Director, National Quality Program	HARRY S. HERTZ
Director, National Technical Information Service	DONALD W. CORRIGAN, <i>Acting</i>
Deputy Director	DONALD W. CORRIGAN

The Department of Commerce encourages, serves, and promotes the Nation's international trade, economic growth, and technological advancement. The Department provides a wide variety of programs through the competitive free enterprise system. It offers assistance and information to increase America's competitiveness in the world economy; administers programs to prevent unfair foreign trade competition; provides social and economic statistics and analyses for business and government planners; provides research and support for the increased use of scientific, engineering, and technological development; works to improve our understanding and benefits of the Earth's physical environment and oceanic resources; grants patents and registers trademarks; develops policies and conducts

research on telecommunications; provides assistance to promote domestic economic development; and assists in the growth of minority businesses.

The Department was designated as such by act of March 4, 1913 (15 U.S.C. 1501), which reorganized the Department of Commerce and Labor, created by act of February 14, 1903 (15 U.S.C. 1501), by transferring all labor activities into a new, separate Department of Labor. The Department of Commerce (DOC) is composed of the Office of the Secretary and the operating units.

Office of the Secretary

Secretary The Secretary is responsible for the administration of all functions and authorities assigned to the Department of Commerce and for advising the President on Federal policy and programs affecting the industrial and commercial segments of the national economy. The Secretary is served by the offices of Deputy Secretary, Inspector General, General Counsel, and the Assistant Secretaries of Administration, Legislative and Intergovernmental Affairs, and Public Affairs. Other offices whose public purposes are widely administered are detailed below.

Business Liaison This office develops and promotes a cooperative working relationship and ensures effective communication between the Department of Commerce and the business community. The Office's objectives are to keep the business community aware of Department and administration resources, policies, and programs, and to keep Department and administration officials aware of issues of concern to business. The Office also promotes business involvement in departmental policymaking and program development, and provides technical assistance to businesses that desire help in dealing with the Government.

For further information, call 202-482-3942.

Consumer Affairs This office seeks to promote a better understanding between

businesses and consumers, to help business improve the quality of their services, to educate consumers to make wise purchasing decisions, and to provide the consumer viewpoint in the development of economic policy. Through a variety of programs, the Office works with businesses, consumers, Government agencies, and international organizations to develop innovative ways to encourage American businesses to become more competitive both in the United States and in the global marketplace.

For further information, contact the Office of Consumer Affairs, U.S. Department of Commerce, Room H5718, Washington, DC 20230. Phone, 202-482-5001. Fax, 202-482-6007. E-mail, caffairs@doc.gov.

Small and Disadvantaged Business

Utilization The Office of Small and Disadvantaged Business Utilization (OSDBU) serves as the principal departmental advocate for small, minority, and women business owners. It assures that small firms fully participate in Commerce programs and receive the maximum amount of Commerce contract and subcontract dollars.

The Office is the focal point of the Department's constant efforts to increase awards to small firms by searching for opportunities to match with the capabilities of small, minority, and women-owned firms.

It informs the small business community about Commerce opportunities by publishing the *Annual Forecast of Contracts*, by individual counseling, and by participating with other Federal agencies and trade associations at procurement fairs.

The Office of Small and Disadvantaged Business Utilization was established by the Small Business Act, as amended (15 U.S.C. 644).

For further information, call 202-482-1472.

DEPARTMENT OF COMMERCE

Economics and Statistics Administration

The Under Secretary for Economic Affairs advises the Secretary and other Government officials on matters relating to economic developments and forecasts and on the development of macroeconomic and microeconomic policy. The Under Secretary, as Administrator of the Economics and Statistics Administration, exercises

general supervision over the Bureau of the Census and the Bureau of Economic Analysis.

Current economic data are available to the public through the STAT-USA Internet (<http://www.stat-usa.gov>), the National Trade Data Bank, and the Economic Bulletin Board.

For further information, call 800-782-8872.

Bureau of the Census

[For the Bureau of the Census statement of organization, see the *Federal Register* of Sept. 16, 1975, 40 FR 42765]

The Bureau of the Census was established as a permanent office by act of March 6, 1902 (32 Stat. 51). The major functions of the Bureau are authorized by the Constitution, which provides that a census of population shall be taken every 10 years, and by laws codified as title 13 of the United States Code. The law also provides that the information collected by the Bureau from individual persons, households, or establishments be kept strictly confidential and be used only for statistical purposes.

The principal functions of the Bureau include:

- decennial censuses of population and housing;
- quinquennial censuses of State and local governments, manufacturers, mineral industries, distributive trades, construction industries, and transportation;
- current surveys that provide information on many of the subjects covered in the censuses at monthly, quarterly, annual, or other intervals;

—compilation of current statistics on U.S. foreign trade, including data on imports, exports, and shipping;

—special censuses at the request and expense of States and local government units;

—publication of estimates and projections of the population;

—publication of current data on population and housing characteristics; and

—current reports on manufacturing, retail and wholesale trade, services, construction, imports and exports, State and local government finances and employment, and other subjects.

