Cite this Code: CFR

To cite the regulations in this volume use title, part and section number. Thus, 7 CFR 1600.1 refers to title 7, part 1600, section 1.
Explanation

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. The Code is divided into 50 titles which represent broad areas subject to Federal regulation. Each title is divided into chapters which usually bear the name of the issuing agency. Each chapter is further subdivided into parts covering specific regulatory areas.

Each volume of the Code is revised at least once each calendar year and issued on a quarterly basis approximately as follows:

Title 1 through Title 16 ..............................................................as of January 1
Title 17 through Title 27 .................................................................as of April 1
Title 28 through Title 41 ..............................................................as of July 1
Title 42 through Title 50 ..............................................................as of October 1

The appropriate revision date is printed on the cover of each volume.

LEGAL STATUS

The contents of the Federal Register are required to be judicially noticed (44 U.S.C. 1507). The Code of Federal Regulations is prima facie evidence of the text of the original documents (44 U.S.C. 1510).

HOW TO USE THE CODE OF FEDERAL REGULATIONS

The Code of Federal Regulations is kept up to date by the individual issues of the Federal Register. These two publications must be used together to determine the latest version of any given rule.

To determine whether a Code volume has been amended since its revision date (in this case, January 1, 1998), consult the “List of CFR Sections Affected (LSA),” which is issued monthly, and the “Cumulative List of Parts Affected,” which appears in the Reader Aids section of the daily Federal Register. These two lists will identify the Federal Register page number of the latest amendment of any given rule.

EFFECTIVE AND EXPIRATION DATES

Each volume of the Code contains amendments published in the Federal Register since the last revision of that volume of the Code. Source citations for the regulations are referred to by volume number and page number of the Federal Register and date of publication. Publication dates and effective dates are usually not the same and care must be exercised by the user in determining the actual effective date. In instances where the effective date is beyond the cutoff date for the Code a note has been inserted to reflect the future effective date. In those instances where a regulation published in the Federal Register states a date certain for expiration, an appropriate note will be inserted following the text.

OMB CONTROL NUMBERS

The Paperwork Reduction Act of 1980 (Pub. L. 96-511) requires Federal agencies to display an OMB control number with their information collection request.
Many agencies have begun publishing numerous OMB control numbers as amendments to existing regulations in the CFR. These OMB numbers are placed as close as possible to the applicable recordkeeping or reporting requirements.

**OBSoLeTe PrOviSioNS**

Provisions that become obsolete before the revision date stated on the cover of each volume are not carried. Code users may find the text of provisions in effect on a given date in the past by using the appropriate numerical list of sections affected. For the period before January 1, 1986, consult either the List of CFR Sections Affected, 1949-1963, 1964-1972, or 1973-1985, published in seven separate volumes. For the period beginning January 1, 1986, a “List of CFR Sections Affected” is published at the end of each CFR volume.

**InCoPrOATION BY REFERENCE**

What is incorporation by reference? Incorporation by reference was established by statute and allows Federal agencies to meet the requirement to publish regulations in the Federal Register by referring to materials already published elsewhere. For an incorporation to be valid, the Director of the Federal Register must approve it. The legal effect of incorporation by reference is that the material is treated as if it were published in full in the Federal Register (5 U.S.C. 552(a)). This material, like any other properly issued regulation, has the force of law.

What is a proper incorporation by reference? The Director of the Federal Register will approve an incorporation by reference only when the requirements of 1 CFR part 51 are met. Some of the elements on which approval is based are:

(a) The incorporation will substantially reduce the volume of material published in the Federal Register.

(b) The matter incorporated is in fact available to the extent necessary to afford fairness and uniformity in the administrative process.

(c) The incorporating document is drafted and submitted for publication in accordance with 1 CFR part 51.

Properly approved incorporations by reference in this volume are listed in the Finding Aids at the end of this volume.

What if the material incorporated by reference cannot be found? If you have any problem locating or obtaining a copy of material listed in the Finding Aids of this volume as an approved incorporation by reference, please contact the agency that issued the regulation containing that incorporation. If, after contacting the agency, you find the material is not available, please notify the Director of the Federal Register, National Archives and Records Administration, Washington DC 20408, or call (202) 523-4534.

**CFR INDEXES AND TABULAR GUIDES**

A subject index to the Code of Federal Regulations is contained in a separate volume, revised annually as of January 1, entitled CFR INDEX AND FINDING AIDS. This volume contains the Parallel Table of Statutory Authorities and Agency Rules (Table I), and Acts Requiring Publication in the Federal Register (Table II). A list of CFR titles, chapters, and parts and an alphabetical list of agencies publishing in the CFR are also included in this volume.

An index to the text of “Title 3—The President” is carried within that volume.

The Federal Register Index is issued monthly in cumulative form. This index is based on a consolidation of the “Contents” entries in the daily Federal Register.
A List of CFR Sections Affected (LSA) is published monthly, keyed to the revision dates of the 50 CFR titles.

REPUBLICATION OF MATERIAL

There are no restrictions on the republication of material appearing in the Code of Federal Regulations.

INQUIRIES

For a legal interpretation or explanation of any regulation in this volume, contact the issuing agency. The issuing agency’s name appears at the top of odd-numbered pages.

For inquiries concerning CFR reference assistance, call 202-523-5227 or write to the Director, Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408 or e-mail info@fedreg.nara.gov.

SALES

The Government Printing Office (GPO) processes all sales and distribution of the CFR. For payment by credit card, call 202-512-1800, M-F, 8 a.m. to 4 p.m. e.s.t. or fax your order to 202-512-2233, 24 hours a day. For payment by check, write to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954. For GPO Customer Service call 202-512-1803.

ELECTRONIC SERVICES

In addition, the Federal Register’s public inspection list and table of contents are also available on the National Archives and Records Administration’s Fax-on-Demand system. Phone, 301-713-6905.

RAYMOND A. MOSLEY,
Director,
Office of the Federal Register.

Title 7—Agriculture is composed of fifteen volumes. The parts in these volumes are arranged in the following order: parts 1-26, 27-52, 53-209, 210-299, 300-399, 400-699, 700-899, 900-999, 1000-1199, 1200-1599, 1600-1899, 1900-1939, 1940-1949, 1950-1999, and part 2000 to end. The contents of these volumes represent all current regulations codified under this title of the CFR as of January 1, 1998.

The Food and Consumer Service current regulations in the volume containing parts 210-299, include the Child Nutrition Programs and the Food Stamp Program. The regulations of the Federal Crop Insurance Corporation are found in the volume containing parts 400-699.

All marketing agreements and orders for fruits, vegetables and nuts appear in the one volume containing parts 900-999. All marketing agreements and orders for milk appear in the volume containing parts 1000-1199. Part 900—General Regulations is carried as a note in the volume containing parts 1000-1199, as a convenience to the user.

Redesignation tables appear in the Finding Aids section of the volumes containing parts 210-299 and parts 1600-1899.

For this volume, Cheryl E. Sirofchuck was Chief Editor. The Code of Federal Regulations publication program is under the direction of Frances D. McDonald, assisted by Alomha S. Morris.
Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the LSA (List of CFR Sections Affected), the Federal Register Index, or both.

LSA
The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected. $27 per year.

Federal Register Index
The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references. $25 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Superintendent of Documents Subscription Order Form

Order Processing Code: □ YES, send me the following indicated subscriptions for one year:

- LSA (List of CFR Sections Affected), (LSA) for $27 per year.
- Federal Register Index (FRSU) $25 per year.

The total cost of my order is $.___.

Price is subject to change. International customers please add 25%.

MEETINGS OF THE BOARD OF DIRECTORS OF THE RURAL TELEPHONE BANK

§ 1600.1 General. The purpose of this part is to effectuate the provisions of the Government in the Sunshine Act. This part applies to the deliberations of a quorum of the Directors of the Bank required to take action on behalf of the Bank where such deliberations determine or result in the joint conduct or disposition of official Bank business. Any deliberation to which this part applies is hereinafter in this part referred to as a meeting of the Board of Directors.

§ 1600.2 Definitions. As used in this part:
Board means Board of Directors of the Rural Telephone Bank (Bank).
Director means an individual who is a member of the Board.
Legal Counsel means the legal counsel of the Bank.
Meeting means the deliberations (including those conducted by conference telephone call or by any other method) among a quorum of the Directors, where such deliberations determine or result in joint conduct of official business of the Board. For purposes of this part, each item on the agenda of a meeting is considered a meeting or a portion of a meeting. To the extent that the discussions do not result in the beginning of deliberations or achieve a consensus on a matter of official agency business or effectively pre-determine official actions, the term Meeting does not include:
(1) Deliberations to determine whether a meeting or portions of a meeting will be open or closed or whether information pertaining to closed meetings will be disclosed;
(2) Calling a meeting at a date earlier than announced as provided in §1600.5;
(3) Changing the subject matter of a publicly announced meeting as provided in §1600.5;
(4) Disposition of Board business by circulation of materials to individual Board members;
(5) Staff briefings of Board members;
(6) Informal background discussions among Board members and staff which clarify issues and expose varying views; or
(7) Sessions with individuals from outside the Bank where Board members listen to a presentation and may elicit additional information.
Open to public observation means the right of any member of the public to attend and observe, but not participate or interfere in any way in an open meeting of the Board.

§ 1600.3 Open meetings. (a) Except as provided for in §1600.6 every portion of every meeting of the Board shall be open to public observation. Observation does not include participation or disruptive conduct by observers, and persons engaging in such conduct will be removed from the meeting. Documents being considered at meetings of the Board may be obtained subject to the exemptions set forth in §1600.8.
(b) Board members shall not jointly conduct or dispose of official Board business other than in accordance with this part.
(c) The Secretary of the Board shall be responsible for assuring that ample space, sufficient visibility, and adequate acoustics are provided for public observation of meetings of the Board.

§ 1600.4 Scheduling of meetings. A decision to hold a meeting of the Board should be made as provided in the bylaws of the Bank and at least ten days prior to the scheduled meeting date in order for the Secretary of the
Bank to give the public notice required by §1600.5. Special meetings of the Board may be held on less than ten days notice if a majority of the Board determines by a recorded vote that Bank business requires that the special meeting be held on less than ten days notice. After public announcement of a meeting of the Board under the provisions of §1600.5, the subject matter thereof, or the determination to open or close a meeting, or portion thereof, may only be changed if a majority of the Directors determines by a recorded vote that business so requires and that no earlier announcement of the change is possible.

§ 1600.5 Public announcement of meetings.

(a) Except as otherwise provided in this section, public announcement of open meetings and meetings or portions thereof closed under §1600.7 will be made at least seven days in advance of each meeting. Except to the extent that such information is determined to be exempt from disclosure under §1600.6, each such public announcement will state the time, place, and subject matter of the meeting, whether it is to be open or closed to the public, and the name and telephone number of the official designated to respond to requests for information about the meeting. Each such announcement shall be submitted for publication in the Federal Register. Copies of the announcement shall also be mailed to holders of Class B and Class C Bank stock.

(b) If a meeting is closed, the Board may omit from the announcement information usually included, if and to the extent that it finds that disclosure would be likely to have any of the consequences listed in §1600.6.

(c) Where a majority of the Board members determine by recorded vote that Bank business requires that a meeting be called on less than ten days notice, public announcement shall be made at the earliest practicable time. Such announcement will state the time, place, and the subject matter of the meeting, whether it is to be open or closed to the public, and the name and telephone number of the official designated to respond to requests for information about the meeting.

(d) The time or place of a meeting may be changed following the public announcement required by paragraph (a) of this section only if the Secretary publicly announces such change at the earliest practicable time. The subject matter of a meeting, or the determination of the Board to open or close a meeting, or portion of a meeting, to the public, may be changed following the public announcement required by this section only if:

(1) A majority of the Directors determines by a recorded vote that business so requires and that no earlier announcement of the change was possible; and

(2) The Secretary publicly announces such change and the vote of each Director upon such change at the earliest practicable time.

(e) The earliest practicable time, as used in this subsection, means as soon as possible, which should in few, if any, instances be later than the commencement of the meeting or portion in question.

(f) Each person interested in attending an open meeting of the Board should notify the Assistant Secretary of the Board at least one business day prior to the open meeting of their intention to attend the meeting. Any person who fails to do so may not be accommodated if there is insufficient space in the meeting room.

§ 1600.6 Bases for closing a meeting to the public.

(a) A portion of a Board meeting may be closed to the public and any information pertaining to such meeting otherwise required by §1600.3 to be disclosed to the public may be withheld, where the Board determines that public disclosure of information to be discussed at such meetings is likely to:

(1) Disclose matters that are:

(i) Specifically authorized under criteria established by an Executive Order to be kept secret in the interests of national defense or foreign policy; and

(ii) In fact properly classified pursuant to such Executive Order.

(2) Relate solely to the internal personnel rules and practices of the Bank;

(3) Disclose matters specifically exempted from disclosure by statute
§ 1600.7

(other than the Freedom of Information Act, 5 U.S.C. 552), provided that such statute:
(i) Requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue; or
(ii) Establishes particular criteria for withholding or refers to particular types of matters to be withheld.

(4) Disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;
(5) Involve accusing any person of a crime, or formally censuring any person;
(6) Disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;
(7) Disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would:
(i) Interfere with enforcement proceedings;
(ii) Deprive a person of a right to a fair trial or to an impartial adjudication;
(iii) Constitute an unwarranted invasion of personal privacy;
(iv) Disclose the identity of a confidential source, and, in the case of a record compiled by a criminal enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source;
(v) Disclose investigative techniques and procedures; or
(vi) Endanger the life or physical safety of law enforcement personnel;
(8) Disclose information contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of the Bank or any other agency responsible for the regulation or supervision of financial institutions;
(9) Disclose information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed action of the Board or of another agency, except that this shall not apply in any instance where the content or nature of the proposed action has already been disclosed to the public or where the Board is required by law to make such disclosure on its own initiative prior to taking final action on such proposal; or
(10) Specifically concern the Board’s participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the Board of a particular case of formal agency adjudication pursuant to the procedures in 5 U.S.C. 554 or otherwise involving a determination on the record after opportunity for a hearing.

(b) Any Board meeting or portion thereof, which may be closed, or any information which may be withheld under paragraph (a) of this section, will not be closed or withheld, respectively, in any case where the Board finds the public interest requires otherwise.

§ 1600.7 Procedures for closing a meeting to the public.

(a) A majority of all Directors may vote to close a meeting or withhold information pertaining to that meeting. A separate vote shall be taken with respect to any action under §1600.6(a). A majority of the Board may act by taking a single vote with respect to a series of meetings, a portion or portions of which are proposed to be closed to the public, or with respect to any information concerning such series of meetings, so long as each meeting in such series involves the same particular subject matter and is scheduled to be held no more than thirty days after the initial meeting in such series. The vote of each Director participating in such vote shall be recorded and no proxy shall be allowed.

(b) Whenever any person whose interests may be directly affected by a portion of the Board’s meeting requests that the Board close such portion to the public on the basis of exemptions in paragraph (a)(5), (a)(6), or (a)(7) of §1600.6, the Board, upon request of any one of its members, will vote whether or not to close such portion of the meeting. The vote of each Director participating in such vote shall be recorded and no proxy shall be allowed.
(c) Before every Board meeting closed on the basis of one or more of the exemptions in §1600.6(a), the Legal Counsel will publicly certify that, in Counsel’s opinion, the meeting may be closed to the public and shall state each relevant exemption.

(d) Within one business day after any vote taken pursuant to paragraph (a), (b), or (c) of this section, the Board will make publicly available a written copy of the vote, reflecting the vote of each Board member. Except to the extent that such information is exempt from disclosure, if a meeting or portion of a meeting is to be closed to the public, the Board will make publicly available within one business day after the required vote a full written explanation of its action, together with a list of all persons expected to attend the meeting and their affiliation.

§ 1600.8 Transcript, recording or minutes; availability to the public.

(a) The Secretary of the Board will maintain the following records for each Board meeting, or portion thereof which is closed to the public pursuant to a vote under §1600.7:

(1) A copy of the Legal Counsel’s certification required by §1600.7;

(2) A copy of a statement from the presiding officer which sets forth the time and place of the closed meeting or portion thereof and a list of persons present; and

(3) A complete verbatim transcript or electronic recording adequate to record fully the proceedings of each Board meeting or portion of a meeting, except that in the case of a meeting or portion of a meeting closed to the public on the basis of exemptions in paragraph (a)(8) or (a)(10) of §1600.6, the Secretary of the Board will maintain either a transcript, electronic recording, or a complete set of minutes. Such minutes shall fully and clearly describe all matters discussed and shall provide a full and accurate summary of actions taken and the reasons therefor, including a description of each of the views expressed on any item and the record of all roll-call vote reflecting the vote of each member of the question. All documents considered in connection with any action will be identified in such minutes.

(b) The retention period for the records required by paragraph (a) of this section will be for a period of at least two years after the particular Board meeting or until one year after the conclusion of any Board proceeding with respect to which the meeting or portion thereof was held, whichever occurs later.

(c) The Secretary of the Board will make promptly available to the public the transcript, electronic recording, transcription of the recording, or minutes of the discussion of any item on the agenda of a Board meeting, except for such item or items of such discussion as the Board determines to contain information which may be withheld on the basis of one or more of the exemptions in §1600.6.

(d) Requests for public inspection of electronic recordings, transcripts or minutes of Board meetings shall be made to the Assistant Secretary of the Board of Directors of the Rural Telephone Bank, room 4051-South Building, U.S. Department of Agriculture, 14th Street and Independence Avenue SW., Washington, DC 20250. Requests for inspection or copies of transcripts shall specify the date of the meeting, the name of the agenda and the agenda item number; this information will appear in the notice of the meeting.

(e) The transcripts, minutes, or transcriptions of electronic recordings of a Board meeting will disclose the identity of each speaker, and will be furnished to any person at the actual cost of transcription or duplication.

**PART 1610—LOAN POLICIES**

Sec. 1610.1 General.
1610.2 Definitions.
1610.3 Loan authorizations.
1610.4 Loan applications.
1610.5 Minimum Bank loan.
1610.6 Concurrent Bank and RUS cost-of-money loans.
1610.7 Acquisition of certain exchange facilities.
1610.8 Adoption of applicable RUS policy.
1610.9 Class B stock.
1610.10 Determination of interest rate on Bank loans.
1610.11 Prepayments.

§ 1610.1  
Loans made by the Governor of the Rural Telephone Bank (the “Bank”) will be made in conformance with title IV of the Rural Electrification Act of 1936 (the “Act”), as amended (7 U.S.C. 941 et seq.), and this part 1610. Loans are made under section 408(a)(1) of the Act for purposes of section 201 of the Act. Loans are also made for purposes of section 408(a)(2) of the Act. The Bank will give preference to the use of loan funds for purposes set forth in section 408(a)(2) of the Act to the extent that it has completed applications for such loans.

§ 1610.2 Definitions.
As used in this part:
Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).
Appropriated means funds appropriated based on subsidy.
Bank means the Rural Telephone Bank, an agency and instrumentality of the United States within the United States Department of Agriculture.
Borrower means any organization which has an outstanding telephone loan made by the Bank or RUS, or guaranteed by RUS, or which is seeking such financing.
Governor means the Governor of the Bank.
REA means the Rural Electrification Administration, formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.
RUS cost-of-money-loan means a loan made under section 305(d)(2) of the Act bearing an interest rate as determined under 7 CFR 1735.31(c). RUS cost-of-money loans are made concurrently with Bank loans.
TIER (Times Interest Earned Ratio) means the ratio of the borrower’s net income (after taxes) plus interest expense, all divided by interest expense. For the purpose of this calculation, all amounts will be annual figures and interest expense will include only interest on debt with a maturity greater than one year.

§ 1610.3 Loan authorizations.
The aggregate amount of loans made will not exceed the amount authorized by the Board of Directors (the “Board”) of the Bank.

§ 1610.4 Loan applications.
No application for a loan will be considered for approval by the Bank until it has been reviewed by RUS and the Governor has determined, based on such review, the eligibility of the applicant for a Bank loan and the amount thereof. Loan application forms are available from RUS on request. No fees or charges are assessed for Bank loans.
[58 FR 66252, Dec. 20, 1993]

§ 1610.5 Minimum Bank loan.
A Bank loan will not be made unless the applicant qualifies for a Bank loan of at least $50,000.

§ 1610.6 Concurrent Bank and RUS cost-of-money loans.
(a) The Bank makes loans, under section 408 of the Act, concurrently with RUS cost-of-money loans made under section 305(d)(2) of the Act. To qualify for concurrent Bank and RUS cost-of-money loans on or after November 1, 1993, a borrower must meet each of the following requirements:
§ 1610.9 Class B stock.

Borrowers receiving loans from the Bank shall be required to invest in class B stock at 5 percent of the total amount of loan funds advanced. Borrowers may purchase class B stock by:

(1) Paying an amount (using their own general funds) equal to 5 percent of the amount, exclusive of the amount for class B stock, of each loan advance, at the time of such advance; or

(2) Requesting that funds for the purchase of class B stock be included in the loan. If funds for class B stock are included in a loan, the funds for class B stock shall be advanced in an amount

§ 1610.10 Adoption of applicable RUS policy.

The policies embodied in 7 CFR part 1610, in all parts of 7 CFR chapter XVII except those identified below, will be utilized by the Governor in carrying out the Bank’s loan program to the extent that such policies are consistent with title IV of the Act (7 U.S.C. 941 et seq.) and to the extent that policies in 7 CFR chapter XVII are consistent with 7 CFR part 1610. The parts of 7 CFR chapter XVII applicable solely to the Electric Program and thus exceptions to this section are parts 1710 through 1734 inclusive.

[55 FR 39397, Sept. 27, 1990]

§ 1610.11 Acquisition of certain exchange facilities.

In the interest of making optimum use of the Bank’s loan funds, a Bank loan for the acquisition of exchange facilities under section 408(a)(2) of the Act (7 U.S.C. 948(a)(2)) will not be recommended by the Governor for approval by the Secretary of Agriculture unless the Governor determines that the acquisition is reasonably necessary to improve the efficiency, effectiveness, or financial stability of the borrower’s telephone system, that the location and character of the proposed acquisition are such that the acquisition is reasonably necessary to accomplish such improvement, and that the amount of the requested loan for such acquisition is reasonably justified by the nature and scope of the improvement which the acquisition would effect.

§ 1610.10 Determination of interest rate on Bank loans.

(a) All loan fund advances made on or after December 22, 1987 under Bank loans approved on or after October 1, 1987, shall bear interest at the rate determined as established below, but not less than 5 percent per annum.

(b) The interest rate for the period beginning on the date the advance is made and ending at the close of the fiscal year in which the advance is made shall be the average yield on the date of advance on outstanding marketable obligations of the United States having a final maturity comparable to the final maturity of the advance. The interest rate shall be determined to the nearest 0.01 percent.

(1) For this determination, the Bank will use yields on actively traded Treasury issues adjusted to constant maturities obtained from the Federal Reserve statistical release ("Treasury rate"). In accordance with standard Treasury procedures, the rate in effect for any given day is the rate set at the close of business on the preceding day. The 30-year Treasury rate will be applied to all advances with a final maturity of at least 30 years from date of advance. A straight-line interpolation between other Treasury rates will be used to determine the rate applicable for advances with final maturities of less than 30 years.

(2) The Bank will notify the borrower in writing of the interest rate that applies to each advance.

(c) After the fiscal year in which the advance is made, the interest rate applied to the advance will be the sum of the calculations made in paragraphs (c)(1) through (5) of this section. This interest rate determination shall be made by the Governor within 30 days of the end of each fiscal year and shall be determined to the nearest 0.01 percent.

(1) The aggregate of all amounts received by the Bank during the fiscal year from the issuance of Class A stock, multiplied by the rate at which dividends are payable by the Bank during the fiscal year as specified in section 406(c) of the Act, which product is divided by the aggregate of the amounts advanced by the Bank during the fiscal year.

(2) The aggregate of all amounts received by the Bank during the fiscal year from the issuance of Class B stock, multiplied by the rate at which dividends are payable by the Bank during the fiscal year as specified in section 406(d) of the Act, which product is divided by the aggregate of the amounts advanced by the Bank during the fiscal year. Section 406(d) provides that "No dividends shall be payable on Class B stock." The "amounts received by the Bank during the fiscal year from the issuance of Class B stock" means the amount of cash received during the fiscal year for the purchase of Class B stock, plus the amount advanced to borrowers by the Bank during the fiscal year for such purchases, less any Class B stock that is rescinded during the fiscal year.

(3) The aggregate of all amounts received by the Bank during the fiscal year from the issuance of Class C stock, multiplied by the rate at which dividends are payable by the Bank during the fiscal year as specified in section 406(e) of the Act, which product is divided by the aggregate of the amounts advanced by the Bank during the fiscal year.

(4) The amounts received by the Bank during the fiscal year from each issue of telephone debentures and other obligations of the Bank, multiplied, respectively, by the rates at which interest is payable by the Bank during the fiscal year to holders of each issue, each of which product is divided, respectively, by the aggregate of the amounts advanced by the Bank during the fiscal year.

(5) The amount by which the aggregate of the amounts advanced by the Bank during the fiscal year exceeds the aggregate of the amounts received by the Bank from the issuance of Class A stock, Class B stock, Class C stock, and telephone debentures and other obligations of the Bank during the fiscal year, multiplied by the historic cost of money rate as of the close of the immediately preceding fiscal year, which product is divided by the aggregate of

equal to 5 percent of the amount, exclusive of the amount for class B stock, of each loan fund advance, at the time of such advance.

[56 FR 26596, June 10, 1991]
the amounts advanced by the Bank during the fiscal year.

(6) As used in paragraph (c)(5) of this section, the term "historic cost of money rate as of the close of the immediately preceding fiscal year," means the sums of the results of the following calculations: The amounts advanced by the Bank in each fiscal year during the period beginning with fiscal year 1974 and ending with the immediately preceding fiscal year, multiplied, respectively, by the cost of money rate for the fiscal year (as set forth in Table I for fiscal years 1974 through 1987, and as determined by the Governor in paragraphs (c) (1) through (5) of this section for fiscal years after fiscal year 1987), with each product then divided by the aggregate of the amounts advanced by the Bank from the beginning of fiscal year 1974 through the end of the fiscal year just ended.

In this table, "fiscal year" means the 12-month period ending on September 30 of the designated year.

(e) If the Bank, pursuant to section 407(b) of the Act, issues telephone debentures to refinance outstanding telephone debentures or other obligations, the Bank shall reduce the interest rate charged on each advance of Bank loan funds made during the fiscal year(s) in which the refinanced debentures or other obligations were originally issued. The reduction shall be for the period beginning on the issue date of the refinancing debentures and ending on the date the advance matures or is completely prepaid, whichever is earlier. The reduction shall be in addition to any other interest rate reduction required by section 408(b)(3) of the Act. The interest rate shall be reduced by the amount which fully reflects that percentage of the funds saved by the Bank as a result of the refinancing which is equal to the percentage representation of the advance of all advances made during the fiscal year(s) involved. In no case, however, shall the interest rate be reduced to less than 5 percent per annum. The interest rate reduction for each advance shall be determined as follows:

(1) The funds saved by the Bank as a result of the refinancing shall be computed.

(2) The advance shall be divided by the total of all advances made during the fiscal year(s) involved, and stated to the nearest .01 percent.

(3) The percentage in paragraph (e)(2) of this section is multiplied by the amount in paragraph (e)(1) of this section to determine the savings for a particular advance. The interest rate on that advance is then reduced to fully reflect the savings over the remaining amortization period of the loan from which the advance was made.

(f) Within 60 days after the issue date described in paragraph (e) of this section, the Governor shall amend the loan documentation for each advance described in paragraph (e) of this section, as necessary, to reflect any interest rate reduction applicable to the advance by reason of paragraph (e) of this section, and shall notify each affected borrower of the reduction.

(g) Within 5 days of determining the cost of money rate for a fiscal year, the Governor shall:
§ 1610.11 Prepayments.

(a) Bank loans approved before November 1, 1993, may be prepaid in accordance with the terms thereof, including payment of the premium as provided therein.

(b) A borrower may prepay part or all of a Bank loan made on or after November 1, 1993, by paying the outstanding principal and any accrued interest without being required to pay a prepayment premium.

(c) Borrowers that qualify to issue a refunding note or notes in accordance with 7 CFR 1735.43, Payments on loans, shall not be required to pay a prepayment premium on all payments made in accordance with the new payment schedule.

§ 1610.11 Prepayments.

(1) Cause the determination to be published in the Federal Register in accordance with section 552 of title 5, United States Code, and

(2) Furnish a copy of the determination to the Comptroller General of the United States.

(h) A borrower should not wait until the end of the fiscal year to submit a requisition for an advance of loan funds if it wants the advance made in that fiscal year. Borrower requisitions submitted late in the fiscal year may not be processed in that fiscal year because of workload and other factors.

PART 1700—GENERAL INFORMATION

Subpart A—Organization and Functions
Sec. 1700.1 General. 1700.2 Office of the Administrator. 1700.3 Office of the Deputy Administrator—Program Operations. 1700.4 Rural electric program. 1700.5 Rural telephone program. 1700.6 Economic development and technical services. 1700.7 Office of the Deputy Administrator—Management and Policy Support. 1700.8 Office of Assistant Administrator—Management. 1700.9 Information, legislation, policy and management analysis. 1700.10—1700.19 [Reserved]

Subpart B—Programs
1700.20 Insured electric loans pursuant to section 305 of the Rural Electrification Act, as amended. 1700.21 Insured telephone loans pursuant to section 305 of the Rural Electrification Act, as amended. 1700.22 Rural Telephone Bank loans pursuant to section 408 of the Rural Electrification Act, as amended. 1700.23 Guaranteed loans pursuant to section 306 of the Rural Electrification Act, as amended. 1700.24 Loans and grants pursuant to section 313 of the RE Act. 1700.25 Other loan authorities. 1700.26 Studies, investigations, and reports. 1700.27 Loan security activities. 1700.28 Issuances implementing procedure. 1700.29 [Reserved]

Subpart C—Public Information
1700.30 Availability of Agency publications and other information, and collection of public comments to proposed rules. 1700.31 Indexes. 1700.32 Requests for records. 1700.33 Appeals.

Subpart D—Delegations of Authority; General
1700.40 Exercise of delegated authority. 1700.41 Persons serving in acting capacities. 1700.42 Persons serving as acting Administrator. 1700.43 Persons serving as acting Assistant Administrator. 1700.44 Contracts approved on behalf of the Administrator. 1700.45—1700.59 [Reserved]

Subpart E—Delegations of Authority; Agency Issuances and Certain Correspondence
1700.60 Agency issuances. 1700.61 Agency publications control officer. 1700.62—1700.69 [Reserved]

Subpart F—Delegations; Authorities Reserved by the Administrator
1700.70 General. 1700.71 Rural economic development loan and grant and distance learning and medical link grant programs. 1700.72 Electric program. 1700.73 Telephone program. 1700.74—1700.89 [Reserved]

Subpart G—Delegations of Authority; Loan Review Committees
1700.90 General. 1700.91 Senior loan review committee. 1700.92 Assistant Administrator’s loan committee. 1700.93 Rural economic development recommendation committee. 1700.94—1700.99 [Reserved]

Subpart H—Delegations of Authority; Rural Economic Development, Program Support, and Borrower Accounting Activities
1700.100 General. 1700.101 Deputy Administrator. 1700.102 Assistant Administrator—Economic Development and Technical Services. 1700.103 Director—Rural Development Assistance Staff. 1700.104 Chief, Financing Branch—Rural Development Assistance Staff. 1700.105 Director, Borrower Accounting Division. 1700.106 Chief, Technical Accounting and Auditing Staff. 1700.107 Chiefs, Area Accounting Branches. 1700.108 Field Accountants. 1700.109 Director—Program Support Staff. 1700.110—1700.119 [Reserved]

Subpart I—Delegations of Authority; Electric Program
1700.120 General. 1700.121 Deputy Administrator. 1700.122 Assistant Administrator—Electric. 1700.123 Deputy Assistant Administrator—Electric. 1700.124 Regional Directors. 1700.125 Chiefs, Regional Engineering Branches. 1700.126 Chiefs, Area Operations Branches. 1700.127 Director—Power Supply Division. 1700.128 Chief, Operations Branch, Power Supply Division.
§ 1700.1 General.

(a) The Rural Electrification Administration (REA) was established by Executive Order No. 7037, signed by the President on May 11, 1935. Statutory authority was provided by the Rural Electrification Act of 1936 (RE Act) (49 Stat. 1363; 7 U.S.C. 901). The RE Act established REA as a lending agency with responsibility for developing a program for rural electrification.

(b) On October 28, 1949, an amendment to the RE Act authorized REA to make loans to improve and extend telephone service in rural areas. The Rural Telephone Bank (RTB or the Bank), an Agency of the United States, was established by another amendment to the RE Act, approved May 7, 1971. The Administrator of RUS serves as the Bank’s chief executive with the title of Governor. On May 11, 1973, the RE Act was further amended to establish a revolving fund and to provide authority for REA to guarantee loans made by other legally organized lenders. The RE Act was amended further on December 21, 1987, to establish a Rural Economic Development Subaccount, and to authorize funds from this subaccount to provide zero-interest loans and grants to REA borrowers to promote rural economic development and job creation. The RE Act was also amended on November 5, 1990, to add a new section 314, which authorized REA to guarantee 90 percent of the principal and interest of loans made for electric and telephone facilities by legally organized lenders. It was further amended on November 28, 1990, to establish an Assistant Administrator for Economic Development and a rural development technical assistance unit; to expand the authorities and responsibilities of REA in rural economic development; and to establish a Rural Business Incubator Fund for making grants and reduced interest loans to electric and telephone borrowers to promote business incubator projects. At the same time, the Administrator was also granted authority for financial assistance for distance learning and medical link programs.

(c) The Secretary of Agriculture (Secretary) was required to establish the Rural Utilities Service (RUS) pursuant to section 232 of the Federal Crop
Insurance Reform and Department of Agriculture Reorganization Act of 1994, (Pub. L. 103-354, 108 Stat. 3178) (Reorganization Act). The Reorganization Act established RUS as successor to REA. On October 20, 1994, the Secretary abolished REA and established RUS. RUS was assigned responsibility for administering electric and telephone loan programs previously administered by REA, water and waste facility loans and grants previously administered by the Rural Development Administration, along with other functions as the Secretary determines appropriate. The rights, interests, obligations, duties, and contracts previously vested in REA are transferred to and vested in RUS. The Secretary designated the Administrator of RUS to serve as the Governor of RTB.

(d) The offices of RUS are located in the South Building of the United States Department of Agriculture at 14th and Independence Avenue, SW., Washington, DC 20250-1500. The Electric and Telephone Programs are administered by regional offices located at this same address. There is a Northern and a Southern Regional Office, along with a Power Supply Division, for the electric program, and an Eastern and a Western Regional Office for the telephone program. (See §1700.4(b) and §1700.5(b).)

[59 FR 66440, Dec. 27, 1994]

§1700.2 Office of the Administrator.

(a) The Administrator (who also serves as Governor of the RTB) is appointed by the President, with the advice and consent of the Senate, for a term of 10 years. The Administrator functions as the chief executive of the Agency under the general supervision and direction of the Under Secretary for Rural Economic and Community Development. The Administrator is aided directly by two Deputy Administrators, Assistant Administrators for the Electric Program, the Telephone Program, for Economic Development and Technical Services, and for Management. The Financial Services Staff and the Equal Opportunity and Civil Rights Staff also report directly to the Administrator. The work of the Agency is carried out through the offices and divisions described in this part.

(b) The Financial Services Staff performs the following functions:

(1) Evaluates financial conditions of financially troubled borrowers;
(2) Negotiates settlements and "work-outs" of financially troubled borrowers who have or may have delinquent loans in order to satisfy the government’s interests, keeping abreast of financial and legal factors that may affect the negotiations;
(3) Coordinates the Agency’s efforts to identify and develop strategies for potentially financially troubled borrowers;
(4) Develops techniques and criteria for evaluating the financial and operating performance of certain rural electric and telephone borrowers;
(5) Develops certain standards, policies, and procedures in connection with loan requirements and processing for the electric and telephone programs;
(6) Analyzes and evaluates certain loan requests and transactions to determine whether the documentation justifies the request;
(7) Serves as staff to the Senior Loan Committee;
(8) Keeps other government organizations advised concerning activities of the staff; and
(9) Serves as RUS liaison to the capital markets.

(c) The Equal Opportunity and Civil Rights Staff administers the program for equal opportunity in the delivery of services and benefits by RUS borrowers and in the employment practices in the Agency. The staff:

§ 1700.3 Office of the Deputy Administrator—Program Operations.

The Deputy Administrator—Program Operations directs and coordinates the electric, telephone and rural economic development programs, technical services, and borrower accounting activities; reviews Agency policies in these areas and, as necessary, implement changes; and participates with the Administrator and other officials in planning and formulating the programs and activities of the Agency.

