THE DIRECTOR

EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
WASHINGTON, D.C. 20503

July 8, 2013

The Honorable John A. Boehner
Speaker of the House of Representatives
Washington, DC 20510

Dear Mr. Speaker:

Section 1106 of Title 31, United States Code, requests that the President send to the Congress a supplemental update of the Budget that was transmitted to the Congress earlier in the year. This enclosed supplemental update of the Budget, commonly known as the Mid-Session Review, contains revised estimates of receipts, outlays, budget authority, and the budget deficit for fiscal years 2013 through 2023.

Sincerely,

A handwritten signature in black ink, appearing to read "S M B", with a long horizontal flourish extending to the right.

Sylvia M. Burwell
Director

Enclosure

Identical Letter Sent to the President of the Senate

SUMMARY

This Mid-Session Review (MSR) updates the Administration's estimates for outlays, receipts, and the deficit for economic, legislative, and other changes that have occurred since the release of the President's 2014 Budget. The 2013 deficit is now projected to be \$759 billion, \$214 billion lower than the \$973 billion deficit projected in the Budget. As a percentage of gross domestic product (GDP), the 2013 deficit is now projected to equal 4.7 percent, down from the 6.0 percent projected in the Budget. Going forward, the MSR estimates that the deficit will fall to below 3 percent of GDP by 2017 and to about 2 percent of GDP by 2023. The MSR also shows that the Budget achieves the core goal of fiscal sustainability by putting Federal debt on a declining path as a share of the economy.

STRENGTHENING THE ECONOMIC RECOVERY

The President believes our top priority must be strengthening the true engine of economic growth—a rising and thriving middle class. He will continue to pursue policies to accelerate the recovery, speed job creation, and expand the middle class. The 2014 Budget demonstrates that we do not need to choose between making critical investments necessary to help grow our economy and support middle class families and continuing to cut the deficit in a balanced way. The Budget shows how we can do both. It offers concrete strategies to address three fundamental questions: How do we attract more jobs to our shores? How do we equip our people with the skills needed to do the jobs of the 21st Century? How do we make sure hard work leads to a decent living?

To once again make America a magnet for jobs, the Budget invests in high-tech manufacturing and innovation, clean energy, and infrastructure, while cutting red tape to help businesses grow. To give workers the skills they need to compete in the global economy, it invests in education and job training, and sets forth a visionary proposal to ensure every four-year-old has access to high quality pre-school. To ensure hard work is rewarded, it builds ladders of opportunity to help every American and every community. By identi-

fying offsets for each of these initiatives, the Budget invests in the potential of the middle class and our economy while keeping us on a fiscally disciplined long-term path.

While more work remains to be done, the U.S. economy has made significant progress in recovering from the worst downturn since the Great Depression. When the President took office in 2009, the private sector was losing over 800,000 jobs a month, credit markets that provide capital for investment had seized up, and businesses—small and large—were struggling. The housing market was in free fall and our auto industry was near collapse.

Through the determination and resiliency of the American people and the decisive actions of the President working with Congress to bolster job growth and jumpstart economic activity, we successfully broke the back of the recession and pulled the Nation back from the brink. The economy has been recovering ever since. We have seen positive economic growth for 15 consecutive quarters. Through June, the private sector has added jobs every month for 40 straight months, with a total of 7.2 million jobs added over that period. This year alone, more than 1.2 million private sector jobs have been added so far. The unemployment rate has fallen from a high of 10 percent in 2009 to 7.6 percent as of June. Manufacturers have added more than 500,000 jobs over the past three years. And the housing market and the auto industry continue to show signs of recovery.

But while the economy is adding jobs, too many Americans are still unemployed and have been looking for work for too long. Businesses are hiring again, but too many are still struggling to compete and find workers with the right skills to meet their needs. Home prices are rising at the fastest pace in seven years and construction is expanding, but too many families with solid credit are still finding it difficult to buy a home or refinance. And although corporate profits have climbed to all-time highs, wages and incomes for America's middle class have continued to stagnate.

By making investments in our people and infrastructure, we can strengthen the middle class, make America a magnet for jobs and innovation, and grow our economy. But economic growth alone will not solve our Nation's long-term fiscal challenges. That is why the President is committed to continuing to reduce the deficit in a balanced way.

THE ROLE OF DEFICIT REDUCTION IN PROMOTING SUSTAINED ECONOMIC GROWTH AND JOB CREATION

Over the past few years, we have experienced the fastest period of deficit reduction since the years immediately following World War II. The President and the Congress have achieved over \$2.5 trillion in deficit reduction by cutting spending by more than \$1.4 trillion, achieving more than \$600 billion in new revenue from raising tax rates on the wealthiest Americans, and realizing interest savings. As a Nation we are more than halfway toward the goal of \$4 trillion in deficit reduction that bipartisan, independent experts have identified as necessary to bring deficits below 3 percent of GDP, put our debt on a downward trajectory, and put us on a fiscally sustainable path.

The President's Budget includes a compromise plan to achieve that goal while demonstrating that we do not need to choose between economic growth and fiscal discipline. The President's compromise proposal combines additional spending cuts, entitlement reforms, and revenue from tax reform to achieve nearly \$1.8 trillion in additional deficit reduction over the next 10 years, bringing total deficit reduction to more than \$4.3 trillion.

We are already making progress down this path to further deficit reduction. Under the revised estimates in the MSR, the current year deficit has fallen by \$214 billion compared to the projections in the Budget, and deficits will continue to fall to below 3 percent of GDP in 2017. In addition, the MSR shows that the Federal debt will begin to decline as a share of the economy in 2016. Over the next 10 years, deficits fall to about 2 percent of GDP, and debt continues to decline every year after 2015. Putting our budget on a sustainable fiscal path is a critical step toward

ensuring that we have a solid foundation on which to build a strong economy and a thriving middle class for years to come.