The Bureau makes available statistical results of its censuses, surveys, and other programs to the public through printed reports, computer tape, CD-ROM's, the Internet, and other media and prepares special tabulations sponsored and paid for by data users. It also produces statistical compendia, catalogs, guides, and directories that are useful in locating information on specific subjects. Upon request, the Bureau makes searches of decennial census records and furnishes certificates to individuals for use as evidence of age, relationship, or place of birth. A fee is charged for searches.

Bureau of Economic Analysis

[For the Bureau of Economic Analysis statement of organization, see the *Federal Register* of Dec. 29, 1980, 45 FR 85496]

The Bureau of Economic Analysis (BEA) is the Nation's economic accountant—integrating and interpreting a variety of source data to draw a complete and consistent picture of the U.S. economy. Its economic accounts provide information on such key issues as economic growth, regional development, and the Nation's position in the world economy.

The national income and product accounts—featuring gross domestic product—provide a quantitative view of the production, distribution, and use of the Nation's output. The Bureau also

prepares estimates of the Nation's tangible wealth and input-output tables that show how industries interact.

The regional economic accounts provide estimates of personal income, population, and employment for regions, States, and metropolitan areas. The Bureau prepares estimates of gross state product and projections of regional economic activity.

The international economic accounts encompass U.S. international transactions (balance of payments) with foreign countries and the international investment position of the United States. The Bureau provides survey-based data on foreign direct investment in the U.S. and U.S. direct investment abroad.

For further information, contact the Public Information Office, Bureau of Economic Analysis, Department of Commerce, Washington, DC 20230. Phone, 202-606-9900. Fax, 202-606-5310.

Bureau of Export Administration

[For the Bureau of Export Administration statement of organization, see the *Federal Register* of June 7, 1988, 53 FR 20881]

The Bureau of Export Administration was established as a separate agency within the Department of Commerce on October 1, 1987, to separate the functions of export promotion and export control as mandated by the Export Administration Act, as amended (50 U.S.C. app. 2401 *et seq.*).

The Bureau directs the Nation's export control policy. Major functions include processing license applications, conducting foreign availability studies to determine when products should be decontrolled, and enforcing U.S. export control laws.

Export Administration This office oversees export licensing, technology

and policy analysis, economic security and nonproliferation issues, and foreign availability determinations. These activities are instrumental in reducing processing time for granting export licenses and in keeping the list of controlled technology consistent with current risks. This office also works with our allies in seeking stronger, more uniform ways of controlling strategic exports.

Export Enforcement This office investigates breaches of U.S. export control laws and analyzes export intelligence to assess diversion risks. In addition, this office administers and enforces the antiboycott provisions of the Export Administration Act.

Economic Development Administration

The Economic Development Administration (EDA) was created in 1965 under the Public Works and Economic Development Act (42 U.S.C. 3121) as part of an effort to target Federal resources to economically distressed areas and to help develop local economies in the United States. It was mandated to assist rural and urban communities that were outside the mainstream economy and that, as a result, lagged in economic development, industrial growth, and personal income.

The Administration's economic development assistance programs (EDAP's) are carried out through a network of headquarters and regional personnel. It provides grants for public works and development facilities, planning and coordination, defense conversion, and other financial assistance that help to reduce substantial and persistent unemployment in economically distressed areas.

Public works and development facilities grants support infrastructure projects that foster the establishment or

expansion of industrial and commercial businesses, supporting the retention and creation of jobs.

Planning grants support the design and implementation of effective economic development policies and programs, by local development organizations, in States and communities.

Technical assistance grants provide for local feasibility and industry studies, management and operational assistance, natural resource development, and export promotion. In addition, EDA funds a network of university centers that provides technical assistance.

Research, evaluation, and demonstration funds are used to support studies about the causes of economic distress and to seek solutions to counteract and prevent such problems.

Economic readjustment grants help communities adjust to a gradual erosion or sudden dislocation of their local economic structure.

Defense conversion grants assist communities adversely affected by Department of Defense base closures and defense contract cutbacks, as well as Department of Energy realignments, by providing development tools that can be effectively and easily implemented.

The Trade Adjustment Assistance Program provides technical assistance to certified firms and industries which have been economically injured by the impact of decreased imports. Comprehensive technical assistance is provided through the Department's wide-ranging network of assistance centers.

International Trade Administration

[For the International Trade Administration statement of organization, see the *Federal Register* of Jan. 25, 1980, 45 FR 6148]

The International Trade Administration was established on January 2, 1980, by the Secretary of Commerce to promote world trade and to strengthen the international trade and investment position of the United States.

The Administration is headed by the Under Secretary for International Trade, who coordinates all issues concerning trade promotion, international commercial policy, market access, and trade law enforcement. The Administration is responsible for nonagricultural trade operations of the U.S. Government and supports the trade policy negotiation efforts of the U.S. Trade Representative.

