which was referred to the Committee on the Judiciary

JUNE 26, 2008

Reported by Mr. LEAHY, without amendment

JULY 7, 2008

Considered and agreed to

---

## RESOLUTION

Designating September 2008 as “Tay-Sachs Awareness  
Month”.

Whereas Tay-Sachs disease is a rare, genetic disorder that causes destruction of nerve cells in the brain and spinal cord due to the poor functioning of an enzyme called beta-hexosaminidase A;

Whereas there is no proven treatment or cure for Tay-Sachs disease and the disease is always fatal in children;

Whereas the disorder was named after Warren Tay, an ophthalmologist from the United Kingdom, and Bernard Sachs, a neurologist from the United States, both of

whom contributed to the discovery of the disease in 1881 and 1887, respectively;

Whereas Tay-Sachs disease often affects families with no prior history of the disease;

Whereas approximately 1 in 27 Ashkenazi Jews, 1 in 30 Louisianan Cajuns, 1 in 30 French Canadians, 1 in 50 Irish Americans, and 1 in every 250 people are carriers of Tay-Sachs disease, which means approximately 1,200,000 Americans are carriers;

Whereas these unaffected carriers of the disease possess the recessive gene that can trigger the disease in future generations;

Whereas, if both parents of a child are carriers of Tay-Sachs disease, there is a 1 in 4 chance that the child will develop Tay-Sachs disease;

Whereas a simple and inexpensive blood test can determine if an individual is a carrier of Tay-Sachs disease, and all people in the United States, especially those citizens who are members of high-risk populations, should be screened; and

Whereas raising awareness of Tay-Sachs disease is the best way to fight this horrific disease: Now, therefore, be it

1       *Resolved*, That the Senate designates September  
2 2008 as “Tay-Sachs Awareness Month”.
