

115TH CONGRESS
2D SESSION

H. R. 4914

To better support our early childhood educators and elementary school and secondary school teachers, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

FEBRUARY 2, 2018

Mr. NORCROSS (for himself and Mr. PASCRELL) introduced the following bill; which was referred to the Committee on Education and the Workforce, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To better support our early childhood educators and elementary school and secondary school teachers, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE AND FINDINGS.**

4 (a) SHORT TITLE.—This Act may be cited as the
5 “Supporting the Teaching profession through Revitalizing
6 Investments in Valuable Educators Act” or the “STRIVE
7 Act”.

8 (b) FINDINGS.—Congress finds the following:

1 (1) States identified significant teacher short-
2 ages in their reports to the Department of Edu-
3 cation during the 2015–2016 school year, with 48
4 States identifying shortages in special education, 42
5 identifying teacher shortages in mathematics, and
6 40 identifying teacher shortages in science. One rea-
7 son for the shortages in these areas is because math-
8 ematics and science teachers can earn significantly
9 higher starting salaries in the private sector. Fur-
10 ther, rural communities face limitations in recruiting
11 and retaining teachers for reasons such as funding
12 issues, limited teacher supply, and geographic isola-
13 tion.

14 (2) Students in high-poverty and high-minority
15 schools, both urban and rural, typically feel the larg-
16 est impact of teacher shortages. These schools often
17 experience difficulty hiring and high turnover on a
18 regular basis, and they are the most severely af-
19 fected when teacher shortages become widespread.
20 This happens, in part, because inequitable funding
21 of schools leaves many low-wealth urban and rural
22 communities with inadequate resources, so they
23 must pay lower salaries and typically have poorer
24 working conditions.

1 (3) According to a study by Mathematica, when
2 high-performing teachers were offered large financial
3 incentives to transfer to low-performing schools,
4 their students' scores climbed 10 points in reading
5 and 9 points in math compared to students state-
6 wide over 2 years.

7 (4) According to a survey conducted by Scho-
8 lastic, 97 percent of teachers list supportive school
9 leadership as essential or very important for retain-
10 ing strong teachers and improving student achieve-
11 ment, more than any other factor.

12 (5) Research suggests that incurring postsec-
13 ondary education debt can decrease the likelihood
14 that high-achieving students, lower-income students,
15 and students of color choose to work in lower-wage
16 professions in general, especially in the education
17 system. Therefore, loan forgiveness and service
18 scholarships for teachers may be especially effective
19 for recruiting teachers and school leaders from di-
20 verse, lower-income backgrounds.

21 (6) According to the Learning Policy Institute,
22 teacher loan forgiveness and service scholarship pro-
23 grams can be successful in both recruiting and re-
24 taining teachers. To be effective, these programs
25 should provide a financial benefit that meaningfully

1 offsets the cost of a teacher's professional prepara-
2 tion. This includes covering licensing and certifi-
3 cation costs.

4 (7) A 2015 Government Accountability Office
5 study of Federal grant and loan forgiveness pro-
6 grams for teachers found that the structure of these
7 programs matters. Further research shows effective
8 loan forgiveness and service scholarship programs
9 follow 5 design principles. These programs—

10 (A) cover all or a large percentage of tui-

11 tion;

12 (B) target high-need fields or schools, or

13 both;

14 (C) recruit candidates who are academi-

15 cally strong, committed to teaching, and well-

16 prepared;

17 (D) commit recipients to teach with rea-

18 sonable incentives to fulfill their commitment;

19 and

20 (E) are bureaucratically manageable for

21 participating teachers, local educational agen-

22 cies, and institutions of higher education.

23 (8) The TEACH grant program under subpart
24 9 of part A of title IV of the Higher Education Act
25 of 1965 (20 U.S.C. 1070g et seq.) provides up to

1 \$16,000 in grants to prospective teachers who agree
2 to teach in low-income schools and high-need subject
3 areas for 4 years. This is far below the Department
4 of Education's most recent estimate of the average
5 annual cost of approximately \$25,409 in tuition,
6 fees, and room and board at the average full-time
7 undergraduate 4-year institution.

8 (9) The National Center for Education Statis-
9 tics found that more than $\frac{2}{3}$ of the individuals en-
10 tering the education field borrow money to pay for
11 their higher education. Teachers with a bachelor's
12 degree have an average debt of \$20,000 and teach-
13 ers with a master's degree have an average debt of
14 \$50,000. Teachers also start out earning 20 percent
15 less than their peers with comparable degrees who
16 pursue jobs outside of education. These
17 compounding factors can disincentivize prospective
18 teachers from entering the profession.

