1 SEC. 2. FINDINGS; PURPOSE.

2 (a) FINDINGS.—Congress finds that—

3 (1) healthy populations of fish and other aquat-
 4 ic organisms depend on the conservation, protection,
 5 restoration, and enhancement of aquatic habitats in
 6 the United States;

7 (2) aquatic habitats (including wetlands,
 8 streams, rivers, lakes, estuaries, coastal and marine
 9 ecosystems, and associated riparian upland habitats
 10 that buffer those areas from external factors) per-
 11 form numerous valuable environmental functions
 12 that sustain environmental, social, and cultural val-
 13 ues, including recycling nutrients, purifying water,
 14 attenuating floods, augmenting and maintaining
 15 stream flows, recharging ground water, acting as
 16 primary producers in the food chain, and providing
 17 essential and significant habitat for plants, fish,
 18 wildlife, and other dependent species;

1 (3) the extensive and diverse aquatic habitat re-
2 sources of the United States are of enormous signifi-
3 cance to the economy of the United States, pro-
4 viding—

5 (A) recreation for 44,000,000 anglers;

6 (B) more than 1,000,000 jobs and approxi-
7 mately \$125,000,000,000 in economic impact
8 each year relating to recreational fishing; and

9 (C) approximately 500,000 jobs and an ad-
10 ditional \$35,000,000,000 in economic impact
11 each year relating to commercial fishing;

12 (4) at least 40 percent of all threatened species
13 and endangered species in the United States are di-
14 rectly dependent on aquatic habitats;

15 (5) certain fish species are considered to be eco-
16 logical indicators of aquatic habitat quality, such
17 that the presence of those species in an aquatic eco-
18 system reflects high-quality habitat for other fish;

19 (6) loss and degradation of aquatic habitat, ri-
20 parian habitat, water quality, and water volume
21 caused by activities such as alteration of water-
22 courses, stream blockages, water withdrawals and di-
23 versions, erosion, pollution, sedimentation, and de-
24 struction or modification of wetlands have—

1 (A) caused significant declines in fish pop-
2 ulations throughout the United States, espe-
3 cially declines in native fish populations; and

4 (B) resulted in economic losses to the
5 United States;

6 (7)(A) providing for the conservation and sus-
7 tainability of fish and other aquatic organisms has
8 not been fully realized, despite federally funded fish
9 and wildlife restoration programs and other activi-
10 ties intended to conserve aquatic resources; and

11 (B) that conservation and sustainability may be
12 significantly advanced through a renewed commit-
13 ment and sustained, cooperative efforts that are
14 complementary to existing fish and wildlife restora-
15 tion programs and clean water programs;

16 (8) the National Fish Habitat Action Plan pro-
17 vides a framework for maintaining and restoring
18 aquatic habitats to ensure perpetuation of popu-
19 lations of fish and other aquatic organisms;

20 (9) the United States can achieve significant
21 progress toward providing aquatic habitats for the
22 conservation and restoration of fish and other aquat-
23 ic organisms through a voluntary, nonregulatory in-
24 centive program that is based on technical and fi-

1 nancial assistance provided by the Federal Govern-
2 ment;

3 (10) the creation of partnerships between local
4 citizens, Indian tribes, Alaska Native organizations,
5 corporations, nongovernmental organizations, and
6 Federal, State, and tribal agencies is critical to the
7 success of activities to restore aquatic habitats and
8 ecosystems;

9 (11) the Federal Government has numerous
10 regulatory and land and water management agencies
11 that are critical to the implementation of the Na-
12 tional Fish Habitat Action Plan, including—

13 (A) the United States Fish and Wildlife
14 Service;

15 (B) the Bureau of Land Management;

16 (C) the National Park Service;

17 (D) the Bureau of Reclamation;

18 (E) the Bureau of Indian Affairs;

19 (F) the National Marine Fisheries Service;

20 (G) the Forest Service;

21 (H) the Natural Resources Conservation
22 Service; and

23 (I) the Environmental Protection Agency;

24 (12) the United States Fish and Wildlife Serv-
25 ice, the Forest Service, the Bureau of Land Manage-

1 ment, and the National Marine Fisheries Service
2 each play a vital role in—

3 (A) the protection, restoration, and en-
4 hancement of the fish communities and aquatic
5 habitats in the United States; and

6 (B) the development, operation, and long-
7 term success of fish habitat partnerships and
8 project implementation;

9 (13) the United States Geological Survey, the
10 United States Fish and Wildlife Service, and the
11 National Marine Fisheries Service each play a vital
12 role in scientific evaluation, data collection, and
13 mapping for fishery resources in the United States;

14 (14) the State and territorial fish and wildlife
15 agencies play a vital role in—

16 (A) the protection, restoration, and en-
17 hancement of the fish communities and aquatic
18 habitats in the respective States and territories;
19 and

20 (B) the development, operation, and long-
21 term success of fish habitat partnerships and
22 project implementation; and

23 (15) many of the programs for conservation on
24 private farmland, rangeland, and forestland that are
25 carried out by the Secretary of Agriculture, includ-

1 ing the Natural Resources Conservation Service and
2 the State and Private Forestry programs of the For-
3 est Service, are able to significantly contribute to the
4 implementation of the National Fish Habitat Action
5 Plan through the engagement of private landowners.

6 (b) PURPOSE.—The purpose of this Act is to encour-
7 age partnerships among public agencies and other inter-
8 ested parties consistent with the mission and goals of the
9 National Fish Habitat Action Plan—

10 (1) to protect and maintain intact and healthy
11 aquatic habitats;

12 (2) to prevent further degradation of aquatic
13 habitats that have been adversely affected;

14 (3) to reverse declines in the quality and quan-
15 tity of aquatic habitats to improve the overall health
16 of fish and other aquatic organisms;

17 (4) to increase the quality and quantity of
18 aquatic habitats that support a broad natural diver-
19 sity of fish and other aquatic species;

20 (5) to improve fisheries habitat in a manner
21 that leads to improvement of the annual economic
22 output from recreational, subsistence, and commer-
23 cial fishing;

1 (6) to ensure coordination and facilitation of ac-
2 tivities carried out by Federal departments and
3 agencies under the leadership of—

4 (A) the Director of the United States Fish
5 and Wildlife Service;

6 (B) the Assistant Administrator for Fish-
7 eries of the National Oceanic and Atmospheric
8 Administration; and
