## Explanation

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. The Code is divided into 50 titles which represent broad areas subject to Federal regulation. Each title is divided into chapters which usually bear the name of the issuing agency. Each chapter is further subdivided into parts covering specific regulatory areas.

Each volume of the Code is revised at least once each calendar year and issued on a quarterly basis approximately as follows:

Title 1 through Title 16.....	as of January 1
Title 17 through Title 27.....	as of April 1
Title 28 through Title 41.....	as of July 1
Title 42 through Title 50.....	as of October 1

The appropriate revision date is printed on the cover of each volume.

### LEGAL STATUS

The contents of the Federal Register are required to be judicially noticed (44 U.S.C. 1507). The Code of Federal Regulations is prima facie evidence of the text of the original documents (44 U.S.C. 1510).

### HOW TO USE THE CODE OF FEDERAL REGULATIONS

The Code of Federal Regulations is kept up to date by the individual issues of the Federal Register. These two publications must be used together to determine the latest version of any given rule.

To determine whether a Code volume has been amended since its revision date (in this case, October 1, 2000, consult the "List of CFR Sections Affected (LSA)," which is issued monthly, and the "Cumulative List of Parts Affected," which appears in the Reader Aids section of the daily Federal Register. These two lists will identify the Federal Register page number of the latest amendment of any given rule.

### EFFECTIVE AND EXPIRATION DATES

Each volume of the Code contains amendments published in the Federal Register since the last revision of that volume of the Code. Source citations for the regulations are referred to by volume number and page number of the Federal Register and date of publication. Publication dates and effective dates are usually not the same and care must be exercised by the user in determining the actual effective date. In instances where the effective date is beyond the cut-off date for the Code a note has been inserted to reflect the future effective date. In those instances where a regulation published in the Federal Register states a date certain for expiration, an appropriate note will be inserted following the text.

### OMB CONTROL NUMBERS

The Paperwork Reduction Act of 1980 (Pub. L. 96-511) requires Federal agencies to display an OMB control number with their information collection request.

Many agencies have begun publishing numerous OMB control numbers as amendments to existing regulations in the CFR. These OMB numbers are placed as close as possible to the applicable recordkeeping or reporting requirements.

#### OBSOLETE PROVISIONS

Provisions that become obsolete before the revision date stated on the cover of each volume are not carried. Code users may find the text of provisions in effect on a given date in the past by using the appropriate numerical list of sections affected. For the period before January 1, 1986, consult either the List of CFR Sections Affected, 1949–1963, 1964–1972, or 1973–1985, published in seven separate volumes. For the period beginning January 1, 1986, a “List of CFR Sections Affected” is published at the end of each CFR volume.

#### CFR INDEXES AND TABULAR GUIDES

A subject index to the Code of Federal Regulations is contained in a separate volume, revised annually as of January 1, entitled CFR INDEX AND FINDING AIDS. This volume contains the Parallel Table of Statutory Authorities and Agency Rules (Table I). A list of CFR titles, chapters, and parts and an alphabetical list of agencies publishing in the CFR are also included in this volume.

An index to the text of “Title 3—The President” is carried within that volume.

The Federal Register Index is issued monthly in cumulative form. This index is based on a consolidation of the “Contents” entries in the daily Federal Register.

A List of CFR Sections Affected (LSA) is published monthly, keyed to the revision dates of the 50 CFR titles.

#### REPUBLICATION OF MATERIAL

There are no restrictions on the republication of material appearing in the Code of Federal Regulations.

## SUBCHAPTER C—ACCOUNTS, RECORDS AND REPORTS

### PARTS 1200–1219—UNIFORM SYSTEMS OF ACCOUNTS

#### PART 1200—GENERAL ACCOUNTING REGULATIONS UNDER THE INTERSTATE COMMERCE ACT

Sec.

1200.1 Financial statements released by carriers.

1200.2 Adoption of generally accepted accounting principles issued by the Financial Accounting Standards Board (FASB).

AUTHORITY: 49 U.S.C. 721, 11142, 11143, 11144, 11145.

##### § 1200.1 Financial statements released by carriers.

Carriers desiring to do so may prepare and publish financial statements in reports to stockholders and others, except in reports to this Board, based on generally accepted accounting principles for which there is authoritative support, provided that any variance from this Board's prescribed accounting rules contained in such statements is clearly disclosed in footnotes to the statements.

[32 FR 20123, Dec. 20, 1967]

##### § 1200.2 Adoption of generally accepted accounting principles issued by the Financial Accounting Standards Board (FASB).

(a) *Accounting Series Circulars.* Following the release of a Statement of Financial Accounting Standards by the FASB, and provided that the Bureau of Accounts of the Board considers such standards appropriate for the Board's accounting regulations, the Bureau of Accounts shall issue an Accounting Series Circular (ASC) requiring carriers under the Board's jurisdiction to follow the new standards in their accounts and reports filed with the Board. The Bureau shall also specify in the ASC the proper accounting procedures that the carriers shall follow.

(b) *Carriers' and Interested Parties' Comments on the ASC.* The ASC issued by the Bureau of Accounts will remain effective until revoked by the Bureau

of Accounts. After an ASC is issued, the Bureau of Accounts shall allow carriers and interested parties 45 days following the service date of the ASC during which the respondents may submit to the Bureau their comments and reasons either supporting or opposing the ASC.

(c) *Formal Adoption of the New Accounting Standards.* After considering the comments submitted in response to the ASC, and based on the proposal of the Bureau of Accounts, the Board will decide whether or not to adopt the new accounting standards specified in the ASC by revising the Uniform Systems of Accounts, (49 CFR 1201 through 1210).

(d) *Accounting Standards Not Appropriate for Board's Use.* The Bureau of Accounts may determine that a new FASB Statement of Financial Accounting Standards is not appropriate for use by carriers under the Board's jurisdiction. In such instances, the Bureau shall issue an ASC to advise the carriers that the new standards shall not be used in their reports filed with the Board. The carriers and interested parties shall be allowed 45 days following the ASC's service date to submit comments to the Board. The Board will then determine whether or not to revise the Uniform Systems of Accounts to conform to the new accounting standards.

(i) *Regulations prescribed.* Carriers by railroad subject to provisions of the Interstate Commerce Act and not independently operated as electric lines, and each lessor of such a carrier, shall comply with regulations in this part as presented hereinafter.

(ii) *Definitions.*

1. *Abandonment* means the withdrawal from transportation service of a branch line or other track segment or facility, representing a permanent reduction in plant.

2. *Accounts* means the accounts prescribed in this system of accounts.

3. *Actually issued* as applied to funded debt securities or capital stock issued or assumed by the company, means those which have been sold to bona fide purchasers or holders for a valuable consideration (including those issued in exchange for other securities or other property) and such purchasers or holders secured them free from control by the carriers. Also securities issued as dividends on stock.

4. *Actually outstanding* as applied to funded debt securities or capital stock issued or assumed by the carrier means those which have been actually issued and are neither retired and canceled nor reacquired and held by or for the accounting company.

5. (a) *Affiliated companies* means companies or persons that directly, or indirectly through one or more intermediaries control, or are controlled by, or are under common control with, the accounting carrier.

(b) *Control* (including the terms *controlling*, *controlled by*, and *under common control with*) means the possession directly or indirectly, of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement, and

whether such power is established through a majority of minority ownership or voting of securities, common directors, officers or stockholders, voting trusts, holding trusts, associated companies, contract or any other direct or indirect means.

6. *Amortization* means the gradual extinguishment of an amount in an account by distributing such amount over a fixed period dependent on the requirements of regulatory bodies, over the life of the asset or liability to which it applies, or over the period during which it is anticipated the benefit will be realized.

7. *Carrier* as used herein and when not otherwise indicated in the context means any carrier to which this system of accounts is applicable.

8. *Consolidation* means the formation of a new company. See instruction 2-15.

9. *Board* means the Surface Transportation Board.

10. *Compensating balance* means the portion of any demand deposit (or any time deposit or certificate of deposit) maintained by a carrier (or by any person on behalf of the carrier) which constitutes support for existing borrowing arrangements of the carrier with a lending institution. Such arrangements include both outstanding borrowings and the assurance of future credit availability. (The compensating balance requirement should be adjusted by the amount of float unless such adjustment would cause the compensating balance to be greater than the cash balance per carrier's books.) The float adjustment is made by subtracting the float from the compensating balance requirement if the collected bank ledger balance exceeds the cash balance per carrier's books or by adding the float to the compensating balance requirement if the collected bank ledger balance is less than the cash balance per carrier's books.

(a) *Float* means deposits and withdrawals in transit which constitute a difference between the collected bank ledger balance and the cash balance per carrier's books.

11. *Cost center* refers to an organizational subdivision for which cost data are desired and for which provision is made to accumulate costs such as a terminal, yard, or track segment. A

cost center may correspond to a given area of responsibility for which costs are presently accumulated for planning and control. A cost center is the smallest segment of activity or area of responsibility for which costs are accumulated and directly traceable.

12. *Cost of renewal* means the cost of additional material applied (other than the value assigned second-hand parts remaining in the rebuilt unit) plus the cost of labor used in the rebuilding process, exclusive of the portion applicable to dismantling and repair of old parts reused.

13. *Cost of removal* means cost of demolishing, dismantling, tearing down or otherwise removing property.

14. *Debt issue cost* means all costs in connection with the issuance and sale of evidences of debt, such as fees for drafting mortgages and trust deeds; fees for issuing or recording evidences of debt; cost of engraving and printing bonds and certificates of indebtedness; fees paid trustees, specific costs of obtaining governmental authority; fees for legal services; fees and commissions paid underwriters, brokers and salespeople for marketing such evidences for debt; fees and costs of listing on exchanges; and other like costs.

15. *Discount* as applied to funded debt securities or capital stock issued or assumed by the carrier, means the excess of the par or face value of the securities plus interest or dividends accrued at the date of the sale over the cash value of the consideration received from their sale.

16. *Equity security* encompasses any instrument representing ownership shares (e.g., common, preferred and other capital stock), or the right to acquire (e.g., warrants, rights, and call options) or dispose of (e.g., put options) ownership shares in an enterprise at fixed or determinable prices. The term does not encompass preferred stock that by its terms either must be redeemed by the issuing enterprise or is redeemable at the option of the investor, nor does it include treasury stock or convertible bonds.

(a) *Marketable*, as applied to an equity security, means an equity security as to which sales prices or bid and ask prices are currently available on a national securities exchange (i.e., those

registered with the Securities and Exchange Commission) or in the over-the-counter market. In the over-the-counter market, an equity security shall be considered marketable when a quotation is publicly reported by the National Association of Securities Dealers Automatic Quotations System or by the National Quotations Bureau, Inc. (provided, in the latter case, that quotations are available from at least three dealers). Equity securities traded in foreign markets shall be considered marketable when such markets are of a breadth and scope comparable to those referred to above. This definition is not met by restricted stock (securities for which sale is restricted by a governmental or contractual requirement except where such requirement terminates within one year or where the holder has the power to cause the requirement to be met within one year). Any portion of the stock which can reasonably be expected to qualify for sale within one year, such as may be the case under Rule 144 or similar rules of the Securities and Exchange Commission, is not considered restricted.

(b) *Market value* refers to the aggregate of the market price of a single share or unit times the number of shares or units of each marketable equity security in the portfolio. When an equity has taken positions involving short sales, sales of calls, and purchases of puts for marketable equity securities and the same securities are included in the portfolio, those contracts shall be taken into consideration in the determination of market value of the marketable equity securities.

(c) *Cost*, as applied to a marketable equity security, refers to the original cost unless a new cost basis has been assigned based on recognition of an impairment of value that was deemed other than temporary or as the result of a transfer between current and non-current classifications. In such cases, the new cost basis assigned shall be considered cost.

17. (a) *Income taxes* means taxes based on income determined under provisions of the United States Internal Revenue Code and foreign, state and other taxes (including franchise taxes) based on income.

(b) *Income tax expense* means the amount of income taxes (whether or not currently payable or refundable) allocable to a period in the determination of net income.

(c) *Pretax accounting income* means income or loss for a period, exclusive of related income tax expense.

(d) *Taxable income* means the excess of revenues over deductions or the excess of deductions over revenue to be reported for income tax purposes for a period.

(e) *Timing differences* means differences between the periods in which transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income. Timing differences originate in one period and reverse or *turn around* in one or more subsequent periods. Some timing differences reduce income taxes that would otherwise be payable currently; others increase income taxes that would otherwise be payable currently.

(f) *Permanent differences* means differences between taxable income and pretax accounting income arising from transactions that, under applicable tax laws and regulations, will not be offset by corresponding differences or *turn around* in other periods.

(g) *Tax effects* means differentials in income taxes of a period attributable to (1) revenue or expense transactions which enter into the determination of pretax accounting income in one period and into the determination of taxable income in another period, (2) deductions or credits that may be carried backward or forward for income tax purposes and (3) adjustments of prior periods and direct entries to other stockholders' equity accounts which enter into the determination of taxable income in a period but which do not enter into the determination of pretax accounting income of that period. A permanent difference does not result in a *tax effect* as that term is used in this definition.

(h) *Deferred taxes* means tax effects which are deferred for allocation to income tax expense of future periods.

(i) *Interperiod tax allocation* means the process of apportioning income taxes among periods.

(j) *Tax allocation within a period* means the process of apportioning income tax expenses applicable to a given period between income before extraordinary items and extraordinary items, and of associating the income tax effects of adjustments of prior periods and direct entries to other stockholders' equity accounts with these items.

18. (a) *Investor* means a business entity that holds an investment in voting stock of another company.

(b) *Investee* means a corporation that issued voting stock held by an investor.

(c) *Corporate joint venture* is a company owned and operated as a separate and specific business or project for the mutual benefit of the members of the group. Joint facilities for purposes of this system of accounts are not considered corporate joint ventures.

(d) *Dividends* when applied to distributions received from investees unless otherwise specified, means dividends received or receivable in cash, other assets, or another class of stock and does not include stock dividends or stock splits.

(e) *Earnings or losses of an investee and financial position of an investee* refer to net income (or net loss) and financial position of an investee determined in accordance with generally accepted accounting principles.

(f) *Undistributed earnings of an investee* means net income less dividends declared whether received or not.

(g) *Date of acquisition* is the date on which the investor assumes the rights of ownership. Ordinarily, this is the date assets are received and other assets are given or securities issued.

19. *Joint facility* means any owned or leased carrier operating property occupied or operated jointly by the carrier and one or more other carriers, under an arrangement whereby the cost and income are apportioned to the parties to the joint agreement. Portions of a structure or other property used exclusively by each of two or more carriers are not joint facilities.

20. *Ledger value* of an account means the undepreciated or unamortized cost of acquisition of the item to the carrier, recorded in the general ledger. In case the cost of any item of property is

not shown separately in the ledger, the ledger value of that item shall be its proportionate share of the value of the entire group in which the particular property is included.

21. *Merger* means the acquisition of one company by another. See instruction 2-15.

22. *Minor items of property* means the associated parts or items of which units of property are composed.

23. *Net railway operating income*: Operating revenue remaining after deducting operating expenses, income taxes on ordinary income, and the provision for deferred income taxes. Also, in arriving at NROI, deduct the Income from Lease of Road and Equipment and add the Rent for Leased Road and Equipment, formerly accounts 509 and 542, respectively.

24. *Net salvage value* means salvage value of property retired less the cost of removal.

25. *Nominally issued* as applied to funded debt securities or capital stock issued or assumed by the carrier, means those which have been signed, certified by trustees, or otherwise executed, and placed with the proper officer for sale and delivery, or pledged, or otherwise placed in some special fund of the accounting company, but which have not been sold or issued directly to the trustees of such fund in accordance with contractual requirements.

26. *Nominally outstanding* as applied to funded debt securities or capital stock issued or assumed by the carrier, means those which, after being actually issued, have been reacquired by or for the accounting company under such circumstances which require them to be considered as held alive and not retired and canceled.

27. *Premium* as applied to funded debt securities or capital stock issued or assumed by the carrier, means the excess of the cash value of the consideration received from their sale over the sum of their par (stated value of no par stock) or face value and interest or dividends accrued at the date of sale.

28. *Programmed track replacements* are costs incurred as part of a track replacement program or planned expenditures. Programmed track replacements are generally performed by relatively large work gangs which, on the basis of

programmed and authorized work orders, use heavy mechanized equipment to replace rail, ties and other track material. For guidance on what not to capitalize, see the notes to the text of Accounts 8, 9 and 11.

29. *Property retired* means units of property which have been removed, sold, abandoned, destroyed, or which for any cause have been permanently withdrawn from service; also minor items of property not replaced.

30. *Rail Transportation Property*. Rail transportation property is all property and other assets, irrespective of ownership, that comprise the entire operating unit devoted to rail transportation service. This definition comprises the following accounts:

- 701 Cash
- 703 Special deposits
- 704 Loans and notes receivable
- 705 Accounts receivable—interline and other balances
- 706 Accounts receivable—customers
- 707 Accounts receivable—other
- 708.5 Receivable with affiliated companies
- 709 Accrued accounts receivable
- 710 Working funds
- 711 Prepayments
- 712 Material and supplies
- 713 Other current assets
- 714 Deferred income tax charges
- 731 Road and equipment property
- 732 Improvements on leased property

31. *Salvage value* means the amount received from the sale of operating property retired less any expenses in connection with the sale or in preparing the property for sale. If the property is retained for reuse, the salvage value shall be recorded in account 712, Materials and Supplies, or other appropriate account at an amount not to exceed its recorded cost (actual or average), or current market value, whichever is lower.

32. *Segment of a business* refers to a component of an entity whose activities represent a separate major line of business or class of customer. A segment may be in the form of a subsidiary, a division, or a department, and in some cases a joint venture or other non-subsidiary investee, provided that its assets, results of operations, and activities can be clearly distinguished, physically and operationally and for financial reporting purposes,

from the other assets, results of operations, and activities of the entity. The fact that the results of operations of the segment being sold or abandoned cannot be separately identified strongly suggests that the transaction should not be classified as a disposal of a segment of business.

(a) *Measurement date* means the date on which the management having authority to approve the action commits itself to a formal plan to dispose of a segment of the business, whether by abandonment or sale. The measurement date for disposals requiring Commission approval shall be the service date of the Order authorizing the disposal.

(b) *Disposal date* refers to the date of closing the sale, if the disposal is by sale or the date that operations cease if the disposal is by abandonment.

33. *Service life* means the period between the date when operating property is placed in service and the date of its retirement.

34. *Service value* means the ledger value of operating property less its salvage value (see definition 17).

35. *Track maintenance* is material and labor costs of routine track repairs such as sporadic tie replacement, repair of broken rails, tightening track bolts and track spikes. A more complete list of maintenance items are included in notes to the text of Accounts 8, 9 and 11.

36. *Work equipment* means equipment which can be coupled in a train for movement over the carrier's tracks, and which is used in the carrier's work service. See equipment listing for account 57, *Work equipment*.

## GENERAL INSTRUCTIONS

1-1 *Classification of carriers.* (a) For purposes of accounting and reporting, carriers are grouped into the following three classes:

Class I: Carriers having annual carrier operating revenues of \$250 million or more after applying the railroad revenue deflator formula shown in Note A.

Class II: Carriers having annual carrier operating revenues of less than \$250 million but in excess of \$20 million after applying the railroad revenue deflator formula shown in Note A.

Class III: Carriers having annual carrier operating revenues of \$20 million or less after applying the railroad revenue deflator formula shown in Note A.

(b)(1) The class to which any carrier belongs shall be determined by annual carrier operating revenues after the railroad revenue deflator adjustment. Upward and downward reclassification will be effected as of January 1 of the year immediately following the third consecutive year of revenue qualification.

(2) If a Class II or Class III carrier's classification is changed based on three years' adjusted revenues the carrier shall complete and file the Classification Index Survey Form with the Commission by March 31 of the year following the end of the period to which it relates.

(3) Newly organized carriers shall be classified on the basis of their annual carrier operating revenues after railroad revenue deflator adjustment for the latest period of operation. If actual data are not available, new carriers shall be classified on the basis of their carrier operating revenues known and estimated for a year (after railroad revenue deflator adjustment).

(4) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective January 1 of the next calendar year on the basis of the combined revenue for the year when the combination occurred (after railroad revenue deflator adjustment).

(5) In unusual circumstances, such as partial liquidation and curtailment or elimination of contracted services, where regulations will unduly burden the carrier, the carrier may request the Board for an exception to the regulations. This request shall be in writing specifying the conditions justifying an exception.

(c) Class I carriers shall keep all of the accounts of this system which are applicable to their operations. Class II and III carriers are not required to maintain the accounts of this system.

(d) All switching and terminal companies, regardless of their operating revenues will be designated Class III carriers.

(e) Unless provided for otherwise, all electric railway carriers, regardless of operating revenues, will be designated Class III carriers.

NOTE A: The railroad revenue deflator formula is based on the Railroad Freight Price Index developed by the Bureau of Labor Statistics. The formula is as follows:

Current Year's Revenues  $\times$  (1991 Average Index/Current Year's Average Index)

NOTE B: See related regulations 49 CFR 1241.15 Railroad classification survey form.

[57 FR 27185, June 18, 1992; 57 FR 31754, July 17, 1992]

1-2 *Classification of accounts.* (a) Accounts are prescribed to cover cost of property used in transportation operations and operations incidental thereto and for revenues, expenses, taxes, rents, and other items of income for such operations. Separate accounts are prescribed for investment in property not used in transportation operations and for other investments and income therefrom; for unusual and infrequent items; for operations and disposal of discontinued segments; for extraordinary items and accounting changes; and for assets, liabilities and capital includable in the balance sheet statement. Retained earnings accounts form the connecting link between the income account and the equity section of the balance sheet. They are provided to record the transfer of net income or loss for the year; certain capital transactions; and, when authorized by the Board, other items.

(b) The cost of property, and the revenues, expenses, taxes and rents for miscellaneous operations involving the use of such facilities as hotels, restaurants, grain elevators, storage warehouses, power plants, cold storage plants, etc., shall not be included in the accounts prescribed for transportation operations unless the operation of the facilities is conducted by the railway companies in connection with furnishing transportation services. Likewise, the cost of property, the revenues, expenses, taxes, and rents arising from the operation of stockyards shall not be included in accounts prescribed for transportation operations

unless operation of the facilities is conducted in connection with transportation of livestock. It is not intended that cost of property and income arising from incidental public stockyards service rendered by stockyards primarily devoted to transportation services shall be excluded from transportation operation accounts.

(c) Joint facility accounts are provided for the joint users of tracks, bridges, yards, wharves, stations, and other facilities in which to record items in settlement for use of such facilities. When the compensation for the use of facilities is a fixed amount or is based upon a charge per passenger, ton, car or other unit, the amount shall be fairly apportioned by the operating company among the joint facility operating expense and income accounts. The creditor shall show the distribution of these charges upon its bills, and such distribution shall be adhered to by the debtor. Train service in connection with the line haul of traffic, including that operated under a joint arrangement for the benefit of two or more carriers, is not considered a joint facility operation.

(d)(1) *Extraordinary Items.* All items of profit and loss recognized during the year are includable in ordinary income unless evidence clearly supports their classification as extraordinary items.

Extraordinary items are characterized by both their unusual nature and infrequent occurrence taking into account the environment in which the firm operates; they must also meet the materiality standard.

Unusual means the event or transaction must possess a high degree of abnormality and be of a type clearly unrelated to, or only incidentally related to the ordinary and typical activities of the entity.

Infrequent occurrence means the event or transaction shall be of a type not reasonably expected to recur in the foreseeable future.

(2) *Unusual or Infrequent Items.* Material events unusual in nature or infrequent in occurrence but not both, thus not meeting both criteria for classification as extraordinary, shall be includable in the accounts provided as separate components of income/expense from continuing operations.

(3) *Discontinued Operations.* The results of continuing operations shall be reported separately from discontinued operations and any gain or loss resulting from disposal of a segment of a business (see definition 23(a)) shall be reported in conjunction with the related results of discontinued operations and not as an extraordinary item. The disposal of a segment of a business shall be distinguished from other disposals of assets incident to the evolution of the entity's business, such as the disposal of part of a line of business, the shifting of production or marketing activities for a particular line of business from one location to another, the phasing out of a product line or class of service, and other changes occasioned by technological improvements. If a loss is expected from the proposed sale or abandonment of a segment, the estimated loss shall be provided for at the measurement date (see definition 23(b)). If a gain is expected, it shall be recognized when realized, which ordinarily is the disposal date (see definition 23(c)).

(4) *Prior period adjustments.* Only the following two items of profit and loss shall be accounted for and reported as prior period adjustments and excluded from the determination of net income for the current period:

(1) Correction of an error in the financial statements of a prior period, and

(2) Adjustments that result from realization of income tax benefits of preacquisition operating loss carryforwards of purchased subsidiaries.

With the exception of the two items just mentioned, all items of profit and loss recognized during a period shall be included in the determination of net income for that period.

NOTE: The carrier shall follow generally accepted accounting principles where an interpretation of the rules is needed or obtain an interpretation from its public accountant or the Board.

(5) *Accounting Changes.* Errors in financial statements result from mathematical mistakes, mistakes in the application of accounting principles, or oversight or misuse of facts that existed at the time the financial statements were prepared. In contrast, a change in an accounting estimate re-

sults from new information or subsequent developments and from better insight or judgment. Correction of an error should be accomplished through a prior period adjustment [See Instruction 1-2(d)(4)]. Changes in an accounting estimate should be accounted for in the period of change (and future period if the change affects both) (See Instruction 1-7). A change in an accounting principle or accounting entity should be referred to this Board for approval. The cumulative effect of a change in accounting principle should ordinarily be reflected in the account provided for in determining net income.

(6) *Materiality.* As a general standard an item shall be considered material when it exceeds 10 percent of annual income (loss) before extraordinary items. An item may also be considered in relation to the trend of annual earnings before extraordinary items or other appropriate criteria. Items shall be considered individually and not in the aggregate in determining materiality. However, the effects of a series of related transactions arising from a single specific and identifiable event or plan of action shall be aggregated to determine materiality.

(7) *Board Approval and Accountant's Letter.* Items shall be included in the accounts provided for extraordinary items, unusual or infrequent items, discontinued operations, prior period adjustments and cumulative effect of changes in accounting principles only upon approval of the Board. If the carrier retains the service of an independent accountant, a request for using these accounts shall be accompanied by a letter from the independent accountant approving or otherwise commenting on the request.

NOTE: The carrier may refer to generally accepted accounting principles for further guidance in applying paragraph (d) above.

[42 FR 35017, July 7, 1977 as amended at 43 FR 37455, Aug. 23, 1978; 52 FR 4321, 4324, Feb. 11, 1987]

1-3 *Records.* (a) Each carrier shall keep its books of account, and all other books, records, and memoranda which support the entries in such books of account so as to be able to furnish readily full information as to any item included in any account. Each entry

shall be supported by such detailed information as will permit ready identification, analysis, and verification of all facts relevant thereto.

(b) All expenditures including the expense accounts of officers and employees shall be supported by vouchers, payrolls, receipted bills, canceled checks, receipts for petty cash payments, or other evidences of the expenditures incurred.

(c) The books referred to herein include not only books of accounts in a limited technical sense but all other records such as minute books, stock books, reports, correspondence, memoranda, etc., which will be useful in developing the history of or facts regarding any transaction.

(d) No carrier shall destroy any books, records, memoranda, etc., which support entries to its accounts unless destruction is permitted by the regulations governing preservation of records, Part 1220 of this chapter.

(e) In addition to prescribed accounts, clearing accounts, temporary accounts, and subdivisions of any accounts may be kept, provided the integrity of the prescribed accounts is not impaired.

(f) Cost detail shall be maintained by cost centers for purposes of cost assignments effective 1-1-79. This provides for cost control and cost planning at any designated area of responsibility. These cost centers shall be similarly defined as the railroads' existing responsibility centers. Cost center information shall therefore be kept at the same level of detail presently collected, categorized, and maintained in railroad internal managerial accounting systems. This detailed information shall not be reported to the Board on an ongoing basis. However, the carrier shall keep the detailed information to provide a ready analysis and verification of the costs collected by cost center.

[42 FR 35017, July 7, 1977, as amended at 52 FR 4324, Feb. 11, 1987; 61 FR 9113, Mar. 7, 1996]

1-4 *Accounting period.* (a) Each carrier shall keep its books on a monthly basis so that known transactions, as nearly as may be ascertained, shall be entered in the accounts not later than 60 days after the last day of the period for which the accounts are stated, ex-

cept that the time within which the final entries for the year ending December 31 shall be made may be extended to such date in the following March as shall not interfere with the preparation and filing of annual report.

(b) A trial balance of the general ledger accounts shall be prepared at the close of each month setting out the account number, title, and amount of each ledger account. (Mechanical, electronic or automatic data processing printout documentation producing the equivalent of manually prepared trial balances shall identify balances by account numbers.) At the end of the calendar year, the revenue, expense, and other income accounts shall be closed into retained earnings account, and the balance sheet account balances shall be brought forward to the general ledger for the succeeding year.

(c) No changes shall be made in the accounts for periods covered by quarterly and annual reports that have been filed with the Board unless the changes have first been authorized by the Board.

1-5 *Accrual method of accounting.* The accounting for operating revenues, operating expenses, income and other items each month and year shall be, as nearly as practicable, upon the basis of accruals consistently applied. Any change in practice of accounting for accruals or any unusual accruals involving material amounts shall be reported promptly to the Board.