19 (10) In evaluating the TEACH grant program,
20 the Government Accountability Office found that al-
21 most $\frac{2}{3}$ of the requests for assistance under the pro-
22 gram from October 2011 through March 2014 cited
23 problems submitting certification paperwork. The
24 Government Accountability Office recommended im-
25 provements in the program's design, including re-

1 ducing burdensome annual paperwork, increasing
2 awareness about the program, and streamlining the
3 dispute process.

4 (11) Spending by teachers on school supplies
5 adds up to \$1,600,000,000 nationally. According to
6 the Education Market Association, most teachers
7 spend around \$500, with 10 percent spending
8 \$1,000 or more.

9 (12) Teacher quality partnerships are designed
10 to strengthen higher education-based teacher and
11 school leader preparation. Studies show that teach-
12 ers who are better prepared to enter the classroom
13 stay longer and perform better than their underpre-
14 pared peers. Teacher quality partnerships also fund
15 programs like induction and mentoring that have
16 been shown to increase teacher and school leader re-
17 tention. Research indicates that the ongoing support
18 for teachers provided by teacher quality partner-
19 ships, including mentoring and coaching, is an im-
20 portant part of early childhood education programs.

21 (13) According to the Center for Education
22 Data and Research, a more diverse teaching work-
23 force leads to better student outcomes, particularly
24 in high-poverty environments with significant at-risk
25 student populations. Further, researchers from Van-

1 derbilt University found that greater racial and eth-
2 nic diversity in the principal corps benefits students,
3 especially children of color. Three commonly cited
4 rationales for this benefit are—

5 (A) students of color benefit from seeing
6 minority adult role models in a position of au-
7 thority;

8 (B) the higher expectations that teachers
9 of color tend to place on students of color; and

10 (C) the effect of cultural differences be-
11 tween teachers of different backgrounds on in-
12 structional strategies and interpretation of stu-
13 dents' behavior.

14 (14) According to the report entitled “Empow-
15 ered Educators: How Leading Nations Design Sys-
16 tems for Teaching Quality”, effective teacher prepa-
17 ration successfully integrates theory and practice
18 components. Further, according to the “Preparing
19 Teachers for a Changing World” report sponsored
20 by the National Academy Foundation, highly effec-
21 tive teachers vary in styles, yet have many teaching
22 strategies in common. Research has identified a set
23 of knowledge, skills, and dispositions essential for
24 beginning teachers that should be incorporated into
25 the teacher education curriculum. This includes the

1 opportunity and capacity to reflect on and evaluate
2 skills and to learn from practice. Evidence-based
3 teacher preparation includes developing teacher
4 skills, content knowledge, inquiry, and the capacity
5 to provide effective learning experiences for a diverse
6 set of students.

7 (15) As it does in medicine, the Federal Gov-
8 ernment should maintain a substantial, sustained
9 program of service scholarships or loan forgiveness
10 programs that cover training costs in high-quality
11 preparation programs at the undergraduate or grad-
12 uate level for those who will teach in a high-need
13 field or location for at least 4 years, as candidates
14 are much more likely to remain in the profession
15 and to make a difference for student achievement
16 after 3 years of teaching. State governments can
17 augment such an approach with programs targeted
18 to specific local needs.

19 (16) Research has shown the impact cultural
20 competence can have on closing student achievement
21 gaps and improving student outcomes by incor-
22 porating racial and ethnic minority contributions in
23 curricula and diversifying pedagogical practices. Cul-
24 tural competence is both a moral and ethical respon-
25 sibility to create a welcoming environment for stu-

1 dents to succeed. The impact of having educators
 2 who have the ability to challenge and motivate di-
 3 verse student populations can dramatically improve
 4 our educational system and student outcomes.

11 of the Secretary and after consulta-
12 tion with the State educational agency
13 of the State in which the educational
14 service agency operates) to be a school

14 reasons of the cancellation (in whole or in part)
15 under section 455(r) of the Higher Education Act of
16 1965 of any eligible Federal Direct Loan (as defined
17 in section 455(r)(6)(A) of such Act).”.

18 (2) EFFECTIVE DATE.—The amendment made
19 by this subsection shall apply to cancellations of in-

12 ment (together with the interest thereon) for that
13 recipient shall be reduced by an amount that bears
14 the same ratio to the total amount of the recipient’s
15 grant under this subpart as the amount of time the
