Members	JOSEPH J. DINUNNO, JOHN E. MANSFIELD, JESSIE H. ROBERSON
General Counsel	RICHARD A. AZZARO
General Manager	KENNETH M. PUSATERI
Technical Director	J. KENT FORTENBERRY

The Defense Nuclear Facilities Safety Board reviews and evaluates the content and implementation of standards relating to the design, construction, operation, and decommissioning of defense nuclear facilities of the Department of Energy (DOE).

The Defense Nuclear Facilities Safety Board was established as an independent agency on September 29, 1988, by the Atomic Energy Act of 1954, as amended (42 U.S.C. 2286-2286i).

The Board is composed of five members appointed by the President with the advice and consent of the Senate. Members of the Board are appointed from among United States citizens who are respected experts in the field of nuclear safety.

Activities

The Defense Nuclear Facilities Safety Board reviews and evaluates the content and implementation of standards for

defense nuclear facilities of DOE; investigates any event or practice at these facilities which may adversely affect public health and safety; and reviews and monitors the design, construction, and operation of facilities. The Board makes recommendations to the Secretary of Energy concerning DOE defense nuclear facilities to ensure adequate protection of public health and safety. In the event that any aspect of operations, practices, or occurrences reviewed by the Board is determined to present an imminent or severe threat to public health and safety, the Board transmits its recommendations directly to the President.

[For the Environmental Protection Agency statement of organization, see the *Code of Federal Regulations*, Title 40, Part 1]

The mission of the Environmental Protection Agency is to protect human health and to safeguard the natural environment—air, water, and land—upon which life depends to the fullest extent possible under the laws enacted by Congress.

The Environmental Protection Agency was established in the executive branch as an independent agency pursuant to Reorganization Plan No. 3 of 1970 (5 U.S.C. app.), effective December 2, 1970. It was created to permit coordinated and effective governmental

action on behalf of the environment. The Agency is designed to serve as the public’s advocate for a livable environment.

ENVIRONMENTAL PROTECTION AGENCY

Activities

Air and Radiation The air activities of the Agency include:

- developing national programs, policies, regulations, and standards for air quality, emission standards for stationary and mobile sources, and emission standards for hazardous air pollutants;
- conducting research and providing information on indoor air pollutants to the public;
- providing technical direction, support, and evaluation of regional air activities;
- providing training in the field of air pollution control;
- providing technical assistance to States and agencies having radiation protection programs, including radon mitigation programs and a national surveillance and inspection program for measuring radiation levels in the environment; and
- providing technical support and policy direction to international efforts to reduce global and transboundary air pollution and its effects.

For further information, call 202-564-7400.

Water The Agency's water quality activities represent a coordinated effort to keep the Nation's waters clean and safe for fishing, swimming, and drinking, including:

- development of national programs, technical policies, and regulations for water pollution control and water supply;
- ground water and drinking water source protection;
- marine and estuarine protection;
- control of polluted runoff;
- water quality standards and effluent guidelines development;
- support of regional water activities;
- development of programs for technical assistance and technology transfer; and
- training in the field of water quality.

For further information, call 202-260-5700.

Solid Waste and Emergency Response

The Office of Solid Waste and Emergency Response provides policy,

guidance, and direction for the Agency's hazardous waste and emergency response programs, including:

- development of policies, standards, and regulations for hazardous waste treatment, storage, and disposal;
- national management of the Superfund toxic waste cleanup program;
- development of guidelines for the emergency preparedness and community right-to-know programs;
- implementation of special initiatives such as the brownfields national partnership;
- management of environmental justice/public participation programs related to waste siting issues;
- development of guidelines and standards for the land disposal of hazardous wastes and for underground storage tanks;
- analysis of technologies and methods for the recovery of useful energy from solid waste;
- economic impact assessment of RCRA and CERCLA regulations;
- coordination with the Department of Defense on base closure environmental issues; and
- technical assistance in the development, management, and operation of waste management activities, including technical assistance to Federal facilities.

For further information, call 202-260-4610.

Prevention, Pesticides, and Toxic Substances

The Office of Prevention, Pesticides, and Toxic Substances is responsible for:

- promoting the public's right to know about chemical risk;
- promoting pollution prevention through source reduction strategies;
- evaluating and regulating pesticides and industrial chemicals to safeguard all Americans;
- identifying and reviewing emerging and existing science and technology policies, including biotechnology-derived products;
- developing, evaluating, and implementing science policies both domestically and internationally;
- establishing safe levels for pesticide residues on food;

- developing national strategies for control of toxic substances;
- developing criteria for assessing chemical substances, standards for test protocols for chemicals, rules and procedures for industry reporting, and scientific information for the regulation of substances that may be hazardous to people or the environment; and
- evaluating and assessing the impact of existing chemicals, new chemicals, and chemicals with new uses to determine the hazard and develop appropriate restrictions.

The Office also coordinates activities under its statutory responsibilities with other agencies for the assessment and control of toxic substances and pesticides.

For further information, call 202-260-2902.

Research and Development The Office of Research and Development (ORD) provides the scientific foundation for the Agency’s environmental protection mission. ORD’s chief role is to conduct and support high quality research targeted to understanding and resolving the Nation’s most serious environmental threats. In addition, ORD develops methods and technologies to reduce exposures to pollution and prevent its creation. The Office is also a major player in sharing information on

technological innovations to protect people and the environment. ORD prepares health and ecological risk assessments and makes recommendations for sound risk management strategies in order to assure that highest risk pollution problems receive optimum remediation. The Office manages a vital extramural grants program entitled Science To Achieve Results (STAR), which awards research grants to scientists in universities and students in environmental science. All ORD extramural and intramural research is carefully aligned to support Agency environmental goals and strategic priorities.

For further information, call 202-564-6620.

Regional Offices

The Agency’s 10 regional offices represent its commitment to the development of strong local programs for pollution abatement. The Regional Administrators are responsible for accomplishing, within their regions, the national program objectives established by the Agency. They develop, propose, and implement an approved regional program for comprehensive and integrated environmental protection activities.

The Equal Employment Opportunity Commission enforces laws which prohibit discrimination based on race, color, religion, sex, national origin, disability, or age in hiring, promoting, firing, setting wages, testing, training, apprenticeship, and all other terms and conditions of employment. The Commission conducts investigations of alleged discrimination; makes determinations based on gathered evidence; attempts conciliation when discrimination has taken place; files lawsuits; and conducts voluntary assistance programs for employers, unions, and community organizations. The Commission also has adjudicatory and oversight responsibility for all compliance and enforcement activities relating to equal employment opportunity among Federal employees and applicants, including discrimination against individuals with disabilities.

The Equal Employment Opportunity Commission (EEOC) was created by title VII of the Civil Rights Act of 1964 (42 U.S.C. 2000e-4), and became