1-6 *Charges to be just and reasonable.* All charges to the accounts prescribed in this system of accounts for carrier property, operating revenues, operating and maintenance expenses, and other carrier expenses, shall be just, reasonable and not exceed amounts necessary to the honest and efficient operation and management of carrier business. Payments shall not exceed the fair market value of goods and services acquired in an arm's length transaction. Any payments in excess of such just and reasonable charges shall be included in account 551, *Miscellaneous income charges.*

1-7 *Changes in accounting estimates.* Changes in accounting estimate arising during the current year which are applicable to prior years shall be included in the same account which would have

been charged or credited if the item had been taken up or the adjustment made in the year to which it pertained. [See Instruction 1-2(d)(5) for Accounting Changes].

[42 FR 35017, July 7, 1977, as amended at 52 FR 4324, Feb. 11, 1987]

1-8 *Accounting for computer systems and word processing costs.* (a) Capitalized costs for computer systems and word processing equipment shall be charged to property account 59, when such costs are not dedicated to a particular function (See Account 59). Related depreciation expenses for capitalized costs shall be charged to account 62-23-00, Depreciation, Other Equipment.

(b) Repair and maintenance costs related to computer systems and word processing equipment shall be charged to function 46 of the Other equipment subactivity by appropriate natural expense (labor, material, purchased services, other). Repairs performed by an outside company shall be charged to operating expense account 39-23-46.

(c) Operating costs related to computer systems and word processing equipment shall be charged to function 87, Management services and data and word processing, when the equipment benefits more than one activity. When the equipment benefits one activity only, such operating costs shall be charged to the activity/function benefited.

[52 FR 4324, Feb. 11, 1987]

1-9 *Transactions with affiliated companies.* (a) The records and supporting data of all transactions with affiliated companies shall be maintained in a separate file. The types of transactions referred to in this paragraph are for management services or any other type of services rendered, sale or use of facilities or any other type of assets or property. The file shall be maintained so as to enable the carrier, upon a Board request, to furnish accurate information with supporting documentation about particular transactions within 15 days of the request. We do not intend the file to include data relating to ordinary carrier operations (e.g. lawful tariff charges or interchange of equipment).

(b) Each bill rendered by an affiliated company shall state specifically the basis used for determining charges, unless the file contains the information to support the specific basis for charges.

(c) Punched cards, magnetic tapes, discs, or other machine-sensible devices used for recording, consolidating, and summarizing accounting transactions and records with a carrier's electronic or automatic data processing system may constitute a file within the meaning of this instruction.

(d) The carrier shall record, as the cost of assets or services received from an affiliated supplier, the invoice price (plus any incidental costs related to those transactions) in those cases where the invoice price can be determined from a prevailing price list of the affiliated supplier available to the general public in the normal course of business. If no such price list exists, the charges shall be recorded at the lower of their cost to the originating affiliated supplier (less all applicable valuation reserves in case of asset sales, or their estimated fair market value determined on the basis of a representative study of similar competitive and arm's-length or bargained transaction. Any difference between actual transaction price and the above, as well as charges that are not transportation related, shall be considered of a financing nature and shall be recorded, accordingly, as nonoperating charges or credits. (See instruction 1-6.)

(e) Nothing contained herein shall be construed as restraining the carrier from subdividing accounts (see instruction I-3(e)) for the purpose of recording separately transactions with affiliated companies.

(f) Carriers reporting information on a consolidated or combined basis in railroad Annual Report Form R-1 shall maintain a file with appropriate records and supporting data. This shall include work sheets showing revenues, expenses, earnings, investment in assets and accumulated depreciation for all affiliated railroads and rail-related affiliated companies. The work sheets shall also disclose any eliminations. Carriers shall also disclose the methodology used to support segregation of

rail-related or other items as appropriate. Further, a file shall be maintained to support and reconcile entity sales, transfers and reclassifications as well as taxes deducted from gains or losses.

[42 FR 35017, July 7, 1977, as amended at 53 FR 46620, Nov. 18, 1988]

1-10 *Accounting for income taxes.* (a) The interperiod tax allocation method of accounting shall be applied where material timing differences (see definition 20(e)) occur between pretax accounting income and taxable income. Carriers may elect, as provided by the Revenue Act of 1971, to account for the investment tax credit by either the flow through method or the deferred method of accounting. See paragraphs (d) and (e) below. All income taxes (Federal, state and other) currently accruable for income tax return purposes shall be charged to account 556, *Income taxes on ordinary income*, and account 590, *Income Taxes on Extraordinary Items*, as applicable.

(b) Under the interperiod tax allocation method of accounting the tax effect of timing differences (see definition 20) originating in the current accounting period are allocated to income tax expense of future periods when the timing differences reverse. Similar timing differences originating and reversing in the current accounting period should be combined into groups and the current tax rates applied to determine the tax effect of each group. A carrier shall not apply other than current tax rates in determining the tax effect of reversing differences except upon approval of the Board. When determining the amount of deferred taxes, rather than computing state and other taxes individually by jurisdiction, the Federal income tax rate may be increased by a percent equivalent to the effect of taxes imposed by the jurisdictions. In classifying a deferred charge or credit as current or noncurrent a carrier shall follow the classification criteria used for the related asset or liability which caused the timing difference. A deferred charge or credit that is not related to an asset or liability because (a) there is no associated asset or liability or (b) reduction of an associated

asset or liability will not cause the timing difference to reverse shall be classified based on the expected reversal date of the specific timing difference. Such classification disregards any additional timing differences that may arise and is based on the criteria used for classifying other assets and liabilities.

(c) The future tax benefits of loss carryforwards shall normally be recognized in the year in which such loss is applied to reduce taxes. Only in those unusual instances when realization is assured beyond any reasonable doubt should the future tax benefits of loss carryforwards be recognized in the year of loss. The tax effects of any realizable loss carrybacks shall be recognized in the determination of net income (loss) of the loss periods; appropriate adjustments of existing net deferred tax credits may also be necessary in the loss period.

(d) Carriers electing to account for the investment tax credit by the flow through method shall credit account 556 *Income taxes on ordinary income*, or account 590, *Income taxes on extraordinary items*, as applicable, and charge account 760, *Federal income taxes accrued*, with the amount of investment tax credit utilized in the current accounting period. When the flow through method is followed for the investment tax credit, account 557, *Provision for Deferred Taxes*, shall reflect the difference between the tax payable (after recognition of allowable investment tax credit) based on taxable income and tax expense (with full recognition of investment tax credit that would be allowable based on accounting income) based on accounting income.

(e) Carriers electing to account for the investment tax credit by the deferred method shall concurrently with making the entries prescribed in (d) above charge account 557, *Provision for deferred taxes*, or account 591, *Provision for deferred taxes—extraordinary item*, as applicable, and shall credit account 786, *Accumulated deferred income tax credits*, with the investment tax credit utilized as a reduction of the current year's tax liability but deferred for accounting purposes. The investment tax credit so deferred shall be amortized by credits

to account 557, *Provision for deferred taxes*.

NOTE A: Any change in practice of accounting for the investment tax credit shall be reported promptly to the Board. Carriers desiring to clear deferred investment tax credits because of a change from the deferral method to the flow through method shall submit the proposed journal entry to the Board for consideration and advice.

NOTE B: The carrier shall follow generally accepted accounting principles where an interpretation of the accounting rules for income taxes is needed or obtain an interpretation from its public accountant or the Board.

[42 FR 35017, July 7, 1977, as amended at 47 FR 12350, Mar. 23, 1982; 52 FR 4321, Feb. 11, 1987]

1-11 *Items in texts of accounts*. The items appearing in the texts of the accounts or elsewhere herein are for the purpose of more clearly indicating the application of the prescribed accounting. The items are intended to be representative, but not exhaustive. The appearance of an item in the text of a primary account warrants the inclusion of the item in the account mentioned only when the whole text also indicates inclusion inasmuch as the same item frequently appears in more than one primary account. The proper entry in each instance must be determined by the entire text of each primary account.

1-12 *Distribution of pay and expenses of employees*. (a) The pay and expenses of officers or employees regularly assigned to specific duties who perform incidental services of a different nature involving small expense may be included in the appropriate expense accounts for the duties to which such officers or employees are regularly assigned.

(b) When it is necessary to apportion the pay of officers and employees among various accounts, the carrier shall apportion the pay on the basis of the directly assignable pay to the various accounts.

1-13 *Payroll related expenses*. (a) Fringe benefits (account series 12-00-00) distributed to the activities using one of the following techniques (in order of preference):

(1) Apply appropriate factors to the total of the fringe expense account, in such a way as to distribute an equitable proportion of cost to each activ-

ity. These factors shall be developed to take into account variables such as the following:

(i) The effect of seniority on the expense. For example, profit sharing or pensions may be available to only certain categories of employees, which may be more predominant in one activity than another.

(ii) The effect of the type of work performed. For example, workmen's compensation expense may vary for each category of employees because of the rate charged or the claims experience of the category.

(iii) Any other variable which may have an appreciable effect on the equity of the apportionment.

(2) Distribute the amount in the same proportion as the pay charged to each activity in account series 11-00-00 (salaries and wages).

(3) Distribute the amounts using any other equitable basis which the carrier can substantiate.

(b) All carriers shall be prepared to describe the basis of apportionment used to distribute expenses included in this instruction.

(c) Any carrier which finds it impracticable to distribute expenses as required by this instruction should furnish the Board with full particulars of the conditions which prevent the proper distribution. Upon receipt of such information carrier will be advised of the procedure to be followed.

1-14 *Submission of questions*. To maintain uniformity of accounting, carriers shall submit questions of doubtful interpretation to the Board for consideration and decision.

1-15 *Transfers from government authorities*. When a Federal, State, or municipal government transfers cash or other assets to a railroad, the transaction shall be accounted for in accordance with the provisions set forth hereunder.

(a) The following forms of government transfers shall be included in account 502, *Railway Operating Revenues—Transfers from Government Authorities for Current Operations* when received:

(1) Payments as reimbursement for operating losses sustained on a specific line, or in a certain region. Examples

include support of commuter operations of a railroad, and local rail service assistance subsidies granted to a railroad under authority of the Railroad Revitalization and Regulatory Reform Act of 1976;

(2) Subsidies designated by the donor to offset operating expenses of the railroad, and

(3) Subsidies which may be applied at the discretion of the recipient to operating expenses and/or operating property.

(b) Government transfers relating to the acquisition, addition to, or improvement of depreciable operating property shall be included in account 783, *Deferred Revenues—Transfers from Government Authorities* when received. Account 783 shall be periodically charged, and account 503, *Railway Operating Revenues—Amortization of Deferred Transfers from Government Authorities* shall be credited with amounts equal to the depreciation costs of the assets to which they apply.

(c) Government transfers in the form of, or designated for the purchase of nondepreciable operating property shall be included in account 796, *Other Capital Surplus* in the manner described in the text of that account.

(d)(1) Transfers from the Federal Government to Amtrak and ConRail relating to the acquisitions, addition to, or improvement of depreciable or nondepreciable operating property shall be included in account 796 in the manner described in the text of that account.

(2) Transfers from the Federal Government to Amtrak and ConRail other than those described in paragraph (d)(1) shall be accounted for in accordance with paragraph (a) of this section.

(e) The provisions of this section do not apply to the following forms of government transfers:

(1) Government contributions in connection with construction projects in which government agencies and railroads participate. Transfers of this type shall be accounted for in accordance with the provisions of instruction 2-17. Paragraph (b) of that instruction lists applicable construction projects.

(2) Government payment for specific services rendered by the carrier in transporting property or persons by

rail line other than services described in paragraph (a)(1) of this section. Such payments shall be included in account 501, *Railway Operating Revenues (Exclusive of Transfers from Government Authorities)*.

(3) Government transfers relating to other than carrier operations.

(4) Government transfers in exchange for debt and/or equity securities of recipients.

(f) Government transfers shall generally be recorded when made available to the railroad. However, transfers relating to specific operations shall be recorded as earned.

(g) Government transfers in the form of assets other than cash shall be recorded at fair value when received.

[43 FR 30558, July 17, 1978, as amended at 52 FR 4321, Feb. 11, 1987]

#### 1-16 *Business entertainment expenses.*

(a) Business entertainment expenses are to be accounted for as operating expenses when incurred in conjunction with sales or marketing related activities. Sales or marketing related activities are those that emphasize a carrier's ability to provide efficient, timely and competitive service. These activities include outlays designed to promote new business as well as outlays incurred in maintaining existing business. The entertainment expenditures must be reasonable in relation to the business conducted and the business purpose for the entertainment must be adequately supported. Examples of this type of activity include the following:

(1) Salespersons' salaries and travel expenses, advertising, promotional and educational material;

(2) The conduct of shipper symposiums, conferences, meetings and traffic related functions;

(3) The use of direct mail solicitations and the publication and distribution of routing guides and service directories;

(4) Incidental promotional materials such as road atlases, calendars, pens, scratchpads, and other materials of nominal value;

(5) The conduct of business oriented lunches and dinners, public affairs programming, conferences and customer service calls;

(6) Sponsoring sales promotion functions, involving a number of customers or potential customers.

It must be noted that an activity listed above is not to be automatically accounted for as an operating expense. A carrier must be able to justify that an activity was primarily sales or marketing related.

(b) Business entertainment expenses are to be accounted for as non-operating expenses when they cannot be shown to be related to the sales or marketing activity. These are expenses that are primarily related to recreation or to the convenience and comfort of the individuals rather than to the transaction of business. Examples of this type of activity include the following:

(1) Recreational or resort entertainment, including but not limited to, fishing, hunting, tennis, golfing, skiing or other sporting or recreational trips or outings;

(2) Expense paid transportation in any carrier owned, leased or furnished vehicles, planes, helicopters, boats, yachts, or other methods;

(3) Expense paid lodging in any carrier owned, leased or furnished motels, hotels, apartments, condominiums, lodges, rooms and other places of overnight accommodation;

(4) Paid admission to any sporting, cultural, educational, recreational, or entertaining occurrence or event;

(5) Gifts such as athletic equipment, food or liquor, beverages of all types, smoking materials, clothing and personal accessories;

(6) The furnishing of lunches, dinners, appetizers or beverages where there is no true business purpose;

(7) Social occasions such as holiday parties.

It must be noted that an activity listed above is not to be automatically accounted for as a non-operating expense. If a carrier can justify that the activity was primarily sales or marketing related, it may be accounted for as an operating expense.

NOTE: The examples listed above are not inclusive, but are intended as a guide to give carriers an indication of what will or will not be permitted to be recovered through the

rate structure. In all instances the burden of proof will fall on the carrier involved.

### INSTRUCTIONS FOR PROPERTY ACCOUNTS

2-1 *Items to be charged.* (a) To the road and equipment property accounts shall be charged the cost of purchasing land, the cost of purchasing and constructing buildings, facilities and equipment, and the cost of additions and betterments to property. *Cost* means the amount of cash disbursed, or the fair value of other assets distributed, or the present value of amounts to be paid. Where the fair market value of resources given up (assets, services or items of stockholder's equity) is not clearly determinable, the cost may be determined by the fair market value of the resources acquired. The carrier shall be prepared to furnish the Board with the particulars of its method of determining cash value when the consideration is other than monetary. The amount of liabilities incurred with suppliers in the normal course of business, which are due in customary trade terms not exceeding approximately one year, shall be recorded at the maturity value. Acquisition date is the date title passes to the carrier.

(b) The cost of road and equipment purchased under a plan involving other deferred payments (debt or capital lease) shall be recorded at the discounted present value of the payment, net of executory costs such as insurance, maintenance, and taxes. The interest rate used to discount the payments should be the prevailing market rate for similar debt instruments of issues with similar credit ratings. In any event, the rate used for valuation purposes will normally be at least equal to the rate at which the carrier can obtain financing of a similar nature from other sources at the date of

the transaction (the carrier's incremental borrowing rate). In the case of a capital lease, when it is practical to ascertain the implicit rate computed by the lessor, and that rate is less than the carrier's incremental borrowing rate, the carrier should use the implicit rate. Acquisition date for a capital lease is the date the lease agreement is signed. If the property covered by the lease has yet to be constructed or has not been acquired by the lessor at the date the lease agreement or commitment is signed, the acquisition date shall be the date the property under construction is completed or the date the property not yet acquired is acquired by the lessor. (See Instruction 2-20.)

(c) Where actually incurred, interest cost is to be added to the cost of road and equipment deemed *qualifying assets* during the period of time required to get them ready for their intended use (acquisition period). *Qualifying assets* are those that are (1) either constructed or otherwise produced for a carrier's own use (including assets constructed or produced for the carrier by others for which deposits or progress payments have been made) or (2) assets intended for sale or lease that are constructed or otherwise produced as discrete projects. The amount of interest to be capitalized for qualifying assets shall be based upon the average amount of accumulated expenditures for the asset during the acquisition period at the rate used on specific new borrowings associated with the qualifying asset. If average accumulated expenditures for the asset exceed the amount of specific new borrowings associated with the asset, the rate to be applied to such excess shall be a weighted average of the rates applicable to other borrowings of the enterprise. The total amount of interest cost capitalized in an accounting period shall not exceed the total amount of interest cost incurred by the enterprise during that period.

(d) Suitable records shall be maintained showing expenditures during the year for original road and equipment and road extensions; for merger and purchase of existing lines and reorganizations; for additions and better-

ments; and credits for property retirement.

(e) When the carrier exchanges road and equipment for other road and equipment with no other consideration involved, the road and equipment received shall be recorded at the ledger value of the road and equipment relinquished. Where the carrier receives a monetary consideration in the exchange, the carrier shall recognize gain on the exchange to the extent that the consideration received exceeds a proportionate share of the recorded cost of the road and equipment surrendered. The portion of the cost applicable to the realized amount shall be based on the ratio of the monetary consideration to the total consideration received (monetary consideration plus the estimate fair value of the road and equipment received) or, if more clearly evident, the fair value of the road and equipment transferred. Where the carrier pays a monetary consideration in the exchange, it shall not recognize any gain on the transaction but shall record the road and equipment received at the amount of the monetary consideration paid plus the recorded costs of the road and equipment surrendered. If a loss is indicated by the terms of an exchange transaction, the carrier shall recognize the entire loss on the exchange. Immaterial gains and losses on these exchanges shall be included in account 519, Miscellaneous Income, or 551, Miscellaneous Income Charges, as appropriate. Material amounts shall be recorded in accordance with Instruction 1-2(d).

[52 FR 4324, Feb. 11, 1987]

*2-2 Minimum rule applicable to additions to property.* An exception to the rule in Instruction 2-1 is that when the cost of acquisition of units of road property and of additions to existing units of road property (other than land and tracks) is less than \$5,000, such costs may be charged to operating expenses. This amount (rounded to the nearest \$100) will be adjusted by the June Producer Price Index for all commodities when an aggregate adjustment is \$500 or more. The revision will be published in the Federal Register and be effective as of January 1 of the following year. The carrier shall not

parcel expenditures under a general plan bringing the accounting for such expenditures within this minimum rule. An amount of less than the current minimum capitalization level, for the railroad as a whole or for individual property accounts may be adopted for purposes of this rule provided the carrier first notifies the Board of the amount it proposes to adopt and thereafter makes no change in the amount unless authorized by the Board. An amount adopted shall be adhered to in reporting property changes for valuation purposes.

[55 FR 42016, Oct. 17, 1990]

2-3 *Land.* (a) Accounts are provided for the cost of land used in transportation operations and also for land used in other than transportation operations. When land is retired from transportation operations but is retained by the carrier the original cost (estimated, if not known) shall be transferred to the account prescribed for property used in other than transportation operations. It is not contemplated that irregular parcels of land acquired in connection with acquisition of right-of-way which have no value as commercial property shall be thus transferred, either for the purpose of making right-of-way boundaries run more or less regular or for the purpose of eliminating from transportation property account the cost of unoccupied lands between tracks in yards and terminals. When any land, the cost of which is included in the accounts, is sold or otherwise retired, the ledger value shall be credited to the appropriate property investment account. The profit or loss from sale or loss from retirement or land shall be included in the accounts prescribed for such amounts.

(b) [Reserved]

[42 FR 35017, July 7, 1977, as amended at 52 FR 4324, Feb. 11, 1987]

2-4 *Structures.* Accounts are provided for the cost of several classes of buildings and facilities, including fixtures permanently attached to and made a part thereof. When a building or other structure is used or held primarily for transportation operations and is an integral part of the carrier's transportation plant, but a part there-

of is used or held for commercial purposes such as for rental to others or for use in other than transportation operations by the carrier, the entire cost of the building or other structure is includable in the accounts for transportation property. When a building or other structure is used or held primarily for commercial purposes or for use in other than transportation operations by the carrier, the entire cost of the building or structure is includable in account 737, *Property used in other than carrier operations*. Reclassification of property from its primary classification as transportation or other than transportation property, as the case may be, to the other classification is not required where changes in use are of a temporary nature or for a short period of time. The accounting for costs of maintenance, taxes, other operating costs, and for revenues and rentals shall be consistent with the classification of the building or other structure.

2-5 *Equipment.* Accounts are provided for several classes of equipment, such as locomotives, passenger-train cars, freight-train cars, highway revenue equipment, work equipment, floating equipment, and the necessary appurtenance, furniture, and fixtures first to equip for service, including the cost of inspection, setting up, and trying out, and transportation over foreign lines; also the cost of additions and betterments, such as improved appliances, parts, or appurtenances. When retired equipment is held without being torn down, the estimated value of the salvage therefrom shall be included in account 741, *Other assets*, until the salvage is recovered, except that the estimated scrap value of retired equipment held for sale in the ordinary course of business, and on which sale and realization of the proceeds within one year is assured, is includable in account 713, *Other current assets*.

2-6 *Components of construction cost.* The cost of constructing property includable in the property accounts shall include the direct and other costs as described hereunder.

(a) *Cost of labor.* This includes the amount paid for labor expended by the carrier's own employees, including the cost of labor expended for preliminary work, such as sinking test holes or

making soundings for tunnels, grading, buildings, and other structures; and cost of labor expended in laying and taking up tracks for temporary use in construction, except the cost of labor expended on tracks provided for the protection of traffic during the progress of addition and betterment work. The cost of labor shall also include the accounting company's expenditures for associated fringe benefits, such as vacation and holiday pay, health and welfare group insurance, pensions and retirement plans, payroll taxes and unemployment insurance. Office expenses and traveling and other personal expenses of employees, when borne by the carrier, shall be considered a part of the cost of the labor, as shall also the cost of fidelity bonds and employer's liability insurance premiums. When officers or employees are especially assigned to construction work their pay and their traveling and incidental expenses while thus engaged shall be included in the cost of the work. No charge shall be made against road and equipment accounts for the pay of officers and employees who merely render services incidentally in connection with extensions, additions, or betterments, although traveling and incidental expenses incurred by such officers and employees solely on account of such work shall be included in the account to which the cost of the work is chargeable.

(b) *Cost of materials and supplies.* This includes the purchase price of materials and supplies, including small tools, at the point of free delivery plus the cost of inspection and loading assumed by the carrier; a suitable proportion of store expenses; also sales and excise taxes on materials and supplies except as otherwise provided in the text of account 712, *Material and supplies*. In calculating the cost of materials used, proper allowance shall be made for the value of unused portions and of cuttings, turnings, borings, etc.; for the value of the material recovered from temporary tracks, scaffolding, cofferdams, and other temporary structures used in construction; and for the value of small tools recovered and used for other purposes.

(c) *Cost of work-train service.* This includes amounts paid to others for rent

and maintenance of equipment used; cost of labor of enginemen, trainmen, and enginehousemen, including wages of engine crews and train crews held in readiness for such service; and cost of fuel and other supplies consumed in connection with the operation of work trains. It shall also include the cost of maintaining the carrier's own equipment used in construction service. Amounts representing constructive rent or return upon the investment in owned equipment shall not be included as a part of the cost of work-train service.

(d) *Cost of special machine service.* This includes the cost of labor expended and of materials and supplies consumed in maintaining and operating power shovels, scrapers, rail unloaders, ballast unloaders, pile drivers, dredges, ditchers, weed burners, and other labor-saving machines; also rents paid for use of such machines.

(e) *Cost of transportation.* This includes the amounts paid to other companies or individuals for the transportation of men, materials and supplies, special machine outfits, appliances, and tools in connection with construction. Freight charges paid foreign lines for the transportation of construction material to the carrier's line shall be included, so far as practicable, as a part of the cost of the material.

(f) *Cost of contract work.* This includes amounts paid for work performed under contract by other companies, firms, or individuals, and costs incident to the award of the contract.

(g) *Cost of protection from casualties.* This includes expenditures for protection against fire, such as payments for discovery or extinguishment of fires, cost of detecting and prosecuting incendiaries, witness fees in relation thereto, amounts paid to municipal corporations and other for fire protection, and other analogous items of expenditure incurred directly in connection with construction work.

(h) *Cost of injuries and damages.* This includes expenditures on account of injuries to persons or damage to property when incurred directly as a result of

construction projects, and shall be included in the cost of the work in connection with which the injury or damage occurs. It also includes that portion of premiums paid for insuring property applicable to the period prior to the completion or coming into service of the property insured. Insurance recovered on account of compensation paid for injuries to persons incident to construction shall be credited to the accounts to which such compensation is charged, and insurance recovered on account of damages to property incident to construction shall be credited to the accounts chargeable with the expenditures necessary for restoring the damaged property. The cost of injuries and damages incident to the removal of old structures, or parts thereof, shall be charged to operating expenses, except that such costs in connection with the removal of old structures which are incumbrances on newly acquired lands shall be included in accounts 2, *Land for transportation purposes*, or 3, *Grading*, as appropriate.

(i) *Cost of privileges*. This includes compensation for temporary privileges, such as the use of public property or streets, in connection with the construction of the property of the carrier.

(j) *Material excavated*. The cost of disposing of material excavated in connection with construction shall be considered as a part of the cost of work, except that when such material is used for filling, the cost of removal and dumping shall be equitably apportioned between the work in connection with which the removal occurs and the work in connection with which the material is used.

(k) *Interest cost*. [See Instruction 2-1(c)].

[42 FR 35017, July 7, 1977, as amended at 52 FR 4325, Feb. 11, 1987]

**2-7 Additions to and retirements of property—General.** (a) In accounting for additions to and retirements and replacements of road and equipment property (excluding land) used in transportation operations, such property changes shall be considered as consisting of: (1) Units of property, and (2) other than units of property as prescribed in Instruction 2-19. Track property changes will be distinguished by

units of property as approved by the Commission.

(b) The cost of removal of retired property, both depreciable and other than depreciable, when borne by the carrier, shall be charged, as appropriate, to account 11-13-39, *Personnel—Salaries and Wages—Way and Structures—Other—Dismantling retired property*, or 11-23-39, *Personnel—Salaries and Wages—Equipment—Other Equipment—Dismantling retired property*, and other appropriate accounts (including subactivities 11 and 12).<sup>1</sup>

(c) An equitable proportion of a balance in property accounts 76, *Interest During Construction*, and 80, *Other elements of investment*, applicable to retired property shall be cleared from these accounts concurrently with the retirement accounting. Unless provided for otherwise, interest costs shall be capitalized in accordance with generally accepted accounting principles.

(d) When retired property is held and not removed, the estimated value of the salvage therefrom shall be included in account 741, *Other assets*, until the salvage is recovered, except that the estimated scrap value of retired property held for sale in the ordinary course of business, and on which sale and realization of the proceeds within one year is assured, is includible in account 713, *Other current assets*.

(e) The accounting for track additions and retirements (with and without replacement) shall be guided by Instruction 2-10.

[42 FR 35017, July 7, 1977, as amended at 46 FR 10920, Feb. 5, 1981; 48 FR 7183, Feb. 18, 1983; 49 FR 2254, Jan. 19, 1984; 52 FR 4321, Feb. 11, 1987]

**2-8 Additions to and retirements of units of property.** (a) When a unit of road or equipment property is added to the plant, the cost thereof shall be included in the appropriate primary account. When a unit of property is retired, with or without replacement, the

<sup>1</sup>The references to solely related freight operating expense activity/subactivity numbers and titles used throughout the system are for convenience and brevity. Refer to the specific account texts to determine the appropriate solely related passenger and/or common expense activity/subactivity numbers.

cost thereof shall be written out of the property account at time of retirement.

(b) When a unit of road or equipment property (or a minor item not replaced) classified as depreciable and included in the accounts prescribed for depreciable property is retired the service value shall be charged to account 735, *Accumulated depreciation; Road and equipment property*.

(c) When road property (other than a minor item constituting repairs) classified as other than depreciable property is retired, the cost thereof shall be cleared from the property account and the service value shall be charged to account 61-13-99, *General—Other Expenses—Way and Structures—Other—Other*. When the retirement requires Board approval, the carrier shall clear the cost from the property account upon the effective date of the abandonment. Subactivities 11 and 12 also apply.

(d) When property included in the depreciable accounts but excluded from the depreciation base is retired, the service value (including engineering expenditures assignable to retired property but not included in the depreciation base) shall be charged to operating expense.

*2-9 Additions and retirements of other than units of property.* (a) When an item of road or equipment property, other than a complete unit, is added to the plant and the addition is not a replacement, the cost thereof shall be accounted for in the same manner as an addition of a complete unit of property, subject to the minimum rule applicable to road property (see Instruction 2-2). When an item of property other than a complete unit (minor item) is replaced, independent of the complete unit of which it is a part, the cost of replacement shall be treated as maintenance and charged to operating expenses. If the replacement constitutes an improvement then the cost of replacement should be accounted for as a rebuilding expenditure under Instruction 2-12.

(b) When second-hand property acquired is in such physical condition that it is necessary to rehabilitate the property to bring it up to the standard required by the carrier, the cost of

such rehabilitation shall be included in the appropriate account for the property.