In addition to the policies explicitly reflected in the MSR, the President has outlined a plan for commonsense immigration reform and called on Congress to enact legislation that would strengthen our borders; crack down on employers who exploit American and immigrant workers; streamline the legal immigration system to attract highly-skilled entrepreneurs and engineers to help create jobs, drive economic growth, and reunite Americans with their families; and establish a responsible pathway to earned citizenship. In June, the Senate passed, with a strongly bipartisan vote, a bill that would achieve these goals and also make a substantial contribution to reducing the deficit. The Congressional Budget Office estimated the effect of the Senate immigration bill, using its own economic and technical assumptions, and found that the bill would reduce Federal deficits by \$158 billion over the first decade and by about \$700 billion in the second decade. In addition, according to the independent Social Security Office of the Chief Actuary, the bipartisan Senate-passed immigration reform bill would strengthen Social Security over the long-term, ensuring full Social Security solvency until 2035—two years longer than if we fail to act on immigration—and reducing Social Security unfunded liabilities by half a trillion dollars through 2037.

REPLACING SEQUESTRATION WITH BALANCED DEFICIT REDUCTION, WHILE INVESTING IN THE MIDDLE CLASS AND AMERICA'S FUTURE

The 2014 Budget presents a strategy to grow the economy in both the short and long term. To ensure America remains competitive in the 21st Century, it invests in American innovation, reviving our manufacturing base and keeping our Nation at the forefront of technological advancement. For example, it invests in 15 manufacturing innovation institutes across the country, transforming regions into global epicenters of advanced manufacturing. To ensure our energy security and combat global climate change, it advances the President's all-of-the-above energy strategy, focusing on energy production, the development of clean energy alternatives, and the promotion of energy efficiency efforts in

both the public and private sectors. To build a foundation for growth and competitiveness and create jobs now, it invests in repairing our existing infrastructure and building the infrastructure of tomorrow, including high-speed rail, high-tech schools, and power grids that are resilient to future extreme conditions. And to ensure hard work leads to a decent living, it creates new ladders of opportunity by expanding childhood education, supporting communities as they rebuild from the Great Recession, creating pathways to work for the long-term unemployed and youth, and raising the minimum wage to \$9 an hour so a hard day's work pays more.

Importantly, the 2014 Budget also supports economic growth by including more than enough deficit reduction to replace sequestration and the deep discretionary funding cuts triggered by the failure of the Joint Select Committee on Deficit Reduction (the "Joint Committee") to reach an agreement. With the recovery gaining traction, we need to focus on ways to protect and accelerate economic growth, not hold it back. The Budget demonstrates that we can replace these economically-damaging cuts with smart, targeted efforts to cut wasteful spending, strengthen entitlements, and eliminate loopholes through tax reform, while at the same time making critical investments to grow the economy, create jobs, and strengthen the middle class.

In the Budget Control Act (BCA), the Congress agreed on tight caps for discretionary spending that will allow for the critical investments we need to grow the economy while saving more than a trillion dollars over the next 10 years and bringing domestic discretionary spending to its lowest level as a share of the economy since the Eisenhower Administration. The BCA also established the Joint Committee to provide Congress with an opportunity to reach bipartisan agreement on achieving an additional \$1.2 trillion in balanced deficit reduction over 10 years. The law included the threat of sequestration as a mechanism to force Congress to act. The specter of harmful across-the-board cuts to defense and non-defense programs was intended to drive both sides to compro-

mise; sequestration itself was never intended to be implemented. However, Congress's failure to act on an alternative deficit reduction plan led the scheduled cuts to begin taking effect in March.

Sequestration is already having negative impacts on the country and the American people. Although the economy has continued to grow and job creation has held steady, we could be experiencing even stronger growth and job creation were it not for sequestration. The CBO estimated that sequestration will reduce the Nation's economic growth by more than half a percentage point and cost 750,000 jobs in 2013. Other independent economic forecasters have reached similar conclusions. The negative effects of sequestration are already being felt in areas ranging from reduced Army and Air Force training programs to cuts in National Institute of Health research to cuts at Head Start centers. Moreover, these impacts will build over time.

If allowed to continue, sequestration will further harm the economy and undermine the middle class. Congress can and should take action to replace it by passing a comprehensive and balanced deficit reduction package. Unfortunately, Congressional Republicans, primarily in the House of Representatives, have been unwilling to accept any plan to replace sequestration that includes new revenue. Instead, the Republican House has proposed to shift funding to defense accounts by imposing even deeper cuts in areas such as education, innovation and infrastructure.

Bipartisan and independent groups that have examined the Nation's fiscal outlook have concluded that the best way forward is a balanced plan that phases in deficit reduction to avoid harming the economic recovery, raises new revenue from tax reform that will also improve U.S. competitiveness, includes entitlement reform that takes further steps to address rising health care costs while providing protections for the most vulnerable, and maintains investments in education, innovation, and infrastructure. That is the right path forward, and it is the approach the President has proposed in his 2014 Budget.

ECONOMIC ASSUMPTIONS

This Mid-Session Review (MSR) updates the economic forecast from the 2014 Budget. The 2014 Budget forecast projected that the economic recovery, which began in 2009, would continue. Unemployment was expected to decline as the economy recovered, and inflation was expected to remain moderate. Interest rates were expected to remain quite low in the near term, but to rise gradually in the medium term. The MSR forecast, completed in late May, maintains these assumptions with minor modifications to take account of evolving conditions since the last forecast.

Since 2009, and through the first quarter of 2013, real GDP has risen for 15 straight quarters. Following the resumption of real GDP growth, the private sector began adding jobs. Private-sector employment has increased in each of the past 40 months, although it will take a further period of healthy job growth to fully recover from the losses due to the recession. The unemployment rate has declined from its peak of 10.0 percent in October 2009 to 7.6 percent in June 2013. Likewise, the housing market has begun to contribute to the recovery. The steep decline in the housing market ended in 2009, and housing starts and home prices have rebounded over the past two years.

Administration policies contributed to the economic revival, as have automatic fiscal stabilizers such as the unemployment compensation system. The American Recovery and Reinvestment Act was passed soon after the President took office, at a time when we were losing more than 800,000 jobs per month and after real GDP fell at an annual rate of 8.9 percent in the fourth quarter of 2008. The Administration's prompt action helped to reverse these precipitous declines and opened the way to a sustained economic recovery. Additional actions by the Administration and Congress, culminating in the passage of the temporary payroll tax holiday as part of the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act in December 2010, further sustained demand and fostered continued growth.