§ 1700.4 Rural electric program.

(a) The Assistant Administrator—Electric directs and coordinates the rural electrification program of the Agency, participating with the Administrator and Deputy Administrator—Program Operations and others in planning and formulating the programs and activities of the Agency.

(b) Regional Offices. (1) The two regional offices are the primary points of contact between RUS and electric distribution system borrowers. Each office administers the rural electric program for an assigned geographical area with assistance of field representatives located in areas assigned to them. The regional offices are composed of the following states and territories:
   (i) Northern Region. Alaska, Connecticut, Delaware, Hawaii, Idaho, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Dakota, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming, and present and former Pacific Trust Territories; and
   (ii) Southern Region. Alabama, Arizona, Arkansas, California, Colorado, Florida, Georgia, Kansas, Louisiana, Mississippi, Missouri, Nebraska, Nevada, New Mexico, North Carolina, Oklahoma, Puerto Rico, South Carolina, Tennessee, Texas, Utah, and the Virgin Islands.

(2) The regional offices perform the following functions with respect to loan feasibility and security and accomplishment of the purposes of the RE Act:
   (i) Administer the rural electrification program for distribution borrowers in the region, serving as the single point of contact for distribution borrowers;
   (ii) Provide guidance to borrowers on Agency loan policies and procedures, and receives, evaluates, and processes insured and guaranteed loan applications and other requests for financing assistance;
   (iii) If delegated the authority by the Administrator, Regional Directors may approve certain loans, lien accommodations and other actions;
   (iv) Assure that distribution and transmission systems and facilities are designed and constructed in accordance with the terms of the loan and proper engineering practices and specifications;
   (v) Maintain oversight of borrower rate actions;
   (vi) Provide guidance to borrowers on supplemental power resources; load and energy management; and the environmental aspect of the design, construction and operation of their systems;
   (vii) Maintain necessary oversight of borrowers' financial management and technical operations and practices to assure the security of the government's loans. Institute operations and management studies or other forms of corrective action as necessary;
   (viii) Works to ensure accountability of loan and other financial transactions; and
   (ix) Supplements efforts of the Equal Opportunity and Civil Rights Staff to ensure borrower compliance with civil rights requirements.

(c) Power Supply Division. The Division performs the following functions:
§ 1700.5 Rural telephone program.

(a) The Assistant Administrator—Telephone directs and coordinates the rural telephone program of the Agency, participating with the Administrator and Deputy Administrator—Program Operations and other officials in planning and formulating the programs and activities of the Agency.

(b) Regional Offices. (1) The two regional offices are the primary points of contact between RUS and all telephone system borrowers. Each office administers the rural telephone program for an assigned geographical area with assistance of field representatives located in areas assigned to them.

(2) The regional offices are composed of the following states and territories:

(i) Eastern Region. Alabama, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, Virgin Islands, West Virginia, and Wisconsin; and

21
§ 1700.6 Economic development and technical services.

(a) The Assistant Administrator—Economic Development and Technical Services directs and coordinates the rural economic development and technical services programs of the Agency, participating with the Administrator and Deputy Administrator—Program Operations and other officials in planning and formulating the programs and activities of the Agency. Two staffs and one division report to this Assistant Administrator.

(b) Rural Development Assistance Staff. This staff performs the following functions:

(1) Administers the Agency’s rural economic development and job creation programs;

(2) Evaluates the application of new communications network technology to rural telephone systems;

(3) Develops standards, policies, and procedures in connection with construction activities financed by the rural telephone program;

(4) Provides advice and assistance to the regional offices and, as requested, to borrowers on the above functions and responsibilities; and

(5) Maintains liaison with other government agencies, utilities, industry officials, and professional organizations on the above matters.

(c) Telecommunications Standards Division. This division administers engineering staff activities related to the design, construction, and technical operation and maintenance of rural telephone systems and facilities. The division:

(1) Develops Agency engineering practices, policies, guidelines and technical data relating to telephone borrowers’ systems;

(ii) Western Region. Alaska, Arizona, Arkansas, California, Colorado, Hawaii, Idaho, Iowa, Kansas, Louisiana, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, Wyoming and present and former Pacific Trust Territories along with the Northern Mariana Islands and Guam.

(3) The regional offices have the following responsibilities with respect to loan feasibility and security and accomplishment of the purposes of the RE Act:

(i) Provide guidance to applicants and borrowers on Agency and Rural Telephone Bank loan policies and procedures, and make recommendations to the Administrator on applications for loans or guarantees. If delegated the authority by the Administrator, Area Directors may approve certain loans, lien accommodations and other actions;

(ii) Review and analyze borrowers’ toll revenue settlements and local service rates for adequacy to meet loan service payments and other expenses;

(iii) Assure that telephone systems and facilities are designed and constructed in accordance with the terms of the loan and the Agency’s regulations. They review, analyze and approve borrowers’ engineering plans and specifications; engineering, equipment and construction contracts; and borrowers’ payments to engineers and contractors. They work with the borrowers to assure that completed construction meets RUS standards for quality of service and loan security; and

(iv) Provide information to borrowers regarding management and technical operations and practices with respect to the feasibility and security of the Government’s loans and achievement of RE Act purposes.

(d) Rural Telephone Bank Management Staff. This staff performs the following functions:

(1) Prepares analyses and makes recommendations to the Assistant Governor of the RTB on RTB issues;

(2) Performs the calculations needed to determine the cost of money rate to RTB borrowers;

(3) Prepares the minutes of RTB board meetings;

(4) Develops practices and procedures for determining toll forecasts for the telephone regional offices, and develops the toll forecasts for borrowers with complicated settlement arrangements; and

(5) Maintains liaison with other government agencies, utilities, industry officials, and professional organizations on the above matters.

§ 1700.6 Economic development and technical services.

(ii) Western Region. Alaska, Arizona, Arkansas, California, Colorado, Hawaii, Idaho, Iowa, Kansas, Louisiana, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, Wyoming and present and former Pacific Trust Territories along with the Northern Mariana Islands and Guam.

(3) The regional offices have the following responsibilities with respect to loan feasibility and security and accomplishment of the purposes of the RE Act:

(i) Provide guidance to applicants and borrowers on Agency and Rural Telephone Bank loan policies and procedures, and make recommendations to the Administrator on applications for loans or guarantees. If delegated the authority by the Administrator, Area Directors may approve certain loans, lien accommodations and other actions;

(ii) Review and analyze borrowers’ toll revenue settlements and local service rates for adequacy to meet loan service payments and other expenses;

(iii) Assure that telephone systems and facilities are designed and constructed in accordance with the terms of the loan and the Agency’s regulations. They review, analyze and approve borrowers’ engineering plans and specifications; engineering, equipment and construction contracts; and borrowers’ payments to engineers and contractors. They work with the borrowers to assure that completed construction meets RUS standards for quality of service and loan security; and

(iv) Provide information to borrowers regarding management and technical operations and practices with respect to the feasibility and security of the Government’s loans and achievement of RE Act purposes.

(c) Telecommunications Standards Division. This division administers engineering staff activities related to the design, construction, and technical operation and maintenance of rural telephone systems and facilities. The division:

(1) Develops Agency engineering practices, policies, guidelines and technical data relating to telephone borrowers’ systems;
(2) Formulates and develops regulations, procedures, directives, and bulletins concerning the execution of Agency rural economic development activities;
(3) In coordination with Agency personnel, provides guidance to borrowers on Agency rural economic development policies and procedures, and makes recommendations to the Administrator on borrowers’ applications for rural economic development financial assistance;
(4) Provides economic and community development technical assistance to borrowers; and
(5) Advises Agency personnel on rural economic development matters.

(c) Program Support Staff. This staff has the following responsibilities:
(1) Prepares special and ongoing analyses regarding the operations of the Agency’s loan, loan-guarantee, and grant programs, and supervises special projects as assigned;
(2) Develops and maintains Agency regulations and bulletins on pre-and post-loan policies and procedures, and provides advice and assistance to Agency staff and others regarding the achievement of program policies;
(3) Coordinates with corresponding program staffs regarding the implementation of program-wide policies;
(4) Coordinates joint program initiatives;
(5) Provides coordination and assistance on management development of RUS and borrower personnel, as assigned; and collaborates with borrowers’ organizations and professional groups in management development;
(6) Develops and maintains a variety of loan fund control ledgers for electric and telephone program lending authorities; and
(7) Keeps abreast of external developments by state, local and Federal regulatory and legislative bodies relating to RUS programs.

The Deputy Administrator—Management and Policy Support directs and coordinates the legislative, public information, administrative and budget activities of the Agency and participates with the Administrator and other officials in planning and formulating the programs, policies and other functions of the Agency. Activities are carried out by an Assistant Administrator—Management and others who report directly to the Deputy Administrator.
§ 1700.8 Office of Assistant Administrator—Management.

The Assistant Administrator—Management directs and coordinates the general administrative activities of the agency, participates with the Administrator and Deputy Administrators and other officials in planning and formulating the programs and activities of the agency. The Office of Budget and four other divisions are directed and coordinated by the Assistant Administrator—Management.

(a) The Office of Budget administers the budgetary and financial management program of the Agency. The office:

(1) Determines the annual funding needs for current and multi-year forecasts, participating with the Administrator in presenting and supporting the Agency's budget and program plans; and

(2) Administers budget execution, apportionment, allotment and use and control of all Agency funds.

(b) The Personnel Management Division administers the personnel program of the Agency, covering both headquarters and field personnel. The division:

(1) Administers the provisions of the Classification Act, to achieve uniform application of position classification principles and standards to all RUS positions; conducts organization studies and develops recommendations for changes; develops and administers the Agency's personnel management evaluation activities;

(2) Administers the employment program for the Agency, including staffing, recruitment, placement and separation; administers the Agency's merit promotion program; maintains liaison with the National Finance Center of personnel data processing activities including payroll;

(3) Administers Agency responsibilities for employee relations including: grievances and appeals, performance appraisals, performance recognition system, conflict of interest, awards, benefits, and leave;

(4) Directs, coordinates, and evaluates a program of employee training to achieve the maximum utilization of skills and abilities of personnel; conducts training sessions; plans and directs conferences; prepares training budget; approves training requests; and coordinates an information program for foreign visitors;

(5) Provides advice and assistance to Agency officials and employees to ensure sound and effective administration of the Agency's personnel program;

(6) Maintains working relations and liaison on personnel management matters with the staff and other agencies of the Department and other government agencies; and

(7) Participates with the Administrator, in conjunction with the Equal Opportunity and Civil Rights Staff, in the implementation and enforcement of USDA equal employment opportunity programs (see §1700.2(c) (2)); coordinates equal employment opportunity complaint system with the Department; develops and administers the Agency's Federal Equal Opportunity Recruitment Program.

(c) The Administrative Services Division administers a wide array of management services. The division administers:

(1) General services involving contracting and procurement, space management, property and supplies management, records management and communications;

(2) The Agency's rulemaking and regulatory review activities, coordinating with the Office of the Federal Register, the Office of the General Counsel, and the Office of Management and Budget; and

(3) The Agency's publications issuance system and the forms and report program.

(d) The Automated Information Systems Division analyzes the application of data processing to RUS program activities, including feasibility studies of the costs and benefits of automated data processing. The division:

(1) Establishes standards and procedures for developing, maintaining and using the Agency's major automated systems covering borrower information, loan accounting and special management programs; performs systems analyses, development, and programming; and ensures data security;

(2) Operates the data processing equipment of the Agency, including the
conversion of data from source documents and the preparation of statements, reports, analyses, and other information, and provides training and assistance to users; and

3. Collects and analyzes financial, operating, and other statistical data obtained from borrowers and other sources, and prepares reports on the progress and status of the programs of RUS and the RTB.

(3) Collects and analyzes financial, operating, and other statistical data obtained from borrowers and other sources, and prepares reports on the progress and status of the programs of RUS and the RTB.

(e) The Financial Operations Division administers the fiscal accounting program of the agency and the RTB. The division:

(1) Develops, recommends and implements accounting policies, systems, and procedures regarding the Agency's and RTB's operations;

(2) Maintains accounts to provide control over and accountability for all funds, assets, liabilities, income and expenses of the Agency and the RTB; and prepares reports required by RUS, RTB, the U.S. Department of Agriculture, and other government agencies;

(3) Examines and certifies for payment, vouchers and invoices covering administrative expenses and loan fund advances of the Agency and the RTB;

(4) Reviews, examines and processes monthly billings and debt service payments for RUS and RTB loans;

(5) Reviews, examines and processes loan fund advances, billings, debt service payments and all other accounting related activities connected with Federal Financial Bank loans to RUS borrowers; and

(6) Maintains custody of the original copies of notes and mortgages and certain loan collateral.

§ 1700.9 Information, legislation, policy and management analysis.

The Deputy Administrator—Management and Policy Support, directs two separate staffs of the Agency dealing with public information and legislation, and policy and management analysis.

(a) The Legislative and Public Affairs Staff performs the following functions:

(1) Analyzes the policy, programs and procedural implications of Federal and State legislation affecting RUS programs; prepares special reports for the Administrator on legislative affairs; and responds to inquiries from Congress and others concerning RUS programs;

(2) Maintains liaison with the Department's legislative staff and with congressional offices;

(3) Manages the information activities of the Agency to provide borrowers and the public with timely information concerning the operations, status, progress and accomplishments of the rural electrification, rural telephone and rural development programs;

(4) Evaluates the public information activities of the Agency and advises on actions that will improve public understanding and acceptance of Agency functions; and

(b) The Policy and Management Analysis Staff performs the following functions:

(1) Coordinates the development and monitors the implementation of the Agency's long-term program and management plans, ensuring that these plans are up to date at all times;

(2) Ensures that these long-term plans include quality-improvement, efficiency, and cost saving initiatives;

(3) Ensures that audit resolutions are incorporated in the Agency's strategic planning and other processes for establishing goals and objectives; and

(4) Initiates and coordinates management productivity programs of the Agency.

§§ 1700.10—1700.19 [Reserved]

Subpart B—Programs

§ 1700.20 Insured electric loans pursuant to section 305 of the Rural Electrification Act, as amended.

(a) General. These loans are made from the Rural Electrification and Telephone Revolving Fund for purposes authorized by section 4 of the RE Act. The standard interest rate on these loans is 5 percent, but a rate as low as 2 percent is authorized by section 305(b) of the RE Act if a borrower:

(1) Has experienced extreme financial hardship; or
§ 1700.21 Insured telephone loans pursuant to section 305 of the Rural Electrification Act, as amended.

(a) General. (1) These loans are made from the Rural Electrification and Telephone Revolving Fund for purposes authorized by section 201 of the RE Act. The standard interest rate on these loans is 5 percent, but a rate as low as 2 percent is authorized by section 305(b) of the RE Act under the same conditions as specified in §1700.20(a) of this part.

(2) These loans are made for the purpose of improvement, expansion, construction, acquisition and operation of telephone lines, facilities, or systems to furnish or improve telephone service in rural areas. Borrowers may be required to provide a portion of the investment themselves. The loans, approval of which rests solely within the discretion of the Administrator, must be repaid within a period, not to exceed 35 years, that approximates the expected useful life of the facilities financed and must be reasonably secured in the judgment of the Administrator. The loans may be made to any type of commercial or nonprofit corporation now providing or who may hereafter provide telephone service in rural areas. Preference is given to persons already providing telephone service in rural areas and to cooperative, nonprofit, limited dividend or mutual associations.

(b) Loan applications. Applications for these loans are made on forms prescribed by RUS, copies of which are available from RUS on request. Loan applicants are assisted, as necessary, in conducting area coverage surveys and in preparing loan applications. If an application is acceptable after legal, engineering, economic and financial studies, funds are obligated by a loan contract and the borrower gives a note, mortgage and, in some cases, other security.

(d) Construction. Under the loan agreements, RUS reserves the right to approve the design and construction of the facilities, and to require progress reports on construction and audits of the borrower’s records relating to construction.

(e) Advance of loan funds. Loan funds are advanced on the basis of requisitions submitted by borrowers in accordance with the loan contract and RUS regulations.

§ 1700.21 Insured telephone loans pursuant to section 305 of the Rural Electrification Act, as amended.

(a) General. (1) These loans are made from the Rural Electrification and Telephone Revolving Fund for purposes authorized by section 201 of the RE Act. The standard interest rate on these loans is 5 percent, but a rate as low as 2 percent is authorized by section 305(b) of the RE Act under the same conditions as specified in §1700.20(a) of this part.

(2) These loans are made for the purpose of improvement, expansion, construction, acquisition and operation of telephone lines, facilities, or systems to furnish or improve telephone service in rural areas. Borrowers may be required to provide a portion of the investment themselves. The loans, approval of which rests solely within the discretion of the Administrator, must be repaid within a period, not to exceed 35 years, that approximates the expected useful life of the facilities financed and must be reasonably secured in the judgment of the Administrator. The loans may be made to any type of commercial or nonprofit corporation now providing or who may hereafter provide telephone service in rural areas. Preference is given to persons already providing telephone service in rural areas and to cooperative, nonprofit, limited dividend or mutual associations.

(b) Loan applications. Applications for these loans are made on forms prescribed by RUS, copies of which are available from RUS on request. Loan applicants are assisted, as necessary, in conducting area coverage surveys and in preparing loan applications. If an application is acceptable after legal, engineering, economic and financial studies, funds are obligated by a loan contract and the borrower gives a note, mortgage and, in some cases, other security.

(d) Construction. Under the loan agreements, RUS reserves the right to approve the design and construction of the facilities, and to require progress reports on construction and audits of the borrower’s records relating to construction.

(e) Advance of loan funds. Loan funds are advanced on the basis of requisitions submitted by borrowers in accordance with the loan contract and RUS regulations.
(d) Advance of loan funds. Loan funds are advanced on the basis of requisitions submitted by borrowers in accordance with the loan contract and 7 CFR part 1744.

§ 1700.22 Rural Telephone Bank loans pursuant to section 408 of the Rural Electrification Act, as amended.

These loans are made for the purposes authorized by section 201 of the Act. The loans, approval of which rests solely within the discretion of the Governor, bear interest at a rate equal to the cost of funds to the Bank; must be repaid within a period, up to a maximum of 35 years, that approximates the expected useful life of the facilities financed; and must be reasonably secured in the judgement of the Administrator. These loans are administered by RUS staff as part of the rural telephone program pursuant to the policies and procedures set forth in 7 CFR part 1610.

[56 FR 2671, Jan. 24, 1991]

§ 1700.23 Guaranteed loans pursuant to section 306 of the Rural Electrification Act, as amended.

These loans are made by any legally organized lending agency and guaranteed in the full amount thereof by the Administrator for purposes provided in the RE Act, including without limitation, distribution, sub-transmission, bulk transmission and generation facilities. The loans guaranteed under this section are serviced by the lender except that loans made by the Federal Financing Bank are serviced by RUS. The interest rate on these loans is as agreed upon by the borrower and the lender.

[57 FR 6290, Feb. 24, 1992]

§ 1700.24 Loans and grants pursuant to section 313 of the RE Act.

These zero-interest loans and grants are made to borrowers under the RE Act for the purpose of promoting rural economic development and rural job creation projects. Selection and approval of applications for zero-interest loans and grants rests solely within the discretion of the Administrator. (See 7 CFR part 1703.)

[57 FR 6290, Feb. 24, 1992]

§ 1700.25 Other loan authorities.

(a) The Administrator has authority under section 314 of the RE Act to guarantee 90 percent of the principal and interest of loans made by qualified private lenders to finance electric and telephone facilities in rural areas. (See 7 CFR parts 1712 and 1739.) The Administrator also has authority under section 502 of the RE Act to make grants and reduced interest loans to promote business incubator programs or for the creation or operation of business incubators in rural areas. Authority is also granted to the Administrator by the Rural Economic Development Act of 1990 (7 U.S.C. 950aaa et seq.) to provide financial assistance for distance learning and medical link programs.

(b) The Administrator has authority under section 5 of the RE Act to make loans to electric borrowers for the purpose of financing the wiring of the premises of persons in rural areas and for the purchase and installation of electrical and plumbing appliances and equipment, including machinery. The Administrator also has authority under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) to finance community antenna television (CATV) services and facilities. Funds have not been appropriated for these purposes since 1969 in the case of section 5 loans and not since 1981 in the case of CATV loans.

[57 FR 6290, Feb. 24, 1992]

§ 1700.26 Studies, investigations, and reports.

Pursuant to section 2 of the RE Act, the Agency may make, or cause to be made, studies, investigations, and reports concerning the condition and progress of electrification and telephony in rural areas in the several States and territories and may publish and disseminate information with respect thereto.
§ 1700.27 Loan security activities.

In carrying out its program, and in the interest of loan security, the Agency requires periodic reports of borrowers on operations, annual audits, etc., and provides specialized and technical accounting, engineering, and other managerial assistance to borrowers with respect to the construction and operation of their facilities, to help them establish efficient and economical service in rural areas.

§ 1700.28 Issuances implementing procedure.

There are available from RUS, upon request:
(a) Basic forms of loan agreements; and
(b) Rules and bulletins issued from time to time which implement the loan agreements and the Agency’s policies and procedures.

§ 1700.29 [Reserved]

Subpart C—Public Information

§ 1700.30 Availability of Agency publications and other information, and collection of public comments to proposed rules.

(a) 5 U.S.C. 552(a)(2) requires that certain materials be made available for public inspection and copying.
(b) The Rural Utilities Service (RUS) issues from time to time notices and regulations in the Federal Register as well as bulletins, informational publications, and staff instructions in order to:
   (1) Implement the provisions of the RE Act and the loan and security instruments;
   (2) Establish Agency procedures; and
   (3) Assist electric and telephone borrowers in the design, operation, and maintenance of their systems.
(c) Information about availability and costs of Agency publications and other Agency materials is available from Publications and Directives Management Branch, Administrative Services Division, Rural Utilities Service, Room 0180, South Building, U.S. Department of Agriculture, Washington, DC 20250-1500.
(d) RUS will provide for the distribution of indexes of publications in conformance with the Freedom of Information Act, 5 U.S.C. 552(a)(2). Single copies of individual bulletins, informational publications, staff instructions, and forms, including forms of basic loan and security instruments, are available to borrowers and other members of the public either directly from RUS, from the Superintendent of Documents, U.S. Government Printing Office, Washington DC 20402, or from another source to be established by RUS. Costs for these publications are established in conformance with 7 CFR part 1. Initial copies of Bulletins directed to RUS borrowers are provided at no cost to those borrowers.
(e) RUS requires that all persons submitting comments to a proposed rule published by the Agency submit a signed original and three copies of their comments to the address shown in the preamble to the proposed rule. Copies of comments submitted are available to the public in conformance with 7 CFR part 1.

§ 1700.31 Indexes.

5 U.S.C. 552(a)(2) requires that each agency publish or otherwise make available a current index of all materials required to be made available for public inspection and copying. RUS will maintain and publish current indexes and quarterly supplements thereof, providing identifying information for all RUS Bulletins and for staff manuals and instructions made available pursuant to §1700.30. Requests for copies should be addressed, in person or by mail, to the Office of the Director, Administrative Services Division, Room 0168—South Building, U.S. Department of Agriculture, Washington, DC 20250-1500.

§ 1700.32 Requests for records.

Requests for records under 5 U.S.C. 552(a)(3) shall be made in accordance with 7 CFR 1.6(a) and addressed to Office of the Director, Legislative and Public Affairs Staff, Rural Utilities Service, room 4043, South Building, U.S. Department of Agriculture, Washington, DC 20250-1500. A request shall describe the records sought as set forth in 7 CFR 1.6(b). A charge may be made
to cover the costs of fulfilling the request. Requests may be submitted in person or by mail.

[55 FR 53487, Dec. 31, 1990]

§ 1700.33 Appeals.

Any person whose request under §1700.32 is denied shall have the right to appeal such denial. This appeal shall be submitted in accordance with 7 CFR 1.3(e) and addressed to the Administrator, Rural Utilities Service, Room 4051, South Building, U.S. Department of Agriculture, Washington, DC 20250-1500.

Subpart D—Delegations of Authority; General

SOURCE: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§ 1700.40 Exercise of delegated authority.

(a) Unless specifically reserved, or otherwise delegated, the delegations of authority contained in subparts D through L of this part include the authority to take any action or execute any document deemed necessary and proper to the discharge of such responsibilities. In the exercise of authority delegated in subparts D through L of this part, all applicable RUS policies, regulations, and procedures should be followed. All delegations previously made are superseded.

(b) No delegation of authority by the Administrator or other person shall preclude the Administrator or other person from exercising any of the authority so delegated.

§ 1700.41 Persons serving in acting capacities.

Incumbents delegated authority in subparts D through L of this part are authorized to designate a person to act for them as necessary, except that a Regional Director or the Director, Power Supply Division may not redelegate authority to approve loans, loan guarantees or lien accommodations, and related actions as set forth in §§1700.124(a), 1700.127(a) and 1700.145(a). If an incumbent of a position to whom delegations are made in subparts D through L of this part is absent or is unable to carry out such delegations, the person designated authority to act for the incumbent shall exercise the authority conferred by such delegations. Such designations shall be in accordance with any instruction issued by the incumbent’s supervisor.

§ 1700.42 Persons serving as acting Administrator.

The following persons are authorized, in descending order, to act for the Administrator only in his or her absence, sickness, resignation, or death: Deputy Administrator, Assistant Administrator—Electric, Assistant Administrator—Telephone, Assistant Administrator—Economic Development and Technical Services. That is, if the first person on the list is also absent, sick, has resigned, or is dead, the second person on the list is authorized to act for the Administrator and so on down the list. Persons on this list may not redelegate the authority to act for the Administrator. The Administrator may in his or her discretion in writing, on a case-by-case basis, delegate authority to act as Administrator in his or her absence outside of this specified order.

§ 1700.43 Persons serving as acting Assistant Administrator.

(a) Electric and telephone programs. The Deputy Assistant Administrator in each program is authorized to act for the respective Assistant Administrator in his absence, sickness, resignation or death. The Deputy Assistant Administrators may not redelegate this authority.

(b) Assistant Administrator—Economic Development and Technical Services. (1) The Directors of the Rural Development Assistance Staff, Borrower Accounting Division and the Program Support Staff are authorized to act for the Assistant Administrator—Economic Development and Technical Services in his or her absence according to the following schedule:

<table>
<thead>
<tr>
<th>Director of Rural Development Assistance Staff</th>
<th>Months</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rural Development Assistance Staff.</td>
<td>January, April, July, October.</td>
</tr>
<tr>
<td>Borrowers Accounting Division.</td>
<td>February, May, August, November.</td>

<tr>
<th>Months</th>
</tr>
</thead>
<tbody>
<tr>
<td>March, June, September, December.</td>
</tr>
</tbody>
</table>

(2) If a particular Director is absent, sick, has resigned or is dead during a scheduled month, the delegation will revolve back to the preceding month. These Directors may not redelegate this authority.

§ 1700.44 Contracts approved on behalf of the Administrator.

(a) Nonstandard contracts. Prior to the approval or the execution of the following documents, the Office of the General Counsel (OGC) shall comment as to any legal matters concerning such nonstandard contracts:

1. Contracts for engineering services, architectural services, construction, and power supply that include a substantive deviation from the standard form contract approved by OGC; and

2. Other documents involving legal matters of concern to the approving official.

(b) Signature. All contract approvals shall be signed:

(Name and Title)
For the Administrator

§§ 1700.45—1700.59 [Reserved]

Subpart E—Delegations of Authority; Agency Issuances and Certain Correspondence

Source: 59 FR 21625, Apr. 26, 1994, unless otherwise noted.

§ 1700.60 Agency issuances.

 Except as may be specifically delegated from time to time to the Deputy Administrator, or others, all authority is reserved by the Administrator to approve and issue regulations and other information published in the Federal Register, bulletins, informational publications, staff instructions concerning Agency administrative matters and those affecting more than one program, and unnumbered memoranda (mailings to borrowers in more than one program and all RUS staff). Signature authority is also reserved by the Administrator for written responses to Members of Congress, Governors, State Legislators, Federal Agency heads or Cabinet officials, as well as other controlled correspondence for Agency response. Additionally, signature authority is reserved by the Administrator for Agency mass mailings which include but are not limited to mailings to accountants, engineers, and consultants.

§ 1700.61 Agency publications control officer.

The Deputy Administrator is designated the Agency Publications Control Officer.

§§ 1700.62—1700.69 [Reserved]

Subpart F—Delegations; Authorities Reserved by the Administrator

Source: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§ 1700.70 General.

Authority for all matters not specifically delegated in subparts D through L of this part, or by other written delegation, is reserved to the Administrator, including, without limitation, the following authorities reserved in this subpart.

§ 1700.71 Rural economic development loan and grant and distance learning and medical link grant programs.

Approval of the following:

(a) Applications for loans or grants when all conditions for such approval have been met.

(b) All zero-interest loans and grants.

(c) Any modifications in the method of carrying out loan purposes, or in the amount of applications selected and loans or grants approved.

(d) Extension of principal and interest repayments for rural development purposes.

§ 1700.72 Electric program.

(a) Approval of the following loans, loan guarantees, lien accommodations or subordinations:

(1) All discretionary hardship loans.
(2) All insured loans, loan guarantees, and lien accommodations or subordinations to finance operating costs.

(3) All loans, loan guarantees, and lien accommodations or subordinations of more than $15,000,000 for distribution and power supply borrowers.

(4) All loans, loan guarantees, and lien accommodations or subordinations for distribution borrowers that are members of a power supply borrower that is in default of its obligations to the Government or that is currently assigned to the Financial Services Staff, unless otherwise determined by the Administrator.

(5) All insured loans, loan guarantees, and lien accommodations or subordinations that require an Environmental Impact Statement.

(6) All certifications and findings required by the RE Act or other applicable laws and regulations, the placing and releasing of conditions precedent to the advance of funds, and all mortgages, loan contracts or other necessary documents relating to the authorities reserved in paragraph (a) of this section.

(b) And execution of all loan contracts, mortgages or other documents in connection with loans, loan guarantees and lien accommodations approved by the Administrator.

(c) Approval of the following for unpaid and outstanding loans and loan guarantees:

(1) Rescission of loans or termination of loan guarantee commitments when the amount of the rescission or termination is more than $15,000,000.

(2) Requests to extend the time period for advancing loan funds if:

(i) The borrower is delinquent in payments on loans made or guaranteed by RUS or in litigation that may affect loan security; or

(ii) The request does not fully comply with the requirements specified in applicable RUS regulations.

(3) Extension of time of prepayment principal and interest pursuant to Section 12 of the RE Act, for borrowers in default or currently assigned to the Financial Services Staff.

(4) Agreements, plans, arrangements, recommendations to settle debt, or other actions affecting a borrower's financial or other obligations to the Government through the Administrator of RUS for loans, loan guarantees, or other financial obligations except as may be specifically delegated to the Financial Services Staff.

(5) Loan budget adjustments (transfers or reclassifications) when approval is for:

(i) Changes in generation facilities that are subject to a power survey or certification by RUS;

(ii) Any proposed change of more than $15,000,000;

(iii) Any proposed operating costs.

(d) Approval of the following for borrower facilities, organization, operations, or corporate status:

(1) Agreements for the merger or consolidation of borrowers.

(2) Power surveys or certifications by RUS involving changes in generation facilities.

(3) Contracts for the acquisition of plant-in-place of more than $15,000,000 and related financial transactions.

(4) Approval, in amounts of $25,000,000 or more, of:

(i) The use of general funds; or

(ii) Sales or transfers of property and related releases of lien.

(5) Equity development plans and amendments to equity development plans submitted by borrowers:

(i) As part of an application for any loan and loan guarantee that requires approval of the Administrator;

(ii) By any borrower whose equity as a percentage of total assets, is less than 10 percent at the time the plan is submitted, or whose equity is predicted to drop below 10 percent during the 10-year period of the plan.

(6) Assumptions of debt.

§ 1700.73 Telephone program.

(a) Approval of the following loans, loan guarantees, lien accommodations or subordinations:

(1) All loans, loan guarantees, and lien accommodations or subordinations to finance operating costs.

(2) All loans, loan guarantees, or lien accommodations or subordinations for more than $15,000,000.

(3) Loans and loan guarantees with acquisition costs for more than $5,000,000.
§§ 1700.74—1700.89
7 CFR Ch. XVII (1-1-98 Edition)
(4) Loans and loan guarantees containing funds to refinance outstanding debt amounts for more than $5,000,000.
(b) All loan contracts, mortgages and other documents to be executed in connection with loans and loan guarantees approved by the Administrator.
(c) Approval of the following for unpaid and outstanding loans and loan guarantees:
(1) Extension of time for payment of principal and interest pursuant to Section 12 of the RE Act, for borrowers in default.
(2) Agreements, plans, arrangements, recommendations to settle debt, or other actions affecting a borrower’s financial or other obligations to the Government acting through the Administrator of RUS for loans, loan guarantees or other financial obligations.
(3) Sales and transfers of property for more than $5,000,000 and related releases of lien.

§ 1700.90 General.
To assist in carrying out the authorities which are reserved or delegated in subparts D through L of this part, the roles of the following committees in this subpart are recognized.

§ 1700.91 Senior loan review committee.
The Senior Loan Review Committee, appointed by the Administrator, shall review and make recommendations to the Administrator on all electric and telephone loans, loan guarantees, and lien accommodations or subordinations whose approval has been reserved by the Administrator. The committee shall be chaired by the Administrator and include the Assistant Administrator—Electric (AAE), Assistant Administrator—Telephone (AAT), and such other members as the Administrator may appoint.

§ 1700.92 Assistant Administrator’s loan committee.
Both the electric and telephone programs shall have Assistant Administrator’s Loan Committees (AALC), consisting of the Regional Directors or Acting Regional Directors of the respective programs as well as additional members appointed by the appropriate Assistant Administrator. The AALC shall be chaired by either the appropriate Assistant Administrator or Deputy Assistant Administrator. The AALC shall meet as required to review, analyze, and concur in recommendations for actions to be taken for all loan application requests, loan guarantee applications, and lien accommodations or subordinations. The recommending official may not vote.
(a) Assistant Administrators and Regional Directors may approve loans, loan guarantees, or lien accommodations or subordinations under § 1700.124 or § 1700.146 only after the AALC has concurred with such actions.
(b) An Assistant Administrator may, in their sole discretion, forward a recommendation for a loan, loan guarantee or other financing action to the Senior Loan Committee for its consideration.

§ 1700.93 Rural economic development recommendation committee.
The Administrator may appoint a recommendation committee for the purpose of reviewing loan and grant recommendations.

§§ 1700.94—1700.99 [Reserved]

Subpart H—Delegations of Authority; Rural Economic Development, Program Support, and Borrower Accounting Activities

§ 1700.100 General.
The following delegations of authority in this subpart are made by the Administrator.
§ 1700.101 Deputy Administrator.

The Deputy Administrator in conformance with applicable regulations and RUS policy is hereby delegated authority to exercise all authorities conferred upon other persons in §1700.102.

§ 1700.102 Assistant Administrator—Economic Development and Technical Services.

The Assistant Administrator—Economic Development and Technical Services in conformance with applicable regulations and RUS policy is delegated authority to exercise all authorities conferred upon others in §§ 1700.103 through 1700.109, approval of staff instructions affecting only the Rural Development Program, and unnumbered memoranda (mailings to two or more borrowers) sent to rural development borrowers or grant recipients.

§ 1700.103 Director—Rural Development Assistance Staff.

The Director—Rural Development Assistance Staff in conformance with applicable regulations and RUS policy is delegated authority to approve for the Rural Economic Development Loan and Grant Programs and Distance Learning and Medical Link Grant Programs the following:

(a) Releases of loan and grant funds including the approval of all agreements and documents between the RUS borrower and the ultimate recipient.
(b) Cancellation of applications that have not been selected for approval by the Administrator.
(c) Rescission of loan and grant funds.
(d) Extension of the time period for the RUS borrower to meet the prerequisites to the advance of funds and the period to disburse the funds.
(e) In addition, all authorities conferred upon other persons in §1700.104.

§ 1700.104 Chief, Financing Branch—Rural Development Assistance Staff.

The Chief, Rural Development Assistance Staff—Financing Branch in conformance with applicable regulations and RUS policy is delegated authority to approve and execute for the Rural Economic Development Loan and Grant and Distance Learning and Medical Link Grant Programs the following:

(a) Reports of vouchers released; and
(b) Notice to Financial Operations Division (FOD) authorizing the advance or release of funds.

§ 1700.105 Director, Borrower Accounting Division.

The Director, Borrower Accounting Division in conformance with applicable regulations and RUS policy is delegated authority to:

(a) Approve a certified public accountant (CPA) for borrower audits of its financial statements.
(b) Take actions concerning the selection or change of a borrower's CPA (7 CFR 1773.4).
(c) Serve as the RUS liaison within the Office of Inspector General (OIG) for all borrower irregularities.
(d) In addition, execute all authorities conferred upon other persons in §§ 1700.106 through 1700.108.

