§ 924.1 Scope.

This part contains all rules applicable only within the State of Mississippi which have been adopted under the Surface Mining Control and Reclamation Act of 1977.

[45 FR 58525, Sept. 4, 1980]

§ 924.10 State program approval.

(a) The Mississippi State program, as submitted on August 2, 1979, and resubmitted on May 27, 1980, is approved, effective September 4, 1980. Copies of the approved program are available at:

(1) Mississippi Department of Environmental Quality, Office of Geology, Southport Center, 2380 Highway 80 West, Jackson, Mississippi 39289-1307. Telephone (601) 961-5530.

(2) Office of Surface Mining Reclamation and Enforcement, Birmingham Field Office, 135 Gemini Circle, Birmingham, Alabama 34209. Telephone (205) 290-7282.

(b) In its May 16, 1980 opinion, the U.S. District Court for the District of Columbia ordered the Secretary to affirmatively disapprove any regulation in a State program which incorporates

a suspended or remanded regulation. A list follows of provisions contained in the Mississippi submission which are based on suspended or remanded Federal regulations. These regulations are affirmatively disapproved to the extent indicated or, if no limitation is indicated, in their entirety.

(1) The definition of "mine plan area" in section 101 and its use in sections 179, 180, 183 and 184 to the extent the definition includes areas outside the permit area.

(2) Sections 100.11 (a), (b), and (c) insofar as they may be read to retain discretion in the Mississippi DNR to grant an exemption from reconstruction of existing structures after making the findings in sections 180.12 or 184.12.

(3) In section 161.5(2)(i), the "all permits test" used in defining valid existing rights to the extent it does not include persons who had made good faith applications for all necessary permits, but not yet received them.

(4) In section 161.5, the definition of "public road."

(5) Under sections 161.11(c) and .12(f)(1) the limitation on surface mining operations which will affect places eligible for listing on the National Register of Historical Places.

(6) Sections 161.11(c) and .12(f)(1) insofar as they would apply to privately-owned places listed on the National Register of Historic Places in addition to publicly-owned places.

(7) Sections 176.11(b) (3) and (5) to the extent that they require the notice of exploration to include a map rather than a description only.

(8) Sections 179.20 and 180.16.

(9) Sections 179.21 and 183.21, to the extent they apply to land not qualifying as prime farmland.

(10) Section 183.14(a)(1) insofar as it requires a geologic description of the strata down to and immediately below any coal seam for areas to be affected only by "surface operations and facilities" where removal of overburden down to level of coal seam will not occur.

(11) Sections 183.25 (c), (h) and (i).

(12) Section 185.17(a) insofar as it exempts permits approved prior to August 3, 1977, from prime farmland reconstruction standards.

(13) Sections 185.17(b)(3) and 223.14(c).

(14) Section 185.17(b)(8).

(15) In section 186.5 the words "or has not been" from the definition of "irreparable harm to the environment."

(16) Sections 206.12(e)(6)(iii) and (g)(7)(iii).

(17) Section 207.11(e) insofar as it does not allow citizen access to the mine site for performance bond release.

(18) Section 208.14(b).

(19) Sections 216.42(a) (1) and (7) insofar as they require that runoff from reclaimed lands meet the same effluent limitations as that for actively mined lands.

(20) Sections 216.42(b) and 217.42(b).

(21) Sections 216.46(b) and 217.46(b).

(22) Sections 216.46(c) and 217.46(c).

(23) In sections 216.46(d) and 217.46(d), the words "and shall have a discharge rate to achieve and maintain the required theoretical detention time."

(24) Sections 216.46(h) and 217.46(h).

(25) Section 216.65(f) and 217.65(f).

(26) Sections 216.83(a) and 217.83(a) to the extent that they would preclude an exemption from the underdrain requirement for coal processing waste banks where an operator can demonstrate that an alternative to the required subdrainage systems would ensure structural integrity of the waste bank and protection of ground or surface water quality.

(27) Sections 216.95 and 217.95.

(28) Sections 216.103(a)(1) and 217.103(a)(1).

(29) Sections 216.115, 217.115, 223.11(c) 223.15(b) and 223.15(c), to the extent that they exceed the statutory authority which requires only that restored land be "capable" of supporting the designated use.

(30) Sections 216.116(b) and 217.116(b) to the extent that they delay triggering an operator's five year period of responsibility for revegetation until the operator meets the standard for vegetative cover.

(31) Sections 216.133(b)(1) and 217.133(b)(1), to the extent that an operator is not allowed to choose between restoring the land to condition capable of supporting prior-to-mining use or to higher use.

(32) Sections 216.133(c)(4) and (9) and 217.133(c)(4) and (9) concerning information needed to support alternative land uses to the extent that the operator need only demonstrate a "reasonable likelihood" of attaining a post mining use that is higher or better than previous use.

(33) Sections 216.150—176 and 217.150—176 concerning roads to the extent that notice and opportunity to comment must be provided to the public on the road classification system.

(34) Section 217.52(a), the language "on the recharge capacity of reclaimed land and * * *", concerning groundwater monitoring to the extent that special precautionary measures are not necessary to protect the recharge capacity of water bearing formations.

(35) Section 217.54 concerning hydrologic balance to the extent that water replacement is only required for surface coal mining operations.

(36) Sections 217.101(b)(1) and 217.102 concerning backfilling and grading to the extent that Appropriate Original Contour (AOC) regulations do not provide flexibility for settled fills that have become stabilized and revegetated.

(37) Part 223 concerning performance standards for operations on prime farmlands to the extent that it prevents an exemption for surface facilities actively used over extended periods but which affect a minimal amount of land.
