

for certification as prescribed by the certifying agency and applicable state regulations regarding seed potato certification.

Your production guarantee and premium rate will be provided by the actuarial table for certified seed potatoes. If, due to insurable causes occurring within the insurance period, potato production will not qualify as certified seed on any insured certified seed potato acreage within a unit, we will pay you one dollar (\$1.00) per cwt., times your production guarantee for such acreage, times your share. Any production which will not qualify as certified seed because of your failure to carry out the standard practices and procedures required for certification will be considered lost due to uninsured causes.

Insurable acreage grown under the provisions of this amendment may be designated as a separate unit.

Any claim for indemnity on a unit must be submitted to us on our form no later than 10 working days after you receive your records from the certification agency.

All provisions of the potato policy not in conflict with this amendment are applicable.

This amendment is not continuous. A new amendment must be submitted each crop year to take advantage of the certified seed potato option.

§ 422.10

1. You must have a Federal Crop Insurance Potato Policy (basic policy) in force. This Quality Potato Option (Option) provides guaranteed production on a hundredweight (cwt.) basis only.

2. This Option must be submitted to us on or before the sales closing date for the initial crop year in which you wish to insure your potatoes under this Option.

3. If you elect this Option, all acreage of potatoes insured under the basic policy must be insured under this Option except for any acreage:

a. Specifically excluded by the Actuarial Table;

b. Grown for seed if you elect to exclude the acreage from coverage; or;

c. Insured under the Processing Potato Quality Option.

4. Production to count determined under subsection 9.e. of the basic policy will be further modified as follows:

a. Production to count, unharvested appraised production, production stored after an acceptable inspection, and marketed production containing potatoes that grade less than U.S. No. 2<sup>1</sup> will be determined by dividing the actual percentage of potatoes grading U.S. No. 2<sup>1</sup> or better by the percentage factor, and multiplying the result, not to exceed 1,000, by the number of weight (cwt.) of such potatoes; or

b. Production to count of potatoes stored without an acceptable inspection will be 100 percent of the gross cwt. of such potatoes.

5. If you have a Frost/Freeze Potato Option and this Option in effect on the same production, the production to count will be based on the Option which results in the least production to count.

6. All sampling and grade determinations must be made by a potato grader licensed or certified by the applicable State or United States Department of Agriculture. However, if such a grader is not available to sample or grade the potatoes, the sampling or grading for the purposes of this Option will be performed by us.

7. Your premium rate for this Option will be contained in the Actuarial Table.

8. "Acceptable Inspection" means that prior to storage the potatoes are evaluated by us and grade determinations are made in accordance with section 6 of this Option.

9. "Percentage factor" means the historical average percentage of potatoes grading U.S. No. 2<sup>1</sup> or better, by type, determined from your records as established by us. If at least four continuous years of records are available, the percentage factor will be the simple average of the available records not to exceed 10 years. If less than four years of records are available, the percentage factor will be the

one contained in the actuarial table. The Actuarial Table may provide different percentage factors by type.
