8 **TITLE I—GENERAL PROVISIONS**

9 **SEC. 101. FINDINGS AND PURPOSE.**

10 (a) FINDINGS.—The Congress finds and declares  
11 that—

1           (1) there are a large number of avoidable  
2 deaths and injuries in the Nation caused by medical  
3 negligence and malpractice;

4           (2) the identity of health care professionals re-  
5 sponsible for medical negligence should be revealed  
6 to the public and they should be subject to discipline  
7 by the appropriate State medical boards;

8           (3) despite the large number of consumers in-  
9 jured by medical malpractice each year, fewer than  
10  $\frac{1}{2}$  of 1 percent of the Nation's health care profes-  
11 sionals face any serious State sanctions each year;

12           (4) the purpose of State medical boards is to  
13 protect the public from the unprofessional, improper  
14 and incompetent practice of medicine;

15           (5) most State medical boards are not ade-  
16 quately disciplining health care professionals and  
17 when they do, most of their efforts focus on offenses  
18 other than medical negligence, with revocations or  
19 suspensions of licenses rarely occurring;

20           (6) among the reasons why the State medical  
21 boards are unwilling or unable to identify and dis-  
22 cipline negligent health care professions are that the  
23 boards lack adequate funding, staffing, investigative  
24 and disciplinary powers and because the boards are

1 dominated by health care professionals who are re-  
2 luctant to discipline their colleagues;

3 (7) medical malpractice lawsuits are a nec-  
4 essary adjunct to State disciplinary proceedings, but  
5 they are not a substitute for them, since it is govern-  
6 ment, through its licensure of health care profes-  
7 sionals, that must ensure that high-quality health  
8 care is delivered to the public;

9 (8) health care consumers have very little infor-  
10 mation available to them regarding the quality of  
11 their health care providers and professionals;

12 (9) in order to make informed choices between  
13 health care providers and professionals, consumers  
14 need access to more information about their health  
15 care providers and professionals, including discipli-  
16 nary and malpractice records; and

17 (10) more and better information to health care  
18 consumers about their health care providers and pro-  
19 fessionals and more and better discipline of incom-  
20 petent and negligent health care professionals will  
21 alleviate the medical malpractice crisis and improve  
22 the quality of health care in the Nation by helping  
23 consumers to choose between health care providers  
24 and professionals and by removing the licenses of

1 those health care professionals who are a danger to  
2 the public health and welfare.

3 (b) PURPOSE.—It is the purpose of this Act—

4 (1) to create a national program of medical  
5 malpractice prevention by requiring State medical  
6 boards to be controlled by members of the public  
7 and not of the profession being monitored;

8 (2) to ensure that State medical boards are  
9 more effective in identifying and disciplining incom-  
10 petent, unethical, and negligent health care profes-  
11 sionals by ensuring that such boards are adequately  
12 staffed and funded to fulfill their purpose of permit-  
13 ting only qualified and fit individuals to practice  
14 medicine;

15 (3) to provide ready access to consumers of in-  
16 formation regarding their health care providers and  
17 professionals; and

18 (4) to ensure that all health care professionals  
19 remain abreast of new information regarding the ef-  
20 ficacy of medical tests and procedures and to assist  
21 in the identification of incompetent health care pro-  
22 fessionals, thereby reducing the incidence of the  
23 practice of unnecessary medicine and the incidence  
24 of preventable injuries to patients.

1 **SEC. 102. PREEMPTION.**

2 The provisions of this Act shall preempt State law  
3 only to the extent that the Secretary finds that State law  
4 does not protect the health and safety of patients in the