Although Administration actions helped spark the ongoing recovery, the economy has faced serious headwinds that have held down the growth rate and limited gains in employment. Several European countries are experiencing slowing or negative growth as they have engaged in fiscal austerity measures to address their deficit and debt problems. China and other emerging countries have also experienced some slowing in their very rapid growth rates of the past decade. The global slowdown has reduced the growth of U.S. exports, which subtracted from overall U.S. GDP growth during the fourth quarter of 2012 and first quarter of 2013. In addition, the economic downturn, which reduced State and local tax revenue significantly, forced fiscal consolidation at the State and local government level because State governments generally face balanced-budget requirements.

Notably, sequestration has imposed a drag on growth in recent months. Congress has not yet acted on the comprehensive plan that the President proposed to replace sequestration with long-term deficit reduction. As a consequence, the economy was under additional fiscal pressure during the first half of 2013, leading to a reduction in the forecast for growth during 2013, although the MSR continues to assume that the sequestration will be reversed going forward.

Assuming adoption of the President's proposed fiscal plan, the Administration projects economic growth to continue in the second half of 2013 and to pick up in 2014. As various headwinds die down, and the proposed Budget replaces sequestration, the Administration expects more rapid growth in 2014. The decline in the unemployment rate over the past several months has been more rapid than expected when the 2014 Budget forecast was finalized, and unemployment is now projected to decline somewhat more rapidly than in the Budget projections.

Beyond 2018, the Administration's forecast is based on the long-run trends expected for real GDP growth, price inflation, and interest rates. Projected real GDP growth in the long run is below the historical average growth for

Table 2. ECONOMIC ASSUMPTIONS¹--Continued

10-year Treasury notes	2.8	1.8	2.1	2.6	3.2	3.7	4.1	4.4	4.6	4.8	5.0	5.0	5.0

NA = Not Available

¹ Based on information available as of mid-May 2013.² Rent, interest, dividend, and proprietors' income components of personal income.³ Seasonally adjusted CPI for all urban consumers.⁴ Percentages apply to basic pay only; percentages to be proposed for years after 2014 have not yet been determined.⁵ Overall average increase, including locality pay adjustments. Percentages for years after 2014 have not yet been determined.⁶ Average rate, secondary market (bank discount basis).

Inflation: Overall inflation, as measured by the consumer price index (CPI), rose in early 2013, but it has moderated since then. Core inflation, excluding food and energy prices, has declined over the last 12 months to 1.7 percent, from 2.3 percent during the preceding 12-month period. Inflation is presently below the Federal Open Market Committee's (FOMC) target, but is expected to pick up again as the economy recovers and unemployment declines in the medium term. In the long run, the CPI inflation rate is projected to be 2.2 percent per year. Another key measure of inflation is the chained price index for gross domestic product, which is projected to increase by 1.6 percent in 2013, and 1.9 percent for 2014 onward.

Interest Rates: The projections for interest rates are based on financial market data and market expectations at the time the forecast was developed in late May. The three-month Treasury bill rate is expected to average only 0.1 percent in 2013 and 2014. It is expected to begin to rise in 2015 and to reach 3.7 percent by 2020. The yield on the 10-year Treasury note is expected to rise to 3.2 percent in 2015, and to reach 5.0 percent by 2021. In the later years of the forecast, interest rates are close to their historical averages in real terms; that is, adjusted for the projected rate of inflation.

Incomes and Income Shares: Corporate profits have rebounded more quickly than labor compensation (which consists of wages and salaries and employee fringe benefits). As a result, corporate profits have risen as a share of total income, while the share for labor compensation is below its long-run average. As the economy recovers, some of this shift in shares is expected to reverse. Labor compensation is projected to rise somewhat relative to total income, while the share of corporate profits is projected to fall. The wage share (which excludes fringe benefits) is also expected to recover from its recent low level in step with the increase in compensation.

FORECAST COMPARISONS

A comparison of the MSR forecast with the most recent Blue Chip consensus (an average of about 50 private-sector forecasts), the Congressional Budget Office (CBO), and the FOMC forecasts is shown below in Table 3. For 2013, the Administration's 2.4 percent projected rate of real GDP growth during the four quarters of the year is somewhat above that of the other forecasts, largely because of the assumption that the sequester will be replaced by the President's package of alternative deficit reduction proposals before the end

of the fiscal year, which would reduce the fiscal drag during the second half of 2013. During 2014, real GDP growth (Q4/Q4) is expected to be 3.4 percent, which is above the Blue Chip consensus of 2.8 percent, but it is within the FOMC central tendency of 3.0 to 3.5 percent, and again reflects the assumption that the President's Budget policies are adopted. In 2015 and 2016, the Administration's projected rate of GDP growth is more conservative than CBO's forecast, while average growth from 2013 through 2023 is 0.1 percentage point higher than CBO.

The Administration projects that unemployment will average 7.5 percent in 2013, 7.0 percent in 2014, and 6.5 percent in 2015. The Blue Chip consensus is quite similar:

7.5 percent in 2013, 7.1 percent in 2014, and 6.7 percent in 2015. (The CBO projections—last updated in January—assumed a somewhat higher trajectory for the unemployment rate.) The FOMC also projects that unemployment will fall. By the fourth quarter of 2015, the central tendency of the FOMC forecast ranges from 5.8 percent to 6.2 percent.

The forecasts are fairly similar for inflation and interest rates. Private forecasters expect inflation to rise to between 2 percent to 2-1/2 percent per year for both main measures of inflation. The Administration forecast projects slightly less inflation and slightly higher interest rates than the Blue Chip consensus in the long run.

RECEIPTS

The Mid-Session Review (MSR) estimates of receipts are above the Budget estimates by \$65 billion in 2013 and below the Budget estimates by \$11 billion in 2014. In each subsequent year, the MSR estimates of receipts are below the Budget estimates by amounts ranging from \$15 billion to \$69 billion, resulting in a \$384 billion decrease in receipts over the 10-year budget horizon (2014 through 2023). The net increase in 2013 receipts is in large part attributable to the effect of technical revisions based on new tax reporting data, collections to date and other information, which increase receipts by \$110 billion. Revised economic assumptions partially offset this increase, reducing 2013 receipts by \$46 billion.