[42 FR 35017, July 7, 1977, as amended at 55 FR 42016, Oct. 17, 1990]

*2-10 Additions to and retirements of track.*

(a) When track or its components are added to the plant, the cost shall be included in the track primary account. When track components are replaced as part of a track replacement program, the replacement cost shall be accounted for as an addition to the track property account. The cost of track components which are retired with or without replacement shall be written out of the track property account at the time of retirement.

(b) When track is retired the service value (ledger value less net salvage) shall be charged to account 735, *Accumulated depreciation; Road and equipment property*.

(c) All repairs of tracks shall be accounted for as operating expenses.

(d) Track investment written out of the accounts shall be at original cost or estimated standard or average cost for that density category. Material to be reused shall be put in an investment pool at unrecovered cost and, when reused, included in the appropriate density category at the average cost of the investment pool.

[48 FR 7183, Feb. 18, 1983]

*2-11 Expenses in connection with additions and betterments.* The cost of removing old material from equipment and from buildings, bridges, wharves, tracks, and other fixed improvements, shall be charged to the appropriate operating expense accounts. Such charges shall include the cost of removing old foundations and filling old excavations, and restoring condition of grounds after addition and betterment work; and maintaining or protecting traffic during the progress of addition and betterment work, including the cost of constructing, maintaining, and removing temporary tracks required for maintaining traffic during the progress of the work.

[42 FR 35017, July 7, 1977. Redesignated at 48 FR 7183, Feb. 18, 1983]

2-12 *Units of property rebuilt or converted*—(a) *Rebuilding expenditures.* Carriers shall be governed by the following provisions when determining and accounting for depreciable road and equipment property rebuilding expenditures:

(1) Rebuilding expenditures are those cost actually incurred which substantially extend the service life or substantially increase the utility of depreciable road and equipment property. The rebuilding expenditures shall be material in nature relative to the current replacement cost of a similar new unit of road or equipment property. Expenses resulting from delayed maintenance and repairs shall not be considered in determining materiality.

(2) The phrase *extend the service life* means to extend the life of a property unit past its estimated service life.

(3) The term *increased utility* means that the road or equipment property has become more useful, more efficient, more durable, or has greater capacity.

(4) Rebuilt or converted road or equipment property shall be accounted for as an addition to the appropriate property accounts, with the old units accounted for as retired from service. The charge to the appropriate property accounts shall be composed of (i) the cost (estimated if necessary) less a fair allowance for depreciation, or salvage value, whichever is lower, of the parts reused, (ii) the cost of labor expended in rebuilding or in the conversion process, (iii) the cost of additional materials applied, and (iv) any other expenses incurred directly with the rebuilding or conversion. In no case shall the total amount charged to the property accounts for these units exceed the current replacement costs of similar new units that would be used for the same purpose. When a unit of road property or equipment is transferred from one class of service to another, with or without physical conversion, the unit shall be accounted for as retired from its original account and be recorded in a primary investment account appropriate to its new class of service.

(5) If it is necessary to repair the secondhand or reused parts remaining in a rebuilt unit, the repair cost may be

added to the value assigned parts in determining the related cost to be capitalized. Associated dismantling costs shall be included in operating expenses.

(b) *Repair expenses.* Expenses pertaining to road and equipment property, which represent normal or delayed repairs and maintenance, shall be expensed in the year incurred.

(c) *File and Storage.* Carriers shall keep records of each rebuilding program readily available. These records shall be provided to representatives of the Board when requested. The retention period shall be as required by 49 CFR part 1220, Preservation of Records.

[44 FR 67426, Nov. 26, 1979. Redesignated at 48 FR 7183, Feb. 18, 1983, and amended at 52 FR 4321, Feb. 11, 1987]

2-13 *Changes in line of road and relocation of yard tracks.*

(a) When changes are made in a line of road for the purpose of reducing curves or grades, or to eliminate bridges, tunnels, tracks in the installation of a centralized traffic control system, or other physical features, the part of the line so changed shall be considered property retired and its ledger value credited to the property accounts. The new line of road, including land, grading, ballast, track elements, and other transportation facilities serving the road shall be considered an addition and the cost charged to the property accounts. The cost of track changes which do not involve change in the existing roadbed shall be charged to operating expenses, even though the tracks may be dismantled in the process, but the resulting track extensions or reductions shall be accounted for as additions or retirements as appropriate.

(b) The cost of shifting or rearranging tracks within a yard shall be charged to operating expenses, even though the tracks may be dismantled in the process, but resulting increases or decreases in grading, ballast, or track length shall be accounted for as additions or retirements, as appropriate. Where tracks in whole or in part within a yard are determined to be no longer permanently used, the ledger value of such tracks shall be eliminated from the property account. If yard tracks and facilities are constructed in another location to take

the place of tracks retired, such tracks and facilities shall be accounted for as additions and the cost thereof shall be included in the property account.

[48 FR 7183, Feb. 18, 1983]

2-14 *Track connections.* (a) When the accounting carrier bears the construction cost of a connecting track situated on the property of another carrier, but acquires the salvage rights to the track, the cost of the track construction shall be charged to account 731, *Road and equipment property.*

(b) When carriers (1) share the cost of constructing a connecting track of which a portion is situated on each carrier's right-of-way, and (2) own and obtain the salvage rights to the track segment located on their respective properties, the construction cost borne by each carrier shall be charged to account 731, *Road and equipment property.*

(c) The cost of constructing a track connection on the right-of-way of another carrier which acquires the ownership of and salvage rights to the track, shall be charged by the carrier bearing such cost to accounts 37-11-00, *Purchased service—Joint facility—Debit—Way and Structures—Running*, or 37-12-00, *Purchased services—Joint facility—Debit—Way and Structures—Switching*. The owner carrier shall charge the amount of the construction cost to account 731, *Road and equipment—property*, with contra credit to accounts 38-11-00, *Purchases services—Joint facility—Credit—Way and Structures—Running*, or 38-12-00, *Purchases services—Joint facility—Credit—Way and Structures—Switching*. Material amounts for such costs shall be referred to the Board for consideration and decision.

(d) The cost of constructing a side track under a deposit refund agreement shall be charged to account 731, *Road and equipment property*. The deposit shall be credited to account 782, *Other liabilities*. Deposit amounts refunded during the agreement period shall be charged to account 782, *Other liabilities*. Upon termination of the agreement, the amount of any unrefunded deposit shall be credited to the applicable primary property accounts on an equitable basis.

2-15 *Merger, consolidation, and purchase of a railway operating entity or sys-*

*tem.* (a) When a railway or portion thereof constituting an operating unit or system is acquired by merger or consolidation in a pooling of interests or by purchase the cost of acquisition represented by cash, capital stock or other securities issued or assumed, liabilities assumed, and other consideration, shall be recorded in the accounts in the manner stated hereunder. Separate instructions are provided for a merger of subsidiaries.

(b) Pooling of interests:

(1) When the acquisition results from a merger or consolidation constituting a pooling of interests, in which all or substantially all of the equity interest in predecessor companies continue, as such, in a surviving company or a new company created for the purpose, the road and equipment, the other assets, and the liabilities of the predecessor companies, together with the balances in the accumulated amortization and depreciation accounts and the retained earnings accounts shall be recorded in the appropriate balance sheet accounts at the amounts shown in the accounts of predecessor companies, adjusted as may be necessary to conform with the accounting rules of the Board. Such adjustments shall be included in retained earnings or the other accounts that would have been appropriate had the adjustments been made in the books of account of the predecessor company.

(2) When the total par or the stated value of no par capital stock issued or outstanding pursuant to the pooling of interests is more than the aggregate amount of the capital stock of the separate companies before such pooling of interests, the excess shall be charged to account 795, *Other capital*, if unrestricted capital is available for such purpose; otherwise, the excess shall be charged to retained earnings.

(3) When the total par or stated value of no par capital stock issued or outstanding pursuant to the pooling of interests is less than aggregate amount of the capital stock of the separate companies before such pooling of interests, the difference for reduction in capital stock shall be credited to account 795, *Other capital*.

(c) Purchase:

(1) When the acquisition results from a purchase (except from subsidiaries

controlled through ownership of the majority share of voting stock) including mergers or consolidations other than pooling of interests, the amount includible in account 731, *Road and equipment property*, shall be the cost at the date of acquisition to the purchaser of the transportation property acquired. The cost assigned the property, as well as other assets acquired, shall be the amount of the cost consideration given. Where property and other assets are acquired for other than cash, including liabilities assumed and shares of stock issued, cost shall be determined by either the fair value of the consideration given or the fair value of the assets acquired, whichever is more clearly evident. In addition to any liabilities assumed, provision shall be made for such estimated liabilities as may be necessary.

(2) When the costs of individual units or classes of transportation property are not specified in the agreement, the cost assigned such property shall be apportioned among the appropriate primary accounts using the percentage relationship between the fair values for each class of property acquired and the total of such values.

(d) Merger of subsidiaries:

The acquisition and merger of property of subsidiaries controlled through ownership of the majority shares of voting stock is to be accounted for as a pooling of interests or as a purchase depending on the circumstances in each case. Where control was initially acquired through issuance of capital stock to stockholders of the subsidiary the rule applicable to pooling of interests ordinarily is applicable. Where control was initially acquired through purchase of stock the rule applicable to purchase of property may be appropriate even though the shares were purchased gradually from time to time over a period of years, in which event recognition of retained earnings since date of acquisition assignable to such shares may be proper. The journal entry pertaining to acquisition of property of subsidiaries shall be submitted to the Board for consideration based on the principles herein and procedures for which there is authoritative support, and the accounting for the merg-

er shall become final only after approval by the Board.

2-16 *Reorganization of railway.* (a) When a railway reorganization or receivership has been consummated, the assets acquired, liabilities assumed, and the capital stock or other securities issued or assumed, and other consideration, shall be recorded in the accounts in the manner stated hereunder. An adjustment of capitalization resulting in modification and reformation of classes of securities pursuant to voluntary action of the holders of securities but not resulting in a formal reorganization following a bankruptcy or other receivership proceedings (sometimes called a quasi-reorganization) is not covered by this instruction 2-16. Reduction of capital stock and other contributions to capital by stockholders shall be recorded in accordance with the instructions in the text of account 795, *Other capital*.

(b) The amounts includable in primary road and equipment property accounts shall be recorded at cost as shown in the predecessor companies' accounts except as otherwise provided in paragraphs (c) and (d) of this instruction 2-16. The remaining assets and the liabilities of the predecessor companies, adjusted as necessary to conform with the accounting rules of the Board, together with the balances in the accumulated amortization and depreciation accounts, shall be recorded in the appropriate balance sheet accounts.

(c) When the amount recorded for assets acquired is more than the par or stated value of no par capital stock issued and other consideration paid, including liabilities assumed, the difference shall be applied to such extent as necessary and is available to provide first for any deficiency in past accrued depreciation on property classified as depreciable; and, second, for any estimated loss from retirement of a branch line, segment of track or other important facility indicated by supporting records to be imminent. The remaining amount of the difference, if any, shall be applied proportionately to reduce the amounts includable in the property accounts in accordance with paragraph (b) of this instruction 2-16, based on the percentage relationship between

such difference and the aggregate cost of the property shown in the predecessor companies' accounts.

(d) When the amount applicable to the assets acquired is less than the par or stated value of no par capital stock issued and other consideration paid, including liabilities assumed, the accounting shall be referred to the Board for consideration and decision.

*2-17 Construction projects in which governmental agencies, individuals, or others, and the carrier participate.* (a) The amount includible in the property account for construction projects in which the carrier and governmental agencies, individuals, or others participate shall be (1) the payment made by the carrier for its share of the cost of construction plus (2) the recorded cost (estimated if unknown) of property relinquished as a direct result of the arrangement and retired from service less the value of salvage recovered therefrom by the carrier and less depreciation accrued on depreciable property, which is part of the carrier's cost of the project. The amount so includable in the property account shall be distributed equitably among the primary accounts applicable to railway property constructed. This amount shall first be applied to railway facilities includable in accounts other than 4, *Other right-of-way expenditures*, or 39, *Public improvements—Construction*, then any remaining balance shall be included in account 4 or 39, as appropriate. In no case shall the amount included in the primary accounts for the railway facilities acquired exceed the actual cost of constructing such facilities. The property account shall not include any cost or value for facilities or land contributed or paid for by governmental agencies, individuals or others. Property acquired as a specific contribution to capital by stockholders does not come under this rule. (See text of account 795, *Other capital*.)

(b) Construction projects as used in this section means widening of highways, construction of spillways, drainage canals, farm and other private passes, pipelines, drains or other facilities across the right-of-way; construction of overhead highway bridges, and railroad bridges over public highways and across streams, which provide a

railroad use in the operation of trains and a public use in the uninterrupted passage of highway and river traffic; installation of warning signals to protect highway traffic; and industrial side tracks. Also, reconstruction and relocation of tracks and appurtenant facilities such as occur in connection with carrying out flood control, reclamation, and other public improvement projects where it becomes necessary to abandon part of the line of railroad and relocate the tracks.

*2-18 Leased property improvements and retirements.* The cost to lessee of structures, facilities, additions and betterments on leased property and for retirement of property the cost of which is included in account 732 *Improvements on leased property*, shall be accounted for in conformity with the principles in the instructions for property owned. When lessor's property is retired and replaced and lessee is not obligated to reimburse the lessor for the retired property other than through the replacement, the lessee shall (1) charge the cost of the replacement to account 732, *Improvements on leased property*, (2) discontinue accruing depreciation for lessor's retired property, and (3) when recording final settlement with the lessor, consider jointly the amount accrued in account 772, *Accrued liability; Leased property*, for lessor's retired property and the respective amounts for the replacement included in accounts 732, *Improvements on leased property*, and 733, *Accumulated depreciation; Improvements on leased property*. When lessee is obligated to reimburse the lessor currently or at the termination of the lease for property retired other than through replacement, the lessee shall include the amount of the obligation in the appropriate liability account. The lessee shall furnish the lessor such information as is required to enable the lessor to perform necessary accounting. The accounting by the lessee and the lessor shall be consistent with contractual arrangements.

2-19 *List of units of property.* (a) This list of units is established for the purpose of designating the units of property to be used in accounting for additions to and retirements and replacements of property. Detailed information is included in instructions 2-7 and 2-8. Items listed under road property accounts are subject to the minimum rule applicable to additions to property. See instruction 2-2 pertaining to the minimum rule.

(b) This list of units will be revised from time to time as may be necessary to meet conditions. A carrier desiring to include in any account an appropriate unit not now specified therein may, upon approval of the Board, make such authorized addition to this list of units.

(c) Rules applicable to units of property rebuilt or converted and to changes in line of road or tracks which involve accounting for units or property retired are set forth in instructions 2-12 and 2-13.

2-20 *Accounting for leases.* (a) Leases shall be accounted for as capital leases whenever the lease meets one or more of the following four criteria:

- (1) The lease transfers ownership of the property to the lessee by the end of the lease term,
  - (2) The lease contains a bargain purchase option,
  - (3) The lease term is equal to 75 percent or more of the estimated economic life of the property, and,
  - (4) The present value at the beginning of the lease term of the minimum lease payments equals or exceeds 90 percent of the fair value of the leased property to the lessor at the inception of the lease less any related investment tax credit retained by the lessor.
- (b) If the lease does not meet any of the four criteria, the lease shall be classified and accounted for as an operating lease.
- (c) When accounting for capital leases the lessee shall record the asset

and the related obligation. The amount recorded as the asset and the obligation shall be the present value at the beginning of the lease term of the minimum lease payments during the lease term, excluding that portion of the payments representing executory costs such as insurance, maintenance, and taxes to be paid by the lessor. However, if that amount exceeds the fair value of the leased property, the amount recorded as the asset and the obligation shall be the fair value. The lessee shall compute the present value of the minimum lease payments using its incremental borrowing rate unless (1) it is practicable to learn the implicit rate computed by the lessor and (2) the implicit rate computed by the lessor is less than the lessee's incremental borrowing rate. If both of those conditions are met, the lessee shall use the implicit rate.

(d) Leased assets that meet the criteria for classification as a capital lease shall be subject to depreciation over their useful lives in the same manner as assets owned. If the capital lease meets the criteria of either Instruction 2-20(a)(1) or 2-20(a)(2), the asset shall be amortized in a manner consistent with the lessee's normal depreciation policy for owned assets. If the lease does not meet either of these two criteria, the asset shall be amortized in a manner consistent with the lessee's normal depreciation policy except that the period of amortization shall be the lease term.

(e) The accounting accorded the lease shall be subject to the same considerations as other obligations in classifying them with current and non-current liabilities in the classified balance sheet. Leases that meet the criteria requiring capitalization shall be recorded in those accounts that provide for carrier operating property or property used in other than carrier operations, as appropriate. The accounts shall segregate the amounts pertaining to capital leases.

(f) If the lease qualifies as an operating lease it should be accounted for by charging the rent to expense over the lease term. The rental expense should be recognized on a straight line basis over the lease term unless an-

other method is more representative of the use and the benefits derived.

(g) The criteria specified in paragraph (a) should be applied to all leases regardless of the relationship between the lessor and the lessee unless it is clear that the terms of the lease transaction have been significantly affected by their relationship. In this situation, the accounting should be modified to recognize economic substance rather than legal form.

(h) In the case of subsidiary companies or companies under common control whose principal business activity is leasing property or facilities to the carrier, the carrier is encouraged to request special authority to file consolidated or combined financial statements. If the carrier does not wish to file consolidated or combined financial statements, capitalization of the lease will be required if the lease meets the criteria that would require capitalization.

NOTE: The carrier shall follow generally accepted accounting principles where an interpretation of the rules for lease accounting is needed or obtain an interpretation from its public accountant or the Board.

*2-21 Freight train car repair costing.* Class I railroads shall report the costs of repairing freight train cars by car types.

(a) The accounting for freight train car repair costs shall agree with the applicable instructions and texts of accounts in 49 CFR Part 1201 relating to the equipment repair process (see Note A).

(b) Railroads may assign either actual costs, standard costs, or a combination of both to the accounting process. Standard costs, if used, shall recognize the differences in performing repairs on various types of equipment, and the differences related to specific repair facilities. Standard costs shall be based on adequate operational data which are reviewed at least annually. The resulting variances (price, efficiency, capacity, etc.) shall be reasonably allocated back to the car types to derive the amounts reported in Form R-1.

(c) Railroads shall report repair costs by the freight train car types shown in

Schedule 415 of Form R-1. In assigning repair costs, railroads may use either one of the following methodologies:

*Level I: Job Order Cost System*

Railroads may use a job order cost system for assigning repair costs to the car types for freight train cars. Under this methodology, railroads shall directly match direct labor and materials with the specific unit of equipment that was repaired. Actual costs, standard costs, or a combination of both may be used as stated above.

*Level II: Alternative Repair Costs Methodology*

Railroads not using the job order cost system shall report freight train car repair costs by using the methodology described below:

(1) The repair costs relating to heavy, program, or project repairs of freight train cars shall be directly assigned to the car types repaired by using actual or standard costs. A heavy repair is defined as a repair that is relatively so material in cost, repair time, or physical damage that management's involvement in the determination of the repair to be made is necessary and relatively greater than usual. Program or project repairs are those repairs which are performed under a predetermined plan where estimates costs, time periods, and car types to be repaired are identified.

(2) The repair costs relating to light and running repairs of system cars shall be allocated to the car types by using the Association of American Railroads' Car Repair Billing System (CRBS) as the process for distributing light and running repairs. The CRBS will be the tracking system for recording the number of repairs, the car types and types of repairs. Then by applying the CRBS standard costs to the particular repairs, standard costs relationships by car type can be developed and used to distribute actual light and running repair cost pools to the car types.

(3) Railroads shall match repair costs billed by and paid to foreign roads with the car types that were repaired. Foreign billings for light and running repairs are usually conducted through CRBS, and therefore, the car types can be identified. For heavy off-line repairs, car type identification is possible because system management is

generally involved with the authorization of such heavy repairs and car identification numbers are generally included in the billing process.

(4) Repair costs relating to foreign freight train cars shall also be reported by car types. However, a separate breakdown between foreign and system repair costs is not required for Board reporting purpose. Car type identification for light and running repairs to foreign cars can be obtained from CRBS tapes. The cost of heavy repairs to foreign cars should be accumulated by car types. The resulting expense credits from foreign railroads should be assigned to the car types to which they relate.

(5) Railroads shall match any resulting expense credits with the car types to which they relate. This can occur, for example, when a railroad is charged with the repair costs of system cars, but the responsibility of the repair ultimately rests with and is paid by a foreign road.

(d) Railroads shall submit to the Board any repair cost by car type methodology which does not agree with item (c) above. The Board shall review the methodology and determine if it is acceptable for reporting purposes.

(e) Railroads may submit justification and supporting documents requesting waiver from provisions required by this instruction. This provision is intended to provide relief for those smaller Class I railroads that might be unduly burdened by the cost of developing and maintaining the required system. Waivers shall be directed to the Board's Accounting and Valuation Board.

(f) Equipment repair cost records, including the allocation methods used, shall be maintained and made available to the Board upon request.

**INSTRUCTIONS FOR MAINTENANCE EXPENSES**

3-1 *Items to be charged.* (a) The accounts provided for maintenance of

road property and of equipment are designed to show the cost of repairs and also the loss through depreciation of the property used in transportation operations, including expenses resulting from ordinary wear and tear of service, exposure to the elements, inadequacy, obsolescence, or other depreciation, or from accident, fire, flood, or other casualty.

(b) These accounts shall include the cost of labor, materials and supplies, work-train service, floating equipment work service, special machine service, contract work, privileges, protection from casualties, and other analogous items of expense in connection with the maintenance of the plant used in railway service. The cost of materials and supplies, which shall include small tools, shall include the cost at the point of free delivery plus freight charges of foreign lines, and the costs of inspection and loading assumed by the carrier; also a proportion of store expenses. Such costs shall not include expenses of transportation over the carrier's line. Royalties for patent rights on mechanical appliances used in repairs of equipment shall be included in the cost of the repairs. The cost of boarding, traveling, and other incidental expenses of employees shall be included in the accounts to which the pay of the employees is chargeable, except where otherwise specified in the text of the accounts. In calculating the cost of materials used proper allowance shall be made for the value of unused portions and of cuttings, turnings, borings, etc., and for the value of the material recovered from property repaired and from temporary tracks, scaffolding, cofferdams, and other temporary structures used in repair work.

(c) The cost of repairs shall include the cost of inspecting to determine the repairs necessary, and of adjusting or repairing parts, both of road property and of equipment, such as the repairing of locomotives, cars, frogs, switches, rails, etc.; the cost of inspecting and testing after repairs have been made such as the testing of locomotives after repairs to determine whether the repairs have been properly made, and the running of repaired locomotives light in order to break them in for regular service; incidental costs of repairs,

such as the construction or removal of false work in connection with maintenance, cost of demolishing retired road property and disposing of the wreckage therefrom when the property is dismantled by or for the carrier; cost of maintaining or protecting traffic during the progress of construction work, including the cost of constructing, maintaining and removing temporary tracks required for maintaining traffic during the progress of the work; cost of mowing and beautifying grounds around buildings; repairing fences, sidewalks, driveways, and streets within or adjacent to such grounds; cost of removing snow from roofs of buildings (when not removed by those employed in the buildings); cost of periodical restorations of seasonal features, such as gardens, shrubbery, and lawns; cost of operating hothouses in connection with the work of beautifying grounds; and cost of clearing and removing casual incumbrances, such as ice, snow, and fallen timber.

(d) An employee's job classification shall not govern the accounting for work performed. Charges to a particular expense function shall be based on the nature of the work performed.

#### INSTRUCTIONS FOR DEPRECIATION ACCOUNTS

4-1 *Method.* (a) There shall be charged monthly to operating expenses or other appropriate accounts and credited to account 735, *Accumulated depreciation; Road and equipment property*, during the service life of depreciable road and equipment property, includable in accounts classed as depreciable, amounts which will approximate the loss in service value not restored by current repairs or covered by insurance. The charges for accruing depreciation currently shall be computed in conformity with the group plan by applying to the cost of property such percentage rates as will distribute the service value by the straight-line method in equal annual charges to operating expenses or other accounts during the estimated life of the property. In the case of track accounts 8, 9 and

11, service value shall reflect net salvage value. For road property, the cost shall be original cost or estimated original cost, as used in the valuation records, adjusted to current date. If a carrier submits proof that the actual cost of depreciable property is substantially different from cost figures in the valuation records, the carrier may, with the approval of the Board, use such cost figures as the depreciation base.

(b) The term group plan means the plan under which depreciation charges are accrued upon the basis of the cost of depreciable property includable in accounts classed as depreciable using the service lives of the individual depreciable units in the accounts and properly weighing to determine the composite annual rate of depreciation.

(c) For the purpose of the group plan of depreciation accounting, the following primary accounts are classed as depreciable accounts:

Road accounts:

3. Grading.
4. Other right-of-way expenditures.
5. Tunnels and subways.
6. Bridges, trestles and culverts.
7. Elevated structures.
8. Ties.
9. Rails and other track material.
11. Ballast.
13. Fences, snowsheds, and signs.
16. Station and office buildings.
17. Roadway buildings.
18. Water stations.
19. Fuel stations.
20. Shops and enginehouses.
22. Storage warehouses.
23. Wharves and docks.
24. Coal and ore wharves.
25. TOFC/COFC terminals.
26. Communication systems.
27. Signals and interlockers.
29. Power plants.
31. Power transmission systems.
35. Miscellaneous structures.
37. Roadway machines.
39. Public improvements-construction.
44. Shop machinery.
45. Power plant machinery.

Equipment accounts:

52. Locomotives.
53. Freight-train cars.
54. Passenger-train cars.
55. Highway revenue equipment.
56. Floating equipment.
57. Work equipment.
58. Miscellaneous equipment.
59. Computer systems and word processing equipment.

(d) When abandonment of a branch line or other important segment of the track structure or other part of the plant for which depreciation charges are not includable in the accounts as foreseeable within a reasonable period of time due to exhaustion of traffic, obsolescence or other causes, application may be made to the Board for authority to record a suitable provision in anticipation of a probable loss.

[42 FR 35017, July 7, 1977, as amended at 48 FR 4183, Feb. 18, 1983; 52 FR 4325, Feb. 11, 1987]

4-2 *Rates of depreciation.* (a) A separate composite annual percentage rate for each depreciable property account, or a subgroup in that account, shall be used in computing annual depreciation expenses and accumulated depreciation. The composite rates shall be based on the results of a depreciation study performed by each railroad. A depreciation study shall, in general, contain the following components:

(i) Actuarial or semiactuarial methods for determining service lives for road and equipment properties;

(ii) Salvage value calculations for road and equipment properties;

(iii) Accumulated depreciation for each account or subaccount as appropriate;

(iv) Other factors and related calculations involving the depreciation process; and

(v) A commentary on any adjustments and judgmental factors used in the study.

(b) Railroads shall submit to the Board for review and approval a report on depreciation studies and proposed depreciation rates every three years for equipment property, and every six years for road property. Railroads can, however, submit depreciation studies prior to its scheduled year, in which case a new cycle will begin.

(c) In computing monthly depreciation charges, the annual percentage rates shall be applied to the depreciation base as of the first of each month and the results shall be divided by twelve.

(d) Class II railroads are exempt from the three-year and six-year cyclical reviews, but shall submit depreciation studies when requested by the Board.

Class III railroads are not required to submit depreciation studies.

(e) A separate track depreciation rate shall apply to each primary property account in each track density category as provided in Instruction 4-3(d). Track depreciation rates shall be developed by estimating the average life based on an acceptable depreciation methodology, consistently applied, including as an option the units of production method based on gross ton-miles per mile of track.

[42 FR 35017, July 7, 1977, as amended at 46 FR 20210, Apr. 3, 1981; 48 FR 7184, Feb. 18, 1983; 52 FR 4321, Feb. 11, 1987]

4-3 *Depreciation records to be kept.* (a) The carrier shall maintain for each class of property in convenient and accessible form engineering and other data bearing on prospective service lives.

(b) The carrier also shall keep such records of depreciable property and property retirements as will reflect the service life of each class of property which has been retired, or will permit the determination of service life indications by past experience of useful life tenure of comparable property, turnover, or other appropriate methods; also such records as will reflect the percentage of value of the salvage for property retired from each class of depreciable property.

(c) For purposes of analysis the carrier shall maintain subsidiary records in which the accumulated depreciation account is broken down into component parts corresponding to each primary account to show the current credits and debits and the balance for each account. Such detailed information shall be reported annually to this Board. For balance sheet purposes, the accumulated depreciation account shall be treated as a single composite account for depreciable property.

(d) Carriers shall be prepared to justify all track depreciation rates by keeping appropriate data on the service lives and salvage values of track components which went into the life and net salvage computation of each primary account in each density category.

(e) The investment and related accumulated depreciation for accounts 3, 4, 5, 8, 9, 11 and 39 must be maintained by distinct traffic density categories.

Each line segment shall be identified on January 1 of each year as belonging to one of the following traffic density classes, based on the average traffic density in the preceding three years:

DENSITY

Class	Description
I	Lines carrying at least 20 million gross ton-miles per mile on an annual basis and not designated as belonging to Density Class III.
II	Lines carrying less than 20 million gross ton-miles per mile on an annual basis and not designated as belonging to Density Class III.
III	Lines identified as potentially subject to abandonment pursuant to Section 10904 of the Interstate Commerce Act.
IV	Yard and way switching tracks.
V	Electronic yards.

