## LAND AND MINERALS MANAGEMENT

### BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is charged with the multiple use management of natural resources on more than 247 million acres of surface estate of public land, about one-eighth of the land in the United States. The BLM also administers approximately 700 million acres of onshore Federal mineral estate underlying BLM and other surface ownerships. In addition, BLM has trust responsibilities on 56 million acres of Indian trust lands for mineral operations and cadastral (land) surveys. The lands managed by BLM provide important natural resources, recreational and scenic values to the American people, as well as resource commodities and revenue to the Federal Government, States, and counties. It is the mission of BLM to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations. The Budget proposes legislation to establish a Congressionally-chartered National BLM Foundation. This Foundation will provide the BLM with an opportunity to broaden its partnership capabilities, leverage private funding, and focus public support for the BLM mission of protecting and restoring the natural, cultural, historical, and recreation resources on the Nation's public lands.

**Land resources.**—Provides for management of rangeland and forest resources; riparian areas; soil, water, and air activities; wild horses and burros; and cultural resources. The Budget funds rangeland management activities through a combination of direct appropriations and offsetting collections generated from a proposed three-year pilot program to assess an administrative processing fee on grazing permits. The fee recovers some costs associated with issuing grazing permits/leases on BLM lands. The funds from the fee will be used to address pending applications for grazing permit renewals. The BLM proposes a \$1 per Animal Unit Month fee, collected along with current grazing fees. The BLM will promulgate regulations for the continuation of the grazing administrative fee for cost recovery after the pilot expires.

**Wildlife and fisheries management.**—Provides for maintenance, improvement, or enhancement of fish and wildlife habitats as part of the management of public lands and ecosystems.

**Threatened and endangered species management.**—Provides for protection, conservation, consultation, recovery, and evaluation of populations and habitats of threatened, endangered and special status animal and plant species.

**Recreation management.**—Provides for management and protection of recreational resource values, designated and potential wilderness areas, and collection and expenditure of recreation user fees. The Administration proposes to permanently reauthorize the Departments of the Interior and Agriculture recreation fee program under the Federal Lands Recreation Enhancement Act, which is set to expire on December 8, 2015.

**Energy and minerals management.**—Provides for management of onshore oil and gas; coal; geothermal and renewable energy resources such as wind and solar; other leasable minerals and mineral materials activities; and the administration of encumbrances on the mineral estate on Federal and Indian lands. The Budget funds oil and gas management activities through a combination of direct appropriations and offsetting collections generated from assessing fees for inspection activities and processing applications for permits to drill. The 2015 Budget funds the inspection activity in the Oil and Gas Management program through inspection fees. These fees are expected to generate \$48 million in 2015 that will be used to offset the costs of administering the BLM's oil and gas program and increase program capability.

**Realty and ownership management.**—Provides for management and non-reimbursable processing of authorizations and compli-

ance for realty actions and rights-of-way (including Alaska), administration of land title records and completion of cadastral surveys on public lands. Provides for the processing of communication site use authorization requests.

**Resource protection.**—Provides for management of the land use planning and National Environmental Policy Act processes, including monitoring activities. Also ensures the health and safety of users of the public lands through remediation of abandoned mine lands and protection from criminal and other unlawful activities; the effects of hazardous material and/or waste; and physical safety hazards.

**Transportation and facilities management.**—Provides for construction and maintenance of administrative and recreation sites, roads, trails, bridges and dams, including compliance with building codes and standards and environmental protection requirements. These funds allow for the systematic management of facilities with critical health and safety concerns, and ensure the protection of natural and cultural resources and the environment. In 2015, BLM will fund all construction and deferred maintenance projects from this activity, including those on the Oregon and California grant lands.

**Challenge Cost Share (CCS).**—This program leverages non-Federal funding, in-kind services, and materials with Federal funding to conduct on-the-ground projects that improve condition of the public lands. These conservation, restoration, and enhancement projects benefit forestry, range, riparian, fish, wildlife, threatened and endangered species, recreation, and cultural resources.

**National Landscape Conservation System (NLCS).**—Provides for the management of National Monuments, National Conservation Areas, and other Congressional conservation designations in the NLCS. The program provides for the recurring operational (base) budgets of these NLCS units.

**Workforce and organizational support.**—Provides for the management of specified bureau business practices, such as human resources, Equal Employment Opportunity, financial resources, procurement, property, information technology, and fixed costs.

**Mining law administration.**—Provides for exploration and development of minerals on public lands pursuant to the General Mining Law of 1872, including validity examinations, patent application reviews, enforcement of environmental and bonding requirements, and recordation of mining claims. Program costs are expected to be fully offset by claim maintenance and other fees in 2015.

This appropriation provides for the acquisition of lands or interests in lands, by purchase or exchange, when necessary for public access and recreation use, preservation of open space, resource protection, and/or other purposes related to the management of public lands. The 2015 Federal Land Acquisition program builds on efforts started in 2011 to strategically invest in inter-agency landscape-scale conservation projects while continuing to meet agency-specific programmatic needs. The Department of the Interior and the U.S. Forest Service collaborated extensively to develop a process to more effectively coordinate land acquisitions with government and local community partners to achieve the highest priority shared conservation goals. The Administration proposes to permanently authorize annual mandatory funding, without further appropriation or fiscal year limitation for the Departments of Agriculture and the Interior Land and Water Conservation Fund programs beginning in fiscal year 2015.

These funds are used for the planning, construction, development, and monitoring of range improvements.

This appropriation is derived from: 1) revenues received to offset administrative and other costs incurred to process applications for rights-of-way, and the monitoring of construction, operation, and termination of rights-of-ways; 2) recovery of costs associated with the adopt-a-horse program; 3) revenues received for rehabilitation of damages to lands, resources, and facilities; 4) fees for processing specified categories of realty actions under the Federal Land Policy Management Act; 5) deposits received from contractors in lieu of completing contract requirements such as slash burning and timber extension expenses; 6) fees for costs of reproduction and administrative services involved in providing requested copies of materials; 7) fixed fees for energy and minerals lease applications, assignments, and transfers; 8) costs of processing applications and administering permits, including environmental analysis and monitoring of special recreation permits; and 9) rents received for permits to do commercial filming and photography on public lands. The Budget assumes BLM will continue to identify new opportunities to recover more of its costs from benefiting public land users in order to reduce the need for direct appropriations from the Treasury.

PERMANENT OPERATING FUNDS—Continued  
Summary of Budget Authority and Outlays—Continued

	2013 actual	2014 est.	2015 est.
Outlays .....	282	233	246

Permanent operating funds accounts include:

*Operations and maintenance of quarters.*—Funds in this account are used to maintain and repair Bureau of Land Management (BLM) employee-occupied quarters from which rental charges are collected. Agencies are required to collect quarters rentals from employees who occupy Government-owned housing and quarters. This housing is provided only in isolated areas or where an employee is required to live on-site at a Federally owned facility or reservation.

*Forest ecosystems health and recovery.*—Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California grant lands, public domain lands, and Coos Bay Wagon Road lands. Pursuant to Public Law 102-381, as amended, this account was established to allow BLM to more efficiently and effectively address forest health issues. Funds can be used for other forest health purposes, including release from competing vegetation and density control treatments. This account will expire on September 30, 2015 under current law.

*Timber sale pipeline restoration fund.*—This fund provides for the deposit and use of fees collected by BLM for sales of timber authorized by section 2001(k) of Public Law 104-19. Of the total deposited into this account, 75 percent is to be used for the preparation of timber sales to fill the timber pipeline on lands administered by BLM, and 25 percent is to be used to address recreation projects on BLM lands.

*Stewardship contract product sales.*—Stewardship contracting improves, maintains, or restores forest and rangeland health; restores or maintains water quality; improves fish and wildlife habitat; reestablishes native plant species and increases their resilience to insects and disease; and reduces hazardous fuels that pose risks to communities and ecosystem values. Stewardship contracting authority includes agreements with non-profits, best-value contracts, designation by description, end results, and goods for services.

*Expenses, road maintenance deposits.*—Users of certain roads under BLM's jurisdiction make deposits for maintenance purposes. Moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

*Federal Lands Recreation Enhancement Act, BLM.*—The Federal Lands Recreation Enhancement Act (FLREA) was enacted on December 8, 2004, as part of the Consolidated Appropriations Act for 2005. The FLREA replaced the Recreation Fee Demonstration Program, and most current BLM sites have transitioned to the new program. All receipts collected under this authority are deposited to this account. The BLM returns 100 percent of these receipts back to the site where the fees were generated. The FLREA, as amended, authorizes this program through December 8, 2015. The Administration proposes legislation to permanently authorize the recreation fee programs of the Departments of the Interior and Agriculture under FLREA. The FLREA is currently set to expire on December 8, 2015.

