¶45.5 MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Edwin Thomas, one of his secretaries.

¶45.6 MESSAGE FROM THE PRESIDENT—NATIONAL EMERGENCY WITH RESPECT TO HAITI

The SPEAKER laid before the House a message from the President, which was read as follows:

To the Congress of the United States:

On October 4, 1991, pursuant to the International Emergency Economic Powers Act ("IEEPA") (50 U.S.C. 1703 et seq.) and section 301 of the National Emergencies Act ("NEA") (50 U.S.C. 1601 et seq.), President Bush exercised his statutory authority to issue Executive Order No. 12775 on October 4, 1991, declaring a national emergency and blocking Haitian government property.

On October 28, 1991, pursuant to the above authorities, President Bush exercised his statutory authority to issue Executive Order No. 12779 on October 28, 1991, blocking property of and prohibiting transactions with Haiti.

On June 30, 1993, pursuant to the above authorities, as well as the United Nations Participation Act of 1945, as amended ("UNPA") (22 U.S.C. 287c) I exercised my statutory authority to issue Executive Order No. 12853 on June 30, 1993, to impose additional economic measures with respect to Haiti. This latter action was taken, in part, to ensure that the economic measures taken by the United States with respect to Haiti would conform to United Nations Security Council Resolution 841 (June 16, 1993).

On October 18, 1993, pursuant to the IEEPA and the NEA, I again exercised my statutory authority to issue Executive Order No. 12872 on October 18, 1993, blocking property of various persons with respect to Haiti.

On May 6, 1994, the United Nations Security Council adopted Resolution 917, calling on Member States to take additional measures to tighten the embargo against Haiti. These include, inter alia, a requirement that Member States deny permission for take off, landing or overflight to any aircraft flying to or from Haiti, other than aircraft on regularly scheduled commercial passenger flights. In addition, the Resolution strongly urges, but does not

mandate, the freezing of funds and financial resources of officers of the military in Haiti, including police, major participants in the coup d'état of 1991, and in illegal governments since the coup d'état, those employed by, or acting on behalf of, the military, and immediate family members of the foregoing. Effective at 11:59 p.m. e.d.t., May 8, 1994, I have taken additional steps pursuant to the above statutory authorities to enhance the implementation of this international embargo and to conform to United Nations Security Council Resolution 917.

This new Executive order:

- bans arriving and departing flights and overflights stopping or originating in Haiti, except regularly scheduled commercial passenger flights;
- blocks the funds and financial resources, subject to the jurisdiction of the United States, of the individuals specified in Resolution 917, identified above;
- prohibits any transaction that evades or avoids or has the purpose of evading or avoiding, or attempts to violate, any of the prohibitions of this order; and
- authorizes the Secretary of the Treasury, in consultation with the Secretary of State, to issue regulations implementing the provisions of the Executive order.

The new Executive order is necessary to implement certain provisions of United Nations Security Council Resolution 917 of May 6, 1994, that are to take effect without delay. Further measures, including a comprehensive trade embargo with certain humanitarian exceptions, are required no later than May 21, 1994. I am considering additional measures to give full effect to these and other provisions of that Resolution. The measures we are imposing and the United Nations Security Council Resolution adopted on May 6, 1994, reflect the determination of the United States, acting in concert with the international community, to end the assault on democracy and human dignity in Haiti.

I am providing this notice to the Congress pursuant to section 204(b) of the IEEPA (50 U.S.C. 1703(b)) and section 301 of the NEA (50 U.S.C. 1631). I am enclosing a copy of the Executive order that I have issued.

WILLIAM J. CLINTON.

¶46.13 MESSAGE FROM THE PRESIDENT—AERONAUTICS AND SPACE ACTIVITIES

The SPEAKER pro tempore, Mr. SCOTT, laid before the House a message from the President, which was read as follows:

To the Congress of the United States:

I am pleased to transmit this report on the Nation's achievements in aeronautics and space during fiscal year 1993, as required under section 206 of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2476). Aeronautics and space activities involve 14 contributing departments and agencies of the Federal Government, as this report reflects, and the results of their ongoing research and development affect the Nation as a whole in a variety of ways.

Fiscal year 1993 brought numerous important changes and developments in U.S. aeronautics and space efforts. It included 7 Space Shuttle missions, 14 Government launches of Expendable Launch Vehicles [ELVs], and 4 commercial launches from Government facilities. Highlights of the Shuttle missions included the first in a series of flights of the U.S. Microgravity Payload that contained scientific and materials-processing experiments to be carried out in an environment of reduced gravity; the deployment of the Laser Geodynamic Satellite (a joint venture between the United States and Italy); the deployment of a Tracking and Data Relay Satellite; and, the second Atmospheric Laboratory for Applications and Science mission to study the composition of the Earth's atmosphere, ozone layer, and elements thought to be the cause of ozone depletion. The ELV missions carried a variety of payloads ranging from Global Positioning System satellites to those with classified missions.

I also requested that a redesign of the Space Station be undertaken to reduce costs while retaining science-user capability and maintaining the program's international commitments. To this end, the new Space Station is based on a modular concept and will be built in stages. However, the new design draws heavily on the previous Space Station Freedom investment by incorporating most of its hardware and systems. Also, ways are being studied to increase the Russian participation in the Space Station.

The United States and Russia signed a Space Cooperation Agreement that called for a Russian cosmonaut to participate in a U.S. Space Shuttle mission and for the Space Shuttle to make at least one rendezvous with the Mir. On September 2, 1993, Vice President Albert Gore, Jr., and Russian Prime Minister Victor Chernomyrdin signed a series of joint statements on cooperation in space, environmental observations/space science, commercial space launches, missile export controls, and aeronautical science.

In aeronautics, efforts included the development of new technologies to improve performance, reduce costs, increase safety, and reduce engine noise. For example, engineers have been working to produce a new generation of environmentally compatible, economic aircraft that will lay the technological foundation for a next generation of aircraft that are superior to the products of other nations. Progress also contin-

ued on programs to increase airport capacity while at the same time improving flight safety.

In the Earth sciences, a variety of programs across several agencies sought better understanding of global change and enhancement of the environment. While scientists discovered in late 1992 and early 1993, for instance, that global levels of protective ozone reached the lowest concentrations ever observed, they also could foresee an end to the decline in the ozone layer. Reduced use of ozone-destroying chlorofluorocarbons would allow ozone quantities to increase again about the year 2000 and gradually return to "normal."

Thus, fiscal year 1993 was a successful one for the U.S. aeronautics and space programs. Efforts in both areas have contributed to advancing the Nation's scientific and technical knowledge and furthering an improved quality of life on Earth through greater knowledge, a more competitive economy, and a healthier environment.
