40.13 MESSAGE FROM THE PRESIDENT—PEACEFUL USE OF NUCLEAR ENERGY IN UKRAINE

The SPEAKER pro tempore, Mr. EWING, laid before the House a message from the President, which was read as follows:

To the Congress of the United States:
I am pleased to transmit to the Congress, pursuant to sections 123b. and 123d. of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2153 (b), (d)), the text of a proposed Agreement for Cooperation Between the United States of America and Ukraine Concerning Peaceful Uses of Nuclear Energy, with accompanying annex and agreed minute. I am also pleased to transmit my written approval, authorization, and determination concerning the agreement, and the memorandum of the Director of the United States Arms Control and Disarmament Agency with the Nuclear Proliferation Assessment Statement concerning the agreement. The joint memorandum submitted to me by the Secretary of State and the Secretary of Energy, which includes a summary of the provisions of the agreement and various other attachments, including agency views, is also enclosed.

The proposed agreement with Ukraine has been negotiated in accordance with the Atomic Energy Act of 1954, as amended by the Nuclear Non-Proliferation Act of 1978 and as otherwise amended. In my judgment, the proposed agreement meets all statutory requirements and will advance the nonproliferation and other foreign policy interests of the United States. The agreement provides a comprehensive framework for peaceful nuclear cooperation between the United States and Ukraine under appropriate conditions and controls reflecting our common commitment to nuclear non-proliferation goals.

The proposed new agreement with Ukraine permits the transfer of technology, material, equipment (including reactors), and components for nuclear research, and nuclear power production. It provides for U.S. consent rights to retransfers, enrichment, and reprocessing as required by U.S. law. It does not permit transfers of any sensitive nuclear technology, restricted data, or sensitive nuclear facilities or major critical components of such facilities. In the event of termination, key condi-
