(3) Not later than July 1, 1986, the Administrator shall submit to such committees a report describing an experimental program that could feasibly be carried out through projects in five remote areas, selected on the basis of the information and findings included in the report under paragraph (2), to demonstrate alternative approaches for the Veterans' Administration to furnish health-care services to eligible veterans in remote areas. The report shall include a description of the health-care services, and a detailed breakdown of the costs for them, that could be furnished under such an experimental program to such veterans in each such area, along with the recommendations (and the reasons therefor) of the Administrator regarding whether any such project should be carried out and such recommendations for legislative or administrative action as the Administrator considers appropriate in light of the information contained in the report.