*Acquisitions in Deschutes, Oregon from land sale receipts.*—Pursuant to Public Law 105-221, the Oregon Public Lands Transfer Act, the Secretary of the Interior is authorized to use the pro-

ceeds from land sales in Deschutes County to purchase environmentally sensitive lands.

*Operations and acquisitions in Nevada from land sale receipts.*—Pursuant to Public Law 105-263, 85 percent of receipts from sales of public domain lands in southern Nevada are used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, the U.S. Fish and Wildlife Service and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse BLM for costs incurred arranging sales and exchanges under the Act.

*Lincoln County Land Sales Act.*—Public Law 106-298 authorizes the Secretary to dispose of certain lands in Lincoln County, Nevada, and distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent to an interest bearing account that is available for expenditure without further appropriation to be used by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

*White Pine County Land Sales Act.*—Public Law 109-432 authorizes the Secretary to dispose of certain lands in White Pine County, Nevada, and to distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent to an account that is available for expenditure without further appropriation for the management of archaeological resources, wilderness protection, recreation activities, preparation of a management plan, reimbursement for sale costs, and other purposes.

*Leases from Naval Petroleum Reserve No 2.*—The 2005 Energy Policy Act established this fund for environmental investigation and restoration on that site located in Kern County, California. A portion of revenue from new leases on the site is authorized to be deposited to this account.

*BLM Permit Processing Improvement Fund.*—The 2005 Energy Policy Act established pilot offices to improve interagency coordination in processing onshore Federal oil and gas permits. Fifty-percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited in this fund through 2015 and used to facilitate BLM oil and gas permit processing in these pilot offices.

*Geothermal Lease Revenue Fund.*—The 2005 Energy Policy Act established this fund. Twenty-five percent of geothermal bonuses, rents, and royalties were authorized to be deposited to this account through 2010 and used to expedite geothermal leasing activities. Deposits to this fund were subsequently terminated beginning in fiscal year 2010.

*Federal land disposal.*—The Federal Land Transaction Facilitation Act, P.L. 106-248 (114 Stat. 613), provided authority for BLM to sell public lands that were classified as suitable for disposal under resource management plans in effect at the time of enactment. This law provided that receipts from such sales could be used to acquire non-Federal lands with significant resource values that fall within the boundaries of areas now managed by the Department of the Interior. This authority expired on July 25, 2010, and was later reauthorized through July 25, 2011. All funds not obligated by both expiration dates were transferred to the Land and Water Conservation Fund. A separate legislative proposal to extend the LWCF authorization will be submitted with the Budget.

**Owyhee Land Acquisition Account.**—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1039), provides that the Secretary may sell public land located within the Boise District of BLM that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to, certain wilderness areas.

**Washington County, Utah Land Acquisition Account.**—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1091), authorizes the sale of public land located within Washington County, Utah, that, as of July 25, 2000, has been identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to, certain wilderness areas.

**Silver Saddle Endowment Account.**—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1114), requires Carson City to deposit twenty-five percent of the difference between what the Secretary of the Interior and the City paid for the 62-acre Bernhard parcel before the Secretary conveys the land to the City. Amounts deposited in the account established by paragraph (1) shall be available to the Secretary, without further appropriation, for the oversight and enforcement of a certain conservation easement.

**Carson City Special Account.**—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1113), authorizes the sale of 158 acres of public land described in the statute. Five percent of the proceeds are paid to the State of Nevada for use for public education. The remainder is deposited to this account and used to acquire environmentally sensitive land or an interest in environmentally sensitive land in Carson City; to cover the cost of surveys and appraisals; and to reimburse BLM for administrative expenses.

**Ojito Land Acquisition.**—The Ojito Wilderness Act authorized the sale of land to the Pueblo Indian Tribe and the purchase of land from willing sellers within the State of New Mexico.

**Reauthorize the Federal Lands Transaction Facilitation Act (FLTFA).**—The Budget proposes to reauthorize the FLTFA land sale authority, which expired in July 2011, to allow lands identified as suitable for disposal in recent land use plans to be sold using the FLTFA authority. FLTFA sales revenues would continue to be used to fund the acquisition of environmentally sensitive lands and to cover BLM's administrative costs associated with conducting sales.

Miscellaneous permanent payments include:

*Payments for Oregon and California and Coos Bay Wagon Road grant lands, receipts.*—The Secure Rural Schools and Community Self-Determination Act of 2000 (P.L. 106-393), as amended by P.L. 110-343 and by P.L. 112-141, provides annual transition payments to the 18 O&C counties. These payments were derived from revenues from federal activities on O&C lands in the previous fiscal year that were not deposited to permanent operating funds, supplemented by amounts from the General Fund when necessary. The last payment authorized under P.L. 106-393 was in 2006. Section 601 of Division C of P.L. 110-343 amended and reauthorized the Secure Rural Schools Act (P.L. 106-393). Payments authorized for 2012 by P.L. 112-141 will be made in 2013. Amendments to P.L. 106-393 retained most provisions of the original Act, but reduced payments each year. Section 10(a) of Public Law 113-40, 127 Stat. 545, provided authorization for 2013, with the payments being made in 2014. The Budget reflects a five-year reauthorization of the Secure Rural Schools Act with funding through mandatory appropriations. Counties not opting to receive a portion of the USDA Forest Service payments to communities will receive funds authorized under the 1937 and 1939 statutes. Payments to the Oregon counties under the 1937 statute will be 50 percent of revenues from O&C grant lands. Payments under the 1939 statute are for lost tax revenue in two Oregon counties and are estimated to be 75 percent of all revenues from Coos Bay Wagon Road grant lands.

*Payments to States (proceeds of sales).*—States are paid five percent of the net proceeds from the sale of public land and public land products (31 U.S.C. 1305).

*Payments to States from grazing receipts, etc, public lands outside grazing districts.*—States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

*Payments to States from grazing receipts, etc, public lands within districts.*—States are paid 12.5 percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

*Payments to States from grazing receipts, etc, public lands within grazing districts, miscellaneous.*—States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

*Payments to counties, National Grasslands.*—Of the revenues received from the use of Bankhead-Jones Act lands administered by BLM, 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

*Payments to Nevada from receipts on land sales.*—(A) Public Law 96–586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent). (B) Public Law 105–263, as amended by P.L. 107–282, authorizes the disposal through sale of approximately 49,000 acres in Clark County Nevada, the proceeds of which are to be distributed as follows: a) five percent for use in the general education program of the State of Nevada; b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, Fish and Wildlife Service, and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails, and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse BLM for costs incurred arranging sales and exchanges under the Act. (C) Public Law 106–298 authorizes the sale of certain lands in Lincoln County, Nevada. The proceeds of these sales are to be distributed as follows: a) five percent to the State of Nevada for general education purposes; b) 10 percent to Lincoln County for general purposes with emphasis on supporting schools; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

*Property.*—This account received funding appropriated by section 9102 of the fiscal year 1990 Department of Defense Appropriations Act for the acquisition of Federal real properties, improvements on such lands or rights to their use or exploitation, and any personal property related to the land purchased by the Cook Inlet Region, Incorporated as authorized by the provisions of section 12(b) of Public Law 94–204 (43 U.S.C. 1611). The BLM maintains an accounting of the funds used by the Cook Inlet Region, Incorporated to purchase properties.

*State 5 Percent Share, Carson City Land Sales.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 STAT. 1113), requires that five percent of proceeds from the sale of 158 acres described in the statute shall be paid to the State of Nevada for general public education purposes.

The Helium Act Amendments of 1960, Public Law 86-777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities. The Helium Privatization Act of 1996 (HPA), Public Law 104-273, provided for the eventual privatization of the program and its functions, specifying that once the helium debt is retired, the Helium Production Fund would be dissolved. The debt was repaid at the beginning of fiscal year 2014. The Helium Stewardship Act of 2013 (HSA), Public Law 113-40, provided for continued operation of the Helium program while facilitating a gradual exit from the helium market. The Helium program consists of: (a) continued storage and transmission of crude helium; (b) oversight of the production of helium on Federal lands; and (c) administration of in-kind and open market crude helium gas sale programs. To minimize impacts to the helium market, the HSA provides a "glide path" from the sales mandated under HPA, increasing the sales price of helium through an auction mechanism and reducing the total volume of helium sold each year, until the amount in storage reaches 3.0 billion cubic feet. At that point, the remaining helium will be reserved for Federal users. Additionally, HSA provides for a hard deadline to sunset the program and sell off the program assets by 2021.

