary of Labor, the Secretary of Health, Education, and Welfare, the Secretary of Homeland Security (when the Coast Guard is serving under the Department of Homeland Security), the Director of the Office of Emergency Preparedness, and the Chairman of the National Selective Service Appeal Board with regard to such proposed rule or regulation, and shall allow not less than 10 days for the submission of such views before publication of the proposed rule or regulation. On January 24, 2024, the SSS completed its coordination requirements, and the Director certifies that he has requested the views of the officials required to be consulted pursuant to subsection (a) of E.O. 11623, considered those views, and, as appropriate, incorporated those views in these regulations, and that none of them has timely requested that the matter be referred to the President for decision.

List of Subjects in 32 CFR Part 1665

Personally identifiable information, Privacy, Procedural rules.

For the reasons stated in the preamble, SSS amends 32 CFR part 1665 as set forth below:

PART 1665—PRIVACY ACT PROCEDURES

■ 1. The authority citation for part 1665 is revised to read as follows:

Authority: 50 U.S.C. 3801 *et seq.;* and 5 U.S.C. 552a.

■ 2. Amend § 1665.1 by:
■ a. Revising paragraph (a);
■ b. Removing paragraph (b);
■ c. Redesignating paragraphs (c) and (d) as paragraphs (b) and (c), respectively;
■ d. In newly redesignated paragraph (b), revising the first sentence; and
■ e. In newly redesignated paragraph (c), removing the word ''the'' before the words ''10 days'' in the first sentence.

The revisions reads as follows:

§ 1665.11665.1 Rules for determining if an individual is the subject of a record.

(a) Individuals desiring to know if a specific system of records maintained by the Selective Service System (SSS) contains a record pertaining to them should address their inquiries in writing or by electronic means to the Selective Service System, ATTN: Records Manager, Public and Intergovernmental Affairs Directorate, Arlington, VA 22209–2425. Online inquiries in English and Spanish may be made at: Contact Us | Selective Service System: Selective Service System (sss.gov) or by email using *PrivacyAct@sss.gov.* The written or electronic inquiry should contain the following information: name and address of the requester, email address of subject (for electronic requests only), identity of the systems of records, and nature of the request. It should also include identifying information specified in the applicable SSS System of Record Notices to assist in identifying the request, such as location of the record, if known, full name, birth date, time periods in which the records are believed to have been complied, etc. SSS Systems of Record Notices subject to the Privacy Act is in the **Federal Register** and copies of the notices will be available upon request to the records manager. A compilation of such notices will also be made and published by the Office of Federal Register, in accord with 5 U.S.C. 552a(f). Requesters seeking copies of their registration records with the SSS may first seek to obtain their registration number and related information by visiting *https://www.sss.gov/verify/* and making the request. To make this request, the individual must provide their last name, social security number and date of birth when completing the required fields to access their registration information online. For other documentation requests such as for a registration Status of Information Letter (SIL), the individual must make the request electronically or in writing and send via the United States Postal Service (USPS).

(b) For requesters who make a hand-written request for USPS delivery or electronic request for information to SSS, will ordinarily be informed of whether the named system of records contains a record pertaining to the requester within 10 days of receipt of such a request (excluding Saturdays, Sundays, and legal Federal holidays).

* * *

* * * * *

§ 1665.21665.2 [Amended]

■ 3. Amend § 1665.2 by:
■ a. In paragraph (a):
■ i. Adding the words ''or electronic'' after the words ''Requirement for written'' in the paragraph heading; and
■ ii. Adding the words ''or electronically (as specified in § 1665.1(a)) after the words ''request in writing'' in the first sentence.

§ 1665.41665.4 [Amended]

■ 4. Amend § 1665.4 by:
■ a. In paragraph (a):
■ i. Adding the words ''or electronic'' after the words ''Requirement for written'' in the paragraph heading; and
■ ii. Adding the words ''or electronically (as specified in § 1665.1(a))'' after the words ''request in writing'' in the first sentence.

■ 5. Amend § 1665.5 by:
■ a. Revising the section heading;
■ b. Removing the words ''request for review'' and adding in their place the word ''appeal'' wherever it appears;
■ c. Revising paragraphs (a) and (d); and
■ d. Adding paragraphs (e) and (f).

The revisions and additions read as follows:

1665.5 Appeals.

(a) If the requester is dissatisfied with the SSS response, the requester can appeal an adverse determination denying the request to the appellate authority listed in the notification of denial letter. The appeal must be made in writing or electronically (as specified in § 1665.1(a)), and it must be postmarked (or sent by email) within 60 calendar days of the date of the letter denying the initial request for records or amendment of information. The appeal should include a copy of the SSS determination (including the assigned request number, if known). For the quickest possible handling, the appeal whether in writing or by email should specify that it is a ''Privacy Act Appeal.'' If the requester is dissatisfied with the SSS response, the requester can appeal an adverse determination denying an initial request to access or amend a record in accordance with the provisions of §§ 1665.2 and 1665.4. The requester should submit the appeal in writing or electronically (as specified in § 1665.1(a)) and, to the extent possible, include the information specified in paragraph (b) of this section. Individuals desiring assistance in the preparation of their appeal should contact the records manager at the address provided herein.

* * * * *

(d) The appellant will be notified of the decision on his or her appeal in writing or by email within 20 days (excluding Saturdays, Sundays, and legal Federal holidays) from the date of receipt by SSS of the individual's request for review unless the *appeal authority* extends the 20 days period for good cause. The extension and the reasons therefore will be sent by SSS to the requester within the initial 20-day

period. Such extensions should not be routine and should not normally exceed an additional 30 days. If the decision affirms the adverse determination in whole or in part, the notification will include a brief statement of the reason(s) for the affirmation, including any exemptions applied, and will inform the appellant of the Privacy Act provisions for judicial review of the appellate authority's decision, a description of the steps the individual may take to obtain judicial review of such a decision, a statement that the individual may file a concise statement with SSS setting forth the individual's reasons for his disagreement with the decision, and the procedures for filing such a statement of disagreement. The Director of Selective Service has the authority to determine the *conciseness* of the statement, *considering* the scope of the disagreement and the complexity of the issues. Upon the filing of a proper, concise statement by the individual, any subsequent disclosure of the information in dispute will be clearly noted so that the fact that the record is disputed is apparent, which shall include a copy of the concise statement furnished and a concise statement by SSS setting forth its reasons for not making the requested changes, if SSS chooses to file such a statement. A notation of a dispute is required to be made only if an individual informs SSS of their disagreement with its determination in accordance with paragraphs (a) through (c) of this section. A copy of the individual's statement, and if it chooses, SSS's statement will be sent to any prior transferee of the disputed information who is listed on the accounting required by 5 U.S.C. 552a(c). If the reviewing official determines that the record should be amended in accord with the individual's request, SSS will promptly correct the record, advise the individual, and inform previous recipients if an accounting of the disclosure was made pursuant to 5 U.S.C. 552a(c). The notification of correction pertains to information actually disclosed. If the adverse determination is reversed or modified, in whole or in part, the appellant will be notified in writing of this decision and the request will be reprocessed in accordance with that appeal decision.

(e) In order to seek a judicial review of a denial of a request for access to records, a requester must first file an appeal under this section.

(f) An appeal ordinarily will not be acted on if the request becomes a matter of litigation.

■ 6. Amend § 1665.6 by revising paragraph (c)(3) to read as follows:

§ 1665.6 Schedule of fees.

* * * * *

(c) * * *

(3) Remittance shall be in the form of cash, a personal check or bank draft drawn on a bank in the United States, or postal money order. Remittances shall be made payable to the order of the Selective Service System and mailed or delivered to the records manager, Selective Service System, 1501 Wilson Blvd., Suite 700, Arlington, VA 22209.

* * * * *

■ 7. Amend § 1665.7 by revising the section heading and paragraphs (a) and (b) and removing paragraph (c) to read as follows:

§ 1665.7 Information available to the public or to those seeking confirmation of SSS registration status to convey benefits related to registration.

(a) SSS maintains a record which contains the name, Selective Service number, and registration status of those that have registered with SSS.

(b) Any compensated employee of SSS may disclose to an entity seeking to convey a benefit related to SSS registration status by law whether the individual has or has not registered with SSS.

■ 8. Revise § 1665.8 to read as follows:

§ 1665.8 Systems of records exempted from certain provisions of this act.

The SSS will not provide requesters information exempt from disclosure pursuant to 5 U.S.C. 552a(k), (*e.g.,* the SSS will not reveal to the suspected violator the informant's name or other identifying information relating to the informant).

These final regulations were reviewed and approved by Joel C. Spangenberg, Acting Director of Selective Service.

Daniel A. Lauretano, Sr.,

Selective Service System General Counsel & Federal Register Liaison Officer.

BILLING CODE 8015–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2024–0354]

Special Local Regulations; Marine Events Within the Captain of the Port Charleston

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce special local regulations for the Low Country Splash event on May 18, 2024, to provide for the safety of life on navigable waterways during this event. Our regulation for marine events within the Captain of the Port Charleston identifies the regulated area for this event in Charleston and Mt. Pleasant, SC. During the enforcement periods, no person or vessel may enter, transit through, anchor in, or remain within the regulated area unless authorized by the Coast Guard Patrol Commander or a designated representative.

DATES: The regulations in 33 CFR 100.704 will be enforced from 7 a.m. through 11 a.m., on May 18, 2024, for the regulated are listed in Item No. 4 of Table 1 to § 100.704.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notification of enforcement, call or email Marine Science Technician First Class Thomas J. Welker, Sector Charleston Waterways Management Division, U.S. Coast Guard; telephone 843–740–3184, email at *Thomas.J.Welker@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce special local regulations in 33 CFR 100.704 for the annual Low Country Splash event regulated area identified in Table 1 to § 100.704, Item No. 4, from 7 a.m. through 11 a.m. on May 18, 2024. This action is being taken to provide for the safety of life on navigable waterways during this swim event. Our regulation for Marine Events within the Captain of the Port Charleston, § 100.704, Table 1 to § 100.704, Item No. 4, specifies the location of the regulated area for the Low Country Splash which encompasses portions of the Wando River and Cooper River. Under the provisions of § 100.704(c), all persons and vessels are prohibited from entering the regulated area, except those persons and vessels participating in the event, unless they receive permission to do so from the Coast Guard Patrol Commander, or designated representative.

Under the provisions of § 100.704(c), spectator vessels may safely transit outside the regulated area, but may not anchor, block, loiter in, impede the transit of festival participants or official patrol vessels or enter the regulated area without approval from the Coast Guard Patrol Commander or a designated representative. The Coast Guard may be assisted by other Federal, State, or local law enforcement agencies in enforcing this regulation. In addition to this notice of enforcement in the **Federal Register**, the Coast Guard will provide notice of

the regulated area via Local Notice to Mariners, Marine Safety Information Bulletins, Broadcast Notice to Mariners, and on-scene designated representatives.

Dated: April 23, 2024.

F.J. DelRosso,

Captain, U.S. Coast Guard, Captain of the Port Charleston.

BILLING CODE 9110–04–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

36 CFR Part 1225

[FDMS No. NARA–24–0008; NARA–2024–026]

RIN 3095–AC12

Federal Records Management: GAO Concurrence

AGENCY: National Archives and Records Administration (NARA).

ACTION: Direct rule.

SUMMARY: The National Archives and Records Administration (NARA) is amending our records management regulations to limit the role of the Government Accountability Office (GAO) in approving certain deviations in agency records schedules. Under the updated regulation, Federal agencies will only require GAO approval for records schedules that propose retention periods for accountable officer records that are shorter than the retention periods provided in the General Records Schedule (GRS). 1.1, item 010 for Accountable Officer records. GAO approval will no longer be required for other deviations from the GRS. GAO approval will also not be required for records schedules that dispose of program records less than three years old. GAO has concurred with this change.

DATES: Send comments on or before July 1, 2024.

ADDRESSES: You may submit comments on this rule, identified by RIN 3095–AC12, by any of the following methods:

Federal eRulemaking Portal: https://www.regulations.gov. Follow the instructions for submitting comments.

Email: Regulation_comments@nara.gov. Include RIN 3095–AC12 in the subject line of the message.

Mail (for paper, disk, or CD–ROM submissions): Send comments to Regulation Comments Desk (External Policy Program, Strategy & Performance Division (MP)); Suite 4100; National Archives and Records Administration; 8601 Adelphi Road; College Park, MD 20740–6001.

Hand delivery or courier: Deliver comments to the front desk at 8601 Adelphi Road, College Park, MD, addressed to: Regulations Comments Desk, External Policy Program; Suite 4100.

FOR FURTHER INFORMATION CONTACT: Edward Germino, Strategy and Performance Division, by email at *regulation_comments@nara.gov,* or by telephone at 301–837–3758. Contact *rmstandards@nara.gov* with any questions on records management standards and policy.

SUPPLEMENTARY INFORMATION:

Background

The Federal Records Act at 44 U.S.C. 3309 requires Government Accountability Office approval in situations where an agency seeks to dispose of records pertaining to claims and demands by or against the Government of the United States or to accounts in which the Government of the United States is concerned. NARA regulations have expanded the statutory requirement to require approval in two situations. First, agencies require GAO approval to dispose of agency program records that are less than three years old. Second, GAO approval is needed before an agency disposes of records in any way that deviates from what is provided in former General Records Schedule (GRS) 2–10. GRS 2–10 has been superseded by GRS 1.1, *Financial Management and Reporting Records.*

Practically, the current regulatory requirement to obtain GAO approval before the disposal of certain records means that agencies must seek GAO approval of numerous records schedules unrelated to GAO's mission. The required approval by GAO has created an additional burden on agencies requesting approval of these proposed records schedules and delays NARA's evaluation and approval processes.

NARA and GAO agree that the review required by this regulation is no longer necessary or appropriate. GAO review of records disposals under this regulation was originally established to support GAO authority under 44 U.S.C. 3309, which provides that records related to claims and demands by or against the U.S. Government cannot be disposed of by the agency head unless they have been settled and adjusted by GAO. However, the General Accounting Office Act of 1996 and the Legislative Branch Appropriations Act of 1996 transferred the authority to settle accounts to the Executive Branch. However, GAO retained the authority to relieve accountable officers from their liability under 31 U.S.C. 3527. Therefore, NARA is amending its records management regulation to only require GAO approval of records schedules that would provide retention periods for records of accountable officers that are shorter than what is authorized in the GRS.

Regulatory Analysis

Executive Order 12866, Regulatory Planning and Review, and Executive Order 13563 Improving Regulation and Regulation Review

OMB has reviewed this rulemaking and determined it is not ''significant'' under section 3(f) of Executive Order 12866. It is not significant because it applies only to Federal agencies, updates the regulations due to a statutory requirement (to incorporate technological developments and to account for changing technology and agency practices), and is not establishing a new program. Although the proposed revisions change existing requirements and add new ones for agencies, the requirements are necessary to keep the existing regulations up-to-date, comply with the statute, and ensure agencies are preserving records for the United States.

Regulatory Flexibility Act (5 U.S.C. 601, et seq.)

This review requires an agency to prepare an initial regulatory flexibility analysis and publish it alongside the proposed rule. This requirement does not apply if the agency certifies that the rulemaking will not, if promulgated, have a significant economic impact on a substantial number of small entities (5 U.S.C. 603). NARA certifies, after review and analysis, that this rulemaking will not have a significant adverse economic impact on small entities.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501, et seq.)

The Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501, *et seq.*) requires that agencies consider the impact of paperwork and other information collection burdens imposed on the public and, under the provisions of PRA section 3507(d), obtain approval from OMB for each collection of information they conduct, sponsor, or require through regulations. This rulemaking does not impose additional information collection requirements on the public that are subject to the Paperwork Reduction Act.

Executive Order 13132, Federalism

Executive Order (E.O.) 13132 requires agencies to ensure that State and local officials have the opportunity for

meaningful and timely input when those agencies are developing regulatory policies that may have a substantial, direct effect on the states, on the relationship between the Federal Government and the states, or on the distribution of power and responsibilities among the various levels of government. If the effects of the rule on State and local governments are sufficiently substantial, the agency must prepare a Federal assessment to assist senior policymakers. This rulemaking will not have any effects on State and local governments within the meaning of the E.O. Therefore, no federalism assessment is required.

Unfunded Mandates Reform Act (Sec. 202, Pub. L. 104–4; 2 U.S.C. 1532)

The Unfunded Mandates Reform Act requires that agencies determine whether any Federal mandate in the rulemaking may cause State, local, and Tribal governments, in the aggregate, or cause the private sector to expend $100 million in any one year. NARA certifies that this rulemaking does not contain a Federal mandate that may result in such an expenditure.

List of Subjects in 36 CFR Part 1225

Archives and records, Records management, Records schedules, Scheduling records.

For the reasons discussed in the preamble, NARA amends 36 CFR part 1225 as follows:

PART 1225—SCHEDULING RECORDS

■ 1. The authority citation for part 1225 continues to read as follows:

Authority: 44 U.S.C. 2111, 2904, 2905, 3102, and Chapter 33.

■ 2. Amend § 1225.20 to read as follows:

§ 1225.20 When do agencies have to get GAO approval for schedules?

(a) If an agency requests a deviation from the GRS related to accountable officer records that would authorize a retention period shorter than the retention period provided in the GRS, the agency must obtain approval from the Comptroller General.

(b) This approval must be obtained before NARA will approve the proposed agency records schedule.

Colleen J. Shogan,

Archivist of the United States.

BILLING CODE 7515–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 268

[EPA–HQ–OLEM–2023–0372; FRL 11026–02–OLEM]

Department of Energy Hanford Mixed Radioactive Waste Land Disposal Restrictions Variance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The United States Environmental Protection Agency (EPA) is granting a treatment variance, requested by the U.S. Department of Energy (DOE) in an August 1, 2023, petition, from the Land Disposal Restrictions (LDR) treatment standards for approximately 2,000 gallons of mixed hazardous low-activity radioactive waste from DOE's Test Bed Initiative (TBI) for the Hanford Site in Washington State. The petition requested approval for DOE to treat the TBI waste to the LDR technology standard of stabilization (STABL) with verification of meeting LDR concentration-based and Toxicity Characteristic Leaching Procedure-based standards as applicable for the relevant waste codes.

DATES: This final rule is effective on May 1, 2024.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–HQ–OLEM–2023–0372. All documents in the docket are listed on the *http://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available electronically through *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Bethany Russell, Waste Characterization Branch, Materials Recovery and Waste Management Division, Office of Resource Conservation and Recovery (5304P), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: 202–566–0823; email address: *russell.bethany@epa.gov.*

I. General Information

A. Does this action apply to me?

This action applies only to DOE's Hanford facility located in Richland, Washington.

B. What action is the Agency taking?

The EPA is finalizing the variance from the LDR treatment standards for approximately 2,000 gallons of mixed hazardous low-activity radioactive waste from DOE's TBI requested by DOE in an August 1, 2023, petition, for the Hanford Site in Washington State. The EPA is finalizing the variance without alteration and codifying the proposed modification to Table 1 to paragraph (o) of 40 CFR 268.44 for the TBI demonstration petition for the reasons stated in the preamble to the November 28, 2023, proposal and in the Agency's responses to the comments received on the proposal.

C. What is the Agency's authority for taking this action?

Sections 3004(d) through (g) of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6294(d)–(g), prohibit the land disposal of hazardous wastes unless such wastes meet the LDR treatment standards (or treatment standards) established by EPA (or the Agency). Section 3004(m) of RCRA, 42 U.S.C. 6924(m), requires EPA to set levels or methods of treatment, if any, which substantially diminish the toxicity of the waste or substantially reduce the likelihood of migration of hazardous constituents from the waste so that short-term and long-term threats to human health and the environment are minimized. EPA has established treatment standards for all hazardous wastes.

However, when facilities generate hazardous wastes which cannot be treated to the specified levels, or when it is technically inappropriate for such wastes to undergo the prescribed treatment, they can apply for a variance from a treatment standard.[1] The requirements for a treatment variance are found at 40 CFR 268.44. An applicant for a treatment variance may demonstrate that it is inappropriate to require a waste to be treated to the level or by the method specified as the treatment standard, even though such treatment is technically possible. This is the criterion pertinent to this action.[2]

[1] *See* 51 FR 40605–40606 (November 7, 1986); *see also* 62 FR 64504 (December 5, 1997).

[2] According to 40 CFR 268.44(a)(2), a petitioner may obtain a variance from an applicable treatment standard if it is inappropriate to require the waste to be treated to the level specified in the treatment standard or by the method specified as the

The petitioner must also demonstrate that compliance with any given treatment variance is sufficient to minimize threats to human health and the environment posed by land disposal of the waste.

II. Background

A. The Petition

On August 2, 2023, the EPA received a petition from the DOE requesting a variance from a treatment standard of the LDR of 40 CFR 268.40 for disposal of approximately 2,000 gallons of hazardous wastes generated from DOE's TBI.

On November 28, 2023, the EPA solicited public comments on a draft approval of the petition (88 FR 83065). The public comment period ended December 28, 2023. The EPA received thirteen (13) comments on the proposed rulemaking. The full text of the comments is in the Docket (EPA–HQ–OLEM–2023–0372). The EPA appreciates all the comments and has provided a brief summary, below, of common themes found in the comments and the EPA's responses. The EPA has provided comprehensive responses to all the comments in a document titled ''Responses to Comments on November 28, 2023, Proposed RCRA Land Disposal Restrictions Treatment Variance for Hanford Test Bed Initiative Wastes,'' which is in the Docket. The agency carefully considered all the points raised and has concluded that the comments do not provide reason for the EPA to deny the petition or to modify the approval as it was proposed.

B. Brief Summary of Common Themes in Comments Received and the EPA's Responses

Most commenters agreed that the EPA should approve a treatment variance for the TBI waste. Several commenters opined that the EPA should approve a broader variance applicable to a larger quantity of waste. Some commenters took issue with proposed approval for DOE to stabilize and dispose of the waste at only the two off-site facilities requested by DOE. Several commenters specifically took issue with the proposed approval for DOE to transport pretreated TBI waste in liquid form for treatment at the two facilities—located in Texas and Utah—expressing concern about the risks of transporting liquid waste over long distances and requesting that the EPA require that the treatment be conducted at or near the Hanford site.

One commenter questioned the desirability and efficacy of grouting for Hanford tank waste.

The comments, EPA's fuller summaries, and the EPA's full responses are included in the docket for this rule. The EPA very briefly summarizes some overarching points from its responses below.

This rule approves the petition that DOE submitted because the EPA has determined that the variance meets the two applicable criteria in 40 CFR 268.44(a): vitrification of the 2000 gallons of TBI waste would be technically inappropriate in view of the conditions specified in the variance, and the treatment authorized by the variance will minimize threats to human health and the environment posed by land disposal of the waste. Although several commenters argued that other approaches to treating and disposing of the waste would be preferable, the EPA's approval is not based on the overall desirability of the requested approach as compared to other possible approaches that DOE did not request. Rather, the EPA's approval is based on and limited to its assessment of the petition that DOE submitted.

In this regard, it is important to recognize the EPA's limited role in the TBI. The EPA supports the TBI as a vehicle to evaluate the regulatory pathways for stabilization of some portion of Hanford tank waste and supports making progress on the Hanford tank waste mission. Moreover, the EPA believes the TBI aligns with the overall recommendations in a number of federally funded research and development center reports commissioned by Congress, National Academies of Sciences reports, and reports by the General Accountability Office. However, the EPA did not design the TBI. Within the Federal Government, DOE is primarily responsible for determining treatment and disposal approaches for Hanford waste within the appropriate regulatory frameworks. The variance does not compel the TBI; it simply provides for TBI-specific LDR standards that will apply to the subject waste.

Finally, the EPA emphasizes that the variance is limited to the specific 2000 gallons of TBI waste that DOE requested receive an LDR variance, and that the EPA evaluated. The EPA expresses no view as to the appropriateness of any variances DOE may request in the future for any other Hanford waste.

List of Subjects in 40 CFR Part 268

Environmental protection, Hazardous waste, Mixed waste and variances.

Barry N. Breen,

Principal Deputy Assistant Administrator, Office of Land and Emergency Management.

For the reasons set out in the preamble, title 40, chapter I of the Code of Federal Regulations is amended as follows:

PART 268—LAND DISPOSAL RESTRICTIONS

■ 1. The authority citation for part 268 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921, and 6924.

■ 2. In § 268.44, the table in paragraph (o) is amended by adding in alphabetical order an entry for ''United States Department of Energy (Energy), Richland, WA,'' and adding four footnotes ''17'', ''18'', ''19'', and ''20'' in numerical order to read as follows:

§ 268.44 Variance from a treatment standard.

* * * * *

(o) * * *

treatment standard, even though such treatment is technically possible. To show that this is the case, as applicable here, the petitioner must demonstrate that treatment to the specified level or by the specified method is technically inappropriate (for example, resulting in combustion of large amounts of mildly contaminated environmental media).

TABLE—WASTES EXCLUDED FROM THE TREATMENT STANDARDS UNDER § 268.40

Facility name [1] and address	Waste code	See also	Regulated hazardous constituent	Wastewaters		Nonwastewaters

BILLING CODE 6560–50–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 92

[Docket No. FWS–R7–MB–2020–0134; FXMB12610700000–201–FF07M01000]

RIN 1018–BF08

Migratory Bird Subsistence Harvest in Alaska

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Announcement.

SUMMARY: The U.S. Fish and Wildlife Service (Service or we) announces that we are extending the Kodiak Island Roaded Area experimental season for subsistence migratory bird hunting and egg gathering by registration permit for 1 year (through the spring–summer subsistence harvest season [hereafter, ''season''] in 2024). As set forth in a 2021 final rule, this experimental season began in the 2021 season and was set to terminate at the end of the 2023 season. However, we are extending the experimental season to provide subsistence harvest opportunity for an additional year while an evaluation of harvest data from the first 3 years of the experimental season is completed and a long-term plan is developed. Extending the experimental season requires no revision of the regulations pertaining to subsistence harvest of migratory birds in Alaska; we are issuing this document solely for the purpose of public information.

DATES: We make this announcement May 1, 2024. The rule that published April 19, 2021, at 86 FR 20311 setting forth the regulations pertaining to the experimental hunt was effective April 19, 2021.

ADDRESSES: You may find supplementary materials for the 2021 rulemaking action as well as the comments received at the Federal eRulemaking Portal: *https://www.regulations.gov* in Docket No. FWS–R7–MB–2020–0134.

FOR FURTHER INFORMATION CONTACT: Wendy Loya, U.S. Fish and Wildlife Service, 1011 E Tudor Road, Mail Stop 201, Anchorage, AK 99503; (907) 227–2942. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point of contact in the United States.

SUPPLEMENTARY INFORMATION:

Background

Under the Migratory Bird Treaty Act (16 U.S.C. 703 *et seq.*), the Secretary of the Interior regulates the harvest of certain species of migratory birds, including establishing regulations for fall–winter harvest and for take by the indigenous inhabitants of the State of Alaska for their essential needs. The subsistence take of migratory birds in Alaska occurs during the spring and summer, when the harvest of migratory birds is not allowed elsewhere in the United States. Regulations governing the subsistence take of migratory birds in Alaska are in title 50 of the Code of Federal Regulations (CFR) in part 92. The regulations in 50 CFR 92.31 specify when and where the harvesting of birds for subsistence purposes may occur in 12 different regions of Alaska.

The migratory bird subsistence harvest regulations are developed cooperatively by the Alaska Migratory Bird Co-Management Council (hereafter, ''the Council''), which consists of the Service, the Alaska Department of Fish and Game, and Alaska Native representatives. The Council's primary purpose is to develop recommendations pertaining to the subsistence harvest of migratory birds.

Regulations for the Kodiak Archipelago Region

On February 26, 2021, we published a proposed rule (86 FR 11707), and on April 19, 2021, we published the subsequent final rule (86 FR 20311), to

revise the Alaska subsistence harvest regulations. The 2021 rulemaking action incorporated regulatory amendments that were recommended by the Council in 2019 and approved by the Service in 2020 (85 FR 73233, November 17, 2020) and included revisions to 50 CFR 92.31(e), pertaining to the Kodiak Archipelago Region. The rule provided for a 3-year experimental season for subsistence migratory bird hunting and egg gathering by registration permit only within the Kodiak Island Roaded Area (hereafter, ''the Roaded Area''). The regulations allow residents of the Kodiak Archipelago Region the opportunity to participate in subsistence harvest activities without the need for a boat. Prior to the 2021 final rule, the Roaded Area and marine waters adjacent to the Roaded Area (within 500 feet from the water's edge), were closed to harvest. Under these regulations, which are still in effect, the Roaded Area is closed to hunting and egg gathering for Arctic terns, Aleutian terns, mew gulls, and emperor geese.

The Council expected that the 3-year experimental season would begin in 2020 and continue through 2022, and the preambles to the 2020 proposed and final rules associated those years (2020–2022) with the 3-year experimental season. However, delays in the 2020 rulemaking process prevented the 3-year experimental season from beginning in 2020 as initially planned. Therefore, in the April 19, 2021, final rule (86 FR 20311), we stated that our intent to allow a 3-year experimental season for migratory bird hunting and egg gathering by registration permit along the Roaded Area remained the same, but that this activity would now occur during the 2021–2023 seasons with the experimental season terminating at the end of 2023. We further stated that reopening the Roaded Area after the 3-year experimental period would require a subsequent proposal from the Council for continuation of the season under either operational or experimental status.

Accordingly, in 2021, the Roaded Area was opened to spring–summer subsistence hunting of migratory birds and egg gathering. Participants of this experimental program first must obtain a registration permit and later must report their harvest.

Council Recommendation and Service Decision

In spring of 2023, the Council recommended to the Service that the 3-year experimental season for subsistence migratory bird hunting and egg gathering by registration permit only for the Roaded Area be extended an additional year. Because evaluation of the first 3 years of harvest data will extend into 2024, the Council determined that the experimental period should be extended through the 2024 season.

The 2023 subsistence harvest season closed after August 31, 2023. The Council is now assessing the effect of the experimental season and will develop a recommendation regarding the operational status for the Roaded Area in 2025 and beyond. The 1-year extension will allow the current harvest opportunity to continue until an evaluation of the first 3 years of data (2021–2023) is completed and a proposal to guide future harvest opportunity in the Roaded Area can be developed.

The Service concurs with the Council recommendation. Therefore, we announce that we are extending the experimental season through the end of the 2024 season (August 31, 2024). No revisions to the regulations pertaining to the Kodiak Archipelago Region are necessary because the regulations at 50 CFR 92.31(e) do not specify an end point for the registration permit program.

Authority: This document is published under the authority of the Migratory Bird Treaty Act (16 U.S.C. 703 *et seq.*).

Jerome Ford,

Assistant Director, Migratory Bird Program.

[FR Doc. 2024–09430 Filed 4–30–24; 8:45 am]

BILLING CODE 4333–15–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 100217095–2081–04; RTID 0648–XD915]

Reef Fish Fishery of the Gulf of Mexico; 2024 Recreational Accountability Measure and Closure for Gulf of Mexico Red Grouper

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS implements an accountability measure (AM) for the red grouper recreational sector in the exclusive economic zone (EEZ) of the Gulf of Mexico (Gulf) for the 2024 fishing year through this temporary rule. NMFS has projected that the 2024 recreational annual catch target (ACT) for Gulf red grouper will have been reached by July 1, 2024. Therefore, NMFS closes the recreational sector for Gulf red grouper on July 1, 2024, and it will remain closed through the end of the fishing year on December 31, 2024. This closure is necessary to protect the Gulf red grouper resource.

DATES: This temporary rule is effective from 12:01 a.m., local time, on July 1, 2024, until 12:01 a.m., local time, on January 1, 2025.

FOR FURTHER INFORMATION CONTACT: Dan Luers, NMFS Southeast Regional Office, telephone: 727–551–5719, email: *daniel.luers@noaa.gov.*

SUPPLEMENTARY INFORMATION: NMFS manages the Gulf reef fish fishery, which includes red grouper, under the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP). The Gulf of Mexico Fishery Management Council prepared the FMP, which was approved by the Secretary of Commerce, and NMFS implements the FMP through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). All red grouper weights discussed in this temporary rule are in gutted weight.

In 2022, NMFS published a final rule implementing a framework action under the FMP (87 FR 40742, July 8, 2022), which set the current red grouper recreational annual catch limit (ACL) of 2.02 million lb (0.92 million kg) and the ACT of 1.84 million lb (0.83 million kg) (50 CFR part 622.41(e)(2)(iv)). Under regulations at 50 CFR 622.41(e)(2)(i), if red grouper recreational landings reach or are projected to reach the recreational ACL, NMFS will close the recreational sector for the remainder of the fishing year. However, as specified in 50 CFR 622.41(e)(2)(ii), in the year following a recreational ACL overage, NMFS is required to reduce the length of the following year's recreational fishing season by the amount necessary to ensure that the recreational ACT is not exceeded in that following year. Preliminary landings estimates indicate that the Gulf red grouper recreational ACL was exceeded in 2023 by 498,743 lb (226,226 kg).

NMFS projects that the 2024 recreational ACT for Gulf red grouper of 1.84 million lb (0.83 million kg) will be reached as of July 1, 2024. This closure date is based on projected harvest rates using the average of recreational landings from 2021 through 2023, and the evaluation of four scenarios that generated predicted closure dates ranging from July 13, 2024, to August 2, 2024. NMFS is acting conservatively in

setting the 2024 recreational season by choosing an earlier closure date than the projecting scenarios because recreational harvest exceeded the red grouper recreational ACL by approximately 72 percent in 2021, by 35 percent in 2022, and by 25 percent in 2023. Accordingly, this temporary rule closes the recreational sector for Gulf red grouper effective at 12:01 a.m., local time, on July 1, 2024, through the end of the fishing year on December 31, 2024.

During the recreational closure, the bag and possession limits for red grouper in or from the Gulf EEZ are zero. The prohibition on possession of Gulf red grouper also applies in Gulf state waters for any vessel issued a valid Federal charter vessel/headboat permit for Gulf reef fish.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR 622.41(e)(2)(i) and (ii), which was issued pursuant to section 304(b) of the Magnuson-Stevens Act, and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment is unnecessary and contrary to the public interest. Such procedures are unnecessary because the regulations associated with the closure of the red grouper recreational sector at 50 CFR 622.41(e)(2)(i) and (ii) have already been subject to notice and public comment, and all that remains is to notify the public of the closure. Prior notice and opportunity for public comment are contrary to the public interest because there is a need to immediately implement this action to protect the red grouper stock and provide sufficient notice to recreational sector participants. Prior notice and opportunity for public comment would require time and could result in a harvest in excess of the established ACT and ACL. In addition, many charter vessel/headboat operations book trips for clients in advance and require as much notice as NMFS is able to provide to adjust their business plans to account for the recreational fishing season.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 26, 2024.

Everett Wayne Baxter,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

50 CFR Part 660

[Docket No. 240425–0119]

RIN 0648–BM53

Fisheries Off West Coast States; West Coast Salmon Fisheries; Federal Salmon Regulations for Overfished Species Rebuilding Plans

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS is revising regulations that implement the Pacific Fishery Management Council's (Council) Pacific Coast Salmon Fishery Management Plan (FMP). This final action removes the rebuilding plan for Snohomish River coho salmon from regulation, as this stock has been rebuilt and is no longer required to be managed under a rebuilding plan.

DATES: Effective May 31, 2024.

FOR FURTHER INFORMATION CONTACT: Shannon Penna, Fishery Management Specialist, 562–980–4239, *Shannon.Penna@noaa.gov.*

SUPPLEMENTARY INFORMATION: Regulations at 50 CFR part 660, subpart H implement the management of West Coast salmon fisheries under the FMP in the exclusive economic zone (3 to 200 nautical miles (5.6 to 370.4 kilometers)) off the coasts of the States of Washington, Oregon, and California.

The Snohomish River coho salmon stock contributes to U.S. ocean salmon fisheries north of Cape Falcon, ocean salmon fisheries off British Columbia, and marine and freshwater Puget Sound salmon fisheries. In 2018, NMFS determined that Snohomish River coho salmon was overfished under the Magnuson-Stevens Fishery and Conservation Management Act (MSA) (Letter from Barry A. Thom, NMFS West Coast Regional Administrator, to Chuck Tracy, Pacific Fishery Management Council Executive Director, dated June 18, 2018). The MSA requires Councils to develop and implement a rebuilding plan within 2 years of being notified by NMFS that a stock is overfished. In this case, the stock was determined to be overfished when the 3-year geometric spawning escapement dropped below 50,000 spawners. The Council transmitted its recommended rebuilding plan to NMFS on October 17, 2019, which was similar to the existing management framework, to rebuild Snohomish River coho salmon. Estimates of Snohomish River coho exploitation rates were not available for 2020 and 2021; however, fisheries in earlier years resulted in exploitation rates below the maximum fishing mortality threshold (0.6); therefore, Snohomish River coho were not considered subject to overfishing.

The Council determined that the recommended rebuilding plan met the MSA requirement to rebuild the stock as quickly as possible, taking into account the status and biology of any overfished stock and the needs of fishing communities (50 CFR 600.310(j)(3)(i)). NMFS approved and implemented the Council's recommended rebuilding plan for Snohomish River coho salmon through a final rule (86 FR 9301, February 21, 2021).

In 2023, NMFS determined that Snohomish River coho salmon met the criteria in the FMP for being rebuilt and notified the Council (Letter from Jennifer Quan, NMFS West Coast Regional Administrator, to Merrick Burden, Pacific Fishery Management Council Executive Director, dated October 13, 2023). A stock is rebuilt when the 3-year geometric mean spawning escapement exceeds the level associated with the maximum sustainable yield (S_{MSY}). When Snohomish River coho salmon was determined to be overfished, the 3-year geometric mean was 29,677 (2014 to 2016). The most recent 3-year geometric mean of the spawning escapement reported for this stock (2019 to 2021) is 55,154, which exceeds the spawning escapement requirement to achieve S_{MSY} for this stock, 50,000 spawners. Because the stock is rebuilt, it is no longer required to be managed under a rebuilding plan. Therefore, the Snohomish River coho salmon rebuilding plan should be removed from regulation to avoid confusion regarding the stock's status. Additionally, removing the Snohomish River coho salmon rebuilding plan from regulation will avoid confusion should NMFS make a future determination that the Snohomish River coho salmon stock is overfished again, in which case the MSA requires the Council to prepare and implement a rebuilding plan within 2 years of that determination (50 CFR 600.310(j)(2)(ii)). Leaving the current rebuilding plan in regulation could cause confusion as it might be misperceived as being the default rebuilding plan for Snohomish River coho salmon or required for current management, which was not the intention of the Council nor of NMFS. Therefore, to avoid confusion, it is

necessary to remove the existing Snohomish River coho salmon rebuilding plan from regulation. The proposed rule was issued on February 28, 2024, and the comment period closed on March 14, 2024.

Public Comment

No comments were received during the public comment period of February 28 to March 14, 2024. No changes were made from the proposed rule.

Classification

NMFS is issuing this rule pursuant to section 305(d) of the MSA. This reason for using this regulatory authority is: pursuant to MSA section 305(d), this action is necessary to carry out this regulatory amendment, because it implements technical and minor administrative changes to the regulations governing the salmon fishery. The NMFS Assistant Administrator has determined that this final rule is consistent with the Salmon FMP and other applicable law.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification or on the economic impacts of the rule generally. As a result, a regulatory flexibility analysis was not required and none was prepared. This final rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

List of Subjects in 50 CFR Part 660

Fisheries, Fishing, and Recording and reporting requirements.

Dated: April 26, 2024.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 50 CFR part 660 as follows:

PART 660—FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.,* 16 U.S.C. 773 *et seq.,* and 16 U.S.C. 7001 *et seq.*

§ 660.413 [Amended]

■ 2. Amend § 660.413 by removing paragraph (e).

[Docket No. 240304–0068; RTID 0648–XD853]

Fisheries of the Exclusive Economic Zone Off Alaska; Trawl Sablefish in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; modification of closure.

SUMMARY: NMFS is opening directed fishing for sablefish by vessels using trawl gear in the Bering Sea subarea and the Aleutian Islands subarea of the Bering Sea and Aleutian Islands Management Area (BSAI). This action is necessary to fully use the 2024 sablefish total allowable catch (TAC) allocated to vessels using trawl gear in the Bering Sea subarea and the Aleutian Islands subarea of the BSAI.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), May 1, 2024, through 2400 hours, A.l.t., December 31, 2024. Comments must be received at the following address (see **ADDRESSES**) no later than 4:30 p.m., A.l.t., May 15, 2024.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2023–0124, by any of the following methods:

Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *https://www.regulations.gov* and enter NOAA–NMFS–2023–0124 in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.

Mail: Submit written comments to Gretchen Harrington, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *https://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, *etc.*), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''NA'' in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Steve Whitney, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

Pursuant to the final 2024 and 2025 harvest specifications for groundfish in the BSAI (89 FR 17287, March 11, 2024) NMFS closed directed fishing for sablefish using trawl gear in the Bering Sea subarea and the Aleutian Islands subarea of the BSAI under § 679.20(d)(1)(iii).

As of April 24, 2024, NMFS has determined that approximately 3,380 metric tons (mt) in the Bering Sea subarea and 1,780 mt in the Aleutian Islands subarea of sablefish initial TAC allocated to trawl gear remains unharvested. Therefore, in accordance with § 679.25(a)(1)(i), (a)(2)(i)(C), and (a)(2)(iii)(D), and to fully utilize the 2024 sablefish TAC allocated to trawl in the Bering Sea subarea and the Aleutian Islands subarea of the BSAI, NMFS is terminating the previous closure and is opening directed fishing for sablefish by vessels using trawl gear in the Bering Sea subarea and the Aleutian Islands subarea of the BSAI. This will enhance the socioeconomic well-being of harvesters in this area. The Administrator, Alaska Region (Regional Administrator) considered the following factors in reaching this decision: (1) the current catch of sablefish allocated to trawl gear in the Bering Sea subarea and the Aleutian Islands subarea of the BSAI; and, (2) the harvest capacity and stated intent on future harvesting patterns of vessels in participating in this fishery.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion, and would delay the opening of directed fishing for sablefish by vessels using trawl gear in the Bering Sea subarea and the Aleutian Islands subarea of the BSAI. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of April 24, 2024.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Without this inseason adjustment, NMFS could not allow the fishery for sablefish by vessels using trawl gear in Bering Sea subarea and the Aleutian Islands subarea of the BSAI to be harvested in an expedient manner and in accordance with the regulatory schedule. Under § 679.25(c)(2), interested persons are invited to submit written comments on this action to the above address until May 15, 2024.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 25, 2024.

Everett Wayne Baxter,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

Proposed Rules

Federal Register
Vol. 89, No. 85
Wednesday, May 1, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2024–1286; Project Identifier MCAI–2024–00017–T]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all Airbus SAS Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes). This proposed AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. This proposed AD would require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in a European Union Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by June 17, 2024.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2024–1286; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For material that is proposed for IBR in this NPRM, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.* It is also available at *regulations.gov* under Docket No. FAA–2024–1286.
- You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 206–231–3225; email: *dan.rodina@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2024–1286; Project Identifier MCAI–2024–00017–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Dan Rodina, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 206–231–3225; email: *dan.rodina@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2024–0003, dated January 5, 2024 (EASA AD 2024–0003) (also referred to as the MCAI), to correct an unsafe condition for Airbus SAS Model A300 B4–601, B4–603, B4–620, B4–622, B4–605R, B4–622R, C4–605R variant F, C4–620, F4–605R, F4–622R, and A300F4–608ST airplanes. Model A300 C4–620 and A300F4–608ST airplanes are not certificated by the FAA and are not included on the U.S. type certificate data sheet; this proposed AD therefore does not include those airplanes in the applicability. The MCAI states that new or more restrictive airworthiness limitations have been developed.

EASA AD 2024–0003 specifies that it requires a task (limitation) already in Airbus A300–600 ALS Part 4 Revision 03 that is required by EASA AD 2017–0202 (which corresponds to FAA AD 2018–18–21, Amendment 39–19400 (83

FR 47054, September 18, 2018) (AD 2018–18–21)), and that incorporation of EASA AD 2024–0003 invalidates (terminates) prior instructions for that task. For Model A300 B4–601, B4–603, B4–620, B4–622, B4–605R, B4–622R, 300 F4–605R, F4–622R, and A300 C4–605R Variant F airplanes only, this proposed AD therefore would terminate the limitations required by paragraph (g) of AD 2018–18–21 for the tasks identified in the service information referenced in EASA AD 2017–0202 only.

The FAA is proposing this AD to address the risks associated with the effects of aging on airplane systems. The unsafe condition, if not addressed, could result in an increased potential for failure of certain life-limited parts, and reduced structural integrity or controllability of the airplane. You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2024–1286.

Related Service Information Under 1 CFR Part 51

The FAA reviewed EASA AD 2024–0003, which specifies new or more restrictive airworthiness limitations for airplane structures and safe life limits.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

FAA's Determination

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, which are specified in EASA AD 2024–0003 described previously, as incorporated by reference. Any differences with EASA AD 2024–0003 are identified as exceptions in the regulatory text of this proposed AD.

This proposed AD would require revisions to certain operator maintenance documents to include new actions (*e.g.,* inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this proposed AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance (AMOC) according to paragraph (k)(1) of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2024–0003 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2024–0003 through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2024–0003 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2024–0003. Service information required by EASA AD 2024–0003 for compliance will be available at *regulations.gov* by searching for and locating Docket No. FAA–2024–1286 after the FAA final rule is published.

Airworthiness Limitation ADs Using the New Process

The FAA's process of incorporating by reference MCAI ADs as the primary source of information for compliance with corresponding FAA ADs has been limited to certain MCAI ADs (primarily those with service bulletins as the primary source of information for accomplishing the actions required by the FAA AD). However, the FAA is now expanding the process to include MCAI ADs that require a change to airworthiness limitation documents, such as airworthiness limitation sections.

For these ADs that incorporate by reference an MCAI AD that changes airworthiness limitations, the FAA requirements are unchanged. Operators must revise the existing maintenance or inspection program, as applicable, to incorporate the information specified in the new airworthiness limitation document. The airworthiness limitations must be followed according to 14 CFR 91.403(c) and 91.409(e).

The previous format of the airworthiness limitation ADs included a paragraph that specified that no alternative actions (*e.g.,* inspections) or intervals may be used unless the actions and intervals are approved as an AMOC in accordance with the procedures specified in the AMOC paragraph under ''Additional AD Provisions.'' This new format includes a ''Provisions for Alternative Actions and Intervals'' paragraph that does not specifically refer to AMOCs, but operators may still request an AMOC to use an alternative action or interval.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 120 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate. Therefore, the agency estimates the average total cost per operator to be $7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or

develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Airbus SAS: Docket No. FAA–2024–1286; Project Identifier MCAI–2024–00017–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by June 17, 2024.

(b) Affected ADs

This AD affects AD 2018–18–21, Amendment 39–19400 (83 FR 47054, September 18, 2018) (AD2018–18–21).

(c) Applicability

This AD applies to all Airbus SAS airplanes identified in paragraphs (c)(1) through (4) of this AD, certificated in any category.

(1) Model A300 B4–601, B4–603, B4–620, and B4–622 airplanes.

(2) Model A300 B4–605R and B4–622R airplanes.

(3) Model A300 F4–605R and F4–622R airplanes.

(4) Model A300 C4–605R Variant F airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Unsafe Condition

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address the risks associated with the effects of aging on airplane systems. The unsafe condition, if not addressed, could result in an increased potential for failure of certain life-limited parts, and reduced structural integrity or controllability of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2024–0003, dated January 5, 2024 (EASA AD 2024–0003).

(h) Exceptions to EASA AD EASA AD 2024–0003

(1) This AD does not adopt the requirements specified in paragraphs (1) and (2) of EASA AD 2024–0003.

(2) Paragraph (3) of EASA AD 2024–0003 specifies revising ''the approved AMP,'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(3) The initial compliance time for doing the tasks specified in paragraph (3) of EASA AD 2024–0003 is at the applicable ''limitations'' and ''associated thresholds'' as incorporated by the requirements of paragraph (3) of EASA AD 2024–0003, or within 90 days after the effective date of this AD, whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraph (4) of EASA AD 2024–0003.

(5) This AD does not adopt the ''Remarks'' section of EASA AD 2024–0003.

(i) Provisions for Alternative Actions and Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2024–0003.

(j) Terminating Action for Certain Tasks Required by AD 2018–18–21

For Model A300 B4–601, B4–603, B4–620, B4–622, B4–605R, B4–622R, 300 F4–605R, F4–622R, and A300 C4–605R Variant F airplanes only: Accomplishing the actions required by this AD terminates the corresponding requirements of AD 2018–18–21 for the tasks identified in the service information referenced in EASA AD 2017–0202 only.

(k) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, mail it to the address identified in paragraph (l) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(l) Additional Information

For more information about this AD, contact Dan Rodina, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 206–231–3225; email: *dan.rodina@faa.gov.*

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2024–0003, dated January 5, 2024.

(ii) [Reserved]

(3) For EASA AD 2024–0003, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu.* You may find this EASA AD on the EASA website at *ad.easa.europa.eu.*

(4) You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations,* or email *fr.inspection@nara.gov.*

Issued on April 23, 2024.

Victor Wicklund,

Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

14 CFR Part 71

[Docket No. FAA–2024–1146; Airspace Docket No. 24–ACE–5]

RIN 2120–AA66

Revocation of Class E Airspace; Festus, MO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to revoke the Class E airspace at Festus, MO. The FAA is proposing this action as the result of the instrument procedures being cancelled and the airport closing.

DATES: Comments must be received on or before June 17, 2024.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–1146 and Airspace Docket No. 24–ACE–5 using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instruction for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11H, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/.* You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would revoke the Class E airspace extending upward from 700 feet above the surface at Festus Memorial Airport, Festus, MO, due to instrument procedures being cancelled and the airport closing.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov* as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at *www.dot.gov/privacy.*

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by removing the Class E surface area at Festus Memorial Airport, Festus, MO.

This action is the result of the instrument procedures being cancelled and the airport closing.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ACE MO E5 Festus, MO [Removed]

* * * * *

Issued in Fort Worth, Texas, on April 25, 2024.

[Docket No. FAA–2024–1123; Airspace Docket No. 24–ASW–10]

RIN 2120–AA66

Amendment of Class E Airspace; Llano and Mason, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend the Class E airspace at Llano, TX, and Mason, TX. The FAA is proposing this action as the result of an airspace review conducted due to the decommissioning of the Llano very high frequency omnidirectional range (VOR) as part of the VOR Minimum Operational Network (MON) Program. The geographic coordinates of the Llano Municipal Airport, Llano, TX, would also be updated to coincide with the FAA's aeronautical database. This action will bring the airspace into compliance with FAA orders and support instrument flight rule (IFR) procedures and operations.

DATES: Comments must be received on or before June 17, 2024.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–1123 and Airspace Docket No. 24–ASW–10 using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instruction for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the Class E airspace extending upward from 700 feet above the surface at Llano Municipal Airport, Llano, TX, and Mason County Airport, Mason, TX, to support IFR operations at these airports.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one

time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov* as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at *www.dot.gov/privacy.*

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by:

Modifying the Class E airspace extending upward from 700 feet above the surface to within a 7.2-mile (increased from a 6.5-mile) radius of Llano Municipal Airport, Llano, TX; adding an extension within 2 miles each side of the 179° bearing from the airport extending from the 7.2-mile radius to 12.3 miles south of the airport; modifying the extension within 4 miles each side of the 359° bearing from the airport extending from the 7.2-mile (previously 6.5-mile) radius of the airport to 8.7 (previously 13.5) miles north of the airport; and updating the geographic coordinates of the airport to coincide with the FAA's aeronautical database;

And modifying the Class E airspace extending upward from 700 feet above the surface to within a 7.7-mile (increased from a 6.4-mile) radius of the Mason County Airport, Mason, TX; modifying the extension within 2 miles each side of the 001° bearing from the airport extending from the 7.7-mile (previously 6.4-mile) radius to 11.8 miles north of the airport; and adding an extension within 2 miles each side of the 181° bearing from the airport extending from the 7.7-mile radius to 10.8 miles south of the airport.

This action is the result of an airspace review conducted due to the decommissioning of the Llano VOR as part of the VOR MON Program and supports IFR operations at these airports.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ASW TX E5 Llano, TX [Amended]

Llano Municipal Airport, TX
(Lat 30°47′03″ N, long 98°39′36″ W)

An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraphs 6002 and 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by:

Modifying the Class E surface area to within a 4.2-mile (decreased from a 4.7-mile) radius of the Hastings Municipal Airport, Hastings, NE; removing the Hastings VOR/DME and associated extension from the airspace legal description; removing the extension northwest of the airport as it is no longer required; and replacing the outdated terms ''Notice to Airmen'' and ''Airport/Facility Directory'' with ''Notice to Air Missions'' and ''Chart Supplement;''

And modifying the Class E airspace extending upward from 700 feet above the surface to within a 6.7-mile (decreased from a 7.2-mile) radius of Hastings Municipal Airport; and within 2 miles each side of the 150° bearing from the airport extending from the 6.7-mile (previously 7.2-mile) radius to 10.5 miles (previously 10.4 miles) southeast of the airport.

This action is the result of an airspace review conducted due to the decommissioning of the Hastings VOR as part of the VOR MON Program and supports IFR operations at this airport.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6002 Class E Airspace Areas Designated as a Surface Area.

* * * * *

ACE NE E2 Hastings, NE [Amended]

Hastings Municipal Airport, NE
(Lat 40°36′19″ N, long 98°25′40″ W)

Within a 4.2-mile radius of Hastings Municipal Airport. This Class E airspace area is effective during the specific dates and times established in advance by a Notice to Air Missions. The effective dates and times will thereafter be continuously published in the Chart Supplement.

* * * * *

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ACE NE E5 Hastings, NE [Amended]

Hastings Municipal Airport, NE
(Lat 40°36′19″ N, long 98°25′40″ W)

That airspace extending upward from 700 feet above the surface within a 6.7-mile radius of Hastings Municipal Airport; and within 2 miles each side of the 150° bearing from the airport extending from the 6.7-mile radius to 10.5 miles southeast of the airport.

* * * * *

Issued in Fort Worth, Texas, on April 25, 2024.

Steven T. Phillips,

Acting Manager, Operations Support Group, ATO Central Service Center.

[Docket No. FAA–2024–1147; Airspace Docket No. 24–AGL–13]

RIN 2120–AA66

Revocation of Class E Airspace; Gibson City, IL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to revoke the Class E airspace at Gibson City, IL. The FAA is proposing this action as the result of the instrument procedures being cancelled and the airspace no longer being required.

DATES: Comments must be received on or before June 17, 2024.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–1147 and Airspace Docket No. 24–AGL–13 using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instruction for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11H, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/.* You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Jeffrey Claypool, Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222–5711.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would revoke the Class E airspace extending upward from 700 feet above the surface at Gibson City Municipal Airport, Gibson City, IL, due to instrument procedures being cancelled and the airspace no longer being required.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov* as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at *www.dot.gov/privacy.*

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by removing the Class E surface area at Gibson City Municipal Airport, Gibson City, IL.

This action is the result of the instrument procedures being cancelled and the airspace no longer being required.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

[Docket No. FAA–2024–1122; Airspace Docket No. 24–AGL–12]

RIN 2120–AA66

Amendment of Class E Airspace; Paxton, IL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend the Class E airspace at Paxton, IL. The FAA is proposing this action as the result of an airspace review conducted due to the decommissioning of the Roberts very high frequency omnidirectional range (VOR) as part of the VOR Minimum Operational Network (MON) Program. This action will bring the airspace into compliance with FAA orders and support instrument flight rule (IFR) procedures and operations.

DATES: Comments must be received on or before June 17, 2024.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–1122 and Airspace Docket No. 24–AGL–12 using any of the following methods:

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend Class E airspace extending upward from 700 feet above the surface at Paxton Airport, Paxton, IL, to support IFR operations at this airport.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov* as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at *www.dot.gov/privacy*.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov*. Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/*.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by modifying the Class E airspace extending upward from 700 feet above the surface at Paxton Airport, Paxton, IL, by removing the Roberts VORTAC and associated extension from the airspace legal description; and removing the

exclusionary language as it is no longer required.

This action is the result of an airspace review conducted as part of the decommissioning of the Roberts VOR as part of the VOR MON Program and to support IFR operations at this airport.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

AGL IL E5 Paxton, IL [Amended]

Paxton Airport, IL
(Lat 40°26′56″ N, long 88°07′40″ W)

That airspace extending upward from 700 feet above the surface within a 6.3-mile radius of Paxton Airport.

* * * * *

Issued in Fort Worth, Texas, on April 25, 2024.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the Class E surface area and Class E airspace extending upward from 700 feet above the surface at Chanute Martin Johnson Airport, Chanute, KS, to support IFR operations at this airport.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically

invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov* as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at *www.dot.gov/privacy.*

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraphs 6002 and 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by:

Modifying the Class E surface area to within a 3.9-mile (decreased from a 4-mile) radius of the Chanute Martin Johnson Airport, Chanute, KS; updating the geographic coordinates of the airport to coincide with the FAA's aeronautical database; and replacing the outdated terms ''Notice to Airmen'' and ''Airport/Facility Directory'' with ''Notice to Air Missions'' and ''Chart Supplement;''

And modifying the Class E airspace extending upward from 700 feet above the surface to within a 6.4-mile (decreased from a 6.5-mile) radius of Chanute Martin Johnson Airport; and updating the geographic coordinates of the airport to coincide with the FAA's aeronautical database.

This action is the result of an airspace review conducted due to the decommissioning of the Chanute VOR as part of the VOR MON Program and to support IFR operations at this airport.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6002 Class E Airspace Areas Designated as a Surface Area.

* * * * *

ACE KS E2 Chanute, KS [Amended]

Chanute Martin Johnson Airport, KS
(Lat 37°40′04″ N, long 95°29′12″ W)

Within a 3.9-mile radius of Chanute Martin Johnson Airport. This Class E airspace area is effective during the specific dates and times established in advance by a Notice to Air Missions. The effective dates and times will thereafter be continuously published in the Chart Supplement.

* * * * *

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ACE KS E5 Chanute, KS [Amended]

Chanute Martin Johnson Airport, KS
(Lat 37°40′04″ N, long 95°29′12″ W)

That airspace extending upward from 700 feet above the surface within a 6.4-mile radius of Chanute Martin Johnson Airport.

* * * * *

Issued in Fort Worth, Texas, on April 25, 2024.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2024–1119; Airspace Docket No. 24–ACE–2]

RIN 2120–AA66

Amendment of Class E Airspace; Beloit, KS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend the Class E airspace at Beloit, KS. The FAA is proposing this action as the result of an airspace review conducted due to the decommissioning of the Mankato very high frequency omnidirectional range (VOR) as part of the VOR Minimum Operational Network (MON) Program. The geographic coordinates of the airport would also be updated to coincide with the FAA's aeronautical database. This action will bring the airspace into compliance with FAA orders and support instrument flight rule (IFR) procedures and operations.

DATES: Comments must be received on or before June 17, 2024.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–1119 and Airspace Docket No. 24–ACE–2 using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instruction for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11H, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/.* You may also contact the Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Jeffrey Claypool, Federal Aviation Administration, Operations Support Group, Central Service Center, 10101 Hillwood Parkway, Fort Worth, TX 76177; telephone (817) 222–5711.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the Class E airspace extending upward from 700 feet above the surface at Moritz Memorial Airport, Beloit, KS, to support IFR operations at this airport.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it received on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT post these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov* as described in the system of records notice (DOT/ALL–14FDMS), which can be reviewed at *www.dot.gov/privacy.*

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Federal Aviation Administration, Air Traffic Organization, Central Service Center, Operations Support Group, 10101 Hillwood Parkway, Fort Worth, TX 76177.

Incorporation by Reference

Class E airspace is published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11H, dated August 11, 2023, and effective September 15, 2023. These updates would be published subsequently in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11H lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by modifying the Class E airspace extending upward from 700 feet above the surface to within a 7-mile (increased from a 6.5-mile) radius of Moritz Memorial Airport, Beloit, KS;

correct the state associated with the airport from IA to KS; and updated the geographic coordinates of the airport to coincide with the FAA's aeronautical database.

This action is the result of an airspace review conducted due to the decommissioning of the Mankato VOR as part of the VOR MON Program and to support IFR operations at this airport.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11H, Airspace Designations and Reporting Points, dated August 11, 2023, and effective September 15, 2023, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ACE KS E5 Beloit, KS [Amended]

Moritz Memorial Airport, KS
(Lat 39°28′18″ N, long 98°07′44″ W)

That airspace extending upward from 700 feet above the surface within a 7-mile radius of Moritz Memorial Airport.

* * * * *

Issued in Fort Worth, Texas, on April 25, 2024.

Steven T. Phillips,

Acting Manager, Operations Support Group, ATO Central Service Center.

BILLING CODE 4910–13–P

DEPARTMENT OF STATE

22 CFR Part 126

[Public Notice: 12377]

RIN 1400–AF84

International Traffic in Arms Regulations: Exemption for Defense Trade and Cooperation Among Australia, the United Kingdom, and the United States

AGENCY: Department of State.

ACTION: Proposed rule.

SUMMARY: The Department of State (the Department) proposes to amend the International Traffic in Arms Regulations (ITAR) to support the goals of the AUKUS partnership, the enhanced trilateral security partnership among Australia, the United Kingdom, and the United States. This exemption is designed to foster defense trade and cooperation between and among the United States and two of its closest allies. It is reflective of our nations' collective commitment to implement shared security standards on protecting defense technology and sensitive military know-how. To achieve this, the Department proposes to amend the ITAR to include an exemption to the requirement to obtain a license or other approval from the Department's Directorate of Defense Trade Controls (DDTC) prior to any export, reexport, retransfer, or temporary import of defense articles; the performance of defense services; or engagement in brokering activities between or among authorized users within Australia, the United Kingdom, and the United States. The Department also proposes to add a list of defense articles and defense services excluded from eligibility for transfer under the proposed new exemption; add to the scope of the exemption for intra-company, intra-organization, and intra-governmental transfers to allow for the transfer of classified defense articles to certain dual nationals who are authorized users or regular employees of an authorized user within the United Kingdom and Australia; and revise the section on expediting license review applications by referencing new processes for Australia, the United Kingdom, and Canada.

DATES: Send comments on or before May 31, 2024.

ADDRESSES: Interested parties may submit comments by one of the following methods:

- *Email: DDTCPublicComments@state.gov,* with the subject line ''Australia, the United Kingdom, and the United States ITAR Exemption''
- *Internet:* At *www.regulations.gov,* search for this notice using Docket DOS–2024–0013.

Those submitting comments should not include any personally identifying information they do not desire to be made public or information for which a claim of confidentiality is asserted. Comments and/or transmittal emails will be made available for public inspection and copying after the close of the comment period via the Directorate of Defense Trade Controls website at *www.pmddtc.state.gov.* Parties who wish to comment anonymously may submit comments via *www.regulations.gov,* leaving identifying fields blank.

FOR FURTHER INFORMATION CONTACT: Ms. Engda Wubneh, Foreign Affairs Officer, Office of Defense Trade Controls Policy, U.S. Department of State, telephone (771) 205–9566; email *DDTCCustomerService@state.gov,* ATTN: Regulatory Change, ITAR Section 126.7 Australia, the United Kingdom, and the United States Exemption.

SUPPLEMENTARY INFORMATION: On September 15, 2021, the leaders of Australia, the United Kingdom, and the United States announced an intention to deepen ''diplomatic, security, and defense cooperation to meet the challenges of the twenty-first century'' through the creation of AUKUS, an enhanced trilateral security partnership. Reflective of the goals of AUKUS, on December 22, 2023, President Biden signed the National Defense Authorization Act (''NDAA'') for Fiscal Year 2024, Public Law 118–31, which, among other matters, established new

authorities and requirements relating to defense trade between or among Australia, the United Kingdom, and the United States. These new authorities and requirements are contained in section 1343 of the NDAA for Fiscal Year 2024, which created a new section 38(l) in the Arms Export Control Act (AECA) (22 U.S.C. 2778(l)). Certain of these requirements include a determination and certification as to whether Australia and the United Kingdom have implemented systems of export controls that are comparable to those of the United States in several specified areas. If one or both partner nation's systems are determined and certified to meet the listed standards related to export controls in the AECA, and if the partner nation has implemented a comparable exemption from its export controls for the United States, the Department would immediately implement an ITAR exemption, subject to certain statutory limitations, for the partner nation(s) to which the positive certification applies. A separate provision, section 1344 of the NDAA for Fiscal Year 2024, calls for regulatory action to establish an expedited decision-making process for license applications to export certain commercial, advanced-technology defense articles and defense services to Australia, the United Kingdom, and Canada. These proposed amendments stand to enhance security cooperation and collaboration with two of our closest allies.

The Department is proposing an ITAR amendment in the interest of preparing for a future exemption and obtaining public feedback to shape a final rule following any positive certification. The proposed new exemption, designed to implement the provisions of new section 38(l) of the AECA, would be located in ITAR § 126.7 and would provide that no license or other approval is required for the export, reexport, retransfer, or temporary import of defense articles; the performance of defense services; or engagement in brokering activities between or among designated authorized users within Australia, the United Kingdom, and the United States provided certain requirements and limitations are met. These include a list of excluded defense articles and defense services not eligible for the exemption, which can be found in a proposed new Supplement No. 2 to Part 126. The scope of excluded defense articles and defense services remain subject to revision and the Department welcomes comment on proposed Supplement No. 2 to Part 126. Further details regarding the requirements and limitations of the proposed exemption are as follows:

- In § 126.7(b)(1), the exemption may only be used for transfers to or within the physical territory of Australia, the United Kingdom, or the United States, per AECA section 38(l)(1)(C)(2).
- In § 126.7(b)(2), the pool of eligible members, known as authorized users, is created to facilitate secure defense trade and cooperation. Australia and the United Kingdom's members will undergo an authorized user enrollment process, in coordination with DDTC, and those members will be listed through the DDTC website. Members located in the United States must be registered with DDTC and not debarred under ITAR § 127.7. The UK and Australia authorized users may request that DDTC provide confirmation of the status of U.S. authorized users. As these lists are subject to change, DDTC will confirm the eligibility of parties under this exemption prior to the transfer (*e.g.,* export, temporary import, reexport, etc.) of defense articles or defense services.
- In § 126.7(b)(3), the defense articles and defense services listed in Supplement No. 2 to Part 126 are not eligible for this proposed exemption. These items are excluded from eligibility under the proposed exemption because (1) they are exempted from eligibility by statute, including AECA section 38(j)(1)(C)(ii), or (2) are specifically exempted by either the UK, Australia, or the United States, per AECA section 38(l)(4)(A). For those items excluded from eligibility to be transferred under this proposed exemption by the United States, the U.S. government assessed that the defense articles and defense services in the list require a license or other approval from DDTC due to their importance to the national security and foreign policy interests of the United States. These items are, however, subject to the expedited licensing procedures listed in § 126.15 and may be reviewed and revised during the lifetime of the exemption. The Department notes that Supplement No. 2 to Part 126 lists the USML entries in column 1 that represent the location of the excluded defense articles and defense services within the USML. A USML category's listing in column 1 does not indicate the entire USML category is excluded; only the portions of those entries that are further described in column 2 are excluded. When reviewing the list of exclusions, careful review of all relevant entries is required. For example, when determining whether manufacturing know-how and source code described in USML Category IV(i) is excluded, entries such as exclusions for technical data designated as Missile Technology (MT) or directly related to anti-tamper articles may apply, and manufacturing know-how and source code are each addressed in separate exclusion entries:
  - *IV(a), (b), and (g):* Manufacturing know-how and source code directly related to articles in these paragraphs are both excluded.
  - *IV(c):* Manufacturing know-how directly related to articles in this paragraph is not excluded, but directly related source code is excluded.
  - *IV(d) and (h):* Manufacturing know-how directly related to articles in these paragraphs is excluded, but directly related source code is not excluded.
- In § 126.7(b)(4), transferors that use this proposed exemption must abide by this requirement for recordkeeping purposes, and such records must be made available to DDTC upon request.
- In § 126.7(b)(5), the limitations provided exclude exemption use for transfers that would require certification to Congress pursuant to sections 36(c) and 36(d) of the AECA.
- In § 126.7(b)(6) and (7), the Department is reiterating other ITAR provisions to underscore that the proposed exemption is subject to other requirements within the subchapter, and the named sections are not an exhaustive list.
- In § 126.7(b)(8), the Department is establishing that classified defense articles and defense services are eligible for transfer under this exemption provided the authorized users in the United States, Australia, and the United Kingdom meet their respective industrial security requirements. For authorized users in the United States, this is the National Industrial Security Program Operating Manual (NISPOM) (32 CFR part 117) and, for Restricted Data, the Atomic Energy Act of 1954, as amended. For Australian authorized users, this is the Defence Security Principles Framework (DSPF) Principle 16 and Control 16.1, Defence Industry Security Program, and for United Kingdom authorized users this is the Government Functional Standards (GovS) 007: Security.
- The Department is also proposing to add a provision to the exemption in ITAR § 126.18 to allow certain dual nationals of Australia and the United Kingdom to receive classified defense articles without a separate license from DDTC. These persons must be authorized users of the exemption in § 126.7 or regular employees of such authorized users in § 126.7, hold a security clearance approved by Australia, the United Kingdom, or the United States that is equivalent to the classification level of SECRET or above

in the United States, and be located within the physical territory of Australia, the United Kingdom, or the United States or be a member of the armed forces of Australia, the United Kingdom, or the United States acting in their official capacity. The proposed addition of § 126.18(e) is to facilitate the use of the exemption at § 126.7 and allow dual nationals of another country, and Australia or the United Kingdom, to transfer classified defense articles provided the listed criteria, as described in § 126.18(e), are met.

• Lastly, the Department is proposing to revise § 126.15 per the provisions of section 1344 of the NDAA for Fiscal Year 2024. This revised text would note the review of license applications for exports of certain commercial, advanced-technology defense articles and defense services to or between the physical territories of Australia, the United Kingdom, or Canada, and are with government or corporate entities from such countries, shall be processed within certain timeframes. The subject export must not be eligible for transfer under an ITAR exemption. License requests related to a government-to-government agreement between Australia, the United Kingdom, or Canada and the United States must be approved, returned, or denied within 30 days of submission. For all other license applications subject to this section, any review shall be completed no later than 45 calendar days after the date of the application. The Department notes that the existing language in § 126.15 paragraphs (a) and (b) are separate ITAR provisions implementing requirements that originated in the NDAA for Fiscal Year 2005.

The Department issues this proposed rulemaking noting that the AECA requires that an exemption must be immediately implemented when the Department certifies that Australia and/or the United Kingdom meet the requirements of section 38(l)(1)(A). The exemption contemplated by this proposed rule is designed to execute this requirement. This proposed rule is being published in order to solicit public comment on the clarity and utility of such an exemption, and related proposed changes, including the list of excluded defense articles and defense services found at the proposed Supplement No. 2 to Part 126.

Finally, the Department notes the changes to § 126.15 of this proposed rule may be implemented by a separate final rule, based on timing and statutory constraints.

Regulatory Analysis and Notices

Administrative Procedure Act

This rulemaking is exempt from the notice-and-comment rulemaking requirements of the Administrative Procedure Act (APA) pursuant to 5 U.S.C. 553(a)(1) as a military or foreign affairs function of the United States Government. Despite this exemption, the Department has elected to publish this proposed rule for public comment.

Regulatory Flexibility Act

Since this rule is exempt from the notice-and-comment provisions of 5 U.S.C. 553 as a military or foreign affairs function, the rule does not require analysis under the Regulatory Flexibility Act.

Unfunded Mandates Reform Act of 1995

This rulemaking does not involve a mandate that will result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any year and it will not significantly or uniquely affect small governments. Therefore, no actions are deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Executive Orders 12372 and 13132

This rulemaking will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132, it is determined that this proposed amendment does not have sufficient federalism implications to require consultations or warrant the preparation of a federalism summary impact statement. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities do not apply to this rulemaking.

Executive Orders 12866, 14094 and 13563

Executive Order 12866, as amended by Executive Order 14094, and Executive Order 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributed impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Because the scope of this rule does not impose additional regulatory requirements or obligations, the Department believes costs associated with this rule will be minimal. Regarding the proposed exemption, Australia and the United Kingdom, as set forth in the Section 655 reports required annually by the Foreign Assistance Act of 1961, as amended, are ordinarily among the most commonly-licensed destinations for transfers subject to the ITAR. The Department expects that fewer license applications will be submitted as a result of this rule for authorized users that meet the criteria of the exemption, for eligible transfers of defense articles and defense services to and between Australia, the United Kingdom, and the United States. Consequently, this exemption will relieve licensing burdens for some exporters. Regarding the expedited licensing review process when an ITAR exemption is not available for use, the Department expects minimal costs associated with this provision for the public, with the benefit of license applications involving Australia, the United Kingdom, or Canada being subject to faster adjudication. The Department is seeking public comment on its assessment of the costs and benefits of this proposed rule. This rule has been designated as a significant regulatory action by the Office and Information and Regulatory Affairs under Executive Order 12866.

Executive Order 12988

The Department of State has reviewed this rulemaking in light of Executive Order 12988 to eliminate ambiguity, minimize litigation, establish clear legal standards, and reduce burden.

Executive Order 13175

The Department of State has determined that this rulemaking will not have tribal implications, will not impose substantial direct compliance costs on Indian tribal governments, and will not preempt tribal law. Accordingly, Executive Order 13175 does not apply to this rulemaking.

Paperwork Reduction Act

This rulemaking does not impose or revise any information collections subject to 44 U.S.C. Chapter 35.

List of Subjects in 22 CFR Part 126

Arms and munitions, Exports.

For the reasons set forth above, title 22, chapter I, subchapter M, part 126 is proposed to be amended as follows:

PART 126—GENERAL POLICIES AND PROVISIONS

■ 1. The authority citation for part 126 is revised to read as follows:

Authority: 22 U.S.C. 287c, 2651a, 2752, 2753, 2776, 2778, 2779, 2779a, 2780, 2791, 2797; Sec. 1225, Pub. L. 108–375, 118 Stat. 2091; Sec. 7045, Pub. L. 112–74, 125 Stat. 1232; Sec. 1250A, Pub. L 116–92, 133 Stat. 1665; Sec. 205, Pub. L. 116–94, 133 Stat. 3052; Secs. 1343 and 1344, Pub. L. 118–31, 137 Stat. 510; E.O. 13637, 78 FR 16129, 3 CFR, 2013 Comp., p. 223.

■ 2. Add § 126.7 to read as follows:

§ 126.7 Exemption for defense trade and cooperation among Australia, the United Kingdom, and the United States.

(a) No license or other approval is required for the export, reexport, retransfer, or temporary import of defense articles, the performance of defense services, or engagement in brokering activities as described in part 129 of this subchapter, between or among authorized users of this exemption, subject to the requirements and limitations in paragraph (b) of this section.

(b) The exemption described in paragraph (a) of this section is subject to the following requirements and limitations:

(1) The transfer must be to or within the physical territory of Australia, the United Kingdom, or the United States;

(2) The transferor and recipient must be:

(i) U.S. persons registered with the Directorate of Defense Trade Controls (DDTC) and not debarred under § 127.7 of this subchapter; or

(ii) Authorized users identified through the DDTC website;

(3) The defense article or defense service is not identified in Supplement No. 2 to part 126 of this subchapter as ineligible for transfer under this exemption;

(4) The transferor shall maintain records of each transfer available to the Directorate of Defense Trade Controls upon request, including a description of the defense article or defense service; the name and address of the recipient and the end-user, and other available contact information (*e.g.,* telephone number and electronic mail address); the name of the natural person responsible for the transaction; the stated end use of the defense article or defense service; the date of the transaction; and the method of transfer;

(5) The value of the transfer does not exceed the amounts described in § 123.15 of this subchapter and does not involve the manufacturing abroad of significant military equipment as described in § 124.11 of this subchapter;

(6) The transfer is subject to meeting the requirements of this subchapter, to include §§ 120.15(d) and 120.16 of this subchapter, parts 122 and 123 of this subchapter (except insofar as exemption from licensing requirements is herein authorized) and § 126.1 of this subchapter, and the requirement to obtain non-transfer and use assurances for all significant military equipment;

(7) Transferors must comply with the requirements of ITAR § 123.9(b) of this subchapter; and

(8) For U.S. authorized users, transfers of classified defense articles and defense services must meet the requirements in 32 CFR part 117, National Industrial Security Program Operating Manual (NISPOM) and, for Restricted Data, the Atomic Energy Act of 1954, as amended. Australian authorized users must meet the requirements in the Defence Security Principles Framework (DSPF) Principle 16 and Control 16.1, Defence Industry Security Program, and United Kingdom authorized users must meet the requirements in the Government Functional Standards GovS 007: Security.

* * * * *

■ 3. In § 126.15, revise the section heading and add paragraphs (c) and (d) to read as follows:

§ 126.15 Expedited processing of license applications for the export of defense articles and defense services to Australia, the United Kingdom, or Canada.

* * * * *

(c) Any application submitted for authorization of the export of defense articles or defense services to Australia, the United Kingdom, or Canada, describing an export that cannot be undertaken under an exemption provided in this subchapter, will be expeditiously processed by the Department of State. The prospective export must occur wholly within, or between the physical territories of Australia, the United Kingdom, Canada, or the United States, and between governments or corporate entities from such countries.

(d) Any license application in paragraph (c) of this section to export defense articles and defense services related to a government-to-government agreement between Australia, the United Kingdom, or Canada and the United States must be approved, returned, or denied within 30 days of submission. For all other license applications, any review shall be completed no later than 45 calendar days after the date of the application. The provisions of this paragraph do not apply to any applications which require congressional certification.

■ 4. In § 126.18, add paragraph (e) to read as follows:

§ 126.18 Exemptions regarding intra-company, intra-organization, and intra-governmental transfers to employees who are dual nationals or third-country nationals.

* * * * *

(e) Notwithstanding any other provisions of this subchapter, no license is required for the transfer of classified defense articles to citizens of Australia or the United Kingdom who:

(1) Are dual nationals of another country;

(2) Are authorized users, or regular employees of an authorized user of the exemption in § 126.7;

(3) Hold a security clearance approved by Australia, the United Kingdom, or the United States that is equivalent to the classification level of SECRET or above in the United States; and

(4) Are either:

(i) Within the physical territory of Australia, the United Kingdom, or the United States; or

(ii) A member of the armed forces of Australia, the United Kingdom, or the United States acting in their official capacity.

■ 5. Add Supplement No. 2 to Part 126 to read as follows:

Supplement No. 2 to Part 126—Excluded Technology List

Supplement No. 2 lists the defense articles and defense services excluded from the scope of the exemption provided at § 126.7 of this subchapter. USML entries in column 1 represent the location of the excluded defense articles and defense services within the USML and does not indicate the entire USML entry in column 1 is excluded; only the portions of those entries that are further described in column 2 are excluded.

USML entry	Exclusion
I through XV, and XX	Missile Technology Control Regime (MTCR) articles, as annotated on the USML by an ''MT'' designation; and directly related technical data and defense services.
I through XX	Readily identifiable anti-tamper articles, not already installed in the commodity they are intended to protect; and directly related technical data and defense services.
II(k), III(e), IV(i), VI(g), and XIX(g)	Source code, directly related to articles described in USML Categories II(a)(4), II(d), II(j)(12) or (16), III(d)(1) or (2), IV(a), (b), (c), or (g), VI(a) or (c), or XIX(e), beyond that required for build-to-print, design-to-specification, or basic operation, maintenance, or training, unless export is pursuant to a written solicitation or contract issued or awarded by the U.S. Department of Defense for a pre-determined end-use.
II(k), III(e), IV(i), X(e), and XIX(g)	Manufacturing know-how (see § 120.43(e)) directly related to: —articles described in USML Categories II(d), III(d)(1) or (2), IV(a), (b), (d), (g), or (h), X(a)(1) or (2), or XIX; or —parts, components, accessories, or attachments that are only used in those articles.
XI(d) and XII(f)	Classified manufacturing know-how directly related to: —articles described in USML Categories XI(a)(3) or (4), or XII(d); or —parts, components, accessories, or attachments that are only used in those articles.
II(j)(9) through (11), and (k)	Articles described in USML Category II(j)(9) through (11) that are not an element of an armament, weapon, or military platform; and directly related technical data and defense services.
III(a)(9) and (e); IV(a)(5) and (6), (b)(2), (c), (g), (h), and (i); VI(f)(6) and (g); VIII(h)(6) and (i); XI(c) and (d); XII(a), (d), (e), and (f); and XX(c) and (d).	Cluster munitions and articles specially designed for cluster munitions; and directly related technical data and defense services.
IV(a)(3), (9), (10), and (11), (b)(2), (h)(5), and (i).	Articles described in USML Category IV(a)(3), (9), (10), or (11), (b)(2), or (h)(5); and directly related technical data and defense services.
V(a)(13)(iii) and (iv), (a)(23)(iii), (d)(3), (i), and (j).	Articles described in USML Category V(a)(13)(iii) or (iv), (a)(23)(iii), or (d)(3); articles, other than propellants, described in USML Category V(i); and directly related technical data and defense services.
VI(e), (f)(5), and (g); and XX(b)(1), (c), and (d).	Articles described in USML Category VI(e) or (f)(5), or XX(b)(1); articles specially designed for articles described in USML Category XX(b)(1); and directly related technical data and defense services.
VIII(a)(2), (h)(1), and (i)	The F–22 aircraft and articles specially designed for the F-22, other than those also used in aircraft other than the F–22; and directly related technical data and defense services.
X(a)(7)(ii), (d)(2) and (3), and (e)	Articles described in USML Category X(a)(7)(ii); articles specially designed therefor; and directly related technical data and defense services.
XI(a) through (d); and XIII(b) and (l)	Classified countermeasures and counter-countermeasures described in USML Category XI(a) and specially designed parts, components, accessories, and attachments therefor, other than underwater acoustic decoy countermeasures. Classified articles described in USML Category XI(b) or XIII(b). Articles specially designed for commodities or software described in USML Category XIII(b). Classified articles described in USML Category XI(c) directly related to cryptographic systems. Articles directly related to naval acoustic spectrum control and awareness described in USML Category XI(a)(1)(i) and (ii) and (c) and directly related technical data and defense services.
XII(d)(3) and (f)	Classified articles described in USML Category XII(d)(3) and directly related technical data and defense services; and source code and classified technical data and defense services directly related to night vision commodities described in USML Category XII(c)(1) or (2), or (e), beyond basic operations, maintenance, and training information.
XIII(d)(2) and (l)	Articles described in USML Category XIII(d)(2); and directly related technical data and defense services.
XIV(a), (b), (c)(5), (f)(1), (i), and (m)	Articles described in USML Category XIV(a), (b), (c)(5), (f)(1), or (i); and directly related technical data and defense services.
XV(a), (e), and (f)	Classified articles described in USML Category XV(a) or (e); and directly related classified technical data and defense services.
XVI	Articles described in USML Category XVI; and directly related technical data and defense services.
XVIII	Classified articles described in USML Category XVIII specially designed for counter-space operations; and directly related classified technical data and defense services.
XIX(e), (f)(1) and (2), and (g)	Classified articles described in USML Category XIX(e), (f)(1), or (f)(2), not already integrated into a complete engine; and directly related technical data and defense services.
XX(b)(2), (c), and (d)	Articles described in USML Category XX(b)(2); articles specially designed therefor; and directly related technical data and defense services.
XX(d)	Manufacturing know-how (see § 120.43(e)) directly related to: —crewed vessels, or classified uncrewed vessels, described in USML Category XX(a); or —articles described in USML Category XX(b) or (c) that are: ○ used only in crewed vessels, ○ directly related to classified payloads, or ○ directly related to classified Uncrewed Underwater Vehicle (UUV) signature reduction techniques.
XXI	Commodities, software, technical data, and defense services, unless specifically designated as eligible for the AUKUS exemption in State's written Category XXI determination.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. FSIS–2022–0013]

Salmonella Not Ready-To-Eat Breaded Stuffed Chicken Products

AGENCY: Food Safety and Inspection Service (FSIS), U.S. Department of Agriculture (USDA).

ACTION: Final determination and response to comments.

SUMMARY: FSIS is announcing its final determination that not ready-to-eat (NRTE) breaded stuffed chicken products that contain *Salmonella* at levels of 1 Colony Forming Unit per gram (hereinafter, ''1 CFU/g'') or higher are adulterated within the meaning of the Poultry Products Inspection Act (PPIA). FSIS is also announcing that it intends to carry out verification procedures, including sampling and testing of the raw incoming chicken components used to produce NRTE breaded stuffed chicken products prior to stuffing and breading.

DATES: This final determination will be effective on May 1, 2025.

FOR FURTHER INFORMATION CONTACT: Rachel Edelstein, Assistant Administrator, Office of Policy and Program Development, FSIS, USDA; Telephone: (202) 205–0495.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Background

On April 28, 2023, FSIS published a proposed determination (88 FR 26249) in which the Agency tentatively declared that NRTE breaded stuffed chicken products contaminated with *Salmonella* at levels at or above 1 CFU/g present a significant public health concern. This proposed determination emphasized risks that are particular to these products, given their unique characteristics. Specifically, data from outbreak investigations, as well as consumer behavior research studies, show that common consumer preparation practices associated with these products may not destroy *Salmonella* that may be present in the product. Information from consumer behavior research discussed in the proposed determination (88 FR 26257) also shows that common consumer handling of NRTE breaded stuffed chicken products may contribute to cross-contamination. Further, the proposed determination noted that *Salmonella* has been associated with severe and debilitating human illness and available data suggest that the *Salmonella* infectious dose can be relatively low (88 FR 26261–26264). In addition, outbreak data cited in the proposed determination indicates that NRTE breaded stuffed chicken products have been consistently and disproportionately associated with *Salmonella* illness outbreaks over the years (88 FR 26252–26259). Based on the information discussed in the proposed determination, FSIS tentatively concluded that previous efforts to mitigate the public health concerns associated with these products, which primarily focused on product labeling and outreach to inform consumers that these products are raw and how to prepare them safely, have failed to adequately ensure that consumer preparation of NRTE breaded stuffed chicken products will result in a product that does not contain *Salmonella* at levels sufficient to cause a high risk of human illness when consumed. As such, FSIS tentatively determined that the appropriate response to protect public health is to ensure that NRTE breaded stuffed chicken products contaminated with *Salmonella* at levels more likely to cause human illness are excluded from commerce (88 FR 26264).

FSIS specifically proposed to declare that NRTE breaded stuffed chicken products contaminated with *Salmonella* at levels of 1 CFU/g or above as adulterated under the PPIA. As discussed in the proposal, FSIS tentatively concluded that when present in NRTE breaded stuffed chicken products, *Salmonella* at 1 CFU/g or higher meets the definition of an ''added substance'' that ''may render'' them injurious to health pursuant to 21 U.S.C. 453(g)(1) (88 FR 26260–26261). The proposal further explained that FSIS also believes that NRTE breaded stuffed chicken products that contain *Salmonella* at 1 CFU/g or higher meets the more stringent ''ordinarily injurious'' standard under 21 U.S.C. 453(g)(1) (88 FR 26261). Moreover, the proposed determination tentatively concluded that such products are adulterated under 21 U.S.C. 453(g)(3) because their elevated risk of illness makes them ''. . . unsound, unhealthful, unwholesome, or otherwise unfit for human food'' (88 FR 26261).

After reviewing comments on the proposed determination, FSIS is finalizing the determination as proposed, with one exception. Based on public comments, FSIS has decided to modify the verification sampling location originally proposed to provide greater flexibility and reduce costs to industry. Specifically, instead of collecting samples after the establishment has completed all processes needed to prepare the chicken component to be stuffed and breaded to produce a final NRTE breaded stuffed chicken product, as was proposed, FSIS will collect verification samples on the raw incoming chicken components. FSIS is also clarifying that

establishments may incorporate raw chicken components sampled by FSIS into finished NRTE breaded stuffed chicken products so long as such products remain under the establishments' control pending test results. FSIS is also clarifying, as requested by commenters, that it does not intend to begin FSIS sampling and verification testing discussed in this determination until May 1, 2025. In addition, FSIS has considered the economic effects of this determination and has updated the final Cost Benefit Analysis (CBA) in response to public comments.

II. Summary of Comments and Reponses

FSIS received 3,386 comments on the proposed determination from individuals, a laboratory services business, an association representing the entire food industry, research institutes associated with the meat and frozen foods industries, a society of meat industry professionals, an animal welfare advocacy organization, trade associations representing the poultry products industry, members of the meat and poultry industry, and consumer advocacy organizations.

A summary of issues raised by commenters and the Agency's responses follows.

A. FSIS' Legal Authority and Adulteration Under the PPIA

Comment: A trade association representing the poultry industry asserted that FSIS does not have Congressional authorization to take the actions discussed in the proposed determination. Poultry products trade associations, members of the poultry products industry, a society of meat industry professionals, and an institute representing the interests of the meat industry asserted that FSIS' determination that *Salmonella* is an added substance in NRTE breaded stuffed chicken pursuant to 21 U.S.C. 453(g)(1) is inconsistent with legal precedent, which holds that a substance is only ''added'' if it is artificially introduced by a person.[1] A poultry products trade association and an institute representing the meat industry asserted that FSIS does not have a legal basis to declare that any level of *Salmonella* ordinarily renders NRTE breaded stuffed chicken injurious to health under 21 U.S.C. 453(g)(1), given the courts have previously determined that consumers prepare raw chicken in a manner that destroys *Salmonella.*[2]

On the other hand, consumer advocacy organizations agreed with the Agency's tentative conclusion that *Salmonella* is an added substance in NRTE breaded stuffed chicken and is thus subject to the ''may render injurious'' standard. The commenters also agreed with FSIS' tentative conclusion that NRTE breaded stuffed chicken products that contain *Salmonella* at 1 CFU/g or higher meet the more stringent ''ordinarily injurious'' standard, because ordinary consumer handling and preparation preserves levels in the end product that result in illness.

Response: The PPIA provides FSIS with the authority to regulate poultry to ensure that adulterated products do not enter commerce.[3] Furthermore, Congress, at 21 U.S.C. 453(g)(1), declared two standards for determining whether a product is adulterated. First, if a substance is an ''added substance'' the product is adulterated if the substance may render the product injurious to health. Second, if the substance is not added, the product is adulterated if the quantity of such substance in or on the product ordinarily renders it injurious to health.

As discussed in the proposed determination (88 FR 26250–26251), this is not the first time that FSIS has exercised its authority to designate a foodborne pathogen as an adulterant in a raw product. In September 1994, FSIS stated that it considered raw ground beef contaminated with *Escherichia coli* O157:H7 (*E. coli* O157:H7) to be adulterated within the meaning of an identical adulteration provision in the Federal Meat Inspection Act (FMIA; 21 U.S.C. 601(m)), and that the Agency was prepared to use the enforcement provisions of that statute to exclude adulterated product from commerce. At the same time, FSIS indicated that it would begin to sample raw ground beef at federally regulated establishments and in commerce.[4] Shortly after the 1994 decision, a group of supermarket and meat industry organizations filed suit in the U.S. District Court for the Western District of Texas to reverse FSIS' determination, arguing the Agency exceeded its statutory authority by declaring *E. coli* O157:H7 to be an adulterant under the FMIA. The court ruled in favor of FSIS.[5] The Agency then updated its policy in 1999, declaring *E. coli* O157:H7 to also be an adulterant of intact beef cuts that are to be further processed into nonintact raw products before being distributed for consumption. In 2011, FSIS declared that six additional Shiga Toxin-Producing *Escherichia coli* (STEC) serogroups (O26, O45, O103, O111, O121, and O145) are adulterants of raw non-intact beef products and raw intact beef components intended to be used in these products.[6]

FSIS is now taking similar action, declaring *Salmonella* to be an adulterant in NRTE breaded stuffed chicken when present at levels at or above 1 CFU/g. FSIS based this decision on the best available science and data using similar criteria as in its 1994, 1999, and 2011 STEC policymaking. This determination, like the STEC determinations, is within the scope of the Agency's statutory authority.

The adulteration definition in 21 U.S.C. 453(g)(1) includes two standards for determining whether a product is adulterated. Under 21 U.S.C. 453(g)(1), if a substance is an ''added substance'' the product is adulterated if the substance ''may render'' the product injurious to health. If the substance is not added, the product is adulterated ''if the quantity of such substance in or on'' the product ''ordinarily'' renders it injurious to health.

FSIS has determined that when present in NRTE breaded stuffed chicken products, *Salmonella* at 1 CFU per gram or higher meets the definition of an ''added substance'' that ''may render'' these products injurious to health. As discussed in the proposed determination (88 FR 26260–26261) and herein, (processing can add *Salmonella* to previously uncontaminated NRTE breaded stuffed chicken components and may increase the occurrence of *Salmonella* throughout the finished product overall. As such, some portion of *Salmonella* present in the NRTE

breaded stuffed chicken products has been introduced by humans.

While no court has addressed whether *Salmonella* in processed poultry products is an ''added substance'' under the PPIA, FSIS' determination that *Salmonella* at 1 CFU/g is an added substance in NRTE breaded stuffed chicken is consistent with the holding in *United States* v. *Anderson Seafoods* (622 F.2d 157 (1980)). The issue directly before the court in *U.S.* v. *Anderson Seafoods* was the meaning of the term ''added substance'' as used in an adulteration provision of the Federal Food, Drug, and Cosmetic Act (FFDCA), which, in relevant parts, is identical to the ''added substance'' provision in the PPIA.[7] [8] *U.S.* v. *Anderson Seafoods* involved hazardous levels of mercury in swordfish. Specifically, the issue before the court was whether all mercury in the fish should be considered an ''added substance'' under the adulteration provisions of the FFDCA and thus subject to the ''may render injurious standard'' when some mercury in swordfish occurs naturally and some is the result of man-made pollution. After considering the legislative history and relevant case law, the court found that the term ''added,'' as used in the FFDCA, means ''artificially introduced, or attributable in some degree to the acts of man.'' [9] The court also held that the ''may render it injurious to health'' standard applies to the food, not to the added substance and, therefore, ''where some portion of a toxin present in a food has been introduced by [humans], the entirety of that substance present in the food will be treated as an added substance.'' [10]

As discussed in the proposed determination (88 FR 26260–26261) and herein, processing can add *Salmonella* to previously uncontaminated NRTE breaded stuffed chicken components and may increase the occurrence of *Salmonella* throughout the finished product overall. As such, some portion of *Salmonella* present in the NRTE breaded stuffed chicken products has been introduced by man and, in accordance with the holding in *Anderson Seafoods,* all *Salmonella* in this product should be treated as an ''added substance'' and may be regulated under the PPIA's ''may render injurious'' standard.

In addition, FSIS' believes that *Salmonella* at 1 CFU/g in NRTE breaded stuffed chicken meets the more stringent ''ordinarily injurious to health'' standard for substances that are not added, satisfying the definition of ''adulterated'' under 21 U.S.C. 453(g)(1). This determination also does not conflict with legal precedent. The Agency recognizes that, historically, most foodborne pathogens, including *Salmonella,* have not been considered adulterants of raw and other NRTE meat and poultry based on the assumption that ordinary cooking is generally sufficient to destroy the pathogens.

However, NRTE breaded stuffed chicken products are NRTE multi-ingredient, further processed products that often contain multiple raw poultry source materials and are heat treated in a manner that typically imparts an RTE appearance. As noted in the proposed determination (88 FR 26249), consumer research, together with information gathered during outbreak investigations, clearly show that, because of these unique product characteristics, which make these products particularly risky, consumers often do not prepare these products properly, even when the products display adequate cooking instructions and statements on the label. FSIS is not aware of any court that has analyzed the status of *Salmonella* as an adulterant in NRTE breaded stuffed chicken products, giving due weight to the products' unique characteristics, consumer behaviors, public health risks associated with these products, or the most recent science and data concerning *Salmonella* in NRTE breaded stuffed chicken products.

Comment: A group of consumer advocacy organizations agreed with FSIS' position and reasoning in the proposed determination that *Salmonella* is an added substance pursuant to 21 U.S.C. 453(g)(1) in NRTE breaded stuffed chicken products. However, poultry products trade associations, members of the poultry products industry, a society of meat industry professionals, and an institute representing the interests of the meat industry disagreed with FSIS' determination, arguing that *Salmonella* exists naturally in chicken, and provided studies that they assert show that *Salmonella* exists naturally in muscle tissue.[11] [12] [13] [14] These commenters also stated that FSIS did not adequately support its view that cross-contamination during further processing is responsible for the presence of *Salmonella* in chicken components used to create NRTE breaded stuffed chicken products.

Response: In the proposed determination, FSIS specifically evaluated whether *Salmonella* should be considered an added substance in NRTE breaded stuffed chicken (88 FR 26260–26261). Although FSIS agrees with the commenters that *Salmonella* naturally exists in certain parts of poultry before processing, such as the skin, livers, feather follicles, and bones, the Agency noted that *Salmonella* is not ordinarily found in the muscle tissue of healthy birds. NRTE breaded stuffed chicken products contain raw, comminuted chicken breast meat, trim, or whole chicken breast meat (*i.e.,* further processed chicken parts or comminuted chicken). FSIS sampling data has shown that further processed chicken parts (legs, breasts, and wings) and comminuted chicken have a higher occurrence of *Salmonella* positive results compared to carcasses.[15] [16]

As FSIS noted in the proposed determination (88 FR 26260), these sampling data indicate that, during processing, *Salmonella* that is regularly present in certain parts of the bird is added to the interior of edible poultry muscle tissue, where *Salmonella* is not ordinarily found. The proposed

[7] The definition in the FFDCA provides that ''A food shall be deemed to be adulterated (a)(1) if it bears or contains any poisonous or deleterious substance which may render it injurious to health; but in case the substance is not an added substance such food shall not be considered adulterated under this clause if the quantity of such substance in such food does not ordinarily render it injurious to health'' (21 U.S.C. s 342(a)(1)).

[8] While the PPIA defines the circumstances in which a poultry product may be adulterated, FSIS has referred to the FFDCA as a substantially similar statute to further elucidate the meaning that terms are given in a similar provision. See, *e.g.,* FSIS final response to petition #12–02, Petition to Require Labeling of All Ritually Slaughtered Meat and Poultry (Jan 1, 2012) p. 2. determination cited several instances of how such cross-contamination could occur (88 FR 62260). For one, when poultry is cut, *Salmonella* in the skin and feather follicles can be exposed and spread during processing to previously uncontaminated product. [17] [18] [19] Additionally, many NRTE breaded stuffed chicken products are made with comminuted chicken. Because of the nature of comminution, *Salmonella* contamination in chicken skin and bone can spread throughout an entire batch or lot through cross-contamination. FSIS sampling data show that ground and other raw comminuted chicken products that were produced using either bone-in or skin-on source materials were more likely to be contaminated with *Salmonella* than those fabricated from deboned, skinless source materials.[20] In addition, *Salmonella*-negative raw poultry parts and comminuted poultry may become cross-contaminated by contact with *Salmonella*-contaminated equipment or when they are commingled with *Salmonella*-positive products, such as when they are collected in combo bins for further processing.[21] [22] *Salmonella*-contaminated equipment used to incorporate the stuffed ingredients into the chicken component of NRTE breaded stuffed chicken products may also contribute to *Salmonella* contamination in these products. For these reasons, FSIS considers *Salmonella* an added substance in NRTE breaded and stuffed chicken products. It is important to note that the determination that *Salmonella* is an added substance in NRTE breaded and stuffed chicken products is based on the circumstances under which these particular products are fabricated and processed and that FSIS has not made a determination about whether *Salmonella* is an added substance in any other raw poultry products. FSIS will address the status of *Salmonella* in other raw poultry products in a subsequent rulemaking proceeding after considering the comments received in that proceeding.

Industry commenters provided a study in which researchers tested poultry muscle tissue for the presence of *Salmonella*.[23] However, the study was not sensitive enough to draw the conclusion that *Salmonella* at 1 CFU/g or higher is ordinarily present in such tissue. In the study, 1-day old chicks were deliberately inoculated with highly pathogenic *Salmonella* before development of healthy gut microflora. Thus, the initial load of *Salmonella* in the tested birds was not necessarily representative of the pathogen levels ordinarily present in farm-raised poultry.[24] Moreover, the study had a very small sample size and, in the end, only one out of five muscle tissue samples collected from 42-day old birds were positive for the *Salmonella* serotypes tested.[25] Thus, this study does not serve as demonstrable evidence that *Salmonella* is ordinarily present in the muscle tissue of farm-raised poultry. In fact, the study concluded that the high prevalence of *Salmonella* in the skin of infected poultry significantly contributes to contamination of ground chicken and turkey and suggested that the exclusion of skin as a component of ground poultry may be the best option for reducing *Salmonella* contamination in ground poultry products. This finding, therefore, supports FSIS' position that, amongst other things, *Salmonella* contaminated chicken skin substantively contributes to the spread of the pathogen in NRTE breaded stuffed chicken products, including to components that do not ordinarily contain *Salmonella.*

Industry also cites three other papers they say show that *Salmonella* prevalence is the same in skin-on and skin-off chicken.[26] [27] [28] The commenters assert these studies prove that *Salmonella* naturally occurs in poultry muscle tissue. However, these papers show variable results for *Salmonella* detection in skin-off versus skin-on chicken.[22–24] Two studies, Cook 2012 and Pointon 2008, showed similar rates of *Salmonella* between the skin-on and skin-off parts using a rinse sampling method. In contrast, the third study, Guran 2017, showed *Salmonella* presence in skin-on chicken parts was significantly higher than in the skin-off parts with 44.7% vs 12.3% positive for chicken breast and 40.9% vs 22.8% positive for chicken thighs when samples were mixed by stomaching.[23] The variable results from the studies discussed could be due to methodology differences. Researchers have noted that rinse sampling methods may not recover *Salmonella* that are firmly attached to the skin or trapped within skin folds and feather follicles, while vigorous mixing using a stomacher may release attached *Salmonella* therefore increasing detection.[29] [30] A study by Wu 2014 supports this, showing rinsed skin samples recovered significantly less *Salmonella* than skin that was stomached (2.3 vs. 20.7%).[31]

At an industry level, poultry skin is a known source of *Salmonella* contamination due to bacteria being trapped in the skin folds and feather follicles.[32] These areas may not be accessible until they are disturbed

during cutting or grinding. When this processing exposes and releases the pathogen, it can spread, resulting in higher contamination levels in the product. FSIS sampling data clearly indicates *Salmonella* poultry rates rise as poultry is further processed, from chicken carcasses at 4.14% to legs, breasts, wings at 7.62% to comminuted at 24.2%.[33] This is a pattern FSIS has observed yearly and based on more than 25,000 samples analyzed in FY2022 alone.[34]

Comment: A few commenters, including trade associations representing the poultry products and frozen foods industries, asserted that the evidence cited in the proposed determination does not indicate that NRTE breaded stuffed chicken products contaminated with *Salmonella* are ordinarily injurious to health. First, they argued that the outbreak data cited does not indicate that the products have harmed a substantial amount of people. They also argued that outbreak investigations do not indicate that consumers ordinarily prepare NRTE breaded stuffed chicken in a manner that renders them unsafe to eat.

Response: NRTE breaded stuffed chicken products pose a substantive risk to public health. The data available show that NRTE breaded stuffed chicken products are inherently risky, given their unique characteristics, and have a disparate impact on public health. Specifically, as noted above and in the proposed determination (88 FR 26252), an analysis of all chicken associated outbreaks identified in the Centers for Disease Control and Prevention's (CDC) National Outbreak Reporting System (NORS) [35] or in the scientific literature from 1998–2020 found that, during this time, NRTE breaded stuffed chicken products accounted for less than 0.15 percent of the total domestic chicken supply yet represented approximately five percent of all chicken-associated *Salmonella* outbreaks in the United States. Specifically, although NRTE breaded stuffed chicken products make up a very small percentage of the total domestic supply of chicken, they have been associated with 14 *Salmonella* outbreaks between 1998 and 2021, resulting in 195 reported illnesses and 41 reported hospitalizations (88 FR 26258–26259). The actual number of cases is likely higher than the number of reported cases.[36]

As discussed in the proposed determination (88 FR 26263), *Salmonella* can cause bloody diarrhea, fever, abdominal cramps, nausea, and vomiting. In some instances, *Salmonella* enters the blood and makes its way to other areas of the body including, but not limited to, the heart, lung, bone, joints, and the central nervous system.[37] This can result in severe illness requiring hospitalizations and even death, especially in vulnerable populations, such as very young, elderly, and immunocompromised individuals. Even when *Salmonella* is no longer detectable in the body, prior Salmonella illness has also been associated with an increased risk in colon cancer and can cause debilitating, long-lasting conditions including inflammatory bowel disease, irritable bowel syndrome and reactive arthritis.[38]

Comment: A few poultry products trade associations stated that the proposed determination did not explain or support why *Salmonella,* particularly at 1 CFU/g, would render a NRTE breaded stuffed chicken product adulterated under 21 U.S.C. 453(g)(3).

Response: Under 21 U.S.C. 601(m)(3) of the FMIA and 21 U.S.C. 453(g)(3) of the PPIA, a meat or poultry product is adulterated ''if it consists in whole or in part of any filthy, putrid, or decomposed substance or is for any other reason unsound, unhealthful, unwholesome, or otherwise unfit for human food.'' Historically, FSIS has interpreted the phrase ''is for any other reason unsound, unhealthful, unwholesome, or otherwise unfit for human food'' as providing a separate basis for adulteration than consists of ''any filthy, putrid, or decomposed substance.'' Thus, meat or poultry products that FSIS has determined are ''otherwise unfit for human food'' within the meaning of 21 U.S.C. 601(m)(3) and 21 U.S.C. 453(g)(3) do not also need to consist ''in whole or in part of any filthy, putrid, or decomposed substance.'' For example, when raw meat or poultry products are associated with an illness outbreak but contain pathogens that are not considered adulterants in raw products, FSIS has found products linked to the illness outbreak to be adulterated under 21 U.S.C. 601(m)(3) or 21 U.S.C. 453(g)(3) because they are ''unsound, unhealthful, unwholesome or otherwise unfit for human food'' (77 FR 72689). FSIS has also determined that certain materials from cattle as well as the carcasses of non-ambulatory disabled cattle are adulterated because they present a sufficient risk of exposing humans to the bovine spongiform encephalopathy agent such as to render them ''unfit for human food'' under 21 U.S.C. 601(m)(3) (69 FR 1862).

As discussed in the proposal (88 FR 26261), FSIS evaluated the available information on *Salmonella* associated with human illnesses, the *Salmonella* infectious dose, the severity of human illnesses caused by *Salmonella,* and consumer preparation practices associated with NRTE breaded stuffed chicken product as documented in outbreak investigations associated with these products and consumer behavior research studies. Based on this evaluation, FSIS concluded that NRTE breaded stuffed chicken products contaminated with *Salmonella* at levels of 1 CFU/g present a sufficiently serious risk of causing *Salmonella* illness. Thus, as discussed in the proposed rule, FSIS has determined that such products are adulterated as defined in 21 U.S.C. 453(g)(3) because their elevated risk of illness makes them ''unhealthful, unwholesome, or otherwise unfit for human food'' (82 FR 26261).

B. Need for the Proposed Action

Comment: Many commenters, including an animal welfare organization, two consumer advocacy groups, and several individuals, stated FSIS' proposed action is necessary to assure NRTE breaded stuffed chicken products are safe to eat. However, a few poultry products trade associations and an institute representing the meat industry asserted that the proposed determination is not necessary to protect public health. These commenters specifically asserted the rate of salmonellosis associated with all chicken products has decreased over the past ten years. They also stated that public health efforts by the industry and FSIS have already made NRTE breaded stuffed chicken products safe to eat.

Response: As discussed throughout the proposed determination (88 FR

[38] Mughini-Gras, L. et al. Increased colon cancer risk after severe Salmonella infection. PLoS ONE, 2018. 13(1): p. 1–19. *https://doi.org/10.1371/journal.pone.0189721.*

26249), FSIS is specifically targeting *Salmonella* in NRTE breaded stuffed chicken products because their unique characteristics make them particularly risky, and they pose a disparate impact on consumers' health. There have been 14 recorded outbreaks associated with the consumption of NRTE breaded stuffed chicken products since 1998, with the latest outbreak occurring as recently as 2021. *Salmonella* outbreaks have been disproportionately associated with NRTE breaded stuffed chicken products. Specifically, an analysis of all chicken associated outbreaks identified in the CDC's NORS [39] and in the scientific literature from 1998–2020 found that, during this time, NRTE breaded stuffed chicken products accounted for less than 0.15 percent of the total domestic chicken supply yet represented approximately five percent of all chicken-associated outbreaks in the United States (88 FR 26252). Outbreaks associated with these products have continued to occur regularly despite updated labeling instructions, outreach, and other industry and Agency efforts to make the products safer and ensure consumers are aware of how to prepare them (88 FR 26259–26260). Moreover, data from outbreak investigations and consumer research discussed in the proposed determination show that many consumers continue to cook NRTE breaded stuffed chicken products in a manner that does not adequately destroy *Salmonella* in these products (88 FR 26252–26260).

C. Definition of NRTE Breaded Stuffed Chicken Products

Comment: Trade associations and institutes representing the meat and poultry foods industries asked FSIS to clarify what products are subject to this final determination and noted that it should not apply to frozen NRTE products that are not breaded or stuffed, or that appear raw. A trade association representing the poultry products industry specifically asserted that the determination should not include NRTE breaded stuffed chicken products intended for use by hotel, restaurant, or institutional consumers.

Response: As discussed in the proposed determination (88 FR 26252), FSIS specifically defines NRTE breaded stuffed chicken products as those NRTE products that are both breaded *and* stuffed, contain raw chicken components (*e.g.,* comminuted chicken breast meat, trim, or whole chicken breast meat), and where the finished product is heat-treated only to set the batter or breading on the exterior of the product, which may impart an RTE appearance. Only products that specifically meet this definition are subject to the 1 CFU/g or higher adulteration standard discussed in this final determination. As discussed in the proposed determination (88 FR 26266—26267) and herein, FSIS will also conduct verification sampling in federally regulated establishments that produce such products. Thus, this final determination does not apply to RTE products (*e.g.,* fully cooked RTE chicken cordon bleu). In addition, NRTE products that are stuffed and breaded, but are not ''par-fried,'' ''pre-browned,'' or otherwise heat treated to only set the batter or breading, are not subject to this final determination.[40] This final determination also does not apply to NRTE stuffed products that are not breaded, such as turducken or whole stuffed chickens—nor to NRTE breaded products that are not stuffed, such as chicken nuggets. Under this determination, NRTE breaded stuffed chicken that contain *Salmonella* at or above 1 CFU/g will be considered adulterated even if intended for hotel, restaurant, or institutional use because, regardless of intended use, NRTE breaded stuffed chicken products have characteristics that can make effective cooking of these products more challenging, *i.e.,* they may appear fully cooked, are typically cooked from a frozen state, and are thicker in diameter and have a different composition than other par-fried breaded products (82 FR 26252).

D. Food Emergency Response Network Survey

Comment: A few poultry product trade associations asserted that they did not have the time or information necessary to respond to the Food Emergency Response Network (FERN) Survey.[41] Specifically, these commenters argued that the Agency published the FERN Survey during the proposed determination's comment period, leaving inadequate time for analysis and comment. They also asserted that FSIS never explained why this survey was relevant or how it supported the proposed determination.

A few poultry product trade associations and an institute representing the meat industry also raised some specific issues with the FERN Survey. First, they noted that it did not utilize the laboratory or sampling methods discussed in the proposed determination. Second, these commenters stated that the samples were not weighted to reflect relative production volume, they were not geographically dispersed, and that no statistical analysis was performed on the base results. The commenters also stated that the study lacked statistical power, given minimal samples were collected over a short period of time.

Response: FSIS disagrees with the assertion that the Agency never explained why the FERN Survey was relevant or how it was used to inform the proposed determination. The proposed determination discussed the FERN Survey report in detail (88 FR 26265–26266). FSIS gave the public adequate time and information to respond to the FERN Survey report. After release of the FERN Survey report, FSIS extended the proposed determination's comment period to August 11, 2023, to give the public more time to review the materials and formulate comments. Furthermore, the survey's methodology and results—as well as FSIS' analysis—were discussed in detail in the proposed determination (88 FR 26265–26266), which published 105 days prior to the close of the comment period.[42] [43]

In regard to the specific issues with the FERN Survey raised by commenters, the FERN Survey report made clear that the data were derived from convenient sampling of eligible products available to the participating laboratories and that FSIS made no claims about the statistical significance of any differences observed [44] or about how this survey supports FSIS enumeration methodology. Indeed, FSIS explained that the survey was intended to collect information on the positive rate of *Salmonella* in NRTE breaded stuffed chicken purchased at retail and differences in testing strategies, which were intended to help inform the FSIS verification sampling plan resulting from this determination. The FERN Survey results indicate that the current FSIS testing methods are acceptable for these products because the FERN labs

[39] CDC National Outbreak Reporting System available at: *https://www.cdc.gov/nors/index.html.*

[40] For example, if a meat counter at a retail store were to stuff a chicken breast with cheese and roll it in breadcrumbs, but not heat treat the product to set the breading, the product would not be subject to this determination.

[42] FSIS Constituent Update—June 23, 2023. Available at: *https://www.fsis.usda.gov/news-events/news-press-releases/constituent-update-june-23-2023.*

[43] FSIS, *Survey of Not Ready-to-Eat Breaded and Stuffed Chicken Products for Salmonella,* Docket ID No FSIS–2022–0013–0015 (June 2023).

[44] Survey of Not Ready-to-Eat Breaded and Stuffed Chicken Products for *Salmonella* (*usda.gov*).

tested samples using the validated methods. The survey was also conducted to help inform the FSIS sampling and verification testing resulting from this determination.

As explained in the proposed determination (88 FR 26265), the FERN Survey gathered data at retail to provide information about the *Salmonella*-positive rate of NRTE breaded stuffed chicken products. In the proposal, FSIS noted that when using FSIS methods and a larger test portion, the survey found that the 27 percent positive rate for *Salmonella* in NRTE breaded stuffed chicken products detected in retail samples is comparable to the 29 percent positive rate detected in FSIS sampling of comminuted chicken.[45] The Agency also noted that these rates are higher than the *Salmonella*-positive rates for other raw chicken products, which suggests that NRTE breaded stuffed chicken products and comminuted chicken have a higher risk than other raw chicken. However, as noted in the proposal, consumer preparation practices are more likely to mitigate the risk associated with comminuted or ground chicken because, unlike NRTE breaded stuffed chicken products, ground chicken clearly appears raw and is not typically cooked from a frozen state (88 FR 26265).

E. Outbreak Data

Comment: A poultry products trade association argued that FSIS placed too much emphasis on the duration of outbreaks associated with NRTE breaded stuffed chicken products to support its decision, noting that the length of an outbreak is not necessarily related to its severity. It also asserted that statements gathered during outbreak investigations are anecdotal and, thus, not adequate to support FSIS' conclusion that consumers do not safely prepare NRTE breaded stuffed chicken products. Moreover, the commenter noted that most of the outbreak investigations FSIS discussed were associated with outdated product labeling and used antiquated investigational methods.

Response: The outbreak data—together with the other evidence discussed in the proposed determination (88 FR 26249)—supports the conclusion that NRTE breaded stuffed chicken products are disproportionately associated with *Salmonella* illnesses compared to other raw poultry products and that, despite industry and Agency efforts, consumers continue to prepare such products in a manner that does render them safe to eat. The outbreak investigation findings discussed in the proposed determination (88 FR 26252–26259) were not based on anecdotal evidence or antiquated investigational methods. The findings were based on exposure and food-history information gathered and analyzed by local, state, and Federal health partners, including the CDC. These investigations used accepted investigational practices at the time of the outbreak.

Although FSIS mentioned the length of such outbreaks in the proposed determination, the Agency judges the severity of such outbreaks on their overall public health impact, not the length of the outbreaks. As noted in the proposed determination, despite making up a very small percentage of the total domestic supply of chicken (88 FR 26252), NRTE breaded stuffed chicken products were associated with 14 *Salmonella* outbreaks between 1998 and 2021, resulting in 195 reported illnesses and 41 hospitalizations (88 FR 26258–26259).

F. Salmonella Framework

Comment: A poultry establishment and a poultry products trade association noted that FSIS has not finished its *Salmonella* Framework, which contemplates reviewing FSIS' comprehensive approach to *Salmonella* and that, considering this ongoing effort, it is premature to set specific standards for NRTE breaded stuffed chicken at this time. The commenters stated that pursuing a separate policy for NRTE breaded stuffed chicken products risks creating inconsistencies or redundant policies.

Response: The Agency is confident it can address the persistent *Salmonella* outbreaks caused by NRTE breaded stuffed chicken products, as stated in this notice, and also propose to address illness associated from *Salmonella* in raw poultry generally in a future proposed rule. This will not lead to inconsistent or redundant policies. FSIS develops food safety requirements based on pathogens, consumption data, and other food safety factors, which can vary depending on the product.

For the reasons discussed in the proposed determination, FSIS believes that NRTE breaded stuffed chicken products pose different exposure risks to consumers than other types of raw poultry products and are more likely to result in *Salmonella* outbreaks than other products; therefore, FSIS has determined to hold NRTE breaded stuffed chicken products to a more stringent *Salmonella* adulteration standard than for other raw poultry products. FSIS is not delaying its efforts concerning this product. Consistent with this final determination, as the Agency develops the proposed *Salmonella* Framework,[46] it will consider measures that will be most effective in addressing the public health risks associated with *other* raw poultry products.

G. Wait for Additional Information

Comment: Poultry products trade associations, a poultry products establishment, and a society of meat industry professionals noted that FSIS needs to gather more information about *Salmonella* in NRTE breaded stuffed chicken products before finalizing this determination. Specifically, they stated that FSIS needs to gather more data on the frequency that products currently exceed the 1 CFU/g threshold, whether enforcing the 1 CFU/g standard would be feasible, and what impact the proposed determination would have on public health. The commenters further stated that FSIS needs more insight into which serotypes are most prevalent in these products, as well as better information regarding infectious dose and host susceptibility. The commenters said that FSIS should build a comprehensive microbiological baseline before moving forward and use that information to conduct a risk assessment.

Response: FSIS has sufficient information to finalize this determination. As discussed in the proposed determination (88 FR 26249), available data from outbreak investigations and consumer behavior research show that NRTE breaded stuffed chicken products contaminated with *Salmonella* pose a significant public health risk. As noted in the proposal, these data show that common consumer preparation practices associated with NRTE breaded stuffed chicken products may not destroy organisms that may be present in the product and may also contribute to cross contamination (88 FR 26264). The proposal also described available data that show *Salmonella* has been associated with severe and debilitating human illnesses and that the *Salmonella* infectious dose is relatively low (88 FR 26264). Thus, because *Salmonella* can survive ordinary handling and cooking practices for NRTE breaded stuffed chicken products,

[45] USDA Food Safety and Inspection Service Annual Sampling Report Fiscal Year 2021: *https://www.fsis.usda.gov/sites/default/files/media_file/2022-02/FY2021-Sampling-Summary-Report.pdf.*

[46] FSIS, Proposed Regulatory Framework to Reduce *Salmonella* Illnesses Attributable to Poultry, available *https://www.fsis.usda.gov/inspection/inspection-programs/inspection-poultry-products/reducing-salmonella-poultry/proposed.*

FSIS has determined that the appropriate response to protect public health is to ensure that products contaminated with *Salmonella* at levels more likely to cause human illness are excluded from commerce. As explained in the proposed determination, assuming a minimum of 0.5 log (68%) *Salmonella* reduction likely achieved with even partial cooking, considering a level of *Salmonella* at 1 CFU/g (assuming a typical 70–88 gram chicken component portion size) to adulterate product should significantly mitigate the risk of illness associated with NRTE breaded stuffed chicken products (88 FR 26263). Additionally, as discussed in the proposed determination, all *Salmonella* serotypes have the potential to cause illness, and the disparity in serotypes may be related to factors other than serotype-specific differences in human virulence. Thus, given the unique public health risk associated with NRTE breaded stuffed chicken products, FSIS has determined that any *Salmonella* at levels of 1 CFU/g or higher is an adulterant in these products. FSIS will continue to evaluate and, if necessary, refine its policies and standards related to the oversight of NRTE breaded stuffed chicken products as advances in science and technology related to pathogen levels, serotypes, and infectious dose become available.

FSIS typically performs baseline studies to estimate the national prevalence of bacteria of public health concern in situations where a large number of establishments produce a product and uniform verification sampling is performed. Here, a baseline study isn't warranted for NRTE bread stuffed chicken products because there are currently only six federally regulated establishments producing such products. Due to the public health risk posed by the product type, which is supported by recurring *Salmonella* illness outbreaks, the Agency decided to move forward with the proposed determination.

H. Infectious Dose

Comment: Poultry products trade associations, a member of the poultry products industry, and a meat industry research institute asserted there were several deficiencies in the infectious dose data FSIS relied on to support its proposed determination that NRTE breaded stuffed chicken with 1 CFU/g *Salmonella* are adulterated. Specifically, the commenters stated that FSIS relied on a single dose-response study to support the 1 CFU/g proposed determination.[47] Moreover, commenters asserted that this study (hereinafter, ''Teunis 2010'') contained insufficient and outdated data. The commenters, therefore, provided an updated study by the same author for FSIS' consideration (hereinafter, ''Teunis 2022'').[48] The commenters also suggested that *Salmonella* serotypes used in Teunis 2010 were not representative of the serotypes that caused NRTE breaded stuffed chicken product outbreaks or are found in raw chicken.

Response: The Agency considered Teunis 2022 along with the evidence already cited on infectious dose in the proposed determination. However, upon review, FSIS does not conclude that the updated dose-response model in Teunis 2022, in consideration with the other evidence previously cited, warrants a change in the proposed adulterant threshold of 1 CFU/g of *Salmonella* in NRTE breaded stuffed chicken products.

FSIS' 1 CFU/g determination was not based on a single study. FSIS cited seven *Salmonella* outbreak papers in the proposed determination where the infectious dose was found to be very low, *i.e.,* 10 or fewer *Salmonella* organisms. FSIS cited an additional nine papers noted in the proposed determination that found an infectious dose between 11 and 420 organisms resulted in human illness. Finally, FSIS cited an additional dose-response paper written by the World Health Organization (WHO) that supports *Salmonella* illness can result, on average, from small doses.[49]

FSIS also did not rely on outdated data. Teunis 2022 specifically states the outbreak data analyzed in the study ''. . . are the same that were used in a previous analysis,'' *i.e.,* Teunis 2010. In fact, most of the data from the human challenge feeding trials [50] used in Teunis 2022 were published in 1951, about 70 years before the publication of Teunis 2022. These data are scientifically debated. In these trials, healthy volunteers were fed *Salmonella,* but none of the strains used in Teunis 2022 had been isolated from a person with salmonellosis.[51] Some of the volunteers had been vaccinated for *Salmonella* typhoid and paratyphoid. Blaser and Newman summarize the issues as follows, ''the ability to generalize about what happens in nature from the experimental data concerning the infective dose of salmonellae is limited by several factors, including choice of strains, repeated testing of the same subjects, failure to assess minimal infective doses, and use of too few volunteers at the lower dosages.'' FSIS also disagrees with the commenters' assertion that a transposition of an outbreak dose from 344 CFU to 3.44 CFU in Teunis 2010 was ''significant'' and, thus, evidence that FSIS' dose-response analysis was based on an outdated model. Teunis 2022 specifically states that ''It was checked that correction of the dose changed the estimates of *Salmonella* Enteritidis infectivity and pathogenicity only by a minute amount, putting to rest concerns that quantitative risk assessments might have been caused to use an incorrect model.'' [52]

The commenters also suggested that *Salmonella* serotypes used in Teunis 2010 are not representative of the serotypes that caused NRTE breaded stuffed chicken product outbreaks or are found in raw chicken. However, as stated in the proposed determination, all known NRTE breaded stuffed chicken product outbreaks have been Typhimurium, Heidelberg, I 4,[5],12:i:-, and Enteritidis. Teunis 2010 and Teunis 2022 used 48 outbreaks to estimate the *Salmonella* dose-response for all serotypes. Eighty-three percent of those outbreaks represent serotypes that have been associated with NRTE breaded stuffed chicken product outbreaks.

Lastly, as mentioned, the proposed determination cited an additional dose-response model, which was developed by the WHO Food and Agriculture Organization of the United Nations for risk assessments for *Salmonella* in eggs and broiler chickens.[53] Also using outbreaks, the model estimated a 13 percent chance of becoming ill if ingesting 100 organisms. Even at the level of 1 organism ingested, there was still a non-zero chance of illness (0.25%).

Comment: Industry members, poultry products trade associations, and a meat industry research institute said FSIS should establish a new adulteration threshold equal to or higher than 10 CFU/g for NRTE breaded stuffed chicken products. These commenters noted that the FERN Survey and FSIS data on NRTE breaded stuffed chicken products show that more than a quarter of all *Salmonella* positives were *Salmonella* Kentucky, which they claimed would not result in illness at 1 CFU/g.[54] A poultry products trade association also suggested FSIS based its adulteration threshold on the infectious dose for *Salmonella* Enteritidis, given it was the serotype most commonly associated with NRTE breaded stuffed chicken outbreaks documented in the proposed determination. Specifically, the trade association stated that FSIS should base its threshold on the median dose of *Salmonella* Enteritidis that is predicted to have a 50% probability of causing illness, which was reported as 3,360 CFU. The comment asserted that assuming that the average chicken component of an NRTE breaded stuffed chicken product is 70–88 grams as noted in the proposal, this provides a range of 38–48 CFU/g in NRTE breaded stuffed chicken products.

Response: FSIS is finalizing the 1 CFU/g threshold as described in the proposed determination because outbreaks associated with products have continued to occur regularly despite updated labeling instructions, outreach, and other industry and Agency efforts to make the products safer. FSIS is not establishing a higher adulteration threshold of 10 CFU/g or greater based on the dose at which 50% of individuals exposed to 3,360 CFU of *Salmonella* Enteritidis are predicted to become ill. Use of such a metric where half (50%) of individuals exposed could become ill is not acceptable for a public health regulatory program aimed at reducing the risk posed by NRTE breaded stuffed chicken products, which are habitually undercooked by consumers. *Salmonella* Enteritidis is not the only serotype of concern in NRTE breaded stuffed chicken product, nor it is representative of the infectious dose of all *Salmonella* serotypes. For example, Teunis 2022 states Infantis is predicted to have an $InfD_{50}$ of 0.7 CFU and $InfD_{01}$ 0.01 CFU. Infantis is also predicted to have an $IllD_{50}$ of 1 CFU and an $IllD_{01}$ of 0.07 CFU. All four measures of infection and illness would be below the proposed 1 CFU/g adulteration threshold. Using the $IllD_{01}$, Teunis 2022 supports the limit of 1 CFU/g for Enteritidis, Typhimurium, and Infantis.

FSIS is not only concerned about *Salmonella* Enteritidis and Infantis, but numerous serotypes that have been shown to be in NRTE breaded stuffed chicken product. As discussed below, FSIS determined numerous serotypes were of concern based on three data sources: (1) verification sampling of raw comminuted chicken (a major component of NRTE breaded stuffed chicken), (2) outbreak associated investigated sampling of NRTE breaded stuffed chicken products, and (3) the recent FERN survey of NRTE breaded stuffed chicken at retail.

First, using FSIS raw poultry sampling verification datasets for comminuted chicken from 2015 to CYQ3 2021,[55] FSIS serotyped 2,921 *Salmonella* positives and 58 unique serotypes. FSIS found the following five most frequent serotypes in the following rank order from most to least: Infantis, Enteritidis, Kentucky, Typhimurium, and Schwarzengrund. Since NRTE breaded stuffed chicken products can be made by grinding intact chicken, with trim and chicken skin, these comminuted verification data suggest these serotypes are found in NRTE breaded stuffed chicken products. The second data source was a 2015, FSIS investigative sampling of NRTE breaded stuffed chicken comminuted source components, finished products, and the processing environment from two NRTE establishments associated with an outbreak.[56] Among the 1,433 samples, 518 were positive for *Salmonella,* a 36% positive rate. FSIS found the following serotypes in the following rank order from most to least: Kentucky, Typhimurium, Infantis, Enteritidis, Heidelberg, Schwarzengrund, I 4,[5],12:i:-, Montevideo, Mbandaka, and Muenchen indicating virulent *Salmonella* serotypes can be directly found in NRTE breaded stuffed chicken products. Lastly, in the FERN Survey, NRTE breaded stuffed chicken products were purchased at retail from July 1, 2022, to September 30, 2022. In total, 58 of the 487 samples, 12%, were positive for *Salmonella.* Fifty-three were serotyped finding Infantis, Enteritidis, Kentucky, and Typhimurium, in that order of frequency.

As FSIS acknowledged in the proposed determination, not all *Salmonella* serotypes (*e.g., Salmonella* Kentucky), are equally likely to cause illness (88 FR 26262). However, all *Salmonella* serotypes, including *Salmonella* Kentucky, have the ability to invade, replicate, and survive in human host cells, resulting in potentially fatal disease,[57] and the disparity among serotypes may be related to factors other than serotype-specific differences in human virulence.[58] With *Salmonella,* higher virulence is associated with enhanced ability to survive and grow in the gut or to attach to and invade human cells, which is driven by changes to several mechanisms, including mobile genetic elements and resident genes as well as variations in gene sequence and expression. In an August 2018 report, the National Advisory Committee on Microbiological Criteria for Foods (NACMCF) was unable to find evidence in the literature for any determinant that correlated with high virulence in human foodborne disease.[59] NACMCF noted that a few *Salmonella* serotypes are consistently associated with the greatest incidence of human disease. However, this disparity among serotypes may be related to survival in animal hosts or during food harvesting and processing rather than serotype-specific differences in human virulence.

Comment: A meat industry research institute and industry member asserted that current support for the 1 CFU/g standard is based, in part, on data that include products whose characteristics are not the same as raw chicken. According to the commenters, FSIS cited studies/data associated with cheese, chocolate, and dressings, which are all RTE products of high fat content, and have known *Salmonella* protective characteristics during digestion. They noted that high fat content protects *Salmonella* against gastric acidity resulting in a reduction of dose-response curve with a low infectious

dose.[60] [61] [62] [63] They argued that raw chicken, unlike these other products, provides increased heat lethality, is expected to be heated, and is lower in fat and not emulsified.

Response: FSIS does not agree with the assertion that the dose-response models, including Teunis 2010, Teunis 2022, and the WHO Risk assessment of *Salmonella* in eggs and broiler chickens, are not applicable to chicken-specific outcomes. The commenters indicated that many of the outbreaks used in the dose-response models reported low doses for high-fat products (some reported in the range of 10^1). Looking at the outbreaks used in the *Salmonella* Enteritidis dose-response model,[64] there are many outbreaks that are presumably high-fat but are also high dose. For example, (food vehicle and dose (CFU)) Hollandaise 4.48×10^4, Macaroni salad 4.40×10^4, Scallop/cream 1.00×10^6, Yam/soup 1.94×10^6, Bavarois (Bavarian ice-cream) 1.01×10^5, Ice cream 3.84×10^6, Tiramisu 1.29×10^8, Cake 6.06×10^5, Mayonnaise 5.57×10^4. These outbreak doses range from about 10,000 to 100,000,000 organisms. Further, the commenter suggested that the chicken matrix is low-fat and the only ingredient of concern. NRTE breaded stuffed chicken products can be made from comminuted (ground) chicken where high-fat chicken skin may be combined and comminuted with skinless, boneless chicken. Additionally, NRTE breaded stuffed chicken products include high-fat ingredients, such as cheese, cream, butter, and ham, that could act to encourage pathogen survival.

