§ 8.2 Semiannual assessment.

(a) Each national bank and each District of Columbia bank shall pay to the Comptroller of the Currency a semiannual assessment fee, due by January 31 and July 31 of each year, for the six-month period beginning 30 days before each payment date. The amount of the semiannual assessment paid by each bank is computed as follows:

If the banks' total assets (consolidated domestic and foreign subsidiaries) are:		The semiannual assessment is:

(1) Every national bank falls into one of the ten asset-size brackets denoted by Columns A and B. A bank's semiannual assessment is composed of two parts. The first part is the calculation of a base amount of the assessment, which is computed on the assets of the bank up to the lower endpoint (Column A) of the bracket in which it falls. This base amount of the assessment is calculated by the OCC in Column C.

(2) The second part is the calculation by the bank of assessments due on the remaining assets of the bank in excess of Column E. The excess is assessed at the marginal rate shown in Column D.

(3) The total semiannual assessment is the amount in Column C, plus the amount of the bank's assets in excess Column E times the marginal rate in Column D: Assessments = C+[(Assets—E) x D].

(4) Each year, the OCC may index the marginal rates in Column D to adjust for the percent change in the level of prices, as measured by changes in the Gross Domestic Product Implicit Price Deflator (GDPIPD) for each June-to-June period. The OCC may at its discretion adjust marginal rates by amounts less than the percentage change in GDPIPD. The OCC will also adjust the amounts in Column C to reflect any change made to the marginal rate.

(5) The specific marginal rates and complete assessment schedule will be published in the "Notice of Comptroller of the Currency Fees", provided for at § 8.8 of this part. Each semiannual assessment is based upon the total assets shown in the bank's most recent