§ 1700.106 Chief, Technical Accounting and Auditing Staff.

The Chief, Technical Accounting and Auditing Staff in conformance with Federal regulations and RUS policy is delegated authority to approve or execute:

(a) Actions concerning accounting policies, procedures, standards, interpretations of Financial Accounting Standards Board (FASB) issuances or other technical accounting issues; and
(b) Actions concerning the application of generally accepted auditing standards to borrowers' accounts.

§ 1700.107 Chiefs, Area Accounting Branches.

The Chiefs, Area Accounting Branches in conformance with Federal regulations and RUS policy are delegated authority to approve or execute:

(a) Statement of condition of borrower's records; and
(b) In addition, all authorities conferred upon other persons in §1700.108.

§ 1700.108 Field Accountants.

The Field Accountants in conformance with applicable regulations and RUS policy are delegated authority to approve or execute:
§ 1700.109

(a) Propriety of the disbursements of loan and equity funds as required by loan contract provisions and RUS policy.
(b) Adequacy of borrowers’ accounting systems and related records.

§ 1700.109 Director—Program Support Staff.

The Director—Program Support Staff in conformance with applicable regulations and RUS policy is delegated authority to encumber loan funds for RUS and RTB loans.

§§ 1700.110—1700.119 [Reserved]

Subpart I—Delegations of Authority; Electric Program

Source: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§ 1700.120 General.

The following delegations of authority are made by the Administrator to the electric program.

§ 1700.121 Deputy Administrator.

The Deputy Administrator in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the electric program:
(a) Agreements or contracts for management or operations services between telephone and electric borrowers.
(b) Federal Register notices announcing the availability of final Environmental Impact Statements and the approval of RUS’s final Environmental Impact Statements as well as Findings of No Significant Impact (FONSI).
(c) In addition, all authorities conferred upon other persons in §1700.122.

§ 1700.122 Assistant Administrator—Electric.

The Assistant Administrator—Electric in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the electric program:
(a) Approval of the following loans and necessary documents, except for those approvals reserved for the Administrator in §1700.72(a):
(1) Approval of loans of $15,000,000 or less for entities not previously financed by RUS.
(2) Loans, loan guarantees, and lien accommodations or subordinations for distribution and power supply borrowers in amounts from $50,000,000 to $15,000,000.
(b) The following actions for unpaid and outstanding loans:
(1) Rescission of loans or termination of loan guarantee commitments when the amount of the rescission or termination is $15,000,000 or less.
(2) Requests to extend the period for advancing loan funds in any amount except for:
(i) Requests from borrowers that are delinquent in their loan payments to RUS or in payments guaranteed by RUS or in litigation that may affect loan security.
(ii) Requests that do not comply with the requirements specified in applicable RUS regulations.
(iii) Cases where the Administrator has further reserved this authority.
(3) Extension of time for payment of principal and interest pursuant to section 12 of the RE Act for other than Energy Conservation Resources Loans, except for requests from borrowers in default or currently assigned to FSS.
(4) Loan budget adjustments (transfers or reclassifications) except when such adjustments would provide funds for:
(i) Changes in generation facilities that are subject to a power survey certification.
(ii) Any proposed change for more than $15,000,000.
(iii) Any proposed operating costs.
(5) Imposition of and release of special controls on loan fund advances when the borrower is delinquent in payments on RUS loans or guarantees by RUS or the borrower is in litigation that may affect loan security.
(6) Questions arising from the interpretations or clarifications of the application of 7 CFR 1721.1 to individual borrower circumstances.
(c) The following changes in borrowers’ facilities, organization or corporate status:
(1) Changes in transmission facilities not identified to RUS at the time of loan approval that are subject to a
§ 1700.124

Regional Directors.

Regional Directors in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the electric program’s distribution borrowers:

(a) The following loans, loan guarantees, lien accommodations, and documents:

   (1) Insured loans, loan guarantees, and lien accommodations or subordinations in amounts of less than $10,000,000, except for those approvals reserved for the Administrator in §1700.72(a), or those reserved for the Assistant Administrator—Electric under §1700.122(a).

   (2) All certifications and findings required by the RE Act or other applicable laws and regulations, the imposing and releasing of conditions precedent to the advance of loan funds, and all mortgages, loan contracts or other documents relating to the delegations set forth in paragraph (a)(1) of this section.

   (b) The following matters for unpaid and outstanding loans:

      (1) Recission of loans or termination of loan guarantee commitments when

      (2) All certifications and findings required by the RE Act or other applicable laws and regulations, the imposing and releasing of conditions precedent to the advance of loan funds, and all mortgages, loan contracts or other documents relating to the delegations set forth in paragraph (a)(1) of this section.

(Rural Utilities Service, USDA)
the amount of the rescission or termination is $10,000,000 or less, except for discretionary or operating loans.

(2) Requests to extend the period for advancing loan funds when the amount of unadvanced loan funds is $10,000,000 or less, except for:

(i) Requests from borrowers that are delinquent in their loan payments to RUS or in loans guaranteed by RUS or in litigation that may affect loan security.

(ii) Requests that do not fully comply with the requirements specified in RUS regulations.

(iii) Cases where the Administrator has further reserved this authority.

(3) Basis date agreements for all approved requests to extend the period for advancing loan funds.

(4) Principal deferments under Section 12 of the RE Act for Energy Resource Conservation Loans and Rural Economic Development Investments.

(5) Loan budget adjustments (reclassifications or transfers) except when such adjustments would provide funds for:

(i) Changes in generation and transmission facilities that are subject to a power survey or certification by RUS.

(ii) Any change exceeding $10,000,000.

(iii) Any operating costs.

(6) Advance of loan funds under “stop orders” and “special conditional agreements” when the conditions have been met, except when the borrower is delinquent in its loan payments to RUS, or its loans guaranteed by RUS, or when the borrower is in litigation which may affect loan security or the Office of the Administrator has reserved this authority.

(7) Imposition of special controls on the further advance of loan funds when it has been determined that loan feasibility may be jeopardized.

(8) Complete releases of lien and satisfaction in cases where a borrower has repaid its indebtedness in full.

(9) Approval of prepayments in accordance with 7 CFR part 1786 and all related documents.

(10) Cancellation or endorsement due to payment on borrowers’ notes which have been paid in full in connection with a prepayment made under the provisions of 7 CFR part 1786, subpart F.

(c) Matters concerning borrower facilities, organization, or corporate status:

(1) Agreements between electric borrowers for the operation of facilities.

(2) Management and operating agreements between electric borrowers and subsidiary organizations engaged in rural development activities.

(3) Sales and leases of borrowers’ capital assets involving transactions in amounts of $5,000,000 or less and the related releases of lien.

(4) Use of general funds by a borrower for plant additions in the amount of $5,000,000 or less, except for facilities subject to power supply surveys or certification by RUS.

(5) Annual review of loan security of borrowers.

(6) Action concerning certain retirements of patronage capital and other cash distributions which meet the following conditions:

(i) The retirement will not reduce total equity to less than 25 percent of total assets and other debits;

(ii) The oldest capital credits outstanding before the retirement are at least 10 years old where the retirement method is first-in, first-out, or the retirement is not more than 7 percent of all outstanding capital credits before the retirement where another method of retirement, authorized by the bylaws, is used; and

(iii) TIER and DSC ratios exceed mortgage minimum, i.e., the average of the highest two of the last 3 years exceeds 1.5 for TIER and 1.25 for DSC.

(7) Approval as a majority note holder of employment contracts between a borrower and its general manager.

(8) Waiver of specified defects in title to property obtained by borrowers.

(9) All equity development plans and amendments to equity development plans except those requiring approval of the Administrator.

(10) Any contracts for the acquisition of plant-in-place of $5,000,000 or less and related financial transactions.

(d) Letters certifying borrowing eligibility for non-borrower electric cooperatives seeking financing from the Bank for Cooperatives.
(e) In addition, all authorities conferred upon other persons in §§1700.125, 1700.126 and 1700.130.

§ 1700.125 Chiefs, Regional Engineering Branches.

The Chiefs, Regional Engineering Branches in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the electric program with respect to distribution and transmission facilities for distribution borrowers:

(a) The following matters concerning unpaid and outstanding loans and loan guarantees:

(1) Financial requirements and expenditure statements when all conditions precedent to the advance of loan funds have been met, no litigation is pending pertaining to the loan or loan guarantee, the borrower is not delinquent in its loan payments to RUS or in loans guaranteed by RUS, and the Office of the Administrator has not reserved this authority.

(2) Report of vouchers released.

(3) Concurrent loan fund requisitions.

(b) The following matters concerning technical specifications, and borrower facilities and organization, except for matters concerning generation facilities:

(1) Selection by a borrower of an architect; plans and specifications, work orders, and contracts for architectural services for the construction of headquarters, garage, and warehouse facilities requiring RUS approval, and final inventory documents and payments to contractors and architects.

(2) Selection by a borrower of an engineer and contracts for engineering services in cases requiring RUS approval.

(3) Contracts for construction and right-of-way clearing and for the purchase of substation sites and Headquarters facility sites with clear title and special types of equipment requiring RUS approval.

(4) Final inventory documents and payments to contractors and engineers.

(5) Use of nonstandard drawings, materials, and equipment.

(6) Technical engineering studies for transmission, load management, microwave, Supervisory Control and Data Acquisition (SCADA) and other facilities requiring RUS approval.

(8) Plans and specifications for construction, preliminary design data and plans, and profile sheets.

(9) Negotiation in lieu of competitive bidding of borrowers' contracts.

(10) Award of contracts for construction of purchase of material and equipment with fewer than three bids.

(11) Long-range engineering plans.

(12) Borrowers' environmental reports.

(13) Amendments to all types of power supply contracts or agreements including extensions of time to existing contracts and superseding contracts with no significant changes; the addition of new delivery points; and modification of existing delivery points between distribution borrowers and non-RUS borrower power suppliers, except where facilities are subject to a power survey or certification by RUS.

(14) Final statements of engineering fees requiring RUS approval, except for generation facilities.

(c) In addition, all other authorities of an engineering nature pertaining to distribution and transmission conferred upon other persons in §1700.130.

§ 1700.126 Chiefs, Area Operations Branches.

The Chiefs, Area Operations Branches in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the electric program's distribution borrowers:

(a) The following matters with unpaid and outstanding distribution loans.

(1) Affidavits, certificates, filings, and confirmation statements with respect to the recording, filing or renewing of security instruments, including financing statements under the Uniform Commercial Code of the applicable state.

(2) Municipal and county franchises, licenses, ordinances, and permits to construct or operate facilities obtained by borrowers as required by its security instruments.
(3) Notice of clearance of RUS loan documents.

(b) Matters concerning borrower facilities, organization, or corporate status:

(1) Sales and leases of borrower’s capital assets involving transactions in amounts of $500,000 or less, except for facilities subject to power supply surveys or certification by RUS.

(2) Partial releases of lien, associated with sales of a borrower’s capital assets, involving transactions in amounts of $500,000 or less.

(3) Approval of large retail power contracts which have not been delegated to the General Field Representatives—Electric.

§ 1700.127 Director—Power Supply Division.

The Director—Power Supply Division in conformance with applicable Regulations and RUS policy is delegated authority to approve or execute for the electric program’s power supply borrowers:

(a) Approval of the following loans, loan guarantees, and loan documents:

(1) Approval of insured loans, loan guarantees, and lien accommodations or subordinations in amounts of less than $10,000,000 for power supply borrowers, except for those approvals reserved for the Administrator in § 1700.72(a).

(2) All certifications and findings required by the RE Act or other applicable laws and regulations, the placing and releasing of conditions precedent to the advance of funds, and all mortgages, loan contracts or other documents relating to the delegations set forth in paragraph (a)(1) of this section.

(b) The following matters for unpaid and outstanding loans:

(1) Rescission of loans or termination of loan guarantee commitments when the amount of the rescission or termination is $10,000,000 or less, except for discretionary or operating loans.

(2) Requests to extend the period for advancing loan funds when the amount of unadvanced loan funds is $10,000,000 or less, except for:

(i) Requests from borrowers that are delinquent in their loan payments to RUS, loans guaranteed by RUS or in litigation that may affect loan security.

(ii) Requests that do not fully comply with the requirements specified in RUS regulations.

(iii) Cases where the Administrator has further reserved this authority.

(3) Execution of basis date agreements for all approved requests to extend the period for advancing loan funds.

(4) Loan budget adjustments (reclassifications or transfers) except when such adjustments would provide funds for:

(i) Changes in generation and transmission facilities that are subject to a power survey or certification by RUS.

(ii) Any proposed change for more than $10,000,000.

(iii) Any proposed operating costs.

(5) Advance of loan funds under “stop orders” and “special conditional agreements” when the conditions have been met, except when the borrower is delinquent in its loan payments to RUS, loan guaranteed by RUS or when the borrower is in litigation which may affect loan security or the Administrator has reserved this authority.

(6) Imposition of special controls on the advance of loan funds when it has been determined that loan feasibility may be jeopardized.

(7) Approval of prepayments in accordance with 7 CFR part 1786 and all related documents.

(8) Complete releases of lien when a borrower has paid in full its indebtedness.

(9) Approval of mortgages for refinancing transactions, regardless of amount.

(10) Cancellation or endorsement due to payment on borrower’s notes which have been paid in full in connection with a prepayment made under the provisions of 7 CFR part 1786, subpart F.

(c) Matters concerning borrower facilities, organization, or corporate status:

(1) Agreements concerning borrower facilities, organization, or corporate status:

(2) Management and operating agreements between electric borrowers and subsidiary organizations engaged in rural development activities.

(d) Sales and leases of borrowers’ capital assets involving transactions in amounts of $500,000 or less, except for facilities subject to power supply surveys or certification by RUS.
amounts of $10,000,000 or less and the related releases of lien.
(4) Use of general funds by a borrower for plant additions in the amount of $10,000,000 or less, except for facilities subject to power supply surveys or certification by RUS.
(5) Annual review of loan security of power supply borrowers.
(6) Approval as a majority noteholder of employment contracts between a borrower and its general manager.
(7) Wholesale power electric rates in connection with power supply contracts.
(8) Waiver of specified defects in title to property obtained by power supply borrowers.
(9) Interconnection Agreements, Wheeling Agreements, non firm Power Sales or Purchase Agreements requiring a construction expenditure of $10,000,000 or less.
(10) Firm Power Sale or Purchase Agreements with a duration of 3 years or less, which require a construction expenditure of $10,000,000 or less.
(11) Participation agreements with other utilities on jointly owned facilities for new transmission, subtransmission or distribution facilities requiring an expenditure of $10,000,000 or less.
(12) Participation agreements with other utilities on jointly owned facilities for generation modifications to existing plant requiring an expenditure of $10,000,000 or less.
(13) Any contracts for the acquisition of plant-in-place of $5,000,000 or less and related financial transactions.
(d) In addition, all authorities conferred upon other persons in §§1700.128 and 1700.129.

§ 1700.128 Chief, Operations Branch, Power Supply Division.

The Chief, Operations Branch, Power Supply Division in conformance with applicable Regulations and RUS policy is delegated authority to approve or execute for the electric program:
(a) The following matters dealing with outstanding power supply loans:
(1) Affidavits, certificates, filings, and continuation statements with respect to the recording, filing or renewal of mortgages and deeds of trust, including financing statements under the Uniform Commercial Code of the applicable state.
(2) Municipal and county franchises, licenses, ordinances, and permits to construct or operate facilities obtained by borrowers as required by the mortgage.
(3) Notice of Clearance of RUS loan documents.
(4) Approval of large retail power contracts.
(5) Sales, transfers, and partial releases of liens involving sales of borrowers' capital assets with a value of $500,000 or less.
(b) The following matters concerning unpaid and outstanding loans:
(1) Financial requirements and expenditure statements when all conditions precedent to the advance of loan funds have been met, no litigation is pending pertaining to the loan, the borrower is not delinquent in its loan payments to RUS, loans guaranteed by RUS and the Administrator has not reserved this authority.
(2) Report of vouchers released.
(3) Concurrent loan fund requisitions.

§ 1700.129 Chiefs, Power Engineering Branches, Power Supply Division.

The Chiefs, Power Engineering Branches, Power Supply Division in conformance with applicable Regulations and RUS policy are delegated authority to approve or execute for the electric program for electric power supply borrowers:
(a) The following matters concerning technical specifications, and borrower facilities and organizational issues for power supply borrowers:
(1) Selection by a borrower of an engineer or architect; plans and specifications, work orders, preliminary design data, plans and profile sheets, and contracts for architectural and all engineering services for facilities requiring RUS approval, and final inventory documents and payments to contractors and architects.
(2) Borrowers' selection of method of construction.
(3) Final statements of engineering fees.
(4) Purchase of generating plant sites.
§ 1700.130

(5) Technical engineering studies for generation facilities.
(6) Contracts for the construction and purchase of materials and equipment for generation and transmission facilities.
(7) Use of nonstandard specifications, drawings, materials and equipment.
(8) Negotiation in lieu of competitive bidding of borrowers' contracts.
(9) Award of contracts for construction or purchase of materials and equipment with fewer than three bids.
(10) The borrower's generation portion of the CWP.

§ 1700.130 General Field Representatives—Electric.

The General Field Representatives—Electric in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the electric program:
(a) Cost estimates and facilities for distribution borrowers' large power applications.
(b) Use of armless or narrow profile construction for distribution in scenic areas or where right-of-way is restricted.
(c) Certificates of completion for distribution and transmission contract construction.
(d) Power requirements and irrigation studies for distribution borrowers:
(1) Without generation facilities;
(2) With an ownership or lease interest in RUS financed generation facilities of less than 40 MW nameplate rating as set forth in "RUS Financed Generating Plants," Information Publication (IP) 200-2, or its equivalent. This publication is available from Publications and Directives Management Branch, Administrative Services Division, Rural Utilities Service, room 0180, South Building, U.S. Department of Agriculture, Washington, DC 20250-1500;
(3) With an ownership or lease interest in RUS financed generation facilities of 40 MW or more, provided the borrower has not received RUS financial assistance for generation capacity of 40 MW or more within 15 years of the borrower's request for RUS approval of its Power Requirements Study; or
(4) That are members of a power supply borrower when the member study is not prepared as part of the power supply borrower's Power Requirements Study;
(e) Amendments to or revisions of previously approved power requirements or irrigation studies for distribution borrowers which are members of a power supply borrower when the amendment or revision is for support of
a new loan application to be submitted by the member prior to RUS's approval of a new power-supply Power Requirements Study.

(f) Distribution facilities in construction work plans including amendments and voltage drop, sectionalizing and power factor studies solely for distribution borrowers.

(g) Long-range financial forecasts prepared for distribution borrowers.

(h) Approval, for distribution borrowers, of large retail power contracts for which the borrower's investment in plant facilities does not exceed 10 percent of total utility plant except for distribution borrowers which are members of an RUS financed power supply borrower which is in default under its loan repayments or whose debt has been restructured.

§ 1700.131 Director, Electric Staff Division.

The Director, Electric Staff Division in conformance with applicable regulations and RUS policy is delegated authority to approve the following:

(a) Power Requirements Studies for:
   (1) All power supply borrowers.
   (2) All members of a power supply borrower when the members' studies were prepared as part of the power supply borrower's Power Requirements Study.
   (3) Distribution borrowers with an ownership or lease interest in generating facilities of 40 MW or more nameplate rating as set forth in RUS Financed Generating Plants (IP 200-2), or its equivalent, provided the borrower has received RUS financial assistance for generating capacity of 40 MW or more within 15 years of the borrower's request for RUS approval of its Power Requirements Study.

(b) Approval of Integrated Resource Plans for power supply and distribution systems and Demand Side Management plans for distribution systems.

§ 1700.132 Technical Standards Committees “A” and “B”—Electric.

The Technical Standards Committees “A” and “B”—Electric in conformance with applicable regulations and RUS policy are delegated authority to approve for the electric program:

(a) Technical Standards Committee “A”—Electric accepts or rejects all proposals of standard specifications, drawings, material and equipment submitted for acceptance for use in RUS financed electric systems.

(b) Technical Standards Committee “B”—Electric reviews and makes a final decision on cases referred to it by either Committee A or by appeal from a sponsor from an adverse decision made by Committee A.

§§ 1700.133—1700.139 [Reserved]

Subpart J—Delegations of Authority; Telephone Program

Source: 59 FR 21624, Apr. 26, 1994, unless otherwise noted.

§ 1700.140 General.

The delegations in this subpart relating to the RUS telephone program also apply to the Rural Telephone Bank (RTB).

§ 1700.141 General delegations.

The following delegations of authority for the telephone program in this subpart are made by the Administrator.

§ 1700.142 Deputy Administrator.

The Deputy Administrator in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the telephone program:

(a) Agreements or contracts covering management or operations services between telephone and electric borrowers.

(b) Federal Register notices announcing the availability of final Environmental Impact Statements and the approval of RUS's final Environmental Impact Statements as well as Findings of No Significant Impact (FONSI).

(c) In addition, all authorities conferred upon other persons in §1700.143.

§ 1700.143 Assistant Administrator—Telephone.

The Assistant Administrator—Telephone in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the telephone program:
§ 1700.144 Deputy Assistant Administrator—Telephone.

The Deputy Assistant Administrator—Telephone, in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the telephone program:

(a) Revisions of the borrower’s capital structure by amendment to its charter or bylaws or by issuance of additional shares of stock.

(b) In addition, all authorities conferred upon other persons in §§ 1700.145 and 1700.149.

§ 1700.145 Regional Directors.

The Regional Directors in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the telephone program:

(a) The following loans, loan guarantees, and lien accommodations or subordinations except for those approvals reserved by the Administrator in §1700.73(a):

(1) Loans, loan guarantees and lien accommodations of $7,500,000 or less.

(2) Loans and loan guarantees with acquisition costs of less than $2,000,000.

(3) Loans and loan guarantees containing refinancing of less than $2,000,000.

(b) The following loan documents and related actions:

(1) Interim financing requests.

(2) Special loan contract conditions, except for changes in such conditions for loans made by the Administrator or the Assistant Administrator.

(3) Waivers of contract conditions for release of funds.

(4) Loan designs.

(5) Characteristics letters to loan applicants setting forth loan requirements proposed for inclusion in pending loan recommendations.

(6) Loan contracts and security instruments, except for loans made by the Administrator.
§ 1700.146 Chiefs, Regional Engineering Branches—Telephone.

The Chiefs, Regional Engineering Branches—Telephone in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the telephone program:

(a) The following matters for unpaid and outstanding loans:
- Financial Requirement Statements, RUS Form 481;
- Construction loan budget adjustments except those involving change of loan budget purposes or new or revised administrative findings.

(b) The following matters concerning technical specifications and borrower facilities and organization:
- The selection by a borrower of an engineer or an architect and contracts for engineering and architecture services;
- Final inventory documents and payments to contractors and engineers;
- Statements of final engineering fees;
- Borrowers’ proposals and cost estimates for force account engineering and construction;
- Plans and specifications for central office equipment, radio, and microwave equipment, garage and warehouse.
§ 1700.147 Chiefs, Regional Operations Branches—Telephone.

The Chiefs, Regional Operations Branches—Telephone in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the telephone program:

(a) The following matters concerning unpaid and outstanding loans:
   (1) Affidavits, certificates, filings, and continuation statements with respect to the recording, filing or renewing of mortgages and deeds of trust, including financing statements under the Uniform Commercial Code of the applicable state after clearance when necessary by OGC;
   (2) Municipal and county franchises obtained by borrowers from the standpoint of acceptability for RUS loans;
   (3) State regulatory body orders and approvals from the standpoint of acceptability for RUS loans;
   (4) Special legal fees to be paid by borrowers from loan funds; and
   (5) Non-construction loan budget adjustment items, except those involving legal or policy questions or new or revised administrative findings.

(b) The following matters concerning borrower organization or corporate or capital structure:
   (1) Certificates regarding a borrower's incorporation and Articles of Incorporation and Bylaws and changes in a borrower's corporate name;
   (2) Forms of stock and equity certificates;
   (3) Borrowers' cash sales of material and equipment, excluding property in place, when approval is required and releases of lien and all other documents relating to such sales;
   (4) Borrowers' insurance and fidelity coverage;
   (5) Borrowers' lease agreements;
   (6) Approval, in amounts up to $100,000 of sales of property and related partial releases of lien;
   (7) Purchase or lease of real estate by borrowers; and
   (8) Management and operating agreements. When the borrowers involved are in more than one region, both chiefs must approve.

(c) In addition, all authorities conferred upon other persons in § 1700.148(a) and (b).

§ 1700.148 General Field Representatives—Telephone.

The General Field Representatives—Telephone in conformance with applicable regulations and RUS policy are delegated authority to approve or execute for the telephone program:

(a) Plans and specifications for RUS standard Form 772, central office buildings, or borrower specific standardized central office building plans and specifications, repeaters, standardized lightwave equipment, subscriber carrier and trunk carrier. Also, outside plant plans and specifications that conform to an approved design.

(b) Outside plant contracts up to $250,000 and all other construction and equipment contracts less than $100,000.

(c) Results of the Area Coverage Survey.

§ 1700.149 Director—Telecommunications Standards Division.

The Director—Telecommunications Standards Division in conformance with applicable regulations and RUS policy is delegated authority to approve or execute for the telephone program:

(a) Reports and invoices up to $100,000 submitted under contracts covering research services performed for RUS in connection with the telephone program.
§ 1700.172 Director, Financial Operations Division.

The Director, Financial Operations Division in conformance with applicable regulations and RUS policy is delegated authority to approve and execute for FOD the following activities related to loans made to the Administrator of RUS by facilities or properties, and power sales agreements with non-RE Act beneficiaries.

(d) Wholesale power rates.

(e) Contracts for the construction and purchase of materials and equipment.

(f) Retail rate contracts between borrowers and others relating to large power installations.

(g) Additional authorities, as specifically delegated by the Administrator, necessary to effectively resolve troubled borrower situations.

(h) Authority to execute or testify, consistent with USDA Departmental Regulations, on behalf of RUS as follows:

(1) Affidavits and certificates concerning borrowers assigned to FSS.

(2) Testify on behalf of the Agency before regulatory bodies or courts on matters pertaining to borrowers assigned to the FSS.

§ 1700.162—1700.169 [Reserved]
§ 1700.173

the Secretary of Treasury under authority of section 3(a) and 304 of the RE Act:

(1) Advances of principal on notes executed by the Administrator; and
(2) Payment of principal on loans made by the Administrator.

(b) Letters to the Federal Financing Bank (FFB) granting RUS approval to requests from borrowers, which are concurred in by the applicable Regional Director in the Electric or Telephone program for:

(1) Extensions of short-term maturity dates of advances on the specified maturity date;
(2) Prepayment of short-term maturities, including prepayment for the purpose of extending to long-term prior to the scheduled maturity date; and 7
(3) Prepayments of long-term maturities.

c) Endorsements or assignments on promissory notes or other collateral pledged by borrowers as security for loans, as may be necessary in connection with the return of such documents to borrowers, due to the payment of the obligations in full or in order that the borrowers may institute legal action thereon or in connection therewith and the transmittal to the borrowers of such promissory notes or other collateral pledged by the borrower.

(d) Cancellation or endorsement due to payment on the borrowers’ notes which have been paid in full or which are to be returned to borrowers by reason of the cancellation of such notes resulting from the receipt of RUS of funding, renewal or substituted notes and transmittal to the borrower.

(e) Actions concerning borrower loan accounting, computations, procedures and policies.

(f) Liaison responsibility with the Federal Financing Bank, the Department of Treasury.

(g) Liaison responsibility with General Accounting Office (GAO).

(h) In addition, all authorities conferred upon other persons in §1700.173.

§ 1700.173 Chief, Loans Receivable Branch.

The Chief, Loans Receivable Branch in conformance with applicable regulations and RUS policy is delegated authority to approve and execute for FOD:

(a) Preparation and forwarding of Energy Resource Conservation (ERC) loan documents to the Office of the General Counsel (OGC).

(b) Preparation and forwarding of basis date agreements to OGC.

§§ 1700.174—1700.189 [Reserved]

Subpart A—[Reserved]

Subpart B—Rural Economic Development Loan and Grant Program

Source: 57 FR 44317, Sept. 25, 1992, unless otherwise noted.

§ 1703.10 Purpose.
§ 1703.11 Policy.

(a) It is RUS’s policy that borrowers use the Rural Economic Development Loan and Grant Program to promote projects that will result in a sustainable increase in the productivity of economic resources in rural areas and thereby lead to a higher level of income for rural citizens.

(b) It is RUS’s policy that borrowers promote economic development in rural areas and job creation projects that:

1. Are based on sound economic and financial analyses;

2. Take a long-term perspective.

(c) It is RUS’s policy to direct the funds under this program to projects which are located in, or will primarily benefit, those rural areas that are experiencing the greatest economic hardship.

(d) It is RUS’s policy to encourage economic development in rural areas and job creation projects without regard to service area.

(e) It is RUS’s policy to encourage borrowers to make cushion of credit payments.

(f) It is RUS’s policy to maintain liaisons with officials of other Federal, state, regional and local rural development agencies to coordinate this program with other rural economic development programs.

§ 1703.12 Definitions.

Act— the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

Administrator— the Administrator of the Rural Utilities Service or the Administrator’s designee.

Approved purpose— a purpose that the Administrator has specifically approved in the letter of agreement covering the use of the RUS zero-interest loan and/or grant funds provided to the borrower.

Borrower— an entity that has outstanding RUS and/or Rural Telephone Bank (RTB) loan(s) or loan guarantee for an electric or telephone purpose under the provisions of the Act.

Business incubator— a facility in which small businesses can share premises, support staff, computers, software or hardware, telecommunications terminal equipment, machinery, janitorial services, utilities, or other overhead expenses, and where such businesses can receive technical assistance, financial advice, business planning services or other support. The business incubator program, however, does not necessarily have to involve the sharing of premises.

Cushion of credit payment— a voluntary unscheduled payment made after October 1, 1987, on an RUS note, which is credited to the cushion of credit account of a borrower.

Demonstration Project— a project for which the owner agrees in writing to provide RUS, if requested, with detailed information on the steps it takes in organizing and operating the project, will permit RUS and RUS’s guests to make reasonable visits to the project, and honor any other reasonable RUS request to disseminate information on the project. Examples of information include a description of incorporation procedures, types of financing obtained, permits required by governments, amount of time required for various stages of the project, sources of technical assistance from government programs, private foundations or trade organizations, any experiences or lessons that the owner wishes to share with the public and other information which will assist RUS in promoting similar projects. It will not require the disclosure of trade secrets or proprietary techniques.

Electric or telephone purpose— a purpose that:

1. The Administrator or Governor of the RTB is authorized to finance under sections 2, 4, 5, 201, 305, and 408 of the Act; or

2. Is characterized as furnishing, generating or transmitting electric energy or other activities involved in providing electricity, or is characterized as providing telephone service. It will include electric and telephone facilities and equipment used in connection with providing such a service. It will not include a relatively insignificant amount of customer premises equipment, as determined by the Administrator.

Job creation— creation of jobs in rural areas. This includes the implementation of a project in close enough proximity to rural areas so that the majority of the jobs created will be held by rural residents.
Letter of agreement—a legal document executed by the Administrator and the borrower that contains certain terms, conditions, requirements and understandings applicable to the zero-interest loan and/or grant, as determined by the Administrator.

Letter of credit—a commitment from a financial institution satisfactory to the Administrator to honor a draft drawn on the RUS borrower should the RUS borrower fail to pay on a zero-interest loan.

Pass-through-grant—a grant that the borrower makes to another entity that will own or undertake the project using the proceeds of the RUS grant.

Pass-through-loan—a loan that the borrower makes to another entity that will own or undertake the project using the proceeds of the RUS zero-interest loan.

Project—an undertaking that develops the economy of a rural area or results in job creation. As used in subpart B, the term “project” includes both direct undertakings by borrowers as well as those sponsored by other parties using the proceeds of pass-through-loans or pass-through-grants. It is the component or phase of the undertaking for which the borrower is requesting RUS funds, as determined by the Administrator.

Project feasibility studies—studies, analyses, designs, reports, manuals, guides, literature, or other forms of creating and/or disseminating information for use in evaluating or developing a proposed project. For example, it would include market research and environmental studies.

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

Reasonable loan servicing charges—charges for expenses the borrower incurs to service a loan provided to another entity unaffiliated with the borrower using the proceeds of the RUS zero-interest loan. The charges over the life of the loan for routine loan servicing expenses must not exceed an amount equal to the sum of one percent per year of the outstanding principal on the first day of each year on the borrower’s RUS zero-interest loan. The charges for extraordinary expenses associated with collection of delinquent payments or other similar expenses must receive the prior approval of the Administrator.

Revolving loan program—a program established and operated by the Borrower, using grant funds, the Borrower’s contribution and loan repayments to make loans to businesses or others for rural economic development and job creation purposes.

RTB—the Rural Telephone Bank, established as a body corporate and an instrumentality of the United States, to obtain supplemental funds from non-Federal sources and utilize them in making loans, for the purposes of financing, or refinancing, the construction, improvement, expansion, acquisition, and operation of telephone lines, facilities, or systems, for RUS Borrowers financed under sections 201 and 406 of the Act.

Rural area—a rural area as defined in section 13 of the Act.

Rural economic development—job creation or preservation or community facilities improvement projects that clearly demonstrate significant benefits to rural areas.

Rural economic development account—a federally insured account into which the borrower deposits any advances of zero-interest loan funds from RUS until the borrower disburses the funds.

Scope of work—a detailed plan, which has been approved by the Administrator, covering the work to be performed by the loan and/or grant recipient using the loan and/or grant funds.

 Significant stockholder—an owner or holder of five percent or more of the common stock (or shares) or five percent or more of the preferred stock (or shares) of the RUS borrower.
§ 1703.13 Source of funds.

Funds provided under this program come from interest differential credits to the subaccount and appropriated amounts made available to the subaccount.

§ 1703.14 Disposition of funds in the subaccount.

Zero-interest loans and grants will be made during each fiscal year to the full extent of the amounts held in the subaccount subject only to limitations imposed by law. For administrative purposes, the Administrator will make a determination of the fiscal year-end amount held in the subaccount as of a date prior to, but as near as practicable to, the end of the fiscal year.

§ 1703.15 [Reserved]

§ 1703.16 Eligibility.

Zero-interest loans and grants may be made to any borrower that is not delinquent on any outstanding Federal debt or in bankruptcy proceedings. However, a zero-interest loan or grant will not be made to a borrower during any period in which the Administrator has determined that no additional financial assistance of any nature should be provided to the borrower pursuant to any provision of the Act. The determination to suspend eligibility for assistance under this subpart will be based on one or more of the following factors:

(a) The borrower’s demonstrated unwillingness to exercise diligence in repaying RUS loans or loan guarantees that results in the Administrator being unable to find that a loan, or loan guaranteed by RUS, would be repaid within the time agreed;

(b) The borrower’s demonstrated unwillingness to meet requirements in RUS’s legal documents or regulations; or

(c) Other actions on the part of the borrower that thwart the achievement of the objectives of the RUS program.

§ 1703.17 Uses of zero-interest loans and grants.

(a) Zero-interest loans and grants must be used exclusively to promote rural economic development and/or job creation projects, including, but not limited to, project feasibility studies, start-up costs, business incubator projects, and other reasonable expenses for the purpose of fostering rural economic development.

(b) The Administrator will give preference to providing funds under this subpart for projects other than business incubator projects to the extent funds are available to borrowers for business incubator projects from a rural business incubator fund administered by the Administrator in accordance with section 502 of the Act (7 U.S.C. 950aa–1).

(c) Zero-interest loans and grants may be used for projects that enhance rural economic development by providing advanced telecommunications services and computer networks for medical and educational services, as follows: (1) For telecommunications end use and/or transmission facilities; and (2) Other portions of the project, such as modifications to buildings necessary to accommodate telecommunications equipment for medical care and other services, public or private education, and employment training.

(d) Zero-interest loans and grants may be used for community antenna television systems or facilities. The borrower will document that such facilities provide a tangible economic...
§ 1703.18 Types of projects eligible for grant funding.

Grants may be made for the following purposes:

(a) The establishment and operation of a revolving loan program by Borrowers in accordance with §1703.22.