FSIS agrees that very few of the outbreaks used in any of the dose-response models mentioned in the public comments or the proposed determination are specifically associated with an outbreak where the contaminated ingredient was determined to be chicken. However, there are several outbreaks used in the dose-response models that are based on animal products. These include beef, chicken, egg, prawn, scallop, and octopus. The commenters did not provide an explanation for how the lack of chicken outbreaks would impact the dose-response except to imply it would not be representative. However, dose-response models describe pathogens and are rarely, if ever, specific to the transmission pathway.

I. Virulence

Comment: A poultry industry commenter stated that FSIS needs to gather more information on *Salmonella* virulence.

Response: As discussed in the proposed determination (88 FR 26262), the basis for *Salmonella* virulence is not fully understood. Many virulence factors have been identified that contribute to *Salmonella* pathogenicity. The interactions of these factors and the resulting strain virulence and pathogenicity has not been completely elucidated, but single genes and pathogenicity islands have been identified as key virulence traits. However, there is currently no agreed-upon definition of virulence genes presence/absence profile that can reliably predict severity of disease.[65] FSIS, as discussed in the proposed determination (88 FR 26262), is working to better understand *Salmonella* characteristics, including virulence, and actively engages in and encourages research in this area. As science and laboratory technologies advance, FSIS will continue to use the most innovative and sensitive methods available to protect public health.

J. Consumer Behavior

Comment: Poultry products trade associations and a meat industry research institute argued that consumers prepare raw chicken in a manner that destroys *Salmonella* and, thus, *Salmonella* cannot be considered an adulterant in products that include raw poultry components. One poultry products trade association also specifically asserted that FSIS cannot take the action discussed in the proposed determination because it has not proved that consumers must cook NRTE breaded stuffed chicken products to a temperature higher than other raw poultry products in order to effectively kill *Salmonella.* A poultry products trade association also asserted that the 2020 consumer study [66] and the 2022 CDC Appliance Report [67] cited in the proposed determination do not prove that consumers mishandle or use the incorrect appliances to prepare NRTE breaded stuffed chicken products. The commenter also noted that FSIS' analysis of consumer behavior pertaining to food thermometer use relied on an outdated paper explicitly focused on *microwavable* products from 1998–2006.[68]

Response: FSIS disagrees. As FSIS noted in the proposed determination (88 FR 26252), there are special considerations to take into account with these particular products that are relevant to consumer cooking practices. For one, unlike most raw poultry products, NRTE breaded stuffed chicken products often appear fully cooked and, thus, some consumers may only reheat the product for aesthetic or palatability purposes rather than subject it to cooking sufficient to kill pathogenic bacteria. Second, consumers typically cook NRTE breaded stuffed chicken from a frozen state, which increases the risk that the products will not reach an internal temperature needed to destroy *Salmonella* organisms that may be in the product. Third, NRTE breaded stuffed chicken products have a thicker diameter and a different composition than most other raw chicken products that are not stuffed, including other par-fried breaded products, which can make effective cooking of NRTE breaded stuffed chicken more challenging. In addition, it may be difficult for a consumer to determine an accurate internal temperature of these products because they contain multiple ingredients, such as cheese and vegetables, that may cook at different rates. FSIS has recommended in the past that consumers check the temperature at multiple locations throughout the product using a food thermometer, but this is not always practical or accurate.

[68] Smith, K.E., Medus, C., Meyer, S.D., Boxrud, J.D., Leano, F., Hedburg, C., Elfering, K., Braymen, C., Bender, J.B., Danila, R.N. 2008. Outbreaks of Salmonellosis in Minnesota (1998 through 2006) Associated with Frozen, Microwaveable, Breaded Stuffed Chicken Products. Journal of Food Protection. 71(10): 2153–2160.

outbreak investigations indicate that, despite industry and Agency efforts, consumers' cooking practices continue to be insufficient to destroy *Salmonella* in NRTE breaded stuffed chicken products and, as such, they continue to have a disparate impact on public health. Despite industry updates to labeling and Agency outreach on the safe preparation of NRTE breaded stuffed chicken products, outbreak investigations consistently indicate that case patients erroneously believed these products were precooked, did not ordinarily use food thermometers to check the internal temperature of the product, and used a microwave or other unsuitable appliance to cook the products. Moreover, many case patients became ill even when they used an oven to prepare the product.

Further, FSIS disagrees with commenters' assertions that the consumer research cited in the proposed determination was flawed or did not indicate that a significant percentage of consumers customarily mishandle NRTE breaded stuffed chicken products despite reading the manufacturer's labeling and instructions. As commenters noted, the proposed determination cited a 2008 report published in the *Journal of Food Protection.* FSIS appropriately cited this report to describe four separate salmonellosis outbreaks associated with NRTE breaded stuffed chicken that occurred between 1998–2006, related investigative findings, and the subsequent actions taken in response.[69] The report indicated that most consumers sickened in a 1998 outbreak reported using a microwave to prepare the product, and no consumers reported using a food thermometer. In response, the company responsible for the outbreak updated the preparation instructions on its product labeling. Then, in 2005, the report indicated that another outbreak occurred. Again, the manufacturer responsible for the outbreak updated its labeling instructions. FSIS also issued a public health alert to remind consumers that frozen meat and poultry products must be fully cooked before they are consumed. According to the report, following these additional communications with consumers and labeling changes by the manufacturers, two additional outbreaks occurred in the 2005–2006 timeframe. Again, most of the case patients used a microwave oven to cook the products and none of the case patients took the internal temperature of the product after cooking it. FSIS, therefore, issued another public health alert, emphasizing that consumers must cook NRTE breaded stuffed chicken products to 165 °F. FSIS sent a letter to an establishment involved in one of the outbreaks recommending they enhance and validate the cooking instructions to ensure that they address the intended use by the consumer.[70] FSIS then posted the letter online as guidance to all industry and requested that all such establishments update their labeling to include a statement such as ''Uncooked: For Safety, Must be Cooked to an Internal Temperature of 165 degrees F as Measured by Use of a Thermometer.'' As discussed in the proposed determination, despite these efforts, consumers continued to prepare NRTE breaded stuffed chicken products in a manner that did not adequately destroy *Salmonella,* resulting in several more outbreaks and subsequent unsuccessful efforts to update labeling instructions and educate the public on how to properly cook such products (88 FR 26252–26259).

In addition to analyzing outbreak data, FSIS discussed the results of two consumer behavior studies that helped inform its determination that a significant percentage of consumers do not customarily cook NRTE breaded stuffed chicken products in a manner that adequately destroys *Salmonella.* In the 2020 Meal Preparation Experiment cited in the proposed determination (88 FR 26257),[71] FSIS contracted with RTI International and North Carolina State University to conduct five separate iterations of a meal preparation study to evaluate consumer food handling behaviors in a test kitchen. The third iteration of the study specifically examined participants' meal preparation related to NRTE breaded stuffed chicken products. Half of the participants were assigned to a control group, whereas the other half was assigned to a treatment group. Amongst other things, the study found that consumers may confuse frozen NRTE breaded stuffed chicken products with RTE products. Specifically, the study concluded that even though 99% of all participants read the manufacturer's instructions for NRTE breaded stuffed chicken products, nearly a quarter reported they were not sure if the products were raw or fully cooked, twenty-two percent reported they were unaware that the product was raw, and eleven percent of the participants incorrectly believed the product was fully cooked. The study also found that a significant number of participants did not use food thermometers to check that the NRTE breaded stuffed chicken product reached a safe internal temperature of 165 °F, with some using other methods to determine doneness such as time, visual cues, and touch. Thirty-eight percent of participants also self-reported not using their food thermometer at home to check that NRTE breaded stuffed chicken products were properly cooked. Moreover, the study observed that a significant number of participants did not adequately wash their hands during meat preparation. The study concluded that these issues were likely attributable to participants preparing a NRTE breaded stuffed chicken product rather than raw, unfrozen poultry that is not breaded and stuffed. This indicates that the appearance of NRTE breaded stuffed chicken products and the fact that they are typically cooked from a frozen state may contribute to *Salmonella* cross-contamination in the home.

The proposed determination also discussed the results of a 2022 survey that collected information from thousands of participants from May 31–July 6, 2022, to determine the demographic characteristics of persons who prepare NRTE breaded stuffed chicken products and the appliances they use to prepare them.[72] Even though NRTE breaded stuffed chicken product labels typically instruct consumers to cook the product in an oven and specifically warns against the use of a microwave, 54 percent of participants reported that they prepared these products using appliances other than, or in addition to, ovens.[73] Specifically, 30 percent reported preparing the products using air fryers, 29 percent reported using microwaves, approximately 14 percent reported using toaster ovens, and approximately 4 percent reported using another appliance. Economic and other factors might affect certain groups'

[69] Smith, K.E., Medus, C., Meyer, S.D., Boxrud, J.D., Leano, F., Hedburg, C., Elfering, K., Braymen, C., Bender, J.B., Danila, R.N. 2008. [71] Final Report: Food Safety Consumer Research Project: Meal Preparation Experiment on Raw Stuffed Chicken Breasts (September 23, 2020) at: *https://www.fsis.usda.gov/sites/default/files/media_file/2021-04/fscrp-yr3-nrte-final-report.pdf.*

[72] Marshall, K.E., Canning, M., Ablan, M., Crawford T.N., Robyn, M. Appliances Used by Consumers to Prepare Frozen Stuffed Chicken Products-United States, May–July 2022. Morb Mortal Wkly Rep Dec 2,2022; 71(48);1511–1516. Available at: *https://www.cdc.gov/mmwr/volumes/71/wr/mm7148a2.htm.*

[73] Participants in the study were allowed to choose more than one cooking option.

access to recommended cooking appliances and, thereby, the customary manner in which these groups cook NRTE breaded stuffed chicken products.

FSIS also disagrees that, in order to finalize the proposed determination, it must show that consumers must cook NRTE breaded stuffed chicken products to a temperature higher than other raw poultry products in order to effectively kill *Salmonella.* As noted in the proposed determination, the status of NRTE breaded stuffed chicken products contaminated with *Salmonella* must depend on whether there is adequate assurance that consumer handling of the product will result in a product that does not contain *Salmonella* at levels sufficient to cause human illness when consumed (64 FR 2803). The evidence cited in the proposed determination, including the consumer research cited above, shows consumers routinely do not fully cook NRTE breaded stuffed chicken nor do they routinely use a food thermometer to test the internal temperature of the product and, thus, has concluded that the appropriate response to protect public health is to ensure that products contaminated with *Salmonella* at levels sufficient to cause human illness (1 CFU/g) are excluded from commerce.

K. Laboratory Methods

Comment: Poultry products trade associations, a meat products research institute, a member of the poultry products industry, a trade group representing the frozen foods industry, and a society of meat industry professionals raised some issues regarding the laboratory methods FSIS intends to implement. Generally, they stated that *Salmonella* enumeration testing technology is still under development, that current methods are limited, and that FSIS needs to ensure that its methods are validated prior to implementation of this determination. Specifically, they noted that available *Salmonella* enumeration methods are not currently validated for NRTE breaded stuffed chicken products or at a detection level of 1 CFU/g. A poultry products trade association and an industry member also asserted that there is a margin of variability inherent in the available laboratory methods and asked for clarity on how FSIS would account for this. An industry member also asked FSIS to use polymerase chain reaction (PCR)-based limit of detection testing, until quantification methods are improved and validated.

Response: FSIS laboratories performed a thorough verification of validated methods by independent organizations. FSIS' current qPCR method is validated for 1 CFU/g in NRTE breaded stuffed chicken.[74] The Most Probable Number (MPN) method is another enumeration technique that FSIS has adopted.[75] FSIS intends to routinely evaluate new methods of *Salmonella* quantification, as they become available, that provide both accuracy and fitness for a high-throughput laboratory environment.

Comment: To expedite test results, a poultry products trade association requested that the Agency consider conducting the quantitative assay concurrently with the assay being conducted to screen the sample for the general presence of *Salmonella,* not based on that assay. The commenters also asked for clarity on if quantitative and general detection results will be obtained from the same homogenized sample to avoid conflicting results that could arise if using different analytical sample portions due to factors such as the nonhomogeneous distribution of *Salmonella.*

Response: FSIS intends to use the same homogenized sample for the quantitative and detection screen protocols. Enumeration results will be reported on the same day. For samples that are potential positives, an additional 3 days may be necessary for a confirmed positive or negative result. These timeframes and methods may change as FSIS incorporates new laboratory technologies into its sampling and verification testing.

Comment: A poultry products trade group stated that *Salmonella* levels in finished product are typically less than 1 CFU/g but that the levels in samples may grow beyond the 1 CFU/g threshold during transport of the sample to Federal laboratories. The commenters asked the Agency to account for this phenomenon in its final determination, given even a slight difference in results may have a negative impact on industry.

Response: Current FSIS procedures ensure the temperature of the *Salmonella* samples to be 15 °C or less upon receipt at the field service laboratories.[76] The laboratories will discard samples that arrive at a temperature above 15 °C.[77] This upper temperature limit is intended to prevent the outgrowth of competitors that could affect pathogen recovery in the lab. These limits also ensure that growth during shipment does not occur. While 15 °C is the upper allowable limit, samples received at the laboratory typically do not approach that temperature. USDA studies have shown no significant difference in the levels of *Salmonella* in ground beef samples if kept at refrigerator temperatures for 24–48 hours (Narang et al, 2005).

Comment: A commercial laboratory suggested that FSIS consider using third-party laboratories that are part of the Accredited Laboratory Program (ALP) when including laboratories that will be assisting the Agency. Further, a member of the poultry products industry stated that FSIS should utilize industry analytical data from ALP on the levels of *Salmonella* to conduct their verification, to assist small and very small processors.

Response: Currently, FSIS labs analyze all samples that FSIS inspectors collect to verify that product is wholesome and not adulterated. Also, FSIS labs currently have the capacity to conduct verification sampling and testing of NRTE breaded stuffed chicken products. Thus, at this time, FSIS intends to collect all samples and use its own labs for verification testing conducted under this final determination.

L. Verification Sampling

Comment: Poultry products trade associations, industry members, and a meat industry research institute asked FSIS to consider sampling earlier in the NRTE breaded stuffed chicken product production process to give establishments more flexibility to divert failed product for other uses. Specifically, commenters asked FSIS to consider conducting sampling on the raw incoming chicken components used to produce NRTE breaded stuffed chicken, prior to those materials being comminuted and combined. They indicated that, if FSIS finalized the sampling location as discussed in the proposed determination, establishments would have less flexibility to divert product exceeding the 1 CFU/g adulteration threshold, given the chicken components, once processed and prepared for breading and stuffing, have a short shelf life and a unique formulation that can only be utilized to produce NRTE breaded stuffed chicken products. Thus, the commenters asserted that sampling at the location discussed in the proposed determination would lead to substantial food waste and lost product costs.

[74] BioMerieux GENE–UP QUANT *Salmonella,* AOAC Performance Tested Methods℠ Certification Number 082104 is the current validation.

[77] FSIS Directive 10250.1, *Salmonella and Campylobacter Verification Program for Raw Meat and Poultry Products.*

Response: In the proposed determination (88 FR 26249), FSIS proposed to collect verification samples after the establishment has completed all processes needed to prepare the chicken component to be stuffed and breaded to produce final NRTE breaded stuffed chicken products. However, FSIS agrees with commenters that sampling earlier in the production process may provide some establishments with additional flexibility to divert sampled source products for other uses, thereby reducing food waste, lost product costs, and establishment operations changes due to the collection event. As such, FSIS will collect verification samples from incoming raw poultry source materials at the establishment producing the NRTE breaded stuffed chicken prior to breading and stuffing at an appropriate point in the establishment's process. In assessing the suitability of the sampling location at any individual establishment, FSIS will take into account the establishments' production process and the Agency's ability to collect the sample safely and effectively. Any *Salmonella* detected in NRTE breaded stuffed chicken source materials will be enumerated and source materials that exceed 1 CFU/g *of Salmonella* must be diverted for other uses.

Comment: A poultry products trade association asked for clarity on whether the *Salmonella* adulteration threshold for NRTE breaded stuffed chicken products applies only to the chicken components tested by FSIS or to the finished product itself. The commenter also asked for clarity on whether establishments may complete the production of NRTE breaded stuffed chicken products while awaiting sampling results, so long as such products remain under establishment control and are not released into commerce. Further, the commenter asked FSIS to provide that establishments may divert raw chicken source material confirmed positive for *Salmonella* at 1 CFU/g for uses other than the production of NRTE breaded stuffed chicken products.

Response: Under this determination, all finished NRTE breaded stuffed chicken products that are contaminated with *Salmonella* at 1 CFU/g or greater are adulterated within the meaning of 21 U.S.C. 453(g)(1) and 21 U.S.C. 453(g)(3). This adulteration standard applies to finished NRTE breaded stuffed chicken products, not the raw incoming chicken components tested by FSIS. Tested chicken components and those components represented by the sampled lot before incorporation into NRTE–BSC products would not be considered adulterated for certain other uses if confirmed positive for 1 CFU/g or greater of *Salmonella.* Thus, establishments may divert such raw material components to another appropriate application (*e.g.,* breaded nugget or fully cooked products). Chicken components subject to sampling and verification testing and confirmed positive for 1 CFU/g or greater of *Salmonella* would be ineligible for use in NRTE breaded stuffed chicken products under 9 CFR 417.2(c)(3).

In the proposed determination (88 FR 26266), FSIS stated that, pending test results, establishments should not incorporate sampled lots into finished NRTE breaded stuffed chicken products. However, in response to public comments, FSIS is clarifying that this statement was only meant to apply to sampled lots incorporated into NRTE breaded stuffed chicken products released into commerce. Establishments that produce NRTE breaded stuffed chicken may, at their discretion, incorporate sampled lots into finished NRTE breaded stuffed chicken products, so long as those finished products remain under establishment control awaiting acceptable test results.

Comment: A poultry products trade association and a meat industry research institute noted that, upon entering commerce, NRTE breaded stuffed chicken may be subject to additional testing by state or local health authorities, customers, consumer advocacy organizations, or even FSIS and other Federal partners. The commenters asked for clarity on how FSIS would interpret such downstream testing and what public health actions it would take if such testing showed that finished NRTE breaded stuffed chicken products in commerce contain *Salmonella* at 1 CFU/g or greater.

Response: Under this determination, all finished NRTE breaded stuffed chicken products that are contaminated with *Salmonella* at 1 CFU/g or greater are adulterated within the meaning of 21 U.S.C. 453(g)(1) and 21 U.S.C. 453(g)(3). If FSIS receives test results from a third party (*e.g.,* a state health department, advocacy organization, or consumer), the Agency will address those results in accordance with FSIS Directive 10,000.1, *Policy on Use of Results for Non-FSIS Laboratories.* Assuming the test results are deemed acceptable, FSIS may use the results to inform Agency action, such as detaining the product or initiating a recall.

Comment: To minimize product storage costs, a poultry products trade association asserted that FSIS should provide establishments with enumeration results as soon as they are available, without waiting for serotype or WGS information.

Response: FSIS will transmit test results to establishments as soon as possible and will not withhold such results while awaiting other information. FSIS intends to use the LIMS-Direct system and Biological Information Transfer Email System (BITES) messages to alert establishments and Office of Field Operations personnel prior to the confirmed positive and WGS or serotyping steps of the analysis.

Comment: Poultry products trade associations, a poultry products industry member, and a meat industry research institute requested clarity on how production lots would be defined for purposes of FSIS' verification and sampling program.

Response: Establishments are responsible for defining a production lot. Establishments should ensure that there is a scientifically supportable basis for their lotting practices to ensure microbiological independence. To create independence between production lots, establishments need to consider the way in which the hazard is likely to be introduced to the process, such as from the addition of chicken skin, and during handling and processing of chicken parts, and grinding of chicken trim that may be used in the production of NRTE breaded stuffed chicken products. When applicable and available, FSIS and establishment microbial sampling, as well as the lotting of received source materials must also be considered and support the establishments product lot definition. A production lot can be defined by the establishment in several ways. FSIS does not consider ''clean-up to clean-up'' alone as a supportable basis for distinguishing one portion of raw chicken production from another portion of production. Establishments may decide to use a robust, statistically based sampling program, one or more processing interventions that have been validated to limit or control *Salmonella,* or other scientifically supportable process to define the lot.[78]

M. Implementation Date

Comment: A meat industry research institute stated that the Agency must allow a reasonable timeframe to implement the final determination. The commenter noted that establishments

[78] For additional information on lotting see the *FSIS Guideline for Holding and Controlling Meat, Poultry, and Egg Products Pending FSIS Test Results.* Available at: *https://www.fsis.usda.gov/policy/fsis-guidelines.*

will need to adjust and put processes in place to hold product during testing and divert positive product. Moreover, according to the commenter, establishments may need to weigh the costs of these processes to determine whether continued production of these types of products is viable. According to the commenter, an effective date one year from the publication of a final determination would be reasonable.

Response: FSIS agrees that industry will need a reasonable amount of time to adjust to this determination. As such, this final determination will not be effective until 12 months after publication of this final determination. Also, FSIS inspection verification sampling will be implemented 12 months after publication of this final determination.

N. Cost Benefit Analysis

Comment: Poultry products trade associations, a meat industry research institute, and a member of the poultry products industry, asserted that storage costs under the proposal would be greater than anticipated in the proposed determination; however, they did not provide any costs estimates to support their assertion. Specifically, the commenters argued that some establishments do not have enough storage capacity to hold products awaiting test results and would, thus, have to purchase off-site storage. Further, commenters stated that the proposed determination did not adequately account for transportation or labor costs, associated with moving product to and from off-site storage facilities. Commenters also asserted that FSIS test results are likely to take longer than estimated in the proposed determination's CBA and that test and hold requirements will reduce shelf life for these products.

Response: FSIS disagrees that the anticipated costs for cold storage will be greater than estimated in the proposed determination. FSIS requires that establishments maintain control of sampled product pending FSIS verification testing results so that product does not enter commerce, while allowing establishments the flexibility of determining where to hold product as well as deciding whether to divert product into other uses. Additionally, as mentioned above, establishments will be able to complete the production process using sampled product, provided they maintain control of any finished products and do not release them into commerce, pending acceptable test results. This will likely reduce an establishment's need for cold storage capacity. To be conservative, FSIS' preliminary cost benefit analysis (CBA; 88 FR 26267) accounted for cold storage costs assuming every lot would be sampled and held. The final CBA assumes FSIS would sample up to 5 lots per establishment per month. The preliminary CBA also assumed that sampling would take place right before the chicken component was stuffed and formed into a NRTE breaded stuffed chicken product. However, as discussed above, FSIS has updated the sampling location to give establishments greater flexibility to divert products for other uses and otherwise reduce operating costs. Given FSIS' assumed lower sampling frequency, greater flexibility in sampling location and establishments' ability to divert components or products, FSIS does not expect establishments to have challenges holding or controlling FSIS sampled product or have additional labor or transportation issues. Moreover, FSIS does not believe the quality or shelf-life of NRTE breaded stuffed chicken products would be impacted during cold storage while industry awaits FSIS sampling results because these products are frozen. In response to comments, FSIS updated the final CBA by conservatively using the higher estimate for frozen cold storage costs instead of the refrigerated cold storage costs used in the preliminary CBA.

FSIS also does not foresee an issue with cold storage capacity. Cold storage construction in the United States has increased since 2020 to meet higher refrigeration demands. According to the U.S. Bureau of Labor Statistics, the number of private refrigerated warehouse facilities increased by 7.5 percent from 2020 to 2021 and an additional 6.8 percent from 2021 to 2022.[79] This increase compares to an average annual growth rate of 2.5 percent per year from 2013 to 2020.[80] With the increase in the number of cold storage establishments, FSIS does not expect the cold storage availability to impact the establishments' ability to store lots of product when FSIS collects a sample. For a conservative estimate, the Agency assumed that all costs of storing product for the sampled lots are due to this final determination; however, establishments may already store the chicken components for NRTE breaded stuffed chicken products in their facilities or in an off-site location for a certain amount of time.

FSIS is confident in its estimated sampling timeframes. In the final determination, FSIS estimates all product sampled and tested by FSIS will be held for 2 days pending screening and enumeration results. At the 1 CFU/g limit, FSIS estimates that about 97 percent of product could be released after two days. Receiving the enumeration results within two days will help industry make more timely decisions about their product and save on cold storage and lost product costs.

Comment: A poultry products trade association and meat industry research institute stated that there are issues with FSIS' analysis of costs in the proposed determination associated with diverted or destroyed product. Specifically, these commenters noted that there is not a market for raw chicken components that are already formulated for use in NRTE breaded stuffed chicken products and, thus, establishments producing raw poultry products cannot readily divert such products for other uses.

Response: FSIS proposed an inspection verification sampling program for *Salmonella* in NRTE breaded stuffed chicken products in which the Agency would collect a sample from the chicken component of NRTE breaded stuffed chicken product prior to breading and stuffing, but after the establishment had completed all the processes needed to prepare the chicken to be stuffed and breaded. However, in the final determination, and based on public comment, FSIS decided to modify the verification sampling location by collecting verification samples on the incoming chicken components. This change may provide establishments with additional flexibility and allow them to divert chicken components more readily.

Comment: A poultry products trade association and meat industry research institute noted that many establishments would be hesitant to divert *Salmonella*-positive product for other NRTE purposes. According to the commenters, to avoid potential liability, many establishments may cook the affected product or employ some other lethality step, resulting in a lower value product. The commenters also asserted that many establishments would need to incorporate sampled lots into finished NRTE breaded stuffed chicken products to avoid spoilage.

Response: FSIS accounts for the lost value in the CBA by assuming diverted chicken components would lose ⅔ of their market value. Alternatively, the establishment is not required to divert

[79] Bureau of Labor of Statistics. Number of Establishments in Private NAICS 49312 Refrigerated warehousing and storage for All establishment sizes in U.S. TOTAL, NSA. Annual totals from 2013 to 2022. Accessed on September 27, 2023.

[80] Bureau of Labor of Statistics. Number of Establishments in Private NAICS 49312 Refrigerated warehousing and storage for All establishment sizes in U.S. TOTAL, NSA. Annual totals from 2013 to 2022. Accessed on September 27, 2023.

product because FSIS collected a sample and thus, may choose to continue to produce NRTE breaded stuffed chicken and hold the finished product pending verification, which FSIS also included in its estimates for cold storage costs. NRTE breaded stuffed chicken finished product produced from chicken components that FSIS detects to contain *Salmonella* at levels of 1 CFU/g or higher are considered adulterated; however, establishments may be able to fully cook these finished products to achieve lethality resulting in a ready-to-eat product.

Comment: Industry asked FSIS to clarify how it estimated lot sizes in the proposed determination's CBA and noted that the lot sizes may be larger than estimated in the preliminary CBA.

Response: The lot size estimates used in the preliminary CBA were an assumption based on the Agency's data on annual production volumes at these establishments. The preliminary CBA assumed establishments producing at least 1 million pounds of NRTE breaded stuffed chicken annually were high volume establishments with 10,000-pound lots. This assumption was based on examples from the 2013 FSIS Compliance Guideline: Controlling Meat and Poultry Products Pending FSIS Test Results.[81] The preliminary CBA assumed establishments producing less than 1 million pounds of NRTE breaded stuffed chicken annually were low-volume establishments with 1,000-pound lots. This assumption was based on production data from FSIS' Public Health Information System. FSIS requested comments on these assumptions but did not receive specific comments on lot size for these products. However, in responses to the comments that the lot sizes may be larger, the final CBA has been updated to consider a day's production as a lot at both high and low volume establishments. This is a conservative estimate because the lot sizes may be smaller than a day's production. Establishments ultimately define and support their lot sizes.

Comment: A meat industry research institute and a poultry products industry member stated that FSIS' CBA should have accounted for different employee types to estimate sampling or HACCP plan reassessment labor costs. The same commenters stated that a food safety, quality assurance, or a laboratory employee are more likely to conduct sampling. They stated that establishments typically do not use line personnel to conduct sampling and, thus, would need to hire additional personnel to conduct tasks associated with sampling and testing. Another commenter suggested that FSIS should better account for the wages of an ''experienced production employee'' in estimating the labor costs of HACCP plan reassessment.

Response: In response to comments, the final CBA has been updated to include that sample collection is conducted by food scientists and technologists. In addition, the final CBA has been updated to included wage ranges for all the wage estimates to account for the variability in wage rates within the professions. FSIS maintains the assumption that establishments would use and train current employees to implement any new or additional sampling in response to this final determination. While the CBA conservatively assumed every establishment would begin or increase sampling in response to this new policy, some establishments already have robust sampling procedures in place and may not make any changes to their sampling in response to the final determination, while other establishments may choose not to conduct any sampling. Additionally, the Agency did not receive any information on the number of additional employees an establishment would hire in response to this final determination.

Comment: Poultry product trade associations, a member of the poultry products industry, and a meat industry research institute stated that FSIS' CBA underestimated miscellaneous costs associated with the proposed determination, such as testing by industry, employee training, applying new *Salmonella* interventions, changing production processes, and validating new production methods and cooking instructions. These commenters also stated that the CBA underestimated the market price of NRTE breaded stuffed chicken products and, specifically, failed to adjust the price for inflation.

Response: FSIS disagrees that miscellaneous costs are underestimated. FSIS included the cost of HACCP reassessment in the CBA for all establishments producing NRTE breaded stuffed chicken products. Sanitation procedures are a prerequisite to HACCP and according to 9 CFR 416.1, ''Each official establishment must be operated and maintained in a manner sufficient to prevent the creation of insanitary conditions and to ensure that product is not adulterated.''[82] Any sanitation issues should be addressed as a condition for the establishment's grant of inspection. Any costs associated with sanitation will not be a result of the new policy.

FSIS did not include the cost of validating cooking instructions in the CBA because industry has already made the recommended changes after the 2015–2016 outbreaks. Any expenses establishments incur to validate cooking instructions or update labels are outside the scope of the policy.

FSIS updated the final CBA to 2022 dollars and used the 2022 average price of chicken breast to represent the price of chicken components for NRTE breaded stuffed chicken product. To be conservative, FSIS used the retail price of boneless chicken breast, which is the premium chicken component utilized in these products.

Comment: Poultry product trade associations, a member of the poultry product industry, and a meat industry research institute noted that sampling and testing alone does not change pathogen loads. Thus, according to commenters, the CBA should assume that establishments will bear the costs of updating their processes to control *Salmonella.*

Response: The final determination and FSIS inspection verification of the adequacy of the HACCP system to control the *Salmonella* hazard, will require industry to use effective methods to control *Salmonella* in NRTE breaded stuffed chicken products regardless of whether FSIS collects an inspection verification sample. FSIS included the cost for establishment-led sampling and testing in the CBA. Establishment-led sampling is an establishment HACCP validation and verification activity that would allow for establishments to support the adequacy of their HACCP system to control the *Salmonella* hazard at one or more steps in the process and verify that they are producing NRTE breaded stuffed chicken products with less than 1 CFU/g *Salmonella.*

Establishments may implement additional interventions to reduce the pathogen loads on their chicken component, but since FSIS did not receive specific comments on the interventions that establishments would use to reduce the *Salmonella* levels on the product, the cost of interventions are not included in the total cost estimate. Though the cost of interventions is not

[81] FSIS Compliance Guideline: Controlling Meat and Poultry Products. Pending FSIS Test Results. 2013. *https://www.fsis.usda.gov/sites/default/files/media_file/2021-09/FSIS-GD-2013-0003.pdf.* Accessed on: November 9, 2023.

[82] National Archives. Code of Federal Regulations. Part 416.1 Sanitation Rules: General Rules. Accessed on October 11, 2023: *https://www.ecfr.gov/current/title-9/chapter-III/subchapter-E/part-416.*

included in the CBA, establishments would only adopt new interventions if the new interventions and the cost to implement interventions is more beneficial than diverting or destroying product. Any new interventions used should offset the cost of diverted or destroyed product already accounted for in the CBA.

Comment: A poultry products trade association stated that the benefits of the proposed determination would need to be greater than estimated to achieve the breakeven effect noted in FSIS' CBA, as costs were underestimated. According to the commenter, the use of the Grocery Manufacturers Association (GMA) data does not address the specific nature of recalls for this product class, and the CBA should account for every recall and not every outbreak. The commenter also argued that since trends show the number of outbreaks in these products has decreased over the years, industry may already be implementing interventions and trending toward less outbreaks through voluntary actions.

Response: FSIS disagrees that costs are underestimated and that benefits need to be higher for the final breakeven analysis. FSIS also disagrees that the GMA report [106] is not in scope for NRTE breaded stuffed chicken products. The GMA report is based on survey results from 36 companies and nearly 91 percent of respondents came from the food and beverage industry. FSIS used this report to determine the average impact of a recall on industry. The cost of recalls in NRTE breaded stuffed chicken products would be similar to the cost of recalls averaged over other food products represented in the GMA report.

While the number of outbreaks has slowed slightly in recent years, outbreaks are still occurring regularly, and we have no reason to believe that there would be a downward trend absent this new policy. The most recent 2021 outbreak resulted in more hospitalizations than any of the 14 other NRTE breaded stuffed chicken product outbreaks, with 36 illnesses, and 12 hospitalizations (88 FR 26258–26259). *Salmonella* outbreaks have been disproportionately associated with NRTE breaded stuffed chicken products, which account for less than 0.15 percent of the total domestic chicken supply yet represented approximately five percent of all chicken-associated outbreaks in the United States (88 FR 26252). Based on the available data, FSIS believes that a downward trend in *Salmonella* outbreaks and illnesses from NRTE breaded stuffed chicken can only be achieved by a policy change. The new policy is expected to cause industry to use more effective methods to control for *Salmonella* in NRTE breaded stuffed chicken products, including diverting, or destroying chicken components with *Salmonella* levels at or over the 1 CFU/g limit.

O. Additional Action

Comment: One individual stated that, in addition to the actions discussed in the proposed determination, FSIS should incentivize establishments to only implement validated control programs in their HACCP Systems.

Response: FSIS regulations at 9 CFR 417.4(a) require that every establishment validate their HACCP plan's adequacy in controlling the food safety hazards identified during the hazard analysis and verify that the plan is being effectively implemented. Therefore, establishments are currently required to implement control programs into their HACCP Systems that are validated. FSIS has published guidance for industry on how to validate their HACCP Systems.[83]

Comment: In addition to the actions discussed in the proposed determination, a consumer advocacy organization suggested that FSIS create final product standards for all poultry products contaminated with *Salmonella.*

Response: This determination is only concerned with *Salmonella* in NRTE breaded stuffed chicken products. The recommendation is, thus, outside the scope of the proposed determination. FSIS intends to address issues related to *Salmonella* illnesses associated with other raw poultry products separately through the *Salmonella* Framework Initiative.[84]

Comment: One animal welfare organization noted that stress can cause or exacerbate *Salmonella* infections in live poultry and, thereby, increase contamination in final products. Thus, in addition to the actions discussed in the proposed determination, the commenter asked FSIS to consider strategies to minimize the time poultry spend awaiting slaughter, protect live poultry from severe environmental conditions during holding, ensure stun baths are designed to prevent pre-stun shocks, and otherwise minimize stress, bruising, and injury to birds during transport.

Response: The final determination is concerned with *Salmonella* in NRTE breaded stuffed chicken products and specifically, establishing an adulteration threshold, and inspection verification of the new policy. Thus, the commenters' suggestions are not within the scope of this action. However, FSIS guidance specifically addresses best practices to control *Salmonella* prior to and during slaughter and processing.[85] FSIS inspection program personnel (IPP) also routinely verify that poultry establishments operate in accordance with Good Commercial Practices, which includes the employment of humane methods of handling and slaughtering.[86]

Comment: An industry member asked FSIS to partner with the U.S. Food and Drug Administration (FDA) to implement the 1 CFU/g standard for other RTE items such as peanut butter, lettuce, tomatoes, and other goods that have been linked to *Salmonella* outbreaks so there is a consistent standard for all such products.[87] Another industry member recommended that FSIS partner with universities to develop education programs aimed at ensuring that robust statistical process control systems are implemented at establishments. The commenter also asked FSIS to work with the USDA Animal and Plant Health Inspection Service to promote vaccine approval, and with other Federal partners to develop more widespread salmonellosis risk assessments.

Response: Recommendations, petitions, and comments on non-FSIS-regulated food products should be directed to FDA. FSIS regularly partners with Federal and State health partners and academia to address issues pertaining to *Salmonella* in FSIS-regulated products. FSIS will continue these partnerships to ensure food safety and further consumer protections.

Comment: A poultry products trade association and an industry member stated that FSIS should amend 9 CFR 381.173 and 381.174 to prohibit mechanically separated chicken (MSC) from being used as a component of NRTE breaded stuffed chicken products.

[86] FSIS Directive 6110.1, *Verification of Poultry Good Commercial Practices,* available at: *https://www.fsis.usda.gov/policy/fsis-directives/6110.1.*

[87] Foodborne illness source attribution estimates for 2019 for *Salmonella, Escherichia coli* O157, Listeria monocytogenes, and Campylobacter using multi-year outbreak surveillance data, United States. The Interagency Food Safety Analytics Collaboration (IFSAC); October 2021.

Response: At this time, FSIS does not believe that 9 CFR 381.173 and 381.174 need to be revised because, under this determination, all source material received and used to produce NRTE breaded stuffed chicken must be considered in the establishment's hazard analysis to support the *Salmonella* hazard control required and intended by the HACCP system. Any raw chicken components establishments use to produce NRTE breaded stuffed chicken, including MSC, will be subject to FSIS' food safety inspection verification. MSC must also appear in the ingredients statement.

P. Alternatives to the Proposed Action

Comment: In lieu of the proposed action, a poultry products trade association and an industry member stated that FSIS should take the actions described in the 2022 supplement to the National Chicken Council's 2016 petition [88] and otherwise focus on improved labeling for NRTE breaded stuffed chicken products.

Response: As discussed throughout the proposed determination and above, over the years, establishments have repeatedly updated their NRTE breaded stuffed chicken product labeling practices in response to reoccurring illness outbreaks caused by these products in an attempt to reduce future instances of salmonellosis. However, these attempts have been unsuccessful. Thus, FSIS does not believe codifying special labeling requirements for NRTE breaded stuffed chicken products is likely to address the *Salmonella* concerns related to these types of products.

Comment: In lieu of the proposed action, a poultry products trade association stated that FSIS should, amongst other actions, require all NRTE breaded stuffed chicken to reassess their HACCP plan, noting that FSIS has taken similar approaches in the past.

Response: HACCP system regulations require that every establishment reassess the adequacy of its HACCP plan at least annually and whenever any changes occur that could affect the underlying hazard analysis or alter the HACCP plan (9 CFR 417.4(a)(3)). This final determination that *Salmonella* at levels of 1 CFU/g or higher is an adulterant in NRTE breaded stuffed chicken products constitutes such a change. Thus, all establishments that produce NRTE breaded stuffed chicken products must reassess their HACCP plans. Establishments that make changes to their production process as a result of their reassessment would also need to re-validate their HACCP plans. FSIS will issue instructions to IPP in establishments that produce NRTE breaded stuffed chicken products to verify that these establishments have completed their reassessment before the effective date of this final determination. That said, FSIS does not believe that a HACCP reassessment, in the absence of a change in policy, is likely to be a sufficient option to address the *Salmonella* concerns related to these types of products. As discussed in the proposed determination, FSIS believes the appropriate response to protect public health is to ensure that NRTE breaded stuffed chicken products contaminated with *Salmonella* at levels sufficient to cause human illness are excluded from commerce.

Comment: In lieu of the proposed action, a poultry products trade association and meat industry research institute suggested that FSIS, amongst other things, develop guidance for processing NRTE breaded stuffed chicken products to reinforce best practices and help small establishments.

Response: FSIS currently has several applicable industry guidance resources available. FSIS has, for example, published industry guidance on NRTE breaded stuffed chicken product labeling [89] and industry guidance for controlling *Salmonella* in raw poultry to assist establishments that slaughter or process raw poultry products to prevent and minimize the risk of *Salmonella* in their operations.[90] These documents contain best practices and recommendations for industry to consider in their food safety system(s). FSIS will continue to publish and revise relevant guidance, as needed. However, FSIS does not believe that new or updated guidance, in the absence of a change in policy, is likely to be a sufficient option to address the *Salmonella* concerns related to these types of products.

Comment: In lieu of the proposed action, a poultry products trade association stated that FSIS should, amongst other things, conduct food safety assessments (FSAs) at establishments producing NRTE breaded stuffed chicken products to verify that food safety systems are being implemented properly for these products. The commenter also noted that these FSAs could also help identify best food safety practices for producing such products.

Response: FSIS does not believe that conducting FSAs, in lieu of this final determination, would sufficiently address the *Salmonella* concerns related to these types of products.

FSIS assigns and conducts Public Health Risk Evaluations (PHREs) as described in FSIS Directive 5100.4 [91] using both for-cause and routine risk-based PHRE criteria. PHREs are an analysis of establishment performance and use risk-based criteria to determine if FSIS will conduct an FSA. FSAs, as described in FSIS Directive 5100.1,[92] are conducted to assess an establishment's food safety system and verify that meat, poultry, or egg products are safe, wholesome, and produced in accordance with FSIS statutory and regulatory requirements. FSIS will continue to conduct PHREs and FSAs following the criteria described in these FSIS Directives at establishments that produce NRTE breaded stuffed chicken products.

Comment: A poultry products trade association and a trade association representing the frozen food industry stated that FSIS should implement the recommendations outlined in NACMPI's 2021 report.[93]

Response: As discussed in the proposed determination (88 FR 26259), the report provided several recommendations that primarily focus on the labeling of NRTE breaded stuffed chicken products. Specifically, the subcommittee recommended that FSIS re-verify that companies continue to voluntarily label NRTE breaded stuffed chicken products as raw in several places on the label and that labels of these products include validated cooking instructions. The subcommittee also recommended that FSIS update the 2006 labeling guidance to warn consumers not to use microwaves and air fryers if validated instructions are not provided for these methods and to cook the product to a minimum of

[92] FSIS Directive 5100.1, *Public Health Risk Evaluation Methodology,* available at: *https://www.fsis.usda.gov/sites/default/files/media_file/2021-08/5100.4.pdf.*

[93] National Advisory Committee on Meat and Poultry Inspection, Subcommittee II: Stuffed Not Ready-to-Eat Poultry Products, USDA (Sept. 28, 2021).

165 °F as measured using a food thermometer. The subcommittee further recommended that FSIS add label verification for these products as a recurring task for inspectors and review labels from the 2021 outbreak. In addition, the subcommittee recommended that FSIS require establishments that produce these products to reassess their HACCP plans in light of the outbreaks and encouraged FSIS to conduct targeted consumer outreach regarding these types of products, including creating an FSIS web page highlighting NRTE breaded stuffed chicken products. The subcommittee also recommended that FSIS establish requirements for the labeling of NRTE breaded stuffed chicken products and publish industry guidance explaining how to validate cooking instructions for such products.

In light of the 2021 *Salmonella* outbreak and earlier outbreaks associated with these products, the Agency concluded and shared with NACMPI in 2023 that the recommendations, which focus primarily on product labeling and consumer handling practices, are unlikely to be effective in preventing additional foodborne illnesses associated with NRTE breaded stuffed chicken products. Therefore, FSIS concluded that public health measures that focus primarily on product labeling and consumer handling practices have not been effective in preventing additional foodborne illnesses associated with NRTE breaded stuffed chicken products.

III. Implementation

A. HACCP Reassessment

FSIS' regulations require that every establishment reassess the adequacy of its HACCP plan at least annually and whenever any changes occur that could affect the underlying hazard analysis or alter the HACCP plan (9 CFR 417.4(a)(3)). This final determination that *Salmonella* at levels of 1 CFU/g or higher is an adulterant in NRTE breaded stuffed chicken products constitutes such a change. Thus, as discussed in the proposed determination (88 FR 26264), FSIS is announcing that all establishments that produce Heat Treated but Not Fully Cooked—Not Shelf Stable NRTE breaded stuffed chicken products must reassess their HACCP plans; establishments can reassess as part of their annual reassessment if their annual reassessment occurs before the effective date. Establishments that make changes to their production process as a result of their reassessment would also need to revalidate their HACCP plans. Prior to the effective date of this final determination, FSIS will issue instructions to IPP in establishments that produce NRTE breaded stuffed chicken products to verify that these establishments have completed their reassessment. Establishments must complete the reassessment and revalidate their HACCP plans by May 1 2025.

B. Implementation and Status of Laboratory Methods

As explained in the proposed determination (88 FR 26264–26266), FSIS will implement routine sampling and verification testing for *Salmonella* in NRTE breaded stuffed chicken products. In the proposed determination (88 FR 26264), FSIS stated that it would collect samples from the chicken component of a NRTE breaded stuffed chicken product prior to breading and stuffing after the establishment had completed all the processes needed to prepare the chicken to be stuffed and breaded. However, in response to public comments, FSIS has decided to modify the proposed verification sampling location to give establishments greater flexibility to divert source components for other appropriate uses and, thereby, lower lost product costs. Therefore, instead of collecting verification samples after the establishment has completed all processes needed to prepare the chicken component to be stuffed and breaded to produce a final NRTE breaded stuffed chicken product, as was proposed, FSIS will collect verification samples on the raw incoming chicken components used to produce NRTE breaded stuffed chicken product. In implementing sampling and verification testing for these products, FSIS will consider the production process at each impacted establishment and the Agency's ability to collect samples safely and effectively.

FSIS intends to perform, evaluate, determine, and report whole genome sequencing (WGS), serotype, levels, and antimicrobial resistance (AMR) profile for *Salmonella* isolates identified.[94] As noted in the proposed determination (88 FR 26262), FSIS intends to continuously evaluate and, if necessary, refine the status of *Salmonella* as an adulterant in NRTE breaded stuffed chicken products as advances in science and technology related to pathogen levels, serotypes, virulence genes, and product matrices become available. FSIS will likewise refine its sampling and verification testing for these products, as needed.

The detection and isolation methodology for *Salmonella* is described in chapter 4.14, of the FSIS Microbiology Laboratory Guidebook (MLG).[95] When sampling the raw incoming chicken components of NRTE breaded stuffed chicken products under this final determination, FSIS will collect one pound of the selected incoming chicken component from the establishment to analyze 325 grams per test for *Salmonella.* Samples will be initially screened, post-enrichment, for the presence or absence of *Salmonella.* Samples that screen negative will be reported as ''negative.'' For samples that screen positive, FSIS will then analyze *Salmonella* levels. Potential positives that screen positive for *Salmonella* presence and contain levels ≥1 CFU/g will then be analyzed using selective and differential culture-based media to identify the presumptive positive samples. Presumptive positives will then be confirmed by molecular-based mass spectrometric identification. A sample is only considered a ''confirmed positive'' for *Salmonella* after completion of both cultural and confirmatory testing. If any chicken component is ''confirmed positive'' with *Salmonella* levels of 1 CFU/g or higher, the entire sampled lot will need to be diverted to a use other than NRTE breaded stuffed chicken products. Any NRTE breaded stuffed chicken products that contain a chicken component from a sampled lot confirmed positive with *Salmonella* levels of 1 CFU/g or higher prior to stuffing and breading will be considered adulterated and excluded from commerce.

FSIS estimates that negative results will routinely be available within two days of sample collection, assuming overnight sample transit to the laboratory coupled with an overnight sample enrichment followed by screening and quantification at the laboratory. Enumeration is conducted from the same sample as screen testing and both results will be reported on the same day. For samples that are potential positives, an additional 3 days may be necessary for a confirmed positive or negative result. These timeframes and methods may change as FSIS incorporates new laboratory

[94] This information would be reported as with any test result. Inspectors would get result through the Public Health Information System (PHIS). FSIS would report out through Laboratory Information Management System (LIMS) Direct for industry as well as the result would be in the new PHIS sample result history report. The results would also be in public release data sets that the Agency does quarterly. The WGS data would also be uploaded to NCBI as are other *Salmonella* isolates.

[95] FSIS Microbiology Laboratory Guidebook available at: *https://www.fsis.usda.gov/news-events/publications/microbiology-laboratory-guidebook.*

technologies into its sampling and verification testing.[96]

FSIS does not intend to begin the sampling and verification testing discussed in this final determination until May 1, 2025. This should give establishments enough time to adjust their relevant procedures and processes to facilitate such sampling and testing.

C. Sampled Lot

When FSIS tests a product for adulterants, the Agency withholds its determination as to whether product is not adulterated, and thus eligible to enter commerce, until all test results that bear on the determination have been received.[97] Under this policy, establishments must maintain control of products tested for adulterants to ensure that the products do not enter commerce while waiting for receipt of the test results. Thus, when FSIS samples raw incoming chicken components intended for use in NRTE breaded stuffed chicken products, establishments will need to control and maintain the integrity of the sampled chicken components (*i.e.,* the sampled lots) pending the availability of test results. As noted above, establishments may incorporate sampled lots into finished NRTE breaded stuffed chicken products, so long as those finished products remain under establishment control awaiting test results.

FSIS IPP will give establishments that produce NRTE breaded stuffed chicken product advance notice before they collect a product sample for verification testing to give the establishment enough time to hold or control the sampled lot. Establishments are responsible for providing a supportable basis for defining the sampled lot. For sampling purposes, production lots should be defined such that they are microbiologically independent. Microbiological independence is documented by separation, (*e.g.,* physical, temporal, or by sanitation intervention), that clearly delineates the end of one production lot and the beginning of the next. The microbiological results from one test are independent of prior or later lots. In other words, if a chicken component sample collected prior to stuffing and breading tests positive for *Salmonella* at a level of 1 CFU/g or higher, products from other chicken component lots should not be implicated if the lots are microbiologically independent.

Generally, FSIS recommends that establishments develop and implement in-plant sampling plans that define production lots or sub-lots that are microbiologically independent of other production lots or sub-lots. Production lots that are so identified may bear distinctive markings on the shipping cartons. FSIS has issued guidance to help establishments comply with the requirement that product that FSIS has tested for adulterants does not enter commerce until test results become available.[98] FSIS intends to update the guidance to add NRTE breaded stuffed chicken products. In addition to providing guidance on adequate control measures establishments can implement for products tested for adulterants, the document also includes guidance on how establishments can define a product lot in order to determine the amount of product that must be controlled pending test results. Before implementation, FSIS will update the guidance to cover sampling and verification testing for *Salmonella* in the selected raw incoming chicken components intended for use in NRTE breaded stuffed chicken products.

D. State Programs and Foreign Government Programs

States that have their own poultry inspection programs for poultry products produced and transported solely within the State are required to have mandatory ante-mortem and post-mortem inspection, reinspection, and sanitation requirements that are at least equal to those in the PPIA (21 U.S.C. 454(a)(1)). In accordance with this final determination, these States will need to adopt sampling procedures and testing methods to detect *Salmonella* at 1 CFU/g or above in the chicken component in NRTE breaded stuffed chicken products that are at least equal to FSIS' procedures and testing methods for State-inspected establishments that produce these products.[99] Any State participating in a Cooperative Interstate Shipment Program will need to adopt FSIS' sampling procedures and testing methods to detect *Salmonella* at 1 CFU/g or above in NRTE breaded stuffed chicken products in selected establishments that produce these products for shipment in interstate commerce that are the ''same as'' those utilized by FSIS (21 U.S.C. 472).

Foreign countries that are eligible to export poultry products to the United States must apply inspection, sanitation, and other standards that are equivalent to those that FSIS applies to those products (21 U.S.C. 466). At this time, no foreign countries export NRTE breaded stuffed chicken products to the United States. As discussed in the proposed determination (88 FR 26267), in evaluating a foreign country's poultry products inspection system to determine the country's eligibility to export NRTE breaded stuffed chicken products to the United States, FSIS would consider whether the sampling procedures and testing methods the country uses to detect *Salmonella* at 1 CFU/g in these products are equivalent to those that FSIS uses.

IV. Anticipated Costs and Benefits of This Final Determination

FSIS has considered the economic effects of this determination and has updated the final CBA in response to public comments. In the final CBA, FSIS updated the estimated costs and benefits for the final policy from those published in the preliminary CBA from 2021 to 2022 dollars. Also, in response to public comments, FSIS updated the assumed lot size for FSIS and industry sampling, included a range of wages, updated the assumed type of employee that will conduct establishment led sampling, and updated the assumptions used to estimate cold storage time and costs. With input from the Centers for Disease Control and Prevention (CDC), the Agency included an under-reporting multiplier of 25.5 to estimate the actual number of *Salmonella* illnesses associated with outbreaks from NRTE breaded stuffed chicken products.[100] [101]

[96] For example, on July 8, 2022, FSIS announced that it had awarded a contract to bioMérieux to incorporate its non-enrichment quantification system for *Salmonella,* 'GENE–UP™ QUANT *Salmonella,*' into the Agency's laboratory system. The Agency evaluated commercially available quantification systems and determined that this technology is the most appropriate for use in the high throughput FSIS laboratory environment. FSIS stated that in the future, the Agency would announce when the method is available and when it will be implemented in all three FSIS food testing laboratories. FSIS also stated that it plans to extend pathogen quantification technology to sample types other than raw poultry rinses in the future (see FSIS Constituent Update, Jul 8, 2022, *FSIS to include Salmonella Quantification in Raw Poultry Rinse Samples.* Available at: *https://www.fsis.usda.gov/news-events/news-press-releases/constituent-update-july-8-2022#:~:text=Salmonella%20quantification%20is%20a%20significant%20step%20in%20FSIS%E2%80%99,regulatory%20sample%2C%20not%20solely%20its%20presence%20or%20absence.*

Continued

In the final determination, the Agency also includes an estimated opportunity cost for the Agency to implement the new sampling and testing program and updated the impact on small businesses analysis.[102] The full analysis is available at: *https://www.regulations.gov/docket/FSIS-2022-0013/document.*

Summary of Estimated Costs and Benefits

The final determination is expected to impact six domestic establishments and cost industry at least $5.29 million annually, assuming a 7 percent discount rate over a ten-year period. These costs are associated with HACCP plan reassessments, holding sampled chicken components or finished products in storage awaiting FSIS test results, the costs associated with developing and implementing an establishment-conducted sampling program and destroying or diverting the chicken components of NRTE breaded stuffed chicken with *Salmonella* levels at or over the 1 CFU/g limit. Industry may also incur other costs associated with their individual responses to this policy, including applying interventions, training, product reformulation and label changes, and subsequent HACCP plan validation. However, based on public comments, the Agency does not expect establishments to make these changes. If establishments were to implement these additional changes, then we would expect both additional costs and benefits. The Agency would incur an opportunity cost of $0.02 million associated with sampling and testing for *Salmonella.,* FSIS will be able to shift existing resources as necessary to conduct sampling, testing, and associated FSAs to implement the final determination. The estimated total cost for this policy is $5.31 million: $5.29 million in costs to industry and $0.02 million in opportunity costs for FSIS, assuming a 7 percent discount rate over a 10-year period.

The estimated benefits for this policy are derived from preventing outbreak-related recalls.[103] Each prevented outbreak-related recall has an estimated benefit of $34.99 million ($1.42 million in health benefits + $33.57 million in industry benefits). Between 2006 and 2021 there was one outbreak every 1.36 years on average (15 years ÷ 11 outbreaks). Total benefits will exceed total costs if the new policy prevents at least 1 outbreak-related recall every 6.6 years ($34.99 million ÷ $5.31million).[104] Though the policy may not prevent every possible outbreak-related recall, the Agency expects it will prevent at least 1 every 6.6 years.

Without this policy, there is a higher risk of *Salmonella* illnesses from NRTE breaded stuffed chicken products. When only considering health benefits, the policy would break-even if 1,134 illnesses were avoided annually ($5.31 million ÷ $4,682).[105] The smallest number of cases associated with an outbreak from NRTE breaded stuffed chicken products occurred in 2009, with 2 reported cases, which represents an estimated 51 cases and a cost burden of $0.24 million, when applying the under-reporting multiplier of 25.5.[106] The largest number of reported cases associated with outbreaks occurred between 2008–2009, with 47 reported cases, which represents 1,199 estimated cases and a cost burden of $5.6 million, when applying the under-reporting multiplier.[107] [108] Despite proper labeling, the most recent outbreak in 2021 occurred with 36 reported cases, which represents 918 estimated cases and a cost burden of $4.3 million. In the final determination, FSIS is declaring NRTE breaded stuffed chicken products that contain *Salmonella* at levels of 1 CFU/g or higher adulterated. FSIS intends to carry out verification procedures, including sampling and testing of the raw incoming chicken components used to produce NRTE breaded stuffed chicken products, to verify that producing establishments do not produce adulterated products. This determination, and the associated FSIS verification procedures, should decrease the number of illnesses associated with *Salmonella* in NRTE breaded stuffed chicken products.

Impact on Small Businesses

In the CBA, FSIS defines high-volume establishments as establishments that produce at least 1 million pounds of NRTE breaded stuffed chicken products annually and low-volume establishments as establishments that produce less than 1 million pounds annually. Using these categories, three of the six establishments that produce NRTE stuffed chicken products were classified as high-volume, and three establishments as low volume. All three of the low-volume establishments are HACCP size small or very small.[109] FSIS expects the cost burden of this determination on low-volume establishments would be under 4.2 percent of the estimated revenue from NRTE stuffed chicken for these three establishments. Establishments are not required to develop and implement their own sampling programs in response to this determination. If establishments chose to avoid these voluntary costs, the final determination is estimated to cost low-volume establishments about 1.9 percent of estimated revenue from NRTE breaded stuffed chicken products produced at these three establishments. In addition, nearly 90 percent of production at two of the three low-volume establishments is product other than NRTE breaded stuffed chicken. Thus, the impact of this final determination would represent a smaller percentage of these establishments' overall total revenue. Further, once the policy is implemented, FSIS does not intend to begin the FSIS sampling and the verification testing discussed in the final determination until 12 months after the date of publication in the **Federal Register**. A small business would have this time to prepare for changes, lowering the burden. Finally, establishments needing monetary assistance with this new policy may be able to take advantage of the grants and financial options available to small

[101] FSIS used the under-reporting multiplier of 25.5 estimated in Scallan et al. for a group of pathogens for which only outbreak data were available to approximate the total number of cases for NRTE stuffed chicken products. FSIS used this under-reporting multiplier as only outbreak data is available for NRTE stuffed chicken products.

[102] As noted by the Office of Management and Budget in the Circular No. A–4 published on November 9, 2023. Opportunity costs ''is the cost attributable to a regulation if an agency will be performing enforcement activities or otherwise using resources in connection with that regulation, even if the agency's budget is not increasing.'' *https://www.whitehouse.gov/wp-content/uploads/2023/11/CircularA-4.pdf.* Accessed on 02/15/2024.

[103] Though each reported outbreak between 2006 and 2021 did not result in a recall, FSIS assumes there is a risk of recall with each possible *Salmonella* outbreak.

[104] Numbers may not add up due to rounding.

[105] Number rounded to the nearest whole number.

[106] Scallan E, Hoekstra RM, Angulo FJ, Tauxe RV, Widdowson MA, Roy SL, Jones JL, Griffin PM. Foodborne illness acquired in the United States—major pathogens pdf icon [PDF—9 pages]. Emerging Infectious Diseases. 2011;17(1):7–15: *https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3375761/.*

[107] Food Safety and Inspection Service, USDA. *Salmonella* in Not Ready-To-Eat Breaded Stuffed Chicken Products. Final Determination. Docket No. FSIS–2022–0013, available at: *https://www.regulations.gov/docket/FSIS-2022-0013.*

[108] The FSIS estimate for the cost of *Salmonella*-related illness $4,682 per case, (2022 dollars) was developed using the USDA, Economic Research Service, Cost Estimates of Foodborne Illness *Salmonella* (October 2014) updated for inflation. *https://www.ers.usda.gov/data-products/cost-estimates-of-foodborne-illnesses/.* The cost model accounts for medical costs (including hospitalizations), premature death and productivity loss. Numbers may not calculate due to rounding.

[109] Under the HACCP size definitions, large establishments have 500 or more employees, small establishments have between 10 and 499 employees, and very small establishments have less than 10 employees or less than $2.5 million in annual revenue. 61 FR 38806.

establishments, reducing potential burden. More information on these loans and grants can be found on the FSIS website.[110]

V. USDA Non-Discrimination Statement

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (*e.g.,* Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; the USDA TARGET Center at (202) 720–2600 (voice and TTY).

To file a program discrimination complaint, a complainant should complete a Form AD–3027, USDA Program Discrimination Complaint Form, which can be obtained online at *https://www.usda.gov/forms/electronicforms,* from any USDA office, by calling (866) 632–9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights (ASCR) about the nature and date of an alleged civil rights violation. The completed AD–3027 form or letter must be submitted to USDA by:

(1) *Mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410;

(2) *Fax:* (833) 256–1665 or (202) 690–7442; or

(3) *Email: program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

[110] Grants and Financial Options, USDA FSIS *https://www.fsis.usda.gov/inspection/apply-grant-inspection/grants-financial-options.*

VI. Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS web page located at: *https://www.fsis.usda.gov/federal-register.* FSIS also will make copies of this publication available through the FSIS *Constituent Update,* which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The *Constituent Update* is available on the FSIS web page. Through the web page, FSIS is able to provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: *https://www.fsis.usda.gov/subscribe.* Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves and have the option to password protect their accounts.

Paul Kiecker,

Administrator.

BILLING CODE 3410–DM–P

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

[Docket ID: NRCS–2024–0007]

Urban Agriculture and Innovative Production Advisory Committee

AGENCY: Natural Resources Conservation Service, United States Department of Agriculture.

ACTION: Notice to solicit nominees.

SUMMARY: The Department of Agriculture's (USDA) Office of Urban Agriculture and Innovative Production (OUAIP) is seeking nominations for individuals to serve on the Urban Agriculture and Innovative Production Advisory Committee (UAIPAC). The UAIPAC advises the Secretary of Agriculture on the development of policies and outreach relating to urban, indoor, and other emerging agricultural production practices. The 12 members appointed by the Secretary of Agriculture are expected to serve a 3-year term. The nomination period includes four vacancies, including the: urban producer representative; higher education or extension program representative; business and economic development representative; and representative with related experience in urban, indoor, and other emerging agriculture production practices.

DATES: USDA will consider nominations received via email or postmarked by July 1, 2024.

ADDRESSES: Please send nominations via email to: *UrbanAgricultureFederalAdvisoryCommittee@usda.gov.* Email is the preferred method for sending nominations; alternatively, nominations can be mailed to Brian Guse, Director of the Office of Urban Agriculture and Innovative Production, Department of Agriculture, 1400 Independence Avenue SW, Room 4083, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Markus Holliday, Coordinator, Office of Urban Agriculture and Innovative Production; telephone: (301) 974–1287; email: *UrbanAgricultureFederalAdvisoryCommitee@usda.gov.*

Individuals who require alternative means for communication may contact the USDA TARGET Center at (202) 720–2600 (voice and text telephone (TTY)) or dial 711 for Telecommunications Relay service (both voice and text telephone users can initiate this call from any telephone).

SUPPLEMENTARY INFORMATION:

UAIPAC Overview and Membership

Section 222 of the Department of Agriculture Reorganization Act of 1994, as amended, by section 12302 of the 2018 Farm Bill (7 U.S.C. 6923; Pub. L. 115–334), directed the Secretary of Agriculture to establish an ''Urban Agriculture and Innovative Production Advisory Committee'' to advise the Secretary on any aspect of section 222, including the development of policies and outreach relating to urban, indoor, and other emerging agricultural production practices as well as identify any barriers to urban agriculture. UAIPAC will host public meetings to deliberate on recommendations for the Secretary of Agriculture. These recommendations provide advice to the Secretary on supporting urban agriculture and innovative production through USDA's programs and services. For additional background and member information visit the UAIPAC website at *https://www.usda.gov/partnerships/federal-advisory-committee-urban-ag.*

The UAIPAC consists of 12 members including:

- 4 representatives who are agriculture producers including 2 individuals who are located in an urban

area or urban cluster; and 2 individuals who are farmers that use innovative technology;

- 2 representatives from an institution of higher education or extension program;
- 1 representative from a nonprofit organizaton, which may include a public health, environmental, or community organization;
- 1 representative who represents business and economic development, which may include a business development entity, a chamber of commerce, a city government, or a planning organization;
- 1 expert with supply chain experience, which may include a food aggregator, wholesale food distributor, food hub, or an individual who has direct-to-consumer market experience;
- 1 representative from a financing entity; and
- 2 representatives with related experience or expertise in urban, indoor, and other emerging agriculture production practices, as determined by the Secretary.

Member Nominations

Nominations are open to the public. Any interested person or organization may nominate qualified individuals for membership, including self-nominations. Individuals who wish to be considered for membership must submit a nomination package to include the following required items:

(1) A completed background disclosure form (Form AD–755) signed by the nominee (see *https://www.usda.gov/sites/default/files/documents/ad-755.pdf*);

(2) A brief summary explaining the nominee's interest in one or more open vacancies including any unique qualifications that address the membership composition and criteria described above; and

(3) A résumé providing the nominee's background, experience, and educational qualifications.

It will be helpful to include the following optional items in your nomination package:

(1) Recent publications by the nominee relative to extending support for urban agriculture or innovative production; and

(2) Letter(s) of endorsement.

Please send nominations via email to: *UrbanAgricultureFederalAdvisoryCommittee@usda.gov* as the preferred method. Alternatively, nominations can be mailed to Brian Guse, Director of the Office of Urban Agriculture and Innovative Production, Department of Agriculture, 1400 Independence Avenue SW, Room 4083, Washington, DC 20250.

Ethics Statement

To maintain the highest levels of honesty, integrity, and ethical conduct, no committee or subcommittee member may participate in any ''specific party matters'' (for example, matters are narrowly focused and typically involve specific transactions between identified parties) such as a lease, license, permit, contract, claim, grant, agreement, or related litigation with USDA in which the committee or subcommittee member has a direct financial interest. This includes the requirement for committee or subcommittee members to immediately disclose to the Designated Federal Officer (DFO) (for discussion with USDA's Office of Ethics) any specific party matter in which the member's immediate family, relatives, business partners or employer would be directly seeking to financially benefit from the committee's recommendations.

All members will receive ethics training to identify and avoid any actions that would cause the public to question the integrity of the committee's advice and recommendations. Members who are appointed as ''Representatives'' are not subject to Federal ethics laws because the appointment allows them to represent the point(s) of view of a particular group, business sector or segment of the public.

Members appointed as ''Special Government Employees'' (SGEs) are considered intermittent Federal employees and are subject to Federal ethics laws. SGE's are appointed due to their personal knowledge, academic scholarship, background or expertise. No SGE may participate in any activity in which the member has a prohibited financial interest. Appointees who are SGEs are required to complete and submit a Confidential Financial Disclosure Report (OGE–450 form) via the FDonline e-filing database system. Upon request USDA will assist SGEs in preparing these financial reports. To ensure the highest level of compliance with applicable ethical standards USDA will provide ethics training to SGEs on an annual basis. The provisions of these paragraphs are not meant to exhaustively cover all Federal ethics laws and do not affect any other statutory or regulatory obligations to which advisory committee members are subject.

USDA Non-Discrimination Policy

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family or parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Individuals who require alternative means of communication for program information (for example, braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA TARGET Center at (202) 720–2600 (voice and text telephone (TTY)) or dial 711 for Telecommunicaions Relay Service (both voice and text telephone users can initiate this call from any phone). Additionally, program information may be made available in languages other than English.

Equal opportunity practices in accordance with USDA's policies will be followed in all appointments to the FACA Committee: UAIPAC. To ensure that the recommendations of UAIPC have taken into account the needs of the diverse groups served by USDA, membership will include to the extent possible, individuals with demonstrated ability to represent minorities, women, and persons with disabilities. USDA is an equal opportunity provider, employer, and lender.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD–3027, found online at *https://www.usda.gov/oascr/how-to-file-a-program-discrimination-complaint* and at any USDA office or write a letter addressed to USDA and provide in the letter all the information requested in the form. To request a copy of the complaint form, call (866) 632–9992. Submit your completed form or letter to USDA by: (1) mail to: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410; (2) fax: (202) 690–7442; or (3) email: *OAC@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Dated: April 25, 2024.

Cikena Reid,

Committee Management Officer, USDA.

[FR Doc. 2024–09267 Filed 4–30–24; 8:45 am]

BILLING CODE 3410–16–P

DEPARTMENT OF AGRICULTURE

Rural Housing Service

[Docket No. RHS–24–NONE–0015]

Notice of Request for Revision of a Currently Approved Information Collection

AGENCY: Rural Housing Service.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites comments on the Planning and Performing Construction and Other Development information collection package and announces the Rural Housing Service (RHS or the Agency) intention to request a revision for a currently approved information collection from the Office of Management and Budget (OMB).

DATES: Comments on this notice must be received by July 1, 2024.

FOR FURTHER INFORMATION CONTACT: Contact Adyam Negasi, Innovation Center, Regulations Management Division, U.S. Department of Agriculture, 1400 Independence Ave. SW, Washington, DC 20250; Tel: 202–221–9298; Email: *Adyam.Negasi@usda.gov.*

SUPPLEMENTARY INFORMATION: The Office of Management and Budget's regulation (5 CFR 1320) implementing provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104–13) requires that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d)). This notice identifies an information collection that the Agency is submitting to OMB for revision.

Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumption used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques on other forms and information technology.

Comments may be sent by the Federal eRulemaking Portal: Go to *https://www.regulations.gov* and, in the ''Search'' box, type in the Docket No. RHS–24–NONE–0015. A link to the Notice will appear. You may submit a comment here by selecting the ''Comment'' button or you can access the ''Docket'' tab, select the ''Notice,'' and go to the ''Browse & Comment on Documents'' tab. Here you may view comments that have been submitted as well as submit a comment. To submit a comment, select the ''Comment'' button, complete the required information, and select the ''Submit Comment'' button at the bottom. Information on using *Regulations.gov*, including instructions for accessing documents, submitting comments, and viewing the docket after the close of the comment period, is available through the site's ''FAQ'' link at the bottom.

Title: 7 CFR 1924–A, Planning and Performing Construction and other Development.

OMB Number: 0575–0042.

Expiration Date of Approval: 08/30/2024.

Type of Request: Revision of a currently approved information collection.

Abstract: RHS offers a supervised credit program to build modest housing and essential community facilities in rural areas. The information collection under OMB Number 0575–0042 enables RHS to effectively administer the policies, methods, and responsibilities needed to demonstrate compliance with applicable acts for planning and performing development work for these facilities.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average .32 hours per response.

Respondents: Individuals or households, farms, business or other for-profit, non-profit institutions, and small businesses or organizations.

Estimated Number of Respondents: 189,639.

Estimated Number of Responses per Respondent: 1.81.

Estimated Number of Responses: 343,109.

Estimated Total Annual Burden on Respondents: 108,713 hours.

Copies of this information collection can be obtained from Adyam Negasi, Rural Development Innovation Center, Regulations Management Division, at 202–221–9298. All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Cathy Glover,

Acting Administrator, Rural Housing Service.

BILLING CODE 3410–XV–P

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

[DOCKET #: RUS–24–AGENCY–0007]

Notice of Revision of a Currently Approved Information Collection

AGENCY: Rural Utilities Service

ACTION: Notice; request for comments

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 the Rural Utilities Service (RUS) announces its intention to request a revision for a currently approved information collection package for the Rural Broadband Loans, Loan/Grant Combinations, and Loan Guarantees program.

DATES: Comments on this notice must be received by July 1, 2024 to be assured of consideration.

ADDRESSES: Comments may be submitted electronically by the Federal eRulemaking Portal, *regulations.gov*.

Other Information: Additional information about Rural Development (RD) and its programs is available on the internet at *rd.usda.gov.*

FOR FURTHER INFORMATION CONTACT: Adyam Negasi, RD Innovation Center—Regulations Management Division, U.S. Department of Agriculture, 1400 Independence Ave. SW, Washington, DC 20250; Tel: 202–221–9298; Email: *Adyam.Negasi@usda.gov.*

SUPPLEMENTARY INFORMATION: The Office of Management and Budget's (OMB) regulation (5 CFR part 1320) implementing provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104–13) requires that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d)). This notice identifies an information collection that the Agency is submitting to OMB for revision.

Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumption used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques on other forms and information technology.

Comments may be sent by the Federal eRulemaking Portal, *regulations.gov*. In the ''Search for dockets and documents on agency actions'' box enter the Docket No. RUS–24–AGENCY–0007 and click the ''Search'' button. From the search results: click on or locate the document title and select the ''Comment'' button. To submit a comment: Insert comments under the ''Comment'' title. Select if you are an individual, organization, or anonymous. Select the box ''I'm not a robot,'' and then select ''Submit Comment.'' Information on using *regulations.gov*, including instructions for accessing documents, submitting comments, and viewing the docket after the close of the comment period, is available through the site's ''FAQ'' link.

All comments will be available for public inspection online at the Federal eRulemaking Portal (*https://www.regulations.gov*).

Title: Rural Broadband Loans, Loan/Grant Combinations, and Loan Guarantees.

OMB Control Number: 0572–0154.

Type of Request: Revision of a currently approved information collection under 7 CFR part 1738.

Abstract: RUS is authorized by Title VI, Rural Broadband Access, of the Rural Electrification Act of 1936, as amended (RE Act), to provide loans, loan/grant combinations and loan guarantees to fund the cost of construction, improvement, or acquisition of facilities and equipment for the provision of broadband service in eligible rural areas in the States and Territories of the United States. The regulation, 7 CFR part 1738, prescribes the types of loans and/or grants available, facilities financed, and eligible applicants, as well as minimum equity requirements to be considered for a loan.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 3.04 hours per response.

Respondents: Public Bodies; Non-Profits; Special Districts; Tribal Organizations.

Estimated Number of Respondents: 90.

Estimated Number of Responses per Respondent: 3.03.

Estimated Number of Responses: 273.

Estimated Total Annual Burden on Respondents: 831 hours.

Copies of this information collection can be obtained from Adyam Negasi, RD Innovation Center—Regulations Management Division, at 202–221–9298 or *Adyam.negasi@usda.gov.*

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Andrew Berke,

Administrator, Rural Utilities Service, USDA Rural Development.

Rural Business-Cooperative Service

Rural Housing Service

Rural Utilities Service

[Docket No. RBS–23–BUSINESS–0025]

Notice of Solicitation of Applications (NOSA) for the Strategic Economic and Community Development Program for Fiscal Year (FY) 2024; Correction

AGENCY: Rural Business-Cooperative Service, Rural Housing Service, and Rural Utilities Service, USDA.

ACTION: Notice; correction.

SUMMARY: The Rural Business-Cooperative Service, Rural Housing Service, and Rural Utilities Service, agencies that comprise the Rural Development Mission Area within the United States Department of Agriculture, published a notice of solicitation of applications in the **Federal Register** on February 13, 2024, entitled ''Notice of Solicitation of Applications (NOSA) for the Strategic Economic and Community Development Program for Fiscal Year (FY) 2024.'' The NOSA provides requirements to applicants submitting applications for Strategic Economic and Community Development (SECD) points through Secretary of Agriculture designated covered programs. Based on funding availability guidance published in the NOSA, this Correction Notice is issued to clarify that Community Facilities Grant Program funds will not be reserved for SECD in FY 2024. This Correction Notice also clarifies that approved USDA Rural Partners Network (RPN) networks are considered multi-jurisdictional entities for purposes of SECD and that community and economic development plans created in association with an RPN network will be accepted as plans under SECD.

FOR FURTHER INFORMATION CONTACT: Greg Batson, Rural Development Innovation Center, U.S. Department of Agriculture, Stop 0793, 1400 Independence Avenue SW, Washington, DC 20250–0783, Telephone: (573) 239–2945. Email: *gregory.batson@usda.gov.*

SUPPLEMENTARY INFORMATION:

Corrections

In FR Doc 2024–02782 of February 13, 2024 (89 FR 10026), make the following correction of reference in the NOSA to ''Community Facilities Grants'' which is being removed by this Correction:

(1) On page 10026, in column 3, under Supplementary Information in the Overview section, following the funding opportunity number, remove the second bullet for ''Community Facilities Grants; see 7 CFR part 3570, subpart B.''

(2) On page 10027, in column 1, under section A.3. The Covered Programs, following the second paragraph, remove the second bullet, ''Community Facilities Grants; see 7 CFR part 3570, subpart B.''

(3) On page 10027, in column 2, section B. Federal Award Information, after the Available Funds heading, remove the first three sentences and replace with: ''The amount of reserved funds available for SECD covered projects is as follows; Community Facilities Loans funding is $280,000,000, and Community Facilities Guaranteed Loans funding is $32,500,000, Water and Waste Disposal Programs Guaranteed Loans funding is $5,000,000, Water and Waste Disposal Direct Loans funding is $42,500,000, Water and Waste Disposal Grants funding is $11,935,000, and Rural Business Development Grants funding is $1,350,000 for Enterprise Grants and $150,000 for Opportunity Grants.

(4) On page 10027, in column 2, in section B. Federal Award Information, remove the second line of the table referencing ''Community Facilities Grant Program'' and the associated percentage of funds reserved for SECD Community Facilities Grant Program in column 2 of the table.

(5) On page 10027, in column 3, under section C. Eligibility Information, 1. Eligible Applicants, replace the 5th paragraph with ''The third criterion is that the project supports partial or complete implementation of a strategic community investment plan on a multi-jurisdictional and multi-sectoral basis as defined in 7 CFR 1980.1005. USDA Rural Partners Network (RPN) networks are considered multi-jurisdictional entities for purposes of SECD and community and economic development plans created in association with an RPN network will be accepted as plans under SECD.''

Basil I. Gooden,

Under Secretary, Rural Development.

BILLING CODE 3410–XY–P

DEPARTMENT OF COMMERCE

Office of the Secretary

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Generic for Funding Opportunity Announcements and Related Forms

AGENCY: Office of the Secretary, Department of Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before July 1, 2024.

ADDRESSES: Interested persons are invited to submit written comments by mail to the Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, at *PRAcomments@doc.gov.* Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to the Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, at 1401 Constitution Avenue NW, Washington, DC 20230 or *PRAcomments@doc.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for a new generic clearance to collect data to help to ensure grants, cooperative agreements and other Federal financial assistance programs are awarded to applicants best suited to perform the functions of the awards.

Periodically Commerce solicits grant applications on *http://grants.gov* by issuing a Funding Opportunity Announcement, Request for Applications, Notice of Funding Announcement, Notice of Solicitation of Applications, *Grants.gov* announcement, or other funding announcement type. Applicants are generally required to perform two pre-award steps The first part of Commerce grant applications consists of submitting the application form(s), which includes the Standard Form 424, Application for Federal Assistance and may include additional standard grant application forms. The second part of a grant application usually requires a technical proposal demonstrating the applicant's capabilities in accordance with a statement of work or selection criteria and other related information as specified in the funding announcement. Following the grant award, the grant awardee may also be required to provide progress reports or additional documents.

In addition to grants and agreements, there are other types of funding announcements. Commerce agencies announce new Federal financial assistance programs in the **Federal Register** in a Notice of Funding Availability (NOFA) or other types of funding or program announcements. Generally, the applicants need to apply for financial assistance under the new program. The agencies generally require application forms and related forms for the applicants to apply for Federal financial assistance.

II. Method of Collection

Program offices may use various methods of collection. This could include web pages, email, mail, *Grants.gov* or other online data management systems.

III. Data

OMB Control Number: 0690–NEW.

Form Number(s): Varies or None.

Type of Review: Regular submission. This is a new information collection.

Affected Public: Individuals or households; Private Sector; Not-for-profit institutions; State, Local, or Tribal government.

Estimated Number of Respondents: 10,000.

Estimated Time per Response: Varies.

Estimated Total Annual Burden Hours: 100,000.

Respondent's Obligation: Voluntary or Mandatory.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–17–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 2161]

Approval of Expansion of Subzone 183B; Samsung Austin Semiconductor, LLC; Taylor, Texas

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones (FTZ) Act provides for ''. . . the establishment . . . of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes,'' and authorizes the Foreign-Trade Zones Board to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs and Border Protection ports of entry;

Whereas, the Board's regulations (15 CFR part 400) provide for the establishment of subzones for specific uses;

Whereas, the Foreign Trade Zone of Central Texas, Inc., grantee of Foreign-Trade Zone 183, has made application to the Board for an expansion of Subzone 183B on behalf of Samsung

Austin Semiconductor, LLC, to include a site located in Taylor, Texas (FTZ Docket B–66–2023, docketed December 28, 2023);

Whereas, notice inviting public comment has been given in the **Federal Register** (89 FR 319, January 3, 2024) and the application has been processed pursuant to the FTZ Act and the Board's regulations; and,

Whereas, the Board adopts the findings and recommendations of the examiners' memorandum, and finds that the requirements of the FTZ Act and the Board's regulations are satisfied;

Now, therefore, the Board hereby approves the expansion of Subzone 183B on behalf of Samsung Austin Semiconductor, LLC, located in Taylor, Texas, as described in the application and **Federal Register** notice, subject to the FTZ Act and the Board's regulations, including section 400.13.

Dated: April 25, 2024.

Dawn Shackleford,

Executive Director of Trade Agreements Policy & Negotiations, Alternate Chairman, Foreign-Trade Zones Board.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[S–70–2024]

Foreign-Trade Zone 273; Application for Subzone; Sediver USA, Inc.; West Memphis, Arkansas

An application has been submitted to the Foreign-Trade Zones (FTZ) Board by the City of West Memphis, Arkansas Public Facilities Board, grantee of FTZ 273, requesting subzone status for the facility of Sediver USA, Inc., located in West Memphis, Arkansas. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the FTZ Board (15 CFR part 400). It was formally docketed on April 17, 2024.

The proposed subzone (1.926 acres) is located at One Sediver Way in West Memphis, Arkansas. No authorization for production activity has been requested at this time. The proposed subzone would be subject to the existing activation limit of FTZ 273.

In accordance with the FTZ Board's regulations, Camille Evans of the FTZ Staff is designated examiner to review the application and make recommendations to the Executive Secretary.

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary and sent to: *ftz@trade.gov.* The closing period for their receipt is June 10, 2024. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to June 25, 2024.

A copy of the application will be available for public inspection in the ''Online FTZ Information Section'' section of the FTZ Board's website, which is accessible via *www.trade.gov/ftz.*

For further information, contact Camille Evans at *Camille.Evans@trade.gov.*

Dated: April 17, 2024.

Elizabeth Whiteman,

Executive Secretary.

Multilayered Wood Flooring From the People's Republic of China: Final Results of Antidumping Duty Administrative Review and Final Determination of No Shipments; 2021–2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that Jiangsu Senmao Bamboo and Wood Industry Co., Ltd. (Senmao) made sales of multilayered wood flooring (wood flooring) from the People's Republic of China (China) at prices below normal value during the period of review (POR) December 1, 2021, through November 30, 2022. Commerce also determines that certain companies had no shipments during the POR.

DATES: Applicable May 1, 2024.

FOR FURTHER INFORMATION CONTACT: Davyd Williams, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4338.

SUPPLEMENTARY INFORMATION:

Background

Commerce published the preliminary results of the administrative review on December 26, 2023.[1] For a complete description of the events that occurred since Commerce published the *Preliminary Results, see* the Issues and Decision Memorandum.[2] Commerce conducted this review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order[3]

The product covered by the *Order* is wood flooring from China. A full description of the scope of the *Order* is contained in the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the parties' case and rebuttal briefs are addressed in the Issues and Decision Memorandum. A list of these issues is included as Appendix I to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Changes From the Preliminary Results

Based on our analysis of the comments received, Commerce made certain revisions to the calculation of the preliminary weighted-average dumping margin assigned to Senmao and the non-examined, separate rate respondents. The Issues and Decision Memorandum contains descriptions of these revisions.

[1] *See Multilayered Wood Flooring from the People's Republic of China: Preliminary Results of the Antidumping Duty Administrative Review, Preliminary Determination of No Shipments, and Rescission of Review, in Part; 2021–2022,* 88 FR 88869 (December 26, 2023) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum (PDM).

[2] *See* Memorandum, ''Issues and Decision Memorandum for the Final Results of the 2021–2022 Administrative Review of the Antidumping Duty Order on Multilayered Wood Flooring from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

[3] *See Multilayered Wood Flooring from the People's Republic of China: Notice of Amended Final Affirmative Determination of Sales at Less than Fair Value and Antidumping Duty Order,* 76 FR 76690 (December 8, 2011), as amended in *Multilayered Wood Flooring from the People's Republic of China: Amended Antidumping and Countervailing Duty Orders,* 77 FR 5484 (February 3, 2012) (collectively, *Order*); *see also Multilayered Wood Flooring from the People's Republic of China: Final Clarification of the Scope of the Antidumping and Countervailing Duty Orders,* 82 FR 27799 (June 19, 2017).

Final Determination of No Shipments

In the *Preliminary Results,* Commerce determined that certain companies did not have shipments of subject merchandise during the POR. As we received no information to contradict our preliminary determination with respect to those companies, we continue to find that they made no shipments of subject merchandise to the United States during the POR. Accordingly, we will issue appropriate instructions that are consistent with our ''automatic assessment'' clarification for all of the companies listed in Appendix II.[4]

Separate Rates

Consistent with the *Preliminary Results,* we determine that Senmao and two additional companies that were not selected for individual examination, Dalian Jaenmaken Wood Industry Co., Ltd. and Dalian Deerfu Wooden Product Co., Ltd., demonstrated their eligibility for separate rates.[5]

Rate for Non-Examined Separate Rate Respondents

The statute and Commerce's regulations do not address the establishment of a rate to be assigned to respondents not selected for individual examination when we limit our examination of companies subject to the administrative review pursuant to section 777A(c)(2)(B) of the Act. Generally, we look to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in an investigation, for guidance when calculating the rate for respondents not individually examined in an administrative review. Under section 735(c)(5)(A) of the Act, the all-others rate is normally ''an amount equal to the weighted average of the estimated weighted average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely {on the basis of facts available}.'' Accordingly, Commerce's normal practice in determining the rate for separate-rate respondents not selected for individual examination, has been to average the weighted-average dumping margins of the selected companies, excluding rates that are zero, *de minimis,* or based entirely on facts available.[6] However, when the weighted-average dumping margins established for all individually investigated respondents are zero, *de minimis,* or based entirely on facts available, section 735(c)(5)(B) of the Act permits Commerce to ''use any reasonable method to establish the estimated all-others rate for exporters and producers not individually investigated, including averaging the estimated weighted-average dumping margins determined for the exporters and producers individually investigated.'' [7]

For the final results of this administrative review, we determine that the estimated weighted-average dumping margin for Senmao is not zero or *de minimis.* Thus, we are assigning Senmao's weighted-average dumping margin as the rate for the non-examined respondents which qualify for a separate rate in this review as a ''reasonable method'' for assigning a rate to the non-examined respondents.[8]

The China-Wide Entity

Aside from the companies for which we made a final no-shipment determination, Commerce considers all other companies for which a review was requested, and which did not demonstrate separate rate eligibility, to be part of the China-wide entity.[9]

Final Results of Review

Commerce determines that the following weighted-average dumping margins exist for the period December 1, 2021, through November 30, 2022:

Producer/exporter	Weighted-average dumping margin (percent)
Jiangsu Senmao Bamboo and Wood Industry Co., Ltd	19.78
Dalian Jaenmaken Wood Industry Co., Ltd	19.78
Dalian Deerfu Wooden Product Co., Ltd	19.78

Disclosure

Commerce intends to disclose the calculations performed in connection with these final results of review to interested parties within five days after public announcement of the final results or, if there is no public announcement, within five days of the date of publication of the notice of final results in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b), Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with these final results of review. We intend to issue assessment instructions to CBP no earlier than 35 days after the date of publication of these final results. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

For Senmao, whose weighted-average dumping margin is not zero or *de minimis* (*i.e.,* less than 0.5 percent) in the final results of this review, and because we do not have entered values for all U.S. sales to a particular importer (or customer), Commerce calculated a per-unit assessment rate by dividing the total amount of dumping for reviewed sales of subject merchandise to that importer (or customer) by the total quantity sold to that importer (or customer).

We intend to instruct CBP to assess antidumping duties on all appropriate entries covered by this review when the importer-specific assessment rate calculated is above *de minimis* (*i.e.,* 0.50 percent). To determine whether the duty assessment rates are *de minimis,* in accordance with the requirement set forth in 19 CFR 351.106(c)(2), we calculate importer- (or customer-) specific *ad valorem* ratios based on the estimated entered value. Where an importer-specific per-unit assessment rate is zero or *de minimis,* Commerce will instruct CBP to liquidate appropriate entries without regard to antidumping duties.[10]

For U.S. entries that were not reported in the U.S. sales data submitted by Senmao, but that entered under Senmao's case number (*i.e.,* at Senmao's cash deposit rate), Commerce will instruct CBP to liquidate such entries at the cash deposit rate for the China-wide

[4] *See Non-Market Economy Antidumping Proceedings: Assessment of Antidumping Duties,* 76 FR 65694 (October 24, 2011) (*Assessment Notice*); *see also* the ''Assessment Rates'' section, *infra.*

[5] *See Preliminary Results* PDM at 8–11.

[6] *See Longkou Haimeng Mach. Co.* v. *United States,* 581 F. Supp. 2d 1344, 1357–60 (CIT 2008) (affirming Commerce's determination to assign a 4.22 percent dumping margin to the separate rate respondents in a segment where the three mandatory respondents received dumping margins of 4.22 percent, 0.03 percent, and zero percent, respectively); *see also Certain Kitchen Appliance Shelving and Racks from the People's Republic of China: Final Determination of Sales at Less Than Fair Value,* 74 FR 36656, 36660 (July 24, 2009).

[7] *See Albemarle Corp.* v. *United States,* 821 F.3d 1345 (Fed. Cir. 2016).

[8] *See* section 735(c)(5)(B) of the Act.

[9] *See* Appendix III.

[10] *See* 19 CFR 351.106(c)(2).

entity (*i.e.,* 85.13 percent).[11] For the companies not individually examined in this administrative review that qualified for a separate rate, the assessment rate will be equal to the weighted-average dumping margin calculated for Senmao in these final results of review.

Consistent with Commerce's assessment practice in non-market economy cases, for the companies which Commerce determined had no shipments of the subject merchandise, any suspended entries made under those exporters' case numbers (*i.e.,* at the exporters' rates) will be liquidated at the China-wide rate.[12]

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of these final results for shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) for companies which were found eligible for a separate rate in this review, the cash deposit rate will be 19.78 percent; (2) for previously investigated or reviewed Chinese and non-Chinese exporters that received a separate rate in a prior segment of this proceeding, the cash deposit rate will continue to be the existing exporter-specific rate; (3) for all Chinese exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be that for the China-wide entity; and (4) for all non-Chinese exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the Chinese exporter that supplied that non-Chinese exporter. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to liquidation of the relevant entries during the POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of double antidumping duties, and/or an increase in the amount of antidumping duties by the amount of countervailing duties.

Administrative Protective Order

This notice also serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

This determination is issued and published in accordance with sections 751(a) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: April 24, 2024.

Ryan Majerus, Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Welded Line Pipe From the Republic of Korea: Final Results of Antidumping Duty Administrative Review; 2021–2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that SeAH Steel corporation (SeAH), the sole producer/exporter of welded line pipe (WLP) from the Republic of Korea (Korea) subject to this administrative review, did not make sales of subject merchandise at less than normal value during the period of review (POR), December 1, 2021, through November 30, 2022.

DATES: Applicable May 1, 2024.

FOR FURTHER INFORMATION CONTACT: Adam Simons, AD/CVD Operations, Office II, Enforcement and Compliance,

International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6172.

SUPPLEMENTARY INFORMATION:

Background

On December 28, 2023, Commerce published the *Preliminary Results* and invited interested parties to comment.[1]

On January 29, 2024, we received a case brief from American Cast Iron Pipe Company, Dura-Bond Industries, Stupp Corporation, Welspun Global Trade LLC, and Axis Pipe & Tube (collectively, the Domestic Interested Parties).[2] On February 12, 2024, we received a rebuttal brief from SeAH.[3] For a complete description of the events that occurred since the *Preliminary Results, see* the Issues and Decision Memorandum.[4]

Scope of the Order [5]

The merchandise subject to the *Order* is welded line pipe. For a complete description of the scope of the *Order, see* the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs are listed in the appendix to this notice and addressed in the Issues and Decision Memorandum. Interested parties can find a complete discussion of these issues and the corresponding recommendations in this public memorandum, which is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Changes Since the Preliminary Results

Based on a review of the record and comments received from interested parties regarding our *Preliminary Results,* we made certain changes to our calculations for SeAH; however, these changes did not result in a revised margin for SeAH. For a detailed discussion of these changes, *see* the Issues and Decision Memorandum.

Final Results of the Review

As a result of this review, we determine the following estimated weighted-average dumping margin for the period December 1, 2021, through November 30, 2022:

Producer or exporter	Weighted-average dumping margin (percent)
SeAH Steel Corporation	0.00

Disclosure

We intend to disclose the calculations performed for SeAH in connection with these final results to interested parties within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.212(b)(1), Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review.

Pursuant to 19 CFR 351.212(b)(1), SeAH did not report the actual entered value for all of its U.S. sales; in such instances, we calculated importer-specific per-unit duty assessment rates by aggregating the total amount of antidumping duties calculated for the examined sales and dividing this amount by the total quantity of those sales. Where either the respondent's weighted-average dumping margin is zero or *de minimis* within the meaning of 19 CFR 351.106(c)(1), or an importer-specific assessment rate is zero or *de minimis,* we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for the future deposits of estimated duties where applicable.[6]

Commerce's ''automatic assessment'' practice will apply to entries of subject merchandise during the POR produced by SeAH for which it did not know that the merchandise it sold to the intermediary (*e.g.,* a reseller, trading company, or exporter) was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for SeAH will be zero; (2) for previously investigated or reviewed companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which the company participated; (3) if the exporter is not a firm covered in this review, or the original less-than-fair-value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the cash deposit rate established for the most recently completed segment for the producer of the subject merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 4.38 percent, the all-others rate established in the LTFV investigation.[7] These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to

[7] *See Order.*

liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: April 25, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Aluminum Lithographic Printing Plates From the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Preliminary Affirmative Determination of Critical Circumstances, and Postponement of Final Determination and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum lithographic printing plates (printing plates) from People's Republic of China (China) are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is January 1, 2023, through June 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 1, 2024.

FOR FURTHER INFORMATION CONTACT: Benito Ballesteros, AD/CVD Operations, Office IX, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–7425.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce initiated this investigation on October 18, 2023.[1] On February 14, 2024, Commerce postponed the preliminary determination of this investigation, and the revised deadline is now April 25, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics addressed in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are printing plates from China. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] No interested party commented on the scope of the investigation as it appeared in the *Initiation Notice.* Therefore, Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated constructed export prices in accordance with section 772(b) of the Act. Because China is a non-market economy, within the meaning of section 771(18) of the Act, Commerce has calculated normal value in accordance with section 773(c) of the Act. Furthermore, pursuant to sections 776(a) and (b) of the Act, Commerce preliminarily has relied upon facts otherwise available, with adverse inferences, in determining the estimated weighted-average dumping margin for the China-wide entity. For a full description of the methodology underlying Commerce's preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Affirmative Determination of Critical Circumstances

In accordance with section 733(e) of the Act and 19 CFR 351.206, Commerce preliminarily determines that critical

[3] *See* Memorandum, ''Decision Memorandum for the Preliminary Affirmative Determination in the Less-Than-Fair-Value Investigation of Aluminum Lithographic Printing Plates from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[4] *See Antidumping Duties; Countervailing Duties, Final Rule,* 62 FR 27296, 27323 (May 19, 1997).

[5] *See Initiation Notice*, 88 FR at 73317.

circumstances exist with respect to imports of printing plates from China for Fujifilm Printing Plate (China) Co., Ltd. (Fujifilm) and the China-wide entity. For a full description of the methodology and results of Commerce's critical circumstances analysis, *see* the Preliminary Decision Memorandum.

Combination Rates

In the *Initiation Notice*,[6] Commerce stated that it would calculate producer/exporter combination rates for the respondents that are eligible for a separate rate in this investigation. Policy Bulletin 05.1 describes this practice.[7]

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Producer	Exporter	Estimated weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offset) (percent)
Fujifilm Printing Plate (China) Co., Ltd	Fujifilm Printing Plate (China) Co., Ltd	38.57	38.56
China-wide Entity		107.62	107.61

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption, as discussed below. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the weighted average amount by which normal value exceeds U.S. price, as indicated in the chart above, as follows: (1) for the producer/exporter combinations listed in the table above, the cash deposit rate is equal to the estimated weighted-average dumping margin listed for that combination in the table; (2) for all combinations of Chinese producers/exporters of merchandise under consideration that have not established eligibility for their own separate rates, the cash deposit rate will be equal to the estimated weighted-average dumping margin established for the China-wide entity; and (3) for all third-county exporters of merchandise under consideration not listed in the table above, the cash deposit rate is the cash deposit rate applicable to the Chinese producer/exporter combination (or the China-wide entity) that supplied that third-country exporter.

Should the final estimated weighted-average dumping margin be zero or *de minimis* for the producer/exporter combination identified above, entries of merchandise from this producer/exporter combination will be excluded from the order. Such exclusion will not be applicable to merchandise exported to the United States by any other producer/exporter combinations or by third country exporters that sourced from the excluded producer/exporter combination.

Section 733(e)(2) of the Act provides that, given an affirmative determination of critical circumstances, any suspension of liquidation shall apply to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the later of: (a) the date which is 90 days before the date on which the suspension of liquidation was first ordered; or (b) the date on which notice of initiation of the investigation was published. Commerce preliminarily finds that critical circumstances exist for imports of subject merchandise from Fujifilm and the China-wide entity. In accordance with section 733(e)(2)(A) of the Act, the suspension of liquidation shall apply to all unliquidated entries of merchandise that were entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days before the publication of this notice.

To determine the cash deposit rate, Commerce normally adjusts the estimated weighted-average dumping margin by the amount of domestic subsidy pass-through and export subsidies determined in a companion countervailing duty (CVD) proceeding when CVD provisional measures are in effect. Accordingly, where Commerce has made a preliminary affirmative determination for domestic subsidy pass-through or export subsidies, Commerce has offset the calculated estimated weighted-average dumping margin by the appropriate rate(s). Any such adjusted rates may be found in the ''Preliminary Determination'' section's chart of estimated weighted-average dumping margins above.

Should provisional measures in the companion CVD investigation expire prior to the expiration of provisional measures in this LTFV investigation, Commerce will direct CBP to begin collecting cash deposits at a rate equal to the estimated weighted-average dumping margins calculated in this preliminary determination unadjusted for the passed-through domestic subsidies or for export subsidies at the time the CVD provisional measures expire.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose to interested parties the calculations performed in connection with this preliminary determination within five days of its public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[8] Interested

[6] *Id.* at 73320.

[7] *See* Enforcement and Compliance's Policy Bulletin No. 05.1, regarding, ''Separate-Rates Practice and Application of Combination Rates in Antidumping Investigations involving Non-Market Economy Countries,'' (April 5, 2005) (Policy Bulletin 05.1), available on Commerce's website at *https://enforcement.trade.gov/policy/bull05-1.pdf.*

[8] *See* 19 CFR 351.309(d); *see also* 19 CFR 351.303 (for general filing requirements).

parties who submit case briefs or rebuttal briefs in this investigation must submit: (1) a statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.[9]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[10] Further, we request that interested parties limit their executive summary of each issue to no more than 450 words, not including citations. We intend to use the executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[11]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the (1) party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Pursuant to 19 CFR 351.210(e)(2), Commerce requires that requests by respondents for postponement of a final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On March 28, 2024, pursuant to 19 CFR 351.210(e), Fujifilm requested that Commerce postpone the final determination and extend provisional measures to a period not to exceed six months.[12] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the International Trade Commission (ITC) of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of the subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: April 25, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is aluminum lithographic printing plates. Aluminum lithographic printing plates consist of a flat substrate containing at least 90 percent Aluminum. The aluminum-containing substrate is generally treated using a mechanical, electrochemical, or chemical graining process, which is followed by one or more anodizing treatments that form a hydrophilic layer on the aluminum-containing substrate. An image-recording, oleophilic layer that is sensitive to light, including but not limited to ultra-violet, visible, or infrared, is dispersed in a polymeric binder material that is applied on top of the hydrophilic layer, generally on one side of the aluminum lithographic printing plate. The oleophilic light-sensitive layer is capable of capturing an image that is transferred onto the plate by either light or heat. The image applied to an aluminum lithographic printing plate facilitates the production of newspapers, magazines, books, yearbooks, coupons, packaging, and other printed materials through an offset printing process, where an aluminum lithographic printing plate facilitates the transfer of an image onto the printed media. Aluminum lithographic printing plates within the scope of this investigation include all aluminum lithographic printing plates, irrespective of the dimensions or thickness of the underlying aluminum substrate, whether the plate requires processing after an image is applied to the plate, whether the plate is ready to be mounted to a press and used in printing operations immediately after an image is applied to the plate, or whether the plate has been exposed to light or heat to create an image on the plate or remains unexposed and is free of any image.

Subject merchandise also includes aluminum lithographic printing plates produced from an aluminum sheet coil that has been coated with a light-sensitive image-recording layer in a subject country and that is subsequently unwound and cut to the final dimensions to produce a finished plate in a third country (including the United States), or exposed to light or heat to create an image on the plate in a third country (including in a foreign trade zone within the United States).

Excluded from the scope of this investigation are lithographic printing plates manufactured using a substrate produced from a material other than aluminum, such as rubber or plastic.

Aluminum lithographic printing plates are currently classifiable under Harmonized Tariff of the United States (HTSUS) subheadings 3701.30.0000 and 3701.99.6060. Further, merchandise that falls within the scope of this investigation may also be entered into the United States under HTSUS

[9] *See* 19 CFR 351.309(c)(2) and (d)(2).

[10] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[11] *See Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023).

[12] *See* Fujifilm's Letter, ''Fujifilm's Request to Postpone Final Determination,'' dated March 28, 2024.

subheadings 3701.99.3000 and 8442.50.1000. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

Aluminum Lithographic Printing Plates From Japan: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that aluminum lithographic printing plates (printing plates) from Japan are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is July 1, 2022, through June 30, 2023. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 1, 2024.

FOR FURTHER INFORMATION CONTACT: Caroline Carroll, AD/CVD Operations, Office IX, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4948.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce initiated this investigation on October 18, 2023.[1] On February 14, 2024, Commerce postponed the preliminary determination of this investigation, and the revised deadline is now April 25, 2024.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics addressed in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are printing plates from Japan. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] No interested party commented on the scope of the investigation as it appeared in the *Initiation Notice.* Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice. See* the scope in Appendix I to this notice.

Preliminary Collapsing Determination

Based on record evidence in this investigation, Commerce preliminarily finds that Fujifilm Corporation (Fujifilm Corp.) and Fujifilm Shizuoka Co., Ltd. (FFSH) are affiliated companies, pursuant to sections 771(33)(E) and (F) of the Act. Furthermore, pursuant to 19 CFR 351.401(f)(1)–(2), we find that Fujifilm Corp. and FFSH should be collapsed and treated as a single entity (collectively, Fujifilm). For additional information, *see* the Affiliation and Collapsing Memorandum.[6]

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated export prices in accordance with section 772(a) of the Act. Normal value (NV) is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying Commerce's preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Section 733(d)(1)(ii) of the Act provides that in the preliminary determination, Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. Pursuant to section 735(c)(5)(A) of the Act, this rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, Commerce preliminarily assigned a rate based entirely on facts available to Miraclon Corporation Ltd. Therefore, the only rate that is not zero, *de minimis,* or based entirely on facts otherwise available is the rate calculated for Fujifilm. Consequently, the rate calculated for Fujifilm is also assigned as the rate for all other producers and exporters.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
Fujifilm Corporation; Fujifilm Shizuoka Co., Ltd	87.81
Miraclon Corporation Ltd	* 157.16
All Others	87.81

* Rate based on facts available with adverse inferences.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise ; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose to interested parties the calculations performed in connection with this preliminary determination within five days of its public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than five days after the deadline date for case briefs.[7] Interested parties who submit case or rebuttal briefs in this investigation must submit: (1) a statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.[8]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[9] Further, we request that interested parties limit their executive summary of each issue to no more than 450 words, not including citations. We intend to use the executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[10]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the (1) party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Pursuant to 19 CFR 351.210(e)(2), Commerce requires that requests by respondents for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On March 28, 2024, pursuant to 19 CFR 351.210(e), Fujifilm requested that Commerce postpone the final determination and extend provisional measures to a period not to exceed six months.[11] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporter account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the International Trade Commission (ITC) of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of the subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: April 25, 2024

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is aluminum lithographic

[7] *See* 19 CFR 351.309; *see also* 19 CFR 351.303 (for general filing requirements).

[8] *See* 19 CFR 351.309(c)(2) and (d)(2).

[9] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

[10] *See Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023).

[11] *See* Fujifilm's Letter, ''Fujifilm's Request to Postpone Final Determination,'' dated March 28, 2024.

printing plates. Aluminum lithographic printing plates consist of a flat substrate containing at least 90 percent aluminum. The aluminum-containing substrate is generally treated using a mechanical, electrochemical, or chemical graining process, which is followed by one or more anodizing treatments that form a hydrophilic layer on the aluminum-containing substrate. An image-recording, oleophilic layer that is sensitive to light, including but not limited to ultra-violet, visible, or infrared, is dispersed in a polymeric binder material that is applied on top of the hydrophilic layer, generally on one side of the aluminum lithographic printing plate. The oleophilic light-sensitive layer is capable of capturing an image that is transferred onto the plate by either light or heat. The image applied to an aluminum lithographic printing plate facilitates the production of newspapers, magazines, books, yearbooks, coupons, packaging, and other printed materials through an offset printing process, where an aluminum lithographic printing plate facilitates the transfer of an image onto the printed media. Aluminum lithographic printing plates within the scope of this investigation include all aluminum lithographic printing plates, irrespective of the dimensions or thickness of the underlying aluminum substrate, whether the plate requires processing after an image is applied to the plate, whether the plate is ready to be mounted to a press and used in printing operations immediately after an image is applied to the plate, or whether the plate has been exposed to light or heat to create an image on the plate or remains unexposed and is free of any image.

Subject merchandise also includes aluminum lithographic printing plates produced from an aluminum sheet coil that has been coated with a light-sensitive image-recording layer in a subject country and that is subsequently unwound and cut to the final dimensions to produce a finished plate in a third country (including the United States), or exposed to light or heat to create an image on the plate in a third country (including in a foreign trade zone within the United States).

Excluded from the scope of this investigation are lithographic printing plates manufactured using a substrate produced from a material other than aluminum, such as rubber or plastic.

Aluminum lithographic printing plates are currently classifiable under Harmonized Tariff of the United States (HTSUS) subheadings 3701.30.0000 and 3701.99.6060. Further, merchandise that falls within the scope of this investigation may also be entered into the United States under HTSUS subheadings 3701.99.3000 and 8442.50.1000. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

Certain Mobile Access Equipment and Subassemblies Thereof From the People's Republic of China: Preliminary Results and Partial Rescission of Antidumping Duty Administrative Review; 2022–2023

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that Zhejiang Dingli Machinery Co., Ltd. (Dingli), the sole mandatory respondent in this review and an exporter of certain mobile access equipment and subassemblies thereof (MAE) from the People's Republic of China (China), sold subject merchandise in the United States at prices below normal value (NV) during the period of review April 13, 2022, through March 31, 2023. In addition, Commerce is rescinding this review with respect to Oshkosh JLG (Tianjin) Equipment Technology Co., Ltd. (Oshkosh), Lingong Group Jinan Heavy Machinery Co., Ltd. (Lingong), and Terex (Changzhou) Machinery Co., Ltd. (Terex). Interested parties are invited to comment on these preliminary results of review.

DATES: Applicable May 1, 2024.

FOR FURTHER INFORMATION CONTACT: Dmitry Vladimirov, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0665.

SUPPLEMENTARY INFORMATION:

Background

On April 14, 2022, Commerce published in the **Federal Register** the antidumping duty order on MAE from China.[1] On June 12, 2023, based on timely requests for review, in accordance with 19 CFR 351.221(c)(1)(i), we initiated this administrative review of the *Order* with respect to four companies.[2] On December 11, 2023, we extended the deadline for the preliminary results of this review to April 26, 2024.[3] For a complete description of the events that occurred since the initiation of this review, *see* the Preliminary Decision Memorandum.[4] The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.* A list of the topics discussed in the Preliminary Decision Memorandum is attached as an appendix to this notice.

Scope of the Order[5]

The merchandise covered by the *Order* is MAE from China. A full description of the scope of the *Order* is contained in the Preliminary Decision Memorandum.

Partial Rescission of Administrative Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if a party who requested the review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review. On July 11, 2023, the petitioner[6] timely withdrew its request for an administrative review of Oshkosh.[7] On July 26, 2023, Lingong timely withdrew its request for an administrative review.[8] On August 8, 2023, the petitioner timely withdrew its request

for an administrative review of Terex.[9] Because there are no outstanding review requests for these companies, Commerce is rescinding the administrative review of Oshkosh, Lingong, and Terex, consistent with 19 CFR 351.213(d)(1).

Separate Rate

Commerce preliminary determines that Dingli is eligible to receive a separate rate in this administrative review. For additional information, *see* the Preliminary Decision Memorandum.

China-Wide Entity

Commerce's policy regarding the conditional review of the China-wide entity applies to this administrative review.[10] Under this policy, the China-wide entity will not be under review unless a party specifically requests, or Commerce self-initiates, a review of the entity. Because no party requested a review of the China-wide entity in this review, the China-wide entity is not under review, and the China-wide entity's rate (*i.e.,* 165.14 percent) is not subject to change.

Methodology

Commerce is conducting this review in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended (the Act). For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum.[11]

Preliminary Results of the Review

We preliminarily determine that the following weighted-average dumping margin exists for the period April 13, 2022, through March 31, 2023, for the mandatory respondent:

Exporter	Weighted-average dumping margin (percent)
Zhejiang Dingli Machinery Co., Ltd	9.33

Disclosure and Public Comment

Commerce intends to disclose its calculations performed in these preliminary results to interested parties within five days after the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Pursuant to 19 CFR 351.309(c)(1)(ii), interested parties may submit case briefs to Commerce no later than 30 days after the date of publication of this notice. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[12] Interested parties who submit case briefs or rebuttal briefs in this administrative review must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[13] As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this review, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[14] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final results in this administrative review. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in case and rebuttal briefs.

All submissions, including case and rebuttal briefs, as well as hearing requests, should be filed using ACCESS.[15] An electronically filed document must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Time on the established deadline. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[16]

Final Results of Review

Unless the deadline is extended, Commerce intends to issue the final results of this administrative review, including the results of its analysis of issues raised in written briefs, no later than 120 days after the date of publication of this notice in the **Federal Register**, pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(1).

Assessment Rates

Upon completion of the final results, Commerce shall determine and U.S. Customs and Border Protection (CBP) shall assess antidumping duties on all appropriate entries of subject merchandise covered by this review.

If an examined respondent's weighted-average dumping margin is not zero or *de minimis* (*i.e.,* less than 0.50 percent) in the final results of this review, we intend to calculate an importer-specific assessment rate for antidumping duties based on the ratio of the total amount of dumping calculated for each importer's examined sales and the total entered value of those same sales in accordance with 19 CFR 351.212(b)(1).[17] If the weighted-average dumping margin for Dingli or an importer-specific assessment rate is zero or *de minimis* in the final results of this review, we intend to instruct CBP to liquidate the appropriate entries without regard to antidumping duties.[18] The final results of this administrative review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable.[19]

For the companies for which we are rescinding this administrative review, antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, during the period of review, in accordance with 19 CFR 351.212(c)(1)(i).

Commerce intends to issue assessment instructions to CBP no

[19] *See* section 751(a)(2)(C) of the Act.

earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for shipments of the subject merchandise from China entered, or withdrawn from warehouse, for consumption on, or after, the publication date of the final results of review, as provided in section 751(a)(2)(C) of the Act: (1) for the subject merchandise exported by the company listed above that has a separate rate, the cash deposit rate will be equal to the weighted-average dumping margin established in the final results of this administrative review (except, if the rate is zero or *de minimis,* then zero cash deposit will be required); (2) for previously investigated or reviewed Chinese and non-Chinese exporters of subject merchandise not listed above that received a separate rate in a prior segment of this proceeding, the cash deposit rate will continue to be the existing exporter-specific rate; (3) for all Chinese exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be that for the China-wide entity, *i.e.,* 165.14 percent; [20] and (4) for all non-Chinese exporters of subject merchandise which have not received their own separate rate, the cash deposit rate will be the rate applicable to the Chinese exporter that supplied that non-Chinese exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of double antidumping duties, and/or an increase in the amount of antidumping duties by the amount of the countervailing duties.

Notification to Interested Parties

We are issuing and publishing these preliminary results of this administrative review in accordance with sections 751(a)(1) and 777(i)(1) of the Act, 19 CFR 351.213(h)(2), and 19 CFR 351.221(b)(4).

Dated: April 25, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Alloy and Certain Carbon Steel Threaded Rod From the People's Republic of China: Preliminary Results and Partial Rescission of Antidumping Duty Administrative Review; 2022–2023

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that Ningbo Dongxin High-Strength Nut Co., Ltd. (Ningbo Dongxin), the sole mandatory respondent in this review and an exporter of alloy and certain carbon steel threaded rod (threaded rod) from the People's Republic of China (China), sold subject merchandise in the United States at prices below normal value (NV) during the period of review April 1, 2022, through March 31, 2023. Additionally, Commerce is rescinding this review with respect to Ningbo Zhongjiang High Strength Bolts Co., Ltd. (Ningbo Zhongjiang). Interested parties are invited to comment on these preliminary results of review.

DATES: Applicable May 1, 2024.

FOR FURTHER INFORMATION CONTACT: Claudia Cott, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4270.

SUPPLEMENTARY INFORMATION:

Background

On April 9, 2020, Commerce published in the **Federal Register** the antidumping duty order on threaded rod from China.[1] On June 12, 2023, based on timely requests for review, in accordance with 19 CFR 351.221(c)(1)(i), we initiated an administrative review of the *Order* covering two companies: Ningbo Dongxin and Ningbo Zhongjiang.[2] On November 30, 2023, we extended the deadline for these preliminary results of this review to April 26, 2024.[3] For a complete description of the events that occurred since the initiation of this review, *see* the Preliminary Decision Memorandum.[4]

Scope of the Order [5]

The merchandise covered by the *Order* is alloy and certain carbon steel threaded rod from China. For a complete description of the scope of the order, *see* the Preliminary Decision Memorandum.

Partial Rescission of Administrative Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if a party who requested the review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review. On June 16, 2023, Ningbo Zhongjiang timely withdrew its request for an

administrative review of itself within the 90-day deadline.[6] No other parties requested a review of Ningbo Zhongjiang. Therefore, in accordance with 19 CFR 351.213(d)(1), Commerce is rescinding the administrative review of Ningbo Zhongjiang.

Separate Rates

Commerce preliminarily determines that Ningbo Dongxin is eligible to receive a separate rate in this administrative review.[7] For additional information, *see* the Preliminary Decision Memorandum. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

China-Wide Entity

Commerce's policy regarding the conditional review of the China-wide entity applies to this administrative review.[8] Under this policy, the China-wide entity will not be under review unless a party specifically requests, or Commerce self-initiates, a review of the entity. Because no party requested a review of the China-wide entity in this review, the China-wide entity is not under review, and the China-wide entity's rate (*i.e.,* 48.91 percent) [9] is not subject to change.

Methodology

Commerce is conducting this review in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended (the Act). For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum.

Preliminary Results of the Review

We preliminarily determine that the following weighted-average dumping margin exists for the period April 1, 2022, through March 31, 2023, for the mandatory respondent:

Exporter	Weighted-average dumping margin (percent)
Ningbo Dongxin High-Strength Nut Co., Ltd	35.10

Disclosure and Public Comment

Commerce intends to disclose its calculations and analysis performed in these preliminary results to interested parties within five days after the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Pursuant to 19 CFR 351.309(c)(1)(ii), interested parties may submit case briefs to Commerce no later than 30 days after the date of publication of this notice. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[10] Interested parties who submit case or rebuttal briefs in this administrative review must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[11]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this review, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.[12] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final results in this administrative review. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in case and rebuttal briefs.

All submissions, including case and rebuttal briefs, as well as hearing requests, should be filed using ACCESS.[13] An electronically filed document must be received successfully in its entirety by ACCESS by 5:00 p.m. Eastern Time on the established deadline. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[14]

Final Results of Review

Unless the deadline is extended, Commerce intends to issue the final results of this administrative review, including the results of its analysis of issues raised in written briefs, no later than 120 days after the date of publication of this notice in the **Federal Register**, pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(1).

Assessment Rates

Upon completion of the final results, Commerce shall determine and U.S. Customs and Border Protection (CBP) shall assess antidumping duties on all appropriate entries of subject merchandise covered by this review.

If an examined respondent's weighted-average dumping margin is not zero or *de minimis* (*i.e.,* less than 0.50 percent) in the final results of this review, we intend to calculate an importer-specific assessment rate for antidumping duties based on the ratio of the total amount of dumping calculated for each importer's examined sales and the total entered value of those same sales in accordance with 19 CFR 351.212(b)(1).[15] If the weighted-average dumping margin for Ningbo Dongxin or an importer-specific assessment rate is zero or *de minimis* in the final results of this review, we intend to instruct CBP to liquidate the appropriate entries

without regard to antidumping duties.[16] The final results of this administrative review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable.[17]

For Ningbo Zhongjiang, for which we are rescinding this administrative review, antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, during the period of review, in accordance with 19 CFR 351.212(c)(1)(i).

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for shipments of the subject merchandise from China entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of review, as provided in section 751(a)(2)(C) of the Act: (1) for the subject merchandise exported by the company listed above that has a separate rate, the cash deposit rate will be equal to the weighted-average dumping margin established in the final results of this administrative review (except, if the rate is zero or *de minimis,* then zero cash deposit will be required); (2) for previously investigated or reviewed Chinese and non-Chinese exporters of subject merchandise not listed above that received a separate rate in a prior segment of this proceeding, the cash deposit rate will continue to be the existing exporter-specific rate; (3) for all Chinese exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be that for the China-wide entity, *i.e.,* 48.91 percent; [18] and (4) for all non-Chinese exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the Chinese exporter that supplied that non-Chinese exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of double antidumping duties, and/or an increase in the amount of antidumping duties by the amount of the countervailing duties.

Notification to Interested Parties

We are issuing and publishing these preliminary results of this administrative review in accordance with sections 751(a)(1) and 777(i)(1) of the Act, 19 CFR 351.213, and 19 CFR 351.221(b)(4).

Dated: April 25, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Steel Concrete Reinforcing Bar From the Republic of Türkiye: Final Results of Countervailing Duty Administrative Review; 2021

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that certain producers and exporters of steel concrete reinforcing bar (rebar) from the Republic of Türkiye (Türkiye) received countervailable subsidies during the period of review (POR) January 1, 2021, through December 31, 2021.

DATES: Applicable May 1, 2024.

FOR FURTHER INFORMATION CONTACT: Nicholas Czajkowski, AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202)-482–1395.

Background

On December 7, 2023, Commerce published in the **Federal Register** the *Preliminary Results* of the 2021 administrative review of the countervailing duty order on rebar from the Republic of Türkiye and invited comments from interested parties.[1] On March 21, 2024, Commerce extended the deadline for issuing the final results until April 25, 2024.[2] For a complete description of the events that occurred since the *Preliminary Results, see* the Issues and Decision Memorandum.[3] Commerce conducted this review in accordance with section 751(a)(1)(A) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order

The product covered by the order is rebar from Türkiye. For a full

[1] *See Steel Concrete Reinforcing Bar from the Republic of Turkey: Preliminary Results of Countervailing Duty Administrative Review and Rescission of Administrative Review, in Part; 2021,* 88 FR 85234 (December 7, 2023) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

[2] *See* Memorandum, ''Extension of Deadline for Final Results of the Countervailing Duty Administrative Review,'' dated March 21, 2024.

[3] *See* Memorandum, ''Decision Memorandum for the Final Results of the Countervailing Duty Administrative Review of Steel Concrete Reinforcing Bar from the Republic of Türkiye; 2021,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

description of the scope of the order, *see* the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised by the interested parties in their case and rebuttal briefs are addressed in the Issues and Decision Memorandum. The topics discussed and the issues raised by parties to which we responded in the Issues and Decision Memorandum are listed in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duties Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Changes Since the Preliminary Results

Based on comments received from interested parties, we made certain changes regarding the attribution of subsidies to Kaptan Demir Celik Endustrisi ve Ticaret A.S., however, this did not result in a change to the calculation of subsidy benefits for Kaptan. For a full description of these revisions, *see* the Issues and Decision Memorandum.

Methodology

Commerce conducted this administrative review in accordance with section 751(a)(1)(A) of the Act. For each of the subsidy programs found countervailable, we determine that there is a subsidy, *i.e.,* a government-provided financial contribution that gives rise to a benefit to the recipient, and that the subsidy is specific.[4] For a full description of the methodology underlying Commerce's conclusions, including any determination that relied upon the use of adverse facts available (AFA) pursuant to sections 776(a) and (b) of the Act, *see* the Issues and Decision Memorandum.

Final Results of the Administrative Review

We find the following net countervailable subsidy rates for the period January 1, 2021, through December 31, 2021:

Producer/exporter	Subsidy rate (percent *ad valorem*)
Kaptan Demir Celik Endustrisi ve Ticaret A.S., Kaptan Metal Dis Ticaret ve Nakliyat A.S., and their cross-owned affiliates[5].	5.54.
Colakoglu Metalurji A.S. and Colakoglu Dis Ticaret A.S	0.03 (*de minimis*).

Disclosure

Normally, Commerce discloses to interested parties the calculations of the final results of an administrative review within five days of a public announcement or, if there is no public announcement, within five days of the date of publication of the notice of final results in the **Federal Register**, in accordance with 19 CFR 351.224(b). However, because we have made no changes to the calculations in the *Preliminary Results,* there are no calculations to disclose.

Assessment

In accordance with section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(2), Commerce shall determine, and U.S. Customs and Border Protection (CBP) shall assess, countervailing duties on all appropriate entries covered by this review. Commerce intends to issue assessment instructions to CBP no earlier than 35 days after publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

In accordance with section 751(a)(1) of the Act, we also intend to instruct CBP to collect cash deposits of estimated countervailing duties in the amounts shown for the companies listed above for shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review. For all non-reviewed firms, we will instruct CBP to continue to collect cash deposits of estimated countervailing duties at the all-others rate or the most recent company-specific rate applicable to the company, as appropriate. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Administrative Protective Order

This notice also serves as a final reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation subject to sanction.

Notification to Interested Parties

The final results are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: April 24, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Initiation of Five-Year (Sunset) Reviews

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: In accordance with the Tariff Act of 1930, as amended (the Act), the Department of Commerce (Commerce) is automatically initiating the five-year reviews (Sunset Reviews) of the antidumping and countervailing duty (AD/CVD) order(s) and suspended investigation(s) listed below. The International Trade Commission (the ITC) is publishing concurrently with this notice its notice of *Institution of Five-Year Reviews* which covers the same order(s) and suspended investigation(s).

DATES: Applicable May 1, 2024.

FOR FURTHER INFORMATION CONTACT: Commerce official identified in the *Initiation of Review* section below at AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230. For information from the ITC, contact Mary Messer, Office of Investigations, U.S. International Trade Commission at (202) 205–3193.

SUPPLEMENTARY INFORMATION:

Background

Commerce's procedures for the conduct of Sunset Reviews are set forth in its *Procedures for Conducting Five-Year (Sunset) Reviews of Antidumping and Countervailing Duty Orders,* 63 FR 13516 (March 20, 1998) and 70 FR 62061 (October 28, 2005). Guidance on methodological or analytical issues relevant to Commerce's conduct of Sunset Reviews is set forth in *Antidumping Proceedings: Calculation of the Weighted-Average Dumping Margin and Assessment Rate in Certain Antidumping Duty Proceedings; Final Modification,* 77 FR 8101 (February 14, 2012).

Initiation of Reviews

In accordance with section 751(c) of the Act and 19 CFR 351.218(c), we are initiating the Sunset Reviews of the following antidumping and countervailing duty order(s) and suspended investigation(s):

DOC case No.	ITC case No.	Country	Product	Commerce contact
A–570–910 ...	731–TA–1116	China	Circular Welded Carbon-Quality Steel Pipe (1st Review).	Thomas Martin, (202) 482–3936.
A–533–883 ...	731–TA–1413	India	Glycine (1st Review)	Mary Kolberg, (202) 482–1785.
A–588–878 ...	731–TA–1414	Japan	Glycine (1st Review)	Mary Kolberg, (202) 482–1785.
A–549–837 ...	731–TA–1415	Thailand	Glycine (1st Review)	Mary Kolberg, (202) 482–1785.
A–552–823 ...	731–TA–1411	Vietnam	Laminated Woven Sacks (1st Review)	Thomas Martin, (202) 482–3936.
A–533–823 ...	731–TA–929	India	Silicomanganese (4th Review)	J. Arrowsmith, (202) 482–5255.
A–834–807 ...	731–TA–930	Kazakhstan ..	Silicomanganese (4th Review)	J. Arrowsmith, (202) 482–5255.
C–307–820 ...	731–TA–931	Venezuela	Silicomanganese (4th Review)	J. Arrowsmith, (202) 482–5255.
C–570–911 ...	701–TA–447	China	Circular Welded Carbon-Quality Steel Pipe (1st Review).	Mary Kolberg, (202) 482–1785.

C–533–884 ...	701–TA–604	India	Glycine (1st Review)	J. Arrowsmith, (202) 482–5255.
C–552–824 ...	701–TA–601	Vietnam	Laminated Woven Sacks (1st Review)	Thomas Martin, (202) 482–3936

Filing Information

As a courtesy, we are making information related to sunset proceedings, including copies of the pertinent statute and Commerce's regulations, Commerce's schedule for Sunset Reviews, a listing of past revocations and continuations, and current service lists, available to the public on Commerce's website at the following address: *https://enforcement.trade.gov/sunset/.* All submissions in these Sunset Reviews must be filed in accordance with Commerce's regulations regarding format, translation, and service of documents. These rules, including electronic filing requirements via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), can be found at 19 CFR 351.303.

In accordance with section 782(b) of the Act, any party submitting factual information in an AD/CVD proceeding must certify to the accuracy and completeness of that information. Parties must use the certification formats provided in 19 CFR 351.303(g). Commerce intends to reject factual submissions if the submitting party does not comply with applicable revised certification requirements.

Letters of Appearance and Administrative Protective Orders

Pursuant to 19 CFR 351.103(d), Commerce will maintain and make available a public service list for these proceedings. Parties wishing to participate in any of these five-year reviews must file letters of appearance as discussed at 19 CFR 351.103(d). To facilitate the timely preparation of the public service list, it is requested that those seeking recognition as interested parties to a proceeding submit an entry of appearance within 10 days of the publication of the Notice of Initiation. Because deadlines in Sunset Reviews can be very short, we urge interested parties who want access to proprietary information under administrative protective order (APO) to file an APO application immediately following publication in the **Federal Register** of this notice of initiation. Commerce's regulations on submission of proprietary information and eligibility to receive access to business proprietary information under APO can be found at 19 CFR 351.304–306. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[1]

[1] *Administrative Protective Order, Service, and Other Procedures in Antidumping and*

Continued

Information Required From Interested Parties

Domestic interested parties, as defined in section 771(9)(C), (D), (E), (F), and (G) of the Act and 19 CFR 351.102(b), wishing to participate in a Sunset Review must respond not later than 15 days after the date of publication in the **Federal Register** of this notice of initiation by filing a notice of intent to participate. The required contents of the notice of intent to participate are set forth at 19 CFR 351.218(d)(1)(ii). In accordance with Commerce's regulations, if we do not receive a notice of intent to participate from at least one domestic interested party by the 15-day deadline, Commerce will automatically revoke the order without further review.[2]

If we receive an order-specific notice of intent to participate from a domestic interested party, Commerce's regulations provide that *all parties* wishing to participate in a Sunset Review must file complete substantive responses not later than 30 days after the date of publication in the **Federal Register** of this notice of initiation. The required contents of a substantive response, on an order-specific basis, are set forth at 19 CFR 351.218(d)(3). Note that certain information requirements differ for respondent and domestic parties. Also, note that Commerce's information requirements are distinct from the ITC 's information requirements. Consult Commerce's regulations for information regarding Commerce's conduct of Sunset Reviews. Consult Commerce's regulations at 19 CFR part 351 for definitions of terms and for other general information concerning antidumping and countervailing duty proceedings at Commerce.

This notice of initiation is being published in accordance with section 751(c) of the Act and 19 CFR 351.218(c).

Dated: April 22, 2024.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[FR Doc. 2024–09424 Filed 4–30–24; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Advance Notification of Sunset Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

Background

Every five years, pursuant to the Tariff Act of 1930, as amended (the Act), the Department of Commerce (Commerce) and the International Trade Commission automatically initiate and conduct reviews to determine whether revocation of a countervailing or antidumping duty order or termination of an investigation suspended under section 704 or 734 of the Act would be likely to lead to continuation or recurrence of dumping or a countervailable subsidy (as the case may be) and of material injury.

Upcoming Sunset Reviews for June 2024

Pursuant to section 751(c) of the Act, the following Sunset Reviews are scheduled for initiation in June 2024 and will appear in that month's *Notice of Initiation of Five-Year Sunset Reviews* (Sunset Review).

	Department contact
Antidumping duty proceedings	
Non-Malleable Cast Iron Pipe Fittings from China, A–570–875 (4th Review)	Thomas Martin, (202) 482–3936.
Quartz Surface Products from China, A–570–084 (1st Review)	Mary Kolberg, (202) 482–1785.
Raw Flexible Magnets from China, A–570–922 (3rd Review)	Mary Kolberg, (202) 482–1785.
Raw Flexible Magnets from Taiwan, A–583–842 (3rd Review)	Mary Kolberg, (202) 482–1785.
Countervailing Duty Proceedings	
Quartz Surface Products from China, C–570–085 (1st Review)	Thomas Martin, (202) 482–3936.
Raw Flexible Magnets from China, C–570–923 (3rd Review)	Mary Kolberg, (202) 482–1785.

Suspended Investigations

No Sunset Review of suspended investigations is scheduled for initiation in June 2024.

Commerce's procedures for the conduct of Sunset Review are set forth in 19 CFR 351.218. The *Notice of Initiation of Five-Year* (*Sunset) Review* provides further information regarding what is required of all parties to participate in Sunset Review.

Pursuant to 19 CFR 351.103(c), Commerce will maintain and make available a service list for these proceedings. To facilitate the timely preparation of the service list(s), it is requested that those seeking recognition as interested parties to a proceeding contact Commerce in writing within 10 days of the publication of the Notice of Initiation.

Please note that if Commerce receives a Notice of Intent to Participate from a member of the domestic industry within 15 days of the date of initiation, the review will continue.

Thereafter, any interested party wishing to participate in the Sunset Review must provide substantive comments in response to the notice of initiation no later than 30 days after the date of initiation. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[1]

This notice is not required by statute but is published as a service to the international trading community.

