

- (A) the total land area of the State (in square miles); multiplied by
- (B) 370; multiplied by
- (C)(i) the population of the State in urbanized areas; divided by
- (ii) the total population of the State.

(3) STATE APPORTIONMENT FACTOR.—For each State qualifying for an apportionment under paragraph (1), the Secretary shall calculate an amount equal to the difference between the total population of the State less the amount calculated in paragraph (2).

(4) STATE APPORTIONMENT.—Each State qualifying for an apportionment under paragraph (1) shall receive an amount equal to the amount to be apportioned under this subsection multiplied by the amount calculated for the State under paragraph (3) divided by the sum of the amounts calculated under paragraph (3) for all States qualifying for an apportionment under paragraph (1).

(5) APPORTIONMENTS AMONG URBANIZED AREAS IN EACH STATE.—The Secretary shall apportion amounts made available to each State under paragraph (4) so that each urbanized area receives an amount equal to the amount apportioned under paragraph (4) multiplied by a ratio equal to the population of each urbanized area divided by the sum of populations of all urbanized areas in the State. Amounts apportioned to each urbanized area shall be added to amounts apportioned to that urbanized area under section 5336, and made available for grants under section 5307.

AMENDMENTS

2005—Pub. L. 109-59, title V, §§5401(c), 5402(c), Aug. 10, 2005, 119 Stat. 1815, 1820, substituted “National university transportation centers” for “University transportation research” in item 5505 and “University transportation research” for “Advanced vehicle technologies program” in item 5506.

1998—Pub. L. 105-178, title V, §§5110(b), 5111(b), June 9, 1998, 112 Stat. 444, 445, added items 5505 and 5506.

SUBCHAPTER I—GENERAL

§ 5501. National Intermodal Transportation System policy

(a) GENERAL.—It is the policy of the United States Government to develop a National Intermodal Transportation System that is economically efficient and environmentally sound, provides the foundation for the United States to compete in the global economy, and will move individuals and property in an energy efficient way.

(b) SYSTEM CHARACTERISTICS.—(1) The National Intermodal Transportation System shall consist of all forms of transportation in a unified, interconnected manner, including the transportation systems of the future, to reduce energy consumption and air pollution while promoting economic development and supporting the United States’ preeminent position in international commerce.

(2) The National Intermodal Transportation System shall include a National Highway System consisting of the Dwight D. Eisenhower System of Interstate and Defense Highways and those principal arterial roads that are essential for interstate and regional commerce and travel, national defense, intermodal transfer facilities, and international commerce and border crossings.

(3) The National Intermodal Transportation System shall include significant improvements in public transportation necessary to achieve national goals for improved air quality, energy conservation, international competitiveness, and mobility for elderly individuals, individuals with disabilities, and economically disadvantaged individuals in urban and rural areas of the United States.

(4) The National Intermodal Transportation System shall provide improved access to ports and airports, the Nation’s link to commerce.

(5) The National Intermodal Transportation System shall give special emphasis to the contributions of the transportation sectors to increased productivity growth. Social benefits must be considered with particular attention to the external benefits of reduced air pollution, reduced traffic congestion, and other aspects of the quality of life in the United States.

(6) The National Intermodal Transportation System must be operated and maintained with insistent attention to the concepts of innovation, competition, energy efficiency, productivity, growth, and accountability. Practices that resulted in the lengthy and overly costly construction of the Dwight D. Eisenhower System of Interstate and Defense Highways must be confronted and stopped.

(7) The National Intermodal Transportation System shall be adapted to “intelligent vehicles”, “magnetic levitation systems”, and other new technologies, wherever feasible and economical, with benefit cost estimates given special emphasis on safety considerations and techniques for cost allocation.

(8) When appropriate, the National Intermodal Transportation System will be financed, as regards Government apportionments and reimbursements, by the Highway Trust Fund. Financial assistance will be provided to State and