(b) Project feasibility studies to assist for-profit and non-profit entities in conjunction with a loan for an authorized project. Feasibility studies will include management assistance, consultation, and research for planning individual projects that the Borrower has determined will benefit the rural community. Feasibility studies which may be financed under this section must be performed by qualified entities subject to §1703.19, General requirements for grant funding. Feasibility studies must address the important aspects of project assessment and planning to ensure, to the extent practicable, the success of projects. These include the market, technical, economic, financial, and managerial issues related to project feasibility. Feasibility studies may be funded in connection with viable projects as a reimbursement to the project owner for expenses incurred during the initial planning stages of the project prior to project funding by RUS;

(c) The acquisition of technical assistance in conjunction with projects funded with zero-interest loans to enable for-profit and non-profit entities to obtain analysis of facilities and processes, managerial, financial, and operational consultation. Grant funds may also be used in conjunction with zero-interest loans to enable non-profit business incubators to provide technical assistance. Technical assistance will enable project owners to identify and evaluate problems or potential problems and provide training in order that they may ultimately implement, manage, operate, and maintain viable projects which are financed with zero-interest loan funds. Technical assistance financed under this section must be performed by qualified entities which are independent of the project owner subject to §1703.19, General requirements for grant funding;

(d) Business incubators established by non-profit organizations to assist in developing emerging enterprises. Business incubators funded in conjunction with zero-interest loans will include those facilities in which single or multiple businesses may use premises, support staff, computer software, hardware, telecommunications equipment, machinery, janitorial services, utilities, or other overhead facilities. Grant funding may also be provided to allow business incubators to provide feasibility studies and technical assistance in accordance with paragraphs (b) and (c) of this section;

(e) Community development assistance to non-profit entities and public bodies for employment creation projects, or other projects which provide needed community facilities and services;

(f) Facilities and equipment to public, for-profit and non-profit entities to provide education and training to rural residents to facilitate economic development. Equipment and facilities may be funded to enable rural businesses to
provide educational and job enhancement skills to employees;
(g) Facilities and equipment to public, for-profit and non-profit entities to provide medical care to rural residents. Equipment and facilities may be funded to enable eligible entities to provide medical training and related professional health care skills to rural health care providers;
(h) Projects which utilize advanced telecommunications and/or computer networks to facilitate medical or educational services or job training in accordance with paragraphs (f) and (g) of this section.

§ 1703.19 General requirements for grant funding.

(a) Grants made under §1703.18(a), establishment and operation of a revolving loan program by Borrowers, will be limited to Borrowers and can be made without zero-interest loans. Grants made under §1703.18(b) through (h) will be made only in conjunction with zero-interest loans, and on a pass-through basis.
(b) Pass-through grant funding for projects under §1703.18 (b), (c), (f), (g) and (h) will be available for non-profit and for-profit entities. Pass-through grant funding for projects under §1703.18 (d) and (e) will be available only for non-profit entities.
(c) All projects funded with zero-interest loans and grants will require supplemental funding in accordance with §1703.23. For grants made under §1703.18(a), the portion eligible for RUS funding may be fully funded with grant funds. For all other grants funded under §1703.18, the portion of project costs eligible for RUS funding may be funded up to 20 percent with grant funds.
(d) Grant funding will be provided only to the extent necessary for a feasible project. A feasible project is a project which expects to generate sufficient income to pay operating expenses and debts and compensate for depreciation of equipment and facilities for the project which is to be funded by RUS. Depreciation must be based on allowable depreciation schedules as set forth by the United States Internal Revenue Service. Borrowers whose analyses of projects show feasibility without grant funds should not apply for grant funding. Borrowers requesting pass-through grant funds will base grant funding requests on borrower projected income and expense projections for the project, and documentation regarding depreciation of the equipment and facilities for the project. The Administrator will determine whether the Borrower’s projections of income, expenses and depreciation are reasonable. 
(e) For projects that project insufficient operating revenue the first two years to show feasibility, borrowers should first consider the deferral provisions set forth in §1703.29(b) before determining the appropriate level of requested grant funding. Zero-interest loan and grant funding will be approved in accordance with paragraph (d) of this section based on the option which results in the lowest required grant percentage.
(f) The owner of the pass-through project that receives grant funds will be encouraged to commit that the project will be a demonstration project.
(g) Borrowers or project owners must demonstrate the availability and commitment of other sources of funding needed to complete a project in addition to RUS loan and/or grant funds, prior to the first advance of RUS funds.
(h) Feasibility studies and/or technical assistance funded with grants under §1703.18 (b) and (c) must be performed by entities which are independent of the Borrower and qualified to provide such services. The project owner, if deemed qualified in accordance with this paragraph, may furnish a feasibility study under §1703.18(b). Entities furnishing technical assistance under §1703.18(c), must be independent of the project owner. To be deemed qualified, entities providing feasibility studies and/or technical assistance must:
(1) Provide sufficient documentation evidencing their proven ability, background and experience to furnish such services; and
(2) Provide sufficient documentation evidencing their legal authority and capacity to furnish such services.

[59 FR 11706, Mar. 14, 1994]
§ 1703.20 Ineligible uses of zero-interest loans and grants.

(a) Zero-interest loans and grants must not be used:

(1) To fund or assist projects of which any director, officer, general manager or significant stockholder of the Borrower, or close relative thereof, is an owner, stockholder, partner or director, or which would, in the judgment of the Administrator, create a conflict of interest or the appearance of a conflict of interest. The Borrower must disclose to the Administrator information regarding any conflict of interest, potential conflict of interest or any appearance of a conflict of interest. The Administrator will determine whether there is a conflict of interest or whether any potential conflict of interest or appearance of a conflict of interest may adversely affect RUS’s interests. A Borrower organized as, or consisting of, a cooperative, widely held mutual corporation, tribal government, municipal power corporation, public power district, or a similar widely held organization would ordinarily be able to have an ownership interest in or manage a project operated on either a for-profit or non-profit basis. A Borrower organized as a closely held, for-profit corporation with more than 5 percent of its stock held by one legal person, its subsidiary or an affiliate, would ordinarily be able to own or manage a project operated on a non-profit basis only;

(2) For any costs incurred on the project:

(i) Prior to receipt of the Borrower’s completed application by RUS during an application period unless the Administrator has specifically approved such usage in writing; or

(ii) For site development, the destruction or alteration of buildings, or other activities that would adversely affect the environment or limit the choice of reasonable alternatives prior to satisfying the requirements of §1703.32;

(3) By the Borrower to purchase or lease any real property, materials, equipment, or services from its subsidiary, an affiliate, or significant stockholders, officers, managers or directors of the Borrower, or close relatives thereof, where the purchase or lease has not been fully disclosed to the Administrator and received the Administrator’s prior written approval;

(4) By the recipient of a pass-through-loan or pass-through-grant to purchase or lease any real property, materials, equipment, or services from the Borrower, its subsidiary, an affiliate of the Borrower, or significant stockholders, officers, managers or directors of the Borrower, or close relatives thereof, where the purchase or lease has not been fully disclosed to the Administrator and received the Administrator’s prior written approval;

(5) To pay off or refinance existing indebtedness incurred prior to receipt of the Borrower’s completed application by RUS or for refinancing or repaying a loan made under the Act or a program administered by the Administrator;

(6) For any electric or telephone purpose, as determined by the Administrator;

(7) For the Borrower’s electric or telephone operations or for any operations affiliated with the Borrower unless the Administrator has specifically informed the Borrower in writing that the operations are part of the approved purposes;

(8) To pay the salaries of any employee or owner of the Borrower, its subsidiaries, or affiliates. This restriction does not prohibit the use of loan or grant funds for printing and similar costs for project feasibility studies it has prepared, commissioned or purchased if specifically approved by the Administrator. This restriction is subject to the operating expense allowance for revolving loan funds set forth in §1703.22 (a)(6);

(9) To fund feasibility studies and technical assistance as set forth in §1703.18 independently of projects which are funded under the zero-interest loan and grant program;

(10) For community antenna television systems or facilities except as provided in §1703.17(d) of this subpart;

(11) For proposed projects located in areas covered by the Coastal Barrier Resources Act (16 U.S.C. 3901 et seq.); or

(12) For anything other than an approved purpose.
§ 1703.21 Limitations on the use of zero-interest loan and grant funds.

(a) A borrower may not charge interest for the use of the proceeds of the zero-interest loan provided under this program; however, it may charge reasonable loan servicing charges, reasonable legal fees involved in providing the RUS funds to the recipient, and the amount paid for an irrevocable letter of credit made on behalf of the borrower that guarantees repayment of an RUS zero-interest loan, all as determined by the Administrator. A borrower may require the recipient of a pass-through-loan to provide and obtain adequate security for the zero-interest loan funds.

(b) A borrower must calculate any costs to charge in connection with the use of grant funds under this program for the project and must temporarily deposit the grant funds in accordance with 7 CFR parts 3015, Uniform Federal Assistance Regulations, and 3016, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments, as appropriate. Grant funds will be disbursed to the Borrower in accordance with § 1703.61(b).

(c) A borrower may not make a profit from any zero-interest loan or grant provided from the subaccount, with the exception of the $500 interest income exclusion in paragraph (d) of this section.

(d) The Borrower may not requisition zero-interest loan funds unless those funds are deposited into the Borrower’s RUS construction fund trustee account. The Borrower will be required to set up a separate Federally insured account called the Rural Economic Development Account, if loan funds are not expected to be disbursed within two months after receipt from RUS. All interest earned on temporarily deposited zero-interest loan funds in excess of $500 per 12-month period must be used for approved purposes or returned to RUS. Interest earned in excess of $500 per 12 month period and returned to RUS will not be used to reduce the Borrower’s principal indebted-

§ 1703.22 Revolving loan program.

Grant funds under this section will be provided only to RUS Borrowers on a non pass-through basis. RUS Borrowers will, in turn, provide loans to foster rural economic development in accordance with this subpart and the specific requirements of this section.

(a) General. Grant funds disbursed to RUS Borrowers to establish revolving loan programs under this section are subject to the following requirements:

(1) The uses, restrictions and limitations for zero-interest loans set forth in §§1703.17, 1703.20 and 1703.21 respectively;

(2) Loans made by RUS Borrowers initially lending grant funds disbursed by RUS are limited to types of projects specified in §1703.18 (d), (e), (f), (g) and (h). Loans may also be made for feasibility studies and technical assistance in accordance with §1703.18 (b) and (c), respectively, but only for those types of projects specified in this paragraph (a)(2). Loans made from repayments of the initial loans made by RUS Borrowers may be used for any rural economic development purpose in accordance with a prior agreement between the Borrower and RUS;

(3) All other requirements relevant to zero-interest pass-through loans and grants outlined in this subpart, except the minimum size of a zero-interest loan as specified in §1703.28(f);

(4) The initial loans made from the revolving loan fund using the grant funds must carry an interest rate of zero percent; however, loans made from repayments of the initial loan may carry an interest rate in accordance with prior agreement with RUS. In either case, the Borrower may charge reasonable loan servicing fees;

(5) The Borrower will provide a board resolution certifying a commitment to
provide and maintain additional funding to the revolving loan fund in an amount no less than 20 percent of the RUS grant approved. The Borrower will provide documentation that the additional funding has been deposited in the appropriate account in §1703.22(h)(1) prior to grant disbursement. This requirement does not pertain to supplemental funding requirements for individual projects as set forth in §1703.23. Additional funding required in this paragraph pertains only to borrowers establishing revolving loan funds, with the following provisions:

(i) Use of additional funding is subject to requirements set forth in paragraph (b) of this section and with RUS concurrence;

(ii) Individual projects funded under this section are subject to supplemental funds requirements set forth in §1703.23;

(iii) At the Borrower’s option with RUS concurrence, all or a portion of the additional funding may be used to assist project owners receiving funding from Federal grant funds under this section to meet their supplemental funding requirements set forth in §1703.23 of this subpart. Such additional funding will be deemed as Federal funds and accounted for in accordance with paragraph (h)(3)(ii)(A) of this section for electric borrowers or paragraph (h)(3)(iii)(A) of this section for telephone borrowers, as appropriate;

(iv) At the Borrower’s option, all or a portion of the additional funding may be retained as non-Federal funds, for any rural economic development project(s), subject to paragraph (g) of this section and RUS concurrence. Additional funding committed as non-Federal will be accounted for in accordance with paragraph (h)(1)(i)(E) of this section for electric borrowers or paragraph (h)(3)(ii)(E) of this section for telephone borrowers, as appropriate;

(6) Grant funds will only be provided to an RUS Borrower for a revolving loan program when a proposed budget submitted to RUS demonstrates and the Borrower agrees in writing that no more than 10 percent of grant funds received are used to cover operating expenses of the revolving loan program. Operating expenses include the costs of administering the revolving loan fund and the provision of technical assistance to project owners. All proceeds in excess of those needed to cover authorized expenses, as described above, must revert to the revolving fund and be available for re-lending for eligible projects. Budgets which reflect expenses incurred in operating the fund must be submitted to RUS annually;

(7) The Borrower may charge reasonable loan servicing charges. For purposes of this section, loan servicing charges must not exceed an amount equal to the sum of one percent per year of the outstanding principal on the first day of each year on each project owner’s zero-interest loan which is made from the RUS grant proceeds;

(8) The Borrower will submit documentation indicating that potential projects which are eligible for funding have sufficiently progressed in the planning stage to allow grant funding approved for a revolving loan program to be requisitioned by the Borrower, disbursed by RUS, and loaned to recipients within 3 years of the date of grant approval by RUS. Grant funds that have not been requisitioned within 3 years will be cancelled, unless the Administrator has approved an extension in writing. Grant funds will be disbursed by RUS in accordance with paragraphs (d) and (g) of this section;

(9) If the revolving loan program is terminated, further disbursement of grant funds will be cancelled. Repayments of loans made using grant funds which have been disbursed will be used in accordance with the Borrower’s rural development plan;

(10) Payment of creditors which provide interim or construction financing to a viable project for eligible purposes as set forth in §1703.18 of this subpart may be authorized. Refinancing for the sole purpose of replacing higher interest conventional financing with zero-interest revolving loan funds is not authorized.

(b) The Borrower’s rural development plan. RUS requires that the revolving loan program be administered in accordance with a rural development plan, developed by the Borrower and approved by RUS. The plan must be of
§ 1703.22

7 CFR Ch. XVII (1-1-98 Edition)

sufficient detail to provide RUS with a complete understanding of what the Borrower intends to accomplish by administering a revolving loan program. The rural development plan will provide the mechanics of how the revolving loan funds will be disbursed to the project owner. The rural development plan must outline the Borrower's plans for administering the revolving loan program, during the initial period when RUS grant funds are lent by the Borrower and after the revolving fund becomes non-Federal in accordance with paragraph (g) of this section. The plan must outline the following:

(1) Specific objectives for the revolving loan program, revolving loan operating procedures, lending parameters, maximum and minimum loan amount, and types of projects to be funded;

(2) Documentation of Borrower's coordination of lending activities with other local entities that provide financing for rural economic development projects. Such documentation will indicate that the Borrower will not compete with, but supplement other sources of legal financing;

(3) Eligibility criteria if other than outlined in this subpart;

(4) The application process and method of disposition of the funds to the project owner; and

(5) A procedure for monitoring the project owner's accomplishments and reporting requirements by the project owner's management.

(c) The Borrower's scope of work. Borrowers applying for grant funding under this section must submit a scope of work to RUS. Applications for grants under this section will be evaluated for funding based on the Borrower's rural development plan in paragraph (b) of this section and the scope of work. The scope of work must contain the following items:

(1) Documented need for grant funds. The Borrower must identify a sufficient number of rural development projects of the type specified in §1703.18 (d), (e), (f), (g), and (h) which are currently being planned requiring zero-interest loans equal to the amount of grant assistance requested from RUS. These projects may be supported with a community facilities plan, or other development plan, prepared by local community leaders in cooperation with the Borrower. For each project, the Borrower will submit information required under §1703.34;

(2) Documented authority and ability of the Borrower to administer a revolving rural development loan program in accordance with the provisions of this subpart. The Borrower must provide a complete listing of all personnel responsible for administering this program along with a statement of their qualifications and experience;

(3) Documented ability of the Borrower to commit financial resources under the control of the Borrower to assist in the establishment of a rural development revolving loan program. This should include a statement of the sources of funding for the administration of the Borrower's operations, as well as financial and technical assistance for projects;

(4) Documentation that the Borrower has secured commitments of significant financial support from public agencies and/or private organizations for supplemental funding to support a rural development loan program;

(5) A list of proposed fees and other charges the Borrower will assess the projects it funds; and

(6) The Borrower's rural development policy for non-Federal funds in accordance with paragraphs (b) and (g) of this section.

(d) Grant processing and approval. Applications for grants to establish revolving loan funds will be reviewed in accordance with §§1703.45 and 1703.46, and with the Borrower's rural development plan in paragraph (c) of this section.

(e) Disbursement of grant funds. Borrowers are not authorized to commence projects to be funded under this section until those projects have been submitted for authorization in accordance with paragraph (c)(1) of this section, or the projects have been submitted for authorization subsequent to grant approval in accordance with paragraph (e)(2) of this section. RUS grant funds will be disbursed on a reimbursement basis. However, upon written justification by borrowers and approval by the Administrator, borrowers unable to
fund projects under reimbursement provisions, for financial or other extraordinary reasons, may receive grant funds under the special disbursement method by submitting unpaid invoices from project owners, and grant funds will be disbursed to borrowers and passed directly to project owners. In either case, RUS grant funds will be disbursed in accordance with the provisions of 7 CFR Part 3015, Uniform Federal Assistance Regulations, the applicable requirements of this subpart, the administrative provisions outlined in paragraph (g) of this section, and the following requirements:

1. Only projects authorized by RUS in accordance with paragraphs (c)(1) and (e)(2) of this section, for which adequate documentation is submitted, including receipts for expenditures under the reimbursement method or unpaid invoices under the special disbursement method, as applicable, and certification of approved purposes, will be considered for disbursement;

2. A project which was not submitted prior to grant approval in accordance with paragraph (c)(1) of this section, may be authorized for funding subsequent to grant approval. A project which is authorized for funding under this paragraph will be considered for disbursement at the first allowable time period after project authorization in accordance with paragraphs (e)(3) and (e)(4) of this section. Project authorization after grant approval is subject to the following requirements:
   (i) The project meets the specific objectives for the Borrower's revolving loan program as outlined in paragraph (b)(1) of this section;
   (ii) The Borrower presents evidence that the project requested for authorization can be funded prior to projects which were authorized prior to grant approval in accordance with paragraph (b)(1) of this section; and
   (iii) RUS approves the project for funding in accordance with §1703.34;

3. Under the reimbursement method, grant funds requisitioned for individual projects in increments of less than $100,000, or less than 25 percent of the amount approved for the revolving loan fund, whichever is less, may be disbursed semi-annually. Submission periods for requisitioning grant funds on a semi-annual disbursement basis will be 14 days commencing from the 6-month anniversary date of grant approval. Grant funds under the special disbursement method will be requisitioned in accordance with the applicable provision in paragraph (e)(4) of this section;

4. For the reimbursement method, grant funds requisitioned for individual projects in increments of $100,000 or greater, or at least 25 percent of the amount approved for the revolving loan fund, whichever is less, may be submitted for disbursement at any time. Under the special disbursement method, grant funds of less than $100,000 may be requisitioned for disbursement at any time. However, the minimum requisition will be $50,000, or the total grant award, whichever is less.

(f) Reporting requirements. (1) The Borrower must maintain financial management systems and retain financial records in accordance with 7 CFR part 3015, Uniform Federal Assistance Regulations.

(2) Borrower records must include an accurate accounting and source documentation to support each transaction involving the revolving loan fund. Records are subject to a rural economic loan review as set forth in §1703.66(g).

(3) SF-269, "Financial Status Report," and a revolving loan program activity report will be required of all Borrowers on an annual basis. Reports will be submitted no later than 90 days after December 31 of each year. The program activity report will contain an aggregate list of projects funded, the amount funded for each project, the project repayment schedule, a brief description of each project, the project objectives, whether or not the project has been completed, and the projected number of jobs created or saved by each project. Reports under this paragraph will be required until all grant funds have been disbursed and projects completed.

(4) A performance report will be required for each project funded on an annual basis. Performance reports will be due no later than 90 days after December 31 of each year. Performance reports will be submitted until one year after project completion. Project
§ 1703.22

performance reports will contain the following:

(i) A comparison of actual accomplishments during the reporting period to the objectives established for the project and, if not attained, reasons why established objectives were not met;

(ii) Problems, delays, or adverse conditions which will materially affect attainment of planned project objectives, prevent the meeting of time schedules or objectives, or preclude the attainment of project work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or contemplated to resolve the situation;

(iii) Projected accomplishments for the next reporting period, if applicable; and

(iv) Status of compliance with any special conditions for project funding, if applicable.

5. Borrowers must report and remit interest earned on advances of grant funds deposited in interest accounts to RUS on a quarterly basis in accordance with 7 CFR part 3015, Uniform Federal Assistance Regulations.

6. Non-Federal funds. Once all RUS-derived grant funds have been utilized by the Borrower to fund rural development projects according to the provisions of this section and the applicable provisions of this subpart, loans made by the Borrower thereafter from repayments to the revolving loan fund shall not be considered as being derived from Federal funds and the requirements of these regulations will not be imposed on the Borrower or project owners. However, the Borrower will, as a condition for receiving a grant under this section, agree to the following conditions:

(1) To maintain a revolving loan account to promote rural economic development in accordance with the Borrower’s rural development plan for non-Federal funds submitted in accordance with paragraph (b) of this section;

(2) To maintain the additional funding supplied by the Borrower in accordance with paragraph (a)(5) of this section and interest earnings within the revolving loan fund;

(3) Approval may be granted by the Administrator to terminate the revolving loan program, or modify the requirements set forth in paragraphs (g)(1) and (g)(2) of this section, upon written request and justification by the Borrower. Should the Borrower terminate the revolving loan program without obtaining approval by the RUS Administrator, the Borrower will return the amount of the original grant to RUS.

(h) Administrative provisions. The requirements of this paragraph set forth the procedures for accounting, requisitioning and disbursement of Federal funds, those funds initially disbursed for projects which may be funded in accordance with an approved rural development plan and scope of work submitted by the Borrower. Disbursement of grant funds will be approved on a reimbursement basis after the grant agreement is executed by RUS and the Borrower, the applicable provisions of this subpart are met, subject to disbursement restrictions in paragraph (e) of this section, and the requirements in paragraphs (h)(1) through (3) of this section.

(1) Accounting requirements. Accounting will be performed in accordance with 7 CFR part 1767, Accounting Requirements for RUS Electric Borrowers, or 7 CFR part 1770, Accounting Requirements for RUS Telephone Borrowers, as appropriate. The Borrower will maintain accounts for the revolving funds as follows:

(A) RUS electric Borrowers. A general ledger Account 131.13, “Cash-General—Economic Development Grant Funds.” The Borrower will debit this account in an amount equal to the amount of the grant received from RUS, any additional funds deemed Federal from the Borrower as required by paragraph (a)(5)(iii) of this section, and all other funds advanced for the project, regardless of the source, if controlled by the Borrower. The Borrower will credit this account for all expenditures made with Federal funds on behalf of the rural development project.

(B) A general ledger Account 124.1, “Other Investments—Federal Economic Development Loans.” The Borrower will debit this account in the amount of Federal funds the Borrower
advances to non-associated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in Account 131.13 in paragraph (h)(1)(i)(A) of this section. This account will be credited with repayments of loans made with Federal economic development grant funds.

(C) A general ledger Account 123.3, "Investment in Associated Companies—Federal Economic Development Loans." The Borrower will debit this account in the amount of Federal funds the Borrower advances to associated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in Account 131.13 in paragraph (h)(1)(i)(A) of this section. This account will be credited with repayments of loans made with Federal economic development grant funds.

(D) Account 421, "Miscellaneous Non-operating Income." The Borrower will credit this account in the amount of Federal funds disbursed by RUS resulting from an approved requisition request in accordance with paragraph (h)(2) of this section.

(E) A general ledger Account 131.14, "Cash-General—Economic Development Non-Federal Revolving Funds." The Borrower will debit this account with any additional funds deemed non-Federal from the borrower as required by paragraph (a)(5)(iv) of this section, cash received from the repayment of loans made from accounts in paragraphs (h)(1)(i)(B), (h)(1)(i)(C), (h)(1)(i)(F), and (h)(3)(ii)(G) of this section. The Borrower will credit this account to reflect loans made for rural economic development projects from non-Federal funds from accounts specified in paragraphs (h)(1)(i)(F) and (h)(1)(i)(G) of this section.

(F) A general ledger Account 124.2, "Other Investments—Non-Federal Economic Development Loans." The Borrower will debit this account in the amount of non-Federal funds the Borrower advances to non-associated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in Account 131.14, in paragraph (h)(1)(i)(E) of this section. This account will be credited with repayments of loans made from non-Federal economic development funds.

(G) A general ledger Account 123.4, "Investment in Associated Companies—Non-Federal Economic Development Loans." The Borrower will debit this account in the amount of non-Federal funds the Borrower advances to associated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in Account 131.14, in paragraph (h)(1)(i)(E) of this section. This account will be credited with repayments of loans made from non-Federal economic development funds.

(H) A general ledger Account 171, "Interest and Dividends Receivable." The Borrower will debit this account with the amount of interest earned on the revolving loan fund. The Borrower will credit this account and debit the appropriate cash account when the cash is received.

(i) A general ledger Account 419, "Interest and Dividend Income." The Borrower will credit this account with the amount of interest earned on the revolving loan fund.

(ii) RUS telephone Borrowers. (A) A general ledger Account 1130.4, "Cash-General Fund—Economic Development Grant Funds (Class A Companies)", or Account 1120.14, "Cash-General Fund—Economic Development Grant Funds (Class B Companies)." The Borrower will debit the appropriate account in an amount equal to the amount of the grant received from RUS, any additional funds deemed Federal from the Borrower required by paragraph (a)(5)(iii) of this section, and all other funds advanced for the project, regardless of the source, if controlled by the Borrower. The Borrower will credit the appropriate account for all expenditures made with Federal funds on behalf of the rural development project.

(B) A general ledger Account 1402.4, "Other Investments in Nonaffiliated Companies—Federal Economic Development Grant Loans." The Borrower will debit this account in the amount of Federal funds the Borrower advances to nonaffiliated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be
made in the appropriate account in paragraph (h)(1)(ii)(A) of this section. This account will be credited with repayments of loans made from Federal economic development grant funds.

(C) A general ledger Account 1401.1, "Other Investments in Affiliated Companies—Federal Economic Development Grant Loans." The Borrower will debit this account in the amount of Federal funds the Borrower advances to affiliated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in the appropriate account in paragraph (h)(1)(ii)(A) of this section. This account will be credited with repayments of loans made from Federal economic development grant funds.

(D) Account 7300, "Other Non-operating Income (Class A Companies)", or Account 7300, Non-operating Income and Expense (Class B Companies), as appropriate. The Borrower will debit these accounts, as appropriate, in the amount of grant funds disbursed by RUS resulting from an approved requisition request in accordance with paragraph (h)(2) of this section.

(E) A general ledger Account 1130.5, "Cash—General Fund—Economic Development Non-Federal Revolving Funds (Class A Companies)", or Account 1120.15, "Cash—General Fund—Economic Development Non-Federal Revolving Funds (Class B Companies)", as appropriate. The Borrower will debit the appropriate account with any additional funds deemed non-Federal from the Borrower as required by paragraph (a)(5) of this section, cash received from the repayment of loans made from accounts in paragraphs (h)(1)(ii)(F), (h)(1)(ii)(G), and (h)(1)(ii)(E) of this section. The Borrower will credit the appropriate account to reflect loans made for rural economic development projects from non-Federal funds from accounts specified in paragraphs (h)(1)(ii)(F) and (h)(1)(ii)(G) of this section.

(F) A general ledger Account 1402.5, "Other Investments in Nonaffiliated Companies—Non-Federal Economic Development Grant Loans." The Borrower will debit this account in the amount of non-Federal funds the Borrower advances to nonaffiliated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in the appropriate account in paragraph (h)(1)(ii)(E) of this section. This account will be credited with repayments of loans made from non-Federal economic development funds.

(G) A general ledger Account 1401.2, "Other Investments in Affiliated Companies—Non-Federal Economic Development Grant Loans." The Borrower will debit this account in the amount of non-Federal funds the Borrower advances to affiliated organizations for authorized rural economic development projects. For each debit in this account, a corresponding credit will be made in the appropriate account in paragraph (h)(1)(ii)(E) of this section. This account will be credited with repayments of loans made from non-Federal economic development funds.

(H) A general ledger Account 1210, "Interest and Dividends Receivable." The Borrower will debit this account with the amount of interest earned on the revolving fund loan. The Borrower will credit this account and debit the appropriate cash account when the cash is received.

(2) Requisition requirements. Grant funds may be requisitioned by RUS Borrowers in accordance with disbursement requirements in paragraph (e) of this section. Borrowers will be fully reimbursed for funds expended for approved projects funded. For each completed project, the Borrower will submit the following for reimbursement:

(i) Standard Form 270, "Request for Reimbursement"; and

(ii) Copies of cancelled checks and other verifiable source records supporting the transactions; and

(iii) Certification and evidence that the project costs to be reimbursed are for a project which has been authorized by RUS and are authorized costs for that project.
§ 1703.28 Maximum and minimum sizes of a zero-interest loan or grant application.

(a) The maximum size of an application that will be considered for funding under this subpart during a fiscal year will be 3 percent of the projected total amount available for the zero-interest loans or grants under section 313 of the Act during that fiscal year, rounded to the nearest $10,000. This determination will be made by the Administrator for each fiscal year.

(b) Regardless of the projected total amount that will be available, the maximum size may not be lower than $200,000.

(c) The projected total amount available during a particular fiscal year is calculated as the sum of the projected amount that will be credited to the subaccount during a particular fiscal year from the interest differential calculation based on the RUS borrowers’ cushion of credit levels at the time the Administrator makes the determination and any amounts appropriated for that fiscal year for zero-interest loans or grants made under section 313 of the Act.

(d) After the Administrator has determined the maximum size for a fiscal year, a notice of the calculation and amount will be published promptly in the Federal Register. Thereafter, the maximum size will remain in effect until the Administrator has published the maximum size for the next fiscal year.

(e) All unselected applications on file at RUS, including both loan and grant applications, from the same borrower for the same project will be considered to be one application in determining specifically actions necessary to initiate a larger project, constitute a distinct project for the purposes of this section.
§ 1703.29 Terms of zero-interest loan repayment.

(a) The Administrator will determine the terms and repayment schedule of the zero-interest loan to the borrower based on the nature of the project and approved purposes. Ordinarily, the total term of the zero-interest loan, including any principal deferment period, will not exceed 10 years. The repayment terms the borrower sets on a pass-through-loan must equal the terms of the loan provided to the borrower unless a written request from the borrower to provide a longer deferment period, shorter total term of the loan, or other benefits is approved by the Administrator.

(b) The Administrator has the discretion to defer the repayment of principal up to two years, based on an analysis of the feasibility of the project. Ordinarily, if the Administrator considers the project to be a business expansion or going concern, the first repayment of principal will not begin until one year after the date of the RUS note. Ordinarily, if the Administrator considers the project to be a start-up project, the first repayment of principal will not begin until 2 years after the date of the RUS note. Loans must be repaid under terms set forth in RUS’s legal documents.

(c) Unless the Administrator has specifically approved otherwise, the borrower will be required to repay the RUS zero-interest loan in full at such time as a pass-through-loan has been fully repaid to the borrower. If the borrower uses the proceeds of the RUS zero-interest loan to provide pass-through-loans to more than one entity, this requirement will only apply to that portion of the zero-interest loan associated with the loan that has been fully repaid to the borrower.

(d) If the Administrator determines that, as a result of statute, court rulings, or regulatory commission decisions, it is necessary to ensure that the borrower will repay the RUS zero-interest loan, the borrower may be required to provide an irrevocable letter of credit, or another form of guarantee satisfactory to the Administrator. The letter of credit or other guarantee is to be made payable to RUS. The letter of credit or other guarantee may not be secured by any assets under a RUS and/or Rural Telephone Bank mortgage and must be in form and substance satisfactory to the Administrator. RUS must receive the letter of credit or other guarantee prior to the advance of any zero-interest loan funds.

§ 1703.30 Approval of agreements.

(a) The Administrator must approve any agreements between the borrower and the owner(s) of the project, those undertaking the project, or any intermediary that will re-lend or transfer the proceeds of the RUS funds, that the Administrator deems necessary.

(b) Borrowers must obtain the Administrator’s approval of any loan, grant or security agreement, mortgage or note between the borrower and the owner(s) of the project, those undertaking the project or any intermediary that will re-lend or transfer the proceeds of the RUS funds, prior to the advance of RUS zero-interest loan or grant funds to the borrower. The borrower must receive the Administrator’s approval of the final draft version of the documents prior to their execution.

(c) Borrowers must obtain the Administrator’s written approval prior to revising or amending any loan, grant or security agreement, mortgage or note that has been reviewed and approved by the Administrator pursuant to paragraph (b) of this section. Additionally, the borrower must obtain the Administrator’s written approval prior to executing, revising or amending any other agreement, in connection with the project, between the borrower and the owner(s) of the project, those undertaking the project or any intermediary that will re-lend or transfer the proceeds of the RUS funds.

(d) The borrower and the owner(s) of the project, or those undertaking the project, should make agreements and...
§ 1703.31 Transfer of employment or business.

The project must not result primarily in the transfer of any existing employment or business activity from one area to another.

§ 1703.32 Environmental requirements.

(a) Prospective recipients of zero-interest loans or grants should consider the potential environmental impact of their proposed projects at the earliest planning stage and plan development in a manner that reduces, to the extent practicable, the potential to affect the quality of the human environment adversely.

(b) Application for zero-interest loans or grants for project feasibility studies.

For a proposal to fund a project feasibility study, the only environmental information normally required is whether or not the proposed project being studied or analyzed will be located within an area protected under the Coastal Barrier Resources Act (16 U.S.C. 3501 et seq.) Generally, the use of Federal funds to promote development on coastal barriers is strictly limited by the Coastal Barriers Resources Act.

(c) Application for zero-interest loans or grants for a project that is not considered project feasibility studies. (1) The Administrator will review support materials in the application and initiate an environmental review process pursuant to 7 CFR part 1794. This process will focus on any environmental concerns or problems that are associated with the project.

(2) The level and scope of the environmental review will be determined in accordance with the National Environmental Policy Act of 1969 (NEPA), as amended, (42 U.S.C. 4321 et seq.), the Council on Environmental Policy for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500–1508), RUS’s environmental policies and procedures (7 CFR part 1794) and other relevant Federal environmental laws, regulations and Executive Orders.

(3) Activity related to the project that will adversely affect the environment or limit the choice of reasonable alternatives must not be undertaken prior to completion of RUS’s environmental review process.

§ 1703.33 Other considerations.

(b) Architectural barriers. All facilities financed with RUS zero-interest loans or grants that are open to the public or in which physically handicapped persons may be employed or reside must be designed, constructed, and/or altered to be readily accessible to, and usable by handicapped persons. Standards for these facilities must comply with the Architectural Barriers Act of 1968, as amended, (42 U.S.C. 4151 et seq.) and with the Uniform Federal Accessibility Standards (UFAS), (Appendix A to 41 CFR part 101, subpart 101–19.6).

(c) Flood hazard area precautions. In accordance with 7 CFR part 1788, if the project is in an area subject to flooding, flood insurance must be provided to the extent available and required under the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4001 et seq.). The insurance must cover, in addition to the buildings, any machinery, equipment, fixtures and furnishings contained in the buildings. RUS will comply with Executive Order 11988, Floodplain Management (3 CFR, 1977 Comp., p. 117), and §1794.41 of this chapter, in considering the application for the project. As set forth in §1794.41 of
§ 1703.34 Applications.

(a) Borrowers may file an application on any official workday during the first 14 days of every month. A borrower must send a copy of the application, except for an application that requests a zero-interest loan or grant for project feasibility studies, to the state single point of contact for state and local governments at the same time it submits the application to RUS. As discussed in §1703.33(g), state and local governments have 60 days to review a borrower’s proposal before the Administrator gives final approval to an application, except a proposal for project feasibility studies. The Administrator may establish a special application period if determined necessary.