Dated: April 22, 2024

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Information Security and Privacy Advisory Board

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: National Institute of Standards and Technology (NIST)'s Information Security and Privacy Advisory Board (ISPAB) will hold an open meeting on Tuesday, May 21, 2024, from 2:30 p.m. until 3:30 p.m., Eastern Time.

DATES: The ISPAB will meet on Tuesday, May 21, 2024, from 2:30 p.m. until 3:30 p.m., Eastern Time.

ADDRESSES: The meeting will be held virtually via webinar. Please note participation instructions under the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Jeff Brewer, ISPAB Designated Federal Official, National Institute of Standards and Technology, Telephone (301) 975–2489. Mr. Brewer's email address is *jeffrey.brewer@nist.gov.*

SUPPLEMENTARY INFORMATION:

Authority: The ISPAB was established to function solely as an advisory body, in accordance with the provisions of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. The Board reports to the Director of NIST, and reports annually to the Secretary of Commerce, the Secretary of Homeland Security, the Director of the Office of Management and Budget, the Director of the National Security Agency, and appropriate committees of Congress. The Board is authorized under 15 U.S.C. 278g–4 and tasked with identifying emerging managerial, technical, administrative, and physical safeguard issues relative to information security and privacy.

Pursuant to the Federal Advisory Committee Act, as amended, 5 U.S.C. 1001 *et seq.,* notice is hereby given that the ISPAB will hold an open meeting on the date and time in the **DATES** section and will be open to the public. The primary purpose of this meeting is to discuss and deliberate potential recommendations. The agenda may change to accommodate ISPAB business. The final agenda will be posted on the NIST website at *https://csrc.nist.gov/Events/2024/ispab-may-meeting.*

Individuals and representatives of organizations who would like to offer comments and suggestions related to the Board's business are invited to request a place on the agenda. Approximately ten minutes will be reserved for public comments and speaking times will be assigned on a first-come, first-serve basis. The amount of time per speaker will be determined by the number of requests received but is likely to be about five minutes each. Questions from the public will not be considered during this period. Speakers who wish to expand upon their oral statements, those who had wished to speak but could not be accommodated on the agenda, and those who were unable to participate are invited to submit written statements by email to *jeffrey.brewer@nist.gov.*

All participants will be attending via webinar and are required to pre-register to be admitted to the meeting. To register and receive detailed instruction on how to join the meeting, please submit your first and last name, email address, and company name via the registration link at *https://csrc.nist.gov/Events/2024/ispab-may-meeting* by 5 p.m. Eastern Time, May 20, 2024.

Alicia Chambers,

NIST Executive Secretariat.

National Oceanic and Atmospheric Administration

[RTID 0648–XD921]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council (Pacific Council) will convene a webinar meeting of its Groundfish Management Team (GMT) and its Groundfish Advisory Subpanel (GAP). The GAP and the GMT will discuss items on the Pacific Council's June 2024 meeting agenda. These meetings are open to the public.

DATES: The GMT online meeting will be held on Wednesday, May 22, 2024, from 1 p.m. to 4 p.m., Pacific time. The GAP online meeting will be held on Thursday, May 23, 2024, from 9 a.m. to 1 p.m., Pacific time. The scheduled ending times for these meetings are an estimate. Each meeting will adjourn when business for the day is completed.

ADDRESSES: Both meetings will be held online. Specific meeting information, including directions on how to attend the meeting and system requirements will be provided in the meeting announcement on the Pacific Council's website (see *www.pcouncil.org*). You may send an email to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov*) or contact him at (503) 820–2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384.

FOR FURTHER INFORMATION CONTACT: Todd Phillips, Staff Officer, Pacific Council; *todd.phillips@noaa.gov;* telephone: (503) 820–2426.

SUPPLEMENTARY INFORMATION: The primary purpose of the GAP and GMT webinars is to prepare for the Pacific Council's June 2024 meeting agenda items. The advisory bodies are expected to primarily discuss groundfish and administrative-related matters during this webinar.

Detailed agendas for the webinars will be available on the Pacific Council's website prior to the meetings. The GAP and GMT may also address other assignments relating to groundfish management. No management actions will be decided by the GMT and GAP.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov;* (503) 820–2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 26, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD917]

Pacific Islands Pelagic Fisheries; American Samoa Longline Limited Entry Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; availability of permits.

SUMMARY: NMFS announces that 34 American Samoa pelagic longline limited entry permits in two permit size classes are available for 2024. NMFS is accepting applications for these available permits.

DATES: NMFS must receive complete permit applications including payment by August 29, 2024.

ADDRESSES: Download a blank application from the NOAA Fisheries website: *https://www.fisheries.noaa.gov/permit/american-samoa-longline-limited-entry-permit.* Submit your application and pay the processing fee electronically per instructions at *https://www.fisheries.noaa.gov/pacific-islands/commercial-fishing/apply-pacific-islands-fishing-permit.*

FOR FURTHER INFORMATION CONTACT: Walter Ikehara, NMFS Pacific Islands Regional Office (PIRO), Sustainable Fisheries, tel 808–725–5175 or email *PIRO-permits@noaa.gov.*

SUPPLEMENTARY INFORMATION: Federal regulations at 50 CFR 665.816 allow NMFS to re-issue permits for the American Samoa pelagic longline limited entry program if the number of permits falls below the maximum allowed. At least 34 permits are available for issuance in the following permit size classes, as follows:

- 21 in Small (vessels up to 50 feet or 15.24 meters in overall length), and
- 13 in Large (vessels overall length 50 feet or 15.24 meters and longer).

Please note that the number of available permits may change before the application period closes. Applicants must specify the permit size class (one only) for which they are applying on the application form.

If there are more applications than available permits in a particular size class, the Regional Administrator shall issue permits to persons according to the following priority standard:

(i) Priority accrues to the person with the earliest documented participation in the pelagic longline fishery in the Exclusive Economic Zone (EEZ) around American Samoa from smallest to largest vessel; and

(ii) In the event of a tie in the priority ranking between two or more applicants, the applicant whose second documented participation in the pelagic longline fishery in the EEZ around American Samoa is first in time will be ranked first in priority. If there is still a tie between two or more applicants, the Regional Administrator will select the successful applicant by an impartial lottery.

NMFS will only consider complete applications, which must include the completed and signed application form, copy of current United States Coast Guard Certificate of Documentation or state or territory vessel registration, evidence of documented participation in the fishery if needed for prioritization, and non-refundable payment of the application processing fee. Incomplete applications may be abandoned 30 days after receipt if deficiencies are not addressed.

Documented participation means participation proved by, but not necessarily limited to, a properly submitted NMFS or American Samoa logbook, an American Samoa creel survey record, a delivery or payment record from an American Samoa-based cannery, retailer or wholesaler, an American Samoa tax record, an individual wage record, ownership title, vessel registration, or other official documents showing:

(i) Ownership of a vessel that was used to fish in the EEZ around American Samoa; or

(ii) Evidence of work on a fishing trip during which longline gear was used to harvest western Pacific pelagic management unit species in the EEZ around American Samoa. If the applicant does not possess the necessary documentation of evidence of work on a fishing trip based on records available only from NMFS or the Government of American Samoa (*e.g.,* creel survey record or logbook), the applicant may issue a request to PIRO to obtain such records from the appropriate agencies, if available. The applicant should provide sufficient information on the fishing trip to allow PIRO to retrieve the records.

If an applicant requests NMFS, in writing, to use NMFS longline logbook data as evidence of documented participation, the applicant must specify the qualifying vessel, official number, and month and year of the logbook records. NMFS will not conduct an unlimited search for records.

NMFS must receive applications by August 29, 2024 to be considered for a permit (see **ADDRESSES**). NMFS will not accept applications received after that date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 26, 2024.

Everett Wayne Baxter,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD863]

Fisheries of the Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 87 Post Data Workshop webinar III for Gulf of Mexico white, pink, and brown shrimp.

SUMMARY: The SEDAR 87 assessment process of Gulf of Mexico white, pink, and brown shrimp will consist of a Data Workshop, and a series of assessment webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 87 Post Data Workshop webinar III will be held Tuesday, May 21, 2024, from 1 p.m. to 4 p.m., Eastern Time.

ADDRESSES:

Meeting address: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; (843) 571–4366; email: *Julie.neer@safmc.net.*

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data

Workshop, (2) a series of assessment webinars, and (3) A Review Workshop. The product of the Data Workshop is a report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The assessment webinars produce a report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The product of the Review Workshop is an Assessment Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion during the Post Data Workshop webinar III are as follows:

Participants will discuss and finalize any outstanding data issues remaining from the Data Workshop.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 26, 2024.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the webinar are as follows:

Participants will discuss what recreational landings streams, including the SRFS (State of Florida's State Reef Fish Survey) data may be available for use in the assessment of SE yellowtail snapper.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

BILLING CODE 3510–22–P

COMMODITY FUTURES TRADING COMMISSION

Agency Information Collection Activities: Notice of Intent To Extend Information Collection 3038–0115, Reparations Complaint, CFTC Form 30

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice.

SUMMARY: The Commodity Futures Trading Commission (CFTC) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (''PRA''), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including proposed extension of an existing collection of information, and to allow 60 days for public comment. This notice solicits comments on the extension of information collection requirements regarding the CFTC Reparations Complaint Process, pursuant to part 12 of the Commission regulations under the Commodity Exchange Act (''CEA'').

DATES: Comments must be submitted on or before July 1, 2024.

ADDRESSES: You may submit comments, identified by ''OMB Control No. 3038–0115'' by any of the following methods:

- The Agency's website, at *http://comments.cftc.gov/.* Follow the instructions for submitting comments through the website.
- *Mail:* Christopher Kirkpatrick, Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581.
- *Hand Delivery/Courier:* Same as Mail above.

Please submit your comments using only one method. All comments must be submitted in English, or if not, accompanied by an English translation. Comments will be posted as received to *https://www.cftc.gov.*

FOR FURTHER INFORMATION CONTACT: Eugene Smith, Director, Office of Proceedings, Commodity Futures Trading Commission, (202) 418–5371; email: *esmith@cftc.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA, 44 U.S.C. 3501 *et seq.,* Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of Information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3 and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the CFTC is publishing a proposed notice to extend the existing collection of information listed below. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.[1]

Title: Reparations Complaint, CFTC Form 30 (OMB Control No. 3038–0115). This is a request for an extension of a currently approved information collection.

Abstract: Pursuant to Section 14 of the Commodity Exchange Act, members of the public may apply to the Commission to seek damages against Commission registrants for alleged violations of the Act and/or Commission regulations. The legislative intent of the Reparations program was to provide a low-cost, speedy, and effective forum for the resolution of customer complaints and to sanction individuals and firms found to have violated the Act and/or any regulations.

In 1984, the Commission promulgated Part 12 of the Commission regulations to administer Section 14. Rule 12.13 provides the standards and procedures for filing a Reparations complaint. Specifically, paragraph (b) describes the form and content requirements of a complaint. CFTC Form 30 mirrors the requirements set forth in paragraph (b).

The Commission began utilizing Form 30 in or about 1984. The form was created to assist customers, who are typically *pro se* and non-lawyers. It was also designed as a way to provide proper notice to respondents of the charges against them. This form is critical to fulfilling this policy goal. The Commission implemented a web-based version of Form 30 in 2021 as an additional option for the public to submit reparations complaints online.

With respect to the collection of information, the CFTC invites comments on:

- Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have a practical use;
- The accuracy of the Commission's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Ways to enhance the quality, usefulness, and clarity of the information to be collected; and
- Ways to minimize the burden of collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology; *e.g.,* permitting electronic submission of responses.

You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act, a petition for confidential treatment of the exempt information may be submitted according to the procedures established in § 145.9 of the Commission's regulations.[2]

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from *http://www.cftc.gov* that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the ICR will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

Burden Statement: The respondent burden for this collection is estimated to be as follows:

Respondents/Affected Entities: Commodity futures customers.

Estimated Number of Respondents: 15.

Estimated Average Burden Hours per Respondent: 1.5.

Estimated Total Annual Burden Hours: 23.[3]

Frequency of Collection: As applicable.

There are no capital costs or operating and maintenance costs associated with this collection.

BILLING CODE 6355–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2024–SCC–0026]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; PLUS Adverse Credit Reconsideration Loan Counseling

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing an extension without change of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before May 31, 2024.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, (202) 377–4018.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: PLUS Adverse Credit Reconsideration Loan Counseling.

OMB Control Number: 1845–0129.

Type of Review: Extension without change of a currently approved ICR.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 142,824.

Total Estimated Number of Annual Burden Hours: 107,119.

Abstract: Section 428B(a)(1)(A) of the Higher Education Act of 1965, as amended (HEA), provides that to be eligible to receive a Federal PLUS Loan under the Federal Family Education Loan (FFEL) Program, the applicant must not have an adverse credit history, as determined pursuant to regulations promulgated by the Secretary. In accordance with section 455(a)(1) of the HEA, this same eligibility requirement applies to applicants for PLUS loans under the Direct Loan Program. Since July 1, 2010, there have been no new FFEL Program loans originated and the Direct Loan Program is the only Federal loan program that offers Federal PLUS Loans.

The adverse credit history section of the eligibility regulations in 34 CFR 685.200 (b) and (c) were updated in 2014 by the Department of Education (the Department) when a review of and a change to the regulations was made. Specifically, an applicant for a PLUS loan who is determined to have an adverse credit history must complete loan counseling offered by the Secretary before receiving the Federal PLUS loan.

The Department is requesting an extension to the information collection regarding the adverse credit history regulations in 34 CFR 685.200 (b) and (c) and the burden these changes create for Federal PLUS loan borrowers, both parent and graduate/professional students.

Dated: April 25, 2024.

Kun Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

DEPARTMENT OF EDUCATION

[Docket No.: ED–2024–SCC–0064]

Agency Information Collection Activities; Comment Request; Office of Special Education and Rehabilitative Services Peer Reviewer Data Form

AGENCY: Office of Special Education and Rehabilitative Services (OSERS), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before July 1, 2024.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2024–SCC–0064. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the *regulations.gov* site is not available to the public for any reason, the Department will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. Please note that comments submitted

after the comment period will not be accepted. Written requests for information or comments submitted by postal mail or delivery should be addressed to the Manager of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W203, Washington, DC 20202–8240.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Justin Hampton, 202–245–6318.

SUPPLEMENTARY INFORMATION: The Department, in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Department is soliciting comments on the proposed information collection request (ICR) that is described below. The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Office of Special Education and Rehabilitative Services Peer Reviewer Data Form.

OMB Control Number: 1820–0583.

Type of Review: A revision of a currently approved ICR.

Respondents/Affected Public: Individuals and Households.

Total Estimated Number of Annual Responses: 350.

Total Estimated Number of Annual Burden Hours: 88.

Abstract: The OSERS Peer Reviewer Data Form (OPRDF) is used by OSERS staff to identify potential reviewers who would be qualified to review specific types of grant applications for funding. OSERS uses this form to collect background contact information for each potential reviewer; and to provide information on any reasonable accommodations that might be required by the individual. OSERS is requesting a revision with minor changes to the previous form regarding the gender response options. The previous version of the OPRDF, 1820–0583, will expire on July 31, 2024.

Dated: April 26, 2024.

Juliana Pearson,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Student Support Services Program

AGENCY: Office of Postsecondary Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for new awards for fiscal year (FY) 2025 for the Student Support Services (SSS) Program, Assistance Listing Number 84.042A. This notice relates to the approved information collection under OMB control number 1840–0017.

DATES:

Applications Available: May 1, 2024.

Deadline for Transmittal of Applications: July 15, 2024.

Deadline for Intergovernmental Review: September 13, 2024.

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045), and available at *www.federalregister.gov/d/2022-26554*.

FOR FURTHER INFORMATION CONTACT: Lavelle Wright, U.S. Department of Education, 400 Maryland Avenue SW, 5th Floor, Washington, DC 20202–4260. Telephone: (202) 987–1300. Email: *Lavelle.Wright@ed.gov*.

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purpose of the SSS Program is to increase the number of disadvantaged students, including low-income college students, first-generation college students, and college students with disabilities, who successfully complete a program of study at the postsecondary level. The support services that are provided should increase the retention and graduation rates for these categories of students and facilitate their transfer from two-year to four-year colleges and universities. The support services should also foster an institutional climate that supports the success of students who are limited English proficient, students from groups that are historically underrepresented in postsecondary education, students with disabilities, students who are homeless children and youths, students who are in foster care or are aging out of the foster care system, and other disconnected students. Student support services should also improve the financial and economic literacy of students.

Priorities: This notice contains two competitive preference priorities. Competitive Preference Priorities 1 and 2 are from the Secretary's Notice of Final Supplemental Priorities and Definitions for Discretionary Grant Programs, published in the **Federal Register** on December 10, 2021 (86 FR 70612) (Supplemental Priorities).

Note: Applicants must include, in the one-page abstract submitted with the application, a statement indicating which, if any, of the competitive preference priorities are addressed. If the applicant has addressed the competitive preference priorities, this information must also be listed on the SSS Program Profile Form.

Competitive Preference Priorities: For FY 2025 and any subsequent year for which we make awards from the list of unfunded applications from this competition, these priorities are competitive preference priorities. Under 34 CFR 75.105(c)(2)(i), we award up to an additional eight points to an application, depending on how well the application meets these priorities.

These priorities are:

Competitive Preference Priority 1—Meeting Student Social, Emotional, and Academic Needs (up to 3 points).

Projects that are designed to improve students' social, emotional, academic, and career development needs, with a focus on underserved students, by creating education and work-based settings that are supportive, positive, identity-safe and inclusive, including with regard to race, ethnicity, culture, language, and disability status, through the following activity:

Supporting students to engage in high-quality, real-world, hands-on learning that is aligned with classroom instruction and takes place in community-based settings, such as apprenticeships, pre-apprenticeships, work-based learning, and service learning, and in civic activities, that allow students to apply their knowledge and skills, strengthen their employability skills, such as critical thinking, complex problem solving, and effective communication, and access career exploration opportunities.

Competitive Preference Priority 2—Increasing Postsecondary Education Access, Affordability, Completion, and Post-Enrollment Success (up to 5 points).

Projects that are designed to increase postsecondary access, affordability, completion, and success for underserved students by addressing one or both of the following priority areas:

(a) Increasing postsecondary education access and reducing the cost of college by creating clearer pathways for students between institutions and making transfer of course credits more seamless and transparent (up to 2 points).

(b) Establishing a system of high-quality data collection and analysis, such as data on enrollment, persistence, retention, completion, and post-college outcomes, for transparency, accountability, and institutional improvement (up to 3 points).

Definitions: The following definitions apply to this competition. The definitions of ''demonstrates a rationale,'' ''logic model,'' ''project component,'' and ''relevant outcomes'' are from 34 CFR 77.1. The definitions of ''children or students with disabilities,'' ''disconnected youth,'' ''English learner,'' ''military- or veteran-connected student,'' and ''underserved student'' are from the Supplemental Priorities.

Children or students with disabilities means children with disabilities as defined in section 602(3) of the Individuals with Disabilities Education Act (IDEA) (20 U.S.C. 1401(3)) and 34 CFR 300.8, or students with disabilities, as defined in the Rehabilitation Act of 1973 (29 U.S.C. 705(37), 705(202)(B)).

Demonstrates a rationale means a key project component included in the project's logic model is informed by research or evaluation findings that suggest the project component is likely to improve relevant outcomes.

Disconnected youth means an individual, between the ages 14 and 24, who may be from a low-income background, experiences homelessness, is in foster care, is involved in the justice system, or is not working or not enrolled in (or at risk of dropping out of) an educational institution.

English learner means an individual who is an English learner as defined in section 8101(20) of the Elementary and Secondary Education Act of 1965, as amended, or an individual who is an English language learner as defined in section 203(7) of the Workforce Innovation and Opportunity Act.

Logic model (also referred to as a theory of action) means a framework that identifies key project components of the proposed project (*i.e.,* the active ''ingredients'' that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes.

Note: In developing logic models, applicants may want to use resources such as the Regional Educational Laboratory Program's (REL Pacific) Education Logic Model Application, available at *https://ies.ed.gov/ncee/edlabs/regions/pacific/elm.asp* to help design their logic models. Other sources include: *https://ies.ed.gov/ncee/edlabs/regions/pacific/pdf/REL_2014025.pdf, https://ies.ed.gov/ncee/edlabs/regions/pacific/pdf/REL_2014007.pdf,* and *https://ies.ed.gov/ncee/edlabs/regions/northeast/pdf/REL_2015057.pdf.*

Military- or veteran-connected student means one or more of the following:

(a) A child participating in an early learning program, a student enrolled in preschool through grade 12, or a student enrolled in career and technical education or postsecondary education who has a parent or guardian who is a member of the uniformed services (as defined by 37 U.S.C. 101), in the Army, Navy, Air Force, Marine Corps, Coast Guard, Space Force, National Guard, Reserves, National Oceanic and Atmospheric Administration, or Public Health Service or is a veteran of the uniformed services with an honorable discharge (as defined by 38 U.S.C. 3311).

(b) A student who is a member of the uniformed services, a veteran of the uniformed services, or the spouse of a service member or veteran.

(c) A child participating in an early learning program, a student enrolled in preschool through grade 12, or a student enrolled in career and technical education or postsecondary education who has a parent or guardian who is a veteran of the uniformed services (as defined by 37 U.S.C. 101).

Project component means an activity, strategy, intervention, process, product, practice, or policy included in a project. Evidence may pertain to an individual project component or to a combination of project components (*e.g.,* training teachers on instructional practices for English learners and follow-on coaching for these teachers).

Relevant outcome means the student outcome(s) or other outcome(s) the key project component is designed to improve, consistent with the specific goals of the program.

Underserved student means a student in one or more of the following subgroups:

(a) A student who is living in poverty or is served by schools with high concentrations of students living in poverty.

(b) A student of color.

(c) A student who is a member of a federally recognized Indian Tribe.

(d) An English learner.

(e) A child or student with a disability.

(f) A disconnected youth.

(g) A student experiencing homelessness or housing insecurity.

(h) A lesbian, gay, bisexual, transgender, queer or questioning, or intersex (LGBTQI+) student.

(i) A student who is in foster care.

(j) A pregnant, parenting, or caregiving student.

(k) A student impacted by the justice system, including a formerly incarcerated student.

(l) A student who is the first in their family to attend postsecondary education.

(m) A student enrolling in or seeking to enroll in postsecondary education for the first time at the age of 20 or older.

(n) A student who is working full-time while enrolled in postsecondary education.

(o) A student who is enrolled in or is seeking to enroll in postsecondary education who is eligible for a Pell Grant.

(p) An adult student in need of improving their basic skills or an adult student with limited English proficiency.

(q) A military- or veteran-connected student.

Program Authority: 20 U.S.C. 1070a–11 and 20 U.S.C. 1070a–14.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75 (except for 75.215 through 75.221), 77, 79, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative

Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200 (Uniform Guidance), as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The regulations for this program in 34 CFR part 646. (e) The Supplemental Priorities.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian Tribes.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education (IHEs) only.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: The Administration has requested $1,211,000,000 for the Federal TRIO Programs for FY 2025, of which we intend to use an estimated $381,883,715 for new SSS awards under this competition. The actual level of funding, if any, depends on final congressional action. However, we are inviting applications to allow enough time to complete the grant process if Congress appropriates funds for the Federal TRIO Programs.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in subsequent years from the list of unfunded applications from this competition.

Estimated Range of Awards: $148,181–$1,659,366.

Estimated Average Size of Awards: $324,456.

Maximum Award: The maximum award varies based on whether the applicant is currently receiving an SSS grant, as well as the type of project and number of students served. For applicants not currently receiving an SSS Program grant, the maximum awards are as follows:

Type of proposal	Maximum amount *
Regular SSS Proposal Serving a Minimum of 140 Student Participants	$272,364
Regular SSS Proposal Serving a Minimum of 100 Student Participants who are Students with Disabilities	272,364
English as a Second Language (ESL) SSS Proposal Serving a Minimum of 140 Student Participants	272,364
Science, Technology, Engineering, and Mathematics (STEM) and Health Science SSS Proposal Serving a Minimum of 120 Student Participants	272,364
Teacher Preparation SSS Proposal Serving a Minimum of 140 Student Participants	272,364
Veterans SSS Proposal Serving a Minimum of 120 Student Participants	272,364

For applicants proposing to serve fewer than the minimum number of student participants specified in the above table, the maximum award is an amount equal to: $1,945 per student participant for Regular, ESL, and Teacher Preparation proposals; $2,724 per student participant for projects serving Students with Disabilities (SWD proposals); and $2,270 per student participant for STEM (including Health Science) and Veterans proposals.

For applicants currently receiving an SSS Program grant, the maximum award amount is the greater of (a) $272,364 or (b) 100 percent of the applicant's base award amount for FY 2024.

For any currently funded applicant that proposes to serve fewer students than it served in FY 2024, the maximum award is the amount that corresponds with the cost per participant previously established for the project in FY 2024.

Estimated Number of New Awards: 1,159.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 60 months.

III. Eligibility Information

1. *Eligible Applicants:* IHEs or combinations of IHEs.

Note: Combinations of IHEs under this competition must follow the procedures under 34 CFR 75.127–75.129 in developing a group application. This includes developing an agreement that details the activities that each member of the group plans to perform and binds each member of the group to every statement and assurance made by the applicant in the application. This agreement must be submitted with the application.

2.*a. Cost Sharing or Matching:* Section 402D(d)(4) of the HEA requires that all successful applicants that use SSS Program funds to provide grant aid to students pursuant to section 402D(d)(1) of the HEA must provide matching funds, in cash, from non-Federal funds, in an amount that is not less than 33 percent of the total amount of the SSS Program funds used for this aid. This matching requirement does not apply to a grant recipient that is an IHE eligible to receive funds under part A or part B of title III or under title V of the HEA.

b. *Supplement-Not-Supplant:* This competition involves supplement, not supplant funding requirements. Under section 404B(e) of the HEA (20 U.S.C. 1070a–22(e)), grant funds awarded under this program must be used to supplement, and not supplant, other Federal, State, and local funds that would otherwise be expended to carry out activities assisted under this program.

c. *Indirect Cost Rate Information:* For entities eligible to apply to this competition, the program regulations at 34 CFR 694.11 limit indirect cost reimbursement to the rate determined in the entity's negotiated indirect cost rate agreement, or 8 percent of a modified total direct cost base, whichever amount is less. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *www2.ed.gov/about/offices/list/ocfo/intro.html.*

d. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

3. *Subgrantees:* A grantee under this competition may not award subgrants to entities to directly carry out project activities described in its application.

4. *Other:* An applicant may submit multiple applications if each separate application describes a project that will serve a different campus or a different population (section 402A(c)(5) of the HEA).

Under section 402A(h)(1) of the HEA, the term ''different campus'' means a site of an IHE that—(a) is geographically apart from the main campus of the institution; (b) is permanent in nature; and (c) offers courses in educational programs leading to a degree, certificate, or other recognized educational credential.

Under section 402A(h)(2) of the HEA, the term ''different population'' means a group of individuals that an eligible entity desires to serve through an SSS grant that is separate and distinct from any other population that the entity has applied to serve using Federal TRIO Program funds, or, while sharing some of the same needs as another population that the eligible entity has applied to

serve using Federal TRIO Program funds, has distinct needs for specialized services. To implement the requirement in section 402A(h)(2) of the HEA for this competition, the Secretary is designating the populations to be served as: participants who meet the specific requirements for SSS services, participants who are students with disabilities, participants who need ESL services, participants receiving services in the STEM fields, participants receiving Teacher Preparation Services, and participants who have served in the armed forces. These different populations need different types of services. Accordingly, the Secretary has determined that projects serving these different populations should be subject to different standards for the minimum number of participants. An applicant may submit more than one application as long as each application proposes to serve a different population. For project types other than a regular SSS project, an applicant must propose to serve 100 percent of the students in the specific project type.

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045), and available at *www.federalregister.gov/d/2022-26554,* which contain requirements and information on how to submit an application.

2. *Intergovernmental Review:* This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this program.

3. *Funding Restrictions:* We specify unallowable costs in 34 CFR 646.31. We reference additional regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

4. *Recommended Page Limit:* The application narrative, Part III of the application, is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative, which includes the budget narrative, to no more than 65 pages and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double-space (no more than three lines per vertical inch) all text in the application narrative, excluding titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12-point font or larger or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended 65-page limit does not apply to Part I, the Application for Federal Assistance cover sheet (SF 424); Part II, the Budget Information Summary form (ED Form 524); Part III–A, the SSS Program Profile form; Part III–B, the one-page Project Abstract form; or Part IV, the assurances and certifications. The recommended page limit also does not apply to a table of contents, which you should include in the application narrative. You must include your complete response to the selection criteria in the application narrative.

We recommend that any application addressing the competitive preference priorities include no more than three additional pages each for priorities 1 and 2, if addressed. Applications that do not follow the page limit and formatting recommendations will not be penalized.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 646.21 and 75.210.

We will award up to 105 points to an application under the selection criteria and up to 8 additional points to an application under the competitive preference priorities, for a total score of up to 113 points. The maximum number of points available for each criterion is indicated in parentheses.

(a) *Need for the project.* (up to 24 points)

The Secretary evaluates the need for an SSS project proposed at the applicant institution on the basis of the extent to which the application contains clear evidence of—

(1) A high number or percentage, or both, of students enrolled or accepted for enrollment at the applicant institution who meet the eligibility requirements of 34 CFR 646.3 (up to 8 points);

(2) The academic and other problems that eligible students encounter at the applicant institution (up to 8 points); and

(3) The differences between eligible SSS students compared to an appropriate group, based on the following indicators:

(i) Retention and graduation rates.

(ii) Grade point averages.

(iii) Graduate and professional school enrollment rates (four-year colleges only).

(iv) Transfer rates from two-year to four-year institutions (two-year colleges only) (up to 8 points).

(b) *Objectives.* (up to 8 points) The Secretary evaluates the quality of the applicant's proposed objectives in the following areas on the basis of the extent to which they are both ambitious, as related to the need data provided under paragraph (a) of this section, and attainable, given the project's plan of operation, budget, and other resources.

(1) Retention in postsecondary education (3 points).

(2) In good academic standing at grantee institution (2 points).

(3) Two-year institutions only.

(i) Certificate or degree completion (1 point); and

(ii) Certificate or degree completion and transfer to a four-year institution (2 points).

(4) Four-year institutions only. Completion of a baccalaureate degree (3 points).

(c) *Plan of operation.* (up to 30 points) The Secretary evaluates the quality of the applicant's plan of operation on the basis of the following:

(1) The plan to inform the institutional community (students, faculty, and staff) of the goals, objectives, and services of the project and the eligibility requirements for participation in the project (up to 3 points).

(2) The plan to identify, select, and retain project participants with academic need (up to 3 points).

(3) The plan for assessing each individual participant's need for specific services and monitoring his or her academic progress at the institution to ensure satisfactory academic progress (up to 4 points).

(4) The plan to provide services that address the goals and objectives of the project (up to 10 points).

(5) The applicant's plan to ensure proper and efficient administration of the project, including the organizational placement of the project; the time commitment of key project staff; the specific plans for financial management, student records management, and personnel management; and, where appropriate, its plan for coordination with other programs for disadvantaged students (up to 10 points).

(d) *Institutional commitment.* (up to 16 points) The Secretary evaluates the institutional commitment to the proposed project on the basis of the extent to which the applicant has—

(1) Committed facilities, equipment, supplies, personnel, and other resources to supplement the grant and enhance project services (up to 6 points);

(2) Established administrative and academic policies that enhance participants' retention at the institution and improve their chances of graduating from the institution (up to 6 points);

(3) Demonstrated a commitment to minimize the dependence on student loans in developing financial aid packages for project participants by committing institutional resources to the extent possible (up to 2 points); and

(4) Assured the full cooperation and support of the Admissions, Student Aid, Registrar and data collection and analysis components of the institution (up to 2 points).

(e) *Quality of personnel.* (up to 9 points) To determine the quality of personnel the applicant plans to use, the Secretary looks for information that shows—

(1) The qualifications required of the project director, including formal education and training in fields related to the objectives of the project, and experience in designing, managing, or implementing SSS or similar projects (up to 3 points);

(2) The qualifications required of other personnel to be used in the project, including formal education, training, and work experience in fields related to the objectives of the project (up to 3 points); and

(3) The quality of the applicant's plan for employing personnel who have succeeded in overcoming barriers similar to those confronting the project's target population (up to 3 points).

(f) *Budget.* (up to 5 points) The Secretary evaluates the extent to which the project budget is reasonable, cost-effective, and adequate to support the project.

(g) *Evaluation plan.* (up to 8 points) The Secretary evaluates the quality of the evaluation plan for the project on the basis of the extent to which—

(1) The applicant's methods for evaluation—

(i) Are appropriate to the project and include both quantitative and qualitative evaluation measures (up to 2 points); and

(ii) Examine in specific and measurable ways, using appropriate baseline data, the success of the project in improving academic achievement, retention and graduation of project participants (up to 2 points); and

(2) The applicant intends to use the results of an evaluation to make programmatic changes based upon the results of project evaluation (up to 4 points).

(h) *Quality of the project design.* (up to 5 points)

In determining the quality of the design of the proposed project, the Secretary considers the extent to which the proposed project demonstrates a rationale (as defined in this notice).

Note: Under the ''Objectives'' selection criterion in paragraph (b) above, applicants must address the standardized objectives in 34 CFR 646.21(b)(1) through (4) related to the participants' academic achievements, including retention, good academic standing, graduation, and transfer rates. The graduation objective should be measured by cohorts of students who become SSS Program participants in each year of the project and should be compared to a relevant and valid comparison group. The graduation, certificate, and transfer rates for two-year institutions should be measured over a four-year period and that of four-year institutions should be measured over a six-year period.

Note: For the selection criterion ''Quality of personnel'' in paragraph (e), applicants are encouraged to include in their application that they are committed to paying their staff a living wage for the local area and providing benefits.

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

For this competition, a panel of non-Federal reviewers will review each application in accordance with the selection criteria in 34 CFR 646.21 and 75.210 and the competitive preference priorities. The individual scores of the reviewers will be added and the sum divided by the number of reviewers to determine the peer review score received in the review process. Additionally, in accordance with 34 CFR 646.22, the Secretary will award up to 15 prior experience points to applicants that have conducted an SSS Program project within the last three Federal government fiscal years, based on their documented experience. Prior experience points, if any, will be added to the application's averaged reader score to determine the total score for each application.

If there are insufficient funds for all applications with the same total scores, the Secretary will choose among the tied applications so as to serve geographical areas that have been underserved by the SSS Program by first selecting applicants from institutions that are not already recommended for new awards on the SSS slates. If there are still insufficient funds for all applications with the same score, the Secretary will select applicants from institutions that are designated as eligible to apply under the HEA titles III and V programs according to the most recent version (at the time of publication of this notice) of the Eligibility Matrix.

Finally, if there are still tied applications after implementing both of these tiebreakers, the Secretary will select applications from institutions with the highest percentage of undergraduate students who are Pell Grant recipients.

3. *Risk Assessment and Specific Conditions:*

Consistent with 2 CFR 200.206, before awarding grants under this competition, the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2), we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review

and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

5. *In General:* In accordance with the Office of Management and Budget's guidance located at 2 CFR part 200, all applicable Federal laws, and relevant Executive guidance, the Department will review and consider applications for funding pursuant to this notice inviting applications in accordance with—

(a) Selecting recipients most likely to be successful in delivering results based on the program objectives through an objective process of evaluating Federal award applications (2 CFR 200.205);

(b) Prohibiting the purchase of certain telecommunication and video surveillance services or equipment in alignment with section 889 of the National Defense Authorization Act of 2019 (Pub. L. 115–232) (2 CFR 200.216);

(c) Providing a preference, to the extent permitted by law, to maximize use of goods, products, and materials produced in the United States (2 CFR 200.322); and

(d) Terminating agreements in whole or in part to the greatest extent authorized by law if an award no longer effectuates the program goals or agency priorities (2 CFR 200.340).

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

5. *Performance Measures:* The success of the SSS Program is measured by the percentage of SSS participants that complete a program of postsecondary education. The following performance measures have been developed to track progress toward achieving program success:

(a) The percentage of first-time, full-time first-year SSS Program participants who are still enrolled at the beginning of the next academic year or have earned a degree at a two-year grantee institution or transferred from a two-year to a four-year institution.

(b) The percentage of first-time, full-time first-year SSS Program participants at four-year institutions who received a bachelor's degree from the grantee institution within six years (Note: The Department will calculate this measure based both on 100 percent and 150 percent of normal completion time).

(c) The percentage of first-time, full-time SSS Program participants at two-year institutions who received an associate's degree and/or transferred to a four-year institution within three years (Note: The Department will calculate this measure based both on 100 percent and 150 percent of normal completion time).

(d) The cost per successful outcome. All SSS Program grantees are required to submit an annual performance report documenting the persistence and degree attainment of their participants. Since students take different amounts of time to complete their degrees, multiple years of performance report data are needed to determine the degree completion rates of SSS Program participants. The Department will aggregate the data provided in the annual performance reports from all grantees to determine the overall program accomplishment level.

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the

application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Technical Assistance and Dissemination To Improve Services and Results for Children With Disabilities—The National Center for Systemic Improvement; Corrections

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice; corrections.

SUMMARY: On March 21, 2024, the Department published in the **Federal Register** a notice inviting applications (NIA) for the FY 2024 Technical Assistance and Dissemination to Improve Services and Results for Children with Disabilities—The National Center for Systemic Improvement competition, Assistance Listing Number 84.326R. The Department is correcting the NIA by decreasing the estimated available funds and updating the maximum award amounts as well as extending the deadline date for transmittal of applications until May 22, 2024 and the deadline for intergovernmental review until July 22, 2024.

DATES: *Applicability date:* This correction is applicable May 1, 2024.

FOR FURTHER INFORMATION CONTACT: Perry Williams, U.S. Department of Education, 400 Maryland Avenue SW, Room 4A10, Washington, DC 20202. Telephone: (202) 987–0138. Email: *Perry.Williams@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of March 21, 2024, we published the NIA in the **Federal Register** (89 FR 20184). The NIA established a deadline date of May 20, 2024, for the transmittal of applications. We are extending the deadline date for transmittal of applications, because the *Grants.gov* platform will be closed for site maintenance from May 18–21, 2024. Since applicants will be unable to submit applications or work in the *Grants.gov* system during that time, we are extending the deadline to allow applicants additional time to complete and submit their applications. Following the publication of the NIA, the President signed the Further Consolidated Appropriations Act, 2024 (Pub. L. 118–47), on March 23, 2024. Title III of the Further Consolidated Appropriations Act decreased funding for the Technical Assistance and Dissemination to Improve Services and Results for Children with Disabilities program. Accordingly, we are correcting the NIA to reflect the updated estimated available funds maximum award amounts for this competition.

Applicants that have already submitted applications under this competition may resubmit applications but are not required to do so. If a new application is not submitted, the Department will use the application that was submitted by the original deadline. If a new application is submitted, the Department will consider the application that was last successfully submitted and received by 11:59:59 p.m., Eastern Time on the application deadline.

Note: All information in the NIA, including eligibility criteria, remains the same, except for the estimated funding amount and maximum award amounts.

Information about Technical Assistance and Dissemination to Improve Services and Results for Children with Disabilities is available on the Department's website at *https://www2.ed.gov/programs/oseptad/index.html.*

Program Authority: 20 U.S.C. 1463 and 1481.

Corrections

In FR Doc. 2024–05979, appearing on pages 20184–20193 of the **Federal Register** of March 21, 2024 (89 FR 20184), we make the following corrections:

1. On page 20190, in the first and second columns, In the section titled ''II. Award Information'', following the heading ''Estimated Available Funds:'' remove ''The Administration has requested $55,345,000 for the Technical Assistance and Dissemination to Improve Services and Results for Children with Disabilities program for FY 2024, of which we intend to use an estimated $6,250,000 for this competition. The actual level of funding, if any, depends on final congressional action. However, we are inviting applications to allow enough time to complete the grant process if Congress appropriates funds for this program.'' and add, in its place, ''$5,400,000 in year one, $5,750,000 in years two through five.''

2. On page 20190, in the second column, following the heading ''Maximum Award:'' remove ''$6,250,000 for a single budget period of 12 months'' and add, in its place, ''$5,400,000 for a single budget period of 12 months in year one, $5,750,000 for a single budget period of 12 months in years two through five.''

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this notice, the NIA, and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site, you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit

your search to documents published by the Department.

Glenna Wright-Gallo,

Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 553–235]

Seattle City Light; Notice of Designation of Certain Commission Personnel as Non-Decisional

Commission staff members Haley McLoud (Office of the General Counsel; 202–502–8807; *haley.mcloud@ferc.gov*) and Paige Espy (Office of the General Counsel; 202–502–6698; *paige.espy@ferc.gov*) are assigned to assist with settlement negotiations for the Skagit River Hydroelectric Project No. 553.

As non-decisional staff, Ms. McLoud and Ms. Espy will not participate in an advisory capacity in the Commission's review of any offer of settlement or settlement agreement, or deliberations concerning the disposition of the relicense application.

Different Commission advisory staff will be assigned to review any offer of settlement or settlement agreement, and to process the relicense application, including providing advice to the Commission with respect to the agreement and the application. Non-decisional staff and advisory staff are prohibited from communicating with one another concerning the settlement and the relicense application.

Dated: April 25, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2192–052]

Consolidated Water Power Company; Notice of Application for a Non-Capacity Amendment of License Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Non-Capacity Amendment of License.

b. *Project No:* 2192–052.

c. *Date Filed:* December 7, 2023.

d. *Applicant:* Consolidated Water Power Company.

e. *Name of Project:* Biron Hydroelectric Project.

f. *Location:* The project is located on the Wisconsin River in Portage and Wood counties, Wisconsin. The project does not occupy any federal lands.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Mark E. Anderson, 610 High Street, Wisconsin Rapids, Wisconsin 55495, *MarkAnderson2@versoco.com,* (755) 422–4112.

i. *FERC Contact:* Jon Cofrancesco, (202) 502–8951, *jon.cofrancesco@ferc.gov.*

j. *Cooperating agencies:* With this notice, the Commission is inviting federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, that wish to cooperate in the preparation of any environmental document, if applicable, to follow the instructions for filing such requests described in item k below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. *Deadline for filing comments, motions to intervene, and protests:* May 27, 2024.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include the docket number P–2192–052. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request:* Consolidated Water Power Company (Consolidated) proposes to remove approximately 130 acres of land from the project boundary and establish a new project boundary to follow a metes and bounds survey line. The 130 acres is part of a larger 132.06 acre parcel. The land proposed for removal is generally lowland marsh with pockets of upland deciduous and conifer stands. The lower one-third of the parcel is bisected by a drainage ditch which is connected to a series of ditches serving area cranberry growers. The land also incorporates an old, abandoned landfill previously operated by Consolidated's parent paper company that was closed in 1982. The closed landfill would continue to be monitored by the parent company in accordance with the original closure requirements. Consolidated also seeks Commission approval to transfer its fee-title ownership of this parcel back to its parent company or another entity in order to relieve itself of any potential liability associated with the landfill. Consolidated would retain flowage easements over the land. Consolidated anticipates that the parcel would be left undeveloped in the future and states that the parcel is not needed for project operations or flood control. Consolidated states the parcel has limited recreational opportunities due to its location and topography and contains no historical or cultural sites; and that no environmental effects are expected.

m. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/*

esubscription.asp to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

o. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

p. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

q. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: April 25, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER24–1785–000]

MPower Energy NJ LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of MPower Energy NJ LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is May 15, 2024.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OGC–2024–0145; FRL–11854–02–OGC]

Proposed Consent Decree, Clean Water Act Claim; Reopening of the Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; reopening of public comment period.

SUMMARY: The Environmental Protection Agency (EPA) provided notice of a proposed consent decree in *Sierra Club, et al.* v. *EPA, et al.,* No. 3:24–cv–00130 (S.D.W. Va. 2024) on March 29, 2024. The EPA is reopening the public comment period for this proposed consent decree.

DATES: The comment period for the proposed consent decree published on March 29, 2024, at 89 FR 22140, is re-opened. Written comments on the proposed consent decree must be received by May 31, 2024.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2024–0145 online at *https://www.regulations.gov* (EPA's preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. Comments received may be posted without change to *https://www.regulations.gov,* including any personal information provided. For detailed instructions on sending comments, see the ''Additional Information About Commenting on the Proposed Consent Decree'' heading under the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Elise O'Dea, Water Law Office, Office of General Counsel, U.S. Environmental Protection Agency; telephone: (202) 564–4201; email address: *odea.elise@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Additional Information About the Proposed Consent Decree

On March 18, 2024, Sierra Club, the West Virginia Highlands Conservancy, Inc., and the West Virginia Rivers Coalition, Inc. (collectively, ''Plaintiffs'') filed a complaint in Federal district court asserting that EPA failed to perform a mandatory duty under the Clean Water Act (CWA) to establish total maximum daily loads (TMDLs) for certain waters located in the Lower Guyandotte River Watershed in West Virginia that are biologically impaired due to ionic toxicity (Ionic Toxicity TMDLs). This complaint followed Plaintiffs' submission to EPA of a Notice of Intent to Sue (NOI) on March 21, 2023. Following submission of the NOI, Plaintiffs and EPA initiated settlement discussions, which resulted in the proposed consent decree. Under the consent decree, EPA would be obligated to establish Ionic Toxicity TMDLs for 11 waterbody segments in the Lower Guyandotte River Watershed by January 15, 2025. In exchange, Plaintiffs would permanently release any and all claims against EPA that the Agency must establish ionic toxicity TMDLs for any other waterbody segments within the Lower Guyandotte River Watershed except for six identified waterbody segments and any waterbody segments that are listed as biologically impaired for the first time after June 1, 2023. For those six waterbody segments and any waterbody segments listed as biologically impaired for the first time after June 1, 2023, Plaintiffs would refrain from bringing any such claims against EPA until January 15, 2039. Further, Plaintiffs would not bring such claims against EPA for any West Virginia waterbody segment outside the Lower Guyandotte River Watershed until after January 15, 2025.

In accordance with the EPA Administrator's March 18, 2022, memorandum regarding ''Consent Decrees and Settlement Agreements to resolve Environmental Claims Against the Agency,'' the EPA provided notice of the proposed consent decree in *Sierra Club, et al.* v. *EPA, et al.,* No. 3:24–cv–00130 (S.D.W. Va. 2024) on March 29, 2024. 89 FR 22140–41. The EPA is reopening the public comment period. Written comments on the proposed consent decree must now be received by May 31, 2024. EPA seeks public input prior to its final decision-making with regard to potential settlement of the litigation. EPA will accept written comments relating to the proposed consent decree from persons who are not parties to the litigation. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments received disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the CWA.

II. Additional Information About Commenting on the Proposed Consent Decree

A. How can I get a copy of the proposed consent decree?

The official public docket for this action (identified by Docket ID No. EPA–HQ–OGC–2024–0145) contains a copy of the proposed consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OEI Docket is (202) 566–1752.

The electronic version of the public docket for this action contains a copy of the proposed consent decree and is available through *https://www.regulations.gov.* You may use *https://www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search.''

B. How and to whom do I submit comments?

Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2024–0145 via *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from this docket. EPA may publish any comment received to its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* For additional information about submitting information identified as CBI, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *https://www.regulations.gov* website to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA does not plan to consider these late comments.

Steven M. Neugeboren,

Associate General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OGC–2024–0204; FRL–11940–01–OGC]

Proposed Settlement Agreement, Clean Air Act Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement agreement; request for public comment.

SUMMARY: In accordance with the Clean Air Act, as amended (CAA or the Act), notice is given of a proposed settlement agreement in *Nevada Cement Co., LLC* v. *EPA et al.* On April 14, 2023, Plaintiff Nevada Cement Company, LLC filed a petition for review in the United States Court of Appeals for the Ninth Circuit in Case No. 23–682. On June 5, 2023, Plaintiff filed a petition for review in the same court in Case No. 23–1098. Plaintiff disputes the Environmental Protection Agency's (EPA) disapproval of a state implementation plan submitted by the State of Nevada and promulgation of the final rule entitled ''Federal 'Good Neighbor Plan' for the 2015 Ozone National Ambient Air Quality Standards.'' The proposed settlement agreement would establish a process and deadlines by which Plaintiff would apply to EPA for a Case-by-Case Emissions Limit Request for its Fernley, Nevada, facility, in exchange for agreeing to lift a judicial stay entered by the U.S. Court of Appeals for the Ninth Circuit.

DATES: Written comments on the proposed settlement agreement must be received by May 31, 2024.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2024–0204, online at *https://www.regulations.gov* (EPA's preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. Comments received may be posted without change to *https://www.regulations.gov,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Additional Information about Commenting on the Proposed Settlement Agreement'' heading under the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Kyle Durch, Air and Radiation Law Office, Office of General Counsel, U.S. Environmental Protection Agency; telephone (202) 564–1809; email address *durch.kyle@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining a Copy of the Proposed Settlement Agreement

The official public docket for this action (identified by Docket ID No. EPA–HQ–OGC–2024–0204) contains a copy of the proposed settlement agreement. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202)

566–1744 and the telephone number for the OEI Docket is (202) 566–1752.

The electronic version of the public docket for this action contains a copy of the proposed settlement agreement and is available through *https://www.regulations.gov.* You may use *https://www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search.''

II. Additional Information About the Proposed Settlement Agreement

The Environmental Protection Agency (''EPA'' or ''Agency'') promulgated a final rule disapproving the State of Nevada's and 20 other states' ozone interstate transport state implementation plan submissions for the 2015 ozone NAAQS. ''Air Plan Disapprovals; Interstate Transport of Air Pollution for the 2015 8-Hour Ozone National Ambient Air Quality Standards,'' 88 FR 9336 (February 13, 2023) (''SIP Disapproval''). In a subsequent rule, EPA established emissions-control requirements for various sources in 23 states, including in Nevada, of interstate ozone in the ''Federal 'Good Neighbor Plan' for the 2015 Ozone National Ambient Air Quality Standards,'' 88 FR 36654 (June 5, 2023) (''Good Neighbor Plan''). These actions were taken, in accordance with Clean Air Act (''CAA'') section 110(a)(2)(D)(i)(I). 42 U.S.C. 7410(a)(2)(D)(i)(I). Nevada Cement Company (''NCC'') filed petitions for review challenging each of these actions. *Nevada Cement Co. LLC* v. *EPA et al.,* No. 23–682 (9th Cir. filed Apr. 14, 2023) (challenging the SIP Disapproval as to Nevada); *Nevada Cement Co. LLC* v. *EPA et al.,* No. 23–1098 (9th Cir. filed June 5, 2023) (challenging the Good Neighbor Plan as to Nevada).

The proposed settlement agreement with Nevada Cement Company (''NCC'') would establish a process for NCC to apply to EPA for a Case-by-Case Emissions Limit Request (''CBCELR''), consistent with procedures outlined in 40 CFR 52.40(e)(2), which, if approved, would bring its Fernley, Nevada, facility into compliance with the Good Neighbor Plan. To do this, NCC would first submit to EPA, by June 27, 2024, an Engineering Study Report concerning the feasibility and emissions-reduction efficiency of Low-NO_X Burners (''LNB'') installed on each kiln at its Fernley facility, as operated in conjunction with the existing selective non-catalytic reduction (''SNCR'') at such kilns. NCC would determine, subject to EPA's review and dispute resolution procedures, whether that report supports installing LNB; if not, and EPA concurs, it would proceed to apply for a CBCELR based on existing technology at the facility. If LNB is selected, NCC would install LNB on the kilns and would submit a CBCELR no later than March 27, 2026, which would include a limit based on a 180-day demonstration period with LNB installed on the kilns at the Fernley facility, and operated in an optimized manner with the existing SNCR at such kilns. EPA would lift its administrative stay of the Good Neighbor Plan as to the Fernley facility no later than October 15, 2026.

Further, no later than ten business days after moving the court to hold these cases in abeyance—which would be filed no later than five business days after the Settlement Agreement is final—EPA and NCC would file a joint motion with the court in Case No. 23–682 to lift the court's stay of the State Implementation Plan (''SIP'') Disapproval as to the State of Nevada.[1] The proposed settlement agreement includes informal and formal dispute resolution procedures, and the sole remedy of either party under the proposed settlement agreement is to reinitiate the litigation.

In accordance with section 113(g) of the CAA, for a period of thirty (30) days following the date of publication of this document, the Agency will accept written comments relating to the proposed settlement agreement. EPA or the Department of Justice may withdraw or withhold consent to the proposed settlement agreement if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

III. Additional Information About Commenting on the Proposed Settlement Agreement

Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2024–0204, via *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from this docket. EPA may publish any comment received to its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* For additional information about submitting information identified as CBI, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this document. Note that written comments containing CBI and submitted by mail may be delayed and deliveries or couriers will be received by scheduled appointment only.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *https://www.regulations.gov* website to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment.

Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be

[1] The process for EPA to lift its administrative stay of the Good Neighbor Plan as to NCC's Fernley facility would occur through approval of the alternate limit and in conjunction with approval of such alternate limit, EPA would take action to bring the Good Neighbor Plan into effect for NCC's Fernley facility.

marked ''late.'' EPA is not required to consider these late comments.

Gautam Srinivasan,

Associate General Counsel.

BILLING CODE 6690–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0854; FR ID 216732]

Information Collection Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before May 31, 2024.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, and (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–0854.

Title: Section 64.2401, Truth-in-Billing Format, CC Docket No. 98–170 and CG Docket No. 04–208.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 4,165 respondents; 26,711 responses.

Estimated Time per Response: 2 to 230 hours.

Frequency of Response: On occasion reporting requirement; Third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this information collection is found at section 201(b) of the Communications Act of 1934, as amended, 47 U.S.C. 201(b), and section 258, 47 U.S.C. 258, Public Law 104–104, 110 Stat. 56. The Commission's implementing rules are codified at 47 CFR 64.2400.

Total Annual Burden: 1,872,245 hours.

Total Annual Cost: $10,000,000.

Needs and Uses: In 1999, the Commission released the Truth-in-Billing and Billing Format, CC Docket No. 98–170, First Report and Order and Further Notice of Proposed Rulemaking, (1999 TIB Order); published at 64 FR 34488, June 25, 1999, which adopted principles and guidelines designed to reduce telecommunications fraud, such

as slamming and cramming, by making bills easier for consumers to read and understand, and thereby, making such fraud easier to detect and report. In 2000, Truth-in-Billing and Billing Format, CC Docket No. 98–170, Order on Reconsideration, (2000 Reconsideration Order); published at 65 FR 43251, July 13, 2000, the Commission, granted in part petitions for reconsideration of the requirements that bills highlight new service providers and prominently display inquiry contact numbers. On March 18, 2005, the Commission released Truth-in-Billing and Billing Format; National Association of State Utility Consumer Advocates' Petition for Declaratory Ruling Regarding Truth-in-Billing, Second Report and Order, Declaratory Ruling, and Second Further Notice of Proposed Rulemaking, CC Docket No. 98–170, CG Docket No. 04–208, (2005 Second Report and Order and Second Further Notice); published at 70 FR 29979 and 70 FR 30044, May 25, 2005, which determined, inter alia, that Commercial Mobile Radio Service providers no longer should be exempted from 47 CFR 64.2401(b), which requires billing descriptions to be brief, clear, non-misleading and in plain language. The 2005 Second Further Notice proposed and sought comment on measures to enhance the ability of consumers to make informed choices among competitive telecommunications service providers. On April 27, 2012, the Commission released the Empowering Consumers to Prevent and Detect Billing for Unauthorized Charges (''Cramming''), Report and Order and Further Notice of Proposed Rulemaking, CG Docket No. 11–116, CG Docket No. 09–158, CC Docket No. 98–170, FCC 12–42 (Cramming Report and Order and Further Notice of Proposed Rulemaking); published at 77 FR 30972, May 24, 2012, which determined that additional rules are needed to help consumers prevent and detect the placement of unauthorized charges on their telephone bills, an unlawful and fraudulent practice commonly referred to as ''cramming.''

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1095; FR ID 217096]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s). Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before July 1, 2024. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–1095.

Title: Surrenders of Authorizations for International Carrier, Space Station and Earth Station Licensees.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 8 respondents; 8 responses.

Estimated Time per Response: 1 hour.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Voluntary. The statutory authority for this information collection is contained in Sections 4(i), 7(a), 11, 303(c), 303(f), 303(g), and 303(r) of the Communications Act of 1934, as amended; 47 U.S.C. 154(i), 157(a), 161, 303(c), 303(f), 303(g), and 303(r).

Total Annual Burden: 8 hours.

Annual Cost Burden: No cost.

Needs and Uses: This collection will be submitted to the Office of Management and Budget (OMB) as an extension after this 60-day comment period has ended in order to obtain the full three-year clearance from OMB. There are no changes in the number of respondents, responses, annual burden hours and total annual costs.

Licensees file surrenders of authorizations with the Commission on a voluntary basis. This information is used by Commission staff to issue Public Notices to announce the surrenders of authorization to the general public. The Commission's release of Public Notices is critical to keeping the general public abreast of the licensees' discontinuance of telecommunications services.

Without this collection of information, licensees would be required to submit surrenders of authorizations to the Commission by letter which is more time consuming than submitting such requests to the Commission electronically. In addition, Commission staff would spend an extensive amount of time processing surrenders of authorizations received by letter. The collection of information saves time for both licensees and Commission staff since they are received in IBFS electronically and include only the information that is essential to process the requests in a timely manner. Furthermore, the E-filing module expedites the Commission staff's announcement of surrenders of authorizations via Public Notice.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

[OMB No. 3064–0019]

Agency Information Collection Activities: Proposed Collection Renewal; Comment Request

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice and request for comment.

SUMMARY: The FDIC, as part of its obligations under the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to take this opportunity to comment on the renewal of the existing information collections described below (OMB Control No. 3064–0019).

DATES: Comments must be submitted on or before July 1, 2024.

ADDRESSES: Interested parties are invited to submit written comments to the FDIC by any of the following methods:

- *Agency Website: https://www.fdic.gov/resources/regulations/federal-register-publications/.*
- *Email: comments@fdic.gov.* Include the name and number of the collection in the subject line of the message.
- *Mail:* Manny Cabeza (202–898–3767), Regulatory Counsel, MB–3128, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.
- *Hand Delivery:* Comments may be hand-delivered to the guard station at the rear of the 17th Street NW building (located on F Street NW), on business days between 7:00 a.m. and 5:00 p.m.

All comments should refer to the relevant OMB control number. A copy of the comments may also be submitted to the OMB desk officer for the FDIC: Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Manny Cabeza, Regulatory Counsel, 202–898–3767, *mcabeza@fdic.gov,* MB–3128, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

Proposal to renew the following currently approved collection of information:

1. *Title:* Interagency Notice of Change in Control.

OMB Number: 3064–0019.

Form Number: 6822/01.

Affected Public: Individuals, insured state nonmember banks, and insured state savings associations.

Burden Estimate:

SUMMARY OF ESTIMATED ANNUAL BURDEN (OMB NO. 3064–0019)

Information collection (IC) (obligation to respond)	Type of burden (frequency of response)	Number of respondents	Number of responses per respondent	Time per response (HH:MM)	Annual burden (hours)
1. Form 6822/01—Interagency Notice of Change in Control, 12 CFR 303.85 (Mandatory).	Reporting (On Occasion) ...	34	0.82	29:30	826
2. Interagency Notice of Change in Control Public Notice Requirement, 12 CFR 303.87 (Mandatory).	Disclosure (On Occasion) ..	34	0.82	01:00	28
Total Annual Burden (Hours)	.....	.....	.....	.....	854

Source: FDIC.

General Description of Collection: Section 7(j) of the FDIA (12 U.S.C. 1817(j)) and sections 303.80–88 of the FDIC Rules and Regulations (12 CFR 303.80 *et seq.*) require that any person proposing to acquire control of an insured depository institution and certain parent companies thereof provide 60 days prior written notice of the proposed acquisition to the appropriate federal banking agency. Such written notice which pertains to the acquisition of control of an FDIC supervised institution and certain parent companies thereof is filed with the regional director of the FDIC region in which the bank is located. The FDIC reviews the information reported in the Notice to assess, in part, any anticompetitive and monopolistic effects of the proposed acquisition, to determine if the financial condition of any acquiring person or the future prospects of the institution might jeopardize the financial stability of the institution or prejudice the interests of the depositors of the institution, and to determine whether the competence, experience, or integrity of any acquiring person, or of any of the proposed management personnel, indicates that it would not be in the interest of the depositors of the institution, or in the interest of the public, to permit such persons to control the bank. The FDIC must also make an independent determination of the accuracy and completeness of all of the information required to be filed in conjunction with a Notice.

The FDIC is increasing the total burden associated with this collection from 549 hours to 854 hours. This information collection contains a disclosure requirement, which was not recognized in the 2021 submission. The 305 increase in burden hours is due to the addition of the disclosure requirement and the use of a more accurate methodology to estimate the number of respondents and responses per respondent.

Request for Comment

Comments are invited on: (a) Whether the collections of information are necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collections, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.

Federal Deposit Insurance Corporation.

By order of the Board of Directors.

Dated at Washington, DC, April 26, 2024.

James P. Sheesley,

Assistant Executive Secretary.

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments, relevant information, or

documents regarding the agreements to the Secretary by email at *Secretary@fmc.gov,* or by mail, Federal Maritime Commission, 800 North Capitol Street, Washington, DC 20573. Comments will be most helpful to the Commission if received within 12 days of the date this notice appears in the **Federal Register**, and the Commission requests that comments be submitted within 7 days on agreements that request expedited review. Copies of agreements are available through the Commission's website (*www.fmc.gov*) or by contacting the Office of Agreements at (202) 523–5793 or *tradeanalysis@fmc.gov.*

Agreement No.: 201392–001.

Agreement Name: Yang Ming Joint Service Agreement.

Parties: Yang Ming Marine Transport Corp.; Yang Ming (Singapore) Pte. Ltd.

Filing Party: Joshua Stein, Cozen O'Connor.

Synopsis: The Amendment deletes Yang Ming (UK) Limited as a party to the agreement.

Proposed Effective Date: 04/26/2024.

Location: https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/68502.

Agreement No.: 201425.

Agreement Name: HMM/SML Slot Exchange Agreement.

Parties: HMM Co., Ltd.; SM Line Corporation.

Filing Party: Joshua Stein, Cozen O' Connor.

Synopsis: The Agreement authorizes HMM Co., Ltd., (''HMM'') and SM Line Corporation (''SML'') to exchange slots between all ports in the Republic of Korea and China on the one hand and ports on the U.S. Pacific Coast on the other hand.

Proposed Effective Date: 06/7/2024.

Location: https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/86560.

Agreement No.: 201426.

Agreement Name: Cinco/Hyundai Glovis Space Charter.

Parties: Cinco International HongKong Limited; Hyundai Glovis Co. Ltd.

Filing Party: Wayne Rohde, Cozen O' Connor.

Synopsis: The Agreement authorizes Cinco to charter space to Hyundai Glovis in the trade between China and South Korea, on the one hand, and ports on the U.S. West Coast, on the other hand.

Proposed Effective Date: 04/26/2024.

Location: https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/86562.

Dated: April 26, 2024.

Carl Savoy,

Federal Register Alternate Liaison Officer.

BILLING CODE 6730–02–P

FEDERAL MARITIME COMMISSION

National Shipper Advisory Committee May 2024 Meeting

AGENCY: Federal Maritime Commission.

ACTION: Notice of Federal advisory committee meeting.

SUMMARY: Notice is hereby given of a meeting of the National Shipper Advisory Committee (NSAC), pursuant to the Federal Advisory Committee Act. The Committee advises the Federal Maritime Commission. The meeting will be held for the purpose of soliciting and discussing information, insight, and expertise pertaining to conditions in the ocean freight delivery system relevant to the Commission.

DATES: The Committee will meet in-person in Tacoma, WA, on May 20, 2024, from 1 p.m. until 3 p.m. Pacific time. Please note that this meeting may adjourn early if the Committee has completed its business.

ADDRESSES: The meeting will be held at the Fabulich Center located at 3600 Port of Tacoma Rd., Tacoma, WA 98424. This meeting will be open to the public. Requests to register should be submitted to *nsac@fmc.gov* and contain ''REGISTER FOR NSAC MEETING'' in the subject line. The deadline for members of the public to register to attend the meeting in-person is Thursday, May 16 at 5 p.m. eastern. The meeting will also stream virtually, and a link will be distributed in advance of the meeting to those who register in advance. Please note in the registration request if you would like to attend in person or virtually.

FOR FURTHER INFORMATION CONTACT: Mr. Dylan Richmond, Designated Federal Officer of the National Shipper Advisory Committee, phone: (202) 523–5810; email: *drichmond@fmc.gov.*

SUPPLEMENTARY INFORMATION:

Background: The National Shipper Advisory Committee is a Federal advisory committee. It operates under the provisions of the Federal Advisory Committee Act, 5 U.S.C. app., and 46 U.S.C. chapter 425. The Committee was established on January 1, 2021, when the National Defense Authorization Act for Fiscal Year 2021 became law. Public Law 116–283, section 8604, 134 Stat. 3388 (2021). The Committee provides information, insight, and expertise pertaining to conditions in the ocean freight delivery system to the Commission. Specifically, the Committee advises the Federal Maritime Commission on policies relating to the competitiveness, reliability, integrity, and fairness of the international ocean freight delivery system. 46 U.S.C. 42502(b).

The Committee will receive an update from each of its subcommittees. The Committee may receive proposals for recommendations to the Federal Maritime Commission and may vote on these recommendations. Any proposed recommendations will be available for the public to view in advance of the meeting on the NSAC's website, *https://www.fmc.gov/industry-oversight/national-shipper-advisory-committee/.* The Committee will also take public comment in the meeting.

Public Comments: The Committee will take public comment at its meeting and are particularly interested in receiving feedback regarding their objectives and ongoing discussions.

Members of the public may also submit written comments to NSAC at any time. Comments should be addressed to NSAC, c/o Dylan Richmond, Federal Maritime Commission, 800 North Capitol St. NW, Washington, DC 20573 or *nsac@fmc.gov.*

A copy of all meeting documentation, including meeting minutes, will be available at *www.fmc.gov* following the meeting.

By the Commission.

Dated: April 26, 2024.

David Eng,

Secretary.

BILLING CODE 6730–02–P

FEDERAL MARITIME COMMISSION

[Docket No. 24–18]

ACCESS ONE TRANSPORT, INC., Complainant v. CMA CGM S.A., Respondent; Notice of Filing of Complaint and Assignment

Served: April 26, 2024.

Notice is given that a complaint has been filed with the Federal Maritime Commission (the ''Commission'') by Access One Transport, Inc. (the ''Complainant'') against CMA CGM S.A. (the ''Respondent''). Complainant states that the Commission has subject matter jurisdiction over the complaint pursuant to the Shipping Act of 1984, as amended, 46 U.S.C. 40101 *et seq.* and personal jurisdiction over the Respondent as an ocean common

carrier, as defined in 46 U.S.C. 40102(7) and (18).

Complainant is a corporation with a place of business in Gardena, California that operates as a licensed motor carrier.

Complainant identifies Respondent as a corporation organized under the laws of France with a corporate headquarters in Marseille, France who does business in the United States through CMA CGM (America) LLC, with its principal place of business in Norfolk, Virginia.

Complainant alleges that Respondent violated 46 U.S.C. 41102(c), 41104(a)(3) and 41104(a)(8). Complainant alleges these violations arose from acts or omissions of the Respondent that rendered Complainant unable to return empty containers within the allowable free time, including the imposition of dual transaction restrictions and return limits, and the unavailability of appointments. Complainant also alleges these violations caused various damages to the Complainant, including detention charges, chassis charges, storage costs, stop off charges, and re-delivery charges.

An answer to the complaint must be filed with the Commission within 25 days after the date of service.

The full text of the complaint can be found in the Commission's electronic Reading Room at *https://www2.fmc.gov/readingroom/proceeding/24-18/.* This proceeding has been assigned to the Office of Administrative Law Judges. The initial decision of the presiding judge shall be issued by April 28, 2025, and the final decision of the Commission shall be issued by November 11, 2025.

David Eng,

Secretary.

BILLING CODE 6730–02–P

GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090–XXXX)

Docket No. 2024–0001; Sequence No. 2] Submission for OMB Review; Actual Place of Residence Determination (GSA Form 5047)

AGENCY: Office of Human Resource Management, Division of Human Capital Policy and Programs, General Services Administration (GSA).

ACTION: Notice of request for comments regarding a request for a new OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act, the Regulatory Secretariat Division will be submitting to the Office of Management and Budget (OMB) a request to review and approve a new information collection requirement.

DATES: Submit comments on or before May 31, 2024.

ADDRESSES: Written comments and recommendations for this information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Colin C. Bennett, Human Resources Specialist, Office of Human Resources Management, Division of Human Capital Policy and Programs, at telephone 240–418–6822 or via email to *colin.bennett@gsa.gov* for clarification of content.

SUPPLEMENTARY INFORMATION:

A. Purpose

The General Services Administration (GSA) routinely hires, reassigns, promotes and transfers Federal employees to duty stations in foreign areas (*i.e.,* locations outside of the United States, its territories and possessions). For this staffing activity, GSA pays for the cost of relocation, known as ''permanent change of station'' relocation benefits (see further 5 U.S.C. 5722(a) and 5724(d)). Relocation benefits include the cost of travel and transportation, as well as the cost of shipment of household goods to a new post outside of the Continental United States. In addition, most overseas employees are eligible for ''renewal agreement travel,'' a travel reimbursement authority that allows agency to leverage funds to pay for periodic travel back to the United States between overseas tours of duty for paid time off, known as ''home leave'' (see further, 5 U.S.C. 5728(a) and 5 U.S.C. 6305(a)).

For an agency to calculate the costs of relocation as well as renewal agreement travel, both federal travel laws require that the employee (or appointee) designate an ''actual place of residence.'' When such residence cannot be easily determined by the job candidate, the agency must instead make an administrative residency determination on behalf of the employee. The new GSA Form 5047 will help agency representatives (*i.e.,* human resources specialists) make a determination of the actual place of residence based upon documents and input provided by the job candidates, considered members of the public.

Typically, agencies use the definition of ''residence'' from the Immigration and Naturalization Act of 1952, codified at 5 U.S.C. 1101(33), which defines ''residence'' as a ''place of general abode'' or the ''principal, actual dwelling place in fact, without regard to intent.'' While for most employees (or appointees) the determination of an actual place of residence in the U.S. is typically straightforward, residency may be unclear if the appointee is already overseas and has been overseas for a long period of time. Long-term posts overseas are often characterized by the lease (or even sale) of the employee's primary U.S. dwelling, changes in the declared U.S. voting registration location, and/or changes in the state and local income or property tax jurisdictions.

To more effectively administer permanent change of station relocation as well as renewal agreement travel, the General Services Administration (GSA) has created a new agency form, GSA Form 5047, *Actual Place of Residence Determination.* This form will allow employees, job candidates, and the agency's human resources specialists, to more easily determine the actual place of residence by working through a series of guided questions on the form's worksheet. Following completion of the form's worksheet, the employee, candidate, and human resources specialist can summarize the determination on the form's front cover sheet.

The questions on the worksheet portion of the form are drawn from governing administrative law authorities, primary Comptroller General decisions such as: *Rafael Arroyo,* decision B–197205 (May 16, 1980), decision B–157548 (Sept. 13, 1965), 45 Comp. Gen. 136, and decision B–140748 (Oct. 29, 1959), 39 Comp. Gen. 337. Under these administrative law authorities, the place of actual residence is established at the time of appointment or transfer (see also decision B–136029, June 24, 1958, 37 Comp. Gen. 846). Use of this form is therefore recommended for all overseas appointments, transfers or reassignments and, in particular, those personnel selections of job candidates via agency transfer employed by a different U.S. Government agency and already present overseas.

Use of this form will allow GSA to comply with the Federal Travel Regulations, which require the administrative determination and documentation of the actual place of residence for all overseas appointments or placements (see further 41 CFR 302–3.509). In addition, this form will also

allow the agency to leverage the renewal agreement travel authority (*i.e.,* the Home Leave Act of 1954, 68 Stat. 1008) only when appropriate and not in the rare cases of local foreign hires who have severed all jurisdictional nexuses with the U.S.

Significantly, this residency determination form can also be used to determine eligibility for the following other overseas allowance and benefit authorities: (a) the 45-day annual leave accrual authority (5 U.S.C. 6304(b)), (b) home leave (5 U.S.C. 6305(a)) and (c) living quarters allowance (5 U.S.C. 5923(a)(2)). Under each of these authorities, local hires who currently live in foreign areas are excluded from benefits eligibility unless they can demonstrate that foreign residence is temporary, is only pursuant to continuous employment overseas with the U.S. Government (or other U.S. interest), and finally, there exists a contractual transportation agreement that provides for the eventual return of the job candidate to a specifically-identified place of actual residence within the U.S.

B. Annual Reporting Burden

Respondents: 25 per year.
Responses per Respondent: 1.
Total Annual Responses: 25.
Hours per Response: 1.
Total Burden Hours: 25.

C. Public Comments

A 60-day notice was published in the **Federal Register** at 89 FR 13341 on February 22, 2024. No comments were received.

Obtaining copies of proposals: We have provided a copy of the proposed draft GSA Form 5047 at the end of this notice below the signature block. A copy of the proposed draft form can alternatively be obtained through GSA's Regulatory Secretariat Division by calling (202) 501–4755 or emailing *GSARegSec@gsa.gov*. Please cite OMB Control No. 3090–XXXX, *Actual Place of Residency Determination (GSA Form 5047),* in all correspondence.

Lois Mandell,

Director, Regulatory Secretariat Division, General Services Administration.

BILLING CODE 6820–FM–P

GSA Form 5047

ACTUAL PLACE OF RESIDENCE DETERMINATION
SECTION A - COVER SHEET

Name of Candidate

First _____ MI ____ Last _____

BACKGROUND. An employee's "actual place of residence in the U.S.," as determined by an appointing agency, is a statutory requirement that determines eligibility for "permanent change of station" (PCS) relocation costs (5 U.S.C. §§ 5722 and 5724(d)) under the Administrative Expenses Act of 1946 and home leave travel cost reimbursement (also known as "renewal agreement travel," 5 U.S.C. § 5728) under the Home Leave Act of 1954.

Note: This residency determination form can also be used to determine eligibility for: (a) the 45-day annual leave accrual authority (5 U.S.C. § 6304(b)), from the Annual and Sick Leave Act of 1951, (b) home leave (5 U.S.C. § 6305(a)) and (c) living quarters allowance (5 U.S.C. § 5923(a)(2)), both from the Overseas Allowances Act of 1960.

Under GSA Order 5730.1, usually the "actual place of residence" is the principal, actual dwelling place in fact, without regard to intent, at the time of selection for appointment or transfer. (See 8 U.S.C. § 1101(a)(33)). This rule is used for candidates who are selected while residing within the U.S.

For candidates residing in the U.S. at the time of appointment or transfer, the actual place of residence is [Worksheet Not Required]:

City _____ State (Postal Abbreviation) ____

For Department of Defense candidates residing in a foreign area at the time of selection by transfer, the actual place of residence determination is made as follows:

For employees selected from the Department of Defense, use the "Actual Residence at Time of Appointment," Line Item G, of DoD Form 1617, *Transfer of Civilian Employees Outside of CONUS*. Under GSA longstanding travel policy (i.e., former 41 C.F.R. § 302-1.12(c)(3)(iii), 1997 edition) this is considered a continuous designation unless this designation was in error or later circumstances entitle a different determination. The residence listed on the DoD Form 1617 is **[Worksheet Not Required]**:

City _____ State (Postal Abbreviation) ____

When Worksheet Required:

For candidates from DoD residing in a foreign area at the time of selection by transfer, who do not have the DoD Form 1617 available, as well as candidates from other federal agencies (e.g., Commerce Department, State Department, USAID), GSA must make an administrative determination of the actual place of residence. Use this form's worksheet to determine the most appropriate actual place of residence.

The generally recognized test for the "actual place of residence" test within GSA and other agencies is based upon the Comptroller General Opinions, *Rafael Arroyo*, B-197205, May 16, 1980, B-157548, 45 Comp. Gen. 136 (1965), and B-140748, 39 Comp. Gen. 337 (1959). These administrative law decisions require the employing office, at the time of appointment or transfer, to determine (and then document) the "actual place of residence" by consideration of the following categories of evidence:

(1) Physical residence (i.e., actual dwelling place of fact, regardless of intent, under 8 U.S.C. § 1101(a)(33)) discussed above) at the time of selection;
(2) Residence provided in agency records;
(3) Residence according to employment history;
(4) Individual or family association with an area;
(5) Exercising the privileges and duties of citizenship, such as: voting or paying state income or property taxes; and
(6) Place of birth, education, and marriage.

Based on evaluation of all the above facts and documents available, and following completion of the worksheet below, the employee's "actual place of residence" is:

Country (U.S. or Foreign)

City State (if U.S.)

Name of Human Resources Specialist

Signature (Human Resources Specialist)

Date

SECTION B
ACTUAL PLACE OF RESIDENCE WORKSHEET

Based on *Rafael Arroyo*, Comptroller General decision B-197205 (1980), and other administrative law sources. Consider the preponderance of the evidence (from below) if there are multiple possible places of residence.

Name of Candidate

First _____ MI _____ Last _____

Current Physical Residence at Time of Appointment or Transfer
August 24, 1955, B-124663, 35 Comp. Gen. 101; B-122796, November 4, 1955, 35 Comp. Gen. 270

Country (U.S. or Foreign) _____

City _____ State (if U.S.) _____

Can this residence be considered temporary and only incident to the performance of Government duties? If Yes, disregard this factor (45 Comp. Gen. 136):

Yes ☐ No ☐

Note: If the current location is a foreign county, be aware that the appointee may not be eligible for foreign allowances and benefits. The 45-day annual leave accrual, home leave, renewal agreement travel, and living quarters allowance authorities all require current residents of foreign countries to have that foreign residence only temporarily, pursuant only to continuous U.S. Government employment, and supported by a documented transportation agreement (such as DoD Form 1617) that stipulates eventual return transportation to an annotated place of actual residence in the U.S. While B-122796, November 4, 1955, 35 Comp. Gen. 270 permits GSA to provide reciprocity to job candidates appointed by transfer from other agencies, in certain circumstances, such appointees are instead foreign "local" hires, meaning, they lack sufficient jurisdictional connections to the United States and are unable to satisfy the eligibility requirements of those authorities (i.e. continuous U.S. employment overseas pursuant to a documented transportation agreement). In situations where a documented transportation agreement was known to exist, and has been subsequently lost, or cannot be located, the job candidate's resume can be used instead to support continuous employment overseas by the U.S. Government and the transportation agreement requirement can be supported by obtaining a copy of the original relocation package used to send the job candidate overseas by the losing agency under the Administrative Expenses Act of 1946.

Residence Provided in Agency Records
(e.g., Mailing Address for W-2 and Leave and Earnings Statements)
B-125293, October 28, 1955, 35 Comp. Gen. 244

Country (U.S. or Foreign)

City State (if U.S.)

Historical Residence While Employed
(i.e., residence during the prior 5 years)
B-125293, October 28, 1955, 35 Comp. Gen. 244

Country (U.S. or Foreign)

City State (if U.S.)

Family Connections
B-140748, 39 Comp. Gen. 337 (1959); B-125293, October 28, 1955, 35 Comp. Gen. 244

Does your family (e.g., parents, siblings) live in a particular location where you maintain a historical or affinity connection? (For example, where you own a family burial plot and/or where you plan to retire at the conclusion of Federal service.)

Yes No

If Yes: City State (if U.S.)

Voting and Paying Taxes
January 15, 1947, 26 Comp. Gen. 488 and B-125293, October 28, 1955, 35 Comp. Gen. 244

1. Are you currently a registered U.S. voter?
   Yes No I am not sure
2. If you have voted in the past in U.S. elections, either in person, or by mail (e.g., absentee ballot), what historically has been your voting jurisdiction?

County State

3. Do you currently pay U.S. income tax? Yes No
4. Do you currently pay U.S. State and/or local Income tax? Yes No
5. If you currently pay U.S. State tax and/or local tax, what state and/or local jurisdiction?

State

Local Jurisdiction (County, City, etc.)

6. Do you pay income tax to a foreign country? Yes ☐ No ☐
7. If you pay income tax to a foreign country, what country?

Long-standing connections through birth, where you spent your youth, education (i.e., secondary schooling and/or college), and/or marriage
B-157548, 45 Comp. Gen. 136 (1965)

Do you identify with a particular U.S. State or Territory due to a long-standing, historical connection, such as through birth, marriage and/or education?

Yes ☐ No ☐

If yes, what State or Territory:

Local Jurisdiction (County, Township, etc.)

Name of Human Resources Specialist

Signature (Human Resources Specialist)

Date

PRIVACY ACT STATEMENT

Information collected via this form is pursuant to federal law, in particular: 5 U.S.C. § 3301 [rules for admission to the Federal service] and 5 U.S.C.§ 3302 [rules for the competitive service]. The information collected also facilitates the correct benefits determination decisions for the accumulation of annual leave (5 U.S.C. § 6304(b)), home leave and related renewal agreement travel (5 U.S.C. § 6305(a) and 5 U.S.C. § 5728(a)), and permanent change of station (5 U.S.C. §§ 5722, 2724a, and 5724(d)). Disclosure of information related to the candidate and position is mandatory under these authorities so that the correct pay and benefits can be provided upon appointment, transfer, or reassignment to a foreign area. Use of this information is governed by Civil Service regulations found within 5 U.S.C. Part 630 and the Federal Travel Regulations under 41 C.F.R. Part 302. The information collected via this form will only be used by the GSA Office of Human Resources Management and the employee's new supervisor under the provisions of 5 U.S.C. § 552a(b)(3) [routine use]. Such information is not releasable to the public due to 5 U.S.C. § 552(b)(6) and will be stored within the Office of Personnel Management's Electronic Personnel Folder (eOPF) application, under System of Record Notice (SORN) "OPM/GOVT-1" at 77 FR 73694 (December 11, 2012). An employee's failure to provide the information requested on this form may lead to the erroneous payment of compensation and benefits, or the non-payment of eligible compensation and benefits.

Instructions for Human Resources Offices

1. Interview the candidate and collect the DoD Form 1617 (if applicable) and demographic information.
2. Complete the Section B Worksheet (if necessary).
3. Based upon the totality of the evidence collected and all available facts (B-157548, Sept. 13, 1965, 45 Comp. Gen. 136), document via the Worksheet and complete the Cover Sheet. The place constituting the actual place of residence must be determined upon the facts and circumstances of each individual case (B-124663, August 24, 1955, 35 Comp. Gen. 101 and September 21, 1955, B-124492).
4. Sign and date both theSection B Worksheet (if applicable) and the Section A Cover Sheet.
5. Submit to the Office of the Chief Financial Officer (OCFO), Travel and Relocation Office, for use in their determination and inclusion within GSA Forms 87A and 2255.

Centers for Medicare & Medicaid Services

[CMS–3451–FN]

Medicare and Medicaid Programs: Application From the Joint Commission for Initial CMS-Approval of Its Rural Health Clinic (RHC) Accreditation Program

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Final notice.

SUMMARY: This final notice announces our decision to approve The Joint Commission (TJC) for initial recognition as a national accrediting organization (AO) for rural health clinics (RHCs) that wish to participate in the Medicare or Medicaid programs.

DATES: The decision announced in this notice is applicable June 1, 2024, to June 1, 2028.

FOR FURTHER INFORMATION CONTACT: Caecilia Andrews (410) 786–2190.

SUPPLEMENTARY INFORMATION:

I. Background

Under the Medicare program, eligible beneficiaries may receive covered services in a rural health clinic (RHC) provided certain requirements are met by the RHC. Sections 1861(aa)(1) and (2) and 1905(l)(1) of the Social Security Act (the Act), establish distinct criteria for facilities seeking designation as an RHC. Regulations concerning provider agreements are at 42 CFR part 489 and those pertaining to activities relating to the survey and certification of facilities are at 42 CFR part 488, subpart A. The regulations at 42 CFR part 491, subpart A, specify the conditions that an RHC must meet to participate in the Medicare program. The scope of covered services and the conditions for Medicare payment for RHCs are set forth at 42 CFR part 405, subpart X.

Generally, to enter into an agreement, an RHC must first be certified by a State survey agency as complying with the conditions or requirements set forth in part 491 of CMS regulations. Thereafter, the RHC is subject to regular surveys by a State survey agency to determine whether it continues to meet these requirements.

However, there is an alternative to surveys by State survey agencies. Section 1865(a)(1) of the Act provides that, if a provider entity demonstrates through accreditation by an approved national accrediting organization (AO) that all applicable Medicare conditions are met or exceeded, we will deem those provider entities as having met the requirements. Accreditation by an AO is voluntary and is not required for Medicare participation.

If an AO is recognized by the Secretary of Health and Human Services as having standards for accreditation that meet or exceed Medicare requirements, any provider entity accredited by the national accrediting body's approved program would be deemed to meet the Medicare conditions. A national AO applying for CMS approval of their accreditation program under 42 CFR part 488, subpart A must provide CMS with reasonable assurance that the AO requires the accredited provider entities to meet requirements that are at least as stringent as the Medicare conditions. Our regulations concerning the approval of AOs are set forth at § 488.5.

The Joint Commission (TJC) has requested initial approval by CMS for its RHC program. CMS has reviewed TJC's application as described later in this rule and is hereby announcing TJC's initial term of approval for a period of four years.

II. Approval of Deeming Organization

Section 1865(a)(2) of the Act and our regulations at § 488.5 require that our findings concerning review and approval of a national accrediting organization's requirements consider, among other factors, the applying accrediting organization's requirements for accreditation; survey procedures; resources for conducting required surveys; capacity to furnish information for use in enforcement activities; monitoring procedures for provider entities found not in compliance with the conditions or requirements; and ability to provide us with the necessary data for validation.

Section 1865(a)(3)(A) of the Act further requires that we publish, within 60 days of receipt of an organization's complete application, a notice identifying the national accrediting body making the request, describing the nature of the request, and providing at least a 30-day public comment period. We have 210 days from the receipt of a complete application to publish notice of approval or denial of the application.

III. Provisions of the Proposed Notice

On December 7, 2023, CMS published a proposed notice in the **Federal Register** (88 FR 85290), announcing TJC's request for initial approval of its Medicare rural health clinic (RHC) accreditation program. In that proposed notice, we detailed our evaluation criteria.

Under section 1865(a)(2) of the Act and in our regulations at § 488.5 and § 488.8(h), we conducted a review of TJC's RHC application in accordance with the criteria specified by our regulations, which include, but are not limited to, the following:

- An administrative review of TJC's: (1) corporate policies; (2) financial and human resources available to accomplish the proposed surveys; (3) procedures for training, monitoring, and evaluation of its RHC surveyors; (4) ability to investigate and respond appropriately to complaints against accredited RHCs; and (5) survey review and decision-making process for accreditation.
- A review of TJC's survey processes to confirm that a provider or supplier, under TJC's RHC deeming accreditation program, would meet or exceed the Medicare program requirements.
- A documentation review of TJC's survey process to do the following:

++ Determine the composition of the survey team, surveyor qualifications, and TJC's ability to provide continuing surveyor training.

++ Compare TJC's processes to those we require of State survey agencies (SA), including periodic resurvey and the ability to investigate and respond appropriately to complaints against TJC-accredited RHCs.

++ Evaluate TJC's procedures for monitoring an accredited RHC it has found to be out of compliance with TJC's program requirements. (This pertains only to monitoring procedures when TJC identifies non-compliance. If noncompliance is identified by a SA through a validation survey, the SA monitors corrections as specified at § 488.9(c)).

++ Assess TJC's ability to report deficiencies to the surveyed RHC and respond to the RHC's plan of correction in a timely manner.

++ Establish TJC's ability to provide CMS with electronic data and reports necessary for effective validation and assessment of the organization's survey process.

++ Determine the adequacy of TJC's staff and other resources.

++ Confirm TJC's ability to provide adequate funding for performing required surveys.

++ Confirm TJC's policies with respect to surveys being unannounced.

++ Confirm TJC's policies and procedures to avoid conflicts of interest, including the appearance of conflicts of

interest, involving individuals who conduct surveys or participate in accreditation decisions.

++ Obtain TJC's agreement to provide CMS with a copy of the most current accreditation survey together with any other information related to the survey as we may require, including corrective action plans.

IV. Analysis of and Responses to Public Comments on the Proposed Notice

In accordance with section 1865(a)(3)(A) of the Act, the December 7, 2023, proposed notice also solicited public comments regarding whether TJC's requirements met or exceeded the Medicare Conditions for Certification (CfCs) for RHCs. We did not receive any public comments.

V. Provisions of the Final Notice

A. Differences Between TJC's Standards and Requirements for Accreditation and Medicare Conditions and Survey Requirements

We compared TJC's RHC accreditation requirements and survey process with the Medicare conditions set forth at 42 CFR part 491, subpart A, the survey and certification process requirements of parts 488 and 489, and survey process as outlined in the State Operations Manual (SOM). Our review and evaluation of TJC's RHC application, which was conducted as described in section III. of this final notice, yielded the following areas where, as of the date of this notice, TJC has completed revising its standards and certification processes to—

- Meet the Medicare CfC requirements for all of the following regulations:

++ Section 491.2, to clarify the definition of a rural health clinic, specifically that a rural health clinic is not a rehabilitation agency or a facility primarily for the care and treatment for mental diseases, and also to include the definition of the Secretary.

++ Section 491.4, to explicitly reference that an RHC must be in compliance with applicable Federal, State and local laws and regulations.

++ Section 491.4(a) and 491.4(b), to specify that an RHC must be licensed pursuant to applicable State and local law and that staff are licensed, certified or registered in accordance with applicable State and local laws.

++ Section 491.10(a)(2), to include the term ''designated member of the professional staff,'' who are responsible for maintaining the records and for insuring that they are completely and accurately documented, readily accessible, and systematically organized.

In addition to the standards review, CMS reviewed TJC's comparable survey processes, which were conducted as described in section III. of this final notice, and yielded the following areas where, as of the date of this notice, TJC has completed revising its survey processes to demonstrate that it uses survey processes that are comparable to State survey agency processes by:

++ Removing language suggesting survey activities could be completed virtually (as temporarily allowed during the COVID–19 Public Health Emergency (PHE)), since the conclusion of the PHE has occurred.

++ Clarifying that mid-level staffing waivers are only applicable to existing CMS-certified RHCs and that initial enrollment applications for CMS-certification must meet all staffing requirements at 42 CFR 491.8, in accordance with the State Operations Manual (SOM), Appendix G, and SOM Chapter 2.

++ Clarifying, in accordance with SOM, Appendix G, Task 1, that TJC's survey composition includes a Registered Nurse.

++ Ensuring survey procedures align with SOM, Appendix G, Interpretive guidelines at § 491.5(a)(3)(iii), which require that an RHC with additional locations must enroll each permanent unit separately, and each must independently and fully comply with the RHC CfCs.

++ To ensure survey processes align with SOM, Appendix G, Task 3-Observation Methods, related to patient and staff identifiers.

++ Clarifying instructions related to the selection of active patient records consistent with SOM, Appendix G, Task 3.

++ Revise survey documentation, including the survey report and evidence of standard compliance, to include the RHC's name and address, not that of the health system to which it might belong, consistent with regulations at § 413.65 and § 491.5(a)(1).

++ To provide additional surveyor training related to the evaluation of emergency preparedness at § 491.12, specifically related to review of the RHC's risk assessment to ensure that risk assessments account for the patient population served.

++ To provide a survey process for calculating the required time of mid-level staff based on the hours of operations to assess staffing in accordance with § 491.8(a)(6), specifically to ensure a nurse practitioner, physician assistant, or certified nurse-midwife (CNM) is available to furnish patient care services at least 50 percent of the time the RHC operates, even when a physician is also present in the clinic.

++ To provide additional surveyor training related to staffing requirements, including physicians providing medical direction within the RHC, consistent with § 491.8(b)(1).

++ To ensure surveyor guidance includes inspecting all areas within patient care rooms, comparable to SOM, Appendix G, to assess the RHC's physical plant and environment at § 491.6.

++ To update TJC's survey procedures to be comparable to SOM, Appendix G, survey protocol for § 491.9(a)(2) and § 491.9(c)(1) to adequately assess that the RHC is primarily engaged in providing outpatient health services and the RHC staff furnishes those diagnostic and therapeutic services and supplies that are commonly furnished in a physician's office or at the entry point into the health care delivery system, which includes medical history, physical examination, assessment of health status, and treatment for a variety of medical conditions.

++ To reassess survey time and allocation of survey teams consistent with § 488.5(a)(5) and § 488.5(a)(6), especially for a new deeming program and initial surveys.

B. Term of Approval

Based on our review and observations described in section III. and section V. of this final notice, we approve TJC as a national accreditation organization for RHCs that request participation in the Medicare program. The decision announced in this final notice is effective June 3, 2024, to June 3, 2028 (4 years).

VI. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping, or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35).

The Administrator of the Centers for Medicare & Medicaid Services (CMS), Chiquita Brooks-LaSure, having reviewed and approved this document, authorizes Trenesha Fultz-Mimms, who is the Federal Register Liaison, to electronically sign this document for

purposes of publication in the **Federal Register**.

Trenesha Fultz-Mimms,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Notice of Publication of Common Agreement for Nationwide Health Information Interoperability (Common Agreement) Version 2.0

AGENCY: Office of the National Coordinator for Health Information Technology, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: This notice fulfills an obligation under the Public Health Service Act (PHSA) that requires the National Coordinator for Health Information Technology to publish on the Office of the National Coordinator for Health Information Technology's public internet website, and in the **Federal Register**, the trusted exchange framework and common agreement developed under the PHSA. This notice is for publishing an updated version of the Common Agreement (Version 2.0).

FOR FURTHER INFORMATION CONTACT: Mark Knee, Office of the National Coordinator for Health Information Technology, 202–664–2058.

SUPPLEMENTARY INFORMATION: This notice fulfills the obligation under section 3001(c)(9)(C) of the Public Health Service Act (PHSA) (42 U.S.C. 300jj–11(c)(9)(C)) to publish the trusted exchange framework and common agreement, developed under section 3001(c)(9)(B) of the PHSA (42 U.S.C. 300jj–11(c)(9)(B)), in the **Federal Register**. This publication consists of the following document:

BILLING CODE 4150–45–P

Common Agreement for Nationwide Health Information Interoperability (Common Agreement) Version 2.0

COMMON AGREEMENT FOR NATIONWIDE HEALTH INFORMATION INTEROPERABILITY

Version 2.0

April 2024

This document was published by the U.S. Department of Health and Human Services, Office of the National Coordinator for Health Information Technology and was produced at U.S. taxpayer expense. This document meets the requirement in section 3001(c)(9)(C) of the Public Health Service Act for the National Coordinator for Health Information Technology to publish on the Office of the National Coordinator for Health Information Technology's public Internet website, and in the Federal Register, the common agreement (42 U.S.C. 300jj-11(c)(9)(C)).

The Common Agreement for Nationwide Health Information Interoperability

This Common Agreement for Nationwide Health Information Interoperability (the "Common Agreement") is entered into as of the CA Effective Date, by and between The Sequoia Project, Inc., a Virginia non-stock corporation, acting as the current Recognized Coordinating Entity© as defined below (the "RCE™") and _____, a _____ ("Signatory"). RCE and Signatory may also be referred to herein individually as a "Party" or collectively as the "Parties."

RECITALS

WHEREAS, Section 4003 of the 21st Century Cures Act directed the U.S. Department of Health and Human Services ("**HHS**") National Coordinator for Health Information Technology to, "in collaboration with the National Institute of Standards and Technology and other relevant agencies within the Department of Health and Human Services, for the purpose of ensuring full network-to-network exchange of health information, convene public-private and public-public partnerships to build consensus and develop or support a trusted exchange framework, including a common agreement among health information networks nationally" (the "Trusted Exchange Framework and Common Agreement"℠ or TEFCA℠);

WHEREAS, this Common Agreement (including the documents incorporated herein by reference) is the common agreement developed pursuant to Section 4003 of the 21st Century Cures Act;

WHEREAS, The Sequoia Project has been selected by the Office of the National Coordinator for Health Information Technology ("ONC") to serve as the RCE for purposes of implementing, maintaining, and updating this Common Agreement, including the Qualified Health Information Network™ ("QHIN™") Technical Framework, as well as managing the activities associated with the designation of interested health information networks ("HINs") as QHINs (as defined and set forth in this Common Agreement);

WHEREAS, Signatory wishes to be Designated as a QHIN and has completed the application and testing process toward such Designation;

WHEREAS, Signatory must, among other conditions set forth in this Common Agreement, agree to be bound by the terms of this Common Agreement before Signatory may be designated as a QHIN and, upon signing this Common Agreement, Signatory agrees to be so bound as a Signatory and as a QHIN, if so Designated, as the case may be;

NOW, THEREFORE, in consideration of the mutual promises set forth herein and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties, intending to be legally bound, mutually agree as set forth below.

AGREEMENT

1. Definitions and Relevant Terminology.

1.1 Defined Terms. Capitalized terms used in this Common Agreement shall have the meaning set forth below. Where a definition includes one or more citations to a statute, regulation, or standard, the definition shall be interpreted to refer to such statute, regulation, or standard as may be amended from time-to-time.

Applicable Law: all federal, State, local, or tribal laws and regulations then in effect and applicable to the subject matter herein. For the avoidance of doubt, federal agencies are only subject to federal law.

Breach of Unencrypted Individually Identifiable Information: the acquisition, access, or Disclosure of unencrypted Individually Identifiable Information maintained by an IAS Provider that compromises the security or privacy of the unencrypted Individually Identifiable Information.

Business Associate: has the meaning assigned to such term at 45 CFR § 160.103.

Business Associate Agreement (BAA): a contract, agreement, or other arrangement that satisfies the implementation specifications described within 45 CFR § 164.314(a) and 164.504(e), as applicable.

Common Agreement: unless otherwise expressly indicated, the Common Agreement for Nationwide Health Information Interoperability, the QHIN Technical Framework (QTF), all Standard Operating Procedures (SOPs), and all other attachments, exhibits, and artifacts incorporated therein by reference.

Common Agreement (CA) Effective Date: if (i) Signatory was Designated as a QHIN prior to the Implementation Date, then the Implementation Date; or (ii) if Signatory was Designated as a QHIN after the Implementation Date, then the date that the RCE executes the Common Agreement to which Signatory is a Party.

Confidential Information: any information that is designated as Confidential Information by a CI Discloser, or that a reasonable person would understand to be of a confidential nature, and is disclosed to a CI Recipient pursuant to or in connection

with a Framework Agreement. For the avoidance of doubt, "Confidential Information" does not include electronic protected health information (ePHI), as defined in a Framework Agreement, that is subject to a Business Associate Agreement or other provisions of a Framework Agreement.

Notwithstanding any label to the contrary, "Confidential Information" does not include any information that: (i) is or becomes known publicly through no fault of the CI Recipient; or (ii) is learned by the CI Recipient from a third party that the CI Recipient reasonably believes is entitled to disclose it without restriction; or (iii) is already known to the CI Recipient before receipt from the CI Discloser, as shown by the CI Recipient's written records; or (iv) is independently developed by the CI Recipient without the use of or reference to the CI Discloser's Confidential Information, as shown by the CI Recipient's written records, and was not subject to confidentiality restrictions prior to receipt of such information from the CI Discloser.

Confidential Information (CI) Discloser: a person or entity that discloses Confidential Information.

Confidential Information (CI) Recipient: a person or entity that receives Confidential Information.

Connectivity Services: the technical services provided by a QHIN, Participant, or Subparticipant to its Participants and Subparticipants that facilitate TEFCA Exchange and are consistent with the requirements of the then-applicable QHIN Technical Framework.

Contract: the Contract by and between The Sequoia Project and HHS, or, if applicable, a successor agreement between The Sequoia Project and HHS or a successor agreement between a different RCE and HHS.

Covered Entity: has the meaning assigned to such term at 45 CFR § 160.103.

Cybersecurity Council: the council established by the RCE to enhance cybersecurity commensurate with the risks in TEFCA Exchange, as more fully set forth in an SOP.

Designated Network: the Health Information Network that Signatory uses to offer and provide the Designated Network Services.

Designated Network Governance Body: a representative and participatory group or groups that approve the processes for fulfilling the Governance Functions and participate in such Governance Functions for Signatory's Designated Network.

Designated Network Services: the Connectivity Services or Governance Services.

Designation (including its correlative meanings "Designate," "Designated," and "Designating"): the RCE's written confirmation to ONC and Signatory that Signatory has satisfied all the requirements of the Common Agreement, the QHIN Technical Framework, all applicable SOPs, and is now a QHIN.

Directory Entry(ies): listing of each Node controlled by a QHIN, Participant or Subparticipant, which includes the endpoint resource for such Node(s) and any other organizational or technical information required by the QTF or an applicable SOP.

Disclosure (including its correlative meanings "Disclose," "Disclosed," and "Disclosing"): the release, transfer, provision of access to, or divulging in any manner of TEFCA Information (TI) outside the entity holding the information.

Discover (including its correlative meanings "Discovery" and "Discovering"): the first day on which something is known to the QHIN, Participant, or Subparticipant, or by exercising reasonable diligence would have been known, to the QHIN, Participant or Subparticipant.

Discriminatory Manner: any act or omission that is inconsistently taken or not taken with respect to any similarly situated QHIN, Participant, Subparticipant, Individual, or group of them, whether it is a competitor, or whether it is affiliated with or has a contractual relationship with any other entity, or in response to an event.

Dispute: (i) a disagreement about any provision of this Common Agreement, including any SOP, the QTF, and all other attachments, exhibits, and artifacts incorporated by reference; or (ii) a concern or complaint about the actions, or any failure to act, of Signatory, the RCE, any other QHIN, or another QHIN's Participant(s) or Subparticipant(s).

Dispute Resolution Process: the non-binding Dispute resolution process set forth in an SOP.

Electronic Protected Health Information (ePHI): has the meaning assigned to such term at 45 CFR § 160.103.

Exchange Purpose(s) or XP(s): the reason, as authorized by a Framework Agreement, including the applicable SOP(s), for a transmission, Query, Use, Disclosure, or Response transacted through TEFCA Exchange.

Framework Agreement(s): with respect to QHINs, the Common Agreement; and with respect to a Participant or Subparticipant, the Participant/Subparticipant Terms of Participation (ToP).

FHIR Endpoint: has the meaning assigned to such term in the Health Level Seven International® (HL7®) Fast Healthcare Interoperability Resources (FHIR®) Specification available at https://hl7.org/fhir/r4/, as such specification may be amended, modified or replaced.

FTC Rule: the Health Breach Notification Rule promulgated by the Federal Trade Commission set forth at 16 CFR Part 318.

Governing Council: the permanent governing body for activities conducted under the Framework Agreements, as more fully described in the applicable SOP(s).

Government Benefits Determination: a determination made by any agency, instrumentality, or other unit of the federal, State, local, or tribal government as to whether an Individual qualifies for government benefits for any purpose other than health care (e.g., Social Security disability benefits) to the extent permitted by Applicable Law. Disclosure of TI for this purpose may require an authorization that complies with Applicable Law.

Government Health Care Entity: any agency, instrumentality, or other unit of the federal, State, local, or tribal government to the extent that it provides health care services (e.g., treatment) to Individuals but only to the extent that it is not acting as a Covered Entity.

Governance Functions: the functions, activities, and responsibilities of the Designated Network Governance Body as set forth in an applicable SOP.

Governance Services: the governance functions described in applicable SOP(s), which are performed by a QHIN's Designated Network Governance Body for its Participants and Subparticipants to facilitate TEFCA Exchange in compliance with the then-applicable requirements of the Framework Agreements.

Health Care Provider: meets the definition of such term in either 45 CFR § 171.102 or in the HIPAA Rules at 45 CFR § 160.103.

Health Information Network (HIN): has the meaning assigned to the term "Health Information Network or Health Information Exchange" in the information blocking regulations at 45 CFR § 171.102.

HIPAA: the Health Insurance Portability and Accountability Act of 1996, Pub. Law 104-191, and the Health Information Technology for Economic and Clinical Health Act of 2009, Pub. Law 111-5.

HIPAA Rules: the regulations set forth at 45 CFR Parts 160, 162, and 164.

HIPAA Privacy Rule: the regulations set forth at 45 CFR Parts 160 and 164, Subparts A and E.

HIPAA Security Rule: the regulations set forth at 45 CFR Part 160 and Part 164, Subpart C.

Implementation Date: the date sixty (60) calendar days after publication of version 2 of the Common Agreement in the Federal Register.

Individual: has the meaning assigned to such term at 45 CFR § 171.202(a)(2).

Individual Access Services Incident (IAS Incident): a TEFCA Security Incident or a Breach of Unencrypted Individually Identifiable Information maintained by an IAS Provider.

Individual Access Services Provider (IAS Provider): each QHIN, Participant, and Subparticipant that offers Individual Access Services (IAS).

Individual Access Services (IAS): the services provided to an Individual by a QHIN, Participant, or Subparticipant that has a direct contractual relationship with such Individual in which the QHIN, Participant, or Subparticipant, as applicable, agrees to satisfy that Individual's ability to use TEFCA Exchange to access, inspect, obtain, or transmit a copy of that Individual's Required Information.

IAS Consent: an IAS Provider's own supplied form for obtaining express written consent from the Individual in connection with the IAS.

Individually Identifiable Information: information that identifies an Individual or with respect to which there is a reasonable basis to believe that the information could be used to identify an Individual.

Initiating Node: a Node through which a QHIN, Participant, or Subparticipant initiates transactions for TEFCA Exchange.

Node: a technical system that is controlled directly or indirectly by a QHIN, Participant, or Subparticipant and that is listed in the RCE Directory Service.

Non-HIPAA Entity (NHE): a QHIN, Participant, or Subparticipant that is neither a Covered Entity nor a Business Associate as defined under the HIPAA Rules with regard to activities under a Framework Agreement. To the extent a QHIN, Participant, or Subparticipant is a Hybrid entity, as defined in 45 CFR § 164.103, such QHIN, Participant, or Subparticipant shall be considered a Non-HIPAA Entity with respect to TEFCA Exchange activities related to such QHIN, Participant, or Subparticipant's non-covered components.

ONC: the U.S. Department of Health and Human Services Office of the National Coordinator for Health Information Technology.

Participant: to the extent permitted by applicable SOP(s), a U.S. Entity that has entered into the ToP in a legally binding contract with a QHIN to use the QHIN's Designated Network Services to participate in TEFCA Exchange in compliance with the ToP.

Participant/Subparticipant Caucus: a forum established pursuant to an applicable SOP(s), the purpose of which is for the Participants and Subparticipants to meet and discuss issues of interest directly related to TEFCA Exchange and related activities under the Framework Agreements.

Participant/Subparticipant Terms of Participation (ToP): the requirements set forth in Exhibit 1 to the Common Agreement to which: QHINs must contractually obligate their Participants to agree; to which QHINs must contractually obligate their Participants to contractually obligate their Subparticipants and Subparticipants of the Subparticipants to agree, in order to participate in TEFCA Exchange including the QHIN Technical Framework (QTF), all applicable Standard Operating Procedures (SOPs), and all other attachments, exhibits, and artifacts incorporated therein by reference.

Passthrough Node: a Node that is neither an Initiating nor Responding Node and through which a QHIN, Participant, or Subparticipant transmits transactions to and from Initiating and Responding Nodes, including any other services it provides.

Privacy and Security Notice: an IAS Provider's own supplied written privacy and security notice that contains the information required by the applicable SOP(s).

Protected Health Information (PHI): has the meaning assigned to such term at 45 CFR § 160.103.

Public Health Authority: has the meaning assigned to such term at 45 CFR § 164.501.

QHIN Technical Framework (QTF): the most recent effective version of the document that contains the technical, functional, privacy, and security requirements for TEFCA Exchange.

Qualified Health Information Network (QHIN): to the extent permitted by applicable SOP(s), a Health Information Network that is a U.S. Entity that has been Designated by the RCE and is a Party to the Common Agreement countersigned by the RCE.

QHIN Caucus: a forum established pursuant to an applicable SOP(s), the purpose of which is for the QHINs to meet and discuss issues of interest directly related to TEFCA Exchange and related activities under the Framework Agreements.

Query(ies) (including its correlative uses/tenses "Queried" and "Querying"): the act of asking for information through TEFCA Exchange.

RCE Directory Service: a technical service provided by the RCE that enables QHINs to identify their Nodes to enable TEFCA Exchange. The requirements for use of, inclusion in, and maintenance of the RCE Directory Service are set forth in the Framework Agreements, QTF, and applicable SOPs.

Recognized Coordinating Entity (RCE): the entity selected by ONC that enters into the Common Agreement with QHINs in order to impose, at a minimum, the requirements of the Common Agreement, including the SOPs and the QTF, on the QHINs and administer such requirements on an ongoing basis. The RCE is a Party to the Common Agreement.

Required Information: the Electronic Health Information, as defined in 45 CFR § 171.102, that is (i) maintained in a Responding Node by any QHIN, Participant, or Subparticipant prior to or during the term of the applicable Framework Agreement and (ii) relevant for a required XP Code, as set forth in the QTF or an applicable SOP(s).

Responding Node: a Node through which the QHIN, Participant, or Subparticipant Responds to a received transaction for TEFCA Exchange.

Response(s) (including its correlative uses/tenses "Responds," "Responded" and "Responding"): the act of providing the information that is the subject of a Query or otherwise transmitting a message in response to a Query through TEFCA Exchange.

Security Posture: the security status of an entity's networks, information, and systems based on information assurance resources including, without limitation, people, hardware, software, and policies, and capabilities in place to manage the defense of the entity's networks, information, and systems and to react as the situation changes (derived from NIST Definition 800-30r1).

Signatory: the entity that has satisfied Section 4.1 and is a Party to the Common Agreement.

Standard Operating Procedure(s) or SOP(s): a written procedure or other provision that is adopted pursuant to the Common Agreement and incorporated by reference into a Framework Agreement to provide detailed information or requirements related to TEFCA Exchange, including all amendments thereto. Each SOP identifies the relevant group(s) to which the SOP applies, including whether Participants or Subparticipants are required to comply with a given SOP.

State: any of the several States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands.

Subparticipant: to the extent permitted by applicable SOP(s), a U.S. Entity that has entered into the ToP in a legally binding contract with a Participant or another Subparticipant to use the Participant's or Subparticipant's Connectivity Services to participate in TEFCA Exchange in compliance with the ToP.

TEFCA Exchange: the transaction of information between Nodes using an XP Code.

TEFCA Information (TI): any information that is transacted through TEFCA Exchange except to the extent that such information is received by a QHIN, Participant, or Subparticipant that is a Covered Entity, Business Associate, or NHE that is exempt from compliance with the Privacy section of the applicable Framework Agreement and is incorporated into such recipient's system of record, at which point the information is no longer TI with respect to such recipient and is governed by the HIPAA Rules and other Applicable Law.

TEFCA Security Incident(s):

(i) An unauthorized acquisition, access, Disclosure, or Use of unencrypted TI using TEFCA Exchange, but NOT including any of the following:

(a) Any unintentional acquisition, access, Use, or Disclosure of TI by a Workforce Member or person acting under the authority of a QHIN, Participant, or Subparticipant, if such acquisition, access, Use, or Disclosure (i) was made in good faith, (ii) was made by a

person acting within their scope of authority, (iii) was made to another Workforce Member or person acting under the authority of any QHIN, Participant, or Subparticipant, and (iv) does not result in further acquisition, access, Use, or Disclosure in a manner not permitted under Applicable Law and the Framework Agreements.

(b) A Disclosure of TI where a QHIN, Participant, or Subparticipant has a good faith belief that an unauthorized person to whom the Disclosure was made would not reasonably have been able to retain such information.

(c) A Disclosure of TI that has been de-identified in accordance with the standard at 45 CFR § 164.514(b).

(ii) Other security events (e.g., ransomware attacks), as set forth in an SOP, that adversely affect a QHIN's, Participant's, or Subparticipant's participation in TEFCA Exchange.

Threat Condition: (i) a breach of a material provision of a Framework Agreement that has not been cured within fifteen (15) days of receiving notice of the material breach (or such other period of time to which the Parties have agreed), which notice shall include such specific information about the breach that the RCE has available at the time of the notice; or (ii) a TEFCA Security Incident; or (iii) an event that RCE, a QHIN, its Participant, or their Subparticipant has reason to believe will disrupt normal TEFCA Exchange, either due to actual compromise of or the need to mitigate demonstrated vulnerabilities in systems or data of the QHIN, Participant, or Subparticipant, as applicable, or could be replicated in the systems, networks, applications, or data of another QHIN, Participant, or Subparticipant; or (iv) any event that could pose a risk to the interests of national security as directed by an agency of the United States government.

Transitional Council: the interim governing body for activities conducted under Framework Agreements, as more fully described in the applicable SOP(s).

United States: the fifty (50) States, the District of Columbia, and the territories and possessions of the United States including, without limitation, all military bases or other military installations, embassies, and consulates operated by the United States government.

U.S. Entity/Entities: any corporation, limited liability company, partnership, or other legal entity that meets all of the following requirements:

(i) The entity is organized under the laws of a State or commonwealth of the United States or the federal law of the United States and is subject to the jurisdiction of the United States and the State or commonwealth under which it was formed;

(ii) The entity's principal place of business, as determined under federal common law, is in the United States; and

(iii) None of the entity's directors, officers, or executives, and none of the owners with a five percent (5%) or greater interest in the entity, are listed on the *Specially Designated Nationals and Blocked Persons List* published by the United States Department of the Treasury's Office of Foreign Asset Control or on the United States Department of Health and Human Services, Office of Inspector General's *List of Excluded Individuals/Entities*.

Use(s) (including correlative uses/tenses, such as "Uses," "Used," and "Using"): with respect to TI, means the sharing, employment, application, utilization, examination, or analysis of such information within an entity that maintains such information.

U.S. Qualified Person means those individuals who are U.S. nationals and citizens at birth as defined in 8 USC 1401, U.S. nationals but not citizens of the United States at birth as defined in 8 USC 1408, lawful permanent residents of the United States as defined in the Immigration and Nationality Act, and non-immigrant aliens who are hired by a U.S. Entity as an employee in a specialty occupation pursuant to an H-1B Visa.

Workforce Member(s): any employees, volunteers, trainees, and other persons whose conduct, in the performance of work for an entity, is under the direct control of such entity, whether or not they are paid by the entity.

XP Code: the code used to identify the XP in any given transaction, as set forth in the applicable SOP(s).

1.2 Common Agreement Terminology.

1.2.1 References to Signatory and QHINs. As set forth in its definition and in the introductory paragraph of this Common Agreement, the term "Signatory" is used to refer to the specific entity that is a Party to this Common Agreement with the RCE. Any and all rights and obligations of a QHIN stated herein are binding upon Signatory as of the CA Effective Date and are also binding upon all other QHINs. References herein to "other QHINs," "another QHIN," and similar such terms are used to refer to any and all other organizations that have signed the Common Agreement with the RCE.

1.2.2 Intentionally Omitted.

1.2.3 General Rule of Construction. For the avoidance of doubt, a reference to a specific section of the Common Agreement in a particular section does not mean that other sections of this Common Agreement that expressly apply to a QHIN are inapplicable. A reference in this Common Agreement to any law, any regulation, or to Applicable Law includes any amendment, modification or replacement to such law, regulation, or Applicable Law.

1.2.4 Terms of Participation. Signatory shall contractually obligate its Participants to comply with the ToP. Notwithstanding the foregoing, for any entity that became a Participant of Signatory prior to the Implementation Date, Signatory shall (i) contractually obligate such entity to comply with the ToP within one-hundred eighty (180) days of the Implementation Date, provided that such Participant is and remains a party to the Participant-QHIN Agreement, as defined in and required by Common Agreement Version 1.1, during such period; or (ii) terminate such Participant's ability to engage in TEFCA Exchange upon the earlier of the date of termination of the existing Participant-QHIN Agreement or one-hundred eighty (180) days after the Implementation Date.

2. **Incorporation of Recitals.** The Recitals set forth above are incorporated into this Common Agreement in their entirety and shall be given full force and effect as if set forth in the body of this Common Agreement.

3. **Governing Approach.**

3.1 Role of the RCE and ONC. ONC was directed by Congress in the 21st Century Cures Act to, "in collaboration with the National Institute of Standards and Technology and other relevant agencies within the Department of Health and Human Services, for the purpose of ensuring full network-to-network exchange of health information, convene public-private and public-public partnerships to build consensus and develop or support a trusted exchange framework, including a common agreement among health information networks nationally." ONC entered into the Contract with the RCE to implement, maintain, and update the Common Agreement.

Under the Contract, the RCE is responsible for matters related to the development and operation of the exchange of TI and related activities.

ONC provides oversight of the RCE's work under the Contract. Under the Contract, ONC has the right to review the RCE's conduct, including Designation, corrective action, and termination decisions regarding QHINs, the proper execution of nondiscrimination and conflict of interest policies that demonstrate a commitment to transparent, fair, and nondiscriminatory treatment by the RCE of

QHINs, and whether the RCE has adhered to the requirements imposed upon it by this Common Agreement. ONC may also address complaints made by a QHIN against the RCE as set forth in Section 15.6. QHINs have the right to appeal RCE decisions as set forth in Section 16 of this Common Agreement.

3.2 Participation in Governance. QHINs, Participants, and Subparticipants shall have the opportunity to engage in governance under the Common Agreement. The RCE shall establish a Transitional Council and then a Governing Council which will be responsible for serving as a resource to the RCE and a forum for orderly and civil discussion of any issues affecting TEFCA Exchange or other issues that may arise under the Common Agreement. The formation, composition, responsibilities, and duration of the Transitional Council and Governing Council shall be set forth in an SOP(s).

3.3 Advisory Groups. The RCE, in consultation with the Transitional or Governing Council (as applicable) and ONC, may establish Advisory Groups for purposes of seeking input from distinct groups of stakeholders that are parties to or affected by TEFCA Exchange activities to better inform the governance process, provide input on certain topics, and promote inclusivity. The process for establishing Advisory Groups and selecting members is set forth in the applicable SOP.

4. QHIN Designation.

4.1 Eligibility to be Designated. Signatory affirms and warrants that as of the CA Effective Date and throughout the term of this Common Agreement, it meets and will continue to meet the eligibility criteria listed below and any additional requirements set forth in the applicable SOP(s).

(i) Signatory is a U.S. Entity and is not controlled by any person or entity that is not a U.S. Qualified Person(s) or U.S. Entity(ies). The specific, required means to demonstrate this are set forth in an SOP.

(ii) Signatory is a Health Information Network.

(iii) Signatory has the ability to perform all of the Designated Network Services and other required functions of a QHIN in the manner required by this Common Agreement, the SOPs, the QTF, and all other applicable guidance from the RCE. The specific, required means to demonstrate this are set forth in an SOP(s).

(iv) Signatory has in place the organizational infrastructure and legal authority to comply with the obligations of the Common Agreement and

to provide Governance Services for its Designated Network. In addition, Signatory has the resources and infrastructure to support a reliable and trusted network. The specific, required means to demonstrate this are set forth in an SOP(s).

If, at any time during the term of this Common Agreement, Signatory Discovers that it fails to meet the foregoing eligibility criteria or any additional requirements set forth in the applicable SOP(s), Signatory shall immediately notify the RCE.

4.2 Affirmation of Application. Signatory represents and warrants that the information in its application for Designation was at the time of the application submission, and continues to be as of the CA Effective Date, accurate and complete, to the best of its knowledge. Signatory acknowledges that the RCE relied upon the information in its application to evaluate whether Signatory meets the criteria to be Designated and that violation of this representation and warranty is a material breach of this Common Agreement. If the RCE determines that information in the application that was material to the RCE's decision to Designate Signatory is or was not accurate or complete, the RCE may terminate Signatory's Designation and this Common Agreement and will provide notice of such termination to Signatory.

5. Change Management.

5.1 Change Management Framework. The RCE shall coordinate all changes to the Common Agreement, the QTF, and the SOPs in conjunction with ONC. In addition to the activities described below, ONC shall be available in a consultative role throughout the change management process to review any proposed amendments to the Common Agreement, the QTF, and the SOPs as well as the adoption of any new SOP and the repeal of any existing SOP. The RCE will work with ONC, the Governing Council, and the QHIN and Participant/Subparticipant Caucuses, as outlined below, to consider amendments to the Common Agreement, the QTF, or the SOPs and the adoption of any new SOP or the repeal of any existing SOP. Provided, however, that the actions described in Sections 5.1 through 5.3 of this Common Agreement by or with respect to the Governing Council, the QHIN Caucus, and the Participant/Subparticipant Caucus, as applicable, shall not be required until the respective body has been established as described in Section 3 and the applicable SOP(s). Signatory acknowledges that it and the RCE do not have the sole legal authority to agree to changes to this Common Agreement, the QTF, or the SOPs. ONC must approve all changes, additions, and deletions. The Common Agreement must be the same for all QHINs.

5.2 Amending the Common Agreement or the QTF. The RCE is tasked, under its Contract with ONC, with updating the Common Agreement and QTF. Proposed

amendments to the Common Agreement or QTF may originate from multiple sources, including, but not limited to, ONC, the RCE, the Governing Council, the QHIN Caucus, or the Participant/Subparticipant Caucus. The RCE may consult with the Governing Council, the QHIN Caucus, or the Participant/Subparticipant Caucus prior to submitting the proposed amendment(s) to ONC for consideration. The RCE shall collect all proposed amendments and submit them to ONC, who shall determine whether further action on a proposed amendment is warranted.

5.2.1 If ONC determines that a proposed amendment warrants further consideration, then the RCE will present the proposed amendment to the Governing Council for its feedback. The Governing Council will evaluate the proposed amendment and determine whether it will seek feedback from the QHIN Caucus, the Participant/Subparticipant Caucus, or both, as deemed necessary and appropriate. The Governing Council will provide the RCE with written feedback on the proposed amendment in a timely manner, which will include feedback from the QHIN and Participant/Subparticipant Caucuses as applicable and appropriate.

5.2.2 The RCE shall consult with ONC about the Governing Council feedback. ONC shall, after considering the feedback, determine whether the proposed amendment should proceed after making any changes to the amendment. If ONC decides to proceed with the amendment, it will advance the proposed amendment to the QHIN Caucus for approval by a written vote. An amendment will be approved if at least two-thirds (2/3) of the votes cast by the QHIN Caucus members within the timeframe established by ONC for the voting period are in favor of the proposed amendment. The requirement to consult with the Governing Council in this provision shall be satisfied by ONC's approval of the proposed amendment if, at the time of such approval, the Governing Council and the QHIN Caucus have not yet been established.

5.2.3 The time period for ONC to decide whether to proceed or not with proposed amendment to the Common Agreement pursuant to Section 5.2.2 above shall initially be three (3) months after ONC receives from the RCE feedback from the Governing Council pursuant to Section 5.2.2 above; provided, however, that ONC may, in its discretion, extend this time for an unlimited number of additional three- (3-) month time periods.

5.2.4 The time period for ONC to decide whether to proceed or not with a proposed amendment to the QTF pursuant to Section 5.2.2 above shall initially be three (3) months after ONC receives from the RCE feedback from the Governing Council pursuant to Section 5.2.2 above; provided, however, that ONC may, in its discretion, extend this time for one (1) additional three-

(3-) month time period.

5.2.5 If an amendment to the Common Agreement or QTF is approved as described above, the amendment shall become effective on the effective date identified by ONC as part of the amendment process and shall be binding on Signatory without any further action by Signatory or the RCE. If Signatory is not willing or able to comply with the amendment, then Signatory shall, within fifteen (15) business days of being notified by the RCE that the amendment has been approved, provide the RCE written notice of termination of this Common Agreement effective no later than the expiration of thirty (30) days from approval of the amendment.

5.2.6 Notwithstanding the foregoing, if the RCE determines that an amendment to the Common Agreement or QTF is required in order for the RCE to remain in compliance with Applicable Law, the RCE is not required to provide QHINs with an opportunity to vote on the amendment. However, the RCE shall still be required to provide sixty (60) days' advance written notice of the amendment and legal analysis of the need to use this expedited process, unless the RCE would be materially harmed by being out of compliance with Applicable Law if it provided the sixty (60) days' written notice, in which case it will provide as much notice as practicable under the circumstances. Any such amendment to this Common Agreement or the QTF shall be subject to ONC review and modification prior to the RCE providing advance written notice of the amendment to Signatory. Only those amendments that are approved by ONC will be enacted.

5.3 Amending, Adopting, or Repealing an SOP. The RCE is tasked, under its Contract with ONC, with developing an initial set of SOPs that were considered adopted when initially made publicly available prior to the initial QHIN application period (i.e., prior to *anyone* signing the Common Agreement). The amendment process set forth below shall also apply to amending the initial set of SOPs through adopting one or more new SOPs, repealing an SOP in its entirety, or amending one of the initial SOPs.

5.3.1 Proposed amendments to the SOPs may originate from multiple sources including, but not limited to, ONC, the RCE, the Governing Council, the QHIN Caucus, or the Participant/Subparticipant Caucus. The RCE may consult with the Governing Council, the QHIN Caucus, or the Participant/Subparticipant Caucus prior to submitting the proposed amendment(s) to ONC for consideration. The RCE shall collect all proposed amendments and submit them to ONC, who shall determine whether further action on a proposed amendment is warranted.

5.3.2 If ONC determines that a proposed amendment warrants further consideration, then the RCE will present the proposed amendment to the Governing Council for its feedback. The Governing Council will evaluate the proposed amendment and determine whether it will seek feedback from the QHIN Caucus, the Participant/Subparticipant Caucus, or both, as deemed necessary and appropriate. The Governing Council will evaluate proposed amendments in a timely manner and provide the RCE with written feedback on the proposed amendment.

5.3.3 The RCE shall consult with ONC about the Governing Council feedback. ONC shall, after considering the feedback, determine whether the proposed amendment should proceed after making any changes to the amendment. If ONC decides to proceed with the amendment, it will advance the proposed amendment to the QHIN Caucus and the Participant/Subparticipant Caucus for approval by a written vote. An amendment will be approved if at least two-thirds (2/3) of the votes cast by the QHIN Caucus and at least two-thirds (2/3) of the votes cast by the Participant/Subparticipant Caucus within the timeframe established by ONC for the voting period are in favor of the proposed amendment. The requirement to consult with the Governing Council in this provision shall be satisfied by ONC's approval of the proposed amendment if, at the time of such approval, the QHIN Caucus and the Participant/Subparticipant Caucus have not yet been established.

5.3.4 The time period for ONC to decide whether to proceed or not with a proposed amendment to an SOP pursuant to Section 5.3.3 above shall initially be three (3) months after ONC receives from the RCE feedback from the Governing Council; provided, however, that: (a) ONC may, in its discretion, extend this time for one (1) additional three- (3-) month time period; and (b) if ONC, in addition, determines in its reasonable discretion that the amendment affects or may be contrary to an ONC policy or another policy of the Department of Health and Human Services or any Applicable Law, ONC may extend this time for an unlimited number of additional three- (3-) month time periods.

5.3.5 Notwithstanding the requirement for a Participant/Subparticipant vote set forth in Section 5.3.3, if the proposed amendment will not have a material impact on any Participants or Subparticipants, ONC may advance the proposed amendment to the QHIN Caucus only, whereby the amendment will be approved if at least two-thirds (2/3) of the votes cast by the QHIN Caucus within the timeframe established by ONC for the voting period are in favor of the proposed amendment. The requirement to consult with the QHIN Caucus in this provision shall be satisfied by ONC's approval of the

proposed amendment if, at the time of such approval, the QHIN Caucus has not yet been established. The RCE will determine an effective date for the approved amendment subject to approval of ONC.

5.3.6 Notwithstanding the foregoing, if the RCE determines that an amendment to an SOP is required in order for the RCE to remain in compliance with Applicable Law, the RCE is not required to provide the QHIN Caucus or the Participant/Subparticipant Caucus with an opportunity to vote on the amendment. However, the RCE shall still be required to provide sixty (60) days' advance written notice of the amendment and the legal analysis of the need to use this expedited process, unless the RCE would be materially harmed by being out of compliance with Applicable Law if it provided the sixty (60) days' written notice, in which case the RCE will provide as much notice as practicable under the circumstances. Any such amendment to an SOP shall be subject to ONC review and modification prior to enactment. Only those amendments that are approved by ONC will be enacted.

5.4 Voting Method. For purposes of the voting process set forth in this Section 5, the phrase "written vote" includes any process by which there is a voting record, which may include voting by electronic means.

6. Cooperation and Non-Discrimination.

6.1 Cooperation. Signatory understands and acknowledges that numerous activities with respect to this Common Agreement will likely involve other QHINs and their respective Participants and Subparticipants, as well as employees, agents, third-party contractors, vendors, or consultants of each of them. Signatory shall reasonably cooperate with the RCE, ONC, other QHINs, and their respective Participants and Subparticipants in all matters related to TEFCA Exchange. Requirements for reasonable cooperation are set forth in an SOP. The costs of cooperation to Signatory shall be borne by Signatory and shall not be charged to the RCE or other QHINs. Nothing in this Section 6.1 shall modify or replace the TEFCA Security Incident notification obligations under Section 12.3 and, if applicable, the IAS Incident notification obligations under Section 10.5.2 of this Common Agreement.

6.2 Non-Discrimination.

6.2.1 Prohibition Against Exclusivity. Neither Signatory nor the RCE shall prohibit or attempt to prohibit any QHIN, Participant, or Subparticipant from joining, exchanging with, conducting other transactions with, or supporting any other networks or exchange frameworks that use services *other than* the

Signatory's Designated Network Services, concurrently with the QHIN's, Participant's, or Subparticipant's participation in TEFCA Exchange.

6.2.2 No Discriminatory Limits on Exchange of TI. Signatory shall not engage in TEFCA Exchange, refrain from engaging in TEFCA Exchange, or limit TEFCA Exchange with any other QHIN, Participant, Subparticipant, or Individual, in a Discriminatory Manner. Notwithstanding the foregoing, if Signatory refrains from engaging in TEFCA Exchange or limits interoperability with any other QHIN, Participant, or Subparticipant under the following circumstances, Signatory's actions or inactions shall not be deemed discriminatory: (i) Signatory's Connectivity Services require load balancing of network traffic or similar activities provided such activities are implemented in a consistent and non-discriminatory manner for a period of time no longer than necessary to address the network traffic issue; (ii) Signatory has a reasonable and good-faith belief that the other QHIN, Participant, or Subparticipant has not satisfied or will not be able to satisfy the applicable terms hereof (including compliance with Applicable Law) in any material respect; or (iii) Signatory's actions or inactions are consistent with or permitted by an applicable SOP. One QHIN suspending its exchange activities with another QHIN, Participant, or Subparticipant in accordance with Section 17.4.2 shall not be deemed discriminatory.

6.2.3 Updates to Connectivity Services. In revising and updating its Connectivity Services from time to time, Signatory will use commercially reasonable efforts to do so in accordance with generally accepted industry practices and to implement any changes in a non-discriminatory manner; provided, however, this provision shall not apply to limit modifications or updates to the extent that such revisions or updates are required by Applicable Law or implemented to respond promptly to newly discovered privacy or security threats.