The \$11 billion net reduction in 2014 receipts reflects a \$40 billion decrease in receipts attributable to revised economic assumptions, which is partially offset by a \$27 billion increase in receipts attributable to technical factors. Changes in the estimated effect of the Administration's proposals on receipts offset the reduction attributable to revised economic assumptions by an additional \$2 billion.

The \$384 billion reduction in receipts over the 10-year budget horizon is primarily due to receipt losses of \$424 billion attributable to revisions in the economic forecast. These reductions are partially offset by net increases of \$40 billion attributable to technical revisions and to changes in the estimates of the Administration's proposals and the provisions extended in the adjusted baseline.

ECONOMIC CHANGES

Revisions in the economic forecast reduce receipts by \$46 billion in 2013, \$40 billion in 2014, and \$23 billion to \$71 billion in each subsequent year, for a total reduction of \$424 billion over the 10 years from 2014 through 2023. In 2013, revisions to the economic forecast have the greatest effect on individual and corporation income taxes, reducing those sources of receipts by \$25 billion and \$14 billion, respectively. Revisions in the economic forecast also reduce collections of social insurance and retirement receipts by \$7 billion

in 2013. The reduction in individual income tax receipts is primarily attributable to reductions in the forecasts of wages and salaries and nonwage sources of personal income. Changes in the forecasts of GDP and other economic measures that affect the profitability of corporations are primarily responsible for the reduction in 2013 in corporation income taxes. Reductions in the forecasts of wages and salaries and proprietors' income, which are the tax base for Social Security and Medicare payroll taxes, the largest components of social insurance and retirement receipts, account for most of the reduction in this source of receipts.

Over the 10-year budget horizon, revisions in the economic forecast reduce collections of individual income taxes and social insurance and retirement receipts by \$444 billion and \$200 billion, respectively. Reductions in the economic forecast for wages and salaries, nonwage sources of personal income, and proprietors' income account for most of the downward revision in these two sources of receipts. The reductions in individual income taxes and social insurance and retirement receipts are partially offset by increases in corporation income taxes of \$241 billion. Revisions in the forecasts of GDP, interest rates, other sources of income, and imports reduce all remaining sources of receipts by a net \$21 billion.

TECHNICAL CHANGES

Technical revisions in the estimates increase receipts by \$110 billion in 2013 and \$27 billion in 2014. In later years, technical revisions increase receipts in some years and decrease them in others, resulting in a net increase in receipts of \$21 billion over the 10-year budget horizon. The increase in receipts in 2013 is mostly due to a \$101 billion increase in individual income taxes, attributable in large part to more recent collections data. The net increase in receipts over the 10-year budget horizon is primarily due to net downward re-estimates of corporation income taxes and miscellaneous receipts, which are more than offset by upward re-estimates of individual income taxes, social insurance and retirement receipts, and the remaining

sources of receipts. The technical revisions in individual and corporation income taxes and in social insurance and retirement receipts are in large part attributable to more recent collections data and revisions in the tax models based primarily on updated tax data for prior years. The technical revisions in miscellaneous receipts primarily reflect changes in the estimates of various penalties based on more recent information.

REVISIONS IN EXPIRING PROVISIONS EXTENDED IN THE ADJUSTED BASELINE

The Budget's adjusted baseline permanently continued the tax relief provided to individuals and families under the American Recovery and Reinvestment Act of 2009 that was extended only through tax year 2017 under the American Taxpayer Relief Act of 2012. This tax relief includes increased refundability of the child tax credit, expansions in the earned income tax credit for larger families and married taxpayers filing a joint return, and increased assistance for qualified tuition and related expenses provided by the American Opportunity Tax Credit. Because these provi-

sions are refundable (taxpayers may receive payments in excess of their tax liability), the proposed extension of these provisions affects both outlays and receipts. Revisions in the estimated cost of extending these provisions increase receipts in each year, beginning in 2018, and by \$8 billion over the 10 years, 2014 through 2023. This reduction in the cost of extending these provisions is in large part attributable to a reallocation of a portion of the cost from receipts to outlays, rather than a reduction in the total relief provided to individuals and families. This reallocation reflects the revised economic forecast, current collection experience and updated tax data for prior years.

REVISIONS IN PROPOSALS

Revisions in the estimates of the Administration's proposals increase receipts by a net \$11 billion over the 10 years, 2014 through 2023. These revisions, which reflect the revised economic forecast and technical re-estimates based on more recent collections data and other information, are the net effect of relatively small revisions in the estimates of a number of provisions.

*\$500 million or less.

EXPENDITURES

Outlays for 2013 are now estimated to be \$3,536 billion, \$149 billion lower than the 2014 Budget estimate, reflecting slower-than-expected spending across a range of discretionary and mandatory programs, due in part to the implementation of across-the-board spending cuts required by the Budget Control Act (BCA) for 2013, as well as higher-than-expected dividend payments to Treasury from Fannie Mae and Freddie Mac. Relative to the Budget, projected total outlays have decreased by \$4 billion in 2014, but increased by \$148 billion over the 10-year budget horizon, 2014 to 2023, primarily in the last five years. These increases in outyear spending are primarily the cumulative upward effect of economic and technical reestimates in a number of mandatory programs, as well as in interest payments.

LEGISLATIVE CHANGES

The only legislation affecting spending estimates since the completion of the 2014 Budget was the Consolidated and Further Continuing Appropriations Act of 2013, enacted on March 26, 2013. This Act provided final appropriations for the Department of Defense, the Department of Homeland Security, and certain other agencies, and extended the continuing resolution providing funding for the remaining agencies to the end of 2013. Relative to the estimates in the 2014 Budget, the full-year appropriations increase outlays by \$5 billion in 2013. The legislation lowers outlays by \$8 billion in 2014, with negligible effects over the remainder of the next decade.

ESTIMATING CHANGES

Estimating changes are due to factors other than enacted legislation or changes in policy. These result from changes in economic assumptions, discussed earlier in this Review, and changes in technical factors. Relative to the Budget estimates, economic and technical changes decrease estimated outlays for 2013 by \$154 billion, but increase outlays by \$156 billion from 2014 through 2023.