Import Administration The Office of the Assistant Secretary for Import Administration defends American industry against injurious and unfair trade practices by administering efficiently, fairly, and in a manner consistent with U.S. international trade obligations the antidumping and countervailing duty laws of the United States; the machine tool arrangements with Japan and Taiwan under the President's Machine Tool Program. The Office ensures the proper administration of foreign trade zones and advises the Secretary on establishment of new zones; and administers programs

governing watch assemblies, and other statutory import programs.

Market Access and Compliance The Office of the Assistant Secretary for Market Access and Compliance advises on the analysis, formulation, and implementation of U.S. international economic policies and carries out programs to promote international trade, improve access by U.S. companies to overseas markets, and strengthen the international trade and investment position of the United States. Through the five regional Deputy Assistant Secretaries (Europe; Western Hemisphere; Asia and the Pacific; Africa and the Near East; and Japan), the Office analyzes and develops recommendations for region- and country-specific international economic, trade, and investment policy strategies and objectives. In addition, the Office is responsible for implementing, monitoring, and enforcing foreign compliance with bilateral and multilateral trade agreements.

Trade Development The Office of the Assistant Secretary for Trade Development advises on international trade and investment policies pertaining to U.S. industrial sectors, carries out programs to strengthen domestic export competitiveness, and promotes U.S. industry participation in international markets. The Office manages an integrated trade development program that includes industry analysis and trade

promotion organized by industry sectors, including technology and aerospace; basic industries; service industries and finance; textiles, apparel, and consumer goods; environmental technologies; and tourism.

U.S. and Foreign Commercial Service

The U.S. and Foreign Commercial Service develops, produces, markets, and manages an effective line of high-quality products and services geared to the marketing information needs of the U.S. exporting and international business

community. The Service delivers programs through 100 U.S. export assistance centers located in the United States, and 141 posts located in 76 countries throughout the world. It supports overseas trade promotion events; manages a variety of export promotion services and products; promotes U.S. products and services throughout the world market; conducts conferences and seminars in the United States; and assists State and private-sector organizations on export financing.

Minority Business Development Agency

[For the Minority Business Development Agency statement of organization, see the *Federal Register* of Mar. 17, 1972, 37 FR 5650, as amended]

The Minority Business Development Agency, formerly the Office of Minority Business Enterprise, was established by the Secretary of Commerce on November 1, 1979, and operates under the authority of Executive Order 11625 of October 13, 1971. The Agency develops and coordinates a national program for minority business enterprise.

The Agency was created to assist minority businesses in achieving effective and equitable participation in the American free enterprise system and in overcoming social and economic disadvantages that have limited their participation in the past. The Agency provides national policies and leadership in forming and strengthening a partnership of business, industry, and government with the Nation's minority businesses.

Business development services are provided to the minority business

community through three vehicles: the Minority Business Opportunity Committees which disseminate information on business opportunities; the Minority Business Development Centers that provide management and technical assistance and other business development services; and Electronic Commerce which includes a Web page on the Internet that will show how to start a business and use of the Electronic Commerce to electronically match business with contract opportunities.

The Agency promotes and coordinates the efforts of other Federal agencies in assisting or providing market opportunities for minority business. It coordinates opportunities for minority firms in the private sector. Through such public and private cooperative activities, the Agency promotes the participation of Federal, State, and local governments, and business and industry in directing resources for the development of strong minority businesses.

National Oceanic and Atmospheric Administration

U.S. Department of Commerce, Washington, DC 20230

Phone, 202-482-2985. Internet, <http://www.noaa.gov/>.

[For the National Oceanic and Atmospheric Administration statement of organization, see the *Federal Register* of Feb. 13, 1978, 43 FR 6128]

The National Oceanic and Atmospheric Administration (NOAA) was formed on October 3, 1970, by Reorganization Plan No. 4 of 1970 (5 U.S.C. app.). Its principal functions are authorized by Title 15, Chapter 9, United States Code (National Weather Service); Title 33, Chapter 17, United States Code (National Ocean survey), and Title 16, Chapter 9, United States Code (National Marine Fisheries Service).

NOAA is the largest bureau within the Department of Commerce and is integral to providing the Department with an environmental perspective on issues having an impact on the Nation's resources and its economy. NOAA's mission entails environmental assessment, prediction, and stewardship. It is dedicated to monitoring and assessing the state of the environment in order to make accurate and timely forecasts to protect life, property, and natural resources, as well as to promote the economic well-being of the United States and to enhance its environmental security. As the Nation's premier environmental steward, NOAA is committed to protecting America's ocean, coastal, and living marine resources while promoting sustainable economic development.

In order to undertake its mission, NOAA has a strategic plan of seven interrelated goals falling under two broad themes of (1) environmental

assessment and prediction with the goals of advancing short-term warnings and forecasts, implement seasonal to interannual climate forecasts, predict and assess decadal-to-centennial climate change, and promote safe navigation, and (2) environmental stewardship, comprised of the goals to build sustainable fisheries, recover protected species, and sustain healthy coastal ecosystems.