(b) A completed application will consist of an original and two copies of:

(1) An application form. The application must include a completed application form, “Application for Federal Assistance,” Standard Form 424.
(2) A board resolution. The application must include a board resolution that:
   (i) Requests a zero-interest loan and/or grant, including the amount of the zero-interest loan and/or the amount of the grant rounded to the nearest $1,000 dollars;
   (ii) Includes the total combined deferment and repayment period requested for a zero-interest loan if less than 10 years;
   (iii) Includes the board’s endorsement of the proposed rural economic development project as described in the application;
   (iv) States the proposed project does not violate §§ 1703.20 and 1703.21; and discloses any information regarding a conflict of interest, potential conflict of interest, or appearance of a conflict of interest that would allow the Administrator to make an informed decision;
   (v) Authorizes an official of the borrower to requisition zero-interest loan or grant funds under this program;
   (vi) For an application for a grant only, authorizes the chief executive officer of the borrower to execute and deliver on behalf of the borrower the certification Form AD-1049 regarding a drug-free workplace program as required in part 3017, subpart F of this title; and
   (vii) Any other matters deemed necessary by the Administrator;
(3) Miscellaneous Federal forms. The application must include the following completed forms:
   (i) Form AD-1047, “Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions,” as required in part 3015, subpart A through E of this title; and
   (ii) Assurance statement or certification statement required under the Uniform Act as set forth in §1703.33(d). For pass-through-loans and pass-through-grants, the ultimate recipient of the proceeds of the RUS zero-interest loan or grant must sign the assurance statement that it will comply with the applicable provisions of the Uniform Act or sign a certification that the provisions of the Uniform Act will not apply to the rural development project which will be partially financed with the proceeds of RUS funds. If the borrower will not provide a pass-through-loan or pass-through-grant to another entity, the borrower must submit a completed assurance statement or certification regarding the applicable provisions of the Uniform Act, or have such an assurance statement on file at RUS;
(4) Contingent certifications and disclosures. As determined by the type and amount of requested funds, the application must include the following completed forms:
   (i) For an application for a zero-interest loan in excess of $150,000 or for an application for a grant in excess of $100,000, a certification statement, “Certification Regarding Lobbying,” and, if the borrower is engaged in lobbying activities described under §1703.33(h), a completed disclosure form, “Disclosure of Lobbying Activities”; and
   (ii) For an application for a grant only, a completed certification form, “Certification Regarding Drug-Free Workplace Requirements (Grants),” Form AD-1049 as required in part 3017, subpart F of this title;
(5) Other requirements. The following:
   (i) A section entitled “Selection Factors” as set forth in §1703.35;
   (ii) A section entitled “Project Description” as set forth in §1703.36;
   (iii) Except for applications for project feasibility studies, a section entitled “Environmental Impact of the Project” as set forth in §1703.37;
   (iv) Monitoring plan. For a pass-through loan and/or grant, a copy of the Borrower’s plan to monitor the loan and/or grant and ensure that the requirements of this subpart are met; and
   (v) Scope of work. For an application for a loan and/or grant, a proposed scope of work for the project.
(c) The Administrator may request additional information it considers relevant from the borrower.
(d) During the application review process, the borrower may change the amount of the zero-interest loan or grant funds requested or other portions of its application, only if approved by the Administrator. A borrower that changes its request from a grant to a
zero-interest loan must submit information necessary for the Administrator to evaluate a loan proposal as set forth in this subsection, and submit a new board resolution requesting the loan.

(The information collection requirements contained in paragraph (b) of this section were approved by the Office of Management and Budget under control number 0572-0090)

§ 1703.35 Section of the application covering the selection factors.

The application must contain a section addressing the “selection factors” consisting of the following:

(a) “Nature of the project” (§1703.46(g)(1)), which includes any information considered appropriate including aspects of the project that may not be obvious to an outside observer;

(b) “Job creation project” (§1703.46(g)(2)), which includes any information that is not readily apparent concerning whether the project would directly create jobs in rural areas. The number of the jobs and the basis for the job projection should be included under “Number of long-term jobs”;

(c) “Long-term improvements in economic development” (§1703.46(g)(3)), which addresses the extent to which the project will improve the productive potential of the labor force, industrial plant, infrastructure, natural resources and institutions by employing advanced technology, creating higher-skilled occupations, adding higher value to natural resources, creating jobs with higher-career potential, or is considered part of a knowledge intensive industry;

(d) “Diversifying the rural economy or alleviating underemployment” (§1703.46(g)(4)), which includes any information the borrower desires the Administrator to consider;

(e) “Supplemental funds” (§1703.46(h)(1)), which includes the name of each source and the respective amount of supplemental funds that was provided to the project within 6 months of submitting the application to RUS, and the amount that will be provided within two years of receiving RUS funds. Also indicate the nature and strength of the commitments to make these supplemental funds available, when these funds are expected to be disbursed, any special terms and conditions associated with the commitments, copies of the commitments, and, if established, the interest rate, term and deferment period on any loan for the project;

(f) “Economic conditions and job creation” (§1703.46(h)(2)), which includes:

(1) “Unemployment rates” (§1703.46(h)(2)(i)). List the county or counties in which the project will be located. It is not necessary to include the county, state or national unemployment rates. RUS obtains these rates from other Federal agencies;

(2) “Per capita personal income” (§1703.46(h)(2)(ii)). As with “Unemployment rates,” it is not necessary to include the county, state or national per capita personal income levels;

(3) “Change in population” (§1703.46(h)(2)(iii)). It is not necessary to include the county population levels;

(4) “Number of long-term jobs” (§1703.46(h)(2)(iv)). Include the number of long-term jobs that the project will directly create in rural areas and the total project cost;

(5) “Community-based economic development program” (§1703.46(h)(2)(v)). Explain if the project is part of a community-based economic development program; and

(6) “Plan for improving the marketable skills of people in rural areas” (§1703.46(h)(2)(vi)). Include information on any written plan for the project to provide opportunities or incentives to improve the marketable skills of rural residents through training and/or education. For projects that consist of providing training or education, indicate how it will benefit rural residents;

(g) “Location” (§1703.46(h)(3)), which indicates whether or not the project will be located in a town and, if so, the name of the town;

(h) “Support for the program—cushion of credit payments” (§1703.46(h)(4)), which mentions any cushion of credits payments made recently in accounts at RUS;

(i) “Demonstration project” (§1703.46(h)(5)), which includes a discussion of any commitments from the
§ 1703.36 Owner(s) of the project to be a demonstration project and a copy of the written commitment;

(j) “Probability of success” (§1703.46(h)(6)), which includes:

(1) “Owners and management of the project” (§1703.46(h)(6)(i)) that discusses how the knowledge, experience, education and training of the proposed owners and management of the project increases the likelihood of long-term success; and

(2) “Ultimate recipient’s business plan” (§1703.46(h)(6)(ii)), that references an attached copy of the business plan.

(i) The plan should include:

(A) A description of the project;

(B) A description of the business, if applicable, its products and the prospects of the industry;

(C) What will be produced or accomplished;

(D) The area to be served;

(E) Any market research or marketing plan;

(F) Any operating plan;

(G) Total project costs and projected use of funds by purpose or category;

(H) A financial plan, including a feasibility study with projected balance sheets, income statements and cash flow statements;

(I) The source of supplemental funds, the nature and strength of commitments from other sources of financing, and the equity contribution;

(J) The proposed ownership and management of the project;

(K) A description of any coordination with a local, regional or state development organization; and

(L) Other relevant information.

(ii) The scope of the plan should reflect the amount requested in the application, the risks involved with developing and operating the project, and the overall cost of the project. The plan should describe any coordination with a local, regional or state development organization.

§ 1703.36 Section of the application covering the project description.

In general, this section should be more detailed the larger the project for which the borrower is requesting funding. The section of the application on the “project description” must include:

(a) A description of the proposed project including the nature of the project, the location of the project, organizations that will be involved in the project and the primary beneficiaries of the project. Also include in this subsection a statement describing whether the borrower has or will have a direct or indirect (through a subsidiary or affiliated organization) ownership or similar beneficial interest in the facilities to be constructed or in the entity that will occupy or utilize these facilities. In addition, explain whether it seems likely that the proposed project will be undertaken or completed in the absence of an RUS zero-interest loan or grant;

(b) A separate paragraph entitled “Uses of RUS Funds and Total Project Costs”, that includes a breakdown of the specific uses of RUS funds and a breakdown of the specific uses of all funds necessary to ensure completion of the project. Project costs should be limited to the amount to be spent over the 2-year period after receiving RUS funds;

(c) For a project that involves the establishment of a new venture, such as a rural business incubator or a similar start-up venture, a discussion of how the costs of establishing, organizing and arranging financing for the venture will be paid, how start-up costs incurred after the venture has been established will be paid, the expected sources of revenue necessary to sustain the project and revenue and expense projections for the first 3 years of the project;

(d) If the borrower will provide a pass-through-loan or pass-through-grant to another entity, outline the terms and conditions that the borrower intends to place on the recipient of the RUS funds including the security arrangements and collateral on a zero-interest loan. The discussion of proposed security arrangements and collateral should reflect the amount requested in the application, the risks involved with developing and operating the project, and the overall cost of the project;

(e) For pass-through-loans and pass-through-grants, a description of the ultimate recipient, including the form of
organization and ownership (i.e., corporation, nonprofit corporation, cooperative, partnership, sole proprietor), the owner(s) and the chief officers;

(f) If the project involves construction, a brief description of the construction necessary to make the project operational and the organization involved with the project that will be responsible for building the project facilities or having them built;

(g) A discussion of the manner in which the borrower intends to monitor the zero-interest loan and/or grant proceeds to ensure that they are used only for approved purposes; and

(h) If applicable, a discussion on any potential conflict of interest or the appearance of a conflict of interest, a clarification of any aspect of the project with respect to the restriction that it must not result primarily in the transfer of any existing employment or business activity from one area to another or a clarification of any aspect of the project with respect to limitations in §§ 1703.20 and 1703.21.

§ 1703.37 Section of the application covering the environmental impact of the project.

(a) For a proposed project that only involves internal modifications or equipment additions to buildings or other structures (for example; relocating interior walls or adding computer facilities) and/or external changes or additions to existing buildings, structures or facilities requiring physical disturbance of less than 0.4 hectare (0.99 acre), the environmental information normally required is:

(1) A copy of a flood hazard zone map from the Federal Emergency Management Agency with the location of the project site marked;

(2) A statement of whether or not the proposed project will be located within an area protected under the Coastal Barrier Resources Act (16 U.S.C. 3501 et seq.);

(3) A description of the internal modifications or equipment additions, and the external changes or additions to existing buildings, structures or facilities being proposed, the size of the site in hectares, and the general nature of the proposed use of the facilities once the project is completed, including any hazardous materials to be used, created or discharged, any substantial amount of air emissions, wastewater discharge, or solid waste that will be generated; and

(4) A statement of whether the project site contains or is near a property listed or eligible for listing in the National Register of Historic Places (16 U.S.C. 470).

(b) For all other proposed projects include:

(1) A copy of a flood hazard zone map from the Federal Emergency Management Agency with the location of the project site marked (42 U.S.C. 4001 et seq.);

(2) A diagram showing the general layout of the proposed facilities on the project site;

(3) The size of the project site in hectares;

(4) A map (preferably a U.S. Geological Survey map) of the project area indicating the boundaries of the project;

(5) A statement of whether or not the project will be located within an area protected under the Coastal Barrier Resources Act;

(6) The amount of property to be cleared, excavated, fenced or otherwise disturbed by the project;

(7) The current land use and zoning of the project site and any vegetation on the project site;

(8) A description of buildings or other major structures, including dimensions, to be constructed or modified;

(9) A statement of whether the presence of wetlands or existing agricultural operations are present at the project site (7 CFR part 1794); whether properties listed or eligible for listing in the National Register of Historic Places are on or near the project site; whether threatened or endangered species or critical habitat are on or near the project site (16 U.S.C. 1531 et seq.);

(10) The general nature of the proposed use of the facilities once the project is completed, including any hazardous materials to be used, created or discharged, any substantial amount of air emissions, wastewater discharge, or solid waste that will be generated (7 CFR part 1794); and

(11) A copy of any environmental review, study, assessment, report or other document that has been prepared
in connection with obtaining permits, approvals or other financing for the proposed project from state, local or other Federal agencies. Such material, to the extent relevant, may be used to fulfill the requirements of this section.

(c) The Administrator may request additional environmental information in specific cases to satisfy §1703.32.

§§ 1703.38—1703.44 [Reserved]

§ 1703.45 Review and analysis of applications.

Completed applications received at RUS by the 14th day of the month will be considered at the first selection date which occurs at least 40 days after the application was received. Completed applications received at RUS after the 14th day of a month will be either be held for the next application period or returned to the borrower, at the borrower’s option. The review period of at least 40 days should allow sufficient time for state and local governments to review the proposed projects under the intergovernmental review process, as set forth in 7 CFR part 3015, and to provide the sufficient time for the Administrator to fully review and analyze these applications. In the event state and local government review has not been completed, the Administrator’s approval may be contingent upon the review being satisfactorily documented. The Administrator reserves the discretion to consider applications outside the normal selection period.

§ 1703.46 Documenting the evaluation and selection of applications for zero-interest loans and grants.

(a) The Administrator will only consider for selection applications that request funds for purposes as set forth in §§1703.17 and 1703.18 and are not ineligible under §1703.20, as determined by the Administrator. The Administrator will not consider applications that do not conform with all of the provisions of this subpart, as determined by the Administrator. The Administrator will make the determination of all numbers, dollars, levels and rates, as well as the nature, costs, location and other characteristics of the proposed project, to calculate the number of points assigned to an application for each selection factor. Applications for zero-interest loans and grants will be ranked separately. In addition, applications requesting less than 5 percent of the total project costs as provided in §1703.25 will be ranked separately, subject to §1703.46(j). The Administrator will select applications that receive the greatest number of total points under paragraphs (f) and (g) of this section, subject to available funds and the provisions of §§1703.25, 1703.46(i), and 1703.46(j).

(b) After reviewing an application, the Administrator may decline to select an application:

(1) That would result in a conflict of interest or the appearance of a conflict of interest;

(2) Based on the management and financial situation of the borrower applying for the zero-interest loan or grant. In determining the borrower’s financial situation, the Administrator will consider, among other things, the borrower’s existing and projected cash flows, equity to asset ratios, times interest earned ratios, debt service coverage ratios, the level of its investments, the level of its cash and other liquid assets, its working capital and repayment of its debts;

(3) Based on a determination that limitations under state laws will lessen the likelihood of repayment of the RUS zero-interest loan in the event that the borrower does not receive funds from the project necessary to cover the RUS zero-interest loan payments;

(4) Based on the unwillingness of the borrower applying for the zero-interest loan or grant to exercise diligence in repaying RUS loans or loan guarantees, and comply with RUS’s legal documents and regulations;

(5) For an otherwise eligible project when any of the revenues of the project are derived from a legalized gambling activity; or

(6) For any illegal activity.

(c)(1) The Administrator will first evaluate the application and the project with respect to the three factors in this paragraph. The Administrator will not select applications requesting funds for projects that in the Administrator’s best judgment have a low probability of:

(i) Being a viable business or operation;
§ 1703.46

(ii) Being successful as measured by long-term job creation or retention; and

(iii) Producing long-term economic development in rural areas.

(2) The Administrator's determination in paragraph (c) of this section will be based on the ultimate recipient's feasibility studies, income statements, cash flow statements, existing and projected balance sheets, market research, job creation potential, industry trends, and current economic conditions given the nature of the project. Long-term job creation and economic development in rural areas as used for this factor will mean jobs or economic development that would generally be expected to last at least five years.

(d) The Administrator will not award points under the selection factors in paragraphs (f) and (g) of this section for applications that:

(1) Involve the purchase land that will not be developed or used as a site for a project structure during the current phase of the project, as determined by the Administrator;

(2) Will be used for residential purposes or entertainment purposes at the residential level, such as residential dwellings and land sites, facilities to provide entertainment television, or personal, non-business related vehicle(s); however, nursing homes providing medical care, as determined by the Administrator, will not be considered to be residential dwellings;

(3) Will be used primarily to finance the purchase of an established business or operation rather than for economic development in rural areas or job creation purposes; or

(4) Will be used primarily to transfer property or real estate between owners without making any improvements or additions that will promote economic development in rural areas or job creation.

(e) After the above determinations, the Administrator will evaluate the applications and assign points with respect to the factors in paragraph (f) of this section. Applications evaluated under paragraph (f) of this section that do not receive at least 35 points or are not within the top 75 percent when all applications being assigned points are ranked from high to low by total number of points will not be evaluated with respect to the factors in paragraph (g) of this section. The only exception to this evaluation process would be the Administrator's determination that additional applications must be selected in accordance with §1703.14. After such a determination, the remaining applications evaluated in paragraph (f) of this section will be also evaluated under the factors in paragraph (g) of this section.

(f) Selection factors pertaining to the type of project. The number of points assigned for each selection factor will be determined as follows:

(1) Nature of the project. The extent to which the nature of the project will promote economic development in rural areas and/or job creation—up to 50 points. The determination for this factor will be based on whether the project:

(i) Is considered a start-up, expansion, or enhancement of a business, a business incubator, an industrial building or park, infrastructure necessary to connect these types of projects to existing infrastructure, necessary for the development and operation of these types of projects, or, in the Administrator's determination, basic infrastructure necessary for successful businesses in the rural economy;

(ii) Will provide technical assistance to rural businesses or rural residents, train or educate rural residents, promote economic development in rural areas on a non-profit basis, or provide medical care to rural residents; and

(iii) Will succeed as envisioned in the application, and the possibility that the owners or operators may become delinquent on their loan payments.

(2) Job creation project. The extent to which the project will directly lead to job creation given the size of the project and the amount of RUS funds requested or the project is necessary for job creation—up to 25 points. As part of the determination, the Administrator will consider whether the project will provide long-term employment for rural residents. For industrial parks, industrial buildings, and similar projects, the Administrator will consider whether the application includes information on businesses or tenants that will occupy the building(s) and the
nature and extent of the commitments to use the buildings in determining the number of points to award. The Administrator will also consider the probability that the project will not result in job creation as envisioned in the application in terms of both the number of jobs and the duration of the jobs.

(3) Long-term improvements in economic development. Projects that lead directly to an increase in long-term productivity and per capita income in rural areas—up to 25 points. The Administrator's determination will be based on the extent to which the project will improve the productive potential of the labor force, industrial plant, natural resources, institutions, and infrastructure necessary for economic development and job creation by utilizing advanced technology, creating higher skilled occupations, creating jobs with higher career potential or jobs that are considered part to be of a knowledge intensive industry, or adding higher value to natural resources. In considering infrastructure projects, the Administrator will award points only for the facilities, such as water and sewer facilities, that will serve and are necessary for commercial activities described under this factor.

(4) Diversifying the rural economy or alleviating underemployment. Projects that in the judgement of the Administrator will diversify the rural economic base or assist in alleviating chronic underemployment for rural residents—10 points. The Administrator will assign points only to the extent the application contains convincing evidence pertaining to this factor.

(g) Other selection factors. The number of points assigned for each selection factor will be determined as follows:

(1) Supplemental funds. (i) A determination of the amount of supplemental funds provided or to be provided to the project from the project owner in the form of equity funds, private sources, state and local government sources, other Federal Government sources, the borrower or other sources of funds. The supplemental funds used in this calculation must be disbursed to the project during the period covering six months prior to the receipt of the application by RUS and two years after the first advance of RUS funds for the project. Supplemental funds must be committed to the project before RUS will advance its funds. RUS loan or grant funds from the borrower or RUS loan or grant funds from any other organization will not be included in the calculations. The Administrator will determine what constitutes expenditures on the project. If supplemental funds as a percentage of the RUS zero-interest loan and/or grant to be provided to the project is:

(A) Equal to 20%—10 points, the minimum number of points;
(B) Equal to 100%—20 points;
(C) Equal to 500%—30 points, the maximum number of points.

(ii) Ratios of supplemental funds to RUS funds falling between these levels will be assigned points based on a straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1.

(2) Economic conditions and job creation. (i) A comparison will be made of the unemployment rate in the county where the project will be located to the state and national unemployment rates.

(A) If the unemployment rate in the county where the project will be located exceeds the National unemployment rate by 30 percent or more—10 points, the maximum number of points awarded.

(B) If the unemployment rate in the county where the project will be located is equal to the National unemployment rate—5 points.

(C) If the unemployment rate in the county where the project will be located is equal to or less than 75 percent of the National unemployment rate—0 points.

(D) If the unemployment rate in the county where the project will be located exceeds the state unemployment rate by 30 percent or more—8 points, the maximum number of points awarded.

(E) If the unemployment rate in the county where the project will be located is equal to the state unemployment rate—4 points.
(F) If the unemployment rate in the county where the project will be located is equal to or less than 75 percent of the state unemployment rate—0 points.

(G) For both the state and national unemployment rate calculations, rates falling between the levels will be assigned points based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1. If the project will be located in several counties, the Administrator will use a simple average (mean) of the counties for the comparison. The Administrator will use the average of the most recent twelve months of unemployment rates it has obtained from the Bureau of Labor Statistics, U.S. Department of Labor or other government sources and processed into a suitable format.

(ii) A comparison will be made of the per capita personal income in the county where the project will be located to the state and national per capita personal income levels.

(A) If the per capita personal income level in the county where the project will be located is less than or equal to 90 percent of the National per capita personal income level—10 points, the maximum number of points awarded.

(B) If the per capita personal income level in the county where the project will be located is equal to the National per capita personal income level—5 points.

(C) If the per capita personal income level in the county where the project will be located exceeds the National per capita personal income level by 15 percent or more—0 points.

(D) If the per capita personal income level in the county where the project will be located is less than or equal to 90 percent of the state per capita personal income level—8 points, the maximum number of points awarded.

(E) If the per capita personal income level in the county where the project will be located is equal to the state per capita personal income level—4 points.

(F) If the per capita personal income level in the county where the project will be located exceeds the state per capita personal income level by 15 percent or more—0 points.

(G) For both the state and national per capita personal income calculations, incomes falling between the levels will be assigned points based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1. If the project will be located in several counties, the Administrator will use a simple average (mean) of the counties for the comparison. The Administrator will use the most recent annual per capita personal income levels it has obtained from the Bureau of Economic Analysis, U.S. Department of Commerce or other government sources and processed into a suitable format.

(iii) A calculation will be made of the change in total population over the most recent two-year period in the county where the project will be located. The population change will be based on the total percentage change over the two-year period calculated as follows: the population for the most recent year less the population as of two years prior to that year with the difference being divided by the population as of two years prior to the most recent year.

(A) If the percentage growth over the two-year period is negative 2.00 percent or higher negative amount (a population decline)—8 points, the maximum number of points.

(B) If the percentage growth over the two-year period is equal to zero or is positive (population increase)—0 points.

(C) Population growth percentages falling between these levels will be assigned points based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1. If the project will be located in several counties, the Administrator will use a simple average (mean) of the counties for the comparison. The Administrator will use the most recent population data for all counties it has obtained from the Bureau of Economic Analysis, U.S. Department of Commerce or other government sources and processed into a suitable format. The data provide one population figure for the year.
(iv) The number of long-term jobs that the project will directly create in rural areas.

(A) For five or more direct long-term jobs per $100,000 of total project costs—15 points, the maximum number of points awarded.

(B) For two direct long-term jobs per $100,000 of total project costs—8 points.

(C) For no direct long-term jobs—0 points.

(D) Direct, long-term jobs under this factor are jobs that would generally be expected to last at least five years. Long-term jobs that would provide 6 months per year of equivalent full-time employment will be counted under this factor. Long-term jobs that would provide fewer months of employment would be given points based on the ratio of the number of months per year of employment to 12 months. Jobs of at least 20 hours per week will be counted under this factor. For construction of an industrial building, extension of water and/or sewer lines to a building, or a similar project, the Administrator will require a reasonable analysis of the number of jobs that will be created before awarding points for this factor. The Administrator reserves the right to adjust the number based on its analysis of the project, the explanation in the application of the businesses that will locate in the building(s), and any commitments from businesses to locate in the building(s). This factor will not count indirect job creation that results from an overall increase in the local economy once the project is completed. If total project costs per job falls between these levels, points will be assigned based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1.

(v) Projects that are part of a local, community-based rural economic development program that would improve the local economy and enhance the well-being of rural residents—10 points. The determination will be based on information submitted by the borrower in its application and other information the Administrator considers appropriate.

(vi) Projects that have a written plan to provide opportunities or incentives to improve marketable skills for rural residents through training and/or education, or projects which consist of providing this training and/or education—5 points.

(3) Location. Projects that will be physically in a rural area—20 points.

(4) Support for program—cushion of credit payments. (i) Applications submitted by borrowers that have made cushion of credit payments as set forth in section 313 of the Act based on the following:

(A) If the borrower has $300,000 or three percent of total assets, whichever is less, in cushion of credit payments—15 points;

(B) If the borrower has $100,000 or one percent of total assets, whichever is less, in cushion of credit payments—10 points;

(C) If the borrower has at least $5,000 or 0.5 percent of total assets, whichever is less, in cushion of credit payments—5 points.

(ii) The amount of cushion of credit payments will be based on the amount at the time the Administrator evaluates the project. The calculation of a borrower’s total assets will be based on RUS’s most recently published Statistical Report, Rural Electric Borrowers (RUS Informational Publication 201-1) or Statistical Report, Rural Telephone Borrowers (RUS Informational Publication 300-4). These publications are available from the Rural Utilities Service, Administrative Services Division, Washington, DC 20250. If the amount of cushion of credit payments falls between these levels, points will be based on a straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1.

(5) Demonstration project. If the application contains a written commitment from the owner(s) of the project that the project will be a demonstration project—5 points.

(6) Probability of Success. (i) The knowledge, experience, education and training of the proposed owners and management of the project—up to 10 points.

(ii) The ultimate recipient’s business plan and indications that the project
will successfully result in economic development in rural areas and/or job creation—up to 40 points. The Administrator’s evaluation of the success of the project will be based on indications in the application and RUS’s analysis that the project will be a viable business or operation, be successful in creating or retaining long-term jobs, and be successful in producing economic development that will result in long-term benefits to rural areas. The plan should include:

(A) A description of the project;
(B) A description of the business, if applicable, its products and the prospects of the industry;
(C) What will be produced or accomplished;
(D) The area to be served;
(E) Any market research or marketing plan;
(F) Any operating plan;
(G) Total project costs and projected use of funds by purpose or category;
(H) A financial plan, including a feasibility study with projected balance sheets, income statements and cash flow statements;
(I) The source of supplemental funds, the nature and strength of commitments from other sources of financing, and the equity contribution;
(J) The proposed ownership and management of the project;
(K) A description of any coordination with a local, regional or state development organization; and
(L) Other relevant information.

(iii) The Administrator expects the ultimate recipient’s business plan referenced in paragraph (g)(6)(ii) of this section to be comparable to a plan normally submitted to a bank for long-term financing. In evaluating an application for this selection factor, the Administrator will consider the probability that the project will result in long-term economic development in rural areas and/or job creation as envisioned in the application.

(iv) Quality and completeness of borrower’s initial application submitted to RUS—up to 10 points. The Administrator’s determination will be based on the completeness and quality of the application as measured by the additional information required from the borrower to complete the analysis. For a pass-through loan and grant, the quality of the Borrower’s plan to monitor the loan and grant and assure that the requirements of this subpart and 7 CFR parts 3015 and 3016 are met will also be considered.

(7) Special economic status. The Administrator has the discretion to designate special economic status (up to 25 points) to applications submitted by borrowers that have documented one or more of the following four conditions in one or more county(ies) to be served by the proposed project:

(i) A designation of disaster area by the President of the United States which has been so designated within three years prior to applying to RUS;
(ii) The loss, removal, or closing of a major source or sources of employment in the last 3 years which causes an increase of 2 percentage points or more in the area’s most recent unemployment rate compared with the period immediately before the dislocation;
(iii) Chronic or long-term economic deterioration, documented by one or both of the following conditions:
   (A) An unemployment level equal to or greater than 1.5 times the National average unemployment percentage from 4 out of the last 5 years, starting with the most current statistics available. The applicant, when calculating recent years’ unemployment percentages, should compare county statistics with the National Average unemployment for the corresponding year. Statistics on unemployment will be based on figures provided by the U.S. Bureau of Labor Statistics. However, the Administrator may, at his discretion, also consider verifiable, published State statistical data provided by the applicant in situations where county-wide statistical data is not representative of local conditions. Such statistical data must be part of a recognized database which reflects information for other areas within the State;
   (B) A 15% loss of population due to out-migration over the most recent 10-year decennial census, based on the U.S. Bureau of the Census decennial data;
(iv) A designation as a Rural Empowerment Zone or Rural Enterprise Community by the Empowerment Zone Program authorized by Section 13301 of

(h) Outline of selection factors. The selection factors contained in §§1703.46(f) and 1703.46(g) and the maximum number of points that may be assigned to each is listed below:

(1) Nature of the project—50 points;
(2) Job creation project—25 points;
(3) Long-term improvements in economic development—25 points;
(4) Diversifying the rural economy or alleviating underemployment—10 points;
(5) Supplemental funds—30 points;
(6) Economic conditions and job creation:
   (i) Unemployment rates—18 points;
   (ii) Per capita personal income—18 points;
   (iii) Change in population—8 points;
   (iv) Number of long-term jobs—15 points;
(7) Location—20 points;
(8) Support for program—cushion of credit payments—15 points;
(9) Demonstration project—5 points;
(10) Probability of success:
   (i) Owners and management of the project—10 points;
   (ii) Ultimate recipient’s business plan—40 points; and
   (iii) Completeness of borrower’s initial application—10 points;
(11) Special economic status—25 points.

(i) Regardless of the number of points assigned to a borrower’s application, the Administrator may:

(1) Limit the number of applications selected in any one state during any fiscal year to the ratio of borrowers in that state to the total number of borrowers multiplied by three, or ten percent of the total number selections that have been made during the current fiscal year, whichever is greatest. The number of borrowers will be determined as of the latest published RUS statistical reports (Statistical Report, Rural Electric Borrowers, RUS Informational Publication 201–1 and Statistical Report, Rural Telephone Borrowers, RUS Informational Publication 300–4. These publications are available from the Rural Utilities Service, Administrative Services Division, Washington, DC 20250);

(2) Limit a borrower to one selected application during any selection period;

(3) Limit the number of applications selected for a particular project;

(4) Allocate available funds between applications from electric and telephone borrowers;

(5) Select an application receiving fewer points than another application if there are insufficient funds during a particular budget period to select the higher ranked application; except that the Administrator may ask the borrower that submitted the higher ranked application if it desires to reduce the amount of its application to the amount of funds available. The reduction may require additional supplemental funds to ensure a successful project. Based on information the borrower provides, the Administrator will re-analyze the project to ensure that the project will still be feasible with reduced funding; or

(6) Select the highest ranking applications for funds to finance projects that the Administrator classifies as project feasibility studies.

(j) During each selection period, the highest ranking application from among the applications requesting less than 5 percent of the total project costs as provided in §1703.25 will be considered with the applications requesting 5 percent or more of total project costs.

(k) The Administrator reserves the right to use the region or data it considers most appropriate if “county” data are unavailable for a particular area.

§§1703.47–1703.57 [Reserved]

§ 1703.58 Post selection period.

(a) RUS will inform a borrower whether the Administrator has selected its application. The advance of RUS funds after the selection has occurred is contingent upon the borrower meeting any terms and conditions the Administrator determines are necessary. A borrower that submitted an
§ 1703.59 Final application processing and legal documents.

(a) After a borrower has submitted all information the Administrator determines is necessary for the selected application, RUS will send the necessary legal documents to the borrower to execute and return to RUS. The legal documents will include a letter of agreement and any legal documents the Administrator deems appropriate, including any loan agreements, notes, security instruments, certifications or legal opinions. The letter of agreement will, among other things, constitute the Administrator’s approval of funds for the project subject to certain terms and conditions as determined by the Administrator, and include a project description, approved purposes of the zero-interest loan and/or grant, the maximum amount of zero-interest loan and/or grant, supplemental funds to be provided to the project and certain agreements or commitments the borrower proposed in its application.

(b) The Administrator has the discretion to include as an approved purpose the reimbursement of short-term financing and expenditures that were used for costs incurred on the project in accordance with §1703.20(a)(2).

(c) If the borrower fails to submit within one month from the date of the Administrator’s selection of an application all of the information that the Administrator determines to be necessary for RUS to prepare legal documents, the Administrator may consider the selection of the application cancelled.

§ 1703.60 [Reserved]

§ 1703.61 Disbursement of zero-interest loan and grant funds.

(a) RUS will disburse zero-interest loan funds to the borrower which must
Rural Utilities Service, USDA

§ 1703.66 Review and other requirements.

(a) RUS will review borrowers receiving zero-interest loans or grants, as necessary, to ensure that funds are expended for approved purposes. Borrowers receiving zero-interest loans or grants must monitor the project to the extent necessary to ensure that the project is in compliance with all applicable regulations, including ensuring that funds are expended for approved purposes. The borrower is responsible for ensuring that disbursements and expenditures of funds are properly supported with certifications, invoices, contracts, bills of sale, or any other forms of evidence determined appropriate by the Administrator and that such supporting material is available, at the borrower's premises, for review.

(b) RUS will disburse zero-interest loan proceeds to the project for approved purposes in accordance with the legal documents executed by the Administrator and the borrower and applicable RUS regulations. The borrower must make payments on a zero-interest loan as set forth in the legal documents executed by the Administrator and the borrower. The Borrower or project owner's share in the cost of the project must be utilized in advance of RUS zero-interest loan funds, or upon RUS approval, on a pro-rata distribution basis with loan funds during the disbursement period. The Borrower or project owner will not be permitted to provide its contribution at the end of the loan disbursement period.

(c) If the borrower fails to satisfy all conditions, requirements, and terms prerequisite to the advance of zero-interest loan and/or grant funds as set forth in the letter of agreement or other RUS legal documents within 120 days from the date the borrower signs the letter of agreement agreeing and accepting the conditions, requirements, and terms of the RUS zero-interest loan and/or grant, or such later date as the Administrator may approve, the Administrator may rescind the zero-interest loan and/or grant commitment.

(d) During the period between the execution of RUS's legal documents and the disbursement of funds, the borrower must provide the Administrator written notification if the project is no longer viable or the borrower no longer desires a zero-interest loan or grant for the project. After RUS has received the borrower's notification, the Administrator will rescind the commitment.

(e) The borrower must return to RUS all proceeds of the zero-interest loan and/or grant, including any interest earned on the funds being returned, which have not been lent or disbursed by the borrower for approved purposes during the six months following the advance of the loan or grant funds from RUS to the borrower, or such later date as the Administrator may approve. If the project is under the control of the borrower, all proceeds of the zero-interest loan and/or grant must be returned to RUS, including any interest earned on the funds being returned, which have not been expended by the borrower for approved purposes before the first anniversary of the date of the advance of the loan or grant funds from RUS to the borrower, or such later date as the Administrator may approve. Authorization of any extension rests solely within the discretion of the Administrator.

§§ 1703.62–1703.65 [Reserved]

§ 1703.66 Review and other requirements.
§ 1703.66

by the RUS field accountant, borrower’s certified public accountant, the Office of Inspector General, the General Accounting Office and any other accountant conducting an audit of the borrower’s financial statements or this rural economic development program. Borrowers will be required to permit RUS to inspect and copy its records and documents that pertain to the project.

(b) The Borrower must require the recipient of a pass-through loan and grant to provide an itemized list to the Borrower that shows the expenditures made on the project for approved purposes, including a certification to that effect. The Borrower will also require the recipient to attach invoices, receipts, bills of sale, and other evidence representing the items on the list of expenditures that at least total the amount of the RUS zero-interest loan and grant. In addition, the Borrower will also require the recipient to furnish a record of itemized receipts showing total project costs in such detail that will permit auditors to establish the RUS funding percentage. RUS’s legal agreements will include the terms and conditions that the Borrower must require in its agreement with the recipient of a pass-through loan and grant covering the use and intended schedule of expenditures of the loan funds.

(c) RUS’s legal documents may require the borrower to include in its legal documents with the recipient of a pass-through loan or a pass-through-grant the requirement to expend the funds for approved purposes by a certain date specified in RUS’s legal documents or return to the borrower all funds that have not been expended by such date. The borrower must promptly return to RUS all unexpended funds that the recipient returns to the borrower under the terms set forth in the legal documents executed between the Administrator and the borrower. The borrower may request an extension due to delays in the project. Authorization of any extension rests solely within the discretion of the Administrator.

(d) The legal documents executed between the Borrower and the Administrator in connection with a zero-interest loan and/or grant must contain certain provisions giving the Administrator discretionary rights and remedies in the event a Borrower fails to comply with this subpart, other Federal regulations and statutes, or the terms, conditions and requirements of the executed legal documents. Regardless of any right or remedy the Administrator chooses to assert, if the Borrower uses any zero-interest loan and/or grant funds other than for approved purposes, the Borrower will be required to return to RUS the amount used for unapproved purposes. An unauthorized zero-interest loan amount which is returned will be considered a prepayment on the RUS note.

(e) Borrowers receiving zero-interest loans and/or grants will be subject to a rural economic development review of zero-interest loan and grant funds.

(f) The borrower must promptly notify the Administrator in writing if another entity is in default on a pass-through-loan between the borrower and the entity.

(g) Grants provided under this program will be administered in accordance with 7 CFR part 3015 and 7 CFR part 3016, as appropriate. Copies of these USDA Uniform Assistance regulations can be obtained by contacting RUS in Washington, DC. A Borrower that receives a grant for the establishment of a revolving loan fund, or project owner that receives a pass-through loan and grant, will be subject to requirements under these regulations which cover, among other things, financial reporting, accounting records, budget controls, record retention and audit requirements. For pass-through loans and grants, RUS Borrowers will be required to include in their legal documents the requirement for project owners to provide sufficient financial, accounting and budget information and other records deemed necessary to facilitate audits in accordance with 7 CFR part 3015 and 7 CFR part 3016 for non-profit entities, and RUS rural economic development loan reviews for projects in a for-profit status.

