

109TH CONGRESS
2^D SESSION

H. RES. 948

Recognizing the dedication of the employees at the National Aeronautics and Space Administration's Stennis Space Center who, during and after Hurricane Katrina's assault on Mississippi, provided shelter and medical care to storm evacuees and logistical support for storm recovery efforts, while effectively maintaining critical facilities at the Center.

IN THE HOUSE OF REPRESENTATIVES

JULY 25, 2006

Mr. TAYLOR of Mississippi (for himself, Mr. MELANCON, Mr. JEFFERSON, Mr. PICKERING, Mr. GORDON, Mr. WICKER, Mr. THOMPSON of Mississippi, and Mr. JINDAL) submitted the following resolution; which was referred to the Committee on Science

RESOLUTION

Recognizing the dedication of the employees at the National Aeronautics and Space Administration's Stennis Space Center who, during and after Hurricane Katrina's assault on Mississippi, provided shelter and medical care to storm evacuees and logistical support for storm recovery efforts, while effectively maintaining critical facilities at the Center.

Whereas, during Hurricane Katrina, some 3,700 persons (including employees, their immediate and extended families, and members of the general public), sought shelter at the Stennis Space Center;

Whereas the Stennis cafeteria, which normally serves about 175 breakfasts and 600 lunches each day, served 3,000 meals 3 times a day to evacuees, for a period of a week following the storm;

Whereas before, during, and in the immediate aftermath of the storm, the small staff of the Stennis Medical Clinic provided medical care to all who needed it among the evacuees onsite, including some 20 special needs patients, and soon after the storm, the Stennis clinic staff was complemented by medical personnel airlifted from other National Aeronautics and Space Administration Centers;

Whereas, although commercial electrical power was not available to Stennis for 10 days following the storm, electrical power was maintained to all essential buildings through the extensive use of diesel-powered generators and the around the clock efforts of a team of individuals who mechanically maintained those generators and kept them fueled, also enabling the pumps on Stennis' deep-water wells to provide a continuous supply of potable water for drinking, cooking, and sanitation to support the 3,700 people onsite;

Whereas a team of employees in the Stennis rocket propulsion test complex protected the health of all test infrastructure, employing innovative methods to ensure an uninterrupted supply of purge gases to all required facility infrastructure and test hardware, failure of which would have resulted in untold millions of dollars of new costs to clean, purge, and recertify these facilities for Space Shuttle Main Engine and other propulsion system testing;

Whereas for 10 days following the storm, logistical support (including food, water, medical supplies, and personnel

exchange) of the National Aeronautics and Space Administration Michoud Assembly Facility in New Orleans was provided via helicopters operating from the Stennis Space Center, along with helicopters, and flight crew and security personnel, from the Marshall Space Flight and Kennedy Space Centers; and

Whereas, immediately following the storm, Stennis Space Center facilitated the use of its property as the site of the Federal Emergency Management Agency's Incident Command Center serving a 6-county area along the Mississippi Gulf Coast, and Stennis served as the central distribution hub for disaster response supplies to those same counties, including, during the nearly 2-months of Federal Emergency Management Agency relief operations at Stennis, distributing more than 7,600,000 gallons of water, 41,000,000 pounds of ice, and 3,500,000 MREs (meals-ready-to-eat) to devastated areas via the Stennis Space Center hub: Now, therefore, be it

1 *Resolved*, That the House of Representatives com-
 2 mends the dedication of the employees who stayed behind
 3 at the National Aeronautics and Space Administration's
 4 Stennis Space Center, who, during and after Hurricane
 5 Katrina's assault on Mississippi, provided shelter and
 6 medical care to storm evacuees and logistical support for
 7 storm recovery efforts, while effectively maintaining crit-
 8 ical facilities at the Center, including Cheryl Bennett,
 9 James Bevis, Terry Bordelon, Steve Brettel, Vicki Brown,
 10 Bill Brumfield, Kirt Bush, Paul Byrd, Ethan Calder,
 11 Marla Carpenter, David Carstens, Jonathan Clemens,