NOAA is structured into five primary component line offices. These are the National Weather Service, the National Environmental Satellite, Data, and Information Service, the National Marine Fisheries Service, the National Ocean Service, and the Office of Oceanic and Atmospheric Research.

National Weather Service

The National Weather Service (NWS) provides daily forecasts and warnings for severe weather events such as hurricanes, tornadoes, winter storms, flooding, and tsunamis. With its modernization program, NWS will be able to maximize its use of advanced computer technology to capture, integrate, and analyze Doppler radar imagery and data from satellites and automated surface instruments, and to speed up the dissemination of its forecasts and warnings. This will allow NWS to provide the public with more localized, timely, and accurate forecasts, increasing the lead time it has to prepare for severe weather events. NWS also

provides services in support of aviation and marine activities, agriculture, forestry, and urban air quality control.

For further information, contact the National Weather Service, 1325 East-West Highway, Silver Spring, MD 20910-3283. Phone, 301-713-0689. Fax, 301-713-0610. Internet, <http://www.nws.noaa.gov/>.

National Environmental Satellite, Data, and Information Service

The National Environmental Satellite, Data, and Information Service (NESDIS) operates the Nation's civilian geostationary and polar-orbiting environmental satellites. It also manages the largest collection of atmospheric, geophysical, and oceanographic data in the world. From these sources, NESDIS develops and provides, through various media, environmental data for forecasts, national security, and weather warnings to protect life and property. This data is also used to assist in energy distribution, the development of global food supplies, the management of natural resources, and in the recovery of downed pilots and mariners in distress.

For further information, contact the National Environmental Satellite, Data, and Information Service, Room 2069, 4401 Suitland Road, Suitland, MD 20233. Phone, 301-457-5115. Fax, 301-457-5276. Internet, <http://www.noaa.gov/nedis/nedis.html/>.

National Marine Fisheries Service

The National Marine Fisheries Service (NMFS) supports the management, conservation, and sustainable development of domestic and international living marine resources. NMFS is involved in the stock assessment of the Nation's multi-billion dollar marine fisheries, protecting marine mammals and threatened species, habitat conservation operations, trade and industry assistance, and fishery enforcement activities.

For further information, contact the National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910. Phone, 301-713-2239. Fax, 301-713-2258. Internet, <http://kingfish.ssp.nmfs.gov/>.

National Ocean Service

The National Ocean Service (NOS), growing out the Nation's oldest scientific agency, Survey of the Coast, established in 1807 by President Thomas Jefferson, has responsibility to chart the Nation's coastlines and airways to ensure safe navigation, as well as managing and protecting coastal and ocean resources. Through its Coastal Zone Management Program, NOS monitors the health of U.S. coasts by examining how use of the near shore impacts on its ecosystem, striving to protect wetlands, water quality, beaches, and wildlife. NOS is also involved in the assessment of hazardous material spills and works to restore or replace areas damaged by such contamination.

For further information, contact the National Ocean Service, Room 13632, 1305 East-West Highway, Silver Spring, MD 20910. Phone, 301-713-3074. Fax, 301-713-4269. Internet, <http://www.nos.noaa.gov/>.

Office of Oceanic and Atmospheric Research

The Office of Oceanic and Atmospheric Research (OAR) carries out research into such phenomena as El Niño, global warming, ozone depletion, solar storms that can disrupt telecommunications and electrical power systems, and coastal and Great Lakes ecosystems. OAR conducts and directs its research programs in coastal, marine, atmospheric, and space sciences through its own laboratories and offices, as well as through networks of university-based programs across the country.

For further information, contact the Office of Oceanic and Atmospheric Research, Room 11627, 1315 East-West Highway, Silver Spring, MD 20910. Phone, 301-713-2458. Fax, 301-713-0163. Internet, <http://www.oar.noaa.gov/>.

Office of NOAA Corps Operations

NOAA also maintains a fleet of ships and aircraft under the auspices of its Office of NOAA Corps Operations. These are used for scientific, engineering, and technical services, as well as to serve as research platforms for gathering critical marine and

atmospheric data in support of a number of NOAA's research programs. This includes flying "hurricane hunter" aircraft into nature's most turbulent

storms to collect data critical to hurricane research.

For further information, contact the Office of NOAA Corps Operations, Room 12857, 1315 East-West Highway, Silver Spring, MD 20910-3282. Phone, 301-713-1045.

National Telecommunications and Information Administration

[For the National Telecommunications and Information Administration statement of organization, see the *Federal Register* of June 5, 1978, 43 FR 24348]

The National Telecommunications and Information Administration (NTIA) was established in 1978 pursuant to Reorganization Plan No. 1 of 1977 (5 U.S.C. app.) and Executive Order 12046 of March 27, 1978 (3 CFR, 1978 Comp., p. 158), by combining the Office of Telecommunications Policy, Executive Office of the President, and the Department of Commerce's Office of Telecommunications to form a new agency reporting to the Secretary of Commerce. Its functions are detailed in the National Telecommunications and Information Administration Organization Act (47 U.S.C. 901 *et seq.*).

