

survey of commercial vessels, yachts, and other marine structures. Classification certifies adherence to these standards, thus representing that a vessel or structure possesses the structural and mechanical fitness required for its intended service.

The section requires that a Federal department, agency, or instrumentality recognize the American Bureau of Shipping as its agent for classing vessels owned by the Federal Government and in any matters related to classification. In effect, the ABS has a statutory monopoly on classing vessels of the United States Government. Additionally, the section contains the authority to permit the Secretary to rely on reports, documents, and certificates issued by a classification society that is similar to the American Bureau of Shipping. However, a “similar classification society” continues to mean one that is organized like the American Bureau of Shipping with attendant governmental representation.