6.2.4 Notice of Updates to Connectivity Services. Signatory shall implement a reporting protocol to provide reasonable prior written notice of all modifications or updates of its Connectivity Services to all other QHINs if such revisions or updates are expected to adversely affect TEFCA Exchange between QHINs or require changes in the Connectivity Services of any other QHIN, regardless whether they are necessary due to Applicable Law or newly discovered privacy or security threats.

6.3 Non-Interference. Signatory shall not prevent a Participant or Subparticipant from changing the QHIN through which the Participant or Subparticipant engages in

TEFCA Exchange. Notwithstanding the foregoing, this subsection does not preclude Signatory from including and enforcing reasonable term limits in its contracts with its Participants related to a Participant's use of Signatory's Designated Network Services.

7. Confidentiality and Accountability.

7.1 Confidential Information. Signatory and RCE each agree to use and disclose all Confidential Information received pursuant to this Common Agreement only as authorized in this Common Agreement and any applicable SOP(s) and solely for the purposes of performing its obligations under this Common Agreement or the proper exchange of information under the Common Agreement and for no other purpose. Each Party may act as a CI Discloser and a CI Recipient, accordingly. A CI Recipient may disclose the Confidential Information it receives only to its Workforce Members who require such knowledge and use in the ordinary course and scope of their employment or retention and are obligated to protect the confidentiality of the CI Discloser's Confidential Information in a manner substantially equivalent to the terms required herein for the treatment of Confidential Information. If a CI Recipient must disclose a CI Discloser's Confidential Information under operation of law, the CI Recipient may do so provided that, to the extent permitted by Applicable Law, the CI Recipient gives the CI Discloser reasonable notice to allow the CI Discloser to object to such redisclosure, and such redisclosure is made to the minimum extent necessary to comply with Applicable Law.

7.2 Disclosure of Confidential Information. Nothing herein shall be interpreted to prohibit the RCE from disclosing any Confidential Information to ONC. Signatory acknowledges that ONC, as a Federal government agency, is subject to the Freedom of Information Act. Any disclosure of Signatory's Confidential Information to ONC or any ONC contractor will be subject to Applicable Law, as well as the limitations, procedures, and other relevant provisions of any applicable SOP(s).

7.3 ONC's and the RCE's Approach when Requesting Confidential Information. As a matter of general policy, ONC will request only the limited set of Confidential Information that ONC believes is necessary to inform the specific facts and circumstances of a matter. The RCE will request only the limited set of Confidential Information that the RCE believes is necessary to inform the specific facts and circumstances of a matter.

7.4 QHIN Accountability.

7.4.1 Statement of General Principle. To the extent not prohibited by Applicable Law, Signatory shall be responsible for its acts and omissions, and the acts or

omissions of its Participants and their Subparticipants, but not for the acts or omissions of any other QHINs or their Participants or Subparticipants. For the avoidance of doubt, a Signatory that is also a governmental agency or instrumentality shall not be liable to the extent that the Applicable Law that governs Signatory does not expressly waive Signatory's sovereign immunity. Notwithstanding any provision in this Common Agreement to the contrary, Signatory shall not be liable for any act or omission if a cause of action for such act or omission is otherwise prohibited by Applicable Law. This Section 7.4.1 shall not be construed as a hold-harmless or indemnification provision.

7.4.2 Harm to RCE. Subject to Sections 7.4 and 7.6 of this Common Agreement that exclude certain types of damages or limit overall damages, Signatory shall be responsible for harm suffered by the RCE to the extent that the harm was caused by Signatory's breach of this Common Agreement, the QTF, or any applicable SOP.

7.4.3 Harm to Other QHINs. Subject to Section 7.6 of this Common Agreement, which excludes certain types of damages or limits overall damages, Signatory shall be responsible for harm suffered by another QHIN to the extent that the harm was caused by Signatory's breach of this Common Agreement, the QTF, or any applicable SOP.

7.5 RCE Accountability. Signatory will not hold the RCE, or anyone acting on its behalf, including but not limited to members of the Governing Council, Transitional Council, Caucuses, Cybersecurity Council, any Advisory Group, any work group, or any subcommittee, its contractors, employees, or agents liable for any damages, losses, liabilities, or injuries arising from or related to this Common Agreement, except to the extent that such damages, losses, liabilities, or injuries are the direct result of the RCE's breach of this Common Agreement. This Section 7.5 shall not be construed as a hold-harmless or indemnification provision.

7.6 **LIMITATION ON LIABILITY. NOTWITHSTANDING ANYTHING IN THIS COMMON AGREEMENT TO THE CONTRARY, IN NO EVENT SHALL EITHER THE RCE'S OR SIGNATORY'S TOTAL LIABILITY TO EACH OTHER AND ALL OTHER QHINS ARISING FROM OR RELATING TO THIS COMMON AGREEMENT EXCEED AMOUNTS EQUAL TO TWO MILLION DOLLARS ($2,000,000) PER INCIDENT AND FIVE MILLION DOLLARS ($5,000,000) AGGREGATE PER ANNUM OR SUCH OTHER AMOUNTS AS STATED IN A THEN-IN-EFFECT SOP, IN ORDER TO ALLOW FOR THE PERIODIC ADJUSTMENT OF THIS LIABILITY LIMIT OVER TIME WITHOUT THE NEED TO AMEND THIS COMMON AGREEMENT. THIS AND ANY SUCH ADJUSTED LIMITATION ON LIABILITY SHALL APPLY REGARDLESS OF WHETHER A CLAIM FOR ANY SUCH LIABILITY OR DAMAGES**

IS PREMISED UPON BREACH OF CONTRACT, BREACH OF WARRANTY, NEGLIGENCE, STRICT LIABILITY, OR ANY OTHER THEORIES OF LIABILITY, EVEN IF SUCH PARTY HAS BEEN APPRISED OF THE POSSIBILITY OR LIKELIHOOD OF SUCH DAMAGES OCCURRING. IF SIGNATORY IS A GOVERNMENT AGENCY OR A GOVERNMENT INSTRUMENTALITY UNDER FEDERAL LAW, STATE LAW, LOCAL LAW, OR TRIBAL LAW AND IT IS PROHIBITED FROM LIMITING ITS RECOVERY OF DAMAGES FROM A THIRD PARTY UNDER APPLICABLE LAW, THEN THIS SECTION 7.6 SHALL NOT APPLY TO EITHER SIGNATORY OR THE RCE. NOTHING IN THIS SECTION 7.6 OF THIS COMMON AGREEMENT SHALL BE CONSTRUED TO CREATE LIABILITY FOR A GOVERNMENTAL AGENCY OR INSTRUMENTALITY OR OTHERWISE WAIVE SOVEREIGN IMMUNITY.

8. RCE Directory Service.

8.1. Access to and Use of the RCE Directory Service. During the term of this Common Agreement and provided that Signatory is not suspended, the RCE shall provide Signatory with access to the RCE Directory Service. The timeframes and requirements for access to, publishing Directory Entries in, and use of the RCE Directory Service are set out in the QTF and the applicable SOP(s).

8.2. Utilization of the RCE Directory Service. The RCE Directory Service and Directory Entries contained therein shall be used by Signatory solely as necessary to create and maintain operational connectivity under the Common Agreement to enable TEFCA Exchange. Signatory shall not use or disclose Directory Entries except to its Workforce Members, to the Workforce Members of its Participants or Subparticipants, or to the Workforce Members of health information technology vendors who are engaged in assisting Signatory, the Participant or Subparticipant with engaging in TEFCA Exchange. Further, Signatory shall not use another QHIN's Directory Entries or information derived therefrom for marketing or any form of promotion of its own products and services, unless otherwise permitted pursuant to an SOP. In no event shall Signatory use or disclose the information contained in the RCE Directory Service in a manner that should be reasonably expected to have a detrimental effect on ONC, the RCE, other QHINs or their Participants or Subparticipants, or any other individual or organization. For the avoidance of doubt, Directory Entries are Confidential Information of the Discloser except to the extent such information meets one of the exceptions to the definition of Confidential Information. Nothing herein shall be interpreted to prohibit a QHIN from publicly disclosing the identity of its Participants or Subparticipants.

8.3. QHIN Directory Entries. Signatory must have at least one Node listed in the RCE Directory Service. Signatory is responsible for entering its Participant and Subparticipant Nodes in the RCE Directory Service and maintaining the accuracy of

such entries. Signatory shall immediately remove from the RCE Directory Service any Node(s) associated with a Participant or Subparticipant that is suspended from engaging in TEFCA Exchange or whose agreement to participate in TEFCA Exchange in connection with Signatory has expired or been terminated.

8.4. Framework Agreement Record.

8.4.1. QHINs must maintain a record of all ToPs into which Signatory enters with its Participants, regardless of whether such Participants are listed in the RCE Directory Service. Such record must be provided to the RCE within five (5) business days following the RCE's written request unless such other timeframe is agreed to by the RCE.

8.4.2. Records of all ToPs into which Signatory's Participants or Subparticipants enter with their respective Subparticipants must be maintained by Signatory's Participants and Subparticipants in accordance with their respective obligations pursuant to the ToP. Upon request from the RCE, Signatory must provide such record to the RCE within two (2) business days of receiving such record(s) from its Participant(s).

9. TEFCA Exchange Activities.

9.1 Utilization of TEFCA Exchange. Signatory may only utilize Designated Network Services for purposes of facilitating TEFCA Exchange. TEFCA Exchange may only be utilized for an XP. To the extent there are limitations on what types of Participants or Subparticipants may transact TEFCA Information for a specific XP, such limitations will be set forth in the applicable SOP(s). All TEFCA Exchange is governed by and must comply with the Framework Agreements governing the QHINs, Participants, and Subparticipants.

9.2 Uses. Signatory may Use TI in any manner that: (i) is not prohibited by Applicable Law; (ii) is consistent with Signatory's Privacy and Security Notice, if applicable; and (iii) is in accordance with Sections 11 and 12 of this Common Agreement, if applicable.

9.3 Disclosures. Signatory may Disclose TI provided such Disclosure: (i) is not prohibited by Applicable Law; (ii) is consistent with Signatory's Privacy and Security Notice, if applicable; and (iii) is in accordance with Sections 11 and 12 of this Common Agreement, if applicable.

9.4 Responses. Except as otherwise set forth in an applicable SOP, Responding Nodes must Respond to Queries for all XP Codes that are identified as "required" in the

applicable SOP(s). Such Response must include all Required Information. Notwithstanding the foregoing, Signatory may withhold some or all of the Required Information to the extent necessary to comply with Applicable Law.

9.5 Special Legal Requirements. If and to the extent Applicable Law requires that an Individual either consent to, approve, or provide an authorization for the Use or Disclosure of that Individual's information to Signatory, such as a more stringent federal or State law relating to sensitive health information, then Signatory shall refrain from the Use or Disclosure of such information in connection with this Common Agreement unless such Individual's consent, approval, or authorization has been obtained consistent with the requirements of Applicable Law and Section 11 of this Common Agreement including without limitation communicated pursuant to the access consent policy(ies) described in the QTF or applicable SOP(s). Copies of such consent, approval, or authorization shall be maintained and transmitted pursuant to the process described in the QTF by whichever party is required to obtain it under Applicable Law, and Signatory may make such copies of the consent, approval, or authorization available electronically to any QHIN, Participant, or Subparticipant in accordance with the QTF and to the extent permitted by Applicable Law. Signatory shall maintain written policies and procedures to allow an Individual to revoke such consent, approval, or authorization on a prospective basis. If Signatory is an IAS Provider, the foregoing shall not be interpreted to modify, replace, or diminish the requirements set forth in Section 10 of this Common Agreement and any applicable SOP(s) for obtaining an Individual's express written consent.

10. Individual Access Services.

10.1 Individual Access Services (IAS) Offering(s). Signatory may elect to be an IAS Provider by offering IAS to any Individual in accordance with the requirements of this Section 10 and in accordance with all other provisions of this Common Agreement. Nothing in this Section 10 shall modify, terminate, or in any way affect an Individual's right of access under the HIPAA Privacy Rule at 45 CFR § 164.524 with respect to any QHIN, Participant, or Subparticipant that is a Covered Entity or a Business Associate. Nothing in this Section 10 of this Common Agreement shall be construed as modifying or taking precedence over any provision codified in 45 CFR Part 171. An IAS Provider shall not prohibit or attempt to prohibit any Individual using the IAS of any other IAS Provider or from joining, exchanging with, conducting other transactions with any other networks or exchange frameworks, using services

other than the IAS Providers' Designated Network Services, concurrently with the QHIN's, Participant's, or Subparticipant's participation in TEFCA Exchange.

10.2 Individual Consent. This Section 10.2 shall apply to Signatory if Signatory is an IAS Provider. The Individual requesting IAS shall be responsible for completing the IAS Consent. The IAS Consent shall include, at a minimum: (i) consent to use the Individual Access Service; (ii) the Individual's acknowledgement and agreement to the IAS Provider's Privacy and Security Notice; and (iii) a description of the Individual's rights to access, delete, and export such Individual's Individually Identifiable Information. An IAS Provider may implement secure electronic means (e.g., secure e-mail, secure web portal) by which an Individual may submit the IAS Consent. An IAS Provider shall collect the IAS Consent prior to the Individual's first use of the IAS and prior to any subsequent use if there is any material change in the applicable IAS Consent, including the version of the Privacy and Security Notice referenced therein. Nothing in the IAS Consent may contradict or be inconsistent with any applicable provision of this Common Agreement or the SOP(s). If the IAS Provider is a Covered Entity and has a Notice of Privacy Practices that meets the requirements of 45 CFR § 164.520, the IAS Provider is not required to have a Privacy and Security Notice that meets the requirements of the applicable SOP. Nothing in Section 10 reduces a Covered Entity's obligations under the HIPAA Rules.

10.3 Intentionally Omitted.

10.4 Intentionally Omitted.

10.5 Additional Security Requirements for IAS Providers. This Section 10.5 shall apply to Signatory if Signatory is an IAS Provider.

10.5.1 Scope of Security Requirements. An IAS Provider must meet the applicable security requirements set forth in Section 12 for all Individually Identifiable Information it maintains as an IAS Provider, regardless of whether such information is TI.

10.5.2 IAS Incident Notice to Affected Individuals. If an IAS Provider reasonably believes that an Individual has been affected by an IAS Incident, it must provide such Individual with notification without unreasonable delay and in no case later than sixty (60) days following Discovery of the IAS Incident. The notification required under this Section 10.5.2 must be written in plain language and shall include, to the extent possible, the information set forth in the applicable SOP(s). To the extent Signatory is already required by Applicable Law to notify an Individual of an incident that would also be an

IAS Incident, this Section 10.5.2 does not require duplicative notification to that Individual.

10.6 Survival for IAS Providers. This Section 10.6 shall apply to Signatory if Signatory is an IAS Provider. As between Signatory as an IAS Provider and an Individual, the IAS Provider's obligations in the IAS Consent, including the IAS Provider's requirement to comply with the Privacy and Security Notice and provide Individuals with rights, shall survive for so long as the IAS Provider maintains such Individual's Individually Identifiable Information. If Signatory was an IAS Provider, the requirements of Section 10.5 shall survive termination of this Common Agreement for so long as Signatory maintains Individually Identifiable Information acquired during the term of this Common Agreement as an IAS Provider regardless of whether such information is or was TI.

11. Privacy.

11.1 Compliance with the HIPAA Privacy Rule. If Signatory is a NHE (but not to the extent that it is acting as an entity entitled to make a Government Benefits Determination under Applicable Law, a Public Health Authority, or a Government Health Care Entity or any other type of entity exempted from compliance with this Section 11.1 in an applicable SOP), then it shall comply with the provisions of the HIPAA Privacy Rule listed below with respect to all Individually Identifiable Information as if such information is Protected Health Information and Signatory is a Covered Entity.

11.1.1 From 45 CFR § 164.502, General Rules:

- Subsection (a)(1) – Dealing with permitted Uses and Disclosures, **but only to the extent Signatory is authorized to engage in the activities described in this subsection of the HIPAA Privacy Rule for the applicable XP.**
- Subsection (a)(2)(i) – Requiring Disclosures to Individuals
- Subsection (a)(5) – Dealing with prohibited Uses and Disclosures
- Subsection (b) – Dealing with the minimum necessary standard
- Subsection (c) – Dealing with agreed-upon restrictions
- Subsection (d) – Dealing with deidentification and re-identification of information
- Subsection (e) – Dealing with Business Associate contracts
- Subsection (f) – Dealing with deceased persons' information
- Subsection (g) – Dealing with personal representatives
- Subsection (h) – Dealing with confidential communications

- Subsection (i) – Dealing with Uses and Disclosures consistent with notice
- Subsection (j) – Dealing with Disclosures by whistleblowers

11.1.2 45 CFR § 164.504(e), Organizational Requirements.

11.1.3 45 CFR § 164.508, Authorization Required. Notwithstanding the foregoing, the provisions of Sections 10.2 shall control and this Section 11.1.3 shall not apply with respect to an IAS Provider that is a NHE.

11.1.4 45 CFR § 164.510, Uses and Disclosures Requiring Opportunity to Agree or Object. Notwithstanding the foregoing, an IAS Provider that is a NHE but is not a Health Care Provider shall not have the right to make the permissive Disclosures described in § 164.510(a)(3) - Emergency circumstances; provided, however, that an IAS Provider is not prohibited from making such a Disclosure if the Individual has consented to the Disclosure pursuant to Section 10 of this Common Agreement.

11.1.5 45 CFR § 164.512, Authorization or Opportunity to Object Not Required. Notwithstanding the foregoing, an IAS Provider that is a NHE but is not a Health Care Provider shall not have the right to make the permissive Disclosures described in § 164.512(c) - Standard: Disclosures about victims of abuse, neglect or domestic violence; § 164.512 Subsection (d) - Standard: Uses and Disclosures for health oversight activities; and § 164.512 Subsection (j) - Standard: Uses and Disclosures to avert a serious threat to health or safety; provided, however, that an IAS Provider is not prohibited from making such a Disclosure(s) if the Individual has consented to the Disclosure(s) pursuant to Section 10 of this Common Agreement.

11.1.6 From 45 CFR § 164.514, Other Requirements Relating to Uses and Disclosures:

- Subsections (a)-(c) – Dealing with de-identification requirements that render information not Individually Identifiable Information for purposes of this Section 11 and TEFCA Security Incidents
- Subsection (d) – Dealing with minimum necessary requirements
- Subsection (e) – Dealing with Limited Data Sets

11.1.7 45 CFR § 164.522, Rights to Request Privacy Protections.

11.1.8 45 CFR § 164.524, Access of Individuals, except that an IAS Provider that is a NHE shall be subject to the requirements of Section 10 with respect to access by Individuals for purposes of IAS and not this Section 11.1.8.

11.1.9 45 CFR § 164.528, Accounting of Disclosures.

11.1.10 From 45 CFR § 164.530, Administrative Requirements:

- Subsection (a) – Dealing with personnel designations
- Subsection (b) – Dealing with training
- Subsection (c) – Dealing with safeguards
- Subsection (d) – Dealing with complaints
- Subsection (e) – Dealing with sanctions
- Subsection (f) – Dealing with mitigation
- Subsection (g) – Dealing with refraining from intimidating or retaliatory acts
- Subsection (h) – Dealing with waiver of rights
- Subsection (i) – Dealing with policies and procedures
- Subsection (j) – Dealing with documentation

11.2 Written Privacy Policy. Signatory must develop, implement, make publicly available, and act in accordance with a written privacy policy describing its privacy practices with respect to Individually Identifiable Information that is Used or Disclosed pursuant to this Common Agreement and any SOPs. Signatory can satisfy the written privacy policy requirement by including applicable content consistent with the HIPAA Rules in its existing privacy policy, except as otherwise stated herein with respect to IAS Providers. This written privacy policy requirement does not supplant the HIPAA Privacy Rule obligations of a QHIN, Participant, or a Subparticipant that is a Covered Entity to post and distribute a Notice of Privacy Practices that meets the requirements of 45 CFR § 164.520. If Signatory is a Covered Entity, then this written privacy policy requirement can be satisfied by its Notice of Privacy Practices. If Signatory is an IAS Provider, then the written privacy policy requirement must be in the form of a Privacy and Security Notice that meets the requirements of Section 10.2 of this Common Agreement. Notwithstanding Section 11.1, to the extent the Signatory's written privacy policy is "more stringent" than the HIPAA Privacy Rule provisions listed below, the written privacy policy shall govern. "More stringent" shall have the meaning assigned to it in 45 CFR § 160.202 except the written privacy policy shall be substituted for references to State law and the reference to

"standards, requirements or implementation specifications adopted under subpart E of part 164 of this subchapter" shall be limited to those listed below.

12. Security.

12.1 General Security Requirements. Signatory shall comply with the HIPAA Security Rule as if the HIPAA Security Rule applied to Individually Identifiable Information that is TI regardless of whether Signatory is a Covered Entity or a Business Associate. Signatory shall also comply with the security requirements stated in Section 12 of this Common Agreement and specific additional requirements as described in the QTF and applicable SOPs. With the exception of Section 12.1.5, none of these requirements in Section 12.1 shall apply to any federal agency or any other type of entity exempted from compliance with this Section 12.1 in an applicable SOP.

12.1.1 Cybersecurity Coverage. In accordance with the applicable SOP(s), Signatory shall maintain, throughout the term of this Common Agreement: (i) a policy or policies of insurance for cyber risk and errors and omissions; (ii) internal financial reserves to self-insure against a cyber-incident; or (iii) some combination of (i) and (ii).

12.1.2 Cybersecurity Certification. Signatory shall achieve and maintain third-party certification to an industry-recognized cybersecurity framework demonstrating compliance with all relevant security controls, as set forth in the applicable SOP.

12.1.3 Annual Security Assessments. Signatory must obtain a third-party security assessment and technical audit no less often than annually and as further described in the applicable SOP. Within thirty (30) days of completing such annual security assessment or technical audit, Signatory must provide evidence of completion and mitigation as specified in the applicable SOP.

12.1.4 Intentionally Omitted.

12.1.5 Security Resource Support to Participants. Signatory shall make available to its Participants: (i) security resources and guidance regarding the protection of TI applicable to the Participants' participation in the QHIN under the applicable Framework Agreement; and (ii) information and resources that the RCE or Cybersecurity Council makes available to Signatory related to promotion and enhancement of the security of TI under the Framework Agreements.

12.1.6 Chief Information Security Officer.

i. The RCE shall designate a person to serve as the Chief Information Security Officer (CISO) for activities conducted under the Framework Agreements. This may be either an employee or independent contractor of the RCE. The RCE's CISO will be responsible for monitoring and maintaining the overall Security Posture of activities conducted under the Framework Agreements and making recommendations to all QHINs regarding changes to baseline security practices required to address changes to the threat landscape.

ii. Signatory agrees that it, and not the RCE, is ultimately responsible for the Security Posture related to Signatory's participation in TEFCA. Signatory shall also designate a person to serve as its CISO for purposes of Signatory's participation in TEFCA Exchange. Signatory's CISO shall have responsibility for Signatory's Security Posture 'with respect to its participation in TEFCA Exchange and as set forth in an SOP. The RCE shall establish a Cybersecurity Council to enhance cybersecurity commensurate with the risks of the activities conducted under the Framework Agreements as set forth in an SOP.

12.2 TI Outside the United States. Signatory shall only Use TI outside the United States or Disclose TI to any person or entity outside the United States to the extent such Use or Disclosure is permitted or required by Applicable Law and the Use or Disclosure is conducted in conformance with the HIPAA Security Rule, regardless of whether Signatory is a Covered Entity or Business Associate.

12.3 TEFCA Security Incident Reporting. Signatory shall report to the RCE and to all QHINs that are likely impacted, whether directly or by nature of one of the other QHIN's Participants or Subparticipants, any TEFCA Security Incident, as set forth in the applicable SOP(s). Such report must include sufficient information for the RCE and others affected to understand the nature and likely scope of the TEFCA Security Incident. Signatory shall supplement the information contained in the report as additional relevant information becomes available and cooperate with the RCE, and with other QHINs, Participants, and Subparticipants that are likely impacted by the TEFCA Security Incident.

12.3.1 Receiving TEFCA Security Incident Report. Signatory shall implement a reporting protocol by which other QHINs can provide Signatory with a report of a TEFCA Security Incident.

12.3.2 Vertical Reporting of TEFCA Security Incident(s). Signatory shall report a TEFCA Security Incident to its Participants and Subparticipants as required by an applicable SOP.

12.3.3 Compliance with Notification Under Applicable Law. Nothing in this Section 12.3 shall be deemed to modify or replace any breach notification requirements that Signatory may have under the HIPAA Rules, the FTC Rule, or other Applicable Law. To the extent Signatory is already required by Applicable Law to notify a Participant, Subparticipant, or another QHIN of an incident that would also be a TEFCA Security Incident, this Section 12.3 does not require duplicative notification.

12.4 Encryption. If Signatory is a NHE (but not to the extent that it is a federal agency or any other type of entity exempted from compliance with this Section 12.4 in an applicable SOP), Signatory must encrypt all Individually Identifiable Information it maintains, both in transit and at rest, regardless of whether such information is TI. Requirements for encryption may be set forth in an SOP.

13. General Obligations.

13.1 Compliance with Applicable Law and the Framework Agreements. Signatory shall comply with all Applicable Law and shall implement and act in accordance with any provision required by this Common Agreement, including all applicable SOPs and provisions of the QTF, when providing Designated Network Services or otherwise engaging in or facilitating TEFCA Exchange.

13.2 Compliance with Specific Obligations.

13.2.1 Responsibility of the RCE. To the extent required by the Contract, the RCE shall take reasonable steps to confirm that Signatory is abiding by the obligations under this Common Agreement, the QTF, and all applicable SOPs. In the event that the RCE becomes aware of a material non-compliance with any of the obligations stated in a Framework Agreement or any of the applicable SOPs by Signatory or its Participants or Subparticipants, then the RCE shall promptly notify Signatory in writing. Such notice shall notify Signatory that its failure to correct any such deficiencies within the timeframe established by the RCE shall constitute a material breach of this Common Agreement, which may result in termination of this Common Agreement in accordance with Section 17.3.2.

13.2.2 Responsibility of Signatory. Signatory shall be responsible for taking reasonable steps to confirm that all of its Participants and Subparticipants are abiding by the ToP and all applicable SOPs. In the event that Signatory becomes aware of a material non-compliance by one of its Participants or Subparticipants, then Signatory shall promptly notify the Participant or

Subparticipant in writing. Such notice shall inform the Participant or Subparticipant that its failure to correct any such deficiencies within the timeframe established by Signatory shall constitute a material breach of the ToP, which may result in suspension or termination of Participant's or Subparticipant's ability to engage in TEFCA Exchange. Except as set forth in Section 17.4.5, Signatory is responsible for determining when suspension or termination of its Participants' or Subparticipants' ability to engage in TEFCA Exchange is warranted. Nothing in this Section 13.2.2 shall be deemed to limit Signatory's responsibility for the acts or omissions of its Participants and Subparticipants as set forth in Section 7.4.

13.2.3 Responsibility for Third-Party Technology Vendors of Signatory. To the extent that Signatory uses a third-party technology vendor(s) that will have access to TEFCA Information in connection with Designated Network Services, it shall include in a written agreement with each such subcontractor or agent a requirement to comply with all applicable provisions of this Common Agreement and a prohibition on engaging in any act or omission that would cause Signatory to violate the terms of this Common Agreement if Signatory had engaged in such act or omission itself.

13.3 Intentionally Omitted.

13.4 Intentionally Omitted.

14. Specific QHIN Obligations.

14.1 Transparency – Access to Participant/Subparticipant Information. If either ONC or the RCE has a reasonable basis to believe that one or more of the following situations exist with respect to Signatory, then Signatory shall make available, upon written request, evidence of the applicable Participant/Subparticipant Terms of Participation and information relating to the exchange of TI and the circumstances giving rise to the basis for such request. The foregoing shall be subject to Signatory's right to restrict or condition its cooperation or disclosure of information in the interest of preserving privileges but only to the extent that such information is material to the defense of a substantiated claim asserted by a third party. Such situations include: (i) an alleged violation of this Common Agreement or Applicable Law; or (ii) a threat to the security of TEFCA Exchange or information that the RCE or ONC reasonably believes is TI. The right of Signatory to restrict or condition its cooperation or disclosure of information pursuant to this Section 14.1 in the interest of preserving privileges shall not apply to a disclosure that is requested in the interest of national security.

14.2 Compliance with Standard Operating Procedures. The RCE shall adopt Standard Operating Procedures (SOPs) to provide detailed guidance on specific aspects of the exchange activities under this Common Agreement that are binding on the RCE, Signatory and, as applicable, Participants and Subparticipants. The SOPs are incorporated by reference into this Common Agreement, and Signatory shall comply with all SOPs that are applicable to it. In the ToP, Participants and Subparticipants will agree to comply with all applicable SOPs. If Signatory or its Participants or Subparticipants fail to comply with any applicable SOP, the RCE may take corrective action to bring the organization into compliance with the SOP, which may include: (i) requiring Signatory to suspend the ability of a Participant or Subparticipant to exchange information under the Framework Agreement(s) until the non-compliance is corrected to the satisfaction of the RCE; (ii) requiring Signatory to terminate the ability of a Participant or Subparticipant to exchange information under the Framework Agreement(s); (iii) suspending Signatory's ability to exchange information under the Common Agreement; or (iv) terminating Signatory's ability to exchange information under the Common Agreement. RCE shall adopt an SOP that provides detailed information about sanctions for non-compliance with an SOP. Nothing in this Section 14.2 of this Common Agreement limits the RCE's rights to terminate this Common Agreement under Section 17.3.2 or 17.3.3 of this Common Agreement.

14.3 Intentionally Omitted.

14.4 Intentionally Omitted.

15. Dispute Resolution.

15.1 Acknowledgement and Consent to Dispute Resolution Process. Signatory acknowledges that it may be in its best interest to resolve Disputes related to the Common Agreement through a collaborative, collegial process rather than through civil litigation. Signatory has reached this conclusion based upon the fact that the legal and factual issues related to the exchange and related activities under the Common Agreement are unique, novel, and complex, and limited case law exists that addresses the legal issues that could arise in connection with this Common Agreement. Therefore, Signatory agrees to participate in the Dispute Resolution Process with respect to any Dispute. Notwithstanding, Signatory understands that the Dispute Resolution Process does not supersede or replace any oversight, investigatory, enforcement, or other administrative actions or processes that may be taken by the relevant authority, whether or not arising out of or related to the circumstances giving rise to the Dispute. RCE and Signatory are committed to promptly and fairly resolving Disputes.

To that end, Signatory shall use its best efforts to resolve Disputes that may arise with other QHINs, their respective Participants and Subparticipants, or the RCE through informal discussions before seeking to invoke the Dispute Resolution Process. Likewise, Signatory, on its own behalf and on behalf of its Participant(s) or Subparticipant(s), will seek to resolve Disputes involving the RCE through good-faith informal discussions with the RCE prior to invoking the Dispute Resolution Process. If the Dispute cannot be resolved through cooperation between Signatory and the other QHIN(s) or the RCE, then the RCE may, or Signatory may on its own behalf or on behalf of its Participant(s) or Subparticipant(s), choose to submit the Dispute to the Dispute Resolution Process.

Under no circumstances will the Dispute Resolution Process give the RCE any power to assess monetary damages against any party to the Dispute Resolution Process including, without limitation, Signatory or its Participants or Subparticipants or any other QHIN or its Participants or Subparticipants. Except in accordance with Section 15.2, if Signatory refuses to participate in the Dispute Resolution Process, such refusal shall constitute a material breach of this Common Agreement and may be grounds for suspension or termination of Signatory's participation in TEFCA Exchange.

15.2 Injunctive Relief.

15.2.1 Notwithstanding Section 15.1, Signatory shall be relieved of its obligation to participate in the Dispute Resolution Process if Signatory: (i) makes a good faith determination that is based upon available information or other evidence that another QHIN's or its Participants' or Subparticipants' acts or omissions will violate Section 7.1 or cause irreparable harm to Signatory or another organization or person (e.g., another QHIN or its Participant or an Individual); and (ii) pursues immediate injunctive relief against such QHIN or its Participant or Subparticipant in a court of competent jurisdiction in accordance with Section 19.3. Signatory must notify RCE of such action within two (2) business days of filing for the injunctive relief and of the result of the action within twenty-four (24) hours of a court of competent jurisdiction granting or denying injunctive relief.

15.2.2 If the injunctive relief sought in Section 15.2.1 is not granted and Signatory chooses to pursue the Dispute, the Dispute must be submitted to the Dispute Resolution Process in accordance with Section 15.1.

15.3 Activities during Dispute Resolution Process. The pendency of a Dispute under this Common Agreement has no effect on either Party's obligations herein, unless

Signatory terminates its rights in accordance with Section 17.3.1 or is suspended in accordance with Section 17.4.2.

15.4 Implementation of Agreed Upon Resolution. If, at any point during the Dispute Resolution Process, Signatory and all other parties to the Dispute accept a proposed resolution of the Dispute, Signatory and RCE each agree to implement the terms of the resolution within the timeframe agreed to in the resolution of the Dispute, to the extent applicable to each of them.

15.5 Reservation of Rights. If, following the completion of the Dispute Resolution Process, in the opinion of either Party, the Dispute Resolution Process failed to adequately resolve the Dispute, a Party may pursue any remedies available to it in a court of competent jurisdiction in accordance with Section 19.3.

15.6 Escalation of Certain Disputes to ONC. Except for RCE suspension or termination decisions subject to Section 16 of this Common Agreement, if Signatory has reason to believe that: (i) the RCE is acting in a Discriminatory Manner or in violation of the RCE's conflict of interest policies; or (ii) the RCE has not acted in accordance with its obligations stated in this Common Agreement, then Signatory shall have the right, on its own behalf and on behalf of its Participants and Subparticipants, to make a complaint to ONC. The complaint shall identify the parties to the Dispute, a description of the Dispute, a summary of each party's position on the issues included in the Dispute, the final disposition of the Dispute, and the basis for the RCE's alleged misconduct. The RCE and Signatory shall each also promptly provide such additional information as may be reasonably requested by ONC in order to consider and resolve the issues raised for review. Since this complaint may include PHI and may include Confidential Information, the RCE will work with ONC to develop mechanisms to protect the confidentiality of this information. Such protective mechanisms and the process for escalating a complaint to ONC are set forth in an SOP.

15.7 Reporting of Anonymized Dispute Information to ONC. As part of the RCE's communications with ONC, within fifteen (15) business days after the end of each calendar quarter, the RCE reports the following information relating to each Dispute that has been submitted through the Dispute Resolution Process in an anonymized format to ONC: (i) identification of whether the parties to the Dispute are QHIN(s) only, or whether the Dispute also involves Participant(s) or Subparticipant(s); (ii) a description of the Dispute with reasonable specificity; and (iii) the final disposition of the Dispute.

16. Appeals to ONC.

16.1 Signatory may appeal the following decisions of the RCE to ONC:

16.1.1 Suspension of a Signatory or Suspension of a Signatory's Participant or Subparticipant; and

16.1.2 Termination of a Signatory's Common Agreement by the RCE.

16.2 ONC anticipates publishing regulations to address the appeals of any of the RCE's decisions listed in Section 16.1. ONC anticipates issuing sub-regulatory guidance to address those appeals while formulating regulations. Until ONC's regulations governing those appeals are finalized and effective, the sub-regulatory guidance ONC issues shall be binding under this Common Agreement.

17. Term, Termination and Suspension.

17.1 Term. This Common Agreement shall commence on the CA Effective Date and shall remain in effect until it is terminated by either Party in accordance with the terms of this Common Agreement.

17.2 Intentionally Omitted.

17.3 Termination.

17.3.1 Termination by Signatory. Signatory may terminate this Common Agreement at any time without cause by providing ninety (90) days' prior written notice to RCE. Signatory may also terminate for cause if the RCE commits a material breach of the Common Agreement, and the RCE fails to cure its material breach within thirty (30) days of Signatory providing written notice to RCE of the material breach; provided, however, that if RCE is diligently working to cure its material breach at the end of this thirty (30) day period, then Signatory must provide the RCE with up to another thirty (30) days to complete its cure.

17.3.2 Termination by the RCE. RCE may not terminate this Common Agreement except as provided by Section 4.2, this Section 17.3.2, or Section 17.3.3 of this Common Agreement. RCE may terminate this Common Agreement with immediate effect by giving notice to Signatory if: (i) Signatory is in material breach of any of the terms and conditions of this Common Agreement and fails to remedy such breach within thirty (30) days after receiving notice of such breach; provided, however, that if Signatory is diligently working to cure its material breach at the end of this thirty- (30-) day period, then RCE must provide Signatory with up to another thirty (30) days to complete its cure; or

(ii) Signatory breaches a material provision of this Common Agreement where such breach is not capable of remedy.

17.3.3 Termination by RCE if the RCE Ceases to be Funded. The Parties acknowledge that the RCE's activities under this Common Agreement are supported by ONC funding. If this funding ceases, there are no guarantees that the RCE will continue unless a financial sustainability model has been put in place. If federal funding ceases, or if the available funding is not sufficient to provide the necessary funding to support operation of the RCE and there is no successor RCE, then the RCE may terminate this Common Agreement by providing one hundred and eighty (180) days' prior written notice to Signatory.

17.3.4 Termination by Mutual Agreement. The Parties may terminate this Common Agreement at any time and for any reason by mutual, written agreement.

17.3.5 Effect of Termination of the Common Agreement.

(i) Upon termination of this Common Agreement for any reason, RCE shall promptly remove Signatory and its Participants and Subparticipants from the RCE Directory Service and any other lists of QHINs that RCE maintains. Signatory shall implement the technical mechanism(s) necessary to ensure that its Participants' and Subparticipants' ability to participate in TEFCA Exchange is terminated upon termination of this Common Agreement.

(ii) Upon termination of this Common Agreement for any reason, Signatory shall, without undue delay, (a) remove all references that identify it as a QHIN from all media, and (b) cease all use of any material, including but not limited to product manuals, marketing literature, and web content that identifies it as a QHIN. Within twenty (20) business days of termination of this Common Agreement, Signatory shall confirm to RCE, in writing, that it has complied with this Subsection 17.3.5(ii).

(iii) To the extent Signatory stores TI, such TI may not be distinguishable from other information maintained by Signatory. When the TI is not distinguishable from other information, it is not possible for Signatory to return or destroy TI it maintains upon termination or expiration of this Common Agreement. Upon termination or expiration of this Common Agreement, if Signatory is subject to Section 11 of this Common Agreement, such sections

shall continue to apply so long as the information would be ePHI if maintained by a Covered Entity or Business Associate. The protections required under the HIPAA Security Rule shall also continue to apply to all TI that is ePHI, regardless of whether Signatory is a Covered Entity or Business Associate.

(iv) In no event shall Signatory be entitled to any refund of any fees that it has paid the RCE prior to termination.

(v) The provisions set forth in this Section 17.3.5 are in addition to those survival provisions set forth in Section 19.16.

17.4 Suspension.

17.4.1 Suspension by RCE. RCE may suspend Signatory's ability to engage in TEFCA Exchange if RCE determines, following completion of a preliminary investigation, that Signatory is responsible for a Threat Condition or in accordance with Section 17.4. RCE will make a reasonable effort to notify Signatory in advance of RCE's intent to suspend Signatory, including notice of the Threat Condition giving rise to such suspension. If advance notice is not reasonably practicable under the circumstances, the RCE will notify Signatory of the suspension, and the Threat Condition giving rise thereto, as soon as practicable following the suspension. Upon suspension of Signatory, RCE will work collaboratively with Signatory to resolve the issue leading to the suspension. RCE shall adopt an SOP to address specific requirements and timelines related to suspension.

17.4.2 Selective Suspension by Signatory. Signatory may, in good faith and to the extent permitted by Applicable Law, determine that it must suspend exchanging with another QHIN, Participant, or Subparticipant with which it is otherwise required to exchange in accordance with an SOP because of reasonable and legitimate concerns related to the privacy, security, accuracy, or quality of information that is exchanged. If Signatory makes this determination, it is required to promptly notify the RCE and the QHIN that Signatory is suspending of its decision and the reason(s) for making the decision. If Signatory makes the decision to suspend, it is required, within thirty (30) days, to initiate the Dispute Resolution Process in order to resolve whatever issues led to the decision to suspend, or end its suspension and resume exchanging with the other QHIN. Provided that Signatory selectively suspends exchanging with another QHIN in accordance with this Section 17.4.2 and in accordance with Applicable Law, such selective suspension shall not be deemed a violation of Sections 6.2.2 or 9.4.

17.4.3 Additional Suspension Rights of RCE. Notwithstanding anything to the contrary set forth herein, the RCE retains the right to suspend any TEFCA Exchange activity (i) upon ten (10) days' prior notice if the RCE determines that Signatory has created a situation in which the RCE may suffer material harm and suspension is the only reasonable step that the RCE can take to protect itself; or (ii) immediately if the RCE determines that the safety or security of any person or the privacy or security of TI or Confidential Information is threatened. In the case of an immediate suspension under this Section 17.4.3, the RCE will provide notice as soon as practicable following the suspension.

17.4.4 Effect of Suspension. The suspension of Signatory's ability to participate in TEFCA Exchange pursuant to this Section 17.4 has no effect on Signatory's other obligations hereunder, including, without limitation, obligations with respect to privacy and security. During any suspension pursuant to this Section 17.4, Signatory's inability to exchange information under this Common Agreement or comply with those terms of this Common Agreement that require information exchange shall not be deemed a breach of this Common Agreement. In the event of suspension of Signatory's ability to participate in TEFCA Exchange, Signatory shall communicate to its Participants, and require that they communicate to their Subparticipants, that all TEFCA Exchange by or on behalf of Signatory's Participants and Subparticipants will also be suspended during any period of Signatory's suspension. Signatory is responsible for having and implementing the technical mechanism(s) necessary to ensure that its Participants' and Subparticipants' ability to participate in TEFCA Exchange is suspended during the period of Signatory's suspension from TEFCA Exchange.

17.4.5 RCE Suspension of Participant or Subparticipants. To the extent that RCE determines that one of Signatory's Participants or Subparticipants has done something or failed to do something that results in a Threat Condition, RCE may suspend, or the RCE may direct that Signatory suspend, that Participant's or Subparticipant's ability to engage in TEFCA Exchange. In the event that the RCE directs Signatory to suspend a Participant or Subparticipant based on (a) the RCE's determination that suspension or termination is warranted based on (i) an alleged violation of such Framework Agreement or of Applicable Law by the party/parties; (ii) a cognizable threat to the security of TEFCA Exchange or the information that the RCE reasonably believes is TI; or (iii) such suspension is in the interests of national security as directed by an agency of the United States government, then Signatory must effectuate such suspension as soon as practicable and not longer than within

twenty-four (24) hours of the RCE having directed the suspension, unless the RCE specifies a longer period of time is permitted to effectuate the suspension; and (b) any reason other than those in subsection (a), then Signatory must effectuate suspension as soon as practicable.

17.5 Successor RCE and Transition. Signatory agrees that ONC has the right to select any successor RCE or to act as an interim RCE until such successor RCE has been selected. Signatory further agrees to work cooperatively with the RCE and any interim or successor RCE selected by ONC. Additionally, Signatory shall continue to abide by the provisions of this Common Agreement during the transition to any interim or successor RCE.

18. Fees.

18.1 Fees Paid by QHINs to the RCE. Signatory shall pay the fees set forth on Schedule 1 attached hereto (the "QHIN Fees"). RCE shall invoice Signatory for all Fees in accordance with Schedule 1. Unless otherwise set forth in Schedule 1, invoices shall be due and payable by Signatory within sixty (60) days after receipt thereof unless Signatory notifies RCE in writing that it is contesting the accuracy of the invoice and identifies the specific inaccuracies that it asserts. QHIN Fees contested under this Section 18.1 shall be resolved between Signatory and RCE as stated in the applicable SOP. Other than with regard to invoiced amounts that are contested in good faith, any collection costs, attorneys' fees or other expenses reasonably incurred by RCE in collecting amounts due under this Common Agreement are the responsibility of Signatory. If Signatory fails to pay any undisputed QHIN Fees when due hereunder, RCE has the right to suspend or terminate Signatory's ability to participate in any exchange activity under this Common Agreement. Prior to taking any action against Signatory for non-payment, including suspension, RCE shall provide Signatory ten (10) days' prior written notice. If Signatory makes payment within ten (10) days of receiving written notice, RCE will not suspend Signatory's ability to participate in any exchange activity under this Common Agreement. If Signatory fails to make payment within ten (10) days of receiving notice, then the RCE may implement the suspension or may terminate Signatory's ability to participate in any exchange activity under this Common Agreement.

18.1.1 Changes to QHIN Fees. Schedule 1 may be updated by the RCE from time-to-time in relation to operational costs, availability of ONC funding, and other market factors in order to ensure the sustainability of the activities conducted under the Framework Agreements. In light of the foregoing, changes to Schedule 1 are not subject to the change management process set forth in Section 5. The RCE shall provide Signatory not less than ninety

(90) days' advance written notice of any adjustments to the QHIN Fees set forth in Schedule 1.

18.2 Fees Charged by QHINs to Other QHINs. Signatory is prohibited from charging fees to other QHINs for any exchange of information using the Designated Network Services.

18.3 Fees Charged by QHINs, Participants or Subparticipants. QHINs, Participants, and Subparticipants that operate a Responding Node may charge fees to an Initiating Node when Responding to Queries through TEFCA Exchange as defined in an applicable SOP. The foregoing shall not prohibit Signatory from charging its Participants or Subparticipants fees for use of its Designated Network Services.

19. Contract Administration.

19.1 Authority to Execute. Signatory warrants and represents that it has the full power and authority to execute this Common Agreement and that any representative of Signatory who executes this Common Agreement has full power and authority to do so on behalf of Signatory.

19.2 Notices. All notices to be made under this Common Agreement shall be given in writing to Signatory at the address for legal notice specified in its QHIN Application and to the RCE at The Sequoia Project 8300 Boone Blvd., Suite 500, Vienna, Virginia 22182 or rce@sequoiaproject.org, and shall be deemed given: (i) upon delivery, if personally delivered; (ii) upon delivery by overnight delivery service such as UPS or FEDEX or another recognized commercial carrier; (iii) upon the date indicated on the return receipt, when sent by the United States Postal Service Certified Mail, return receipt requested; or (iv) if by facsimile telecommunication or other form of electronic transmission, upon receipt when the sending facsimile machine or electronic mail address receives confirmation of receipt by the receiving facsimile machine or electronic mail address. Either Party may update its address for notice by providing notice to the other Party in accordance with this Section 19.2.

19.3 Governing Law, Forum, and Jurisdiction.

19.3.1 Conflicts of Law and Governing Law. In the event of a Dispute between Signatory and the RCE, the applicable federal and State conflicts of law provisions that govern the operations of the Parties shall determine governing law.

19.3.2 Jurisdiction and Venue. The RCE, currently a Virginia non-profit corporation, and Signatory each hereby submits to the exclusive jurisdiction of any State

or federal court sitting in the Commonwealth of Virginia within twenty-five (25) miles of Alexandria, Virginia in any legal proceeding arising out of or relating to this Common Agreement unless otherwise required by Applicable Law. The RCE and Signatory each agrees that all claims and matters arising out of this Common Agreement may be heard and determined in such court, and each Party hereby waives any right to object to such filing on grounds of improper venue, *forum non-conveniens*, or other venue-related grounds.

19.3.3 Intentionally Omitted.

19.3.4 Sovereign Immunity. No provision within this Common Agreement in any way constitutes a waiver by the United States Department of Health and Human Services or any other part of the federal government of sovereign immunity or any other applicable immunity from suit or from liability that the United States Department of Health and Human Services or other part of the federal government may have by operation of law.

19.4 Assignment. None of this Common Agreement, including but not limited to any of the rights created by this Common Agreement, can be transferred by either Party, whether by assignment, merger, other operation of law, change of control of the Party or otherwise, without the prior written approval of the other Party. Notwithstanding the foregoing, if ONC selects another organization to serve as the RCE, then RCE shall assign this Common Agreement to the successor RCE or an interim RCE as directed by ONC and consent of Signatory to such assignment shall not be required. Signatory understands and agrees that no interim or successor RCE shall have any obligation or liability for any act or omission of The Sequoia Project in connection with this Common Agreement or any of the other Framework Agreements prior to the termination of The Sequoia Project's status as the RCE.

19.5 Force Majeure. Neither Party shall be responsible for any delays or failures in performance caused by the occurrence of events or other circumstances that are beyond its reasonable control after the exercise of commercially reasonable efforts to either prevent or mitigate the effect of any such occurrence or event.

19.6 Severability. If any provision of this Common Agreement shall be adjudged by any court of competent jurisdiction to be unenforceable or invalid, that provision shall be struck from the Common Agreement, and the remaining provisions of this Common Agreement shall remain in full force and effect and enforceable.

19.7 Counterparts. This Common Agreement may be executed in one or more counterparts, each of which shall be considered an original counterpart, and shall become a binding agreement when each Party shall have executed one counterpart.

19.8 Captions. Captions appearing in this Common Agreement are for convenience only and shall not be deemed to explain, limit, or amplify the provisions of this Common Agreement.

19.9 Independent Parties. Nothing contained in this Common Agreement shall be deemed or construed as creating a joint venture or partnership between Signatory and RCE.

19.10 Acts of Contractors and Agents. To the extent that the acts or omissions of a Party's agent(s) or contractor(s), or their subcontractor(s), result in that Party's breach of and liability under this Common Agreement, said breach shall be deemed to be a breach by that Party.

19.11 Entire Agreement; Waiver. This Common Agreement, together with the QTF, SOPs, and all other attachments, exhibits, and artifacts incorporated by reference, contains the entire understanding of the Parties with regard to the subject matter contained herein. The failure of either Party to enforce, at any time, any provision of this Common Agreement shall not be construed to be a waiver of such provision, nor shall it in any way affect the validity of this Common Agreement or any part hereof or the right of such Party thereafter to enforce each and every such provision. No waiver of any breach of this Common Agreement shall be held to constitute a waiver of any other or subsequent breach, nor shall any delay by either Party to exercise any right under this Common Agreement operate as a waiver of any such right.

19.12 Effect of Agreement. Except as provided in Sections 7.4 and Section 15, nothing in this Common Agreement shall be construed to restrict either Party's right to pursue all remedies available under law for damages or other relief arising from acts or omissions of the RCE or other QHINs or their Participants or Subparticipants related to the Common Agreement, or to limit any rights, immunities, or defenses to which Signatory may be entitled under Applicable Law.

19.13 Priority. In the event of any conflict or inconsistency between Applicable Law, a provision of this Common Agreement, the QTF, an SOP, or any implementation plans, guidance documents, or other materials or documentation the RCE makes available to QHINs, Participants, or Subparticipants regarding the operations or activities conducted under the Framework Agreements, the following shall be the order of precedence for this Common Agreement to the extent of such conflict or inconsistency: (i) Applicable Law; (ii) the Common Agreement; (iii) the ToP; (iv) the QTF; (v) the Dispute Resolution Process, as set forth herein and further detailed in an SOP; (vi) all other SOPs; (vii) all other attachments, exhibits, and artifacts

incorporated herein by reference; and (viii) other RCE plans, documents, or materials made available regarding activities conducted under the Framework Agreements.

19.14 QHIN Time Periods. Any of the time periods relating to the Parties hereto that are specified in this Common Agreement may be changed on a case-by-case basis pursuant to the mutual written consent of the Parties, provided that these changes are not undertaken to adversely affect another QHIN and provided that these changes would not unfairly benefit either Party to the detriment of others participating in activities under the Framework Agreements. Time periods that pertain to ONC may not be changed, except by ONC, including the time periods for ONC review of proposed changes to the Common Agreement, the QTF, or SOPs that are set forth in Section 5.

19.15 Remedies Cumulative. The rights and remedies of the Parties provided in this Common Agreement are cumulative and are in addition to any other rights and remedies provided by Applicable Law.

19.16 Survival of Rights and Obligations. The respective rights, obligations, and liabilities of the Parties with respect to acts or omissions that occur by either Party prior to the date of expiration or termination of this Common Agreement shall survive such expiration or termination. Following any expiration or termination of this Common Agreement, the Parties shall thereafter cooperate fully and work diligently in good faith to achieve an orderly resolution of all matters resulting from such expiration or termination.

19.16.1 The following sections shall survive expiration or termination of this Common Agreement as more specifically provided below:

(i) The following sections shall survive in perpetuity following the expiration or termination of this Common Agreement: Sections 7.6 Limitation of Liability; 19.2 Notices; 19.3 Governing Law, Forum, and Jurisdiction; 19.6 Severability; 19.9 Independent Parties; 19.10 Acts of Contractors and Agents; 19.11 Entire Agreement; Waiver; 19.12 Effect of Agreement; 19.13 Priority; and 19.15 Remedies Cumulative.

(ii) The following sections shall survive for a period of six (6) years following the expiration or termination of this Common Agreement: Sections 7.1 Confidential Information; 7.2 Disclosure of Confidential Information; 7.4.1 Statement of General Principle;

12.3 TEFCA Security Incident Notification; and 14.1 Transparency - Access to Participant/Subparticipant Information.

(iii) The following section shall survive for the period specifically stated in such section following the expiration or termination of this Common Agreement: Section 17.3.5 Effect of Termination of Common Agreement.

(iv) To the extent that Signatory is an IAS Provider, the provisions set forth in Section 10.6 shall survive following the termination or expiration of this Common Agreement for the respective periods set forth therein.

IN WITNESS WHEREOF, the Parties hereto, intending legally to be bound hereby, have executed and delivered this Common Agreement as of the date first above written.

Exhibit 1 to the Common Agreement for Nationwide Health Information Interoperability

Participant/Subparticipant Terms of Participation

Version 1.0

April 2024

Participant/Subparticipant Terms of Participation

Introduction:

Section 4003 of the 21st Century Cures Act directed the U.S. Department of Health and Human Services ("HHS") National Coordinator for Health Information Technology to, "in collaboration with the National Institute of Standards and Technology and other relevant agencies within the Department of Health and Human Services, for the purpose of ensuring full network-to-network exchange of health information, convene public-private and public-public partnerships to build consensus and develop or support a trusted exchange framework, including a common agreement among health information networks nationally" (the "Trusted Exchange Framework and Common Agreement"℠ or TEFCA℠). The common agreement referenced in the foregoing sentence is the Common Agreement for Nationwide Health Information Interoperability entered into by each Qualified Health Information Network™ ("QHIN™") that has been Designated to participate in TEFCA. The Common Agreement requires that every QHIN contractually obligate their TEFCA Participants, who in turn are required to contractually obligate their Subparticipants to comply with the Participant/Subparticipant Terms of Participation ("ToP").

Upstream QHIN, Participant, or Subparticipant ("QPS"), as defined below, must ensure that these ToP are included, directly or by reference, in a legally enforceable contract in which the Upstream QPS binds its Participants and Subparticipants. **These ToP must be presented and entered into WITHOUT modification,** ***except*** that Upstream QPS should insert its name in the highlighted field(s) below and the name of the QHIN if Upstream QPS is not a QHIN and *may*, but is not required to, add signature lines to the end of these ToP. For the avoidance of doubt, the foregoing is not intended to prohibit Upstream QPS from imposing additional terms upon its Participants and/or Subparticipants, provided any such terms do not conflict with the ToP with respect to TEFCA Exchange.

Participant/Subparticipant Terms of Participation:

[NAME OF UPSTREAM QPS] ("Upstream QPS") participates in TEFCA by providing technical and/or governance services to its Participants and/or Subparticipants to facilitate their ability to engage in TEFCA Exchange consistent with all applicable legal and contractual requirements. [Upstream QPS is a QHIN OR Upstream QPS is a Participant or Subparticipant of [QHIN].] Your organization ("You") wishes to become a Participant or Subparticipant, as applicable, of Upstream QPS so that You may participate in TEFCA Exchange.

As a Participant or Subparticipant, You agree to abide by these Participant/Subparticipant Terms of Participation ("ToP").

1. Definitions and Relevant Terminology.

1.1 Defined Terms. Capitalized terms used in these ToP shall have the meaning set forth below. Where a definition includes one or more citations to a statute, regulation, or standard, the definition shall be interpreted to refer to such statute, regulation, or standard as may be amended from time-to-time.

Applicable Law: all federal, State, local, or tribal laws and regulations then in effect and applicable to the subject matter herein. For the avoidance of doubt, federal agencies are only subject to federal law.

Breach of Unencrypted Individually Identifiable Information: the acquisition, access, or Disclosure of unencrypted Individually Identifiable Information maintained by an IAS Provider that compromises the security or privacy of the unencrypted Individually Identifiable Information.

Business Associate: has the meaning assigned to such term at 45 CFR § 160.103.

Business Associate Agreement (BAA): a contract, agreement, or other arrangement that satisfies the implementation specifications described within 45 CFR § 164.314(a) and 164.504(e), as applicable.

Common Agreement: unless otherwise expressly indicated, the Common Agreement for Nationwide Health Information Interoperability, the QHIN Technical Framework (QTF), all Standard Operating Procedures (SOPs), and all other attachments, exhibits, and artifacts incorporated therein by reference.

Confidential Information: any information that is designated as Confidential Information by the CI Discloser, or that a reasonable person would understand to be of a confidential nature, and is disclosed to a CI Recipient pursuant to a Framework Agreement. For the avoidance of doubt, "Confidential Information" does not include electronic protected health information (ePHI), as defined herein, that is subject to a Business Associate Agreement and/or other provisions of a Framework Agreement.

Notwithstanding any label to the contrary, "Confidential Information" does not include any information that: (i) is or becomes known publicly through no fault of the CI Recipient; or (ii) is learned by the CI Recipient from a third party that the CI Recipient reasonably believes is entitled to disclose it without restriction; or (iii) is already known to the CI Recipient before receipt from the CI Discloser, as shown by the CI Recipient's written records; or (iv) is independently developed by CI Recipient without the use of or reference to the CI Discloser's Confidential Information, as shown by the CI Recipient's written records, and was not subject to confidentiality restrictions prior to receipt of such information from the CI Discloser.

Confidential Information (CI) Discloser: a person or entity that discloses Confidential Information.

Confidential Information (CI) Recipient: a person or entity that receives Confidential Information.

Connectivity Services: the technical services provided by a QHIN, Participant, or Subparticipant to its Participants and Subparticipants that facilitate TEFCA Exchange and are consistent with the requirements of the then-applicable QHIN Technical Framework.

Covered Entity: has the meaning assigned to such term at 45 CFR § 160.103.

Designated Network: the Health Information Network that a QHIN uses to offer and provide the Designated Network Services.

Designated Network Governance Body: a representative and participatory group or groups that approve the processes for fulfilling the Governance Functions and participate in such Governance Functions for Signatory's Designated Network.

Designated Network Services: the Connectivity Services and/or Governance Services.

Directory Entry(ies): listing of each Node controlled by a QHIN, Participant or Subparticipant, which includes the endpoint resource for such Node(s) and any other organizational or technical information required by the QTF or an applicable SOP.

Disclosure (including its correlative meanings "Disclose," "Disclosed," and "Disclosing"): the release, transfer, provision of access to, or divulging in any manner of TEFCA Information (TI) outside the entity holding the information.

Discover (including its correlative meanings "Discovery" and "Discovering"): the first day on which something is known to the QHIN, Participant, or Subparticipant, or by exercising reasonable diligence would have been known, to the QHIN, Participant, Subparticipant.

Discriminatory Manner: an act or omission that is inconsistently taken or not taken with respect to any similarly situated QHIN, Participant, Subparticipant, Individual, or group of them, whether it is a competitor, or whether it is affiliated with or has a contractual relationship with any other entity, or in response to an event.

Electronic Protected Health Information (ePHI): has the meaning assigned to such term at 45 CFR § 160.103.

Exchange Purpose or XP: means the reason, as authorized by a Framework Agreement, including the applicable SOP(s), for a transmission, Query, Use, Disclosure, or Response transacted through TEFCA Exchange.

Framework Agreement(s): with respect to QHINs, the Common Agreement; and with respect to a Participant or Subparticipant, the ToP.

FTC Rule: the Health Breach Notification Rule promulgated by the Federal Trade Commission set forth at 16 CFR Part 318.

Government Benefits Determination: a determination made by any agency, instrumentality, or other unit of the federal, State, local, or tribal government as to whether an Individual qualifies for government benefits for any purpose other than health care (e.g., Social Security disability benefits) to the extent permitted by Applicable Law. Disclosure of TI for this purpose may require an authorization that complies with Applicable Law.

Government Health Care Entity: any agency, instrumentality, or other unit of the federal, State, local, or tribal government to the extent that it provides health care services (e.g., treatment) to Individuals but only to the extent that it is not acting as a Covered Entity.

Governance Functions: the functions, activities, and responsibilities of the Designated Network Governance Body as set forth in an applicable SOP.

Governance Services: the governance functions described in an applicable SOP, which are performed by a QHIN's Designated Network Governance Body for its Participants and Subparticipants to facilitate TEFCA Exchange in compliance with the then-applicable requirements of the Framework Agreements.

Health Care Provider: meets the definition of such term in either 45 CFR § 171.102 or in the HIPAA Rules at 45 CFR § 160.103.

Health Information Network (HIN): has the meaning assigned to the term "Health Information Network or Health Information Exchange" in the information blocking regulations at 45 CFR § 171.102.

HIPAA: the Health Insurance Portability and Accountability Act of 1996, Pub. Law 104-191and the Health Information Technology for Economic and Clinical Health Act of 2009, Pub. Law 111-5.

HIPAA Rules: the regulations set forth at 45 CFR Parts 160, 162, and 164.

HIPAA Privacy Rule: the regulations set forth at 45 CFR Parts 160 and 164, Subparts A and E.

HIPAA Security Rule: the regulations set forth at 45 CFR Part 160 and Part 164, Subpart C.

Implementation Date: the date sixty (60) calendar days after publication of version 2 of the Common Agreement in the Federal Register.

Individual: has the meaning assigned to such term at 45 CFR § 171.202(a)(2).

Individual Access Services Incident (IAS Incident): a TEFCA Security Incident or a Breach of Unencrypted Individually Identifiable Information maintained by an IAS Provider.

Individual Access Service Consent (IAS Consent): an IAS Provider's own supplied form for obtaining express written consent from the Individual in connection with the IAS.

Individual Access Services Provider (IAS Provider): each QHIN, Participant, and Subparticipant that offers Individual Access Services (IAS).

Individual Access Services (IAS): the services provided to an Individual by a QHIN, Participant, or Subparticipant that has a direct contractual relationship with such Individual in which the QHIN, Participant, or Subparticipant, as applicable, agrees to satisfy that Individual's ability to use TEFCA Exchange to access, inspect, obtain, or transmit a copy of that Individual's Required Information.

Individually Identifiable Information: information that identifies an Individual or with respect to which there is a reasonable basis to believe that the information could be used to identify an Individual.

Initiating Node: a Node through which a QHIN, Participant, or Subparticipant initiates transactions for TEFCA Exchange and, to the extent such transaction is a Query, receives a Response to such Query.

Node: a technical system that is controlled directly or indirectly by a QHIN, Participant, or Subparticipant and that is listed in the RCE Directory Service.

Non-HIPAA Entity (NHE): a QHIN, Participant, or Subparticipant that is neither a Covered Entity nor a Business Associate as defined under the HIPAA Rules with regard to activities under a Framework Agreement. To the extent a QHIN, Participant, or Subparticipant is a Hybrid entity, as defined in 45 CFR § 164.103, such QHIN, Participant, or Subparticipant shall be considered a Non-HIPAA Entity with respect to TEFCA Exchange activities related to such QHIN, Participant, or Subparticipant's non-covered components.

ONC: the U.S. Department of Health and Human Services Office of the National Coordinator for Health Information Technology.

Participant: to the extent permitted by applicable SOP(s), a U.S. Entity that has entered into the ToP in a legally binding contract with a QHIN to use the QHIN's Designated Network Services to participate in TEFCA Exchange in compliance with the ToP.

Participant/Subparticipant Terms of Participation (ToP): the requirements set forth in Exhibit 1 to the Common Agreement, as reflected herein, to which: QHINs must contractually obligate their Participants to agree; to which QHINs must contractually obligate their Participants to contractually obligate their Subparticipants and Subparticipants of the Subparticipants to agree, in order to participate in TEFCA Exchange including the QHIN Technical Framework (QTF), all applicable Standard Operating Procedures (SOPs), and all other attachments, exhibits, and artifacts incorporated therein by reference.

Privacy and Security Notice: an IAS Provider's own supplied written privacy and security notice that contains the information required by the applicable SOP(s).

Protected Health Information (PHI): has the meaning assigned to such term at 45 CFR § 160.103.

Public Health Authority: has the meaning assigned to such term at 45 CFR § 164.501.

QHIN Technical Framework (QTF): the most recent effective version of the document that contains the technical, functional, privacy, and security requirements for TEFCA Exchange.

Qualified Health Information Network (QHIN): to the extent permitted by applicable SOP(s), a Health Information Network that is a U.S. Entity that has been Designated by the RCE and is a party to the Common Agreement countersigned by the RCE.

Query(ies) (including its correlative uses/tenses "Queried" and "Querying"): the act of asking for information through TEFCA Exchange.

RCE Directory Service: a technical service provided by the RCE that enables QHINs to identify their Nodes to enable TEFCA Exchange. The requirements for use of, inclusion in, and maintenance of the RCE Directory Service are set forth in the Framework Agreements, QTF, and applicable SOPs.

Recognized Coordinating Entity® (RCE™): the entity selected by ONC that enters into the Common Agreement with QHINs in order to impose, at a minimum, the requirements of the Common Agreement, including the SOPs and the QTF, on the QHINs and administer such requirements on an ongoing basis.

Required Information: the Electronic Health Information, as defined in 45 CFR § 171.102, that is (i) maintained in a Responding Node by any QHIN, Participant, or Subparticipant prior to or during the term of the applicable Framework Agreement and (ii) relevant for a required XP Code, as set forth in the QTF or an applicable SOP(s).

Responding Node: a Node through which the QHIN, Participant, or Subparticipant Responds to a received transaction for TEFCA Exchange.

Response(s) (including its correlative uses/tenses "Responds," "Responded" and "Responding"): the act of providing the information that is the subject of a Query or otherwise transmitting a message in response to a Query through TEFCA Exchange.

Standard Operating Procedure(s) or SOP(s): a written procedure or other provision that is adopted pursuant to the Common Agreement and incorporated by reference into the Framework Agreements to provide detailed information or requirements related to TEFCA Exchange, including all amendments thereto. Each SOP identifies the relevant group(s) to which the SOP applies, including whether Participants or Subparticipants are required to comply with a given SOP.

State: any of the several States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands.

Subparticipant: to the extent permitted by applicable SOP(s), a U.S. Entity that has entered into the ToP in a legally binding contract with a Participant or another Subparticipant to use the Participant's or Subparticipant's Connectivity Services to participate in TEFCA Exchange in compliance with the ToP.

TEFCA Exchange: the transaction of information between Nodes using an XP Code.

TEFCA Information (TI): any information that is transacted through TEFCA Exchange except to the extent that such information is received by a QHIN, Participant, or Subparticipant that is a Covered Entity, Business Associate, or NHE that is exempt from compliance with the Privacy section of the applicable Framework Agreement and is incorporated into such recipient's system of records, at which point the information is no longer TI with respect to such recipient and is governed by the HIPAA Rules and other Applicable Law.

TEFCA Security Incident(s):

(i) An unauthorized acquisition, access, Disclosure, or Use of unencrypted TI using TEFCA Exchange, but NOT including any of the following:
  (a) Any unintentional acquisition, access, Use, or Disclosure of TI by a Workforce Member or person acting under the authority of a QHIN, Participant, or Subparticipant, if such acquisition, access, Use, or Disclosure (i) was made in good faith, (ii) was made by a person acting within their scope of authority, (iii) was made to another Workforce Member or person acting under the authority of any QHIN, Participant, or Subparticipant, and (iv) does not result in further acquisition, access, Use, or Disclosure in a manner not permitted under Applicable Law and the Framework Agreements.
  (b) A Disclosure of TI where a QHIN, Participant, or Subparticipant has a good faith belief that an unauthorized person to whom the Disclosure was made would not reasonably have been able to retain such information.
  (c) A Disclosure of TI that has been de-identified in accordance with the standard at 45 CFR § 164.514(b).

(ii) Other security events (e.g., ransomware attacks), as set forth in an SOP, that adversely affect a QHIN's, Participant's, or Subparticipant's participation in TEFCA Exchange.

Threat Condition: (i) a breach of a material provision of a Framework Agreement that has not been cured within fifteen (15) days of receiving notice of the material breach (or such other period of time to which the Parties have agreed), which notice shall include such specific information about the breach that the RCE has available at

the time of the notice; or (ii) a TEFCA Security Incident; or (iii) an event that RCE, a QHIN, its Participant, or their Subparticipant has reason to believe will disrupt normal TEFCA Exchange, either due to actual compromise of or the need to mitigate demonstrated vulnerabilities in systems or data of the QHIN, Participant, or Subparticipant, as applicable, or could be replicated in the systems, networks, applications, or data of another QHIN, Participant, or Subparticipant; or (iv) any event that could pose a risk to the interests of national security as directed by an agency of the United States government.

United States: the fifty (50) States, the District of Columbia, and the territories and possessions of the United States including, without limitation, all military bases or other military installations, embassies, and consulates operated by the United States government.

U.S. Entity/Entities: any corporation, limited liability company, partnership, or other legal entity that meets all of the following requirements:

(i) The entity is organized under the laws of a State or commonwealth of the United States or the federal law of the United States and is subject to the jurisdiction of the United States and the State or commonwealth under which it was formed;
(ii) The entity's principal place of business, as determined under federal common law, is in the United States; and
(iii) None of the entity's directors, officers, or executives, and none of the owners with a five percent (5%) or greater interest in the entity, are listed on the *Specially Designated Nationals and Blocked Persons List* published by the United States Department of the Treasury's Office of Foreign Asset Control or on the United States Department of Health and Human Services, Office of Inspector General's *List of Excluded Individuals/Entities*.

Use(s) (including correlative uses/tenses, such as "Uses," "Used," and "Using"): with respect to TI, means the sharing, employment, application, utilization, examination, or analysis of such information within an entity that maintains such information.

Workforce Member(s): any employees, volunteers, trainees, and other persons whose conduct, in the performance of work for an entity, is under the direct control of such entity, whether or not they are paid by the entity.

XP Code: the code used to identify the XP in any given transaction, as set forth in the applicable SOP(s).

1.2 ToP Terminology.

1.2.1 References to You and QHINs, Participants, and Subparticipants. As set forth in its definition and in the introductory paragraph of these ToP, the term "You" is used to refer to the specific entity that is a party to these ToP with the Upstream QPS. (You and Upstream QPS may also be referred to herein individually as a "Party" or collectively as the "Parties.") Any and all rights and obligations of a QHIN, Participant or Subparticipant stated herein are binding upon all other QHINs, Participants, and Subparticipants that have entered into a Framework Agreement. References herein to "QHINs," "other Participants," "other Subparticipants," and similar such terms are used to refer to any and all other organizations that have signed a Framework Agreement.

1.2.2 General Rule of Construction. For the avoidance of doubt, a reference to a specific section of the ToP in a particular section does not mean that other sections of the ToP that expressly apply to You are inapplicable. A reference in these ToP to any law, any regulation, or to Applicable Law includes any amendment, modification or replacement to such law, regulation, or Applicable Law.

1.2.3 Terms of Participation for Subparticipants. You shall contractually obligate your Subparticipants, if any, to comply with the ToP. Notwithstanding the foregoing, for any entity that became Your Subparticipant prior to the Implementation Date, You shall (i) contractually obligate such entity to comply with the ToP within one-hundred eighty (180) days of the Implementation Date, provided that such Subparticipant is and remains a party to the Participant Subparticipant Agreement, as defined in and required by Common Agreement Version 1.1, during such period; or (ii) terminate such entity's ability to engage in TEFCA Exchange upon the earlier of the date of termination of the existing Participant-Subparticipant Agreement or one-hundred (180) days after the Implementation Date.

2. Cooperation and Non-Discrimination.

2.1 Cooperation. You understand and acknowledge that numerous activities with respect to the ToP will likely involve the RCE, QHINs, and their respective Participants and Subparticipants, as well as employees, agents, third-party contractors, vendors, or consultants of each of them. You shall reasonably cooperate with the RCE, ONC, QHINs and their respective Participants and Subparticipants in all matters related to TEFCA Exchange, including any dispute resolution activities in which You are involved. Expectations for reasonable

cooperation are set forth in an SOP. The costs of cooperation to You shall be borne by You and shall not be charged to the RCE or other QHINs. Nothing in this Section 2.1 shall modify or replace the TEFCA Security Incident notification obligations under Section 8.3 and, if applicable, the IAS Incident notification obligations under Section 6.3.2 of the ToP.

2.2 Non-Discrimination.

2.2.1 Prohibition Against Exclusivity. Upstream QPS shall not prohibit or attempt to prohibit You, nor shall You or Upstream QPS prohibit or attempt to prohibit any of Your Subparticipants, if any, from joining, exchanging with, conducting other transactions with, or supporting any other networks or exchange frameworks that use services *other than* the Upstream QPS's Designated Network Services or Your Connectivity Services, concurrently with Your or Your Subparticipants' participation in TEFCA Exchange. Notwithstanding the foregoing, this subsection does not preclude You from including and enforcing reasonable term limits in the contracts with Your Subparticipants related to Your Subparticipants' use of Your Connectivity Services.

2.2.2 No Discriminatory Limits on Exchange of TI. Neither You nor Upstream QPS shall engage in TEFCA Exchange, refrain from engaging in TEFCA Exchange, or limit TEFCA Exchange with any QHIN, Participant, Subparticipant, or Individual in a Discriminatory Manner. Notwithstanding the foregoing, if You refrain from engaging in TEFCA Exchange or limit interoperability with any other QHIN, Participant, or Subparticipant under the following circumstances, Your actions or inactions shall not be deemed discriminatory: (i) Your Connectivity Services require load balancing of network traffic or similar activities provided such activities are implemented in a consistent and non-discriminatory manner for a period of time no longer than necessary to address the network traffic issue; (ii) You have a reasonable and good-faith belief that the other QHIN, Participant, or Subparticipant has not satisfied or will not be able to satisfy the applicable terms of a Framework Agreement (including compliance with Applicable Law) in any material respect; and/or (iii) Your actions or inactions are consistent with or permitted by an applicable SOP. One QHIN, Participant, or Subparticipant suspending its exchange activities with another QHIN, Participant, or Subparticipant in accordance with Section 17.4.2 of the Common Agreement or Section 10.4.5 of the ToP, as applicable, shall not be deemed discriminatory.

2.2.3 Updates to Connectivity Services. In revising and updating Connectivity Services from time to time, You will use commercially reasonable efforts to

do so in accordance with generally accepted industry practices and to implement any changes in a non-discriminatory manner; provided, however, this provision shall not apply to limit modifications or updates to the extent that such revisions or updates are required by Applicable Law or implemented to respond promptly to newly discovered privacy or security threats.

2.2.4 Notice of Updates to Connectivity Services. You shall implement a reporting protocol to provide reasonable prior written notice of all modifications or updates of Your Connectivity Services to Upstream QPS and Your Subparticipants if such revisions or updates are expected to adversely affect Your ability to engage in TEFCA Exchange or require changes in the Connectivity Services of Upstream QPS or Your Subparticipants, regardless of whether they are necessary due to Applicable Law or newly discovered privacy or security threats.

3. Confidentiality and Accountability.

3.1 Confidential Information. You and Upstream QPS each agree to use and disclose all Confidential Information received pursuant to these ToP only as authorized in these ToP and any applicable SOP(s) and solely for the purposes of performing its obligations under a Framework Agreement or the proper exchange of information through TEFCA Exchange and for no other purpose. You and Upstream QPS may act as a CI Discloser and a CI Recipient, accordingly. A CI Recipient may disclose the Confidential Information it receives only to its Workforce Members who require such knowledge and use in the ordinary course and scope of their employment or retention and are obligated to protect the confidentiality of the CI Discloser's Confidential Information in a manner substantially equivalent to the terms required herein for the treatment of Confidential Information. If a CI Recipient must disclose the CI Discloser's Confidential Information under operation of law, it may do so provided that, to the extent permitted by Applicable Law, the CI Recipient gives the CI Discloser reasonable notice to allow the CI Discloser to object to such redisclosure, and such redisclosure is made to the minimum extent necessary to comply with Applicable Law.

3.2 Disclosure of Confidential Information. Nothing herein shall be interpreted to prohibit Upstream QPS or the RCE from disclosing any Confidential Information to ONC. You acknowledge that ONC, as a Federal government agency, is subject to the Freedom of Information Act. Any disclosure of Your Confidential Information to

ONC or any ONC contractor will be subject to Applicable Law, as well as the limitations, procedures, and other relevant provisions of any applicable SOP(s).

3.3 ONC's and the RCE's Approach when Requesting Confidential Information. As a matter of general policy, ONC will request only the limited set of Confidential Information that ONC believes is necessary to inform the specific facts and circumstances of a matter. The RCE will request only the limited set of Confidential Information that the RCE believes is necessary to inform the specific facts and circumstances of a matter.

4. RCE Directory Service and Directory Entries.

4.1 Utilization of Directory Entries. The RCE Directory Service and Directory Entries contained therein shall be used by QHINs solely as necessary to create and maintain operational connectivity to enable TEFCA Exchange. Upstream QPS is providing You with access to, and the right to use, Directory Entries on the express condition that You only use and disclose Directory Entry information as necessary to advance the intended use of the Directory Entries or as required by Applicable Law. For example, You are permitted to disclose Directory Entry information to Your Workforce Members, Your Subparticipant's Workforce Members, and/or to the Workforce Members of health information technology vendors who are engaged in assisting You or Your Subparticipant with establishing and maintaining connectivity via the Framework Agreements. Further, You shall not use another QPS's Directory Entries or information derived therefrom for marketing or any form of promotion of Your own products and services, unless otherwise permitted pursuant to an SOP. In no event shall You use or disclose the information contained in the Directory Entries in a manner that should be reasonably expected to have a detrimental effect on ONC, the RCE, Upstream QPS, Your Subparticipants, other QHINs, other Participants, other Subparticipants, or any other individual or organization. For the avoidance of doubt, Directory Entries are Confidential Information of the CI Discloser except to the extent such information meets one of the exceptions to the definition of Confidential Information. Nothing herein shall be interpreted to prohibit a QHIN or Upstream QPS from publicly disclosing the identity of its own Participants or Subparticipants.

4.2 ToP Record. You must maintain a record of all ToPs into which You enter with Your Subparticipants, if any, regardless of whether such Subparticipants are listed in the RCE Directory Services. Such record must be provided to the RCE within four (4) business days following the RCE's or Upstream QPS's written request unless such other timeframe is agreed to by the RCE.

5. TEFCA Exchange Activities.

5.1 Utilization of TEFCA Exchange. You may only utilize Connectivity Services for purposes of facilitating TEFCA Exchange. You may only utilize TEFCA Exchange for an XP. To the extent there are limitations on what types of Participants or Subparticipants may transact TEFCA Information for a specific XP, such limitations will be set forth in the applicable SOP(s). All TEFCA Exchange is governed by and must comply with the Framework Agreements governing the QHINs, Participants, and Subparticipants engaging in the TEFCA Exchange.

To the extent that Upstream QPS provides you with access to other health information exchange networks, these ToP do not affect these other activities or the reasons for which You may request and exchange information within these other networks. Such activities are not in any way limited by the Framework Agreements provided the transactions are not TEFCA Exchange.

5.2 Uses. You may Use TI in any manner that: (i) is not prohibited by Applicable Law; (ii) is consistent with Your Privacy and Security Notice, if applicable; and (iii) is in accordance with Sections 7 and 8 of these ToP.

5.3 Disclosures. You may Disclose TI provided such Disclosure: (i) is not prohibited by Applicable Law; (ii) is consistent with Your Privacy and Security Notice, if applicable; and (iii) is in accordance with Sections 7 and 8 of these ToP.

5.4 Responses. Except as otherwise set forth in an applicable SOP, Your Responding Nodes must Respond to Queries for all XP Codes that are identified as "required." in the applicable SOP(s). Such Response must include all Required Information. Notwithstanding the foregoing, You may withhold some or all of the Required Information to the extent necessary to comply with Applicable Law.

5.5 Special Legal Requirements. If and to the extent Applicable Law requires that an Individual either consent to, approve, or provide an authorization for the Use or Disclosure of that Individual's information to You, such as a more stringent federal or State law relating to sensitive health information, then You shall refrain from the Use or Disclosure of such information in connection with these ToP unless such Individual's consent, approval, or authorization has been obtained consistent with the requirements of Applicable Law and Section 7 of these ToP, including, without limitation, communicated pursuant to the access consent policy(ies) described in the QTF or applicable SOP(s). Copies of such consent, approval, or authorization shall be maintained and transmitted pursuant to the process described in the QTF by whichever party is required to obtain it under Applicable Law, and You may make such copies of the consent, approval, or authorization available electronically to any QHIN, Participant, or Subparticipant in accordance with the QTF and to the extent

permitted by Applicable Law. You shall maintain written policies and procedures to allow an Individual to revoke such consent, approval, or authorization on a prospective basis. If You are an IAS Provider, the foregoing shall not be interpreted to modify, replace, or diminish the requirements set forth in Section 6 of these ToP and any applicable SOP(s) for obtaining an Individual's express written consent.

6. **Individual Access Services.**

6.1 IAS Offering(s). You may elect to be an IAS Provider by offering IAS to any Individual in accordance with the requirements of this section and in accordance with all other provisions of these ToP and applicable SOP(s). Nothing in this Section 6 shall modify, terminate, or in any way affect an Individual's right of access under the HIPAA Privacy Rule at 45 CFR § 164.524 if You are a Covered Entity or a Business Associate. Nothing in this Section 6 of these ToP shall be construed as modifying or taking precedence over any provision codified in 45 CFR Part 171. An IAS Provider shall not prohibit or attempt to prohibit any Individual using the IAS of any other IAS Provider or from joining, exchanging with, conducting other transactions with any other networks or exchange frameworks, using services *other than* the IAS Providers' Designated Network Services, concurrently with the QHIN's, Participant's, or Subparticipant's participation in TEFCA Exchange.

6.2 Individual Consent. This Section 6.2 shall apply to You if You are an IAS Provider. The Individual requesting IAS shall be responsible for completing the IAS Consent. The IAS Consent shall include, at a minimum: (i) consent to use the IAS; (ii) the Individual's acknowledgement and agreement to Your Privacy and Security Notice; and (iii) a description of the Individual's rights to access, delete, and export such Individual's Individually Identifiable Information. You may implement secure electronic means (e.g., secure e-mail, secure web portal) by which an Individual may submit the IAS Consent. You shall collect the IAS Consent prior to the Individual's first use of the IAS and prior to any subsequent use if there is any material change in the applicable IAS Consent, including the version of the Privacy and Security Notice referenced therein. Nothing in the IAS Consent may contradict or be inconsistent with any applicable provision of these ToP or the SOP(s). If You are a Covered Entity and have a Notice of Privacy Practices that meets the requirements of 45 CFR § 164.520, You are not required to have a Privacy and Security Notice that meets the requirements of the applicable SOP. Nothing in Section 6 reduces a Covered Entity's obligations under the HIPAA Rules.

6.3 Additional Security Requirements for IAS Providers. In addition to meeting the applicable security requirements set forth in Section 8, if You are an IAS Provider, You must further satisfy the requirements of this subsection.

6.3.1 Scope of Security Requirements. You must meet the applicable security requirements set forth in Section 8 for all Individually Identifiable Information You maintain as an IAS Provider, regardless of whether such information is TI.

6.3.2 IAS Incident Notice to Affected Individuals. If You reasonably believe that an Individual has been affected by an IAS Incident, You must provide such Individual with notification without unreasonable delay and in no case later than sixty (60) days following Discovery of the IAS Incident. The notification required under this section must be written in plain language and shall include, to the extent possible, the information set forth in the applicable SOP(s). To the extent You are already required by Applicable Law to notify an Individual of an incident that would also be an IAS Incident, this section does not require duplicative notification to that Individual.

6.4 Survival for IAS Providers. This Section 6.4 shall apply to You if You are an IAS Provider. As between You as an IAS Provider and an Individual, the IAS Provider's obligations in the IAS Consent, including Your requirement to comply with the Privacy and Security Notice and provide Individuals with rights, shall survive for so long as You maintain such Individual's Individually Identifiable Information. If You were an IAS Provider, the requirements of Section 6.3 shall survive termination of these ToP for so long as You maintain Individually Identifiable Information acquired during the term of these ToP as an IAS Provider regardless of whether such information is or was TI.

7. **Privacy.**

7.1 Compliance with the HIPAA Privacy Rule. If You are a NHE (but not to the extent that You are acting as an entity entitled to make a Government Benefits Determination under Applicable Law, a Public Health Authority, or a Government Health Care Entity or any other type of entity exempted from compliance with this Section in an applicable SOP), then You shall comply with the provisions of the HIPAA Privacy Rule listed below with respect to all Individually Identifiable

information as if such information is Protected Health Information and You are a Covered Entity.

7.1.1 From 45 CFR § 164.502, General Rules:

- Subsection (a)(1) – Dealing with permitted Uses and Disclosures, but only to the extent You are authorized to engage in the activities described in this subsection of the HIPAA Privacy Rule for the applicable XP.
- Subsection (a)(2)(i) – Requiring Disclosures to Individuals
- Subsection (a)(5) – Dealing with prohibited Uses and Disclosures
- Subsection (b) – Dealing with the minimum necessary standard
- Subsection (c) – Dealing with agreed-upon restrictions
- Subsection (d) – Dealing with de-identification and re-identification of information
- Subsection (e) – Dealing with Business Associate contracts
- Subsection (f) – Dealing with deceased persons' information
- Subsection (g) – Dealing with personal representatives
- Subsection (h) – Dealing with confidential communications
- Subsection (i) – Dealing with Uses and Disclosures consistent with notice
- Subsection (j) – Dealing with Disclosures by whistleblowers

7.1.2 45 CFR § 164.504(e), Organizational Requirements.

7.1.3 45 CFR § 164.508, Authorization Required. Notwithstanding the foregoing, the provisions of Sections 6.2 shall control and this Section 7.1.3 shall not apply with respect to You if You are an IAS Provider that is a NHE.

7.1.4 45 CFR § 164.510, Uses and Disclosures Requiring Opportunity to Agree or Object. Notwithstanding the foregoing, an IAS Provider that is a NHE but is not a Health Care Provider shall not have the right to make the permissive Disclosures described in § 164.510(a)(3) - Emergency circumstances; provided, however, that an IAS Provider is not prohibited from making such a Disclosure if the Individual has consented to the Disclosure pursuant to Section 6 of these ToP.

7.1.5 45 CFR § 164.512, Authorization or Opportunity to Object Not Required. Notwithstanding the foregoing, an IAS Provider that is a NHE but is not a

Health Care Provider shall not have the right to make the permissive Disclosures described in § 164.512(c) - Standard: Disclosures about victims of abuse, neglect or domestic violence, § 164.512 Subsection (d) - Standard: Uses and Disclosures for health oversight activities, and § 164.512 Subsection (j) - Standard: Uses and Disclosures to avert a serious threat to health or safety; provided, however, that an IAS Provider is not prohibited from making such a Disclosure(s) if the Individual has consented to the Disclosure(s) pursuant to Section 6 of these ToP.

7.1.6 From 45 CFR § 164.514, Other Requirements Relating to Uses and Disclosures:

- Subsections (a)-(c) – Dealing with de-identification requirements that render information not Individually Identifiable Information for purposes of this Section 7 and TEFCA Security Incidents
- Subsection (d) – Dealing with minimum necessary requirements
- Subsection (e) – Dealing with Limited Data Sets

7.1.7 45 CFR § 164.522, Rights to Request Privacy Protections.

7.1.8 45 CFR § 164.524, Access of Individuals, except that an IAS Provider that is a NHE shall be subject to the requirements of Section 6 with respect to access by Individuals for purposes of IAS and not this Section 7.1.8.

7.1.9 45 CFR § 164.528, Accounting of Disclosures.

7.1.10 From 45 CFR § 164.530, Administrative Requirements:

- Subsection (a) – Dealing with personnel designations
- Subsection (b) – Dealing with training
- Subsection (c) – Dealing with safeguards
- Subsection (d) – Dealing with complaints
- Subsection (e) – Dealing with sanctions
- Subsection (f) – Dealing with mitigation
- Subsection (g) – Dealing with refraining from intimidating or retaliatory acts
- Subsection (h) – Dealing with waiver of rights
- Subsection (i) – Dealing with policies and procedures
- Subsection (j) – Dealing with documentation

7.2 Written Privacy Policy. You must develop, implement, make publicly available, and act in accordance with a written privacy policy describing Your privacy practices with respect to Individually Identifiable Information that is Used or Disclosed pursuant to these ToP. You can satisfy the written privacy policy requirement by including applicable content consistent with the HIPAA Rules in Your existing privacy policy, except as otherwise stated herein with respect to IAS Providers. If You are a Covered Entity, this written privacy policy requirement does not supplant the HIPAA Privacy Rule obligations to post and distribute a Notice of Privacy Practices that meets the requirements of 45 CFR § 164.520. If You are a Covered Entity, then this written privacy policy requirement can be satisfied by Your Notice of Privacy Practices. If You are an IAS Provider, then the written privacy practices requirement must be in the form of a Privacy and Security Notice that meets the requirements of Section 6.2 of these ToP. Notwithstanding Section 11.1, to the extent the Signatory's written privacy policy is "more stringent" than the HIPAA Privacy Rule provisions listed below, the written privacy policy shall govern. "More stringent" shall have the meaning assigned to it in 45 CFR § 160.202 except the written privacy policy shall be substituted for references to State law and the reference to "standards, requirements or implementation specifications adopted under subpart E of part 164 of this subchapter" shall be limited to those listed below.

8. Security.

8.1 Security Controls. You shall implement and maintain appropriate security controls for Individually Identifiable Information that are commensurate with risks to the confidentiality, integrity, and/or availability of the Individually Identifiable Information. If You are a NHE, You shall comply with the HIPAA Security Rule provisions with respect to all Individually Identifiable Information as if such information were Protected Health Information and You were a Covered Entity or Business Associate. You shall comply with any additional security requirements that may be set forth in an SOP applicable to Participants and Subparticipants.

8.2 TEFCA Security Incident Reporting.

8.2.1 Reporting to Upstream QPS. You shall report to Upstream QPS any suspected TEFCA Security Incident, as set forth in the applicable SOP(s). Such report must include sufficient information for Upstream QPS and others affected to understand the nature and likely scope of the TEFCA Security Incident. You shall supplement the information contained in the report as additional relevant information becomes available and cooperate with Upstream QPS and, at the direction of Upstream QPS, with the RCE, and with

other QHINs, Participants, and Subparticipants that are likely impacted by the TEFCA Security Incident.

8.2.2 Reporting to Subparticipants. You shall report any TEFCA Security Incident experienced by or reported to You to Your Subparticipants as required by an applicable SOP.

8.2.3 Compliance with Notification Under Applicable Law. Nothing in this Section 8.3 shall be deemed to modify or replace any breach notification requirements that You may have under the HIPAA Rules, the FTC Rule, or other Applicable Law. To the extent You are already required by Applicable Law to notify Upstream QPS or a Subparticipant of an incident that would also be a TEFCA Security Incident, this section does not require duplicative notification.

8.3 Security Resource Support to Subparticipants. You shall make available to Your Subparticipants (if any): (i) security resources and guidance regarding the protection of TI applicable to the Subparticipants' participation in TEFCA Exchange; and (ii) information and resources that the RCE or Cybersecurity Council makes available to You related to promotion and enhancement of the security of TI under the Framework Agreements.

8.4 TI Outside the United States. You shall only Use TI outside the United States or Disclose TI to any person or entity outside the United States to the extent such Use or Disclosure is permitted or required by Applicable Law and the Use or Disclosure is conducted in conformance with the HIPAA Security Rule, regardless of whether You are a Covered Entity or Business Associate and as set forth in an applicable SOP.

8.5 Encryption. If You are a NHE (but not to the extent that You are a federal agency or any other type of entity exempted from compliance with this Section in an applicable SOP), You must encrypt all Individually Identifiable Information You maintain, both in transit and at rest, regardless of whether such information is TI. Requirements for encryption may be set forth in an SOP.

9. General Obligations.

9.1 Compliance with Applicable Law and the ToP. You shall comply with all Applicable Law and shall implement and act in accordance with any provision required by the ToP, including all applicable SOPs and provisions of the QTF, when engaging in or facilitating TEFCA Exchange. While each SOP identifies the relevant group(s) to which it applies, not every requirement in an SOP or the QTF will necessarily be

applicable to You. It is Your responsibility to determine, in consultation with Upstream QPS, which of the SOPs and QTF provisions are applicable to You.

9.2 Your Responsibility for Your Subparticipants. You shall be responsible for taking reasonable steps to confirm that all of Your Subparticipants (if any) are abiding by the ToP, specifically including all applicable SOPs and QTF provisions. In the event that You become aware of a material non-compliance by one of Your Subparticipants, then You shall promptly notify the Subparticipant in writing. Such notice shall inform the Subparticipant that its failure to correct any such deficiencies within thirty (30) days of receiving notice shall constitute a material breach of the ToP, which may result in early termination of these ToP.

9.3 Your Responsibility for Your Third-Party Technology Vendors. To the extent that You use a third-party technology vendor that will have access to TEFCA Information in connection with Connectivity Services or TEFCA Exchange, You shall include in a written agreement with each such subcontractor or agent a requirement to comply with all applicable provisions of these ToP and a prohibition on engaging in any act or omission that would cause You to violate the terms of these ToP if You had engaged in such act or omission Yourself.

9.4 Fees Charged by QHINs, Participants, or Subparticipants. You may charge fees to an Initiating Node when Responding to Queries through TEFCA Exchange as defined in an applicable SOP. The foregoing shall not prohibit You from charging Your Subparticipants fees for use of Your Connectivity Services.

10. Term, Termination, and Suspension.

10.1 Term. These ToP shall become effective upon agreement of both Parties and shall remain in effect until terminated by either Party. You may terminate these ToP by providing at least thirty (30) days' prior written notice of termination to Upstream QPS. Upstream QPS may terminate these ToP by providing at least ninety (90) days' prior written notice to You. Notwithstanding the foregoing, in the event that Upstream QPS's Framework Agreement is terminated, Your ToP shall be immediately terminated.

10.2 Termination for Cause. Either Party may terminate these ToP for cause if the other Party commits a material breach of a Framework Agreement, and fails to cure its material breach within thirty (30) days of receiving notice specifying the nature of such breach in reasonable detail from the non-breaching Party; provided, however, that if Upstream QPS is diligently working to cure its material breach at the end of this thirty (30) day period, then You must provide Upstream QPS with up to another thirty (30) days to complete its cure.

10.3 Effect of Termination. Upon termination of these ToP, You will no longer be able to engage in TEFCA Exchange facilitated by or through Upstream QPS. To the extent You store TI, such TI may not be distinguishable from other information maintained by You. When the TI is not distinguishable from other information, it is not possible for You to return or destroy TI You maintain upon termination or expiration of these ToP. Upon termination or expiration of these ToP, if You are subject to Section 7 of these ToP, such sections shall continue to apply so long as the information would be ePHI if maintained by a Covered Entity or Business Associate. The protections required under the HIPAA Security Rule shall also continue to apply to all TI that is ePHI, regardless of whether You are a Covered Entity or Business Associate. The provisions set forth in this Section 10.3 are in addition to those survival provisions set forth in Section 11.9.

10.4 Conflict with Other Agreements Between You and Upstream QPS. Notwithstanding anything herein to the contrary, in the event You and Upstream QPS are parties to an agreement that provides additional terms related to TEFCA Exchange and that agreement provides for a shorter notice period for termination, such shorter notice period shall control.

10.5 Rights to Suspend.

10.5.1 RCE's Right to Suspend Your Ability to Engage in TEFCA Exchange. You acknowledge and agree that the RCE has the authority to suspend, or direct the Upstream QPS to suspend, any QPS's ability to engage in TEFCA Exchange if: (i) there is an alleged violation of the respective Framework Agreement or of Applicable Law by the respective party/parties; (ii) there is a Threat Condition; (iii) the RCE determines that the safety or security of any person or the privacy or security of TI and/or Confidential Information is threatened; (iv) such suspension is in the interests of national security as directed by an agency of the United States government; or (v) there is a situation in which the RCE may suffer material harm and suspension is the only reasonable step that the RCE can take to protect itself. You acknowledge that upon receiving direction from the RCE, You will be suspended as soon as practicable provided, however, if the suspension is based on Subsections 10.5.1(i) or 10.5.1(iv) or a Threat Condition that results in a cognizable threat to the security of TEFCA Exchange or the information that the RCE reasonably believes is TI, then You will be suspended within twenty-four (24) hours of the RCE having directed Your QHIN to effectuate the suspension, unless the RCE specifies a longer period of time is permitted.

10.5.2 Upstream QPS's Right to Suspend Your Ability to Engage in TEFCA Exchange. You acknowledge and agree that Upstream QPS has the same authority as the RCE to suspend Your ability to engage in TEFCA Exchange, and Your Subparticipant's (if any) ability to engage in TEFCA Exchange, if any of the circumstances described in Subsections 10.5.1 (i)-(iii) above occur with respect to You or any of Your Subparticipants.

(i) Upstream QPS *may* exercise such right to suspend based on its own determination that any of the circumstances described in Subsections 10.5.1 (i)-(iii) above occurred with respect to You or any of Your Subparticipants.

(ii) Upstream QPS *must* exercise such right to suspend if directed to do so by the RCE or its Upstream QPS based on its determination that suspension is warranted based on any of the circumstances described in Subsections 10.5.1 (i)-(v) above with respect to You or any of Your Subparticipants.

(iii) You acknowledge that if Upstream QPS makes a determination that suspension is warranted or receives direction from its Upstream QPS to suspend Your ability to engage in TEFCA Exchange, You will be suspended as soon as practicable provided, however, if the suspension is based on the circumstances described in Subsections 10.5.1(i) or 10.5.1(iv) or a Threat Condition that results in a cognizable threat to the security of TEFCA Exchange or the information that the RCE reasonably believes is TI, then You will be suspended within twenty-four (24) hours of notice of Upstream QPS's determination or receipt of direction from its Upstream QPS, unless Upstream QPS specifies a longer period of time is permitted.

10.5.3 Upstream QPS Suspension. Notwithstanding the foregoing, in the event that Upstream QPS's ability to engage in TEFCA Exchange is suspended, Your and any of Your Subparticipants' ability to engage in TEFCA Exchange will be immediately suspended.

10.5.4 Suspension Rights Granted to You Related to Your Subparticipants. If You have Subparticipants, You acknowledge and agree that You have the same responsibility and authority to suspend Your Subparticipant's ability to engage in TEFCA Exchange if any of the circumstances described in Subsections 10.5.1 (i)-(iii) above occur with respect to any of Your Subparticipants. If You make a determination to suspend, You are required

to promptly notify Upstream QPS of Your decision and the reason(s) for making the decision. If any of Your Subparticipants notify You of their decision to suspend exchange with their Subparticipant(s), You must notify Upstream QPS of such decision.

(i) You *may* exercise such right to suspend based on Your own determination that any of the circumstances described in Subsections 10.5.1 (i)-(iii) above occurred with respect to any of Your Subparticipants.

(ii) You *must* exercise such right to suspend if directed to do so, by the RCE or Upstream QPS based on the RCE's determination that suspension is warranted based on any of the circumstances described in Subsections 10.5.1 (i)-(v) above with respect to any of Your Subparticipants.

(iii) You must effectuate such suspension of Your Subparticipant as soon as practicable provided, however, if the suspension is based on the circumstances described in Subsections 10.5.1(i) or 10.5.1(iv) or a Threat Condition that results in a cognizable threat to the security of TEFCA Exchange or the information that the RCE reasonably believes is TI, then it must be effectuated within twenty-four (24) hours of the triggering event, unless a longer period of time is permitted. For purposes of this subsection, the triggering event is Your determination to suspend, Your receipt of direction from your Upstream QPS to suspend, or the RCE having directed Your QHIN to effectuate the suspension.

10.5.5 Selective Suspension. You may, in good faith and to the extent permitted by Applicable Law, determine that You must suspend exchanging with a QHIN, Participant, or Subparticipant with which You are otherwise required to exchange in accordance with an SOP because of reasonable and legitimate concerns related to the privacy, security, accuracy, or quality of information that is exchanged. If You make this determination, You are required to promptly notify Upstream QPS of Your decision and the reason(s) for making the decision. If any of Your Subparticipants notify You of their decision to suspend exchange with a QHIN, Participant, or Subparticipant, You must notify Upstream QPS of such decision. You acknowledge that You may be required to engage in a process facilitated by the RCE to resolve whatever issues led to the decision to suspend. Provided that You selectively suspend exchanging with another QHIN, Participant, or Subparticipant in accordance with this section and in accordance with Applicable Law, such selective

suspension shall not be deemed a violation of Section 2.2 of these ToP.

11. Contract Administration.

11.1 Authority to Agree. You warrant and represent that You have the full power and authority to enter into these ToP.

11.2 Assignment. None of these ToP can be transferred by either Party, including whether by assignment, merger, other operation of law, change of control (i.e., sale of substantially all of the assets of the Party) of the Party or otherwise, without the prior written approval of the other Party.

11.3 Severability. If any provision of these ToP shall be adjudged by any court of competent jurisdiction to be unenforceable or invalid, that provision shall be struck from the ToP, and the remaining provisions of these ToP shall remain in full force and effect and enforceable.

11.4 Captions. Captions appearing in these ToP are for convenience only and shall not be deemed to explain, limit, or amplify the provisions of these ToP.

11.5 Independent Parties. Nothing contained in these ToP shall be deemed or construed as creating a joint venture or partnership between Upstream QPS and You.

11.6 Acts of Contractors and Agents. To the extent that the acts or omissions of a Party's agent(s) or contractor(s), or their subcontractor(s), result in that Party's breach of and liability under these ToP, said breach shall be deemed to be a breach by that Party.

11.7 Waiver. The failure of either Party to enforce, at any time, any provision of these ToP shall not be construed to be a waiver of such provision, nor shall it in any way affect the validity of these ToP or any part hereof or the right of such Party thereafter to enforce each and every such provision. No waiver of any breach of these ToP shall be held to constitute a waiver of any other or subsequent breach, nor shall any delay by either Party to exercise any right under these ToP operate as a waiver of any such right.

11.8 Priority. In the event of any conflict or inconsistency between any other agreement that You and Upstream QPS enter into with respect to TEFCA Exchange, Applicable Law, a provision of these ToP, the QTF, an SOP, and/or any implementation plans, guidance documents, or other materials or documentation the RCE makes available to QHINs, Participants, and/or Subparticipants regarding the operations or activities conducted under the Framework Agreements, the following shall be the order of

precedence for these ToP to the extent of such conflict or inconsistency: (1) Applicable Law; (2) these ToP; (3) the QTF; (4) the SOPs; (5) all other attachments, exhibits, and artifacts incorporated herein by reference; (6) other RCE plans, documents, or materials made available regarding activities conducted under the Framework Agreements; and (7) any other agreement that You and Upstream QPS enter into with respect to TEFCA Exchange.

11.9 Survival. The following sections of these ToP shall survive expiration or termination of these ToP as more specifically provided below:

(i) Section 3, Confidentiality and Accountability shall survive for a period of six (6) years following the expiration or termination of these ToP.

(ii) Section 6.4, Survival for IAS Providers, to the extent that You are an IAS Provider, shall survive following the expiration or termination of these ToP for the respective time periods set forth in Section 6.4.

(iii) Section 7, Privacy, to the extent that You are subject to Section 7, said Section shall survive the expiration or termination of these ToP so long as the information maintained by You would be ePHI if maintained by a Covered Entity or Business Associate.

(iv) Section 8.1 Security Controls, and Section 8.5, Encryption, to the extent that You are subject to Sections 8.1 and 8.5, said Section or Sections shall survive the expiration or termination of these ToP for so long as the information maintained by You would be ePHI if maintained by a Covered Entity or Business Associate regardless of whether You are a Covered Entity or Business Associate.

(v) The requirements of Section 8.2, TEFCA Security Incidents Reporting, shall survive for a period of six (6) years following the expiration or termination of these ToP.

Common Agreement Version Control Table

Version 1.0	January 2022
Version 1.1	November 2023
Draft Version 2.0	January 2024
Version 2.0	April 2024

BILLING CODE 4150–45–C

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Final HHS National Environmental Policy Act Compliance Procedures to Incorporate Federal Flood Risk Management Standard Procedures

AGENCY: Assistant Secretary for Administration, Department of Health and Human Services (HHS).

ACTION: Notice; final procedures.

SUMMARY: In accordance with Executive Order 13690 of January 30, 2015—Establishing a Federal Flood Risk Management Standard and Process for Soliciting and Considering Stakeholder Input, HHS is publishing its final floodplain management procedures to include climate science if an action takes place in a floodplain.

DATES: The final procedures are in effect on the May 1, 2024.

FOR FURTHER INFORMATION CONTACT: CAPT Leo Angelo Gumapas, Environmental Engineering Program Chief, at 202–669–6942 or by email at *leoangelo.gumapas@psc.hhs.gov,* for clarification of content.

SUPPLEMENTARY INFORMATION:

Background

E.O. 13690 of January 30, 2015—*Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input*—was issued to improve the nation's resilience to flooding and to better prepare for the impacts of climate change. In amending and building upon E.O. 11988—*Floodplain Management*—which was issued in 1977, E.O. 13690 and the associated Federal Flood Risk Management Standard (FFRMS) reinforce the important tenets and concepts articulated in E.O. 11988, such as avoiding actions in or impacting a floodplain and minimizing potential harm if an action must be located in a floodplain. When avoiding a floodplain is not possible, E.O. 13690 calls for agencies to improve the resilience of communities and federal actions.

On August 15, 2017, E.O. 13807 was issued, which revoked E.O. 13690. Accordingly, the ''Revised Guidelines for Implementing Executive Order 11988, Floodplain Management'' and its supplementary policy were withdrawn. On May 20, 2021, E.O. 14030, reinstated E.O. 13690 and all supplementary policies.

HHS's current floodplain management procedures are published in the General Administration Manual Part 30: Environmental Protection (GAM–30) section *30–40–40 Floodplain Management,* and they are based on E.O. 11988. The GAM–30 was last updated on February 25, 2000, and it is based on outdated laws and regulations. Program Support Center (PSC) | Real Estate, Logistics, Operations (RLO) | Real Property Management Service (RPMS) | Real Property Policy and Strategy (RPPS) drafted HHS FFRMS procedures based on E.O. 13690 to update GAM–30 Section 30–40–40 Floodplain Management.

The Council on Environmental Quality (CEQ) reviewed HHS's FFRMS procedures and provided favorable comments on December 2022.

HHS published its FFRMS procedures on the **Federal Register** for public comment for a thirty-day period from November 6, 2023 to December 6, 2023. HHS FFRMS procedures were viewed 128 times with no comments received over the thirty-day comment period.

Procedure Revisions

Revised General Administration Manual, HHS Part 30, Environmental Protection

Part 30—Environmental Protection

30–40 Natural Asset Review
30–40–40 Floodplain Management

Purpose: Executive Order (E.O.) 13690 on Establishing a Federal Flood Risk Management Standard (FFRMS) and a Process for Further Soliciting and Considering Stakeholder Input (2015), establishes a Federal Flood Risk Management Standard to ensure each Federal agency takes actions to enhance the Nation's resilience to current and future flooding and better prepare the United States for the impacts of climate change, such as sea level rise and extreme weather events. E.O. 13690 and the associated FFRMS amended and built upon E.O. 11988 on Floodplain Management (1977), which requires agencies to take action to reduce the risk of flood loss, to minimize the impacts of floods on human safety, health, and welfare, and to restore and preserve the natural and beneficial values served by floodplains. E.O. 13690 modernizes E.O. 11988 by increasing the vertical flood elevation and expanding corresponding horizontal extent of the floodplain to consider changing flood hazards due to climate change and other processes, and by encouraging climate-conscious resilient design if there are no practicable locations outside the expanded floodplain.

Definitions

Base Flood. ''Base Flood'' means that flood which has a one percent of greater chance of occurrence in any given year.

Base Flood Elevation (BFE). ''BFE'' means the computed elevation to which the floodwater is anticipated to rise during the base flood.

Base Floodplain. ''Floodplain'' means the area subject to flooding by the base flood, the flood that has a one percent or greater chance of flooding in any given year.

Climate-Informed Science Approach (CISA). ''CISA'' means the flood hazard area (vertical flood elevation and corresponding horizontal extent) that results from using the best-available, actionable hydrologic and hydraulic data and methods that integrate current and future changes in flooding based on climate science.

Critical Action. ''Critical Action'' means any activity for which even a slight chance of flooding is too great, *e.g.,* elderly housing proposals.

Federal Flood Risk Management Standard (FFRMS). ''FFRMS'' means the floodplain determined using one of the three approaches: CISA, 0.2PFA, and FVA.

Freeboard Value Approach (FVA). ''FVA'' means the flood hazard area that results from adding an additional 2 feet to the BFE and expanding to the corresponding horizontal extent for non-critical actions, and by adding an additional 3 feet to the BFE and expanding to the corresponding horizontal extent for critical actions.

Horizontal Extent. ''Horizontal Extent'' means the horizontal land area flooded by the vertical extent (extra flood elevation beyond the BFE).

Nature-Based Approach. HHS OPDIVs/STAFFDIVs, where possible, must use natural systems, ecosystem processes, and natural features and nature-based approaches in development of alternatives for proposed action.

Vertical Extent. ''Vertical Extent'' means the additional flood height above the BFE. 0.2-Percent-Annual-Chance (500-year) Flood Approach (0.2PFA). ''0.2PFA'' means the area subject to flooding by the 0.2-percent annual chance flood.

Responsibilities: Each OPDIV/STAFFDIV has the responsibility under E.O. 13690 to act on Federally Funded Projects to reduce the risk of flood loss, to minimize the impact of floods on human safety, health, and welfare, and to restore and preserve the natural and beneficial values served by floodplains in carrying out its responsibilities for:

Acquiring, managing, and disposing of Federal lands and facilities

Providing Federally undertaken, financed, or assisted construction, substantial improvements, and substantial damages to structures and facilities

Conducting Federal activities and programs affected land use, including but not limited to, water and related land resources planning, regulating, and licensing activities.

Each OPDIV/STAFFDIV shall determine whether the site in which their action would occur could potentially be inundated by floodwaters using FFRMS and shall use this information to make an informed decision to either avoid siting in the determined flood hazard area or design the action to be more resilient to the associated flood hazard. Each OPDIV/STAFFDIV shall evaluate the potential effects of any actions it may take in a FFRMS floodplain in accordance with the floodplain assessment procedures in this section. It must also ensure that its planning programs and budget requests reflect consideration of flood hazards and floodplain management.

Integration with NEPA. OPDIVs/STAFFDIVs are to evaluate the potential effects of a proposed action in a floodplain in accordance with the procedures for National Environmental Policy Act (NEPA) review in HHS General Administration Manual Part *30–50.* If an environmental assessment (EA)

or environmental impact statement (EIS) is required to be prepared for the proposed action, a floodplain assessment as described Paragraph E of this section, shall be included in the EA or EIS.

Floodplain Assessment (E.O. 13690)

Determine if Proposed Action is in a FFRMS floodplain: First, determine if Federally Funded Project is a critical action, which impacts floodplain determinations for the FVA approach. Second, evaluate the vertical extent and corresponding horizontal extent to establish the FFRMS floodplain using one of the three approaches in the following is the order of preference pending data availability:

CISA

0.2PFA

FVA

Involve Public in Decision-making Process: Notify the public such as a notice in a local newspaper or posting in an accessible public space for the area where the action is under consideration. Public notifications and all supporting communications and activities should be accessible to all (*e.g.,* plain language, culturally responsive, and accommodating), including but not limited to those with disabilities or limited English proficiency. All public notifications are required to follow all guidance and regulation regarding 508 compliance, the use of plain language, and limited English proficiency. If completing an EA or EIS, then include floodplain notice in Description of Proposed Action and Alternatives or Notice of Intent, respectively.

Identify and Evaluate Practicable Alternatives to Locating in FFRMS Floodplain: OPDIVs/STAFFDIVs shall use input from public comments on practicable alternatives, including, if possible, nature-based solutions.

Identify Adverse and Beneficial Impacts: Identify adverse and beneficial impacts, including stimulating floodplain development, which may result from the project. Analyze the following factors: (1) Natural environment (water resources, hydrology, topography, habitat); (2) Social concerns (environmental justice, visual quality/aesthetics, historic and cultural values, land use patterns), (3) Economic Aspects (costs of construction, transportation, relocation, natural features, and ecosystem processes), and (4) Legal considerations (deeds, leases).

Mitigate Adverse Impacts: Minimize impacts identified and restore and preserve the beneficial values served by floodplains. The analysis shall discuss the following:

Alternatives to the proposed action that may avoid adverse effects and incompatible development in the floodplain, including the alternatives of no action or location at an alternate site.

Proposed buildings and structures located in FFRMS floodplain shall be programmed and designed to latest version of the American Society of Civil Engineers ''*Flood Resistant Design and Construction*'' (ASCE/SEI 24–14) provisions to mitigate the adverse effects of the proposed action.

Senior Real Property Official Approval: No action shall take place involving HHS Federal Real Property in an FFRMS floodplain without a finding by the Senior Real Property Officer that the only practicable alternative consistent with the law and with the policy set forth in E.O. 13690 requires siting in a FFRMS floodplain. The action involving HHS Federal Real Property proposed for Senior Real Property Official approval shall be designed to minimize potential harm to or within the FFRMS floodplain. The Senior Real Property Official shall approve proposed actions requiring an EA or EIS on projects involving HHS Federal Real Property affecting FFRMS floodplains.

Re-Evaluate Alternatives: Use any new information obtained from Public Notice to determine if the proposed project is still applicable. Reissue public notice with Finding of No Significant Impact or Record of Decision if EA or EIS is drafted, respectively.

Announce and Explain Decision to the Public (Notice): Notify the public of the draft decision by publishing such as a notice in a local newspaper or posting in an accessible public space, dating the notice and the posting at removal.

For programs subject to E.O. 12372, the public notice shall be sent to the appropriate state and local reviewing agencies the geographic areas affected. A public review period of 30 days after the issuance of the public notice shall be allotted before any action is taken.

Implement the Proposed Federally Funded Project: Implement the Federally Funded Project with appropriate mitigation measures. Design and construction contracts shall include any mitigation measures are identified through the process. Ensure through independent 3rd party construction quality assurance that mitigation measures are fully implemented.

Licenses, permits, loans, or grants: Each OPDIV/STAFFDIV shall take FFRMS into account when formulating or evaluating any water and land use plans and shall require land and water resources use appropriate risk management measures to mitigate the degree of hazard involved. Adequate provision shall be made for the evaluation and consideration of flood hazards determined by FFRMS for the licenses, permits, loan, or grant-in-aid programs that an OPDIV/STAFFDIV administers. OPDIVs/STAFFDIVs shall also encourage and provide appropriate guidance to applicants to evaluate the effects of their proposal in FFRMS floodplains prior to submitting applications for Federal licenses, permits, loans, or grants.

Authorization or Appropriation Requests: OPDIVs/STAFFDIVs shall indicate in any requests for new authorizations or appropriations whether the proposed action is in accord with Executive Order 13690 if the proposed action will be in a floodplain.

Guidance: The following resources provides guidance for Implementation of FFRMS.

FFRMS Floodplain Determination Job Aid, Version 1.0, August 2023.

Reducing Flood Losses through the International Codes: Coordinating Building Codes and Floodplain Management Regulations, 5th Edition, September 2019.

Protecting Building Utility Systems from Flood Damage: Principles and Practices for the Design and Construction of Flood Resistant Building Utility Systems, Federal Emergency Management Agency (FEMA) P–348, Edition 2, February 2017.

Cheryl R. Campbell,

Assistant Secretary for Administration.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Diabetes and Digestive and Kidney Diseases; Notice of Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which

would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Diabetes and Digestive and Kidney Diseases Initial Review Group; Digestive Diseases and Nutrition C Study Section.

Date: June 6–7, 2024.

Time: 9:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: InterContinental Chicago Hotel, 505 North Michigan Avenue, Chicago, IL 60611 (In-person and Virtual).

Contact Person: Peter J. Kozel, Ph.D., Scientific Review Officer, Review Branch, DEA, NIDDK, National Institutes of Health, Room 7009, 6707 Democracy Boulevard, Bethesda, MD 20892–5452, (301) 594–4721, *kozelp@mail.nih.gov*.

(Catalogue of Federal Domestic Assistance Program Nos. 93.847, Diabetes, Endocrinology and Metabolic Research; 93.848, Digestive Diseases and Nutrition Research; 93.849, Kidney Diseases, Urology and Hematology Research, National Institutes of Health, HHS)

Dated: April 25, 2024.

Miguelina Perez,

Program Analyst, Office of Federal Advisory Committee Policy.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Synergy in Science: Innovations in Autoimmune Disease Research and Care

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: This symposium is sponsored by the National Institutes of Health (NIH), Office of Research on Women's Health (ORWH), and the title of this year's symposium is ''Synergy in Science: Innovations in Autoimmune Disease Research and Care.'' The symposium will discuss the convergence of cutting-edge insights and collaborative efforts in the realm of autoimmune diseases.

DATES: The meeting will be held on May 15, 2024, from 1 to 5 p.m.

ADDRESSES: The meeting will be virtual. Registration is available at *https://nih.zoomgov.com/webinar/register/WN_jYi3sBFvToeHZJcfytw6GA#/registration.* The meeting is viewable on NIH Videocast at *https://videocast.nih.gov/watch=54417;* no registration is required.

FOR FURTHER INFORMATION CONTACT: For information concerning this meeting, see the ORWH website, *https://orwh.od.nih.gov/about/newsroom/events/8th-annual-vivian-w-pinn-symposium,* or contact Dr. Vicki Shanmugam, Director, NIH Office of Autoimmune Disease Research in the Office of Research on Women's Health, 6707 Democracy Boulevard, Suite 400, Bethesda, MD 20817, telephone: 301–402–4179; email: *vicki.shanmugam@nih.gov*.

SUPPLEMENTARY INFORMATION: This Notice is in accordance with 42 U.S.C. 287d, of the Public Health Service Act, as amended. The 8th Annual Vivian W. Pinn Symposium honors the first full-time Director of ORWH, Dr. Vivian Pinn, and is held during National Women's Health Week. This event serves as a critical forum for experts across sectors to communicate and collaborate for the advancement of women's health.

Providing the keynote address, ''Understanding the Immunome: Past, Present, and Future,'' is Jane Buckner, M.D., President of Benaroya Research Institute.

The objectives of the symposium are:

- *Drivers of Autoimmunity:* Understand the state of the science on sex-differences in autoimmune diseases, and what the future may hold for interventions.
- *NIH Research Frontiers:* Explore innovations arising from NIH's intramural research programs, driving progress in autoimmune care through rigorous scientific inquiry and technological breakthroughs.
- *Advocacy Accelerating Treatments:* Examine the synergy between patient advocacy and scientific progress, highlighting how collaborative efforts expedite the development of novel treatments for rare autoimmune diseases.
- *Research at the Bedside:* Unravel the complexities of autoimmune diseases across the lifespan through patient-centric bedside research insights.

Interested individuals can register at: https://nih.zoomgov.com/webinar/register/WN_jYi3sBFvToeHZJcfytw6GA#/registration.

More information about the speakers and agenda can be found at *https://orwh.od.nih.gov/about/newsroom/events/8th-annual-vivian-w-pinn-symposium.*

This event is free.

Dated: April 24, 2024.

Lawrence A. Tabak,

Principal Deputy Director, National Institutes of Health.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Current List of HHS-Certified Laboratories and Instrumented Initial Testing Facilities Which Meet Minimum Standards To Engage in Urine and Oral Fluid Drug Testing for Federal Agencies

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services (HHS) notifies Federal agencies of the laboratories and Instrumented Initial Testing Facilities (IITFs) currently certified to meet the standards of the Mandatory Guidelines for Federal Workplace Drug Testing Programs (Mandatory Guidelines) using Urine and the laboratories currently certified to meet the standards of the Mandatory Guidelines using Oral Fluid.

FOR FURTHER INFORMATION CONTACT: Anastasia Flanagan, Division of Workplace Programs, SAMHSA/CSAP, 5600 Fishers Lane, Room 16N06B, Rockville, Maryland 20857; 240–276–2600 (voice); *Anastasia.Flanagan@samhsa.hhs.gov* (email).

SUPPLEMENTARY INFORMATION: The Department of Health and Human Services (HHS) publishes a notice listing all HHS-certified laboratories and Instrumented Initial Testing Facilities (IITFs) in the **Federal Register** during the first week of each month, in accordance with Section 9.19 of the Mandatory Guidelines for Federal Workplace Drug Testing Programs (Mandatory Guidelines) using Urine and Section 9.17 of the Mandatory Guidelines using Oral Fluid. If any laboratory or IITF certification is suspended or revoked, the laboratory or IITF will be omitted from subsequent lists until such time as it is restored to full certification under the Mandatory Guidelines.

If any laboratory or IITF has withdrawn from the HHS National Laboratory Certification Program (NLCP) during the past month, it will be listed at the end and will be omitted from the monthly listing thereafter.

This notice is also available on the internet at *https://www.samhsa.gov/workplace/drug-testing-resources/certified-lab-list.*

HHS separately notifies Federal agencies of the laboratories and IITFs currently certified to meet the standards of the Mandatory Guidelines using Urine and of the laboratories currently

certified to meet the standards of the Mandatory Guidelines using Oral Fluid.

The Mandatory Guidelines using Urine were first published in the **Federal Register** on April 11, 1988 (53 FR 11970), and subsequently revised in the **Federal Register** on June 9, 1994 (59 FR 29908); September 30, 1997 (62 FR 51118); April 13, 2004 (69 FR 19644); November 25, 2008 (73 FR 71858); December 10, 2008 (73 FR 75122); April 30, 2010 (75 FR 22809); January 23, 2017 (82 FR 7920); and on October 12, 2023 (88 FR 70768).

The Mandatory Guidelines using Oral Fluid were first published in the **Federal Register** on October 25, 2019 (84 FR 57554) with an effective date of January 1, 2020, and subsequently revised in the **Federal Register** on October 12, 2023 (88 FR 70814).

The Mandatory Guidelines were initially developed in accordance with Executive Order 12564 and section 503 of Public Law 100–71 and allowed urine drug testing only. The Mandatory Guidelines using Urine have since been revised, and new Mandatory Guidelines allowing for oral fluid drug testing have been published. The Mandatory Guidelines require strict standards that laboratories and IITFs must meet in order to conduct drug and specimen validity tests on specimens for Federal agencies. HHS does not allow IITFs to conduct oral fluid testing.

To become certified, an applicant laboratory or IITF must undergo three rounds of performance testing plus an on-site inspection. To maintain that certification, a laboratory or IITF must participate in a quarterly performance testing program plus undergo periodic, on-site inspections.

Laboratories and IITFs in the applicant stage of certification are not to be considered as meeting the minimum requirements described in the HHS Mandatory Guidelines using Urine and/or Oral Fluid. An HHS-certified laboratory or IITF must have its letter of certification from HHS/SAMHSA (formerly: HHS/NIDA), which attests that the test facility has met minimum standards. HHS does not allow IITFs to conduct oral fluid testing.

HHS-Certified Laboratories Approved to Conduct Oral Fluid Drug Testing

In accordance with the Mandatory Guidelines using Oral Fluid effective October 10, 2023 (88 FR 70814), the following HHS-certified laboratories meet the minimum standards to conduct drug and specimen validity tests on oral fluid specimens:

At this time, there are no laboratories certified to conduct drug and specimen validity tests on oral fluid specimens.

HHS-Certified Instrumented Initial Testing Facilities Approved to Conduct Urine Drug Testing

In accordance with the Mandatory Guidelines using Urine effective February 1, 2024 (88 FR 70768), the following HHS-certified IITFs meet the minimum standards to conduct drug and specimen validity tests on urine specimens:

Dynacare*, 6628 50th Street NW, Edmonton, AB Canada T6B 2N7, 780–784–1190 (Formerly: Gamma-Dynacare Medical Laboratories)

HHS-Certified Laboratories Approved to Conduct Urine Drug Testing

In accordance with the Mandatory Guidelines using Urine effective February 1, 2024 (88 FR 70768), the following HHS-certified laboratories meet the minimum standards to conduct drug and specimen validity tests on urine specimens:

Alere Toxicology Services, 1111 Newton St., Gretna, LA 70053, 504–361–8989/800–433–3823 (Formerly: Kroll Laboratory Specialists, Inc., Laboratory Specialists, Inc.)

Alere Toxicology Services, 450 Southlake Blvd., Richmond, VA 23236, 804–378–9130 (Formerly: Kroll Laboratory Specialists, Inc., Scientific Testing Laboratories, Inc.; Kroll Scientific Testing Laboratories, Inc.)

Clinical Reference Laboratory, Inc., 8433 Quivira Road, Lenexa, KS 66215–2802, 800–445–6917

Desert Tox, LLC, 5425 E Bell Rd, Suite 125, Scottsdale, AZ 85254, 602–457–5411/623–748–5045

DrugScan, Inc., 200 Precision Road, Suite 200, Horsham, PA 19044, 800–235–4890

Dynacare*, 245 Pall Mall Street, London, ONT, Canada N6A 1P4, 519–679–1630 (Formerly: Gamma-Dynacare Medical Laboratories)

ElSohly Laboratories, Inc., 5 Industrial Park Drive, Oxford, MS 38655, 662–236–2609

LabOne, Inc. d/b/a Quest Diagnostics, 10101 Renner Blvd., Lenexa, KS 66219, 913–888–3927/800–873–8845 (Formerly: Quest Diagnostics Incorporated; LabOne, Inc.; Center for Laboratory Services, a Division of LabOne, Inc.)

Laboratory Corporation of America, 1225 NE 2nd Ave., Portland, OR 97232, 503–413–5295/800–950–5295 (Formerly: Legacy Laboratory Services Toxicology MetroLab)

Laboratory Corporation of America Holdings, 7207 N Gessner Road, Houston, TX 77040, 713–856–8288/800–800–2387

* The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories continued under

DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. HHS, with the HHS' NLCP contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, HHS will recommend that DOT certify the laboratory as meeting the minimum standards of the current Mandatory Guidelines published in the **Federal Register**. After receiving DOT certification, the laboratory will be included in the monthly list of HHS-certified laboratories and participate in the NLCP certification maintenance program. DOT established this process in July 1996 (61 FR 37015) to allow foreign laboratories to participate in the DOT drug testing program.

Anastasia D. Flanagan,

Public Health Advisor, Division of Workplace Programs.

Fish and Wildlife Service

[FWS–R4–ES–2024–N026; FXES11140400000–245–FF04E00000]

Endangered Species; Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received applications for permits to conduct activities intended to enhance the propagation or survival of endangered species under the Endangered Species Act. We invite the public and local, State, Tribal, and Federal agencies to comment on these applications. Before issuing any of the requested permits, we will take into consideration any information that we receive during the public comment period.

DATES: We must receive written data or comments on the applications by May 31, 2024.

ADDRESSES: *Reviewing Documents:* Submit requests for copies of applications and other information submitted with the applications to Karen Marlowe (see **FOR FURTHER INFORMATION CONTACT**). All requests and comments should specify the applicant's name and application number (*e.g.,* Mary Smith, ESPER0001234).

Submitting Comments: If you wish to comment, you may submit comments by one of the following methods:

- *Email (preferred method): permitsR4ES@fws.gov.* Please include your name and return address in your email message. If you do not receive a confirmation from the U.S. Fish and Wildlife Service that we have received your email message, contact us directly at the telephone number listed in **FOR FURTHER INFORMATION CONTACT.**
- *U.S. mail:* U.S. Fish and Wildlife Service Regional Office, Ecological Services, 1875 Century Boulevard, Atlanta, GA 30345 (Attn: Karen Marlowe, Permit Coordinator).

FOR FURTHER INFORMATION CONTACT: Karen Marlowe, Permit Coordinator, via telephone at 404–679–7097 or via email at *karen_marlowe@fws.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, invite review and comment from the public and local, State, Tribal, and Federal agencies on applications we have received for permits to conduct certain activities with endangered and threatened species under section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and our regulations in the Code of Federal Regulations (CFR) at 50 CFR part 17. Documents and other information submitted with the applications are available for review, subject to the requirements of the Privacy Act of 1974, as amended (5 U.S.C. 552a), and the Freedom of Information Act (5 U.S.C. 552).

Background

With some exceptions, the ESA prohibits take of listed species unless a Federal permit is issued that authorizes such take. The definition of ''take'' in the ESA includes hunting, shooting, harming, wounding, or killing, and also such activities as pursuing, harassing, trapping, capturing, or collecting.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to take endangered or threatened species while engaging in activities that are conducted for scientific purposes that promote recovery of species or for enhancement of propagation or survival of species. These activities often include the capture and collection of species, which would result in prohibited take if a permit were not issued. Our regulations implementing section 10(a)(1)(A) of the ESA for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

The ESA requires that we invite public comment before issuing these permits. Accordingly, we invite local, State, Tribal, and Federal agencies, and the public to submit written data, views, or arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies. Proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild.

Permit application No.	Applicant	Species	Location	Activity	Type of take	Permit action
ES117405–5	Tennessee Valley Authority; Knoxville, TN.	Tricolored bat (*Perimyotis subflavus*)	Alabama, Arkansas, Georgia, Kentucky, Mississippi, North Carolina, Tennessee, and Virginia.	Presence/probable absence surveys.	Enter hibernacula or maternity roost caves, capture with mist nets or harp traps, handle, identify, collect hair samples, band, radio tag, light tag, wing punch, and release.	Renewal and amendment

Public Availability of Comments

Written comments we receive become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Next Steps

After the comment period closes, we will make decisions regarding permit issuance. If we issue permits to any of the applicants listed above in this notice, we will publish a subsequent notice in the **Federal Register**. You may locate the notice announcing the permit issuance by searching *https://www.regulations.gov* for the application number listed above in this document. Type in your search exactly as the application number appears above, with spaces and hyphens as necessary. For example, to find information about the potential issuance of Permit No. PER 1234567–0, you would go to *https://www.regulations.gov* and put ''PER 1234567–0'' in the Search field.

Authority

We publish this notice under section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Sean Blomquist,

Acting Deputy Assistant Regional Director, Ecological Services, Southeast Region.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R3–ES–2023–0248; FXES11140300000–245–FF03E00000]

Receipt of Incidental Take Permit Application and Proposed Habitat Conservation Plan for the Sweet Acres Wind Project, White County, IN; Categorical Exclusion

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of documents; request for comment and information.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received an application from Indiana Crossroads Wind Farm II LLC (applicant), for an incidental take permit (ITP) under the Endangered Species Act, for its Sweet Acres Wind Project (project). If approved, the ITP would be for a 6-year period and would authorize the incidental take of the federally endangered Indiana bat, the federally endangered northern long-eared bat, and the tricolored bat and little brown bat, both of which are proposed for listing. The applicant has prepared a habitat conservation plan in support of the application. We request public comment on the application, which includes the applicant's proposed habitat conservation plan (HCP), and on the Service's preliminary determination that the proposed permitting action may be eligible for a categorical exclusion pursuant to the Council on Environmental Quality's National Environmental Policy Act (NEPA) regulations, the Department of the Interior's (DOI) NEPA regulations, and the DOI Departmental Manual. To make this preliminary determination, we prepared a draft environmental action

statement and low-effect screening form, both of which are also available for public review. We invite comment from the public and local, State, Tribal, and Federal agencies.