NOTE A: For purposes of designating line segments as belonging to one of the density classes, the carrier shall consider all traffic carried over the segment whether in the carrier's trains or in the trains of other carriers (estimated if not known).

NOTE B: When a carrier operates systems of parallel tracks on a single roadbed, the density associated with the related segment of a rail route shall be the aggregate gross ton-miles on all individual tracks.

[42 FR 35017, July 7, 1977, as amended at 46 FR 20210, Apr. 3, 1981; 48 FR 7183, Feb. 18, 1983; 52 FR 4321, Feb. 11, 1987]

4-4 *Leased property—depreciation.* (a) The carrier shall include in operating expenses charges for depreciation on road property and equipment used but not owned, the rent for which is includable in the lease rental accounts, and shall maintain the same records of service lives, salvage values, etc., as provided for owned road property and equipment. The excess of the total compensation paid over the amount chargeable for depreciation shall be included in the rent account. If settlement between the carrier and the lessor is not currently made, the amount of the depreciation accrued during the period of the lease shall be credited by the carrier to account 772. *Accrued liability; Leased property.* The necessary adjustments of the difference between the balance thus accrued in that account and the actual amount of settlement shall be made appropriately through accounts 519, *Miscellaneous income*, or 551, *Miscellaneous income*

*charges*, at the time settlement for depreciation on the property is made with the lessor.

(b) The carrier shall not include in the depreciation account in operating expenses any charges for depreciation of equipment used but not owned when the rents therefor are not included in the lease rental accounts but shall include such charges in the appropriate other rent expense accounts.

4-5 *Jointly used property—depreciation.* The owning carrier shall include in the depreciation accounts in operating expenses the charges for depreciation on units of depreciable property jointly used with one or more other carriers. The owning carrier shall credit and each using carrier shall charge the appropriate joint facility accounts in operating expenses with the amounts billed by the owning carrier against each using carrier for its proportion of the service loss on property retired from service whether billed currently as depreciation or when retirements occur as the loss in service value. The using carriers shall be required to account for depreciation or retirement of units of road property jointly used but not owned to the extent of their contract liability. The same principle shall apply to terminal companies and their nonowner tenants in accounting for depreciation accruals or retirement charges recorded in the accounts of the terminal companies.

#### INSTRUCTIONS FOR INCOME AND BALANCE SHEET ACCOUNTS

5-1 *Current assets.* (a) In the group of accounts designated as current assets shall be included cash, those assets which are readily convertible into cash or are held for current use in operations, current claims against others and amounts accruing to the carrier which are subject to settlement in the ordinary course of business within one year. There shall not be included in this group of accounts any amount the collection of which is not reasonably assured within one year because of the known financial conditions of the debtor or otherwise. Such items shall be included in account 741, *Other assets*, at an amount not in excess of a reasonable estimate of realizable value. Items

of current character but of doubtful value shall be written down or written off by charge to account 63-61-00, *General—Uncollectible accounts—General and administrative*, or account 553, *Uncollectible accounts*, as appropriate. Adjustment of these items of doubtful value shall be made by direct reduction of the asset account in which such items are carried or by provision in account 709.5, *Allowance for uncollectible accounts*, for the estimated uncollectible amount.

(b) The carrier shall transfer the estimated realizable value of obsolete material to account 741, *Other assets*, equitably distribute the loss due to obsolescence among the accounts ordinarily chargeable for such classes of material, and concurrently credit account 712, *Material and Supplies*.

5-2 *Recorded value of securities owned.* (a)(1) The investment in securities other than those issued or assumed by the accounting company shall be recorded in these accounts at cost, but excluding amounts paid for accrued interest and accrued dividends.

(2) Accounts 702, *Temporary Cash Investments*, 721, *Investments in Affiliated Companies*, and 722, *Other Investments*, shall be maintained in such a manner as to reflect the marketable equity securities' portion (see definition 26) and other securities or investments.

(3) For the purpose of determining net ledger value, the marketable equity securities in account 702 shall be considered the current portfolio and the marketable equity securities in accounts 721 and 722 (combined) shall be considered the noncurrent portfolio. The net ledger value of each portfolio shall be the lower of its aggregate cost or market value. (See definition 26.) The amount by which aggregate cost exceeds market value shall be accounted for as the valuation allowance. Account 702, *Temporary Cash Investments*, shall be subdivided to include the valuation allowance for the marketable equity securities included therein. Account 724, *Allowance for Net Unrealized Loss on Noncurrent Marketable Equity Securities—Cr.*, is the valuation allowance for the marketable equity securities recorded in account 721, *Investments in Affiliated Companies*, and

722, *Other Investments*. Marketable equity securities accounted for by the equity method shall not be combined with other marketable equity securities when determining aggregate cost and market value.

(4) Realized gains and losses (the difference between net proceeds from sale and cost) shall be included in the determination of net income of the period in which they occur. Changes in the valuation allowance for marketable equity securities included in account 702 shall be charged to account 551, *Miscellaneous Income Charges*, or credited to account 519, *Miscellaneous Income*, as appropriate, with a contra entry to the valuation allowance contained within account 702. Changes in the valuation allowance for marketable equity securities included in accounts 721 and 722 shall be recorded in equity account 798.1, *Net Unrealized Loss on Noncurrent Marketable Equity Securities*, with a contra entry to valuation account 724.

(5) If there is a change in the classification of a marketable equity security between current and noncurrent, the security shall be transferred at the lower of its cost or market value at date of transfer. If market value is less than cost, the market value shall become the new cost basis, and the difference shall be accounted for as if it were a realized loss and included in the determination of net income.

(6) The accounting company shall write down the ledger value of any securities to the extent of impairment in their value or write off entirely if there is no reasonable prospect of realizing any value therefrom. For long term investments in marketable equity securities, when the decline in market value below cost is judged to be other than temporary, the cost basis of the individual security shall be written down to a new cost basis. The amount of the write-down shall be accounted for as realized loss by a charge to account 551, *Other Income Charges*, and a credit to account 723, *Reserve for Adjustment of Investment in Securities*. The new cost basis shall not be changed for subsequent recoveries in value.

(b)(1) For financial statement purposes the carrier shall follow the principles of equity accounting for (1) all investments in corporate joint ven-

tures (see definition 21(c)), and (2) all investments in voting stock of affiliated companies giving the carrier the ability to significantly influence the operating and financial policies of an investee (see definition 21(b)). For purposes of this instruction an investment of 20 percent or more of the outstanding voting stock of an investee will indicate the ability to exercise significant influence over an investee in the absence of evidence to the contrary.

(2) Since the equity method is not to be effected by entries in the books of accounts but is to apply only in financial reports to the Board, the carrier shall establish worksheet or memorandum accounts. Three basic worksheet or memorandum accounts are needed:

(i) An investment account to include (1) equity in the undistributed earnings or losses of the investee since the date of acquisition (see definition 21(g)); (2) accumulated amortization of the difference between cost and net assets at date of acquisition (see (b)(3) below); and other adjustments for disposition or writedown of investments.

(ii) An income account to include (1) the investor's share of the investee's undistributed profits or losses for each reporting period subsequent to acquisition of the investment except that in the year of acquisition such amount shall be determined from the date of acquisition; (2) amortization for the reporting period of the difference between cost and net assets at date of acquisition. This account shall be closed at year-end to the retained earnings memorandum account discussed in paragraph (iii) below.

(iii) A retained earnings account to include (1) equity in the undistributed earnings or losses of the investee since the date of acquisition; (2) accumulated amortization of the difference between cost and net assets acquired at date of acquisition (see (b)(3) below).

(iv) Other memorandum accounts will be needed for such adjustments as gains and losses on disposition of investments, recognition of impairments in value, the investor's share of extraordinary and prior period adjustments reported in the investee's financial statements (see instruction 1-2(d)),

and provision for deferred taxes where it is reasonable to assume that undistributed earnings of an investee will be transferred to the investor in a taxable distribution. These memorandum accounts shall be closed at year-end to the retained earnings memorandum account discussed in paragraph (iii) above.

(3) The carrier shall retain the following information for each investee in support of the worksheet or memorandum accounts:

- (i) Original cost of investment.
- (ii) Equity in net assets of investee at date of acquisition.
- (iii) Allocation of difference between cost and equity in net assets, namely, to specific assets of investee or to goodwill.
- (iv) Accumulated amortization of difference between cost and equity in net assets.
- (v) Unamortized balance of difference between cost and equity in net assets.
- (vi) Equity in undistributed earnings/losses for each year since date of acquisition.
- (vii) Dividends received since date of acquisition if determinable.
- (viii) Proceeds from sale of investments.

(4) Any difference between the investor's cost and its share of the net assets of the investee at date of acquisition shall be allocated to specific assets of the investee to the extent the difference is attributable to them. When the difference is allocated to depreciable or amortizable assets, depreciation and amortization (through the investment and income memorandum accounts) should absorb the difference over the remaining life of the related assets. If the difference is not related to specific accounts, it should be considered goodwill and amortized over a reasonable period not to exceed 40 years. For investments made prior to November 1, 1970, amortization of goodwill is not required in the absence of evidence that the goodwill has a limited term of existence.

(5) The financial statements of the investee that are used for equity accounting should be timely. If the accounting year of the investee differs from that of the investor then the most recent available financial statements

may be used. The lag in reporting should be consistent from period to period.

(6) Material profits or losses on transactions between the investor and investee shall be eliminated until realized by either company as if the two were consolidated.

(7) A transaction of the investee of a capital nature that affects the investor's share of the investee's stockholder's equity should be reported in the financial statements as if the two were consolidated.

(8) The investor shall deduct any dividends applicable to outstanding cumulative preferred stock whether or not declared, and any other dividends declared when computing its share of undistributed earnings or losses.

(9) The investor shall suspend application of the equity method when the investment (including the investment memorandum account) together with any net advances made to the investee is reduced to zero. Additional losses shall not be provided for unless the investor has guaranteed obligations of the investee or is otherwise committed to provide further financial support for the investee. If the investee subsequently reports net income the investor shall resume applying the equity method at such time as its share of that net income equals the share of net losses not recognized during the period of suspension.

(10) When the investor's voting stock interest falls below the level of ownership described in paragraph (b)(1) of this instruction, the investment no longer qualifies for the equity method. Should dividends received on the investment in subsequent periods exceed the investor's share of earnings for such periods, the investment memorandum and income memorandum accounts shall be reduced by the excess amount.

(11) When the level of ownership of an investment increases to that described in paragraph (b)(1) of this instruction, the equity method shall be applied. The memorandum accounts for the investment, income (for current year's equity in undistributed earnings less amortization), and retained earnings (for prior years' equity in undistributed earnings less amortization) shall

be adjusted retroactively on a step-by-step basis determining the equity in net assets at date of acquisition, amortization adjustment, and equity in undistributed earnings or losses at each level of ownership. Where small purchases are made over a period of time and then a purchase is made which qualifies the investment for the equity method, the date of latest purchase may be used as date of acquisition.

(12) Information having significance with respect to the investor's ownership in investees shall be disclosed in notes to financial statements of annual reports filed with the Board in accordance with generally accepted accounting principles.

(c) When securities with a fixed maturity date are purchased at a discount (i.e., when total cost including brokerage fees, taxes, commissions, etc., is less than par), such discounts may be amortized over the remaining life of the securities through periodic debits to the account in which the securities are carried (preferably coincident with entries recording interest accruals) and credits to the same account in which interest income is credited. No debits shall be made in respect to discounts upon securities held as investments or in special funds if there is reason to believe that such securities will be disposed of by redemption or otherwise at less than par or will not be paid at date of maturity. When securities with a fixed maturity date are purchased at a premium (i.e., when the total cost including brokerage fees, taxes, commissions, etc., is in excess of par), such premium may be amortized over the remaining life of the securities through periodic credits to the account in which the securities are carried (preferably coincident with entries recording interest accruals) and debits to the same accounts in which the interest income is recorded.

NOTE: The carrier shall follow generally accepted accounting principles where an interpretation of the rules for equity accounting is needed or obtain an interpretation from its public accountant or the Board.

5-3 *Discounts, expenses, and premiums on debt.* (a) Ledger accounts shall be provided to cover the discounts, expenses, and premiums on the sale or resale of each subclass of funded debt and of receivers' and trustees' securities

issued for the benefit of or assumed by the company. (For explanation of *subclass* see account 765, *Funded debt unmatured*.) The net debit balances remaining in the ledger accounts for discount and premium shall be included in account 770.1, *Unamortized debt discount*, and the net credit balances in account 770.2, *Unamortized premium on debt*. Debt expense shall be included in account 743, *Other deferred debits*.

(b) Each fiscal period there shall be charged to account 548, *Amortization of discount on funded debt*, a proportion on a consistent basis of each of the debit balances in the discount and premium accounts and correspondingly there shall be credited to income account 517, *Release of premiums on funding debt*, a similar proportion of each of the credit balances in these accounts. Related debt expense shall also be charged to account 548 on a proportional and consistent basis. The amounts for the respective debit balances for discount and expenses applicable to a particular issue of obligations may be charged directly to account 548 at time of issue when the aggregate of such amounts does not appreciably affect the accounts. The method of apportioning debt discount, issue costs, and premium to accounts 517 and 548 shall be the *interest method*, where the effective interest rate on the date of issuance is applied to the carrying value (debt, less related discount, and issue cost, plus related premium of each specific issue to the beginning of any given period.) However, other methods of amortization may be used if the results obtained are not materially different from those which would result from the interest method.

(c) When any funded debt which has been actually issued to bona fide holders for value is reacquired by the accounting company, that proportion of the balance remaining in accounts containing discount, expense and premium on funded debt for the subclass of the security reacquired applicable to the portion reacquired shall be credited or charged thereto, as appropriate, and concurrently charged or credited to account 519, *Miscellaneous income*, account 551, *Miscellaneous income charges*; or to account 570, *Extraordinary items*, as appropriate, in accordance with the text

of these accounts. Such proportion shall be based upon the ratio of the par value of the security reacquired to the par value of all the securities of the subclass actually outstanding immediately before such reacquirement. Gains and losses from extinguishment of debt (excluding debt maturing serially) which is acquired to satisfy sinking fund requirements, shall not be recorded as extraordinary items regardless of amount, but shall be included in accounts 519 and 551, as appropriate. Such gains and losses shall be separately disclosed in reports to this Board.

[42 FR 35017, July 7, 1977, as amended at 52 FR 4325, Feb. 11, 1987]

5-4 *Discount, premium, and assessment on capital stock.* (a) Separate ledger accounts shall be provided for each subclass of capital stock issued or assumed by the accounting company to cover discount suffered and premium realized at the time of sale of capital stock. General levies or assessments against stockholders shall be credited to the appropriate ledger accounts for the subclass of capital stock against which the levy or assessment is made.

(b) The total of net debit balance in these ledger accounts shall be included in account 793, *Discount on capital stock*, and the total of net credit balances in account 794, *Premiums and assessments on capital stock*.

(c) Discount on each subclass of capital stock may be offset or reduced by charges to account 794, *Premiums and assessments on capital stock*, to the extent that net gains from premiums or assessments have been included therein or to account 795, *Other capital*, to the extent that net gains from reacquisition and resale or retirement of capital stock applicable to such subclass have been included therein. Any remaining discount may be amortized by charge to account 616, *Other debits to retained earnings*, or may be retained and carried in account 793, *Discount on capital stock*, until the stock to which the discount applies is retired.

(d) In case the accounting company is permitted and elects with the approval of the Board, to distribute all or any part of the net balance of other paid-in capital to its stockholders, the amount

thus distributed shall be charged to account 795, *Other capital*.

(e) When capital stock is reacquired, either by purchase or donation, and is retired or cancelled, account 791, *Capital stock*, shall be charged with the par value, stated value of no par stock, or if no par stock without stated value, the proportionate amount at which the particular class of stock is included in account 791. Any excess of reacquisition cost over the recorded value of the stock shall be charged to account 795, *Other capital*, to the extent of the accumulated net gains included in this account applicable to reacquisition and resale or retirement of such subclass. Any remaining excess reacquisition cost shall be charged to account 616, *Other debits to retained earnings*. Any excess of recorded value over reacquisition cost shall be credited to account 795, *Other capital*.

(f) When capital stock is reacquired, either by purchase or donation, and is not retired or cancelled, nor properly includable in sinking or other funds, the reacquisition cost shall be charged to account 798.5, *Treasury stock*.

(g) When treasury stock is resold, account 798.5, *Treasury stock*, shall be credited with the cost paid for it. Gains shall be credited to account 795, *Other capital*. Losses shall be charged to account 795, *Other capital*, to the extent that previous net gains from sales or retirements of the same class of stock are included therein; otherwise, to account 616, *Other debits to retained earnings*.

5-5 *Joint liabilities.* The accounting company shall state as a liability in its balance sheet the difference between the total par value of securities jointly or severally issued by it and others and the portion of such liability which, under the joint arrangement, it is expected will be liquidated by the other party or parties to the joint arrangement. The amount of the jointly or severally issued securities expected to be liquidated by the other party or parties shall be shown as a contingent liability in accordance with instruction 5-6 pertaining to contingent assets and liabilities.

5-6 *Contingencies.* (a) The proper accounting treatment for contingencies depends upon whether the contingency

is: *Probable*: the event or events are likely to occur; *Reasonably possible*: the chance of occurrence of the future event or events is more than remote, but less than likely; or *Remote*: the chance of occurrence of the future event or events is slight.

(b) Loss contingencies must be accrued when they are probable and the amount of loss can be reasonably estimated. Where they are only reasonably possible, only footnote disclosure is required. Where they are remote, footnote disclosure is not required, but is permitted.

(c) Gain contingencies usually are not reflected in the accounts since to do so might be to recognize revenue prior to its realization. Adequate disclosure shall be made of contingencies that might result in gain, but care shall be exercised to avoid misleading implications as to the likelihood of realization.

[42 FR 35017, July 7, 1977, as amended at 52 FR 4326, Feb. 11, 1987]

5-7 *Long-term obligations*. Commitments under unconditional purchase obligations associated with suppliers' financing arrangements and future payments on long-term borrowings and redeemable stock shall be disclosed in accordance with generally accepted accounting principles. Such disclosures shall not preclude accounting recognition if the substance of a financing arrangement is the acquisition of an asset or inurrence of a liability.

### INSTRUCTIONS FOR CLEARING ACCOUNTS

6-1 *Items to be charged*. In recognition of the fact that certain expenditures incident to the construction and the operation of property are not chargeable directly to any particular property investment or expense account, clearing accounts have been provided for the purpose of securing an equitable distribution of such items to the proper primary accounts.

6-2 *Material and stationery store expenses*. (a) To clearing accounts called *Material store expenses* and *Stationery store expenses* shall be charged expenses

in connection with purchasing, handling and storing material and stationery in and distributing it from the company's storehouses. Including the pay of officers and employees in the purchasing and store departments and their traveling, office, and other expenses; also expenses, including wages, fuel, and supplies, of operating switching locomotives when exclusively assigned to the service of switching at material storehouses. (Expenses of incidental switching at material yards by locomotives in regular switching service shall be charged to the appropriate transportation accounts.) The pay and expenses of men employed in purchasing or inspecting a single class of material, such as ties, shall be added as store expenses to the cost of that particular material.

(b) The total amount of storehouse expenses charged to these accounts shall be distributed among the accounts to which material and stationery has been charged, in proportion to the amounts charged to each account for the items issued, except that the amount representing the purchasing department expenses shall be apportioned on the value of the items issued which were purchased by that department. To avoid monthly fluctuations in the ratio of store expenses to the value of material and stationery purchased or issued, carriers may make a monthly apportionment on the basis of fair percentage rates, provided the store expense accounts are adjusted and closed out at the end of each year.

6-3 *Shop expenses*. (a) To a clearing account entitled *Shop expenses* shall be charged items of expense at shops, enginehouses, repair tracks, and other places where mechanical work is performed, not assignable directly to specific accounts. Such expenses shall be apportioned among the various accounts affected. The basis of distribution shall be the relative proportion which the total amount of charges to *Shop expenses* bears to the total of the directly distributed labor. To avoid monthly fluctuations in the ratio of shop expenses to the total of distributed labor, carriers are permitted to make the monthly apportionment on the basis of a percentage of the distributed labor, provided the shop expense

account is adjusted and closed out at the end of the year.

(b) The expenses assignable to this account shall include the pay of foremen (who exercise supervision over all departments), their clerks, and other employees engaged in general work in and about shops, cost of heat, light and power; cost of small tools and supplies and water and power purchased; also cost of removal of snow and ice from transfer tables and shop yards, and other incidental shop expenses. To this account shall be charged expenses, including wages, fuel and supplies, of operating switching locomotives when exclusively assigned to switching service at shops (the expenses of incidental switching at shops by locomotives in transportation switching service shall be charged to appropriate transportation accounts).

6-4 *Gravel and sand pits and quarries.*

(a) When a gravel or sand pit or quarry is opened for operations likely to extend over a long period, an account shall be set up designated, *Operations of gravel pit at* ————, or *Operations of quarry at* ————, as the case may be. To this account shall be charged cost of the land in excess of its estimated value after the gravel, sand, or stone has been removed (credit to the property account in which the cost of the land is included); payments for right to enter upon and remove ballast from land not owned by the carrier; cost of sinking test holes; and costs preparatory to opening the pit or quarry. To this account shall be charged also the cost, in excess of the estimated salvage value, of rails and fastenings, ties, other material and labor used in constructing tracks to and in the gravel pit or quarry (the estimated salvage being carried in an appropriate suspense account); cost of labor and train service employed in producing, quarrying, and loading ballast, including the cost of operation, repairs, and depreciation of power shovels and other machines and machinery; pay and expenses of watchmen; cost of explosives and hand tools, and miscellaneous expenses; and cost of installing, operating and maintaining signals and interlockers at gravel pits.

(b) Credit to the clearing account shall be made each month to cover the

cost of ballast material produced during the month. The cost of production shall include the expenses directly assignable to the monthly output plus a proportion of the expenses not directly assignable, such as cost of land, tracks, machinery, and interlockers. This latter amount shall be computed upon the basis of the ratio which the monthly output bears to the total estimated yardage to be taken from the pit. When any portion of the product of such pits or quarries is sold, the cost thereof shall be credited to this clearing account and any related profit shall be credited to account 110, *Incidental*.

6-5 *Power plant operations.* (a) The accounting for the expenses of maintaining and operating an electric, steam, or other power plant (both building and machinery) shall be determined by the purpose for which the power produced is used. When a power plant is intended and used for producing power solely for the carrier's own operations and the cost of operating the plant is chargeable to clearing account *Shop expenses*, or to any one specific account for operating expenses, the expenses of maintenance shall be charged to the appropriate maintenance accounts, and the cost of operation to the account appropriate according to the use of the power.

(b) When the power from such a plant is properly chargeable to more than one account, the expenses of maintaining and operating the plant shall be included in clearing account designated *Power plant operations*. The expense of maintenance shall be cleared from that account to the appropriate maintenance accounts. The expenses of operation shall be apportioned to the appropriate accounts upon the basis of quantity of power used for the various purposes.

(c) When a part of the power produced by a power plant is sold and the remainder is used in the carrier's own operations, the cost of maintaining and operating the plant shall be charged to a clearing account. The expense of maintenance shall be cleared from that account to the appropriate maintenance accounts. The proportion of the expenses of operation assignable to the power sold, on the basis of ratio of

quantity of power sold to total quantity of power produced, shall be credited to this clearing account and any related profit shall be credited to account 110, *Incidental*. The remainder of the cost of operation shall be distributed to the appropriate expense accounts for the carrier's own operations.

(d) When power plants are intended and used solely for furnishing power to others, their investment cost shall be included in account 737, *Property used in other than carrier operations*, and the revenues and operating expenses shall be included in the accounts provided for operations of such property.

(e) The accounting for the maintenance of transmission systems and distribution systems shall be in accordance with instructions pertaining to power plant operations.

**General Expenditures**

**70 General expenditures.**

The primary accounts of this general account are designed to include expenditures made in connection with the acquisition and construction of original road and equipment, and with extension, additions, and betterments to road and equipment property, when such expenditures cannot properly be included in any of the foregoing accounts as a part of the cost of any specific work. When assignable, such expenditures shall be included in the cost

**49 CFR Ch. X (10-1-00 Edition)**

of the property for which the expenditures occurred.

**76 Interest during construction.**

(a) When any bonds, notes, or other evidences of indebtedness are sold, or any interest-bearing debt is incurred for acquisition and construction of original road and equipment, extensions, additions, and betterments, the interest accruing on the part of the debt representing the cost of property chargeable to road and equipment accounts (less interest, if any, allowed by depositaries on unexpended balances) after such funds become available for use and before the receipt or the completion or coming into service of the property so acquired shall be charged to this account.

(b) When such securities are sold at a premium, the proportion of such premium assignable to the time between the date of the actual issuance of the securities and the time when the property acquired or the improvement made becomes available for service shall be credited to this account.

(c) This account shall also include such proportion of the discount and expense on funded debt issued for the acquisition of original road, original equipment, road extensions, additions, and betterments, as is equitably assignable to the period between the date of the actual issuance of securities and the time when the property acquired or the improvement made become available for the service for which it is intended. The proportion of discount and expense thus chargeable shall be determined by the ratio between the period prior to the completion or coming into service of the facilities or improvements acquired and the period of the entire life of the securities issued.

NOTE A: Interest on bonds, notes, or other evidences of indebtedness accruing before the proceeds from the sale of the securities become available for use shall not be included in this account, nor shall there be included any interest accruing after the property with respect to which the proceeds are expended is received or becomes available for use in connection with commercial service.

NOTE B: If securities issued or assumed by the carrier are subsequently sold or exchanged by or for the carrier, the excess of the par value and accrued interest of the securities over the actual money value of the

consideration received shall be deemed a discount. In no case (except as provided in the third paragraph of this account) shall discount be included as part of the cost of items included in the accounts prescribed in this classification.

NOTE C: Whenever interest, premium, or discount assignable to the construction period is incurred in connection with an expenditure covered by some specific road and equipment account or accounts, such interest, premium, or discount shall be charged directly to the specific accounts to which it is related. Unless provided for otherwise, interest costs shall be capitalized in accordance with generally accepted accounting principles.

NOTE D: This account shall not include interest during the construction period on the carrier's own funds expended in connection with the acquisition or construction of original road and equipment, extensions, additions, and betterments.

### Other Property Accounts

#### 80 Other elements of investment.

(a) This account shall include amounts resulting from adjustment of the primary property accounts to conform with cost of property in valuation records. The amount in this account shall be cleared on a consistent basis as property is retired from service or otherwise in accordance with the rules in paragraphs (b), (c), and (d) of this account. Any material amount in this account assignable to property previously retired from service shall be cleared immediately.

(b) When property is retired from service, an equitable portion of the balance in this account assignable to such property shall be cleared when the retirement entry is made. The amount so cleared, when a debit, shall be charged to account 551, *Miscellaneous income charges*, or, when a credit, shall be recorded in account 519, *Miscellaneous income*. The exception to this general rule with respect to a credit balance assignable to property retired is that when property classified as depreciable is retired from service and the balance in the accumulated depreciation account for the property is materially deficient, because of sudden retirement or other unusual cause, the portion of a

credit balance cleared for the retirement, equal to the deficiency, shall be applied to reduce the amount of loss otherwise chargeable to the accumulated depreciation account.

(c) A carrier may apply to the Board for authority to clear the entire balance from this account immediately or amortize the balance over a short period of time by appropriate inclusion in account 616, *Other debits to retained earnings*, or account 606 *Other credits to retained earnings*. Any amount so authorized or directed by the Board to be cleared and written off to retained income shall be in lieu of amounts includible in accounts indicated in paragraph (b).

(d) Other plans for clearance, disposition, or classification of a balance in this account in conformity with sound accounting principles may be submitted to the Board with suitable details for consideration. This includes application for disposition of a balance in this account attributable to reduction of capitalization in a reorganization. An accounting procedure so applied for shall become effective only after Board approval. Each carrier shall maintain a record of items initially included in and cleared later from this account and the basis used in computing such items.

NOTE: The amounts attributable to past mergers, consolidations and purchases of property included in this account shall be merged with the adjustment made pursuant to paragraph (a) of this text.

#### 90 Construction in progress.

This account shall include expenditures incurred by the carrier in the process of constructing road and equipment with its own forces or under contract during the period prior to the time property is placed in transportation operations, including cost of materials and supplies located at point of use and of necessary land acquired for such projects. When a project is completed or when a segment of a large project is completed and placed in service, the cost of the completed project or the completed segment thereof shall be transferred to the appropriate road and equipment primary accounts. Separate subaccounts may be maintained for road, equipment, or other classes of

expenditures. Expenditures for relatively unimportant projects may be included directly in primary accounts.

#### INSTRUCTION

(1) The operating expense accounts use a six-digit code. The first two digits denote natural expense, the second two digits denote activity/subactivity, and the third two digits denote detailed functions. [See Table A for an overview of the coding structure and Tables B-E for detailed functions.]

(2) The operating expense account explanations use a three-tier format. Section 1 contains natural expense explanations with applicable activity/subactivity and function assignment. Section 2 details the activity/subactivity explanations. Section 3 explains the functions appropriate for each activity/subactivity. To obtain a complete explanation for a particular account, refer to section 1 to locate the natural expense and activity/subactivity (first four digits) and read the appropriate account text. Accounts that are assigned to functions are appropriately listed. For further information, refer to section 2 and section 3.

(3) All accounts listed in Table A and section 1 are for freight only. Refer to Table F for applicable passenger or common account codes. Account numbers designated with an asterisk in section 1 denote freight only accounts, while other accounts are used for both freight and passenger or common accounts.