The Public Telecommunications Facilities Program (PTFP) was transferred to NTIA in 1979 from the Department of Health, Education, and Welfare pursuant to the Public Telecommunications Financing Act of 1978 (47 U.S.C. 390 *et seq.*), to take advantage of NTIA's technical and policy expertise. Also, NTIA administers the National Endowment for Children's Educational Television under title 47 United States Code, section 394.

The Administration's principal responsibilities and functions include:

- serving as the principal executive branch adviser to the President on telecommunications and information policy;

- developing and presenting U.S. plans and policies at international communications conferences and related meetings;

- prescribing policies for and managing Federal use of the radio frequency spectrum, in accordance with Executive Order 12046, issued under section 305 of the Communications Act of 1934, as amended (47 U.S.C. 305);

- serving as the principal Federal telecommunications research and engineering laboratory, through NTIA's Institute for Telecommunication Sciences (ITS), headquartered in Boulder, Colorado;

- providing grants through the Telecommunications and Information Infrastructure Assistance Program for planning and demonstration projects to promote the goals of the development and widespread availability of advanced telecommunications technologies, to enhance the delivery of social services and generally serve the public interest, to promote access to government information and increase civic participation, and to support the development of an advanced nationwide telecommunications and information infrastructure;

- providing grants through the Public Telecommunications Facilities Program to extend delivery of public telecommunications services to U.S. citizens, to increase ownership and management by women and minorities,

and to strengthen the capabilities of existing public broadcasting stations to provide telecommunications services; and

—monitoring grants awarded through the National Endowment for Children's

Educational Television to enhance the creation and production of educational television programming for children to develop fundamental intellectual skills.

For further information, contact the National Telecommunications and Information Administration, Department of Commerce, Washington, DC 20230. Phone, 202-482-1551.

Patent and Trademark Office

[For the Patent and Trademark Office statement of organization, see the *Federal Register* of Apr. 14, 1975, 40 FR 16707]

The patent system was established by Congress “. . . to promote the progress of . . . the useful arts. . .” under Article I, section 8, U.S. Constitution (title 35, United States Code: Patents). The registration of trademarks is based on the commerce clause of the U.S. Constitution (title 15, United States Code, chapter 22: Trademarks). The Patent and Trademark Office (PTO) grants patents and registers trademarks to qualified applicants.

The Office examines applications for patents to determine if the applicants are entitled to patents under the law and grants the patents when they are so entitled. The patent law provides for the granting of patents in three major categories: utility patents, design patents, and plant patents. The term of a design patent is 14 years from the date of grant. The term of utility and plant patents is 20 years measured from the earliest effective U.S. filing date, if the application for patent was filed on or after June 8, 1995. For utility or plant patents that were in force on June 8, 1995, or that result from an application filed prior to June 8, 1995, the term shall be the longer of 17 years measured from the date of grant or 20 years measured from the earliest effective U.S. filing date.

All utility patents are subject to the payment of maintenance fees. Effective June 8, 1995, applicants may file provisional applications for patents in the PTO. Provisional applications are

available for utility and plant inventions but not design inventions. Provisional applications are not examined and will become abandoned by operation of law within one year of the filing date of the provisional application. The provisional application itself cannot mature into a patent. However, if applicants wish to obtain a patent on the invention disclosed in a provisional application, applicants must file a nonprovisional application not later than 12 months from the filing date of the provisional application.

The Office also issues Statutory Invention Registrations, which have the defensive but not the enforceable attributes of a patent. It also processes international applications for patents under the provisions of the Patent Cooperation Treaty as an International Searching Authority under Chapter I of the Treaty and as an International Preliminary Examining Authority under Chapter II of the Treaty.

Over 122,977 patents providing inventors with exclusive rights were issued for the fiscal year of 1997. Effective January 1, 1996, patentees have the right to exclude others from making, using, offering for sale, or selling the invention throughout the U.S. or importing the invention into the U.S. during the term of their patent. Patents and trademarks may be reviewed and searched in the PTO and in over 80 patent and trademark depository libraries throughout the country. The patent system fosters innovation, investment in developing and marketing inventions,

and prompt disclosure of technological information.

About 112,509 trademarks were registered for fiscal year 1997, and 7,389 trademark registrations were renewed. A trademark includes any distinctive word, name, symbol, device, or any combination thereof adopted and used, or intended to be used, by a manufacturer or merchant to identify his goods or services and distinguish them from those manufactured or sold by others. Trademarks, registered for 10 years, with renewal rights of equal term, are examined by the Office for compliance with various statutory requirements to prevent unfair competition and consumer deception.

In addition to the examination of patent and trademark applications, issuance of patents, and registration of trademarks, the Patent and Trademark Office:

- sells printed copies of issued patents and trademark registrations;

- records and indexes documents transferring ownership;

- maintains a scientific library and search files containing over 30 million documents, including U.S. and foreign patents and U.S. trademarks;

- provides search rooms for the public to research their applications;

- hears and decides appeals from prospective inventors and trademark applicants;

- participates in legal proceedings involving the issue of patents or registration of trademarks;

- advocates strengthening intellectual property protection worldwide;

- compiles the *Official Gazettes*, a weekly notice of patents issued and trademarks registered by the Office, including other information; and

- maintains a roster of patent agents and attorneys qualified and recognized to practice before the Office.

For further information, contact the Office of Public Affairs, Patent and Trademark Office, Washington, DC 20231. Phone, 703-305-8341. The Office's operations are located at 2121 Crystal Drive, Arlington, VA 22202.

Technology Administration

The Technology Administration was established by Congress in 1988 (15 U.S.C. 3704). It is headed by the Under Secretary for Technology, who serves as a principal adviser to the Secretary of Commerce and as the Department's spokesperson for science and technology issues.

The Technology Administration serves as the premier technology agency working with U.S. industry in addressing competitiveness and in exercising leadership both within the Department of Commerce and governmentwide. It discharges this role through the Office of Technology Policy (OTP) by advocating coherent policies for maximizing the impact of technology on economic growth; through the National Institute of Standards and Technology (NIST) by carrying out technology programs with U.S. industry; and through the National

Technical Information Service (NTIS) by disseminating technology information.

The Office of Air and Space Commercialization, in the Office of the Under Secretary, develops policies fostering the competitiveness of the U.S. commercial space sector.

For further information, call 202-482-1575.

Office of Technology Policy

The primary role of the Office of Technology Policy is to offer assistance to private sector and government communities in advocating and pursuing policies that maximize the impact of technology on economic growth, and by exercising leadership to define the role of government in supporting U.S. industrial competitiveness in the post-cold war environment. The Office serves as a liaison to the private sector,

identifying barriers to the rapid commercialization of technology, eliciting support for Administration civilian technology policies, and ensuring that industry's interests are reflected in standards and technology agreements and civilian technology policy. It also assists Federal, State, and local officials, industry, and academic institutions in promoting the technological growth and competitiveness of the U.S. economy.

For further information, call 202-482-5687.

National Institute of Standards and Technology

The National Institute of Standards and Technology (NIST) assists industry in developing technology to improve product quality, modernize manufacturing processes, ensure product reliability, and facilitate rapid commercialization of products based on new scientific discoveries.

The Institute's primary mission is to promote U.S. economic growth by working with industry to develop and apply technology, measurements, and standards. It carries out this mission through four major programs:

- measurement and standards laboratories that provide technical leadership for vital components of the Nation's technology infrastructure needed by U.S. industry to continually improve its products and services. Research is mainly performed in the areas of electronics and electrical engineering, manufacturing engineering, chemical science and technology, physics, materials science and engineering, building and fire research, and information technology;

- a rigorously competitive Advanced Technology Program that provides cost-shared awards to industry to develop high-risk enabling technologies with broad economic potential;

- a Manufacturing Extension Partnership, a nationwide network of extension centers and experts offering technical and business assistance to smaller manufacturers in adopting new technologies and business practices; and

- a highly visible quality outreach program associated with the Malcolm Baldrige National Quality Award that recognizes continuous improvements in quality management by U.S. manufacturers and service companies.

For further information, call 301-975-3058. Fax, 301-926-1630. E-mail, inquiries@nist.gov. Internet, <http://www.nist.gov/>.

National Technical Information Service

The National Technical Information Service (NTIS) is the Nation's largest central clearinghouse and governmentwide resource for scientific, technical, engineering, and other business-related information. NTIS is a self-supporting agency, using revenue earned from the sale of its products and services to cover its costs. It acquires information from U.S. Government agencies and their contractors and grantees, as well as from foreign, primarily governmental, sources. Under the American Technology Preeminence Act, all Federal agencies are required to transfer unclassified scientific, technical, and engineering information resulting from federally funded research and development activities to NTIS.

The NTIS collection of nearly 3 million works covers a broad array of subjects and includes reports on the results of research and development and scientific studies on manufacturing processes, current events, and foreign and domestic trade; business and management studies; social, economic, and trade statistics; computer software and databases; health care reports, manuals, and data; environmental handbooks, regulations, economic studies, and applied technologies; directories to Federal laboratory and technical resources; and global competitive intelligence. The collection also includes audiovisual training materials in such areas as foreign languages, workplace safety and health, law enforcement, and fire services.

Information products in the NTIS collection are cataloged in the *NTIS Bibliographic Database*, which is available on-line through commercial

vendors, on CD-ROM from NTIS, and for recently acquired materials, via FedWorld, NTIS' on-line information network. FedWorld also provides public access to thousands of Government documents, connects to dozens of Federal on-line systems, and offers instant electronic delivery of selected NTIS products.

In addition to its information product offerings to the public, NTIS offers a broad range of services to assist Federal agencies in meeting their information dissemination needs. Services include Web site development, hosting, and interactive communications;

development and replications of diskette and CD-ROM products; duplication of audio, visual, and multimedia materials; and warehousing and distribution of information items in virtually any format. NTIS also operates a joint venture program. Through partnership agreements with private individuals, firms, and other organizations, NTIS seeks to develop new information products and to open new channels of sales and distribution for its materials.