The Bureau of Ocean Energy Management (BOEM) manages the exploration and development of the nation's offshore energy and marine mineral resources on the U.S. Outer Continental Shelf (OCS). The marine environment includes vast deposits of oil and natural gas, non-energy minerals, as well as renewable resources such as offshore wind, wave and ocean currents. BOEM's goal is to balance economic development, energy security, and environmental protection through responsible and transparent management of offshore resources based on the best available science. In carrying out this mission, the Bureau manages a range of OCS activities. This includes preparing a five-year oil and gas leasing program, which identifies OCS areas (parcels of the seafloor) to be offered to industry for development, and subsequently conducting oil and gas lease sales under the program. In addition, BOEM supports leasing and permitting for OCS renewable energy development, manages OCS sand and gravel resources, conducts environmental reviews, and oversees national resource assessments of oil, gas and other mineral resource potential on the OCS. As the Nation's designated steward of mineral resources on the OCS, BOEM works diligently to build a successful offshore program with a legal and regulatory framework that will provide for safe and environmentally sound OCS mineral resource development. The Ocean Energy Management account includes the following budget activities: Renewable Energy, Conventional Energy, Environmental Programs, General Support Services, and Executive Direction.

**Renewable Energy.**—Oversees renewable energy program development and implementation, including: identification of wind energy areas; environmental and compliance work; issuance of offshore renewable energy leases; review of site assessment, construction, and operation plans; and consultation with state and local governments, other Federal agencies, and other stakeholders.

**Conventional Energy.**—Supports OCS oil and gas leasing, including planning the Five-Year OCS Oil and Gas Leasing Program; surveying OCS boundaries; conducting lease sales; administering leases; reviewing exploration and development plans; conducting technical and economic resource evaluation; and engaging in coastal and marine planning activities involving minerals other than oil and gas.

**Environmental Programs.**—Develops the environmental impact statements and environmental assessments needed to consider the potential environmental impacts of proposed actions in accordance with the National Environmental Protection Act and related regulations. Also conducts specific studies that address information needs associated with both conventional and renewable energy leasing activities on the Outer Continental Shelf.

**General Support Services.**—Funds shared support services for the Bureau, such as space, worker and unemployment compensation, voice and data communications, and other central services.

**Executive Direction.**—Funds bureau-wide leadership, management, coordination, communications strategies, and outreach. It includes budget management, Congressional and public affairs, and program policy and analysis.

COASTAL IMPACT ASSISTANCE

The Energy Policy Act of 2005 (P.L. 109-58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed annually to coastal States that have submitted approved coastal impact assistance plans. The program was transferred from the Bureau of Ocean Energy Management, Regulation and Enforcement (BOEMRE), now the Bureau of Ocean Energy Management (BOEM), to the U.S. Fish and Wildlife Service. Remaining balances from this program were transferred on October 1, 2011.

The Bureau of Safety and Environmental Enforcement (BSEE) was established on October 1, 2011, to aggressively enforce safety and environmental protection requirements for energy operations on the 1.7 billion-acre U.S. Outer Continental Shelf (OCS). BSEE's mission is to promote safety, protect the environment, and conserve resources offshore through vigorous regulatory oversight and enforcement. The Offshore Safety and Environmental Enforcement account is BSEE's primary operating account. Activities include: Operations, Safety, and Regulation; Administrative Operations; General Support Services; and Executive Direction.

**Operations, Safety, and Regulation.**—Manages safety and environmental compliance activities associated with OCS oil and gas development plans and permits, including drilling permit application reviews; conducts facility inspections, including overseeing critical high-risk activities and identifying incidences of noncompliance with safety requirements; monitors industry compliance with mitigation and other environmental requirements; ensures offshore operators comply with oil spill planning and preparedness requirements; conducts accident investigations; oversees operator training and audit programs; conducts annual operator performance reviews; conducts research on emerging energy development technologies; and performs inspection verification of oil and gas production levels to help ensure the public receives a fair return from the sale of these public resources.

**Administrative Operations.**—Provides general administration and ethics programs, equal employment opportunity services, emergency management, finance, human resources, procurement, and information management. This activity also provides a full range of administrative and information management services to the Bureau of Ocean Energy Management (BOEM), as well as select services to other Departmental entities.

**General Support Services.**—Conducts shared activities and related support services for the bureau, such as rental and security of office space, workers' and unemployment compensation, voice and data communications, and other centrally provided services. BSEE provides some of these general support services to BOEM through a reimbursable service agreement.

**Executive Direction.**—Provides bureau-wide leadership, direction, management, coordination, communications strategies, and outreach. Conducts functions such as budget, congressional and public affairs, and policy and program analysis.

**Environmental protection.**— This activity funds those functions that directly contribute to ensuring that the environment is protected during surface coal mining operations. It also addresses activities to ensure coal operators adequately reclaim the land after mining is completed.

Under this activity, the Office of Surface Mining Reclamation and Enforcement provides grants and support to States to operate enforcement programs on State and private lands under the terms of the Surface Mining Control and Reclamation Act of 1977. This activity also provides for the operation of enforcement programs on Federal and Indian lands, as well as Federal oversight of these regulatory programs.

**Technology development and transfer.**—This activity provides funding to enhance the technical skills that States and Indian Tribes need to operate their regulatory programs. It provides technical tools, such as the Applicant Violator System, to States and Indian Tribes to solve problems related to the environmental effects of coal mining and technical assistance to address specific coal mining issues.

**Financial management.**—This activity provides resources for managing, accounting, and processing collections and for pursuing delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability to deny new mining permits to applicants with unabated State or Federal violations.

**Executive direction and administration.**—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

**ABANDONED MINE RECLAMATION FUND**  
(Legislative proposal, subject to PAYGO)

The Budget proposes to return coal fees to the level prior to 2006, when an amendment to the Surface Mining Control and Reclamation Act reduced the fees. The proposal to return the fees to their historic levels will generate an additional \$52 million in 2015 that will be used to reclaim priority abandoned mine sites.

Public Law 109-432, as amended, authorizes mandatory Treasury payments to all States and Tribes equivalent to their share of the accumulated balance of the Abandoned Mine Reclamation Fund (i.e. prior balance funds). Prior balance fund payments were made over the past seven years and will be exhausted as of fiscal year (FY) 2015. The payments also return half of annual coal fee collections to States and Tribes that have certified completion of their abandoned coal mine reclamation programs, with a limitation of funding levels available to each certified State and Tribe of not more than \$75 million in FY 2015 (P.L. 113-40, Sec. 10(d)).

The Budget proposes to eliminate mandatory payments from the Treasury to States and Tribes that have been certified as completing reclamation of their abandoned coal mines, so that abandoned mine lands funds are only used to clean up the most hazardous abandoned coal mines.

Public Law 109-432 authorizes mandatory Treasury payments to three United Mine Workers of America retiree health benefit plans (the Combined Benefit Fund, the 1992 Plan, and the 1993 Plan), to the extent that other Federal funding sources do not meet the plans' expenditure needs, subject to certain limitations. Interest earned on Abandoned Mine Land trust fund balances is available for transfer to cover funding shortfalls in the plans; unobligated balances in the fund are used to generate interest for this purpose.

ADMINISTRATIVE PROVISION

With funds available for the Technical Innovation and Professional Services program in this or any other Act with respect to any fiscal year, the Secretary may transfer title for computer hardware, software and other technical equipment to State and tribal regulatory and reclamation programs. BUREAU OF RECLAMATION

Appropriations to the Bureau are made from the General Fund and special funds. The source of funds are a) the General Fund, which funds other projects or programs. Among the projects funded from the General Fund are the Colorado River Basin

Project and the Colorado River Storage Project; b) the Reclamation Fund, derived from repayments and other revenues from water and power users, receipts from the sale, lease, and rental of Federal lands, and certain oil and mineral revenues. Program activities that can be financed from the Reclamation Fund are those that directly benefit the 17 Western States and are for the purposes authorized under "Reclamation Law"; c) the Central Valley Project Restoration Fund, consisting of revenues from project beneficiaries; and d) other sources such as the Colorado River Dam Fund, which generates revenue from the sale of Boulder Canyon power, and the recreation, entrance, and user fee account, consisting of fees collected pursuant to the Land and Water Conservation Fund Act of 1965, as amended. Non-Federal entities also advance funds for operation and maintenance and provide funds under the Contributed Funds Act. The Water and Related Resources account supports the development, management, and restoration of water and related natural resources in the 17 Western States. The account includes funds for operating and maintaining existing facilities to obtain the greatest overall level of benefits, to protect public safety, and to conduct studies on ways to improve the use of water and related natural resources. Work will be done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues and stretch limited water supplies. The American West is the fastest growing region of the country and faces serious water challenges. Adequate and safe water supplies are fundamental to the health, economy, security, and ecology of the country. With increased demands for water from growth and energy needs, amplified recognition of environmental water requirements, and the potential for decreased supplies due to drought and climate change, a water balance cannot be achieved without water conservation and water reuse. In 2015, Reclamation will help address these issues through a water conservation program, which includes cost-shared grants for conservation and water and energy management improvement projects; basin-wide planning studies that will evaluate and address the impacts of climate change; cooperative watershed management; and funding of water reuse and recycling projects through the Title XVI Water Reclamation and Reuse Program. Reclamation will also partner with States, Tribes

and local entities under the program to develop incentives and best practices for implementing water and energy conservation and water recycling projects.