DATES: We must receive your written comments on or before May 31, 2024.

ADDRESSES:

Obtaining Documents: The documents this notice announces, as well as any comments and other materials that we receive, will be available for public inspection online in Docket No . FWS–R3–ES–2023–0248 at *https://www.regulations.gov.*

Submitting Comments: If you wish to submit comments on any of the documents, you may do so in writing by one of the following methods:

- *Online: https://www.regulations.gov.* Follow the instructions for submitting comments on Docket No. FWS–R3–ES–2023–0248.
- *U.S. mail:* Public Comments Processing, Attn: Docket No. FWS–R3–ES–2023–0248; U.S. Fish and Wildlife Service; 5275 Leesburg Pike, MS: PRB/3W; Falls Church, VA 22041–3803.

FOR FURTHER INFORMATION CONTACT: Susan Cooper, Field Supervisor, Indiana Ecological Services Field Office, by email at *susan_cooper@fws.gov* or by telephone at 812–334–4261, extension 214; or Andrew Horton, Regional HCP Coordinator, by email at *andrew_horton@fws.gov* or by telephone at 612–713–5337. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), have received an application from Indiana Crossroads II Wind Farm LLC (applicant) for a 6-year incidental take permit (ITP) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applicant requests the ITP to take the Indiana bat (*Myotis sodalis*) and northern long-eared bat (*Myotis septentrionalis*), both federally listed as endangered, and the proposed as endangered tricolored bat (*Perimyotis subflavus*) and little brown bat (*Myotis lucifugus*), being considered for listing. Take would be incidental to the operation of 42 wind turbines, with a total generating capacity of 201.6 megawatts (MW), at the Sweet Acres Wind Project in White County, Indiana. While the ITP would be for 6 years, the operational life of most new wind energy facilities is 30 years; therefore, intensive monitoring conducted during the 6-year permit term would inform the need for future avoidance or a future new or revised long-term ITP for the remaining life of the project that would comply with a new NEPA analysis and habitat conservation plan (HCP). The applicant has prepared an HCP that describes the actions and measures that the applicant would implement to avoid, minimize, and mitigate incidental take of the covered species for the first 6 years.

We request public comment on the application, which includes the applicant's proposed HCP, and on the Service's preliminary determination that this HCP qualifies as ''low effect,'' and may qualify for a categorical exclusion pursuant to the Council on Environmental Quality's National Environmental Policy Act (NEPA) regulations (40 CFR 1501.4), the Department of the Interior's (DOI) NEPA regulations (43 CFR 46), and the DOI's Departmental Manual (516 DM 8.5(C)(2)). To make this preliminary determination, we prepared a draft environmental action statement and low-effect screening form, both of which are also available for public review.

Background

Section 9 of the ESA and its implementing regulations prohibit the ''take'' of animal species listed as endangered or threatened. Take is defined under the ESA as to ''harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect [listed animal species], or to attempt to engage in any such conduct'' (16 U.S.C. 1532). However, under section 10(a) of the ESA, we may issue permits to authorize incidental take of listed species. ''Incidental take'' is defined by the ESA as take that is incidental to, and not the purpose of, carrying out an otherwise lawful activity (16 U.S.C. 1539). Regulations governing incidental take permits for endangered and threatened species, respectively, are found in the Code of Federal Regulations (CFR) at 50 CFR 17.22 and 50 CFR 17.32.

Applicant's Proposed Project

The applicant requests a 6-year ITP to take the federally endangered Indiana bat (*Myotis sodalis*), federally endangered northern long-eared bat (*Myotis septentrionalis*), proposed endangered tricolored bat (*Perimyotis subflavus*) and under discretionary review, the little brown bat (*Myotis lucifugus*). The applicant determined that take is reasonably certain to occur incidental to operation of 42 previously constructed wind turbines in White County, Indiana, covering approximately 11,646 hectares (28,778 acres) of private land. The proposed conservation strategy in the applicant's proposed HCP is designed to avoid, minimize, and mitigate the impacts of the covered activity on the covered species. The biological goals and objectives are to minimize potential take of covered bat species through on-site minimization measures and to provide habitat conservation measures to offset any impacts from project operations. The HCP provides on-site avoidance and minimization measures, which include turbine operational adjustments. The authorized level of take from the project is 18 Indiana bats, 2 northern long-eared bats, 18 tricolored bats, and 18 little brown bats bat over the 6-year permit duration. To offset the impacts of the taking of the species, the applicant will implement one or more of the following mitigation options:

- Purchase credits from an approved conservation bank;
- Contribute to an in-lieu fee mitigation fund;
- Implement a permittee-responsible mitigation project; or
- Contribute to a white-nose syndrome treatment fund.

National Environmental Policy Act

The issuance of an ITP is a Federal action that triggers the need for compliance with NEPA. The Service has made a preliminary determination that the applicant's proposed project, and the proposed mitigation measures, would individually and cumulatively have a minor effect on the covered species and the human environment. Therefore, we have preliminarily determined that the proposed ESA section 10(a)(1)(B) permit would be a low-effect ITP that individually or cumulatively would have a minor effect on the species and may qualify for application of a categorical exclusion pursuant to the Council on Environmental Quality's NEPA regulations, DOI's NEPA regulations, and the DOI Departmental Manual. A low-effect ITP is one that would result in (1) minor or nonsignificant effects on species covered in the HCP; (2) nonsignificant effects on the human environment; and (3) impacts that, when added together with the impacts of other past, present, and reasonably foreseeable actions, would not result in significant cumulative effects to the human environment.

Next Steps

The Service will evaluate the application and the comments received to determine whether to issue the

requested ITP. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the preceding and other matters, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue the requested ITP to the applicant.

Request for Public Comments

The Service invites comments and suggestions from all interested parties on the proposed HCP and screening form during a 30-day public comment period (see **DATES**). In particular, information and comments regarding the following topics are requested:

1. Whether the adaptive management, monitoring, and mitigation provisions in the proposed HCP are sufficient;

2. The requested 6-year ITP term;

3. Any threats to the covered bat species that may influence their populations over the life of the ITP that are not addressed in the proposed HCP or screening form;

4. Any new information on white-nose syndrome effects on covered bat species;

5. Whether or not the significance of the impact on various aspects of the human environment has been adequately analyzed; and

6. Any other information pertinent to evaluating the effects of the proposed action on the human environment.

Availability of Public Comments

You may submit comments by one of the methods shown under **ADDRESSES**. We will post on *https://regulations.gov* all public comments and information received electronically or via hardcopy. All comments received, including names and addresses, will become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Authority

We provide this notice under section 10(c) of the ESA (16 U.S.C. 1539) and its implementing regulations (50 CFR 17.22) and NEPA (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1500–1508; 43 CFR part 46).

Karen Herrington,

Acting Assistant Regional Director, Ecological Services.

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX.24.DJ73.V3410.00; OMB Control Number 1028–NEW]

Vulnerability to Water Insecurity, Hazards Planning and Response

AGENCY: U.S. Geological Survey, Department of Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the U.S. Geological Survey (USGS) is proposing a new information collection.

DATES: Interested persons are invited to submit comments on or before May 31, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Send your comments on this information collection request (ICR) by mail to U.S. Geological Survey, Information Collections Officer, 12201 Sunrise Valley Drive, MS 159, Reston, VA 20192; or by email to *gs-info_collections@usgs.gov.* Please reference OMB Control Number 1028–NEW—Water Insecurity in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this Information Collection Request (ICR), contact Jennifer Rapp by email at *jrapp@usgs.gov,* or by telephone at 804–261–2635. You may also view the ICR at *http://www.reginfo.gov/public/do/PRAMain.* Individuals who are hearing or speech impaired may call the Federal Relay Service at 1–800–877–8339 for TTY assistance.

SUPPLEMENTARY INFORMATION: In accordance with the PRA (44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we provide the general public and other federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on September 2, 2022 (87 FR 54240). No comments were received.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other federal agencies on the proposed ICR that is described below. We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: The United States is facing growing challenges related to the availability and quality of water due to shifting demographics, aging water delivery infrastructure, the impacts of climate change, and increasing hazards risk, like floods and drought. Working with incomplete knowledge, managers must consider the needs of various

demographic groups and economic sectors when making management decisions as well as when responding to emergencies. To improve delivery of effective science to support decision-making, the USGS must adapt to meet the evolving needs of stakeholders in the water hazard space. We will collect information regarding the decision-making process, data, and data format needs to support daily, long-term, and emergency management decision-making. Information will also be sought on gaps in data delivery and coverage. A lack of decision-support data within water institutions can lead to poor decision-making and outcomes that produce conflict between water use sectors, states, or communities and ultimately may led to crisis. This information will support the delivery of appropriate data, in appropriate formats, at the right time for decision-making and emergency management. The information will guide USGS support of water resource institutions, enhancing resilience in the face of the many water-resources challenges the Nation currently faces.

Title of Collection: Vulnerability to Water Insecurity, Hazards Planning and Response.

OMB Control Number: 1028–NEW.

Form Number: None.

Type of Review: New.

Respondents/Affected Public: state, Tribal nation, and local water resource managers and water resource stakeholders; water hazard responders; and members of the public that engage in use of water data as part of their job (*i.e.,* academics or non-governmental organizations).

Total Estimated Number of Annual Respondents: 750.

Total Estimated Number of Annual Responses: 750.

Estimated Completion Time per Response: 60 minutes.

Total Estimated Number of Annual Burden Hours: 750.

Respondent's Obligation: Voluntary.

Frequency of Collection: Once per year.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor, nor is a person is required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Joseph Nielsen,

Director, Integrated Information Dissemination Division, Water Resources Mission Area.

Notice of Inventory Completion: University of California, Riverside, Riverside, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of California, Riverside has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 31, 2024.

ADDRESSES: Megan Murphy, University of California, Riverside, 900 University Avenue, Riverside, CA 92517–5900, telephone (951) 827–6349, email *megan.murphy@ucr.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of California, Riverside, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. The two associated funerary objects are charcoal samples. From December 1984 through January 1985 the University of California, Riverside Archaeological Research Unit (UCR–ARU) investigated archaeological site CA–RIV–1806 (Hi Card Ranch) as part of an environmental impact assessment related to a housing development near Wildomar. Daniel McCarthy, staff archaeologist for the UCR–ARU published a report on the excavation in 1986 entitled ''Excavations at Hi Card Ranch (CA–RIV–1806), Santa Rosa Plateau, Near Wildomar, Riverside County, California''. A total of 26 units, including four test units were excavated. Items removed from the site included cremated human remains and charcoal, as well as faunal bone, a bead made from faunal bone, seeds, stone tools and flakes, ground stones, modified disc-shaped and donut-shaped stones, and projectile points. The human bone removed from the site was not identified as human until a morphological laboratory analysis following excavation. Five small human bone fragments were all uncovered in unit 6, which was located on the northwestern edge of the excavation in what archaeologists believed was a single cremation. The associated archaeological collection was temporarily housed in the University of California Riverside Archaeological Curation Unit under Accession #101. The cremated human bone fragments and charcoal listed in this inventory were sent to the UCR Radiocarbon Laboratory under the direction of Dr. Taylor to be dated and remained in the UCR collection after testing. The remainder of the collection was returned to the landowner, Mr. Keith Card, in October of 1989. UCR NAGPRA Program Staff contacted the family and colleagues of the late Keith Card, but were unable to locate the other artifacts removed from the site.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

The University of California, Riverside has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The two objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in

this notice and the Pechanga Band of Indians (*previously* listed as Pechanga Band of Luiseno Mission Indians of the Pechanga Reservation, California).

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the University of California, Riverside must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The University of California, Riverside is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 23, 2024.

Melanie O'Brien,

Manager, National NAGPRA Program.

Notice of Inventory Completion: University of Toledo, Toledo, OH

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Toledo has completed an inventory of human remains and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains in this notice may occur on or after May 31, 2024.

ADDRESSES: Thomas Zych, The University of Toledo, 2801 W Bancroft Street, MS 956, Toledo, OH 43606, telephone (419) 530–4395, email *thomas.zych@UToledo.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of Toledo, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. On an unknown date, the individual was found and removed from a Morris Hill in Bowling Green, Wood County, Ohio by Joseph Unkart and later donated to the University of Toledo. No associated funerary objects are present.

Based on the information available, human remains representing, at least, 21 individuals have been reasonably identified. On an unknown date, the individuals were removed from an area in northwestern Ohio, likely by David Stothers, an archaeologist and professor at the University of Toledo between 1972 and 2011. No associated funerary objects are present.

Based on the information available, human remains representing, at least, 13 individuals have been reasonably identified. The individuals were likely removed from an area in northwestern Ohio by Edward Lincoln Moseley, a professor and naturalist at Bowling Green State University in Bowling Green, Ohio between 1924 and 1936, where he served as the head of the biology department. Moseley frequently collected from the Sandusky Bay area. On an unknown date, the individuals were acquired by the University of Toledo. No associated funerary objects are present.

Based on the information available, human remains representing, at least, one individual has been reasonably identified. The individual was located in the University of Toledo collections on March 31, 2023. The individual was likely removed from an area in northwestern Ohio by David Stothers. No associated funerary objects are present.

The University of Toledo has no record of any potentially hazardous substances used to treat the human remains described in this notice.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains described in this notice.

Determinations

The University of Toledo has determined that:

- The human remains described in this notice represent the physical remains of 36 individuals of Native American ancestry.
- There is a reasonable connection between the human remains described in this notice and the Absentee-Shawnee Tribe of Indians of Oklahoma; Bad River Band of the Lake Superior Tribe of Chippewa Indians of the Bad River Reservation, Wisconsin; Bay Mills Indian Community, Michigan; Cayuga Nation; Chippewa Cree Indians of the Rocky Boy's Reservation, Montana; Citizen Potawatomi Nation, Oklahoma; Delaware Nation, Oklahoma; Delaware Tribe of Indians; Eastern Shawnee Tribe of Oklahoma; Forest County Potawatomi Community, Wisconsin; Grand Traverse Band of Ottawa and Chippewa Indians, Michigan; Hannahville Indian Community, Michigan; Kaw Nation, Oklahoma; Keweenaw Bay Indian Community, Michigan; Kickapoo Traditional Tribe of Texas; Kickapoo Tribe of Indians of the Kickapoo Reservation in Kansas; Kickapoo Tribe of Oklahoma; Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin; Lac du Flambeau Band of Lake Superior Chippewa Indians of the Lac du Flambeau Reservation of Wisconsin; Lac Vieux Desert Band of Lake Superior Chippewa Indians of Michigan; Little River Band of Ottawa Indians, Michigan; Little Shell Tribe of Chippewa Indians of Montana; Little Traverse Bay Bands of Odawa Indians, Michigan; Match-e-be-nash-she-wish Band of Pottawatomi Indians of Michigan; Miami Tribe of Oklahoma; Minnesota Chippewa Tribe, Minnesota (Six component reservations: Bois Forte Band (Nett Lake); Fond du Lac Band; Grand Portage Band; Leech Lake Band; Mille Lacs Band; White Earth Band); Nottawaseppi Huron Band of the Potawatomi, Michigan; Omaha Tribe of Nebraska; Oneida Indian Nation; Oneida Nation; Onondaga Nation; Ottawa Tribe of Oklahoma; Peoria Tribe of Indians of

Oklahoma; Pokagon Band of Potawatomi Indians, Michigan and Indiana; Ponca Tribe of Indians of Oklahoma; Ponca Tribe of Nebraska; Prairie Band Potawatomi Nation; Red Cliff Band of Lake Superior Chippewa Indians of Wisconsin; Red Lake Band of Chippewa Indians, Minnesota; Sac & Fox Nation of Missouri in Kansas and Nebraska; Sac & Fox Nation, Oklahoma; Sac & Fox Tribe of the Mississippi in Iowa; Saginaw Chippewa Indian Tribe of Michigan; Saint Regis Mohawk Tribe; Sault Ste. Marie Tribe of Chippewa Indians, Michigan; Seneca Nation of Indians; Seneca-Cayuga Nation; Shawnee Tribe; Sokaogon Chippewa Community, Wisconsin; St. Croix Chippewa Indians of Wisconsin; Stockbridge Munsee Community, Wisconsin; Tonawanda Band of Seneca; Turtle Mountain Band of Chippewa Indians of North Dakota; Tuscarora Nation; and the Wyandotte Nation.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the University of Toledo must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The University of Toledo is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 23, 2024.

Notice of Inventory Completion: University of Toledo, Toledo, OH

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Toledo has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 31, 2024.

ADDRESSES: Thomas Zych, University of Toledo, 2801 W Bancroft Street, MS 956, Toledo, OH 43606, telephone (419) 590–4395, email *thomas.zych@UToledo.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of Toledo, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. On October 28, 1976, the individual was removed from the Turkeyfoot Site (33–LU–129), Lucas County, Ohio by the University of Toledo. No associated funerary objects are present.

Based on the information available, human remains representing, at least, two individuals have been reasonably identified. In 1972, the individuals were removed during a surface survey of the Little Road Site (33–LU–13), Lucas County, Ohio by David Stothers, a professor at the University of Toledo. The two associated funerary objects are one lot of lithic debitage and one lot of faunal remains.

The University of Toledo has no record of any potentially hazardous substances being used to treat any of the human remains or associated funerary objects described in this notice.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

The University of Toledo has determined that:

- The human remains described in this notice represent the physical remains of three individuals of Native American ancestry.
- The two objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Absentee-Shawnee Tribe of Indians of Oklahoma; Bad River Band of the Lake Superior Tribe of Chippewa Indians of the Bad River Reservation, Wisconsin; Bay Mills Indian Community, Michigan; Chippewa Cree Indians of the Rocky Boy's Reservation, Montana; Citizen Potawatomi Nation, Oklahoma; Eastern Shawnee Tribe of Oklahoma; Forest County Potawatomi Community, Wisconsin; Grand Traverse Band of Ottawa and Chippewa Indians, Michigan; Hannahville Indian Community, Michigan; Kaw Nation, Oklahoma; Keweenaw Bay Indian Community, Michigan; Kickapoo Traditional Tribe of Texas; Kickapoo Tribe of Indians of the Kickapoo Reservation in Kansas; Kickapoo Tribe of Oklahoma; Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin; Lac du Flambeau Band of Lake Superior Chippewa Indians of the Lac du Flambeau Reservation of Wisconsin; Lac Vieux Desert Band of Lake Superior Chippewa Indians of Michigan; Little River Band of Ottawa Indians, Michigan; Little Shell Tribe of Chippewa Indians of Montana; Little Traverse Bay Bands of Odawa Indians, Michigan; Match-e-be-nash-she-wish Band of Pottawatomi Indians of Michigan; Miami Tribe of Oklahoma; Minnesota Chippewa Tribe, Minnesota (Six component reservations: Bois Forte Band (Nett Lake); Fond du Lac Band; Grand Portage Band; Leech Lake Band; Mille Lacs Band; White Earth Band); Nottawaseppi Huron Band of the Potawatomi, Michigan; Omaha Tribe of

Nebraska; Ottawa Tribe of Oklahoma; Peoria Tribe of Indians of Oklahoma; Pokagon Band of Potawatomi Indians, Michigan and Indiana; Ponca Tribe of Indians of Oklahoma; Ponca Tribe of Nebraska; Prairie Band Potawatomi Nation; Red Cliff Band of Lake Superior Chippewa Indians of Wisconsin; Red Lake Band of Chippewa Indians, Minnesota; Sac & Fox Nation of Missouri in Kansas and Nebraska; Sac & Fox Nation, Oklahoma; Sac & Fox Tribe of the Mississippi in Iowa; Saginaw Chippewa Indian Tribe of Michigan; Sault Ste. Marie Tribe of Chippewa Indians, Michigan; Seneca Nation of Indians; Seneca-Cayuga Nation; Shawnee Tribe; Sokaogon Chippewa Community, Wisconsin; St. Croix Chippewa Indians of Wisconsin; Tonawanda Band of Seneca; Turtle Mountain Band of Chippewa Indians of North Dakota; and the Wyandotte Nation.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the University of Toledo must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The University of Toledo is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Notice of Inventory Completion: San Francisco State University NAGPRA Program, San Francisco, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the San Francisco State University (SF State) NAGPRA Program has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the associated funerary objects in this notice may occur on or after May 31, 2024.

ADDRESSES: Elise Green, San Francisco State University NAGPRA Program, 1600 Holloway Avenue, San Francisco, CA 94132, telephone (415) 405–3545, email *egreen@sfsu.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the San Francisco State University NAGPRA Program, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, 100 individuals have been reasonably identified in a Notice of Inventory Completion published in the **Federal Register** on August 29, 2008, by the Phoebe A. Hearst Museum of Anthropology, University of California, Berkeley (73 FR 50995–50996). The 160 associated funerary objects listed in this notice are chert arrow points, obsidian arrow points, obsidian cores, chert scraper, mollusk shells, clamshell beads, pestles, mano, shaft straightener, Olivella beads, metal object, buckle, glass, porcelain fragments, shell fragments, blades, wood, basalt flake, bone awl, and a snag hook. CA–TEH–58 was located on the Sacramento River about five miles north of Red Bluff.

CA–TEH–58 was recorded in 1950 by U.C. Berkeley and was described as an historic Wintun village site. The site was destroyed because of construction of the Red Bank Reservoir project. CA–TEH–58 was excavated in 1953, 1955, and 1962 by A. E. Treganza of SF State. The 1953 project was sponsored by the National Park Service; U.C. Berkeley sponsored the 1955 excavation. The burials (1–104) collected in 1953 and 1955 are curated at U.C. Berkeley although, according to an undated document at the Treganza Museum (Anon n.d. [a]), ''TEH–58 Burial 103'' was sent to the Lowie (now Hearst) Museum at U. C. Berkeley indicating that burial had been curated at SF State. A letter from the Treganza Museum to the Lowie Museum on May 26, 1969, indicates the materials were transferred ''late in 1965 or early in 1966'' (Van Dyke 1969). The 1962 project was conducted under National Park Service contract # 14–10–0434–893 between SF State and the National Park Service. The objects from the 1962 project were curated at SF State. According to Treganza Burials 105–109 were curated at SF State. No human remains from CA–TEH–58 were found at SF State during the current inventory.

It was once common practice by museums to use chemicals on cultural items to prevent deterioration by mold, insects, and moisture. To date, the SF State NAGPRA Program has no records documenting use of chemicals at our facilities, and we currently do not use chemicals on any cultural items. A former SF State professor, Dr. Michael Moratto, stated that staff used glues, polyvinyl acetate, and a solution called Glyptol to mend and stabilize cultural objects in the past. Prior non-invasive and non-destructive hazardous chemical tests conducted at the SF State NAGPRA Program repositories show arsenic, mercury, and/or lead in some storage containers, surfaces, and certain cultural items.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

The SF State University NAGPRA Program has determined that:

- The 160 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.

• There is a reasonable connection between the associated funerary objects described in this notice and the Grindstone Indian Rancheria of Wintun-Wailaki Indians of California and the Paskenta Band of Nomlaki Indians of California.

Requests for Repatriation

Written requests for repatriation of the associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the associated funerary objects in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the SF State NAGPRA Program must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the associated funerary objects are considered a single request and not competing requests. The SF State NAGPRA Program is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 23, 2024.

Notice of Inventory Completion: Haffenreffer Museum of Anthropology, Brown University, Bristol, RI

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Haffenreffer Museum of Anthropology, Brown University (Haffenreffer Museum) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 31, 2024.

ADDRESSES: Thierry Gentis, Brown University, Haffenreffer Museum of Anthropology, 300 Tower Street, Bristol, RI 02889, telephone (401) 863–5702, email *thierry_gentis@brown.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Haffenreffer Museum, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. On an unknown date, the individual and associated funerary objects were removed from the Northern Plains area by J.A Monroe. On an unknown date, the individual and associated funerary objects were donated to the Jenks Museum of Natural History and later transferred to the Haffenreffer Museum of Anthropology at Brown University. The Haffenreffer Museum of Anthropology has no knowledge or record of any potentially hazardous substances being used to treat the human remains. The five associated funerary objects include two pottery sherds, two cord-marked pottery sherds, and one flint projectile point which is embedded in the vertebra of the individual.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

The Haffenreffer Museum has determined that:

• The human remains described in this notice represent the physical remains of one individual of Native American ancestry.

• The five objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.

• There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation, Montana; Blackfeet Tribe of the Blackfeet Indian Reservation of Montana; Cheyenne and Arapaho Tribes, Oklahoma; Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; Chippewa Cree Indians of the Rocky Boy's Reservation, Montana; Crow Creek Sioux Tribe of the Crow Creek Reservation, South Dakota; Crow Tribe of Montana; Eastern Shoshone Tribe of the Wind River Reservation, Wyoming; Flandreau Santee Sioux Tribe of South Dakota; Fort Belknap Indian Community of the Fort Belknap Reservation of Montana; Iowa Tribe of Kansas and Nebraska; Iowa Tribe of Oklahoma; Kaw Nation, Oklahoma; Kiowa Indian Tribe of Oklahoma; Little Shell Tribe of Chippewa Indians of Montana; Lower Brule Sioux Tribe of the Lower Brule Reservation, South Dakota; Lower Sioux Indian Community in the State of Minnesota; Northern Arapaho Tribe of the Wind River Reservation, Wyoming; Northern Cheyenne Tribe of the Northern Cheyenne Indian Reservation, Montana; Oglala Sioux Tribe; Omaha Tribe of Nebraska; Otoe-Missouria Tribe of Indians, Oklahoma; Pawnee Nation of Oklahoma; Ponca Tribe of Indians of Oklahoma; Ponca Tribe of Nebraska; Prairie Island Indian Community in the State of Minnesota; Rosebud Sioux Tribe of the Rosebud Indian Reservation, South Dakota; Sac & Fox Nation of Missouri in Kansas and Nebraska; Sac & Fox Nation, Oklahoma; Sac & Fox Tribe of the Mississippi in Iowa; Santee Sioux Nation, Nebraska; Shakopee Mdewakanton Sioux Community of Minnesota; Sisseton-Wahpeton Oyate of the Lake Traverse Reservation, South Dakota; Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado; Spirit Lake Tribe, North Dakota; Standing Rock Sioux Tribe of North & South Dakota; Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota; Upper Sioux Community, Minnesota; Ute Indian Tribe of the Uintah & Ouray Reservation, Utah; Ute Mountain Ute Tribe; and the Yankton Sioux Tribe of South Dakota.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the Haffenreffer Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The Haffenreffer Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 23, 2024.

Notice of Inventory Completion: University of Toledo, Toledo, OH

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Toledo has completed an inventory of human remains and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains in this notice may occur on or after May 31, 2024.

ADDRESSES: Thomas Zych, The University of Toledo, 2801 W Bancroft Street, MS 956, Toledo, OH 43606, telephone (419) 530–4395, email *thomas.zych@UToledo.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of Toledo, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, 118 individuals have been reasonably identified. On an unknown date, the individuals were likely removed from Sandusky County, Ohio by Gene Edwards, a previous president of the Sandusky Bay Chapter of the Archaeological Society of Ohio. On an unknown date, the individuals were acquired by the University of Toledo. No associated funerary objects are present. The University of Toledo has no record of the human remains being treated with any potentially hazardous substances.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location and acquisition history of the human remains described in this notice.

Determinations

The University of Toledo has determined that:

- The human remains described in this notice represent the physical remains of 118 individuals of Native American ancestry.
- There is a reasonable connection between the human remains described in this notice and the Absentee-Shawnee Tribe of Indians of Oklahoma; Bad River Band of the Lake Superior Tribe of Chippewa Indians of the Bad River Reservation, Wisconsin; Bay Mills Indian Community, Michigan; Cayuga Nation; Chippewa Cree Indians of the Rocky Boy's Reservation, Montana; Citizen Potawatomi Nation, Oklahoma; Delaware Nation, Oklahoma; Delaware Tribe of Indians; Eastern Shawnee Tribe of Oklahoma; Forest County Potawatomi Community, Wisconsin; Grand Traverse Band of Ottawa and Chippewa Indians, Michigan; Hannahville Indian Community, Michigan; Kaw Nation, Oklahoma; Keweenaw Bay Indian Community, Michigan; Kickapoo Traditional Tribe of Texas; Kickapoo Tribe of Indians of the Kickapoo Reservation in Kansas; Kickapoo Tribe of Oklahoma; Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin; Lac du Flambeau Band of Lake Superior Chippewa Indians of the Lac du Flambeau Reservation of Wisconsin; Lac Vieux Desert Band of Lake Superior Chippewa Indians of Michigan; Little River Band of Ottawa Indians, Michigan; Little Shell Tribe of Chippewa Indians of Montana; Little Traverse Bay Bands of Odawa Indians, Michigan; Match-e-be-nash-she-wish Band of Pottawatomi Indians of Michigan; Miami Tribe of Oklahoma; Minnesota Chippewa Tribe, Minnesota (Six component reservations: Bois Forte Band (Nett Lake); Fond du Lac Band; Grand Portage Band; Leech Lake Band; Mille Lacs Band; White Earth Band); Nottawaseppi Huron Band of the Potawatomi, Michigan; Omaha Tribe of Nebraska; Oneida Indian Nation; Oneida Nation; Onondaga Nation; Ottawa Tribe of Oklahoma; Peoria Tribe of Indians of Oklahoma; Pokagon Band of Potawatomi Indians, Michigan and Indiana; Ponca Tribe of Indians of Oklahoma; Ponca Tribe of Nebraska; Prairie Band Potawatomi Nation; Red Cliff Band of Lake Superior Chippewa Indians of Wisconsin; Red Lake Band of Chippewa Indians, Minnesota; Saginaw Chippewa Indian Tribe of Michigan; Saint Regis Mohawk Tribe; Sault Ste. Marie Tribe of Chippewa Indians, Michigan; Seneca Nation of Indians; Seneca-Cayuga Nation; Shawnee Tribe; Sokaogon Chippewa Community, Wisconsin; St. Croix Chippewa Indians of Wisconsin; Stockbridge Munsee Community, Wisconsin; Tonawanda Band of Seneca; Turtle Mountain Band of Chippewa Indians of North Dakota; Tuscarora Nation; and the Wyandotte Nation.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the University of Toledo must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The University of Toledo is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Notice of Inventory Completion: Los Rios Community College District, Sacramento, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Los Rios Community College District (LRCCD) has completed an inventory of associated funerary objects and has determined that there is a cultural affiliation between the associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the associated funerary objects in this notice may occur on or after May 31, 2024.

ADDRESSES: Jamey Nye, Los Rios Community College District, 1919 Spanos Ct., Arden-Arcade, CA 95825, telephone (916) 568–3031, email *nagpra@losrios.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of LRCCD, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, sometime before 1936, associated funerary objects were removed from the Johnson Mound (CA–SAC–06) in Sacramento County, California by Jeremiah B. Lillard. Between 1923 and 1940, Lillard was president of the Sacramento Junior College, now named Sacramento City College, which is one of four campuses in LRCCD. In April 2023, the associated funerary objects were located on the American River College campus, another campus within LRCCD. The two associated funerary objects are one abalone ornament and one bow-shaped abalone ornament.

Based on the information available, sometime between 1933 and 1938, the associated funerary object was removed from Augustine Mound (CA–SAC–127) in Sacramento County, California by Jeremiah B. Lillard. Between 1923 and 1940, Lillard was president of the Sacramento Junior College, now named Sacramento City College, which is one of four campuses in LRCCD. In April 2023, the associated funerary object was located on the American River College campus, another campus within LRCCD. The associated funerary object is one bone pendant (awl).

Based on the information available, in 1939, the associated funerary object was removed from the Needs Site (CA–SAC–151) in Sacramento County, California by the Sacramento Junior College Field Party, which was led by the college president, Jeremiah B. Lillard. Sacramento Junior College, now named Sacramento City College, is one of four campuses in LRCCD. In April 2023, the associated funerary object was located on the American River College campus, another campus within LRCCD. The associated funerary object is one basal point.

LRCCD has no record of any potentially hazardous substances being used to treat any of the associated funerary objects described in this notice.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the associated funerary objects described in this notice.

Determinations

LRCCD has determined that:

- The four objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the associated funerary objects described in this notice and the Buena Vista Rancheria of Me-Wuk Indians of California; California Valley Miwok Tribe, California; Chicken Ranch Rancheria of Me-Wuk Indians of California; Ione Band of Miwok Indians of California; Jackson Band of Miwuk Indians; Shingle Springs Band of Miwok Indians, Shingle Springs Rancheria (Verona Tract), California; Tuolumne Band of Me-Wuk Indians of the Tuolumne Rancheria of California; United Auburn Indian Community of the Auburn Rancheria of California; and the Wilton Rancheria, California.

Requests for Repatriation

Written requests for repatriation of the associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the associated funerary objects in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, LRCCD must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of associated funerary objects are considered a single request and not competing requests. LRCCD is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Notice of Inventory Completion: San Francisco State University NAGPRA Program, San Francisco, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the San Francisco State University (SF State) NAGPRA Program has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 31, 2024.

ADDRESSES: Elise Green, San Francisco State University NAGPRA Program, 1600 Holloway Avenue, San Francisco, CA 94132, telephone (415) 405–3545, email *egreen@sfsu.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the SF State NAGPRA Program and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual has been reasonably identified. The 92 associated funerary objects are Olivella beads, abalone pendants, obsidian points, basalt cores, flakes, polished bones, pestles, mortars, and stone tools. All sites: CA–TEH–23; CA–TEH–22, the Thomes Creek Site; and CA–TEH–233, the Lindauer Site, were excavated in the summer of 1963 by Adan E. Treganza as part of the Tehama-Colusa Canal Survey. This survey was conducted to capture baseline archaeological data about the area prior to the construction of a canal by the Bureau of Reclamation.

CA–TEH–23 is in the Tehama Quad and contained several burials which were excavated. CA–TEH–22 is in the Corning Quad, on a bluff at the confluence off the Thomes Creek and Sacramento River. According to the available site documentation, CA–TEH–22 was a large village site and contained at least two burials. CA–TEH–233 was an occupation mound and may have included a cemetery. Two burials were found and reinterred at the time of recording. Because the remains recorded at CA–TEH–233 were reburied, it is assumed that these elements represent a portion of the remains originally designated Burial 1 that were collected at CA–TEH–22. A letter from Suzanne Griest, UC Davis Museum Preparator, to Robin Wells, Treganza Anthropology Museum Curator, indicates that materials collected from CA–TEH–22 were transferred to Davis at some point prior to July 3, 1980. An additional letter from Griest to Wells suggests that the CA–TEH–22 burials had been misplaced as early as July 14, 1980. The survey abstract indicates that these sites are affiliated with the Central Wintun, whose aboriginal occupation of the surrounding areas is well-documented in the ethnographic literature.

It was once common practice by museums to use chemicals on cultural items to prevent deterioration by mold, insects, and moisture. To date, the SF State NAGPRA Program has no records documenting use of chemicals at our facilities, and we currently do not use chemicals on any cultural items. A former SF State professor, Dr. Michael Moratto, stated that staff used glues, polyvinyl acetate, and a solution called Glyptol to mend and stabilize cultural objects in the past. Prior non-invasive and non-destructive hazardous chemical tests conducted at the SF State NAGPRA Program repositories show arsenic, mercury, and/or lead in some storage containers, surfaces, and certain cultural items.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

The SF State NAGPRA Program has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The 92 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Grindstone Indian Rancheria of Wintun-Wailaki Indians of California and the Paskenta Band of Nomlaki Indians of California.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, SF State NAGPRA Program must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The SF State NAGPRA Program is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Notice of Intended Repatriation: William S. Webb Museum of Anthropology, University of Kentucky, Lexington, KY

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the William S. Webb Museum of Anthropology, University of Kentucky (WSWM) intends to repatriate certain cultural items that meet the definition of unassociated funerary objects and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after May 31, 2024.

ADDRESSES: Celise Chilcote-Fricker, William S. Webb Museum of Anthropology, University of Kentucky, 1020 Export Street, Lexington, KY 40504, telephone (859) 257–5124, email *celise.fricker@uky.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the WSWM, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of five cultural items have been requested for repatriation. The five unassociated funerary objects are one lot lithic, one lot faunal, one lot charcoal, one lot floatation, and one lot botanics. Site 15McN81 (Hedden) in McCracken, KY, was excavated in 1994 by Wilbur Smith Associates to mitigate road construction and in 2003 the Kentucky Office of Vital Statistics approved a request from the Kentucky Transportation Cabinet to curate at the University of Kentucky.

Determinations

The WSWM has determined that:

- The five unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and The Chickasaw Nation.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the WSWM must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The WSWM is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: April 23, 2024.

Notice of Inventory Completion: Field Museum, Chicago, IL

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Field Museum has completed an inventory of human remains and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains in this notice may occur on or after May 31, 2024.

ADDRESSES: June Carpenter, NAGPRA Director, Field Museum, 1400 S Lake Shore Drive, Chicago, IL 60605, telephone (312) 665–7820, email *jcarpenter@fieldmuseum.org.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Field Museum, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. No associated funerary objects are present. The human remains are hair clippings belonging to one individual, identified with the tribal designation ''Pitt River'' (Field Museum catalog numbers 193211.4). Field Museum staff believe they were collected under the direction of Franz Boas and Frederick Ward Putnam for the 1893 World's Columbian Exposition in Chicago. The hair clippings were accessioned into the Field Museum's collection in 1939. No information regarding the individual's name, sex, age, or geographic location has been found. There is no known presence of any potentially hazardous substances.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains described in this notice.

Determinations

The Field Museum has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- There is a reasonable connection between the human remains described in this notice and the Pit River Tribe, California (includes XL Ranch, Big Bend, Likely, Lookout, Montgomery Creek, and Roaring Creek Rancherias).

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the authorized representative identified in this notice under

ADDRESSES. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the Field Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The Field Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.9, 10.10, and 10.14.

Dated: April 23, 2024.

Notice of Inventory Completion: Peabody Museum of Archaeology and Ethnology, Harvard University, Cambridge, MA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Peabody Museum of Archaeology and Ethnology, Harvard University (PMAE) has completed an inventory of human remains and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice. The human remains were collected at the Fort Totten Indian School, Benson County, ND, the Flandreau Indian School, Moody County, SD, and Cass Lake Chippewa Agency, Cass County, MN.

DATES: Repatriation of the human remains in this notice may occur on or after May 31, 2024.

ADDRESSES: Jane Pickering, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496–2374, email *jpickering@fas.harvard.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the PMAE, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at minimum, 44 individuals were collected at the Fort Totten Indian School, Benson County, ND. The human remains are hair clippings collected from one individual who was recorded as being 24 years old, one individual who was recorded as being 18 years old, four individuals who were recorded as being 16 years old, one individual who was recorded as being 15 years old, three individuals who were recorded as being 14 years old, three individuals who were recorded as being 13 years old, 10 individuals who were recorded as being 12 years old, four individuals who were recorded as being 11 years old, six individuals who were recorded as being 10 years old, three individuals who were recorded as being 9 years old, four individuals who were recorded as being 8 years old, two individuals who were recorded as being 7 years old, and two individuals who were recorded as being 6 years old and identified as ''Chippewa.'' Orrin C. Gray took the hair clippings at the Fort Totten Indian School between 1930 and 1933. Gray sent the hair clippings to George Woodbury, who donated the hair clippings to the PMAE in 1935. No associated funerary objects are present.

Human remains representing, at minimum, one individual was collected at the Flandreau Indian School, Moody County, SD. The human remains are hair clippings collected from one individual who was recorded as being 17 years old and identified as ''Chippewa.'' George E. Peters took the hair clippings at the Flandreau Indian School between 1930 and 1933. Peters sent the hair clippings to George Woodbury, who donated the hair clippings to the PMAE in 1935. No associated funerary objects are present.

Human remains representing, at minimum, one individual was collected at the Cass Lake Chippewa Agency, Cass County, MN. The human remains are hair clippings collected from one individual who was recorded as being 22 years old and identified as ''Chippewa.'' M.L. Burns took the hair clippings at the Cass Lake Chippewa Agency between 1930 and 1933. Burns sent the hair clippings to George Woodbury, who donated the hair clippings to the PMAE in 1935. No associated funerary objects are present.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains in this notice.

Determinations

The PMAE has determined that:

- The human remains described in this notice represent the physical remains of 46 individuals of Native American ancestry.
- There is a reasonable connection between the human remains described in this notice and the Little Shell Tribe of Chippewa Indians of Montana.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the Responsible Official identified in **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the PMAE must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The PMAE is responsible for sending a copy of this notice to the Indian Tribe identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 23, 2024.

Notice of Inventory Completion: William S. Webb Museum of Anthropology, University of Kentucky, Lexington, KY

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the William S. Webb Museum of Anthropology, University of Kentucky (WSWM) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 31, 2024.

ADDRESSES: Celise Chilcote-Fricker, William S. Webb Museum of Anthropology, University of Kentucky, 1020 Export Street, Lexington, KY 40504, telephone (859) 257–5124, email *celise.fricker@uky.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the WSWM, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, 10 individuals have been reasonably identified. The 48 associated funerary objects are one lot ceramic sherds, one lot lithic, one lot faunal, one lot shell, one soil sample, 35 shell beads, one ceramic gorget, four shell gorgets, and three stone celts. These remains and funerary objects were removed from an unknown site in Perry County, KY, at an unknown time and donated to the Bobby Davis Museum in Hazard, Kentucky. After the dissolution of the museum, the remains and associated artifacts were donated to the WSWM for the purpose of pursuing repatriation.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location and acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

The WSWM has determined that:

- The human remains described in this notice represent the physical remains of 10 individuals of Native American ancestry.
- The 48 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Absentee-Shawnee Tribe of Indians of Oklahoma; Cherokee Nation; Eastern Band of Cherokee Indians; Eastern Shawnee Tribe of Oklahoma; Shawnee Tribe; and the United Keetoowah Band of Cherokee Indians in Oklahoma.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the WSWM must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The WSWM is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 23, 2024.

Melanie O'Brien,

Manager, National NAGPRA Program.

Notice of Inventory Completion: Longyear Museum of Anthropology, Colgate University, Hamilton, NY

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Longyear Museum of Anthropology (LMA) has completed an inventory of associated funerary objects and has determined that there is a cultural affiliation between the associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the associated funerary objects in this notice may occur on or after May 31, 2024.

ADDRESSES: Kelsey Olney-Wall, Repatriation Manager, University Museums, Colgate University, 13 Oak Drive, Hamilton, NY 13346, telephone (315) 228–7677, email *kolneywall@colgate.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the LMA, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, the associated funerary objects are six shell beads. The six shell beads (Catalog number A234), were gathered by Mortimer Cooley Howe while he was a student at Colgate and the University of Michigan. The Howe collection was

donated to Colgate University, posthumously, by his father Burton Howe in 1947. The handwritten tag on the shell beads connects them to one individual removed from an unknown location in Arkansas, previously reported in a Notice of Inventory Completion published in the **Federal Register** on August 8, 2011 (76 FR 48178–48179). The LMA established the beads are associated with the human remains repatriated to the Osage Nation in 2017.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the associated funerary objects described in this notice.

Determinations

The LMA has determined that:

- The six objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the associated funerary objects described in this notice and The Osage Nation.

Requests for Repatriation

Written requests for repatriation of the associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the associated funerary objects in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the LMA must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the associated funerary objects are considered a single request and not competing requests. The LMA is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 23, 2024.

Notice of Inventory Completion: University of Wisconsin Oshkosh, Oshkosh, WI

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Wisconsin Oshkosh has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 31, 2024.

ADDRESSES: Adrienne Frie, University of Wisconsin Oshkosh, 800 Algoma Boulevard, Oshkosh, WI 54901, telephone (920) 424–1365, email *friea@uwosh.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of Wisconsin Oshkosh, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual (UnprovBurial1_UNKNO) have been reasonably identified. The individual was removed from an unknown geographic location in Wisconsin. There are no records indicating when or how this individual came into the possession of the Archaeology Collection at the University of Wisconsin Oshkosh. The outside of the original storage box was labeled ''human burial, Wisconsin (?),'' according to the University of Oshkosh Culturally Unidentifiable NAGPRA Inventory, which was submitted in 1995. A note in the box reads ''Femur found in trunk at Doty Cabin—no other prov. Deer bone found under driveway in my neighbor's yard.'' The deer bone does not seem to have been originally associated with the human remains. There are no records of this acquisition from the Doty Cabin Museum. No associated funerary objects are present.

Based on the information available, human remains representing, at least, 13 individuals (UnprovBurial2_UNKNO) have been reasonably identified. The individuals were removed from an unknown geographic location, WI. There is no known collection history for these individuals, however, they were described as ''Unprovenienced Burial #2'' in the University of Wisconsin Oshkosh Culturally Unidentifiable NAGPRA Inventory, which was submitted in 1995. According to this Inventory, the outside of the original storage box had been labeled ''human burial, Wisconsin (?)''. The six associated funerary objects are one deer antler; one fragment of an ungulate metapodial; one snake vertebra; one rodent incisor; one lot of gastropod shells and shell fragments; and one lot of soil matrix.

Based on the information available, human remains representing, at least, three individuals (UnprovBurial3_UNKNO) have been reasonably identified. The individuals were removed from an unknown geographic location in Wisconsin. No information was found regarding the provenience of this burial. Jeff Behm, an archaeologist with the University of Wisconsin Oshkosh, noted that the human remains were housed at the University for as long as he'd been employed (since 1985). The box label and the history of the collections at the University of Wisconsin Oshkosh provides a preponderance of evidence that this individual was removed from somewhere in the state of Wisconsin. No associated funerary objects are present.

Based on the information available, human remains representing, at least, one individual (Unprov004_REHWIN) have been reasonably identified. The individual was removed from an unknown geographic location in Wisconsin. On February 16, 1976, the individual was donated to the University of Wisconsin Oshkosh by John Rehwinkel, according to writing present on the individual. Based on Rehwinkel's residence and avocational

archaeology in Wisconsin, the remains are thought to originate from the state. No associated funerary objects are present.

Based on the information available, human remains representing, at least, two individuals (UnprovBurial5_UNKNO) have been reasonably identified. The individuals were removed from an unknown geographic location in Wisconsin. The University of Wisconsin Oshkosh does not have any records related to this collection except what was reported in the Culturally Unidentifiable NAGPRA Inventory, which was submitted in 1995. In that Inventory, the collection was reported as ''Unprovenienced Burial Number 5'' with an MNI of one individual, as well as ''the apparent association with a flake of Hixton silicified sandstone strongly supports a Wisconsin, or at least Upper Midwest provenience''. The outside of the original storage box had simply been labeled ''human burial, Wisconsin (?)''. Based on this evidence, the University of Wisconsin Oshkosh concluded that these individuals were likely removed from Wisconsin. The seven associated funerary objects are one silicified sandstone flake; one cow rib fragment; one lot of incisors from a large ungulate; two large mammal long bone shaft fragments; one large mammal long bone fragment; and one large burnt mammal bone fragment.

Based on the information available, human remains representing, at least, one individual (UnprovStateWI001_UNKNO) have been reasonably identified. The individual was removed from an unknown geographic location in Wisconsin. There are no records indicating when or how this individual came into the possession of the University of Wisconsin Oshkosh. The box label read ''Unprovenienced Burial Wisconsin?''. The box label and the history of the collections at the University provides a preponderance of evidence that this individual was removed from somewhere in the state of Wisconsin. No associated funerary objects are present.

The University of Wisconsin Oshkosh has no record of any potentially hazardous substances being used to treat the human remains or associated funerary objects described in this notice.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location of the human remains and associated funerary objects described in this notice.

Determinations

The University of Wisconsin Oshkosh has determined that:

- The human remains described in this notice represent the physical remains of 21 individuals of Native American ancestry.
- The 13 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Assiniboine and Sioux Tribes of the Fort Peck Indian Reservation, Montana; Bad River Band of the Lake Superior Tribe of Chippewa Indians of the Bad River Reservation, Wisconsin; Bay Mills Indian Community, Michigan; Cayuga Nation; Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota; Chippewa Cree Indians of the Rocky Boy's Reservation, Montana; Citizen Potawatomi Nation, Oklahoma; Crow Creek Sioux Tribe of the Crow Creek Reservation, South Dakota; Flandreau Santee Sioux Tribe of South Dakota; Forest County Potawatomi Community, Wisconsin; Grand Traverse Band of Ottawa and Chippewa Indians, Michigan; Hannahville Indian Community, Michigan; Ho-Chunk Nation of Wisconsin; Iowa Tribe of Kansas and Nebraska; Iowa Tribe of Oklahoma; Keweenaw Bay Indian Community, Michigan; Kickapoo Traditional Tribe of Texas; Kickapoo Tribe of Indians of the Kickapoo Reservation in Kansas; Kickapoo Tribe of Oklahoma; Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin; Lac du Flambeau Band of Lake Superior Chippewa Indians of the Lac du Flambeau Reservation of Wisconsin; Lac Vieux Desert Band of Lake Superior Chippewa Indians of Michigan; Little River Band of Ottawa Indians, Michigan; Little Shell Tribe of Chippewa Indians of Montana; Little Traverse Bay Bands of Odawa Indians, Michigan; Lower Brule Sioux Tribe of the Lower Brule Reservation, South Dakota; Lower Sioux Indian Community in the State of Minnesota; Match-e-be-nash-she-wish Band of Pottawatomi Indians of Michigan; Menominee Indian Tribe of Wisconsin; Miami Tribe of Oklahoma; Minnesota Chippewa Tribe, Minnesota (Six component reservations: Bois Forte Band (Nett Lake); Fond du Lac Band; Grand Portage Band; Leech Lake Band; Mille Lacs Band; White Earth Band); Nottawaseppi Huron Band of the Potawatomi, Michigan; Oglala Sioux Tribe; Oneida Indian Nation; Oneida Nation; Onondaga Nation; Otoe-Missouria Tribe of Indians, Oklahoma; Ottawa Tribe of Oklahoma; Peoria Tribe of Indians of Oklahoma; Pokagon Band of Potawatomi Indians, Michigan and Indiana; Prairie Band Potawatomi Nation; Prairie Island Indian Community in the State of Minnesota; Red Cliff Band of Lake Superior Chippewa Indians of Wisconsin; Red Lake Band of Chippewa Indians, Minnesota; Rosebud Sioux Tribe of the Rosebud Indian Reservation, South Dakota; Sac & Fox Nation of Missouri in Kansas and Nebraska; Sac & Fox Nation, Oklahoma; Sac & Fox Tribe of the Mississippi in Iowa; Saginaw Chippewa Indian Tribe of Michigan; Saint Regis Mohawk Tribe; Santee Sioux Nation, Nebraska; Sault Ste. Marie Tribe of Chippewa Indians, Michigan; Seneca Nation of Indians; Seneca-Cayuga Nation; Shakopee Mdewakanton Sioux Community of Minnesota; Sisseton-Wahpeton Oyate of the Lake Traverse Reservation, South Dakota; Sokaogon Chippewa Community, Wisconsin; Spirit Lake Tribe, North Dakota; St. Croix Chippewa Indians of Wisconsin; Standing Rock Sioux Tribe of North & South Dakota; Stockbridge Munsee Community, Wisconsin; The Osage Nation; Tonawanda Band of Seneca; Turtle Mountain Band of Chippewa Indians of North Dakota; Tuscarora Nation; Upper Sioux Community, Minnesota; Winnebago Tribe of Nebraska; and the Yankton Sioux Tribe of South Dakota.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the University of Wisconsin Oshkosh must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not

competing requests. The University of Wisconsin Oshkosh is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Notice of Inventory Completion: Haffenreffer Museum of Anthropology, Brown University, Bristol, RI

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Haffenreffer Museum of Anthropology, Brown University (Haffenreffer Museum) has completed an inventory of human remains and has determined that there is a cultural affiliation between the human remains and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains in this notice may occur on or after May 31, 2024.

ADDRESSES: Thierry Gentis, Brown University, Haffenreffer Museum of Anthropology, 300 Tower Street, Bristol, RI 02889, telephone (401) 863–5702, email *thierry_gentis@brown.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Haffenreffer Museum, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. On an unknown date, the individual was removed from an unknown location, possibly in New Mexico by Robert Gal during a surface collection. On an unknown date, the individual was donated to the Haffenreffer Museum of Anthropology. In 2019, when the Haffenreffer Museum was relocating the individual to a restricted area, the provenience information for ''possibly New Mexico'' was found on a piece of paper with the individual. The Haffenreffer Museum of has no knowledge or record of any potentially hazardous substances being used to treat the human remains. No associated funerary objects are present.

Based on the information available, human remains representing, at least, one individual have been reasonably identified. On an unknown date, the individual was removed from Clear Creek, New Mexico by Edmund B. Delabarre, a professor at Brown University. In 1961, the individual was donated to the Haffenreffer Museum of Anthropology. The Haffenreffer Museum of has no knowledge or record of any potentially hazardous substances being used to treat the human remains. No associated funerary objects are present.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains described in this notice.

Determinations

The Haffenreffer Museum has determined that:

- The human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- There is a reasonable connection between the human remains described in this notice and the Apache Tribe of Oklahoma; Cheyenne and Arapaho Tribes, Oklahoma; Comanche Nation, Oklahoma; Fort McDowell Yavapai Nation, Arizona; Fort Sill Apache Tribe of Oklahoma; Hopi Tribe of Arizona; Jicarilla Apache Nation, New Mexico; Kiowa Indian Tribe of Oklahoma; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; Navajo Nation, Arizona, New Mexico, & Utah; Northern Arapaho Tribe of the Wind River Reservation, Wyoming; Ohkay Owingeh, New Mexico; Pueblo of Acoma, New Mexico; Pueblo of Cochiti, New Mexico; Pueblo of Isleta, New Mexico; Pueblo of Jemez, New Mexico; Pueblo of Laguna, New Mexico; Pueblo of Nambe, New Mexico; Pueblo of Picuris, New Mexico; Pueblo of Pojoaque, New Mexico; Pueblo of San Felipe, New Mexico; Pueblo of San Ildefonso, New Mexico; Pueblo of Sandia, New Mexico; Pueblo of Santa Ana, New Mexico; Pueblo of Santa Clara, New Mexico; Pueblo of Taos, New Mexico; Pueblo of Tesuque, New Mexico; Pueblo of Zia, New Mexico; San Carlos Apache Tribe of the San Carlos Reservation, Arizona; Santo Domingo Pueblo; Tonto Apache Tribe of Arizona; White Mountain Apache Tribe of the Fort Apache Reservation, Arizona; Yavapai-Apache Nation of the Camp Verde Indian Reservation, Arizona; Ysleta del Sur Pueblo; and the Zuni Tribe of the Zuni Reservation, New Mexico.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the Haffenreffer Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests. The Haffenreffer Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Notice of Inventory Completion: Peabody Museum of Archaeology and Ethnology, Harvard University, Cambridge, MA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Peabody Museum of Archaeology and Ethnology, Harvard University (PMAE) has completed an inventory of human remains and has determined that there are known lineal descendants connected to the human remains in this notice.

DATES: Repatriation of the human remains in this notice may occur on or after May 31, 2024.

ADDRESSES: Jane Pickering, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496–2374, email *jpickering@fas.harvard.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the PMAE, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing one individual have been reasonably identified. The human remains were collected at the Carson Indian School, Ormsby County, NV, and are hair clippings collected from one individual, Evelina Anthony, who was recorded as being 15 years old and identified as ''Washoe.'' Frederic Snyder took the hair clippings at the Carson Indian School between 1930 and 1933. Snyder sent the hair clippings to George Woodbury, who donated the hair clippings to the PMAE in 1935. No associated funerary objects are present.

Lineal Descendant

Based on the information available and the results of consultation, two lineal descendants are connected to the human remains described in this notice.

Determinations

The PMAE has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Cheyenne Stone and Ross Stone are connected to the human remains described in this notice.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. The known lineal descendants connected to the human remains.
2. Any other lineal descendant not identified who shows, by a preponderance of the evidence, that the requestor is a lineal descendant.

Repatriation of the human remains in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the PMAE must determine the most appropriate requestor prior to repatriation. The PMAE is responsible for sending a copy of this notice to the lineal descendant and any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 23, 2024.

Notice of Inventory Completion: William S. Webb Museum of Anthropology, University of Kentucky, Lexington, KY

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the William S. Webb Museum of Anthropology, University of Kentucky (WSWM) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after May 31, 2024.

ADDRESSES: Celise Chilcote-Fricker, William S. Webb Museum of Anthropology, University of Kentucky, 1020 Export St., Lexington, KY 40504, telephone (859) 257–5124, email *celise.fricker@uky.edu.*

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the WSWM, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, six individuals have been reasonably identified. The 33 associated funerary objects are five lots of ceramic sherds, five lots of lithics, six lots of shell, six lots of faunal, three lots of flotation, four lots of soil samples, three lots of seeds, and one bone pin. Site 15McN18 (Crawford Lake) in McCracken, KY was excavated in 1990 by the University of Illinois' Western Kentucky Project. Calibrated radiocarbon dates place it in the Middle Archaic and Mississippian archaeological periods.

Based on the information available, human remains representing, at least, seven individuals have been reasonably identified. The 91 associated funerary objects are seven lots of lithics, six lots of faunal, six lots of floatation, six lots of soil samples, five lots of flora, seven lots of charcoal, 20 lithic projectile points, one lithic scraper, 13 faunal teeth, 13 pieces of ochre, two pieces of hematite, and five lots of burned clay. Site 15McN81 (Hedden) in McCracken, KY, was excavated in 1994 by Wilbur Smith Associates to mitigate road construction and in 2003 the Kentucky Office of Vital Statistics approved a request from the Kentucky Transportation Cabinet to curate at the University of Kentucky.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and

associated funerary objects described in this notice.

Determinations

The WSWM has determined that:

- The human remains described in this notice represent the physical remains of 13 individuals of Native American ancestry.
- The 124 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and The Chickasaw Nation.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the WSWM must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The WSWM is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 23, 2024.

Melanie O'Brien,

Manager, National NAGPRA Program.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2024–0022]

Pacific Wind Lease Sale 2 for Commercial Leasing for Wind Power Development on the Oregon Outer Continental Shelf—Proposed Sale Notice

AGENCY: Bureau of Ocean Energy Management, Interior.

ACTION: Proposed sale notice; request for comments.

SUMMARY: The Bureau of Ocean Energy Management (BOEM) proposes to hold Pacific Lease Sale 2 and offer one or more lease areas (Lease Areas) for commercial wind power development on the U.S. Outer Continental Shelf (OCS). The Lease Areas are located in the Brookings and Coos Bay wind energy areas (WEAs) offshore the State of Oregon. This proposed sale notice (PSN) contains information pertaining to the areas available for leasing, certain lease provisions and conditions, auction details, criteria for evaluating competing bids, and procedures for lease award, appeals, and lease execution. BOEM proposes a multiple factor bidding format using a simultaneous clock auction and will use new auction software for the lease sale, resulting in changes to its previous auction rules. Any lease resulting from this sale does not constitute approval for any offshore wind energy facilities. Lessees must first submit project-specific plans to BOEM and obtain BOEM's approval before they may start any construction of an OCS wind energy facility. BOEM will make such plans available for environmental, technical, and public reviews before deciding whether the proposed development should be authorized.

DATES: BOEM must receive your comments no later than July 1, 2024.

For prospective bidders who want to participate in this lease sale, unless you have already received confirmation from BOEM that you are qualified to participate in the Oregon auction, BOEM must receive your qualification materials no later than July 1, 2024. Prior to the auction, BOEM must confirm your qualification to bid in the auction.

ADDRESSES: You may send comments in any of the following ways:

- *Electronically:* Visit *https://www.regulations.gov.* In the box titled ''Search for dockets and documents on agency actions'' enter ''BOEM–2024–0022'' and click ''Search.'' Follow the instructions to submit comments.
- *Mail or delivery service:* Enclose comment in an envelope labeled ''Comments on Oregon Wind Lease Sale PSN'' and send to: Jean Thurston-Keller, Bureau of Ocean Energy Management, Office of Strategic Resources, 760 Paseo Camarillo, Suite 102 (CM102), Camarillo, California 93010.

For prospective bidders who want to participate in this lease sale: Enclose your qualification materials in an envelope labeled ''Qualification Materials for Oregon Wind Energy Lease Sale'' and send to Bureau of Ocean Energy Management, Office of Strategic Resources, 760 Paseo Camarillo, Suite 102 (CM102), Camarillo, California 93010 or electronically to *renewableenergypocs@boem.gov.*

For more information about submitting comments, see sections XX, ''Public Participation,'' and XXI, ''Protection of Privileged and Confidential Information,'' in the **SUPPLEMENTARY INFORMATION** section below.

FOR FURTHER INFORMATION CONTACT: Jean Thurston-Keller, Bureau of Ocean Energy Management, *jean.thurston-keller@boem.gov* or (805) 384–6303.

SUPPLEMENTARY INFORMATION:

I. Background

(1) *Call for Information and Nominations:* On April 29, 2022, BOEM published the ''Call for Information and Nominations-Commercial Leasing for Wind Power Development on the Outer Continental Shelf offshore Oregon'' (Call). The Call consisted of two areas identified as the Brookings and Coos Bay Call Areas. BOEM received 278 comments from Tribal nations; the general public; Federal, State, and local agencies; the fishing industry; industry groups; developers; non-governmental organizations; universities; and other stakeholders. Comments can be viewed at *https://www.regulations.gov/document/BOEM-2022-0009-0001/comment.* Four developers nominated areas for a commercial wind energy lease within the Call Areas.

(2) *Area Identification:* After the close of the Call comment period on June 28, 2022, BOEM initiated the process for identifying possible leasing areas (Area ID) by reviewing the input received on the Call. BOEM used the modified Area ID process described in a note to stakeholders, available at: *https://www.boem.gov/newsroom/notes-stakeholders/boem-enhances-its-processes-identify-future-offshore-wind-energy-areas.* BOEM and the National Oceanic and Atmospheric Administration's (NOAA) National Centers for Coastal Ocean Science

(NCCOS) team then used an ocean planning modeling tool to identify the two draft WEAs on the OCS offshore Oregon. The modeling tool, data inputs, and methodology are outlined in the ''NCCOS Draft Report: A Wind Energy Siting Analysis for the Oregon Call Areas,'' which can be found at *https://www.boem.gov/sites/default/files/documents/renewable-energy/state-activities/Oregon_WEA_Draft_Report_NCCOS.pdf.*

On August 15, 2023, BOEM announced a 60-day public comment period on the two draft WEAs offshore Oregon, covering approximately 219,568 acres. This comment period was later extended an additional 15 days for a total 75-day public comment period.

BOEM considered the following non-exclusive information sources when identifying the draft WEAs: comments and nominations received on the Call; input from the Oregon Intergovernmental Renewable Energy Task Force; results of the ''Data Gathering and Engagement Summary Report: Oregon Offshore Wind Planning''; input from Tribes, Oregon State agencies, and Federal agencies; comments from stakeholders and ocean users, including the maritime community, offshore wind developers, and the commercial and recreational fishing industry; State renewable energy goals; information on domestic and global offshore wind markets and technological trends; and the data and information found in OROWindMap at: *https://offshorewind.westcoastoceans.org/visualize/#x=-124.50&y=40.50&z=5&logo=true&controls=true&basemap=ocean&tab=data&legends=false&layers=true.*

After the close of the draft WEA comment period on October 31, 2023, BOEM reviewed the input received from all parties mentioned above and finalized the Area ID memorandum. BOEM announced the final WEAs on February 13, 2024, by designating two final WEAs within the Call areas. The first WEA (Brookings) is 133,792 acres and located approximately 18 miles from shore. The second WEA (Coos Bay) is 61,203 acres and located approximately 32 miles from shore. Both final WEAs combined would support approximately 2.4 gigawatts of wind energy capacity if fully developed. The Oregon Area ID documentation can be found at *https://www.boem.gov/renewable-energy/state-activities/oregon.*

(3) *Environmental Reviews:* On February 14, 2024, BOEM published a notice of intent to prepare an environmental assessment (EA). The EA will consider potential environmental consequences of the anticipated site characterization (*e.g.,* biological, archaeological, geological, and geophysical surveys and core samples) and assessment activities (*e.g.,* installation of meteorological buoys) after issuing wind energy leases in the WEAs. In addition to the preparation of the draft EA, BOEM has initiated other consultations under the Endangered Species Act, the Magnuson-Stevens Fishery Conservation and Management Act, and the Coastal Zone Management Act. The EA and associated consultations will inform BOEM's decision whether to proceed with the final sale notice (FSN). BOEM will solicit comments on the draft EA before it is finalized. BOEM will conduct additional environmental reviews upon receipt of a lessee's construction and operations plan (COP) if the proposed leases reach that stage of development.

II. Areas Proposed for Leasing

BOEM proposes two areas for leasing: the Brookings Lease Area, OCS–P 0567, and the Coos Bay Lease Area, OCS–P 0566.

Lease area name	Lease area ID	Acres
Brookings	OCS–P 0567	133,792
Coos Bay	OCS–P 0566	61,203
Total		194,995

Descriptions of the proposed Lease Areas can be found in addendum A of the proposed leases, which can be found on BOEM's website at *https://www.boem.gov/renewable-energy/state-activities/oregon.*

(1) *Map of the Area Proposed for Leasing:* A map of the Lease Areas, spatial data files, and a list of latitude/longitude coordinates in the WGS84 datum can be found on BOEM's website at: *https://www.boem.gov/renewable-energy/state-activities/oregon.*

(2) *Potential Future Restrictions to Ensure Navigational Safety:* Potential bidders are advised that portions of the Lease Areas may not be available for future development (*i.e.,* installation of wind energy facilities) because of navigational safety concerns. BOEM may require additional mitigation measures at the COP stage when the lessee's site-specific navigational safety risk assessment is available to inform BOEM's decision-making.

(3) *Future Restrictions to Protect Sensitive Seafloor Habitats:* Potential bidders are advised that portions of the Lease Areas may not be available for future development (*i.e.,* installation of wind energy facilities) because of sensitive seafloor habitats. Based on comments received during development of the WEAs from Tribes, NOAA's National Marine Fisheries Service, Oregon Department of Fish and Wildlife, and other entities, there are areas of known or expected sensitive seafloor habitats within the WEAs, particularly within the Brookings WEA. The occurrence of these habitats was shown as part of the NCCOS modeling and discussed in the Area Identification memorandum. BOEM will require further data gathering and evaluation of seafloor habitats and expects to place restrictions on disturbance of sensitive seafloor habitats during COP review. The Brookings WEA was developed with the intention of providing sufficient area to accommodate the protection of sensitive seafloor habitat within the lease area.

III. Participation in the Proposed Lease Sale

(1) *Bidder Participation:* Entities that have been notified by BOEM that their qualification is pending or that they are qualified to participate in the upcoming Oregon auction through their response to the Call, or by separate submission of qualification materials, are not required to take any additional action to affirm their interest. Those entities are listed below:

Company name	Company No.
Avangrid Renewables, LLC	15019
BlueFloat Energy Oregon, LLC	15160
OW North America Ventures LLC	15133
U.S. Mainstream Renewable Power, Inc	15089

All other entities wishing to participate in this proposed Oregon auction must submit the required qualification materials to BOEM by the end of the 60-day comment period for this PSN.

(2) *Affiliated Entities:* On the Bidder's Financial Form (BFF), discussed below, eligible bidders must list any other eligible bidders with whom they are affiliated. For the purpose of identifying affiliated entities, a bidding entity is any individual, firm, corporation, association, partnership, consortium, or joint venture (when established as a separate entity) that is participating in the same auction. BOEM considers bidding entities to be affiliated when:

i. They own or have common ownership of more than 50 percent of the voting securities, or instruments of ownership or other forms of ownership, of another bidding entity. Ownership of less than 10 percent of a bidding entity constitutes a presumption of non-control that BOEM may rebut.

ii. They own or have common ownership of between 10 percent up to and including 50 percent of the voting securities or instruments of ownership, or other forms of ownership, of another bidding entity, and BOEM determines that there is control upon consideration of factors including the following:

(1) The extent to which there are common officers or directors.

(2) With respect to the voting securities, or instruments of ownership or other forms of ownership: the percentage of ownership or common ownership; the relative percentage of ownership or common ownership compared to the percentage(s) of ownership by other bidding entities, if a bidding entity is the greatest single owner; or if there is an opposing voting bloc of greater ownership.

(3) Shared ownership, operation, or day-to-day management of a lease, grant, or facility as those terms are defined in BOEM's regulations at 30 CFR 585.113.

iii. They are both direct or indirect subsidiaries of the same parent company.

iv. If, with respect to any lease(s) offered in this auction, they have entered into an agreement prior to the auction regarding the shared ownership, operation, or day-to-day management of such lease.

v. Other evidence indicates the existence of power to exercise control, or that multiple bidders collectively have the power to exercise control over another bidding entity or entities.

Affiliated entities are not permitted to compete against each other in the auction. Where two or more affiliated entities have qualified to bid in the auction, the affiliated entities must decide prior to the auction which one (if any) will participate in the auction. If two or more affiliated entities attempt to participate in the auction, BOEM will disqualify those bidders from the auction.

BOEM solicits comments from stakeholders on the above criteria for ''affiliated entities'' and will consider this feedback to potentially update its definition of affiliated entities in the FSN.

IV. Questions for Stakeholders

Stakeholders are encouraged to comment on any matters related to this proposed lease sale that are of interest or concern. In addition, BOEM has identified the following issues as particularly important, and we encourage commenters to address these issues specifically:

(1) *Existing uses and how they may be affected by the development of the proposed Lease Areas:* BOEM asks commenters to submit technical and scientific data in support of their comments.

(2) *Limits on the Number of Lease Areas per Bidder:* BOEM is proposing to allow each qualified entity to bid for one Lease Area at a time and ultimately acquire only one Lease Area.

V. Proposed Lease Sale Deadlines and Milestones

This section describes the major deadlines and milestones in the auction process from publication of this PSN to execution of a lease issued pursuant to this sale.

(1) The PSN Comment Period:

i. *Submit Comments:* The public is invited to submit comments during this 60-day period, which will expire on July 1, 2024. All comments received or postmarked during the comment period will be made available to the public and considered by BOEM prior to publication of the FSN.

ii. *Public Auction Seminar:* BOEM will host a public seminar to discuss the lease sale process and the auction format. The time and place of the seminar will be announced by BOEM and published on the BOEM website at *https://www.boem.gov/renewable-energy/state-activities/oregon.* No registration or RSVP is required to attend.

iii. *Submit Qualification Materials:* For prospective bidders who want to participate in this lease sale: All qualification materials must be received by BOEM by July 1, 2024. This requirement includes the submission of materials sufficient to establish a company's legal, technical, and financial qualifications pursuant to 30 CFR 585.106–585.107. BOEM's qualification guidelines available at *https://www.boem.gov/Renewable-Energy-Qualification-Guidelines/* provide guidance on the types of information you should submit to BOEM. BOEM will inform you if you are qualified to participate in the auction.

iv. *Confidential information.* If you wish to protect the confidentiality of your comments or qualification materials, clearly mark the relevant sections and request that BOEM treat them as confidential. Please label privileged or confidential information with the caption ''Contains Confidential Information'' and consider submitting such information as a separate attachment. Treatment of confidential information is addressed in section XXI entitled ''Protection of Privileged or Confidential Information.'' Information that is not labeled as privileged or confidential will be regarded by BOEM as suitable for public release.

(2) End of PSN Comment Period to FSN Publication:

i. *Review Comments:* BOEM will review all comments submitted in response to the PSN during the comment period.

ii. *Finalize Qualifications Reviews:* Prior to the publication of the FSN, BOEM will complete any outstanding reviews of bidder qualification materials submitted during the PSN comment period. The final list of eligible bidders will be published in the FSN.

iii. *Prepare the FSN:* BOEM will prepare the FSN by updating information contained in the PSN where necessary.

iv. *Publish FSN:* BOEM will publish the FSN in the **Federal Register** at least 30-calendar days before the date of the sale.

(3) *FSN Waiting Period:* During the period between FSN publication and the lease auction, qualified bidders will be required to take several steps to remain eligible to participate in the auction.

i. Bidder's Financial Form: Each bidder must submit a BFF to BOEM to participate in the auction. The BFF must include each bidder's conceptual strategy for each bidding credit for which that bidder wishes to be considered. BOEM must receive each bidder's BFF no later than the date listed in the FSN. BOEM could consider extensions to this deadline only if BOEM determines that the failure to timely submit a BFF was caused by events beyond the bidder's control. The proposed BFF can be downloaded at: *https://www.boem.gov/renewable-energy/state-activities/oregon.*

Once BOEM has processed a bidder's BFF, the bidder will be allowed to log into *https://www.pay.gov* and submit a bid deposit. For purposes of this auction, BOEM will not consider BFFs submitted by bidders for previous lease sales. An original signed BFF may be mailed to BOEM's Pacific Region, Office of Strategic Resources, for certification. A signed copy of the form may be submitted in PDF format to *renewableenergypocs@boem.gov.* A faxed copy will not be accepted. Your BFF submission should be accompanied with a transmittal letter on company letterhead. The BFF is required to be executed by an authorized representative listed in the qualification package on file with BOEM in accordance with 18 U.S.C. 1001 (fraud and false statements). Additional information regarding the BFF may be found below in section IX, ''Bidder's Financial Form.''

ii. *Bid Deposit:* Each qualified bidder must submit a bid deposit of $2,000,000 in order to bid for one (1) Lease Area. Further information about bid deposits can be found below in section X, ''Bid Deposit''.

(4) *Notification of Eligibility for Bidding Credits:* Prior to the mock auction, BOEM will notify each bidder of its determination of eligibility for bidding credits for the auction.

(5) *Mock Auction:* BOEM will hold a mock auction that is open only to qualified bidders who have met the requirements and deadlines for auction participation, including submission of the bid deposit. The mock auction is intended to give bidders an opportunity to clarify auction rules, test the functionality of the auction software, and identify any potential issues that may arise during the auction. Final details of the mock auction will be provided in the FSN.

(6) *The Auction:* BOEM, through its contractor, will hold an auction as described in the FSN. The auction will take place no sooner than 30-calendar days following the publication of the FSN in the **Federal Register**. The estimated timeframes described in this PSN assume the auction will take place approximately 30-calendar days after the publication of the FSN. Final dates will be included in the FSN. BOEM will announce the provisional winners of the lease sale after the auction ends.

(7) *From the Auction to Lease Execution:*

i. *Refund Non-Winners:* Once the provisional winners have been announced, BOEM will provide the non-winners with a written explanation of why they did not win and will return their bid deposits.

ii. *Department of Justice (DOJ) Review:* DOJ will have up to 30-calendar days to conduct an antitrust review of the auction, pursuant to 43 U.S.C. 1337(c).

iii. *Delivery of the Lease:* BOEM will send three lease copies to each provisional winner, with instructions on how to execute the lease. Once the lease has been fully executed, a provisional winner becomes an auction winner. The first year's rent is due 45-calendar days after the auction winners receive the lease copies for execution.

iv. *Return the Lease:* Within 10-business days of receiving the lease copies, the auction winners must post financial assurance, pay any outstanding balance of their winning bids (*i.e.,* winning bid minus applicable bid deposit and any applicable non-monetary bidding credit), and sign and return the three executed lease copies. The winners may request extensions and BOEM may grant such extensions if BOEM determines that the delay was caused by events beyond the requesting winner's control, pursuant to 30 CFR 585.224(e).

v. *Execution of Lease:* Once BOEM has received the signed lease copies and verified that all other required materials have been received, BOEM will make a final determination regarding its issuance of the leases and will execute the leases, if appropriate.

VI. Withdrawal of Blocks

BOEM reserves the right to withdraw all or portions of the Lease Areas prior to executing the leases with the winning bidders.

VII. Lease Terms and Conditions

Along with this PSN, BOEM is making available the proposed terms, conditions, and stipulations for the commercial leases that would be offered through this proposed sale. BOEM reserves the right to require compliance with additional terms and conditions associated with the approval of a site assessment plan (SAP) and COP. The proposed lease is on BOEM's website at: *https://www.boem.gov/renewable-energy/state-activities/oregon.* Each lease will include the following attachments:

a. Addendum A (''Description of Leased Area and Lease Activities'');

b. Addendum B (''Lease Term and Financial Schedule'');

c. Addendum C (''Lease-Specific Terms, Conditions, and Stipulations''); and

d. Addendum D (''Project Easement(s)'').

VIII. Lease Financial Terms and Conditions

This section provides an overview of the required annual payments and financial assurance under the lease. Please see the proposed lease for more detailed information, including any changes from past practices.

(1) *Rent:* Pursuant to 30 CFR 585.224(b) and 585.503, the first year's rent payment of $3 per acre is due within 45-calendar days after the lessee receives the unexecuted lease copies from BOEM. Thereafter, annual rent payments are due on the anniversary of the effective date of the lease (the ''Lease Anniversary''). Once commercial operations under the lease begin, BOEM will charge rent only for the portions of the Lease Area remaining undeveloped (*i.e.,* non-generating acreage). For example, for the 61,203 acres of Lease Area OCS–P 0566 (Coos Bay), the rent payment would be $183,609 per year until commercial operations begin.

If the lessee submits an application for relinquishment of a portion of its leased area within the first 45-calendar days after receiving the lease copies from BOEM and BOEM approves that application, no rent payment would be due on the relinquished portion of the Lease Area. Later relinquishments of any portion of the Lease Area would reduce the lessee's rent payments starting in the year following BOEM's approval of the relinquishment.

A lease issued under this part confers on the lessee the right to one or more project easements, without further competition, for the purpose of installing gathering, transmission, and distribution cables, pipelines, and appurtenances on the OCS as necessary for the full enjoyment of the lease. A lessee must apply for the project easement as part of the COP or SAP, as provided under subpart F of 30 CFR part 585. The lessee also must pay rent for any project easement associated with the lease. Rent commences on the date that BOEM approves the COP that describes the project easement (or any modification of such COP that affects the easement acreage), as outlined in 30 CFR 585.507. If the COP revision results in increased easement acreage, additional rent would be required at the time the COP revision is approved. Annual rent for a project easement is the greater of $5 per acre per year or $450 per year.

(2) *Operating Fee:* For purposes of calculating the initial annual operating fee payment under 30 CFR 585.506, BOEM applies an operating fee rate to a proxy for the wholesale market value of the electricity expected to be

generated from the project during its first 12 months of operations. This initial payment will be prorated to reflect the period between the commencement of commercial operations and the Lease Anniversary. The initial annual operating fee payment will be due within 90-calendar days of the commencement of commercial operations. Thereafter, subsequent annual operating fee payments will be due on or before the Lease Anniversary.

The subsequent annual operating fee payments will be calculated by multiplying the operating fee rate by the imputed wholesale market value of the projected annual electric power production. For the purposes of this calculation, the imputed market value will be the product of the project's annual nameplate capacity, the total number of hours in a year (8,760), the capacity factor, and the annual average price of electricity derived from a regional wholesale power price index. For example, the annual operating fee for a 976-megawatt (MW) wind facility operating at a 40 percent capacity (*i.e.,* capacity factor of 0.4) with a regional wholesale power price of $40 per megawatt hour (MWh) and an operating fee rate of 0.02 would be calculated as follows:

$$\text{Annual Operating Fee} = 976\ \text{MW} \times 8{,}760\ \frac{\text{hrs}}{\text{year}} \times 0.4 \times$$

$$\frac{\$40}{\text{MWh}}\ \text{Power Price} \times 0.02 = \$2{,}735{,}923.20$$

i. *Operating Fee Rate:* The operating fee rate is the share of the imputed wholesale market value of the projected annual electric power production due to the Office of Natural Resources Revenue (ONRR) as an annual operating fee. For the Lease Areas, BOEM proposes to set the fee rate at 0.02 (2 percent) for the entire life of commercial operations.

ii. *Nameplate Capacity:* Nameplate capacity is the maximum rated electric output, expressed in MW, which the turbines of the wind facility under commercial operations can produce at their rated wind speed as designated by the turbine's manufacturer.

iii. *Capacity Factor:* BOEM proposes to set the capacity factor at 0.4 (*i.e.,* 40 percent) for the year in which the commercial operations begin and for the first 6 years of commercial operations on the lease. At the end of the sixth year, BOEM may adjust the capacity factor to reflect the performance over the previous 5 years based upon the actual metered electricity generation at the delivery point to the electrical grid. BOEM may make similar adjustments to the capacity factor once every 5 years thereafter.

iv. *Wholesale Power Price Index:* Under 30 CFR 585.506(c)(2)(i), the wholesale power price, expressed in dollars per MWh, is determined at the time each annual operating fee payment is due. For the leases offered in this sale the following table provides the proposed price data. A similar price dataset may also be used and may be posted by BOEM at *https://www.boem.gov* for reference.

Lease area name	Wholesale power price
Brookings, OCS–P 0567.	Mid-Columbia Hub.
Coos Bay, OCS–P 0566.	Mid-Columbia Hub.

(3) *Financial Assurance:* Within 10-business days after receiving the unexecuted lease copies and pursuant to 30 CFR 585.515–585.516, the provisional winners will be required to provide an initial lease-specific bond or other BOEM-approved financial assurance instrument in the amount of $100,000. The provisional winners may meet financial assurance requirements by posting a surety bond or other financial assurance instrument as detailed in 30 CFR 585.526–585.529. BOEM encourages the provisional winners to discuss financial assurance requirements with BOEM as soon as possible after the auction has concluded.

BOEM will base the amount of all SAP, COP, and decommissioning financial assurance on cost estimates for meeting all accrued lease obligations at the respective stages of development. The required amount of supplemental and decommissioning financial assurance will be determined on a case-by-case basis.

The financial terms described above can be found in addendum ''B'' of the lease, which is available at: *https://www.boem.gov/renewable-energy/state-activities/oregon.*

IX. Bidder's Financial Form

Each bidder must submit to BOEM the information listed in the BFF referenced in this PSN. A copy of the proposed form is available at: *https://www.boem.gov/renewable-energy/state-activities/oregon.* BOEM recommends that each bidder designate an email address in its BFF that the bidder will use to create an account in *https://www.pay.gov* (if it has not already done so). BOEM will not consider previously submitted BFFs for previous lease sales to satisfy the requirements of this auction. BOEM must receive each BFF, including any conceptual strategies, by the deadline set in the FSN. BOEM may consider BFFs, including any conceptual strategies, that are submitted after the deadline set in the FSN if BOEM determines that the failure to timely submit the BFF was caused by events beyond the bidder's control. The BFF is required to be executed by an authorized representative listed in the bidder's qualification package on file with BOEM.

X. Bid Deposit

Each qualified bidder must submit a bid deposit no later than the date listed in the FSN. Typically, the deadline is approximately 30-calendar days after the publication of the FSN. BOEM may consider extensions to this deadline only if BOEM determines that the failure to timely submit the bid deposit was caused by events beyond the bidder's control.

Following the auction, bid deposits will be applied against the winning bid and other obligations owed to BOEM. If a bid deposit exceeds that bidder's total financial obligation, BOEM will refund the balance of the bid deposit to the bidder. BOEM will refund bid deposits to the unsuccessful bidders once BOEM has announced the provisional winners.

If BOEM offers a lease to a provisional winner and that bidder fails to timely return the signed lease, establish financial assurance, or pay the balance of its bid, BOEM will retain the bidder's $2,000,000 bid deposit for the Lease Area. In such a circumstance, BOEM reserves the right to offer a lease to the

next highest bidder as determined by BOEM.

XI. Minimum Bid

The minimum bid is the lowest dollar amount per acre that BOEM will accept as a winning bid and is the amount at which BOEM will start the bidding in the auction. BOEM proposes a minimum bid of $50.00 per acre for this lease sale.

XII. Auction Procedures

(1) *Multiple-Factor Bidding Auction:* As authorized under 30 CFR 585.220(a)(4) and 585.221(a)(6), BOEM proposes to use a multiple-factor auction format for this lease sale. Under BOEM's proposal, the bidding system for this lease sale will be a multiple-factor combination of monetary and non-monetary factors. The bid made by a particular bidder in each round will represent the sum of the monetary factor (cash bid) and the value of any non-monetary factors in the form of bidding credits. BOEM proposes to start the auction using the minimum bid price for the Lease Area and to increase prices incrementally until no more than one bidder remains bidding on each Lease Area in the auction.

For this sale, BOEM is calculating bidding credits as a percentage of the whole bid, which is a change from the method used in recent sales, where bidding credits were calculated as a percentage of the cash portion of the bid. The intended purpose of this change is to simplify the bidding credit calculation.

BOEM is proposing to grant bidding credits to bidders that commit to any or all of the following:

i. Supporting workforce training programs for the floating offshore wind industry or supporting the development of a domestic supply chain for the floating offshore wind industry, or a combination of both;

ii. Establishing a Lease Area Use Community Benefit Agreement (Lease Area Use CBA) with one or more communities, stakeholder groups, or Tribal entities whose use of the geographic space of the Lease Area, or whose use of resources harvested from that geographic space, is expected to be impacted by the lessee's potential offshore wind development; or

iii. Establishing a General Community Benefit Agreement (General CBA) with one or more communities, Tribes, or stakeholder groups that are expected to be affected by the potential impacts on the marine, coastal, and/or human environment (such as impacts on visual or cultural resources) from activities resulting from lease development that are not otherwise addressed by the Lease Area Use CBA.

These bidding credits are intended to:

i. Enhance, through training, the floating offshore wind workforce and/or enhance the establishment of a domestic supply chain for floating offshore wind manufacturing, assembly, or services, both of which will contribute to the expeditious and orderly development of floating offshore wind resources on the OCS;

ii. Support the expeditious and orderly development of OCS resources by mitigating potential direct impacts from proposed projects and encouraging the investment in infrastructure germane to the floating offshore wind industry;

iii. Mitigate any potential impacts to a community or stakeholder group from renewable energy activity or structures on the Lease Area, and particularly to assist fishing and related industries to manage transitions, gear changes, or other similar impacts which may arise from the development of the Lease Area; and

iv. Mitigate any potential impacts to a community or stakeholder group from floating offshore wind energy development, and particularly to assist local communities to manage transitions, changes, or other similar impacts which may arise from the development of the Lease Area.

(2) *Changes to Auction Rules:* BOEM will be employing new auction software for sales held in 2024. The auction format remains an ascending clock auction with multiple-factor bidding. The new software makes five primary changes to the ascending clock auction rules.

i. If a bidder decides to bid on a different Lease Area in a subsequent round of the auction, it may submit a bid to reduce demand for the Lease Area it bid on in the previous round and, simultaneously, submit a bid to increase demand for another Lease Area. This allows a bidder the option to switch to another Lease Area if the price of the first Lease Area exceeds the specified bid price.

ii. Provisional winners will no longer be determined using a two-step process. The auction rules are implemented in such a way that, when the auction concludes, the bidder who remains on a Lease Area after the final round becomes its provisional winner. There will be no additional processing step.

iii. The auction will use a ''second price'' rule. A given Lease Area will be won by the bidder that submitted the highest bid amount for the Lease Area, but the winning bidder will pay the highest bid amount at which there was competition (*i.e.,* the ''second price'').

iv. For sales in which bidders are allowed to bid for and potentially acquire two or more Lease Areas, any bid for two Lease Areas will be treated as independent bids for those Lease Areas, rather than as a package bid.

v. Each bidder's bidding credit will be expressed directly as a percentage of the final price for the lease.

All potential bidders should review the complete Auction Procedures for Offshore Wind Lease Sales (Version 1) located at: *https://www.boem.gov/renewable-energy/lease-and-grant-information.*

(3) *The Auction:* Using an online bidding system to host the auction, BOEM will start the bidding for the Lease Areas as described below.

Lease area name	Lease area ID	Acres	Minimum bid
Brookings	OCS–P 0567	133,792	$6,689,600
Coos Bay	OCS–P 0566	61,203	3,060,150

The auction will be conducted in a series of rounds. Before each round, the auction system will announce the prices for each Lease Area offered in the auction. In Round 1, there is a single price for each Lease Area equal to the minimum bid price (also known as the 'opening price' or 'clock price of Round 1'). Each bidder can bid, at the opening price, for one Lease Area. After Round 1, the bidder's processed demand is one for the Lease Area for which the bidder bid in Round 1.[1]

Starting in Round 2, each Lease Area is assigned a range of prices for the round. The start-of-round price is the lowest price in the range, and the clock price is the highest price in the range.

[1] Bidders specify their demand for a lease area with either a 0 or 1 in the auction system. A demand of 1 indicates the lease area that they are bidding on. Processed demand is the demand, either 0 or 1, of a bidder for a lease area following the processing of the bids for the round.

A bidder still eligible to bid after the previous round can either continue bidding at the new round's clock price for the same Lease Area for which the bidder's processed demand is one or submit a bid to reduce demand for that Lease Area at any price in the range for that round. A bid to reduce demand at some price indicates that the bidder is not willing to acquire that Lease Area at a price exceeding the specified bid price. A bidder that bids to reduce demand for a Lease Area could bid to increase demand for the other Lease Area in the same round.

If an eligible bidder does not place a bid during the round for the Lease Area for which the bidder's processed demand is one, the auction system will consider this a request to reduce demand for that Lease Area at the start-of-round price. That bidder can nonetheless win that Lease Area if it is the last remaining bidder for that Lease Area.

After each round, the auction system processes the bids and determines each bidder's processed demand for each Lease Area and the posted prices for the Lease Areas. The bidder's eligibility for the next round will equal the number of Lease Areas for which the bidder had a processed demand of one. If, after any round, a bidder's processed demand is zero for both Lease Areas, the bidder's eligibility drops to zero and the bidder can no longer bid in the auction. The posted price is the price determined for each Lease Area after processing of all bids for a round. If only one bidder remains on a Lease Area, the posted price reflects the ''second price'' (*i.e.,* the highest price at which there was competition for the Lease Area).[2]

If, after the bids for the round have been processed, there is no Lease Area with excess demand (*i.e.,* no lease areas have more than one bidder), the auction will end. When this occurs, each bidder with a processed demand of one for a Lease Area will become the provisional winner for that Lease Area. Otherwise, the auction will continue with a new round in which the start-of-round price for each Lease Area equals the posted price of the previous round.

The increment by which the clock price exceeds the start-of-round price will be determined based on several factors, including, but not necessarily limited to, the expected time needed to conduct the auction and the number of rounds that have already occurred. BOEM reserves the right to increase or decrease the increment as it deems appropriate.

The provisional winners of the auction will pay the final posted price (less any applicable bidding credit), or risk forfeiting their bid deposits. A provisional winner will be disqualified if it is subsequently found to have violated auction rules or BOEM regulations, or otherwise engaged in conduct detrimental to the integrity of the competitive auction.

If a bidder submits a bid that BOEM determines to be a provisionally winning bid, the bidder must sign the applicable lease documents, post financial assurance, and submit the outstanding balance of its winning bid (*i.e.,* winning monetary bid minus the applicable bid deposit and the value of bidding credits, as applicable) within 10-business days of receiving the lease copies, pursuant to 30 CFR 585.224. BOEM reserves the right to not issue the lease to the provisionally winning bidder if that bidder fails to: timely execute three copies of the lease and return them to BOEM, timely post adequate financial assurance, timely pay the balance of its winning bid, or otherwise comply with applicable regulations or the terms of the FSN. In any of these cases, the bidder will forfeit its bid deposit and BOEM reserves the right to offer a lease to the next highest eligible bidder as determined by BOEM.

BOEM will publish the names of the provisional winners of the Lease Areas and the associated prices shortly after the conclusion of the sale. Full bid results, including round-by-round results of the entire sale, will be published on BOEM's website after a review of the results and announcement of the provisional winners.

Additional Information Regarding the Auction Format:

i. *Authorized Individuals and Bidder Authentication:* An entity that is eligible to participate in the auction will identify on its BFF up to three individuals who will be authorized to bid on behalf of the company, including their names, business telephone numbers, and email addresses. All individuals will log into the auction system using *Login.gov.* Prior to the auction, each individual listed on the BFF form must obtain a Fast Identity Online (FIDO) compliant security key,[3] and must register this security key on *Login.gov* using the same email address that was listed in the BFF. The *Login.gov* registration, together with the FIDO-compliant security key, will enable the individual to log into the auction system. BOEM will provide information on this process on its website.

After BOEM has processed the bid deposits, the auction contractor will send an email to the authorized individuals, inviting them to practice logging into the auction website on a specific day in advance of the mock auction. The *Login.gov* login process, along with the authentication for the auction helpdesk, will also be tested during the mock auction.

If an eligible bidder fails to submit a bid deposit or does not participate in the first round of the auction, BOEM will deactivate that bidder's login information.

ii. *Timing of Auction:* The FSN will provide specific information regarding when bidders can enter the auction system and when the auction will start.

iii. *Messaging Service:* BOEM and the auction contractors will use the auction system's messaging service to keep bidders informed on issues of interest during the auction. For example, BOEM could change the schedule at any time, including during the auction. If BOEM changes the schedule during an auction, it will use the messaging feature to notify bidders that a revision has been made and will direct bidders to the relevant page. BOEM will also use the messaging system for other updates during the auction.

iv. *Bidding Rounds:* Bidders are allowed to place bids or to change their bids at any time during the bidding round. At the top of the bidding page, a countdown clock shows how much time remains in each round. Bidders will have until the end of the round to place bids. Bidders should do so according to the procedures described in the FSN and the Auction Procedures for Offshore Wind Lease Sales. Information about the round results will be made available only after the round has closed, so there is no strategic advantage to placing bids early or late in the round.

The Auction Procedures for Offshore Wind Lease Sales elaborates on the auction procedures described in this PSN. In the event of any inconsistency among the Auction Procedures for Offshore Wind Lease Sales, the Bidder

[2] The Auction Procedures for Offshore Wind Lease Sales provides details on how bids are prioritized and processed.

[3] FIDO keys are produced by many manufacturers, such as Yubico and Google. They are widely available and can easily be purchased from Amazon, Best Buy, Walmart, or any other seller of electronics. The latest generation of the FIDO standard is FIDO2, and each authorized individual should obtain the key compliant with FIDO2 authentication standard. FIDO keys are typically inserted into a computer's USB port, so the authorized individual should obtain a FIDO key compatible with their computer (USB–A or USB–C) or a USB adapter, as necessary.

Manual, and the FSN, the FSN is controlling.[4]

v. *Alternate Bidding Procedures:* Redundancy is the most effective way to mitigate technical and human issues during an auction. BOEM strongly recommends that bidders consider authorizing more than one individual to bid in the auction—and confirming during the mock auction that each individual is able to access the auction system. A mobile hotspot or other form of wireless access is helpful in case a company's main internet connection should fail. As a last resort, an authorized individual facing technical issues may request to submit its bid by telephone. In order to be authorized to place a telephone bid, an authorized individual must call the help desk number listed in the auction manual before the end of the round. BOEM will authenticate the caller's identity, including requiring the caller to provide a code from the software token. The caller must also explain the reasons why a telephone bid needs to be submitted. BOEM may, in its sole discretion, permit or refuse to accept a request for the placement of a bid using this alternate telephonic bidding procedure. The auction help desk requires codes from the Google Authenticator application (app) as part of its procedure for identifying individuals who call for assistance. *Prior to the auction,* all individuals listed on the BFF should download the Google Authenticator™ mobile app [5] onto their smartphone or tablet.[6] The first time the individual logs into the auction system, the system will provide a QR token to be read into the Google Authenticator app. This token is unique to the individual and enables the Google Authenticator app to generate time-sensitive codes that will be recognized by the auction system. When an individual calls the auction help desk, the current code from the app must be provided to the help desk representative as part of the user authentication process. BOEM will provide information on this process on its website.

(4) *15 Percent Bidding Credit for Workforce Training or Supply Chain Development or a Combination of Both:* This proposed bidding credit will allow a bidder to receive a credit of 15 percent in exchange for a commitment to make a qualifying monetary contribution (''Contribution''), in the same amount as the bidding credit received, to programs or initiatives that support workforce training programs for the U.S. floating offshore wind industry or development of a U.S. domestic supply chain for the floating offshore wind industry, or both, as described in the BFF addendum and the lease. To qualify for this credit, the bidder must commit to the bidding credit requirements on the BFF and submit a conceptual strategy as described in the BFF addendum.

i. As proposed, the Contribution to workforce training must result in a better trained and/or larger domestic floating offshore wind workforce that will provide for more efficient operations via increasing the supply of fully trained personnel. Training of existing lessee employees, lessee contractors, or employees of affiliated entities will not qualify as an appropriate contribution toward fulfilling this bidding credit commitment.

ii. The Contribution to domestic supply chain development must result in overall benefits to the U.S. floating offshore wind supply chain available to all potential purchasers of floating offshore wind services, components, or subassemblies, not solely the lessee's project; and either: (i) the demonstrable development of new domestic capacity (including vessels) or the demonstrable buildout of existing capacity; or (ii) an improved floating offshore wind domestic supply chain by reducing the upfront capital or certification cost for manufacturing floating offshore wind components, including the building of facilities, the purchasing of capital equipment, and the certifying of existing manufacturing facilities.

iii. Contributions cannot be used to satisfy private cost shares for any Federal tax or other incentive programs where cost sharing is a requirement. No portion of the Contribution may be used to meet the requirements of any other bidding credits for which the lessee qualifies.

iv. Bidders interested in obtaining a bidding credit could choose to contribute to workforce training programs, domestic supply chain initiatives, or a combination of both. The conceptual strategy must describe verifiable actions that the lessee will take that will allow BOEM to confirm compliance once the lessee has submitted documentation that shows it has satisfied the bidding credit commitment. The Contribution must be tendered in full, and the lessee must provide documentation evidencing it has made the Contribution and complied with applicable requirements, no later than the date the lessee submits its first Facility Design Report (FDR).

v. As proposed, Contributions to workforce training must promote and support one or more of the following purposes: (i) Union apprenticeships, labor management training partnerships, stipends for workforce training, or other technical training programs or institutions focused on providing skills necessary for the planning, design, construction, operation, maintenance, or decommissioning of floating offshore wind energy projects in the United States; (ii) Maritime training necessary for the crewing of vessels to be used for the construction, servicing, and/or decommissioning of wind energy projects in the United States; (iii) Training workers in skills or techniques necessary to manufacture or assemble floating offshore wind components, subcomponents, or subassemblies. Examples of areas involving these skills and techniques include welding, wind energy technology, hydraulic maintenance, braking systems, mechanical systems that include blade inspection and maintenance, or computers and programmable logic control systems; (iv) Tribal floating offshore wind workforce development programs or training for employees of an Indian Economic Enterprise [7] in skills necessary in the floating offshore wind industry; or (v) Training in any other job skills that the lessee can demonstrate are necessary for the planning, design, construction, operation, maintenance, or decommissioning of floating offshore wind energy projects in the United States.

vi. As proposed, Contributions to domestic supply chain development must promote and support one or more of the following: (i) Development of a domestic supply chain for the floating offshore wind industry, including manufacturing of components and sub-assemblies and the expansion of related services; (ii) Domestic Tier 2 and Tier 3 floating offshore wind component suppliers and domestic Tier-1 supply chain efforts, including quay-side fabrication; [8] (iii) Technical assistance grants to help U.S. manufacturers re-tool or certify (*e.g.,* ISO–9001) for floating offshore wind manufacturing; (iv) Development of Jones Act-compliant

[4] The Bidder Manual is provided to the auction participants in advance of the auction.

[5] Google Authenticator must be installed from either the Apple App Store or the Google Play Store.

[6] Installing the Google Authenticator app is required only if the app has not already been installed on the smartphone or tablet.

[7] *https://www.bia.gov/sites/default/files/dup/assets/as-ia/ieed/Primer%20on%20Buy%20Indian%20Act%20508%20Compliant%202.6.18(Reload).pdf.*

[8] Tier-1 denotes the primary offshore wind components such as the blades, nacelles, towers, foundations, and cables. Tier 2 subassemblies are the systems that have a specific function for a Tier 1 component. Tier 3 subcomponents are commonly available items that are combined into Tier 2 subassemblies, such as motors, bolts, and gears.

vessels for the construction, servicing, and/or decommissioning of wind energy projects in the United States; (v) Purchase and installation of lift cranes or other equipment capable of lifting or moving foundations, towers, and nacelles quayside, or lift cranes on vessels with these capabilities; (vi) Port infrastructure directly related to floating offshore wind component manufacturing or assembly of major floating offshore wind facility components; (vii) Establishing a new or existing bonding support reserve or revolving fund available to all businesses providing goods and services to offshore wind energy companies, including disadvantaged businesses and/or Indian Economic Enterprises; or (viii) Other supply chain development efforts that the lessee can demonstrate advance the manufacturing of floating offshore wind components or subassemblies or the provision of floating offshore wind services in the United States.

vii. *Documentation:* If a lease is issued pursuant to a winning bid that includes a bidding credit for workforce training or supply chain development, the lessee must provide documentation showing that the lessee has met the financial commitment before the lessee submits the first FDR for the lease. The documentation must allow BOEM to objectively verify the amount of the Contribution and the beneficiary(ies) of the Contribution.

At a minimum, the documentation must include: all written agreements between the lessee and beneficiary(ies) of the Contribution, which must detail the amount of the Contribution(s) and how it will be used by the beneficiaries of the Contribution(s) to satisfy the goals of the bidding credit for which the Contribution was made; all receipts documenting the amount, date, financial institution, and the account and owner of the account to which the Contribution was made; and sworn statements by the entity that made the Contribution and the beneficiary(ies) of the Contribution attesting that all information provided in the above documentation is true and accurate. The documentation must describe how the funded initiative or program has advanced, or is expected to advance, U.S. floating offshore wind workforce training or supply chain development. The documentation must also provide qualitative and/or quantitative information that includes the estimated number of trainees or jobs supported, or the estimated leveraged supply chain investment resulting or expected to result from the Contribution. The documentation must contain any information called for in the conceptual strategy that the lessee submitted with its BFF and allow BOEM to objectively verify: (i) the amount of the Contribution and the beneficiary(ies) of the Contribution, and (ii) compliance with the bidding credit criteria provided in addendum ''C'' of the lease. If the lessee's implementation of its conceptual strategy changes due to market needs or other factors, the lessee must explain the changed approach. BOEM reserves all rights to determine that bidding credit criteria have not been satisfied if changes from the lessee's conceptual strategy result in the lessee not meeting the criteria for the bidding credit described in addendum ''C'' of the lease.

i. *Enforcement:* The commitment for the bidding credit must be made in the BFF and included in a lease addendum that will bind the lessee and all future assignees of the lease. If BOEM were to determine that a lessee or assignee had failed to satisfy the requirements of the bidding credit, or if a lessee were to relinquish or otherwise fail to develop the lease by the tenth anniversary date of lease issuance, the amount corresponding to the bidding credit awarded will be immediately due and payable to ONRR with interest from the lease Effective Date. The interest rate will be the underpayment interest rate identified by ONRR. The lessee would not be required to pay said amount if the lessee satisfied its bidding credit requirements but failed to develop the lease by the tenth Lease Anniversary. BOEM could, at its sole discretion, extend the documentation deadline beyond the first FDR submission or extend the lease development deadline beyond the 10-year timeframe.

(5) *5 percent Bidding Credit for Lease Area Use CBA:* The second bidding credit proposed will allow a bidder to receive a credit of 5 percent of its bid in exchange for a commitment to contribute to an existing Lease Area Use CBA or a commitment to enter into a new Lease Area Use CBA with a community or stakeholder group whose use of the geographic space of the Lease Area, or whose use of resources harvested from that geographic space, is expected to be impacted by the lessee's potential offshore wind development. To qualify for the credit, the bidder must commit to the bidding credit requirements in the BFF and submit a conceptual strategy, as described in the BFF addendum.

(1) Bidders committing to use the Lease Area Use CBA bidding credit must submit their conceptual strategy, along with their BFF, as further described below and in the BFF addendum. The conceptual strategy must describe the actions that the lessee intends to take that will allow BOEM to verify compliance when the lessee seeks to demonstrate satisfaction of the requirements for the bidding credit. The lessee must provide documentation showing that the lessee has met the commitment and complied with the applicable bidding credit requirements before the lessee submits the lease's first FDR or before the tenth Lease Anniversary, whichever is sooner.

(2) *Documentation:* As proposed, if a lease is awarded pursuant to a winning bid that includes a Lease Area Use CBA bidding credit, the lessee must provide written documentation to BOEM demonstrating execution of the Lease Area Use CBA commitment no later than submission of the lessee's first FDR or before the tenth Lease Anniversary, whichever is sooner. The documentation must enable BOEM to objectively verify the Contribution has met all applicable requirements outlined in addendum ''C'' of the lease. At a minimum, this documentation must include:

a. All written agreements between the lessee and beneficiary(ies), including the executed Lease Area Use CBA;

b. A description of work done with impacted communities, including the monetary and non-monetary commitments that reflect the value of the bidding credit received; and

c. Sworn statements by the Lease Area Use CBA signatories or their assignees, attesting to the truth and accuracy of all the information provided in the above documentation.

The documentation must contain any information specified in the conceptual strategy that was submitted with the BFF. If the lessee's implementation of its conceptual strategy changes due to market needs or other factors, the lessee must explain this change. BOEM reserves the right to determine that the bidding credit has not been satisfied if changes from the lessee's conceptual strategy result in the lessee not meeting the criteria for the bidding credit described in addendum ''C'' of the lease.

(3) *Enforcement:* The commitment for the bidding credit will be made in the BFF and will be included in a lease addendum that will bind the lessee and all future assignees of the lease. If BOEM were to determine that a lessee or assignee had failed to satisfy the requirements of the bidding credit, or if a lessee were to relinquish or otherwise fail to develop the lease by the submission of the lessee's first FDR or by the tenth anniversary date of lease issuance, the amount corresponding to the bidding credit awarded will be

immediately due and payable to ONRR with interest from the lease Effective Date. The interest rate will be the underpayment interest rate identified by ONRR. The lessee will not be required to pay said amount if the lessee satisfied its bidding credit requirements but failed to develop the lease by the tenth Lease Anniversary. BOEM could, at its sole discretion, extend the documentation deadline beyond the first FDR submission or extend the lease development deadline beyond the 10-year timeframe.

(6) *5 percent Bidding Credit for General CBA:* The third bidding credit proposed would allow a bidder to receive a credit of 5 percent of its bid in exchange for a commitment to contribute to an existing General CBA or a commitment to enter into a new General CBA with a community or stakeholder group that is expected to be impacted by the lessee's potential floating offshore wind development. To qualify for the credit, the bidder must commit to the bidding credit requirements in the BFF and submit a conceptual strategy as described in the BFF addendum. Bidders committing to use the General CBA bidding credit must submit their conceptual strategy along with their BFF, further described below and in the BFF addendum. The conceptual strategy must describe the actions that the lessee intends to take that will allow BOEM to verify compliance when the lessee seeks to demonstrate satisfaction of the requirements for the bidding credit.

(1) *Documentation:* As proposed, if a lease is awarded pursuant to a winning bid that includes a General CBA bidding credit, the lessee must provide written documentation to BOEM demonstrating execution of the General CBA commitment no later than submission of the lessee's first FDR or before the tenth Lease Anniversary, whichever is sooner. The documentation must enable BOEM to objectively verify that the Contribution has met all applicable requirements outlined in addendum ''C'' of the lease. At a minimum, this documentation must include:

a. All written agreements between the lessee and beneficiary(ies), including the executed General CBA;

b. A description of work with impacted communities to reach monetary and non-monetary commitments that reflect the value of the bidding credit received;

c. Sworn statements by the Lease Area Use CBA signatories or their assignees, attesting to the truth and accuracy of all the information provided in the above documentation.

The documentation must contain any information specified in the conceptual strategy that was submitted with the BFF. If the lessee's implementation of its conceptual strategy changes due to market needs or other factors, the lessee will need to explain this change. BOEM reserves the right to determine that the bidding credit has not been satisfied if changes from the lessee's conceptual strategy result in the lessee not meeting the criteria for the bidding credit described in addendum ''C'' of the lease.

(2) *Enforcement:* The commitment for the bidding credit must be made in the BFF and will be included in a lease addendum that will bind the lessee and all future assignees of the lease. If BOEM were to determine that a lessee or assignee had failed to satisfy the requirements of the bidding credit, or if a lessee were to relinquish or otherwise fail to develop the lease by the tenth anniversary date of lease issuance, the amount corresponding to the bidding credit awarded will be immediately due and payable to ONRR with interest from the lease Effective Date. The interest rate would be the underpayment interest rate identified by ONRR. The lessee will not be required to pay said amount if the lessee satisfied its bidding credit requirements but failed to develop the lease by the tenth Lease Anniversary. BOEM could, at its sole discretion, extend the documentation deadline beyond the first FDR submission or extend the lease development deadline beyond the 10-year time.

XIII. Rejection or Non-Acceptance of Bids

BOEM reserves the right and authority to reject any and all bids that do not satisfy the requirements and rules of the auction, the FSN, or applicable regulations and statutes.

XIV. Anti-Competitive Review

Bidding behavior in this sale is subject to Federal antitrust laws. Following the auction, but before the acceptance of bids and the issuance of the lease, BOEM must ''allow the Attorney General, in consultation with the Federal Trade Commission, thirty days to review the results of [the] lease sale.'' 43 U.S.C. 1337(c)(1). If a provisional winner is found to have engaged in anti-competitive behavior in connection with this lease sale, BOEM may reject its provisionally winning bid. Compliance with BOEM's auction procedures and regulations is not an absolute defense against violations of antitrust laws.

Anti-competitive behavior determinations are fact specific. However, such behavior may manifest itself in several different ways, including, but not limited to:

a. An express or tacit agreement among bidders not to bid in an auction, or to bid a particular price;

b. An agreement among bidders not to bid against each other; or

c. Other agreements among bidders that have the potential to affect the final auction price.

Pursuant to 43 U.S.C. 1337(c)(3), BOEM may decline to award a lease if the Attorney General, in consultation with the Federal Trade Commission, determines that awarding the lease may be inconsistent with antitrust laws.

For more information on whether specific communications or agreements could constitute a violation of Federal antitrust law, please see *https://www.justice.gov/atr* and consult legal counsel.

XV. Process for Issuing the Lease

Once all post-auction reviews have been completed to BOEM's satisfaction, BOEM will issue three unsigned copies of the lease to the provisional winner. Within 10-business days after receiving the lease copies, the provisional winner must:

a. Execute and return the lease copies on the bidder's behalf;

b. File financial assurance, as required under 30 CFR 585.515–537; and

c. Pay by electronic funds transfer (EFT) the balance owed (the winning cash bid minus the applicable bid deposit). BOEM will require bidders to use EFT procedures (not *https://www.pay.gov,* the website bidders used to submit bid deposits) for payment of the balance, following the detailed instructions available on ONRR's website at: *https://onrr.gov/paying/payment-options?tabs=renewable-energy,bid-deposit-options.*

BOEM will not execute the lease until the three requirements above have been satisfied, BOEM has accepted the provisionally winning bidder's financial assurance pursuant to 30 CFR 585.515, and BOEM has processed the provisionally winning bidder's payment. BOEM may extend the 10-business-day deadline for signing a lease, filing the required financial assurance, and paying the balance owed if BOEM determines, in its sole discretion, that the provisionally winning bidder's inability to comply with the deadline was caused by events beyond the provisionally winning bidder's control pursuant to 30 CFR 585.224(e).

If the provisional winner does not meet these requirements or otherwise fails to comply with applicable regulations or the terms of the FSN,

BOEM reserves the right to not issue the lease to that bidder. In such a case, the provisional winner will forfeit its bid deposit. Also, in such a case, BOEM reserves the right to offer the lease to the next highest eligible bidder as determined by BOEM.

Within 45-calendar days after receiving the lease copies, the provisional winner must pay the first year's rent using the ''ONRR Renewable Energy Initial Rental Payments'' form available at: *https://www.pay.gov/public/form/start/27797604/.*

Subsequent annual rent payments must be made following the detailed instructions available on ONRR's website at: *https://onrr.gov/paying/payment-options?tabs=rent-payments.*

XVI. Non-Procurement Debarment and Suspension Regulations

Pursuant to 43 CFR part 42, subpart C, an OCS renewable energy lessee must comply with the Department of the Interior's non-procurement debarment and suspension regulations at 2 CFR parts 180 and 1400. The lessee must also communicate this requirement to persons with whom the lessee does business relating to this lease by including this requirement as a term or condition in their contracts and other transactions.

XVII. Final Sale Notice

The development of the FSN will be informed through the EA, related consultations, and comments received during the PSN comment period. The FSN will provide the final details concerning the offering and issuance of an OCS commercial wind energy lease for the Lease Areas offshore Oregon. The FSN will be published in the **Federal Register** at least 30-calendar days before the lease sale is conducted and will provide the date and time of the auction.

XVIII. Changes to Auction Details

BOEM has the discretion to change any auction detail specified in the FSN, including the date and time, if events outside BOEM's control have been found to interfere with a fair and proper lease sale. Such events may include, but are not limited to, natural disasters (*e.g.,* earthquakes, hurricanes, floods, and blizzards), wars, riots, acts of terrorism, fire, strikes, civil disorder, Federal Government shutdowns, cyberattacks against relevant information systems, or other events of a similar nature. In case of such events, BOEM will notify all qualified bidders via email, phone, and BOEM's website at: *https://www.boem.gov/renewable-energy/state-activities/oregon.* Bidders should call BOEM's Auction Manager at (703) 787–1121 if they have concerns.

XIX. Appeals

Reconsideration of rejected bid procedures are provided in BOEM's regulations at 30 CFR 585.118(c) and 585.225. BOEM's decision on a bid is the final action of the Department of the Interior, and is not subject to appeal to the Office of Hearings and Appeals, but an unsuccessful bidder may apply for reconsideration by the Director under 30 CFR 585.225 as follows:

a. If BOEM rejects your bid, BOEM will provide a written statement of the reasons and will refund any money deposited with your bid, without interest.

b. You may ask the BOEM Director for reconsideration, in writing, within 15-business days of bid rejection. The Director will send you a written response either affirming or reversing the rejection.

XX. Public Participation

BOEM will make all comments publicly available on *https://www.regulations.gov* under the docket number and will consider each comment prior to publication of the FSN. BOEM discourages anonymous comments; please include your name, address, and telephone number or email address as part of your comment. You should be aware that your entire comment, including your name, address, and any other personally identifiable information (PII) included in your comment, may be made publicly available at any time.

For BOEM to consider withholding from disclosure your PII, you must identify, in a cover letter, any information contained in the submittal of your comments that, if released, would constitute a clearly unwarranted invasion of your personal privacy. You must also briefly describe any possible harmful consequences of the disclosure of information, such as embarrassment, injury, or other harm.

Even if BOEM withholds your information in the context of this PSN, your comment is subject to the Freedom of Information Act (FOIA). If your submission is requested under FOIA, BOEM will withhold your information only if it determines that one of the FOIA's exemptions to disclosure applies. BOEM will make such a determination in accordance with the Department of the Interior's FOIA regulations and applicable law.

BOEM will make available for public inspection, in their entirety, all comments submitted by organizations and businesses, or by individuals identifying themselves as representatives of organizations or businesses.

XXI. Protection of Privileged and Confidential Information

BOEM will protect privileged and confidential information that you submit consistent with FOIA and 30 CFR 585.113. Exemption 4 of FOIA applies to ''trade secrets and commercial or financial information obtained from a person'' that are privileged or confidential. (5 U.S.C. 552(b)(4)). If you wish to protect the confidentiality of any information, clearly mark it ''Contains Privileged or Confidential Information'' and consider submitting such information as a separate attachment. BOEM will not disclose such information, except as required by FOIA. Information that is not labeled as privileged or confidential may be regarded by BOEM as suitable for public release. Further, BOEM will not treat as confidential aggregate summaries of otherwise non-confidential information.

Access to Information (54 U.S.C. 307103): BOEM may, after consultation with the Secretary of the Interior, withhold the location, character, or ownership of historic properties if it determines that disclosure may, among other things, cause a significant invasion of privacy, risk harm to the historic resources, or impede the use of a traditional religious site by practitioners. Tribes and other interested parties should designate such information that they wish to be withheld as confidential and provide the reasons why BOEM should do so.

Authority: 43 U.S.C. 1337(p); 30 CFR 585.211 and 585.216.

Elizabeth Klein,

Director, Bureau of Ocean Energy Management.

BILLING CODE 4340–98–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2023–0065]

Notice of Availability of a Draft Environmental Assessment for Commercial Wind Lease Issuance on the Pacific Outer Continental Shelf, Oregon

AGENCY: Bureau of Ocean Energy Management, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: The Bureau of Ocean Energy Management (BOEM) announces the availability of a draft environmental assessment (EA) to consider the potential environmental impacts associated with possible wind energy-related leasing and grant issuance, site assessment, and site characterization activities on the U.S. Pacific Outer Continental Shelf (OCS) offshore Oregon. This notice of availability (NOA) announces the start of the public review and comment period, as well as the dates and times for public meetings on the draft EA. After BOEM holds a public meeting and addresses public comments submitted during the review period, BOEM will publish a final EA. The EA will inform BOEM's decision on whether to issue wind energy leases and grants in the Pacific wind energy areas (WEAs) offshore Oregon.

DATES: Comments must be received no later than 30 days after publication date.

BOEM's virtual public meeting will be held on the following date at the time (Pacific time) indicated.

- Tuesday, May 21, 2024, 1 p.m.

Please go to *https://www.boem.gov/oregon* for meeting link, dates, times and for additional information and updates. Meetings are open to the public and free to attend. Pre-registration is not required to attend.

ADDRESSES: The draft EA and detailed information about BOEM's actions related to offshore wind energy planning in Oregon can be found on BOEM's website at *https://www.boem.gov/renewable-energy/state-activities/oregon.* Comments can be submitted in any of the following ways:

- Through the *regulations.gov* web portal: Navigate to *https://www.regulations.gov* and search for docket no. BOEM–2023–0065. Click on the ''Comment'' button below the document link and follow online instructions. Enter your information and comment, then click ''Submit Comment.'' A commenter's checklist is available on the comment web page;
- Orally during the public meetings identified in this announcement; or
- In written form by mail or any other delivery service, enclosed in an envelope labeled ''Oregon Wind Leasing EA'' and addressed to Chief, Environmental Analysis Section, Bureau of Ocean Energy Management, Camarillo, California Office, 760 Paseo Camarillo, Suite 102, Camarillo, CA 93010.

For more information about submitting comments, please see ''Information on Submitting Comments'' under the **SUPPLEMENTARY INFORMATION** heading below.

FOR FURTHER INFORMATION CONTACT: Lisa Gilbane, Chief, Environmental Analysis Section, Bureau of Ocean Energy Management, Camarillo, California Office, 760 Paseo Camarillo, Suite 102, Camarillo, CA 93010, (805) 384–6387 or *lisa.gilbane@boem.gov.*

SUPPLEMENTARY INFORMATION: The draft EA analyzes the proposed action, which is the issuance of wind energy leases within the Oregon WEAs, and the no action alternative. The lease sale itself would not authorize any activities on the OCS. Therefore, the EA considers the reasonably foreseeable environmental consequences of site characterization surveys (*i.e.,* biological, archeological, geological and geophysical surveys, and core samples) and site assessment activities (*i.e.,* installation of meteorological buoys), which are expected to take place following lease issuance. Under the National Environmental Policy Act and its implementing regulations, BOEM is preparing an EA for this proposed action to assist the agency's planning and decision-making (40 CFR 1501.5(b)).

Availability of the Draft EA: The draft EA and associated information are available on BOEM's website at: *https://www.boem.gov/renewable-energy/state-activities/oregon.*

Information on Submitting Comments: All interested parties are requested to comment on the EA document and appendices. For information on how to submit comments, see the **ADDRESSES** section above.

Freedom of Information Act: BOEM will protect privileged or confidential information that you submit as required by the Freedom of Information Act (FOIA). Exemption 4 of FOIA applies to trade secrets and commercial or financial information that is privileged or confidential. If you wish to protect the confidentiality of such information, clearly label it and request that BOEM treat it as confidential. BOEM will not disclose such information if BOEM determines under 30 CFR 585.114(b) that it qualifies for exemption from disclosure under FOIA. Please label privileged or confidential information ''Contains Confidential Information'' and consider submitting such information as a separate attachment.

BOEM will not treat as confidential any aggregate summaries of information or any comments not containing privileged or confidential information. Information that is not labeled as privileged or confidential may be regarded by BOEM as suitable for public release.

Personally Identifiable Information: BOEM encourages you not to submit anonymous comments. Please include your name and address as part of your comment. You should be aware that your entire comment, including your name, address, and any personally identifiable information (PII) included in your comment, may be made publicly available. All submissions from identified individuals, businesses, and organizations will be available for public viewing at *https://www.regulations.gov.*

For BOEM to consider withholding your PII from disclosure, you must identify any information contained in your comments that, if released, would constitute a clearly unwarranted invasion of your personal privacy. You must also briefly describe any possible harmful consequences of the disclosure of information, such as embarrassment, injury, or other harm.

Even if BOEM withholds your information in the context of this notice, your submission is subject to FOIA. If your submission is requested under FOIA, your information will only be withheld if a determination is made that one of FOIA's exemptions to disclosure applies. Such a determination will be made in accordance with the Department of the Interior's FOIA regulations and applicable law.

Except for clearly identified privileged and confidential information, BOEM will make available for public inspection all comments, in their entirety, submitted by organizations and businesses, or by individuals identifying themselves as representatives of organizations or businesses.

Section 304 of the NHPA (54 U.S.C. 307103(a)): After consultation with the Secretary, BOEM is required to withhold the location, character, or ownership of historic resources if it determines that disclosure may, among other things, risk harm to the historic resources or impede the use of a traditional religious site by practitioners. Tribal entities should designate information that falls under section 304 of NHPA as confidential.

Authority: 42 U.S.C. 4231 *et seq.* (NEPA, as amended) and 40 CFR 1506.6.

Richard Yarde,

Pacific Regional Supervisor, Office of Environment, Bureau of Ocean Energy Management.

BILLING CODE 4340–98–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2024–0026]

Atlantic Wind Lease Sale 11 (ATLW–11) for Commercial Leasing for Wind Power Development on the U.S. Gulf of Maine Outer Continental Shelf—Proposed Sale Notice

AGENCY: Bureau of Ocean Energy Management, Interior.

ACTION: Proposed sale notice; request for comments.

SUMMARY: The Bureau of Ocean Energy Management (BOEM) proposes to hold Atlantic Wind Lease Sale 11 (ATLW–11) and offer multiple lease areas (Lease Areas) for commercial wind power development on the U.S. Outer Continental Shelf (OCS) in the Gulf of Maine. The proposed Lease Areas are located in the Gulf of Maine offshore the States of Maine and New Hampshire, and the Commonwealth of Massachusetts. This Proposed Sale Notice (PSN) contains information pertaining to the proposed Lease Areas, certain lease provisions and conditions, auction details, lease forms, criteria for evaluating competing bids, award procedures, appeal procedures, and lease execution procedures. The issuance of any lease resulting from a sale would not constitute approval of project-specific plans to develop floating offshore wind energy. Such plans, if submitted by the Lessee, would be subject to subsequent environmental, technical, and public reviews prior to a BOEM decision whether to approve them. BOEM is proposing an ascending clock auction with multiple-factor bidding.

DATES: BOEM must receive your comments no later than July 1, 2024. All comments received during the comment period will be made available to the public and considered prior to publication of any Final Sale Notice (FSN). For prospective bidders who want to participate in this lease sale, unless you have already received confirmation from BOEM that you are qualified to participate in the Gulf of Maine auction, BOEM must receive your qualification materials no later than July 1, 2024, and, prior to the auction, BOEM must confirm your qualification to bid in the auction.

ADDRESSES: You may submit written comments on the PSN in one of the following ways:

- *Electronically: https://www.regulations.gov.* In the search box, enter ''*BOEM–2024–0026*'' and click ''Search.'' Follow the instructions to submit public comments.
- *Written Comments:* Submit written comments in an envelope labeled ''Comments on Gulf of Maine Lease Sale PSN'' and deliver them by U.S. mail or other delivery service to: Bureau of Ocean Energy Management, Office of Renewable Energy Programs, 45600 Woodland Road, Mailstop: VAM–OREP, Sterling, VA 20166.

Qualifications Materials for Potential Lease Sale Participants: To qualify to participate in a lease sale following the publication of this PSN, qualification materials should be developed in accordance with the guidelines at *https://www.boem.gov/Renewable-Energy-Qualification-Guidelines.* Qualification materials should be submitted electronically to *renewableenergy@boem.gov,* or in an envelope labeled, ''Qualification Materials for Gulf of Maine Wind Energy Lease Sale'' to Bureau of Ocean Energy Management, Office of Renewable Energy Programs, 45600 Woodland Road, VAM–OREP, Sterling, Virginia 20166.

For more information about submitting comments, see sections XX, ''Public Participation,'' and XXI, ''Protection of Privileged and Confidential Information,'' under the **SUPPLEMENTARY INFORMATION** caption below.

FOR FURTHER INFORMATION CONTACT: Zachary Jylkka, Bureau of Ocean Energy Management, *Zachary.Jylkka@boem.gov* or (978) 491–7732; or Gina Best, Bureau of Ocean Energy Management, *Gina.Best@boem.gov* or (703) 787–1341.

SUPPLEMENTARY INFORMATION:

I. Background

a. *Request for Interest (RFI):* On August 19, 2022, BOEM published an RFI in the **Federal Register** (87 FR 51129), to assess interest in, and to invite public comment on, possible commercial wind energy leasing on the Gulf of Maine OCS. The RFI Area consisted of approximately 13.7 million acres. In response to the RFI, BOEM received nominations of areas of interest from five developers, all of which BOEM deems legally, technically, and financially qualified. In addition to gauging interest in the development of commercial wind energy leases within the RFI Area, BOEM also sought feedback from Tribes, stakeholders, industry, and others regarding the location and size of specific areas they wished to be included in (or excluded from) a future offshore wind energy lease sale, along with other planning considerations. BOEM received 51 unique comments on the RFI. Comments and nominations are available at *https://www.boem.gov/renewable-energy/state-activities/maine/gulf-maine.*

b. *Call for Information and Nominations (Call):* On April 25, 2023, BOEM published a Call for Information and Nominations for Commercial Leasing for Wind Power Development on the Gulf of Maine'' (see 88 FR 25427). BOEM received 127 unique comments on the Call. Seven developers nominated areas for a commercial wind energy lease within the Call Area.[1]

c. *Area Identification (Area ID):* An Area ID determination is a required regulatory step under the renewable energy competitive leasing process used to identify areas for environmental analysis and consideration for leasing. After the close of the Call comment period, BOEM initiated the Area ID process using information and input from stakeholders received to date.

BOEM and the National Oceanic and Atmospheric Administration's National Centers for Coastal Ocean Science (NCCOS) collaborated in employing an ocean planning tool (the NCCOS model) to help identify an area that appears most suitable for floating offshore wind energy leasing and development in the Gulf of Maine. The Area ID process seeks to identify and minimize potential conflicts in ocean space as well as to mitigate interactions with other users and adverse interactions with the environment; the NCCOS model supports that effort. BOEM employed the NCCOS model during two distinct steps of the Area ID process: first, to model relative suitability within the boundaries of the Call Area to identify the Draft Wind Energy Area (WEA) and Secondary Areas; and second, to model the relative suitability within the boundaries of the Draft WEA (plus Secondary Area C).

On October 19, 2023, BOEM announced the Gulf of Maine Draft WEA and opened a 30-day public comment period. The methodology used to delineate the Gulf of Maine Draft WEA is outlined in the ''Draft NCCOS Report: A Wind Energy Area Siting Analysis for the Gulf of Maine Call Area.'' [2] The Draft WEA covered approximately 3.5 million acres. BOEM considered the following

[1] Comments can be viewed at *https://www.regulations.gov/docket/BOEM-2023-0025/comments.* A map of the nominations received can be viewed at *https://www.boem.gov/sites/default/files/images/gulf_of_maine_call_nominations_heatmap.png.*

[2] Available at *https://www.boem.gov/sites/default/files/documents/renewable-energy/state-activities/Gulf_of_Maine_Draft%20WEA_Report_NCCOS_0.pdf.*

non-exclusive information sources when identifying the Draft WEA: comments and nominations received on the Call; information from the Gulf of Maine Intergovernmental Renewable Energy Task Force; input from federally recognized Tribes; input from State and Federal agencies; comments from stakeholders and ocean users, including the maritime community, offshore wind developers, and the commercial and recreational fishing industry; input from State and local governments on renewable energy goals; and information on domestic and global offshore wind market and technological trends.

d. BOEM completed the Area ID process after considering additional input received from stakeholders during the Draft WEA comment period. BOEM published the Final WEA on March 15, 2024. The Final WEA comprises approximately 2 million acres and represents an 80% reduction from the size of the Call Area and a 43% reduction from the Draft WEA. The Final WEA has the potential to support generation of 32 gigawatts (GW) of clean energy, surpassing current State goals for offshore wind energy in the Gulf of Maine (13–18 GW, based on Massachusetts and Maine's offshore wind goals and estimates provided by the regional grid operator, ISO-New England). The size of the Final WEA allows BOEM to consider additional ways to reduce conflicts with users and resources, while also supporting the region's renewable energy goals. For additional information, the Gulf of Maine Area ID documentation can be found at *https://www.boem.gov/renewable-energy/state-activities/maine/gulf-maine.*

e. *Environmental Reviews:* On March 18, 2024, BOEM published a notice of intent to prepare an environmental assessment (EA) to consider potential environmental impacts of site characterization activities (*e.g.,* biological, archaeological, geological, and geophysical surveys and core samples) and site assessment activities (*e.g.,* installation of meteorological buoys) that are expected to take place after issuance of wind energy leases (89 FR 19354). The March 18 notice initiated a public scoping process, with BOEM seeking comments on the issues and alternatives that should inform the EA. Public comments on the notice can be found at *https://www.regulations.gov* in docket no. BOEM–2024–0020. In addition to the preparation of the Draft EA, and compliance with threatened and endangered species requirements for certain data collection activities associated with OCS leasing,[3] BOEM has initiated other required consultations under the Endangered Species Act, the Magnuson-Stevens Fishery Conservation and Management Act, and the Coastal Zone Management Act. The EA and associated consultations will inform BOEM's decision whether to proceed with a final sale notice (FSN). BOEM will solicit comments on the EA before it is finalized. BOEM will conduct additional environmental reviews upon receipt of a lessee's Construction and Operations Plan (COP) if one or more of the proposed leases reach that stage of development.

f. *Phased Leasing:* BOEM is proposing lease areas that we believe represent a balance between providing sufficient acreage to meet regional renewable energy demands and known spatial use conflicts. BOEM may propose additional lease sales within the region at a future date; however, the timing and scope of any future sale will be informed by the results of this proposed Gulf of Maine sale, as well as the position of potentially affected Tribes, Gulf of Maine States, stakeholder engagement, relevant market conditions, and regional energy goals.

II. Areas Proposed for Leasing

Within the Final WEA, BOEM proposes eight areas for leasing, as described in Table 1. Descriptions of the proposed Lease Areas may be found in Addendum A of each of the proposed leases, located on BOEM's website at *https://www.boem.gov/renewable-energy/state-activities/maine/gulf-maine.* Several leases are subject to a proposed lease stipulation that would prohibit surface or subsurface development in portions of the lease that are adjacent to corridors BOEM created between proposed leases to facilitate existing and future vessel transit (section II-d). For those leases, the total ''developable acres'' are less than the total ''lease acres'' as described in Table 1.