Discretionary programs. Outlays for discretionary programs decrease by \$43 billion

in 2013 but rise by \$21 billion over the next 10 years relative to the Budget as a result of technical revisions. These changes reflect lower outlays in 2013 compared to the Budget for both defense and non-defense discretionary programs, due to the implementation of across-the-board reductions required by the BCA beginning in March as well as additional factors producing slower-than-expected spending patterns. Just over half of the \$43 billion reduction in 2013 is in defense programs. The remaining half is in non-defense programs, most notably in the Departments of Housing and Urban Development, Education, Energy, and Health and Human Services, as well as International Assistance Programs, outlays for each of which are at least \$2 billion below the 2013 estimate in the Budget. Relative to the Budget, more of the proposed reversal of 2013 sequestration – as well as other obligations previously expected to outlay in 2013 – shifts into 2014 and later years. As a result, spending for non-defense programs rises by a total of \$22 billion over 2014 through 2023. Spending for defense programs falls by \$1 billion over this period.

Medicaid. Technical and economic revisions increase projected Federal outlays for Medicaid by \$8 billion in 2013, and by \$123 billion over the next 10 years from 2014 to 2023 relative to the Budget estimates. The increase stems primarily from higher projected benefit payments in 2013, resulting in higher benefit projections over the 10-year period, partially offset by projected decreases in medical inflation and in the anticipated costs of the Affordable Care Act Medicaid expansion.

Social Security. Estimating changes reduce outlays for Social Security by \$3 billion in 2013 and by an additional \$85 billion over the next 10 years. Reductions in 2013 in both the Old Age and Survivors' Insurance (OASI) and Disability Insurance (DI) programs are primarily due to lower-than-expected numbers of beneficiaries in recent data. Lower spending in both programs in 2014 and beyond is due primarily to lower inflation and therefore lower cost-of-living adjustments (COLAs) in 2014 and 2015 than were assumed in the Budget. Relative to the Budget,

the projected COLA decreases from 2.2 to 1.1 percent for 2014 and from 2.2 to 2.1 percent for 2015. Technical changes partially offset the lower spending due to economic factors, driven by upward revisions in the OASI program to account for improved mortality assumptions among the elderly.

Supplemental Nutrition Assistance Program (SNAP). Outlays for SNAP increase by \$2 billion in 2013 and \$65 billion over the next 10 years, primarily due to technical factors. The technical changes arise from higher actual participation in the program than was assumed in the Budget, revised modeling of current and future beneficiaries who are underemployed or out of the active labor force, and adjustments to better account for future disaster benefits.

Premium assistance tax credits. Changes in technical assumptions decrease estimated outlays for the refundable portion of the premium assistance tax credit by \$43 billion from 2014 through 2023. The estimated decrease in expenditures is the net effect of several offsetting technical changes, including adjustments to premium estimates in the exchanges, revised assumptions for the Affordable Care Act Medicaid expansion, and other technical corrections to the model.

Proceeds from Government Sponsored Enterprises. Collections from dividend payments under Treasury's Preferred Stock Purchase Agreements with Fannie Mae and Freddie Mac have been revised upward in 2013, lowering net outlays by \$71 billion, based on the companies' financial results through the end of March, including a \$50.6 billion increase in the valuation of Fannie Mae's deferred tax asset. Collections for 2014 to 2023 have been revised downward to reflect the change in Fannie Mae's taxable status, increasing net outlays over 10 years by \$34 billion.

Earned Income Tax Credit (EITC). Estimating changes increase outlays for the EITC by \$2 billion in 2013 and an additional \$32 billion from 2014 through 2023. Most of the upward revision can be attributed to changes to economic assumptions for GDP, personal income, wages, and inflation that cause more beneficiaries to stay within the

income eligibility requirements for longer periods of time. Technical changes also contribute modestly to the increase, as a result of revisions to reflect actual participation in the current year and improved participation projections in the future.

Medicare. Economic and technical changes reduce outlays for Medicare by \$2 billion in 2013, but increase spending by \$31 billion over the next 10 years. Outlays for Medicare Parts A and D increase substantially over the next 10 years, while Part B decreases. The spending increase in Part A is primarily a result of upward revisions to Medicare Advantage enrollment, as well as other technical changes. The decrease in Medicare Part B spending is primarily due to increases in premium receipts and receipts from provider payment adjustments related to health information technology programs. The increase to spending for Medicare Part D is due mostly to higher drug spending and revised enrollment assumptions compared to the Budget.

Unemployment compensation. Changes in economic and technical assumptions decrease outlays for unemployment benefits by \$6 billion in 2013. Over 2014 through 2023, outlays are down by an additional \$19 billion relative to the Budget estimate. The reduction is driven in large part by lower-than-expected rates of insured unemployment relative to actual civilian unemployment rates as well as lower-than-expected actual spending than had been assumed in the Budget. In addition, the revised MSR economic forecast for lower near-term civilian unemployment rates and the smaller labor force than was assumed in the President's Budget contributes somewhat to the downward revision in spending throughout the Budget horizon.

Supplemental Security Income (SSI). Estimating changes decrease outlays for the SSI program by \$15 billion over the next 10 years. Most of the downward revision can be attributed to lower COLA assumptions in 2014 and 2015 as well as lower unemployment rate assumptions relative to the Budget, leading to fewer projected applications and awards. Technical revisions to the projected recipient population and average projected payments also contributed to the decrease in SSI spending.

Civilian and military retirement. Economic changes comprise nearly the entire \$14 billion decrease in spending relative to the Budget for civilian and military retirement over the next 10 years. The lower COLA assumptions in 2014 and 2015 explain most of the decreases for both programs.

Child Tax Credit (CTC). Estimating changes decrease outlays for the CTC by \$1 billion in 2013 and an additional \$11 billion from 2014 through 2023. Most of the downward revision can be attributed to lower actual outlays, due to fewer CTC claims during the recent tax filing season. Changes in the economic forecast for the MSR increased outlays relative to the Budget in 2015 and beyond by increasing the number of taxpayers assumed to fall within the eligible income range for the credit.

Troubled Asset Relief Program (TARP) housing programs. Technical changes lower outlays in 2013 for TARP housing programs by \$7 billion relative to the Budget as a result of adjusting projections to account for lower spending to date. On May 30, 2013, the Treasury Department announced a two-year extension of the Home Affordable Modification Program that was not assumed in the Budget. As a result, outlays previously projected for 2013 are now projected to be spent in 2014 through 2020, with total spending over the budget window virtually unchanged.