This account funds activities that are consistent with the CALFED Bay-Delta Program, a collaborative effort involving State and Federal agencies and representatives of California's urban, agricultural, and environmental communities. The goals of the program are to improve fish and wildlife habitat, water supply reliability, water quality, and levee integrity in the San Francisco Bay-San Joaquin River Delta, the principal hub of California's water distribution system.

This account receives funding (user fees and repayment receipts) from the Friant Division long-term water contractors and other Federal and non-Federal sources to implement the provisions described in the Settlement (Settlement) for the National Resources Defense Council et. al. v. Rodgers lawsuit. The Settlement's two primary goals are: 1) To restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish; and 2) To reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement.

The Utah Reclamation Mitigation & Conservation account was established under Title IV of Public Law 102-575 to reflect contributions from the State of Utah, the Federal Government (through the Secretary of the Interior and the Western Area Power Administration), and project beneficiaries (the Conservancy District). The requirement for contributions from the State, the Secretary, and the Conservancy District ended in 2001. The requirement for contributions from the Western Area Power Administration ended in 2013. Funds are deposited into the account as principal and may not be expended for any purpose. Interest earned annually on the account is available for expenditure without further appropriations by the Utah Reclamation Mitigation and Conservation Commission which has the option to use the funds for the mitigation, conservation, and enhancement of fish and wildlife and recreational resources, or to reinvest the funds into the account as principal.

The U.S. Geological Survey (USGS) provides research and scientific information to support the mission of the Department of the Interior (Interior) and its science requirements. The USGS also works in collaboration with other Federal, State, and tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and environmental issues, including the water, land, geologic, and biological resources of the Nation. The USGS budget continues science programs that generate relevant, objective information for natural resource managers and for communities throughout the Nation and engages in partnerships with universities, research institutions, and major public and private laboratories.

**Ecosystems.**—The USGS Ecosystems mission area monitors and inventories biological resources and ecological systems; provides scientific information for the management of biological resources and their habitats; studies and predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats; conducts the high priority ecological and biological research needed by Interior land management bureaus and to support interagency efforts; and operates the Cooperative Research Unit program, a university-based fish and wildlife research program focusing on graduate education and training of future natural resource professionals.

**Climate and Land Use Change.**—The USGS Climate and Land Use Change mission area conducts scientific research, monitoring, remote sensing, modeling, and forecasting to address the effects of climate and land use change on the Nation's natural resources. The resulting research and products are provided as the scientific foundation upon which policymakers, natural resource managers, and the public make informed decisions about the management of natural resources. Landsat satellites and data systems are developed, operated, and maintained to ensure a continuous global record of moderate-resolution land images.

**Energy, Minerals, and Environmental Health.**—The USGS Energy, Minerals, and Environmental Health mission area includes scientific activities that support decision making related to natural resource security; environmental, wildlife, and human health; land and resource management; and economic development. The mission area provides scientific information for assessments and research on mineral and energy resource potential, production and consumption, and environmental impacts of permitting, extraction, and use in the United States and around the

SURVEYS, INVESTIGATIONS, AND RESEARCH—Continued

world. The mission area also provides information and tools to decision makers and the public regarding environmental contaminants, including impacts on susceptible ecosystems and implications for human, wildlife and fish health.

**Natural Hazards.**—The USGS plays a critical role in providing policymakers and the public with a clear understanding of potential threats from natural hazards, societal vulnerability to these threats, and strategies for achieving resilience to earthquakes, volcanic eruptions, landslides, floods, hurricanes, solar storms, tsunamis, and wildfires. The USGS Natural Hazards mission area is working with its partners and stakeholders to define and mitigate risks, build understanding of natural hazard processes, and characterize the potential impact and consequences on human activity, health, the economy, and the environment. This mission area includes USGS activities that characterize and assess coastal and marine processes, conditions, change and vulnerability.

**Water Resources.**—The USGS is one of the primary Federal science agencies that provides information about water resources. To fulfill this responsibility, the USGS Water Resources mission area produces data, analyses, and assessments, and develops methodologies to support Federal, State, tribal, and local government decisions in managing water resources for domestic, agricultural, commercial industrial, recreational, and ecological uses; protecting and enhancing water resources for human health, aquatic health, and environmental quality; minimizing loss of life and property as a result of water-related natural hazards, such as floods, droughts, and land movement; and contributing to sustainable stewardship and development of the Nation's resources for the benefit of present and future generations.

**Core Science Systems.**—The USGS Core Science Systems mission area conducts fundamental research and provides data about the Earth, its complex processes, and its natural resources. These activities provide the Nation with natural science information to support response planning for natural hazards and to manage natural resources. Core Science Systems produces geological, geophysical, and geochemical maps and three-dimensional geologic frameworks that provide critical data for sustaining and improving the quality of life and economic vitality of the Nation. This mission area creates the informatics framework and provides scientific content needed for understanding and stewardship of our Nation's ecological, geologic, and geospatial resources.

**Science Support.**—The USGS Science Support mission area provides Bureau-wide executive direction and coordination, business administration and financial management, and management of information technology infrastructure, processes and systems.

**Facilities.**—The USGS Facilities mission area provides safe, functional workspace, state of the art labs, and facilities for the USGS to accomplish its scientific mission. The mission area provides rental payments and operation and maintenance for properties and maintenance and capital improvement for existing assets.

**Reimbursable program.**—Reimbursements from non-Federal sources are from States, Tribes, and municipalities for: cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission-related work performed at the request of the financing agency.

**Ecological Services.**—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help protect and recover species that are listed under the Endangered Species Act and work toward making the listing of additional species unnecessary. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize adverse environmental effects of development projects. Contaminants are investigated, monitored, and assessed for effects on trust resources.

**Habitat Conservation.**—Through technical and financial assistance the Service promotes the protection, conservation and res-

toration of the nation's fish and wildlife resources. These conservation activities are accomplished through a voluntary citizen and community based stewardship program with partners on private lands. Conserving the nation's coastal trust resources is accomplished through collaboration with others on public and private lands.

**National Wildlife Refuge System.**—The Service maintains the National Wildlife Refuge System consisting of 562 refuges, waterfowl production areas in 209 counties managed by 38 wetland management districts, and 50 wildlife coordination areas. The National Wildlife Refuge System administers this network of more than 150 million acres of land and waters to conserve and restore fish, wildlife, plants, and their habitats, for the benefit of present and future generations of Americans.

**Conservation and Enforcement.**—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 1,000 species of birds. Grants and partnerships are key to these programs, such as the Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protection laws, and works in partnership with international, State, and Tribal counterparts to conserve wildlife resources. The Service, through the International Affairs Program, works with private citizens, local communities, State and Federal agencies, foreign governments, and non-governmental organizations in the United States and internationally to promote a coordinated domestic and international strategy to protect, restore, and enhance the world's diverse wildlife and their habitats, with a focus on species of international concern.

**Fisheries.—Fish and Aquatic Conservation.**—The Fish and Aquatic Conservation Program consists of 72 interconnected National Fish Hatcheries, nine Fish Health Centers, six Fish Technology Centers, and 65 Fish and Wildlife Conservation Offices. Working with partners, the program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American public.

**Science Support.**—Science Support provides funding for applied science directed at high impact questions surrounding threats to fish and wildlife resources to provide answers for critically needed regulatory and policy question to best manage species at healthy and sustainable levels across broader landscapes.

**Cooperative Landscape Conservation.**—Through a national network of Landscape Conservation Cooperatives (LCCs), the Service enhances its core capacity in biological planning and conservation design to strategically address the problems fish and wildlife will face in the future. These LCCs, in cooperation with both Federal and non-Federal partners, will conduct the planning necessary to implement effective on-the-ground strategies and actions to help fish, wildlife, and plants adapt to future challenges. The information gathered will also help to define clear conservation objectives, inform conservation management decisions, focus management actions where they will have the most effect on the landscape, and supply scientific knowledge and expertise needed most by the Service and its partners.

**General Operations.**—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all of the Fish and Wildlife Service's programs. The funds also support the National Conservation Training Center and projects through the National Fish and

Wildlife Foundation to restore and enhance fish and wildlife populations.

