SECTION 1. – GENERAL TERMS AND CONDITIONS

GPO CONTRACT TERMS: Any contract which results from this Invitation for Bid will be subject to the applicable provisions, clauses, and supplemental specifications of GPO Contract Terms (GPO Publication 310.2, effective December 1, 1987 (Rev. 1-18)) and GPO Contract Terms, Quality Assurance through Attributes Program for Printing and Binding (GPO Publication 310.1, effective May 1979 (Rev. 8-02)).

QUALITY ASSURANCE LEVELS AND STANDARDS: The following levels and standards shall apply to these specifications –

Product Quality Levels:

(a) Printing Attributes (page related) – Level II.
(b) Finishing Attributes (item related) – Level II.

Inspection Levels (from ANSI/ASQC Z1.4):

(a) Non-destructive Tests – General Inspection Level I.
(b) Destructive Tests – Special Inspection Level S-2.

Specified Standards: The specified standards for the attributes requiring them shall be –

<table>
<thead>
<tr>
<th>Attribute</th>
<th>Specified Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>P-7. Type Quality and Uniformity</td>
<td>O.K. Press Sheets</td>
</tr>
<tr>
<td>P-8. Halftone Match (Single and Double Impression)</td>
<td>O.K. Press Sheets</td>
</tr>
</tbody>
</table>

Special Instructions: In the event that inspection of press sheets is waived by the Government, the following listed alternate standards (in order of precedence) shall become the Specified Standards –

P-7. O.K. Proofs; Average Type Dimension; Electronic Media.
P-8. O.K. Proofs; Electronic Media.
P-10. O.K. Proofs; Electronic Media.

OPTION TO EXTEND THE TERM OF THE CONTRACT: The Government has the option to extend the term of this contract for a period of 12 months by written notice to the contractor not later than 30 days before the contract expires. If the Government exercises this option, the extended contract shall be considered to include this clause, except, the total duration of the contract may not exceed five (5) years as a result of, and including, any extension(s) added under this clause. Further extension may be negotiated under the “EXTENSION OF CONTRACT TERM” clause. See also “ECONOMIC PRICE ADJUSTMENT” for authorized pricing adjustment(s).

EXTENSION OF CONTRACT TERM: At the request of the Government, the term of any contract resulting from this solicitation may be extended for such period of time as may be mutually agreeable to the GPO and the contractor.
ECONOMIC PRICE ADJUSTMENT: The pricing under this contract shall be adjusted in accordance with this clause, provided that in no event will any pricing adjustment be made that would exceed the maximum permissible under any law in effect at the time of the adjustment. There will be no adjustment for orders placed during the first period specified below. Pricing will thereafter be eligible for adjustment during the second and any succeeding performance period(s). For each performance period after the first, a percentage figure will be calculated as described below and that figure will be the economic price adjustment for that entire next period. Pricing adjustments under this clause are not applicable to reimbursable postage or transportation costs, or to paper, if paper prices are subject to adjustment by separate clause elsewhere in this contract.

For the purpose of this clause, performance under this contract will be divided into successive periods. The first period will extend from Date of Award to April 30, 2020, and the second and any succeeding period(s) will extend for 12 months from the end of the last preceding period, except that the length of the final period may vary. The first day of the second and any succeeding period(s) will be the effective date of the economic price adjustment for that period.

Pricing adjustments in accordance with this clause will be based on changes in the seasonally adjusted “Consumer Price Index For All Urban Consumers – Commodities Less Food” (Index) published monthly in the CPI Detailed Report by the U.S. Department of Labor, Bureau of Labor Statistics.

The economic price adjustment will be the percentage difference between index averages as specified in this paragraph. An index called the variable index will be calculated by averaging the monthly indexes from the 12-month interval ending three (3) months prior to the beginning of the period being considered for adjustment. This average is then compared to the average of the monthly indexes for the 12-month interval ending January 31, 2019, called the base index. The percentage change (plus or minus) of the variable index from the base index will be the economic price adjustment for the period being considered for adjustment.

The Government will notify the contractor by contract modification specifying the percentage increase or decrease to be applied to invoices for orders placed during the period indicated. The contractor shall apply the percentage increase or decrease against the total price of the invoice less reimbursable postage or transportation costs and separately adjusted paper prices. Payment discounts shall be applied after the invoice price is adjusted.

PREAWARD SURVEY: In order to determine the responsibility of the prime contractor or any subcontractor, the Government reserves the right to conduct an on-site preaward survey at the contractor's/subcontractor's facility or to require other evidence of technical, production, managerial, financial, and similar abilities to perform, prior to the award of a contract.