Deposit Insurance Fund (DIF). Technical and economic changes lower deposit insurance spending in 2013 by \$6 billion, but raise spending over 2014 through 2023 by \$5 billion. The short-term reduction in spending is attributable to fewer bank failures experienced to date than were projected in the Budget. The outyear spending increase can be attributed to lower future premiums. Because of the reduction in current year deposit insurance spending, arising from the lower projection of future bank failures relative to the Budget, it is expected that there will be a reduced need to replenish the DIF and that premiums will be lower in the outyears. Revised forecasts of GDP, inflation, and interest rates also result in some minor outyear spending increases.

Net interest. Excluding the debt service associated with enacted legislation, outlays for net interest are projected to decrease by \$7 billion in 2013, but increase by \$41 billion over the next 10 years. The reduction in 2013 is largely due to the effects of recent lower-than-expected inflation in the Consumer Price Index on interest outlays for inflation-indexed securities. The increases in 2016 and subsequent years are virtually all due to technical revisions to interest accounts, as well as higher debt service due to estimating changes in receipts and outlays.

MID-SESSION REVIEW

Table S-3. CUMULATIVE DEFICIT REDUCTION

(Deficit reduction (-) or increase (+) in billions of dollars)

	2014- 2023
Deficit reduction achieved through March 2013:	
Discretionary savings ¹	-1,444
Upper-income tax revenues	-660
Debt service	-480
Total achieved deficit reduction	-2,585
December Compromise Deficit Reduction Package	
Discretionary program reductions	-202
Health savings	-401
Other mandatory savings	-201
Revenue proposals	-594
Immediate investments in infrastructure	50
Programmatic effects of moving to the chained CPI	-230
Discretionary effects of program integrity cap adjustments	9
Debt service and accrual effects	-204
Total, December Package	-1,772
Total deficit reduction	-4,357
Policy initiatives:	
Surface transportation and job creation initiatives	175
Savings in OCO reserved for initiatives	-176
Early childhood investments	77
Tobacco tax financing	-78
Other mandatory proposals	6
Reserve for revenue-neutral business tax reform
Debt service	2
Total, policy initiatives	5
Overseas contingency operations (OCO) and additional changes to deficits:	
Enacted reduction in OCO funding	-669
Remaining reductions in overseas contingency operations	-492
Other proposals	-184
Debt service	-339
Total, overseas contingency operations (OCO) and additional changes to deficits	-1,684
Total, deficit reduction including policy initiatives, OCO, and additional changes to deficits	-6,036
Memorandum: revenue and outlay effects of enacted deficit reduction and the President's December Compromise Deficit Reduction Package:	
Enacted outlay reductions and 2014 MSR spending proposals	-3,003
Enacted receipt increases and 2014 MSR revenue proposals	-1,354

¹ Excludes savings from reductions in OCO.

MID-SESSION REVIEW

Table S-6. PROPOSED BUDGET BY CATEGORY AS A PERCENT OF GDP—Continued

(As a percent of GDP)

	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Averages	
													2014-2018	2014-2023
Memorandum, budget authority for appropriated programs:¹														
Defense	4.3	4.0	3.8	3.2	3.1	3.0	2.9	2.8	2.7	2.6	2.6	2.5	3.2	2.9
Non-defense	3.4	3.5	3.1	3.1	3.0	2.9	2.8	2.7	2.7	2.6	2.3	2.3	3.0	2.8
Total, appropriated funding	7.7	7.5	6.8	6.3	6.1	5.9	5.7	5.5	5.4	5.2	4.9	4.8	6.2	5.7

*0.05 percent of GDP or less.

¹The 2014 MSR proposes changes to the current law caps in the BBEDCA for the reclassification of certain transportation programs and further reductions as part of the Administration's policy to achieve additional deficit reduction.

²These amounts represent a placeholder for major disasters requiring Federal assistance for relief and reconstruction. Such assistance might be provided in the form of discretionary or mandatory outlays or tax relief. These amounts are included as outlays for convenience.

SUMMARY TABLES

MID-SESSION REVIEW

Table S-8. MANDATORY AND RECEIPT PROPOSALS

(Deficit increases (+) or decreases (-) in millions of dollars)

	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Totals	
												2014-2018	2014-2023
Savings Consistent with the December Compromise Deficit Reduction Package:													
Health Savings:													
Health and Human Services (HHS):													
Medicare providers:													
Bad debts:													
Reduce Medicare coverage of bad debts		-200	-860	-1,930	-2,570	-2,800	-3,000	-3,190	-3,410	-3,640	-3,890	-8,360	-25,490
Graduate medical education:													
Better align graduate medical education payments with patient care costs		-780	-930	-960	-990	-1,050	-1,100	-1,170	-1,250	-1,330	-1,420	-4,710	-10,980
Better align payments to rural providers with the cost of care:													
Reduce Critical Access Hospital (CAH) payments from 101% of reasonable costs to 100% of reasonable costs		-90	-110	-120	-120	-130	-150	-160	-170	-190	-190	-570	-1,430
Prohibit CAH designation for facilities that are less than 10 miles from the nearest hospital		-40	-50	-60	-60	-70	-70	-80	-80	-90	-90	-280	-690
Cut waste, fraud, and improper payments in Medicare:													
Reduce fraud, waste, and abuse in Medicare			-20	-20	-30	-50	-50	-50	-60	-60	-60	-120	-400
Require prior authorization for advanced imaging													
Drug rebates and additional Part D savings:													
Align Medicare drug payment policies with Medicaid policies for low-income beneficiaries		-3,140	-7,720	-8,450	-9,720	-11,260	-12,510	-14,310	-16,400	-18,220	-21,440	-40,290	-123,170
Accelerate manufacturer drug rebates to provide relief to Medicare beneficiaries in the coverage gap			-140	-230	-450	-760	-1,210	-1,780	-2,010	-2,320	-2,310	-1,580	-11,210
Encourage efficient post-acute care:													
Adjust payment updates for certain post-acute care providers		-830	-1,930	-3,220	-4,540	-6,020	-7,870	-9,880	-12,140	-14,980	-17,630	-16,540	-79,040
Equalize payments for certain conditions commonly treated in inpatient rehabilitation facilities and Skilled Nursing Facilities (SNFs)		-140	-160	-180	-180	-190	-200	-210	-220	-230	-240	-850	-1,950