The State and Tribal Wildlife Grants program provides funds to States, Commonwealths, the District of Columbia, and Territories primarily through a formula-based apportionment. Additionally, a competitive program uses a merit-based process to fund the best outcome-oriented, results-based projects. At the discretion of affected States, the competitive program may be used by regional associations of State fish and wildlife agencies. Tribes also receive funds through a national competitive award process. These funds are provided to stabilize, restore, enhance, and protect species and their habitat that are of conservation concern, thereby avoiding the costly and time-consuming process that occurs when habitat is degraded or destroyed and species populations plummet.

Federal Land Acquisition funds are used to protect areas that have native fish or wildlife values and provide natural resource benefits over a broad geographical area. Funds in this account also cover acquisition management activities, such as title fees and land surveys. The Service places emphasis on acquiring important fish, wildlife, and plant habitat for the conservation of listed endangered and threatened species. The Federal Land Acquisition program uses alternative and innovative conservation tools, including conservation easements, and implements projects that have the input and participation of the affected local communities and stakeholders. In addition, the 2015 Federal Land Acquisition program builds on efforts started in 2011 to strategically invest in interagency landscape-scale conservation projects while continuing to meet agency-specific programmatic needs. The Department of the Interior and the U.S. Forest Service collaborated extensively to develop a process to more effectively coordinate land acquisitions with government and local community partners to achieve the highest priority shared conservation goals.

**Mandatory Land and Water Conservation Fund.**—The Administration proposes \$900 million in discretionary and mandatory funding in FY 2015, and proposes to permanently authorize \$900 million in annual mandatory funding for the Departments of the Interior and Agriculture Land and Water Conservation Fund programs beginning in fiscal year 2016.

The Landowner Incentive Program provided cost-shared, competitive grants to States, Commonwealths, the District of Columbia, Territories, and Tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These programs provided technical and financial assistance to private landowners to help them protect and manage imperiled species and their habitat, while continuing to engage in traditional land use or working conservation practices. The program was phased out in 2008 and minimal balances remain in this account.

Funds deposited into this account include import duties on arms and ammunition and receipts in excess of Postal Service expenses from the sale of Migratory Bird Hunting and Conservation Stamps, i.e. Duck Stamps. These funds are used to acquire land and water for migratory bird refuges and waterfowl production areas. In addition, any funds reverted from the States within the Federal Aid in Wildlife Restoration Fund are available for this

purpose. The 2015 budget proposes legislation to increase the fees generated by the sale of the stamps for waterfowl.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707). The North American Wetlands Conservation Fund supports wetlands con-

 servation projects approved by the Migratory Bird Conservation Commission. Interest on obligations held in the Federal Aid in Wildlife Restoration Fund is also available for this purpose. In addition, a portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration, and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories for species and habitat conservation actions on non-federal lands, including habitat acquisition, conservation planning, habitat restoration, status surveys, captive propagation and reintroduction, research, and education for species that are listed, or species that are candidates for listing, as threatened or endangered. These activities support recovery efforts and Habitat Conservation Plans in partnership with local governments and other interested parties to protect species. Appropriations to this account are financed by the Land and Water Conservation Fund and the Cooperative Endangered Species Conservation Fund. The latter

is an unavailable receipt account that receives a transfer from the General Fund of the U.S. Treasury equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts plus Lacey Act receipts over \$500,000. Funds made available for grants from the two accounts are subject to annual appropriations authorized by Congress.

**Mandatory Land and Water Conservation Fund.**—The Administration proposes \$900 million in discretionary and mandatory funding in FY 2015, and proposes to permanently authorize \$900 million annual mandatory funding for the Departments of the Interior and Agriculture Land and Water Conservation Fund programs, including the Cooperative Endangered Species Conservation Fund program, beginning in fiscal year 2016.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes the Service to make payments to counties in which Service fee lands are located from revenues resulting from the sale of products from Service lands, less expenses for producing revenue and activities related to revenue sharing. While direct appropriations have previously been used to supplement revenues, the 2015 Budget eliminates discretionary funding as formulas contained in the Act do not account for the economic benefits which refuges provide.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 164 U.S. Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program demonstrates the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. Recreation fees are often used at U.S. Fish and Wildlife Service sites to fund student interns and for various youth programs focusing on hunting, fishing, wildlife observation, wildlife photography, environmental education, and environmental interpretation. The FLREA authorizes this program through 2014 and the program was extended until 2015 in the Continuing Appropriations Act, 2014 (Public Law 113-46).

The Administration proposes legislation to permanently authorize the recreational fee programs of the Departments of the Interior and Agriculture under FLREA. FLREA is currently set to expire on December 8, 2015.

The Federal Aid in Wildlife Restoration Act (16 U.S.C. 669 et seq.), now known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education

and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program, as well as the Firearm and Bow Hunter Education and Safety Program that provides grants to the States.

COASTAL IMPACT ASSISTANCE—Continued

et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed annually to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases. In fiscal year 2011, this program was transferred from the Bureau of Ocean Energy Management, Regulation, and Enforcement to the U.S. Fish and Wildlife Service.

The Federal Aid in Sport Fish Restoration Act, now known as the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777 et seq.), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment and certain other sport fish related products and fuel.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program. It also provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The Sport Fish Restoration Act specifies that the net deposits made into the Sport Fish Restoration and Boating Safety Trust Fund, minus the distributions for administrative expenses, special commissions, the Boating Council, and Multistate Grants, be distributed to support the following:

*The Coastal Wetlands Planning, Protection, and Restoration Act (16 U.S.C. 3951 et seq.)*.—18.5 percent of net deposits, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, are to be made available and distributed as follows: 70 percent to the Army Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent to the U.S. Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the U.S. Fish and Wildlife Service for wetlands conservation projects per the North American Wetlands Conservation Act (16 U.S.C. 4407).

*Boating Safety Programs*.—18.5 percent of net deposits are to be made available to the Department of Homeland Security (United States Coast Guard) for state recreational boating safety programs.

*The Clean Vessel Act*.—2 percent of net deposits are to be made available to the Secretary of the Interior for grants to States, Commonwealths, the District of Columbia and Territories, as determined through a competitive award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities, as well as for educational programs on proper disposal of sewage.

*National Outreach and Communications Programs*.—2 percent of net deposits are to be made available to the Secretary of the Interior to develop national and State outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources.

*Boating Infrastructure Programs*.—2 percent of net deposits are to be made available to the Secretary of Interior to make grants to States, as determined through a competitive award process, for the development and maintenance of facilities for transient non-trailerable recreational vessels 26 feet or longer.

The remaining 57 percent is provided to the States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat, and provision of access for public use.

The National Park Service administers 401 areas and 84.5 million acres of land in 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. In 2013, park visits totaled 281 million. This annual appropriation funds the operation of individual units of the National Park System through two budget activities. Funds within

this appropriation are available for one year, with the exception of repair and rehabilitation funds and funds for the cooperative restoration of the Everglades, which are both funded for two years. In 2015, the Budget also requests a \$30 million increase for the Centennial Initiative in this account.

The first activity, Park Management, covers the management and operation of park areas, and is divided into five subactivities that represent functional areas:

*Resource stewardship.*—Encompasses resource management operations that provide for the protection and preservation of the unique natural, cultural, and historical features of units in the National Park System.

*Visitor services.*—Includes operations that provide orientation, educational, and interpretive programs to enhance the visitor's park experience. It also provides for the efficient management of concession contracts, commercial use authorizations, and franchise fees for the benefit of visitors and the protection of resources.

*Park protection.*—Provides for the protection of park resources, visitors, and staff. Funding supports law enforcement operations that reduce vandalism and other destruction of park resources, safety and public health operations, and the operations of the United States Park Police.

*Facility operations and maintenance.*—Encompasses the maintenance and protection of buildings, other facilities, lands required to accommodate visitor use, and other government investments.

*Park support.*—Covers the management, supervision, and administrative operations for park areas and partnerships.

The second activity, External Administrative Costs, funds costs which are largely determined by organizations outside the National Park Service and for which funding requirements are therefore less flexible. The requirements for these costs are mandated in accordance with applicable laws. To promote the efficient performance of the National Park Service, these costs are most effectively managed on a centralized basis.

The National Recreation and Preservation appropriation covers a broad range of activities relating to outdoor recreation planning, preservation of natural, cultural and historic resources, and environmental compliance. These programs provide a central point at the Federal level for recreation and preservation planning; the coordination of Federal and State policies, procedures and

guidelines; and the administration of technical and financial assistance to Federal, State, and local governments and private organizations. Support is provided to the National Historic Preservation Program to develop a national inventory of historic properties, set standards for historic preservation, and provide technical and financial preservation assistance. Staff resources are also provided to coordinate a number of international assistance programs. This appropriation is comprised of the following seven budget activities:

**Recreation Programs.**—Provides technical assistance to State and local governments and transfers surplus Federal real property to local governments for recreation uses.