As part of the financial determination, the contractor in line for award may be required to provide one or more of the following financial documents:

1) Most recent profit and loss statement
2) Most recent balance sheet
3) Statement of cash flows
4) Current official bank statement
5) Current lines of credit (with amounts available)
6) Letter of commitment from paper supplier(s)
7) Letter of commitment from any subcontractor

These documents will be reviewed to validate that adequate financial resources are available to perform the contract requirements. Documents submitted will be kept confidential and used only for the determination of responsibility by the Government. Failure to provide the requested information, in the time specified by the Government, may result in the Contracting Officer not having adequate information to reach an affirmative determination of responsibility.
POSTAWARD CONFERENCE: Unless waived by the Contracting Officer, immediately after award, the total requirements of the job as indicated in these specifications will be reviewed by Government representatives with the contractor’s representatives at the U.S. Government Publishing Office, Washington, DC. (At the option of the Government, the postaward conference may be conducted via teleconference.)

ASSIGNMENT OF JACKET, PURCHASE ORDER, AND PRINT ORDER NUMBERS: A GPO jacket number will be assigned and a purchase order issued to the contractor to cover work performed. The purchase order will be supplemented by an individual print order for each job placed with the contractor. The print order, when issued, will indicate the quantity to be produced and any other information pertinent to the particular order.

ORDERING: Items to be furnished under the contract shall be ordered by the issuance of print orders by the Government. Orders may be issued under the contract from Date of Award through April 30, 2020, plus for such additional period(s) as the contract is extended. All print orders issued hereunder are subject to the terms and conditions of the contract. The contract shall control in the event of conflict with any print order. A print order shall be “issued” upon notification by the Government for purposes of the contract when it is electronically transmitted or otherwise physically furnished to the contractor in conformance with the schedule.

REQUIREMENTS: This is a requirements contract for the items and for the period specified herein. Shipment/delivery of items or performance of work shall be made only as authorized by orders issued in accordance with the clause entitled “ORDERING.” The quantities of items specified herein are estimates only and are not purchased hereby. Except as may be otherwise provided in this contract, if the Government’s requirements for the items set forth herein do not result in orders in the amounts or quantities described as “estimated,” it shall not constitute the basis for an equitable price adjustment under this contract.

Except as otherwise provided in this contract, the Government shall order from the contractor all the items set forth which are required to be purchased by the Government activity identified on page 1.

The Government shall not be required to purchase from the contractor requirements in excess of the limit on total orders under this contract, if any.

Orders issued during the effective period of this contract and not completed within that time shall be completed by the contractor within the time specified in the order, and the rights and obligations of the contractor and the Government respecting those orders shall be governed by the terms of this contract to the same extent as if completed during the effective period of this contract.

If shipment/delivery of any quantity of an item covered by the contract is required by reason of urgency prior to the earliest date that shipment/delivery may be specified under this contract, and if the contractor will not accept an order providing for the accelerated shipment/delivery, the Government may procure this requirement from another source.

The Government may issue orders which provide for shipment/delivery to or performance at multiple destinations.

Subject to any limitations elsewhere in this contract, the contractor shall furnish to the Government all items set forth herein which are called for by print orders issued in accordance with the “ORDERING” clause of this contract.

PAYMENT: Submitting invoices for payment via the GPO fax gateway (if no samples are required) utilizing the GPO barcode coversheet program application is the most efficient method of receiving payment. Instruction for using this method can be found at the following web address: http://winapps.access.gpo.gov/fms/vouchers/barcode/instructions.html.

The information may only be used to generate mailing labels for the magazine specified. No other use is permitted. The contractor shall not provide the information to any other source. If possible, the contractor shall generate mailing labels directly from the copy of the data provided by the Government. If the contractor has to make a copy of the database, either on its own internal computer system or on some variety of removable media, for the purpose of generating labels, this copy must be destroyed or deleted after each order is distributed. The contractor shall not maintain or carry over a database from one issue to another. Each database will be used for one issue only. The contractor must safeguard the database to ensure only those employees who are directly involved in generating mailing labels and preparing magazines for mailing have access to the information. Once an order is distributed, the contractor will return the original database to the Government. If, for any reason, the disc(s) containing a database is lost, the contractor must immediately notify the Government.

Identification markings such as register marks, commercial identification marks of any kind, etc., except GPO imprint, form number, and revision date, carried in the electronic files, must not print on finished product.