SUMMARY TABLES

Table S-8. MANDATORY AND RECEIPT PROPOSALS—Continued

(Deficit increases (+) or decreases (-) in millions of dollars)

	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	Totals	
												2014-2018	2014-2023
Encourage appropriate use of inpatient rehabilitation hospitals		-190	-230	-240	-240	-240	-250	-260	-280	-290	-300	-1,140	-2,520
Adjust SNF payments to reduce hospital readmissions					-230	-270	-290	-310	-340	-370	-400	-500	-2,210
Implement bundled post-acute care payment						-290	-820	-1,520	-1,720	-1,850	-1,960	-290	-8,160
Additional provider efficiencies:													
Exclude certain services from the in-office ancillary services exception			-350	-550	-600	-640	-680	-730	-780	-830	-890	-2,140	-6,050
Reduce overpayment of Part B drugs		-220	-380	-390	-410	-440	-460	-490	-530	-560	-600	-1,840	-4,480
Modernize payments for clinical laboratory services				-120	-350	-610	-900	-1,240	-1,620	-2,060	-2,560	-1,080	-9,460
Expand sharing Medicare data with qualified entities													
Clarify the Medicare Fraction in the Medicare Disproportionate Share Hospital (DSH) statute													
Improve payment accuracy for Medicare Advantage (MA):													
Increase the minimum MA coding intensity adjustment ..			-320	-750	-1,180	-1,660	-1,890	-2,070	-2,270	-2,490	-2,710	-3,910	-15,340
Align employer group waiver plan payments with average MA plan bids			-280	-360	-360	-380	-420	-480	-540	-590	-640	-1,380	-4,050
Total, Medicare providers		-5,630	-13,480	-17,580	-22,030	-26,860	-31,870	-37,930	-43,820	-50,100	-57,330	-85,580	-306,630
Medicare structural reforms:													
Increase income-related premium under Medicare Parts B and D ..					-3,000	-3,000	-4,000	-7,000	-9,000	-11,000	-13,000	-6,000	-50,000
Modify Part B deductible for new enrollees					-50	-60	-250	-350	-760	-890	-960	-110	-3,320
Introduce home health co-payments for new beneficiaries ..					-20	-40	-70	-100	-130	-170	-200	-60	-730
Introduce a Part B premium surcharge for new beneficiaries who purchase near first-dollar Medigap coverage					-70	-180	-290	-410	-540	-670	-750	-250	-2,910
Encourage the use of generic drugs by low-income beneficiaries		-350	-500	-540	-580	-630	-690	-750	-820	-900	-970	-2,600	-6,730
Strengthen the Independent Payment Advisory Board (IPAB) to reduce long-term drivers of Medicare cost growth										-250	-370	-3,480	-4,100
Total, Medicare structural reforms		-350	-500	-540	-3,720	-3,910	-5,300	-8,610	-11,500	-14,000	-19,360	-9,020	-67,790

Modify reporting of tuition expenses and scholarships on Form 1098-T			-21	-24	-25	-26	-27	-28	-29	-30	-31		-96	-241
Extend IRS math error authority in certain circumstances		-7	-7	-7	-7	-8	-8	-8	-9	-9	-9		-36	-79
Simplify the rules for claiming the EITC for workers without qualifying children		25	494	506	518	528	510	521	533	544	558		2,071	4,737
Total, outlay effects of receipt proposals		837	4,108	6,137	7,805	9,273	10,845	12,547	14,334	16,181	18,069		28,160	100,136

⁵ This proposal would also result in discretionary savings of \$7.2 billion over 10 years.
⁶ This proposal has outlays of less than \$500,000 per year. The total cost is \$1 million from 2014–2018 and \$2 million from 2014–2023.
⁷ This proposal has outlays of less than \$500,000 per year in 2014–2018. The total cost is \$2 million from 2014–2018.
⁸ This proposal has outlays of less than \$500,000 per year. The total cost is \$1 million from 2014–2018 and \$3 million from 2014–2023.
⁹ This proposal has outlays of less than \$500,000 per year. The total cost over 2014–2023 is \$1 million.
¹⁰ This proposal has outlays of less than \$500,000 per year. The total cost over 2014–2023 is \$1 million.
¹¹ This proposal has outlays of less than \$500,000 per year. The total cost over 2014–2023 is also less than \$500,000.
¹² This proposal has outlays of less than \$500,000 per year in years 2014–2018. The total cost is \$1 million from 2014–2018.
¹³ This proposal has outlays of less than \$500,000 per year. The total cost over 2014–2023 is also less than \$500,000.
¹⁴ This proposal has outlays of less than \$500,000 per year. The total cost over 2014–2023 is also less than \$500,000.
¹⁵ This proposal has outlays of less than \$500,000 per year. The total savings are \$1 million over 2014–2018 and \$4 million over 2014–2023.
¹⁶ This proposal has no estimated costs.
¹⁷ This proposal has outlays of less than \$500,000 per year. The total cost over 2014–2023 is also less than \$500,000.
¹⁸ Overall, the proposal generates \$300 million in additional proceeds. Total savings are net of Federal agency relocation costs.
¹⁹ The estimates for this proposal include effects on outlays. The outlay effects included in the totals above are as follows:

MID-SESSION REVIEW

**Table S-9. FUNDING LEVELS FOR APPROPRIATED (“DISCRETIONARY”)
PROGRAMS BY CATEGORY—Continued**

(Budget authority in billions of dollars)

* Less than \$500 million.

¹ The Budget Control Act of 2011 (BCA) amended the Balanced Budget and Emergency Deficit Control Act of 1985 (BBEDCA) by establishing statutory discretionary caps for 2012 through 2021 with separate categories in 2012 and 2013 for “Security” and “Nonsecurity”. These categories were revised on January 15, 2012 to equal all accounts in budget function 050 for the “Defense” category with all other amounts in the “Non-Defense” category for the years 2013 through 2021. The American Taxpayer Relief Act of 2012 reinstated the Security and Nonsecurity caps for 2013.

² The 2014 Budget proposes changes to the current law caps in the BBEDCA, as amended, for the reclassification of certain Transportation programs and further reductions as part of the Administration’s policy to achieve additional deficit reduction.