(h) For pass-through loans and grants awarded under this subpart, the Borrower must diligently monitor performance to ensure that time schedules are being met, projected work by time
periods is being accomplished, and other performance objectives are being achieved. The Borrower must submit an original and one copy of each report to RUS on an annual basis. The project performance reports shall include, but not be limited to, the following:

(1) A comparison of actual accomplishments to the objectives established for that period;
(2) Reasons why any established objectives were not met;
(3) A description of any problems, delays, or adverse conditions which have occurred, or are anticipated, and which may affect the attainment of overall project objectives, prevent meeting of time schedules or objectives, or preclude the attainment of particular project work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or planned to resolve the situation; and
(4) Objectives and timetable established for the next reporting period.

(i) For pass-through loans and grants, a final project performance report will be required with the last SF 269, "Financial Status Report," available from RUS in Washington, DC. The final report also must provide an evaluation of the success of the project in meeting the objectives of the program. The final report may serve as the last annual report.

(j) Monitoring requirements for Borrowers receiving grants for revolving loan funds are specified in §1703.22.

§1703.67 Changes in project objective or scope.

For loans and grants awarded under this subpart, the Borrower must obtain prior approval for any material change to the scope or objectives of the approved project, including changes to the scope of work or budget. Failure to obtain prior approval of changes can result in suspension or termination of grant funds.

§1703.68 Loan and grant termination provisions.

(a) Termination for cause. The Administrator may terminate any loan and/or grant in whole, or in part, at any time before the date of completion of loan and/or grant disbursement, whenever the Borrower has failed to comply with the conditions of the loan and/or grant. The Administrator will promptly notify the Borrower in writing of the determination and the reasons for the termination, together with the effective date. The termination date will be no less than 30 days following receipt of the termination notice. The Borrower will have such time to cure the default, or to state why it feels the loan and/or grant should not be terminated. The Administrator will stay the termination upon the curing of the default, and may delay termination if, sufficient cause has been given by the Borrower.

(b) Termination for convenience. The Administrator or the Borrower may terminate a loan and/or grant in whole, or in part, when both parties agree that the continuation of the project would not produce beneficial results commensurate with further expenditure of funds. The two parties will agree upon termination conditions, including the effective date, and in the case of partial terminations, the portion to be terminated. The Borrower will not incur new obligations for the terminated portion after the effective date, and will cancel as many outstanding obligations as possible. The Administrator will allow full credit to the Borrower for the Federal share of unfulfilled contractual obligations which were incurred in good faith by the Borrower prior to grant termination.
§ 1703.100 Purpose.

The purpose of this subpart is to encourage and improve telemedicine services and distance learning services in rural areas through the use of telecommunications, computer networks, and related advanced technologies by students, teachers, medical professionals, and rural residents.

§ 1703.101 Policy.

(a) RUS recognizes that the transmission of information is vital to the economic development, education, and health of rural Americans. To further this objective, RUS will award loans and grants under this subpart to distance learning and telemedicine projects that will improve the access of people residing in rural areas to improved educational, learning, training, and health care services. Unless a distinction is made in the various sections of this subpart, all aspects of this subpart will apply to all requests for financial assistance.

(b) In providing assistance under this subpart, RUS will give priority to rural areas that it believes have the greatest need of distance learning and telemedicine services. RUS believes that generally the need is greatest in economically challenged areas and those requiring high costs to serve. This program is consistent with provisions of the 1996 Telecommunications Act (Public Law 104-104, 110 Stat. 56) that designates telecommunications service discounts for schools, libraries, and rural health care providers providing benefits to rural end-users. RUS will take into consideration the community's involvement in the project and the applicant's ability to leverage grant funds based on its access to capital.

(c) RUS believes that the residents of rural areas and their local institutions which serve them can best determine what are the most appropriate communications or information systems for use in their respective communities. Therefore, in administering this subpart, RUS will not favor or mandate the use of one particular technology over another.

(d) All rural institutions are encouraged to cooperate with each other and with applicants and end users in promoting the program being implemented under this subpart.

(e) RUS staff will make diligent efforts to inform potential applicants in rural areas of the program being implemented under this subpart.

(f) Financial assistance under this subpart will consist of grants or cost of money loans, or both. The Administrator shall determine the portion of the financial assistance provided to a recipient that consists of grants and the portion that consists of cost of money loans so as to result in the maximum feasible repayment to the government of the financial assistance, based on the ability of the recipient to repay and with the full utilization of funds made available to carry out this subpart.

(g) The Administrator may provide a cost of money loan to entities using telemedicine and distance learning services, and, to entities providing or proposing to provide telemedicine service or distance learning service to other persons at rates calculated to ensure that the benefit of the financial assistance is passed through to the other persons.

(h) The Administrator may provide a cost of money loan under this subpart to a borrower of a telecommunications or electric loan under the Rural Electrification Act of 1936, as amended. A borrower receiving a cost of money loan under this subpart shall:

(1) Make the funds provided available, under any terms it so chooses as long as the terms are no more stringent than the terms under which it received the financial assistance, to entities that qualify as distance learning...
or telemedicine projects satisfying the requirements of this subpart.

(2) Use the funds provided to acquire, install, improve, or extend a system referred to in this subpart.

§ 1703.102 Definitions.

Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

Administrator means the Administrator of the Rural Utilities Service, or designee or successor.

Applicant means an eligible organization which applies for financial assistance under this subpart.

Champion Community means any community that submitted a valid application to become an Empowerment Zone/Enterprise Community (EZ/EC) area, met the requirements to be designated an EZ/EC area, but was not chosen because their score was not high enough to be selected.

Completed application means an application that includes all those items specified in §1703.109 in form and substance satisfactory to the Administrator.

Comprehensive rural telecommunications plan means the plan submitted by an applicant in accordance with §1703.109.

Computer networks means computer hardware and software, terminals, signal conversion equipment including both modulators and demodulators, or related devices, used to communicate with other computers to process and exchange data through a telecommunication network in which signals are generated, modified, or prepared for transmission, or received, via telecommunications terminal equipment and telecommunications transmission facilities.

Consortium means a combination or group of eligible entities formed to undertake the purposes for which the distance learning and telemedicine financial assistance is provided. Each consortium shall be composed of a minimum of two eligible organizations that meet the requirements of §1703.103.

Construct means to acquire, construct, extend, improve, or install a facility or system.

Cost of money loan means a loan made under the DLT program bearing interest at a rate equal to the then current cost of money to the government, at the time the feasibility study is completed, for loans of similar maturity not to exceed 10 years.

Data terminal equipment means equipment that converts user information into data signals for transmission, or reconverts the received data signals into user information, and is normally found on the terminal of a circuit and on the premises of the end user.

Distance learning means a telecommunications link to an end user through the use of eligible equipment to:

(1) Provide educational programs, instruction, or information originating in one area, whether rural or not, to students and teachers who are located in rural areas; or

(2) Connect teachers and students, located in one rural area with teachers and students that are located in a different rural area.

DLT borrower means an entity that has outstanding loans under the provisions of the DLT program.

DLT program means the Distance Learning and Telemedicine Loan and Grant Program administered by RUS pursuant to subtitle D, chapter 1, of the Rural Economic Development Act of 1990, as amended (7 U.S.C. 950aaa through 950aaa±4).

Economic useful life as applied to facilities financed under the DLT program means the number of years resulting from dividing 100 percent by the depreciation rate (expressed as a percent) based on Internal Revenue Service depreciation rules or recognized telecommunications industry guidelines.

Eligible equipment means computer hardware and software, audio and visual equipment, computer network components, telecommunications terminal equipment, telecommunications transmission facilities, data terminal equipment, inside wiring, interactive video equipment, or other facilities that would further telemedicine services or distance learning services. Land, buildings, or building construction are not considered eligible equipment (see §1703.107(a)(10)).
§ 1703.102

Eligible organization means an incorporated entity that meets the requirements of §1703.103.

Empowerment Zone and Enterprise Community (EZ/EC) means any community whose designation as such pursuant to 26 U.S.C. 1391 et seq. is in effect at the time RUS agrees to provide financial assistance.

End user means either or both of the following:
1. Rural elementary or secondary schools or other educational institutions, such as institutions of higher education, vocational and adult training and education centers, libraries, and teacher training centers, and students, teachers and instructors using such rural educational facilities, that participate in a rural distance learning telecommunications program through a project funded under this subpart;
2. Rural hospitals, primary care centers or facilities, such as medical centers and clinics, and physicians and staff using such rural medical facilities, that participate in a rural telemedicine program through a project funded under this subpart.

End user site means a facility that is part of a network or telecommunications system that is utilized by end users.

Financial assistance shall consist of grants, cost of money loans, or both, made under the DLT program.

Grant documents means the letter of agreement, including any amendments and supplements thereto, between RUS and the grantee.

Grantee means a recipient of a grant from RUS to carry out the purposes of the DLT program.

Hub means control center of a network or telecommunications system.

Instructional programming means educational material, including computer software, which would be used for educational purposes in connection with eligible equipment but does not include salaries, benefits, and overhead of medical or educational personnel.

Interactive video equipment means equipment used to produce and prepare for transmission audio and visual signals from at least two distant locations such that individuals at such locations can orally and visually communicate with each other. Such equipment includes monitors, other display devices, cameras or other recording devices, audio pickup devices, and other related equipment.

Letter of agreement means a legal document executed by RUS and the grantee that contains specific terms, conditions, requirements, and understandings applicable to a particular grant.

Loan documents mean the loan agreement, note, and security agreement, including any amendments and supplements thereto, between RUS and the DLT or Telecommunications/Electric borrower.

Local exchange carrier means a commercial, cooperative or mutual-type association, or public body that is engaged in the provision of telephone exchange service or exchange access.

Matching funds means the applicant's funding contribution for allowable purposes.

National School Lunch Program (NSLP) means the federally assisted meal program established under the National School Lunch Act of 1946 (42 U.S.C. 1751).

Project means an undertaking to provide or improve distance learning or telemedicine by using financial assistance provided under the DLT program.

Project service area means the area in which at least 90 percent of the persons to be served by the project are likely to reside.

Rural community facilities means facilities such as schools, libraries, learning centers, training facilities, hospitals, medical centers, or similar facilities, primarily used by residents of rural areas, that will use a telecommunications, computer network, or related advanced technology system to provide educational or health care benefits primarily to residents of rural areas.

RUS means the Rural Utilities Service, an agency of the United States Department of Agriculture formerly known as REA, see 7 CFR 1700.1.

Scope of work means a detailed plan of work that has been approved by the Administrator to be performed by the applicant using financial assistance provided under this subpart.

Secretary means the Secretary of Agriculture.

Technical assistance means:
§ 1703.103 Applicant eligibility and allocation of funds.

(a) To be eligible to receive financial assistance under this subpart, the applicant must be organized in one of the following corporate structures:

(1) An incorporated organization, partnership, Indian tribe and tribal organization as defined in 25 U.S.C. 450b (b) and (c), or other legal entity, including a municipal corporation or a private corporation organized on a for-profit or not-for-profit basis, which operates, or will operate, a school, college, university, learning center, training facility, or other educational institution, including a regional educational laboratory, library, hospital, medical center, medical clinic or any rural community facility. A state government, other than a state government entity that operates a rural community facility, is not considered an eligible applicant; or

(2) A consortium, as defined in §1703.102. A consortium which includes a state government entity is only eligible if the state government entity operates a rural community facility; or

(3) An incorporated organization, partnership, Indian tribe and tribal organization as defined in 25 U.S.C. 450b (b) and (c), or other legal entity which is providing or proposes to provide telemedicine service or distance learning service to other legal entities or consortia at rates calculated to ensure that the economic value and other benefits of the distance learning or telemedicine grant is passed through to such other legal entities or consortia.

(b) At least one of the entities in a partnership or consortium must be eligible individually, and the partnership or consortium must provide written evidence of its legal capacity to contract with RUS. If a partnership or consortium lacks the capacity to contract, each individual entity must contract with RUS on its own behalf.

(c) A borrower of an electric or telecommunications loan under the Act is eligible for a cost of money loan only.

(d) All applications for financial assistance, with the exception of applications requesting a loan and having the minimum required score, will be ranked by the type of application (health care or educational) and total...
§ 1703.104 Allowable grant and loan funding percentage.

(a) Financial assistance, except as noted in paragraph (b) of this section, may be used by eligible organizations for distance learning and telemedicine projects to finance up to 70 percent of the cost of allowable purposes outlined in §1703.105 provided that no financial assistance may exceed the maximum grant or loan amount for the year in which the grant or loan is made.

(b) Cost of money loans requested by an applicant may be used by eligible organizations for distance learning and telemedicine projects to finance up to 90 percent of the cost of allowable loan purposes outlined in §1703.105, provided that no loan may exceed the maximum loan amount for the year in which the loan is made.

§ 1703.105 Grant and loan purposes.

Grants and loans shall be limited to costs associated with the initial capital assets associated with the project. Grant and loan funds as set out in the last sentence of this section shall not exceed twenty percent (20 percent) of the requested financial assistance. The following are allowable grant and loan purposes:

(a) Acquiring, by lease or purchase, eligible equipment as defined in §1703.102;

(b) Acquiring instructional programming; and

(c) Providing technical assistance and instruction for using eligible equipment, including any related software; developing instructional programming; providing engineering or environmental studies relating to the establishment or expansion of the phase of the project that is being financed with the financial assistance.

§ 1703.106 In-kind matching provisions.

(a) In-kind matching, the applicant’s minimum funding contribution (specified in §1703.104) for allowable purposes, is generally required in the form of cash. However, in-kind contributions for the purposes listed in §1703.105 may be substituted for cash.

(b) In-kind items listed in §1703.105 must be non-depreciated or new assets with established monetary value. Manufacturers or service providers discounts are not considered in-kind matching.

(c) Financial assistance may also be provided for hubs located in rural or non-rural areas, if they are necessary to provide distance learning or telemedicine services to rural residents at end user sites.

§ 1703.107 Ineligible loan and grant purposes.

(a) Without limitation, financial assistance under this subpart will not be provided:

(1) To cover the costs of installing or constructing telecommunications transmission facilities, except as provided in paragraph (c) of this section;

(2) To pay for medical equipment except medical equipment primarily used for encoding and decoding data, such as images, for transmission over a telecommunications or computer network;

(3) To pay salaries, wages, or employee benefits to medical or educational personnel;

(4) To pay for the salaries or administrative expenses of the applicant or the project;

(5) To purchase equipment that will be owned by the local exchange carrier or another telecommunications service provider;

(6) To duplicate facilities providing distance learning or telemedicine services in place or to reimburse the applicant or others for costs incurred prior to RUS’ receipt of the completed application;

(7) To pay costs of preparing the application package for financial assistance under this program;
§ 1703.109 The application for financial assistance.

The following items comprise the required material that must be submitted to RUS in support of the application for financial assistance:

(a) Proposed scope of work of the project. The proposed scope of work of the project which includes, at a minimum:

(1) The specific activities to be performed under the project;

(2) Who will carry out the activities;

(3) The time-frames for accomplishing the project objectives and activities; and

(4) A budget for capital expenditures reflecting the line item costs for both the grant and loan funds and other sources of funding for the project.

(b) Executive summary for the project. The applicant must provide RUS a general project overview, verification of compliance with the general requirements of this subpart, and documentation of eligibility. The executive summary shall contain the following 9 categories:

(1) A description of why the project is needed.

(2) An explanation of how the applicant will address the need cited in paragraph (b)(1) of this section, why the applicant requires financial assistance and types of educational or medical services to be offered by the project, and the benefits to the rural residents.

(3) A description of the applicant, documenting eligibility with §1703.103.

(4) An explanation of the total cost of the project including a breakdown of the RUS financial assistance required and the source of funding for the remainder of the project.

(5) A statement that the project is either a distance learning or telemedicine facility as defined in §1703.102. If the project provides both distance learning and telemedicine services, the applicant must identify the predominant use of the system.

(6) A general overview of the telecommunications system to be developed, including the types of equipment, technologies, and facilities used.

(7) A description of the participating hubs and end user sites and the number of rural residents which will be served by the proposed project at each end user site.

(8) The applicant must certify that facilities using financial assistance do...
§ 1703.109 7 CFR Ch. XVII (1-1-98 Edition)

not duplicate adequate established telemedicine services or distance learning services. RUS will make the final determination whether or not financial assistance requested by an applicant will duplicate such adequate established services.

(9) A listing of the location of each end user site (city, town, village, borough or rural area plus the state) discussing how the appropriate National School Lunch Program eligibility percentage was determined in accordance with §1703.112. These percentages may be obtained from the State or local organization that administers the program and must be certified by that organization as being correct.

(c) Financial information. The applicant must provide financial information to support the need for the financial assistance requested for the project. It must show its financial capacity to carry out the proposed work, and show project feasibility. For educational institutions participating in a project application (including all members of a consortium), the financial data must reflect revenue and expense reports and balance sheet reports, reflecting net worth, for the most recent annual reporting period preceding the date of the application. For medical institutions participating in a project application (including all members of a consortium), the financial data must include income statement and balance sheet reports, reflecting net worth, for the most recent completed fiscal year preceding the date of the application. When the applicant is a partnership, company, corporation or other entity, current balance sheets, reflecting net worth, are needed from each of the entities that has at least a 20 percent interest in such partnership, company, corporation or other entity. When the applicant is a consortium, a current balance sheet, reflecting net worth, is needed from each member of the consortium and from each of the entities that has at least a 20 percent interest in such member of the consortium.

(1) Applicants must include sufficient pro-forma financial data which adequately reflects the financial capability of project participants and the project as a whole to continue a sustainable project for a minimum of 10 years after completion of the project. This documentation should include sources of sufficient income or revenues to pay operating expenses including telecommunications access and toll charges, system maintenance, salaries, training, and any other general operating expenses, and provide for replacement of depreciable items.

(2) For applicants requesting a loan and applicants who qualify for a loan or a combination loan/grant in accordance with §1703.112, the documentation must demonstrate the ability to repay the loan. RUS will consider a secured loan guarantee by a third party as evidence of the ability of the applicant to repay a loan.

(3) For each hub and end user site, the applicant must identify and provide reasonable evidence of each source of revenue. If the projection relies on cost sharing arrangements among hub and end user sites, the applicant must provide evidence of agreements made among project participants.

(4) For applicants eligible under §1703.103(a)(3), an explanation of the economic analysis justifying the rate structure to ensure that the benefit, including cost saving, of the financial assistance is passed through to the other persons receiving telemedicine or distance learning services.

(5) For RUS telecommunications and electric borrowers applying for a cost of money loan, the only financial information required in support of that application is the respective most recent Annual Report to RUS (i.e. RUS Form 479, Form 7, or Form 12).

(d) A statement of experience. The applicant must provide a written narrative (not exceeding three single spaced pages) describing its demonstrated capability and experience, if any, in operating an educational or health care endeavor and any project similar to the proposed project. Experience in a similar project is desirable but not required.

(e) Funding commitment from other sources. The applicant must provide evidence, in form and substance satisfactory to the Administrator, that all funds in addition to funds provided under this subpart are committed and will be used for the proposed project.
(f) Telecommunications System Plan. A Telecommunications System Plan, consisting of the following, is required. The items in paragraphs (f) (4) and (5) of this section are needed only when the applicant is requesting loan funds for telecommunications transmission facilities:

(1) The capabilities of the telecommunications terminal equipment, including a description of the specific equipment which will be used to deliver the proposed service. The applicant must document discussions with various technical sources which could include consultants, engineers, product vendors, or internal technical experts, provide detailed cost estimates for operating and maintaining the end user equipment, and provide evidence that alternative equipment and technologies were evaluated.

(2) A listing of the proposed purchases or leases of telecommunications terminal equipment, telecommunications transmission facilities, data terminal equipment, interactive video equipment, computer hardware and software systems, and components that process data for transmission via telecommunications, computer network components, communication satellite ground station equipment, or any other elements of the telecommunications system designed to further the purposes of this subpart, that the applicant intends to build or fund using RUS financial assistance.

(3) A description of the consultations with the appropriate telecommunications carriers (including other interexchange carriers, cable television operators, enhanced service providers, providers of satellite services and telecommunications equipment manufacturers and distributors) and the anticipated role of such providers in the proposed telecommunications system.

(4) Results of discussion with local exchange carriers serving the project area addressing concerns in §1703.107 (c).

(5) The capabilities of the telecommunications transmission facilities, including bandwidth, networking topology, switching, multiplexing, standards and protocols for intra-networking and open systems architecture (the ability to effectively communicate with other networks). In addition, the applicant must explain the manner in which the transmission facilities will deliver the proposed services. For example, for medical diagnostics, the applicant might indicate whether or not a guest or other diagnosticians can join the network from locations off the network. For educational services, indicate whether or not all hub and end-user sites are able to simultaneously hear in real-time and see each other or the instructional material in real-time. The applicant must include detailed cost estimates for operating and maintaining the network, and include evidence that alternative delivery methods and systems were evaluated.

(g) Proposed evaluation methodology. The applicant must provide a proposed method of evaluating the success of the project in meeting the objectives of the program as set forth in §1703.100 and §1703.101 and the proposed scope of work.

(h) Compliance with other Federal statutes and regulations. The applicant is required to submit evidence that it is in compliance with other applicable Federal requirements including, but not limited to the following:

(1) Equal opportunity and nondiscrimination requirements;

(2) Architectural barriers;

(3) Flood hazard area precautions;

(4) Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally Assisted Programs;

(5) Drug-free workplace;

(6) “Certification Regarding Debarment, Suspension and Other Responsibility Matters—Primary Covered Transaction” (See 7 CFR 3017.510);

(7) Intergovernmental review of Federal programs if clearing house(s) exists for the state(s) in which project is located; and

(8) Restrictions on lobbying. For an application for financial assistance in excess of $100,000, a certification statement, “Certification Regarding Lobbying” is required. If the applicant is engaged in lobbying activities, the applicant must submit a completed disclosure form, “Disclosure of Lobbying Activities” (see 7 CFR part 3018).

(i)(1) Environmental impact and historic preservation. The applicant must provide details of the project’s impact on
§ 1703.110 Conflict of interest.

At any time prior to the disbursement of a grant or loan awarded under this subpart, the Administrator may disqualify an otherwise eligible project whenever, in the judgment of the Administrator, the project would create a conflict of interest or the appearance of a conflict of interest. RUS will notify the applicant in writing of the Administrator's intention to disqualify the project under this section and set forth the basis for the Administrator's determination that a conflict of interest or appearance exists. Thereafter, the applicant will have 30 days from the date of such notice to file a written response with the Administrator. If the Administrator receives the applicant's response within the 30-day period, the Administrator will consider the information contained therein before making a final determination whether to disqualify the project. RUS will promptly notify the applicant of the final determination whether a conflict of interest or appearance of a conflict exists. If the determination is affirmative, the notice will also advise the applicant whether the project is disqualified or conditionally disqualified. If the project is conditionally disqualified, the notice will state under what circumstances the project may continue to be eligible for assistance under this subpart. The Administrator's decision under this section will be final.

§ 1703.111 [Reserved]

§ 1703.112 Determination of types of financial assistance.

(a) To maximize the use of available funding and to obtain the maximum repayment to the government, RUS will determine if an applicant will be awarded a grant, loan or a combination
of both loans and grants based upon the following:

(1) The percentage of students eligible to participate in the National School Lunch Program in the areas where the end user sites comprising the project are located; and

(2) The applicant's ability to pay for the project. Financial assistance in the form of grants or a combination of loans and grants will be made available only to those otherwise eligible applicants determined by the Administrator, after review of the financial information furnished by the applicant, to have the least ability to repay the full amount of assistance provided.

(b) The methodology contained in this section will be used to evaluate the relative financial need of the applicant, community, and project. All applicants are required to provide the applicable percentage of students eligible to participate in the National School Lunch Program for each end user site which must be certified as being correct by the appropriate State or local organization administering the program. The type of financial assistance will be determined as follows:

(1) If the end user site(s) for the project have, or are located in school districts which have, from 0-32 percent student eligibility in the National School Lunch Program, the project qualifies for a loan.

(2) If the end user site(s) for the project have, or are located in school districts which have, from 33-60 percent student eligibility in the National School Lunch Program, the project qualifies for a loan and may be eligible for some grant funds.

(3) If the end user site(s) for the project have, or are located in school districts which have, from 61-100 percent student eligibility in the National School Lunch Program, the project qualifies for a grant. The applicant may indicate its desire to be considered for a loan if denied a grant provided the financial data required in §1703.109(c) indicates the ability to repay a loan. Grant applicants should indicate if they desire to be considered for a loan.

(4) Percentage ratios will be rounded up to the next highest or rounded down to the next lowest whole number for fraction of percentages at or greater than .5 or less than .5, respectively.

(c) The following guidelines will be used to determine the applicable National School Lunch Program eligibility percent for a particular end user site:

(1) Public schools or nonprofit private schools of high school grade or under will use the actual eligibility percentage for that particular school.

(2) Schools and institutions of higher learning ineligible to participate in the National School Lunch Program and non-school end user sites (medical facilities, libraries, etc.) will use the eligibility percentage of all students in the school district where the end user will be located.

(d) If all the end user sites in a proposed network or system fall within the same percentile category, the project will be eligible for the type of financial assistance set forth in paragraph (b) of this section.

(e) If end user sites fall within different percentile categories the eligibility percentages associated with each end user site will be averaged to determine the percentile category and type of financial assistance the applicant is eligible for. For purposes of averaging, if a hub is also utilized as an end user site, the hub will be considered as an end user site.

(f) For those applicants which qualify for a combination loan/grant, the Administrator will determine the amount of the grant the applicant will receive, if any, based upon analysis of the financial condition of the applicant as reflected by the information submitted under §1703.109(c). The minimum amount of a grant will be $5,000.

(g) RUS will submit a letter to those applicants being offered financial assistance in the form of a loan, or a combination of a loan and grant, outlining terms and conditions of such assistance. The applicant will have 15 days from the date of the letter to accept the terms and conditions in the letter. If the applicant fails to respond within this time the Administrator may withdraw the offer of financial assistance and the applicant will have no right to appeal the withdrawal.
§ 1703.113 Application filing dates, location, processing, and public notification.

(a) Applications for financial assistance under this subpart shall be submitted to the Rural Utilities Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., STOP 1590, Washington, DC 20250-1590. Applications should be marked “Attention: Assistant Administrator, Telecommunications Program”.

(b) Applications for loans can be submitted at any time. RUS will review each application for completeness in accordance with §1703.109, and notify the applicant, within 15 working days of the receipt of the application, of the results of this review, citing any information which is incomplete. To be considered for loan funds during the fiscal year (FY) that the application is submitted, the applicant must submit any information needed to complete the application by June 30. If this review concludes that a loan is feasible and the application receives the required minimum number of points as determined using the scoring criteria in §1703.117, the Administrator will immediately process the application. The minimum number of points required for a loan application to be immediately processed will be published in the Federal Register each fiscal year.

(c) Applications requesting grant funds must be submitted to RUS to arrive not later than August 12, 1997 if the applications are to be considered during FY 1997. Beyond FY 1997, all applications requesting grant funds must be submitted to RUS to arrive not later than April 30 if the applications are to be considered during the fiscal year the application is submitted. It is suggested that applications be submitted prior to the above deadline to ensure they can be reviewed and considered complete by the deadline. RUS will review each application for completeness in accordance with §1703.109, and notify the applicant, within 15 working days of the receipt of the application, of the results of this review, citing any information which is incomplete. To be considered for grant funds, the applicant must submit the information to complete the application by August 12, 1997 in FY 97 and April 30 beyond FY 97. If the applicant fails to submit such information by the appropriate deadline, the application will be considered during the next fiscal year.

(d) The Administrator will publish, at the end of each fiscal year, a notice in the Federal Register of all completed applications receiving financial assistance under this subpart. The Administrator will also make those applications available for public inspection at the U.S. Department of Agriculture, 1400 Independence Avenue, SW., Washington, DC. For purposes of this paragraph, applications include any information not protected by the Privacy Act of 1974, 5 U.S.C. 552a, and any other information that has not been designated as proprietary information by the applicant.

(e) All applicants must submit an original and two copies of a completed application. A grant applicant must also submit a copy of the application to the State government point of contact, if one has been designated for the state, at the same time it submits an application to RUS. All applications must include the information described in §1703.109.

§§ 1703.114–1703.116 [Reserved]

§ 1703.117 Criteria for scoring applications.

(a) Criteria. The criteria in this section will be used by RUS to score applications that have been determined to be in compliance with the requirements of this subpart. Applicants shall address the following criteria:

1. The need for services and benefits derived from services;
2. The comparative rurality of the proposed project service area;
3. The ability to leverage resources;
4. Innovativeness of design;
5. Connectivity with outside networks;
6. The cost effectiveness of the design;
7. Project participation in EZE/EC (Empowerment Zone and Enterprise Communities); and
8. Project participation in Champion communities.

(b) Scoring criteria—(1) The need for services and benefits derived from services.

(i) This criterion will be used by RUS...
Rural Utilities Service, USDA § 1703.117

to score applications based on the documentation submitted in support of the application for financial assistance that reflects the need for services and benefits derived from the services proposed by the project. Up to 45 points can be assigned to this criterion.

(ii) RUS will consider the extent of the applicant’s documentation explaining the economic, education or health care challenges facing the community; the applicants proposed plan to address these challenges; how the financial assistance can help; and why the applicant cannot complete the project without a loan or grant. The Administrator will also consider any support by recognized experts in the related educational or health care field, any documentation substantiating the educational or health care underserved nature of the applicant’s proposed service area, and any justification for specific educational or medical services which are needed and will provide direct benefits to rural residents. Some examples of benefits to be provided by the project include, but are not limited to:

(A) Improved education opportunities for a specified number of students;
(B) Travel time and money saved by telemedicine diagnosis;
(C) Number of doctors retained in rural areas;
(D) Number of additional students electing to attend higher education institutions;
(E) Lives saved due to prompt medical diagnosis and treatment;
(F) New education courses offered, including college level courses;
(G) Expanded use of educational facilities such as night training;
(H) Number of patients receiving telemedicine diagnosis;
(i) Provision of training, information resources, library assets, adult education, lifetime learning, community use of technology, jobs, connection to region, nation, and world.

(iii) That rural residents, and other beneficiaries, desire the educational or medical services to be provided by the project (a strong indication of need is the willingness of local end users or institutions to pay, to the extent possible, for proposed services).

(iv) The project’s development and support based on input from the local residents and institutions.

(v) The extent to which the application is consistent with the State strategic plan prepared by the Rural Development State Director of the United States Department of Agriculture.

(2) The comparative rurality of the proposed project service area. (i) The methodology contained in this section is used to evaluate the relative rurality (i.e. population) of service areas for various projects. Under this system, the end user sites and hubs (as defined in §1703.102) contained within the proposed project service area are identified. Then, those locations are given a score according to the population of the area where the end user sites are located. Up to 35 points can be assigned to this criterion.

(ii) The following definitions are used in the evaluation of rurality:

(A) Exceptionally Rural Area means any area of the United States not included within the boundaries of any incorporated or unincorporated city, village, or borough having a population in excess of 5,000 inhabitants.

(B) Rural Area means any area of the United States included within the boundaries of any incorporated or unincorporated city, village, or borough having a population over 5,000 and not in excess of 10,000 inhabitants.

(C) Urban Area means any area of the United States included within the boundaries of any incorporated or unincorporated city, village, or borough having a population in excess of 10,000 inhabitants.

(iii) The applicant will receive points as follows:

(A) There are a total of 35 possible points for this criterion. The maximum number of points each end user site can receive is determined by dividing the total possible points for this criterion, 35, by the total number of end user sites. If a hub is utilized as an end user site, the hub will be considered as an end user site.

(B) If the end user site is located in an Exceptionally Rural Area, it will receive the maximum number of points each end user site can receive. If the end user site is located in a Mid-Rural Area, it will receive 50 percent of the
maximum number of points each end user site can receive. If the end user site is located in an Urban Area, it will receive 0 percent of the maximum number of points each end user site can receive.

(C) The total points for each end user site will be added to reach a final point total for the project.

(D) An application must receive a minimum of 18 points under this criterion to be eligible for any financial assistance.

(3) The ability to leverage resources. (i) This section is used to evaluate the ability of the applicant to contribute financially to the project and to secure other non-Federal sources of funding. Documentation submitted in support of the application for financial assistance should reflect any additional financial support for the project from non-Federal sources above the applicant’s required percent matching of the RUS financial assistance as set forth in §1703.104. The applicant must include evidence from authorized representatives of the sources that the funds are available and will be used for the proposed project—up to 35 points.

(ii) The applicant will receive points as follows:
(A) Matching for allowable financial assistance purposes greater than 30 percent, but less than or equal to 50 percent of the RUS financial assistance—10 points.
(B) Matching for allowable financial assistance purposes greater than 50 percent, but less than or equal to 100 percent of the RUS financial assistance—20 points.
(C) Matching for allowable financial assistance purposes greater than 100 percent, but less than or equal to 150 percent of the RUS financial assistance—25 points.
(D) Matching for allowable financial assistance purposes greater than 150 percent, but less than or equal to 200 percent of the RUS financial assistance—30 points.
(E) Matching for allowable financial assistance purposes greater than 200 percent of the RUS financial assistance—35 points.

(4) Innovativeness of project. This criterion will be used by RUS to score applications based on the documentation submitted in support of the application for financial assistance that reflects the innovative nature of the project. The applicant should explain the extent to which, if any, the project is an innovative approach to either delivering or using telecommunications to address the needs of the community, and how the project differs in approach from the typical educational or health care application of technology. Up to 20 points can be assigned to this criterion.

(5) Connectivity with outside networks. (i) This criterion will be used by RUS to score applications based on the documentation submitted in support of the application for financial assistance that reflects the extent to which the proposed project can be connected to other educational or health care networks. Up to 20 points can be assigned to this criterion.

(ii) Consideration will be given to the extent that the proposed project will interconnect with other existing networks at the regional, statewide, national or international levels. RUS believes that to the extent possible, educational and health care networks should be designed to connect to the widest practicable number of other networks that expand the capabilities of the proposed project, thereby affording rural residents opportunities that may not be available at the local level. The ability to connect to the internet alone can not be used as the sole basis to fulfill this criteria.

(iii) Consideration will also be given to the extent that facilities constructed with federal financial assistance, particularly financial assistance under this chapter provided to entities other than the applicant, will be utilized to extend or enhance the benefits of the proposed project.

(6) Cost effective design. (i) This criterion will be used by RUS to score applications based on the documentation submitted in support of the application for financial assistance that reflects the cost efficiency of the project design. Up to 15 points can be assigned to this criterion.

(ii) Consideration will be given to the extent that the proposed technology or technologies for delivering the proposed educational or health care services for the project service area are the
most cost effective for the project proposed. The application must contain information necessary for RUS to use accepted analytical and financial methodologies to determine whether the applicant is proposing the most cost-effective option. RUS will consider the applicant’s documentation comparing various systems and technologies, whether the applicant’s system is the most cost-effective system, and whether buying or leasing specific equipment is more cost effective. Points will be deducted from the scores of the applications that fail to utilize existing telecommunications facilities that could provide the transmission path for the needed services.

(7) Project participation in EZ/ECs. This criterion will be used by RUS to score applications based on the documentation submitted in support of the application for financial assistance that reflects the designation of Empowerment Zones and Enterprise Communities (EZ/EC) included as beneficiaries of the proposed project. Ten (10) points will be assigned if at least one end user site is located in an EZ/EC.

(8) Project participation in Champion Communities. This criterion will be used by RUS to score applications based on the documentation submitted in support of the application for financial assistance that reflects the designation of Champion Communities included as beneficiaries of the proposed project. Five (5) points will be assigned if at least one end user site is located in a Champion Community.

§ 1703.118 Other application selection provisions.

(a) Selection. Applications will be selected for financial assistance based on scores, availability of funds, and the provisions of this section. RUS will make determinations regarding the reasonableness of all numbers; dollar levels; rates; the nature and design of the project; cost; location; and other characteristics of the application and the proposed project to determine the number of points assigned to a grant application for all selection criteria. Joint applications submitted by multiple applicants as set forth in §1703.113 will be rated as a single application.

(b) Regardless of the number of points an application receives in accordance with §1703.117 or the feasibility of the proposed project, the Administrator may, based on a review of the applications in accordance with the requirements of this subpart:

1. Limit the number of applications selected for projects located in any one state during a fiscal year;
2. Limit the number of selected applications for a particular project;
3. Select an application receiving fewer points than another higher scoring application if there are insufficient funds during a particular funding period to select the higher scoring application; provided, however, the Administrator may ask the applicant of the higher scoring application if it desires to reduce the amount of its application to the amount of funds available if, notwithstanding the lower grant amount, the Administrator determines the project is financially feasible in accordance with §1703.109(d)(1) at the lower amount;
4. Award a grant to an applicant whose application carries out the priorities listed in the scoring criteria in such a way to make the application unique; or
5. Award a grant to an applicant which would normally qualify for other financial assistance, if the project achieves one or more of the following:
   (i) Utilizes cutting edge technology to provide a solution to a unique problem;
   (ii) Provides services otherwise not possible in an extremely isolated geographic area; or
   (iii) Provides inordinate quantifiable benefit to rural communities relative to the amount of financial assistance requested.