(4) All expense assigned to common operating accounts shall be allocated to freight and passenger accounts in accordance with Part 1242 of this chapter.

<sup>1</sup> Each operating expense account has a six-digit code divided into three two-digit groups. The first two-digit group denotes the natural expense [see control column], the second group denotes the activity/subactivity for freight, passenger or common service [see Table F], and the third group signifies applicable function assignment [see Tables B, C, D & E].

<sup>2</sup> The account numbers shown on this matrix are for freight only. The account numbers for passenger and common are derived by applying the natural expense code (first two digits) to the activity codes shown in Table F. Natural expenses are used only in the same activities as shown for freight.

<sup>3</sup> Expenses shall be reported by applicable functions [see account text].

**OPERATING EXPENSE ACCOUNTS**

*Section 2—Activity/Subactivity Explanations*

**Way and Structures Activity—(XX-10-XX)**

(A) *Way and Structures* activity refers to repairing, maintaining, leasing, renting, depreciating, and retiring right-of-way and trackage, structures, buildings, and facilities. It includes all natural expense object subclassifications such as salaries and wages, fringe benefits, material and supplies, lease rentals, purchased services, casualties, depreciation and retirements, where such objects are in the performance or support of the above functions. Specifically included are all natural expense objects in the performance of the above described functions on property of the type included in property accounts 2 through 45, excluding 44, whether such property is owned or leased. It includes the costs of operating work trains in support of this activity.

This activity excludes all expenses related to transportation and other equipment described in property accounts 44, 46 and 52 through 58, all of which should be charged to the Equipment activity. It also excludes expenses in performance or support of Transportation, General and Administrative activities, property used for noncarrier operations, non-operating

property, and interest or other fixed charges.

**Running Subactivity—(XX-11-XX)**

(1) *Running* subactivity of the Way and Structures activity refers to the functions of repairing, maintaining, leasing, renting, depreciating, and retiring right-of-way, trackage, signals and interlockers, and highway grade crossings for running tracks, passing tracks, crossovers, etc., including turn-outs from those tracks, passing clearance points. It includes all natural expense object subclassifications under the Way and Structures activity that are applicable to right-of-way and trackage as defined above. This subactivity specifically excludes expenses incurred in operating signals and interlockers and highway grade crossings, which are properly charged to the Transportation activity.

**Switching Subactivity—(XX-12-XX)**

(2) *Switching* subactivity of the Way and Structures activity refers to the function of repairing, maintaining, leasing, renting, depreciating, and retiring right-of-way, trackage, signals and interlockers, and highway grade crossings for yards where separate switching services are maintained, including classification, house, team, industry, and other tracks switched by yard locomotives, and for station, team, industry, and other switching tracks for which no separate switching service is maintained. It includes all natural expense object subclassifications under the Way and Structures activity that are applicable to right-of-way and trackage as defined above. This subactivity specifically excludes expenses incurred in operating signals and interlockers, and highway grade crossings, which are properly charged to the Transportation activity.

**Other Subactivity—(XX-13-XX)**

(3) *Other* subactivity of the Way and Structures activity refers to the function of repairing, maintaining, leasing, renting, depreciating, and retiring other roadway property structures, buildings, and facilities not provided for in the Running and Switching subactivities. It includes all natural expense object subclassifications under

the Way and Structures activity that are applicable to the structures, buildings, and facilities as defined above. The specifically excludes expenses incurred in operating such structures, buildings, and facilities, which are properly charged to the Equipment, Transportation, and General and Administrative activities.

**Equipment Activity—(XX-20-XX)**

(B) *Equipment* activity refers to repairing, maintaining, leasing, renting, depreciating, and retiring transportation and other operating equipment. It includes all natural expense object subclassifications such as salaries and wages, fringe benefits, material and supplies, lease rentals, purchased services, casualties, depreciation, and retirements. Specifically included are all natural expense objects in the performance of the above functions on property of the type included in property accounts 44, 46 and 52 through 58, whether such property is owned or leased. The costs of operating work trains in support of the Equipment activity are to be included herein.

This activity excludes all expenses related to road property as described in property accounts 2 through 45, excluding account 44, all of which should be charged to the Way and Structures activity. It also excludes expenses in performance of, or support for Transportation, General and Administrative activities, property used for noncarrier operations, nonoperating property, and interest or other fixed charges.

**Locomotives Subactivity—(XX-21-XX)**

(1) *Locomotives* subactivity of the Equipment activity refers to repairing, maintaining, leasing, renting, depreciating, and retiring locomotives. It includes all natural expense object subclassifications under the Equipment activity that are applicable to locomotives. This subactivity specifically excludes expenses incurred in operating locomotives, such as locomotive fuel and lubricants, train crew wages, operating supplies, servicing (as opposed to maintaining or repairing), and cleaning which are includable in the Transportation activity, except when locomotive use is clearly in support of other activities or subactivities. When

locomotives are operated in support of repairing or maintaining locomotives, the operating costs shall be charged to this subactivity.

**Freight Train Cars Subactivity—(XX-22-XX)**

(2) *Freight Train Cars* subactivity of the Equipment activity refers to repairing, maintaining, leasing, renting, depreciating, and retiring freight train cars. It includes all natural expense object subclassifications under the Equipment activity that are applicable to freight train cars. This subactivity pertains to all freight train cars described in property account 53, whether owned or leased, including freight cars used for hauling freight in company service and cabooses. It does not pertain to work equipment. This subactivity specifically excludes expenses incurred in running trains or operating freight cars, such as for locomotive fuel and lubricants, train crew wages, inspecting trains, operating supplies, servicing (as opposed to maintaining or repairing), and cleaning, which are includable in the Transportation activity, except where such costs are clearly in support of repairing or maintaining freight cars, other activities or subactivities. When locomotives or trains are operated in support of repairing or maintaining freight cars, the operating costs shall be charged to this subactivity.

**Other Equipment Subactivity—(XX-23-XX)**

(3) *Other Equipment* subactivity of the Equipment activity refers to repairing, maintaining, leasing, renting, depreciating, and retiring other equipment. It includes all natural expense object subclassifications under the Equipment activity which are applicable to other equipment. The subactivity pertains to all equipment described in property accounts 44, 46 and 54 through 58, whether such property is owned or leased. This subactivity specifically excludes expenses incurred in operating other equipment, such as for fuel and lubricants, crew wages, inspecting equipment, operating supplies, servicing (as opposed to maintaining or repairing), and cleaning, which are includable in the Transportation activity, except

where such costs are clearly in support of other activities or subactivities. When locomotives, trains, or other equipment are operating in support of repairing or maintaining other equipment, the operating costs shall be charged to this subactivity.

**Transportation Activity—(XX-30-XX)**

(C) *Transportation* activity refers to operating, servicing, inspecting, weighing, assembling, and switching trains; operating highway revenue services; operating facilities in connection with carrier transportation operations including coal and ore terminals, intermodal terminals, terminal grain elevators, and others; operating carfloat and carferry services and related facilities; operating communications systems which primarily support train operations; and joint facility transportation operations. It includes various administrative functions directly supporting transportation operations including those described in the Administrative Support Operations subactivity. Work train costs in support of the Way and Structures or the Equipment activities should be charged to those activities. However, shipments of company materials, handled in predominantly revenue freight trains, are appropriately included in this activity. This activity includes all natural expense object subclassifications such as salaries and wages, fringe benefits, material and supplies, purchased services, lost or damaged freight, and casualties.

**Train Operations Subactivity—(XX-31-XX)**

This activity excludes all expenses assignable to the Way and Structures, Equipment, and General and Administrative activities, as well as those expenses for noncarrier operations and nonoperating functions.

(1) *Train Operations* subactivity of the Transportation activity refers to operations of all trains except those performing yard functions in terminals. It includes running trains in road or way service; switching trains except where such switching is performed within yards or terminals; and making customer pick-ups and deliveries except in yards and terminals.

It also provides for dispatching, controlling, reporting, and monitoring road train movements; inspecting and lubricating trains; servicing, fueling, and cleaning (not repairing or maintaining) locomotives; purchasing or producing electric power for motive power; and operating supporting activities such as communications, signaling, crossing protection, and interlockings.

This subactivity also includes crew calling and transporting; crew lodging, meals, and other expenses; lost or damaged freight; casualties and insurance; clearing wrecks; and operating joint tracks and facilities except for yards or specialized services. It also includes salaries and wages, fringe benefits, material and supplies, fuel and lubricants, purchased services, casualty and damages, and other natural expense elements incurred in operating trains.

The Train Operations subactivity excludes the operation of specialized services, all of which should be charged to the Specialized Services Operations subactivity. However, road or way switching between trains and specialized service facilities outside of terminal areas belongs to the Train Operations subactivity.

Work and other nonrevenue train operating costs are to be charged to the appropriate supported activity. Shipments of company materials normally should be charged to this subactivity, except where the train movement is exclusively or predominantly for such nonrevenue purpose where the supported activity should bear the train operating costs.

**Yard Operations Subactivity—(XX-32-XX)**

(2) *Yard Operations* subactivity of the Transportation activity refers to classifying cars to make-up or break-down trains; sorting and handling waybills in connection with freight car classification and switching in yards or terminals; inspecting, servicing, fueling, and cleaning (not repairing or maintaining) locomotives and cabooses used to provide yard or terminal services; purchasing or producing electric power for motive power; diverting or holding cars; and reporting operating and car movement data related to

yards and terminals. It also includes operating supporting activities in yards or terminals, such as communications, signaling, and interlockings; yard crew calling and transporting; yard crew lodging, meals, and other expenses; lost or damaged freight specifically traceable to occurrences resulting from the performance of yard operations; casualties and insurance related to yard operations; clearing wrecks which occurred in the performance of yard operations; and operating joint yards and terminals.

Within terminals, this subactivity includes pick-up or delivery of freight cars from or to customer spur tracks, team tracks, freight houses, interchange tracks, rip tracks, and specialized service facilities. It also includes salaries and wages, fringe benefits, material and supplies, fuel and lubricants, purchased services, casualty and damages, and other natural expense elements incurred in operating yards and terminals.

The Yard Operations subactivity includes the cost of switching operations within facilities for Specialized Services and switching or transfer operations between yards and the specialized service facilities. The latter is not limited or affected by definitions or restrictions contained in carrier operating rules or labor agreements. It is related solely to the defined operations when they are performed in a yard or terminal area.

**Train and Yard Common Subactivity—(XX-33-XX)**

(3) *Train and Yard Common* subactivity of the Transportation activity refers to the function of adjusting and transferring loads; and placing and removing car loading devices and grain doors. It also includes lost or damaged freight not specifically traceable to numerous activities resulting from performance of train, yard, or specialized services operations. It also includes salaries and wages, fringe benefits, material and supplies, purchased services, and other natural expense elements incurred in performing the functions defined above. It excludes the natural expense elements of casualties and insurance, which shall be charged to the

Train Operations and Yard Operations subactivities.

**Specialized Services Operations Subactivity—(XX-34-XX)**

(4) *Specialized Services Operations* subactivity of the Transportation activity refers to operating services which are specialized in nature and in cost characteristics, including all of those so designated by the Board. The purpose of segregating the cost of such services is primarily to preclude distortion of general costs applicable to the Train Operations and Yard Operations subactivities. Secondly, further breakout of the costs of operating individual specialized services can be provided in less detail than the full range of natural expense accounts, in reports used for recurring cost analysis purposes pertaining to each type of specialized service.

The designated specialized services operations are as follows:

(a) *TOFC/COFC Operations* refers to the function of operating rail-to-ground or water and ground or water-to-rail transfer facilities for handling trailers or containers, including related storage; and the highway movement of trailers or containers within a terminal area for purposes of pick-up, delivery, or interchange.

The service includes loading, tie-down, and/or unloading flat cars or dollies and piggyback trailers to or from highway tractors; moving trailers, dollies, or containers within the facility; servicing, cleaning, and fueling (but not repairing or maintaining) facility equipment; operating storage areas; and casualties, claims, and insurance relating to the facility.

TOFC/COFC Operations do not include Plan V or other arrangements, where there is a division of revenues between the rail and motor carrier. They do not include switching services performed within the facility by yard or road crews. They also do not include the functions of the Way and Structures, Equipment, and General and Administrative activities, or the Train, Yard, Train and Yard Common, or Administrative Support Operations subactivities.

(b) *Floating Operations* refers to operations of water vessels and equipment

in revenue service. They include the operation of carferries, tugs, barges, lighterage, and all other forms of water craft.

Floating operations exclude operations includable in the Administrative Support Operations subactivity, and the switching transfer of cars between general yards or trains and the facility or a dedicated yard serving the facility, or switching within the dedicated supporting terminal facility when performed by yard crews. They also do not include costs appropriate to the Way and Structures, Equipment, or General and Administrative activities.

Floating operations should be classified by line and terminal operations. The distribution should be made based on the nature of the operation and not the facility or equipment. When the service occurs between distinct terminals, the operation should be considered a line operation. When the service is conducted within a general terminal or harbor area, the operation should be considered a terminal operation.

(c) *Coal Terminal Operations and Ore Terminal Operations* refers to operations of rail-to-water or water-to-rail transloading facilities for coal or for ores, including related storage, blending, and other processing or handling at the facility. These operations include loading and/or unloading rail cars or water vessels at the facility; moving commodities within the facility by whatever means; operating the facility's pollution control equipment; operating and directing the operations of moorings and tugboats; servicing, cleaning, and fueling (but not repairing or maintaining) facility equipment; operating storage areas; and casualties, claims, and insurance relating to the facility.

These terminal operations do not include costs appropriate to the Way and Structures, Equipment, or General and Administrative activities. They also do not include costs appropriate to the Train Operations, Yard Operations, Train and Yard Operations Common, or Administrative Support Services Operations subactivities. Switching transfer of cars between general yards or trains and the facility or a dedicated yard serving the facility and switching

within the dedicated supporting terminal facility when performed by yard crews should be charged to the Yard Operations subactivity.

(d) *Other Marine Terminal Operations* refers to the operations of marine terminals other than those for which a separate designated specialized service operation category is provided.

(e) *Motor Vehicle Loading and Distribution Facility Operations* refers to the operations of facilities for loading, unloading, or storing motor vehicles.

(f) *Protective Service Operations* refers to the function of servicing, cleaning, and fueling (but not repairing or maintaining) mechanical protective service equipment.

(g) *Other Specialized Services Operations* refers to the function of performing rail substitute service, other highway revenue service, LCL terminal operations, warehouse operations, freight car transloading, grain elevator terminal operations, livestock feeding operations, and other specialized services designated by the Board. It includes the transportation operating expenses of only those services listed above.

#### **Administrative Support Operations Subactivity—(XX-35-XX)**

(5) *Administrative Support Operations* subactivity refers to operations providing direct administrative support to the overall Transportation activity. It includes administrative support for the Common, and the Specialized Services Operations subactivities. The administrative support operations includes receiving and processing customer orders, requesting cars, preparing waybills, rating shipments, billing customers, collecting customer receivables in the ordinary course of business (not to include treasury, legal, general accounting, revenue accounting, or credit operations, all of which are chargeable to the General and Administrative activity), billing and recording demurrage, reporting interchanges, reporting advances, and the initial reporting and summarization of input documents for purposes of cash collection and accounting. Any operations beyond the initial summarization and reporting of input data are assignable to the General and Administrative ac-

tivity except for those otherwise included in the definition of this subactivity.

Carrier staff, administrative, or clerical operations related to operating or transportation department general administration should not be charged to this subactivity. The Administrative Support Operations subactivity may be performed at local stations, regional offices, or even at the general offices; however, the location of the operation performance does not affect its nature. The operations included in this subactivity should reasonably correlate to the quantity of shipments or to the quantity of carloadings.

#### **General and Administrative Activity—(XX-60-XX)**

(D) *General and Administrative* activity refers to the providing of overall administration or other general support for carrier operations. It comprehends only that portion of general and administrative activities that relates to carrier operations (as distinguished from noncarrier operations or nonoperating activities) including executive, legal, financial, treasury, accounting, budgeting, taxation, corporate planning, costing, marketing, advertising, traffic, corporate secretary, public relations, real estate, insurance administration, personnel administration, pension plan administration, general purchasing, labor relations, internal auditing, industrial engineering, and regulatory reporting.

This activity excludes expenses incurred for noncarrier operations of the carrier company as well as for general administration of the corporate entity and nonoperating income or expenses. It also excludes expenses in performance of or direct support for Way and Structures, Equipment, and Transportation activities, with particular attention to the Administrative Support Operations subactivity.

In effecting this adjustment, determined differences in accounting for important classes of material shall be equitably assigned among the accounts to which the classes of material are ordinarily chargeable. Separate subdivisions shall be maintained for each issue of obligations. (See instruction 5-3.)

#### OTHER LONG-TERM LIABILITIES

#### 771 Accrued liability; pension and welfare.

(a) This account shall include the credit balances accrued representing the estimated liability of the carrier for amounts provided by charges to operating expenses, including amounts contributed by employees, irrespective of whether carried in special funds or in general funds of the carrier, for pensions, accident and death benefits, savings, relief, hospital, or other provident purposes.

(b) The carrier may use the "full accrual basis" to account for pension costs upon prior approval of the Board. Full accrual basis as used herein means recording in the accounts now and hereafter costs of employees pensions accrued, including credits for past services, upon the basis of actuarial computations, even though the sum has not been funded by payment to the trustees. Applications for such accounting shall show the method of computation, together with the carrier's proposal for recording in the accounts the related income tax credits to be realized in subsequent years.

(c) This account shall be charged when payments are made to retired employees, or disbursements are made for the purposes for which liability was provided.

(d) Separate subaccounts shall be maintained to show the amount provided for each liability and the nature of and amounts of debits and credits to the subaccounts.

**772 Accrued liability; leased property.**

(a) This account shall be credited with amounts concurrently charged to operating expenses or other accounts to cover the accrued liability on leased road and equipment when settlement between the accounting carrier and the lessor is not made currently. The amounts recorded shall include unsettled rent, based on depreciation or other factors, and liability for property retired.

(b) This account shall be divided to show the liability to (1) affiliated companies (See definition 4), and (2) others.

**774 Accrued liability; casualty and other claims.**

(a) This account shall be credited with the amounts charged to operating expense to provide for estimated liabilities for claims for deaths of or injuries to employees and others, and for damages to property not owned or held under lease by the carrier; for claims for loss, destruction, damage, or delays to property entrusted to the carrier for transportation or storage; for revenue over charges, such as those covered by reparation claims; and for similar items. No credits shall be made to this account for amounts recoverable from insurance companies or others.

(b) Separate subaccounts shall be maintained to show the amount provided for each liability and the nature of and amounts of debits and credits to the subaccounts.

(c) If settlements for claims when audited are charged to this account, the balances for each year shall be kept separately until all items have been adjusted and cleared. If the settlements when audited are charged to the appropriate expense accounts, the balance in this account shall be adjusted through the expense accounts so as to reflect the probable liability at the close of each accounting period for claims which have been or may be filed for actuarial occurrences.

(d) Estimates of amounts payable within one year covering liability for

claims shall be transferred from this account to account 759, "Accrued accounts payable."

**775 Other accrued liabilities.**

(b) Separate subaccounts shall be maintained to show the amount provided for each liability and the nature of and amounts of debits and credits to the subaccounts.

(c) Upon accomplishment of the purpose for which each accrued liability was provided in this account, any remaining balance in the applicable subaccount shall be cleared to the appropriate operating expense or other account. Prior Board approval shall be required for clearance of balances in accrued liability subaccounts which were originally established by authority of the Board.

(d) Estimates of amounts payable within one year covering any liability included in this account shall be transferred to account 759, "Accrued accounts payable."

**781 Interest in default.**

for construction of side tracks to be refunded on basis of an agreed portion of the earnings from the traffic handled over the tracks and similar liabilities not payable within one year: This account shall also include other deferred and noncurrent liabilities not otherwise provided for in general balance sheet accounts. Assessments for public improvements and amounts due governmental agencies and others for payments to be made within one year, shall be included in account 763, "Other current liabilities," or other appropriate current liability account.

**783 Deferred revenues—transfers from government authorities.**

This account shall include amounts representing the cost of acquisition, addition to, or improvement of depreciable operating property received, or receivable from Federal, state, or local authorities. Items to be included in this account shall be determined in accordance with instruction 1-15.

**Subpart B—Branch Line Accounting System**

**900 Definitions.**

Unless otherwise required by context, the following definitions apply in this subpart:

*Account* means an account in the ICC's Uniform System of Accounts (USOA), for Railroad companies (49 CFR Part 1201, Subpart A).

*IC Act* means the Interstate Commerce Act (49 U.S.C. 1 *et seq.*), as amended.

*Branch Line* or *Branch* means a rail line or segment of line which (a) has been designated on a transportation system diagram in categories (1), (2), (3), or (4) (49 CFR 1152.10(b) (1), (2), (3), (4)); or (b) is the subject of a directed service order under section 304(d)(3) of the 3R Act; or (c) is the subject of a rail continuation service agreement entered into prior to the designation of the line on a system diagram.

*STB* or *Board* means the Surface Transportation Board.

*Designated State agency* means the instrumentality created by a State or designated by appropriate authority to administer or coordinate its State rail plan as required by section 5(j)(2) of the Department of Transportation Act (90 Stat. 131) or section 402(c)(1)(A) of the 3R Act (87 Stat. 985) or regulations promulgated pursuant thereto.

*RSPO* means the Rail Services Planning Office of the Surface Transportation Board.

*Railroad* means a common carrier by railroad, as defined in section 1(3) of the Interstate Commerce Act (49 U.S.C. 1(3)).

*3R Act* means the Regional Rail Reorganization Act of 1973, Pub. L. 93-236, 87 Stat. 985, as amended.

*4R Act* means the Railroad Revitalization and Regulatory Reform Act of 1976, Pub. L. 94-210, 90 Stat. 31.

*XX*, when used in place of digits in a six-digit account number, means that all accounts containing the remaining four-digits are included. Example: *11-21-XX* refers to all salary and wage accounts for locomotives because *11* designates salaries and wages and *21* designates locomotives. Thus, *11-21-XX* includes all of the following accounts: 11-21-01; 11-21-40; 11-21-48; 11-21-39; and 11-21-99. Similarly, *XX-31-67* means all accounts containing *31* (train operations) and *67* (locomotive fuel).

**910 Purpose and scope.**

(a) Section 205(e)(1)(A) of the 3R Act directs the office to issue regulations which will permit the collection and publication by the Consolidated Rail Corp. (ConRail), or by profitable railroads of information necessary to determine accurately the revenues attributable, avoidable costs, and service units of light-density lines scheduled for abandonment. This accurate information is intended to facilitate the determination of the revenues and avoidable costs in abandonment proceedings

and in potential offers of subsidy. This information is intended to be compatible with the Regional Subsidy Standards (49 CFR Part 1155), for those lines which were not conveyed to ConRail under the final system plan and with the National Subsidy Standards (49 CFR Part 1152, Subpart D), for all other lines. The purpose of the Branch Line Accounting System regulations is to specify an accounting system for the collection and publication of this information.

(b) For further information regarding the Branch Line Accounting System, persons may contact the RSPO's Cost Evaluation Branch: Cost Evaluation Branch, Rail Services Planning Office, 1900 L Street NW., Washington, DC 20036, 202-254-7552.

#### 920 Collection of data.

(a) *Lines for which data collection is required.* The railroad shall collect data on all branch lines which meet the criteria listed in paragraphs 1 through 4 below. The data to be collected are specified in section 920(b).

(1) Branch lines in categories (1), (2), and (3) on the System Diagram Map include, respectively, lines for which a carrier intends to file an abandonment application within three years, lines which the carrier has under study and are potentially subject to abandonment, and lines for which an abandonment application is pending before the Board. The collection of data on such lines shall commence on the first day of the month after the line has been designated in one of the categories and will continue so long as the branch line is retained in one of these categories. The assignment and apportionment methodology set forth in Part 1152, Subchapter B (National Subsidy Standards), shall be applied.

(2) For branch lines operated under an order directing service, under section 304(d)(3) of the 3R Act, data shall be collected from the effective date of the order until the order is withdrawn. The assignment and apportionment methodology set forth in Part 1155, Subchapter B (Regional Subsidy Standards), shall be applied.

(3) For branch lines operated under a rail service continuation agreement under section 1a(6)(a) of the IC Act, data shall be collected from the effective date of the agreement until the termination of the agreement. The assignment and apportionment methodology set forth in Part 1152, Subchapter B (National Subsidy Standards), shall be applied.

(4) For branch lines operated under a rail service continuation agreement under section 304 of the 3R Act, data collection shall commence on the effective date of the agreement and shall continue until the termination date of the agreement. The assignment and apportionment methodology set forth in Part 1155, Subchapter B (Regional Subsidy Standards), shall be applied.

(b) *Data to be collected.* The data collected shall include the items of revenue, expense, and service units which are specified in Parts 1152 and 1155, Subchapter B (National and Regional Subsidy Standards), as described in the account texts listed in section 950. The format for presentation of these data is specified in section 940.

[43 FR 1733, Jan. 11, 1978, as amended at 47 FR 49596, Nov. 1, 1982]

#### 930 Publication of data.

(a) *General.* The railroad shall file on or before June 30 of each calendar year the certification included in these regulations as Appendix I. The railroad shall include a description of each branch line using the format set forth in Appendix I of these regulations. The description of each branch line requires the same data as that submitted under 49 CFR 1152.11. This section prescribes the branch line information required in conjunction with the system diagram maps specifying the line's designation, states and counties traversed, delineation of mileposts, and location of agency and terminal stations.

(b) [Reserved]

(c) *Access to records.* The records, accounts, working papers, and other documents reflecting the revenues, cost, and service unit data of each branch line for which the railroad must maintain data shall be made available for inspection and examination by the Board and, for lines situated within its State, by the designated State agency

at a time and place mutually agreeable to the parties. The railroad shall also reproduce such records for the designated State agency, provided the agency pays the reasonable cost thereof.

(d) *Waivers and modifications.* The Office may, with respect to individual requests, upon good cause shown, waive or modify any requirement of this section not required by law.

[43 FR 1733, Jan. 11, 1978, as amended at 44 FR 9730, Feb. 14, 1979; 47 FR 49596, Nov. 1, 1982]

NOTE D: Revenue from the transportation of caretakers of freight shipments, when not included as a part of the freight charges on the waybill covering the freight shipments, shall be credited to account 102, "Passenger."

NOTE E: This account shall be maintained so as to show separately payments and allowances for (a) terminal collection and delivery services when performed in connection with line-haul transportation of freight on the basis of freight tariff rates, further separated between (1) TOFC/COFC service, and (2) all other freight service; also (b) payments for switching services when performed in connection with line-haul transportation of freight on the basis of switching tariffs and allowances out of freight rates, including the switching of empty cars in connection with a revenue movement, and (c) payments on

basis of tariff rates for loading and unloading livestock.

**104 Switching.** (1) This account shall include the revenue from switching service upon the basis of lawful tariff rates. (2) To this account shall be charged amounts paid for switching when such switching service is provided for in the switching rate charged by the carrier.

NOTE: "Penalty switching" charges paid by the carrier shall be included in expense account 61-32-XX, "General—Other Expenses—Transportation, Yard, Freight."

**105 Water transfers.** (1) This account shall include the revenue, from the transfer by water (ferriage, lighterage, and floatage), of passenger, freight, vehicles, and livestock, upon the basis of lawful local tariff rates.

**106 Demurrage.** This account shall include the revenue from the detention of cars incident to loading, unloading, re-consigning, and stops in transit upon the basis of lawful tariffs for demurrage. This account shall also include the revenue from the detention of trailers and containers used in TOFC/COFC service, incident to loading and unloading, upon the basis of tariff rates.

NOTE: This account shall be maintained so as to reflect separately (1) revenue from detention of cars, and (2) revenue from detention of trailers and containers used in TOFC/COFC service.

**110 Incidental.** This account is designed to show the amounts which the carrier becomes entitled to receive from services rendered incidentally with rail-line and water-line transportation; for the use of facilities of which the expenses for operation and maintenance are not separable from railway expenses and from incidental sources not provided for elsewhere. Among the items included in this account are revenues derived from (1) hotels and restaurants, (2) operations conducted at stations and on trains by individual or companies other than railway companies, (3) storage, (4) the sale of electric power, (5) renting property operated and maintained in connection with the property used in the carrier's transportation operations and from railway operations not provided for elsewhere.

**121 Joint facility, credit.** This account shall include the carrier's proportion of revenue collected by others in connection with the operation of joint tracks, yards, terminals, and other facilities, including revenue from hotels, restaurants, grain elevators, sale of power, and other miscellaneous operations.

NOTE A: The purpose of this account is to show the amounts of revenue from the operation of joint tracks, yards, terminals and other facilities operated by other companies, which under existing contracts or agreements are credited by the operating company to the tenant companies which participate therein. The bill rendered by any creditor company against a debtor company for the latter's proportion of the expense of maintenance and operation of joint facilities, which includes also a credit covering a proportion of the revenue to be paid over, shall show the distribution of the credit for such proportion of the revenue separately

from the distribution of the expense of operation.

NOTE B: No credits shall be made to this account representing amounts creditable by the operating company to primary accounts 101-103, 105, and 110.

122 *Joint facility, debit.* This account shall include that proportion of revenue from the operation of joint tracks, yards, terminals, and other facilities, which is creditable to other companies, including revenue from hotels, restaurants, grain elevators, sale of power, and other miscellaneous operations.