Contractor will be required to accept files electronically via a contractor-hosted FTP server. Appropriate log-on instructions and protocol must be provided at time of award. Contractor must provide necessary security for the FTP, which at a minimum, must have a unique user ID and password.

**ELECTRONIC PREPRESS:** Prior to image processing, the contractor shall perform a basic check (preflight) of the furnished media and publishing files to assure correct output of the required reproduction image. Any errors, media damage, or data corruption that might interfere with proper file image processing must be reported to: Bo Joyner at (478) 327-1771.

The contractor shall create or alter any necessary trapping, set proper screen angles and screen frequency, and define file output selection for the imaging device being utilized. Furnished files must be imaged as necessary to meet the assigned quality level.

All halftones are to be 175-line screen or finer.

The Government will make all revisions to the electronic files.

Upon completion of each order, the contractor must furnish final production native application files (digital deliverables) with the furnished material. The digital deliverables must be an exact representation of the final printed product and shall be returned on the same type of storage media as was originally furnished, unless otherwise specified. The Government will not accept, as digital deliverables, PostScript files, Adobe Acrobat Portable Document Format (PDF) files, or any proprietary file formats other than those supplied, unless specified by the Government. (The Government will accept PDF files as digital deliverables when furnished by the Government.)

**PROOFS:** One (1) set of digital color content proofs of entire publication in book form. Direct to plate must be used to produce the final product with a minimum resolution of 2400 x 2400 dpi. Proofs must be created using the same Raster Image Processor (RIP) that will be used to produce the product. Proofs shall be collated with all elements in proper position (not pasted up), imaged face and back, trimmed, and folded to the finished size of the product.
One (1) set of inkjet proofs that are G7 profiled and use pigment-based inks of entire publication. A proofing RIP that provides an option for high quality color matching (such as Device Links Technology and/or ICC Profiles Technology), and meets or exceeds industry tolerance to ISO 12647-7 Standard for Graphic Technology (as of 3/19/09, and future amendments) must be utilized plus GRACoL 2006 Coated #1 specifications (CGATS TR006) must be achieved. Output must be a minimum resolution of 720 x 720 dpi on a GRACoL or SWOP certified proofing media. Proofs must contain the following color control strip to be evaluated for accuracy: IDEAlliance ISO 12647-7 Control Strip 2009 or 2013(i1).

Proofs must contain color control bars (such as Brunner, GATF, GRETAG, or RIT) for each color of ink on the sheet. Control bars must be placed parallel to the press’s ink rollers and must show areas consisting of minimum 1/8 x 1/8” solid color patches; tint patches of 25, 50 and 75%; dot gain scale; and gray balance patches for process color (if applicable). These areas must be repeated consecutively across the sheet.

The make and model number of the proofing system utilized shall be furnished with the proofs. These proofs must contain all elements, be in press configuration, and indicate margins. Proofs will be used for color match on press. Direct to plate must be used to produce the final product with a minimum resolution of 2400 x 2400 dpi.

The contractor will be responsible for performing all necessary proofreading to ensure proofs are in conformity with the furnished media and visual.

If any contractor’s errors are serious enough in the opinion of the GPO to require revised proofs, the revised proofs are to be provided at no expense to the Government. No extra time can be allowed for this reproofing; such operations must be accomplished within the original production schedule allotted in the specifications.

The contractor must not print prior to receipt of an “O.K. to Print.”

NOTE: Contractor must provide all final “O.K. to Print” proofs during the press sheet inspection – as applicable.

STOCK/PAPER: The specifications of all paper furnished must be in accordance with those listed herein or listed for the corresponding JCP Code numbers in the “Government Paper Specification Standards No. 12” dated March 2011.

All stock used in each copy must be of a uniform shade.

White No. 2 Coated Text, Gloss-finish, basis weight: 70 lbs. per 500 sheets, 25 x 38”, equal to JCP Code A182. (NOTE: Exception to “Government Paper Specifications Standards No. 12” (dated March 2011), under “Testing” – The acceptance criteria in Part 4 shall apply for opacity only.)

NOTE: The requirement for postconsumer fiber (as specified in the Government Paper Specification Standards No. 12) for the stock specified above is waived. However, the addition of postconsumer fiber is encouraged provided that the requirements of this standard are met. All other attributes remain the same.

PRINTING: Print head-to-head in four-color process.

Magazine will include multiple facing pages with process color and/or halftone image(s) printing full/partial bleed(s) and must align across the bind. Facing pages print to and must align across the bind.