TABLE 1—GULF OF MAINE PROPOSED LEASE AREAS, ACRES, AND ASSIGNED REGION

Lease area ID	Region	Total lease acres	Total developable acres
OCS–A 0562	North	121,339	121,339
OCS–A 0563	North	132,369	132,369
OCS–A 0564	South	110,308	105,499
OCS–A 0565	South	115,290	115,290
OCS–A 0566	South	127,388	127,388
OCS–A 0567	South	123,118	117,391
OCS–A 0568	South	134,149	123,389
OCS–A 0569	South	106,038	101,757
Total		969,999	944,422

[3] See *https://www.boem.gov/sites/default/files/documents/renewable-energy/OSW-surveys-NLAA-programmatic.pdf.*

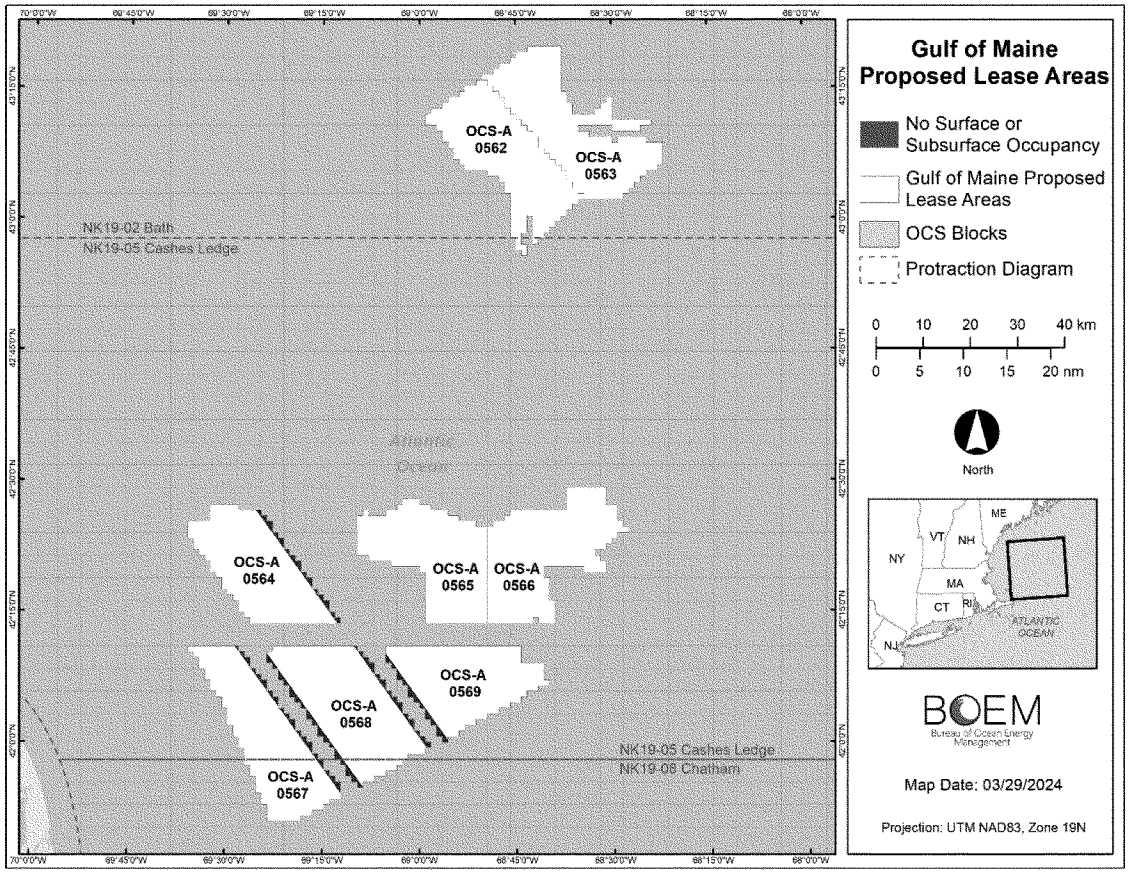

Figure 1: Gulf of Maine Proposed Lease Areas

a. *Map of the Area Proposed for Leasing:* In addition to Figure 1, maps of the Lease Areas, and various GIS spatial files may be found on BOEM's website at *https://www.boem.gov/renewable-energy/state-activities/maine/gulf-maine.*

b. *Potential Future Restrictions to Ensure Navigational Safety:* Potential bidders are advised of the possibility that portions of the Lease Areas may not be available for future development (*i.e.,* installation of wind energy facilities) because of navigational safety concerns. While the Final WEA avoids the vast majority of the U.S. Coast Guard's (USCG) Maine, New Hampshire, Massachusetts Port Access Route Study proposed safety fairways, there is one small area of overlap directly northeast of the Cashes Ledge Groundfish Closure area. This area now falls within the northern portions of leases OCS–A 0562 and 0563. BOEM will coordinate with USCG as its rulemaking process to designate possible safety fairways continues, and BOEM may require additional mitigation measures at the COP stage when the lessee's site-specific navigational safety risk assessment is available to inform BOEM's decision-making.

BOEM has also included a proposed lease stipulation ''Surface Structure Layout and Orientation'' (see Addendum C, section 10 in the Gulf of Maine proposed leases), which would require lessees with directly adjacent leases (*i.e.,* OCS–A 0562 and 0563; OCS–A 0565 and 0566) to design a surface structure layout that contains two common lines of orientation across the adjacent leases (as described in Navigation and Vessel Inspection Circular 02–23). If the lessees cannot agree on such a layout, each lessee would be required to incorporate a 1 nm setback from the boundary of the adjacent lease within which surface structures are prohibited. This would create a minimum 2 nm distance between the proposed facilities of each lessee along the lease boundary. These setback distances are based on USCG recommendations for prior lease sales for which development was expected to include fixed offshore wind foundations (BOEM has included similar lease stipulations for such sales where there were adjacent leases). Given the expectation that offshore wind development in the Gulf of Maine will necessitate floating foundations, BOEM requests comments on this proposed stipulation, particularly the required setback distances and whether setbacks should prohibit both surface and subsurface structures (*i.e.,* floating foundations, mooring lines, anchor structures, or inter-array cables).

c. *Corridors between Leases:* Members of the fishing community have requested that offshore wind energy facilities be designed in a manner that, among other things, provides for uninterrupted transit to fishing grounds where relevant. Within the southern region of the Final WEA, east of Massachusetts, BOEM has created three corridors between leases to facilitate existing and future transit through proposed lease areas.[4] These areas occur in a Northwest to Southeast direction, as well as in an East and West direction, and have a minimum width of 2.5 nautical miles (nm). The width of these areas was adapted from the New York Bight leasing process, which resulted in 2.44 nm corridors between lease areas (see *https://www.boem.gov/renewable-energy/state-activities/new-york-bight*). As stated in the New York Bight FSN (BOEM–2022–0001), BOEM used

[4] BOEM does not have the authority to designate transit lanes. The United States Coast Guard's (USCG) authority to provide safe access routes for the movement of vessel traffic is found in the Ports and Waterways Safety Act. See 46 U.S.C. 70003.

calculations and guidelines published by the Permanent International Association of Navigation Congresses World Association of Waterborne Transport Infrastructure and Maritime Institute in the Netherlands, as well as the USCG draft Port Access Route Study (USCG–2020–0172) to inform that analysis.

Bidders should be aware that BOEM may include a lease stipulation in the FSN that addresses corridors between leases, pending the outcome of additional discussions with ocean users and stakeholders as well as consideration of comments submitted in response to this PSN.

d. *Areas of No Surface or Subsurface Occupancy:* To accommodate the desired distances between surface and subsurface structures (*i.e.,* 2.5 nm width of the designated corridors between leases described above), select portions of the lease areas in the southern portion of the Gulf of Maine WEA (OCS–A 0564, 0567, 0568, 0569) will be offered for sale, but no surface or subsurface occupancy will be permitted, as described in Addendum A of each respective lease.

e. *Stellwagen Bank National Marine Sanctuary:* The Gulf of Maine WEA lies adjacent to the Stellwagen Bank National Marine Sanctuary. Should a lease be issued within the WEA, future offshore wind development may necessitate installation of energy transmission cables within the sanctuary boundaries in identified cable corridors. NOAA has advised BOEM that they may consider authorizing installation of energy transmission cables within sanctuary boundaries under the authority of the National Marine Sanctuaries Act, through one or more of the following mechanisms—General Permits, Authorizations, Certifications, and Special Use Permits.

f. *Potential Future Restrictions to Mitigate Potential Conflicts with Department of Defense (DOD) Activities:* Those interested in bidding should be aware of potential conflicts with DOD's existing uses of the OCS. BOEM coordinates with DOD throughout the leasing process. This included consultation with the Military Aviation and Installation Assurance Siting Clearinghouse, which conducted a DOD assessment of the Gulf of Maine Draft WEA. The assessment identified potential impacts, which are described below.

i. *Air Surveillance and Radar:* The North American Aerospace Defense Command (NORAD) mission may be affected by development of the Lease Areas. Similar impacts have been encountered with other Lease Areas along the Atlantic Coast and have been largely if not entirely mitigated. Considering both the expected height of offshore turbines and future cumulative wind turbine effects, adverse impacts can be mitigated through the use of Radar Adverse-impact Management (RAM) [5] and overlapping radar coverage. For projects where RAM mitigation is acceptable, BOEM anticipates including the following project approval conditions:

(1) Lessee will notify NORAD when the project is within 30–60 days of completion of commissioning of the last wind turbine generator (WTG) (meaning every WTG in the Project is installed with potential for blade rotation), and again when the project is complete and operational, for RAM scheduling;

(2) Lessee will contribute funds to DOD in the amount of no less than $80,000 toward the cost of DOD's execution of the RAM procedures for each radar system affected; and

(3) Lessee will curtail wind turbine operations for national security or defense purposes as described in the lease.

ii. *Department of Navy operations:* While the Navy did not identify any conflicts with the Final WEA, mitigations to resolve potential conflicts with ship testing may be necessary depending on the specific projects proposed within the Lease Areas.

BOEM may require the lessee to enter into an agreement with DOD to implement any necessary conditions and mitigate any identified impacts. BOEM will further coordinate with DOD and the lessee to eliminate potential conflicts throughout the project review stage, which may result in adding mitigation measures or terms and conditions as part of any plan approval.

g. *Potential Future Restrictions to Mitigate Potential Conflicts with Sand Resources:* Potential bidders are advised that BOEM has identified sand resource areas in aliquots offshore the Gulf of Maine (MMIS Application *https://mmis.doi.gov/BOEMMMIS*). OCS sand resource areas are composed of sand deposits found on or below the surface of the OCS seabed. There is potential for sand resources to exist in other areas in the Gulf of Maine not currently identified in aliquots. If it is determined that accessible and significant OCS sand resources may be impacted by a proposed activity, BOEM may require potential bidders to undertake measures deemed economically, environmentally, and technically feasible to protect the resources to the maximum extent practicable, including minimizing, avoiding, and mitigating impact to these resources. Measures may include modification of proposed transmission corridor locations if warranted. Neither BOEM nor the Bureau of Safety and Environmental Enforcement will approve future requests for in-place decommissioning of submarine cables in sand resource areas unless BOEM has determined that the submarine cables do not unduly interfere with other uses of the OCS, specifically sand resource use.

h. *Potential Future Restrictions to Mitigate Possible Conflicts with Deep-Sea Corals and Biologically Sensitive Benthic Habit:* Potential bidders are advised that in the Gulf of Maine Final WEA, BOEM has identified the presence of deep-sea corals and sponges, as well as hardbottom habitat areas suitable for sensitive deep-sea coral and sponge species. BOEM anticipates that any site assessment activities and site characterization activities within the Gulf of Maine authorized by a lease would be subject to the protections for live-bottom features included in BOEM's programmatic consultation with the National Marine Fisheries Service under ESA section 7 (see Addendum C, section 5.2 in the Gulf of Maine leases).[6] BOEM will conduct additional environmental review upon receipt of a lessee's COP and, as a condition of approval, may require avoidance measures to reduce potential impacts to sensitive benthic species and habitat within the Lease Area.

III. Participation in the Proposed Lease Sale

a. *Bidder Participation:* Entities that have been notified by BOEM that their qualification is pending or that they are qualified to participate in any Gulf of Maine auction through their response to the RFI or Call, or by separate submission of qualification materials, are not required to take any additional

[5] RAM is the technical process designed to minimize the adverse impact of obstruction interference on a radar system.

[6] Project Design Criteria 1: Avoid Live Bottom Features. Best Management Practice: All vessel anchoring and any seafloor-sampling activities (*i.e.,* drilling or boring for geotechnical surveys) are restricted from seafloor areas with consolidated seabed features. All vessel anchoring and seafloor sampling must also occur at least 150 m from any known locations of threatened or endangered coral species. All sensitive live bottom habitats (eelgrass, cold-water corals, etc.) should be avoided as practicable. All vessels in coastal waters will operate in a manner to minimize propeller wash and seafloor disturbance and transiting vessels should follow deep-water routes (*e.g.,* marked channels), as practicable, to reduce disturbance to sturgeon and sawfish habitat. *https://www.boem.gov/renewable-energy/final-nlaa-osw-programmatic.*

action to affirm their interest. Those entities are listed below:

Company name	Company No.
Avangrid Renewables, LLC	15019
Equinor Wind US LLC	15058
US Mainstream Renewable Power Inc	15089
Diamond Wind North America, LLC	15113
Hexicon USA, LLC	15151
TotalEnergies SBE US, LLC	15165
Pine Tree Offshore Wind, LLC	15167
OW Gulf of Maine LLC	15175
Repsol Renewables North America, Inc	15180
Maine Offshore Wind Development LLC	15181
Corio USA Projectco LLC	15182

All other entities wishing to participate in any Gulf of Maine auction must submit the required qualification materials to BOEM by the end of the 60-day comment period for this PSN.

b. *Affiliated Entities:* On the Bidder's Financial Form (BFF), discussed below, eligible bidders must list any other eligible bidders with whom they are affiliated. For the purpose of identifying affiliated entities, a bidding entity is any individual, firm, corporation, association, partnership, consortium, or joint venture (when established as a separate entity) that is participating in the same auction. BOEM considers bidding entities to be affiliated when:

i. They own or have common ownership of more than 50 percent of the voting securities, or instruments of ownership or other forms of ownership, of another bidding entity. Ownership of less than 10 percent of a bidding entity constitutes a presumption of non-control that BOEM may rebut.

ii. They own or have common ownership of between 10 percent and up to including 50 percent of the voting securities or instruments of ownership, or other forms of ownership, of another bidding entity, and BOEM determines that there is control upon consideration of factors including the following:

(1) The extent to which there are common officers or directors.

(2) With respect to the voting securities, or instruments of ownership or other forms of ownership: the percentage of ownership or common ownership, the relative percentage of ownership or common ownership compared to the percentage(s) of ownership by other bidding entities, if a bidding entity is the greatest single owner, or if there is an opposing voting bloc of greater ownership.

(3) Shared ownership, operation, or day-to-day management of a lease, grant, or facility as those terms are defined in BOEM's regulations at 30 CFR 585.113.

iii. They are both direct or indirect subsidiaries of the same parent company.

iv. If, with respect to any lease(s) offered in this auction, they have entered into an agreement prior to the auction regarding the shared ownership, operation, or day-to-day management of such lease.

v. Other evidence indicates the existence of power to exercise control, such as evidence that one bidding entity has power to exercise control over the other, or that multiple bidders collectively have the power to exercise control over another bidding entity or entities.

Affiliated entities are not permitted to compete against each other in the auction. Where two or more affiliated entities have qualified to bid in the auction, the affiliated entities must decide prior to the auction which one (if any) will participate in the auction. If two or more affiliated entities attempt to participate in the auction, BOEM will disqualify those bidders from the auction.

IV. Questions for Stakeholders

Stakeholders are encouraged to comment on any matters related to this proposed lease sale that are of interest or concern. BOEM has identified the following issues as particularly important, and we encourage commenters to address these issues specifically:

a. *Number, size, orientation, and location of the proposed Lease Areas:* BOEM is seeking feedback on the proposed number, size, orientation, and location of the Lease Areas and welcomes comments on which Lease Areas, if any, should be prioritized for inclusion, or exclusion, from this lease sale. BOEM is also open to comment on areas of the WEA that were not included as Lease Areas.

b. *Considerations for delineation of the proposed Lease Areas:* These delineation considerations may include comparable commercial viability and size; prevailing wind direction and minimizing wake effects; maximized energy generating potential; mooring system anchor footprints and extents; possible setbacks at Lease Area boundaries; distance to shore, port infrastructure and electrical grid interconnections; and fair return to the Federal Government pursuant to the OCS Lands Act through competition for commercially viable Lease Areas. Additional comments are welcome regarding other considerations for delineating Lease Areas.

c. *Existing uses and how they may be affected by the development of the proposed Lease Areas:* BOEM asks commenters to submit technical and scientific data in support of their comments.

d. *Baseline Monitoring:* BOEM is considering a lease stipulation that would require Lessees to conduct baseline data collection activities for endangered and threatened marine mammals and their habitats in support of developing their construction and operations plans. BOEM requests comments on the scope of this potential requirement, including (but not limited to) priority information on species and habitats, methods to collect that data, regional collaboration, data sharing, and data management.

e. *Corridors between Leases:* BOEM welcomes comments on the potential effects of the proposed lease areas on existing vessel traffic, especially commercial maritime and fishing vessels. BOEM requests comments on the width, location, and orientation of corridors and how that would facilitate continuance of existing transit.

f. *Limits on the Number of Lease Areas per Bidder:* BOEM is proposing to allow each qualified entity to bid for and ultimately win a maximum of two leases each, including a maximum of one Lease Area in the North Region as shown in Table 2. As proposed, a bidder can bid for and win a maximum of two South Region leases, or one North Region lease and one South Region lease—but cannot bid for or win both North Region leases. BOEM is seeking feedback on this proposal, including feedback on how different leasing scenarios (*e.g.,* number of Lease Areas offered, size of Lease Areas, etc.) may influence the advisability of such a limitation.

TABLE 2—GULF OF MAINE PROPOSED LEASE AREAS AND REGIONS

[Preferred option]

Lease Area ID	Region	Acres
OCS–A 0562	North	121,339

TABLE 2—GULF OF MAINE PROPOSED LEASE AREAS AND REGIONS—Continued

[Preferred option]

Lease Area ID	Region	Acres
OCS–A 0563	North	132,369
OCS–A 0564	South	110,308
OCS–A 0565	South	115,290
OCS–A 0566	South	127,388
OCS–A 0567	South	123,118
OCS–A 0568	South	134,149
OCS–A 0569	South	106,038

Alternatively, BOEM could configure the leases into three regions, as shown in Table 3. BOEM would allow each qualified entity to bid for and ultimately win a maximum of two leases each, including a maximum of one Lease Area in each region. BOEM is seeking feedback on this alternative option.

TABLE 3—GULF OF MAINE PROPOSED LEASE AREAS AND REGIONS

[Alternative option]

Lease area ID	Region	Acres
OCS–A 0562	North	121,339
OCS–A 0563	North	132,369
OCS–A 0564	South	110,308
OCS–A 0565	East	115,290
OCS–A 0566	East	127,388
OCS–A 0567	South	123,118
OCS–A 0568	South	134,149
OCS–A 0569	South	106,038

V. Proposed Lease Sale Deadlines and Milestones

This section describes the major deadlines and milestones in the lease sale process from publication of this PSN to execution of a lease.

a. The PSN Comment Period:

i. *Submit Comments:* The public is invited to submit comments during the 60-day period expiring on July 1, 2024. All comments received or postmarked during the comment period will be made available to the public and considered by BOEM prior to publication of the FSN.

ii. *Public Auction Seminar:* BOEM will host a public seminar to discuss the lease sale process and the auction format. The time and place of the seminar will be announced by BOEM and published on the BOEM website at *https://www.boem.gov/renewable-energy/state-activities/maine/gulf-maine.* No registration or RSVP is required to attend.

iii. *Submit Qualification Materials:* Prospective bidders who want to participate in the proposed lease sale must ensure that BOEM receives your qualification materials by July 1, 2024. This requirement includes all materials sufficient to establish a company's legal, technical, and financial qualifications pursuant to 30 CFR 585.107–.108. To qualify to participate in the proposed lease sale, qualification materials must be developed in accordance with the guidelines available at *https://www.boem.gov/Renewable-Energy-Qualification-Guidelines.* BOEM will inform you if you are qualified to participate in the auction.

iv. *Confidential information.* If you wish to protect the confidentiality of your comments or qualification materials, clearly mark the relevant sections and request that BOEM treat them as confidential. Please label privileged or confidential information with the caption ''Contains Confidential Information'' and consider submitting such information as a separate attachment. Treatment of confidential information is addressed in section XXI entitled ''Protection of Privileged or Confidential Information.'' Information that is not labeled as privileged or confidential will be regarded by BOEM as suitable for public release.

b. End of PSN Comment Period to FSN Publication:

i. *Review Comments:* BOEM will review all comments submitted in response to the PSN during the comment period.

ii. *Finalize Qualifications Reviews:* Prior to the publication of the FSN, BOEM will complete review of bidder qualification materials submitted during the PSN comment period. The final list of eligible bidders will be published in the FSN.

iii. *Prepare the FSN:* BOEM will prepare the FSN by updating or modifying information contained in the PSN where necessary.

iv. *Publish FSN:* BOEM will publish the FSN in the **Federal Register** at least 30 days before the date of the sale.

c. *FSN Waiting Period:* During the period between FSN publication and the lease auction, qualified bidders would be required to take several steps to remain eligible to participate in the auction.

i. *Bidder's Financial Form:* Each bidder must submit a BFF to BOEM to participate in the auction. The BFF must include the bidder's Conceptual Strategy for each non-monetary bidding credit for which that bidder wishes to be considered. If a bidder seeks to qualify for the same bidding credit in *more than one* region, the bidder must submit one bidding credit Conceptual Strategy. If, for a given bidding credit, there are any differences in the strategy for each region, the bidder must explicitly identify them in the Conceptual Strategy. BOEM must receive each bidder's BFF no later than the date listed in the FSN. BOEM may consider extensions to this deadline only if BOEM determines that the failure to timely submit a BFF was caused by events beyond the bidder's control. The proposed BFF can be downloaded at: *https://www.boem.gov/renewable-*

energy/state-activities/maine/gulf-maine.

(1) Once BOEM has processed a bidder's BFF, the bidder will be allowed to log into *https://www.pay.gov* and submit a bid deposit. For purposes of this auction, BOEM will not consider BFFs submitted by bidders for previous lease sales. An original signed BFF may be mailed to BOEM's Office of Renewable Energy Programs for certification. A signed copy of the form may be submitted in PDF format to *renewableenergy@boem.gov.* A faxed copy will not be accepted. BFF submissions must be accompanied by a transmittal letter on company letterhead.

(2) The BFF must be executed by an authorized representative listed on the bidder's legal qualifications in the BFF, in accordance with 18 U.S.C. 1001 (fraud and false statements).

(3) Additional information regarding the BFF may be found below in section IX entitled ''Bidder's Financial Form.''

ii. *Bid Deposit:* Each qualified bidder must submit a bid deposit of $2,000,000 for one Lease Area. If the FSN allows bidders to bid for and potentially win more than one Lease Area, each qualified bidder must submit a bid deposit of $2,000,000 per Lease Area sought. For example, if a qualified bidder wants to bid for and seek to win two Lease Areas, they will need to submit a bid deposit of $4,000,000. Further information about bid deposits can be found below in section X ''Bid Deposit.''

d. *Notification of Eligibility for Non-Monetary Credits:* BOEM will notify each bidder of their eligibility for bidding credits prior to the Mock Auction.

e. *Mock Auction:* BOEM will hold a Mock Auction that is open only to qualified bidders who have met the requirements and deadlines for auction participation, including submission of the bid deposit. The Mock Auction is intended to give bidders an opportunity to clarify auction rules, test the functionality of the auction software, and identify any potential issues that may arise during the auction. Final details of the Mock Auction will be provided in the FSN.

f. *The Auction:* BOEM, through its contractor, will hold an auction as described in the FSN. The auction will take place no sooner than 30 days following the publication of the FSN in the **Federal Register**. The estimated timeframes described in this PSN assume the auction will take place approximately 45 days after the publication of the FSN. Final dates will be included in the FSN. BOEM will announce the provisional winners of the lease sale after the auction ends.

g. *From the Auction to Lease Execution:*

i. *Refund Non-Winners:* Once the provisional winners have been announced, BOEM will provide the non-winners with a written explanation of why they did not win and will return their bid deposits.

ii. *Department of Justice (DOJ) Review:* DOJ will have up to 30 days to conduct an antitrust review of the auction, pursuant to 43 U.S.C. 1337(c).

iii. *Delivery of the Lease:* BOEM will send three lease copies to each provisional winner, with instructions on how to execute the lease. Once the lease has been fully executed, a provisional winner becomes an auction winner. The first year's rent is due 45 days after the auction winners receive the lease copies for execution.

iv. *Return the Lease:* Within 10-business days of receiving the lease copies, the auction winners must post financial assurance, pay any outstanding balance of their winning bids (*i.e.,* winning bids minus applicable bid deposit and any applicable non-monetary bidding credits), and sign and return the three executed lease copies. The winners may request extensions and BOEM may grant such extensions if BOEM determines the delay was caused by events beyond the requesting winner's control, pursuant to 30 CFR 585.224(e).

v. *Execution of Lease:* Once BOEM has received the signed lease copies and verified that all other required materials have been received, BOEM will make a final determination regarding its issuance of the leases and will execute the leases, if appropriate.

VI. Withdrawal of Blocks

BOEM reserves the right to withdraw all or portions of the Lease Areas prior to executing the leases with the winning bidders.

VII. Lease Terms and Conditions

Along with this PSN, BOEM has made available the proposed terms, conditions, and stipulations for the commercial leases that would be offered through this proposed sale. BOEM reserves the right to require compliance with additional terms and conditions associated with the approval of a site assessment plan (SAP) and COP. The proposed lease may be found on BOEM's website at: *https://www.boem.gov/renewable-energy/state-activities/maine/gulf-maine.* Each lease would include the following attachments:

a. Addendum A (''Description of Leased Area and Lease Activities'');

b. Addendum B (''Lease Term and Financial Schedule'');

c. Addendum C (''Lease-Specific Terms, Conditions, and Stipulations''); and

d. Addendum D (''Project Easement'').

Addenda ''A,'' ''B,'' and ''C'' provide detailed descriptions of proposed lease terms and conditions. Addendum ''D'' will be completed at the time of COP approval or approval with modifications. After considering comments on the PSN and the proposed lease, BOEM will publish final lease terms and conditions in the FSN.

VIII. Lease Financial Terms and Conditions

This section provides an overview of the required annual payments and financial assurances under the lease. Please see the proposed lease for more detailed information, including any changes from past practices.

a. *Rent:* Pursuant to 30 CFR 585.224(b) and 585.503, the first year's rent payment of $3 per acre is due within 45 days after the lessee receives the unexecuted lease copies from BOEM. Lease area acreage is delineated in Addendum A of the lease and, if applicable, includes portions of a lease that do not allow surface occupancy. Thereafter, annual rent payments are due on the anniversary of the effective date of the lease (the ''Lease Anniversary''). Once commercial operations under the lease begin, BOEM will charge rent only for the portions of the Lease Area remaining undeveloped (*i.e.,* non-generating acreage), as described in the lease. For example, for the 121,339 acres of Lease OCS–A 0562, the rent payment would be $364,017 per year until commercial operations begin.

If the lessee submits an application for relinquishment of a portion of its leased area within the first 45 days after receiving the lease copies from BOEM and BOEM approves that application, no rent payment would be due on the relinquished portion of the Lease Area. Later relinquishments of any portion of the Lease Area would reduce the lessee's rent payments starting in the year following BOEM's approval of the relinquishment.

A lease issued under this part confers on the Lessee the right to one or more project easements, without further competition, for the purpose of installing gathering, transmission, and distribution cables, pipelines, and appurtenances on the OCS as necessary for the full enjoyment of the lease. A Lessee must apply for the project easement as part of the COP or SAP, as

provided under subpart F of 30 CFR part 585.

The lessee also must pay rent for any project easement associated with the lease. Rent commences on the date that BOEM approves the COP that describes the project easement (or any modification of such COP that affects the easement acreage), as outlined in 30 CFR 585.507. If the COP revision results in increased easement acreage, additional rent would be due at the time the COP revision is approved. Annual rent for a project easement is the greater of $5 per acre per year or $450 per year.

b. *Operating Fee:* For purposes of calculating the initial annual operating fee under 30 CFR 585.506, BOEM applies an operating fee rate to a proxy for the wholesale market value of the electricity expected to be generated from the project during its first 12 months of operations. This initial payment will be prorated to reflect the period between the commencement of commercial operations and the Lease Anniversary. The initial annual operating fee must be paid within 90 days of the commencement of commercial operations. Thereafter, subsequent annual operating fees must be paid on or before the Lease Anniversary.

The subsequent annual operating fees will be calculated by multiplying the operating fee rate by the imputed wholesale market value of the projected annual electric power production. For the purposes of this calculation, the imputed market value will be the product of the project's annual nameplate capacity, the total number of hours in a year (8,760), the capacity factor, and the annual average price of electricity derived from a regional wholesale power price index. For example, the annual operating fee for a 976-megawatt (MW) wind facility operating at a 40 percent capacity (*i.e.,* capacity factor of 0.4) with a regional wholesale power price of $40 per megawatt hour (MWh) and an operating fee rate of 0.02 would be calculated as follows:

$$\text{Annual Operating Fee} = 976\ \text{MW} \times 8{,}760\ \frac{\text{hrs}}{\text{year}} \times 0.4 \times \frac{\$40}{\text{MWh}}\ \text{Power Price} \times 0.02 = \$2{,}735{,}923.20$$

i. *Operating Fee Rate:* The operating fee rate is the share of the imputed wholesale market value of the projected annual electric power production due to the Office of Natural Resources Revenue (ONRR) as an annual operating fee. For the Lease Areas, BOEM proposes to set the fee rate at 0.02 (2 percent) for the entire life of commercial operations.

ii. *Nameplate Capacity:* Nameplate capacity is the maximum rated electric output, expressed in MW, which the turbines of the wind facility under commercial operations can produce at their rated wind speed as designated by the turbine's manufacturer.

iii. *Capacity Factor:* BOEM proposes to set the capacity factor at 0.4 (*i.e.,* 40 percent) for the year in which the commercial operations *begin* and for the first 6 years of commercial operations on the lease. At the end of the sixth year, BOEM may adjust the capacity factor to reflect the performance over the previous 5 years based upon the actual metered electricity generation at the delivery point to the electrical grid. BOEM may make similar adjustments to the capacity factor once every 5 years thereafter.

iv. *Wholesale Power Price Index:* Under 30 CFR 585.506(c)(2)(i), the wholesale power price, expressed in dollars per MWh, is determined at the time each annual operating fee payment is due. For the leases offered in this sale, BOEM proposes to use the ISO New England H.INTERNAL_HUB. A similar price dataset may also be used and may be posted by BOEM at boem.gov for reference.

c. *Financial Assurance:* Within 10-business days after receiving the unexecuted lease copies and pursuant to 30 CFR 585.515–585.516, the provisional winners would be required to provide an initial lease-specific bond or other BOEM-approved financial assurance instrument in the amount of $100,000. The provisional winners may meet financial assurance requirements by posting a surety bond or other financial assurance instrument or alternative as detailed in 30 CFR 585.526–585.529. BOEM encourages the provisional winners to discuss financial assurance requirements with BOEM as soon as possible after the auction has concluded.

BOEM will base the amount of financial assurance (for all SAP, COP, and decommissioning activities) on cost estimates for meeting all accrued lease obligations at the respective stages of development. The required amount of supplemental and decommissioning financial assurance will be determined on a case-by-case basis.

The financial terms described above can be found in Addendum ''B'' of the lease, which is available at: *https://www.boem.gov/renewable-energy/state-activities/maine/gulf-maine.*

IX. Bidder's Financial Form

Each bidder must submit to BOEM the information listed in the BFF referenced in this PSN. A copy of the proposed form is available at *https://www.boem.gov/renewable-energy/state-activities/maine/gulf-maine.* BOEM recommends that each bidder designate an email address in its BFF that the bidder will use to create an account in *https://www.pay.gov* (if it has not already done so). BOEM will not consider previously submitted BFFs for previous lease sales to satisfy the requirements of this auction. BOEM must receive each BFF, including any Conceptual Strategy(ies), by the deadline set in the FSN. BOEM may consider BFFs, including any Conceptual Strategy(ies), that are submitted after the deadline set in the FSN if BOEM determines that the failure to timely submit the BFF was caused by events beyond the bidder's control. The BFF is required to be executed by an authorized representative listed in the bidder's qualification package on file with BOEM.

X. Bid Deposit

Each qualified bidder must submit a bid deposit no later than the date listed in the FSN. Typically, the deadline is approximately 30 days after the publication of the FSN. BOEM may consider requests for extensions of this deadline only if BOEM determines that the failure to timely submit the bid deposit was caused by events beyond the bidder's control.

Following the auction, bid deposits will be applied against the winning bid and other obligations owed to BOEM. If a bid deposit exceeds that bidder's total financial obligation, BOEM will refund the balance of the bid deposit to the bidder. BOEM will refund bid deposits to the unsuccessful bidders once BOEM has announced the provisional winners.

If BOEM offers a lease to a provisional winner and that bidder fails to timely return the signed lease, establish financial assurance, or pay the balance of its bid, BOEM will retain the bidder's $2,000,000 bid deposit for the Lease Area. In such a circumstance, BOEM reserves the right to offer a lease for that Lease Area to the next highest bidder as determined by BOEM.

XI. Minimum Bid

The minimum bid is the lowest dollar amount per acre that BOEM will accept as a winning bid and is the amount at which BOEM will start the bidding in the auction. BOEM proposes a minimum bid of $50.00 per acre for this lease sale.

XII. Auction Procedures

a. *Multiple-Factor Bidding Auction:* As authorized under 30 CFR 585.220(a)(4) and 585.221(a)(6), BOEM proposes to use a multiple-factor auction format for this lease sale. Under BOEM's proposal, the bidding system for this lease sale will be a combination of monetary and non-monetary factors. The bid made by a particular bidder in each round will represent the sum of the monetary factor (cash bid) and the value of any non-monetary factors in the form of bidding credits. BOEM proposes to start the auction using the minimum bid price for the Lease Areas and to increase these prices incrementally until no more than one bidder remains bidding on each Lease Area in the auction. For this sale, BOEM is calculating bidding credits as a percentage of the whole bid, which is a change from the method used in sales held prior to 2024, where bidding credits were calculated as a percentage of the cash portion of the bid. The intended purpose of this change is to simplify the bidding credit calculation. BOEM is proposing to grant bidding credits to bidders that commit to one or both of the following:

i. supporting workforce training programs for the floating offshore wind industry or supporting the development of a domestic supply chain for the floating offshore wind industry, or a combination of both; or

ii. establishing and contributing to a fisheries compensatory mitigation fund or contributing to an existing fund to mitigate potential negative impacts to commercial and for-hire recreational fisheries caused by offshore wind development in the Gulf of Maine.

These bidding credits are intended to:

i. enhance, through training, the floating offshore wind workforce and/or enhance the establishment of a domestic supply chain for floating offshore wind manufacturing, assembly, or services, both of which will contribute to the expeditious and orderly development of offshore wind resources on the OCS;

ii. support the expeditious and orderly development of OCS resources by mitigating potential direct impacts from proposed projects and encouraging the investment in infrastructure germane to the floating offshore wind industry; and

iii. minimize potential economic effects on commercial fisheries impacted by potential floating offshore wind development, as cooperation with commercial fisheries impacted by OCS operations will enable development of the Lease Area to advance.

If a bidder qualifies to bid for a Lease Area in more than one region and seeks to qualify for a bidding credit, the bidder must submit one bidding credit Conceptual Strategy, which must explicitly identify any differences in the strategy for each region.

b. *Changes to Auction Rules:* BOEM will be employing new auction software for sales held in 2024. The auction format remains an ascending clock auction with multiple-factor bidding. The new software makes five primary changes have been made to the ascending clock auction rules in the new software, described below.

i. If a bidder decides to bid on a different Lease Area in a given round of the auction, it may submit a bid to reduce demand for the Lease Area it bid on in the previous round and, simultaneously, submit a bid to increase demand for another Lease Area. This allows a bidder the option to switch to another Lease Area if the price of the first Lease Area exceeds the specified bid price.

ii. Provisional winners will no longer be determined using a two-step process. The auction rules are implemented in a way such that, when the auction concludes, the bidder who remains on a Lease Area after the final round becomes its provisional winner. There will be no additional processing step.

iii. The auctions will use a 'second price' rule. A given Lease Area will be won by the bidder that submitted the highest bid amount for the Lease Area, but the winning bidder will pay the highest bid amount at which there was competition (*i.e.,* the 'second price').

iv. Each bidder's bidding credit will be expressed directly as a percentage of the final price for the lease.

v. For sales in which bidders are allowed to bid for and potentially acquire two or more Lease Areas, any bid for two or more Lease Areas will be treated as independent bids for those Lease Areas, rather than as a package bid.

All five of these changes are applicable to the ATLW–11 sale, as proposed in this PSN. All potential bidders should review the complete Auction Procedures for Offshore Wind Lease Sales (Version 1) located at: *https://www.boem.gov/renewable-energy/lease-and-grant-information.*

c. *The Auction:* Using an online bidding system to host the auction, BOEM will start the bidding for the Lease Areas as described below.

TABLE 4—GULF OF MAINE PROPOSED LEASE AREAS AND MINIMUM BIDS

Lease area ID	Region	Acres	Minimum bid
OCS–A 0562	North	121,339	6,066,950
OCS–A 0563	North	132,369	6,618,450
OCS–A 0564	South	110,308	5,515,400
OCS–A 0565	South	115,290	5,764,500
OCS–A 0566	South	127,388	6,369,400
OCS–A 0567	South	123,118	6,155,900
OCS–A 0568	South	134,149	6,707,450
OCS–A 0569	South	106,038	5,301,900

BOEM is proposing to allow each qualified entity to bid for and ultimately win a maximum of two leases each, including a maximum of one Lease Area in the North Region as shown in Table 4. As proposed, a bidder can bid for and win a maximum of two South Region leases, or one North Region lease and one South Region lease—but cannot bid for or win both North Region leases. BOEM is also soliciting comments on an

alternative approach with three regions as discussed in section IV.f.

The auction will be conducted in a series of rounds. Before each round, the auction system will announce the prices for each Lease Area offered in the auction. In Round 1, there is a single price for each Lease Area equal to the minimum bid price (also known as the 'opening price' or 'clock price of Round 1'). Each bidder can bid, at the opening prices, for as many Lease Areas as allowed by the FSN and the bidder's bid deposit. After Round 1, the bidder's processed demand is one for each Lease Area for which the bidder bid in Round 1.[7] The bidder's eligibility for Round 2 equals the number of Lease Areas for which the bidder bid in Round 1.

Starting in Round 2, each Lease Area is assigned a range of prices for the round. The start-of-round price is the lowest price in the range, and the clock price is the highest price in the range. A bidder still eligible to bid after the previous round can either (i) continue bidding at the new round's clock price(s) for the Lease Area(s) for which the bidder's processed demand is one or (ii) submit a bid(s) to reduce demand for one (or more) Lease Area(s) at any price(s) in the range(s) for that round. A bid to reduce demand at some price indicates that the bidder is not willing to acquire that Lease Area at a price exceeding the specified bid price. A bidder that bids to reduce demand for one or two Lease Areas could bid to increase demand up to the same number of other Lease Areas in the same round.

If an eligible bidder does not place a bid during the round for a Lease Area for which the bidder's processed demand is one, the auction system will consider this a request to reduce demand for that Lease Area at the round's start-of-round price. The bidder can nonetheless win that Lease Area if it is the last remaining bidder for that Lease Area.

After each round, the auction system processes the bids and determines each bidder's processed demand for each Lease Area and the posted prices for the Lease Areas. The bidder's eligibility for the next round will equal the number of Lease Areas for which the bidder had processed demand of one. If, after any round, a bidder's processed demand is zero for every Lease Area, the bidder's eligibility drops to zero and the bidder can no longer participate in the auction. The posted price is the price determined for each Lease Area after processing of all bids for a round. If only one bidder remains on a Lease Area, the posted price reflects the ''second price'' (*i.e.,* the highest price at which there was competition for the Lease Area).[8] The posted price for a Lease Area after each round becomes the start-of-round price for that Lease Area in the next round.

If, after the bids for the round have been processed, there is no Lease Area with excess demand (*i.e.,* no lease areas have more than one bidder), the auction will end. When this occurs, each bidder with processed demand of one for a Lease Area will become the provisional winner for that Lease Area. Otherwise, the auction will continue with a new round in which the start-of-round price for each Lease Area equals the posted price of the previous round.

The increment by which the clock price exceeds the start-of-round price will be determined based on several factors including, but not necessarily limited to, the expected time needed to conduct the auction and the number of rounds that have already occurred. BOEM reserves the right to increase or decrease the increment as it deems appropriate.

The provisional winner of each Lease Area will pay the final posted price (less any applicable bidding credit) or risk forfeiting its bid deposit. A provisional winner will be disqualified if it is subsequently found to have violated auction rules or BOEM regulations, or otherwise engaged in conduct detrimental to the integrity of the competitive auction. If a bidder submits a bid that BOEM determines to be a provisionally winning bid, the bidder must sign the applicable lease documents, post financial assurance, and submit the outstanding balance of its winning bid (*i.e.,* winning bid minus the applicable bid deposit and any applicable credits) within 10-business days of receiving the lease copies, pursuant to 30 CFR 585.224. BOEM reserves the right to not issue the lease to the provisionally winning bidder if that bidder fails to: timely execute three copies of the lease and return them to BOEM, timely post adequate financial assurance, timely pay the balance of its winning bid, or otherwise comply with applicable regulations or the terms of the FSN. In any of these cases, the bidder will forfeit its bid deposit and BOEM reserves the right to offer a lease to the next highest eligible bidder as determined by BOEM.

BOEM will publish the names of the provisional winners of the Lease Areas and the associated prices shortly after the conclusion of the sale. Full bid results, including round-by-round results of the entire sale, will be published on BOEM's website after a review of the results and announcement of the provisional winners.

Additional information regarding the auction format:

i. *Authorized Individuals and Bidder Authentication:* An entity that is eligible to participate in the auction will identify on its BFF up to three individuals who will be authorized to bid on behalf of the company, including their names, business telephone numbers, and email addresses. All individuals will log into the auction system using login.gov. Prior to the auction, each individual listed on the BFF form must obtain a Fast Identity Online (FIDO)-compliant security key, and must register this security key on *login.gov* using the same email address that was listed in the BFF. The *login.gov* registration, together with the FIDO-compliant security key, will enable the individual to log into the auction system. BOEM will provide information on this process on its website.

After BOEM has processed the bid deposits, the auction contractor will send an email to the authorized individuals, inviting them to practice logging into the auction system on a specific day in advance of the mock auction. The *login.gov* login process, along with the authentication for the auction helpdesk, will also be tested during the mock auction.

If an eligible bidder fails to submit a bid deposit or does not participate in the first round of the auction, BOEM will deactivate that bidder's login information.

ii. *Timing of Auction:* The FSN will provide specific information regarding when bidders will be able to log into the auction system and when the auction will start.

iii. *Messaging Service:* BOEM and the auction contractors will use the auction system's messaging service to keep bidders informed on issues of interest during the auction. For example, BOEM could change the schedule at any time, including during the auction. If BOEM changes the schedule during the auction, it will use the messaging service to notify bidders that a revision has been made and will direct bidders to the relevant page. BOEM will also use the messaging service for other updates during the auction.

iv. *Bidding Rounds:* Bidders are allowed to place bids or to change their bids at any time during the round. At

[7] Bidders specify their demand for a lease area with either a 0 or 1 in the auction system. A demand of 1 indicates the lease area that they are bidding on. Processed demand is the demand, either 0 or 1, of a bidder for a lease area following the processing of the bids for the round.

[8] The Auction Procedures for Offshore Wind Lease Sales provides details on how bids are prioritized and processed.

the top of the bidding page, a countdown clock shows how much time remains in each round. Bidders will have until the end of the round to place bids. Bidders should do so according to the procedures described in the FSN and the Auction Procedures for Offshore Wind Lease Sales. Information about the round results will be made available only after the round has closed, so there is no strategic advantage to placing bids early or late in the round.

The Auction Procedures for Offshore Wind Lease Sales elaborate on the auction process described in this PSN. In the event of any inconsistency among the Auction Procedures for Offshore Wind Lease Sales, the Bidder Manual, and the FSN, the FSN is controlling.[9]

v. *Alternate Bidding Procedures:* Redundancy is the most effective way to mitigate technical and human issues during an auction. BOEM strongly recommends that bidders consider authorizing more than one individual to bid in the auction and confirming during the Mock Auction that each authorized individual is able to access the auction system. A mobile hotspot or other form of wireless access is helpful in case a company's main internet connection should fail. As a last resort, an authorized individual facing technical issues may request to submit its bid by telephone. To be authorized to place a telephone bid, an authorized individual must call the help desk number listed in the auction manual before the end of the round. BOEM will authenticate the caller's identity. The caller must also explain the reasons why a telephone bid is necessary. BOEM may, in its sole discretion, permit or refuse to accept a request for the placement of a bid using this alternate telephonic bidding procedure. The auction help desk requires codes from the Google Authenticator mobile application as part of its procedure for identifying individuals who call for assistance. Prior to the auction, all individuals listed on the BFF should download the Google Authenticator mobile application[10] onto their smartphone or tablet.[11] The first time the individual logs into the auction system, the system will provide a QR token to be read into the Google Authenticator application. This token is unique to the individual and enables the Google Authenticator application to generate time-sensitive codes that will be recognized by the auction system. When an individual calls the auction help desk, the current code from the application must be provided to the help desk representative as part of the user authentication process. BOEM will provide information on this process on its website.

d. *12.5 Percent Bidding Credit for Workforce Training or Supply Chain Development or a Combination of Both:* This proposed bidding credit will allow a bidder to receive a credit of 12.5 percent in exchange for a commitment to make a qualifying monetary contribution (''Contribution''), in the same amount as the bidding credit received, to programs or initiatives that support workforce training programs for the U.S. floating offshore wind industry or development of a U.S. domestic supply chain for the floating offshore wind industry, or both, as described in the BFF Addendum and the lease. To qualify for this credit, the bidder must commit to the bidding credit requirements on the BFF and submit a Conceptual Strategy as described in the BFF Addendum.

i. As proposed, the Contribution to workforce training must result in a better trained and/or larger domestic floating offshore wind workforce that will provide for more efficient operations via increasing the supply of fully trained personnel. Training of existing lessee employees, lessee contractors, or employees of affiliated entities will not qualify as an appropriate contribution toward fulfilling this bidding credit commitment.

ii. The Contribution to domestic supply chain development must result in overall benefits to the U.S. floating offshore wind supply chain available to all potential purchasers of floating offshore wind services, components, or subassemblies, not solely the lessee's project; and either: (i) the demonstrable development of new domestic capacity (including vessels) or the demonstrable buildout of existing capacity; or (ii) an improved floating offshore wind domestic supply chain by reducing the upfront capital or certification cost for manufacturing floating offshore wind components, including the building of facilities, the purchasing of capital equipment, and the certifying of existing manufacturing facilities.

iii. Contributions cannot be used to satisfy private cost shares for any Federal tax or other incentive programs where cost sharing is a requirement. No portion of the Contribution may be used to meet the requirements of any other bidding credits for which the lessee qualifies.

iv. Bidders interested in obtaining a bidding credit could choose to contribute to workforce training programs, domestic supply chain initiatives, or a combination of both. The Conceptual Strategy must describe verifiable actions that the lessee will take that will allow BOEM to confirm compliance once the lessee has submitted documentation that shows it has satisfied the bidding credit commitment. The Contribution must be tendered in full, and the lessee must provide documentation evidencing it has made the Contribution and complied with applicable requirements, no later than the date the lessee submits its first Facility Design Report (FDR).

v. As proposed, Contributions to workforce training must promote and support one or more of the following purposes: (i) Union apprenticeships, labor management training partnerships, stipends for workforce training, or other technical training programs or institutions focused on providing skills necessary for the planning, design, construction, operation, maintenance, or decommissioning of floating offshore wind energy projects in the United States; (ii) Maritime training necessary for the crewing of vessels to be used for the construction, servicing, and/or decommissioning of wind energy projects in the United States; (iii) Training workers in skills or techniques necessary to manufacture or assemble floating offshore wind components, subcomponents, or subassemblies (examples of areas involving these skills and techniques include welding; wind energy technology; hydraulic maintenance; braking systems; mechanical systems, including blade inspection and maintenance; or computers and programmable logic control systems); (iv) Tribal floating offshore wind workforce development programs or training for employees of an Indian Economic Enterprise[12] in skills necessary in the floating offshore wind industry; or (v) Training in any other job skills that the lessee can demonstrate are necessary for the planning, design, construction, operation, maintenance, or decommissioning of floating offshore wind energy projects in the United States.

vi. As proposed, Contributions to domestic supply chain development must promote and support one or more of the following: (i) Development of a

[9] The Bidder Manual is provided to the auction participants in advance of the auction.

[10] The Google Authenticator app must be installed from either the Apple App Store or the Google Play Store.

[11] Installing the Google Authenticator app is required only if the app has not already been installed on the smartphone or tablet.

[12] *https://www.bia.gov/sites/default/files/dup/assets/as-ia/ieed/Primer%20on%20Buy%20Indian%20Act%20508%20Compliant%202.6.18(Reload).pdf.*

domestic supply chain for the floating offshore wind industry, including manufacturing of components and sub-assemblies and the expansion of related services; (ii) Domestic Tier 2 and Tier 3 floating offshore wind component suppliers and domestic Tier-1 supply chain efforts, including quay-side fabrication; [13] (iii) Technical assistance grants to help U.S. manufacturers re-tool or certify (*e.g.,* ISO–9001) for floating offshore wind manufacturing; (iv) Development of Jones Act-compliant vessels for the construction, servicing, and/or decommissioning of wind energy projects in the United States; (v) Purchase and installation of lift cranes or other equipment capable of lifting or moving foundations, towers, and nacelles quayside, or lift cranes on vessels with these capabilities; (vi) Port infrastructure directly related to floating offshore wind component manufacturing or assembly of major floating offshore wind facility components; (vii) Establishing a new or existing bonding support reserve or revolving fund available to all businesses providing goods and services to offshore wind energy companies, including disadvantaged businesses and/or Indian Economic Enterprises; or (viii) Other supply chain development efforts that the lessee can demonstrate advance the manufacturing of floating offshore wind components or subassemblies or the provision of floating offshore wind services in the United States.

vii. Documentation: If a lease is issued pursuant to a winning bid that includes a bidding credit for workforce training or supply chain development, the lessee must provide documentation showing that the lessee has met the financial commitment before the lessee submits the first FDR for the lease. The documentation must allow BOEM to objectively verify the amount of the Contribution and the beneficiary(ies) of the Contribution.

At a minimum, the documentation must include: all written agreements between the lessee and beneficiary(ies) of the Contribution, which must detail the amount of the Contribution(s) and how it will be used by the beneficiaries of the Contribution(s) to satisfy the goals of the bidding credit for which the Contribution was made; all receipts documenting the amount, date, financial institution, and the account and owner of the account to which the Contribution was made; and sworn statements by the entity that made the Contribution and the beneficiary(ies) of the Contribution attesting that all information provided in the above documentation is true and accurate. The documentation would need to describe how the funded initiative or program has advanced, or is expected to advance, U.S. floating offshore wind workforce training or supply chain development. The documentation must also provide qualitative and/or quantitative information that includes the estimated number of trainees or jobs supported, or the estimated leveraged supply chain investment resulting or expected to result from the Contribution. The documentation must contain any information called for in the Conceptual Strategy that the lessee submitted with its BFF and to allow BOEM to objectively verify (i) the amount of the Contribution and the beneficiary(ies) of the Contribution, and (ii) compliance with the bidding credit criteria provided in Addendum ''C'' of the lease. If the lessee's implementation of its Conceptual Strategy changes due to market needs or other factors, the lessee must explain the changed approach. BOEM reserves all rights to determine that bidding credit criteria have not been satisfied if changes from the lessee's Conceptual Strategy result in the lessee not meeting the criteria for the bidding credit described in Addendum ''C'' of the lease.

viii. Enforcement: The commitment for the bidding credit must be made in the BFF and would be included in a lease addendum that would bind the lessee and all future assignees of the lease. If BOEM were to determine that a lessee or assignee had failed to satisfy the requirements of the bidding credit, or if a lessee were to relinquish or otherwise fail to develop the lease by the tenth anniversary date of lease issuance, the amount corresponding to the bidding credit awarded would be immediately due and payable to ONRR with interest from the lease Effective Date. The interest rate would be the underpayment interest rate identified by ONRR. The lessee would not be required to pay said amount if the lessee satisfied its bidding credit requirements but failed to develop the lease by the tenth Lease Anniversary. BOEM could, at its sole discretion, extend the documentation deadline beyond the first FDR submission or extend the lease development deadline beyond the 10-year timeframe.

e. *12.5 percent Bidding Credit for Fisheries Compensatory Mitigation Fund:* The second bidding credit proposed would allow a bidder to receive a credit of 12.5 percent of its bid in exchange for a commitment to establish and contribute to a Fisheries Compensatory Mitigation Fund, or to contribute to a similar existing fund, to compensate for potential negative impacts to commercial and for-hire recreational fisheries. The term ''commercial fisheries'' refers to commercial and processing businesses engaged in the act of catching and marketing fish and shellfish for sale from the Gulf of Maine. The term ''for-hire recreational fisheries'' refers to charter and headboat fishing operations involving vessels-for-hire engaged in recreational fishing in the Gulf of Maine that are hired for a charter fee by an individual or group of individuals for the exclusive use of that individual or group of individuals. Lessees are encouraged to contribute to a regional fund, such as the initiative by eleven East Coast states to establish a regional fund that would provide financial compensation for economic loss from offshore wind development off the Atlantic Coast. At a minimum, the compensation must address the following:

(1) Gear loss or damage; and

(2) Lost fishing income in Gulf of Maine wind energy Lease Areas.

The fisheries compensatory mitigation fund would assist commercial and for-hire recreational fisheries directly impacted by income or gear losses due to offshore wind activities on offshore wind leases or easements and is intended to address the impacts identified in BOEM's environmental and project reviews. The compensatory mitigation must cover impacts that result directly from the preconstruction, construction, operations and decommissioning of an offshore wind project being developed in the Gulf of Maine wind energy leases or easements. The fund must be established and the Contribution made before the lessee submits the lease's first FDR or before the fifth Lease Anniversary, whichever is sooner. To qualify for this credit, the bidder must commit to the bidding credit requirements on the BFF and submit a Conceptual Strategy as described in the BFF Addendum.

Bidders applying for the fisheries compensatory mitigation fund bidding credit must submit their Conceptual Strategy along with their BFF, further described below and in the BFF Addendum. The Conceptual Strategy would describe the actions that the lessee intends to take that would allow BOEM to verify compliance when the lessee seeks to demonstrate satisfaction

[13] Tier-1 denotes the primary floating offshore wind components such as the blades, nacelles, towers, foundations, and cables. Tier 2 subassemblies are the systems that have a specific function for a Tier 1 component. Tier 3 subcomponents are commonly available items that are combined into Tier 2 subassemblies, such as motors, bolts, and gears.

of the requirements for the bidding credit. The lessee would be required to provide documentation showing that the lessee has met the commitment and complied with the applicable bidding credit requirements before the lessee submits the lease's first FDR or before the fifth Lease Anniversary, whichever is sooner.

As proposed, gear loss, damage, and fishing income loss claims should be prioritized at each phase of offshore wind project development, including impacts from surveys conducted before the establishment of the fund. BOEM encourages lessees to coordinate with other lessees to establish or contribute to a regional fund. A regional fund should be flexible enough to incorporate future contributions from future lease auctions and actuarially sound enough to recognize the multi-decade life of offshore wind projects in the Gulf of Maine. While the fund's first priority is to compensate for gear loss or damage and income loss, funds that have been determined to be excess based on an actuarial accounting may be used to:

i. Promote participation of fishers and fishing communities in the project development process or other programs that better enable the fishing and offshore wind industries to co-exist;

ii. Offset the cost of gear upgrades and transitions for operating within a wind facility.

Any fund established or selected by the lessee to meet this bidding credit requirement must include a process for evaluating the actuarial status of funds at least every 5 years and publicly reporting information on fund disbursement and administrative costs at least annually.

The Fisheries Compensatory Mitigation Fund must be independently managed by a third party and designed with fiduciary governance and strong internal controls while minimizing administrative expenses. The Contribution may be used for fund startup costs, but the Fund should minimize costs by leveraging existing processes, procedures, and information from the BOEM Draft Fisheries Mitigation Guidance, the Eleven Atlantic States' Fisheries Mitigation Project, or other sources.

i. *Documentation:* As proposed, if a lease is awarded pursuant to a winning bid that includes a Fisheries Compensatory Mitigation Fund Bidding Credit, the lessee must provide written documentation to BOEM that demonstrates that it completed the fund Contribution before it submits the lease's first FDR or before the fifth Lease Anniversary, whichever is sooner. The documentation must enable BOEM to objectively verify the Contribution has met all applicable requirements as outlined in Addendum ''C'' of the lease.

ii. At a minimum, this documentation must include:

(1) The procedures established to compensate for gear loss or damage resulting from all phases of the project development on the Lease Area (pre-construction, construction, operation, and decommissioning);

(2) The Fisheries Compensatory Mitigation Fund charter, including the governance structure, audit and public reporting procedures, and standards for paying compensatory mitigation for impacts to fishers from development on wind energy Lease Areas in the Gulf of Maine;

(3) All receipts documenting the amount, date, financial institution, and the account and owner of the account to which the Contribution was made; and

(4) Sworn statements by the entity that made the Contribution, attesting to:

i. The amount and date(s) of the Contribution;

ii. That the Contribution is being (or will be) used in accordance with the bidding credit requirements in the lease; and

iii. That all information provided is true and accurate.

The documentation must contain any information specified in the Conceptual Strategy that was submitted with the BFF. If the lessee's implementation of its Conceptual Strategy changes due to market needs or other factors, the lessee must explain this change. BOEM reserves the right to determine that the bidding credit has not been satisfied if changes from the lessee's Conceptual Strategy result in the lessee not meeting the criteria for the bidding credit described in Addendum ''C'' of the lease.

iii. *Enforcement:* The commitment to the Fisheries Compensatory Mitigation Fund Bidding Credit will be made in the BFF. It will be included in Addendum ''C'' of the lease and will bind the lessee and all future assignees of the lease. If BOEM were to determine that a lessee or assignee had failed to satisfy the commitment at the time the first FDR is submitted, or by the fifth Lease Anniversary, whichever is sooner, the amount corresponding to the bidding credit awarded would be immediately due and payable to ONRR with interest from the lease effective date. The interest rate would be the underpayment interest rate identified by ONRR. The lessee would not be required to pay said amount if the lessee satisfied its bidding credit requirements by the time the first FDR is submitted, or the fifth Lease Anniversary, whichever is sooner. BOEM may, at its sole discretion, extend the documentation deadline beyond the first FDR or beyond the 5-year timeframe.

XIII. Rejection or Non-Acceptance of Bids

BOEM reserves the right and authority to reject any and all bids that do not satisfy the requirements and rules of the auction, the FSN, or applicable regulations and statutes.

XIV. Anti-Competitive Review

Bidding behavior in this sale is subject to Federal antitrust laws. Following the auction, but before the acceptance of bids and the issuance of the lease, BOEM must ''allow the Attorney General, in consultation with the Federal Trade Commission, thirty days to review the results of [the] lease sale.'' 43 U.S.C. 1337(c)(1). If a provisional winner is found to have engaged in anti-competitive behavior in connection with this lease sale, BOEM may reject its provisionally winning bid. Compliance with BOEM's auction procedures and regulations is not an absolute defense against violations of antitrust laws.

Anti-competitive behavior determinations are fact specific. However, such behavior may manifest itself in several different ways, including, but not limited to:

1. An express or tacit agreement among bidders not to bid in an auction, or to bid a particular price;

2. An agreement among bidders not to bid against each other; or

3. Other agreements among bidders that have the potential to affect the final auction price.

Pursuant to 43 U.S.C. 1337(c)(3), BOEM may decline to award a lease if the Attorney General, in consultation with the Federal Trade Commission, determines that awarding the lease may be inconsistent with antitrust laws.

For more information on whether specific communications or agreements could constitute a violation of Federal antitrust law, please see *https://www.justice.gov/atr* and consult legal counsel.

XV. Process for Issuing the Lease

Once all post-auction reviews have been completed to BOEM's satisfaction, BOEM will issue three unsigned copies of the lease to the provisional winner. Within 10-business days after receiving the lease copies, the provisional winner must:

1. Execute and return the lease copies on the bidder's behalf;

2. File financial assurance as required under 30 CFR 585.515–537, as applicable; and

3. Pay by electronic funds transfer (EFT) the balance owed (the winning cash bid less the applicable bid deposit), if any. BOEM would require bidders to use EFT procedures (not *https://www.pay.gov,* the website bidders used to submit bid deposits) for payment of the balance, following the detailed instructions contained the ''Instructions for Making Electronic Payments'' available on BOEM's website at *https://www.boem.gov/sites/default/files/documents/renewable-energy/state-activities/EFT-Payment-Instructions.pdf.*

BOEM will not execute the lease until the three requirements above have been satisfied, BOEM has accepted the provisionally winning bidder's financial assurance pursuant to 30 CFR 585.515, and BOEM has processed the provisionally winning bidder's payment. BOEM may extend the 10-business-day deadline for signing a lease, filing the required financial assurance, and paying the balance owed if BOEM determines, in its sole discretion, that the provisionally winning bidder's inability to comply with the deadline was caused by events beyond the provisionally winning bidder's control pursuant to 30 CFR 585.224(e).

If the provisional winner does not meet these requirements or otherwise fails to comply with applicable regulations or the terms of the FSN, BOEM reserves the right to not issue the lease to that bidder. In such a case, the provisional winner will forfeit its bid deposit. Also, in such a case, BOEM reserves the right to offer the lease to the next highest eligible bidder as determined by BOEM.

Within 45 days after receiving the lease copies, the provisional winner must pay the first year's rent using the ''ONRR Renewable Energy Initial Rental Payments'' form available at: *https://www.pay.gov/public/form/start/27797604.* Subsequent annual rent payments must be made following the detailed instructions available on ONRR's website at: *https://onrr.gov/paying/payment-options?tabs=rent-payments.*

XVI. Non-Procurement Debarment and Suspension Regulations

Pursuant to 43 CFR part 42, subpart C, an OCS renewable energy lessee must comply with the Department of the Interior's non-procurement debarment and suspension regulations at 2 CFR parts 180 and 1400. The lessee must also communicate this requirement to persons with whom the lessee does business relating to this lease by including this requirement as a term or condition in their contracts and other transactions.

XVII. Final Sale Notice

The development of the FSN will be informed through the EA, related consultations, and comments received during the PSN comment period. The FSN will provide the final details concerning the offering and issuance of an OCS commercial wind energy lease for the Lease Areas in the Gulf of Maine. The FSN will be published in the **Federal Register** at least 30 days before the lease sale is conducted and will provide the date and time of the auction.

XVIII. Changes to Auction Details

BOEM has the discretion to change any auction detail specified in the FSN, including the date and time, if events outside BOEM's control have been found to interfere with a fair and proper lease sale. Such events may include, but are not limited to, natural disasters (*e.g.,* earthquakes, hurricanes, floods, and blizzards), wars, riots, act of terrorism, fire, strikes, civil disorder, Federal Government shutdowns, cyberattacks against relevant information systems, or other events of a similar nature. In case of such events, BOEM will notify all qualified bidders via email, phone, and BOEM's website at *https://www.boem.gov/renewable-energy/state-activities/maine/gulf-maine.* Bidders should call BOEM's Auction Manager at (703) 787–1121 if they have concerns.

XIX. Appeals

Reconsideration of rejected bid procedures are provided for in BOEM's regulations at 30 CFR 585.225 and 585.118(c). BOEM's decision on a bid is the final action of the Department of the Interior, and is not subject to appeals to the Office of Hearings and Appeals, but an unsuccessful bidder may apply for reconsideration by the Director under 30 CFR 585.225 as follows:

1. If BOEM rejects a bid, BOEM will provide the bidder a written statement of the reasons for rejection and will refund any money deposited with the bid, without interest.

2. A bidder may ask the BOEM Director for reconsideration, in writing, within 15-business days of bid rejection. The Director will send the bidder a written response either affirming or reversing the rejection.

XX. Public Participation

BOEM will make all comments on the PSN publicly available on *https://www.regulations.gov* under the docket number and will consider each comment prior to publication of the FSN. BOEM discourages anonymous comments; please include your name, address, and telephone number or email address as part of your comment. You should be aware that your entire comment, including your name, address, and any other personally identifiable information (PII) included in your comment, may be made publicly available at any time.

For BOEM to consider withholding from disclosure your PII, you must identify, in a cover letter, any information contained in the submittal of your comments that, if released, would constitute a clearly unwarranted invasion of your personal privacy. You must also briefly describe any possible harmful consequences of the disclosure of information, such as embarrassment, injury, or other harm.

Even if BOEM withholds your information in the context of this PSN, your comment is subject to the Freedom of Information Act (FOIA). If your submission is requested under the FOIA, your information will only be withheld if a determination is made that one of the FOIA's exemptions to disclosure applies. Such a determination will be made in accordance with the Department of the Interior's FOIA regulations and applicable law.

Note that BOEM will make available for public inspection, in their entirety, all comments submitted by organizations and businesses, or by individuals identifying themselves as representatives of organizations or businesses.

XXI. Protection of Privileged and Confidential Information

BOEM will protect privileged and confidential information that you submit consistent with FOIA and 30 CFR 585.114. Exemption 4 of FOIA applies to ''trade secrets and commercial or financial information obtained from a person'' that is privileged or confidential. (5 U.S.C. 552(b)(4)). If you wish to protect the confidentiality of such information, clearly mark it ''Contains Privileged or Confidential Information'' and consider submitting such information as a separate attachment. BOEM will not disclose such information, except as required by FOIA. Information that is not labeled as privileged or confidential may be regarded by BOEM as suitable for public release. Further, BOEM will not treat as confidential aggregate summaries of otherwise non-confidential information.

a. *Access to Information (54 U.S.C. 307103):* BOEM may, after consultation with the Secretary of the Interior, withhold the location, character, or ownership of historic properties if the Secretary and BOEM determine that disclosure may, among other things, cause a significant invasion of privacy, risk harm to the historic resources, or impede the use of a traditional religious site by practitioners. Tribes and other interested parties should designate such information that they wish to be withheld as confidential and provide the reasons why BOEM should do so.

Authority: 43 U.S.C. 1337(p); 30 CFR 585.211 and 585.216.

Elizabeth Klein,

Director, Bureau of Ocean Energy Management.

[FR Doc. 2024–09390 Filed 4–30–24; 8:45 am]

BILLING CODE 4340–98–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1341]

Certain Video Processing Devices and Products Containing the Same; Notice of a Commission Determination To Review in Part a Final Initial Determination, and on Review, To Find No Violation of Section 337; Termination of the Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission (''Commission'') has determined to review the Administrative Law Judge's (''ALJ'') final initial determination (''ID''), issued on February 5, 2024, and on review, to find no violation of section 337 in the above-referenced investigation. This investigation is terminated.

FOR FURTHER INFORMATION CONTACT: Benjamin S. Richards, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 708–5453. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on November 29, 2022, based on a complaint filed on behalf of VideoLabs, Inc. of Palo Alto, California (''VideoLabs''). 87 FR 73329 (Nov. 29, 2022). The complaint, as supplemented, alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain video processing devices and products containing the same by reason of infringement of claims of U.S. Patent Nos. 7,769,238 (''the '238 patent''), 8,139,878 (''the '878 patent''), and 8,208,542 (''the '542 patent''). *Id.* The complaint further alleges that a domestic industry exists. *Id.* The Commission's notice of investigation named as the sole respondent HP Inc. of Palo Alto, California (''HP''). *Id.* The Office of Unfair Import Investigations is not participating in the investigation. *Id.*

On July 27, 2023, and August 25, 2023, the ALJ issued Order No. 20 and Order No. 23, respectively, granting VideoLabs' motions to terminate the investigation with regards to the '238 patent and the '878 patent. Order No. 20 (July 11, 2023), *unreviewed by* Comm'n Notice (July 27, 2023); Order No. 23 (Aug. 7, 2023), *unreviewed by* Comm'n Notice (Aug. 25, 2023). Accordingly, the '542 patent is the sole remaining patent at issue.

The ALJ held a *Markman* hearing on June 7, 2023. On September 22, 2023, the ALJ issued Order No. 27, in which the ALJ construed certain claim terms while reserving construction of other terms until after the evidentiary hearing due to underlying fact issues. *See* Order No. 27 (Sept. 22, 2023).

The ALJ held an evidentiary hearing from October 23–26, 2023. The parties filed their post-hearing opening briefs and replies on November 13, 2023, and November 29, 2023, respectively.

On February 5, 2024, the ALJ issued the final ID in this investigation, which found no violation of section 337 as to any of the asserted claims of the '542 patent.

On February 20, 2024, VideoLabs petitioned for review of the final ID. On February 28, 2024, HP filed a response opposing VideoLabs' petition.

On March 25, 2024, the Commission determined to extend the date by which it must determine whether to review the final ID to April 25, 2024.

Having examined the record of this investigation, including the ID, the petition for review, and the response thereto, the Commission has determined not to review and thus adopts, the ID's claim construction findings and the ID's finding that the asserted claims are invalid as indefinite. Those findings are sufficient to support the ID's ultimate finding of no violation of section 337, which the Commission also adopts. Given the finding that the asserted claims are indefinite, the Commission cannot conduct a complete analysis of the other issues raised in this investigation, *e.g.,* infringement, obviousness, and domestic industry. Accordingly, the Commission has determined to review the remaining findings in the ID and on review take no position on those findings. This investigation is terminated.

The Commission vote for this determination took place on April 25, 2024.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: April 25, 2024.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2024–09362 Filed 4–30–24; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–688 and 731–TA–1612–1613 and 1615–1617 (Final)]

Brass Rod From Brazil, India, Mexico, South Africa, and South Korea; Scheduling of the Final Phase of the Antidumping and Countervailing Duty Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

DATES: April 22, 2024

FOR FURTHER INFORMATION CONTACT: Julie Duffy ((202) 708–2579), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on (202) 205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205–2000. General information concerning the

Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION: Effective September 29, 2023, the Commission established a general schedule for the conduct of the final phase of its investigations on brass rod from Brazil, India, Israel, Mexico, South Africa, and South Korea [1] following preliminary determinations by the U.S. Department of Commerce (''Commerce'') that imports of brass rod from India, Israel, and South Korea were being subsidized by the governments of India, Israel, and South Korea.[2] Notice of the scheduling of the final phase of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on October 5, 2023 (88 FR 69229). All persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission subsequently issued its final determination that an industry in the United States is materially injured by reason of imports of brass rod from India that have been found by Commerce to be subsidized by the government of India.[3] On April 22, 2024, Commerce issued its final affirmative determinations that imports of brass rod from Brazil, India, Mexico, South Africa, and South Korea were being sold at less than fair value in the United States, and that imports of brass rod from South Korea were being subsidized by the government of South Korea.[4] Accordingly, the Commission currently is issuing a supplemental schedule for its antidumping duty investigations on imports of brass rod from Brazil, India, Mexico, South Africa, and South Korea and countervailing duty investigation on imports of brass rod from South Korea.

This supplemental schedule is as follows: the deadline for filing supplemental party comments on Commerce's final antidumping and countervailing duty determinations is 5:15 p.m. on May 3, 2024. Supplemental party comments may address only Commerce's final antidumping duty determinations regarding imports of brass rod from Brazil, India, Mexico, South Africa, and South Korea and countervailing duty determination regarding imports of brass rod from South Korea. These supplemental final comments may not contain new factual information and may not exceed five (5) pages in length. The supplemental staff report in the final phase of these investigations regarding subject imports from Brazil, India, Mexico, South Africa, and South Korea will be placed in the nonpublic record on May 15, 2024; and a public version will be issued thereafter.

For further information concerning these investigations see the Commission's notice cited above and the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

Additional written submissions to the Commission, including requests pursuant to section 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.21 of the Commission's rules.

By order of the Commission.

Issued: April 26, 2024.

Lisa Barton,

Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–603–604 and 731–TA–1413–1415 (Review)]

Glycine From China, India, Japan, and Thailand; Institution of a Five-Year Review

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted a review pursuant to the Tariff Act of 1930 (''the Act''), as amended, to determine whether revocation of the countervailing duty and antidumping duty orders on glycine from China, India, Japan, and Thailand would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted May 1, 2024. To be assured of consideration, the deadline for responses is May 31, 2024. Comments on the adequacy of responses may be filed with the Commission by July 9, 2024.

FOR FURTHER INFORMATION CONTACT: Alexis Yim (202–708–1446), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—On June 21, 2019, the Department of Commerce (''Commerce'') issued countervailing duty orders on imports of glycine from China and India (84 FR 29173). On June 21, 2019, Commerce issued antidumping duty orders on imports of glycine from India and Japan (84 FR 29170). On October 18, 2019, Commerce issued an antidumping duty order on imports of glycine from Thailand (84 FR 55912). The Commission is conducting reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to

determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full reviews or expedited reviews The Commission's determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Countries* in these reviews are China, India, Japan, and Thailand.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise.* In its original determinations, the Commission defined the *Domestic Like Product* as consisting of all glycine, regardless of grade or purity level, coextensive with Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product,* or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determination, the Commission defined the *Domestic Industry* as producers of glycine of consisting of all domestic producers of glycine, regardless of grade or purity level.

(5) The *Order Date* is the date that the countervailing and antidumping duty orders under review became effective. In this review, the *Order Dates* are June 21, 2019 (the countervailing duty orders on imports of glycine from China and India, and the antidumping duty orders on imports of glycine from India and Japan), and October 18, 2019 (on the antidumping duty order on imports of glycine from Thailand).

(6) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is on or before 5:15 p.m. on May 31, 2024. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct an expedited or full review. The deadline for filing such comments is on or before 5:15 p.m. on July 9, 2024. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget (''OMB'') number is not displayed; the OMB number is 3117 0016/USITC No. 24–5–599, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determination in the review.

Information to Be Provided in Response to This Notice of Institution: If you are a domestic producer, union/worker group, or trade/business association; import/export *Subject Merchandise* from more than one *Subject Country;* or produce *Subject Merchandise* in more than one *Subject Country,* you may file a single response. If you do so, please ensure that your response to each question includes the information requested for each pertinent *Subject Country.* As used below, the term ''firm'' includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at *https://usitc.gov/reports/response_noi_worksheet,* where one can download and complete the ''NOI worksheet'' Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product,* a U.S. union or worker group, a U.S. importer of the *Subject Merchandise,* a foreign producer or exporter of the *Subject Merchandise,* a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping and countervailing duty orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in § 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry.*

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product.* Identify any known related parties and the nature of the relationship as defined in § 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in each *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries since the *Order Date.*

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product,* provide the following information on your firm's operations on that product during calendar year 2023, except as noted (report quantity data in 1,000 pounds and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from the *Subject Country,* provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in 1,000 pounds and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or

countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from each *Subject Country;* and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from each *Subject Country.*

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in any *Subject Country,* provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in 1,000 pounds and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in each *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in each *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in each *Subject Country* since the *Order Date,* and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in each *Subject Country,* and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry;* if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of Title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: April 25, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731–TA–672–673 (Fifth Review)]

Silicomanganese From China and Ukraine; Scheduling of Full Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of full reviews pursuant to the Tariff Act of 1930 (''the Act'') to determine whether revocation of the antidumping duty orders on silicomanganese from China and Ukraine would be likely to lead to continuation or recurrence of material injury within a reasonably foreseeable time.

DATES: April 25, 2024.

FOR FURTHER INFORMATION CONTACT: Charles Cummings (202–708–1666), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these reviews may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—On February 5, 2024, the Commission determined that responses to its notice of institution of the subject five-year reviews were such that full reviews should proceed (89 FR 13375, February 22, 2024); accordingly, full reviews are being scheduled pursuant to section 751(c)(5) of the Tariff Act of 1930 (19 U.S.C. 1675(c)(5)). A record of the Commissioners' votes, the Commission's statement on adequacy, and any individual Commissioner's statements are available from the Office of the Secretary and at the Commission's website.

Participation in the reviews and public service list.—Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in these reviews as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11 of the Commission's rules, by 45 days after publication of this notice. A party that filed a notice of appearance following publication of the Commission's notice of institution of the reviews need not file an additional notice of appearance. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the reviews.

For further information concerning the conduct of these reviews and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov.*) No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI

gathered in these reviews available to authorized applicants under the APO issued in the reviews, provided that the application is made by 45 days after publication of this notice. Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the reviews. A party granted access to BPI following publication of the Commission's notice of institution of the reviews need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report.—The prehearing staff report in the reviews will be placed in the nonpublic record on August 19, 2024, and a public version will be issued thereafter, pursuant to section 207.64 of the Commission's rules.

Hearing.—The Commission will hold an in-person hearing in connection with the reviews beginning at 9:30 a.m. on September 5, 2024. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before 5:15 p.m. on August 28, 2024. Any requests to appear as a witness via videoconference must be included with your request to appear. Requests to appear via videoconference must include a statement explaining why the witness cannot appear in person; the Chairman, or other person designated to conduct the reviews, may in their discretion for good cause shown, grant such a request. Requests to appear as remote witness due to illness or a positive COVID–19 test result may be submitted by 3 p.m. the business day prior to the hearing. Further information about participation in the hearing will be posted on the Commission's website at *https://www.usitc.gov/calendarpad/calendar.html.*

A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference, if deemed necessary, to be held at 9:30 a.m. on September 4, 2024. Parties shall file and serve written testimony and presentation slides in connection with their presentation at the hearing by no later than 4:00 p.m. on September 4, 2024. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), and 207.24 of the Commission's rules. Parties must submit any request to present a portion of their hearing testimony *in camera* no later than 7 business days prior to the date of the hearing.

Written submissions.—Each party to the reviews may submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of section 207.65 of the Commission's rules; the deadline for filing is 5:15 p.m. on August 27, 2024. Parties shall also file written testimony in connection with their presentation at the hearing, and posthearing briefs, which must conform with the provisions of section 207.67 of the Commission's rules. The deadline for filing posthearing briefs is 5:15 p.m. on September 13, 2024. In addition, any person who has not entered an appearance as a party to the reviews may submit a written statement of information pertinent to the subject of the reviews on or before 5:15 p.m. on September 13, 2024. On October 2, 2024, the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before 5:15 p.m. on October 4, 2024, but such final comments must not contain new factual information and must otherwise comply with section 207.68 of the Commission's rules. All written submissions must conform with the provisions of section 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

Additional written submissions to the Commission, including requests pursuant to section 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the reviews must be served on all other parties to the reviews (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: These reviews are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.62 of the Commission's rules.

By order of the Commission.

Issued: April 25, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–601 and 731–TA–1411 (Review)]

Laminated Woven Sacks From Vietnam; Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 (''the Act''), as amended, to determine whether revocation of the antidumping and countervailing duty orders on laminated woven sacks from Vietnam would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted May 1, 2024. To be assured of consideration, the deadline for responses is May 31, 2024. Comments on the adequacy of responses may be filed with the Commission by July 9, 2024.

FOR FURTHER INFORMATION CONTACT: Kenneth Gatten (202–708–1447), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—On June 4, 2019, the Department of Commerce (''Commerce'') issued antidumping and countervailing duty orders on imports of laminated woven sacks from Vietnam (84 FR 25753). The Commission is conducting reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to

determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission's determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Country* in these reviews is Vietnam.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise.* In its original determinations, the Commission defined a single *Domestic Like Product* to include all laminated woven sacks, coextensive with Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product,* or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations, the Commission defined the *Domestic Industry* to consist of all U.S. producers of laminated woven sacks. One Commissioner defined the *Domestic Industry* differently.

(5) The *Order Date* is the date that the orders under review became effective. In these reviews, the *Order Date* is June 4, 2019.

(6) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is on or before 5:15 p.m. on May 31, 2024. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is on or before 5:15 p.m. on July 9, 2024. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget

(''OMB'') number is not displayed; the OMB number is 3117 0016/USITC No. 24–5–597, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information to Be Provided in Response to This Notice of Institution: As used below, the term ''firm'' includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at *https://usitc.gov/reports/response_noi_worksheet,* where one can download and complete the ''NOI worksheet'' Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product,* a U.S. union or worker group, a U.S. importer of the *Subject Merchandise,* a foreign producer or exporter of the *Subject Merchandise,* a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping and countervailing duty orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in § 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry.*

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product.* Identify any known related parties and the nature of the relationship as defined in § 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in the *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries since the *Order Date.*

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product,* provide the following information on your firm's operations on that product during calendar year 2023, except as noted (report quantity data in number of sacks and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from the *Subject Country,* provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in number of sacks and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from the *Subject Country;* and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from the *Subject Country.*

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in the *Subject Country,* provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in number of sacks and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the

information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in the *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in the *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in the *Subject Country* since the *Order Date,* and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in the *Subject Country,* and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry;* if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of Title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

Issued: April 25, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1385]

Certain Furniture Products Finished With Decorative Wood Grain Paper and Components Thereof; Notice of Commission Determination Not To Review an Initial Determination Terminating the Investigation Based on Withdrawal of the Complaint

AGENCY: International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (''ID'') (Order No. 8) issued by the presiding administrative law judge (''ALJ''), terminating the investigation in its entirety based on the withdrawal of the complaint.

FOR FURTHER INFORMATION CONTACT: Robert J. Needham, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 708–5468. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on January 12, 2024, based on a complaint filed by Toppan Interamerica, Inc. of McDonough, Georgia (''Toppan''). 89 FR 2252–53 (Jan. 12, 2024). The complaint alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain furniture products finished with decorative wood grain paper and components thereof by reason of infringement of one or more of U.S. Copyright Registration Nos. VA 2–142–287, VA 2–176–002, VA 2–142–295, and 2–142–292. *Id.* at 2252. The complaint further alleges that a domestic industry exists. *Id.* The Commission's notice of investigation named as respondent Whalen LLC d/b/a Whalen Furniture of San Diego, California. *Id.* at 2253. The Office of Unfair Import Investigations is not participating in the investigation. *Id.*

On April 4, 2024, Toppan filed an unopposed motion to terminate the investigation based on the withdrawal of the complaint. No party responded to the motion.

On April 5, 2024, the ALJ issued the subject ID pursuant to Commission Rule 210.21(a) (19 CFR 210.21(a)), granting the motion to terminate the investigation in its entirety. The ID finds that there are no extraordinary circumstances that would prevent the requested termination of the investigation. No party petitioned for review of the subject ID.

The Commission has determined not to review the subject ID. The investigation is hereby terminated in its entirety.

The Commission vote for this determination took place on April 26, 2024.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: April 26, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–447 and 731–TA–1116 (Third Review)]

Circular Welded Carbon-Quality Steel Pipe From China; Institution of a Five-Year Review

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted a review pursuant to the Tariff Act of 1930 (''the Act''), as amended, to determine whether revocation of the countervailing and antidumping duty

orders on circular welded carbon-quality steel pipe from China would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted May 1, 2024. To be assured of consideration, the deadline for responses is May 31, 2024. Comments on the adequacy of responses may be filed with the Commission by July 9, 2024.

FOR FURTHER INFORMATION CONTACT: Charles Cummings (202–708–1666), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—On July 22, 2008, the Department of Commerce (''Commerce'') issued antidumping and countervailing duty orders on imports of circular welded carbon-quality steel pipe from China (73 FR 42545 and 42547). Commerce issued a continuation of the antidumping and countervailing duty orders on imports of circular welded carbon-quality steel pipe from China following Commerce's and the Commission's first five-year reviews, effective May 20, 2014 (79 FR 28894) and second five-year reviews, effective June 26, 2019 (84 FR 30086). The Commission is now conducting a third review pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct a full review or an expedited review. The Commission's determination in any expedited review will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to this review:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year review, as defined by Commerce.

(2) The *Subject Country* in this review is China.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise.* In its original determinations, and its expedited first and second five-year reviews, the Commission defined the *Domestic Like Product* as circular welded carbon-quality steel pipe, coextensive with Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product,* or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations, and its expedited first and second five-year reviews, the Commission defined the *Domestic Industry* as all domestic producers of circular-welded carbon-quality steel pipe.

(5) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will

sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is 5:15 p.m. on May 31, 2024. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct an expedited or full review. The deadline for filing such comments is 5:15 p.m. on July 9, 2024. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget (''OMB'') number is not displayed; the OMB number is 3117 0016/USITC No. 24–5–600, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determination in the review.

Information to Be Provided in Response to This Notice of Institution: As used below, the term ''firm'' includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at *https://usitc.gov/reports/response_noi_worksheet,* where one can download and complete the ''NOI worksheet'' Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product,* a U.S. union or worker group, a U.S. importer of the *Subject Merchandise,* a foreign producer or exporter of the *Subject Merchandise,* a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the countervailing and antidumping duty orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry.*

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product.* Identify any known related parties and the nature of the relationship as defined in section 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in the *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries after 2018.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product,* provide the following information on your firm's operations on that product during calendar year 2023, except as noted (report quantity data in short tons and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating

income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from the *Subject Country,* provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in short tons and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping and/or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. commercial shipments of *Subject Merchandise* imported from the *Subject Country;* and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from the *Subject Country.*

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in the *Subject Country,* provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in short tons and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in the *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in the *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from the *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in the *Subject Country* after 2018, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in the *Subject Country,* and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry;* if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

Issued: April 25, 2024.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2024–09366 Filed 4–30–24; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–929–931 (Fourth Review)]

Silicomanganese From India, Kazakhstan, and Venezuela; Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice that it has instituted reviews pursuant to the Tariff Act of 1930 (''the Act''), as amended, to determine whether revocation of the antidumping duty orders on Silicomanganese from India, Kazakhstan, and Venezuela would be likely to lead to continuation or recurrence of material injury. Pursuant to the Act, interested parties are requested to respond to this notice by submitting the information specified below to the Commission.

DATES: Instituted May 1, 2024. To be assured of consideration, the deadline for responses is May 31, 2024. Comments on the adequacy of responses may be filed with the Commission by July 9, 2024.

FOR FURTHER INFORMATION CONTACT: Caitlyn Hendricks (202–205–2058), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—On May 23, 2002, the Department of Commerce (''Commerce'') issued antidumping duty orders on imports of silicomanganese from India, Kazakhstan, and Venezuela (67 FR 36149). Commerce issued a continuation of the antidumping duty orders on imports of silicomanganese from India, Kazakhstan, and Venezuela following Commerce's and the Commission's first five-year reviews, effective November 30, 2007 (73 FR 841, January 4, 2008), second five-year reviews, effective October 2, 2013 (78 FR 60846), and third five-year reviews,

effective June 12, 2019 (84 FR 27243). The Commission is now conducting fourth reviews pursuant to section 751(c) of the Act, as amended (19 U.S.C. 1675(c)), to determine whether revocation of the orders would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. Provisions concerning the conduct of this proceeding may be found in the Commission's Rules of Practice and Procedure at 19 CFR part 201, subparts A and B, and 19 CFR part 207, subparts A and F. The Commission will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct full or expedited reviews. The Commission's determinations in any expedited reviews will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to these reviews:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year reviews, as defined by Commerce.

(2) The *Subject Countries* in these reviews are India, Kazakhstan, and Venezuela.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise.* In its original determinations, its expedited first five-year review determinations, its full second five-year review determinations, and its expedited third five-year review determinations, the Commission found a single *Domestic Like Product* consisting of all silicomanganese, except low-carbon silicomanganese, coextensive with Commerce's scope.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product,* or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determinations, its expedited first five-year review determinations, its full second five-year review determinations, and its expedited third five-year review determinations, the Commission found a single *Domestic Industry* consisting of all domestic producers of silicomanganese, except low-carbon silicomanganese.

(5) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the *Subject Merchandise* into the United States from a foreign manufacturer or through its selling agent.

Participation in the proceeding and public service list.—Persons, including industrial users of the *Subject Merchandise* and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the proceeding as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the proceeding.

Former Commission employees who are seeking to appear in Commission five-year reviews are advised that they may appear in a review even if they participated personally and substantially in the corresponding underlying original investigation or an earlier review of the same underlying investigation. The Commission's designated agency ethics official has advised that a five-year review is not the same particular matter as the underlying original investigation, and a five-year review is not the same particular matter as an earlier review of the same underlying investigation for purposes of 18 U.S.C. 207, the post-employment statute for Federal employees, and Commission rule 201.15(b) (19 CFR 201.15(b)), 79 FR 3246 (Jan. 17, 2014), 73 FR 24609 (May 5, 2008). Consequently, former employees are not required to seek Commission approval to appear in a review under Commission rule 19 CFR 201.15, even if the corresponding underlying original investigation or an earlier review of the same underlying investigation was pending when they were Commission employees. For further ethics advice on this matter, contact Charles Smith, Office of the General Counsel, at 202–205–3408.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and APO service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this proceeding available to authorized applicants under the APO issued in the proceeding, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. 1677(9), who are parties to the proceeding. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this proceeding must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceeding may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Written submissions.—Pursuant to § 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is 5:15 p.m. on May 31, 2024. Pursuant to § 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct expedited or full reviews. The deadline for filing such comments is 5:15 p.m. on July 9, 2024. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings. Also, in accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the proceeding must be served on all other parties to the proceeding (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the proceeding you do not need to serve your response).

Please note the Secretary's Office will accept only electronic filings at this

time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

No response to this request for information is required if a currently valid Office of Management and Budget (''OMB'') number is not displayed; the OMB number is 3117 0016/USITC No. 24–5–598, expiration date June 30, 2026. Public reporting burden for the request is estimated to average 15 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436.

Inability to provide requested information.—Pursuant to § 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to § 776(b) of the Act (19 U.S.C. 1677e(b)) in making its determinations in the reviews.

Information to Be Provided in Response to This Notice of Institution: If you are a domestic producer, union/worker group, or trade/business association; import/export *Subject Merchandise* from more than one *Subject Country;* or produce *Subject Merchandise* in more than one *Subject Country,* you may file a single response. If you do so, please ensure that your response to each question includes the information requested for each pertinent *Subject Country.* As used below, the term ''firm'' includes any related firms.

Those responding to this notice of institution are encouraged, but not required, to visit the USITC's website at *https://usitc.gov/reports/response_noi_worksheet,* where one can download and complete the ''NOI worksheet'' Excel form for the subject proceeding, to be included as attachment/exhibit 1 of your overall response.

(1) The name and address of your firm or entity (including World Wide Web address) and name, telephone number, fax number, and Email address of the certifying official.

(2) A statement indicating whether your firm/entity is an interested party under 19 U.S.C. 1677(9) and if so, how, including whether your firm/entity is a U.S. producer of the *Domestic Like Product,* a U.S. union or worker group, a U.S. importer of the *Subject Merchandise*, a foreign producer or exporter of the *Subject Merchandise,* a U.S. or foreign trade or business association (a majority of whose members are interested parties under the statute), or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this proceeding by providing information requested by the Commission.

(4) A statement of the likely effects of the revocation of the antidumping duty orders on the *Domestic Industry* in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of *Subject Merchandise* on the *Domestic Industry*.

(5) A list of all known and currently operating U.S. producers of the *Domestic Like Product.* Identify any known related parties and the nature of the relationship as defined in § 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the *Subject Merchandise* and producers of the *Subject Merchandise* in each *Subject Country* that currently export or have exported *Subject Merchandise* to the United States or other countries after 2017.

(7) A list of 3–5 leading purchasers in the U.S. market for the *Domestic Like Product* and the *Subject Merchandise* (including street address, World Wide Web address, and the name, telephone number, fax number, and Email address of a responsible official at each firm).

(8) A list of known sources of information on national or regional prices for the *Domestic Like Product* or the *Subject Merchandise* in the U.S. or other markets.

(9) If you are a U.S. producer of the *Domestic Like Product,* provide the following information on your firm's operations on that product during calendar year 2023, except as noted (report quantity data in short tons and value data in U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the *Domestic Like Product* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm to produce the *Domestic Like Product* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix);

(c) the quantity and value of U.S. commercial shipments of the *Domestic Like Product* produced in your U.S. plant(s);

(d) the quantity and value of U.S. internal consumption/company transfers of the *Domestic Like Product* produced in your U.S. plant(s); and

(e) the value of (i) net sales, (ii) cost of goods sold (COGS), (iii) gross profit, (iv) selling, general and administrative (SG&A) expenses, and (v) operating income of the *Domestic Like Product* produced in your U.S. plant(s) (include both U.S. and export commercial sales, internal consumption, and company transfers) for your most recently completed fiscal year (identify the date on which your fiscal year ends).

(10) If you are a U.S. importer or a trade/business association of U.S. importers of the *Subject Merchandise* from any *Subject Country,* provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in short tons and value data in U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping duties) of U.S. commercial shipments of *Subject Merchandise* imported from each *Subject Country;* and

(c) the quantity and value (f.o.b. U.S. port, including antidumping duties) of U.S. internal consumption/company transfers of *Subject Merchandise* imported from each *Subject Country.*

(11) If you are a producer, an exporter, or a trade/business association of producers or exporters of the *Subject Merchandise* in any *Subject Country,* provide the following information on your firm's(s') operations on that product during calendar year 2023 (report quantity data in short tons and value data in U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of *Subject Merchandise* in each *Subject Country* accounted for by your firm's(s') production;

(b) Capacity (quantity) of your firm(s) to produce the *Subject Merchandise* in each *Subject Country* (that is, the level of production that your establishment(s) could reasonably have expected to attain during the year, assuming normal operating conditions (using equipment and machinery in place and ready to operate), normal operating levels (hours per week/weeks per year), time for downtime, maintenance, repair, and cleanup, and a typical or representative product mix); and

(c) the quantity and value of your firm's(s') exports to the United States of *Subject Merchandise* and, if known, an estimate of the percentage of total exports to the United States of *Subject Merchandise* from each *Subject Country* accounted for by your firm's(s') exports.

(12) Identify significant changes, if any, in the supply and demand conditions or business cycle for the *Domestic Like Product* that have occurred in the United States or in the market for the *Subject Merchandise* in each *Subject Country* after 2017, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the *Domestic Like Product* produced in the United States, *Subject Merchandise* produced in each *Subject Country,* and such merchandise from other countries.

(13) (OPTIONAL) A statement of whether you agree with the above definitions of the *Domestic Like Product* and *Domestic Industry;* if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.61 of the Commission's rules.

By order of the Commission.

Issued: April 25, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219–0New]

Proposed Extension of Information Collection: Coal Respirator Program

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor (DOL), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance, with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Coal Respirator Program.

DATES: All comments must be received on or before July 1, 2024.

ADDRESSES: Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below. Please note that late comments received after the deadline will not be considered.

- *Federal E-Rulemaking Portal: https://www.regulations.gov.* Follow the on-line instructions for submitting comments for docket number MSHA–2024–0004.
- *Mail/Hand Delivery:* DOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, 4th Floor West, Arlington, VA 22202–5452. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor's COVID–19 policy. Special health precautions may be required.
- MSHA will post all comments as well as any attachments, except for information submitted and marked as confidential, in the docket at *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances, MSHA, at *MSHA.information.collections@dol.gov* (email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977, as amended (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811(a), authorizes the Secretary of Labor (Secretary) to develop, promulgate, and revise, as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal, metal and nonmetal mines.

A final rule titled ''Lowering Miners' Exposure to Respirable Crystalline Silica and Improving Respiratory Protection'' (RIN 1219–AB36) amends 30 CFR 72.710 to incorporate by reference ASTM F3387–19, entitled ''*Standard Practice for Respiratory Protection,*'' because it is the most recent consensus standard developed by experts in government and professional associations on the selection, use, and maintenance for respiratory equipment. The final rule requires that approved respirators be selected, fitted, used, and maintained in accordance with the provisions of a written respiratory protection program consistent with the requirements of ASTM F3387–19.

Section 30 CFR 72.710 incorporates, by reference, requirements of ASTM F3387–19 related to respiratory protective equipment. These requirements mandate that coal mines

where miners must wear respirators have written standard operating procedures (SOPs) for their respiratory program, that such miners who must wear respirators are fit-tested in a medical evaluation to the respirators that they will use, and that mines perform emergency respirator inspections. Records are also required to be kept in connection with respirators, including revised written SOPs governing the selection and use of respirators; records relating to the respiratory programs according to ASTM requirements; medical evaluation/fit-test results; and records of emergency respirators inspection. Emergency respirator inspections are regular inspections of respirators reserved for use during emergencies; the inspections are used to ensure that respirators would properly function if needed during an emergency.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g., permitting electronic submission of responses.*

The information collection request will be available on *https://www.regulations.gov.* MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on *https://www.regulations.gov* and *https://www.reginfo.gov.*

The public may also examine publicly available documents at DOL–MSHA, Office of Standards, Regulations and Variances, 201 12th Street South, 4th Floor West, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the West elevator. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor's COVID–19 policy. Special health precautions may be required.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION** section of this notice.

III. Current Actions

This information collection request contains provisions for Coal Respirator Program. MSHA has provided the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request.

Type of Review: New collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0New.

Affected Public: Business or other for-profit.

Number of Annual Respondents: 1,106.

Frequency: Annual.

Number of Annual Responses: 19,908.

Annual Time Burden: 11,060 hours.

Annual Other Burden Cost: $0.

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the proposed new information collection request; they will also become a matter of public record and will be available at *https://www.reginfo.gov.*

Song-ae Aromie Noe,

Certifying Officer, Mine Safety and Health Administration.

NUCLEAR REGULATORY COMMISSION

[NRC–2023–0181]

Final Revision to Branch Technical Position 7–19, Guidance for Evaluation of Defense in Depth and Diversity To Address Common-Cause Failure Due to Latent Design Defects in Digital Instrumentation and Control Systems

AGENCY: Nuclear Regulatory Commission.

ACTION: Standard review plan-final section revision; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing a final revision to the following section of NUREG–0800, ''Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plans: LWR Edition'': Branch Technical Position (BTP) 7–19, ''Guidance for Evaluation of Defense in Depth and Diversity to Address Common-Cause Failure Due to Latent Design Defects in Digital Instrumentation and Control Systems.''

DATES: The Standard Review Plan update is effective on May 31, 2024.

ADDRESSES: Please refer to Docket ID NRC–2023–0181 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0181. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Carla P. Roque-Cruz, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–1455; email: *Carla.Roque-Cruz@nrc.gov.*

- The NRC posts its issued staff guidance on the NRC's public website at *https://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr0800.*

SUPPLEMENTARY INFORMATION:

I. Background

This BTP provides the NRC staff with guidance for evaluating an applicant's assessment of the adequacy of defense in depth and diversity (D3) for a proposed digital instrumentation and

control (DI&C) system. On October 24, 2023 (88 FR 73051), the NRC published for public comment a proposed revision to BTP 7–19, ''Guidance for Evaluation of Defense in Depth and Diversity to Address Common-Cause Failure Due to Latent Design Defects in Digital Instrumentation and Control Systems'' of NUREG–0800, ''Standard Review Plan for the Review of Safety Analysis Reports for Nuclear Power Plants: LWR Edition.'' The public comment period closed on November 24, 2023. Thirty-five public comments were received regarding draft Revision 9 of BTP 7–19. The final Revision 9 to NUREG–0800, BTP 7–19, ''Guidance for Evaluation of Defense in Depth and Diversity to Address Common-Cause Failure Due to Latent Design Defects in Digital Instrumentation and Control Systems'' is available in ADAMS under Accession No. ML24005A077.

A summary of the public comments and the NRC staff's disposition of the comments are available in a separate document, ''Response to Public Comments on Draft Standard Review Plan Branch Technical Position 7–19, 'Guidance for Evaluation of Defense in Depth and Diversity to Address Common-Cause Failure Due to Latent Design Defects in Digital Instrumentation and Control Systems' '' (ADAMS Accession No. ML24005A115).

II. Backfitting, Forward Fitting, and Issue Finality

Chapter 7 of the SRP provides guidance to the staff for reviewing instrumentation and controls information provided in applications for licensing actions. Part of Chapter 7 provides guidance for the evaluation of defense-in-depth and diversity in digital computer-based instrumentation and control systems. Issuance of this BTP revision does not constitute backfitting as defined in section 50.109 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Backfitting'' (the Backfit Rule), and as described in Management Directive (MD) 8.4, ''Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests''; does not constitute forward fitting as that term is defined and described in MD 8.4; and does not affect the issue finality of any approval issued under 10 CFR part 52, ''Licenses, Certificates, and Approvals for Nuclear Power Plants.'' The NRC staff's position is based upon the following considerations.

First, the SRP provides guidance to the NRC staff on how to review an application for NRC regulatory approval in the form of licensing. Changes in internal guidance intended for use by only the staff are not matters that constitute backfitting as that term is defined in 10 CFR 50.109(a)(1); does not constitute forward fitting as that term is defined and described in MD 8.4; and does not affect the issue finality of any approval issued under 10 CFR part 52, ''Licenses, Certificates, and Approvals for Nuclear Power Plants.''

Second, the NRC staff does not intend to use the guidance in this SRP section to support NRC staff actions in a manner that would constitute backfitting or forward fitting. If, in the future, the NRC seeks to impose a position in this SRP section in a manner that constitutes backfitting, forward fitting, or affects the issue finality for a 10 CFR part 52 approval, then the NRC will address the Backfit Rule, the forward fitting provision of MD 8.4, or the applicable issue finality provision in 10 CFR part 52, respectively.

III. Congressional Review Act

This standard review plan section is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

Dated: April 25, 2024.

For the Nuclear Regulatory Commission.

Undine Shoop,

Chief, Integrated Program Management and Beyond Design Basis Branch, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100032; File No. SR–CboeBZX–2023–062]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Order Disapproving a Proposed Rule Change To Amend the Initial Period After Commencement of Trading of a Series of Exchange-Traded Fund Shares on the Exchange as It Relates to the Holders of Record and/or Beneficial Holders, as Provided in Exchange Rule 14.11(l)

April 25, 2024.

I. Introduction

On August 14, 2023, Cboe BZX Exchange, Inc. (''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend the continued listing requirement applicable to Exchange-Traded Fund Shares (''ETF Shares'') relating to holders of record and/or beneficial holders pursuant to BZX Rule 14.11(l). The proposed rule change was published for comment in the **Federal Register** on September 1, 2023.[3]

On September 25, 2023, pursuant to Section 19(b)(2) of the Exchange Act, the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[4] On November 14, 2023, the Commission instituted proceedings pursuant to Section 19(b)(2)(B) of the Exchange Act [5] to determine whether to approve or disapprove the proposed rule change.[6] On February 13, 2024, the Commission designated a longer period for Commission action on the proposed rule change.[7] The Commission has received no comments on the proposed rule change.

This order disapproves the proposed rule change because, as discussed below, BZX has not met its burden under the Exchange Act and the Commission's Rules of Practice to demonstrate that its proposal is consistent with the requirements of Exchange Act Section 6(b)(5), and, in particular, the requirement that the rules of a national securities exchange be designed ''to prevent fraudulent and manipulative acts and practices'' and ''to protect investors and the public interest.'' [8]

II. Description of the Proposal [9]

As described in detail in the Notice and OIP, a continued listing

[7] *See* Securities Exchange Act Release No. 99530, 89 FR 12891 (February 20, 2024).

[8] 15 U.S.C. 78f(b)(5).

[9] On April 29, 2020, BZX filed a proposed rule change to extend the Non-Compliance Period (as defined herein) in the Beneficial Holders Rule (as defined herein) from 12 months after commencement of trading on the Exchange to 36 months after commencement of trading on the Exchange for certain exchange-traded products, including a series of ETF Shares. *See* Securities Exchange Act Release No. 88795 (May 1, 2020), 85 FR 27254 (SR–CboeBZX–2020–036) (''Prior PRC Notice'' or ''prior proposal''). The Commission disapproved the prior proposal, finding that the Exchange failed to satisfy its burden to demonstrate

requirement under BZX Rule 14.11(l) for ETF Shares [10] currently provides that, following the initial 12-month period after commencement of trading on the Exchange, the Exchange will consider the suspension of trading in, and will commence delisting proceedings for, a series of ETF Shares for which there are fewer than 50 beneficial holders for 30 or more consecutive trading days (''Beneficial Holders Rule''). The Exchange is proposing to change the date after which a series of ETF Shares must have at least 50 beneficial holders or be subject to delisting proceedings under the Beneficial Holders Rule (''Non-Compliance Period''). Specifically, the Exchange seeks to extend the Non-Compliance Period in the Beneficial Holders Rule from 12 months after commencement of trading on the Exchange to 36 months after commencement of trading on the Exchange.

The Exchange asserts that it would be appropriate to increase the Non-Compliance Period from 12 months to 36 months because: (1) it would bring the rule more in line with the life cycle of an exchange-traded product (''ETP''); [11] (2) the economic and competitive structures in place in the ETP ecosystem naturally incentivize issuers to delist products rather than continuing to list products that do not garner investor interest; and (3) extending the period from 12 to 36 months will not meaningfully impact the manipulation concerns that the Beneficial Holders Rule is intended to address.

According to the Exchange, the ETP space is more competitive than it has ever been, with more than 2,000 ETPs listed on exchanges. As a result, distribution platforms have become more restrictive about the ETPs they will allow on their systems, often requiring a minimum track record (*e.g.,* twelve months) and a minimum level of assets under management (*e.g.,* $100 million). Many larger entities also require a one-year track record before they will invest in an ETP. In the Exchange's view, this has slowed the growth cycle of the average ETP, with the result that the Exchange has seen a significant number of deficiencies with respect to the Beneficial Holders Rule over the last several years. Specifically, the Exchange states that it has issued deficiency notifications to 39 ETPs for non-compliance with the Beneficial Holders Rule since 2015. Of those 39 ETPs, 30 ultimately were able to achieve compliance while undergoing the delisting process. According to the Exchange, this data shows that a 12-month threshold is an inappropriately short time frame and only serves as a regulatory and administrative burden for issuers that must remediate if they fall out of compliance.

In addition, the Exchange believes that the economic and competitive structures in place in the ETP ecosystem naturally incentivize issuers to delist products with insufficient investor interest, and that the Beneficial Holders Rule has resulted in the forced termination of ETPs that issuers believed were still economically viable. The Exchange states that there are significant costs associated with the launch and continued operation of an ETP, and notes that the Exchange has had 148 products voluntarily delist since 2018. The Exchange also questions whether the number of beneficial holders is a meaningful measure of market interest in an ETP and believes that an ETP issuer is incentivized to have as many beneficial holders as possible.

The Exchange states that the proposal ''does not create any significant change in the risk of manipulation for ETF Shares listed on the Exchange.'' [12] The Exchange contends that a time extension to meet the requirement would present no new issues because any risk that is present during months 12 through 36 of initial listing would also be present during the first 12 months.[13] The Exchange also states that it has in place a robust surveillance program for ETPs that it believes is sufficient to deter and detect manipulation and other violative activity, and that the Exchange (or the Financial Industry Regulatory Authority on its behalf) communicates as needed with other members of the Intermarket Surveillance Group. The Exchange believes that its surveillance procedures will act to mitigate any manipulation concerns that arise from extending the compliance period for the Beneficial Holders Rule from 12 months to 36 months.[14]

Lastly, the Exchange takes the position that other continued listing standards (*e.g.,* the disclosure obligations applicable under Rule 6c–11 of the Investment Company Act of 1940 for series of ETF Shares) are generally sufficient to mitigate manipulation concerns associated with ETF Shares.[15]

III. Discussion and Commission Findings

The Commission must consider whether BZX's proposal is consistent with Section 6(b)(5) of the Exchange Act, which requires, in relevant part, that the rules of a national securities exchange be designed ''to prevent fraudulent and manipulative acts and practices'' and ''to protect investors and the public interest.'' [16] Under the Commission's Rules of Practice, the ''burden to demonstrate that a proposed rule change is consistent with the Exchange Act and the rules and regulations issued thereunder . . . is on the self-regulatory organization ['SRO'] that proposed the rule change.'' [17]

The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding,[18] and any failure of an SRO to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Exchange Act and the

that the proposed rule change is consistent with the Exchange Act and the rules and regulations issued thereunder. *See* Securities Exchange Act Release No. 90819 (December 29, 2020), 86 FR 332 (January 5, 2021) (SR–CboeBZX–2020–036) (''Prior Disapproval Order''). In the current proposed rule change, BZX proposes the same extension of the Non-Compliance Period in the Beneficial Holders Rule from 12 months after commencement of trading on the Exchange to 36 months after commencement of trading on the Exchange, but only with respect to ETF Shares.

[10] BZX Rule 14.11(l)(3)(A) defines ETF Shares as shares of stock issued by an Exchange-Traded Fund. The term ''Exchange-Traded Fund'' has the same meaning as the term ''exchange-traded fund'' defined in Rule 6c–11 under the Investment Company Act of 1940. *See* BZX Rule 14.11(l)(3)(B).

[11] A series of ETF Shares is a type of ETP.

[12] *See* Notice, *supra* note 3, 88 FR at 60518.

[13] *See id.*

[14] *See id.*

[15] *See id.*

[16] 15 U.S.C. 78f(b)(5). Pursuant to Section 19(b)(2) of the Exchange Act, 15 U.S.C. 78s(b)(2), the Commission must disapprove a proposed rule change filed by a national securities exchange if it does not find that the proposed rule change is consistent with the applicable requirements of the Exchange Act. Exchange Act Section 6(b)(5) states that an exchange shall not be registered as a national securities exchange unless the Commission determines that ''[t]he rules of the exchange are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers, or to regulate by virtue of any authority conferred by this title matters not related to the purposes of this title or the administration of the exchange.'' 15 U.S.C. 78(f)(b)(5).

[17] Rule 700(b)(3), Commission Rules of Practice, 17 CFR 201.700(b)(3).

[18] *See id.*

applicable rules and regulations.[19] Moreover, ''unquestioning reliance'' on an SRO's representations in a proposed rule change is not sufficient to justify Commission approval of a proposed rule change.[20]

The Commission has consistently recognized the importance of the Beneficial Holders Rule and other similar requirements, stating that such listing standards help ensure that exchange listed securities have sufficient public float, investor base, and trading interest to provide the depth and liquidity necessary to promote fair and orderly markets.[21] As stated by the Exchange, the Beneficial Holders Rule is intended to ensure that trading in ETF Shares is not susceptible to manipulation.[22]

As discussed above, the Exchange is proposing to increase the Non-Compliance Period from 12 months to 36 months, thereby extending by two years the length of time during which ETF Shares listed on the Exchange would have no requirement to have a minimum number of beneficial holders. In support of its proposal, the Exchange states that some ETPs have had difficulty complying with the Beneficial Holders Rule,[23] and that the existing Beneficial Holders Rule forces the delisting of ETPs that issuers believe may still be economically viable.[24] However, the Exchange does not sufficiently support its assertion that compliance with the Beneficial Holders Rule is especially difficult for ETF Shares or that any such compliance difficulties have led to the delisting of economically viable ETPs. For example, BZX states that it has issued deficiency notifications to 39 series of ETPs for noncompliance with the Beneficial Holders Rule since 2015 and, of those 39 series, 30 attained compliance after issuance of the deficiency notice.[25] These data indicate that, at most, the Exchange delisted nine series of ETPs over eight years for non-compliance with this requirement. However, BZX has not established how many (if any) of those nine series of ETPs were ETF Shares [26] or that they were delisted solely for non-compliance with the Beneficial Holders Rule.[27]

Additionally, the Exchange does not sufficiently explain why any such compliance difficulties, or the need to remediate the applicable deficiencies, justify tripling the Non-Compliance Period for this core quantitative listing standard from one year to three years, and permitting ETF Shares to trade on the Exchange for an additional two years without the protections described above that the Beneficial Holders Rule was designed to provide. For example, the Exchange states that no new manipulation concerns would arise with a longer Non-Compliance Period than a shorter one because any risk that is present during months 12 through 36 of initial listing would also be present during the first 12 months as provided under current rules.[28] However, the Exchange does not address why tripling the period during which the same regulatory risks posed by a Non-Compliance Period would be present is consistent with the Exchange Act. As discussed above, the Beneficial Holders Rule and other minimum number of holders requirements are important to ensure that trading in exchange listed securities is fair and orderly and not susceptible to manipulation, and the Exchange does not explain why it is consistent with the Exchange Act to permit ETF Shares to trade for two additional years without any of the protections of investors and the public interest provided by the Beneficial Holders Rule.

Finally, while the Exchange asserts that existing surveillances and other listing standards are sufficient to mitigate manipulation concerns, it does not offer a sufficient explanation of the basis for that view or provide supporting information or evidence to support its conclusion. Notably, although the Exchange acknowledges that the Beneficial Holders Rule is designed to ensure that trading in exchange-listed securities is not susceptible to manipulation, the Exchange does not explain how any of its specific existing surveillances or other listing requirements effectively address, in the absence of the Beneficial Holders Rule, those manipulation concerns and other regulatory risks to fair and orderly markets, investor protection and the public interest.[29] Accordingly, the Commission is unable to assess whether the Exchange's assertion has merit.

The Commission identified its concerns with this proposal in the OIP,[30] but the Exchange did not adequately respond or provide additional data addressing these concerns. As stated above, under the Commission's Rules of Practice, the ''burden to demonstrate that a proposed rule change is consistent with the Exchange Act and the rules and regulations issued thereunder . . . is on the self-regulatory organization ['SRO'] that proposed the rule change.'' [31] The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding, and any failure of an SRO to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Exchange Act and the applicable rules and regulations.[32] The Commission concludes that, because BZX has not demonstrated that its proposal is designed to prevent fraudulent and manipulative acts and practices or to protect investors and the public interest, the Exchange has not met its burden to demonstrate that its proposal is consistent with Section

[22] *See* Notice, *supra* note 3, 88 FR at 60518. *See also* Prior PRC Notice, *supra* note 9, 85 FR at 27255.

[23] Although the Exchange's proposed rule change is focused on ETF Shares, the Exchange's discussion refers to ETPs more generally.

[24] *See* Notice, *supra* note 3, 88 FR at 60518.

[25] *See id.* at 60517.

[26] As noted above, ETF Shares are a subset of ETPs. *See id.* at 60517, n.7. Additionally, BZX does not disclose how many of those 9 delistings occurred after April 6, 2020, when the Commission approved the adoption of BZX Rule 14.11(l), which permits the listing and trading of ETF Shares on the Exchange. *See* Securities Exchange Act Release No. 88566 (April 6, 2020), 85 FR 20312 (April 10, 2020) (SR–CboeBZX–2019–097).

[27] BZX did not establish that the nine delisted issues complied with all other applicable listing requirements, and therefore were delisted only because of their non-compliance with the Beneficial Holders Rule.

[28] *See* Notice, *supra* note 3, 88 FR at 60518.

[29] The Exchange states that its surveillances focus on detecting securities trading outside of their normal patterns, followed by surveillance analysis and investigations, where appropriate, to review the behavior of all relevant parties for all relevant trading violations. The Exchange also states that it or the Financial Industry Regulatory Authority, on behalf of the Exchange, or both, communicate as needed regarding ETP trading with other markets and the Intermarket Surveillance Group member entities, and may obtain trading information in ETPs from such markets and other entities.

[30] *See* OIP, *supra* note 6, 88 FR at 80784–5; *see also* Prior Disapproval Order, *supra* note 9.

[31] Rule 700(b)(3), Commission Rules of Practice, 17 CFR 201.700(b)(3).

[32] *See id.*

6(b)(5) of the Exchange Act.[33] For this reason, the Commission must disapprove the proposal.

IV. Conclusion

For the reasons set forth above, the Commission does not find, pursuant to Section 19(b)(2) of the Exchange Act, that the proposed rule change is consistent with the requirements of the Exchange Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with Section 6(b)(5) of the Exchange Act.

It is therefore ordered, pursuant to Section 19(b)(2) of the Exchange Act, that proposed rule change SR–CboeBZX–2023–062 is disapproved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[34]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100034; File No. SR–CboeBZX–2024–026]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing of a Proposed Rule Change To Expand BZX Rule 14.11(l) To Permit the Generic Listing and Trading of Multi-class ETF Shares

April 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 15, 2024, Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (''BZX'' or the ''Exchange'') is filing with the Securities and Exchange Commission (''Commission'' or ''SEC'') a proposed rule change to amend Rule 14.11(l) to provide that the Exchange may approve a series of Exchange-Traded Fund (''ETF'') Shares for listing and/or trading on the Exchange that operates in reliance on exemptive relief to Rule 6c–11 under the Investment Company Act of 1940 (the ''Investment Company Act'') that permits the trust issuing the ETF Shares to offer an exchange-traded fund class in addition to classes of shares that are not exchange-traded. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 14.11(l) to provide that the Exchange may approve a series of ETF Shares for listing and/or trading on the Exchange where such series operates in reliance on exemptive relief to Rule 6c–11 under the Investment Company Act that permits the trust issuing the ETF Shares to offer ETF Shares in addition to classes of shares that are not exchange-traded (''Multi-class ETF Shares'') of an open-end fund. There are numerous applications for exemptive relief for Multi-class ETF Shares currently before the Commission.[3] This proposed amendment would provide for the ''generic'' listing and/or trading of Multi-class ETF Shares under Rule 14.11(l) on the Exchange immediately upon the Commission's applicable order granting exemptive relief. This proposal is not intended to amend any other part of Rule 14.11(l) and the Exchange submits this proposal only to prevent any unnecessary delay in listing Multi-Class ETF Shares when and if such requests are granted by the Commission.

Background

Starting in 2000, the Commission began granting limited relief for The Vanguard Group, Inc. (''Vanguard'') to offer certain index-based open-end management investment companies with Multi-class ETF Shares.[4] After this relief was granted, there was limited public discourse about Multi-class ETF Shares until 2019, when the prospect of providing blanket exemptive relief to Multi-class ETF Shares was addressed in the Commission's adoption of Rule 6c-11 under the Investment Company Act (the ''ETF Rule'').[5] The ETF Rule permits ETFs that satisfy certain conditions to operate without the expense or delay of obtaining an exemptive order. However, the ETF Rule did not provide blanket exemptive relief to allow for Multi-class ETF Shares as part of the final rule. Instead,

[33] In disapproving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f). Although the Exchange states that the regulatory and administrative burdens of the Beneficial Holders Rule makes it more difficult for smaller issuers to compete because they have limited resources to overcome legal, marketing, or other obstacles associated with this requirement (*see* Notice, 88 FR at 60517), as discussed above, BZX has failed to establish that its Beneficial Holders Rule is unnecessary or that smaller issuers of ETF Shares actually have been negatively impacted by it.

(filed July 12, 2023); F/m Investments LLC (August 22, 2023); Fidelity Hastings Street Trust and Fidelity Management & Research Company (filed October 24, 2023); Morgan Stanley Institutional Fund Trust and Morgan Stanley Investment Management Inc. (filed January 29, 2024); First Trust Series Fund and First Trust Variable Insurance Trust (filed January 24, 2024); Guinness Atkinson Funds (filed February 27, 2024); and Metropolitan West Funds, TCW ETF Trust, and TCW Funds, Inc. (filed March 20, 2024).

[4] *See* Vanguard Index Funds, Investment Company Act Release Nos. 24680 (Oct. 6, 2000) (notice) and 24789 (Dec. 12, 2000) (order). The Commission itself, as opposed to the Commission staff acting under delegated authority, considered the original Vanguard application and determined that the relief was appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. In the process of granting the order, the Commission also considered and denied a hearing request on the original application, as reflected in the final Commission order. *See also* the Vanguard Group, Inc., Investment Company Act Release Nos. 26282 (Dec. 2, 2003) (notice) and 26317 (Dec. 30, 2003) (order); Vanguard International Equity Index Funds, Investment Company Act Release Nos. 26246 (Nov. 3, 2003) (notice) and 26281 (Dec. 1, 2003) (order); Vanguard Bond Index Funds, Investment Company Act Release Nos. 27750 (Mar. 9, 2007) (notice) and 27773 (April 2, 2007) (order) (collectively referred to as the ''Vanguard Orders'').

[5] *See* Securities Exchange Act Release No. 33–10695 (October 24, 2019) 84 FR 57162 (the ''ETF Rule Adopting Release'').

the Commission concluded that Multi-class ETF Shares should request relief through the exemptive application process so that the Commission may assess all relevant policy considerations in the context of the facts and circumstances of particular applicants. The Exchange adopted Rule 14.11(l)[6] shortly after the implementation of the ETF Rule and, because there were no exemptive applications before the Commission, did not propose to include any language comparable to what is being proposed herein.

As noted above, a number of applications for exemptive relief to permit the applicable fund to offer Multi-class ETF Shares (the ''Applications'') have been submitted to the Commission starting in early 2023. In general, the Applications state that the ability of a fund to offer Multi-class ETF Shares, *i.e.,* both a class of mutual fund shares (each such class, a ''Mutual Fund class'' and such shares ''Mutual Fund Shares'') and ETF Shares, could be beneficial to the fund and to shareholders of each type of class for various reasons, including more efficient portfolio management, better secondary market trading opportunities, and cost efficiencies, among others.[7]

Proposal

The Exchange proposes to amend Rule 14.11(l)(4) to explicitly provide that any series of ETF Shares that is eligible to operate under exemptive relief under the Investment Company Act that permits the fund to offer a class of ETF Shares in addition to classes of shares that are not-exchange traded (*i.e.,* Multi-class ETF Shares) may be approved by the Exchange for listing and/or trading (including pursuant to unlisted trading privileges) on the Exchange pursuant to Rule 19b–4(e) under the Act. The Exchange also proposes to explicitly provide that the requirements of any exemptive relief applicable to Multi-class ETF Shares must be satisfied by a series of ETF Shares on an initial and continued listing basis. Last, the Exchange proposes to amend Rule 14.11(l)(4)(B)(i)(a) to provide that any series of Multi-class ETF Shares that fails to meet the requirements of the applicable exemptive relief will be subject to the suspension of trading or removal provisions of Rule 14.11(l)(4)(B)(i).

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[8] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[9] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[10] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes that permitting Multi-class ETF Shares to list on the Exchange is consistent with the applicable exemptive relief and will help perfect the mechanism of a free and open market and, in general, will protect investors and the public interest in that it will permit the listing and trading of Multi-class ETF Shares, consistent with the applicable exemptive relief, and in a manner that will benefit investors. Specifically, the Exchange believes that the relief proposed in the Applications and the expected benefits of the Multi-class ETF Shares described above would be to the benefit of investors. Eliminating any unnecessary delay for Multi-class ETF Shares listing on the Exchange will simply help accrue those benefits to investors more expeditiously. Further, the Exchange is only proposing to amend its rules to allow such a series of Multi-class ETF Shares to list on the Exchange pursuant to Rule 14.11(l), a change to its rules that will only be meaningful if and when the Commission grants such relief to an Applicant. To the extent that the Commission does not grant Multi-class ETF Shares relief, the proposed change to Rule 14.11(l) will have no impact on series of ETF Shares listed on the Exchange.

The Exchange also believes that amending Rule 14.11(l) to explicitly provide that the initial and continued listing standards applicable to ETF Shares, including the suspension of trading or removal standards, would be applicable to Multi-class ETF Shares operating under any applicable exemptive relief, are designed to promote transparency and clarity in the Exchange's Rules. The Exchange believes that with these changes, Rule 14.11(l)(4) would clearly allow for the listing and trading of Multi-class ETF Shares upon the Commission's order of exemptive relief.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not

[6] *See* Securities Exchange Act No. 88566 (April 6, 2020) 85 FR 20312 (April 10, 2020) (SRCboeBZX–2019–097) (Notice of Filing of Amendment No. 2 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 2, To Adopt BZX Rule 14.11(l) Governing the Listing and Trading of Exchange-Traded Fund Shares).

[7] Specifically, the Applicants believe that a Mutual Fund class would benefit ETF class shareholders because investor cash flows through a Mutual Fund class can be used for efficient portfolio rebalancing. To the extent that cash flows come into a fund through a Mutual Fund class, a portfolio manager may be able to deploy that cash strategically to rebalance the portfolio. Second, cash flows through a Mutual Fund class may allow for greater creation basket flexibility for creations and redemptions through the ETF class, which could promote arbitrage efficiency and smaller spreads on the trading of ETF Shares in the secondary market. With respect to existing funds, ETF classes would permit investors that prefer the ETF structure to gain access to established funds' investment strategies. Additionally, the establishment of an ETF class as part of an existing fund could lead to cost efficiencies. Specifically, in terms of fund expenses, an ETF class could have initial and ongoing advantages for its shareholders, where shareholders of an ETF class of a fund that already has substantial assets could immediately benefit from economies of scale. Finally, the tax-free conversion of shares from the Mutual Fund class to the ETF class may accelerate the development of an ETF shareholder base. Subsequent secondary market transactions by the ETF class shareholders could generate greater trading volume, resulting in lower trading spreads and/or premiums or discounts in the market prices of the ETF Shares to the benefit of ETF shareholders. The Applicants also believe that an ETF class would benefit Mutual Fund class shareholders because in-kind transactions through the ETF class may contribute to lower portfolio transaction costs and greater tax efficiency. Additionally, the conversion feature could allow Mutual Fund shareholders to convert Mutual Fund Shares for ETF Shares without adverse consequences to the Fund by allowing Mutual Fund shareholders to convert their shares into the ETF class of the same fund rather than redeeming their Mutual Fund Shares and buying shares of another ETF. In doing so, the converting shareholder could save on transaction costs and potential tax consequences that may otherwise be incurred in redeeming their existing shares and buying separate ETF Shares. The ETF class would also represent an additional distribution channel for a fund that could lead to additional asset grown and economies of scale; greater assets under management may lead to additional cost efficiencies and an improved tax profile for the fund may also assist the competitive position of the Fund for attracting prospective shareholders. Last, the class of ETF Shares could allow certain investors to engage in more frequent trading without disrupting the fund's portfolio.

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(5).

[10] *Id.*

necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes the proposed rule change, by permitting the listing and trading of ETF Shares operating under Multi-class ETF Shares exemptive relief, would introduce additional competition among various ETF products to the benefit of investors.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

A. by order approve or disapprove such proposed rule change, or

B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeBZX–2024–026 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeBZX–2024–026. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeBZX–2024–026 and should be submitted on or before May 22, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100028; File No. SR–MIAX–2024–21]

Self-Regulatory Organizations; Miami International Securities Exchange; Notice of Filing of a Proposed Rule Change To Amend Exchange Rule 313, Other Restrictions on Options Transactions and Exercises; and Rule 700, Exercise of Option Contracts

April 25, 2024

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 12, 2024, Miami International Securities Exchange, LLC (''MIAX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend Rule 313, Other Restrictions on Options Transactions and Exercises; and Rule 700, Exercise of Option Contracts.[3]

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/miax-options/rule-filings,* at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 313, Other Restrictions on Options Transactions and Exercises; and Rule 700, Exercise of Option Contracts.

Background

Historically, standard expiration contracts expired at 11:59 p.m. Eastern Time, on the Saturday following the third Friday of the specified expiration month. In 2013 the Options Clearing Corporation (''OCC'') proposed a rule change to allow the OCC to change the expiration date for most option contracts to the third Friday of the expiration month instead of the Saturday following the third Friday.[4]

[11] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The Exchange notes that MIAX Rule 313 and MIAX Rule 700 are incorporated by reference to the Exchange's affiliates MIAX Pearl and MIAX Emerald.

[4] *See* Securities Exchange Act Release No. 69772 (June 17, 2013), 78 FR 37645 (June 21, 2013) (SR–OCC–2013–04) (Order Approving Proposed Rule Change to Change the Expiration Date For Most Option Contracts to the Third Friday of the Expiration Month Instead of the Saturday Following the Third Friday).

Since that time the industry has supplemented options that expire monthly by offering options that expire on Mondays and Wednesdays [5] and also on Tuesdays and Thursdays.[6]

Proposal

While the Exchange's rule that governs the listing of options, Rule 404, Series of Option Contracts Open for Trading, has been periodically amended to account for changes to the Short Term Options Series Program,[7] other tangentially related rules have not been simultaneously updated to adequately reflect these changes. Specifically, the Exchange now proposes to amend Exchange Rule 313, Other Restrictions on Options Transactions and Exercises, to adopt clarifying language and Rule 700, Exercise of Option Contracts, to adopt clarifying language and to amend paragraph (c) to adopt clarifying language and to also remove unnecessary rule text to align to current Rule 404.

The Exchange proposes to amend paragraph (a)(2) of Rule 313 to adopt rule text that will provide additional detail for options that expire on a business day and a non-business day. Currently, the first sentence of paragraph (a)(2) provides that, ''[n]otwithstanding the foregoing, during the ten (10) business days prior to the expiration date of a given series of options, other than index options, no restriction on exercise under this Rule may be in effect with respect to that series of options.'' The Exchange now proposes to amend the sentence to provide that, ''[n]otwithstanding the foregoing, during the ten (10) business days prior to the expiration date of a given series of options, which shall include such expiration date for an option contract that expires on a business day, other than index options, no restriction on exercise under this Rule may be in effect with respect to that series of options.'' The Exchange also proposes to amend the second sentence of paragraph (a)(2) of Rule 313. Currently, the second sentence provides that, ''[w]ith respect to index options, restrictions on exercise may be in effect until the opening of business on the last business day before the expiration date.'' The Exchange now proposes to amend the sentence to provide that, ''[w]ith respect to index options, restrictions on exercise that may be in effect until the opening of business on the business day of their expiration, or, in the case of an option contract expiring on a day that is not a business day, on the last business day before the expiration date.'' [8]

The Exchange also proposes to amend paragraph (a)(3)(ii) of Exchange Rule 313. Currently, paragraph (a)(3)(ii) provides that ''Exercises of expiring American-style, cash-settled index options shall not be prohibited on the last business day prior to their expiration.'' The Exchange now proposes to amend the sentence to provide that, ''[e]xercises of expiring American-style, cash-settled index options shall not be prohibited on the business day of their expiration, or, in the case of an option contract expiring on a day that is not a business day, on the last business day prior to their expiration.'' [9]

The Exchange proposes to amend Exchange Rule 700, Exercise of Option Contracts, to adopt new rule text related to expiring options. Currently, paragraph (b) provides that, ''[s]pecial procedures apply to the exercise of equity options on the last business day before their expiration ('expiring options').'' The Exchange now proposes to amend the sentence to provide that, ''[s]pecial procedures apply to the exercise of equity options on the business day of their expiration, or, in the case of an option contract expiring on a day that is not a business day, on the last business day before their expiration ('expiring options').'' [10]

The Exchange also proposes to amend paragraph (c) of Rule 700. Currently, paragraph (c) provides that, ''[o]ption holders have until 5:30 p.m. Eastern Time on the business day immediately prior to the expiration date or, in the case of Short Term Option Series and Quarterly Options Series, on the expiration date, to make a final decision to exercise or not exercise an expiring option.'' The Exchange now proposes to amend the sentence to provide that, ''[o]ption holders have until 5:30 p.m. Eastern Time on the business day of their expiration, or, in the case of an option contract expiring on a day that is not a business day, on the business day immediately prior to the expiration date, to make a final decision to exercise or not exercise an expiring option.'' The Exchange also proposes to remove unnecessary language from paragraph (c).[11] Specifically, the Exchange proposes to remove the text that provides, ''[r]especting options that expire after February 1, 2015, option holders have until 5:30 p.m. Eastern Time on the expiration date to make a final decision to exercise or not exercise an expiring option. Members may set earlier cutoff times for customers submitting exercise notices,'' as this text is made obsolete by the proposed changes to the first sentence of paragraph (c).