NOTE A: The purpose of this account is to show the amount of revenue from operation of a terminal company or other carrier which, under the terms of existing contracts or agreements covering the joint use of tracks, yards, and other facilities, is credited to other carriers that participate in the benefits from such joint use. The bill rendered by a creditor company against a debtor company for the latter's proportion of expense of maintaining and operating joint facilities, which includes a credit covering the debtor company's proportion of the revenues from operation of such joint facilities, shall indicate separately the proper distribution of both the revenues and the expenses included in the bill, and such distribution shall be adhered to the debtor.

NOTE B: No debits shall be made to this account representing amounts creditable by the operating company to primary accounts 101-103, 105, and 110.

OTHER INCOME ACCOUNTS

The preservation of record rules contained in this part shall apply to the following:

Railroad companies  
 Electric railway companies  
 Express companies

 Ratemaking organizations

This part applies also to the preservation of accounts, records and memoranda of traffic associations, demurrage and car service bureaus, weighing and inspection bureaus, and other joint activities maintained by or on behalf of companies listed in the above paragraph of this subpart.

[50 FR 1075, Mar. 18, 1985 and 51 FR 22083, June 18, 1986, as amended at 51 FR 44297, Dec. 9, 1986; 62 FR 50525, Sept. 26, 1997]

### § 1220.1 Records required to be retained.

Companies subject to this part shall retain records for the minimum reten-

tion periods required by § 1220.6, Schedule of records and periods of retention. After the required retention periods, the records may be destroyed at the discretion of each company's management. It shall be the obligation of the subject company to maintain records that adequately support financial and operational data required by the Board. The company may request a ruling from the Board on the retention of any record. The provisions of this part shall not be construed as excusing compliance with the lawful requirements of any other governmental body prescribing longer retention periods for any category of records.

### § 1220.2 Protection and storage of records.

(a) The company shall protect records subject to this part from fires, floods, and other hazards, and safeguard the records from unnecessary exposure to deterioration from excessive humidity, dryness, or lack of ventilation.

(b) The company shall notify the Board if prescribed records are substantially destroyed or damaged before the term of the prescribed retention periods.

### § 1220.3 Preservation of records.

(a) All records may be preserved by any technology that is immune to alteration, modification, or erasure of the underlying data and will enable production of an accurate and unaltered paper copy.

(b) Records not originally preserved on hard copy shall be accompanied by a statement executed by a person having personal knowledge of the facts indicating the type of data included within the records. One comprehensive statement may be executed in lieu of individual statements for multiple records if the type of data included in the multiple records is common to all such records. The records shall be indexed and retained in such a manner as will render them readily accessible. The company shall have facilities available to locate, identify and produce legible paper copies of the records.

(c) Any significant characteristic, feature or other attribute that a particular medium will not preserve shall

The records referred to in these regulations may be destroyed after business is discontinued and the company is completely liquidated. The records may not be destroyed until dissolution is final and all pending transactions and claims are completed. When a company is merged with another company under jurisdiction of the Board, the successor company shall preserve records of the merged company in accordance with these regulations.

**§ 1220.5 Waiver of requirements of these regulations.**

A waiver from any provision of these regulations may be made by the Board

upon its own initiative or upon submission of a written request by the company. Each request for waiver shall demonstrate that unusual circumstances warrant a departure from prescribed retention periods, procedures, or techniques, or that compliance with such prescribed requirements would impose an unreasonable burden on the company.

**§ 1220.6 Schedule of records and periods of retention.**

The following schedule shows periods that designated records shall be preserved. The descriptions specified under the various general headings are for convenient reference and identification, and are intended to apply to the items named regardless of what the records are called in individual companies and regardless of the record media. ### LIST OF INSTRUCTIONS

#### § 1242.00 Separation of common operating expenses.

(a) Commencing with annual reports for the year 1978 or for any portion thereof until further order, all class I railroad companies including class I switching and terminal companies (§1240.1 of this chapter) subject to section 20 of the Interstate Commerce Act as amended shall separate operating expenses common to both freight service and passenger service in accordance with the regulation in this part.

(b) The carrier shall maintain records supporting its common operating expense apportionments to freight and passenger services. The carrier shall report common expense apportionments to the Board as required.

### GENERAL

#### § 1242.01 Expenses solely related to freight service and passenger service.

The Uniform System of Accounts for Railroad Companies (49 CFR part 1201) requires that carriers assign directly to freight service or to passenger service, including allied services, the expenses, taxes, and purchased services incurred solely for the benefit of either freight or passenger service.

§ 1242.02

§ 1242.02 Common expenses.

The Uniform System of Accounts also requires that carriers assign to common expense accounts the remaining expenses, taxes and purchased services which are not solely related to either freight or passenger service. The following instructions govern the separation of common expense accounts between freight and passenger services.

§ 1242.03 Made by accounting divisions.

The separation shall be made by accounting divisions, where such divisions are maintained, and the aggregate of the accounting divisions reported for the quarter and for the year.

§ 1242.04 Special tests.

When the separation of common expense accounts between freight and passenger services is based upon special tests or service unit factors, such tests shall be made at sufficiently frequent intervals to represent actual operating conditions. The service unit factors used are those of the reporting period.

§ 1242.05 Operating expense account number notation.

(a) The operating expense account numbers consist of a six-digit coding structure divided into three two-digit groups. The first two-digit group denotes natural expenses; the second group denotes activities/subactivities for freight, passenger or common service; and the third group signifies applicable function assignment.

(b) For reporting purposes, four natural expense categories are utilized. The categories are: salaries and wages (account 11-XX-XX); material, tools, supplies, fuels and lubricants (account 21-XX-XX); purchased services (accounts 31-XX-XX to 41-XX-XX, inclusive); and general (accounts 61-XX-XX to 65-XX-XX, inclusive, 51-XX-XX, 52-XX-XX, 53-XX-XX and 12-XX-XX).

(c) The symbol "XX" in the first two-digit group is used throughout the separation instructions to denote more than one natural expense associated with the same activity/subactivity-

function account structure. For reporting purposes, the natural expense account numbers represented by "XX" include:

- 11—Salaries and wages;
21—Materials, tools, supplies, fuels, and lubricants;
30 or 41—Purchased services;
30—Summation of certain purchased service accounts;
41—Other purchased services;
61—General.

(d) The "30" natural expense designation indicates a summation of specific purchased service accounts that are reported in total rather than individually. The specific accounts under the way and structures activity except for administration functions include 39-1X-XX, repairs billed by others, Dr.; 40-1X-XX, repairs billed to others, cr.; and 41-1X-XX, other purchased services. For the equipment activity excluding administration functions, the "30" designation denotes the summation of 39-2X-XX and 41-2X-XX.

(e) The "41" natural expense designation (other purchased services) is the purchased service category of the "XX" code for the following:

- (1) Way and structures activity administration—function accounts,
(2) Equipment activity administration—function accounts,
(3) Transportation activity expense accounts, and
(4) General and administration activity expense accounts.

(f) The "61" general natural expense designation is applicable to all accounts with the "XX" symbol except transportation, train and yards accounts (XX-(33/43/53)-XX).

(g) The natural expense account number "50" is used throughout the separation instructions to indicate the summation of accounts 52-XX-XX, Other casualties, and 53-XX-XX, Insurance, that are reported as one item, "Casualties and Insurance," (50-XX-XX).

(h) The number "98" in the function account group (last two digits) is used in the separation rules to designate the summation of a natural expense consisting of more than one functional assignment that is reported as one item. This includes Repairs Billed to Others,

## Surface Transportation Board, DOT

## § 1242.11

Cr.—Equipment (40-2X-XX). For example, the locomotive subactivity contains accounts 40-(21/24/26)-40, 40-(21/24/26)-41, and 40-(21/24/26)-48 which are treated as 40-(21/24/26)-98.

### § 1242.06 Instructions for separation.

(a) Certain instructions for separating common expense accounts (dependent accounts) between freight and passenger services base the allocation on the proportional freight/passenger separation of other common expense accounts (independent accounts). The dependent account is frequently identified by an "XX" symbol in the natural expense position (first two digits) with corresponding independent accounts also identified by the "XX" natural expense symbol. Unless otherwise stated, the applicable natural expense associated with "XX" symbol shall be the same for both the dependent and independent accounts.

(b) To illustrate, §1242.10 provides instructions for separating common Way and Structures, Administration—Track accounts (dependent accounts) designated by XX-19-02. The separation is based on certain other common Way and Structures accounts including Roadway—Running, XX-17-10, and Roadway—Switching, XX-18-10.

(c) As §1242.05 states, the "XX" symbol denotes the following natural expenses for Way and Structures administration functions:

- 11—Salaries and wages,
- 21—Materials, tools, supplies, fuels, and lubricants,
- 41—Other purchased services, and
- 61—General.

These natural expenses shall be individually applied to the separation rules in §1242.10. In each case, the independent accounts providing the basis for freight/passenger separation of the dependent account shall have the same natural expense designation. For example, the basis of separating account 11-19-02, Salaries and Wages, Way and Structures, Administration—Track, would be based on certain independent accounts including 11-17/18-10, Salaries and Wages, Way and Structures, Running/Switching, Repair and Maintenance, Roadway.

SOURCE: 46 FR 26784, May 15, 1981, unless otherwise noted.

#### § 1244.1 Definitions.

(a) *Railroad*—an individual railroad or terminal company subject to the Interstate Commerce Act and every receiver, trustee, executor, administrator or assignee of any such railroad. If a railroad and its railroad subsidiaries report to the Board on a consolidated basis, they would collectively be considered as a *railroad*.

(b) A *railroad subsidiary*—a railroad owned or controlled by another railroad.

(c) A *waybill*, which may be referred to by other names such as mine tickets, is the document or instrument prepared from the bill of lading contract or shipper's instructions as to the disposition of the freight, and used by the railroad(s) involved as the authority to move the shipment and as the basis for determining the freight charges and interline settlements.

#### § 1244.2 Applicability.

(a) Effective July 1, 1981 and thereafter, unless otherwise ordered, each railroad as defined in §1244.1 above is required to file waybill sample information for all line-haul revenue waybills terminated on its lines if it terminates at least 4,500 revenue carloads in any of the three preceding years, or if it terminates at least 5% of the revenue carloads terminating in any state in any of the three preceding years. A railroad required to file waybill sample information under this section shall herein be referred to as *subject railroad*.

**§ 1244.3**

(b) Waybill terminations shall include all line-haul revenue movements terminating for waybilling purposes on the subject railroad's line whether the lading is destined for the terminating station as denoted on the waybill or the shipment is being rebilled or forwarded to the ultimate destination by another railroad or another mode of transportation (e.g., lake cargo, inbound transit, or other rebilled movements).

(c) Each subject railroad shall also file the required waybill sample information for all of its railroad subsidiaries.

(d) Each subject railroad shall also file the required waybill sample information for any other railroad for which it performs revenue billing and/or interline settlements under special agreement.

(e) The surviving corporate entity of railroads (subject to the Interstate Commerce Act) who have merged or re-organized shall be required to report waybill sample information if its predecessor railroad or any of its predecessor railroads were required to report under this section.

(f) In order to determine the number of carloads terminated in each state, railroads not otherwise submitting waybill information must report annually the number of carloads terminated by state for the last calendar year. These reports shall be submitted by March 1 of the year following the report year.

(g) *Transition.* This final rule will apply to all subject waybills which are in the subject railroad's audit month of July 1981 and all audit months thereafter. The former rule will continue to apply to all subject waybills for the prior audit months up to and including June 1981.

**§ 1244.3 Reporting contract shipment waybills.**

(a) All railroads shall identify (flag) contract shipment waybills.

(b) The revenue associated with contract shipments may be encrypted (masked) to safeguard the confidentiality of the contract rates.

(1) Upon written request, the Board will provide a masking procedure for a railroad's use or will mask the con-

tract revenues when the Waybill Sample is filed with the Board.

(2) When a railroad intends to use its own proprietary masking procedure, those procedures, and any changes in those procedures, must be approved by the Board thirty (30) days prior to their use.

(3) All railroads that use a proprietary masking procedure, and intend to continue to use the same procedure, must certify, by letter to the Board, prior to January 31 each year, that the contract revenue masking procedures are unchanged.

(4) All correspondence and certifications concerning masking procedures should be addressed to: Director, Office of Economics, Environmental Analysis, and Administration, Surface Transportation Board, Washington, DC 20423-0001, ATTN: WAYBILL COORDINATOR.

[65 FR 37711, June 16, 2000]

EFFECTIVE DATE NOTE: At 65 FR 37711, June 16, 2000, § 1244.3 was redesignated as § 1244.4 and a new § 1244.3 was added, effective Jan. 1, 2001.

**§ 1244.4 Sampling of waybills.**

(a) Subject railroads shall file waybill sample information in one of the following two ways. (1) Authenticated copies of a sample of audited revenue waybills—the manual system (§ 1244.3(b)). (2) A computer tape containing specified information from a sample of waybills—the computerized system (§ 1244.3(c)).

(b) *The Manual System.* (1) The sample of subject waybills shall be as follows:

(i) All waybills with less than 6 carloads per waybill whose serial numbers are 1 or end in 01,

(ii) All waybills with 6 to 25 carloads per waybill whose serial numbers end in 1; and,

(iii) All waybills with 26 or more carloads per waybill whose serial numbers end in 1 or 7.

(2) The expected sampling rates for the manual system are as follows:

Numbers of carloads on waybill	Expected sample rate
1 to 5 .....	1/100
6 to 25 .....	1/10
26 and over .....	1/5

**Surface Transportation Board, DOT**

**§ 1244.5**

(3) Upon giving the subject roads 60 days notice, the Board may require random serial number endings in lieu of the respective endings shown in §1244.3(b). These random serial number endings would have the expected sample rates shown in §1244.3(b)(2).

(4) If the subject waybills have no waybill numbers or serial numbers, or have seriously flawed waybill or serial numbers, then the subject railroad should serialize those documents in blocks of 1,000 or blocks of multiples of 1,000 (e.g., 1, 2, . . . 1,000; 1, 2, . . .) and use these constructed serial numbers for selection purposes.

(c) *The Computerized System.* (1) The tape shall be required to conform to the standards and format specified in Statement No. 81-1, *Procedure for Sampling Waybill Records by Computer*, issued by the Surface Transportation Board, which may be revised from time to time.

(2) The sampling rates for the computerized system are as follows:

Number of carloads on waybill	Sample rate
1 to 2 .....	1/40
3 to 15 .....	1/12
16 to 60 .....	1/4
61 to 100 .....	1/3
101 and over .....	1/2

(d) *Controls and Annual Counts.* (1) Each subject railroad shall maintain a control procedure to ensure complete and accurate reporting for the waybill sampling. All pertinent waybill data shall be included on hard copy waybill submissions including inbound references for transit waybills. All such pertinent waybill data shall be legible.

(2) All subject railroads shall maintain a record of the number of line-haul revenue carloads that terminated on their line in a calendar year and shall furnish this number when requested by the Board.

(3) All subject railroads using the manual system of reporting shall furnish the Board, in accordance with instructions on the Transmittal Form OPAD-2, the total counts of line-haul revenue waybills terminated in each reporting period for the following three categories:

(i) Waybills, with less than six carloads per waybill,

(ii) Waybills with 6 to 25 carloads per waybill, and

(iii) Waybills with 26 or more carloads per waybill.

(4) All subject railroads on the computerized system of reporting shall furnish the Board the control counts and tape specification information as required by the Statement No. 81-1.

(5) Certification by a responsible officer of the subject railroad as to the completeness and accuracy of sample shall be made once a year in accordance with the instructions on the Transmittal Forms OPAD-1 or OPAD-2.

[46 FR 26784, May 15, 1981, as amended at 46 FR 45141, Sept. 10, 1981. Redesignated at 65 FR 37711, June 16, 2000]

EFFECTIVE DATE NOTE: At 65 FR 37711, June 16, 2000, §1244.3 was redesignated as §1244.4, effective Jan. 1, 2001.

**§ 1244.5 Date of filing.**

(a) The reporting period for which subject railroads submit waybill sample information shall be the audit (accounting) month except as specified below:

(1) Subject railroads using the computerized system may submit waybill sample information quarterly as specified in Statement 81-1.

(2) Subject railroad using the manual system may submit waybill sample information quarterly if it submits fewer than 1,000 waybills per year.

(b) Waybill sample information shall be forwarded no later than 60 days from the end of the reporting period to the Board.

(c) When the submitted waybill sample information is returned to the submitting railroad for correction, that railroad shall resubmit corrected data to the Board promptly but no later than 60 days after its receipt.

(d) *Transmittal Forms.* (1) Subject railroads using the manual system of reporting shall complete the Transmittal Form OPAD-2, to accompany each waybill sample submission.

(2) Subject railroads using the computerized system of reporting shall complete the Transmittal Form OPAD-1, to accompany each waybill tape submission.

### § 1244.6 Retention of files.

(a) Subject railroads which submit waybill sample data by the computerized system instead of the manual system shall retain the underlying hard copy waybills or facsimilies capable of producing legible copies, which shall be complete including inbound references for transit waybills, for a minimum period of four years.

(b) This file of retained waybills shall be maintained in such a manner that the railroads on the computerized system may readily retrieve waybill copies using the waybill identifier code as shown on the submitted computerized waybill record.

### § 1244.7 Special studies.

(a) Although routine submission of hard copy waybills is eliminated when a railroad reports under the computerized system, the Board may order that railroad to submit hard copies of the underlying waybills for special studies.

(b) The Board may order the subject railroads to supply additional data for submitted waybill copies or records for special studies.

### § 1244.8 Analysis of waybill data.

Users of the waybill sample when presenting waybill analysis before the Board shall ensure that the appropriate weighting factors are applied to account for the stratified sampling. See Statement 81-1 for guidelines for weighting waybill data and for computing sampling errors.

## 49 CFR Ch. X (10-1-00 Edition)

### § 1244.9 Procedures for the release of waybill data.

(a) *General.* The procedures for the release of waybill data identify five classes of users of the STB Waybill Sample, define the waybill information or data that each class of users may obtain, and set forth the applicable requirements for the data's release. They also formalize notice and protest procedures for the possible release of waybill data to other users to protect against the inappropriate release of confidential data. The Director of the Office of Transportation Analysis shall be responsible for releasing waybill data in accordance with these procedures.

(b) *Class of user, available data, and applicable release requirements.* (1) *Railroads.* Each requesting railroad may obtain any waybill record from the STB Waybill Sample covering traffic that originated, terminated, or was bridged by that railroad. The railroad shall not have access to waybill data pertaining to traffic in which it did not participate. Also, it must meet all STB and legal requirements concerning release of shipper information in accordance with 49 U.S.C. 11910(a).

(2) *Federal agencies.* Each requesting Federal agency (including quasi-governmental agencies) may obtain any waybill record from the STB Waybill Sample subject to the following requirements:

(i) The Federal agency shall make the information contained in the STB Waybill Sample available only to its employees or those contractors working on the particular project or study requiring the waybill data.

(ii) The Federal agency will ensure that railroads and shippers are afforded the same privilege and protection against disclosure of the waybill data as the Board provides.

(iii) The Federal agency will not release any data to the public unless the data elements are aggregated to contain at least three shippers and to prevent identification of an individual railroad.

(iv) The Federal agency will refer any requests for waybill data and accompanying documentation to the STB for processing and will so inform the

requesting party of such referral to the Board.

(v) The Federal agency must sign an agreement annually with the Board agreeing to these restrictions.

(3) *States.* Each requesting State may obtain any waybill record pertaining to traffic that was originated, terminated, interchanged in, or that passed through its State subject to the same requirements imposed on federal agencies under paragraphs (b)(2)(i) through (v) of this section.

(4) *Transportation practitioners, consulting firms, and law firms—specific proceedings.* Transportation practitioners, consulting firms and law firms may use data from the STB Waybill Sample in preparing verified statements to be submitted in formal proceedings before the STB and/or State Boards (Board) subject to the following requirements:

(i) The STB Waybill Sample is the only single source of the data or obtaining the data from other sources is burdensome or costly, and the data is relevant to issues pending before the Board.

(ii) The requestor submits to the STB a written waybill request that complies with §1244.8(e).

(iii) All waybill data must be returned to the STB, and the firm must not keep any copies.

(iv) A transportation practitioner, consulting firm, or law firm must submit any evidence drawn from the STB Waybill Sample to the Board only unless the evidence is aggregated to the level of at least three shippers and will prevent the identification of an individual railroad. Nonaggregated evidence submitted to the Board will be made part of the public record only if the Board finds that it does not reveal competitively sensitive data. However, evidence found to be sensitive may be provided to counsel or other independent representatives for other parties subject to the usual and customary protective order issued by the Board or appropriate authorized official.

(v) For each Board proceeding, a firm must sign a confidentiality agreement with the STB agreeing to the above restrictions before any data will be released. This agreement will permit use of the released data for a period of one year from the date the agreement is

signed by the user. If the data is required for an additional period of time because a proceeding is still pending before the Board, the firm must sign a new confidentiality agreement covering the data needed for each additional year the proceeding is opened.

(5) *Public use.* Nonconfidential waybill data may be obtained from the "Public Use Waybill File". Reports produced from the Public Use Waybill File may be used, published, or released. The Public Use Waybill File contains the following nonconfidential items:

- (i) Waybill Date (Month, Day, Year).

(xxxv) Termination BEA (omitted if STCC and BEA pair reveals competitively sensitive shipper data).

(xxxvi) Termination STB Rate Territory.

(xxxvii) Waybill Reporting Period Length.

(xxxviii) AAR Provided UMBLER Data.

(xl) Bad Routing Code.

(xli) Miscellaneous Factored Expanded Data (e.g., carloads).

(c) *Other Users.* (1) Users other than those described in paragraphs (b)(1) through (b)(5) of this section may file written requests in accordance with paragraph (e) of this section for permission to use data from the STB Waybill Sample.

(2) All written requests filed by such users are subject to the notice and protest procedures described in paragraph (d) of this section.

(d) *Notice and protest procedures for waybill requests by other users.* Railroads and shippers will be notified and afforded the opportunity to protest waybill requests filed by users other than those described in paragraphs (b)(1) through (b)(5) of this section in accordance with the following procedures:

(1) *Notice of request for confidential waybill data.* Affected railroads and shippers will receive notice by FEDERAL REGISTER Publication. If railroad specific or shipper specific data are requested, those parties will be given written notice of the request.

(2) *Form of notice.* The notice shall identify the parties requesting the data; describe the type of waybill data requested; and state the purpose for which the data is requested. The notice shall include a statement that parties seeking information concerning the filing of objections should refer to Ex Parte No. 385 (Sub-No. 2), 49 CFR 1224.8, or contact the Surface Transportation Board's Office of Transportation Analysis.

(3) *Objections to release.* (i) Objections to release of the confidential waybill data must be filed by the railroad and/or shipper no later than 14 calendar days from publication of the notice in the FEDERAL REGISTER.

(ii) An original and 3 copies of each objection shall be filed with the Director, Office of Transportation Analysis,

Surface Transportation Board, Washington, DC 20423.

(iii) The objection shall identify the parties seeking the confidential waybill data, reiterate the purpose for which the data is sought, and state all grounds for objection to full or partial disclosure of the requested data.

(4) *Board determination.* (i) The Director of the Office of Transportation Analysis will consider all objections in determining whether to release the requested waybill data. Each railroad or shipper who filed objections will be sent written notice of the Director's decision not less than 14 calendar days prior to the disclosure date.

(ii) The Board reserves the right to deny the release of waybill data although no objections may be filed.

(iii) Appeals must be filed with the Chairman within 10 days of the date of the Director's decision. Responses to appeals must be filed within 10 days thereafter (49 CFR 1011.7(b)(1)). The filing of an appeal will automatically stay the effect of the Director's decision.

(e) *Content of waybill requests.* (1) All requestors under paragraphs (b)(4) and (c) of this section shall include the following information:

(i) A complete and detailed explanation of the purpose for which the requested data are needed.

(ii) A description of the specific waybill data or fields actually required (including pertinent geographic areas).

(iii) A detailed justification as to why the specified waybill data are needed.

(2) An original and 2 copies of the waybill request shall be filed with the Director, Office of Transportation Analysis, Surface Transportation Board, Washington, DC 20423.

(f) *Aggregation of confidential shipper data.*

(1) Any shipper data obtained from the Waybill Sample shall not be publicly released unless the data are aggregated to include at least three shippers.

(2) To aggregate the waybill data to the level of three shippers, the three-FSAC Rule shall be used. Under this rule, there must be at least three different freight stations as identified by the Freight Station Accounting Code

## Surface Transportation Board, DOT

## § 1245.1

(FSAC) on one railroad or there must be at least two more FSAC's than there are railroads present in the waybill data being aggregated.

(3) The three-FSAC Rule shall apply to every number and calculation publicly released.

(4) The Director of OTA will consider requests to apply an alternative aggregation method provided the requestor establishes that a particular project necessitates an alternative approach and that approach effectively protects the identity of individual shippers.

(g) *Complaint procedures.* (1) Complaints for alleged breaches of confidentiality or misuse of confidential waybill data must include the following:

(i) Identification of all known parties involved in the alleged violation.

(ii) The approximate date(s) of the alleged violations.

(iii) A full and detailed description of the alleged violation.

(iv) A description of any resulting harm to the complainant.

(2) Prior to filing a complaint, a complainant, upon written request, may obtain a copy of the incoming waybill request and the applicable confidentiality agreement. This request must identify the party involved, give the approximate date the data was released, briefly describe the alleged violation, and substantiate the need for this information for purposes of filing a complaint.

(3) An original and three (3) copies of the complaint shall be filed with the Director, Office of Transportation Analysis, Surface Transportation Board, Washington, DC 20423. A copy of the complaint shall also be served on the alleged violator(s).

(4) An answer must be filed within 20 days after service of the complaint.

(5) All parties will be notified in writing of the Director's decision. If the Director determines that a violation has occurred, the offending parties will be denied access to the waybill sample for a period of time commensurate with the nature of the violation.

(6) Appeals to the Director's determination shall be filed in accordance with paragraph (d)(4)(iii) of this section.

(h) *Munitions shipments.* All waybill requests for munition data at the 3-digit Standard Transportation Commodity Code (STCC) level or greater will be forwarded by the STB to the Department of Defense's Military Traffic Management Command (MTMC). The STB will not release this type of information without MTMC's consent.

AUTHORITY: 49 U.S.C. 721, 11145.

NOTE: The report forms prescribed by part 1245 are available upon request from the Office of the Secretary, Surface Transportation Board, Washington, DC 20423.

### § 1245.1 Rules governing classification of employees, service, and compensation.

The rules governing the classification of railroad employees and reports of their service and compensation outlined in §§1245.3 and 1245.4 are required, and all Class I railroads within the scope of Section 11145 of the Interstate Commerce Act shall be governed by such rules in the preparation and submission of their annual and other periodic reports to the Surface Transportation Board in accordance with the forms adopted for such returns (§1245.2); and also with respect to any other matters covered by these rules.

[47 FR 53867, Nov. 30, 1982]

## §1245.2

### §1245.2 Reports of railroad employees, service and compensation.

Beginning with the reporting period commencing January 1, 1983, and quarterly thereafter until further ordered, each Class I railroad is required to file a Quarterly Report of Railroad Employees, Service, and Compensation, (Form QRSC). In addition, such carriers shall also file an Annual Report of Railroad Employees, Service, and Compensation, (Form ARSC) for each calendar year. Both reports shall be filed with the Bureau of Accounts, Surface Transportation Board, Washington, DC 20423. The quarterly report shall be filed within thirty days after the end of each calendar quarter. The annual report shall be filed within forty five days after the end of the reporting year.

[47 FR 53867, Nov. 30, 1982]

### §1245.3 Employees; definition, service hours, and compensation.

(a) *Definition of "employees"*. The word *employees*, as used in this part, is intended to include every person in the service of the reporting carrier subject to its continuing authority to supervise and direct the manner of rendition of his service. Persons engaged to render only specifically defined service and not subject to the continuing authority of the carrier to supervise and control their acts, such as custom-house brokers, lawyers retained only for specific cases and not under general or continuing retainer, etc., are not employees in the meaning of the term used in this part.

(b) *Counting employees*. Since the number of employees fluctuates, carriers are required to classify and count all of their employees at twelve different times each year.

(c) *Joint employees*. Each person jointly employed shall, if carried on the payrolls of the several joint employers, be counted by each employer and represented in its return of number of employees by a fraction based on the number of employers reporting him; if a person, for example, is reportable by three employers, each should include him in its number of employees as one-third of an employee. When the entire compensation of a joint employee is

## 49 CFR Ch. X (10-1-00 Edition)

shown on the payroll of a single joint employer and is paid to the employee by that employer such employee should, for the purpose of returns, be treated as if employed solely by such employer.

(d) *Service hours*. (1) The number of hours on duty, or held for duty, and the number of hours paid for are to be ascertained and recorded for every class of employee. For enginemen and trainmen, the actual number of miles run and miles paid for but not run are to be recorded, as well as the number of hours on duty and the number of hours paid for. (The service time of all classes of employees shall be recorded in hours instead of days or hours as heretofore.)

(2) Whenever an employee works at more than one occupation, or in more than one class of service, both the number of hours worked and the compensation paid, should be separated and reported under the proper Reporting Divisions.

(3) If an employee is paid a day's wage for a smaller number of hours than constitutes a day's work, the number of hours paid for as well as the actual number of hours the employee is on duty should be ascertained and recorded. Time allowed for meals, part holidays, holidays, absences on leave, vacations, etc., should be excluded from time actually worked, but if such time is paid for it should be appropriately reported as "Time paid for but not worked" on Form A or as a "constructive allowance" on Form B. These requirements apply to enginemen and trainmen paid on the basis of trips or of miles run, and to employees paid at piece rates, as well as to employees paid on hourly, daily, weekly, monthly, or other time basis. Service hours for officers and employees who do not receive payment for overtime should be reported as the number of hours in each month at 8 hours per day contemplated for the position.

(e) *Compensation*. The compensation of employees as defined in the rules in this part is to be stated in such manner and detail as the forms adopted for periodical returns require.

## Surface Transportation Board, DOT

## § 1245.5

### § 1245.4 Forms required to be used.

(a) The report of information to the Surface Transportation Board on railroad employees, service and compensation includes two forms. Form A relates to employees other than train and engine service employees. Form B relates to train and engine service employees.

(b) With general reference to the statement of the compensation of employees in Forms A and B, it should be understood that the total compensation received by the employees in each Reporting Division, as well as the amount of work they perform, should be shown properly distributed under the prescribed column heads as indicated by the forms. It should be noted that if the work of an employee varies during a report period, his time and compensation should be apportioned accordingly. Amounts reported should be gross compensation paid.

*Illustrations.* (a) In the course of a month, an employee works as a Machinist, and as such earns \$200 and he works also as a Gang Foreman and earns \$130. The pay received by him in the occupation of Machinist with corresponding time should be included in returns for Division 61, "Machinists", and his other pay and time as indicated should be included in returns for Division 53, "Gang Foremen and Gang Leaders". (b) When an

employee works at two or more of the occupations of engineer, fireman, conductor, and brakeman, his time and compensation should be assigned in accordance with the facts. For example, in a certain month an employee earns as a Through Freight Engineer \$110, as a Local or Way Freight Engineer \$140, as a Yard Engineer \$100, and as a Local or Way Freight Fireman \$75. The time and the compensation of this employee should be correspondingly distributed among Reporting Divisions 122, 123, 124, and 127 as they are respectively applicable, without regard to the predominance of the time worked or the amount earned by him in one occupation.

(c) As elsewhere indicated, the statement of the number of employees in the service of a company with respect to Reporting Divisions depends upon the allocation of the individual employees as of the day of count.

(d) The Reporting Divisions shown in Forms A and B following will also be used in connection with the employees' schedule in the annual reports of railroads of classes I and II to the Board. Railroads of class III and lessor companies shall report only the information required in the annual report forms prescribed for such companies.

(a) Reproduction of classified material shall take place only when absolutely necessary, and in accordance with section 2001.46 of the Directive. Should copies be made, they are subject to the same controls as the original document. Records showing the number and distribution of copies shall be maintained by the Emergency Coordinator and the log stored with the original documents.

(b) Any suspected or actual unauthorized disclosures of classified information shall be reported to the Emergency Coordinator or Alternate. An immediate investigation will be undertaken by the Emergency Coordinator or Alternate to establish all facts surrounding the disclosure. The Emergency Coordinator or Alternate shall ascertain the nature of the information disclosed and the extent to which it has been disseminated and will maintain records of disclosures as evaluated and investigated.

(c) Any suspected or actual unauthorized disclosure of classified infor-

mation will be reported as soon as possible to the Department of Justice and the Information Security Oversight Office.

(d) Any unauthorized disclosure of classified information or any failure to cooperate with the investigation of unauthorized disclosures by an employee shall be cause for appropriate disciplinary or other remedial action as provided in the Board's Canons of Conduct, 49 CFR 1000.735-31.

[49 FR 7832, Mar. 2, 1984, as amended at 54 FR 38998, Sept. 22, 1989]

### § 1280.6 Storage of classified documents.

All classified documents shall be stored in the safe located in Room 5325 of the STB headquarters building. In those instances where the Emergency Coordinator is not available to receive classified documents, they may be stored, unopened, in the safe located in Room 5325.

### § 1280.7 Education of employees.

All employees who have been granted a security clearance and who have occasion to handle classified materials shall be advised of the procedures outlined in 49 CFR part 1280. They shall also be required to review Executive Order 12356 and appropriate directives of the Information Security Oversight Office (ISOO). This shall be achieved by a memorandum to all affected employees at the time these procedures are implemented, and by appropriate instructions to new employees receiving security clearances in the future.

### § 1280.8 Requests for mandatory review.

Because the Board does not itself generate classified documents, any requests made for mandatory review shall be coordinated by the Emergency Coordinator with appropriate officials of the Department or Agency responsible for issuance of the document involved.

#### § 1300.1 Scope; definitions.

(a) The provisions of this part address the requirements imposed on rail carriers by 49 U.S.C. 11101(b), 11101(c), 11101(d) and 11101(f).

(b) Except as otherwise provided in this section, the provisions of this part apply to any common carriage transportation or service provided by a rail carrier subject to the jurisdiction of the Surface Transportation Board under 49 U.S.C. 10501.

(c) The provisions of this part do not apply to any transportation or service provided by a rail carrier under a contract authorized under 49 U.S.C. 10709 or former 49 U.S.C. 10713 (repealed effective January 1, 1996).

(d) The provisions of this part do not apply to any transportation or service provided by a rail carrier to the extent that such transportation or service is exempted from rate notice and disclosure requirements pursuant to an exemption issued under 49 U.S.C. 10502 or former 49 U.S.C. 10505 (repealed effective January 1, 1996).

(e) For the purposes of this part, "service terms" means all classifications, rules, and practices that affect the rates, charges, or level of service for rail transportation.

#### § 1300.2 Disclosure requirement for existing rates.

(a) A rail carrier must disclose to any person, upon formal request, the specific rate(s) requested (or the basis for calculating the specific rate(s)), as well as all charges and service terms that may be applicable to transportation covered by the rate(s). For purposes of § 1300.4(a)(1) of this part, a formal request under this part is one that clearly notifies the railroad that the requester seeks not only immediate information but also notification of any future increases in the rate(s) involved or changes in pertinent service terms.

(b) The information provided by a rail carrier under this section must be provided immediately. (It is expected that the response will be sent within hours, or at least by the next business day, in most situations.) Such information may be provided either in written or electronic form as agreed to by the parties. If the parties cannot agree, such information is to be provided in electronic (non-passive) form where both parties have the requisite capabilities; otherwise, it is to be provided in writing.

(c) A rail carrier may, at its option, require that all requests submitted under this section be in written or electronic form, although the carrier may permit oral requests.

#### § 1300.3 Response to request for establishment of a new rate.

Where a shipper or a prospective shipper or person acting on behalf of a shipper or a prospective shipper requests that the carrier establish a rate in the absence of an existing rate for particular transportation, the carrier must promptly establish and provide to the requester a rate and applicable service terms. The information may be provided either in written or electronic form, as agreed to by the parties. If the parties cannot agree, such information is to be provided in electronic (non-passive) form where both parties have the requisite capabilities; otherwise, it is to be provided in writing. The response

should be provided as soon as reasonably possible, but no later than 10 business days from receipt of the request. If a carrier determines that additional information is required from the requester before a rate or term can be established, the carrier must so notify the requester as soon as possible, but no later than 10 business days after receipt of the request. Once the additional information is received, the carrier must set the rate and related service terms, and relay them to the requester, as soon as reasonably possible, but no later than 10 business days from the receipt of the additional information. (However, the parties may agree to a different time period, in which case these time periods would not apply.) A rail carrier may, at its option, require that requests submitted under this section be in written or electronic form, although the carrier may permit oral requests.

**§ 1300.4 Notice requirement.**

(a) A rail carrier may not increase any rates or charges, or change any service terms (except for changes that are equivalent to rate reductions), unless 20 days have expired after written or electronic notice has been provided to all persons who, within the previous 12 months:

(1) Have formally requested under §§ 1300.2 or 1300.3 of this part the affected rates or service terms; or

(2) Have made arrangements with the carrier for a future shipment that would be subject to the increased rates or changed service terms.

(b) The notice required by this section may be in written or electronic form, as agreed to by the parties. If the parties cannot agree, the information is to be provided in electronic (non-passive) form where both parties have the requisite capabilities; otherwise, it is to be provided in writing.

(c) For purposes of this section, a mailed notice is deemed "provided" on the date such notice is postmarked.

(d) The notice required by this section must clearly identify the increases in rates or charges or the changes in service terms.

**§ 1300.5 Additional publication requirement for agricultural products and fertilizer.**

(a) With respect to transportation of agricultural products (including grain, as defined in 7 U.S.C. 75, and all products thereof) and fertilizer, a rail carrier shall publish, make available, and retain for public inspection its currently effective rates, schedules of rates, charges, and other service terms, and any scheduled changes to such rates, charges, and service terms. This requirement is in addition to the requirements imposed by §§ 1300.2, 1300.3, and 1300.4 of this part.

(b) The information published under this section must include an accurate description of the services offered to the public; must provide the specific applicable rates (or the basis for calculating the specific applicable rates), charges, and service terms; and must be arranged in a way that allows for the determination of the exact rate, charges, and service terms applicable to any given shipment (or to any given group of shipments). Increases, reductions and other changes must be symbolized or highlighted in some way to facilitate ready identification of the changes, the nature of those changes and their effective dates.

(c) A rail carrier must make the information available at offices where it normally keeps rate information. Access to the information at such offices must be provided to any person, without charge, during normal business hours.

(d) A rail carrier must also make the required publications available to all persons (hereinafter referred to as subscribers) who have subscribed to a publication service operated either by the rail carrier itself or by an agent acting at the rail carrier's direction. Such publications may be made available either in printed or in electronic form as agreed to by the parties. Any scheduled changes must be published in a manner that provides timely notice to subscribers. A rail carrier may impose reasonable charges for such publications. Publications may be limited to the specific information requested by the subscriber, and charges for such limited publications should be set accordingly.

- 1310.1 Scope; definitions.
- 1310.2 Requirement to maintain tariffs.
- 1310.3 Contents of tariffs.
- 1310.4 Incorporation of tariff provisions by reference.
- 1310.5 Availability of tariffs at carrier offices.
- 1310.6 Furnishing copies of tariff publications.

AUTHORITY: 49 U.S.C. 721(a), 13702(a), 13702(c) and 13702(d).

SOURCE: 62 FR 5171, Feb. 4, 1997, unless otherwise noted.

### § 1310.1 Scope; definitions.

(a) The provisions of this part address the tariff requirements imposed by 49 U.S.C. 13702 on motor carriers and freight forwarders for the transportation of household goods, and the notice requirements with which such carriers must comply in order to be entitled to enforce the provisions of their tariffs against individuals whose shipments are subject to such tariffs.

(b) The provisions of this part apply to all movements of household goods defined in paragraph (c)(1) of this section, and to those movements of household goods defined in paragraph (c)(2) of this section that are not provided under contracts entered into pursuant to 49 U.S.C. 14101(b) or former 49 U.S.C. 10702 (repealed January 1, 1996).

(c) For the purposes of this part, the term *household goods* means personal effects and property used or to be used in a dwelling, when a part of the equipment or supply of such dwelling, and similar property if the transportation of such effects or property is:

- (1) Arranged and paid for by the householder, including transportation of property from a factory or store when the property is purchased by the householder with intent to use in his or her dwelling; or
- (2) Arranged and paid for by another party.

(d) For the purposes of this part *service terms* means all classifications, rules, regulations and practices that affect the rates, charges, or level of service for movements of household goods.

### § 1310.2 Requirement to maintain tariffs.

(a) Except when providing transportation for charitable purposes without charge, carriers subject to the Board's jurisdiction under Chapter 135 of Title 49 of the United States Code may provide transportation or service for movements of household goods only if the rates, and related rules and practices, for such transportation or service are contained in a published tariff that is in effect under this section. The carrier may not charge or receive a different compensation for the transportation or service than the rate specified in the tariff, whether by returning a part of that rate to a person, by giving a person a privilege, by allowing the use of a facility that affects the value of that transportation or service, or through another device. Tariffs shall be published in the English language and rates shall be stated in money of the United States.

(b) Tariffs maintained pursuant to this part must be available for inspection by the Board, and must be provided to the Board promptly and free of charge, upon request, by mail or other delivery service.

(c) A carrier that maintains a tariff pursuant to this part may not enforce the provisions of the tariff unless the carrier has given notice that the tariff is available for inspection in its bill of lading or by other actual notice to individuals whose shipments are subject to the tariff, as provided in §1310.4 of this part.

(d) The Board may invalidate a tariff prepared by or on behalf of a carrier under this part if that tariff violates 49 U.S.C. 13702 or the regulations contained in this part.

### § 1310.3 Contents of tariffs.

(a) Tariffs prepared under this part must include an accurate description of the services offered to the public; must provide the specific applicable rates, charges and service terms; and must be

arranged in a way that allows for the determination of the exact rate, charges and service terms applicable to any given shipment. Increases, reductions and other changes must be symbolized or highlighted in some way to facilitate ready identification of the changes and their effective dates.

(b) All information necessary to determine applicable rates, charges and service terms for a given shipment need not be contained in a single tariff, but if multiple tariffs are used to convey that information, the tariff containing the rates must make specific reference to all other tariffs required to determine applicable rates, charges and service terms. The carrier(s) party to the rate(s) must participate in all of the tariffs so linked and all such tariffs must be made available to shippers upon reasonable request.

**§ 1310.4 Incorporation of tariff provisions by reference.**

(a) Carriers that maintain tariffs pursuant to this part may incorporate the terms of such tariffs by reference (i.e., without stating their full text) into the bill of lading or other document embodying the contract of carriage for the transportation of household goods, provided that:

(1) The bill of lading or other document must contain a conspicuous notice that the contract of carriage incorporates the terms of the carrier's tariffs; the carrier must give notice that its tariffs are available for inspection in its bill of lading or by other actual notice to individuals whose shipments are subject to such tariffs; and the carrier must make the full text of incorporated terms readily available for inspection by the shipper, free of charge, upon request. If such terms cannot be made available immediately, they must be made available promptly and free of charge by mail or other delivery service.

(2) If the incorporated terms include any of the terms set forth in paragraphs (a)(2)(i) through (a)(2)(iii) of this section, the notice on the bill of lading or other document must indicate that such terms are included; the shipper must be provided with a brief summary of the principal features of such terms on or with the document;

and the shipper must be able to obtain a more complete explanation of such terms upon request.

(i) Limits on the carrier's liability for loss, damage, or delay of goods, including fragile or valuable goods.

(ii) Claim restrictions, including time periods within which shippers or consignees must file a claim or bring an action against the carrier for its acts or omissions or those of its agents.

(iii) Rights of the carrier to impose monetary penalties on shippers or consignees, increase the price of the transportation, or change any terms of the contract.

(b) A carrier may not claim the benefit as against a shipper or consignee of, and a shipper or consignee shall not be bound by, any tariff term that is incorporated by reference under this section unless the carrier has complied with the requirements of paragraph (a) of this section.

(c) The disclosure requirements established by this section preempt any State requirements on the same subject, for tariff terms that are incorporated by reference into the bill of lading or other document embodying the contract of carriage for the transportation of household goods.

**§ 1310.5 Availability of tariffs at carrier offices.**

(a) Each carrier shall maintain, at its principal office, a complete set of its effective tariffs and those to which it is a party.

(b) Each carrier shall also maintain some or all of its tariffs at its other business offices, upon request. Carriers shall provide information regarding all locations where tariffs may be viewed.

(c) At all points where tariffs are maintained, they shall be made available for inspection by any person during the carrier's normal business hours. The tariffs shall be accessible and readable. The carrier shall also display, in a conspicuous place in those locations, a notice, in large print, which contains a statement that the tariffs are available for public inspection.

(d) At all other carrier business offices, the carrier shall display a notice advising the public of the location of the nearest available tariff. The notice

## § 1310.6

shall be in large print and posted in a conspicuous place. In addition, the carrier shall, upon request, make its tariffs available at that location as soon as possible but not later than within 20 days, or provide the sought information orally if satisfactory to the requestor.

(e) Any publication referred to in a tariff must be maintained with that tariff.

(f) If any tariff maintained pursuant to paragraph (b) of this section has not been used for a substantial length of time, the availability of that tariff, including its reissues, may be discontinued at that office until such time as it is again requested. It shall then be made available within 20 days.

### § 1310.6 Furnishing copies of tariff publications.

(a) Copies of tariffs, specific tariff provisions or tariff subscriptions shall be provided upon request to any interested person.

(b) Except for providing to shippers the full text of tariff terms incorporated by reference into the bill of lading or other document embodying the contract of carriage for the transportation of household goods, as described in § 1310.4(a)(1), carriers may assess charges for furnishing copies of tariff publications to interested persons. If a charge is made, the charge must be reasonable, and identical for the same publications and delivery service.

The carrier shall keep such tariffs available for public inspection and shall make such tariffs available to subscribers as required in this part.

(c) *Other information.* Provisions for information purposes only may be included in a tariff, provided they are clearly identified as such. Such provisions may include rates and service terms covering transportation not subject to regulation by the Board, and advertising and promotional material.

(d) *Effect of filing.* The tender of a tariff and its receipt and acceptance by the Board do not relieve a carrier of liability for violations of the Act, other laws, the Board's regulations, or any decision of the Board or a court, or have any effect on the rights of persons

### § 1312.3

to file complaints for substantive violations of the Act or the Board's regulations.

(e) *Tariff relief.* Relief from the provisions of this part may be sought. Requests for such relief shall be submitted in duplicate and accompanied by the appropriate fee (see 49 CFR part 1002). Packages containing applications for relief shall be prominently marked "SPECIAL TARIFF AUTHORITY APPLICATION." The application shall cite all pertinent tariff matter and shall provide complete information regarding applicant's justification, purpose and manner of relief sought.

(f) *Invalidation of tariffs.* Tariffs that violate section 13702 of the Act, or a regulation of the Board carrying out that section, may be invalidated by the Board. When a tariff is invalidated, the party that filed it will be furnished a written explanation of the reasons for such action. Tariffs issued in lieu of invalidated tariffs shall so state.

### § 1312.3 Tariff contents and standards; Essential criteria.

(a) *Contents.* Tariffs filed with the Board must include an accurate description of the services offered to the public; must provide the specific applicable rates (or the basis for calculating the specific applicable rates) and service terms; and must be arranged in a way that allows for the determination of the exact rate(s) and service terms applicable to any given shipment (or to any given group of shipments).

(b) *Use of multiple tariffs.* All information necessary to determine applicable rates and service terms for a given shipment need not be contained in a single tariff, but if multiple tariffs are used to convey that information, the tariff containing the rates must make specific reference (by STB tariff designation) to all other tariffs required to determine applicable rates and service terms, and the carrier(s) party to the rates must participate in all of the tariffs so linked.

(c) *Clarity.* Tariff information must be presented in a way that facilitates the determination of the prices and services offered, and the related service terms. Ambiguous terms and complex methods of presentation shall not be used.

### 49 CFR Ch. X (10-1-00 Edition)

(d) *Explanations.* Reference marks and abbreviations, other than commonly used abbreviations, shall be explained either in the item in which they are used or in a separate item.

### § 1312.4 Filing of tariffs.

(a) *Filing requirements.* (1) Tariffs shall be filed in English with rates explicitly stated in U.S. dollars and cents. Two copies of each tariff publication shall be filed with the Board. Packages containing tariff filings should be prominently marked "TARIFF FILING" and addressed to: Section of Tariffs, Surface Transportation Board, 1925 K Street, NW., Washington, DC 20423-0001.

(2) A tariff filing must be accompanied by an authorized document of transmittal identifying each publication filed, and by the appropriate filing fee (see 49 CFR part 1002). Acknowledgment of Board receipt of a tariff filing can be obtained by enclosing a duplicate transmittal letter and a postage-paid, self-addressed return envelope. Each transmittal letter shall clearly indicate in the upper left-hand corner thereof:

- (i) The assigned alpha code of the issuing carrier or agent;
- (ii) The number of pages transmitted;
- (iii) The filing fee enclosed, the account number to be billed, or the credit card to be charged;
- (iv) The transmittal number if the filer utilizes transmittal numbers; and
- (v) If the filing fee is charged to a credit card, the credit card number and expiration date, and an authorized signature.

(b) *Paper size.* Tariffs shall be printed on paper not larger than 8½ x 11 inches.

### § 1312.5 Amendments to tariffs.

(a) *Manner of making changes.* An amendment is a change in, addition to, or cancellation of part of a tariff. Supplements are the tariff publications used to amend bound tariffs, and new or revised pages are the tariff publications normally used to amend looseleaf tariffs, although looseleaf tariffs can also be amended by supplements. Tariffs can also be canceled by new or reissued tariffs (see § 1312.7).

(b) *Supplements.* Supplements issued to amend a tariff shall be consecutively numbered. Each new supplement shall identify any supplement(s) that it cancels, and any supplement(s) that are still in effect. A tariff amendment published in a supplement may be carried forward to later supplements if it is identified as reissued without change from the supplement in which it was originally published.

(c) *Looseleaf pages.* Looseleaf pages to an original tariff shall be designated as "Original" (e.g., Original Title Page, Original Page 1, Original Page 2, etc.). Looseleaf pages issued to amend the tariff shall bear consecutive revision numbers and shall cancel the prior version(s) of the same page (e.g., 1st Revised Page 1 Cancels Original Page 1, 2nd Revised Page 1 Cancels 1st Revised Page 1, etc.). Additional original pages may also be issued to amend a tariff, by adding new numbered pages after the last numbered page, or by adding existing numbered pages with alphabetic suffixes (e.g., a page designated as Original Page 2-A could be added between pages 2 and 3, etc.). Each looseleaf tariff shall include a Check Sheet, a Correction Number Check Sheet, or some other method of determining the looseleaf pages issued to amend such tariff.

#### § 1312.6 Advance notice required.

(a) *Notice requirement.* Unless otherwise specifically authorized by the Board, tariffs must be filed with the Board on not less than the notice shown in paragraph (b) of this section. Notice means the number of days the publication is on file with the Board prior to its effective date(s). The date the publication is received by the Board counts as the first day of notice.

(b) *Length of notice.* A tariff may not become effective earlier than:

(1) Thirty days after filing for all collectively established tariff matter.

(2) Seven workdays after filing for independently established increased tariff matter.

(3) Upon filing for independently established new tariff matter, independently established reduced tariff matter, the addition or restoration of a carrier's participation in a tariff, a correction to the list of participating carriers

in a tariff (other than the cancellation of a carrier's participation), an extension of the expiration date of tariff matter, or a postponement of the effective date of proposed tariff matter.

(c) *Receipt of tariffs by the Board.* The Board will receive tariff filings between the hours of 8:30 A.M. and 5:00 P.M. Eastern Time on workdays. Tariff filings delivered to the Board on other than a workday, or after 5:00 P.M. on a workday, will be considered as received the next workday.

(d) *Definitions.* For the purposes of this section:

*Increased* means any tariff change that results in higher charges to the payer of freight charges or reduced service at the same rate;

*New* means an initial rate or other provision for a new service;

*Reduced* means any tariff change that results in lower charges to the payer of freight charges or expanded service at the same rate; and

*Workdays* means all days except Saturdays, Sundays and all Federal holidays observed in the District of Columbia.

[62 FR 19058, Apr. 18, 1997, as amended at 64 FR 5195, Feb. 3, 1999]

#### § 1312.7 STB tariff designation.

(a) *Format.* Every tariff shall show an authorized tariff designation consisting of:

(1) The characters "STB";

(2) The assigned alpha code of the carrier or agent issuing the tariff; and

(3)(i) The tariff number (selected by the carrier or agent) to distinguish that tariff from all other tariffs filed by the same issuing carrier or agent. Tariff numbers shall not exceed 5 numerical digits and may be followed by not more than 2 letter suffixes. Examples of tariff numbers are:

STB XXXX 100  
STB XX 8000-A  
STB XXXX 12345-AB

(ii) Suffixes may be used only to designate reissues of tariffs. As an example, a reissue of tariff 1000 could be designated 1000-A, a reissue of tariff 1000-A could be designated 1000-B, etc.

(b) *Alpha codes.* Alpha codes are assigned to carriers and tariff agents by

**§ 1312.8**

the National Motor Freight Traffic Association, Inc., 2200 Mill Road, Alexandria, VA 22314.

(c) *Fees for assignment.* Fees may be assessed for the assignment of codes, but may not exceed the processing costs.

(d) *Code listing.* A list of the assigned alphabetical codes, and the names of the carriers and agents to which they are assigned, as well as subsequent changes to the list, shall be submitted to the Board's Section of Tariffs.

**§ 1312.8 Identification of tariff publication.**

(a) Every tariff publication filed with the Board shall include:

- (1) The STB tariff designation;
- (2) The name of the issuing carrier or agent;
- (3) The name of the tariff; and
- (4) The issue and effective dates of the publication.

(b) If the publication contains matter effective on other than the general effective date, the notation (Except as Noted) shall be included with the general effective date.

**§ 1312.9 Statement of tariff application and other title page requirements.**

Every new or reissued tariff or supplement filed with the Board shall lead with a title page. The title page of each tariff or supplement shall include the expiration date of the tariff or supplement, if applicable. The title page of each tariff shall also provide the complete name and address of the issuing carrier or agent; a contact person and telephone number; the certificate or operating authority number, if applicable; and a succinct statement of territorial application, mode of serving carrier(s), type of rates, and description of tariff content. EXAMPLES:

(a) Local water carrier rates on FREIGHT, ALL KINDS from points in Alaska to points in the United States.

(b) Joint motor/water commodity rates in containerized service between interior points in the United States and ports in Puerto Rico and Hawaii; and governing rules.

**49 CFR Ch. X (10-1-00 Edition)**

**§ 1312.10 Notification of tariff changes and nature of changes.**

Every publication filed with the Board containing tariff changes shall clearly identify such changes and their nature (whether an increase or decrease in service, rates or transportation charges).

**§ 1312.11 Special notification for ordered matter.**

Every tariff publication containing matter filed in compliance with a Board decision or court order shall indicate in the publication the relevant decision or order, and as well the number of days' notice authorized or required.

**§ 1312.12 Posting requirements.**

(a) *General posting requirements.* (1) Each carrier shall maintain, at its principal office, a complete set of its tariffs (proposed and effective) and those to which it is a party.

(2) Each carrier shall also maintain some or all of its tariffs at other locations, as may be useful. Carriers shall provide information regarding all locations where tariffs may be viewed.

(3) At all points where tariffs are posted, they shall be made available for inspection by any person during the carrier's normal business hours. The tariffs shall be accessible and readable. The carrier shall also post, in a conspicuous place in those locations, a notice, in large print, which contains a statement that the tariffs are available for public inspection.

(4) At all other carrier business offices, the carrier shall display a notice advising the public of the location of the nearest available tariff. The notice shall be in large print and posted in a conspicuous place. In addition, the carrier shall, upon request, make particular tariffs available at that location as soon as possible but not later than within 20 days, or provide the sought information orally if satisfactory to the requestor.

(5) Any publication referred to in a tariff must be posted with that tariff.

(b) *Exception to the posting requirements.* If any tariff maintained pursuant to paragraph (a)(2) of this section has not been used for a substantial

length of time, the posting of that tariff, including its reissues, may be discontinued at that station until such time as a request is made to have it reposted. It shall then be reposted within 20 days.

**§ 1312.13 Furnishing copies of tariff publications.**

(a) *Definitions. Subscriber*, as used in this section, means any person (other than carrier participants in a tariff) that is voluntarily furnished, or that requests that it be furnished, one or more copies of a particular tariff with or without subsequent amendments or reissues of that tariff.

(b) *Sending new publications to subscribers.* (1) The publishing carrier or agent shall send each newly-issued tariff, supplement, or loose-leaf page as requested to each subscriber by first class mail, or other means requested in writing by the subscriber.

(2) Newly-issued tariffs, supplements, or loose-leaf pages shall be sent to each subscriber not later than the time the copies for official filing are sent to the Board.

(3) Carriers or agents may, if acceptable to a subscriber, furnish only specific portions of original tariffs and amendments affecting those portions.

(c) *Certification.* The letter of transmittal accompanying the copies filed with the Board shall contain the following certification:

I certify that compliance with 49 CFR 1312.13 has been made.

(d) *Charges.* (1) If any charge is made, the charge for copies of tariff publications sent to subscribers shall be reasonable, and identical for the same publications.

(2) No charge may be made (even for the cost of sending the publication) for any publication that is invalidated by the Board.

(e) *Notice of invalidation.* If a publication is invalidated, the subscribers shall be notified.

(f) *Alternative subscription services.* The service described in this section must be available to any subscriber requesting it; however, the requirement to offer such service does not preclude the offering of different services to subscribers requesting those services.

**§ 1312.14 Powers of attorney and concurrences.**

(a) *Authorization.* Rates and services of a carrier must be filed in a tariff issued in that carrier's name unless they are filed:

(1) In an agent's tariff when the carrier has executed a power of attorney authorizing that individual or entity to serve as its tariff agent; or

(2) In a tariff of another carrier through issuance of a concurrence to the latter carrier authorizing the first carrier's participation in joint rates and through routes.

(b) *Disclosure of authorization.* If two or more carriers execute powers of attorney to the same agent, it is not necessary for those carriers to exchange concurrences to participate in joint rates in that agent's tariffs. Powers of attorney and concurrences are not to be filed with the Board, but shall be provided to any person on request.

**§ 1312.15 Change of carrier or agent.**

(a) *Change in carrier.* When a carrier's name is lawfully changed, or a fiduciary assumes possession and control of a carrier's property, all affected tariffs must be amended to reflect the change. The amendments required by this paragraph shall be filed promptly and, if possible, prior to their effective date, but in no case later than 60 days thereafter. Regardless of the date the tariff is actually filed, the effective date for an amendment required by this paragraph is the date the event occurs.

(b) *Change of agent.* When a new agent is appointed to take over an agency, or when an alternate agent assumes the duties of the principal agent, each of the superseded agent's effective tariffs shall immediately be amended to reflect the change, bearing an effective date the same as the date of the transfer. In the case of a new agent, this may only occur after one or more of the participating carriers issues a power of attorney to the new agent, and revokes the previous power of attorney. At the same time, all affected tariffs will be amended to reflect the new powers of attorney, and all carriers who have not issued them must be canceled from the tariff.

**§ 1312.16 Substitution of service.**

If a water or motor carrier (hereafter referred to as Carrier A) desires to have the option of substituting the services of a carrier of a different transportation mode (hereafter referred to as Carrier B) for part of its movement of a shipment, it may do so if:

- (a) The shipment moves on the bill of lading that would be used if Carrier A were performing the service;
- (b) Carrier A assumes the responsibility for the lading while it is in the possession of Carrier B; and
- (c) Movement of the lading has been made prior to, or will be made subsequent to, the service performed by Carrier B.

AUTHORITY: 49 U.S.C. 721(a) and 10709.

SOURCE: 61 FR 68669, Dec. 30, 1996, unless otherwise noted.

**§ 1313.1 Scope; definition of terms.**

(a) This part addresses the provisions of 49 U.S.C. 10709 that require rail carriers to file with the Board a summary of each contract for the transportation of agricultural products (including grain, as defined in 7 U.S.C. 75 and products thereof) and that allow complaints to be filed with the Board regarding such contracts.

(b) The provisions of this part do not apply to any transportation that is exempted from the Board's contract regu-

lation pursuant to an exemption issued under 49 U.S.C. 10502 or former 49 U.S.C. 10505 (repealed effective January 1, 1996).

(c) For purposes of this part, the term contract means an agreement, including any amendment thereto, entered into by one or more rail carriers and one or more purchasers of rail services to provide specified transportation of agricultural products (including grain, as defined in 7 U.S.C. 75 and products thereof) under specified rates and conditions. The term amendment includes contract modifications agreed to by the parties.

(d) An amended contract is treated as a new contract under this part. Remedies are revived and review is again available, upon complaint.

**§ 1313.2 Contract summary filing requirement.**

(a) Rail carriers subject to the jurisdiction of the Surface Transportation Board under 49 U.S.C. 10501 must promptly file with the Board a summary of each contract entered into for the transportation of agricultural products.

(b) Contract summaries not in compliance with this part may be rejected by the Board. If a contract summary is rejected, it will be considered as not filed, and the carrier must promptly file a corrected contract summary to replace the rejected summary.

**§ 1313.3 Board review; contract disapproval.**

(a) Board review. (1) No later than 30 days after a contract summary is filed, the Board may, on complaint, begin a proceeding to review such contract on the grounds described in § 1313.9.

(2) If the Board begins a proceeding, it shall determine, within 30 days after the proceeding is commenced, whether the contract is in violation of 49 U.S.C. 10709.

(b) Contract disapproval. If the Board finds that the contract is in violation of 49 U.S.C. 10709, it will:

- (1) Disapprove the contract; or
- (2) Where the Board finds unreasonable discrimination, in accordance with 49 U.S.C. 10709(g)(2)(B)(i), order the contracting carrier(s) to provide to the complainant(s) rates and service

substantially similar to those contained in the contract at issue, with such differences in terms and conditions as are justified by the evidence.

(c) *Applicable rates/charges if a contract is disapproved.* If the Board disapproves a contract (or contract amendment), the appropriate non-contract rates/charges (or the contract provisions otherwise in effect) will be applicable.

**§ 1313.4 Filing procedures and formats for contract summaries.**

(a) *Filing of Summaries.* (1) Two copies of each contract summary, containing the applicable information specified in §§ 1313.6, 1313.7, or 1313.8, as appropriate, must be filed with the Board as soon as possible, but no longer than 7 days after the date of the contract (or contract amendment).

(2) The outside envelope or wrapper containing one or more contract summaries must be prominently marked "Rail Contract Summary" and addressed to: Tariffs Branch, Surface Transportation Board, Washington, DC 20423.

(3) A transmittal letter identifying the submitted publication(s), and the name and telephone number of a contact person, must accompany each filing of one or more contract summaries. Each transmittal letter shall clearly indicate in the upper left-hand corner thereof:

(i) The assigned alpha code of the filing carrier;

(ii) The number of summaries transmitted;

(iii) The filing fee enclosed, the account number to be billed, or the credit card to be charged;

(iv) The transmittal number if the filer utilizes transmittal numbers; and

(v) If the filing fee is charged to a credit card, the information must include the credit card number and expiration date, and an authorized signature.

(b) *Contract summary title page.* The title page of each contract summary must contain only the following information:

(1) In the upper right corner, the contract summary number (see paragraph (c) of this section), followed by the

amendment number if an amended contract summary.

(2) In the center of the page, the filing carrier's name, followed by the words "CONTRACT SUMMARY" or "AMENDED CONTRACT SUMMARY", as applicable, in large print.

(3) Date of contract and its effective date.

(4) In the center lower portion, the individual submitting the filing, and the name of the individual(s) for service of complaints (if not the same individual). If not otherwise noted, a complainant may rely on service to the individual submitting the filing.

(c) *Contract summary numbering system.* (1) The contract summary identification number must include the word "STB," the standard carrier alphabetic code for the filing railroad (limited to four letters), the letter "C," and a sequential number, with each separated by a hyphen. The following is an example: the 357th contract summary filed by the Conrail would have the following identification number: "STB-CR-C-357."

(2) At its option, the carrier may issue contract summaries with non-consecutive numbers if it assigns blocks of numbers for specific uses. An index to the blocks of reserved numbers shall be filed with the Board.

(d) *Format requirements for contract summary information.* (1) The contract summary must enumerate and have each item required in §§ 1313.6, 1313.7 or 1313.8 of this part, as applicable, completed. When the item does not pertain to the contract, the term "Not Applicable" ("NA") shall be used.

(2) Changes in prior contract summaries must be underscored and must be followed by the words "addition," "deletion," "extension," "cancellation," or other appropriate descriptive phrase in parentheses. If the change to the contract is only in confidential matter, a statement to that effect must be made in the amended contract summary and must indicate the particular feature to which the change applies (i.e., rate, special feature, etc.). If "not applicable" is permitted in the original summary under §§ 1313.6 through 1313.8 of this part, the amended summary may use "not applicable"

§ 1313.5

49 CFR Ch. X (10-1-00 Edition)

with a notation that a change pertained only to confidential data.

(3) Amended contract summaries may not substitute phrases such as “not applicable” or “no change” where disclosure was required in the original contact summary (such as in the commodity description); amended contract summaries must set forth all required non-confidential terms in the contract, whether amended or not.

**§ 1313.5 Contract and contract summary availability.**

(a)(1) A contract summary filed under these rules shall be made available for public inspection in the Tariffs Branch of the Surface Transportation Board.

(2) A contract summary filed under these rules also shall be made available to the carrier(s) participating in the contract, upon reasonable request.

(b) Where not already required by § 1313.10(a)(5) of this part, the contract for which a summary is filed under these rules shall be provided immediately to the Board, upon request, for its use in carrying out its functions under the statute.

**§ 1313.6 Contract summary for agricultural commodities.**

### § 1313.9 Grounds for complaints and contract review.

(a) A complaint may be filed against a contract covered by this part:

(1) By any shipper on the ground that such shipper individually will be harmed because the contract unduly impairs the ability of the contracting rail carrier or carriers to meet their common carrier obligations to the complainant under 49 U.S.C. 11101;

(2) By a port on the ground that such port individually will be harmed because the contract will result in unreasonable discrimination against such port; and

(3) By a shipper of agricultural commodities on the ground that such ship-

per individually will be harmed because:

(i) The rail carrier has unreasonably discriminated by refusing to enter into a contract with such shipper for rates and services for the transportation of the same type of commodity under similar conditions to the contract at issue, and that such shipper was ready, willing, and able to enter into such a contract at a time essentially contemporaneous with the period during which the contract at issue was offered; or

(ii) The contract constitutes a destructive competitive practice.

(b) *Unreasonable discrimination,* for purposes of paragraph (a)(3)(i) of this section, has the same meaning as the term has under 49 U.S.C. 10741.

### § 1313.10 Procedures for complaints and discovery.

(a) *Complaints, discovery petitions, replies, and appeals—(1) Initial filing.* Complaints must be filed by the 18th day after the contract summary is filed. Any discovery petition must accompany the complaint.

(2) *Complaint.* A complaint must contain the correct, unabbreviated names and addresses of the complainant(s) and defendant(s). The complainant must set out the statutory provisions under which it has standing to file a complaint, and its reasons for requesting that the Board find the challenged contract unlawful.

(3) *Discovery petition.* A discovery petition must note on the front page "Petition for Discovery of Rail Contract" and note the contract (and any applicable amendment) number. It should provide the following information:

(i) *Standing—grounds.* The ground upon which the petitioner's complaint is based under § 1313.9.

(ii) *Standing—affected party.* Pertinent information regarding the petitioner's actual or potential participation in the relevant market, including:

(A) The nature and volume of petitioner's relevant business.

(B) The relevant commodities that petitioner ships or receives.

(C) Comparisons of the petitioner's commodities, locations of shipping facilities and serving carriers, actual or potential traffic patterns and serving

carrier(s), with the traffic patterns and serving carrier(s) identified in the contract summary. State whether petitioner is a consignor or consignee.

(D) The petitioner's ability to ship the commodity in question at a time generally simultaneous with the challenged contract.

(E) The potential effect of the contract on the petitioner's relevant business.

(F) Any additional supporting information, including prior negotiations, if any.

(iii) *Relevance.* The relevance of the information sought to the petitioner's challenge to the contract.

(iv) *Nexus.* Where the complaint challenges a carrier's ability to perform its common carrier obligation, the nexus between the information sought and the common carrier obligation of the contracting carrier(s).

(4) *Service of pleadings.* The complainant must certify that 2 copies of the complaint, and discovery petition if filed, have been sent to the contracting carrier(s) either by hand, express mail, or other overnight delivery service the same day as filed at the Board. The contracting carrier shall in turn serve the contracting shipper with a copy of the complaint and petition. Replies shall be served in the same manner on complainant/petitioner.

(5) *Submission of contract.* Immediately upon the filing of a complaint, the rail carrier filing the contract summary shall forward to the Board, by hand, express mail, or other overnight delivery service, the subject contract or amended contract.

(6) *Replies.* Replies to the complaint/petition are due within 5 days from the date of filing of the complaint/petition, and in no event later than noon on the 23rd day following filing of the contract summary.

(7) *Copies.* An original and 10 copies of complaints, petitions and replies must be filed with the Board in a package marked "Confidential Rail Contract Material".

(8) *Discovery appeals.* If action on a petition for discovery is taken under delegated authority, that action may be appealed to the Board, subject to the following:

(i) An appeal must be received within 2 days of the initial decision, but in no event later than the 28th day after the contract summary is filed.

(ii) The appeal must be marked "Appeal of Delegated Authority Action Regarding Rail Contract Discovery".

(iii) Telegraphic notice or its equivalent must be given to the opposing parties.

(iv) Replies to the appeal must be filed within one day after the appeal is filed.

(v) An original and 10 copies of appeals and replies must be filed with the Board.

(9) *Furnishing of information.* If discovery is granted, the carrier must furnish the required information to the petitioner by the 1st working day after the Board issues its decision.

(b) *Informal discovery.* (1) Prior to filing a petition for formal discovery under paragraph (a) of this section, a petitioner may request discovery from the carrier.

(2) The carrier must promptly grant or deny the request.

(3) Agreements between carriers and shippers for informal discovery are permitted under these rules.

(c) *Confidentiality.* If confidential contract data are filed with the Board in a pleading, the party filing these data should submit them as a separate package, clearly marked on the outside "Confidential Material Subject to Protective Order." The order in paragraph (d) of this section applies to the parties specified in the order who receive confidential information through proceedings before the Board or through informal discovery.

(d) *Protective order.* Petitioner and carriers, and their duly authorized agents, shall limit to the contract complaint proceeding the use of contract information or other confidential commercial information which may be revealed in the contract, the complaint, reply, or in any other pleading relating to the contract. This restriction shall be a condition to release of any contract term to a petitioner/complainant and shall operate similarly on a carrier

in possession of confidential information which may be contained in a complaint, petition for discovery, or request for informal disclosure. Any information pertaining to parties to the contract or subject to the contract (including consignors, consignees and carriers), or pertaining to the terms of the contract, or relating to the petitioner's/complainant's confidential commercial information, must be kept confidential. Neither the information nor the existence of the information shall be disclosed to third parties, except for: consultants or agents who agree, in writing, to be bound by this regulation; information which is publicly available; information which, after receipt, becomes publicly available through no fault of the party seeking to disclose the information after it has become publicly available, or is acquired from a third party free of any restriction as to its disclosure. The petitioner/complainant or carrier must take all necessary steps to assure that the information will be kept confidential by its employees and agents. No copies of the contract terms or other confidential information are to be retained by the parties not originally privy to the data subsequent to the termination of the proceeding.

(e) *Contract review proceeding.* If the Board institutes a proceeding to review the contract, the complainant's case-in-chief is due 9 days after the institution of the proceeding, but no later than 39 days after the filing of the contract summary. Replies are due 16 days after the institution of the proceeding, but no later than 46 days after the filing of the contract summary.

(a) Rate bureaus must comply with the terms of their agreements, as approved by the Board. Failure to do so will result in lack of immunity for that activity.

(b) The bureaus are required to maintain detailed minutes of all meetings where immunized matters are discussed. The bureaus will be subject to withdrawal of their immunity for serious continuing violations of Board standards, and individual tariff publications will be subject to rejection, suspension, or investigation for improprieties in the rate bureau process.

(c) Absent Board approval, no other changes may be made in any approved agreement.

(d) For the purposes of the statute, the following definitions shall apply:

(1) A *general increase* is a proposed general adjustment of substantially all the rates published in a rate bureau's tariff(s).

### § 1420.1 Annual reports of motor carriers of property, motor carriers of household goods, and dual property carriers.

(a) *Annual Report Form M.* All class I and class II common and contract carriers of property, including household goods and dual property motor carriers, must file Motor Carrier Annual Report Form M (Form M). Carriers must file the annual report on or before March 31 of the year following the year to which it relates. For classification criteria, see §1420.2.

(b) *Quarterly Report Form QFR.* All class I common motor carriers of property and class I household goods motor carriers must file Motor Carrier Quarterly Report Form QFR (Form QFR). The quarterly accounting periods end on March 31, June 30, September 30, and December 31. The quarterly reports must be filed within 30 calendar days after the end of the reporting quarter.

(c) *Where to file reports.* Carriers must file the quarterly and annual reports with the Bureau of Transportation Statistics at the address in §1420.6. You can obtain blank copies of the report forms from the Bureau of Transportation Statistics.

[64 FR 13921, Mar. 23, 1999]

### § 1420.2 Classification of carriers—motor carriers of property, household goods carriers, and dual property carriers.

(a) Common and contract motor carriers of property are grouped into the following three classes:

*Class I.* Carriers having annual carrier operating revenues (including interstate and intrastate) of \$10 million or more after applying the revenue deflator formula in Note A.

*Class II.* Carriers having annual carrier operating revenues (including interstate and intrastate) of at least \$3 million but less than \$10 million after applying the revenue deflator formula in Note A.

*Class III.* Carriers having annual carrier operating revenues (including interstate and intrastate) of less than \$3 million after applying the revenue deflator formula in Note A.

(b)(1) The class to which any carrier belongs shall be determined by annual carrier operating revenues (excluding revenues from private carriage, compensated intercorporate hauling, and leasing vehicles with drivers to private carriers) after applying the revenue deflator formula in Note A. Upward and downward classification will be effected as of January 1 of the year immediately following the third consecutive year of revenue qualification.

(2) Any carrier which begins new operations by obtaining operating authority not previously held or extends its existing authority by obtaining additional operating rights shall be classified in accordance with a reasonable estimate of its annual carrier operating revenues after applying the revenue deflator formula shown in Note A.

(3) When a business combination occurs such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective as of January 1 of the next calendar year on the basis of the combined revenues for the year when the combination occurred after applying the revenue deflator formula shown in Note A.

(4) Carriers must notify the Bureau of Transportation Statistics (BTS) of any change in classification or any change in annual operating revenues that would cause a change in classification. The carrier may request a waiver

### § 1420.3

or an exception from these regulations in unusual or extenuating circumstances, where the classification process will unduly burden the carrier, such as partial liquidation or curtailment or elimination of contracted services. The request must be in writing, specifying the conditions justifying the waiver or exception. BTS will notify the carriers of any change in classification.

(5) Carriers not required to file an Annual Report Form M may be re-

quired to file the Annual Carrier Classification Survey Form. All carriers will be notified of any classification changes.

NOTE A: Each carrier's operating revenues will be deflated annually using the Producers Price Index (PPI) of Finished Goods before comparing those revenues with the dollar revenue limits prescribed in paragraph (a) of this section. The PPI is published monthly by the Bureau of Labor Statistics. The formula to be applied is as follows:

$$\text{Current year's annual operating revenues} \times \frac{1994 \text{ average PPI}}{\text{Current year's average PPI}} = \text{Adjusted annual operating revenues}$$

[52 FR 10383, Apr. 1, 1987, as amended at 59 FR 5111, Feb. 3, 1994; 59 FR 49848, Sept. 30, 1994. Redesignated at 63 FR 52193, Sept. 30, 1998, and amended at 64 FR 13921, 13922, Mar. 23, 1999]

#### § 1420.3 Classification of carriers—motor carriers of passengers.

(a) Common and contract carriers of passengers subject to the Interstate Commerce Act are grouped into the following two classes:

Class I—Carriers having average annual gross transportation operating revenues (including interstate and intrastate) of \$5 million or more from passenger motor carrier operations after applying the revenue deflator formula as shown in the Note.

Class II—Carriers having average annual gross transportation operating revenues (including interstate or intrastate) of less than \$5 million from passenger motor carrier operations after applying the revenue deflator formula as shown in the Note.

(b)(1) The class to which any carrier belongs shall be determined by annual carrier operating revenues after applying the revenue deflator formula as shown in the Note. Upward and downward reclassification will be effected as of January 1 of the year immediately following the third consecutive year of revenue qualification.

(2) Any carrier which begins new operations (obtains operating authority not previously held) or extends its existing authority (obtains additional op-

erating rights) shall be classified in accordance with a reasonable estimate of its annual carrier operating revenues after applying the revenue deflator formula shown in the Note.

(3) When a business combination occurs, such as a merger, reorganization, or consolidation, the surviving carrier shall be reclassified effective as of January 1 of the next calendar year on the basis of the combined revenues for the year when the combination occurred after applying the revenue deflator formula shown in the Note.

(4) Carriers shall notify the Commission of any change in classification or when their annual operating revenues exceed the Class I limit by writing to the Bureau of Accounts, Interstate Commerce Commission, Washington, DC 20423. In unusual circumstances where the classification regulations and reporting requirements will unduly burden the carrier, the carrier may request from the Commission a waiver from these regulations. This request shall be in writing specifying the conditions justifying the waiver. The Commission then shall notify carriers of any change in classification or reporting requirements.

(c) For classification purposes, the Commission shall publish in the FEDERAL REGISTER annually an index number which shall be used for adjusting gross annual operating revenues. The index number (deflator) is based on the Producer Price Index of Finished Goods

## § 1420.8

and is used to eliminate the effects of inflation from the classification process.

NOTE: Each carrier's operating revenues will be deflated annually using the Producers

Price Index (PPI) of Finished Goods before comparing them with the dollar revenue limits prescribed in paragraph (a) of this section. The PPI is published monthly by the Bureau of Labor Statistics. The formula to be applied is as follows:

$$\text{Current year's annual operating revenues} \times \frac{\text{1986 average PPI}}{\text{Current year's average PPI}} = \text{Adjusted annual operating revenues}$$

### § 1420.4 Annual and quarterly reports of Class I carriers of passengers.

(a) All Class I motor carriers of passengers shall complete and file Motor Carrier Quarterly and Annual Report Form MP-1 for Motor Carriers of Passengers (Form MP-1). Other than Class I carriers are not required to file Form MP-1.

(b) Motor Carrier Quarterly and Annual Report Form MP-1 shall be used to file both quarterly and annual selected motor carrier data. The annual accounting period shall be based either (1) on the 31st day of December in each year, or (2) an accounting year of thirteen 4-week periods ending at the close of the last 7 days of each calendar year. A carrier electing to adopt an accounting year of thirteen 4-week periods shall file with the Commission a statement showing the day on which its accounting year will close. A subsequent change in the accounting period may not be made except by authority of the Commission. The quarterly accounting period shall end on March 31, June 30, September 30, and December 31. The quarterly report shall be filed within 30 days after the end of the reporting quarter. The annual report shall be filed on or before March 31 of the year following the year to which it relates.

(c) The quarterly and annual report shall be filed in duplicate to The Bureau of Accounts, Interstate Commerce Commission, Washington, DC 20423. Copies of Form MP-1 may be obtained from the Bureau of Accounts.

[52 FR 20400, June 1, 1987. Redesignated at 63 FR 52193, Sept. 30, 1998]

### § 1420.5 Records.

Books, records and carrier operating documents shall be retained as prescribed in 49 CFR part 1220, Preservation of Records.

[52 FR 10383, Apr. 1, 1987. Redesignated at 63 FR 52193, Sept. 30, 1998]

### § 1420.6 Address.

The following address must be used by motor carriers when submitting a report, requesting an exemption from filing a report, or requesting an exemption from public release of a report: Bureau of Transportation Statistics, U.S. Department of Transportation, K-27, 400 Seventh St., SW., Washington, DC 20590. This address may also be used for general correspondence regarding the data collection program described in this section.

[64 FR 13923, Mar. 23, 1999]

### § 1420.8 Requests for exemptions from filing.

(a) *In General.* This section governs requests for exemptions from filing of reports required under § 1420.1.

(b) *Criteria.* The Bureau of Transportation Statistics (BTS) may grant a request upon a proper showing that the exemption is necessary to preserve confidential business information that is not otherwise publicly available. Information is considered to be confidential when:

(1) Disclosure of the information in the carrier's report would be likely to cause substantial harm to the carrier's competitive position; or

(2) Disclosure of information in the report would be likely to impair protectable government interests.

**§ 1420.9**

(c) *Contents of a request.* The contents of a request for an exemption from filing must contain, at a minimum, the contents that are required for a request for an exemption from public release contained in §1420.9(c). A carrier's request may include any other grounds as to why the request should be granted.

(d) *When requests are due.* The timing of a request for an exemption from filing is the same as the timing for a request for an exemption from public release contained in §1420.9(d). The table below summarizes report and request due dates.

Report	Report due by	Request due by
Annual Form M .....	March 31 .....	March 31
First Quarter Form QFR .....	April 30 .....	March 31
Second Quarter Form QFR .....	July 31 .....	March 31
Third Quarter Form QFR .....	October 31 .....	March 31
Fourth Quarter Form QFR .....	January 31 .....	March 31

(e) *Decision to grant or deny a request.*

(1) A request will be denied if it fails to provide all of the supporting information required in paragraph (c) of this section or if the supporting information is insufficient to establish that information in the carrier's report meets the criteria in paragraph (b) of this section.

(2) BTS will grant or deny each request within a reasonable period of time. BTS will notify the carrier of its decision. The decision by BTS shall be administratively final.

(f) *Pendency.* While a request is pending, the carrier is required to submit any reports required under §1420.1.

(g) *Period of exemptions.* If a request for an exemption under this section is granted, the carrier will be exempt from the reporting requirements of §1420.1 for a period of three reporting years.

(h) *Modification of a decision to grant a request.* If a request is granted it remains in effect in accordance with its terms, unless modified by a later finding that the decision was clearly erroneous. If BTS believes such a finding should be made, BTS will notify the requesting carrier in writing of the reasons for the modification. The carrier may seek reconsideration of the modification.

[64 FR 13922, Mar. 23, 1999]

**§ 1420.9 Requests for exemptions from public release.**

(a) *In General.* This section governs requests for exemptions from public release of reports filed under §1420.1.

(b) *Criteria.* The Bureau of Transportation Statistics (BTS) will grant a request upon a proper showing that the carrier is not a publicly held corporation or that the carrier is not subject to financial reporting requirements of the Securities and Exchange Commission, and that the exemption is necessary to avoid competitive harm and to avoid the disclosure of information that qualifies as trade secret or privileged or confidential information under 5 U.S.C. 552(b)(4). Information is considered to be confidential when:

(1) Disclosure of the information in the carrier's report would be likely to cause substantial harm to the carrier's competitive position; or

(2) Disclosure of information in the report would be likely to impair protectable government interests.

(c) *Contents of a request.* A request for an exemption from public release must contain information supporting the claim. While the supporting information may contain opinions, the request must consist of objective data to the extent possible. General or nonspecific assertions or analysis will be insufficient to support a request if BTS is unable to find that the criteria are met. The supporting information must show:

(1) That the information claimed to be confidential is a trade secret, or

§ 1420.9

commercial or financial information that is privileged or confidential.

(2) Measures taken by the carrier to ensure that the information has not been disclosed or otherwise made available to any person, company, or organization other than the carrier.

(3) Insofar as is known by the carrier, the extent to which the information has been disclosed, or otherwise become available, to persons other than the carrier, and why such disclosure or availability does not compromise the confidential nature of the information.

(4) If the carrier asserts that disclosure would be likely to result in substantial competitive harm, what the harmful effects of disclosure would be, why the effects should be viewed as substantial, and the causal relationship between the effects and disclosure.

(5) If the carrier asserts that disclosure would be likely to impair protectable government interests, what the effects of disclosure are likely to be and why disclosure is likely to impair such interests.

(d) *When requests are due.*

(1) Requests for an exemption under this section may be made at any time during the year. However, a request will be deemed applicable to only those reports due on or after the date the request is received. Requests received after a report's due date will only be considered for the following year's report.

(2) A request will be deemed received on the date the request is physically received or, if it is sent by mail, on the date it is postmarked.

(3) BTS will only allow a late request if there are extenuating circumstances and the carrier gives adequate notice

within a reasonable time of the extenuating circumstances.

(4) A carrier submitting a request relating to the annual report can also request that it cover the quarterly reports for the upcoming year. In this case BTS will decide both requests at the same time. Requests covering the quarterly reports must be received by the due date of the annual report which relates to the prior year. The table in paragraph (e) of this section summarizes report, request, and decision due dates.

(e) *Decision to grant or deny a request.*

(1) After each due date of each annual report specified in §1420.1, BTS will publish a notice in the FEDERAL REGISTER requesting comments on any requests received under this section that are valid and pending.

(2) A request will be granted only if it provides all of the supporting information required in paragraph (c) of this section and if the supporting information is sufficient to establish that information in the carrier's report meets the criteria in paragraph (b) of this section.

(3) If the carrier fails to comply with the timing requirements of paragraph (d) of this section, the claim for confidentiality will be waived unless BTS is notified of extenuating circumstances before the information is disclosed to the public and BTS finds that the extenuating circumstances warrant consideration of the claim.

(4) BTS will grant or deny each request no later than 90 days after the request's due date as defined in paragraph (d) of this section. The decision by BTS shall be administratively final. The table below summarizes report, request, and decision due dates.

Report	Report due	Request due	Decision due
Annual Form M .....	March 31 .....	March 31 .....	June 30
First Quarter Form QFR .....	April 30 .....	March 31 .....	June 30
Second Quarter Form QFR .....	July 31 .....	March 31 .....	June 30
Third Quarter Form QFR .....	October 31 .....	March 31 .....	June 30
Fourth Quarter Form QFR .....	January 31 .....	March 31 .....	June 30

(5) If a request is granted, BTS will notify carrier of that decision and of any appropriate limitations.

(6) If a request for confidentiality is denied, BTS will notify the carrier of

that decision and that the information will be made available to the public not less than ten working days after the carrier has received notice of the

## § 1420.10

denial. The notice will specify the reasons for denying the request.

(f) *Pendency.* A request is deemed pending from the date it is received by BTS until it is granted or denied by BTS. BTS will not release publicly, unless otherwise required by law, any report for which a valid request for an exemption from public release is pending.

(g) *Period of exemptions.* If a request for an exemption under this section is granted, BTS will not publicly release the reports covered by the granted exemption, unless otherwise required by law, for a period of three years from the report's due date.

(h) *Modification of a decision to grant a request.* If a request is granted it remains in effect in accordance with its terms, unless modified by a later finding that the decision was clearly erroneous. If BTS believes such a finding should be made, BTS will notify the requesting carrier in writing of the reasons for the modification and that the carrier's report will be made available to the public in not less than ten working days from the date of receipt of notice under this paragraph. The carrier may seek reconsideration of the modification.

## § 1420.10 Public release of motor carrier of property data.

(a) *In general.* Unless other provided in this section, the data contained in a report filed under §1420.1 shall be made publicly available, but no sooner than the due date for the report.

(b) *Exceptions relating to exemptions from public release.*

(1) If a request for an exemption from public release is pending under §1420.9, BTS will not publicly release the reports covered by the request until at

least the time that a decision to grant or deny the request is made.

(2) If a carrier is granted an exemption from public release under §1420.9, BTS will not publicly release the reports covered by the granted exemption for a period of three years from the report's due date.

(c) *Other exceptions.* Notwithstanding any other provision of this part, information may be released:

(1) If the data are included in aggregate industry statistics that do not identify the individual carrier;

(2) To other components of the Department of Transportation for their internal use only;

(3) If required by law;

(4) With the consent of the carrier filing the report; or

(5) To contractors, if necessary for the performance of a contract with BTS.
