PUBLIC PRINTER REPORTS POSITIVE FINANCIAL RESULT IN GPO'S 2011 ANNUAL REPORT

WASHINGTON— Public Printer Bill Boarman releases the Annual Report of the U.S. Government Printing Office (GPO) today. The report details the management actions that generated a positive financial result of \$5.6 million in net income for the fiscal year.

During the year, GPO instituted various initiatives to better serve Congress, Federal agency customers, and the public, including:

- An employee buyout that targeted a reduction of 330 positions
- A special taskforce that to date has collected more than \$12.5 million in outstanding payments owed by customer agencies
- A GPO survey of congressional offices that allowed them to opt out of receiving printed copies of the documents
- Expansion of GPO's social media channels by launching GPO's Facebook page
- The release of GPO's first mobile Web app
- Development of a strategic vision for the agency and a strategic investment plan to modernize GPO's technology.

"I truly believe our program of reducing costs while continuing to expand GPO's critically important information services to the Senate and House of Representatives, as well as Federal agencies and the public, is working and showing real and measurable benefits," said Public Printer Boarman. "GPO will continue following this path."

With 2,200 employees, GPO is the Federal Government's primary resource for producing, procuring, cataloging, indexing, authenticating, disseminating, and preserving the official information products of the U.S. Government in both digital and tangible formats. GPO is responsible for the production and distribution of information products and services for all three branches of the Federal Government, including U.S. passports for the Department of State as well as the official publications of Congress, the White House, and other Federal agencies. In addition to publication sales, GPO provides for permanent public access to Federal Government information at no charge through GPO's Federal Digital System (www.fdsys.gov) and through partnerships with approximately 1,220 libraries nationwide participating in the Federal Depository Library Program.
