

(d) The RFO, through the process of tiering, is to determine if a site-specific EA or EIS is required for an individually significant action that is included in a program EIS.

**§650.8 When to prepare an environmental assessment (EA).**

An environmental assessment (EA) is to be prepared for:

(a) Land and water resource projects that are not included in §650.7(a) (1) through (4) for which State and local units of government receive Federal technical and financial assistance from NRCS (7 CFR parts 620 through 623; and 640 through 643); and

(b) Other actions not included in a program EIS nor categorically excluded that the EE reveals may be a major Federal action significantly affecting the quality of the human environment.

**§650.9 NEPA and interagency planning.**

(a) *Lead agency.* (1) NRCS is to be the lead agency for actions under programs it administers. If the actions affect more than one State, the NRCS Administrator is to designate one NRCS state conservationist as the RFO.

(2) NRCS normally takes the role of lead agency in actions that share program responsibilities among USDA agencies if NRCS provides the majority of funds for the actions. If the lead agency role is in question, the role of NRCS and other USDA agencies is to be determined by the USDA Environmental Coordinator, Office of Environmental Quality Activities.

(3) If NRCS and Federal agencies outside USDA cannot agree on which will be the lead agency and which will be the cooperating agencies, the procedures in 40 CFR 1501.5(e) are to be followed.

(4) NRCS, as lead agency, is to coordinate the participation of all concerned agencies in developing the EIS according to the provisions of 40 CFR 1501.6(a).

(b) *Cooperating agencies.* (1) NRCS is to request, as appropriate, the assistance of cooperating agencies in preparing the environmental evaluation. This assistance will broaden the expertise in the planning and help to avoid future

conflict. NRCS is to request assistance in determining the scope of issues to be addressed and identifying the significant issues related to a proposed action from Federal agencies that have jurisdiction by law or special expertise.

(2) NRCS is to act as a cooperating agency if requested. NRCS may request to be designated as a cooperating agency if proposed actions may affect areas of NRCS expertise, such as prime farmlands, soils, erosion control, and agricultural sources of nonpoint pollution. NRCS, as a cooperating agency, is to comply with the requirements of 40 CFR 1501.6(b) to the extent possible depending on funds, personnel, and priority. If insufficient funds or other resources prevent NRCS from participating fully as a cooperating agency, NRCS is to request the lead agency to provide funds or other resources which will allow full participation.

(c) *Scoping.* See 40 CFR 1501.7 for a definition of scoping.

(1) NRCS is to use scoping to identify and categorize significant environmental issues in its environmental evaluation. Formalized scoping is used to insure that an analytical EIS can be prepared that will reduce paperwork and avoid delay. Scoping allows NRCS to obtain the assistance and consultation of affected agencies that have special expertise or legal jurisdiction in the proposed action. If early environmental evaluation identifies a need for an EIS, NRCS is to publish a notice of intent (NOI) to prepare an EIS. The NOI is to request the assistance of all interested agencies, groups, and persons in determining the scope of the evaluation of the proposed action.

(2) Normally a scoping meeting is held and Federal, State, or local agencies that have special expertise or legal jurisdiction in resource values that may be significantly affected are requested to participate. The scoping meeting will identify agencies that may become cooperating agencies.

(3) In the scoping meeting, the range of actions, alternatives, and impacts to be evaluated and included in the EIS as defined in (40 CFR 1508.25) are to be determined. Tiering (40 CFR 1508.28) may be used to define the relation of the proposed statement to other statements.