After printing, apply a flood, clear gloss, aqueous coating to each page.

All orders must be printed on a press capable of printing four (4) colors in a single pass through the press (minimum of four printing units).
PRESS SHEET INSPECTION: Final makeready press sheets may be inspected and approved at the contractor’s plant for the purpose of establishing specified standards for use during the actual press run. Upon approval of the sheets, contractor is charged with maintaining those standards throughout the press run (within QATAP tolerances when applicable) and with discarding all makeready sheets that preceded approval. When a press sheet inspection is required, it will be specified on the individual print order. See GPO Publication 315.3 (Guidelines for Contractors Holding Press Sheet Inspections) issued January 2015. NOTE: A press sheet inspection is for the purpose of setting specific standards that are to be maintained throughout the entire run. It does not constitute a prior approval of the entire run.

Press sheets must contain control bars for each color of ink on the sheet. Control bars must be placed parallel to the press’s ink rollers. The control bars (such as BRUNNER, GATF, GRETAG, or RIT) must show areas consisting of 1/8 x 1/8” minimum solid color patches; tint patches of 25, 50, and 75%; dot gain scale; and gray balance patches for process color (if applicable). These areas must be repeated across the entire press sheet.

*Viewing Light* – Press sheets will be viewed under controlled conditions with 5000 degrees Kelvin overhead luminaries. The viewing conditions must conform to ISO 3664-2009. A viewing booth under controlled conditions with 5000 degrees Kelvin overhead luminaries with neutral gray surroundings must be provided.

The contractor must be able to provide the following equipment in working order for use during press sheet inspections:

1. A calibrated densitometer at press site for the purpose of monitoring density, dot gain, contrast, trapping, hue error, and ink coverage.

2. A prooflite such as a color balanced system that closely approximates a phase of natural daylight equal to at least 5000 degree Kelvin. It should be mounted in a viewing booth with the lights set at the proper angles.

All of the above equipment should be mounted in the color booth and made available for the press sheet inspection.

*Advance Copies –* At the conclusion of the press sheet inspection (as applicable), the contractor shall furnish 75 advance copies of the product ordered to the departmental representative. These copies cannot be deducted from the total quantity ordered and may be hand- or machine-folded (at contractor’s option), trimmed, and stitched.

**MARGINS:** Margins will be as indicated on the print order or furnished media.

Contractor can anticipate bleed pages scattered throughout – including full bleeds.

**BINDING:** Saddle-wire stitch in two places and trim three sides. Each product must contain complete four-page signatures after trimming. Single leaves connected with a lip (i.e., binding stub) to left or right side of stitches will not be allowed.

**PACKING:**

*Bulk Shipments –*

Pack in shipping containers.

Pallets are required.
Mailed Shipments –

Single copies must be mailed as self-mailers.

Insert multiple copies (up to 200 leaves) into kraft envelopes.

Quantities over 200 leaves, up to 12 pounds, must be inserted into cushioned shipping bags or wrapped in shipping bundles (maximum gross weight 14 pounds).

Quantities over 12 pounds, up to 36 pounds, must be packed in shipping containers (maximum gross weight 40 pounds).

NOTE: All shipments which fill less than a shipping container must be packaged with materials of sufficient strength and durability and in such a manner which will guarantee that the product will not be damaged and the package will not open nor split during delivery/mailing process.

LABELING AND MARKING:

Bulk Shipments –

Contractor to download GPO Form 905 (Rev. 7-15) – Labeling and Marking Specifications which can be located at GPO.gov, fill in appropriate blanks, and attach to shipping containers.

Mailed Shipments –

Create and affix a recipient address label to each copy mailed singly as self-mailers and to each unit of mail packaged in kraft envelopes, cushioned shipping bags, shipping bundles, and shipping containers. At contractor’s option, addresses may be directly imaged onto self-mailers, kraft envelopes, cushioned shipping bags, shipping bundles, and shipping containers.

For the addressing of self-mailers, contractor must affix and/or image address to the upper quarter of self-cover four – unless otherwise specified.

DEPARTMENTAL RANDOM COPIES (BLUE LABEL): All orders must be divided into equal sublots in accordance with the chart below. A random copy must be selected from each sublot. Do not choose copies from the same general area in each sublot. The contractor will be required to certify that the copies were selected as directed using GPO Form 917 – Certificate of Selection of Random Copies which can be located at GPO.gov. The random copies constitute a part of the total quantity ordered, and no additional charge will be allowed.