(c) RUS will not approve an application if RUS determines that:

1. The applicant’s proposal does not indicate financial feasibility or is not sustainable in accordance with the requirements of §1703.109(d)(1);
2. The applicant’s proposal indicates technical flaws, which, in the opinion of RUS, would prevent successful implementation, operation, or sustainability of the proposed project; or
(3) Any other aspect of the applicant's proposal fails to adequately address any requirements of this subpart or contains inadequacies which would, in the opinion of RUS, undermine the ability of the project to meet the general purpose of this subpart or comply with policies of the DLT program set forth in §1703.101.

(d) RUS may reduce the amount of the applicant's grant award based on insufficient program funding for the fiscal year in which the project is reviewed, and offer the applicant loan funds in addition to the grant funds, if RUS determines that, notwithstanding a lower grant award, the project will show financial feasibility in accordance with §1703.109(d)(1), and continues to meet all other provisions of this subpart. RUS will discuss its findings informally with the applicant and make every effort to reach a mutually acceptable agreement with the applicant. Any discussions with the applicant and agreements made with regard to a reduced grant amount will be confirmed in writing, and these actions shall be deemed to have met the notification requirements set forth in paragraph (e) of this section.

(e) RUS will provide the applicant an explanation of any determinations made with regard to paragraphs (c)(1) through (c)(3) of this section prior to making final project selections for the year. The applicant will be provided 15 days from the date of RUS' letter to respond, provide clarification, or make any adjustments or corrections to the project. If, in the opinion of the Administrator, the applicant fails to adequately respond to any determinations or other findings made by the Administrator, the project will not be funded, and the applicant will be notified of this determination. If the applicant does not agree with this finding an appeal may be filed in accordance with §1703.119.

§1703.119 Appeal provisions.

All qualifying applications under this subpart will be scored based on criteria in section §1703.117. A determination will be made by RUS based on the highest ranking applications and the amount of funds available for grants and loans. All applicants will be notified in writing of the score each application receives, and included in this notification will be a tentative minimum required score to receive financial assistance. If the score received by the applicant could result in the denial of its application, or if its score, while apparently sufficient to qualify for financial assistance, may be surpassed by the score awarded to a competing application after appeal, the applicant may appeal its numerical scoring. Any appeal must be based on inaccurate scoring of the application by RUS and no new information or data that was not included in the original application will be considered. The appeal must be made in writing within 10 days after the applicant is notified of the scoring results. Appeals shall be submitted to the Administrator, Rural Utilities Service, U.S. Department of Agriculture, 1400 Independence Ave., SW., STOP 1590, Washington, DC 20250-1590. Thereafter, the Administrator will review the original scoring to determine whether to sustain, reverse or modify the original scoring determination. Final determinations will be made after consideration of all appeals. The Administrator's determination will be final. A copy of the Administrator's decision will be furnished promptly to the applicant. An appeal based solely upon the type of financial assistance the applicant qualifies for will not be considered.

§§1703.120—1703.121 [Reserved]

§1703.122 Further processing of selected applications.

(a) During the period between the submission of the application and the execution of implementing documents, the applicant must inform RUS if the project is no longer viable or the applicant no longer desires financial assistance for the project. If the applicant informs RUS, the selection will be rescinded and written notice to that effect shall be sent promptly to the applicant.

(b) If an application has been selected and the nature of the project changes, the applicant may be required to submit a new application to RUS for consideration depending on the degree of
change. A new application will be subject to review in accordance with this subpart. The selection may not be transferred to another project.

(c) If state or local governments raise objections to a proposed project under the intergovernmental review process that are not resolved within 3 months of the Administrator’s selection of the application, the Administrator may rescind the selection and written notice to that effect will be sent promptly to the applicant.

(d) Recipients of financial assistance will be required to submit RUS Form 479-A, “Distance Learning and Telemedicine Technical Questionnaire.”

(e) After an applicant selected for financial assistance has submitted such additional information, if any, RUS determines is necessary for completing the financial assistance documents, RUS will send the documents to the applicant to execute and return to RUS.

(1) The financial assistance documents will include, among other things, a letter of agreement for grants; loan documents, including third party guarantees, for loans; or any other legal documents the Administrator deems appropriate, including suggested forms of certifications and legal opinions.

(2) The letter of agreement and the loan documents will include, among other things, conditions on the release or advance of funds and include at a minimum, a project description, approved purposes, the maximum amount of the financial assistance, supplemental funds, required of the project and certain agreements or commitments the applicant may have proposed in its application. In addition, the loan documents may contain covenants and conditions the Administrator deems necessary or desirable to provide assurance that the loan will be repaid and the purposes of the loan will be accomplished.

(f) The recipient of a loan will be required to execute a security instrument in form and substance satisfactory to RUS.

(4) DLT borrowers must, before receiving any advances of loan funds, provide security that is adequate, in the opinion of RUS, to assure repayment, within the time agreed, of all loans to the borrower under the DLT program. This assurance will generally be provided by a first lien upon all of the borrower’s assets or such portion thereof as shall be satisfactory to RUS. RUS may consider the projected revenues from the facilities subject to the lien.

(5) Security may also be provided by third-party guarantees, letters of credit, pledges of revenue or other forms of security satisfactory to RUS.

(6) The security instrument and other loan documents required by RUS in connection with loans under the DLT program shall contain such covenants, and other provisions as may, in the opinion of RUS, be necessary or desirable to secure repayment of the loan.

(7) If the facilities financed do not constitute a complete operating system, the DLT borrower shall provide evidence demonstrating, to RUS’ satisfaction, that the borrower has sufficient contractual or other arrangements to assure that the facilities financed will provide adequate and efficient service.

(f) Until the letter of agreement or loan documents have been executed and delivered by RUS and by the applicant, RUS reserves the right to require any changes in the project or legal documents covering the project to protect the integrity of the program and the interests of the government.

(g) If the applicant fails to submit, within 120 calendar days from the date of RUS’ selection of an application, all of the information that RUS determines to be necessary to prepare legal documents and satisfy other requirements of this subpart, RUS may rescind the selection of the application and written notice of such rescission will be sent promptly to the applicant.

§§ 1703.123—1703.125 [Reserved]

§ 1703.126 Disbursement of loan and grant funds.

(a) For financial assistance of $100,000 or greater, prior to the disbursement of funds, the recipient, if it is not a unit of government, will provide evidence of fidelity bond coverage as required by 7 CFR part 3019.
§ 1703.127 Reporting and oversight requirements.

(a) A project performance activity report will be required of all recipients on an annual basis until the project is complete and the funds are disbursed by the applicant.

(b) A final project performance report will be required. It must provide an evaluation of the success of the project in meeting the objectives of the program. The final report may serve as the last annual report.

(c) RUS will monitor recipients as it determines necessary to assure that projects are completed in accordance with the approved scope of work and that funds are expended for approved purposes.

(d) Recipients shall diligently monitor performance to ensure that time schedules are being met, projected work by time periods is being accomplished, and other performance objectives are being achieved. Recipients are to submit an original and one copy of all reports submitted to RUS. The project performance reports shall include, but not be limited to, the following:

1. A comparison of actual accomplishments to the objectives established for that period;
2. A description of any problems, delays, or adverse conditions which have occurred, or are anticipated, and which may affect the attainment of overall project objectives, prevent the meeting of time schedules or objectives, or preclude the attainment of particular project work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or planned to resolve the situation; and
3. Objectives and timetable established for the next reporting period.

§ 1703.128 Audit requirements.

(a) The grant recipients and DLT borrowers will provide an audit report in accordance with either:

1. 7 CFR part 3051, Audits of Institutions of Higher Education and Other Nonprofit Institutions, or its successor; or
2. 7 CFR part 1773, Policy on Audits of RUS Borrowers.

(b) 7 CFR part 3051 applies to not-for-profit organizations (including hospitals, colleges and universities) and state, local, and Indian tribal governments. 7 CFR part 1773 applies to for-profit organizations receiving grants or loans, and all RUS telecommunications and electric borrowers receiving cost of money loans.

(c) For grant recipients the audit requirements only apply to the year(s) in which grant funds are expended. For DLT borrowers the audit requirements apply until the loan is repaid.

§ 1703.129 Repayment of loans.

The term of cost of money loans will be based on the economic useful life of the facilities to be financed, not to exceed 10 years. If the recipient requests, a one year deferment of principal will be included. In special hardship cases, which the recipient must justify, RUS may approve a two year deferment of principal. Interest on the loan will be due and payable during the principal deferral period. RUS will establish uniform debt service payments based on the total amortization period.
§ 1703.135 Grant and loan administration.

(a) RUS will review recipients as necessary to determine whether funds were expended for approved purposes. The recipient is responsible for ensuring that the project complies with all applicable regulations, and that the financial assistance is expended only for approved purposes. The recipient is responsible for ensuring that disbursements and expenditures of funds are properly supported by invoices, contracts, bills of sale, canceled checks, or other appropriate forms of evidence, and that such supporting material is provided to RUS, upon request, and is otherwise made available, at the recipient's premises, for review by the RUS representatives, the recipient's certified public accountant, the office of Inspector General, U.S. Department of Agriculture, the General Accounting Office and any other officials conducting an audit of the recipient's financial statements or records, and program performance for the financial assistance awarded under this subpart. The recipient will be required to permit RUS to inspect and copy any records and documents that pertain to the project.

(b) Grants provided under this program will be administered under, and are subject to 7 CFR parts 3016 through 3019 or their successor, as appropriate. 7 CFR parts 3016 and 3019 subject grantees to a number of requirements which cover, among other things, financial reporting, accounting records, budget controls, record retention and audits, bonding and insurance, cash deposits for grant funds, grant-related income, use and disposition of real property and equipment purchased with grant funds, procurement standards, allowable costs for grant related activities, and grant close-out procedures.

§ 1703.136 Changes in project objectives or scope.

The recipient will obtain prior approval for any material change to the scope or objectives of the approved project, including changes to the scope of work or budget. Failure to obtain prior approval of changes may result in suspension or termination of funds.

§ 1703.137 Grant and loan termination provisions.

(a) Termination for cause. RUS may terminate any financial assistance in whole, or in part, at any time before the date of completion of funding disbursement, whenever it is determined that the recipient has failed to comply with the conditions of the financial assistance. RUS will promptly notify the recipient in writing of the determination and the reasons for the termination, together with the effective date.

(b) Termination for convenience. RUS or the recipient may terminate financial assistance in whole, or in part, when both parties agree that the continuation of the project would not produce beneficial results commensurate with further expenditure of funds. The two parties will agree upon termination conditions, including the effective date, and in the case of partial termination's, the portion to be terminated. The recipient will not incur new obligations for the terminated portion after the effective date, and will cancel as many outstanding obligations as possible. RUS will allow full credit to the applicant for the Federal share of the noncancelable obligations, properly incurred by the recipient prior to termination.

§§ 1703.138—1703.139 [Reserved]

§ 1703.140 Expedited telecommunications loans.

General. RUS will expedite consideration and determination of an application for a loan or a request for advance of funds submitted by an RUS telecommunications borrower that supports the project seeking financial assistance under this subpart. See 7 CFR part 1737 for loans and 7 CFR part 1744 for advances under this section.

APPENDIX A TO SUBPART D TO PART 1703—ENVIRONMENTAL QUESTIONNAIRE

NOTE: It is extremely important to respond to all questions completely to ensure expeditious processing of the Distance Learning and Telemedicine application. The information herein is required by Federal law.
§ 1703.300

Important: Any activity related to the project that may adversely affect the environment or limit the choice of reasonable development alternatives shall not be undertaken prior to the completion of Rural Utilities Service's environmental review process.

Legal Name of Applicant ——
Signature (Type/Sign/Date) ————

The applicant’s representative certifies, to the best of his/her knowledge and belief, that the information contained herein is accurate. Any false information may result in disqualification for consideration of the loan or grant or rescission of the loan or grant.

I. Project Description—Detailing construction, including, but not limited to, internal modifications of existing structures, and installation of telecommunications transmission facilities (defined in 7 CFR 1703.102), including satellite uplinks or downlinks, microwave transmission towers, and cabling.

1. Describe the portion of the project, and site locations (including legal ownership of real property), involving internal modifications, or equipment additions to buildings or other structures (e.g., relocating interior walls or adding computer facilities) for each site.

2. Describe the portion of the project, and site locations (including legal ownership or real property), involving construction of transmission facilities, including cabling, microwave towers, satellite dishes; or, disturbance of property of .99 acres or greater for each project site.

3. Describe the nature of the proposed use of the facilities, and whether any hazardous materials, air emissions, wastewater discharge or solid waste will result.

4. State whether or not any project site(s) contain or are near properties listed or eligible for listing in the National Register of Historic Places, and identify any historic properties (The applicant must supply evidence that the State Historic Preservation Officer (SHPO) has cleared development regarding any historical properties).

5. Describe any actions taken to mitigate any environmental impacts resulting from the proposed project (use attachment if necessary).

NOTE: The applicant may submit a copy of any environmental review, study, assessment, report or other document that has been prepared in connection with obtaining permits, approvals or other financing for the proposed project from State, local or other Federal bodies. Such material, to the extent relevant, may be used to meet the requirements herein.

Subpart E—Deferments of RUS Loan Payments for Rural Development Projects

Source: 58 FR 21639, Apr. 23, 1993, unless otherwise noted.

§ 1703.300 Purpose.

This subpart E sets forth RUS’s policies and procedures for making loan deferments of principal and interest payments on direct loans or insured loans made for electric or telephone purposes, but not for loans made for rural economic development purposes, in accordance with subsection (b) of section 12 of the RE Act. Loan deferments are provided for the purpose of promoting rural development opportunities.

§ 1703.301 Policy.

It is RUS’s policy to encourage borrowers to invest in and promote rural development and rural job creation projects that are based on sound economic and financial analyses. Borrowers are encouraged to use this program to promote economic, business and community development projects that will benefit rural areas.
§ 1703.302 Definitions and rules of construction.

(a) Definitions. For the purpose of this subpart, the following terms will have the following meanings:

Administrator means the Administrator of RUS.

Borrower means any organization which has an outstanding direct loan or insured loan made by RUS for the provision of electric or telephone service.

Cushion of credit payment means a voluntary unscheduled payment on an RUS note made after October 1, 1987, credited to the cushion of credit account of a borrower.

Deferment means a re-amortization of a payment of principal and/or interest on an RUS direct loan or insured loan for over either a 5- or 10 year period, with the first payment beginning on the date of the deferment.

Direct loan means a loan that is made by the Administrator pursuant to section 4 or section 201 of the RE Act (7 U.S.C. 901 et seq.) for the provision of electric or telephone service in rural areas and does not include a loan made to promote economic development in rural areas.

Financially distressed borrower means an RUS-financed borrower determined by the Administrator to be either:

(i) In default or near default on interest or principal payments due on loans made or guaranteed under the RE Act;

(ii) A borrower that was in default or near default, but is currently participating in a workout or debt restructuring plan with RUS; or

(iii) Experiencing a financial hardship.

Insured loan means a loan that is made, held, and serviced by the Administrator, and sold and insured by the Administrator, pursuant to Section 305 of the RE Act (7 U.S.C. 901 et seq.) for the provision of electric or telephone service in rural areas and does not include a loan made to promote economic development in rural areas.

Project means a rural development project that a borrower proposes and the Administrator approves as qualifying under this subpart.

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RTB means the Rural Telephone Bank (telephone bank), a body corporate and an instrumentality of the United States, that obtains supplemental funds from non-Federal sources and utilizes them in making loans, operating on a self-sustaining basis to the extent practicable (section 401, RE Act).

Technical assistance means market research, product or service improvement, feasibility studies, environmental studies, and similar activities that benefit rural development or rural job creation projects.

(b) Rules of construction. Unless the context otherwise indicates; “includes” and “including” are not limiting, and “or” is not exclusive. The terms defined in §1703.302(a) include both the plural and the singular.

§ 1703.303 Eligibility criteria for deferment of loan payments.

The deferment of loan payments may be granted to any borrower that is not financially distressed, delinquent on any Federal debt, or in bankruptcy proceedings. However, the deferment of loan payments will not be granted to a borrower during any period in which the Administrator has determined that no additional financial assistance of any nature should be provided to the
§ 1703.304 Restrictions on the deferment of loan payments.

(a) The deferment must not impair the security of any loans made by RUS or RTB, or guaranteed by RUS, pursuant to the RE Act.

(b) At no point in time may the amount of the debt service payments deferred exceed 50 percent of the total cost of a community, business, or economic development project for which a deferment is provided.

c) A borrower may defer debt service payments only in an amount equal to the investment made by such borrower in a rural development project. The investment must not be made from:

(1) Proceeds of loans made or guaranteed pursuant to the RE Act, or grants made pursuant to the RE Act or section 2331 through section 2335A of the Rural Economic Development Act of 1990 (7 U.S.C. 950aaa et seq.);

(2) Funds necessary to make timely payments of principal and interest on loans made, guaranteed or lien accommodated pursuant to the RE Act;

(3) Insurance proceeds from mortgaged property;

(4) Damage awards and sale proceeds resulting from eminent domain and similar proceedings involving mortgaged property;

(5) Sale proceeds from mortgaged property sales requiring specific Administrator approval; and

(6) Funds which are restricted by RUS or RTB loan instruments to be held in trust for the Government or to be held for any other specific purpose.

d) Any investment made in a rural development project prior to the date of the application for a deferment based on such project cannot be used to satisfy the requirements of this section.

§ 1703.305 Requirements for deferment of loan payments.

(a) Except as otherwise provided in paragraph (b) of this section, the borrower must make a cushion of credit payment equal to the amount of the payment deferred and subject to the following rules:

(1) Cushion of credit payments made prior to the date that an application for deferral has been approved by RUS cannot be used to satisfy the requirements of this section;

(2) Once a cushion of credit payment has been made to satisfy the requirements of paragraph (a) of this section, it must remain on deposit in the cushion of credit account on the date of the deferral or the deferral will not take place; and

(3) The cushion of credit payment must be received by RUS on the date the payment being deferred is due, or within 30 days prior to this date.

(b) A borrower may elect to consolidate in one application filed pursuant to §1703.311, all of the related deferrals it wishes to receive in a twelve month period following application approval. In such a case, the requirement contained in paragraph (a)(1) of this section may alternatively be satisfied by depositing an amount equal to the aggregate deferrals covered by such application into the cushion of credit account at the time the first cushion of credit payment is due under paragraph (a)(1) of this section.

§ 1703.306 Limitation on funds derived from the deferment of loan payments.

Funds derived from the deferment of loan payments will not be used:

(a) To fund or assist projects which would, in the judgement of the Administrator, create a conflict of interest or the appearance of a conflict of interest. The borrower must disclose to the Administrator information regarding any potential conflict of interest or appearance of a conflict of interest;
§ 1703.311 Application procedures for deferment of loan payments.

(a) A borrower applying for a deferment must:

(1) Submit a certified board resolution to the Administrator requesting a deferment of principal and interest. The resolution must:

(b) For any purpose not reasonably related to the project as determined by the Administrator;

(c) To transfer existing employment or business activities from one area to another; or

(d) For the borrower’s electric or telephone operations, nor for any operations affiliated with the borrower unless the Administrator has specifically informed the borrower in writing that the affiliated operations are part of the approved purposes.

§ 1703.307 Uses of the deferments of loan payments.

The deferment of loan payments will be made to enable the borrower to provide funding and assistance for rural development and job creation projects. This includes, but is not limited to, the borrower providing financing to local businesses, community development assistance, technical assistance to businesses, and other community, business, or economic development projects that will benefit rural areas.

§ 1703.308 Amount of deferment funds available.

(a) The total amount of deferments made available for each fiscal year under this program will not exceed 3 percent of the total payments due during fiscal year 1993 from all borrowers on direct loans and insured loans made under the RE Act. For each subsequent fiscal year after 1993, the total amount of deferments will not exceed 5 percent of the total payments due for the year from all borrowers on direct loans and insured loans.

(b) The total amount of annual deferments are subject to limitations established by appropriations Acts.

§ 1703.309 Terms of repayment of deferred loan payments.

(a) Deferments made to enable the borrower to provide financing to local businesses will be repaid over a period of 60 months, in equal installments, with payments beginning on the date of the deferment, and continuing in such a manner until the total amount of the deferment is repaid. The deferment payment will not accrue interest.

(b) In the case of deferments made to enable the borrower to provide community development assistance, technical assistance to businesses, and for other community, business, or economic development projects not included in paragraph (a) of this section, the deferment will be repaid over a period of 120 months, in equal installments, with payments beginning on the date of the deferment and continuing in such a manner until the total amount of the deferment is repaid. The deferment payments will be made on either a monthly or quarterly basis depending on the existing repayment terms of the direct loan or insured loan being deferred. The deferment will not accrue interest.

(c) The maturity date of a loan may not be extended as a result of a deferment.

(d) If the required payment is not made by the borrower or received by the Administrator when due, the Administrator will reduce the borrower’s cushion of credit account established under this subpart in an amount equal to the deferment payment required.

(e) The balance in a borrower’s cushion of credit account shall not be reduced by the borrower below the level of the unpaid balance of the payment deferred.

§ 1703.310 Environmental considerations.

Prospective recipients of funds received from the deferment of loan payments are encouraged to consider the potential environmental impact of their proposed projects at the earliest planning stage and plan development in a manner that reduces, to the extent practicable, the potential to affect the quality of the human environment adversely.

§ 1703.311 Application procedures for deferment of loan payments.
§ 1703.312 RUS review requirements.

Borrowers shall ensure that funds are invested in the rural development project as approved by RUS. The Administrator reserves the right to review the books and copy records of borrowers receiving loan payment deferments as necessary to ensure that the investments in the rural development project are in accordance with this subpart and the representations and purposes stated in the borrower’s completed application. If an audit discloses that the amount deferred was not used for the purposes stated in the completed application, the borrower shall be required to promptly repay the amount deferred and the benefits of the

(i) Be signed by the president or vice president of the borrower;
(ii) Contain information on the total amount of deferment requested for each specific project;
(iii) Contain information on the type of project and the length of deferment requested as defined in §1703.309; and
(iv) Specify which officer of the borrower has been given the authority to certify to those matters required in this section;

(2) Submit certification by the appropriate officer to the Administrator that the proposed project will not violate the limitations set forth in §1703.306 and disclose all information regarding any potential conflict of interest or appearance of a conflict of interest that would allow the Administrator to make an informed decision;

(3) Submit certification by the appropriate officer to the Administrator that an investment in the rural development project will be made by the borrower in an amount equal to the deferred debt service payment;

(4) Submit certification by the appropriate officer to the Administrator that the amount of the deferment will not exceed 50 percent of the total cost of the project for which the deferment is provided;

(5) Submit certification by the appropriate officer to the Administrator that it will make a cushion of credit payment necessary to satisfy the requirement of §1703.305(a);

(6) Submit certification by the appropriate officer to the Administrator that it will comply with §1703.313 and provide documentation showing that its total investments, including the proposed investment, will not exceed the investment limitations specified in 7 CFR part 1717, Subpart N, Investments, Loans and Guarantees by Electric Borrowers, or 7 CFR Part 1744, Post Loan Policies and Procedures Common to Guaranteed and Insured Loans. The documentation must provide a list of each rural development project the borrower has invested in to date, including the investment amounts;

(7) Submit to the Administrator written identification of the direct loan(s) and/or insured loan(s) for which payments are to be deferred;

(8) Submit to the Administrator a written narrative which contains information regarding the proposed rural development or job creation project such as the manner in which the project will promote community, business, or economic development in rural areas, the nature of the project, its location, the primary beneficiaries, and, if applicable, the number and type of jobs to be created; and

(9) Submit to the Administrator a letter of approval from the state regulatory authority, if applicable, granting its approval for the borrower to defer direct loan payment(s) and/or insured loan payment(s) and invest the amount in a rural development project.

(b) The Administrator reserves the right to determine that special circumstances require additional data from borrowers before acting on a deferment. The Administrator also reserves the right to require, as a condition of approving a loan payment deferment pursuant to this subpart, that the borrower execute and deliver any amendments or supplements to its loan documents that may be necessary or appropriate to achieve the purposes outlined in §1703.300.

(c) The Administrator will decide whether the borrower is eligible for the deferment and will notify the borrower of the decision.
deferment to the borrower will be re-captured by RUS. The borrower is responsible for ensuring that disbursements and expenditures of funds covering the investment in the rural development project are properly supported with certifications, invoices, contracts, bills of sale, cancelled checks, or any other forms of evidence determined appropriate by the Administrator and that such supporting material is available at the borrower’s premises for review by the RUS field accountant, the borrower’s certified public accountant, the Office of Inspector General, the General Accounting Office and any other accountant conducting an audit of the borrower’s financial statements for this rural development program.

§ 1703.313 Compliance with other regulations.

(a) Investments in a rural economic development project made by an electric borrower under this subpart are subject to the provisions of 7 CFR part 1717, Subpart N, Investments, Loans and Guarantees by Electric Borrowers.

(b) Investments in a rural economic development project made by a telephone borrower under this subpart are subject to the provisions of 7 CFR Part 1744, Post Loan Policies and Procedures Common to Guaranteed and Insured Loans.

PART 1710—GENERAL AND PRE-LOAN POLICIES AND PROCEDURES COMMON TO INSURED AND GUARANTEED ELECTRIC LOANS

Subpart A—General

Sec.
1710.1 General statement.
1710.2 Definitions and rules of construction.
1710.3 Form and bulletin revisions.
1710.4 Exception authority.
1710.5 Availability of forms.
1710.6 Applicability of certain provisions to completed loan applications.
1710.7 Exemptions of RUS operational controls under section 306E of the RE Act.
1710.8—1710.49 [Reserved]

Subpart B—Types of Loans and Loan Guarantees

1710.50 Insured loans.
1710.51 Loan guarantees.

1710.52—1710.99 [Reserved]

Subpart C—Loan Purposes and Basic Policies.

1710.100 General.
1710.101 Types of eligible borrowers.
1710.102 Borrower eligibility for different types of loans.
1710.103 Area coverage.
1710.104 Service to non-RE Act beneficiaries.
1710.105 State regulatory approvals.
1710.106 Uses of loan funds.
1710.107 Amount lent for acquisitions.
1710.108 Mergers and consolidations.
1710.109 Reimbursement of general funds and interim financing.
1710.110 Supplemental financing.
1710.111 Refinancing.
1710.112 Loan feasibility.
1710.113 Loan security.
1710.114 TIER, DSC, OTIER and ODSC requirements.
1710.115 Final maturity.
1710.116 [Reserved]
1710.117 Environmental considerations.
1710.118 [Reserved]
1710.119 Loan processing priorities.
1710.120 Construction standards and contracting.
1710.121 Insurance requirements.
1710.122 Equal opportunity and non-discrimination.
1710.123 Debarment and suspension.
1710.124 Uniform Relocation Act.
1710.125 Restrictions on lobbying.
1710.126 Federal debt delinquency.
1710.127 Drug free workplace.
1710.128—1710.149 [Reserved]

Subpart D—Basic Requirements for Loan Approval

1710.150 General.
1710.151 Required findings for all loans.
1710.152 Primary support documents.
1710.153 Additional requirements and procedures.
1710.154—1710.199 [Reserved]

Subpart E—Power Requirements Studies

1710.200 Purpose.
1710.201 Requirement to prepare a PRS—power supply borrowers.
1710.202 Requirement to prepare a PRS—distribution borrowers.
1710.203 Basic policies and requirements for a PRS.
1710.204 PRS work plan requirements.
1710.205 Basic criteria for RUS approval of a PRS.
1710.206 Waiver of borrower requirements.

§ 1710.2

Definitions and rules of construction.

(a) Definitions. For the purpose of this part, the following terms shall have the following meanings:

Administrator means the Administrator of RUS or his or her designee.
APRR means Average Adjusted Plant Revenue Ratio calculated as a simple average of the adjusted plant revenue ratios for 1978, 1979 and 1980 as follows:

\[
APRR = \frac{A + B}{C - D}
\]

where:

- A = Distribution (plant), which equals Part E, Line 14(e) of RUS Form 7;
- B = General Plant, which equals Part E, Line 24(e) of RUS Form 7;
- C = Operating Revenue and Patronage Capital, which equals Part A, Line 1 of RUS Form 7; and
- D = Cost of Power, which equals the sum of Part A, Lines 2, 3, and 4 of RUS Form 7.

Area Coverage means the provision of adequate electric service to the widest practical number of rural users in the borrower's service area during the life of the loan.

Borrower means any organization that has an outstanding loan made or guaranteed by RUS for rural electrification, or that is seeking such financing.

Bulk Transmission Facilities means the transmission facilities connecting power supply facilities to the subtransmission facilities, including both the high and low voltage sides of the transformer used to connect to the subtransmission facilities, as well as related supervisory control and data acquisition systems.

Call provision has the same meaning as "prepayment option".

Consolidation means the combination of 2 or more borrower or nonborrower organizations, pursuant to state law, into a new successor organization that takes over the assets and assumes the liabilities of those organizations.

Consumer means a retail customer of electricity, as reported on RUS Form 7, Part R, Lines 1-7.

Demand side management (DSM) means the deliberate planning and/or implementation of activities to influence consumer use of electricity provided by a distribution borrower to produce beneficial modifications to the system load profile. Beneficial modifications to the system load profile ordinarily improve load factor or otherwise help in utilizing electric system resources to best advantage consistent with acceptable standards of service and lowest system cost. Load profile modifications are characterized as peak clipping, valley filling, load shifting, strategic conservation, strategic load growth, and flexible load profile. (See, for example, publications of the Electric Power Research Institute (EPRI), 3412 Hillview Avenue, Palo Alto, CA 94304, especially "Demand-Side Management Glossary", EPRI TR-101158, Project 1940-25, Final Report, October 1992.) DSM includes energy conservation programs. It does not include sources of electrical energy such as renewable energy systems, fuel cells, or traditionally fueled generation, such as fossil or nuclear fueled generators.

Distribution Borrower means a borrower that sells or intends to sell electric power and energy at retail in rural areas.

Distribution Facilities means all electrical lines and related facilities beginning at the consumer's meter base, and continuing back to and including the distribution substation.

DSC means Debt Service Coverage of the borrower calculated as:

\[
DSC = \frac{A + B + C}{D}
\]

Where:

- All amounts are for the same calendar year and are based on the RUS system of accounts and RUS Forms 7 and 12. References to line numbers in the RUS Forms 7 and 12 refer to the June 1994 version of RUS Form 7 and the December 1993 version of RUS Form 12, and will apply to corresponding information in future versions of the forms;
- A = Depreciation and Amortization Expense of the borrower, which equals Part A, Line 12 of RUS Form 7 (distribution borrowers) or Section A, Line 20 of RUS Form 12a (power supply borrowers);
- B = Interest expense on total long-term debt of the borrower, which equals Part A, Line 15 of RUS Form 7 or Section A, Line 22 of RUS Form 12a, except that interest expense shall be increased by ½ of the amount, if any, by which restricted rentals of the borrower (Part M, Line 3 of RUS Form 7 or Section K, Line 4 of RUS Form 12) exceed 2 percent of the borrower's equity (RUS Form 7, Part C, Line 36 [Total Margins & Equities] less Line 26 [Regulatory Assets] or RUS Form 12a, Section B, Line 36 [Total Margins & Equities] less Line 28 [Regulatory Assets]);
- C = Patronage Capital or Margins of the borrower, which equals Part A, Line 28 of RUS...
§ 1710.2

Form 7 or Section A, Line 35 of RUS Form 12a; and
D=Debt Service Billed (RUS + other), which equals the sum of all payments of principal and interest required to be made on account of total long-term debt of the borrower during the calendar year, plus ¾ of the amount, if any, by which restricted rentals of the borrower (Part M, Line 3 of RUS Form 7 or Section K, Line 4 of RUS Form 12h) exceed 2 percent of the borrower’s equity (RUS Form 7, Part C, Line 26 [Total Margins & Equities] or RUS Form 12a, Section B, Line 38 [Total Margins & Equities] less Line 26 [Regulatory Assets]);

DSM activities means activities of the type referred to in §1710.354(f).

DSM plan means a plan that describes the implementation at the distribution level of the DSM activities identified in the integrated resource plan as having positive net benefits. See §1710.357.

Electric system means all of the borrower’s interests in all electric production, transmission, distribution, conservation, load management, general plant and other related facilities, equipment or property and in any mine, well, pipeline, plant, structure or other facility for the development, production, manufacture, storage, fabrication or processing of fossil, nuclear, or other fuel or in any facility or rights with respect to the supply of water, in each case for use, in whole or in major part, in any of the borrower’s generating plants, including any interest or participation of the borrower in any such facilities or any rights to the output or capacity thereof, together with all lands, easements, rights-of-way, other works, property, structures, contract rights and other tangible and intangible assets of the borrower in each case used or useful in such electric system.

Equity means total margins and equities, which equals Part C, Line 33 of RUS Form 7 (distribution borrowers) or Section B, Line 34 of RUS Form 12a (power supply borrowers).

Fund advance period means the period of time during which the Government may advance loan funds to the borrower. See 7 CFR 1714.56.

Generation Facilities means the generating plant and related facilities, including the building containing the plant, all fuel handling facilities, and the stepup substation used to convert the generator voltage to transmission voltage, as well as related energy management (dispatching) systems.

Hardship rate loan means a loan made at the 5 percent hardship rate pursuant to 7 CFR 1714.8.

Insured Loan means a loan made pursuant to Section 305 of the RE Act, and may include a direct loan made under Section 4 of the RE Act.

Integrated Resources Plan (IRP) means a plan resulting from the planning and selection process for new energy resources that evaluates the benefits and costs of the full range of alternatives, including new generating capacity, power purchases, DSM programs, system operating efficiency, and renewable energy systems.

Interest rate cap means a maximum interest rate of 7 percent applicable to certain municipal rate loans as set forth in §1710.7.

Interest rate term means a period of time selected by the borrower for the purpose of determining the interest rate on an advance of funds. See 7 CFR 1714.6.

Loan means any loan made or guaranteed by RUS.

Loan Contract means the agreement, as amended, supplemented, or restated from time to time, between a borrower and RUS providing for loans made or guaranteed pursuant to the RE Act.

Loan Guarantee means a loan guarantee made by RUS pursuant to the RE Act.

Loan period means the period of time during which the facilities included in a loan application will be constructed. It commences with the date shown on page 1, in the block headed “Cost Estimates as of,” of RUS Form 740c, Cost
Estimates and Loan Budget for Electric Borrowers, which is the same as the date on the Financial and Statistical Report submitted with the loan application. The loan period may be up to 4 years for distribution borrowers and, except in the case of a loan for new generating and associated transmission facilities, up to 4 years for the transmission facilities and improvements or replacements of generation facilities for power supply borrowers. The loan period for new generating facilities is determined on a case by case basis.

Merger means the combining, pursuant to state law, of borrower or non-borrower organizations into an existing survivor organization that takes over the assets and assumes the liabilities of the merged organizations.

Mortgage means any and all instruments creating a lien on or security interest in the borrower’s assets in connection with loans or guarantees under the RE Act.

Municipal rate loan means a loan made at a municipal interest rate pursuant to 7 CFR 1714.5.

ODSC means Operating Debt Service Coverage of the electric system calculated as:

\[ \text{ODSC} = \frac{A + B + C}{D} \]

Where:

- All amounts are for the same calendar year and are based on the RUS system of accounts and RUS Form 7. References to line numbers in the RUS Form 7 refer to the June 1994 version of the form, and will apply to corresponding information in future versions of the form;
- \( A \) = Depreciation and Amortization Expense of the electric system, which usually equals Part A, Line 12 of RUS Form 7;
- \( B \) = Interest expense on total long-term debt of the electric system, which usually equals Part A, Line 15 of RUS Form 7, except that such interest expense shall be increased by \( \frac{1}{3} \) of the amount, if any, by which restricted rentals of the Electric System (usually Part M, Line 3 of RUS Form 7) exceed 2 percent of the borrower’s equity (RUS Form 7, Part C, Line 36 [Total Margins & Equities] less Line 26 [Regulatory Assets]);
- \( C \) = Patronage Capital & Operating Margins of the electric system, which usually equals Part A, Line 20 of RUS Form 7, plus cash received from the retirement of patronage capital by suppliers of electric power and by lenders for credit extended for the Electric System;
- \( D \) = Debt Service Billed (RUS + other), which equals the sum of all payments of principal and interest required to be made on account of total long-term debt of the electric system during the calendar year, plus \( \frac{1}{3} \) of the amount, if any, by which restricted rentals of the Electric System (usually Part M, Line 3 of RUS Form 7) exceed 2 percent of the borrower’s equity (RUS Form 7, Part C, Line 36 [Total Margins & Equities] less Line 26 [Regulatory Assets]).