The Exchange proposes to amend paragraph (d)(iii) of Rule 700. Currently, paragraph (d)(iii) provides that, ''Members have until 7:30 p.m. Eastern Time on the business day immediately prior to the expiration date or, in the case of Short Term Option Series and Quarterly Options Series, on the expiration date, to submit a Contrary Exercise Advice to the Exchange if such Member employs an electronic submission procedure with time stamp for the submission of exercise instructions by option holders.'' The Exchange now proposes to amend this sentence to remove unnecessary language, such that the proposed sentence will provide, ''Members have until 7:30 p.m. Eastern Time to submit a Contrary Exercise Advice to the Exchange if such Member employs an electronic submission procedure with time stamp for the submission of exercise instructions by option holders.''

The Exchange proposes to amend paragraph (h) of Rule 700. Currently, paragraph (h) provides that, ''[i]n the event the Exchange provides advance notice on or before 5:30 p.m. Eastern Time on the business day immediately prior to the last business day before the expiration date indicating that a modified time for the close of trading in equity options on such last business day

[6] *See* Securities Exchange Act Release No. 96342 (November 17, 2022), 87 FR 71727 (November 23, 2022) (SR–MIAX–2022–41) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend Exchange Rule 404, Series of Option Contracts Open for Trading and the Short Term Option Series Program).

[7] *See* Interpretations and Policies .02 of Exchange Rule 404.

[8] The Exchange notes that the proposed rule text is substantively identical to BOX Rule 3170(a)(2).

[9] The Exchange notes that the proposed rule text is substantively identical to BOX Exchange Rule 3170(a)(3)(ii).

[10] The Exchange notes that the proposed rule text is substantively identical to BOX Exchange Rule 9000(b).

[11] The Exchange notes that the proposed rule text is substantively identical to BOX Rule 9000(c).

before expiration will occur, then the deadline to make a final decision to exercise or not exercise an expiring option shall be 1 hour 30 minutes following the time announced for the close of trading on that day instead of the 5:30 p.m. Eastern Time deadline found in Rule 700(c).'' The Exchange now proposes to amend the sentence to provide that, ''[i]n the event the Exchange provides advance notice on or before 5:30 p.m. Eastern Time on the business day immediately prior to the business day of expiration, or, in the case of an option contract expiring on a day that is not a business day, the business day immediately prior to the last business day before the expiration date indicating that a modified time for the close of trading in equity options on such business day or expiration, or, in the case of an option contract expiring on a day that is not a business day, such last business day before expiration will occur, then the deadline to make a final decision to exercise or not exercise an expiring option shall be 1 hour 30 minutes following the time announced for the close of trading on that day instead of the 5:30 p.m. Eastern Time deadline found in Rule 700(c).'' [12]

The Exchange proposes to amend paragraph (i)(2) of Rule 700. Currently, the last sentence of paragraph (i)(2) provides, ''[f]or purposes of this subparagraph (i)(2), an 'unusual circumstance' includes, but is not limited to, a significant news announcement concerning the underlying security of an option contract that is scheduled to be released just after the close on the business day immediately prior to expiration.'' The Exchange now proposes to amend the sentence to provide that, ''[f]or purposes of this subparagraph (i)(2), an 'unusual circumstance' includes, but is not limited to, a significant news announcement concerning the underlying security of an option contract that is scheduled to be released just after the close on the business day the option contract expires, or, in the case of an option contract expiring on a day that is not a business day, the business day immediately prior to expiration.'' [13]

Finally, the Exchange proposes to amend paragraph (l)(8)(ii) of Rule 700. Currently, paragraph (l)(8)(ii) provides, ''[e]xercises of expiring American-style, cash-settled index options shall not be prohibited on the last business day prior to their expiration.'' The Exchange now proposes to amend this sentence to provide, ''[e]xercises of expiring American-style, cash-settled index options shall not be prohibited on the business day of their expiration, or, in the case of option contracts expiring on a day that is not a business day, on the last business day prior to their expiration.'' [14]

2. Statutory Basis

The Exchange believes the proposed rule changes are consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[15] Specifically, the Exchange believes the proposed rule changes are consistent with Section 6(b)(5) [16] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes its proposal to amend Rule 313 promotes just and equitable principles of trade and perfects the mechanism of a free and open market and a national market system, and, in general, protects investors and the public interest as the proposal provides additional detail and clarity to the Exchange's rules. Clear and concise rules benefit investors and the public interest by clearly describing Exchange processes which removes the potential for confusion.

The Exchange believes that its proposal to amend Rule 700 promotes just and equitable principles of trade, fosters cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, removes impediments to and perfects the mechanism of a free and open market and a national market system, and, in general protects investors and the public interest as the proposal provides additional detail and clarity to the Exchange's rules. Additionally, the proposed changes to paragraph (c) harmonizes the Exchange's exercise cut-off time process to that of other options exchanges [17] providing consistency within the industry which benefits investors and the public interest. The Exchange believes that keeping its rules consistent with those of other option exchanges will protect all participants in the market by eliminating confusion. Finally, the proposed changes do not permit unfair discrimination between Members [18] as the rules of the Exchange apply to all Members equally.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rules changes would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule changes are not intended to address a competitive issue but rather would calrify the interaction of the Exchange's rules with one another and harmonize certain rule text regarding expiring options to that of other option exchanges. The proposal is not designed to address any aspect of competition, either between the Exchange and its competitors, or among market participants. Therefore, the Exchange does not believe the proposed rule change would impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, it has become effective pursuant to 19(b)(3)(A) of the Act [19] and Rule 19b–4(f)(6) [20] thereunder.

[12] The Exchange notes that the proposed rule text is substantively identical to BOX Rule 9000(h).

[13] The Exchange notes that the proposed rule text is substantively identical to BOX Rule 9000(i)(2).

[14] The Exchange notes that the proposed rule text is substantively identical to BOX Rule 9000(l)(8)(ii).

[20] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the

Continued

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–MIAX–2024–21 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–MIAX–2024–21. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–MIAX–2024–21 and should be submitted on or before May 22, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100030; File No. SR–NYSE–2024–24]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Establish the NYSE Pillar Depth Data Feed

April 25, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on April 24, 2024, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to establish the NYSE Pillar Depth (''Pillar Depth'') data feed. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to establish the Pillar Depth data feed. The Pillar Depth data feed is a frequency-based depth of book market data feed that would provide a consolidated view of the ten (10) best price levels on both the bid and offer sides across the NYSE Group's combined limit order books for securities traded on the NYSE Group equities markets, *i.e.,* New York Stock Exchange LLC (''NYSE''), NYSE American LLC (''NYSE American''), NYSE Arca, Inc. (''NYSE Arca''), NYSE Chicago, Inc. (''NYSE Chicago'') and NYSE National, Inc. (''NYSE National''), for which the NYSE Group equities markets report quotes and trades under the Consolidated Tape Association (''CTA'') Plan or the Nasdaq/UTP Plan.

Background

The Exchange recently established the NYSE Aggregated Lite (''NYSE Agg Lite'') data feed.[4] The NYSE Agg Lite is a NYSE-only frequency-based depth of book market data feed of the NYSE's limit order book for up to ten (10) price levels on both the bid and offer sides of the order book for securities traded on NYSE and for which NYSE reports quotes and trades under the CTA Plan or the Nasdaq/UTP Plan.[5] The NYSE Agg Lite would be updated no less frequently than once per second. The NYSE Agg Lite would include depth of book order data as well as security status messages. The security status message would inform subscribers of changes in the status of a specific security, such as trading halts, short sale restriction, etc. In addition, the NYSE Agg Lite would also include order

Commission. The Exchange has satisfied this requirement.

[4] *See* Securities Exchange Act Release No. 99689 (March 7, 2024), 89 FR 18466 (March 13, 2024) (SR–NYSE–2024–12) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Establish the NYSE Aggregated Lite Market Data Feed) (''NYSE Agg Lite Filing''). The NYSE Agg Lite data feed is not yet available. In the NYSE Agg Lite Filing, the NYSE noted that it would publish a Trader Update to announce the date when the NYSE Agg Lite data feed would become available for subscribers and vendors.

[5] *Id.*

imbalance information prior to the opening and closing of trading.[6]

Additionally, NYSE American recently established the NYSE American Aggregated Lite (''NYSE American Agg Lite'') data feed.[7] The NYSE American Agg Lite is a NYSE American-only frequency-based depth of book market data feed of the NYSE American's limit order book for up to ten (10) price levels on both the bid and offer sides of the order book for securities traded on NYSE American and for which NYSE American reports quotes and trades under the CTA Plan or the Nasdaq/UTP Plan.[8] The NYSE American Agg Lite would be updated no less frequently than once per second. The NYSE American Agg Lite would include depth of book order data as well as security status messages. The security status message would inform subscribers of changes in the status of a specific security, such as trading halts, short sale restriction, etc. In addition, the NYSE American Agg Lite would also include order imbalance information prior to the opening and closing of trading.[9]

Additionally, NYSE Arca recently established the NYSE Arca Aggregated Lite (''NYSE Arca Agg Lite'') data feed.[10] The NYSE Arca Agg Lite is a NYSE Arca-only frequency-based depth of book market data feed of the NYSE Arca's limit order book for up to ten (10) price levels on both the bid and offer sides of the order book for securities traded on NYSE Arca and for which NYSE Arca reports quotes and trades under the CTA Plan or the Nasdaq/UTP Plan.[11] The NYSE Arca Agg Lite would be updated no less frequently than once per second. The NYSE Arca Agg Lite would include depth of book order data as well as security status messages. The security status message would inform subscribers of changes in the status of a specific security, such as trading halts, short sale restriction, etc. In addition, the NYSE Arca Agg Lite would also include order imbalance information prior to the opening and closing of trading.[12]

Further, NYSE Chicago recently established the NYSE Chicago Aggregated Lite (''NYSE Chicago Agg Lite'') data feed.[13] The NYSE Chicago Agg Lite is a NYSE Chicago-only frequency-based depth of book market data feed of the NYSE Chicago's limit order book for up to ten (10) price levels on both the bid and offer sides of the order book for securities traded on NYSE Chicago and for which NYSE Chicago reports quotes and trades under the CTA Plan or the Nasdaq/UTP Plan.[14] The NYSE Chicago Agg Lite would be updated no less frequently than once per second. The NYSE Chicago Agg Lite would include depth of book order data as well as security status messages. The security status message would inform subscribers of changes in the status of a specific security, such as trading halts, short sale restriction, etc. The NYSE Chicago Agg Lite would not include order imbalance information.[15]

Finally, NYSE National recently established the NYSE National Aggregated Lite (''NYSE National Agg Lite'') data feed.[16] The NYSE National Agg Lite is a NYSE National-only frequency-based depth of book market data feed of the NYSE National's limit order book for up to ten (10) price levels on both the bid and offer sides of the order book for securities traded on NYSE National and for which NYSE National reports quotes and trades under the CTA Plan or the Nasdaq/UTP Plan.[17] The NYSE National Agg Lite would be updated no less frequently than once per second. The NYSE National Agg Lite would include depth of book order data as well as security status messages. The security status message would inform subscribers of changes in the status of a specific security, such as trading halts, short sale restriction, etc. The NYSE National Agg Lite would not include order imbalance information.[18]

Proposed Pillar Depth Data Feed

In response to customer requests, the Exchange proposes to establish the Pillar Depth data feed, a data feed consisting of certain data elements from five market data feeds—NYSE Agg Lite, NYSE American Agg Lite, NYSE Arca Agg Lite, NYSE Chicago Agg Lite and NYSE National Agg Lite. The Exchange does not currently offer this product. As noted above, the Pillar Depth data feed would be a frequency-based depth of book market data feed that would provide a consolidated view of the ten (10) best price levels on both the bid and offer sides across the NYSE Group's combined limit order books for securities traded on the NYSE Group equities markets for which the NYSE Group equities markets report quotes and trades under the CTA Plan or the Nasdaq/UTP Plan. In other words, Pillar Depth would be a compilation of limit order data that the Exchange would provide to vendors and subscribers. As proposed, the Pillar Depth data feed would be updated no less frequently than once per second. In addition to depth of book order data, Pillar Depth would also include security status messages. The security status message would inform vendors and subscribers of changes in the status of a specific security, such as trading halts, short sale restriction, etc. In addition, Pillar Depth would publish imbalance messages no less frequently than once per second during auctions to update price and volume information, prior to the opening and closing of trading on NYSE, NYSE American and NYSE Arca.

For each security, Pillar Depth would only include the top ten (10) bids and top ten (10) offers from among the five NYSE Group equities markets. The resting interest at each price level would be aggregated across the five NYSE Group equities markets, and a market center ID will attribute the exchanges included in this interest. For example, if XYZ stock were traded on both NYSE and NYSE Arca, and one of the top 10 price levels on NYSE was 1,000 shares

[18] *Id.*

on offer at $10.00, and one of the top 10 price levels on NYSE Arca was 500 shares on offer at $10.00. If there were no shares of XYZ on offer on any of the remaining NYSE Group equities markets, then Pillar Depth would represent 1,500 shares on offer at $10.00. This type of aggregation would be repeated for each of the 10 best price levels on both the bid and offer sides across the five NYSE Group equities markets.

The Exchange proposes to offer Pillar Depth after receiving requests from vendors and subscribers that would like to receive the data described above in a consolidated fashion at a pre-defined publication interval, in this case updates no less than once per second. A consolidated data feed may provide greater efficiencies and reduce errors for vendors and subscribers that currently choose to consolidate the above data into a single offering after receiving it from the Exchange through existing products and adjust the publication frequency based on a subscriber's needs. The Exchange believes that providing vendors and subscribers with the option to subscribe to a market data product that consolidates a subset of data from existing products and where such consolidated data is published at a pre-defined interval, thus lowering bandwidth, infrastructure and operational requirements, would allow vendors and subscribers to choose the best solution for their specific business needs. The Exchange notes that publishing only the top ten price levels on both the bid and offer sides across the NYSE Group equities markets' order book where such data is communicated to subscribers at a pre-defined interval would reduce the overall volume of messages required to be consumed by subscribers when compared to a full order-by-order data feed or a full depth of book data feed. Providing data in this format and publication frequency would make Pillar Depth more easily consumable by vendors and subscribers, especially for display purposes.

The Exchange proposes to offer Pillar Depth through the Exchange's Liquidity Center Network (''LCN''), a local area network in the Exchange's Mahwah, New Jersey data center that is available to users of the Exchange's co-location services. The Exchange would also offer Pillar Depth through the ICE Global Network (''IGN''), through which all other users and members access the Exchange's trading and execution systems and other proprietary market data products.

The Exchange believes that Pillar Depth would provide high-quality, comprehensive depth of book order data for the Exchange, NYSE Arca, NYSE American, NYSE Chicago and NYSE National in a unified view and respond to subscriber demand for such a product. The Exchange notes that an anticipated end user might use Pillar Depth for purposes of identifying an indicative price of Tape A, B, and C securities through leveraging the depth and breadth of NYSE, NYSE Arca, NYSE American, NYSE Chicago and NYSE National without having to purchase consolidated data and thus it would not be a latency-sensitive product. The Exchange does not anticipate that an end user would, or could, use the Pillar Depth data for purposes of making order-routing or trading decisions. Rather, the Exchange notes that under Rule 603 of Regulation NMS, Pillar Depth could not be substituted for consolidated data in all instances in which consolidated data is used and certain subscribers would still be required to purchase consolidated data for trading and order-routing purposes.[19]

Exchange Not an Exclusive Distributor of Pillar Depth

The Exchange proposes to offer the Pillar Depth data feed in a capacity similar to that of a vendor. The Exchange, NYSE Arca, NYSE American, NYSE Chicago and NYSE National are the exclusive distributors of the five Agg Lite data feeds[20] from which certain data elements would be taken to create Pillar Depth. By contrast, the Exchange would not be the exclusive distributor of the aggregated and consolidated information that would compose the proposed Pillar Depth data feed. Other vendors would be able, if they chose, to create a data feed with the same information as proposed for inclusion in Pillar Depth, and to distribute it to clients with no greater latency than the Exchange would be able to distribute Pillar Depth. In addition, as discussed further below, the pricing the Exchange would charge clients for Pillar Depth would not be lower than the cost to a vendor of creating a comparable product, including the cost of receiving the underlying data feeds.

After creating Pillar Depth, the Exchange would distribute this data feed through IGN and market data vendors. The path for distribution by the Exchange of this data would not be faster than a vendor that independently created a Pillar Depth-like product could distribute its own product. As such, the proposed Pillar Depth data feed is a data product that a competing vendor could create and sell without being in a disadvantaged position relative to the Exchange. In recognition that the Exchange is the source of its own market data and is affiliated with NYSE Arca, NYSE American, NYSE Chicago and NYSE National, the Exchange represents that the source of the market data it uses to create the proposed Pillar Depth is the same as the source available to other vendors.

With respect to latency, the Exchange, NYSE Arca, NYSE American, NYSE Chicago and NYSE National are located in the same data center in Mahwah, New Jersey. The system creating and supporting the proposed Pillar Depth data feed would need to obtain the five underlying data feeds from these five exchanges before it could aggregate and consolidate information to create Pillar Depth and then distribute it to end users. The Exchange also offers third parties access to its data center through co-location. Accordingly, a competing market data vendor co-located in the Exchange's Mahwah, New Jersey facility offering a similar competing product would similarly need to obtain the five underlying data feeds.

The Exchange has designed the Pillar Depth data feed so that it would not have a competitive advantage over a competing vendor with respect to the speed of access to those five underlying data feeds. Likewise, the Pillar Depth data feed would not have a speed advantage vis-à-vis competing vendors co-located in the data center with respect to access to end user customers, whether those end users are also co-located or not. As such, a market data vendor could perform the aggregation and consolidation function in the Mahwah facility and redistribute a competing product from that location to similarly situated customers on a level playing field with respect to the speed that the Exchange could create and redistribute the Pillar Depth data feed.

With respect to cost, the Exchange will file a separate rule filing to establish the fees for Pillar Depth. To ensure that vendors could compete with the Exchange by creating the same product as Pillar Depth and sell it to their clients, the Exchange would charge its clients for the Pillar Depth data feed an amount that represents the cost to a market data vendor to obtain the five underlying Agg Lite data feeds, plus an additional amount to be determined that would reflect the value of the aggregation and consolidation function. The Exchange notes that a competing vendor might engage in a different analysis of assessing the cost of a

[19] 17 CFR 242.603(c).

[20] These other data feeds are offered pursuant to pre-existing and already effective rules filed with the Commission; those rules will not be altered by this filing.

competing product, which may incorporate passing through fees associated with co-location at the Mahwah, New Jersey data center. However, the incremental co-location costs to a particular vendor might be inconsequential if such vendor is already co-located and is able to allocate its co-location costs over numerous product and customer relationships. The Exchange therefore believes that a competing vendor could create and offer a product similar to the proposed Pillar Depth data feed at a similar cost. For these reasons, the Exchange believes that vendors could readily offer a product similar to Pillar Depth on a competitive basis.

The Exchange will announce the implementation date of this proposed rule change by Trader Update, which, subject to the effectiveness of this proposed rule change, is anticipated to be on May 13, 2024.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b)[21] of the Act (''Act''), in general, and furthers the objectives of Section 6(b)(5)[22] of the Act, in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest, and it is not designed to permit unfair discrimination among customers, brokers, or dealers. This proposal is in keeping with those principles in that it promotes increased transparency through the dissemination of Pillar Depth to those interested in receiving it.

The Exchange also believes this proposal is consistent with Section 6(b)(5) of the Act because it protects investors and the public interest and promotes just and equitable principles of trade by providing investors with new options for receiving market data as requested by market data vendors and subscribers. The proposed rule change would benefit investors by facilitating their prompt access to the frequency-based and consolidated depth of book information contained in the Pillar Depth market data feed.

The Exchange also believes that the proposed rule change is consistent with Section 11(A) of the Act[23] in that it supports (i) fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets and (ii) the availability of information with respect to quotations for and transactions in securities to brokers, dealers, and investors. Furthermore, the proposed rule change is consistent with Rule 603 of Regulation NMS,[24] which provides that any national securities exchange that distributes information with respect to quotations for or transactions in an NMS stock do so on terms that are not unreasonably discriminatory. The Pillar Depth market data feed would be accessed and subscribed to on a voluntary basis, in that neither the Exchange nor market data vendors are required by any rule or regulation to make this data available. Accordingly, vendors and subscribers can discontinue their use at any time and for any reason.

In adopting Regulation NMS, the Commission granted self-regulatory organizations (''SROs'') and broker dealers increased authority and flexibility to offer new and unique market data to consumers of such data. It was believed that this authority would expand the amount of data available to users and consumers of such data and also spur innovation and competition for the provision of market data. The Exchange believes that Pillar Depth is precisely the sort of market data product that the Commission envisioned when it adopted Regulation NMS. The Commission concluded that Regulation NMS would itself further the Act's goals of facilitating efficiency and competition:

> Efficiency is promoted when broker-dealers who do not need the data beyond the prices, sizes, market center identifications of the NBBO and consolidated last sale information are not required to receive (and pay for) such data. The Commission also believes that efficiency is promoted when broker-dealers may choose to receive (and pay for) additional market data based on their own internal analysis of the need for such data.[25]

In addition, Pillar Depth removes impediments to and perfects the mechanism of a free and open market and a national market system by providing investors with alternative market data and would compete with similar market data products currently offered by the four U.S. equities exchanges operated by Cboe Exchange, Inc.—Cboe BZX Exchange, Inc. (''BZX''), Cboe BYX Exchange, Inc. (''BYX''), Cboe EDGA Exchange, Inc. (''EDGA''), and Cboe EDGX Exchange, Inc. (''EDGX''), each of which offers a market data product called Cboe One Feed.[26] Similar to Cboe One Premium Feed, Pillar Depth can be utilized by vendors and subscribers to quickly access and distribute aggregated order book data. As noted above, Pillar Depth, similar to Cboe One Premium Feed, would provide aggregated depth per security, including the bid, ask and share quantity for orders received by the NYSE Group markets, except unlike Cboe One Premium Feed, which provides aggregated depth per security for up to five (5) price levels, Pillar Depth would provide a consolidated view of the ten (10) best price levels on both the bid and offer sides across the NYSE Group's combined limit order books for securities traded on the NYSE Group equities markets.

The Exchange notes that the existence of alternatives to the Exchange's proposed product, including real-time consolidated data, free delayed consolidated data, and proprietary data from other sources, as well as the continued availability of the Exchange's separate data feeds, ensures that the Exchange is not unreasonably discriminatory because vendors and subscribers can elect these alternatives as their individual business cases warrant.

As noted above, the Exchange would be acting in the capacity of a vendor with respect to the proposed Pillar Depth data feed. The proposed Pillar Depth data feed is a product that relies on the Exchange's receipt of underlying data, which is available to all market participants, before it can aggregate and consolidate information to create Pillar Depth; this is a process that a competing vendor could also perform. Accordingly, although the Exchange might be the only distributor of the Pillar Depth data feed initially, it is not in an exclusive position to provide a product like the Pillar Depth data feed. Therefore, the Exchange believes that the proposed

[21] 15 U.S.C. 78f(b).

[22] 15 U.S.C. 78f(b)(5).

[23] 15 U.S.C. 78k–1.

[24] *See* 17 CFR 242.603.

[25] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496 (June 29, 2005) (Regulation NMS Adopting Release).

[26] *See* BZX Rule 11.22(j); BYX Rule 11.22(i); EDGA Rule 13.8(b); and EDGX Rule 13.8(b). The Cboe One Feed offered by BZX, BYX, EDGA and EDGX is a data feed that contains the aggregate best bid and offer of all displayed orders for securities traded on the Cboe exchanges. The Cboe One Feed also contains the individual last sale information, consolidated volume, the primary listing market's official opening and closing price, and the current day consolidated high and low price for all listed equity securities. Cboe One Feed recipients may also elect to receive aggregated two-sided quotations from the Cboe exchanges for five (5) price levels (''Cboe One Premium Feed'').

rule change is consistent with Section 6(b) [27] of the Act, in general, and furthers the objectives of Section 6(b)(5) [28] of the Act, in particular, in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest, and it is not designed to permit unfair discrimination among customers, brokers, or dealers.

Specifically, the Exchange has taken into consideration its affiliated relationship with NYSE Arca, NYSE American, NYSE Chicago and NYSE National in its design of the Pillar Depth data feed to assure that similarly situated competing vendors would be able to offer a similar product on the same terms as the Exchange, both from the perspective of latency and cost. As discussed in detail above, the Exchange proposes to begin offering the Pillar Depth data feed voluntarily in response to demand from vendors and subscribers that are interested in receiving consolidated depth of order book information from the Exchange, NYSE Arca, NYSE American, NYSE Chicago and NYSE National in a unified view. Specifically, portfolio managers, wealth managers, back-office employees, and others are looking for a cost-effective, easy-to-administer, high-quality market data product with the characteristics of the Pillar Depth data feed. The Pillar Depth data feed will help to protect a free and open market by providing vendors and subscribers with additional choices in receiving this type of market data, thus promoting competition and innovation.

As noted above, the Exchange believes that Pillar Depth will offer an alternative to the use of consolidated data products and proprietary data products such as the Cboe One Premium Feed offered by BZX, BYX, EDGX and EDGA. The Exchange believes that Pillar Depth will offer a competitive alternative to the market data products currently offered by the Cboe family of exchanges.

In addition, the proposal would not permit unfair discrimination because the data feed would be available to all vendors and subscribers through both the LCN and IGN on an equivalent basis. In addition, any customer that wishes to continue to be able to purchase one or more of the individual underlying data feeds would be able to do so.

The Exchange does not believe that the proposal would permit unfair discrimination among customers, brokers, or dealers and thus is consistent with the Act because the Exchange will be offering the product on terms that a competing vendor could offer a competing product. Specifically, the proposed data feed does not represent Exchange core data, but rather a new product that represents an aggregation and consolidation of existing, previously filed market data products of the Exchange, NYSE Arca, NYSE American, NYSE Chicago and NYSE National. As such, a competing vendor could similarly obtain the five underlying data feeds and perform a similar aggregation and consolidation function to create the same data product with the same latency. More specifically, a competing vendor that is co-located in the Exchange's Mahwah, New Jersey data center could obtain the five underlying data feeds from the Exchange, NYSE Arca, NYSE American, NYSE Chicago and NYSE National on the same latency basis as the system that would be performing the aggregation and consolidation of the proposed Pillar Depth data feed and provide the same type of product to its customers with the same latency they could achieve by purchasing Pillar Depth from the Exchange. As such, the Exchange would not have any unfair advantage over competing vendors with respect to obtaining data from NYSE Arca, NYSE American, NYSE Chicago and NYSE National; in fact, the technology supporting the Pillar Depth data feed would similarly need to obtain the Exchange's data feed as well and even this connection would be on a level playing field with a competing vendor co-located at the data center. In addition, the Exchange would be charging for the proposed Pillar Depth data feed competitively with the price that a competing vendor could assess for a competing product.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[29] the Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. As noted above, the Exchange proposes to offer the Pillar Depth data feed in a capacity similar to that of a vendor. Although the Exchange, NYSE Arca, NYSE American, NYSE Chicago and NYSE National are the exclusive distributors of the five Agg Lite feeds from which certain data elements would be taken to create Pillar Depth, the Exchange would not be the exclusive distributor of the aggregated and consolidated information that would compose the proposed Pillar Depth data feed. Vendors would be able, if they chose, to create a data feed with the same information as Pillar Depth and distribute it to their clients on a level-playing field with respect to latency and cost as compared to the Exchange's proposed data feed. In addition, the pricing the Exchange would charge clients for Pillar Depth would not be lower than the cost to a vendor of receiving the underlying data feeds and of maintaining co-located operations to receive and distribute such data feeds with no greater latency than the Exchange.

The Exchange has designed the Pillar Depth data feed so that it would not have a competitive advantage over a competing vendor with respect to the speed of access to those five underlying data feeds. Likewise, the Pillar Depth data feed would not have a speed advantage vis-à-vis competing vendors co-located in the data center with respect to access to end user customers, whether those end users are also co-located or not. As such, a market data vendor could perform the aggregation and consolidation function in the Mahwah facility and redistribute a competing product from that location to similarly situated customers on a level-playing field with respect to the speed that the Exchange could create and redistribute the Pillar Depth data feed.

With respect to cost, the Exchange will file a separate rule filing to establish the fee for Pillar Depth. To ensure that vendors could compete with the Exchange by creating the same product as Pillar Depth and sell it to their clients, the Exchange would charge its clients for the Pillar Depth feed an amount that represents the cost to a market data vendor to obtain the five underlying data feeds, plus an additional amount to be determined that would reflect the value of the aggregation and consolidation function. The Exchange notes that a competing vendor might engage in a different analysis of assessing the cost of a competing product, which may incorporate passing through fees associated with co-location at the Mahwah, New Jersey data center. However, the incremental co-location costs to a particular vendor may be inconsequential if such vendor is already co-located and is able to allocate its co-location costs over numerous product and customer relationships. The Exchange therefore believes that a competing vendor could create and offer a product similar to the proposed Pillar Depth data feed at a similar cost. For

[27] 15 U.S.C. 78f(b).

[28] 15 U.S.C. 78f(b)(5).

[29] 15 U.S.C. 78f(b)(8).

these reasons, the Exchange believes that vendors could readily offer a product similar to Pillar Depth on a competitive basis.

The Exchange further believes that Pillar Depth will promote competition among exchanges by offering an alternative to the CBOE One Premium Feed offered by BZX, BYX, EDGA and EDGX. Because other exchanges already offer similar products, the Exchange's proposed Pillar Depth data feed will enhance competition. The Pillar Depth data feed will foster competition by providing an alternative to similar products offered by other exchanges, including the Cboe One Premium Feed.[30] The Pillar Depth data feed would provide investors with a new option for receiving market data, which was a primary goal of the market data amendments adopted by Regulation NMS.[31] Thus, the Exchange believes the proposed rule change is necessary to permit fair competition among national securities exchanges. For these reasons, the Exchange believes that offering Pillar Depth will promote, rather than unnecessarily or inappropriately burden, competition for market data products that are offered in the capacity as a vendor and are not core exchange market data products.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[32] and Rule 19b–4(f)(6) thereunder.[33] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[34]

A proposed rule change filed under Rule 19b–4(f)(6)[35] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b4(f)(6)(iii),[36] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that the proposal raises no novel issues and that waiver of the operative delay will permit the Exchange to make the Pillar Depth data feed available to subscribers, with an anticipated launch date of May 13, 2024, as an alternative to similar products offered by BZX, BYX, EDGA and EDGX, as well the Cboe One Premium Feed. For these reasons, the Commission finds that waiver of the operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposal operative upon filing.[37]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[38] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSE–2024–24 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSE–2024–24. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSE–2024–24 and should be submitted on or before May 22, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[39]

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35181]

Deregistration Under Section 8(f) of the Investment Company Act of 1940

April 26, 2024.

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice of Applications for Deregistration under Section 8(f) of the Investment Company Act of 1940.

The following is a notice of applications for deregistration under section 8(f) of the Investment Company Act of 1940 for the month of April 2024. A copy of each application may be obtained via the Commission's website by searching for the applicable file number listed below, or for an applicant using the Company name search field, on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html.* You may also call the SEC's Public Reference Room at (202) 551–8090. An order granting each application will be issued unless the SEC orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the relevant applicant with a copy of the request by email, if an email address is listed for the relevant applicant below, or personally or by mail, if a physical address is listed for the relevant applicant below. Hearing requests should be received by the SEC by 5:30 p.m. on May 21, 2024, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to Rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary at *Secretarys-Office@sec.gov.*

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.*

FOR FURTHER INFORMATION CONTACT: Shawn Davis, Assistant Director, at (202) 551–6413 or Chief Counsel's Office at (202) 551–6821; SEC, Division of Investment Management, Chief Counsel's Office, 100 F Street NE, Washington, DC 20549–8010.

ETF Managers Trust [File No. 811–22310]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. The applicant has transferred its assets to Amplify ETF Trust, and on January 29, 2024, made a final distribution to its shareholders based on net asset value. Expenses of $9,282,629.85 incurred in connection with the reorganization were paid by the applicant's investment adviser and the acquiring fund's investment adviser.

Filing Date: The application was filed on March 5, 2024.

Applicant's Address: 350 Springfield Avenue, Suite #200, Summit, New Jersey 07901.

Greenspring Fund Inc [File No. 811–03627]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. The applicant has transferred its assets to Cromwell Greenspring Mid Cap Fund, and on August 14, 2023, made a final distribution to its shareholders based on net asset value. Expenses of $245,228 incurred in connection with the reorganization were paid by the applicant's investment adviser and the acquiring fund's investment adviser.

Filing Dates: The application was filed on August 30, 2023, and amended on October 4, 2023, November 22, 2023, February 20, 2024 and April 23, 2024.

Applicant's Address: 2330 West Joppa Road, Suite 110, Lutherville, Maryland 21093–4641.

Invesco Dynamic Credit Opportunities Fund [File No. 811–22043]

Summary: Applicant, a closed-end investment company, seeks an order declaring that it has ceased to be an investment company. The applicant has transferred its assets to Invesco Dynamic Credit Opportunity Fund, and on October 29, 2021 made a final distribution to its shareholders based on net asset value. Expenses of $500,176.86 incurred in connection with the reorganization were paid by the applicant.

Filing Dates: The application was filed on May 12, 2023 and amended on March 15, 2024.

Applicant's Address: 1331 Spring Street Northwest, Suite 2500, Atlanta, Georgia 30309.

Lee Financial Mutual Fund, Inc. [File No. 811–05631]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. The applicant has transferred its assets to Bishop Street Funds, and on December 4, 2023, made a final distribution to its shareholders based on net asset value. Expenses of $71,612.13 incurred in connection with the reorganization were paid by the applicant's investment adviser.

Filing Date: The application was filed on March 29, 2024.

Applicant's Address: 3113 Olu Street, Honolulu, Hawaii 96816.

Savos Investments Trust [File No. 811–08977]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. On September 27, 2022, applicant made a liquidating distribution to its shareholders based on net asset value. Expenses of $24,436.75 incurred in connection with the liquidation were paid by the applicant's investment adviser.

Filing Date: The application was filed on April 17, 2024.

Applicant's Address: 1655 Grant Street, 10th Floor, Concord, California 94520.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100026; File No. SR–BOX–2024–10]

Self-Regulatory Organizations; BOX Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fee Schedule for Trading on the BOX Options Market LLC Facility (''BOX'')

April 25, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 11, 2024, BOX Exchange LLC (the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III, below, which Items have been prepared by the Exchange. The Exchange filed the proposed rule change pursuant to Section 19(b)(3)(A)(ii) of the Act,[3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposal effective upon filing with the Commission. The

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Securities and Exchange Commission (''Commission'') a proposed rule change to amend the Fee Schedule on the BOX Options Market LLC (''BOX'') options facility. The text of the proposed rule change is available from the principal office of the Exchange, at the Commission's Public Reference Room and also on the Exchange's internet website at *https://rules.boxexchange.com/rulefilings.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section VI.A, Complex Order Transaction Fees, of the BOX Fee Schedule, to establish a separate category within the fee structure for fees and rebates on Complex Order transactions for options overlying the Standard and Poor's Depositary Receipts Trust (''SPY''), the INVESCO QQQ Trust℠, Series 1 (''QQQ''), and iShares Russell 2000 Index Fund (''IWM''). The Exchange notes that the fees for SPY, QQQ, and IWM in Section VI.A will remain the same as those currently assessed. The Exchange also proposes to amend the fees in Section VI.B to change how certain Complex Orders are assessed within the fee structure, specifically each leg of Public Customer Complex Orders in SPY, QQQ, and IWM that executes against the BOX Book [5] instead of the Complex Order Book.[6]

Currently, in Section VI of the BOX Fee Schedule, fees and credits for Complex Order transactions in Penny Interval Classes and Non-Penny Interval Classes are assessed depending on three factors: (i) the account type of the Participant submitting the order; (ii) whether the Participant is a liquidity provider or liquidity taker; and (iii) the account type of the contra party. The Exchange proposes to assess separate fees for SPY, QQQ, and IWM Complex Order Transaction Fees in Section VI.A of the Fee Schedule. The Exchange notes that it is not changing the amount of the fees currently assessed for these transactions but is simply carving out SPY, QQQ, and IWM into a separate category within the fee structure.

As proposed, the SPY, QQQ, and IWM fees will continue to be the same as the current fees assessed to transactions in Penny Interval Classes. Specifically, when a Public Customer SPY, QQQ, or IWM Complex Order interacts with a Public Customer, the Exchange will not assess a fee or offer a rebate. When a Public Customer SPY, QQQ, or IWM Complex Order interacts with a non-Public Customer, the Exchange will offer a rebate of $0.50. Further, when a Professional Customer or Broker Dealer SPY, QQQ, or IWM Complex Order interacts with a Public Customer Complex Order, the Exchange proposes to assess a $0.50 fee when making liquidity or a $0.50 fee when taking liquidity. When a Professional Customer or Broker Dealer SPY, QQQ, or IWM Complex Order interacts with a Professional Customer, Broker Dealer, or Market Maker Complex Order, the Exchange proposes to offer a rebate of $0.30 for making liquidity or to assess a fee of $0.50 for taking liquidity. When a Market Maker SPY, QQQ, or IWM Complex Order interacts with a Public Customer Complex Order, the Exchange proposes to assess $0.50 when making liquidity or $0.50 when taking liquidity. When a Market Maker SPY, QQQ, or IWM Complex Order interacts with a Professional Customer, Broker Dealer, or Market Maker Complex Order, the Exchange proposes to offer a rebate of $0.30 when making liquidity or to assess a fee of $0.50 when taking liquidity. The Exchange again notes that these fees are currently assessed to SPY, QQQ, and IWM transactions today as SPY, QQQ, and IWM are Penny Interval Classes.[7]

The proposed fee structure for SPY, QQQ, and IWM Complex Order transactions will be as follows:

Account type	Contra party	SPY, QQQ, and IWM	
		Maker	Taker
Public Customer	Public Customer	$0.00	$0.00
	Professional Customer/Broker Dealer	(0.50)	(0.50)
	Market Maker	(0.50)	(0.50)
Professional Customer or Broker Dealer	Public Customer	0.50	0.50
	Professional Customer/Broker Dealer	(0.30)	0.50
	Market Maker	(0.30)	0.50
Market Maker	Public Customer	0.50	0.50
	Professional Customer/Broker Dealer	(0.30)	0.50
	Market Maker	(0.30)	0.50

For example, under the proposal, if a Public Customer submitted a SPY order to the Complex Order Book (making liquidity), the Public Customer would be provided a rebate of $0.50 if the order interacted with a Market Maker's SPY order and the Market Maker (taking liquidity) would be charged $0.50.

In addition to the above changes to Section VI.A of the Fee Schedule, the Exchange now proposes to amend the fees in Section VI.B to change how

[5] The term ''Central Order Book'' or ''BOX Book'' means the electronic book of orders on each single option series maintained by the BOX Trading Host. *See* BOX Rule 100(a)(10).

[6] The term ''Complex Order Book'' means the electronic book of Complex Orders maintained by the BOX Trading Host. *See* BOX Rule 7240(a)(8).

[7] *See* BOX Options Notice 2024–015 available at *Notice-2024-015-Penny-Program-Class-Removals.pdf (boxexchange.com).*

certain Complex Orders are assessed within the fee structure. By way of background, a Participant may enter a Complex Order with the intent of that order executing against another Complex Order on the Complex Order Book, however, Complex Orders will execute against Complex Orders only after bids and offers at the same net price on the BOX Book for the individual legs have been executed.[8] Currently, under the BOX Fee Schedule, each leg of a Complex Order executed against the BOX Book will be treated as a standard order for purposes of the Fee Schedule and is subject to Section IV (Electronic Transaction Fees). The Exchange now proposes to assess $0.00 for Public Customer Complex Orders in SPY, QQQ, and IWM executed against the BOX Book. Specifically, the Exchange proposes to amend Section VI.B as follows:

''Each order on the BOX Book executed against a Complex Order and each leg of a Complex Order executed against the BOX Book will be treated as a standard order for purposes of the Fee Schedule and subject to Section IV.A (Electronic Transaction Fees for Non-Auction Transactions), except that each leg of a Public Customer Complex Order in SPY, QQQ, and IWM executed against the BOX Book will be assessed $0.00.''

For example, if a SPY, QQQ, or IWM Public Customer Complex Order interacts with the BOX Book, the legs are currently assessed $0.10 for taking liquidity against Professional Customers, Broker Dealers, and Market Makers.[9] The proposed change would effectively decrease the fee assessed in this case from $0.10 to $0.00.

2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Act, in general, and Section 6(b)(4) and 6(b)(5) of the Act,[10] in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among BOX Participants and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Exchange's proposal to establish a separate category within the fee structure for SPY, QQQ, and IWM Complex Order transactions is reasonable, equitable, and not unfairly discriminatory because pricing by symbol is a common practice on many U.S. options exchanges as a means to incentivize order flow to be sent to an exchange for execution in the most actively traded options classes. The Exchange notes that it currently assesses separate fees and rebates for SPY, QQQ, and IWM Non-Auction Transactions.[11] The Exchange also notes that SPY, QQQ, and IWM are among the most actively traded options [12] and therefore the Exchange believes that creating a separate category within the fee structure for these classes is appropriate to more effectively attract order flow to BOX. The Exchange again notes that it is not changing the amount of the fees currently assessed for SPY, QQQ, and IWM Complex Order Transaction Fees in Section VI.A of the Fee Schedule, but is simply carving out SPY, QQQ, and IWM into a separate category within the fee structure. As proposed, the SPY, QQQ, and IWM fees will continue to be the same as the current fees assessed to transactions in Penny Interval Classes.

Additionally, the Exchange believes the proposed change to amend the fees in Section VI.B to change how each leg of a Public Customer Complex Order in SPY, QQQ, and IWM that executes against the BOX Book is assessed within the fee structure is reasonable because it is designed to incentivize Public Customer Complex order flow. Specifically, when a Complex Order interacts with the BOX Book, the orders in the BOX Book are assessed electronic transaction fees for non-auction transactions.[13] Currently, in the case of a Public Customer Complex Order interacting with the BOX Book, the legs are assessed $0.00 for making liquidity against all account types, $0.00 for taking liquidity against another Public Customer, and $0.10 for taking liquidity against Professional Customers, Broker Dealers, and Market Makers. The proposed change would effectively decrease the fee assessed in the latter case from $0.10 to $0.00. Further, the Exchange believes it is equitable and not unfairly discriminatory that Public Customers be charged lower fees than Professional Customers, Broker Dealers, and Market Makers on BOX. The Exchange believes it promotes the best interests of investors to have lower transaction costs for Public Customers and will attract Public Customer order flow. The Exchange believes further that increased opportunities to interact with Public Customer order flow benefits all market participants. As such, the industry in general and the Exchange in particular have historically created fee structures to benefit Public Customers because increased Public Customer order flow benefits all market participants.

The Exchange notes that the BOX Fee Schedule, including Section VI (Complex Order Transaction Fees), assesses fees and credits according to the account type of the Participant originating the order and the contra party.[14] The result of this structure is that a Participant does not know the fee it will be charged when submitting certain orders. Specifically, Participants who submit a Complex Order to BOX may not know ahead of time whether their Complex Order will interact with the Complex Order Book or the BOX Book. As a result, Participants must recognize when submitting a Complex Order to BOX that they could be assessed a range of fees or rebates and must expect the highest applicable fee or lowest applicable rebate such that fees(rebates) may be higher(lower) than their expectations. The Exchange notes that under the proposal, SPY, QQQ, and IWM Public Customer Complex Orders will not be assessed a fee regardless of whether the Complex Order executes in the Complex Order Book or the BOX Book. Further, the Exchange believes the proposed changes are equitable and not unfairly discriminatory as the proposed fee structure will apply uniformly to all Participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

The proposal does not impose an undue burden on intermarket competition. The Exchange believes its proposal to decrease fees for SPY, QQQ, and IWM Public Customer Complex Orders that execute against the BOX Book will allow BOX to compete with other options markets. The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees and rebates to remain competitive with other exchanges. Because competitors are free to modify their own fees and rebates in

[8] *See* BOX Rule 7240(b)(3)(i).

[9] *See* BOX Fee Schedule, Section IV.A (Non-Auction Transactions).

[10] 15 U.S.C. 78f(b)(4) and (5).

[11] *See* BOX Fee Schedule, Section IV.A (Non-Auction Transactions).

[12] *See https://www.optionseducation.org/toolsoptionquotes/today-s-most-active-options* (providing a daily list of the most active options by type).

[14] *See* BOX Fee Schedule Sections IV.A (Electronic Non-Auction Transactions) and VI.A (Complex Order Transaction Fees).

response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

The Exchange believes that the proposed changes do not impose an undue burden on intra-market competition because the proposal will not place any category of market participant at a competitive disadvantage. Specifically, the Exchange believes that assessing no fees to the legs of SPY, IWM, or QQQ Public Customer Complex Orders that trade against the BOX Book does not impose an undue burden on intra-market competition because the proposed change is designed to attract Public Customer order flow which increases the number of executions on BOX, thus benefiting all market participants. The Exchange believes further that separating SPY, IWM, and QQQ Complex Order transaction fees from Penny Interval Classes does not impose an undue burden on competition because the proposal changes the structure of the Fee Schedule but does not change the fees assessed or rebates offered.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Exchange Act [15] and Rule 19b–4(f)(2) thereunder,[16] because it establishes or changes a due, or fee.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend the rule change if it appears to the Commission that the action is necessary or appropriate in the public interest, for the protection of investors, or would otherwise further the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

[15] 15 U.S.C. 78s(b)(3)(A)(ii).

[16] 17 CFR 240.19b–4(f)(2).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–BOX–2024–10 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–BOX–2024–10. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–BOX–2024–10 and should be submitted on or before May 22, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100031; File No. SR–FICC–2024–005]

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Designation of Longer Period for Commission Action on Proposed Rule Change, as Modified by Partial Amendment No. 1, To Modify the GSD Rules To Facilitate Access to Clearance and Settlement of All Eligible Secondary Market Transactions in U.S. Treasury Securities

April 25, 2024.

On March 11, 2024, Fixed Income Clearing Corporation (''FICC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change SR–FICC–2024–005 pursuant to Section 19(b) of the Securities Exchange Act of 1934 (''Exchange Act'') [1] and Rule 19b–4 [2] thereunder to modify FICC's Government Securities Division (''GSD'') Rulebook (''GSD Rules'') to facilitate access to clearance and settlement services of all eligible secondary market transactions in U.S. Treasury securities.[3] On March 19, 2024, FICC filed Partial Amendment No. 1 to make clarifications and corrections [4] to the proposed rule change. The proposed rule change, as modified by Partial Amendment No. 1, is referred to herein as the ''Proposed Rule Change.'' The Proposed Rule Change was published for public comment in the **Federal Register** on

[17] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Notice of Filing *infra* note 5, at 89 FR 21363.

[4] Partial Amendment No. 1 made clarifications and corrections to the description of the proposed rule change and Exhibit 5. Specifically, as originally filed, the description of the proposed rule change made a reference to an incorrect section of the GSD Rules. Partial Amendment No. 1 corrects that reference. Additionally, as originally filed, the description of the proposed rule change and Exhibit 5 contained inconsistent references regarding whether FICC or its Board would be responsible for approving membership applications and related membership matters. Partial Amendment No. 1 clarifies and corrects those references. These clarifications and corrections have been incorporated, as appropriate, into the description of the proposed rule change.

March 27, 2024.[5] The Commission has received comments regarding the substance of the changes proposed in the Proposed Rule Change.[6]

Section 19(b)(2)(i) of the Exchange Act[7] provides that, within 45 days of the publication of notice of the filing of a proposed rule change, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved unless the Commission extends the period within which it must act as provided in Section 19(b)(2)(ii) of the Exchange Act.[8] Section 19(b)(2)(ii) of the Exchange Act allows the Commission to designate a longer period for review (up to 90 days from the publication of notice of the filing of a proposed rule change) if the Commission finds such longer period to be appropriate and publishes its reasons for so finding, or as to which the self-regulatory organization consents.[9]

The 45th day after publication of the Notice of Filing is May 11, 2024. In order to provide the Commission with sufficient time to consider the Proposed Rule Change, the Commission finds that it is appropriate to designate a longer period within which to take action on the Proposed Rule Change and therefore is extending this 45-day time period.

Accordingly, the Commission, pursuant to Section 19(b)(2) of the Exchange Act,[10] designates June 25, 2024, as the date by which the Commission shall either approve, disapprove, or institute proceedings to determine whether to disapprove proposed rule change SR–FICC–2024–005.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100033; File No. SR–NYSEAMER–2024–24]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Change To Adopt Rule 971.2NYP Regarding the Operation of the Customer Best Execution Auction for Complex Orders on the NYSE American Pillar Trading Platform

April 25, 2024.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on April 10, 2024, NYSE American LLC (''NYSE American'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt new Rule 971.2NYP regarding the operation of its Customer Best Execution (''CUBE'') Auction for Complex Orders on the Exchange's Pillar trading technology platform and to modify and make conforming changes to Rules 900.2NY, 971.2NY, 980NYP, and 935NY. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt Rule 971.2NYP (the ''proposed Rule'') to reflect the operation of its Complex CUBE Auction (the ''Complex CUBE Auction''; ''Complex CUBE''; or the ''Auction'') on the Exchange's Pillar trading technology platform and to modify and make conforming changes to Rules 900.2NY, 971.2NY, 980NYP, and 935NY.

Background

In October 2023, the Exchange completed its transition to its Pillar trading technology platform (''Pillar'').[4] Co-incident with this transition, the Exchange implemented new rules applicable to options trading on Pillar, each of which—like the proposed Rule—includes the modifier ''P'' appended to the rule number.[5] For example, the Exchange has adopted Pillar rules that govern options trading regarding: the priority, ranking, and allocation of single-leg interest, including Rule 964NYP (''Pillar Rule 964NYP'');[6] the operation of order types, Market Maker quotations, opening auctions, and risk controls;[7]

[4] *See* Trader Update, NYSE American Options: NYSE Pillar Final Migration Tranche, dated October 30, 2023, *available here: https://www.nyse.com/trader-update/history#110000748137* (announcing the last phase of the Pillar migration). Now that the Exchange has completed its migration to Pillar, it plans to file a rule proposal to delete rules that are no longer operative because they applied only to pre-Pillar trading on the Exchange (including pre-Pillar Rule 971.2NY). In the meantime, for the sake of clarity, the Exchange proposes to add a preamble to pre-Pillar Rule 971.2NY specifying that it is no longer applicable to Complex CUBE Auctions on Pillar, which would add clarity, transparency, and internal consistency to Exchange rules.

[5] *See, e.g.,* proposed Rule 971.2NYP. Upon migration, the Pillar rules replaced and superseded the corollary pre-Pillar rules—most of which have the same rule number without the ''P'' modifier. *See, e.g., infra* note 5 [sic], Pillar Priority Filing (adopting, among other rules, Pillar Rule 964NYP, which replaced and superseded pre-Pillar Rule 964NY when the Exchange migrated to Pillar).

[6] *See* Rules 964NYP (Order Ranking, Display, and Allocation), 964.1NYP (Directed Orders and DOMM Quoting Obligations) and 964.2NYP (Participation Entitlement of Specialist Pool and Designation of Primary Specialist) (collectively, the ''Pillar Priority Rules''). *See also* Securities Exchange Act Release No. 97297 (April 13, 2023), 88 FR 24225 (April 19, 2023) (SR–NYSEAMER–2023–16) (adopting the Pillar Priority Rules on an immediately effective basis, which rules utilize Pillar concepts and incorporate the Exchange's pre-Pillar Customer priority and pro rata allocation model) (the ''Pillar Priority Filing'').

[7] *See* Securities Exchange Act Release No. 97869 (July 10, 2023), 88 FR 45730 (July 17, 2023) (SR–NYSEAMER–2023–34) (adopting, on an immediately effective basis new Rules 900.3NYP

and the trading of Electronic Complex Orders (''ECOs'') (''Pillar Rule 980NYP'').[8]

In addition, as discussed herein, the Exchange adopted a new rule to describe the operation of single-leg CUBE Auctions on Pillar (''Pillar Rule 971.1NYP''). The CUBE Auction is the Exchange's electronic crossing mechanism with a price improvement auction for single-leg and complex trading interest.[9] Since the migration, Pillar Rule 971.1NYP governs single-leg CUBE Auctions.[10] The purpose of this filing is to adopt a Pillar rule that governs the operation of Complex CUBE Auctions on Pillar—*i.e.,* proposed Rule 971.2NYP.[11]

As detailed below, the proposed Rule would maintain the core aspects of pre-Pillar Complex CUBE Auction functionality, but would incorporate applicable Pillar rules (*e.g.,* regarding priority and allocation of Auction interest) and would include modifications and functionality enhancements that are available on Pillar.[12] One such modification is a competitive change to the pricing requirements to initiate (and participate in) Complex CUBE Auctions on Pillar, which is designed to enable the Exchange to better compete for complex auction order flow.[13] Similarly, to the extent that the proposed Rule differs from pre-Pillar Complex CUBE functionality, the Exchange believes that such changes are consistent with existing Pillar functionality for single-leg CUBE Auctions or with functionality offered on a competing options exchange and are therefore not new or novel.[14]

Summary of Proposed Modifications to Complex CUBE Auction Functionality

In addition to retaining the fundamental aspects of pre-Pillar Complex CUBE functionality, the proposed Rule would: incorporate existing Pillar functionality that would determine the pricing, priority, and allocation of interest in Complex CUBE Auctions; include competitive changes to pricing requirements to initiate an Auction; and adopt enhancements to Auction functionality that are identical (or substantively identical) to existing Pillar functionality for single-leg CUBE Auctions, which functionality is also available on another options exchange as noted herein. Specifically, and as described in detail below, the Exchange proposes to modify the Complex CUBE Auction on Pillar as follows:

• *CUBE BBO, Initiating Price, and Range of Permissible Executions.* Adopt a revised definition of CUBE BBO, which incorporates Pillar priority rules regarding displayed Customer interest[15] as well as the Pillar concept of a Derived BBO (or ''DBBO'').[16] Consistent with the proposed CUBE BBO, the Exchange also proposes to update the requirements for the initiating price and range of permissible executions. Further, to the extent that the proposed requirements to initiate and participate in a Complex CUBE Auction differ from pre-Pillar Complex CUBE functionality, the Exchange believes that such changes are consistent (and competitive) with another options exchange that offers a complex price improvement auction.[17]

• *Response Time Interval.* Modify the Response Time Interval for a Complex CUBE Auction to be for a set duration as opposed to the random duration that currently applies to Auctions, which would align the proposed Rule with Pillar Rule 971.1NYP for single-leg CUBE Auctions on Pillar.[18]

• *Complex GTX Order Handling.* Update Complex GTX Order functionality to reflect handling on Pillar, including how such orders will be prioritized per Pillar Rule 964NYP(e), that such orders may include a specific CUBE ''AuctionID'', and that such orders will cancel (rather than continue to trade) after executing with the Complex CUBE Order, if at all, which order handling would align the proposed Rule with Pillar Rule 971.1NYP for single-leg CUBE Auctions on Pillar.[19]

• *Early End Scenarios based on market updates.* Reduce and streamline the number of circumstances that would cause an Auction to end early, which remaining early end scenarios are consistent with the early end scenarios set forth in its pre-Pillar Rule 971.2NY(c)(3)(C)–(D) and (c)(3)(F).[20] This proposed change does not impact nor alter the requirement that a Complex CUBE Auction end early if there is a trading halt in any of the component series, which early termination reason is distinct from

(Orders and Modifiers), 925.1NYP (Market Maker Quotations), 928NYP (Pre-Trade and Activity-Based Risk Controls), 928.1NYP (Price Reasonability Checks—Orders and Quotes), and 952NYP (Auction Process)).

[8] *See* Securities Exchange Act Release No. 97739 (June 15, 2023), 88 FR 40893 (June 22, 2023) (SR–NYSEAMER–2023–17) (order approving Pillar Rule 980NYP (Electronic Complex Order Trading) (the ''Pillar Complex Approval Order''). Pillar Rule 980NYP(a)(7) defines an ''Electronic Complex Order'' or ''ECO'' to mean any Complex Order, as defined in Pillar Rule 900.3NYP(f).

[9] In 2014, the Exchange introduced its CUBE Auction functionality for single-leg trading interest pursuant to Rule 971.1NY and, in 2018, the Exchange introduced Complex CUBE Auction functionality pursuant to Rule 971.2NY. *See, e.g.,* Securities Exchange Act Release Nos. 72025 (April 25, 2014), 79 FR 24779 (May 1, 2014) (SR–NYSEMKT–2014–17) (order approving single-leg CUBE Auctions per Rule 971.1NY); and 83384 (June 5, 2018), 83 FR 27061 (June 11, 2018) (SR–NYSEAMER–2018–05) (order approving Complex CUBE Auctions per Rule 971.2NY).

[10] *See* Securities Exchange Act Release No. 97938 (July 18, 2023), 88 FR 47536 (July 24, 2023) (NYSEAMER–2023–35) (adopting, on an immediately effective basis, Pillar Rule 971.1NYP (the ''Pillar Single-Leg CUBE Filing''). Pillar Rule 971.1NYP replaced and superseded pre-Pillar Rule 971.1NY, which does not apply to trading on Pillar.

[11] As discussed *infra,* prior to the Exchange's migration to Pillar, Rule 971.2NY governed Complex CUBE Auctions (referred to herein as the ''pre-Pillar Rule' ''pre-Pillar Rule 971.2NY''; or ''pre-Pillar Complex CUBE functionality''). On Pillar, however, Rule 971.2NY is no longer applicable. As such, since completing the Pillar migration, the Exchange has not conducted Complex CUBE Auctions.

[12] Although the Exchange describes CUBE Auction functionality for single-leg and complex interest in two separate rules (*i.e.,* Pillar Rule 971.1NYP and proposed Rule 971.2NYP, respectively), the Exchange utilizes the same mechanism to process all CUBE Auctions.

[13] *See* Cboe Exchange, Inc. (''Cboe'') Rule 5.38(b)(1) and (c)(5)(B) (describing Cboe's Complex Automated Improvement Mechanism (''C–AIM''), which includes pricing requirements to both initiate and participate in a C–AIM that are substantially similar those proposed herein, as discussed, *infra.*).

[14] *See generally* Pillar Rule 971.1NYP and the Single-Leg Pillar Filing (as discussed, *infra,* includes the same functionality enhancements as proposed herein). *See generally* Cboe Exchange, Inc. (''Cboe'') Rule 5.38 (describing Cboe's C–AIM, which, as discussed, *infra,* includes substantially the same functionality as certain of the modifications and enhancements in the proposed Rule as noted herein).

[15] *See, e.g.,* Pillar Rule 964NYP(e) (providing that, at each price, displayed Customers have first priority followed by displayed non-Customers, and followed (last) by non-displayed interest (with non-displayed Customers having priority over non-displayed, non-Customers). *See generally* Rule 980NYP (requiring that when an ECO trades with another ECO (*i.e.,* cannot trade with the leg markets—like a Complex CUBE Order—the ECO must, in certain circumstances, trade at a price that improves (is better than) the displayed Customer interest to yield priority to such interest, including for: ECO Auction Collars (*see* Rule 980NYP(d)(3)), ECOs designated as Complex Only Orders (*see* Rule 980NYP(e)(1)(C)); and ECOs initiating or participating in a Complex Order Auction (*see* Rule 980NYP(f)(1) and (f)(2)(A)).

[16] For a more detailed discussion of the DBBO, *see* the Pillar Complex Approval Order, 88 FR, at 40896–98. *See also* Pillar Rule 980NYP(a)(5) (defining the DBBO).

[17] *See* Cboe Rule 5.38(b)(1) and (e)(5)(B) (regarding pricing requirements for participation in C–AIM, as discussed *infra*).

[18] *See* Pillar Rule 971.1NYP(c)(1)(B). As described herein, on Pillar, the proposed Response Time Interval would continue to be no less than 100 milliseconds and no more than one (1) second. *Compare* proposed Rule 971.2NYP(c)(1)(B) *with* pre-Pillar Rule 971.2NY(c)(1)(B).

[19] *See* Pillar Rule 971.1NYP(c)(1)(C)(i) (describing the same GTX Order functionality for single-leg CUBE Auctions on Pillar).

[20] *See* pre-Pillar Rule 971.2NY(c)(3)(A)–(F) (which sets forth the pre-Pillar early end scenarios).

ending an Auction early based on incoming options trading interest.[21]

• *Surrender Quantity.* Provide Complex Contra Orders that guarantee Complex CUBE Orders with a stop price the option of requesting to receive a lesser participant guarantee than the standard 40% (*i.e.,* the Surrender Quantity), which would align the proposed Rule with Pillar Rule 971.1NYP for single-leg CUBE Auctions on Pillar.[22]

• *Concurrent Auctions.* Permit multiple Complex CUBE Auctions in the same complex strategy [23] to occur at the same time and specify how such Auctions are processed and, to correspond with this functionality change, add ''AuctionID'' functionality to allow auction responses (*i.e.,* Complex GTX Orders) to specify the Complex CUBE Order with which they would like to trade, which would align the proposed Rule with Pillar Rule 971.1NYP for single-leg CUBE Auctions on Pillar.[24]

• *Complex CUBE Order Allocation.* Update Auction functionality to reflect the allocation of Complex CUBE Orders against RFR Responses in alignment with Pillar Rule 964NYP (Order Ranking, Display, and Allocation), which would align the proposed Rule with Pillar Rule 971.1NYP for single-leg CUBE Auctions on Pillar.[25]

In addition to the foregoing modifications and enhancements, the proposed Rule includes descriptions of pre-Pillar Complex CUBE functionality that will persist on Pillar. However, the Exchange proposes to streamline, clarify, or relocate certain of these descriptions (as indicated herein) to make the proposed Rule more succinct and easier to understand.[26]

Proposed Rule 971.2NYP: Complex CUBE Auctions on Pillar [27]

Complex CUBE Auctions on Pillar will function in a manner that is substantively identical to pre-Pillar Complex CUBE Auctions, with proposed modifications and enhancements specified herein.[28]

Initiating and Pricing of Complex CUBE Auctions Based on the CUBE BBO

Proposed Rule 971.2NYP would begin by describing the general requirements for initiating a Complex CUBE Auction.

• Proposed Rule 971.2NYP(a) is substantively identical to Rule 971.2NY(a) and would provide that a ''Complex CUBE Order'' is a Complex Order, as defined in Pillar Rule 900.3NYP(f), submitted electronically by an ATP Holder (''Initiating Participant'') into the Complex CUBE Auction, that the Initiating Participant represents as agent on behalf of a public customer, broker dealer, or any other entity. The Exchange notes that this provision includes the updated reference to the definition of Complex Orders set forth in Rule 900.3NYP(f) (rather than pre-Pillar Rule 900.3NY(e)), which difference is immaterial because the definition in both rules is substantively identical.[29]

○ Proposed Rule 971.2NYP(a)(1) is substantively identical to Rule 971.2NY(a)(1)(A)–(B) insofar as it would provide that the Initiating Participant would guarantee the execution of the Complex CUBE Order by submitting a contra-side order (''Complex Contra Order'') representing principal interest or non-Customer interest it has solicited to trade solely with the Complex CUBE Order at a specified price (''stop price'') or by utilizing auto-match limit features (as described in proposed paragraph (b)(1) of the Rule).[30] The proposed Rule also specifies that neither the stop price nor the auto-match limit price would be displayed, which detail is consistent with (although not specified in) the pre-Pillar Rule and would therefore add clarity, transparency and internal consistency to Exchange rules.[31]

Next, the Exchange proposes to add a ''Definitions'' section to describe concepts applicable to the proposed Rule. As described below, the proposed terms are the same in name as those used to describe pre-Pillar Complex CUBE functionality but are not necessarily the same in substance.[32] As such, the requirements for starting a Complex CUBE Auction on Pillar are not identical to the requirements set forth in the pre-Pillar Rule. Because most of the proposed definitions cross-reference other defined concepts, the Exchange has organized its discussion of these terms not alphabetically (as is done in the proposed Rule) but instead in a manner that is designed to make the proposed functionality easier to comprehend.

• *DBBO.* The Exchange proposes that DBBO would have the meaning set forth in Pillar Rule 980NYP(a)(5).[33] The Pillar concept of the DBBO refers to the derived best net bid (''DBB'') and derived best net offer (''DBO'') [34] for a complex strategy. As described in the Pillar Complex Approval Order, the concept of the DBBO was based on the

[21] *Compare* proposed Rule 971.2NYP(c)(2) with pre-Pillar Rule 971.2NY(c)(2) (both providing that an Auction will end early if there is a trading halt in any of the component series).

[22] *See* Pillar Rule 971.1NYP(c)(4)(C) (describing the same optional Surrender Quantity functionality for single-leg CUBE Auctions on Pillar).

[23] The Exchange notes that ''complex strategy'' means a particular combination of leg components and their ratios to one another. Pillar Rule 980NYP(a)(4). New complex strategies can be created when the Exchange receives either a request to create a new complex strategy or an ECO with a new complex strategy. *See id.*

[24] *See* Pillar Rule 971.1NYP(c), (c)(1)(A) (describing the same concurrent auction functionality for single-leg CUBE Auctions on Pillar).

[25] *See* Pillar Rule 971.1NYP(c)(4) (describing the same order allocation functionality for single-leg CUBE Auctions on Pillar—*i.e.,* the rule likewise incorporates the priority scheme set forth in Pillar Rule 964NYP).

[26] For example, the Exchange proposes to replace reference to ''$0.01'' with ''one cent ($0.01),'' which the Exchange believes would add clarity and transparency to the proposed Rule. *See* proposed Rule 971.2NYP(a)(1) (A)(ii) and (iv).

[27] As noted herein, pre-Pillar Rule 971.2NY is not applicable on Pillar and the Exchange is not currently conducting Complex CUBE Auctions on Pillar. *See supra* note 11.

[28] *Compare* proposed Rule 971.2NYP *with* pre-Pillar Rule 971.2NY. The proposed Rule updates certain internal (and external) cross-references to reflect the (re)organization of the proposed Rule and to reflect the applicable Pillar rule(s), which differences are not material because they do not impact functionality. The Exchange has also made the stylistic choice to reorganize certain provisions in the proposed Rule to better align with corollary provisions in Pillar Rule 971.1NYP.

[29] *See also* Pillar Rule 900.3NYP(f) (providing a Complex Order is any order involving the simultaneous purchase and/or sale of two or more different option series in the same underlying security, for the same account, in a ratio that is equal to or greater than one-to-three (.333) and less than or equal to three-to-one (3.00) and for the purpose of executing a particular investment strategy). As discussed *infra,* the Exchange proposes to modify Pillar Rule 980NYP, which governs Electronic Order Trading, to include ''Complex CUBE Orders'' as a type of ECO available for trading on the Exchange. *See* proposed Rule 980NYP(b)(1).

[30] The Exchange notes that the internal cross-reference in the proposed Rule has been updated and expanded to include descriptions of the stop price and auto-match limit price, which difference from pre-Pillar Complex CUBE functionality is not material because it does not impact functionality.

[31] *See* proposed Rule 971.2NYP(a)(1). The Exchange notes that including the proposed rule text would also align with the Pillar rule for single-leg CUBE Auctions. *See* Pillar Rule 971.1NYP(a)(1) (specifying that in a single-leg CUBE Auction neither the stop price nor auto-match limit price are displayed).

[32] *See* proposed Rule 971.2NYP(a)(1)(A) (setting forth ''Definitions'' for purposes of the proposed Rule). The Exchange notes that this proposed section obviates the need for pre-Pillar Commentary .02 (setting forth ''Definitions'' for purposes of the pre-Pillar Rule). As discussed *infra,* the omission of this Commentary does not alter the functionality of the proposed Rule and is therefore immaterial.

[33] *See* proposed Rule 971.2NYP(a)(1)(A)(iii) (defining DBBO).

[34] The DBBO provides for the establishment of a derived (theoretical) bid or offer for a particular complex strategy. *See* Pillar Rule 980NYP(a)(5) (defining the DBBO and providing that the bid (offer) price used to calculate the DBBO on each leg will be the Exchange BB (BO) (if available), bound by the maximum allowable Away Market Deviation). The Away Market Deviation, as defined in Pillar Rule 980NYP(a)(1), ensures that an ECO does not execute too far away from the prevailing market. Pillar Rule 980NYP(a)(5) also provides for the establishment of the DBBO in the absence of an Exchange BB (BO), or ABB (ABO), or both.

definition of Derived BBO set forth in Rule 900.2NY [35] but is more expansive in that it ensures that Electronic Complex Orders (ECOs) do not execute too far away from the prevailing market (*i.e.,* is bound by the Away Market Deviation) and provides alternative means of calculating the DBBO (*e.g.,* by looking to the contra-side best bid (offer) in the absence of same-side interest).[36]

• *Complex BBO.* The Exchange proposes to define the Complex BBO as ''the best-priced complex order(s) in the same complex strategy to buy (sell)'' and would provide that ''[t]he Complex BB cannot exceed the DBO and the Complex BO cannot exceed the (DBB).'' [37] The proposed definition is substantively the same as the definition of Complex BBO set forth in Rule 900.2NY,[38] except that the proposed definition incorporates the Pillar concept of DBBO (described above). Specifically, if the best-priced complex order to buy (sell) crosses the best-priced leg market interest to sell (buy) (*i.e.,* the DBBO), the Exchange would ensure that the Complex BBO honors the leg market prices.[39]

• *CUBE BBO.* The CUBE BBO would refer to the CUBE BB and the CUBE BO.[40] Specifically, as proposed:

○ The CUBE BB for a Complex CUBE Order to buy would be comprised of the higher of: the Complex BB or the Complex BB plus one cent ($0.01) if there is a Customer Complex Order on the Complex BB; or the DBB or the DBB plus one cent ($0.01) if there is displayed Customer interest on the Exchange BBO and the DBB is calculated using the Exchange BBO; and

○ The CUBE BO for a Complex CUBE Order to sell would be comprised of the lower of: the Complex BO or the Complex BO minus one cent ($0.01) if there is a Customer Complex Order on the Complex BO; or the DBO or the DBO minus one cent ($0.01) if there is displayed Customer interest on the Exchange BBO and the DBO is calculated using the Exchange BBO.[41]

Pre-Pillar Rule 971.2NY(a)(2) provided that the CUBE BBO was ''the more aggressive of (i) the Complex BBO improved by $0.01, or (ii) the Derived BBO improved by: $0.01 multiplied by the smallest leg of the complex order strategy.'' [42] Like the pre-Pillar CUBE BBO, the proposed CUBE BBO relies on the best-priced interest on the complex order book or in the leg markets—though, as noted herein, the CUBE BBO incorporates the Pillar concept of DBBO. Unlike pre-Pillar Complex CUBE functionality, the proposed CUBE BBO does not automatically improve the Complex BBO or DBBO, as applicable, nor does it account for the smallest leg ratio if the leg markets make up the CUBE BBO.[43] Instead, as proposed, the CUBE BBO would price improve the best-priced interest on the Exchange only if such interest represents displayed Customer interest, which incorporates the Exchange's Customer-centric priority scheme.

The Exchange's priority and allocation procedures are set forth in Pillar Rule 964NYP. Pillar Rule 964NYP(e) specifies that, at each price, and within each priority category, Customer interest has priority over non-Customer interest and (also at each price) displayed Customer interest has priority over non-displayed Customer interest.[44] Thus, the proposal to require that the CUBE BBO price improve only displayed Customer interest is consistent with the Pillar priority scheme. Moreover, the proposed Rule would align with Pillar Rule 980NYP, which requires that when an ECO trades with another ECO (*i.e.,* not with the leg markets) the transaction price must improve certain ''displayed Customer interest'' to yield priority to such interest.[45] Therefore, the proposed CUBE BBO would align the proposed Rule with existing Pillar rules.

In addition, the proposal to require the CUBE BBO to price improve by one penny the best-priced interest on the Exchange when it includes displayed Customer interest, while different from pre-Pillar functionality, is a competitive change designed to help the Exchange better compete for complex auction order flow. Specifically, Cboe offers a Complex Automated Improvement Mechanism (''C–AIM''), which is analogous to the Complex CUBE Auction. Like the proposed CUBE BBO, Cboe requires C–AIM participants to price improve interest resting on Cboe only when such interest represents a ''Priority Customer'' on the SBBO (which is analogous to the DBBO).[46] While the Cboe C–AIM Rule does not specify that the Priority Customer interest must be displayed interest, the Exchange believes this is a reasonable inference based on requirements set forth in other Cboe rules as well as the fact that Cboe, like the Exchange, must also comply with the Options Order Protection and Locked/Crossed Market Plan.[47] As such, the Exchange believes

[35] *See* Rule 900.2NY (defining Derived BBO as being ''calculated using the BBO from the Consolidated Book for each of the options series comprising a given complex order strategy'').

[36] *See* Pillar Complex Approval Order, 88 FR, at 40896–98.

[37] *See* proposed Rule 971.2NYP(a)(1)(A)(i) (defining Complex BBO).

[38] *See* Rule 900.2NY (defining the ''Complex BBO'' as ''the complex orders with the lowest-priced (*i.e.,* the most aggressive) net debit/credit price on each side of the Consolidated Book for the same complex order strategy'').

[39] The terms ''leg'' or ''leg market'' refers to each of the component option series that comprise an ECO and ''ratio'' refers to the quantity of each leg of an ECO broken down to the least common denominator such that the ''smallest leg ratio'' is the portion of the ratio represented by the leg with the fewest contracts. *See* Pillar Rule 980NYP(a)(8), (a)(9), respectively.

[40] *See* proposed Rule 971.2NYP(a)(1)(A)(ii) (defining CUBE BBO).

[41] *See* proposed Rule 971.2NYP(a)(1)(A)(ii)(a)–(b).

[42] *See* pre-Pillar Rule 971.2NY(a)(2).

[43] The Exchange notes that, pre-Pillar, if the CUBE BBO was based on the Derived BBO and the leg ratio of the complex strategy is 2x3 leg ratio, the CUBE BBO would improve the Derived BBO by two cents ($0.02)—regardless of the presence of Customer interest on the Derived BBO. As discussed herein, although the requisite price improvement to the CUBE BBO is never more than one penny, the Exchange believes this pricing change is competitive and would enable the Exchange to better compete for Complex CUBE Auction flow.

[44] *See* Rule 964NYP(e)(1)–(3) (setting forth three categories in order of first priority—Priority 1—Market Orders; Priority 2—Displayed Orders; and Priority 3—Non-Display Orders; providing that, within each priority category, at a price, Customers have priority over non-Customers; and that ''[i]f, at a price, there are no remaining orders or quotes in a priority category, then same-priced interest in the next priority category has priority).

[45] *See, e.g.,* Pillar Rules 980NYP(d)(3) (providing that the ECO Auction Collars, within which ECOs trade in the ECO Opening Auction, account for (and price improve) ''displayed Customer interest'' on the Exchange BBO(s)); 980NYP(e)(1)(C) (requiring that ECOs designated as ''Complex Only Orders'' trade at a price that improves ''displayed Customer interest'' on the Exchange BBO(s)); and 980NYP(f)(2) (requiring that ECOs may only trade in a Complex Order Auction (COA) at a price that improves ''displayed Customer interest'' on the Exchange BBO(s)).

[46] *See* Cboe Rule 5.38(b)(1) (requiring that, to initiate a C–AIM, the ''Initiating Order'' (akin to Complex Contra Order) must be guaranteed by the ''Agency Order'' (akin to Complex CUBE Order) at a price that improves by at least one MPV the best-priced interest on the complex order book or in the leg markets when such interest represents a ''Priority Customer''). *See also* Cboe Rule (e)(5)(B) (providing that responses to a C–AIM must execute with the Agency Order at a price that is ''(i) the better of the SBO (SBB) [Synthetic Offer (Synthetic Bid] or the offer (bid) of a resting complex order at the top of the COB [Complex Order Book]; or (ii) one minimum increment lower (higher) than the better of the SBO (SBB) or the offer (bid) of a resting complex order at the top of the COB if the BBO of any component of the complex strategy or the resting complex order, respectively, is a Priority Customer order''). Cboe defines a Priority Customer as ''a person or entity that is a Public Customer and is not a Professional,'' which is analogous with the Exchange's definition of Customer. *Compare* Cboe Rule 1.1 *with* Rule 900.2NY (defining Customer and Professional Customer).

[47] The C–AIM pricing requirement that the Exchange proposes to copy is based on the presence of a Priority Customer on the SBBO. The definition of SBBO incorporates Cboe's definition of the BBO, is ''the best bid or offer *disseminated* on the Exchange'' (Cboe Rule 1.1 (emphasis added)). The SBBO represents ''the best net bid and net offer'' on Cboe as calculated using, for complex orders,

Continued

that making price improvement for the CUBE BBO contingent on the presence of displayed Customer interest (as opposed to automatic) may increase Complex CUBE Orders directed to the Exchange (as a result of the more competitive requirements), while maintaining the Exchange's Customer-centric priority scheme.[48] In addition, the proposed CUBE BBO would continue to protect same-priced, displayed Customer interest and would ensure that Complex CUBE Orders do not trade ahead of such displayed Customer interest, whether in the leg markets or as Customer Complex Orders.

• *Initiating Price.* The ''initiating price'' for a Complex CUBE Order to buy (sell) would be the lower (higher) of the Complex CUBE Order's net price or the price that locks the DBO (DBB) or, if the DBO (DBB) includes displayed Customer interest on the Exchange, the DBO (DBB) minus (plus) one cent ($0.01).[49] The pre-Pillar Rule 971.2NY(a)(3) provides that the initiating price for a Complex CUBE Order is ''the less aggressive of the net debit/credit price of such order or the price that locks the contra-side CUBE BBO, which is consistent with the proposed Rule insofar as it relies on the limit price of the Complex CUBE Order as one boundary.'' [50] [sic] The proposed concept relies on the Pillar concept of the DBBO rather than the (pre-Pillar) CUBE BBO, which distinction ensures that the Complex CUBE Order can be priced equal to prices available in the leg markets but must improve such prices in the presence of displayed Customer interest.[51] The Exchange notes that this distinction was not necessary in the pre-Pillar Rule because, as noted herein, the CUBE BBO always price improved the best-priced interest on the Exchange (including on the leg markets) regardless of the presence of Customer interest. As such, the Exchange believes that the proposed ''initiating price'' would continue to respect leg market prices and improve leg market prices in the presence of displayed Customer interest. The Exchange notes that the proposed ''initiating price'' definition would align the Exchange with the price parameters in place on at least one competing options exchange.[52]

• *Range of Permissible Executions.* The ''range of permissible executions'' of a Complex CUBE Order to buy (sell) would include prices equal to or between the initiating price as the upper (lower) bound and the CUBE BB (BO) as the lower (upper) bound, which range is consistent with the pre-Pillar range except that it incorporates the Pillar definition of CUBE BBO.[53] Like the pre-Pillar Rule, the proposed Rule would specify when the Exchange would adjust the permissible range of executions based on interest that arrives during the Auction. Specifically, as proposed, the range of permissible executions for a Complex CUBE Order to buy (sell) would be adjusted based on updates to the CUBE BB (BO) during an Auction, providing that, if the CUBE BB (BO) updates to be higher (lower) than the initiating price, the Auction will end early pursuant to paragraph (c)(3) of this Rule.[54]

Initiating of Auction

Proposed Rule 971.2NYP would set forth the requirements for initiating a Complex CUBE Auction, which are substantively identical to pre-Pillar functionality as noted herein. Specifically, to initiate an Auction, the net price of a Complex CUBE Order to buy (sell) must be equal to or higher (lower) than the CUBE BB (BO) and a Complex CUBE Order that fails to meet these requirements would be rejected along with the Complex Contra Order.[55] As further proposed, the time at which the Auction is initiated would also be considered the time of execution for the Complex CUBE Order, which is identical to pre-Pillar functionality.[56]

Complex CUBE Auction Eligibility Requirements

On Pillar, as is the case today, all options traded on the Exchange would be eligible to be part of a Complex CUBE Auction.[57] Proposed Rule 971.2NYP(b), like the pre-Pillar Rule, would set forth the requisite conditions for initiating a Complex CUBE Auction.

• Proposed Rule 971.2NYP(b)(1) is substantively identical to Rule 971.2NY(b)(1) and would provide that the Initiating Participant marks the Complex CUBE Order for Auction processing and submits a Complex Contra Order with a ''stop price'' or an ''auto-match limit price'' (described below) as the means of guaranteeing the execution of the Complex CUBE Order.

○ Proposed Rule 971.2NYP(b)(1)(A), like Rule 971.2NY(b)(1)(A), would describe the ''stop price'' as the price at which the Initiating Participant guarantees the Complex CUBE Order.[58] The pre-Pillar Rule provides that that the stop price, ''must be executable against the initiating price'', that a stop price must not cross the same-side

---

''the BBO for each component,'' of a complex strategy from the Simple Book [*i.e.,* leg markets] (Cboe Rule 5.33(a)). Because the SBBO for each component leg is based on the best bid and offer *disseminated* by Cboe, the Exchange believes it is reasonable to infer that only displayed Priority Customer is considered for purposes of C–AIM pricing. As such, the Exchange believes that the proposed Rule is consistent with (a reasonable interpretation of) Cboe's requirements and is therefore not new or novel.

[48] As noted, *supra,* the proposed CUBE BBO, if based on the DBBO, ignores the leg ratio of the complex strategy and would require price improvement of only one penny, which is consistent (and competitive) with Cboe as discussed herein.

[49] *See* proposed Rule 971.2NYP(a)(1)(A)(iv) (defining the initiating price).

[50] *See* pre-Pillar Rule 971.2NY(a)(3). As noted above, per pre-Pillar Rule 971.2NY(a)(2), the CUBE BBO must improve the Complex BBO or Derived BBO, as applicable, by at least one cent ($0.01) regardless of Customer interest.

[51] As noted herein, Complex CUBE Orders may not trade with interest in the leg markets; however, such orders may not trade at prices that disadvantage interest in the leg markets, including displayed Customer interest. *See, e.g.,* Pillar Rule 980NYP(c)(2) (providing that when an ECO is trading with another ECO, ''each component leg of the ECO must trade at a price at or within the Exchange BBO for that series'') and 980NYP(e)(1)(A) (providing that, at a price, interest in the leg markets have first priority to trade with an ECO provided it can trade in full or in a permissible ratio).

[52] *See* Cboe Rule 5.38(e)(5)(B) (regarding permissible range of executions at the conclusion of a C–AIM auction).

[53] *Compare* proposed Rule 971.2NYP(a)(1)(A)(v) (defining the range of permissible executions) *with* pre-Pillar Rule 971.2NY(a)(4) (providing that ''[t]the 'range of permissible executions' of a Complex CUBE Order is all prices equal to or between the initiating price and the same-side CUBE BBO''). As noted *infra,* unlike pre-Pillar Rule 971.2NY, the proposed Rule does not refer to the ''same-side CUBE BBO,'' but instead specifies the CUBE BB or CUBE BO, as applicable.

[54] *Compare* proposed Rule 971.2NYP(a)(1)(A)(v) *with* pre-Pillar Rule 971.2NY(a)(4)(A) (providing relevant part, that the CUBE BBO would not update during the Auction if such ''updated CUBE BBO would cause the Auction to conclude earlier pursuant to paragraph (a)(3) of this Rule').

[55] *See* proposed Rule 971.2NYP(a)(2) (Initiating of Auction). *See also* pre-Pillar Rule 971.2NY(b)(2) (providing that ''[a] Complex CUBE Order that does not have a net debit/credit price that is equal to or better than the same-side CUBE BBO is not eligible to initiate an Auction and will be rejected, along with the Complex Contra Order''). The Exchange notes that pre-Pillar Rule 971.2NY(a)(2) refers to a ''net debit/credit price,'' the Exchange proposes to refer simply to the ''net price.'' *See, e.g.,* Pillar Rule 980NYP(c) (referring to the total ''net price'' of an ECO for ranking and priority purposes).

[56] *See* proposed Rule 971.2NYP(a)(2) (Initiating of Auction). *See also* pre-Pillar Rule 971.2NY(c) (providing that [t]he time at which the Auction is initiated will also be considered the time of execution for the Complex CUBE Order'').

[57] Unlike the pre-Pillar Rule, which states that all options traded on the Exchange are eligible to be ''part of a Complex CUBE Order,'' the proposed rule would state that all such options would be eligible to be ''part of a Complex CUBE Auction.'' *Compare* proposed Rule 971.2NYP(b) *with* pre-Pillar Rule 971.2NY(b). This proposed difference would align with Pillar Rule 971.1NYP(b), which provides that ''[a]ll options traded on the Exchange are eligible to be part of the CUBE Auction.''

[58] *Compare* proposed Rule 971.2NY(b)(1)(A) (providing that the single ''stop price'' is ''the price at which the Initiating Participant guarantees the Complex CUBE Order'') *with* pre-Pillar Rule 971.2NY(b)(1)(A) (same).

CUBE BBO; and that ''[t]he Complex Contra Order may trade with the Complex CUBE Order at the stop price''.[59] The Exchange proposes to streamline the implementation of the stop price requirements. Specifically, the proposed Rule would state definitively that ''[t]he stop price must be equal to the initiating price,'' otherwise both the Complex CUBE Order and the Complex Contra Order would be rejected and no Auction would be initiated.[60] The Exchange believes the proposed Rule, which relies solely on the initiating price as the benchmark for the stop price, would add clarity and transparency to, and would improve the accuracy of, the stop price requirements.[61]

○ Proposed Rule 971.2NYP(b)(1)(B) is substantively identical to Rule 971.2NY(b)(1)(B), with differences specified below. Like the pre-Pillar Rule, the proposed Rule would describe the ''auto-match limit price'' as the best (*i.e.,* most aggressive) price at which the Initiating Participant is willing to trade with the Complex CUBE Order, which price must be executable against the initiating price of the Auction.[62] Also consistent with the pre-Pillar Rule, the proposed Rule would specify that when the Initiating Participant guarantees a Complex CUBE Order with an auto-match limit price, the Complex Contra Order for a Complex CUBE Order to buy (sell) would automatically match the price and size of all RFR Responses that are priced lower (higher) than the initiating price down (up) to the auto-match limit price.[63]

In addition, consistent with the pre-Pillar Complex CUBE rule (although worded differently), the proposed Rule would provide that an auto-match limit price specified for a Complex CUBE Order to buy (sell) that is below (above) the CUBE BB (BO) will be repriced to the CUBE BB (BO).[64] Finally, consistent with the pre-Pillar Rule (although not explicitly stated), the Exchange proposes to state that an auto-match limit price specified for a Complex CUBE Order to buy (sell) that is above (below) the initiating price is not eligible to initiate an Auction and both the Complex CUBE Order and the Complex Contra Order will be rejected.[65] The Exchange believes this proposed change would add clarity, transparency, and internal consistency to Exchange rules.[66]

On Pillar, the Exchange would continue to reject Complex CUBE Orders (together with Complex Contra Orders) under the following two circumstances, each of which is identical to the reasons for rejection of such orders per pre-Pillar Rule 971.2NY (b)(3) and (b)(5), respectively, as described below.

• Proposed Rule 971.2NYP(b)(2) is identical to Rule 971.2NY(b)(3) and would provide that Complex CUBE Orders submitted before the opening of trading would not be eligible to initiate an Auction and would be rejected, along with the Complex Contra Order.

• Proposed Rule 971.2NYP(b)(4) is identical to Rule 971.2NY(b)(5) and would provide that Complex CUBE Orders submitted during a trading halt are not eligible to initiate an Auction and would be rejected, along with the Complex Contra Order.

In addition, the proposed Rule would continue to reject Complex CUBE Orders (together with Complex Contra Orders) under the following circumstance, which differs slightly the from the pre-Pillar rule, but would align the proposed Rule with Pillar Rule 971.1NYP for single-leg CUBE Auctions on Pillar.[67]

• Proposed Rule 971.2NYP(b)(3) would provide that the Exchange would reject Complex CUBE Orders submitted when there is insufficient time in the trading session to conduct an Auction. However, whereas the pre-Pillar rule provides that Complex CUBE Orders are rejected if submitted during ''the final second of the trading session,'' the proposed Rule would provide that Complex CUBE Orders would be rejected if submitted ''when there is insufficient time for an Auction to run the full duration of the Response Time Interval.'' [68] The Exchange believes that the proposed change would better account for the fact that a CUBE Auction may last for as little as 100 milliseconds—well below the permitted maximum of one second as stated in the pre-Pillar Rule.[69]

The Exchange believes that this proposed change, which mirrors the operation of the Response Time Interval for single-leg CUBE Auctions, would add clarity, transparency, and internal consistency to Exchange rules regarding when CUBE Orders may be rejected—particularly to market participants

[59] *See* pre-Pillar Rule 971.2NY(b)(1)(A) (providing that, ''[i]f an Initiating Participant specifies a single stop price, the stop price must be executable against the initiating price of the Auction. The Complex Contra Order may trade with the Complex CUBE Order at the stop price, pursuant to paragraph (c)(4) of this Rule. If the stop price crosses the same-side CUBE BBO, the Complex CUBE Order is not eligible to initiate an Auction and will be rejected along with the Complex Contra Order'').

[60] *See* proposed Rule 971.2NYP(b)(1)(A) (providing that ''[t]he stop price must be equal to the initiating price,'' and that ''[a] stop price specified for a Complex CUBE Order that is not equal to the initiating price is not eligible to initiate an Auction and both the Complex CUBE Order and the Complex Contra Order will be rejected'').

[61] Compare proposed Rule 971.2NYP(b)(1)(A) (relying solely on the initiating price as the benchmark against which the stop price is evaluated) *with* '' Rule 971.2NY(b)(1)(A) (relying solely on the initiating price as the benchmark against which the stop price is evaluated) providing, in relevant part, that ''[t]he Complex Contra Order may trade with the Complex CUBE Order at the stop price'').

[62] *See* pre-Pillar Rule 971.2NY(b)(1)(B) (providing that the ''auto-match limit price'' is the most aggressive price at which the Initiating Participant is willing to trade with the Complex CUBE Order, which must be executable against the initiating price of the Auction). The proposed Rule differs in that it refers to ''best price,'' rather than ''most aggressive price,'' which is a stylistic preference that would add clarity and transparency to Exchange rules.

[63] *See* pre-Pillar Rule 971.2NY(b)(1)(B) (providing that ''[t]he Complex Contra Order may trade with the Complex CUBE Order at prices that are better than or equal to the initiating price until trading at the auto-match limit price, if applicable,'' pursuant to paragraph (c)(4) of the pre-Pillar Rule regarding Order Allocation).

[64] *Compare* proposed Rule 971.2NYP(b)(1)(B) *with* pre-Pillar Rule 971.2NY(b)(1)(B) (providing, in relevant part, that ''[i]f the auto-match limit price crosses the same-side CUBE BBO, the Complex Contra Order will be priced back to lock the same-side CUBE BBO.).The Exchange notes that the proposed Rule provision is substantively the same as the pre-Pillar Rule, however, rather than use the terms ''cross'' and ''lock,'' the proposed Rule specifies whether the Complex CUBE Order is to buy or sell and includes the relevant side of the CUBE BBO, which would add clarity and transparency to Exchange rules.

[65] *See* proposed Rule 971.2NYP(b)(1)(B).

[66] The Exchange notes that this functionality has been implemented for single-leg CUBE Auctions on Pillar. *See, e.g.,* Pillar Rule 971.1NYP(b)(1)(C) (providing that for a single-leg CUBE Auction, ''[a]n auto-match limit price specified for a CUBE Order to buy (sell) that is above (below) the initiating price is not eligible to initiate an Auction and both the CUBE Order and the Contra Order will be rejected'').

[67] The proposed Rule would also align with single-leg CUBE Auction functionality. *See, e.g.,* Pillar Rule 971.1NYP(b)(4) (''CUBE Orders submitted when there is insufficient time for an Auction to run the full duration of the Response Time Interval are not eligible to initiate an Auction and shall be rejected, along with the Contra Order'').

[68] *Compare* proposed Rule 971.2NYP(b)(3) (''Complex CUBE Orders submitted when there is insufficient time for an Auction to run the full duration of the Response Time Interval are not eligible to initiate an Auction and shall be rejected, along with the Complex Contra Order'') *with* pre-Pillar Rule 971.2NY(b)(4) (''Complex CUBE Orders submitted during the final second of the trading session in the component series are not eligible to initiate an Auction and shall be rejected, along with the Complex Contra Order''). The Exchange proposes to remove the superfluous reference to ''in the component series,'' which would streamline the proposed Rule text. *See* proposed Rule 971.2NYP(b)(3).

[69] *See, e.g.,* pre-Pillar Rule 971.2NY(c)(1)(B) (providing in relevant part, that ''[t]he minimum/maximum parameters for the Response Time Interval will be no less than 100 milliseconds and no more than one (1) second''). *See also* proposed Rule 971.2NYP(c)(1)(B) (which provides the same minimum/maximum parameters), as discussed *infra.*

submitting CUBE Orders late in the trading day.

Auction Process: Request for Responses and Response Time Interval

On Pillar, the Exchange proposes to utilize the (same) process set forth in pre-Pillar Rule 971.2NY(c) for announcing a Complex CUBE Auction and soliciting trading interest to potentially interact with the Complex CUBE Order, with modifications and enhancements specified below.

- Proposed Rule 971.2NYP(c) would provide that once an Auction has commenced, the Complex CUBE Order (as well as the Complex Contra Order) may not be cancelled or modified, which text is identical to the latter portion of the last sentence of pr pre-Pillar Rule 971.2NY(c).
- Proposed Rule 971.2NYP(c)(1)(A) is substantively identical to pre-Pillar Rule 971.2NY(c)(1)(A) and would provide that upon receipt of a Complex CUBE Order, the Exchange would send a ''Request for Responses'' or ''RFR'' to all ATP Holders who subscribe to receive RFR messages, which RFR would identify the series, the side and size of the Complex CUBE Order, as well as the initiating price. On Pillar, however, the RFR would also include an AuctionID that would identify each Complex CUBE Auction, which would be a new feature.[70] The Exchange notes that other options exchanges likewise include an AuctionID on the request for responses to the price improvement auction and this proposed change is therefore not new or novel.[71]
- Proposed Rule 971.2NYP(c)(1)(B) is substantively identical to pre-Pillar Rule 971.2NY(c)(1)(B) insofar as it provides that the ''Response Time Interval'' would refer to the time period during which responses to the RFR may be entered, which period would be no less than 100 milliseconds and no more than one (1) second. The proposed rule differs from the pre-Pillar rule, which provides for a Response Time Interval that lasts for ''a random period of time within parameters determined by the Exchange and announced by Trader Update.'' [72] Rather than a random period of time, the Exchange proposes that the Response Time Interval would instead be a set duration of time, which is more deterministic.[73] This proposal to rely on a fixed (rather than random) duration of time for a price improvement auction is identical to single-leg CUBE Auction functionality and consistent with functionality available on another options exchange.[74]

Proposed Rule 971.2NYP(c)(1)(C) is identical to pre-Pillar Rule 971.2NY(c)(1)(C) insofar as it would provide that any ATP Holder may respond to the RFR, provided such response is properly marked specifying the price, size and side of the market (''RFR Response'').[75] The proposed Rule would also provide that, consistent with the pre-Pillar Rule (although stated differently), any RFR Response to a Complex CUBE Order to buy (sell) priced below (above) the CUBE BB (BO) would be repriced to the CUBE BB (BO) and would be eligible to trade in the Auction at such price.[76]

RFR Responses: Complex GTX Orders

On Pillar and consistent with the pre-Pillar rule, the Exchange would accept Complex GTX Orders as RFR Responses and impose the following requirements for such orders to be eligible to trade in the CUBE Auction.

- Proposed Rule 971.2NYP(c)(1)(C)(i) is substantively identical to pre-Pillar Rule 971.2NY(c)(1)(C)(i) and would provide that ATP Holders may respond to RFRs with Complex GTX Orders, which are ECOs, as defined in Pillar Rule 980NYP, and have a time-in-force contingency for the Response Time Interval, and must specify price, size and side of the market.[77] The proposed Rule would also specify that Complex GTX Orders must be on the opposite side of the market as a Complex CUBE Order being auctioned when submitted, which would add clarity and transparency to Exchange rules.[78]
- Proposed Rule 971.2NYP(c)(1)(C)(i)(a) is identical to the first sentence of pre-Pillar Rule 971.2NY(c)(1)(C)(i)(a) and would provide that Complex GTX Orders would not be displayed on the Consolidated Book and would not be disseminated to any participants.
- Proposed Rule 971.2NYP(c)(1)(C)(i)(c) is identical to pre-Pillar Rule 971.2NY(c)(1)(C)(i)(c) and would provide that Complex GTX Orders may be cancelled or modified.

In addition to continuing the foregoing requirements, the Exchange proposes to modify or clarify the operation of Complex GTX Orders on Pillar (as compared to pre-Pillar) as follows.[79]

- The Exchange proposes new functionality on Pillar that would permit senders of Complex GTX Orders the option to include an AuctionID to signify the Complex CUBE Order with which such Complex GTX Order would like to trade.[80] The Exchange believes that this proposed functionality, which is also available for single-leg CUBE Auctions and on other options exchanges, would allow market participants to have more control over their trading interest.[81] For the sake of

[70] *See* proposed Rule 971.2NYP(c)(1)(A).

[71] *See* Cboe Rule 5.38(c)(2) (providing that each ''AIM Auction Notification Message'' will include an ''AuctionID''). *See also* Pillar Rule 971.1NYP(c)(1)(A) (providing for the inclusion of AuctionIDs on RFRs announcing single-leg CUBE Auctions).

[72] *See* pre-Pillar Rule 971.2NY(c)(1)(B). *See* Trader Update, January 27, 2022 (announcing that, beginning February 28, 2022, the randomized timer would have a minimum of 100 milliseconds and a maximum of 105 milliseconds), available at, *https://www.nyse.com/trader-update/history#110000409951*.

[73] *See* proposed Rule 971.2NYP(c)(1)(B).

[74] *See* Pillar Rule 971.1NYP(c)(1)(B) (providing the same requirement that ''[t]he Response Time Interval will last for a set duration within parameters determined by the Exchange and announced by Trader Update.''). *See* Cboe Rule 5.38(c)(3) (providing that the ''C–AIM Auction period'' is a period of time determined by the Exchange, which may be no less than 100 milliseconds and no more than 3 seconds).

[75] The Exchange notes that the proposed Rule includes the non-substantive change to add ''the'' before the word ''price,'' which would add clarity and transparency to Exchange rules.

[76] *Compare* proposed Rule 971.2NYP(c)(1)(C) *with* pre-Pillar Rule 971.2NY(c)(1)(C) (providing, in relevant part, that any RFR Response that crosses the same-side CUBE BBO will be eligible to trade in the Complex CUBE Auction at a price that locks the same-side CUBE BBO). The Exchange notes that the proposed Rule provision is substantively the same as the pre-Pillar Rule, however, rather than use the terms ''cross'' and ''same-side CUBE BBO,'' the proposed Rule specifies whether the Complex CUBE Order is to buy or sell and includes the relevant side of the CUBE BBO, which would add clarity and transparency to Exchange rules.

[77] The Exchange notes that the proposed Rule updates the cross-reference to reflect Pillar Rule 980NYP (from the reference in pre-Pillar Rule 971.2NY(c)(1)(C)(i) to pre-Pillar Rule 980NY).

[78] *See* proposed Rule 971.2NYP(c)(1)(C)(i). As discussed, *infra,* the Exchange would reject a Complex GTX Order that is submitted when there is no contra-side Complex CUBE Order being auctioned. *See* proposed Rule 971.2NYP(c)(1)(C)(i)(d).

[79] Unlike pre-Pillar Rule 971.2NY(c)(1)(C)(i)(b), the proposed Rule will not state that ''Complex GTX Orders with a size greater than the size of the Complex CUBE Order will be capped at the size of the CUBE Order,'' because, consistent with Pillar Rule 964NYP and as discussed below, only non-Customer Complex GTX Orders would be capped for purposes of pro rata allocation, whereas Customer Complex GTX Orders would trade with the CUBE Order based on time. *See* proposed Rule 971.2NYP(c)(4)(B), as discussed *infra*.

[80] *See* proposed Rule 971.2NYP(c)(1)(C)(i) (providing in relevant part that ''Complex GTX Orders may include an AuctionID to respond to a specific Complex CUBE Auction''). Should the Complex GTX Order include an apparently erroneous AuctionID (*e.g.,* a Complex GTX Order to buy includes an AuctionID for a Complex CUBE Order to buy), the Exchange would reject such Complex GTX Order even if there are other Auctions (*e.g.,* on the contra-side with a different AuctionID) with which that Complex GTX Order could have traded.

[81] *See* Pillar Rule 971.1NYP(c)(1)(C)(i) (providing that GTX Orders responding to a single-leg CUBE

clarity and transparency, the proposed Rule would also state that a Complex GTX Order that does not include an AuctionID would respond to the Auction that began closest in time to the submission of the Complex GTX Order.[82]

• The Exchange proposes to describe how Complex GTX Orders will be treated on Pillar consistent with Pillar Rule 964NYP (described in detail below).[83] In short, on Pillar, options trading interest is prioritized and allocated in one of three categories: Priority 1—Market Orders; Priority 2—Display Orders; and Priority 3—Non-Display Orders.[84] The proposed Rule would provide that, although such orders are not disseminated or displayed (as described above), for purposes of trading and allocation with the Complex CUBE Order, Complex GTX Orders would be ranked and prioritized as Priority 2—Display Orders per Pillar Rule 964NYP(e).[85] The Exchange believes that this proposed change, which mirrors the handling of GTX Orders in single-leg CUBE Auctions, would add clarity, transparency, and internal consistency to Exchange rules and would make clear to market participants responding to Complex CUBE Auctions with Complex GTX Orders how such interest will be prioritized on Pillar.[86]

• The Exchange also proposes to modify the operation of Complex GTX Orders on Pillar by restricting the interest with which such orders may trade. Pursuant to the second sentence of pre-Pillar Rule 971.2NY(c)(2), any size of a Complex GTX Order that remains after it executes, if at all, with the Complex CUBE Order may then execute with other ECOs on the same side of the market as the CUBE Order before cancelling.[87] On Pillar, the Exchange proposes that Complex GTX Orders, which are submitted for the purpose of participating in an Auction, would execute solely with the Complex CUBE Order, if at all, and then cancel, which differs from the pre-Pillar Rule and is identical to how the Exchange handles GTX Orders submitted to the single-leg CUBE Auction.[88] Like GTX Orders submitted to the single-CUBE Auction, the Exchange believes that allowing the Complex GTX Order to execute solely with the Complex CUBE Order, if at all, would enable ATP Holders to send targeted, more deterministic, Auction responses (including to interact with specific Auctions by utilizing the optional AuctionID functionality, discussed above).[89] The Exchange notes that ATP Holders would continue to have the option to submit RFR Responses not designated as Complex GTX Orders, which Responses would be eligible to trade with any contra-side interest received during the Auction, with any remaining portion of such Responses being cancelled or processed pursuant to Pillar Rule 964NYP, as applicable.[90]

• The Exchange also proposes to modify the circumstances under which a Complex GTX Order would be rejected. First, the Exchange proposes to reject Complex GTX Orders that are priced higher (lower) than the initiating price of a CUBE Order to buy (sell) or that are submitted when there is no contra-side Complex CUBE Auction being conducted, which is consistent with the handling of GTX Orders submitted to single-leg CUBE Auctions.[91]

In addition, as discussed *infra,* on Pillar, the Exchange would allow more than one Auction in a given complex strategy to occur at once—which simultaneous Auctions could be on both sides of the market.[92] Thus, rather than reject Complex GTX Orders submitted on the same side of a Complex CUBE Order (*e.g.,* per pre-Pillar Rule 971.2NY(c)(1)(c)(i)(d)), the Exchange would instead reject Complex GTX Orders submitted when there is no contra-side Complex CUBE Auction occurring when the Complex GTX Order is submitted.[93] The Exchange believes this proposed change would provide increased opportunities to solicit price-improving auction interest.

Consistent with pre-Pillar Rule 971.2NY, the Exchange proposes to treat as RFR Responses certain unrelated Electronic Complex Orders (or ECOs), as defined in Pillar Rule 980NYP, including ECOs designated to be submitted to the Complex Order Auction (''COA'').[94] Further, like the pre-Pillar rule, the proposed Rule would provide that the Exchange will treat as an RFR Response any ECO that is on the opposite side of the market as a Complex CUBE Order; is not marked GTX; is received during the Response Time Interval or resting in the Consolidated Book when the Auction commences; and is eligible to

Auction may include an AuctionID). *See also* Cboe Rule 5.38(c)(5) (providing that AIM Auction responses may include ''the AuctionID for the AIM Auction to which the User is submitting the response'').

[82] *See* proposed Rule 971.2NYP(c)(1)(C)(i).

[83] *See* discussion of Complex CUBE Order allocation, per Pillar Rule 964NYP, *infra. See also* Pillar Priority Filing (describing the Pillar Priority Rules, which govern priority and allocation for options trading on Pillar).

[84] *See* Pillar Rule 964NYP(e) (providing that ''[a]t each price, all orders and quotes are assigned a priority category and, within each priority category, Customer orders are ranked ahead of non-Customer'' and that ''[i]f, at a price, there are no remaining orders or quotes in a priority category, then same-priced interest in the next priority category has priority.'').

[85] *See* proposed Rule 971.2NYP(c)(1)(C)(i)(a) (''Complex GTX Orders will not be displayed or disseminated to any participants. For purposes of trading and allocation with the CUBE Order, GTX Orders will be ranked and prioritized with same-priced Limit Orders as Priority 2—Display Orders, per Pillar Rule 964NYP(e)'').

[86] *See* Pillar Rule 971.1NYP(c)(1)(C)(i)(a) (describing same functionality for GTX Orders submitted in response to single-leg CUBE Auctions).

[87] *See* pre-Pillar Rule 971.2NY(c)(2) (providing, in relevant part, that ''any RFR Responses (*including Complex GTX Orders*) may trade with Complex Orders on the same side of the market as the Complex CUBE Order in accordance with Rule 980NY, Complex Order Trading'' and that ''any remaining balance of Complex GTX Orders will cancel.'' (emphasis added). *See also* pre-Pillar Rule 971.2NY (c)(3), and (c)(4) (providing that Complex GTX Orders may be eligible to trade with Auction interest (other than the Complex CUBE Order) before cancelling).

[88] *Compare* proposed Rule 971.2NYP(c)(1)(C)(i)(b) (''A Complex GTX Order will execute solely with the Complex CUBE Order, if at all, and then cancel'') *with* Pillar Rule 971.1NYP(c)(1)(C)(i)(c) (providing that, in a single-leg CUBE Auction, ''[a] GTX Order will cancel after trading with the CUBE Order to the extent possible''). *See also* Pillar Rule 980NYP(b)(C) (providing, in relevant part, that any remaining portion of a COA GTX Order that does not trade with the COA Order will be cancelled at the end of the COA).

[89] *See* proposed Rule 971.2NYP(c)(1)(C)(i)(b). *See also* proposed Rule 971.2NYP(c)(1)(C)(i) (which provides for optional AuctionID functionality).

[90] As discussed *infra,* proposed Pillar Rule 971.2NYP(c)(2) would provide, in relevant part, that ''[a]t the conclusion of the Auction, the Complex CUBE Order will execute pursuant to paragraph (c)(4) of this Rule'' and that ''[a]ny remaining quantity of RFR Responses (excluding Complex GTX Orders) after the Auction will be processed in accordance with Rule 964NYP (Order Ranking, Display, and Allocation).''

[91] *See* proposed Rule 971.2NYP(c)(1)(C)(i)(d). *See also* Pillar Rule 971.1NYP(c)(1)(C)(i)(e) (providing for the same handling of GTX Orders in a single-leg CUBE Auction).

[92] *See* proposed Rule 971.2NYP(c) (providing that ''[o]ne or more Complex CUBE Auctions in the same complex strategy may occur at the same time'').

[93] *See* proposed Rule 971.2NYP(c)(1)(C)(i)(d). The Exchange notes that it will reject a Complex GTX Order that includes an AuctionID for a Complex CUBE Order that is on the same side of the market as such Complex GTX Order even if there are contra-side Complex CUBE Auctions (with a different AuctionID) with which that Complex GTX Order could have traded.

[94] *Compare* proposed Rule 971.2NYP(c)(1)(C)(i) *with* pre-Pillar Rule 971.2NY(c)(1)(C)(ii). The Exchange notes that the proposed Rule updates the cross-reference for ECOs to Pillar Rule 980NYP and updates the reference to ''COA Orders'' (from the substantively identical ''COA-eligible orders''), which orders are designated to initiate a COA. *See* Pillar Rule 980NYP(a)(3) (defining COA process) and (a)(3)(A) (defining COA Orders). As discussed *infra,* the Exchange notes that COA Orders are eligible to execute in Complex CUBE Auctions. *See* proposed (Pillar) Rule 980NYP(f) (providing that a COA Order may only initiate a COA on arrival, otherwise it is processed as a (non-COA) ECO per Pillar Rule 980NYP(e).

participate within the range of permissible executions specified for the Auction pursuant to proposed paragraph (a)(1)(A)(v) of this Rule.[95] The proposed Rule would specify that the Electronic Complex Order would also have to be in the same complex strategy as the Complex CUBE Order, which difference does not impact functionality and would add clarity, transparency, and internal consistency to Exchange rules.[96]

Concurrent Complex CUBE Auctions [97]

The Exchange proposes to enhance functionality on Pillar by allowing more than one Complex CUBE Auction in the same complex strategy to run concurrently, which would align with single-leg CUBE Auction functionality per Pillar Rule 971.1NYP.[98] The Exchange proposes that if there are multiple Complex CUBE Auctions in a complex strategy that are running concurrently, such Auctions would conclude sequentially, based on the time each Complex CUBE Auction was initiated, unless an Auction concludes early, per proposed paragraph (c)(3) of this Rule (discussed below).[99] As further proposed, at the time each Complex CUBE Auction concludes, the Complex CUBE Order would be allocated against all eligible RFR Responses available at the time of conclusion.[100] In the event there are multiple Auctions underway that are each terminated early, such Auctions would be processed sequentially based on the time each Complex CUBE Auction was initiated, which processing mirrors handling of concurrent single-leg CUBE Auctions.[101] The Exchange believes that this proposed functionality would allow more Complex CUBE Auctions in the same complex strategy to be conducted, thereby increasing opportunities for price improvement on the Exchange to the benefit of all market participants.

In addition, as discussed below, the proposal to add concurrent auctions would also prevent the early end of an Auction in progress when the Exchange receives a new Complex CUBE Order in the same complex strategy.[102] By eliminating this early end scenario, the Exchange would increase the likelihood that an Auction may run for the full Response Time Interval thus affording more time and opportunity for the arrival of price-improving interest to the benefit of investors. The Exchange notes that allowing more than one price improvement auction at a time in the same complex strategy is not new or novel and is functionality already available on another options exchange.[103]

Conclusion of Auction

As is the case today, on Pillar, a Complex CUBE Auction would conclude at the end of the Response Time Interval, unless there is a trading halt in any of the component series or if the Complex CUBE Auction ends early pursuant to proposed paragraph (c)(3) of this Rule (discussed below).[104] At the conclusion of the Auction, the Complex CUBE Order would execute pursuant to proposed paragraph (c)(4) of this Rule (discussed below).[105] After the conclusion of the Auction, the Exchange proposes that any RFR Responses (excluding Complex GTX Orders) that remain would be processed in accordance with Pillar Rule 964NYP (Order Ranking, Display, and Allocation).[106] The Exchange notes that, as discussed below, it would no longer end an Auction early if, during the Auction, interest arrives that crosses any RFR Response(s), which new functionality allows incoming interest to trade outside of the Auction or to trade with unexecuted RFR Responses (or portions thereof) after the Auction.[107] This proposed Rule would align Complex CUBE Auction functionality with single-leg CUBE Auctions on Pillar, including by relying on Pillar Rule 964NYP for any post-Auction executions.[108]

Early Conclusion of Complex CUBE Auction

On Pillar, the Exchange proposes to streamline and reduce the number of scenarios that would cause a Complex CUBE to end early (*i.e.,* before the end of the Response Time Interval) based on trading interest that arrives during the Auction. Pre-Pillar Rule 971.2NY sets forth six scenarios that would cause an Auction to end early.[109] As proposed, on Pillar, the following scenarios would no longer result in the early end of a CUBE Auction:

- First, because the Exchange proposes to allow concurrent auctions, the Exchange would no longer end a Complex CUBE Auction early based on the arrival of a new Complex CUBE Order.[110]
- Second, as noted above, the Exchange does not propose to end the Auction early upon the receipt of any interest that adjusts the same-side CUBE BBO to cross any RFR Response(s) because the Exchange would allow the

[95] *Compare* proposed Rule 971.2NYP(c)(1)(C)(ii) *with* pre-Pillar Rule 971.2NY(c)(2)(C)(ii). The Exchange notes that the proposed Rule differs from the pre-Pillar Rule in that it includes an updated cross-reference to the permissible range of executions as well as minor wording changes to account for concurrent auction functionality, which difference is immaterial because it does not impact functionality.

[96] *See* proposed Rule 971.2NYP(c)(1)(C)(ii) (Unrelated Electronic Complex Orders) (providing that ''Electronic Complex Orders, as defined in Rule 980NYP (including if designated as COA Orders), on the opposite side of the market in the same complex strategy as the Complex CUBE Order that are not marked GTX, that are received during the Response Time Interval or resting in the Consolidated Book when an Auction commences and that are eligible to participate within the range of permissible executions specified for the Auction pursuant to paragraph (a)(4) of this Rule will be also considered RFR Responses.'').

[97] The Exchange notes that the proposal to allow multiple Complex CUBE Auctions to run concurrently on Pillar is distinct from the functionality that permits a single-leg Auction in an option series to run concurrent with a Complex CUBE Auction for a complex strategy that includes the same series. *See* Commentary .03 to pre-Pillar Rule 971.2NY and proposed Commentary .01 to Rule 971.2NYP (which are substantively identical, as discussed below).

[98] *Compare* proposed Rule 971.2NYP(c) (providing that ''[o]ne or more Complex CUBE Auctions in the same series may occur at the same time.'') *with* pre-Pillar Rule 971.2NY(c) (providing that ''[o]nly one Auction may be conducted at a time in any given series''). *See also* Pillar Rule 971.1NYP(c) (allowing single-leg CUBE Auctions to run concurrently),

[99] *See* proposed Rule 971.2NYP(c). As discussed *infra,* a CUBE Auction may conclude early (*i.e.,* before the end of the Response Time Interval) because of certain trading interest that arrives during the Auction or in the event of a trading halt in the underlying security while the Auction is in progress. *See* proposed Rule 971.2NYP(c)(2), (c)(3).

[100] *See* proposed Rule 971.2NYP(c).

[101] *See id. See* also Pillar Rule 971.1NYP(c) (describing substantively identical sequential processing of concurrent single-leg CUBE Auctions in the same series).

[102] *See* pre-Pillar Rule 971.2NY(c)(3)(A).

[103] *See* Cboe Rule 5.38(c)(1)(A)–(B) (providing that multiple price-improvement auctions in the same complex strategy can run concurrently and will be processed sequentially, including if all such auctions are ended early and providing that if only one such auction ends early it will be allocated when it ends).

[104] *See* proposed Rule 971.2NYP(c)(2).

[105] *See id.*

[106] *Compare* proposed Rule 971.2NYP(c)(2) *with* pre-Pillar Rule 971.2(c)(2) (providing, in relevant part, that ''[a]fter the Complex CUBE Order has been filled, any RFR Responses *(including Complex GTX Orders)* may trade with Complex Orders on the same side of the market as the Complex CUBE Order in accordance with Rule 980NYP, Complex Order Trading. Subsequently, any remaining balance of Complex GTX Orders will cancel.'') (emphasis added).

[107] *See* pre-Pillar Rule 971.2NY(c)(3)(C) (providing for the early end of a pre-Pillar Complex CUBE Auction if, during the Auction, the Exchange receives ''[a]ny interest that adjusts the same-side CUBE BBO to cross any RFR Response(s)'').

[108] *See, e.g.,* Pillar Rule 971.1NYP(c)(2) (providing, in relevant part (and substantively identical to the proposed Rule), that, at the conclusion of a Single-Leg CUBE Auction, ''[t]he residual of RFR Responses (excluding GTX Orders) after the CUBE Auction will be processed in accordance with Rule 964NYP (Order Ranking, Display, and Allocation)'').

[109] *See* pre-Pillar Rule 971.2NY(c)(3)(A)–(F).

[110] *Compare* Rule 971.2NY(c)(3)(A) *with* proposed Rule 971.2NYP(c)(3) (which does not include this scenario as causing the early end of an Auction).

Auction to continue uninterrupted.[111] With this proposal, the incoming interest would immediately trade with any non-GTX RFR Responses or route to an Away Market. This proposed handling would align the proposed Rule with the handling of incoming marketable interest that arrives during a single-leg CUBE Auction per Pillar Rule 971.1NYP.[112] The Exchange believes that, on Pillar, allowing an Auction to continue uninterrupted in the above-referenced circumstances would result in fewer Complex CUBE Auctions ending early and, as such, would provide more opportunities for price improvement on the Exchange to the benefit of all market participants.

In contrast, the following scenarios would continue to result in the early end of a Complex CUBE Auction on Pillar. As proposed, an Auction for a Complex CUBE Order to buy (sell) would (continue to) end early if, during the Response Time Interval, the Exchange receives updates to the CUBE BBO as follows:

- Any same-side interest that adjusts the CUBE BB (BO) to be higher (lower) than the initiating price,[113] which proposed provision is substantively identical to the scenario set forth in pre-Pillar Rule 971.2NY(c)(3)(B); [114] or
- Any opposite-side interest that adjusts the CUBE BO (BB) to be lower (higher) than the initiating price when the CUBE BO (BB) is based on the DBO (DBB) (*i.e.,* leg market interest on the Exchange).[115] This proposed provision is based on pre-Pillar Rule 971.2NY(c)(3)(F), which provides for the early end of an Auction based on updates to the leg markets, but differs in that it relies on the Pillar concept of the DBBO.[116] This early end scenario only applies when the CUBE BBO is based on the DBBO (*i.e.,* the leg markets) and the contra-side leg market updates to cross) [sic] the initiating price, which price sets the boundary for the Auction.[117]
- Because leg market interest has priority at a price, the Complex CUBE Auction must end to allow the (improved) leg market interest to trade. The Exchange notes that the pre-Pillar rule provides for the early end of an Auction if the leg markets update to be better than the stop price or auto-match limit price. On Pillar, the parameters for both the stop price and the auto-match limit price are made in relation to the initiating price (as discussed herein) and therefore the Exchange believes the initiating price is the more appropriate benchmark. In addition, proposed Rule 971.2NYP(c)(3)(A) (discussed above), also relies on the initiating price as the basis for determining if an Auction should end early based on same-side market updates. As such, this proposed update would add clarity, transparency, and internal consistency to Exchange rules.

In addition to being substantively the same as the analogous early end scenarios set forth in pre-Pillar Rule 971.2NY(c)(3)(B) and (F) (with the exception of reliance on the DBBO), the Exchange reiterates its belief that the elimination of the balance of the pre-Pillar early end scenario would result in fewer Complex CUBE Auctions ending early and, as such, would provide more opportunities for price improvement on the Exchange to the benefit of all market participants.

Complex CUBE Order Allocation

The Exchange proposes to modify how a Complex CUBE Order is allocated at the end of the Auction to conform with and incorporate Pillar Rule 964NYP (described below), which proposed handling mirrors the allocation of single-leg CUBE Orders as described in Pillar Rule 971.1NYP(c)(4).[118]

Pre-Pillar Rule 971.2NY(c)(4) describes Complex CUBE Order allocation. Specifically, at the conclusion of the Auction, any RFR Responses (including Complex GTX Orders) [119] that are larger than the Complex CUBE Order will be ''capped at the Complex CUBE Order size for purposes of size pro rata allocation of the Complex CUBE Order per [pre-Pillar] Rule 964NY(b)(3)'' [120] and that, at each price level, displayed Customer orders have first priority to trade with the Complex CUBE Order per pre-Pillar Rule 964NY(c)(2)(A).[121] Further, pre-Pillar Rule 971.2NY(c)(4)(B) provides that, after executing against displayed Customer orders at a price, the Complex CUBE Order will be allocated among the RFR Responses and the Complex Contra Order, which allocation may vary depending on whether the Complex Contra Order guaranteed the Complex CUBE Order using a specified stop price or auto-match limit price.[122]

As noted above, prior to the Exchange's migration to Pillar, Complex CUBE Orders traded in accordance with Rule 964NY—the Exchange's pre-Pillar priority and allocation rule.[123] On Pillar, orders and quotes will be ranked, prioritized, and executed based on Pillar Rule 964NYP, which aligns with the Exchange's pre-Pillar ranking and priority scheme. Pillar Rule 964NYP(e) provides that ''[a]t each price, all orders and quotes are assigned a priority category and, within each priority category, Customer orders are ranked

[111] *Compare* Rule 971.2NY(c)(3)(C) *with* proposed Rule 971.2NYP(c)(3) (which does not include this scenario as causing the early end of an Auction).

[112] *See* Pillar Single-Leg CUBE Filing, 88 FR, at 467545.

[113] *See* proposed Rule 971.2NYP(c)(3)(A).

[114] *See* Rule 971.2NY(c)(3)(B) and (c)(3)(D) (providing for the early end of an Auction upon the receipt of any interest that adjusts the same-side CUBE BBO ''to be better than the initiating price'' or ''to cross the single stop price specified by the Initiating Participant,'' respectively). The Exchange notes that the proposed Rule provision is substantively the same as the pre-Pillar Rule, however, rather than use the terms ''same-side CUBE BBO'' and ''better than,'' the proposed Rule specifies whether the Complex CUBE Order is to buy or sell, whether the incoming interest is ''same-side interest,'' and includes the relevant side of the CUBE BBO updated, which would add clarity and transparency to Exchange rules.

[115] *See* proposed Rule 971.2NYP(c)(3)(B). The Exchange notes that as stated in paragraph (a)(1)(A)(ii) of the proposed Rule, when the CUBE BBO is based on the DBBO, such CUBE BBO may be adjusted to account for the presence of displayed Customer interest. *See* proposed Rule 971.2NYP(a)(1)(A)(ii). The Exchange notes that rather than use the terms ''same-side CUBE BBO'' and ''cross,'' the proposed Rule specifies whether the Complex CUBE Order is to buy or sell, whether the incoming interest is ''opposite-side interest'' and includes the relevant side of the CUBE BBO that was updated, which would add clarity and transparency to Exchange rules.

[116] *See* pre-Pillar Rule 971.2NY(c)(3)(F) (providing for the early end of an Auction upon the receipt of ''[i]nterest in the leg market that causes the contra-side CUBE BBO to be better than the stop price or auto-match limit price.'').

[117] For example, if there is an Auction in progress for a CUBE order to buy (sell), the Auction will end early if, during the Auction, the Exchange received contra-side interest to sell (buy) that updates the DBO (DBB) to be lower (higher) than the initiating price (*i.e.,* the incoming interest crosses the initiating price).

[118] As noted herein, Rule 964NY does not apply to trading on Pillar. *Compare* proposed Rule 971.2NYP(c)(4) *with* Pillar Rule 971.1NYP(c)(4) (setting forth priority and allocation rules, as dictated by Pillar Rule 964NYP).

[119] *See* pre-Pillar Rule 971.2NY(c)(1)(C)(i)(b) (''Complex GTX Orders with a size greater than the size of the CUBE Order will be capped at the size of the CUBE Order''). On, Pillar, however, only non-Customer Complex GTX Orders would be capped at the Complex CUBE Order size for purposes of size pro rata allocation whereas Customer Complex GTX Orders would trade with the CUBE Order based on time. *See, e.g.,* proposed Rule 971.2NYP(c)(4)(B), as discussed, *infra.*

[120] Pre-Pillar Rule 964NY(b)(3) describes the Exchange's pro rata allocation formula, which same formula is described in Pillar Rule 964NYP(i).

[121] Pre-Pillar Rule 964NY(c)(2)(A) provides an ''inbound order will first be matched against all available displayed Customer interest in the Consolidated Book.''

[122] *See* pre-Pillar Rule 971.2NY(c)(4)(B)(i)–(ii).

[123] *See* (pre-Pillar) Rule 964NY(b), (c) (providing that, at a price, displayed interest is ranked ahead of non-displayed interest with priority afforded to Customer interest over displayed non-Customer interest; followed by same-priced non-displayed interest, which non-displayed interest is ranked solely in time priority with no preference given to non-displayed Customer interest). *See also* Pillar Priority Filing (describing priority and allocation per Rule 964NYP).

ahead of non-Customer'' and that ''[i]f, at a price, there are no remaining orders or quotes in a priority category, then same-priced interest in the next priority category has priority.'' [124] The three categories are: Priority 1—Market Orders, Priority 2—Display Orders and Priority 3—Non-Display Orders (the ''Pillar Priority categories'').[125] Thus, on Pillar, Customer orders in each priority category will have first priority to trade ahead of same-priced non-Customer interest in that priority category until all interest in that Pillar Priority category is exhausted—and, if there is more than one Customer in that category at the same price, the Customer first in time has priority.[126] Furthermore, as is the case today, the Exchange would allocate same-priced, non-Customer interest that is displayed in the Consolidated Book on a size pro rata basis.[127] Finally, on Pillar (and unlike (pre-Pillar) Rule 964NY), at a price, non-displayed Customer orders will trade in time priority before same-priced non-displayed, non-Customer interest, which also trades in time.[128]

The Exchange proposes that Complex CUBE Auctions on Pillar would follow the priority, ranking, and allocation model set forth in the above-described Pillar Rule 964NYP. As proposed, Rule 971.2NYP(c)(4)(A) would provide that, at each price, Complex CUBE Orders would be allocated consistent with Pillar Rule 964NYP as follows.

- First priority to execute with the Complex CUBE Order is given to Customer RFR Responses, followed by same-priced non-Customer RFR Responses ranked Priority 1—Market Orders (each, ''Priority 1 Interest'');
- Next priority to execute with the Complex CUBE Order is given to Customer RFR Responses ranked Priority 2—Display Orders (''Priority 2 Customer Interest''), followed by same-priced non-Customer RFR Responses ranked Priority 2—Display Orders; and
- Third priority to execute with the Complex CUBE Order is afforded to Customer RFR Responses followed by same-priced non-Customer RFR Responses ranked Priority 3—Non-Display Orders.[129]

The proposal to align Complex CUBE Order allocation with Pillar Rule 964NYP(j) would mirror the allocation methodology for single-leg CUBE Orders on Pillar and would add clarity, transparency, and internal consistency to Exchange rules.[130] In addition, as discussed further below, before the Complex Contra Order receives its guaranteed allocation, the Complex CUBE Order would first trade, at a price, with all Priority 1 Interest and with Priority 2 Customer Interest to ensure the priority of Customer interest is consistent with the Exchange's Customer priority model.

Proposed Rule 971.2NYP(c)(4)(B) (Allocation) would provide that RFR Responses would be allocated based on time or per size pro rata allocation. Specifically, RFR Responses of Customers ranked Priority 1 and 2, as well as all RFR Responses ranked Priority 3, would trade with the Complex CUBE Order based on time per Pillar Rule 964NYP(j).[131] And, RFR Responses of non-Customers ranked Priority 1 and Priority 2 would be capped at the Complex CUBE Order size for purposes of size pro rata allocation per Pillar Rule 964NYP(i).[132] The Exchange notes that this proposed allocation methodology is consistent with the pre-Pillar Auction allocation methodology, except that on Pillar, Customer RFR Responses would be allocated based on time (and no longer on a size pro rata basis), which handling would align the allocation of Complex CUBE Orders with the Exchange's Customer priority model.[133]

Proposed Rule 971.2NYP(c)(4)(C) (Surrender Quantity) would be new functionality and would provide that an Initiating Participant that guarantees a Complex CUBE Order with a stop price (as described in proposed Rule 971.2NYP(b)(1)(A)) has the option of designating a ''Surrender Quantity'' and receiving some percentage of the Complex CUBE Order less than the 40% participant guarantee (as described in proposed Rule 971.2NYP(c)(4)(D)(i)(b)). As proposed, if the Initiating Participant elects a Surrender Quantity, and there is sufficient contra-side interest equal to or better than the stop price to satisfy the Complex CUBE Order, the Complex CUBE Order executes against the Complex Contra Order up to the amount of its Surrender Quantity.[134] Absent sufficient size of contra-side interest equal to or better than the stop price, the Complex Contra Order would trade with the balance of the Complex CUBE Order at the stop price regardless of the Complex Contra Order's Surrender Quantity, which functionality is consistent with pre-Pillar Complex Contra Order behavior.[135] Finally, as proposed, Surrender Quantity information is not disseminated to other market participants and may not be modified after the Complex Contra Order is submitted. The Exchange notes that the concept of ''Surrender Quantity'' is available in single-leg CUBE Auctions and on other options exchanges and is therefore not new or novel.[136] The Exchange believes that providing Initiating Participants the option to designate a Surrender Quantity in Complex CUBE Auctions on Pillar would enhance functionality by affording flexibility and discretion to the Complex Contra Order while providing additional opportunities for RFR Responses to interact with the Complex CUBE Order. In addition, the proposed enhancement to add the option of electing a Surrender Quantity would be a competitive change and would make the Exchange a more attractive venue to send (auction-related) order flow.

Proposed Rule 971.2NYP(c)(4)(D) (RFR Responses and Complex Contra Order Allocation) would provide that, at a price, RFR Responses are allocated in accordance with proposed paragraphs (c)(4)(A) (Customer Priority) and (c)(4)(B) (Time or Size Pro Rata Allocation) and that any allocation to

[124] *See* Pillar Rule 964NYP(e) (Priority Categories).

[125] *See* Pillar Rule 964NYP(e)(1)–(3) (setting forth the Pillar Priority categories).

[126] *See* Pillar Rule 964NYP(e), (j).

[127] *See* Pillar Rule 964NYP(i) (Size Pro Rata Allocation) (setting forth Pillar pro rata allocation formula). The Exchange notes that the Pillar pro rata allocation formula is substantively identical to that set forth in pre-Pillar Rule 964NY(b)(3) (Size Pro Rata Allocation).

[128] *See* Pillar Rule 964NYP(j)(6)–(7).

[129] *See* proposed Rule 971.2NYP(c)(4)(A) (Customer Priority).