For further information, contact the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Phone, 800-553-NTIS. Internet, <http://www.ntis.gov/>.

Sources of Information

Age and Citizenship Age search and citizenship information is available from the Personal Census Search Unit, Bureau of the Census, Data Preparation Division, P.O. Box 1545, Jeffersonville, IN 47131. Phone, 812-218-3046.

Consumer Affairs Information is available to businesses and consumers regarding good business practices and resolving consumer complaints. Tip sheets, in English and Spanish, on how to resolve complaints and consumer bulletins, describing programs in the Department of Commerce, are available. Many publications are available on the Internet at <http://www.doc.gov/>. Phone, 202-482-5001. Fax, 202-482-6007. Consumer response line, 202-482-8021. E-mail, caffairs@doc.gov. For further information, contact the Office of Consumer Affairs, U.S. Department of Commerce, Rm. H5718, Washington, DC 20230.

Economic Conversion Information The Office of Economic Conversion Information (OECI) is a clearinghouse for communities, businesses, and workers seeking to obtain information regarding defense adjustment and economic development. The Office's database contains descriptions and contact numbers of Federal, State, and local programs; guides and models for economic development; and many other

related items. For further information, contact the Office of Economic Conversion Information, Economic Development Administration, Department of Commerce, Washington, DC 20230. Phone, 800-345-1222. Internet, <http://ecix.doc.gov/>. Electronic bulletin board (by modem), 800-352-2949.

Employment Information is available electronically through the Internet, at <http://nets.te.esa.doc.gov/ohrm/>. Phone, 202-482-5138.

The National Oceanic and Atmospheric Administration has field employment offices at the Western Administrative Support Center, Bin C15700, 7600 Sand Point Way NE., Seattle, WA 98115 (phone, 206-526-6294); the Mountain Administrative Support Center, 325 Broadway, Boulder, CO 80303 (phone, 303-497-6332); the Central Administrative Support Center, 601 East Twelfth Street, Kansas City, MO 64106 (phone, 816-426-2056); and the Eastern Administrative Support Center, 200 World Trade Center, Norfolk, VA 23510-1624 (phone, 757-441-6516).

Environment The National Oceanic and Atmospheric Administration conducts research and gathers data about the oceans, atmosphere, space, and Sun, and applies this knowledge to science and service in ways that touch

the lives of all Americans, including warning of dangerous weather, charting seas and skies, guiding our use and protection of ocean and coastal resources, and improving our understanding and stewardship of the environment which sustains us all. For further information, contact the Office of Public and Constituent Affairs, National Oceanic and Atmospheric Administration, Room 6013, 14th Street and Constitution Avenue NW., Washington, DC 20230. Phone, 202-482-6090. Fax, 202-482-3154. Internet, <http://www.noaa.gov/>.

The Patent and Trademark Office has priority programs for advancement of examination of certain patent applications where the invention could materially enhance the quality of the environment of mankind. For further information, contact the Assistant Commissioner for Patents, Office of Petitions, Washington, DC 20231. Phone, 703-305-9282.

Inspector General Hotline The Office of Inspector General works to promote economy, efficiency, and effectiveness and to prevent and detect fraud, waste, abuse, and mismanagement in departmental programs and operations. To reach the OIG Hotline, call 202-482-2495, or 800-424-5197 (toll-free). E-mail, oighotline@doc.gov. Fax, 202-789-0522. Internet, <http://www.oig.doc.gov/>.

Publications The titles of selected publications are printed below with the operating units responsible for their issuance. These and other publications dealing with a wide range of business, economic, environmental, scientific, and technical matters are announced in the weekly *Business Service Checklist*, which may be purchased from the Superintendent of Documents, Government Printing Office, Washington, DC 20402. Phone, 202-512-1800.

The Secretary's *Annual Report to Congress* and *Serving the Nation*, two publications which describe the missions, functions, and accomplishments of Commerce agencies and offices, are available by writing the

Department of Commerce, Office of Public Affairs, Pennsylvania Avenue and 14th Street NW., Room 5610, Washington, DC, or by calling 202-219-3605 for the *Annual Report* and 202-482-4901 for *Serving the Nation*.

Further information on Commerce publications is available at any of the Department's International Trade Administration export assistance centers.

Lists of Other Documents Individuals with access to fax machines can dial 202-501-1191 (*Flash Facts*) to obtain lists of other publication contacts, Secretarial speeches and biographies, press releases, audiovisuals, Commerce bureau public affairs contacts, and Department programs by subject.

Bureau of the Census The following publications are available from the Government Printing Office: *Census Catalog and Guide; Statistical Abstract of the U.S.; Historical Statistics of the United States, Colonial Times to 1970; County and City Data Book, 1994; and State and Metropolitan Area Data Book, 1998*.

Employment opportunities, data highlights, large data files, access tools, and other material are available on the World Wide Web. Internet, <http://www.census.gov/>. E-mail, webmaster@census.gov.