³ Where applicable, amounts in 2012 through 2023 are existing or proposed cap adjustments designated pursuant to Section 251(b)(2) of the BBEDCA, as amended. Amounts in 2010 and 2011 are not so designated but are shown for comparability purposes.

⁴ The Department of Defense’s 2014 OCO funding level has been updated to reflect the amounts requested in the budget amendment that was transmitted to the Congress on May 17, 2013.

⁵ The Budget includes placeholder amounts of \$38.3 billion per year for Government-wide OCO funding from 2015 to 2021. These amounts reflect the Administration’s proposal to cap total OCO budget authority from 2013 to 2021 at \$450 billion but do not reflect any specific decisions or assumptions about OCO funding in any particular year.

⁶ Amounts in 2010-2012 are not designated as Emergency funding pursuant to Section 251(b)(2)(A) of the BBEDCA, as amended, as they include congressionally-designated emergencies, rescissions of funding provided in the American Recovery and Reinvestment Act of 2009 (PL 111-5), and other supplemental funding.

⁷ The amount reflects the net effect of discretionary sequestration for 2013 that took place on March 1, 2013 as a result of the Presidential Order that was issued in compliance with section 251A of the BBEDCA, including adjustments for savings achieved pursuant to section 253(f) of the BBEDCA and other adjustments for technical corrections and account restructuring. The Administration proposes to reverse the 2013 reductions and fully replace the Joint Committee enforcement procedures with balanced deficit reduction.

* \$50 million or less.

¹ Amounts in 2010 through 2013 exclude changes in mandatory programs enacted in appropriations bills since those amounts have been rebased as mandatory, whereas amounts in 2014 are net of these proposals.

² The Budget Control Act of 2011 (BCA) amended the Balanced Budget and Emergency Deficit Control Act of 1985 (BBEDCA) by establishing statutory discretionary caps for 2012 through 2021 with separate categories in 2012 and 2013 for Security and Nonsecurity. These categories were revised on January 15, 2012 to equal all accounts in budget function 050 for the “Defense” category with all other amounts in the “Non-Defense” category. The American Taxpayer Relief Act of 2012 reinstated the Security and Nonsecurity caps for 2013.

³ The Department of Defense (DOD) levels in 2015–2023 include funding that will be allocated, in annual increments, to the National Nuclear Security Administration (NNSA). Current estimates by which DOD’s budget authority will decrease and NNSA’s will increase are, in millions of dollars: 2015: \$1,196; 2016: \$1,444; 2017: \$1,602; 2018: \$1,665; 2019: \$1,702; 2014–2023: \$14,816. DOD and NNSA are reviewing NNSA’s outyear requirements and these will be included in future reports to the Congress.

⁴ Funding from the Hospital Insurance and Supplementary Medical Insurance trust funds for administrative expenses incurred by the Social Security Administration that support the Medicare program are included in the Health and Human Services total and not in the Social Security Administration total.

⁵ The 2014 Budget includes allowances, similar to the Function 920 allowances used in Budget Resolutions, to represent amounts to be allocated among the respective agencies to reach the proposed defense and non-defense caps for 2015 and beyond. These levels are determined for illustrative purposes but do not reflect specific policy decisions.

⁶ Where applicable, amounts in 2012 through 2023 are existing or proposed cap adjustments designated pursuant to Section 251(b)(2) of the BBEDCA, as amended. Amounts in 2010 and 2011 are not so designated but are shown for comparability purposes.

⁷ The Department of Defense’s 2014 OCO funding level has been updated to reflect the amounts requested in the budget amendment that was transmitted to the Congress on May 17, 2013.

⁸ The Budget includes placeholder amounts of \$38.3 billion per year for Government-wide OCO funding from 2015 to 2021. These amounts reflect the Administration’s proposal to cap total OCO budget authority from 2013 to 2021 at \$450 billion but do not reflect any specific decisions or assumptions about OCO funding in any particular year.

⁹ Amounts in 2010-2012 are not designated as Emergency funding pursuant to Section 251(b)(2)(A) of the BBEDCA, as amended, as they include congressionally-designated emergencies, rescissions of funding provided in the American Recovery and Reinvestment Act of 2009 (P.L. 111-5), and other supplemental funding.

¹⁰ The amount reflects the net effect of discretionary sequestration for 2013 that took place on March 1, 2013 as a result of the Presidential Order that was issued in compliance with section 251A of the BBEDCA, including adjustments for savings achieved pursuant to section 253(f) of the BBEDCA and other adjustments for technical corrections and account restructuring. The Administration proposes to reverse the 2013 reductions and fully replace the Joint Committee enforcement procedures with balanced deficit reduction.

* \$500 million or less.

¹ A decrease in the Treasury operating cash balance (which is an asset) is a means of financing a deficit and therefore has a negative sign; that is, the reduction in cash balances reduces the amount that would otherwise be borrowed from the public. An increase in checks outstanding (which is a liability) is also a means of financing a deficit and therefore also has a negative sign.

² Includes checks outstanding, accrued interest payable on Treasury debt, uninvested deposit fund balances, allocations of special drawing rights, and other liability accounts; and, as an offset, cash and monetary assets (other than the Treasury operating cash balance), other asset accounts, and profit on sale of gold.

³ Consists mainly of debt issued by the Federal Financing Bank (which is not subject to limit), debt held by the Federal Financing Bank, the unamortized discount (less premium) on public issues of Treasury notes and bonds (other than zero-coupon bonds), and the unrealized discount on Government account series securities.

⁴ Legislation enacted February 4, 2013, (P.L. 113-3) temporarily suspended the debt limit through May 18, 2013. In accordance with that legislation, the debt limit was set at \$16,699 billion as of May 19, 2013.

⁵ Treasury securities held by the public and zero-coupon bonds held by Government accounts are almost all measured at sales price plus amortized discount or less amortized premium. Agency debt securities are almost all measured at face value. Treasury securities in the Government account series are otherwise measured at face value less unrealized discount (if any).

⁶ At the end of 2012, the Federal Reserve Banks held \$1,645.3 billion of Federal securities and the rest of the public held \$9,635.8 billion. Debt held by the Federal Reserve Banks is not estimated for future years.