[130] *See* Pillar Rule 971.1NYP(c)(4) (describing the Allocation of CUBE Orders, which is the same as the allocation proposed for Complex CUBE Orders).

[131] *See* proposed Rule 971.2NYP(c)(4)(B)(i) (Time).

[132] *See* proposed Rule 971.2NYP(c)(4)(B)(ii) (Size Pro Rata). The size pro rata formula set forth in Pillar Rule 964NYP(i) is substantively identical to the size pro rata formula set forth in Rule 964NY(b)(3). *See* Pillar Priority Filing.

[133] *See, e.g.,* Pillar Rule 964NYP(j). Because the proposed Rule details at the outset of the order allocation section how both Customer and non-Customer RFR Responses would be processed (*i.e.,* in time or on a pro rata allocation basis), the Exchange believes it is not necessary to repeat this (now superfluous) information throughout proposed Rule 971.2NYP(c)(4) (Allocation of Complex CUBE Orders). *See, e.g.,* pre-Pillar Rule 971.2NY(c)(4)(B)(i)–(ii) (repeating in each rule provision how RFR Responses would be allocated).

[134] *See* proposed Rule 971.2NYP(c)(4)(C).

[135] *Compare* proposed Rule 971.2NYP(c)(4)(D)(i) *with* pre-Pillar Rule 971.2NY(c)(4)(B)(i) (allocation to Contra Order that guaranteed a CUBE Order by a single stop price).

[136] *See* Pillar Rule 971.1NYP(c)(4)(C) (Surrender Quantity option in single-leg CUBE Auctions). *See also* Cboe Rule 5.38(e)(5) (allowing initiating participants that guarantee a paired order with a single-price submission, to elect to have ''last priority'' to trade against the agency order and will only trade with the agency order after such order has traded with all other contra-side interest at prices equal to or better than the guaranteed stop price; and further providing that ''last priority'' information is not available to other market participants and, once submitted, may not be modified).

the Complex Contra Order would depend upon the method by which the Complex CUBE Order was guaranteed.[137]

• *Stop Price.*[138] Consistent with the pre-Pillar Complex CUBE rule, a Complex CUBE Order to buy (sell), that is guaranteed by a stop price would execute first with RFR Responses at each price level priced below (above) the stop price within the range of permissible executions, beginning with the lowest (highest) price.[139]

○ Next, any remaining contracts of the Complex CUBE Order would execute at the stop price, first with all Priority 1 Interest, followed by Priority 2 Customer Interest, which as noted above is consistent with new Pillar Rule 964NYP(j).[140]

○ Then, at the stop price, the Complex Contra Order would receive an allocation of the greater of 40% of the original Complex CUBE Order size or one contract (or the greater of 50% of the original Complex CUBE Order size or one contract if there is only one RFR Response), or the Surrender Quantity, if one has been specified. Then, any remaining Complex CUBE Order contracts would be allocated first among remaining RFR Responses at the stop price. If all RFR Responses are filled, any remaining Complex CUBE Order contracts would be allocated to the Contra Order. This proposed handling is consistent with the pre-Pillar Complex CUBE rule except that it includes reference to the new option of designating a ''Surrender Quantity.'' [141]

○ Finally, identical to pre-Pillar functionality, if there are no RFR Responses, the Complex CUBE Order would execute against the Complex Contra Order at the stop price.[142]

• *Auto-Match Limit.*[143] Consistent with the pre-Pillar Complex CUBE rule, a Complex CUBE Order to buy (sell), that is guaranteed by auto-match limit would execute first with RFR Responses at each price level priced below (above) the auto-match limit price within the range of permissible executions, beginning with the lowest (highest) price.[144]

○ Next, consistent with pre-Pillar Complex CUBE functionality, the Complex CUBE Order would be allocated to RFR Responses at a price equal to the price of the Complex Contra Order's auto-match limit price, and if volume remains, to prices higher (lower) than the auto-match limit price; at each price level equal to or higher (lower) than the auto-match limit price, the Complex Contra Order would be allocated contracts equal to the aggregate size of all other RFR Responses within the range of permissible executions, until a price point is reached where the balance of the CUBE Order can be fully executed (the ''clean-up price''). Further, like pre-Pillar functionality, if the Complex Contra Order meets its allocation guarantee at a price below (above) the clean-up price, it would cease matching RFR Responses.[145]

○ As proposed, at the clean-up price, any remaining contracts of the Complex CUBE Order will execute against all Priority 1 Interest, followed by Priority 2 Customer Interest, which as noted above is consistent with proposed new Rule 964NYP(j).[146]

○ Next, and consistent with the pre-Pillar Complex CUBE rule, the Complex Contra Order would receive additional contracts required to achieve an allocation of the greater of 40% of the original Complex CUBE Order size or one contract (or the greater of 50% of the original Complex CUBE Order size or one contract if there is only one RFR Response); if there are other RFR Responses at the clean-up price, the remaining Complex CUBE Order contracts, would be allocated first to RFR Responses; and any remaining CUBE Order contracts would be allocated to the Complex Contra Order at the initiating price.[147]

○ Finally, consistent with the pre-Pillar Complex CUBE rule, if there are no RFR Responses, the Complex CUBE Order would execute against the Complex Contra Order at the initiating price.[148]

Commentary to Proposed Rule 971.2NYP for CUBE Auctions on Pillar

The Exchange proposes to adopt Commentaries to the proposed Rule, which are substantively identical to pre-Pillar Commentaries .01 through .03 and .04 to Rule 971.2NY, with differences discussed below (each a ''proposed Commentary'' or a ''pre-Pillar Commentary'').[149]

Proposed Commentary .01 is substantively identical to pre-Pillar Commentary .03 and would describe ''Concurrent Single-Leg and Complex CUBE Auctions involving the same option series.'' [150] As proposed, like the pre-Pillar Complex CUBE rule, the proposed Rule would allow the Exchange to conduct simultaneous single-leg CUBE Auctions for a given series at the same time as a Complex CUBE Auction for an ECO that includes the same option series.[151] Also, like the pre-Pillar Complex CUBE rule, to the extent there are concurrent CUBE Auctions for a specific option series, each CUBE Auction will be processed sequentially based on the time each

[137] *See* Pillar Rule 971.1NYP(c)(4)(D) (describing substantively identical allocation of RFR Responses and Contra Order in single-leg CUBE Auctions). Consistent with proposed Rule 971.2NYP(c)(1)(C)(i)(c), and in contrast to pre-Pillar Rule 971.2NY(c)(2), the proposed Complex CUBE Order allocation section would not reference Complex GTX Orders, as noted herein, Complex GTX Orders would execute solely with the Complex CUBE Order or cancel.

[138] *See* proposed Rule 971.2NYP(b)(1)(A) (describing stop price requirements).

[139] *Compare* proposed Rule 971.2NYP(c)(4)(D)(i)(a) *with* pre-Pillar Rule 971.2NY(c)(4)(B)(i)(a).

[140] *Compare* proposed Rule 971.2NYP(c)(4)(D)(i)(b) *with* pre-Pillar Rule 971.2NY(c)(4)(B)(i)(b).

[141] *See id.*

[142] *Compare* proposed Rule 971.2NYP(c)(4)(D)(i)(c) *with* pre-Pillar Rule 971.2NY(c)(4)(B)(i)(c).

[143] *See* proposed Rule 971.2NYP(b)(1)(B) (describing auto-match limit price requirements).

[144] *See* proposed Rule 971.2NYP(c)(4)(D)(ii)(a). *See also* pre-Pillar Rule 971.2NY(c)(4)(B)(ii)(a).

[145] *See* proposed Rule 971.2NYP(c)(4)(D)(ii)(b). *See also* pre-Pillar Rule 971.2NY(c)(4)(B)(ii)(b).

[146] *See* proposed Rule 971.2NYP(c)(4)(D)(ii)(c). *See also* pre-Pillar Rule 971.2NY(c)(4)(B)(ii)(b).

[147] *Compare* proposed Rule 971.2NYP(c)(4)(D)(ii)(c) *with* pre-Pillar Rule 971.2NY(c)(4)(B)(ii)(b).

[148] *Compare* proposed Rule 971.2NYP(c)(4)(D)(ii)(d) *with* pre-Pillar Rule 971.2NY(c)(4)(B)(ii)(c). The proposed Rule differs in that it would not specify that ''[a] single RFR Response will not be allocated a number of contracts that is greater than its size,'' as is set forth in (pre-Pillar) Rule 971.2NY(c)(4)(C), because this statement merely re-iterates standard processing on the Exchange. As such, the Exchange believes the inclusion of this statement in the proposed Rule is unnecessary and may lead to potential confusion.

[149] Because the beginning of the proposed Rule includes a ''Definitions'' section (*i.e.,* proposed Rule (a)(1)(D))) [sic] for terms applicable to Complex CUBE Auctions on Pillar, the terms described in pre-Pillar Commentary .02 to Rule 971.2NY are no longer applicable and, as discussed infra, the Exchange proposes to omit pre-Pillar Commentary .02 from the proposed Rule. The omission of this Commentary does not alter the functionality of the proposed Rule and the Exchange therefore believes its omission is immaterial.

[150] The Exchange proposes to relocate the text from pre-Pillar Commentary .03 to proposed Commentary .01, which re-numbering would align the proposed Rule with Commentary .01 to Pillar Rule 971.1NYP—single-leg CUBE Auctions on Pillar). As a result of this reorganization, the Exchange proposes to hold Commentary .03 to proposed Rule 971.2NYP as ''Reserved''.

[151] *See* proposed Rule 971.2NYP, Commentary .01. *See also* Pillar Rule 971.1NYP, Commentary .01 (same). As discussed, *supra,* proposed Commentary .01 (and pre-Pillar Commentary .03) describes functionality that is distinct from the proposal to allow multiple Complex CUBE Auctions to run concurrently on Pillar. *See, e.g.,* proposed Rule 971.2NYP(c). To emphasize this distinction, the proposed Rule states that ''[t]o the extent there are concurrent *single-leg and Complex* CUBE Auctions for a specific option series, each CUBE Auction will be processed sequentially based on the time each CUBE Auction commenced'' (emphasis added). *See* proposed Rule 971.2NYP, Commentary .01.

CUBE Auction commenced.[152] Finally, substantively identical to pre-Pillar Complex CUBE functionality, at the time each CUBE Auction concludes, including when it concludes early, it will be processed pursuant to Pillar Rule 971.1NYP(c)(4) (for Single-Leg CUBE) or proposed Rule 971.2NYP(c)(4) (for Complex CUBE) as applicable.[153]

Proposed Commentary .02(a)–(d) is substantively identical to pre-Pillar Commentary .01(a)–(d) [154] and would provide that the following conduct will be considered conduct inconsistent with just and equitable principles of trade:

- An ATP Holder entering RFR Responses to an Auction for which the ATP Holder is the Initiating Participant;
- Engaging in a pattern and practice of trading or quoting activity for the purpose of causing an Auction to conclude before the end of the Response Time Interval;
- An Initiating Participant that breaks up an agency order into separate Complex CUBE Orders for the purpose of gaining a higher allocation percentage than the Initiating Participant would have otherwise received in accordance with the allocation procedures contained in paragraph (c)(4) of this Rule; [155] and
- Engaging in a pattern and practice of sending multiple RFR Responses at the same price that in the aggregate exceed the size of the Complex CUBE Order.

Proposed Commentary .04 describes functionality for AON Complex CUBE Orders that is substantively identical to pre-Pillar Commentary .04 and would provide that, except as provided in proposed Commentary .04, an AON Complex CUBE auction will be subject to the provisions of proposed Rule 971.2NYP.[156]

- Proposed Commentary .04 (like pre-Pillar Commentary .04) would provide that an Initiating Participant may be designated a Complex CUBE Order of at least 500 contracts as AON (an ''AON Complex CUBE Order'') and unlike non-AON Complex CUBE Orders, such AON CUBE Orders may only be guaranteed by a specified stop price.[157]
  - Proposed Commentary .04 would differ from pre-Pillar Commentary .04 to make clear that the (new) option for certain Initiating Participants to designate a Surrender Quantity would not be available for Complex Contra Orders to an AON Complex CUBE Order. This proposed text is not included in pre-Pillar Commentary .04 because the option to designate a Surrender Quantity is not available today and is an enhanced feature that would only be available for certain non-AON Complex CUBE Auctions on Pillar.[158] The Exchange believes that allowing Initiating Participants to designate a Surrender Quantity to an AON Complex CUBE Order would undermine the purpose of the ''all or none'' aspect of this order type.

Proposed Commentary .04(a)–(d), is substantively identical to pre-Pillar Commentary .04(a)–(d), with differences noted herein, and would provide the following.[159]

- An AON Complex CUBE Order to buy (sell) will execute in full with the Complex Contra Order at the single stop price even if there is non-Customer interest priced lower (higher) than the stop price that, either on its own or when aggregated with non-Customer RFR Responses at the stop price or better, are insufficient to satisfy the full quantity of the AON Complex CUBE Order;
- The Complex Contra Order will not receive any allocation and will be cancelled if (i) RFR Responses to sell (buy) at prices lower (higher) than the stop price can satisfy the full quantity of the AON Complex CUBE Order or (ii) there is Customer interest to sell (buy) at the stop price or better that on its own, or when aggregated with RFR Responses to sell (buy) at the stop price or prices lower (higher) than the stop price, can satisfy the full quantity of the AON Complex CUBE Order. In either case, the RFR Responses will be allocated as provided for in paragraphs (c)(4)(A) and (c)(4)(B) of this proposed Rule, as applicable;
- The AON Complex CUBE Order to buy (sell) and Complex Contra Order will both be cancelled if there is Customer interest to sell (buy) at the stop price or better and such interest, either on its own or when aggregated with RFR Responses to sell (buy) at the stop price or at prices lower (higher) than the stop price, is insufficient to satisfy the full quantity of the AON Complex CUBE Order; and
- Prior to entering an agency order on behalf of a Customer into the Complex CUBE Auction as an AON Complex CUBE Order, Initiating Participants must deliver to the Customer a written notification informing the Customer that such order may be executed using the Complex CUBE Auction. Such written notification must disclose the terms and conditions contained in this Commentary .04 and must be in a form approved by the Exchange.[160]

Rule 900.2NY: Definitions of Customer and Professional Customer

Rule 900.2NY defines a ''Customer'' as ''an individual or organization that is not a Broker/Dealer'' [161] and defines a ''Professional Customer'' as ''an individual or organization that (i) is not a Broker/Dealer in securities, and (ii) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s).'' [162] Included in the definition of Professional Customer is a list of Exchange rules for purposes of

[152] *See id.* The Exchange proposes to make a clarifying change that specifies that ''[t]o the extent there are concurrent *single-leg and Complex* CUBE Auctions for a specific option series, each CUBE Auction will be processed sequentially based on the time each CUBE Auction commenced,'' which change would improve transparency and internal consistency of Exchange rules. *See* proposed Rule 971.2NYP, Commentary .01 (emphasis added).

[153] *See id.* The Exchange notes that the internal cross-reference in the proposed Commentary has been updated to reflect the allocation section in the proposed Rule (*i.e.,* change reference to paragraph (c)(5) of Rule 971.1NY to paragraph (c)(4) of Pillar Rule 971.1NYP and update cite to proposed Rule to include ''P'' modifier), which changes are not material because they do not impact functionality.

[154] The Exchange proposes to relocate pre-Pillar Commentary .01 to proposed Commentary .02 to align with Commentary .02 to Pillar Rule 971.1NYP—single-leg CUBE Auctions on Pillar. In this regard, the Exchange proposes to hold Commentary .03 of the proposed Rule as ''Reserved.''

[155] The Exchange notes that the internal cross-reference in the Commentary .02 has been updated to reflect the allocation section in the proposed Rule (*i.e.,* change reference to paragraph (c)(5) of pre-Pillar Rule 971.2NY to paragraph (c)(4) of the proposed Rule), which change is not material because it does not impact functionality.

[156] The Exchange proposes the non-substantive change to re-locate to the beginning of the proposed Rule text that appears at the bottom of the pre-Pillar Rule.

[157] The Exchange proposes the non-substantive change to use the active voice in proposed Commentary .04. *See* proposed Commentary .04 (providing, in relevant part, that ''[a]n Initiating Participant may designate a Complex CUBE Order that has at least 500 contracts on the smallest leg as AON . . . .'').

[158] *See* proposed Rule 971.2NYP, Commentary .04 (providing, in relevant part that ''a Complex Contra Order that guarantees an AON CUBE Order is not eligible to designate a Surrender Quantity of its guaranteed participation''). *See, e.g.,* proposed Rule 971.2NYP(c)(4)(C) (describing the proposed option of designating a Surrender Quantity for non-AON Complex CUBE Orders that are guaranteed by a stop price).

[159] The Exchange notes that it has made the non-substantive change to specify that the AON Complex CUBE Order is ''to buy (sell)'' and to replace certain references to ''better'' with ''lower (higher)'' and reference to ''contra-side'' with ''sell (buy)'' to more clearly reflect the handling of AON Complex CUBE Orders based on the side of the market to which such order is submitted, which would add clarity, transparency, and internal consistency to the Exchange rules.

[160] *See* proposed Rule 971.2NYP, Commentary .04.

[161] *See* Rule 900.2NY (defining a Customer, including that ''when not capitalized, 'customer' refers to any individual or organization whose order is being represented, including a Broker/Dealer.''),

[162] *See* Rule 900.2NY (defining a Professional Customer).

which Professional Customers are treated in the same manner as Broker/Dealers (or non-Customers) (referred to herein as the ''Professional Customer carve out''), including pre-Pillar Rule 971.2NY for pre-Pillar Complex CUBE Auctions.[163] Accordingly, Professional Customers are treated as Broker/Dealers (or non-Customers) for purposes of the pre-Pillar Complex CUBE Auction. The Exchange notes that at least one other options exchange likewise treats Professional Customer interest as Broker/Dealer (non-Customer) interest for purposes of their price improvement auction.[164]

As described herein the proposed Rule includes certain modifications and enhancements to the Complex CUBE Auction, but the core functionality is substantively identical to the pre-Pillar Complex CUBE functionality. Accordingly, the Exchange believes it would be consistent with the Act to amend Rule 900.2NY to include Rule 971.2NYP in the list of Exchange rules for purposes of which Professional Customers are treated as Broker/Dealers (or non-Customers).[165] This proposed handling would result in consistent treatment of Complex CUBE Orders on Pillar with the handling that existed pre-Pillar, which adds clarity, transparency, and internal consistency to Exchange rules.[166]

Rule 935NY: Order Exposure Requirements

Rule 935NY requires, among other things, that a User's agency orders be exposed for at least one (1) second before such orders may be executed against the User's principal orders, unless such agency order is afforded an exemption. Current Rule 935NY (iv) exempts from its one-second order exposure requirements orders submitted to the CUBE Auction, pursuant to pre-Pillar Rule 971.2NY (Complex Electronic Cross Transactions). The Exchange proposes to amend Rule 935NY to add a cross-reference to proposed Rule 971.2NYP, which would extend the exemption from the order exposure requirements to all Pillar Complex CUBE Orders.[167] As noted herein Complex CUBE Auctions on Pillar include certain enhancements to the pre-Pillar Auctions, but the core functionality remains the same.

Accordingly, the Exchange believes that it would be consistent with the Act to exempt orders submitted to Complex CUBE Auctions on Pillar from the one-second order exposure requirement. This proposed handling would result in consistent treatment of Complex CUBE Orders that were submitted pursuant to pre-Pillar Rule 971.2NY with Complex CUBE Orders submitted on Pillar pursuant to the proposed Rule.[168]

Like the pre-Pillar Complex CUBE Auction, the proposed Rule would provide ATP Holders a minimum of 100 milliseconds to respond to Complex CUBE Auctions, which should promote timely executions, while ensuring adequate exposure of the Complex CUBE Order seeking price improvement.[169] Further, consistent with Rule 935NY, Commentary .01, the ATP Holders that submit Complex CUBE Orders would do so only when there is a genuine intention to execute a bona fide transaction.[170] Moreover, as with the pre-Pillar Complex CUBE Auction, any User on the Exchange can respond to a Complex CUBE on Pillar.[171]

Pillar Rule 980NYP: Electronic Complex Order Trading

Pillar Rule 980NYP describes how Electronic Complex Orders (''ECOs'') will trade on the Exchange.[172] The Exchange proposes to modify Pillar Rule 980NYP to reflect the proposed Complex CUBE Orders and the impact of such orders on the Complex Order Auction (or COA).

First, the Exchange proposes to modify Pillar Rule 980NYP(b) (Types of ECOs) to include Complex CUBE Orders in the list of potential ECOs available for trading on the Exchange, which addition would add clarity, transparency, and internal consistency to Exchange rules.[173]

Next, the Exchange proposes to modify Pillar Rule 980NYP(f) regarding the execution of ECOs during a COA.[174] Procedurally, the COA process is similar to the Complex CUBE Auction insofar as the Exchange sends out a Request for Responses (RFR) once a COA Order satisfies the requirements to initiate a COA, the COA lasts for a specified duration (*i.e.,* the Response Time Interval), unless it ends early, and when the COA concludes, the COA Order executes with the best-priced ECOs received during the COA, next with the leg markets, and any remaining balance is ranked in the Consolidated Book.[175] Unlike a Complex CUBE Order, the COA Order is not a paired order and is not guaranteed an execution and unlike the Complex CUBE Auction which can run concurrent auctions in the same complex strategy, only one COA may be conducted at a time.[176]

The Exchange proposes to modify Pillar Rule 980NYP(f) to specify that a

[163] Specifically, Rule 900.2NY provides that ''[a] Professional Customer will be treated in the same manner as a Broker/Dealer (or non-Customer) in securities for the purposes of'' certain Exchange rules, including but not limited to, pre-Pillar Rule 971.2NY (Complex Electronic Cross Transactions). *See id.* (defining Professional Customer).

[164] *See* Cboe Rule 5.38(e) (providing that ''Priority Customer'' interest executes first with the Agency Order submitted to the price improvement auction, followed by non-Priority Customer interest).

[165] *See* proposed Rule 900.2NY (providing in relevant part, that for purposes of Rule 971.2NYP (Complex Electronic Cross Transactions), ''[a] Professional Customer will be treated in the same manner as a Broker/Dealer (or non-Customer) in securities'').

[166] To update and improve the accuracy of Rule 900.2NY, the Exchange proposes to remove reference to pre-Pillar Rules 971.1NY and 971.2NY because these rules are not operative on Pillar, which change would add clarity, transparency, and internal consistency to Exchange rules. *See* proposed Rule 900.2NY (removing from Professional Customer definition reference to Rules 971.1NY and 971.2NY).

[167] *See* proposed Rule 935NY(iii) (excluding from the order exposure requirement agency orders submitted to ''the Customer Best Execution Auction ('CUBE Auction') pursuant to Rules 971.1NYP or *971.2NYP.*'') (emphasis added).

[168] To update and improve the accuracy of Rule 935NY, the Exchange proposes to remove reference to pre-Pillar Rules 971.1NY and 971.2NY because these rules are not operative on Pillar, which change would add clarity, transparency, and internal consistency to Exchange rules. *See* proposed Rule 935NY (removing reference to Rules 971.1NY and 971.2NY from order exposure carve out).

[169] *See* proposed Rule 971.2NYP(c)(1)(B) (regarding a Response Time Interval of no less than 100 milliseconds).

[170] *See* Rule 935NY, Commentary .01 (''Rule 935NY prevents a User from executing agency orders to increase its economic gain from trading against the order without first giving other trading interest on the Exchange an opportunity to either trade with the agency order or to trade at the execution price when the User was already bidding or offering on the book'').

[171] *Compare* Rule 971.2NY(c)(1)(C) (providing that ''[a]ny ATP Holder may respond to the RFR, provided such response is properly marked specifying price, size and side of the market ('RFR Response'))'' *with* proposed Rule 971.2NYP(c)(1)(C) (same).

[172] *See generally* Rule 980NYP (Electronic Complex Order Trading). Unless otherwise specified, all capitalized terms used herein have the same meaning as is set forth in Rule 980NYP.

[173] *See* proposed Rule 980NYP(b)(1) (providing that ''ECOs may be entered as Limit Orders, Limit Orders designated as Complex Only Orders, *Complex CUBE Orders,* Complex QCCs, or as Complex Customer Cross Orders'') (emphasis added).

[174] *See* Pillar Rule 980NYP(f)(providing that ''[a] COA Order received when a complex strategy is open for trading and that satisfies the requirements of paragraph (1) [*Initiation of a COA*] below will initiate a COA only on arrival after trading with eligible interest per paragraph (2)(A) [*Pricing of a COA*] below''). A COA Order will be rejected if entered during a pre-open state or if entered during Core Trading Hours with a time in-force of FOK or GTX. Only one COA may be conducted at a time in a complex strategy).

[175] *See* Pillar Rule 980NYP(a)(3)(A)–(D) (defining terms related to the COA process); (f)(3)(A)–(D) (setting forth the circumstances under which a COA will conclude before the end of the Response Time Interval); and (f)(4)(A)–(C) (providing the allocation of COA Orders. *See* Rule 900.2NY (defining Consolidated Book as ''the Exchange's electronic book of orders and quotes'').

[176] *See* Pillar Rule 980NYP(f).

COA Order received during a Complex CUBE Auction in the same complex strategy will not initiate a COA.[177] As is the case with COA Orders that do not initiate a COA on arrival, such COA Order would be processed in the same manner as a (non-COA) ECO per Pillar Rule 980NYP(e).[178] The Exchange will only allow one auction process for ECOs at a given time. As such, a COA received during a Complex CUBE Auction would not initiate a COA on arrival and, as with any COA Order that does not initiate a COA on arrival, the Exchange would process the COA Order as a (non-COA) ECO. The Exchange notes that allowing only one auction of complex orders is consistent with functionality on at least one other options exchange and is therefore not new or novel.[179] Consistent with the foregoing, the Exchange also proposes to modify Pillar Rule 980NYP(f)(3)(E), to specify that a COA in progress will end early upon receipt of a Complex CUBE Order in the same complex strategy as the COA.[180] This proposed change would be consistent the with the Exchange's early termination of a COA in progress upon the receipt of a Complex QCC Order in the same complex strategy as the COA Order. The Exchange's rationale for this proposed change is the same as its rationale for ending a COA upon the arrival of a Complex QCC Order in the same complex strategy: to ''allow the Exchange to incorporate executions from the COA, or any remaining balance of the COA Order, to conduct the requisite price validations'' for the Complex CUBE Order.[181] As noted above, until a COA concludes, the Consolidated Book is not updated to reflect any COA Order executions or any balance of the COA Order ranking in the Book. Thus, to allow the later-arriving Complex CUBE Order to be evaluated based on the most up-to-date Book, the Exchange proposes to end a COA upon the arrival of a Complex CUBE Order in the same complex strategy.[182] As such, the Exchange believes that its proposal would help preserve—and maintain investor's confidence in—the integrity of the Exchange's local market.[183]

* * * * *

Implementation

Because of the technology changes associated with this proposed rule change, the Exchange will announce the implementation date by Trader Update, which, subject to effectiveness of this proposed rule change, is anticipated to be in the second quarter of 2024.

2. Statutory Basis

For the reasons set forth above, the Exchange believes the proposed rule change is consistent with Section 6(b) of the Act in general, and furthers the objectives of Section 6(b)(5) of the Act, in that it is designed to promote just and equitable principles of trade,remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change would remove impediments to and perfect the mechanisms of a free and open market and a national market system and would protect investors and the public interest because the enhancement to Complex CUBE Auctions on Pillar would continue to encourage ATP Holders to compete vigorously to provide the opportunity for price improvement for Complex CUBE Orders in a competitive auction process, which may lead to enhanced liquidity and tighter markets.

To the extent that the proposed Rule contains provisions that are identical (or substantively identical) to pre-Pillar Rule 971.2NY, the Exchange believes the proposed Rule would remove impediments to and perfect the mechanisms of a free and open market and a national market system and would protect investors and the public interest because the proposed Rule includes streamlined, and in some cases reorganized, descriptions of approved pre-Pillar Auction functionality in a manner that adds clarity, transparency, and internal consistency to Exchange rules.[184]

Further, to the extent that the proposed Rule includes modifications and enhancements to the Auction, the Exchange believes that the proposed Rule would remove impediments to and perfect the mechanisms of a free and open market and a national market system and would protect investors and the public interest because the proposed modifications and enhancements to Auctions on Pillar would continue to encourage ATP Holders to compete vigorously to provide the opportunity for price improvement for Complex CUBE Orders in a competitive auction process, which may lead to enhanced liquidity and tighter markets. In addition, and as described herein, the proposed modifications and enhancements would align Complex CUBE Auction functionality with single-leg CUBE Auction functionality on Pillar, which would add internal consistency to Exchange rules and may encourage market participants to utilize the enhanced Complex CUBE Auction functionality.[185] Moreover, and as discussed herein, the proposed modifications and enhancements are already available on at least one other options exchange (including the proposed pricing parameters as discussed herein and below) and are therefore competitive.[186]

[177] *See* proposed Pillar Rule 980NYP(f) (providing in relevant part that ''[o]nly one COA may be conducted at a time in a complex strategy *and a COA Order received during a Complex CUBE Auction in the same complex strategy will not initiate a COA*'') (emphasis added).

[178] *See* Pillar Rule 980NYP(f)(1) (''A COA Order that does not satisfy these pricing parameters will not initiate a COA and, unless cancelled, will be ranked in the Consolidated Book and processed as an ECO pursuant to paragraph (e) above'' regarding the ''Execution of ECOs During Core Trading Hours'').

[179] *See* MIAX Options User Manual, MIAX Complex Order Price Improvement Mechanism (MIAX cPRIME, Auction Eligibility), at p. 34, *available here: https://www.miaxglobal.com/sites/default/files/2022-09/MIAX_Options_User_Manual_04042022_0.pdf* (providing, in relevant part, that ''[o]nly one complex auction whether a cPRIME or a Standard Complex auction may be in process for any given Strategy at a time'' and that MIAX will reject ''a cPRIME order in a Strategy that is already in a cPRIME or Standard Complex auction''). Like the Complex CUBE Auction, MIAX's cPRIME is an electronic price improvement mechanism for paired orders; and, like the COA, MIAX's Standard Complex auction is a price improvement auction for orders that are not guaranteed an execution. As noted herein, and unlike MIAX, the Exchange permits concurrent Complex CUBE Auctions in the same complex strategies.

[180] *See* proposed Rule 980NYP(f)(3)(E). *See* Securities Exchange Act Release No. 99354 (January 17, 2024), 89 FR 4358, 4359 (January 23, 2024) (SR–NYSEAMER–2024–03) (adopting, on an immediately effective basis, Pillar Rule 980NYP(f)(3)(E) which specifies that a COA in progress ends early upon receipt of a Complex QCC Order in the same complex strategy).

[181] *See id.,* 89 FR, at 4359.

[182] *See id.* (providing the same rationale for ending a COA early upon the receipt of a Complex QCC in the same complex strategy as the COA Order).

[183] *See id.*

[184] *See, e.g.,* proposed Rule 971.2NYP(b)(1)(A)–(B) (describing stop price and auto-match limit price); (b)(2)–(4) (regarding eligibility of Complex CUBE Orders submitted to the Auction); (c)(1) (regarding RFRs and RFR Responses) and (c)(2) (regarding conclusion of Complex CUBE Auction).

[185] *See, e.g.,* Pillar Rule 971.1NYP (c)(permitting concurrent Auctions); (c)(1)(A) (providing that each RFR include an AuctionID); (c)(1)(B) (providing for a minimum of 100 milliseconds fixed duration of the Response Time Interval); (c)(1)(C)(i) (regarding handling of GTX Orders and optional AuctionID feature); (c)(4)(A) and (B) (incorporating Pillar Rule 964NYP for the priority and allocation of CUBE Orders); and (c)(4)(C) (regarding the optional Surrender Quantity feature).

[186] *See, e.g.,* Cboe Rule 5.38(c)(1) (permitting concurrent auctions in the same strategy); (c)(2) (providing that each C–AIM Auction notification message include an AuctionID) (c)(3) (providing for a minimum of 100 milliseconds fixed duration of C–AIM Auction period); (c)(5) (regarding optional ''AuctionID'' for auction responses); (e)(5) (regarding optional ''last priority'' (*i.e.,* Surrender Quantity) feature); and (e)(5)(B) (describing range of permissible executions in C–AIM and requiring that auction responses price improve Priority Customer interest).

In particular, the proposed rule change to modify the pricing requirements for initiating and participating in Complex CUBE Auctions, including updating the CUBE BBO definition to incorporate the Pillar concept of DBBO, would remove impediments to and perfect the mechanisms of a free and open market and a national market system and would protect investors and the public interest because it would add internal consistency to Exchange rules and streamline Pillar Auction functionality making it easier for market participants to navigate and comprehend.[187]

The Exchange believes that the modified requirements for Complex CUBE Auctions, including the requisite (one penny) price improvement to the proposed CUBE BBO in the presence of displayed Customer interest, would remove impediments to and perfect the mechanisms of a free and open market and a national market system and would protect investors and the public interest because the proposed change would incorporate and align with Pillar Rules 964NYP and 980NYP and would allow the Exchange to better compete for complex auction order flow with a competing options exchange.[188]

Further, the proposed CUBE BBO, which requires price improvement over the best-priced interest if such interest represents displayed Customer interest on the Exchange would continue to protect the priority of such interest. The Exchange believes that making price improvement contingent on Customer interest, which is consistent with pricing requirements on Cboe for its price improvement auction for complex trading interest, may increase Complex CUBE Orders directed to the Exchange, while maintaining the Exchange's Customer-centric priority scheme.[189] The proposed CUBE BBO would protect investors and the public interest by assuring that Complex CUBE Orders comply with the existing priority and allocation rules applicable to the processing and execution of Complex Orders per Pillar Rule 980NYP. In particular, the proposed CUBE BBO would continue to protect same-priced, displayed Customer interest and would ensure that Complex CUBE Orders do not trade ahead of such displayed Customer interest, whether in the leg markets or as Customer Complex Orders. In addition, using the proposed CUBE BBO would ensure that the proposed Rule aligns with the Exchange's priority and allocation rules, per Pillar Rules 964NYP and 980NYP, and that interest in the leg markets, including displayed Customer interest, continues to be protected.

Similarly, the proposed modification to the ''initiating price,'' which incorporates the DBBO, would remove impediments to and perfect the mechanisms of a free and open market and a national market system and would protect investors and the public interest because, consistent with pre-Pillar functionality, it would ensure that the price of the Complex CUBE Order respects the priority of the leg markets, including when they contain displayed Customer interest.

The Exchange believes that the proposal to reject Complex CUBE Orders that are submitted when there is not enough time for a Complex CUBE Auction to run the full duration of the Response Time Interval would remove impediments to and perfect the mechanisms of a free and open market and a national market system and would protect investors and the public interest because it would make clear that Complex CUBE Orders that cannot be exposed to solicit price-improving interest for the full Response Time Interval would not be accepted by the Exchange. Moreover, the proposal to modify the Response Time Interval to be a set duration as opposed to a random duration would align with the operation of the single-leg CUBE auction as well as with other options exchanges that include this feature.[190]

The proposed rule change to enhance the Auction process on Pillar by allowing concurrent auctions, adding the associated ''AuctionID'' feature, and permitting Initiating Participants to designate a Surrender Quantity would, as discussed below, remove impediments to and perfect the mechanisms of a free and open market and a national market system for several reasons. First, the proposed changes would not only allow more Complex CUBE Auctions to occur on the Exchange (because of concurrent Auctions) but would also allow more targeted participation in Complex CUBE Auctions with the new AuctionID feature available for Complex GTX Orders. Market participants that respond to Auctions with Complex GTX Orders would be able to direct their trading interest to a specific Auction thus increasing determinism. That said, and as noted herein, the AuctionID functionality would be optional and a Complex GTX Order sent without an AuctionID would respond to the Auction that began closest in time to the submission of the Complex GTX Order. The Exchange notes that these proposed modifications and enhancements are substantively identical to existing Pillar functionality for single-leg CUBE Auctions and are also available on another options exchange.[191]

The proposal to permit concurrent auctions in the same complex strategies for Complex CUBE Orders would benefit investors because it would allow more Complex CUBE Auctions to run the full duration of the Response Time Interval, thus affording more time and opportunity for the arrival of price-improving interest. The Exchange believes the proposal to allow concurrent Auctions should promote and foster competition and provide more options contracts with the opportunity for price improvement—including because receipt of a new Complex CUBE Order would no longer cause the Auction in progress to end early, which should benefit all market participants. Further, and as noted herein the Exchange permits the conduct of concurrent single-leg CUBE Auctions, per Pillar Rule 971.1NYP(c), and therefore this proposal would add internal consistency to Exchange rules. In addition, the proposed change is consistent with functionality offered on at least one competing options exchange.[192] In addition, this proposed change may lead to an increase in Exchange volume and should allow the Exchange to better compete against other markets that already permit overlapping price improvement auctions for complex orders. Moreover, because at least one other options exchange permits concurrent auctions in price improvement auctions for complex orders, this proposal is not

[187] *See, e.g.,* proposed Rule 971.2NYP(a)(1)(A) (defining the key terms for the proposed Rule, including incorporating the concept of the DBBO per Pillar Rule 980NYP).

[188] *See* Cboe Rule 5.38(b)(1) (requiring that the ''Initiating Order'' (akin to Complex CUBE Order) must be guaranteed by the ''Agency Order'' (akin to Complex Contra Order) at a price that improves by at least one MPV the best-priced interest on the complex order book or in the leg markets when such interest represents a ''Priority Customer''); (e)(5)(B) (describing range of permissible executions in C–AIM and requiring that auction responses price improve Priority Customer interest). *See, e.g.,* proposed Rule 971.2NYP(a)(1)(A) (proposed definitions, including incorporating the concept of the DBBO per Pillar Rule 980NYP).

[189] *See* Cboe Rule 5.38(b)(1) and (e)(5)(B) (regarding required price improvement in the presence of Customer interest). *See supra* note 47 (regarding the Exchange's supposition that Cboe's C–AIM Rule requires price improvement of Priority Customer interest that is displayed).

[190] *See* Pillar Rule 971.1NYP(c)(1)(B). *See also* Cboe Rule 5.38(c)(3) (citing to the minimum auction interval of 100 milliseconds in place on Cboe).

[191] *See* Pillar Rule 971.1NYP(c)(1)(A). *See also* Cboe Rule 5.38(c)(2) (regarding ''AuctionID'' feature).

[192] *See* Cboe Rule 5.38(c)(1) (providing for ''Concurrent C–AIM Auctions in Same Complex Strategies'').

new or novel functionality and would be a competitive change that may make the Exchange a more attractive venue for auction-related order flow.

The proposed changes to streamline early end scenarios for Complex CUBE Auctions would remove impediments to and perfect the mechanisms of a free and open market and a national market system and would protect investors and the public interest because it would increase the opportunity for each Complex CUBE Auction to run the full length of the (fixed duration) Response Time Interval, which should increase opportunities for price improvement. In addition, this proposed change should promote and foster competition and provide more options contracts with the opportunity for price improvement, which should benefit all market participants.

The proposal to provide the option of designating a Surrender Quantity would remove impediments to and perfect the mechanisms of a free and open market because it would afford more discretion and flexibility to the Complex Contra Order and may result in increased Complex CUBE Auction volume on the Exchange. Moreover, this proposed enhancement would align with the single-leg CUBE Auction which likewise allows the Initiating Participant to designate a Surrender Quantity and would allow the Exchange to compete on more equal footing with another options exchange that offers this feature in their price improvement auctions.[193]

The proposed rule changes to modify the handling and operation of Complex GTX Orders on Pillar (*e.g.,* that such orders will execute solely with the Complex CUBE Order, if at all, and then cancel) and to clarify that Complex GTX Orders, although not displayed or disseminated, are ranked and prioritized with same-priced Limit Orders as Priority 2—Display Orders on Pillar (consistent with Pillar Rule 964NYP) would remove impediments to and perfect the mechanisms of a free and open market and a national market system and would protect investors and the public interest because such changes would make clear to market participants responding to an Auction with a Complex GTX Order how such interest would be prioritized and handled on Pillar, thus adding clarity, transparency, and internal consistency to Exchange rules. This proposed change would also align with the handling of GTX Orders in single-leg CUBE Auctions.[194]

The proposed rule change would remove impediments to and perfect the mechanisms of a free and open market and a national market system and would protect investors and the public interest because the proposed Complex CUBE Order allocation is consistent with the pre-Pillar Complex CUBE rule except that it is modified to align with Pillar Rule 964NYP (as discussed in detail herein), which sets forth a priority model on Pillar that is consistent with the Exchange's Customer-centric allocation model and affords Customers priority within each Pillar Priority category. In addition, this alignment of Complex CUBE Order functionality with Pillar Rule 964NYP would add clarity, transparency, and internal consistency to Exchange rules to the benefit of investors. This proposed change would also align the allocation of Complex CUBE Orders with the handling of CUBE Orders in single-leg CUBE Auctions, per Pillar Rule 971.1NYP(c)(4)(A).

The Exchange believes the proposed rule change is not unfairly discriminatory because the proposed handling of Complex CUBE Auctions on Pillar would be the same for similarly-situated ATP Holders. As was the case for pre-Pillar Auctions, all ATP Holders would continue to have an equal opportunity to receive the broadcast and respond with their best prices during the auction. The proposal to continue to afford Customer interest first priority within each Pillar Priority category is consistent with the Exchange's Customer-centric trading model and would benefit investors by attracting more (Customer) order flow to the Exchange which would result in increased liquidity.

Overall, the Exchange believes this proposal may lead to an increase in Exchange volume and should allow the Exchange to better compete against another options market that already offers the enhanced functionality proposed herein.[195] As is the case for single-leg CUBE Auctions on Pillar, the Exchange believes that its proposal would allow the Exchange to better compete for auction order flow, while providing an opportunity for price improvement on Complex CUBE Orders of any size.[196] In addition, the proposed functionality should promote and foster competition and provide more options contracts with the opportunity for price improvement, which should benefit market participants.

Conforming Changes to Rule 900.2NY

The proposed change to the definition of Professional Customer to make clear that Professional Customers are treated as Broker/Dealers (or non-Customers) for purposes of the Complex CUBE Auction on Pillar, per proposed Rule 971.2NYP would remove impediments to and perfect the mechanism of a free and open market and a national market system and would protect investors and the public interest because such changes would ensure consistent handling of Professional Customer interest in the Complex CUBE Auction prior to and after the Exchange's migration to Pillar. The proposed change would align Exchange rules with the rules of at least one other options exchange that likewise differentiates the treatment of Professional Customer interest from Customer interest for purposes of price improvement auctions for paired orders, where Customers (but not Professional Customers) are afforded first priority to trade in the auction.[197] Further, the proposal to remove reference to the pre-Pillar Rules 971.1NY and 971.2NY because these rules are not operative on Pillar would benefit investors because it would improve the accuracy of, and add clarity, transparency, and internal consistency to, Exchange rules making them easier to navigate and understand.

Conforming Changes to Rule 935NY

The Exchange believes that adding a cross-reference to proposed Rule 971.2NYP and thus extending the exemption from the one-second order exposure requirement set forth in Rule 935NY to include the Complex CUBE Auctions on Pillar would remove impediments to and perfect the mechanism of a free and open market and a national market system. As noted herein, the proposed Complex CUBE Auctions on Pillar would offer features that are substantively identical to the pre-Pillar Complex CUBE Auction. Accordingly, the Exchange believes that it would promote just and equitable principles of trade to exempt from the

[193] *See* Pillar Rule 971.1NYP(c)(4)(C). *See also* Cboe Rule 5.38(e)(5) (regarding ''last priority'' feature).

[194] *See* Pillar Rule 971.1NYP(c)(1)(C)(i). The proposed handling of Complex GTX Orders is also consistent with the handling of COA GTX Orders submitted to a COA, per Pillar Rule 980NYP.

[195] *See generally* Cboe Rule 5.38 (offering, in its C–AIM, similar enhanced features and requiring the same pricing parameters and price improvement over ''Priority Customers'' as are proposed herein).

[196] *See generally* Pillar Rule 971.1NYP (regarding single-leg CUBE Auctions on Pillar). *See* discussions, *supra* (detailing features of single-leg CUBE Auctions on Pillar that mirror the enhancements proposed herein).

[197] *See* Cboe Rule 5.38(e) (providing that ''Priority Customer'' interest executes first with the Agency Order submitted to the price improvement auction, followed by non-Priority Customer interest).

one-second order exposure requirement Complex CUBE Orders submitted on Pillar, per proposed Rule 971.2NYP. Like the pre-Pillar CUBE Auction, the proposed Complex CUBE provides ATP Holders a minimum of 100 milliseconds to respond to Complex CUBE Orders, which should promote timely executions, while ensuring adequate exposure of such orders.[198] Further, consistent with Rule 935NY, Commentary .01, the ATP Holders submitting CUBE Orders—to the existing CUBE or to Pillar CUBE—would do so only when there is a genuine intention to execute a bona fide transaction.[199] Finally, the proposal to remove reference to pre-Pillar Rules 971.1NY and 971.2NY because these rules are not operative on Pillar, add clarity, transparency, and internal consistency to Exchange rules.

Conforming Changes to Rule 980NYP

The proposed change to Pillar Rule 980NYP(b)(1) to include Complex CUBE Orders in the list of potential ECOs would remove impediments to and perfect the mechanism of a free and open market and a national market system because it would add clarity, transparency, and internal consistency to Exchange rules. The proposed change to Pillar Rule 980NYP(f) to specify that a COA Order received during a Complex CUBE Auction in the same complex strategy would not initiate a COA and that a COA in progress would end early upon the receipt of a Complex CUBE Order in the same complex strategy would remove impediments to and perfect the mechanism of a free and open market and a national market system because it would allow the Exchange to conduct only one auction process of ECOs at a time, which handling is consistent with functionality on at least one other options exchange.[200] Similarly, the proposal to end a COA in progress early upon the receipt of a Complex CUBE Order would promote internal consistency a COA in progress will end early upon receipt of a Complex QCC Order in the same complex strategy per Pillar Rule 980NYP(f)(3)(E).[201]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule changes would support that intermarket competition by allowing the Exchange to offer additional functionality to its ATP Holders, thereby potentially attracting additional order flow to the Exchange. The Exchange does not believe that the proposed rule changes would impact intra-market competition as the proposed rule changes would be applicable to all similarly-situated ATP Holders and reflects the Exchange's pre-Pillar priority model. As noted herein, the proposed enhancements would align the proposed Rule with the operation of the single-leg CUBE Auction (per Pillar Rule 971.1NYP), which may encourage ATP Holders to utilize both auction mechanisms thus attracting additional liquidity to the Exchange.

The Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues who offer similar functionality. The Exchange believes this proposed rule change would promote fair competition among the options exchanges and establish more uniform functionality across the various price improvement auctions offered by other options exchanges. As noted herein, several of the proposed enhancements to the Auction—*i.e.,* concurrent auctions, inclusion of an AuctionID on Request for Responses and the option to include an AuctionID on Complex GTX Orders, a fixed duration during which auction responses are submitted, and the ability to designate an optional Surrender Quantity—are offered on at least one other options exchange (*e.g.,* Cboe) and the addition of these features would make the Exchange a more competitive venue for price improvement auctions. As discussed herein, the proposed changes to the CUBE BBO definition, which incorporate Pillar concepts (including regarding priority and the DBBO), are designed to enhance the Exchange's ability to compete with Cboe for complex order auction flow. To the extent that the proposed functionality leads to an increase in Exchange volume, this increase should allow the Exchange to better compete against other options markets that already offer similar price improvement mechanisms and for this reason the proposal does not create an undue burden on intermarket competition. By contrast, not having the proposed functionality places the Exchange at a competitive disadvantage vis-à-vis other options exchanges that offer similar price improvement mechanisms.

Similarly, the proposal to treat Professional Customer interest as Broker/Dealer (non-Customer) interest for purposes of the proposed Rule would not impose any undue burden on intramarket or intermarket competition as use of the Complex CUBE Auction is optional. For those market participants that choose to utilize CUBE Auctions on Pillar, the proposed definition applies equally to all similarly-situated investors. In addition, all investors that opt to use the Complex CUBE Auction would be subject to the same (amended) definition—which is consistent with the definition that applied to pre-Pillar Rule 971.2NY—and would also align the Exchange with at least one other options exchange that likewise affords priority in price improvement auctions to ''Priority Customers'' but not to Professional Customers.[202]

The Exchange does not believe that its proposed rule change will impose any burden on intra-market competition because any User on the Exchange may utilize the Complex CUBE Auction, as described in the proposed Rule, and all orders submitted to the Auction would be treated in the same manner for purposes of Rule 935NY (*i.e.,* such orders would be exempt from the one-second order exposure requirement).

In addition, the proposed change to include Complex CUBE Orders among the list of available Complex Orders set forth in Pillar Rule 980NYP(b)(1) would not impose an undue burden on competition but would instead add clarity, transparency, and internal consistency to Exchange rules. Furthermore, the proposal to modify Pillar Rule 980NYP(f) to disallow a COA at the same time there is a Complex CUBE Auction in progress (or end a COA early upon receipt of a Complex CUBE Auction) likewise would not impose any burden on inter-market competition that is not necessary or appropriate in furtherance of the

[198] *See* proposed Rule 971.2NYP(c)(1)(B) (regarding a Response Time Interval of no less than 100 milliseconds).

[199] *See* Rule 935NY, Commentary .01 (''Rule 935NY prevents a User from executing agency orders to increase its economic gain from trading against the order without first giving other trading interest on the Exchange an opportunity to either trade with the agency order or to trade at the execution price when the User was already bidding or offering on the book'').

[200] *See* MIAX Options User Manual, *supra* note 179 (stating that, on MIAX, ''[o]nly one complex auction whether a cPRIME or a Standard Complex auction may be in process for any given Strategy at a time'' and that MIAX will reject ''a cPRIME order in a Strategy that is already in a cPRIME or Standard Complex auction'').

[201] *See* Pillar Rule 980NYP; *see also* note 179 [sic], *supra* (regarding the Exchange's adoption, on an immediately effective basis, new Pillar Rule 980NYP(f)(3)(E), which specifies that a COA in progress ends early upon receipt of a Complex QCC Order in the same complex strategy).

[202] *See* Cboe Rules 5.38(e)–(f) (regarding the handling of Priority Customer interest for purposes of priority and allocation in Cboe's C–AIM Auction and for inclusion on customer crossing orders).

purposes of the Act. First, this proposed change would enable the Exchange to compete on more equal footing with at least one other options exchange that likewise prevents complex trading interest from being subject to simultaneous auctions.[203] Furthermore, options exchanges are free to adopt (if they have not already done so) electronic crossing mechanisms with price improvement auctions that similarly prevent multiple complex auction mechanisms to occur in the same strategy at the same time.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Pursuant to Section 19(b)(3)(A) of the Act [204] and Rule 19b–4(f)(6) [205] thereunder, the Exchange has designated this proposal as one that effects a change that: (i) does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; and (iii) by its terms, does not become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest.[206]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

[203] *See supra* note 179 (citing to MIAX Options User Manual, which prohibits more than one complex auction at a time—whether in the same mechanism (*i.e.,* cPRIME) or in different auction mechanisms (*i.e.,* cPRIME versus MIAX's ''Standard Complex auction'').

[204] 15 U.S.C. 78s(b)(3)(A).

[205] 17 CFR 240.19b–4(f)(6).

[206] In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSEAMER–2024–24 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEAMER–2024–24. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSEAMER–2024–24 and should be submitted on or before May 22, 2024.

[207] 17 CFR 200.30–3(a)(12).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[207]

Sherry R. Haywood,

Assistant Secretary.

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change for Amendments to Rule 7.35 and Rule 7.35B

April 25, 2024.

On March 1, 2024, New York Stock Exchange LLC (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend Rule 7.35 and Rule 7.35B. The proposed rule change was published for comment in the **Federal Register** on March 18, 2024.[3] The Commission has received no comment letters on the proposed rule change.

Section 19(b)(2) of the Act [4] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding, or as to which the self-regulatory organization consents, the Commission will either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is May 2, 2024. The Commission is extending this 45-day time period.

The Commission finds it appropriate to designate a longer period within which to take action on the proposed rule change, so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[5] designates June 16, 2024, as the date by

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 99719 (Mar. 12, 2024), 89 FR 19370 (Mar. 18, 2024) (SR–NYSE–2024–13).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100029; File No. SR–NYSEARCA–2024–05]

Self-Regulatory Organizations; NYSE Arca, Inc.; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To List and Trade Shares of the COtwo Advisors Physical European Carbon Allowance Trust Under NYSE Arca Rule 8.201–E (Commodity-Based Trust Shares)

April 25, 2024.

I. Introduction

On January 10, 2024, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'' or ''Exchange Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares (''Shares'') of the COtwo Advisors Physical European Carbon Allowance Trust under NYSE Arca Rule 8.201–E. The proposed rule change was published for comment in the **Federal Register** on January 26, 2024.[3]

On March 4, 2024, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] The Commission has not received any comments on the proposed rule change. The Commission is publishing this order to institute proceedings pursuant to Section 19(b)(2)(B) of the Act[6] to determine whether to disapprove the proposed rule change.

II. Description of the Proposed Rule Change[7]

The Exchange proposes to list and trade Shares of the COtwo Advisors Physical European Carbon Allowance Trust (''Trust'')[8] under NYSE Arca Rule 8.201–E, which governs the listing and trading of Commodity-Based Trust Shares[9] on the Exchange. The sponsor of the Trust is COtwo Advisors LLC, a Delaware limited liability company (''Sponsor'').

Description of the Operation of the Trust

According to the Exchange, the investment objective of the Trust will be for the Shares to reflect the performance of the price of EU Carbon Emission Allowances for stationary installations (''EUAs''), less the Trust's expenses.[10] The Trust intends to achieve its objective by investing all of its assets in EUAs on a non-discretionary basis (*i.e.,* without regard to whether the value of EUAs is rising or falling over any particular period).[11] The Trust will not hold any assets other than EUAs and, possibly, a very limited amount of cash to pay Trust expenses.[12]

The Trust will not invest in futures, options, options on futures, or swap contracts.[13] The Trust will not hold or trade in commodity futures contracts, ''commodity interests,'' or any other instruments regulated by the Commodity Exchange Act.[14] The Trust's cash custodian may hold cash proceeds from EUA sales to pay Trust expenses. All EUAs will be held in the Union Registry (defined below).[15]

The Trust will value its Shares daily based on the value of EUAs as reflected by the EUA End of Day Index value, as published by the European Energy Exchange AG (''EEX'').[16] The administrator of the Trust will determine the net asset value (''NAV'') of the Trust once each Exchange trading day, which will be released after the end of the Core Trading Session, which is typically 4 p.m. New York time[17] When the Trust sells or redeems its Shares, it will do so in ''in-kind'' transactions with authorized participants in blocks of 50,000 Shares.[18]

EUAs and the EUA Markets

According to the Exchange, the European Union Emissions Trading System (''EU ETS'') is a ''cap and trade'' system that caps the total volume of greenhouse gas emissions from installations and aircraft operators.[19] The EU ETS is administered by the EU Commission, which issues a predefined amount of EUAs through auctions or free allocation.[20] An EUA represents the right to emit one metric ton of carbon

[4] 15 U.S.C. 78s(b)(2).

[5] *See* Securities Exchange Act Release No. 99668, 89 FR 16808 (March 8, 2024). The Commission designated April 25, 2024, as the date by which the Commission shall approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change.

[6] 15 U.S.C. 78s(b)(2)(B).

[7] Additional information regarding the Trust and the Shares can be found in the Notice, *supra* note 3.

[8] On May 12, 2023, the Trust filed with the Commission a registration statement on Form S–1 (File No. 333–271910) (''Registration Statement'') under the Securities Act of 1933. The Exchange represents that the Registration Statement is not yet effective, and the Shares will not trade on the Exchange until such time that the Registration Statement is effective. The Exchange further represents that the Trust will not be registered as an investment company under the Investment Company Act of 1940, as amended, and that the Trust is not a commodity pool for purposes of the Commodity Exchange Act, as amended. *See* Notice, *supra* note 3, 89 FR at 5274.

[9] The Exchange represents that the Shares will satisfy the requirements of NYSE Arca Rule 8.201–E and thereby qualify for listing on the Exchange, and that the Trust relies on the exemption contained in Rule 10A–3(c)(7) regarding the application of Rule 10A–3 (17 CFR 240.10A–3) under the Act. *See* Notice, *supra* note 3, 89 FR at 5274.

[10] *See* Notice, *supra* note 3, 89 FR at 5274.

[11] *See id.*

[12] *See id.* The Trust may also cause the Sponsor to receive EUAs from the Trust in such a quantity as may be necessary to pay the Sponsor's annual fee. *See id.*

[13] *See id.*

[14] *See id.*

[15] *See id.*

[16] *See id.* at 5279. The EUA End of Day Index methodology is available at *https://www.eex.com/fileadmin/EEX/Downloads/Trading/Specifications/Indeces/DE/20211005_Index_Description_v010.pdf.* According to the Exchange, the value of the EUA End of Day Index is calculated based on an algorithm using data regarding the prices of qualifying trades and the average bids and asks of orders that meet certain order quantity requirements. *See* Notice, *supra* note 3, 89 FR at 5276. In order for data regarding trades and orders to be used for calculating the value of the EUA End of Day Index, the trades or orders must satisfy certain requirements regarding (i) quantity of traded contracts, (ii) quantity of contracts per order, (iii) minimum duration of the cumulated valid best bid and best ask, and (iv) maximum spread per contract. The EUA End of Day Index calculation methodology depends on the number of valid trades and orders which fulfil the product-specific parameters. *See id.* The data used for calculating the EUA End of Day Index can also come from fair values collected in a price committee or from other price sources. *See id.* The EUA End of Day Index price calculated is then validated against actual market prices. *See id.*

[17] *See id.* at 5279. The administrator also converts the value of Euro denominated assets into US Dollar equivalent using published foreign currency exchange prices by an independent pricing vendor. *See id.*

[18] *See id.* at 5278.

[19] There are two types of EU emissions allowances: (i) general allowances for stationary installations, or EUA; and (ii) allowances for the aviation sector. *See id.* at 5274. The Trust will not hold any assets other than EUAs and, possibly, a very limited amount of cash to pay Trust expenses. *See id.*

[20] *See id.* at 5274–75.

dioxide equivalent into the atmosphere by operators of stationary installations (''Covered Entities'').[21] By the end of April each year, all Covered Entities are required to surrender EUAs equal to the total volume of actual emissions from their installation for the last calendar year.[22] EU ETS operators can buy or sell EUAs to achieve EU ETS compliance.[23]

In 2012, EU ETS operations were centralized into a single EU registry operated by the EU Commission (the ''Union Registry''), which covers all countries participating in the EU ETS.[24] According to the Exchange, the Union Registry is an online database that holds accounts for all entities covered by the EU ETS as well as for participants (such as the Trust) not covered under the EU ETS.[25] An account must be opened in the Union Registry by a legal or natural person before being able to participate in the EU ETS and transact in EUAs.[26] The European Union Transaction Log (''EUTL'') [27] checks, records and authorizes all transactions that take place between accounts in the Union Registry to ensure that transfers are in accordance with the EU ETS rules.[28] The Union Registry is at all times responsible for holding all EUAs.[29]

The spot and futures markets for EUAs have existed since 2005 after the formal launch of the EU ETS on January 1, 2005.[30] Spot EUA contracts are traded exclusively on EEX,[31] and futures contracts are traded on EEX, ICE Endex Markets B.V. (''ICE Endex''),[32] and Nasdaq Oslo.[33] Additionally, options on EUA futures contracts are traded on EEX and ICE Endex, but not on Nasdaq Oslo.[34]

According to the Exchange, there are currently two primary avenues for trading EUAs: a primary market and a secondary market.[35] The primary market involves participation in a regularly scheduled auction.[36] EUA auctions are held on a near-daily basis throughout the year, other than between mid-December to mid-January, when auctions are paused.[37] EUA auctions take place exclusively on EEX.[38] Prices achieved in these auctions are published on various publicly-accessible websites, including the European Commission's primary website.[39] The secondary market involves transactions between buyers and sellers on regulated markets. The contracts offered for trading are the following: (1) instruments with a daily expiry, including spot EUAs [40] and a single day futures contract on EUAs (''Daily EUA Future''),[41] (2) futures contracts with various maturities; [42] and (3) options on futures contracts.[43] There are also over-the-counter transactions, but, according to the Exchange, they comprise a negligible percentage of transactions.[44]

The Exchange states that the daily EUA End of Day Index value can be expected to be substantially identical to the daily settlement price of the Daily EUA Future.[45] In support of this statement, the Exchange provided a comparison of the daily EUA End of Day Index value and the Daily EUA Future settlement price over a 45 calendar day period from October 26, 2023 through December 8, 2023.[46] Additionally, the Exchange provided a chart showing the spot prices in continuous trading on the EEX and the intra-day prices of Daily EUA Futures on ICE Endex, in EUR/tCO2 from January 2018 to January 2022 to illustrate how the Daily EUA Future reflects the EUA spot price during the trading day.[47]

Surveillance

In support of its proposal, the Exchange states that trading in the Shares will be subject to the existing trading surveillances administered by the Exchange, as well as cross-market surveillances administered by the Financial Industry Regulatory Authority Inc. (''FINRA''), on behalf of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws.[48] The Exchange states that these procedures are adequate to properly monitor Exchange trading of the Shares in all trading sessions and to deter and detect violations of Exchange rules and federal securities laws applicable to trading on the Exchange.[49]

The Exchange has entered into a comprehensive surveillance sharing agreement (''CSSA'') with ICE Endex.[50] The Exchange states that, pursuant to the CSSA, it will communicate as needed regarding trading in the Shares and Daily EUA Futures with ICE Endex, and may obtain trading information regarding trading in the Shares and Daily EUA Futures from ICE Endex.[51]

III. Proceedings to Determine Whether To Approve or Disapprove SR–NYSEARCA–2024–05 and Grounds for Disapproval Under Consideration

The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Act [52] to determine whether the proposed rule change should be approved or disapproved. Institution of such proceedings is appropriate at this time in view of the legal and policy issues raised by the proposal. Institution of proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved. Rather, as described below, the Commission seeks and encourages interested persons to provide comments on the proposed rule change.

Pursuant to Section 19(b)(2)(B) of the Act,[53] the Commission is providing notice of the grounds for disapproval under consideration. The Commission is instituting proceedings to allow for additional analysis of the proposal's consistency with Section 6(b)(5) of the Act, which requires, among other things, that the rules of a national securities exchange be ''designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade,'' and ''to

protect investors and the public interest.'' [54]

The Commission asks that commenters address the sufficiency of the Exchange's statements in support of the proposal, which are set forth in the Notice, in addition to any other comments they may wish to submit about the proposed rule change. In particular, the Commission seeks comment on the following questions and asks commenters to submit data where appropriate to support their views:

1. Given the nature of the underlying assets held by the Trust, what are commenters' views on whether the proposed Trust and Shares would be susceptible to manipulation? What are commenters' views generally on whether the Exchange's proposal is designed to prevent fraudulent and manipulative acts and practices? What are commenters' views generally with respect to the liquidity and transparency of the EUA spot and futures markets and such markets' susceptibility to manipulation? Are there particular features related to the EUA markets and the EUA ecosystem that raise unique concerns about whether the proposed Trust, which would hold EUAs and, possibly, a very limited amount of cash, would be susceptible to fraud or manipulation?

2. According to the Exchange, EEX calculates and publishes its EUA End of Day Index on the price of spot EUAs. The value of the EUA End of Day Index is calculated based on an algorithm using data regarding the prices of qualifying trades and the average bids and asks of orders that meet certain order quantity requirements.[55] What are commenters' views on whether the EUA End of Day Index is an accurate basis to price spot EUAs for purposes of NAV calculation and valuing the Shares of the Trust?

3. The Exchange states that ''[g]iven the significant size of ICE Endex, there is a reasonable likelihood that a market participant attempting to manipulate the Trust Shares would also have to trade on ICE Endex to successfully manipulate the Trust Shares.'' [56] In addition, the Exchange states that ''[i]t is unlikely that trading in the Trust Shares would be the predominant influence on Daily EUA Futures prices traded on ICE Endex for a number of reasons, including the significant volume in and size of the EUA daily expiry market.'' [57] Based on data and analysis provided by the Exchange,[58] do commenters agree with the Exchange that ICE Endex, on which the Daily EUA Futures trade, represents a regulated market of significant size related to spot EUAs? [59] What are commenters' views on whether there is a reasonable likelihood that a person attempting to manipulate the Shares would also have to trade on ICE Endex to manipulate the Shares? [60] Do commenters agree with the Exchange that trading in the Shares would not be the predominant influence on prices in the Daily EUA Futures market? [61]

4. The Exchange states that the ''the correlation between the EUA End of Day Index value that reflects the value of the spot EUAs traded on EEX and the Daily EUA Future settlement price is nearly perfect,'' and ''[t]hus, on any given day, the value of an EUA purchased on EEX or an EUA received after settling a Daily EUA Future traded on ICE Endex is the same.'' [62] The Exchange concludes that ''[w]hile it is possible that a potential manipulator could chose to trade only in the spot EUA market (EEX), the near-perfect correlation between the EUA End of Day Index value and the Daily EUA Future settlement price means that a price distortion in the spot EUA market would be reflected in the Daily EUA Futures market and vice versa.'' [63] What are commenters' views on the correlation between the EUA End of Day Index value and the Daily EUA Future settlement price? What are commenters' views on the correlation between the spot EUA market and the ICE Endex futures market? What are commenters' views on the extent to which a CSSA with ICE Endex would assist in detecting and deterring fraud and manipulation that impacts an exchange-traded product that holds spot EUAs, and on whether the Exchange's correlation analysis [64] provides any evidence to this effect?

IV. Procedure: Request for Written Comments

The Commission requests that interested persons provide written submissions of their views, data, and arguments with respect to the issues identified above, as well as any other concerns they may have with the proposal. In particular, the Commission invites the written views of interested persons concerning whether the proposed rule change is consistent with Section 6(b)(5) or any other provision of the Act, or the rules and regulations thereunder. Although there do not appear to be any issues relevant to approval or disapproval that would be facilitated by an oral presentation of views, data, and arguments, the Commission will consider, pursuant to Rule 19b–4, any request for an opportunity to make an oral presentation.[65]

Interested persons are invited to submit written data, views, and arguments regarding whether the proposed rule change should be approved or disapproved by May 22, 2024. Any person who wishes to file a rebuttal to any other person's submission must file that rebuttal by June 5, 2024.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–NYSEARCA–2024–05 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEARCA–2024–05. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be

[54] 15 U.S.C. 78f(b)(5).

BILLING CODE 8026–09–P

DEPARTMENT OF STATE

[Public Notice: 12382]

Office of the Chief of Protocol; Gifts to Federal Employees From Foreign Government Sources Reported To Employing Agencies in Calendar Year 2022; Correction

ACTION: Notice; Correction.

SUMMARY: The Department of State published a document of overvalue gifts reported to employing agencies in calendar year 2022 in the **Federal Register** of February 15, 2024. The document contained incorrect values and disposition of respective gifts for 50 previously reported items. This notice corrects the previously reported information for those items.

FOR FURTHER INFORMATION CONTACT: Ms. Jennine Jones, Protocol Gift Officer, Office of the Chief of Protocol, U.S. Department of State, 202–647–1333, *SCPR-Gifts-DL@state.gov.*

SUPPLEMENTARY INFORMATION: All information reported to the Office of the Chief of Protocol, including gift appraisal and donor information, is the responsibility of the employing agency, in accordance with applicable law and GSA regulations.

The Office of the Chief of Protocol, Department of State, submits the following comprehensive listing of the statements which, as required by law, federal employees filed with their employing agencies during calendar year 2022 concerning gifts received from foreign government sources. The compilation includes reports of both tangible gifts and gifts of travel or travel expenses of more than minimal value, as defined in 5 U.S.C. 7432 and GSA regulations. For calendar year 2022 (January 1, 2022 through December 31, 2022), minimal value is $415.00.

Pursuant to Title 22 of the Code of Federal Regulations Section 3.4, the report includes all gifts given on a single occasion when the aggregate value of those gifts exceeds minimal value. Agencies not listed in the previously published report either did not receive relevant gifts during the calendar year, did not transmit a listing to the Secretary of State of all statements filed during the preceding year by the employees of that agency pursuant to 5 U.S.C. 7432(f)(1), or did not respond to the State Department's Office of the Chief of Protocol's request for data. The U.S. Senate maintains an internal minimal value of $100; therefore, all gifts over the $100 limit are furnished in the U.S. Senate report.

Publication of this listing in the **Federal Register** is required by section 7342(f) of Title 5, United States Code, as added by section 515(a)(1) of the Foreign Relations Authorization Act, Fiscal Year 1978 (Pub. L. 95–105, August 17, 1977, 91 Stat. 865).

Correction

In the **Federal Register** of February 15, 2024, in FR Doc. 2024–03129, on page 11898–11902, in the Report of Tangible Gifts Furnished by the White House—Executive Office of the President, correct the following:

[66] 17 CFR 200.30–3(a)(57).

AGENCY: THE WHITE HOUSE—EXECUTIVE OFFICE OF THE PRESIDENT

[Report of tangible gifts furnished by the White House—Executive Office of the President]

Name and title of person accepting the gift on behalf of the U.S. Government	Gift, date of acceptance on behalf of the U.S. Government, estimated value, and current disposition or location	Identity of foreign donor and government	Circumstances justifying acceptance
The Honorable Joseph R. Biden Jr., President of the United States.	Painting titled "At Parika Stelling (Guyana)." Rec'd—3/2/2022 Est. Value—$650.00 Disposition—Transferred to NARA.	His Excellency Mohamed Irfaan Ali, President of the Co-operative Republic of Guyana.	Non-acceptance would cause embarrassment to donor and U.S. Government.

BILLING CODE 4710–20–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36486 (Sub-No. 7)]

Grainbelt Corporation—Trackage Rights Exemption—BNSF Railway Company

By petition filed on March 1, 2024, Grainbelt Corporation (GNBC) requests that the Board partially revoke the trackage rights exemption granted to it under 49 CFR 1180.2(d)(7) in Docket No. FD 36486 (Sub-No. 6), as necessary to permit that trackage rights arrangement to expire on March 31, 2025. GNBC filed its verified notice of exemption on March 1, 2024, and simultaneously filed its petition for partial revocation. Notice of the exemption was served and published in the **Federal Register** (89 FR 19001) on March 15, 2024, and the exemption became effective on March 31, 2024.

As explained by GNBC in its verified notice of exemption in Docket No. FD 36486 (Sub-No. 6), GNBC and BNSF Railway Company (BNSF) have entered into an amendment to extend the term of the previously amended, local trackage rights on trackage owned by BNSF between approximately milepost 668.73 in Long, Okla., and approximately milepost 723.30 in Quanah, Tex. (the Line), allowing GNBC to (1) use the Line to access the Plains Cotton Cooperative Association (PCCA) facility near BNSF Chickasha Subdivision milepost 688.6 at Altus, Okla., and (2) operate additional trains on the Line to accommodate the movement of trains transporting BNSF customers' railcars (loaded or empty) located along the Line to unit train

facilities on the Line (collectively, the PCCA Trackage Rights). (GNBC Verified Notice of Exemption 2–4, *Grainbelt Corp.—Trackage Rts. Exemption—BNSF Ry.,* FD 36486 (Sub-No. 6).)

GNBC explains that the trackage rights covered by the verified notice in Docket No. FD 36486 (Sub-No. 6) are local rather than overhead rights and therefore do not qualify for the Board's class exemption for temporary trackage rights under 49 CFR 1180.2(d)(8). (GNBC Pet. 4.) GNBC therefore filed its verified notice of exemption under the Board's class exemption procedures at 49 CFR 1180.2(d)(7) and a petition for partial revocation of the exemption as necessary to permit the PCCA Trackage Rights to expire on March 31, 2025, pursuant to the parties' agreement. (GNBC Pet 3.) GNBC argues that the requested relief will promote the rail transportation policy and is limited in scope. (*Id.* at 4.) GNBC also asserts that the Board has routinely granted similar petitions to allow trackage rights to expire on a negotiated date. (*Id.* at 4–5.)

Discussion and Conclusions

Although GNBC and BNSF have expressly agreed on the duration of the proposed trackage rights, trackage rights approved under the class exemption at 49 CFR 1180.2(d)(7) typically remain effective indefinitely, regardless of any contractual provisions. At times, however, the Board has partially revoked a trackage rights exemption to allow those rights to expire after a limited time rather than lasting in perpetuity. *See, e.g., Grainbelt Corp.—Trackage Rts. Exemption—BNSF Ry.,* FD 36486 (Sub-No. 5) (STB served May 15, 2023) (granting a petition to partially revoke a trackage rights exemption involving the Line at issue in this case); *BNSF Ry.—Trackage Rts. Exemption—Union Pac. R.R.,* FD 36377 (Sub-No. 7) (STB served Mar. 2, 2023); *New Orleans Pub. Belt R.R.—Trackage Rts. Exemption—Ill. Cent. R.R.,* FD 36198 (Sub-No. 1) (STB served June 20, 2018).

Granting partial revocation in these circumstances to permit the trackage rights to expire would eliminate the need for GNBC to file a second pleading seeking discontinuance when the agreement expires, thereby promoting the rail transportation policy at 49 U.S.C. 10101(2), (7), and (15). Moreover, partially revoking the exemption to limit the term of the trackage rights is consistent with the limited scope of the transaction previously exempted.[1] Therefore, the Board will grant the petition and permit the trackage rights exempted in Docket No. FD 36486 (Sub-No. 6) to expire on March 31, 2025.

To provide the statutorily mandated protection to any employee adversely affected by the discontinuance of trackage rights, the Board will impose the employee protective conditions set forth in *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho,* 360 I.C.C. 91 (1979).

This action is categorically excluded from environmental review under 49 CFR 1105.6(c).

It is ordered:

1. The petition for partial revocation of the trackage rights class exemption is granted.

2. As discussed above, the trackage rights in Docket No. FD 36486 (Sub-No. 6) are permitted to expire on March 31, 2025, subject to the employee protective conditions set forth in *Oregon Short Line Railroad,* 360 I.C.C. 91.

3. Notice of this decision will be published in the **Federal Register**.

4. This decision is effective on May 31, 2024. Petitions to stay must be filed by May 13, 2024. Petitions for reconsideration must be filed by May 21, 2024.

Decided: April 25, 2024.

By the Board, Board Members Fuchs, Hedlund, Oberman, Primus, and Schultz.

Raina White,

Clearance Clerk.

[FR Doc. 2024–09387 Filed 4–30–24; 8:45 am]

BILLING CODE 4915–01–P

[1] Because the proposed transaction is of limited scope, the Board need not make a market power finding. *See* 49 U.S.C. 10502(a).

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2024–1191]

Agency Information Collection Activities: Requests for Comments; Clearance of a New Approval of Information Collection: International Traveler Information Card

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval for a new information collection. The collection involves obtaining information from FAA employees and contractors who will travel overseas on official business. The information to be collected will be used in the event an FAA employee and/or contractor is isolated overseas and requires lifesaving assistance.

DATES: Written comments should be submitted by July 1, 2024.

ADDRESSES: Please send written comments:

By Electronic Docket: www.regulations.gov (Enter docket number into the search field).

By mail: Michael S. Raby, FAA National Headquarters, 800 Independence Ave. SW, Washington, DC 20591.

By fax: 202–267–8496.

FOR FURTHER INFORMATION CONTACT: Michael S. Raby, Division Manager, FAA Office of Investigations and Professional Responsibility (AXI–500), by email at: *michael.raby@faa.gov;* phone: (202) 604–2419.

SUPPLEMENTARY INFORMATION: The collection information is necessary to comply with 22 U.S.C. 3927 and 4802, which require Federal agencies to have personnel information on file in the event of an isolating event overseas.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120–XXXX.

Title: International Traveler Information Card.

Form Numbers: There are no FAA forms associated with this information collection.

Type of Review: New information collection.

Background

The International Traveler Information Card (ITIC) is an electronic form that FAA employees and contractors will complete prior to international travel on official business. The purpose of the form is to collect pertinent data to be used in the event a FAA employee and/or contractor are isolated overseas and require lifesaving assistance. This data will assist in the government's ability to properly identify individuals and provide, if necessary, medical support and personal items to FAA employees and contractors should they be isolated overseas.

The authority for this collection resides in Presidential Policy Directive (PPD)/PPD–30, 22 U.S.C. 4802 and 22 U.S.C. 3927. The duty of an agency with employees in foreign countries is to ensure they fully comply with all applicable directives of the Chief of Mission. In order to protect FAA personnel on official duty abroad, the ITIC documents the Personally Identifiable Information (PII) of FAA employees and contractors to help aid in their authentication and recovery. The ITIC requests the following PII: Name, Date of Birth, Gender, Height, Weight, Hair and Eye Color, Clothing and Shoe Size, Race/Ethnic Group, Blood Type, Scars/Marks/Tattoos, Known Medical Conditions, Current Medical Prescriptions, Allergies, Contact Information, Specialized Training, Language(s) Spoken, as well as information about their Emergency Contact. The traveler will also create a Duress Word and Personal Authenticator Statements to aid in the identification.

This information will not be available to the public, and will be managed in accordance with applicable Records Management and Privacy Act policies. Only two International Travel Security Program Managers and the Senior Watch Officer of the Washington Operations Center can retrieve ITICs to aid employees and/or contractors during an isolating event, as determined by the Chief of Mission. The Chief of Mission, relying on situational factors, will make the ultimate decision with whom this information is shared, such as, but not limited to, the Department of Defense, in the event of a personnel recovery event.

Respondents: The FAA estimates 52 respondents because of the number of contractors who traveled internationally on official business in Fiscal Year 2023.

Frequency: As needed.

Estimated Average Burden per Response: 30 minutes per traveler.

Estimated Total Annual Burden: 26 hours per year.

Issued in Washington, DC, on April 19, 2024.

Michelle L. Salter,

Executive Director FAA, Office of Investigations and Professional Responsibility.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2024–1416]

Agency Information Collection Activities: Requests for Comments; Clearance of a Renewed Approval of Information Collection: Helicopter Air Ambulance Operator Reports

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The collection involves the requirement for Helicopter Air Ambulance Operators to report certain information to the FAA. The FAA collects 14 pieces of data from helicopter air ambulance operators, 8 of which are mandated in the report to Congress. We collect data on the following: number of helicopters, helicopter base locations, number of hours the helicopters are flown, number of patients transported, number of transportation requests accepted or denied, number of accidents, number of instrument flight hours flown, number of night flight hours flown, number of incidents, and the rate of accidents or incidents per 100,000 flight hours. The information to be collected will be used in helping the FAA develop risk mitigation strategies and provide information to Congress.

DATES: Written comments should be submitted by July 1, 2024.

ADDRESSES: Please send written comments:

By Electronic Docket: www.regulations.gov (Enter docket number into search field).

By mail: Sandra Ray, Federal Aviation Administration, AFS–260, 1187 Thorn Run Rd., Suite 200, Coraopolis, PA 15108.

By fax: 412–546–7344.

FOR FURTHER INFORMATION CONTACT: Sandra L. Ray by email at: *Sandra.ray@faa.gov;* phone: 412–546–7344.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120–0761.

Title: Helicopter Air Ambulance Operator Reports.

Form Numbers: 2120–0756.

Type of Review: Renewal of an information collection.

Background: The FAA Modernization and Reform Act of 2012 (The Act) mandates that all helicopter air ambulance operators must begin reporting the number of flights and hours flown, along with other specified information, during which helicopters operated by the certificate holder were providing helicopter air ambulance services. See Public Law 112–95, sec. 306, 49 U.S.C. 44731. The Act further mandates that not later than 2 years after the date of enactment, and annually thereafter, the Administrator shall submit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate, a report containing a summary of the data collected.

The helicopter air ambulance operational data provided to the FAA will be used by the agency as background information useful in the development of risk mitigation strategies to reduce the helicopter air ambulance accident rate, and to meet the mandates set by Congress. The information requested is limited to the minimum necessary to fulfill these new reporting requirements mandated by the Act and as developed by FAA. The amount of data required to be submitted is proportional to the size of the operation.

Respondents: 65 Helicopter Air Ambulance Operators.

Frequency: Annually.

Estimated Average Burden per Response: Varies per size of operation.

Estimated Total Annual Burden: 765 Hours for all operators.

Issued in Washington, DC, on April 26, 2024.

Sandra L. Ray,

Aviation Safety Inspector, AFS–260.

Federal Highway Administration

[Docket No. FHWA–2024–0033]

Agency Information Collection Activities: Request for Comments for a New Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice and request for comments.

SUMMARY: The FHWA has forwarded the information collection request described in this notice to the Office of Management and Budget (OMB) to approve a new information collection. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by May 31, 2024.

ADDRESSES: You may submit comments identified by DOT Docket ID Number 0033 by any of the following methods:

Website: For access to the docket to read background documents or comments received go to the Federal eRulemaking Portal: Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.

Fax: 1–202–493–2251.

Mail: Docket Management Facility, U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

Hand Delivery or Courier: U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Melissa Corder, 202–366–5853, Office of Real Estate Services, Federal Highway Administration, Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590, between 7:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: We published a **Federal Register** Notice with a 60-day public comment period on this information collection on November 20, 2023 at 88 FR 80809. There were no comments received.

Title: Relocation Assistance and Real Property Acquisition Regulations for Federal and Federally Assisted Programs.

Background: This program implements 42 U.S.C. 4602, concerning acquisition of real property and relocation assistance for persons displaced by Federal and federally assisted programs. It prohibits the provision of relocation assistance and payments to persons not legally present in the United States (with certain exceptions). The information collected consists of a certification of residency status from affected persons to establish eligibility for relocation assistance and payments. Displacing agencies will require each person who is to be displaced by a Federal or federally assisted project, as a condition of eligibility for relocation payments or advisory assistance, to certify they are lawfully present in the United States.

Respondents: Federal agencies, 50 State Transportation Departments, the District of Columbia, Puerto Rico, Guam, American Samoa, and the Virgin Islands, local government agencies, persons administering projects or programs and airport sponsors receiving financial assistance for expenditures of Federal funds on acquisition and relocation payments and required services to displaced persons that are subject to the Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, for file maintenance and for annual statistical reports.

Frequency: Annually.

Estimated Average Burden per Response: The estimated average burden per response varies. For the respondents, it takes 15 minutes to complete the relocation certification. It takes 1 hour for the file record keeping.

Estimated Total Annual Burden Hours: The estimated total annual burden hours are 10,000 hours, including the 2,000 hours for respondents and 8,000 for the file record keeping.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1.48.

Issued on: April 26, 2024.

Jazmyne Lewis,

Information Collection Officer.

Website: For access to the docket to read background documents or comments received go to the Federal eRulemaking Portal: Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.

Fax: 1–202–493–2251.

Mail: Docket Management Facility, U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

Hand Delivery or Courier: U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Kenneth Petty, Office of Planning (HEPP–1), 202–366–6654, and Spencer Stevens, Office of Planning (HEPP–20), 202–366–6221, Federal Highway Administration, Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590. Office hours are from 8 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: We published a **Federal Register** Notice

with a 60-day public comment period on this information collection on October 27, 2023, at [88 FR 73932]. There were no comments received.

Title: Survey of Metropolitan Planning Organizations and State Departments of Transportation Regarding Practices for Incorporating Equity and Meaningful Public Involvement in Transportation Planning and Project Decision-Making.

OMB Control: 2125–0665.

Background: The U.S. Department of Transportation (DOT, or ''the Department'') is committed to pursuing a comprehensive approach to advancing equity for all. In support of the Department's Equity Action Plan (*https://www.transportation.gov/priorities/equity/equity-action-plan*), DOT is working to support transportation agencies in better addressing the needs of underserved communities.

One focus area for DOT relates to the Department's programmatic enforcement of Title VI of the Civil Rights Act (DOT Order 1000.12C), including emphasizing agency review of potentially-discriminatory plans, investment programs, and projects to prevent unlawful discrimination, and empower communities, including limited English proficient communities, in transportation decision-making (49 CFR 21.5, 21.7, 21.9 and 28 CFR 406). DOT is also emphasizing the requirements of Section 504 of the Rehabilitation Act (28 CFR 35.104) and of the Americans with Disabilities Act (42 U.S.C. 12101 *et seq.*) for ensuring that transportation plans and investment programs do not discriminate on the basis of disability and provide equal opportunity and access for persons with disabilities.

In August of 2022, FHWA conducted a survey of all State departments of transportation (State DOTs) and metropolitan planning organizations (MPOs) to better understand how these agencies consider equity and comply with Title VI in transportation planning and programming activities (OMB Control Number 2125–0665). This survey included questions about how each State DOT or MPO uses quantitative data or tools to analyze equity factors for transportation plans and investment programs, as well as how each agency provides a meaningful and representative role to members of all communities, including underserved and limited English proficient communities, in shaping these plans and programs (28 CFR 407). Information from the survey was used to help the Department form an understanding of the state of the practice related to equity and civil rights compliance and meaningful public involvement in transportation planning and programming, and to inform research products and capacity-building activities for State DOTs and MPOs, to help them improve practices.

FHWA plans to conduct follow-up annual surveys, beginning in 2024, to monitor the progress of State DOTs and MPOs in advancing their transportation planning equity and meaningful public involvement practices, and to identify ongoing research, training, and technical assistance needs. These surveys will cover similar topics as the 2022 survey, with reworded questions to reduce respondent burden and to align with updates to the Department's Equity Action Plan and other policies or guidance.

Survey responses may also inform future revisions to existing guidance, or the development of new guidance, to DOT funding recipients on meeting the requirements of title VI of the Civil Rights Act, the National Environmental Policy Act, section 504 of the Rehabilitation Act, the Americans with Disabilities Act, transportation planning and programming, or other legal or regulatory requirements that relate to transportation equity and public involvement.

FHWA plans to conduct the survey on a voluntary-response basis, utilizing an electronic survey platform. This is planned as an annual information collection, and FHWA estimates that the survey will take approximately one hour to complete. The survey will consist of both multiple-choice and short-answer question formats.

Respondents: 52 State DOTs and approximately 420 MPOs.

Frequency: Annually, beginning in 2024.

Estimated Average Burden per Response: Approximately 60 minutes per respondent.

Estimated Total Annual Burden Hours: Approximately 472 hours.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1.48.

Issued on: April 26, 2024.

Jazmyne Lewis,

Information Collection Officer.

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2023–0267]

RIN 2126–AB56

FMCSA Registration System Modernization

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of virtual public meeting.

SUMMARY: FMCSA announces a virtual public meeting to engage stakeholders—including motor carriers, brokers, freight forwarders, insurance companies, financial institutions, process agents, blanket companies, and third-party service providers—to hear more on their perspectives on improving the registration experience with FMCSA. This is the second instance of FMCSA's Registration Modernization Stakeholder Day; the first meeting was held in person at FMCSA headquarters on January 17, 2024.

DATES: This virtual public meeting will be held on May 29, 2024, from 1 to 3 p.m. EST. A copy of the agenda will be available in advance of the meeting at *https://www.fmcsa.dot.gov/registration/fmcsa-registration-modernization-stakeholder-day-ii.*

ADDRESSES: The meeting will be held virtually. The link will be sent to participants after they register. Those interested in attending this virtual public meeting must register at *https://www.fmcsa.dot.gov/registration/fmcsa-registration-modernization-stakeholder-day-ii* by 11:59 p.m. EST, on May 24, 2024.

FOR FURTHER INFORMATION CONTACT: Gio Vizcardo, Knowledge Manager, Office of Registration, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001; (202) 366–0356; *mcrs-social@dot.gov.*

Services for individuals with disabilities: For information on facilities or services for individuals with disabilities or to request special assistance at the meeting, contact Gio Vizcardo using one of the above means by 11:59 p.m. EST, on April 29, 2024.

SUPPLEMENTARY INFORMATION:

Background

FMCSA is developing a new online registration system to improve the transparency and efficiency of FMCSA's registration procedures and implement statutory requirements related to the registration program. FMCSA seeks user perspectives on improving the registration experience when engaging with FMCSA's registration system. During this meeting, FMCSA will invite attendees to participate after providing initial presentations on preliminary system designs and functionality. FMCSA moderators will facilitate discussions on what potential users would like to see, as well as what would not be helpful from a user experience perspective.

Meeting Information

This meeting is intended for current and potential users of a new online registration system, including but not limited to:

- Motor carriers;
- Brokers and freight forwarders;
- Insurance companies/financial institutions and process agents/blanket companies; and
- Third party service providers.

The full meeting agenda will be available on the registration site (see **ADDRESSES** above for instructions on meeting registration) in advance of the meeting.

Sue Lawless,

Acting Deputy Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2014–0106]

Petition for Extension of Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on March 14, 2024, Metro-North Railroad (MNCW) petitioned the Federal Railroad Administration (FRA) for an extension of a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 240 (Qualification and Certification of Locomotive Engineers) and part 242 (Qualification and Certification of Conductors). The relevant Docket Number is FRA–2014–0106.

Specifically, MNCW requests relief required to continue participation in FRA's Confidential Close Call Reporting System (C^{3}RS) Program. MNCW seeks to continue shielding reporting employees from mandatory punitive sanctions that would otherwise arise as provided in §§ 240.117(e)(1)–(4); 240.305(a)(1)–(4) and (a)(6); 240.307; 242.403(b), (c), (e)(1)–(4), (e)(6)–(11), (f)(1)–(2); and 242.407. The C^{3}RS Program encourages certified operating crew members to report close calls and protects the employees and the railroad from discipline or sanctions arising from the incidents reported per the C^{3}RS Implementing Memorandum of Understanding (IMOU). MNCW notes that it and the Association of Commuter Rail Employees have been governed by an IMOU since September 2014. MNCW states that recent safety improvements associated with C^{3}RS include: ''Development of diagrams to enhance notices to crews for partial passenger platform closures;'' ''Deployment of standardized train spotting or enhanced spotting markers for specific stations;'' and ''Enhancement of root cause analysis for C^{3}RS eligible 'known events' by inviting employees involved to be interviewed by members of the PRT.''

A copy of the petition, as well as any written communications concerning the petition, is available for review online at *www.regulations.gov.*

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted at *www.regulations.gov.* Follow the online instructions for submitting comments.

Communications received by July 1, 2024 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.

Anyone can search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.transportation.gov/privacy.* See also *https://www.regulations.gov/privacy-notice* for the privacy notice of *regulations.gov*.

Issued in Washington, DC.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2010–0171]

Petition for Extension of Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on March 1, 2024, Sacramento Southern Railroad/California State Railroad Museum (CSRM) petitioned the Federal Railroad Administration (FRA) to extend a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR parts 215 (Railroad Freight Car Safety Standards) and 224 (Reflectorization of Rail Freight Rolling Stock). FRA assigned the petition Docket Number FRA–2010–0171.

Specifically, CSRM requests to extend its previous [1] special approval pursuant to 49 CFR 215.203, *Restricted cars,* for 2 railcars (SSRR 6102 and SSRR 6108) and 1 locomotive (SN 402) that are more than 50 years from the dates of original construction. CSRM also seeks relief from § 215.303, *Stenciling of restricted cars,* and part 224, to operate the cars in excursion service. In support of its request, CSRM states that the cars will not be used in interchange or for revenue freight service, and the locomotive is primarily used to haul passenger trains during daylight hours or for yard switching operations. CSRM also states that the equipment is inspected regularly and in excellent mechanical condition.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at *www.regulations.gov.*

Interested parties are invited to participate in these proceedings by

[1] The special approval/waiver in Docket Number FRA–2010–0171 expired on May 16, 2022.

submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted at *www.regulations.gov.* Follow the online instructions for submitting comments.

Communications received by July 1, 2024 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2024–0042]

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System

Under part 235 of title 49 Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that on March 15, 2024, Coos Bay Rail Line (CBRL) petitioned the Federal Railroad Administration (FRA) seeking approval to discontinue or modify a signal system. FRA assigned the petition Docket Number FRA–2024–0042.

Specifically, CBRL requests to discontinue the use of the signal system located on the North Bend swing span bridge, which will be replaced with gates equipped with stop signs, distance signs, and ''craft specific locks'' to govern about 10 train crossings per week over the bridge. CBRL states that the signal system, at milepost 763.6 on the Coos Bay Subdivision, ''has been subjected to years of regular vandalism and theft,'' which makes ''maintaining such a system particularly challenging.'' Additionally, CBRL explains that ''the system also requires significant updating and repairs stemming from a structural failure that damaged multiple components crucial to its reliable and safe operation.'' In support of its request, CBRL states that the subject trackage operates under yard limits authority (GCOR rules 6.27 and 6.28) and that the ''more analog style system'' it proposes to use will be a ''more tamper resistant alternative for governing movement over the bridge.'' CBRL also notes that another of its swing bridges has used a similar system for several years and has had no recordable incidents.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at *www.regulations.gov.*

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted at *http://www.regulations.gov.* Follow the online instructions for submitting comments.

Communications received by July 1, 2024 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.

Anyone can search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Action

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the name of a person whose property and interests in property have been unblocked and who have been removed from the Specially Designated Nationals and Blocked Persons List (SDN List). OFAC is also publishing the name of a vessel previously been identified on the SDN List that is being removed from the SDN List.

DATES: OFAC's actions described in this notice were effective on April 26, 2024.

FOR FURTHER INFORMATION CONTACT: OFAC: Bradley T. Smith, Director, tel.: 202–622–2490; Associate Director for Global Targeting, tel.: 202–622–2420; Assistant Director for Licensing, tel.: 202–622–2480; Assistant Director for Regulatory Affairs, tel.: 202–622–4855; or the Assistant Director for Sanctions Compliance & Evaluation, tel.: 202–622–2490.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website (*https://www.treasury.gov/ofac*).

Notice of OFAC Actions

A. On April 26, 2024, OFAC removed from the SDN List the person listed below, whose property and interests in property were blocked pursuant to section 1(a) of Executive Order 14024 of April 15, 2021, ''Blocking Property With Respect To Specified Harmful

Foreign Activities of the Government of the Russian Federation,'' 86 FR 20249, 3 CFR, 2021 Comp., p. 542 (Apr. 15, 2021) (E.O. 14024).

1. ICE PEARL NAVIGATION CORP, Ucpinarlar Caddesi 36, Kucuk Camlica, Uskudar 34696, Turkey; Marshall Islands; Identification Number IMO 4118745 [RUSSIA–EO14024]

B. On April 26, 2024, OFAC removed from the SDN List the vessel listed below, which was previously subject to prohibitions imposed pursuant to E.O. 14024.

1. YASA GOLDEN BOSPHORUS (V7KQ8) Crude Oil Tanker Marshall Islands flag; Vessel Registration Identification IMO 9334038; MMSI 538002662 (vessel) [RUSSIA–EO14024] (Linked To: ICE PEARL NAVIGATION CORP).

Dated: April 26, 2024.

Internal Revenue Service

Open Meeting of the Taxpayer Advocacy Panel Joint Committee

AGENCY: Internal Revenue Service (IRS) Treasury.

ACTION: Notice of meeting.

SUMMARY: An open meeting of the Taxpayer Advocacy Panel Joint Committee will be conducted. The Taxpayer Advocacy Panel is soliciting public comments, ideas, and suggestions on improving customer service at the Internal Revenue Service. This meeting will be held via teleconference through the Microsoft Teams Platform.

DATES: The meeting will be held Thursday, May 23, 2024.

FOR FURTHER INFORMATION CONTACT: Conchata Holloway at 1–888–912–1227 or 214–413–6550.

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1988) that an open meeting of the Taxpayer Advocacy Panel Joint Committee will be held Thursday, May 23, 2024, at 3:00 p.m. Eastern Time via teleconference. The public is invited to make oral comments or submit written statements for consideration. For more information, please contact Conchata Holloway at 1–888–912–1227 or 214–413–6550, or write TAP Office, 1114 Commerce St. MC 1005, Dallas, TX 75242 or contact us at the website: *http://www.improveirs.org.*

The agenda will include the potential project referrals from the committees, and discussions on priorities the TAP will focus on for the 2024 year. Public input is welcomed.

Dated: April 26, 2024.

Shawn Collins,

Acting Director, Taxpayer Advocacy Panel.

AGENCY: Departmental Offices, U.S. Department of the Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The public is invited to submit comments on these requests.

DATES: Comments should be received on or before May 31, 2024 to be assured of consideration.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Copies of the submissions may be obtained from Melody Braswell by emailing *PRA@treasury.gov,* calling (202) 622–1035, or viewing the entire information collection request at *www.reginfo.gov.*

SUPPLEMENTARY INFORMATION:

Title: Request for Individual Access to Records Protected under the Privacy Act and Consent for Disclosure of Records Protected under the Privacy Act.

OMB Control Number: 1505–NEW.

Type of Review: Extension without change of a currently approved collection.

Description: The *Request for Individual Access to Records Protected under the Privacy Act and Consent for Disclosure of Records Protected under the Privacy Act,* was developed in accordance with the Office of Management and Budget (OMB) Memorandum *M–21–04, Modernizing Access to and Consent for Disclosure of Records Subject to the Privacy Act,* which implements the requirements of the Creating Advanced Streamlined Electronic Services for Constituents Act of 2019 (''*CASES Act*''). This form is based on the mandatory OMB M–21–04 templates for individuals to submit requests for accessing and consenting to the disclosure of records protected under the Privacy Act of 1974, as amended, 5 U.S.C. 552a.

The *Request for Individual Access to Records Protected under the Privacy Act* form is used by individuals seeking access to their records under the Privacy Act and any information pertaining to them that are maintained in Treasury's systems of records. The Privacy Act provides that ''the parent of any minor, or the legal guardian of any individual who has been declared to be incompetent due to physical or mental incapacity or age by a court of competent jurisdiction, may act on behalf of the individual.'' Therefore, this form may also be used by a parent or legal guardian.

Form Number: None.

Affected Public: Public Individuals.

Estimated Number of Respondents: 316.

Frequency of Response: Annual.

Estimated Total Number of Annual Responses: 316.

Estimated Time per Response: 3 hours.

Estimated Total Annual Burden Hours: 948.

Authority: 44 U.S.C. 3501 et seq.

Melody Braswell,

Treasury PRA Clearance Officer.

BILLING CODE 4810–AK–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0545]

Agency Information Collection Activity Under OMB Review: Report of Medical, Legal, and Other Expenses Incident to Recovery for Injury or Death

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs,

will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Refer to ''OMB Control No. 2900–0545''.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20420, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0545'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: 38 U.S.C. 1503, 28 CFR 3.262, § 3.271, and § 3.272.

Title: Report of Medical, Legal, and Other Expenses Incident to Recovery for Injury or Death.

OMB Control Number: 2900–0545.

Type of Review: Revision of a currently approved collection.

Abstract: VA Form 21P–8416b is used to gather information about certain expenses related to securing compensation based on personal injury or death. The form is used by claimants for VA income-based benefits to determine the amount of countable income. Without this information, the VA would be unable to properly determine entitlement to income-based benefits and the rate payable.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 89 FR 14154 on Friday, February 26, 2024, page 14154.

Affected Public: Individuals or Households.

Estimated Annual Burden: 75 hours.

Estimated Average Burden per Respondent: 45 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 100.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0114]

Agency Information Collection Activity: Statement of Marital Relationship

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before July 1, 2024.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0114'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0114'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: 38 U.S.C. 101(3), 38 U.S.C. 101(31), 38 U.S.C. 103(c).

Title: Statement of Marital Relationship (VA Form 21–4170).

OMB Control Number: 2900–0114.

Type of Review: Revision of a currently approved collection.

Abstract: VA Form 21–4170 is primarily used to gather information that is necessary to determine whether a valid common law marriage was established. The form is used by persons claiming to be common law widows/widowers of deceased veterans and by veterans and their claimed common law spouses. Benefits cannot be authorized unless a valid marriage is established. No changes have been made to this form. The respondent burden has decreased due to the estimated number of receivables averaged over the past year.

Affected Public: Individuals or Households.

Estimated Annual Burden: 827 hours.

Estimated Average Burden per Respondent: 25 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 1,984 per year.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

Agency Information Collection Activity: Supplement to VA Forms 21–526EZ, 21P–534EZ, and 21P–535 (For Philippine Claims)

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before July 1, 2024.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0094'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0094'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: 38 U.S.C. 101 and 6104, 38 CFR 3.40.

Title: Supplement to VA Forms 21–526EZ, 21P–534EZ, and 21P–535 (For Philippine Claims) (VA Form 21–4169).

OMB Control Number: 2900–0094.

Type of Review: Revision of a currently approved collection.

Abstract: VA Form 21–4169 is primarily used to gather the necessary information to determine whether a claimant's service qualifies as service in the Commonwealth Army of the Philippines or recognized guerrilla organizations. The form is used for the sole purpose of collecting the information needed to determine eligibility for benefits based on such service, including service information, proof of service, place of residence, and membership in pro-Japanese, pro-German, or anti-American Filipino organizations. Without this information, determination of entitlement would not be possible. No changes have been made to this form. The respondent burden has decreased due to the estimated number of receivables averaged over the past year.

Affected Public: Individuals or Households.

Estimated Annual Burden: 212 hours.

Estimated Average Burden per Respondent: 15 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 849 per year.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: 38 U.S.C. 5307, 38 CFR 3.450–3.454 and 3.458–3.461.

Title: Information Regarding Apportionment of Beneficiary's Award (VA Form 21–0788).

OMB Control Number: 2900–0666.

Type of Review: Revision of a currently approved collection.

Abstract: VA Form 21–0788 is used to collect the information that is necessary to determine whether an apportionment may be authorized and the reasonable amount that may be awarded. Without this collection of information, VA would be unable to properly authorize apportionments of compensation and pension benefits. No changes have been made to this form. The respondent burden has increased due to the estimated number of receivables averaged over the past year.

Affected Public: Individuals or Households.

Estimated Annual Burden: 5,045 hours.

Estimated Average Burden per Respondent: 30 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 10,090 per year.

By direction of the Secretary.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0101]

Agency Information Collection Activity Under OMB Review: Eligibility Verification Reports (EVRs)

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Refer to ''OMB Control No. 2900–0101''.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance

Analytics (008), 810 Vermont Ave. NW, Washington, DC 20420, (202) 266–4688 or email *maribel.aponte@va.gov.*

Please refer to ''OMB Control No. 2900–0101'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: Information is requested by this form under the authority of 38 U.S.C. 1506, regulatory authority is found in 38 CFR 3.277.

Title: Eligibility Verification Reports (EVRs) VA Forms: 21P–0510, 21P–0510 (Spanish), 21P–0512S–1, 21P–0512S–1 (Spanish), VA Form 21P–0512V–1, 21P–0513–1, 21P–0513–1 (Spanish), 21P–0514–1, 21P–0514–1(Spanish), 21P–0516–1, 21P–0516–1 (Spanish), 21P–0517–1, 21P–0517 (Spanish), 21P–0518–1, 21P–0518–1 (Spanish), 21P–0519C–1, 21P–0519C–1 (Spanish), 21P–0519S–1, 21P–0519S–1 (Spanish).

OMB Control Number: 2900–0101.

Type of Review: Extension of a previously approved collection.

Abstract: A claimant's eligibility for Pension is determined, in part, by countable family income and net worth. Any individual who has applied for, or receives, VA Pension or Parents' Dependency and Indemnity Compensation (DIC) must promptly notify the VA in writing of any change in entitlement factors. VBA uses Eligibility Verification Reports (EVRs) to receive income and net worth information from Pension and Parents DIC claimants and beneficiaries to evaluate eligibility for benefits. The reported information can result in increased or decreased benefits. Typically, the claimants and beneficiaries utilize the form to notify the VA of changes in income and net worth, though the forms could be used to reopen a claim for benefits in limited circumstances. This is a request for an extension of the EVR collections with no substantive changes.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 89 FR 14154 on Monday, February 26, 2024, pages 14154 and 14155.

Affected Public: Individuals or households.

Estimated Annual Burden: 34,500 hours.

Estimated Average Burden per Respondent: 30 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 69,000.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

[OMB Control No. 2900–0858]

Agency Information Collection Activity Under OMB Review: Authorization and Consent To Release Information to the Department of Veterans Affairs (VA), General Release for Medical Provider Information to the Department of Veterans Affairs (VA)

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before July 1, 2024.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0858'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0858'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: Public Law 104–191 (''HIPAA''), 42 U.S.C. 290dd–242, 38 CFR part 2, 45 CFR parts 160 and 164.

Title: Authorization and Consent to Release Information to the Department of Veterans Affairs (VA) (VA Form 21–4142), General Release for Medical Provider Information to the Department of Veterans Affairs (VA) (VA Form 21–4142a).

OMB Control Number: 2900–0858.

Type of Review: Revision of a currently approved collection.

Abstract: VA Form 21–4142 is used to authorize the disclosure of information to the VA and VA Form 21–4142a is used to gather the necessary information to request medical provider information to the VA. Without the information solicited by these forms, VA would be unable to determine eligibility, and benefits would not be properly paid. No changes have been made to these forms. The respondent burden has increased due to the estimated number of receivables averaged over the past year.

Affected Public: Individuals and households.

Estimated Annual Burden: 36,687 hours.

Estimated Average Burden per Respondent: 5 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 440,246 per year.

By direction of the Secretary.

Maribel Aponte,

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: 38 U.S.C. 101(4), 38 CFR 3.667.

Title: Certification of School Attendance or Termination (VA Form 21–8960).

OMB Control Number: 2900–0458.

Type of Review: Revision of a currently approved collection.

Abstract: VA compensation and pension programs require current information to determine eligibility for benefits. VA Form 21–8960 solicits information that is needed to determine continued benefit eligibility for schoolchildren between the ages of 18 and 23. If the collection were not conducted or were conducted less frequently, VA would be unable to verify continued entitlement in a timely manner, and increased overpayments would result. No changes have been made to this form. The respondent burden has decreased due to the estimated number of receivables averaged over the past year.

Affected Public: Individuals or Households.

Estimated Annual Burden: 219 hours.

Estimated Average Burden per Respondent: 10 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 1,314 per year.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

Agency Information Collection Activity: Request for Employment Information in Connection With Claim for Disability Benefits

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed revision of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before July 1, 2024.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0065'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0065'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: 38 U.S.C. 1502, 38 CFR 3.340 through 3.342.

Title: Request for Employment Information in Connection with Claim

for Disability Benefits (VA Form 21–4192).

OMB Control Number: 2900–0065.

Type of Review: Revision of a currently approved collection.

Abstract: VA Form 21–4192 is used to gather necessary employment information from veterans' employers so VA can determine eligibility to increased disability benefits based on unemployability. Without this information, determination of entitlement would not be possible. No changes have been made to this form. The respondent burden has increased due to the estimated number of receivables averaged over the past year.

Affected Public: Private Sector.

Estimated Annual Burden: 12,183 hours.

Estimated Average Burden per Respondent: 15 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 48,730 per year.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

Part II

Department of Energy

10 CFR Part 900

Coordination of Federal Authorizations for Electric Transmission Facilities; Final Rule

DEPARTMENT OF ENERGY

10 CFR Part 900

[DOE–HQ–2023–0050]

RIN 1901–AB62

Coordination of Federal Authorizations for Electric Transmission Facilities

AGENCY: Grid Deployment Office, U.S. Department of Energy.

ACTION: Final rule.

SUMMARY: The Department of Energy (DOE) is amending its regulations for the timely coordination of Federal authorizations for proposed interstate electric transmission facilities pursuant to the Federal Power Act (FPA). Specifically, DOE is establishing an integrated and comprehensive Coordinated Interagency Transmission Authorizations and Permits Program (CITAP Program); making participation in the Integrated Interagency Pre-Application (IIP) Process a pre-condition for assistance under the CITAP Program; re-establishing the IIP Process as an iterative and collaborative process between the proponent of a proposed electric transmission project and Federal and State agencies to develop information needed for Federal authorizations; requiring the project proponent to engage in robust engagement with the public, communities of interest, and Indian Tribes during the IIP Process; aligning and harmonizing the IIP Process and implementation of the FPA with the Fixing America's Surface Transportation Act; and ensuring that DOE may carry out its statutory obligation to prepare a single environmental review document sufficient for the purposes of all Federal authorizations necessary to site a proposed project.

DATES: This rule is effective May 31, 2024.

FOR FURTHER INFORMATION CONTACT: Liza Reed, U.S. Department of Energy, Grid Deployment Office, 4H–065, 1000 Independence Avenue SW, Washington, DC 20585. Telephone: (202) 586–2006. Email: *CITAP@hq.doe.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

In this final rule, the Department of Energy (DOE) is amending its regulations under section 216(h) of the Federal Power Act (16 U.S.C. 824p(h)) (FPA) to establish a Coordinated Interagency Transmission Authorizations and Permits Program (CITAP Program) under which DOE will coordinate and expedite Federal authorizations and environmental reviews required to site proposed electric transmission facilities, which may include reviews pursuant to the National Environmental Policy Act of 1969 (Pub. L. 91–190, as amended, 42 U.S.C. 4321 *et seq.*) (NEPA), the National Historic Preservation Act (Pub. L. 89–665, as amended, 54 U.S.C. 30010 *et seq.*) (NHPA), the Endangered Species Act of 1973 (Pub. L. 93–205, as amended, 16 U.S.C. 1531 *et seq.*) (ESA), and evaluations necessary for authorizations under the Federal Land Policy and Management Act (Pub. L. 94–579, as amended, 43 U.S.C. 1701 *et seq.*). DOE coordination under this final rule will increase the efficiency and effectiveness of the Federal authorization and review process for proposed electric transmission facilities by establishing pre-application procedures designed to collect the information needed to perform efficient and timely Federal authorization and environmental reviews, reducing duplication of effort through preparation of a single environmental review document as the basis for all Federal decisions, and setting binding schedules for the completion of all Federal authorizations and environmental reviews. In doing so, this final rule aims to reduce the time it takes to site and permit the electric transmission infrastructure needed to ensure the delivery of reliable, resilient and low-cost electricity to American homes and businesses.

Actions to enable more rapid deployment of electric transmission are more important than ever. As DOE documented in its 2023 National Transmission Needs Study, additional transmission capacity is needed in nearly every region of the country to improve the reliability and resilience of electric service, alleviate high costs caused by transmission congestion and constraints that prevents low-cost energy from reaching customers, and access new low-cost low carbon energy supplies to serve increasing electricity demands.[1] Over the past decade additional transmission capacity has been added at half the rate of the previous three decades, at a time when electricity demand is increasing and new diverse sources of electricity generation are needed to serve that demand and meet Federal, State, and consumer goals to reduce greenhouse gas emissions from the electricity sector.[2] Accelerating the current pace of transmission infrastructure investment and deployment is needed to meet these objectives and will generate multiple benefits to the public, including improved reliability and resilience, lower electricity costs, additional economic activity, and reduced greenhouse gas emissions. By enabling rapid development of transmission capacity, the CITAP Program will help increase access to a diversity of generation sources, reduce transmission congestion and power-sector emissions, and deliver reliable, affordable power that future consumers will need when and where they need it.

On August 23, 2023, in accordance with section 216(h) of the FPA and a

[2] Jenkins, J.D. *et al.* (2022) *Electricity transmission is key to unlock the full potential of the Inflation Reduction Act, Zenodo.* Available at: *https://zenodo.org/record/7106176#:~:text=Previously%2C%20REPEAT%20Project%20estimated%20that%20IRA%20could%20cut,from%20electric%20vehicles%2C%20heat%20pumps%2C%20and%20other%20electrification.*

May 2023 Memorandum of Understanding (MOU) among nine Federal agencies committing to expedite the siting, permitting, and construction of electricity transmission infrastructure through more effective implementation of section 216(h) of the FPA, DOE issued a notice of proposed rulemaking (NOPR), to establish the CITAP Program. (88 FR 57011).[3] Under the CITAP Program, the entity or individual heading the project (''project proponent'') will work with DOE and other Federal agencies to gather materials necessary to inform the completion of authorizations and environmental reviews. These materials include thirteen reports the project proponent will prepare that describe the proposed project and its potential impacts on resources including land, water, plant and animal life (''resource reports''); a summary of the proposed project that will include details on which Federal authorizations or permits may be necessary and the anticipated timeline to completion of acquiring the described authorizations and permits; and proposed project participation and public engagement plans, which will outline opportunities for the public to participate in project authorization decisions and ensure sufficient engagement with both communities of interest and relevant stakeholders. This process of collaborative information gathering is referred to as the ''Integrated Interagency Pre-Application Process'' or ''IIP Process.''

Under the CITAP Program, DOE will set intermediate milestones and ultimate deadlines for the review of relevant authorizations and environmental reviews that provide for their completion within two years and establish DOE as the lead agency for the preparation of a single environmental review document, in compliance with NEPA, that supports the decisions of all relevant Federal entities.[4] This final rule confirms the CITAP Program and the restructured and improved IIP Process as described in the NOPR and adopts revisions to the NOPR proposals in response to comments regarding issues such as the Federal evaluation timelines, approaches to environmental reviews, and levels of details required for the Program.

The IIP Process is a project-proponent-driven process. Accordingly, the time to complete the IIP Process and begin the time bound, two-year Federal authorization and environmental review period depends on the preparation and responsiveness of the project proponent. This final rule establishes a series of checkpoints in the IIP Process (the three anchor meetings described below) and requirements for the pre-application materials that project proponents must develop to proceed through the Process (principally, resource reports and public participation and engagement plans, which are to be developed with guidance from Federal entities). The timeline for completing the pre-application process and proceeding through these checkpoints will depend, in large part, on the readiness and responsiveness of project proponents. As discussed further below, DOE has revised the NOPR proposals in this final rule to reduce the time reserved for DOE to review and respond to the requested information within the IIP Process to just over six months. Coupled with the two-year timeline that DOE and signatories to the 2023 Memorandum of Understanding Regarding Facilitating Federal Authorizations for Electric Transmission Facilities (2023 MOU) agreed to for review of applications and related environmental review, DOE expects that the CITAP Program will substantially reduce the time necessary for permitting of transmission facilities.

In response to the NOPR, DOE received 50 comments during the public comment period, as well as stakeholder input during the public webinar and additional briefing provided by the Grid Deployment Office in DOE that will be administering the CITAP Program. In this final rule, DOE is making several changes to the regulatory text proposed in the NOPR in response to public comments.

DOE received 27 comments in support of the CITAP Program, and several specifically supporting the IIP Process, the Federal decision-making timeline, and the requirement for the thirteen resource reports. Commenters specifically lauded the resource reports for their early and meaningful public engagement components, their effectiveness in coordinating decision-making across different Federal agencies, and their essential role in allowing the subsequent authorization and environmental review processes to be completed within two years. Commenters also affirmed the need for DOE to serve as the Lead Agency for NEPA review, section 106 of the NHPA, and section 7 of the ESA for projects in the CITAP Program to ensure that its objective of making transmission permitting processing more effective and efficient is realized.

The received comments were also instrumental in identifying opportunities to streamline the IIP Process further to ensure that these objectives are met. The IIP Process proposed in the NOPR would have provided, at a maximum, 240 days for DOE evaluation and determinations of completeness and readiness to move to the next steps in the process. In response to comments requesting more efficiency, in this final rule that timeline has been reduced by 55 days by streamlining notification and convening timelines to now total 185 days at a maximum. Additional reductions to documentation timelines, which do not impact decision making, total 45 days, reducing all IIP Process activity by 100 days. As noted previously, however, the total timeline to complete the IIP Process will vary in each individual case based on the project proponent's preparation and responsiveness and the project's readiness to proceed to Federal authorization and environmental reviews. Project proponents will move most quickly through the IIP Process and Federal authorization and environment review processes by ensuring their projects are ready to proceed and by ensuring they are responsive to DOE and Federal agency requests for information.

Section VI of this document discusses several other major issues raised by commenters and provides DOE's responses.

II. Background and Authority

The electric transmission system is the backbone of the United States' electricity system, connecting electricity generators to distributors and customers across the nation. Electric transmission facilities often traverse long distances and cross multiple jurisdictions, including Federal, State, Tribal, and private lands. To receive Federal financial support or build electric transmission facilities on or through Federal lands and waters, project

[3] The nine 2023 MOU signatory agencies are USDA, DOC, DOD, DOE, DOI, EPA, Federal Permitting Steering Improvement Steering Council (Permitting Council), CEQ, and the Office of Management and Budget (OMB). The 2023 MOU is publicly available at *https://www.whitehouse.gov/wp-content/uploads/2023/05/Final-Transmission-MOU-with-signatures-5-04-2023.pdf.*

[4] Section 900.2 of the final rule defines ''Federal entity'' as any Federal agency or department. That section also defines ''relevant Federal entity'' as a Federal entity with jurisdictional interests that may have an effect on a proposed electric transmission project, that is responsible for issuing a Federal authorization for the proposed project, that has relevant expertise with respect to environmental and other issues pertinent to or potentially affected by the proposed project, or that provides funding for the proposed project. The term includes participating agencies. The term includes a Federal entity with either permitting or non-permitting authority; for example, those entities with which consultation or review must be completed before a project may commence, such as DOD for an examination of military test, training or operational impacts.

developers often must secure authorizations from one or multiple Federal agencies, which can take considerable time and result in costly delays.

Recognizing the need for increased efficiency in the authorization process for transmission facilities, the Energy Policy Act of 2005 (Pub. L. 109–58) (EPAct) established a national policy to enhance coordination and communication among Federal agencies with authority to site electric transmission facilities. Section 1221(a) of EPAct added a new section 216 to Part II of the FPA, which sets forth provisions relevant to the siting of interstate electric transmission facilities. Section 216(h) of the FPA, ''Coordination of Federal Authorizations for Transmission Facilities,'' requires DOE to coordinate all Federal authorizations and related environmental reviews needed for siting interstate electric transmission projects, including NEPA reviews, permits, special use authorizations, certifications, opinions, or other approvals required under Federal law.

Among other things, it authorizes DOE to act as the lead agency for Federal coordination and reviews and requires the Secretary of Energy, to the maximum extent practicable under Federal law, to coordinate the Federal authorization and review process with any Indian Tribes, multi-state entities, and State agencies that have their own separate permitting and environmental reviews. 16 U.S.C. 824p(h)(2)–(3). Relatedly, section 216(h) requires the Secretary to provide an ''expeditious'' pre-application mechanism for prospective project proponents; directs the Secretary to establish prompt and binding intermediate milestones and ultimate deadlines for the review of, and Federal authorization decisions relating to, the proposed facility; and provides a mechanism through which a project proponent or any State where the facility would be located may appeal to the President for review, if an agency fails to act within those deadlines or denies an application. 16 U.S.C. 824p(h)(4), (h)(6). The statute also directs the Secretary to prepare, in consultation with the affected agencies, a single environmental review document to be used as the basis for all decisions on the proposed project under Federal law, and to determine, for each Federal land use authorization that must be issued, whether the duration of such authorization is commensurate with the facility's anticipated use. 16 U.S.C. 824p(h)(5)(A); (h)(8)(A).

As discussed in the proposed rule, in May 2023 DOE entered into an implementing MOU with eight other agencies to unlock these benefits. The 2023 MOU expanded upon prior efforts to ensure pre-construction coordination and provides updated direction to Federal agencies in expediting the siting, permitting, and construction of electric transmission facilities. DOE subsequently published a NOPR in August 2023 to update and expand on its existing pre-application mechanism provided in regulations at 10 CFR part 900. Through this rule, DOE amends its section 216(h) implementing regulations to more effectively implement this authority and better coordinate review of Federal authorizations for proposed interstate electric transmission facilities.

For the reasons explained in the following sections, in this final rule, DOE adopts its proposal in the NOPR, with modifications discussed below.

III. Summary of the Final Rule

This final rule is needed for DOE to update its regulations implementing section 216(h) to establish the CITAP Program, improve the IIP Process, and provide for the coordinated review of applications for Federal authorizations necessary to site transmission facilities. DOE's previous implementing regulations structured the IIP Process around two anchor meetings: the Initial and Close-Out meetings. To inform Federal agency coordination, project proponents were required to submit a project summary, an affected environmental resources and impacts summary, a summary of early identification of project issues, and data including maps and geospatial information. Additionally, the regulations included a process for identifying the NEPA lead agency and for establishing a preliminary NEPA review schedule. These regulations did not establish DOE as the lead agency for NEPA review, nor address important environmental and resource reviews under NHPA or ESA. Notably, these regulations did not establish a process through which DOE would set binding milestones for environmental reviews and Federal permitting and authorization decisions.

In this final rule, DOE first establishes a comprehensive and integrated CITAP Program. The CITAP Program is the vehicle through which DOE will implement its authority as defined in Section 216(h) of the FPA, beginning with the IIP Process through the DOE-led environmental review and including DOE's coordination of the schedule for the Federal decisions on permits and authorizations.

Under the CITAP Program, DOE: (i) provides for an effective IIP Process to facilitate timely submission of materials necessary to inform Federal authorizations and related environmental reviews required under Federal law; (ii) sets intermediate milestones and ultimate deadlines for the review of such authorizations and environmental reviews; and (iii) serves as the lead agency for the preparation of a single environmental review document in compliance with NEPA, designed to serve the needs of all relevant Federal entities and effectively inform their corresponding Federal authorization decisions. These elements of the CITAP Program are described in more detail throughout this rule.

Second, pursuant to the FPA, DOE makes the IIP Process a mandatory precondition for participation in the CITAP Program. A project proponent's participation in the IIP Process is necessary for the success of the other elements of the CITAP Program and for the Secretary's satisfaction of the statutory obligations imposed by section 216(h) and affords a unique opportunity for project proponents to provide essential information and to coordinate with Federal entities prior to submission of applications for Federal authorizations. DOE has determined that it will not be able to fulfill its role as lead agency under section 216(h)—including the establishment of binding deadlines—for projects that do not complete the IIP Process. DOE does not require the participation of any Federal or non-Federal entity in the IIP Process; rather Federal entities have agreed to participate through the 2023 MOU and non-Federal entities may participate at their discretion. As discussed further below, DOE concludes that the benefits of participating in the IIP Process, and the resulting access to the CITAP Program, justify the costs to project proponents. The CITAP Program will substantially accelerate the process by which transmission projects are permitted and developed, and the benefits of the expected reduction in permitting timelines are likely to significantly exceed the cost of participating in the IIP Process.

Third, this final rule improves the IIP Process to ensure that it provides project proponents and Federal entities an opportunity to identify as early as possible potential environmental and community impacts associated with a proposed project. The IIP Process is intended to ensure that necessary information is provided to the relevant Federal entities in a timely and coordinated fashion; it is also intended to avoid the duplication of cost and effort that project proponents and Federal entities face in navigating the

series of authorizations necessary to site a transmission line and to allow both the project proponent and the Federal entities to avoid time- and resource-consuming pitfalls that would otherwise appear during the application process. Accordingly, DOE requires that project proponents submit resource reports and public participation and engagement plans, developed with guidance from Federal entities, and participate in a series of iterative meetings to ensure that Federal entities have ample opportunities to provide this guidance. The resource reports are intended to develop data and materials that will facilitate Federal entities' review of the project proponent's applications under the applicable Federal statutes. The early engagement facilitated by the submission of public participation and engagement plans will inform a project proponent's development of a proposed project. This early engagement begins before an application is submitted to the Federal Government and provides opportunities for Tribes and communities to express their views early in the process and to share their concerns directly with project proponents. However, the IIP Process does not relieve the relevant Federal entities of their legal obligation to comply with applicable requirements to consult with Tribes and engage with communities. This rule provides that the total time for DOE reviews and responses in the IIP Process is 185 days.[5] Based on that timeline for DOE decision-making, DOE expects that a prepared and responsive project proponent could complete the IIP Process within a year.

Fourth, pursuant to Congress's express directive in section 216(h)(4), DOE introduces the standard schedule and project-specific schedules, through which DOE will establish binding intermediate milestones and ultimate deadlines for Federal authorizations and related environmental reviews. The standard schedule identifies the steps generally needed to complete decisions on all Federal environmental reviews and authorizations for a proposed electric transmission project, including recommended timing for each step so as to allow final decisions on all Federal authorizations within two years of the publication of a notice of intent (NOI) to prepare an environmental review document. This document serves as a template for the development of project-specific schedules. During the IIP Process, DOE and relevant Federal entities will prepare a project-specific schedule, informed by the standard schedule, that establishes prompt and binding intermediate milestones and ultimate deadlines for the review of, and Federal authorization decisions relating to, a proposed electric transmission project, accounting for relevant factors particular to the specific proposed project, including the need for early and meaningful consultation with potentially affected Indian Tribes and engagement with stakeholders.

Fifth, DOE simplifies the development of an administrative record by incorporating the IIP Process administrative file into a single docket that contains all the information assembled and utilized by the relevant Federal entities as the basis for Federal authorizations and related reviews. DOE will maintain that docket, which will be available to the public upon request except as restricted due to confidentiality or protected information processes. Access to, and restrictions of access to, the docket will be addressed at the time of project-specific implementation.

Sixth, DOE amends its regulations to provide that DOE will serve as the lead NEPA agency and that, in collaboration with any NEPA joint lead agency[6] determined pursuant to procedures established by these regulations and the 2023 MOU and in coordination with the relevant Federal entities, DOE will prepare a single environmental review document to serve as the NEPA document for all required Federal authorizations. DOE will also serve as lead for consultation under section 106 of the NHPA and section 7 of the ESA for projects in the CITAP Program, unless the relevant Federal entities designate otherwise. As additional projects utilize the CITAP Program, DOE anticipates that it will be able to improve upon its NEPA processes, ultimately leading to greater efficiencies for both project proponents and Federal agencies. Relatedly, the rule provides that DOE and the relevant Federal entities shall issue, except where inappropriate or inefficient, a joint decision document.

Finally, DOE provides that the primary scope of the CITAP Program is on-shore high-voltage or regionally or nationally significant transmission projects that are expected to require preparation of an environmental impact statement (EIS) and establishes procedures through which projects outside of that primary scope can seek a determination of qualifying-project status from the Grid Deployment Office on a case-by-case basis.

IV. Tribal Sovereignty

DOE affirms the sovereignty of Federally recognized Indian Tribes and confirms that this final rule makes no changes to Federal agencies' government-to-government responsibilities. Tribal sovereignty refers to Federally recognized Indian Tribes' original, inherent authority to govern themselves, their lands, and their resources. Because of their unique status as sovereigns, Federally recognized Tribes have a direct, government-to-government relationship with the Federal government. The United States has a general, ongoing trust relationship with Indian Tribes as well as with the Native Hawaiian Community. Neither section 216(h) nor this final rule in any way alters that relationship.

Tribal and Native Hawaiian consultation is a process for communication between the Federal government and Indian Tribes and the Native Hawaiian Community that is grounded in the government-to-government or the government-to-sovereign relationship, respectively. Tribal and Native Hawaiian consultation may be required as part of compliance with section 106 of the NHPA, or may arise from other Federal authorities such as Executive Order 13007 or the Presidential Memorandum on Uniform Standards for Tribal Consultation (2022). Agencies often consult with Indian Tribes and the Native Hawaiian Community in conjunction with fulfilling their obligations under NEPA. Consistent with these requirements and authorities, during implementation of the CITAP Program, DOE commits to undertake Tribal and Native Hawaiian consultation as appropriate. Also as appropriate, DOE commits to designate Indian Tribes with special expertise regarding a qualifying project, including knowledge about sacred sites that the project could affect, that are eligible, to become cooperating agencies under NEPA, and to consult with Indian Tribes and Native Hawaiian Organizations as required by the NHPA in the Section 106 process. Finally, DOE clarifies that the IIP Process, resource reports, and other submissions are not

[5] This excludes meeting information summaries, which DOE does not categorize as review and response time that could impact a project timeline, because preparation of required information for subsequent IIP Process steps can happen in parallel.

[6] As discussed in section V.D of this document, DOE is replacing the term ''NEPA co-lead agency'' from the proposed regulatory text with ''NEPA joint lead agency'' in this final rule. The change is non-substantive. For clarity and readability, DOE uses the term ''NEPA joint lead agency'' throughout the preamble in place of ''NEPA co-lead agency'' even when discussing a comment or document that originally referred to a ''NEPA co-lead agency.''

intended to, nor will they, satisfy DOE's or other Federal agencies' legal obligations and responsibilities under the relevant statutes, such as NEPA, NHPA, and ESA. The Federal agencies remain legally responsible for their compliance with the applicable statutes.

V. Terminology and Clarification Changes

In this final rule, DOE has made a number of changes to ensure consistent use of terminology across part 900.

A. ''Project Area'' v. ''Study Corridor'' v. ''Route''

The proposed rule used several terms related to areas. In this final rule, DOE has ensured that the usage of these terms is consistent. DOE clarifies here their meaning and use. For the area containing the study corridors selected by the project proponent for in-depth consideration and the immediate surroundings of the end points of the proposed electric transmission facility, DOE uses the term ''project area.'' For a location within a project area where multiple transmission line designs may be contemplated, DOE used the term ''study corridor''; within the project area, there may be multiple study corridors. Within a given study corridor, DOE refers to ''potential routes'' or ''route segments''; within the study corridor, there may be multiple potential routes or route segments.

Notably, DOE revises the definition of project area from what was proposed by replacing ''containing all study corridors'' with ''containing the study corridors selected by the project proponent for in-depth consideration'' to clarify the scope of this term. Additionally, to clarify the role of study corridors, DOE added to the study corridors definition that ''study corridor does not necessarily coincide with 'permit area,' 'area of potential effect,' 'action area,' or other defined terms that are specific to types of regulatory review.''

The proposed rule used multiple terms to refer to a route of an electric transmission line that is considered during the IIP Process, including ''proposed route'' and ''potential route.'' This final rule replaces these synonymous terms with ''potential route.''

B. ''Potential Project'' v. ''Qualifying Project'' v. ''Transmission Facility''

The proposed rule used several terms to refer to an electric transmission facility that is proposed to be sited and constructed, including ''transmission facility'' and ''electric transmission facility.'' This final rule replaces these terms with ''proposed electric transmission facility,'' which is shortened to ''proposed facility'' when the identity of the facility is clear from the context.

Similarly, the proposed rule included a variety of phrases to refer to an electric transmission project, including ''qualifying project,'' ''electric transmission project,'' ''proposed qualifying project,'' ''proposed undertaking'' and ''project.'' This final rule replaces these terms with ''proposed electric transmission project,'' which is shortened to ''proposed project'' when the identity of the project is clear from the context. While the revision replaces the defined term ''qualifying project'' in a number of instances, the revision has no substantive effect, because any proposed electric transmission project that is accepted into the IIP Process must involve a proposed electric transmission facility that is a qualifying project.

C. ''Plants'' v. ''Vegetation''

The proposed rule used several terms to describe plant life, such as ''plant life,'' ''plants'' and ''vegetation.'' DOE has revised this final rule to consistently use the term ''plants,'' except where the rule uses an established term of art such as ''vegetation management'' or for consistency with Resource Report naming across agencies.

D. ''NEPA Co-Lead Agency'' vs ''NEPA Joint Lead Agency''

The proposed rule used the term ''NEPA co-lead agency'' to refer to a Federal entity that may be designated under § 900.11 to share the responsibilities of DOE as lead agency in preparing an environmental review document. DOE has revised the final rule to replace that term with ''NEPA joint lead agency'' to better conform with the terminology used in NEPA, as amended by Section 321 of the Fiscal Responsibility Act of 2023 (Pub. L. 118–5). The change is non-substantive and only reflects a difference in terminology.

VI. Discussion of Comments

A. General

In response to the NOPR, DOE received 50 sets of comments from the following persons and groups:
