This appropriation funds the construction, replacement, rehabilitation, and expansion of water resources projects whose principal purpose is to provide commercial navigation, flood and storm damage reduction, or aquatic ecosystem restoration benefits to the Nation, and related efforts. The Budget shows all funding provided through the Inland Waterways Trust Fund as well as a portion of the funding from the Harbor Maintenance Trust Fund as transferred to and executed in the Construction account.

This account allocates funds on a performance basis to high-performing projects, which improves the construction program's overall performance. The Budget funds those investments within the three main mission areas of the Corps civil works program—commercial navigation, flood and storm damage reduction, and aquatic ecosystem restoration—as well as related efforts (such as hydropower at multi-purpose dams) that provide the

best economic, environmental, and public safety returns to the Nation.

This account includes \$61 million for work under the Comprehensive Everglades Restoration Plan (CERP), which represents approximately 5 percent of the total amount in this account and 1 percent of the total amount in the civil works program. Funding CERP at this level would not have a significant impact on the overall civil works program in 2015. Construction account funding for CERP in future years will depend on the availability of funds, so the impact of such future funding on the overall civil works program cannot be determined at this time. Funding for the Department of the Interior (DOI) includes an additional \$8 million for work under CERP.

This account also includes \$5 million for other ecosystem restoration work by the Corps in South Florida, including the Everglades ecosystem. Funding for DOI includes \$54 million for such non-CERP work.

The Budget for the two agencies includes a total of \$128 million for ecosystem restoration work in South Florida, of which \$69 million is for CERP and \$59 million is for non-CERP work.

This appropriation also funds the Corps continuing authorities programs, which involve the planning, design, and construction of smaller projects that do not require specific authorizing legislation.

This appropriation funds inspection, operation, maintenance, and related activities for water resources projects operated and maintained by the Corps. These projects include navigation channels, navigation locks and dams, flood and storm damage risk reduction structures such as levees, and multi-purpose projects, as authorized in various River and Harbor, Flood Control, and Water Resources Development Acts. Related activities include aquatic plant control, monitoring of completed projects where appropriate, removal of sunken vessels, and the collection of domestic water and related resources statistics and data. Key infrastructure that is of central importance to the Nation and the continued safety of the public is given highest priority for funding in this account. Funding provided through the Harbor Maintenance Trust Fund is transferred primarily to and executed in the Operation and Maintenance account.

This appropriation funds all of the costs associated with protecting Corps facilities from potential security threats. It also funds the national emergency preparedness program under Executive Order 11490.

This account provides \$7 million for ecosystem restoration work in South Florida, including less than \$1 million for CERP. The operation and maintenance funding demands of CERP and non-CERP work are expected to slowly increase over time as construction projects are completed. The future impact of this on the overall civil works program is therefore linked in part to the pace of construction, which depends on the availability of funding and cannot be determined at this time.

This revolving fund provides for the acquisition, operation, and maintenance of plant and equipment used by the civil works program and for temporary financing of services chargeable to the civil works program. The fund also initially finances Corps district office operating expenses, which the districts later reimburse with project-specific funds. In addition, payments are made into the fund when other agencies or entities use plant and equipment acquired by the fund.

The Harbor Maintenance Trust Fund is authorized under the Harbor Maintenance Revenue Act of 1986 (P.L. 99-662, Title XIV), as amended. Revenue is derived from a 0.125 percent ad valorem tax imposed upon commercial users of specified U.S. ports, Saint Lawrence Seaway tolls, and investment interest. The Budget shows all funding provided through the Harbor Maintenance Trust Fund as transferred to and executed in the Construction, Operation and Maintenance, and Mississippi River and Tributaries accounts.

The Harbor Maintenance Revenue Act authorizes expenditures from this fund to finance up to 100 percent of eligible Corps harbor operation and maintenance costs, including the operation and maintenance of Great Lakes navigation projects. The fund fully finances eligible operation and maintenance costs of the Saint Lawrence Seaway Development Corporation. Section 201 of the Water Resources Development Act of 1996 (P.L. 104-303) authorizes the fund to pay the Federal share of the costs for the construction of dredged material disposal facilities that are necessary for the operation and maintenance of coastal or inland harbors, the dredging and disposal of contaminated sediments that are in or affect the operation and maintenance of Federal navigation channels, the mitigation of impacts resulting from Federal navigation operation and maintenance activities, and the operation and maintenance of dredged material disposal facilities.

The North American Free Trade Agreement Implementation Act (P.L. 103-182, section 683) authorizes payment from the fund of administrative expenses incurred by the Department of the Treasury, the Corps, and the Department of Commerce related to administration of the harbor maintenance tax, but not to exceed \$5 million in any fiscal year.

In 1998, the U.S. Supreme Court excluded all U.S. exports from the harbor maintenance tax. The Court found that the tax violated Article I, section 9, clause 5 of the constitution because the value of the cargo, which is the basis for calculating this tax, does not fairly match the use of port services and facilities by exporters.

The Inland Waterways Trust Fund is authorized under the Inland Waterways Revenue Act of 1978 (P.L. 95-502), as amended by the Water Resources Development Act of 1986 (P.L. 99-662). The fund is used to pay one half of the costs associated with the construction, replacement, rehabilitation, and expansion of Federal inland waterways projects.

Revenue currently is derived from an excise tax imposed on diesel fuel for commercial vessels on most of the inland waterways, plus investment interest. Funding provided through the Inland Waterways Trust Fund is transferred to and executed in the Construction account.