**Natural Programs.**—Increases river and trail opportunities through State and local technical assistance and Chesapeake Bay Gateway and Water Trails grants; creates river conservation and recreational opportunities that are compatible with continuing and future operations of hydropower facilities, fulfills National Park Service responsibilities under the Federal Power Act, and protects park resources through the Hydropower Recreation Assistance Program; and manages the National Natural Landmark program.

**Cultural Programs.**—Manages the National Register of Historic Places; reviews applications and certifies applications for Federal Tax Credits for Historic Preservation; conducts cultural resources management planning through the National Historic Landmarks program, the Historic American Buildings Survey, the Historic American Engineering Record and the Historic American Landscapes Survey programs; advances the application of science and technology in historic preservation and provides information distribution and skills training in the preservation and conservation of the Nation's significant historic and cultural resources through the National Center for Preservation Technology and Training; and coordinates the Federal archeology programs, the American Battlefield Protection Program Assistance Grants program, the Japanese American Confinement Site Grants program, and the Native American Graves Protection and Repatriation Grants program.

**Environmental Compliance and Review.**—Provides review and commentary on environmental impact statements, Federal licensing, permit applications, and other actions that may impact areas of National Park Service jurisdiction.

**Grants Administration.**—Provides administrative expenses associated with the Historic Preservation Fund grant programs, the Native American Graves Protection and Repatriation Grants program, the Japanese American Confinement Sites Grants, and the American Battlefield Protection Program Assistance Grants.

**International Park Affairs.**—Coordinates mandated international assistance programs and the exchange and support functions that complement the Service's domestic role.

**Heritage Partnership Programs.**—Provides financial and technical assistance to Congressionally designated national heritage areas, managed by private or State organizations to promote the conservation of natural, historic, scenic, and cultural resources.

The Urban Park Recreation Recovery Act of 1978 authorizes matching grants and technical assistance to eligible economically distressed urban communities to revitalize and improve recreation opportunities. The program provides direct Federal grants to local governments to rehabilitate existing indoor and outdoor recreation facilities; to demonstrate innovative ways to enhance park and recreation opportunities; and to develop local Recovery Action Plans to identify needs, priorities and strategies for revitalization of the total recreation system.

**Mandatory Land and Water Conservation Fund.**—The Administration proposes \$900 million in discretionary and mandatory funding in FY 2015, and proposes to permanently authorize \$900 million in annual mandatory funding for the Departments of the Interior and Agriculture Land and Water Conservation Fund programs beginning in fiscal year 2016.

The Construction appropriation is composed of five budget activities:

**Line item construction.**—This activity provides for the construction, rehabilitation, and replacement of facilities needed to accomplish the management objectives approved for each park. Projects are categorized as facility improvement, utility systems rehabilitation, historic preservation, or natural resource preservation.

**Special programs.**—This activity includes Emergency and Un-scheduled Projects, the Seismic Safety of National Park System Buildings Program, Employee Housing, Dam Safety, and Equipment Replacement.

**Construction planning.**—This activity includes the project planning function in which funds are used to prepare working drawings, specification documents, and contracts needed to construct or rehabilitate National Park Service facilities.

**Construction program management and operations.**—This activity provides centralized design and engineering management services, as well as contracting services for park construction projects.

**Management planning.**—Under this activity, funding is used to prepare and update Unit Management Plans. The plans guide National Park Service actions for the protection, use, development, and management of each park unit. Funding also is used to conduct studies of alternatives for the protection of areas that may have potential for addition to the National Park System and for environmental impact planning and compliance.

The Land Acquisition and State Assistance appropriation uses funding derived from the Land and Water Conservation Fund to support the National Park Service land acquisition activities and provide grants to States for the purchase and development of land for outdoor recreation activities. The appropriation is composed of the five following budget activities:

**Federal land acquisition administration.**—Provides for the administration of land acquisitions throughout the National Park System, ensuring compliance with existing guidelines and laws.

**Federal land acquisition.**—Provides for the acquisition of land and interests in land to preserve and protect, for public use and enjoyment, the historic, scenic, natural, and recreational values of congressionally authorized areas within the National Park System. Funds are also used for matching grants for the purchase of Civil War Battlefield lands by non-Federal entities. The 2015 Federal Land Acquisition program builds on efforts started in 2011 to strategically invest in interagency landscape-scale conservation projects while continuing to meet agency-specific programmatic needs. The Department of the Interior and the U.S. Forest Service collaborated extensively to develop a process to more effectively coordinate land acquisitions with government and local community partners to achieve the highest priority shared conservation goals.

**State conservation grants administration.**—Provides for the administration of matching grants to States and through States

to local governments, for the acquisition and development of public outdoor recreation areas and facilities.

*State conservation grants.*—This activity provides matching grants to States and local units of government for the acquisition and development of land and facilities that will provide the public access to new opportunities to engage in outdoor recreation.

*Outer Continental Shelf Oil Lease Revenues.*—The Gulf of Mexico Energy Security Act of 2006 (P.L. 109–432) allows a portion of the revenue collected from oil and gas leasing activities in qualified areas just becoming available for leasing in the Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund and distributed to States in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These new OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Omnibus Appropriations Act, 2009 (P.L. 111–8) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration.

*Mandatory Land and Water Conservation Fund.*—The Administration proposes \$900 million in discretionary and mandatory funding in fiscal year 2015, and proposes to permanently authorize \$900 million in annual mandatory funding for the Departments of the Interior and Agriculture Land and Water Conservation Fund programs beginning in fiscal year 2016.

**Recreation Fee Program.**—The National Park Service and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). FLREA was passed on December 8, 2004, as part of the Omnibus Appropriations Act, 2005, and authorized this program through 2014. The Continuing Appropriations Act, 2014 (Public Law 113-46), extended FLREA through 2015. The Administration proposes to permanently reauthorize the Department of the Interior's and the Department of Agriculture's recreation fee programs in FY 2015. Net proceeds are used for high-priority visitor service and facility management projects throughout the National Park System. Up to 80 percent may be retained for use by the collecting park and the remainder retained for discretionary, Servicewide use by the National Park Service Director. Proceeds from the sale of the America the Beautiful passes, which allow access to all public lands that charge fees for a year, are distributed among the Federal land management agencies which offer them for sale, including the National Park Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of Reclamation and the U.S. Forest Service, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with Public Law 108-447.

**Deed-restricted parks fee program.**—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with Public Law 105-327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

**Transportation systems fund.**—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of Public Law 105-391.

**Educational expenses, children of employees, Yellowstone National Park.**—Revenues received from the collection of short-term recreation fees to the Park are used to provide education facilities to pupils who are dependents of persons engaged in the administration, operation, and maintenance of Yellowstone National Park (16 U.S.C. 40a).

**Payment for tax losses on land acquired for Grand Teton National Park.**—Revenues received from fees collected from visitors are

used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

The Historic Preservation Fund appropriation includes grant programs to facilitate the preservation of the Nation's historic and cultural resources. This appropriation provides grants-in-aid to States, Territories, and Indian Tribes. Grants-in-aid to States and local governments require a 40 percent funding match; grants to Tribes do not require matching funds. Beginning in 2014, in addition to the traditional grants-in-aid described above, the account includes a competitive grant program for the survey and nomination of properties associated with communities currently underrepresented in the National Register and as National Historic Landmarks. These grants are not subject to the 40 percent matching requirement.

The Operation of Indian Programs appropriation consists of a wide range of services and benefits provided primarily to Federally-recognized Indian Tribes, Alaskan Native groups, and individual American Indians and Alaska Natives, to fulfill Federal trust responsibility and implement Federal Indian policy.

This account covers expenses associated with the following activities:

**Tribal Government.**—This activity promotes the sovereignty of Federally-recognized Tribes by supporting and assisting them in the development and maintenance of strong and stable gov-

ernments capable of administering quality programs and developing economies. This activity also provides for the maintenance of Bureau of Indian Affairs (BIA) roads and bridges.

**Human services.**—This activity provides funding for social services, housing improvement, welfare assistance, and Indian child welfare. The objective of this activity is to improve the quality of life for individual Indians who live on or near Indian reservations and to protect children, the elderly, and disabled from abuse and neglect.

**Trust: Natural resources management.**—This activity provides for the management, development, and protection of Indian trust land and natural resource assets. Natural resource programs in Indian Country include agriculture, forestry, water, fish, wildlife, and parks.

**Trust: Real estate.**—This activity promotes cooperative efforts with landowners for the optimal utilization, development, and enhancement of trust and restricted Federal Indian-owned lands. The activity includes general real estate services, probate, land title and records, environmental compliance, and other trust services and rights protection.