Bureau of Economic Analysis Publications available from the Government Printing Office include the following: *Survey of Current Business; State Personal Income, 1929-93; Benchmark Input-Output Accounts of the United States, 1987; and Foreign Direct Investment in the United States, 1992 Benchmark*. Summary statistics and general information are available on the Internet, at <http://www.bea.doc.gov/>. To obtain more detailed economic data and press releases, subscribe to the Department of Commerce's Electronic Bulletin Board, by calling 202-482-1986, or by sending E-mail to stat-usa@doc.gov. Additional information on BEA programs, products, and services is available in the *User's Guide to BEA Information*, which may be obtained through the Internet, or by contacting the Public Information Office, BE-53,

Bureau of Economic Analysis, Department of Commerce, Washington, DC 20230. Phone, 202-606-9900.

International Trade Administration *Business America*, which is published biweekly, is available from the Government Printing Office and at ITA export assistance centers.

The Administration maintains an Internet site, at <http://www.ita.doc.gov/>, which offers the single best place for individuals or firms seeking reports, documents, import case/regulations, texts of international agreements like NAFTA and GATT, market research, and points of contact for assistance in exporting or obtaining remedies from unfair trading practices. Customers are able to review comprehensive information on how to export, search for trade information by either industry or by country, learn how to petition against unfairly priced imports, and obtain information on a number of useful international trade related products like overseas trade leads and agent distributor reports. The Internet site also features E-mail addresses and locations for trade contacts in Washington, overseas, in major exporting centers in the U.S., and in other parts of the Federal Government.

Minority Business Development Agency *Minority Business Today*, *Federal Resource Guide*, *BDC Directory*, *MBDA Annual Business Assistance Report (ABAR)*, and *Federal Agency Performance for Minority Business Development* are available from MBDA, Communications Division, Department of Commerce, Washington, DC 20230. Phone, 202-482-1936.

National Institute of Standards and Technology *Journal of Research*; *Publications of the Advanced Technology Program and Manufacturing Extension Partnership Program*; *Handbook of Mathematical Functions*; *Experimental Statistics*; *International System of Units (SI)*; *Standard Reference Materials Catalog*; *Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices Handbook*; and *Uniform Laws and Regulations*

Handbook are available from the Government Printing Office.

National Technical Information Service To place an order, request the *Catalog of NTIS Products and Services*, or other general inquiries, contact the NTIS Sales Desk from 8 a.m. to 8 p.m. (eastern time) at 800-553-NTIS or fax 703-321-8547. TDD, 703-605-6043.

To access the NTIS home page and the FedWorld on-line information network, point Web browser to <http://www.ntis.gov/>.

To inquire about NTIS information services for other Federal agencies, call 703-605-6540.

National Oceanic and Atmospheric Administration The Administration provides technical memoranda, technical reports, monographs, nautical and aeronautical charts, coastal zone maps, data tapes, and a wide variety of raw and processed environmental data. Information on NOAA products is available through the Internet, at <http://www.noaa.gov/>; or contact the Office of Public and Constituent Affairs, 14th Street and Constitution Avenue NW., Washington, DC 20230. Phone, 202-482-6090. Fax, 202-482-3154.

National Telecommunications and Information Administration Several hundred Technical Reports, Technical Memoranda, Special Publications, Contractor Reports, and other information products have been published by NTIA or its predecessor agency since 1970. The publications are available from the National Telecommunications and Information Administration, Department of Commerce, Washington, DC 20230 (phone, 202-482-1551); or the National Telecommunications and Information Administration, Institute for Telecommunication Sciences, Department of Commerce, Boulder, CO 80302 (phone, 303-497-3572).

Electronic information can be obtained from the NTIA General Bulletin Board (modem, 202-482-1199); or the Information Infrastructure Task Force Bulletin Board (modem, 202-501-1920).

Patent and Trademark Office *General Information Concerning Patents*, *Basic*

Facts About Trademarks, Official Gazette of the United States Patent and Trademark Office, and Attorneys and Agents Registered To Practice Before the U.S. Patent and Trademark Office are available from the Government Printing Office. Publications can be accessed through the Internet, at <http://www.uspto.gov/>. File transfer protocol, <ftp.uspto.gov>. Electronic bulletin board (by modem), 703-305-8950. Phone, 703-308-HELP, or 800-PTO-9199.

Small Business and Minority Business Activities

Contact the Office of Small

and Disadvantaged Business Utilization (phone, 202-482-1472) or the Office of External Affairs, Minority Business Development Agency, Department of Commerce, Washington, DC 20230 (phone, 202-482-4547).

Telephone Directory The Department of Commerce telephone directory is available for sale by the Superintendent of Documents, Government Printing Office, Washington, DC 20402. Phone, 202-512-1800.

For further information concerning the Department of Commerce, contact the Office of Public Affairs, Department of Commerce, Fourteenth Street between Constitution and Pennsylvania Avenues NW., Washington, DC 20230. Phone, 202-219-3605. Internet, <http://www.doc.gov/>.