**Education.**—This activity supports Bureau of Indian Education (BIE) tribal elementary and secondary school operations, other education programs for elementary-aged Indian children, tribal post-secondary schools, education program management, and facilities maintenance. The BIE-funded schools include 169 elementary and secondary BIE- and tribally-run schools, 14 dormitories, two post-secondary schools, and operating grants to eligible tribal colleges and universities.

**Public safety and justice.**—This activity funds law enforcement activities on approximately 56 million acres of Indian Country in 35 States. Programs under this activity include investigative, police, and detention services; tribal courts; fire protection; and facilities maintenance.

**Community and economic development.**—This activity promotes the economic vitality of American Indians and Alaska Natives through Job Placement and Training, Economic Development, and Community Development. This activity also provides assistance for renewable and conventional energy and hard mineral development for the economic and social benefit of the Tribes and individual Indian allottees.

**Executive direction and administrative services.**—This activity supports the management of BIA's and BIE's finance, budget, acquisition, and property functions, as well as information technology resources, personnel services, facilities management, payment of GSA and direct rentals, and intra-governmental payments. Significant portions of Indian Affairs activities are executed under contracts or compacts with Federally-recognized Tribes to run tribal and Federal programs. Funding also supports BIA or BIE oversight and technical assistance for these activities in central and regional offices.

This appropriation funds a program to consolidate fractional interests in Indian lands and assist land owners with estate planning. Funds are used to purchase small interests in parcels of lands from willing individual Indian landowners and convey those interests to the tribe on whose reservation the land is located. Consolidation of these interests is expected to reduce the Government's costs for managing Indian lands and promote economic opportunity on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), the American Indian Probate Reform Act of 2004 (P.L. 108-374), and other authorities. No funding is requested in 2015 in this account. Implementation of the Individual Indian Money Account Litigation Settlement (Public Law 111-291, Title I) to address fractionation is in a separate account in the Office of the Secretary.

**Donations and contributed funds.**—The Secretary of the Interior may accept donations of funds or other property, and may use the donated property in accordance with the terms of the donation in furtherance of any program authorized by other provision of law for the benefit of Indians (25 U.S.C. 451).

**ADMINISTRATIVE PROVISIONS**

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts, and grants, either directly or in cooperation with States and other organizations.

Notwithstanding 25 U.S.C. 15, the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office oversight and Executive Direc-

tion and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Education, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

No funds available to the Bureau of Indian Education shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau of Indian Education school system as of October 1, 1995, except that the Secretary of the Interior may waive this prohibition to support expansion of up to one additional grade when the Secretary determines such waiver is needed to support accomplishment of the mission of the Bureau of Indian Education. Appropriations made available in this or any prior Act for schools funded by the Bureau shall be available, in accordance with the Bureau's funding formula, only to the schools in the Bureau school system as of September 1, 1996 and to any school or school program that was reinstated in fiscal year 2012. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1141 of the Education Amendments of 1978 (25 U.S.C. 2021)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106-113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101-301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula. This appropriation supports the functions of the Office of the Secretary of the Interior, including executive-level leadership, policy, guidance, and coordination of the responsibilities carried out by its bureaus and offices. In addition, the appropriation supports programmatic functions carried out by the Office of the Secretary including mineral revenue collections, the Take Pride in America program, the Department's quasi-judicial and appellate responsibilities, and the Office of Valuation Services. The appropriation also provides for workers and unemployment compensation payments for former Bureau of Mines employees.

*Office of Natural Resources Revenue (ONRR).*—The Office of Natural Resources Revenue's mission is to collect, disburse, and verify Federal and Indian energy and other natural resources revenues on behalf of all Americans. Revenues collected by ONRR represent a significant source of non-tax revenue to the Federal Government. The ONRR disburses mineral revenues to States, the Office of the Special Trustee for American Indians, other Federal agencies, and the General Fund of the United States Treasury. Through ONRR, the Administration will continue to implement mineral revenue collection and reporting reforms, including the termination of the royalty-in-kind (RIK) program, the implementation of the Extractive Industries Transparency Initiative, and the implementation of recommendations from the Government Accountability Office, the Department's Inspector General, and others. To solidify its reform of the RIK program, the Administration will propose legislation to repeal all Federal

authorities to accept future royalties in-kind (rather than in cash).

Under the Mineral Leasing Act, States receive fifty-percent of Federal revenues generated from mineral production occurring on Federal lands within that State's boundaries. Alaska is the exception, receiving a 90 percent share of receipts from Federal mineral leasing in that State (exclusive of the National Petroleum Reserve-Alaska). To partially cover the costs of administering the Federal mineral leasing program, the Bipartisan Budget Act permanently amended the Mineral Leasing Act (MLA) to deduct two percent from the required payments to States under the Act.

Flood control payments to States are shared according to the Flood Control Act of 1936 (33 U.S.C. 701 et seq.) which provides that 75 percent of revenue collected be shared with the State in which it was collected. These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the revenue was collected, or for defraying other expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements. Payments are administered by the Office of Natural Resources Revenue.

As of May 23, 1908 (16 U.S.C. 499), 25 percent of the revenues collected from onshore mineral leasing and production on national forest lands have been paid to the State in which the national forest resides. A State's payment is based on national forest acreage. Where a national forest is situated in several States, an individual State payment is proportionate to its area within that particular national forest. These payments are now administered by the Office of Natural Resources Revenue within the Department of the Interior's Office of the Secretary.

**Terminate geothermal payments to counties.**—The Budget proposes to repeal the 25 percent geothermal lease revenue sharing payments to counties established by the Energy Policy Act of 2005 (P.L. 109-58) and return to the traditional 50/50 Federal-State revenue sharing arrangement. States have the flexibility

to allocate their share of revenue from Federal leases to counties, if appropriate.

The Gulf of Mexico Energy Security Act of 2006 opened some additional areas in the Gulf of Mexico for offshore oil and gas leasing, while maintaining moratoria on activities east of the Military Mission Line and within certain distances from the coastline of Florida. The Act provides that 37.5 percent of Outer Continental Shelf revenues from certain leases be distributed to four coastal States (Alabama, Louisiana, Mississippi, and Texas) based on a complex allocation formula, with most distributions subject to an annual cap in later years. The receipts are available in the year following collection, and the funding provided is to be used primarily for coastal protection and restoration activities. These payments are now administered by the Office of Natural Resources Revenue within the Department of the Interior's Office of the Secretary.

Title IV of the Department of the Interior and Related Agencies Appropriation Act, 1998 (P.L. 105-83) established the Environmental Improvement and Restoration Fund account. As required by law, 50 percent of the principal and 50 percent of the interest from the Alaska Escrow account are deposited into the Environmental Improvement and Restoration Fund. The law requires that the corpus of the Fund be invested. Twenty percent of the interest earned by the Fund is permanently appropriated to the Department of Commerce and the unappropriated balance of interest remains in the fund. At this time, no budget authority is requested.

The Individual Indian Money Account Litigation Settlement (P.L. 111-291) established this fund to provide Indian land owners with an additional incentive to sell their fractionated interests, given that the market value associated with highly fractionated interests will be quite low in many cases. Not more than \$60 million may be transferred from the Trust Land Consolidation Fund to this fund for higher education scholarships for American Indians and Alaska Natives to be administered as described in the settlement agreement.

The Individual Indian Money Account Litigation Settlement (P.L. 111-291) established a new trust land consolidation fund for the buy-back and consolidation of fractionated interests in parcels of land from individual Indian landowners. The fund also covers administrative costs to undertake the process of acquiring fractionated interests and associated trust reform activities not to exceed 15 percent of the fund. The acquisition of fractionated interests is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), and the American Indian Probate Reform Act of 2004 (P.L. 108-374). The Settlement provides additional authority for the acquisition of interests held by persons who cannot be located after engaging in extensive efforts to notify them and locate them for a five-year period. The Settlement was finalized on November 24, 2012 and in accordance with the terms of the legislation, these funds remain available for ten years from the date of the Settlement.

Until October 1, 1994, the United States exercised jurisdiction over the Trust Territory of the Pacific Islands according to the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations. These responsibilities were carried out by the Department of the Interior.

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Remaining funds in the Trust Territory of the Pacific Islands account are being used to improve basic economic information and financial management capabilities in the insular areas; address compact impact related issues; and also for brown tree snake control.

**COMPACT OF FREE ASSOCIATION**

For grants and necessary expenses, \$3,318,000, to remain available until expended, as provided for in sections 221(a)(2) and 233 of the Compact of Free Association for the Republic of Palau; and section 221(a)(2) of the Compacts of Free Association for the Government of the Republic of the Marshall Islands and the Federated States of Micronesia, as authorized by Public Law 99-658 and Public Law 108-188. The peoples of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (Public Law 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free

Association Amendments Act of 2003, Public Law 108–188, continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023. The Compact of Free Association for the Republic of Palau was enacted on November 14, 1986 as P.L. 99–658, and was implemented on October 1, 1994. While the financial assistance provisions under the Compact of Free Association with the Republic of Palau were set to expire on September 30, 2009, subsequent appropriations in 2010 through 2014 have continued financial assistance to Palau at 2009 levels.

The Indian Gaming Regulatory Act established, within the Department of the Interior, the National Indian Gaming Commission. The Commission monitors and regulates gaming activities conducted on Indian lands. The Commission fosters the economic development of Indian Tribes by ensuring the integrity of Indian gaming on Indian lands and ensuring that the Tribes are the primary beneficiaries of their gaming revenues. Operating costs of the Commission are financed through annual assessments of gaming operations regulated by the Commission.

Public Law 94-565 (31 U.S.C. 6901-07), as amended, authorizes payments in lieu of taxes ("PILT payments") to counties and other units of local government for lands within their boundaries that are administered by the Bureau of Land Management, the U.S. Forest Service, the National Park Service, the Fish and Wildlife Service, and certain other agencies. The PILT payment

formula is based on a number of factors, including the amount of Federal land within an eligible unit of local government, its population, and certain other Federal payments the local government may receive.

Since the inception of the PILT program in 1977 through fiscal year 2007, PILT funding was subject to annual appropriations. The Emergency Economic Stabilization Act of 2008 provided a five-year (FYs 2008-2012) mandatory funding stream for PILT at the full authorization levels calculated using the existing PILT formula. The Moving Ahead for Progress in the 21st Century Act extended the mandatory authorization through 2013, and the Agricultural Act of 2014 (P.L. 113-79) extended the mandatory authorization through 2014.

The Central Hazardous Materials Fund is used to fund remedial investigations/feasibility studies and cleanups of hazardous waste sites for which the Department of the Interior is liable. Authority is provided for amounts recovered from responsible parties to be credited to this account. Thus, the account may be composed of both annual appropriations of no-year funds and of offsetting collections. The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 *et seq.*) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments will be performed in order to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, prepare for response to potential inland spills, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through cooperative assessment agreements, negotiated settlements, or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a Department-wide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 *et seq.*), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*), the Oil Pollution Act of 1990 (33 U.S.C. 2701 *et seq.*), and the Act of July 27, 1990 (16 U.S.C. 19jj *et seq.*). Since 1992, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

**EXXON VALDEZ RESTORATION PROGRAM**

The Budget reflects the receipts, transfers, and mandatory spending by the Department of the Interior associated with the civil and criminal settlements resulting from the 1989 *Exxon Valdez* oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and State of Alaska natural resource trustee agencies to restore the natural resources and services damaged by the spill. The *Exxon Valdez* Oil Spill Trustee Council consists of three State and three Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

The original civil settlement with the Exxon Corporation included a re-opener provision valid from September 2002 to September 2006, which provided an opportunity for the Trustee governments to claim up to an additional \$100 million for natural resource injury that could not have been known or anticipated at the time of settlement. In late 2006, the United States and the State of Alaska issued a demand letter for \$92 million to the ExxonMobil Corporation, as well a comprehensive restoration project plan for the clean up of lingering oil. Negotiations with ExxonMobil await completion of additional scientific studies.

The civil settlement and interest earned to date total roughly \$1 billion, of which \$219 million remains, outside the Treasury. The balance is managed on behalf of the Trustee Council by the State of Alaska (*Exxon Valdez* Investment Fund), with funds used for general restoration, habitat acquisition and protection, monitoring and research, public information, and science management and administration .

The 2015 Budget proposes to amend the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, to establish a new budget framework for the Wildland Fire Management program that is designed to provide stable funding for fire suppression, while minimizing the adverse impacts of fire transfers on the budgets of other fire and non-fire programs, as well as reduce fire risk, manage landscapes more comprehensively, and increase the resiliency of public lands and the communities that border them. In this proposed new budget framework, a portion of the funding need for suppression response is funded within the discretionary spending limits and a portion is funded in an adjustment to those limits. In addition, it does not increase overall discretionary spending, as it would reduce the ceiling for the existing disaster relief cap adjustment by an equivalent amount as is provided for wildfire suppression operations. More details are provided in the *Budget Process* chapter in the Analytical Perspectives volume.

**Preparedness.**—Funds the non-emergency and predictable aspects of the Department's wildland fire program, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning.

**Suppression Operations.**—Funds the emergency and unpredictable aspects of the Department's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Emergency stabilization actions may be performed within one year of containment of a fire. In FY 2013 and 2014, funding for the ten-year average of inflation-adjusted suppression obligations is split between the FLAME Wildfire Suppression Reserve Fund and this appropriation. The Budget request proposes an adjustment to the discretionary spending limits as a new approach for responsibly budgeting for wildland fire suppression to minimize the risk of fire transfers and provide more stability and certainty of funding to other programs to invest in critical forest and rangeland management needs. The Budget proposes base level funding of 70 percent of the 10-year average of suppression costs to be funded within the discretionary cap. The proposed cap adjustment would fund the remaining identified need for Suppression. The base level of funds ensures that the cap adjustment is only used for the most severe fire activity since it is one percent of the fires that results in 30 percent of the costs. In FY 2015, 70 percent of the 10-year average is \$269 million. The amount requested in the cap adjustment equals the difference between the total amount of suppression expenditures projected for the fiscal year, based on the Outyear Forecast developed by

the U.S. Forest Service's Southern Research Station, and the 70 percent of the 10-year suppression average that is requested within the discretionary budget caps. For 2015, the request for the budget cap adjustment is \$240 million. The DOI and Forest Service wildland fire management programs will continue to strengthen oversight and accountability of suppression spending and use risk management principles to guide decision-making at the strategic, program, and operational levels.

**Other Operations.**—Funds all other aspects of the wildland fire management program designed to reduce the risk of damage resulting from catastrophic wildland fires. Programs include Fuels Management, Resilient Landscapes, Fire Facilities Construction Maintenance, Burned Area Rehabilitation, and Joint Fire Science. The Fuels Management program conducts treatments aimed at mitigating risk to communities and their values, including areas in the wildland-urban interface. The Resilient Landscapes program, which is new in 2015, will conduct treatments that improve the integrity and resilience of our forests and rangelands. These treatments will be coordinated with and receive support, including bureau matching funds, from the resource management programs of the Interior fire bureaus. Both the Fuels Management and Resilient Landscapes programs will also contribute to community adaption to fire and improve the ability to safely and appropriately respond to wildfire. The budgets for the Fuels Management and Resilient Landscapes programs cover the planning, operational aspects, and monitoring of treatments. Both programs will utilize such treatment methods as prescribed fire, mechanical, chemical, and biological treatments or a combination of methods. In 2015, all Fuels Management and Resilient Landscapes project funding will be allocated using an integrated, risk based prioritization system. The Fire Facilities Construction and Maintenance program funds construction and maintenance of facilities to house firefighters and equipment used in wildland firefighting, fuels management, and resilient landscapes activities. Facilities funded in this activity include crew quarters, warehouses, fire caches, dispatch centers, fire stations, engine storage, and aviation bases. The Burned Area Rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The Joint Fire Science subactivity funds the Department's share of the Joint Fire Science program, an interagency partnership that sponsors and delivers applied research to assist field managers with fuels treatment, post-fire rehabilitation, smoke management and many other related topics.

Amounts in the FLAME fund include the portion of the ten-year average of suppression obligations, adjusted for inflation, intended to support the most severe, complex, and threatening fires. The Secretary may permit transfers from this account to cover these extreme fire events. The Secretary may also transfer funds in the event that DOI has exhausted its suppression resources due to an active fire season. In 2015, the Budget proposes to eliminate this account and will fund all suppression activities in the Wildland Fire Management account, with a portion of the suppression funds requested within the discretionary budget cap and a portion of the funds requested in a budget cap adjustment.

The Working Capital Fund finances services and activities that can be performed more effectively and efficiently in a centralized manner, including business services provided by the Interior Business Center (IBC), formerly the National Business Center. Activities financed through the fund include information technology and security, systems hosting and help desk services, Departmental news and information, aircraft services, central reproduction, supplies and health services, and safety and health initiatives. Departmental administrative systems hosted within the fund include the Federal Personnel and Payroll System and the Financial and Business Management System (FBMS). The IBC provides financial management, acquisition, and human resources services as well as payroll services to other agencies as one of the Government-wide payroll providers selected by OPM. Through

the National Indian Program Training Center, a component of DOI University, the Working Capital Fund provides training courses and other services related to Indian culture, law and programs to Federal government employees. The appropriated portion of the Working Capital Fund includes funding for FBMS operations and maintenance, Service First, and the care and management of the Department's cultural collections.