Off-grid renewable energy system means an energy source which is not electrically attached to the grid. Off-grid systems are operated as an island and will have no direct impact on a utility system’s physical operations. An off-grid system need not meet electric utility power quality standards.

On-grid renewable energy system means an energy source electrically attached to an existing grid. It can be attached on either side of a consumer’s meter. On-grid systems are operated as part of the overall utility system and have a direct impact on a utility system’s operations. An on-grid system must meet electric utility power quality and safety standards.

Ordinary Replacement means replacing one or more units of plant, called “retirement units”, with similar units when made necessary by normal wear and tear, damage beyond repair, or obsolescence of the facilities.

OTIER means Operating Times Interest Earned Ratio of the electric system calculated as:

\[ \text{OTIER} = \frac{A + B}{A} \]

Where:

- All amounts are for the same calendar year and are based on the RUS system of accounts and RUS Form 7. References to line numbers in the RUS Form 7 refer to the June 1994 version of the form, and will apply to corresponding information in future versions of the form;
- \( A \) = Interest expense on total long-term debt of the electric system, which usually equals Part A, Line 15 of RUS Form 7, except that such interest expense shall be increased by \( \frac{1}{3} \) of the amount, if any, by which restricted rentals of the Electric System (usually Part M, Line 3 of RUS Form 7) exceed 2 percent of the borrower’s equity (RUS Form 7, Part C, Line 36 [Total Margins & Equities] less Line 26 [Regulatory Assets]); and
§ 1710.2

Patronage Capital & Operating Margins of the electric system, which usually equals Part A, Line 20 of RUS Form 7, plus cash received from the retirement of patronage capital by suppliers of electric power and by lenders for credit extended for the Electric System.

Power Requirements Study (PRS) means the thorough study of a borrower's electric loads and the factors that affect those loads in order to determine, as accurately as practicable, the borrower's future requirements for energy and capacity.

Power Supply Borrower means a borrower that sells or intends to sell electric power at wholesale to distribution or power supply borrowers pursuant to RUS wholesale power contracts.

Prepayment option means a provision included in the loan documents to allow the borrower to prepay all or a portion of an advance on a municipal rate loan on a date other than a rollover maturity date. See 7 CFR 1714.9.

PRR means Plant Revenue Ratio calculated as:

\[ \text{PRR} = \frac{A}{B - C} \]

where:

- A = Total Utility Plant, which equals Part C, Line 3 of RUS Form 7;
- B = Operating Revenue and Patronage Capital, which equals Part A, Line 1 of RUS Form 7; and
- C = Cost of Power, which equals the sum of Part A, Lines 2, 3, and 4 of RUS Form 7.

PRS Work Plan means the plan that sets forth the resources, methods, schedules, and milestones to be used in the preparation and maintenance of a power requirements study.

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

RE Act beneficiary means a person, business, or other entity that is located in a rural area.

REA means the Rural Electrification Administration, formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs. Renewable energy system means a source of energy (kWh) used to meet borrower electric load that is fueled by any of the following technologies: Hydropower, geothermal, biomass, municipal waste, solar thermal, photovoltaic, wind, fuel cells not fueled by fossil fuels. See, for example, “Renewable Resources in U.S. Electricity Supply,” February 1993, Publication number DOE/EIA 0561, published by the Department of Energy, Energy Information Administration, Forrestal Building, EI–231, Washington, DC 20585.

Retirement Unit means a substantial unit of property, which when retired, with or without being replaced, is accounted for by removing its book cost from the plant account.

Rollover maturity date means the last day of an interest rate term.

Rural area means any area of the United States, its territories and insular possessions (including any area within the Federated States of Micronesia, the Marshall Islands, and the Republic of Palau) not included within the boundaries of any urban area, as defined by the Bureau of the Census. For purposes of the “rural area” definition, the character of an area is determined at the time of the initial loan to furnish or improve service in the area.

(i) For initial RUS loans made prior to November 1, 1993, the RE Act defined “rural area” to mean any area of the United States not included within the boundaries of any city, village, or borough having a population exceeding 1500. An area determined to be a “rural area” for the purposes of an initial loan made prior to November 1, 1993, shall continue to be considered a “rural area.”

(ii) For initial RUS loans made on or after November 1, 1993, this definition shall apply. In determining the character of the area, RUS will rely on the Bureau of the Census designation.

Subtransmission Facilities means the transmission facilities that connect...
the high voltage side of the distribution substation to the low voltage side of the bulk transmission or generating facilities, as well as related supervisory control and data acquisition facilities.

System Improvement means the change or addition to electric plant facilities to improve the quality of electric service or to increase the quantity of electric power available to RE Act beneficiaries.

TIER means Times Interest Earned Ratio of the borrower calculated as:

\[
\text{TIER} = \frac{A + B}{A}
\]

Where:

All amounts are for the same calendar year and are based on the RUS system of accounts and RUS Forms 7 and 12. References to line numbers in the RUS Forms 7 and 12 refer to the June 1994 version of RUS Form 7 and the December 1993 version of RUS Form 12, and will apply to corresponding information in future versions of the forms.

A = Interest expense on total long-term debt of the borrower, which equals Part A, Line 15 of RUS Form 7 or Section A, Line 22 of RUS Form 12a, except that interest expense shall be increased by 1% of the amount, if any, by which restricted rentals of the borrower (Part M, Line 3 of RUS Form 7 or Section K, Line 4 of RUS Form 12a) exceed 2 percent of the borrower's equity (RUS Form 7, Part C, Line 36 [Total Margins & Equities] less Line 26 [Regulatory Assets] or RUS Form 12a, Section B, Line 36 [Total Margins & Equities] less Line 28 [Regulatory Assets]); and

B = Patronage Capital or Margins of the borrower, which equals Part A, Line 28 of RUS Form 7 or Section A, Line 35 of RUS Form 12a.

Total Assets means Part C, Line 26 of RUS Form 7 (distribution borrowers) or Section B, Line 27 of RUS Form 12a (power supply borrowers).

Total Utility Plant means Part C, Line 3 of RUS Form 7 (distribution borrowers) or Section B, Line 27 of RUS Form 12a (power supply borrowers).

Transmission Facilities means all electrical lines and related facilities, including certain substations, used to connect the distribution facilities to generation facilities. They include bulk transmission and subtransmission facilities.

Urban area is defined by the Bureau of the Census as an area comprising all territory, population, and housing units in urbanized areas and in places of 2500 or more persons outside urbanized areas. More specifically, “urban” consists of territory, persons, and housing units in:

(i) Places of 2500 or more persons incorporated as cities, villages, boroughs (except in Alaska and New York), and towns (except in the six New England States, New York, and Wisconsin), but excluding the rural portions of “extended cities.”

(ii) Census designated places of 2500 or more persons.

(iii) Other territory, incorporated or unincorporated, included in urbanized areas.

Urbanized area means an urbanized area as defined by the Bureau of the Census in notices published periodically in the Federal Register. Generally an urbanized area is characterized as an area that comprises a place and the adjacent densely settled territory that together have a minimum population of 50,000 people.

(b) Rules of Construction. Unless the context otherwise indicates, “includes” and “including” are not limiting, and “or” is not exclusive. The terms defined in paragraph (a) of this part include the plural as well as the singular, and the singular as well as the plural.

§ 1710.3 Form and bulletin revisions.

References in this part to RUS or REA forms or line numbers in RUS or REA forms are based on RUS or REA Form 7 and Form 12 dated December 1992, unless otherwise indicated. These references will apply to corresponding information in future versions of the forms. The terms “RUS form”, “RUS standard form”, “RUS specification”, and “RUS bulletin” have the same meanings as the terms “REA form”, “REA standard form”, “REA specification”, and “REA bulletin”, respectively, unless otherwise indicated.

[59 FR 66440, Dec. 27, 1994]

§ 1710.4 Exception authority.

Consistent with the RE Act and other applicable laws, the Administrator
§ 1710.5 Availability of forms.

Information about the availability of RUS forms and publications cited in this part is available from Administrative Services Division, Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250-1500. These RUS forms and publications may be reproduced.

§ 1710.6 Applicability of certain provisions to completed loan applications.

(a) Certain new or revised policies and requirements set forth in this part, which are listed in this paragraph, shall not apply to a pending loan application that has been determined by RUS to be complete as of January 9, 1992, the date of publication of such policies and requirements in the Federal Register. This exception does not apply to loan applications received after said date, nor to incomplete applications pending as of said date. This exception applies only to the following provisions:

(1) Paragraph 1710.115(b)—with respect to limiting loan maturities to the expected useful life of the facilities financed;

(2) Section 1710.116—with respect to the requirement to develop and follow an equity development plan;

(3) Paragraph 1710.151(f)—with respect to the borrower providing satisfactory evidence that a state regulatory authority will allow the facilities to be included in the rate base or otherwise allow sufficient revenues to repay the loan;

(4) Paragraphs 1710.250(b), 1710.251(a), and 1710.252(a)—with respect to the requirement that improvements, replacements, and retirements of generation plant be included in a Construction Work Plan; and

(5) Paragraph 1710.300(d)(5)—with respect to the requirement that a borrower's financial forecast include a sensitivity analysis of a reasonable range of assumptions for each of the major variables in the forecast.

(b) Certain provisions of this part apply only to loans made on or after February 10, 1992. These provisions are identified in the individual sections of this part.

§ 1710.7 Exemptions of RUS operational controls under section 306E of the RE Act.

(a) General policy. (1) Section 306E of the RE Act directs the Administrator to issue interim final regulations to minimize approval rights, requirements, restrictions, and prohibitions imposed on the operations of electric borrowers whose net worth exceeds 110 percent of the outstanding loans made or guaranteed to the borrower by RUS. The section also directs the Administrator, when requested by a private lender providing financing for capital investments by such borrowers, to offer, without delay, to share the government's lien on the borrowers' systems or subordinate the government's lien on the property financed by the private lender.

(2) In issuing the regulations, the Administrator is authorized to establish requirements, guided by the practices of private lenders with respect to similar credit risks, to ensure that the security, including the assurance of repayment, for loans made or guaranteed by RUS will remain reasonably adequate. If the regulations are not issued within 180 days of enactment of section 306E, the Administrator may not, until the regulations are issued, require prior approval of, or establish any requirement, restriction, or prohibition, with respect to the operations of any electric borrower that meets the 110 percent ratio.

(3) Nothing in section 306E limits the authority of the Administrator to establish terms and conditions on the use of funds from loans made or guaranteed by RUS, to establish loan feasibility criteria and other requirements for the approval of RUS loans or loan guarantees, such as those set forth in this part, or to take any other action specifically authorized by law.
§ 1710.7

(4) This section addresses the application of section 306E of the RE Act to RUS operational controls and other requirements that apply in general to RUS borrowers. The application of section 306E to lien accommodations and subordinations is set forth in 7 CFR 1717.860 and 1717.904.

(5) The exemptions granted by this section, 7 CFR 1717.860, and 7 CFR 1717.904 apply only to RUS controls and approval rights. They do not affect the controls and approval rights of other co-mortgagees under the RUS mortgage.

(6) For purposes of this section, the terms “default,” “financed or funded by RUS,” “interchange agreement,” “interconnection agreement,” “loan documents,” “pooling agreement,” “power supply contract,” and “wheeling agreement” have the meanings as set forth in 7 CFR 1717.602.

(b) Determination of ratio. The following principles and procedures will apply to the calculation of net worth as a ratio, expressed as a percent, to the outstanding balance of all loans made or guaranteed to the borrower by RUS, hereinafter called the borrower’s “net worth to RUS debt ratio”, or simply “the ratio”:

(1) For purposes of determining whether a borrower is exempt from approvals, requirements, restrictions, or prohibitions imposed by RUS with respect to borrower operations, i.e., “operational controls,” the ratio normally will be based on data as of December 31. Net worth will be based on the year-end financial and statistical reports submitted by borrowers to RUS, and outstanding loans made or guaranteed by RUS will be based on RUS’s records. The financial and statistical reports (Form 7 for distribution borrowers and Form 12a for power supply borrowers) are subject to RUS review and revision, and they must comply with RUS’s system of accounts and accounting principles set forth in 7 CFR part 1767. Since sinking fund depreciation is not approved under 7 CFR part 1767, net worth for borrowers using sinking fund depreciation will be calculated as if the borrower had been using straight line depreciation;

(2) Net worth will be calculated by taking total margins and equities (from Part C of RUS Form 7 for distribution borrowers, or Section B of RUS Form 12a for power supply borrowers) and subtracting assets properly recordable in account 182.2, Uncovered Plant and Regulatory Study Costs, and account 182.3, Other Regulatory Assets, as defined in 7 CFR part 1767, and

(3) By no later than July 1 of each year, RUS will notify each borrower in writing of its exemption status. If the borrower’s net worth to RUS debt ratio exceeds 110 percent based on the most recent year-end data, the borrower will be exempt from the operational controls exempted under paragraph (c) of this section until subsequently notified in writing by RUS that it is no longer exempt.

(c) Borrower operations exempted from RUS controls. Borrowers who are notified by RUS in writing that their net worth to RUS debt ratio exceeds 110 percent are exempted from the operational controls of the RUS mortgage and loan contract listed in this paragraph. These controls, which are implemented through RUS regulations and other documents, are as follows:

(1) RUS approval of extensions and additions. RUS approval of extensions and additions to borrowers’ electric systems, except for the following:

(i) Extensions and additions financed by RUS;

(ii) Construction, procurement, or leasing of generating facilities, regardless of the source of funding, if the combined capacity of the facilities to be built, procured, or leased, including any future facilities included in the planned project, will exceed 25 megawatts in the case of power supply borrowers, or the lesser of 5 megawatts or 30 percent of the borrower’s equity in the case of distribution borrowers;

(iii) Acquisition or leasing of existing electric facilities or systems in service, regardless of the source of funding, whose purchase price, or capitalized value in the case of a lease, exceeds 10 percent of the borrower’s net utility plant; and

(iv) Construction, procurement, or leasing of electric facilities, regardless of the source of funding, to serve a customer whose annual kWh purchases or maximum annual kW demand in the
foreseeable future is projected to exceed 25 percent of the borrower’s total kWh sales or maximum kW demand in the year immediately preceding the acquisition or start of construction;

(2) Long-range engineering plans and construction work plans. RUS approval of long-range engineering plans and CWPs if the borrower does not intend to seek RUS financing for any of the facilities, equipment or other purposes included in those plans. However, if requested by RUS, a borrower must provide an informational copy of such plans to RUS;

(3) Plans and specifications. RUS approval of plans and specifications for construction not financed by RUS;

(4) Standard forms of construction contracts, and engineering and architectural services contracts. RUS requirements to use standard forms of contracts for construction, procurement, engineering services, and architectural services, if the construction, procurement or services are not financed by RUS. To be eligible for this waiver the contracts used must not contain any provisions that prohibit or restrict the assignment of the contracts to the government upon the exercise by RUS of its remedies under security instruments securing loans made or guaranteed by RUS;

(5) Contract bidding requirements. RUS requirements regarding the competitive bidding of construction contracts, if the construction is not financed by RUS.

(6) RUS approval of contracts. (i) Construction contracts and architectural and engineering contracts. RUS approval of contracts for construction and procurement and for architectural and engineering services, if such construction, procurement or services are not financed by RUS.

(ii) Large retail power contracts. RUS approval of contracts to sell electric power to retail customers except when the contract is for longer than 2 years and the kWh sales or kW demand for any year covered by the contract exceeds 25 percent of the borrower’s total kWh sales or maximum kW demand for the year immediately preceding execution of the contract. This exemption applies regardless of the source of funding of any plant extensions, additions or improvements that may be involved in connection with the contract.

(iii) Power supply arrangements. (A) RUS approval of power supply contracts (including but not limited to economy energy sales and emergency power and energy sales), interconnection agreements, interchange agreements, pooling agreements, and any other similar power supply arrangements subject to approval by RUS, if they have a term of 2 years or less. Amendments to said power supply arrangements are also exempted from RUS approval provided that the amendment does not extend the term of the arrangement for more than 2 years beyond the date of the amendment.

(B) Any amendment to a schedule or exhibit contained in any power supply arrangement subject to RUS approval that merely has the effect of either altering a list of interconnection or delivery points or changing the value of a variable term (but not the formula itself) contained in a formulary rate or charge.

(C) The exemptions under this paragraph (c)(6)(iii) apply regardless of whether the borrower is a seller or purchaser of the services furnished by the contracts or arrangements, and regardless of whether or not a Federal power marketing agency is a party to any of them.

(iv) System management and maintenance contracts. RUS approval of contracts for the management and operation of a borrower’s electric system or for the maintenance of the electric system, if such contracts do not cover all or substantially all of the electric system.

(v) Other contracts. [Reserved];

(7) RUS approval of general manager. RUS approval of the selection of a borrower’s manager and employment contract, provided that the borrower is not in default under its loan documents or any other agreement with RUS. Nothing herein shall limit the right of RUS under the loan documents to request termination of the employment of a manager in the event of a default by the borrower;

(8) Board of directors. RUS approval of compensation of a borrower’s board of directors;
(9) Certain expenditures. (i) RUS approval of expenditures for legal, accounting, and supervisory services by a borrower. However, while expenditures for accounting do not require RUS approval, the selection of a certified public accountant by the borrower to prepare audited reports required by RUS remains subject to RUS approval.

(ii) RUS approval of expenditures for engineering services by a borrower, if such engineering services will not be financed by RUS;

(10) Banks. RUS approval of banks or other depositories used by a borrower. However, without the prior written approval of RUS, a borrower shall not deposit funds from loans made or guaranteed by RUS in any bank or other depository that is not insured by the Federal Deposit Insurance Corporation or other Federal agency acceptable to RUS, or in any account not so insured.

(11) Certain equipment. RUS approval of the purchase of data processing equipment and system control equipment by a borrower, if the equipment is not financed by RUS;

(12) Notification of rate changes. Requirement that distribution borrowers notify RUS in writing of proposed changes in electric rates 90 days prior to the effective date of such rates. Instead, the required notification period shall be 30 days, and such notification shall be required only if requested by RUS;

(13) Consolidations and mergers. RUS approval of mergers and consolidations, and conveyances or transfers of the mortgaged property substantially as an entirety, if the following conditions are met:

(i) Such consolidation, merger, conveyance or transfer shall be on such terms as shall fully preserve the lien and security of the mortgage and the rights and powers of the mortgagees;

(ii) The entity formed by such consolidation or with which the borrower is merged or the corporation which acquires by conveyance or transfer the mortgaged property substantially as an entirety shall execute and deliver to the mortgagees a mortgage supplemental in recordable form and containing an assumption by such successor entity of the due and punctual payment of the principal of and interest on all of the outstanding notes and the performance and observance of every covenant and condition of the mortgage;

(iii) Immediately after giving effect to such transaction, no default under the mortgage shall have occurred and be continuing;

(iv) The borrower shall have delivered to the mortgagees a certificate of its general manager or other officer, in form and substance satisfactory to each of the mortgagees, which shall state that such consolidation, merger, conveyance or transfer and such supplemental mortgage comply with this section and that all conditions precedent herein provided for relating to such transaction have been complied with;

(v) The borrower shall have delivered to the mortgagees an opinion of counsel in form and substance satisfactory to each of the mortgagees; and

(vi) The entity formed by such consolidation or with which the borrower is merged or the corporation which acquires by conveyance or transfer the mortgaged property substantially as an entirety shall be an entity:

(A) Having equity equal to at least 27% of its total assets on a pro forma basis after giving effect to such transaction;

(B) Having a pro forma TIER of not less than 1.5 and a pro forma DSC of not less than 1.25 for each of the two preceding calendar years; and

(C) Having net utility plant equal to or greater than 1.0 times its total long-term debt on a pro forma basis;

(14) Sale, lease, or transfer of capital assets. RUS approval for a distribution borrower to sell, lease, or transfer capital assets, if the following conditions are met:

(i) The borrower is not in default;

(ii) In the most recent year for which data are available, the borrower achieved a TIER of at least 1.5, DSC of at least 1.25, OTIER of at least 1.1, and ODSC of at least 1.1, in each case based on the average or the best 2 out of the 3 most recent years;

(iii) The sale, lease, or transfer of assets will not reduce the borrower’s existing or future requirements for energy or capacity being furnished to the borrower under any wholesale power
contract which has been pledged as security to the government;
(iv) Fair market value is obtained for the assets;
(v) The aggregate value of assets sold, leased, or transferred in any 12-month period is less than 10 percent of the borrower’s net utility plant prior to the transaction;
(vi) The proceeds of such sale, lease, or transfer, less ordinary and reasonable expenses incident to such transaction, are immediately:
(A) Applied as a prepayment of all notes secured under the mortgage equally and ratably;
(B) In the case of dispositions of equipment, materials or scrap, applied to the purchase of other property useful in the borrower’s utility business; or
(C) Applied to the acquisition of construction of utility plant; and
(vii) If the borrower has an RUS-approved wholesale power contract with a power supply borrower (seller), the circumstances of the sale, lease or transfer of capital assets conform with the conditions in such contract under which the seller may not withhold its consent to the sale, lease or transfer;

(15) Limitations on distributions. RUS approval for a borrower to declare or pay dividends, pay or determine to pay patronage refunds, retire patronage capital, or make any other cash distributions, if the following conditions are met:
(i) After giving effect to the distribution, the borrower’s equity will be greater than or equal to 30 percent of its total assets;
(ii) The borrower is current on all payments due on all notes secured under the mortgage;
(iii) The borrower is not otherwise in default under its loan documents; and
(iv) After giving effect to the distribution, the borrower’s current and accrued assets will be not less than its current and accrued liabilities.
(d) RUS requirements and operational controls not exempted. All requirements and operational controls contained in the RUS mortgage and loan contract, or otherwise imposed on borrowers pursuant to statute or regulation, that are not specifically listed in paragraph (c) of this section are not exempted and shall continue to apply according to their terms. Examples of such requirements and controls not exempted are listed in this paragraph for the convenience of the public. This list is not exhaustive, and the absence of a requirement or control from this list in no way means that the requirement or control has been exempted:
(1) Requirements and operational controls contained in the RUS mortgage or loan contract that are necessary to ensure that the security for loans made or guaranteed by RUS is reasonably adequate and that the loans will be repaid, or to accomplish other fundamental purposes of the RE Act. Some of these also represent terms and conditions with respect to the use by borrowers of the proceeds of loans made or guaranteed by RUS. Together, these controls include, but are not limited to, the following:
(i) Area coverage requirements set forth in the loan contract and in §1710.103;
(ii) Requirement that certain borrowers maintain, on an ongoing basis, a power requirements study and a power requirements study work plan, as set forth in §§1710.201 and 1710.202;
(iii) Requirement that borrowers follow RUS construction standards and use RUS accepted materials, as set forth in §1710.41, §1710.45, and 7 CFR part 1728;
(iv) Requirement that borrowers maintain, on an ongoing basis, a long-range engineering plan and a construction work plan, as set forth in §1710.250(b);
(v) Requirement that borrowers set rates for electric service sufficient to maintain certain coverage ratios, as set forth in §1710.114;
(vi) Certain RUS approvals of retirements of capital credits in excess of amounts specifically authorized in the mortgage;
(vii) RUS approval of borrower investments, loans, guarantees, and other obligations under 7 CFR part 1717, subpart N;
(viii) RUS requirements on accounting, auditing, irregularities, financial reporting, and access to books and records;
§ 1710.100 General.

RUS makes loans and loan guarantees to finance the construction of electric distribution, transmission and generation facilities, including system improvements and replacements required to furnish and improve electric service in rural areas, and for demand side management, energy conservation

(a) Municipal rate loans. The standard interest rate on an insured loan made on or after November 1, 1993, is the municipal rate, which is the rate determined by the Administrator to be equal to the current market yield on outstanding municipal obligations with remaining periods to maturity, up to 35 years, similar to the interest rate term selected by the borrower. In certain cases, an interest rate cap of 7 percent may apply. The interest rate term and rollover maturity date for a municipal rate loan will be determined pursuant to 7 CFR part 1714, and the borrower may elect to include in the loan documents a prepayment option (call provision).

(b) Hardship rate loans. RUS makes hardship rate loans at the 5 percent hardship rate to qualified borrowers meeting the criteria set forth in 7 CFR 1714.8

§ 1710.51 Loan guarantees.

RUS provides financing through 100 percent loan guarantees made under sections 306 and 306A of the RE Act. RUS also provides 90 percent loan guarantees under section 311 of the RE Act to enable borrowers to secure financing from certain private lenders. The loan guarantees are made for a term of up to 35 years, and the interest rate is established at a rate agreed to by the borrower and the lender, with RUS concurrence. The guarantee applies to the repayment of both principal and interest.

§§ 1710.52—1710.99 [Reserved]
§ 1710.101 Types of eligible borrowers.

(a) RUS makes loans to corporations, states, territories, and subdivisions and agencies thereof; municipalities; people's utility districts; and cooperative, nonprofit, limited-dividend, or mutual associations that provide or propose to provide:

(1) The retail electric service needs of rural areas, or

(2) The power supply needs of distribution borrowers under the terms of power supply arrangements satisfactory to RUS.

(b) In making loans, RUS gives preference to states, territories, and subdivisions and agencies thereof; municipalities; people's utility districts; and cooperative, nonprofit, or limited-dividend associations. RUS does not make loans to individual consumers.

(c) For the purpose of determining eligibility of a distribution borrower not in default on the repayment of a loan made or guaranteed under the RE Act for a loan, loan guarantee, or lien accommodation, a default by a borrower from which a distribution borrower purchases wholesale power shall not:

(1) Be considered a default by the distribution borrower;

(2) Reduce the eligibility of the distribution borrower for assistance under the RE Act; or

(3) Be the cause, directly or indirectly, of imposing any requirement or restriction on the borrower as a condition of the assistance, except such requirements or restrictions as are necessary to implement a debt restructuring agreed on by the power supply borrower and RUS.

(d) For the purpose of determining the eligibility of a distribution borrower, RUS will consider whether the distribution borrower is current on its obligations to its wholesale power supplier under the RUS wholesale power contract.

(e) Nothing in paragraph (c) of this section relieves any distribution borrower that is a member of a power supply borrower in default on its obligations to RUS or operating under a debt restructuring agreement, of requirements set forth in RUS regulations, including, without limitation, §1710.112(b)(6), or of any terms and conditions that the Administrator may otherwise impose on any borrower as a condition of obtaining a loan or loan guarantee (including, in appropriate cases, member guarantees).

(f) Except as provided in paragraph (g) of this section, former borrowers that have paid off all outstanding loans may reapply for a loan to serve RE Act beneficiary loads accruing from the time the former borrower's complete loan application is received by RUS.

The determination of whether an area is rural will be based on the Census designation of the area at the time of the reapplication for a loan, if the area is not served by electric facilities financed by RUS. If the area is served by electric facilities financed by RUS, it will continue to be considered rural.

(g) Former borrowers that have prepaid all, or portions of outstanding insured and direct loans in accordance with RUS regulations must comply with the provisions of 7 CFR part 1786 before being considered eligible to borrow additional funds from RUS.

§ 1710.102 Borrower eligibility for different types of loans.

(a) Insured loans under section 305. Insured loans are normally reserved for the financing of distribution and subtransmission facilities of both distribution and power supply borrowers, including, under certain circumstances, the implementation of demand side management, energy conservation programs, and on grid and off grid renewable energy systems. In accordance
§ 1710.103 Area coverage.

(a) Borrowers shall make a diligent effort to extend electric service to all unserved persons within their service area who:

(1) Desire electric service; and

(2) Meet all reasonable requirements established by the borrower as a condition of service.

(b) If economically feasible and reasonable considering the cost of providing such service and/or the effects on all consumers' rates, such service shall be provided, to the maximum extent practicable, at the rates and minimum charges established in the borrower's rate schedules, without the payment by such persons, other than seasonal or temporary consumers, of a contribution in aid of construction. A seasonal consumer is one that demands electric service only during certain seasons of the year. A temporary consumer is a seasonal or year-round consumer that demands electric service over a period of less than five years.

(c) Borrowers may assess contributions in aid of construction provided such assessments are consistent with the policy set forth in this section.

[57 FR 1053, Jan. 9, 1992, as amended at 60 FR 67404, Dec. 29, 1995]

§ 1710.104 Service to non-RE Act beneficiaries.

(a) To the greatest extent practical, loans are limited to providing and improving electric facilities to serve consumers that are RE Act beneficiaries. When it is determined by the Administrator to be necessary in order to furnish or improve electric service in rural areas, loans may, under certain circumstances, be made to finance electric facilities to serve consumers that are not RE Act beneficiaries.

(b) Loan funds may be approved for facilities to serve non-RE Act beneficiaries only if:

(1) The primary purpose of the loan is to furnish or improve service for RE Act beneficiaries; and

(2) The use of loan funds to serve non-RE Act beneficiaries is necessary and incidental to the primary purpose of the loan.

§ 1710.105 State regulatory approvals.

(a) In States where a borrower is required to obtain approval of a project or its financing from a state regulatory authority, RUS may require that such approvals be obtained, if feasible for the borrower to do so, before the following types of loans are approved by RUS:

1. Loans requiring an Environmental Impact Statement;
2. Loans to finance generation and transmission facilities, when the loan request for such facilities is $25 million or more; and
3. Loans for the purpose of assisting borrowers to implement demand side management and energy conservation programs and on and off grid renewable energy systems.

(b) At minimum, in the case of all loans in states where state regulatory approval is required of the project or its financing, such state approvals will be required before loan funds are advanced.

(c) In cases where state regulatory authority approval has been obtained, but the borrower has failed to proceed with the project in a timely manner according to the schedule contained in the borrower’s project design manual, or if there are cost overruns or other developments that threaten loan feasibility or security, RUS may require the borrower to obtain a reaffirmation of the project and its financing from the state authority before any additional loan funds are advanced.

§ 1710.106 Uses of loan funds.

(a) Funds from loans made or guaranteed by RUS may be used to finance:

1. Distribution facilities. (i) The construction of new distribution facilities or systems and the cost of system improvements and removals, less salvage value, needed to meet load growth requirements or improve the quality of service.
   (ii) The purchase, rehabilitation and integration of existing distribution facilities and associated service territory when the acquisition is an incidental and necessary means of providing or improving service to persons in rural areas who are not receiving adequate central station service, and the borrower is unable to finance the acquisition from other sources. See § 1710.107.
2. Transmission and generation facilities. (i) The construction of new transmission and generation facilities or systems and the cost of system improvements and removals, less salvage value, needed to meet load growth and improve the quality of service.
   (ii) The purchase of an ownership interest in new or existing transmission or generation facilities to serve RE Act beneficiaries.
3. Ordinary plant replacements. The excess of the total cost of ordinary replacements over the original cost of the facilities being replaced, unless financing of the total cost is specifically authorized by the Administrator.
4. Warehouse and garage facilities. The purchase, remodeling, or construction of warehouse and garage facilities required for the operation of a borrower’s system. See paragraph (b) of this section.
5. Interest. The payment of interest on indebtedness incurred by a borrower to finance the construction of generation and transmission facilities during the period preceding the date such facilities are placed into service, if requested by the borrower and found necessary by RUS.
6. Certain costs incurred in demand side management, energy conservation programs and on and off grid renewable energy systems.

(b) In cases of financial hardship, as determined by the Administrator, loans may also be made to finance the following items:

1. The headquarters office and other headquarters facilities in addition to those cited in paragraph (a)(4) of this section;
2. General plant equipment, including furniture, office, transportation, data processing and other work equipment; and
3. Working capital required for the initial operation of a new system.

(c) RUS will not make loans to finance the following:

1. Electric facilities, equipment, appliances, or wiring located inside the
§ 1710.106

premises of the consumer, except qualifying items included in a loan for demand side management or energy resource conservation programs, or on or off grid renewable energy systems;

(2) Facilities to serve consumers who are not RE Act beneficiaries unless those facilities are necessary and incidental to providing or improving electric service in rural areas (see §1710.104);

(3) Any facilities or other purposes that a state regulatory authority having jurisdiction will not approve for inclusion in the borrower's rate base, or will not otherwise allow rates sufficient to repay with interest the debt incurred for the facilities or other purposes; and

(4) Any facilities or other specific purposes that were included in a loan made or guaranteed by RUS that the borrower has prepaid or that has been rescinded.

(d) A distribution borrower may request a loan period of up to 4 years. Except in the case of loans for new generating and associated transmission facilities, a power supply borrower may request a loan period of not more than 4 years for transmission and substation facilities and improvements or replacements of generation facilities. The loan period for new generating facilities is determined on a case by case basis. The loan period for DSM activities will be determined in accordance with §1710.355. The Administrator may approve a loan period shorter than the period requested by the borrower, if in the Administrator's sole discretion, a loan made for the longer period would fail to meet RUS requirements for loan feasibility and loan security set forth in §§1710.112 and 1710.113, respectively.

(e)(1) If, in the sole discretion of the Administrator, the amount authorized for lending for municipal rate loans, hardship rate loans, and loan guarantees in a fiscal year is substantially less than the total amount eligible for RUS financing, RUS may limit the size of all loans of that type approved during the fiscal year. Depending on the amount of the shortfall between the amount authorized for lending and the loan application inventory on hand for each type of loan, RUS may either reduce the amount on an equal proportion basis for all applicants for that type of loan based on the amount of funds for which the applicant is eligible, or may shorten the loan period for which funding will be approved to less than the maximum of 4 years. All applications for the same type of loan approved during a fiscal year will be treated in the same manner, except that RUS will not limit funding to any borrower requesting an RUS loan or loan guarantee of $1 million or less.

(2) If RUS limits the amount of loan funds approved for borrowers, the Administrator shall notify all electric borrowers early in the fiscal year of the manner in which funding will be limited. The portion of the loan application that is not funded during that fiscal year may, at the borrower's option, be treated as a second loan application received by RUS at a later date. This date will be determined by RUS in the same manner for all affected loans and will be based on the availability of loan funds. The second loan application shall be considered complete except that the borrower must submit a certification from a duly authorized corporate official stating that funds are still needed for loan purposes specified in the original application and must notify RUS of any changes in its circumstances that materially affects the information contained in the original loan application or the primary support documents. See 7 CFR 1710.401(f).

(f)(1) For borrowers having one or more loans approved on or after October 1, 1991, advances of funds will be made only for the primary budget purposes included in the loan as shown on RUS Form 740c as amended and approved by RUS, or on a construction work plan or a construction work plan amendment approved by RUS. Each advance will be charged to the oldest outstanding note(s) having unadvanced funds for the primary budget purpose for which the request for advances was made, regardless of whether such notes are associated with loans approved before or after October 1, 1991, unless any conditions on advances under any of these notes have not been met by the borrower.

(2) For borrowers whose most recent loan was approved before October 1,
§ 1710.107 Amount lent for acquisitions.

The maximum amount that will be lent for an acquisition is limited to the value of the property, as determined by RUS. If the acquisition price exceeds this amount, the borrower shall provide the remainder without RUS financial assistance.

§ 1710.108 Mergers and consolidations.

(a) RUS encourages its borrowers to consider merging or consolidating with another electric borrower when such action will contribute to greater operating efficiency and financial soundness.

(b) After a merger or consolidation, RUS will give priority consideration per §1710.119 to the processing of loans for the surviving system to finance the integration and rehabilitation of electric facilities, if necessary, and the improvement or extension of electric service in rural areas. Such priority consideration will also be given in the case of a borrower that has merged or consolidated with an electric system that has not previously received RUS financial assistance, if such system was serving primarily rural residents at the time of the merger or consolidation and such rural residents will continue to be served by the merged or consolidated system. RUS does not make loans for costs incurred in effectuating mergers or consolidations, such as legal expenses or feasibility study costs.

§ 1710.109 Reimbursement of general funds and interim financing.

(a) Borrowers may request that a loan include funds to reimburse general funds and/or replacement of interim financing used to finance equipment and facilities that were included in an RUS-approved construction work plan, work plan amendment or other RUS-approved plan, and for which loan funds have not been provided by RUS. Such reimbursement and/or replacement of interim financing may include the direct costs of procurement and construction, as well as the related cost of engineering, architectural, environmental and other studies and plans needed to support the project, when such cost is capitalized as part of the cost of the facilities.

(b) If procurement and/or construction of the equipment and facilities was completed prior to the current loan period, reimbursement, including replacement of interim financing, will be limited, except in cases of extreme financial hardship as determined by the Administrator, to the cost of procurement and construction completed during the period immediately preceding the current loan period, as specified in paragraph (c) of this section. As defined in §1710.2, the loan period begins on the date shown on page 1 of RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers.

(c)(1) The period immediately preceding the current loan period for which reimbursement and replacement of interim financing is authorized under paragraph (b) of this section is as follows:

(i) The number of months agreed to by RUS and the borrower for complete loan applications received by RUS before February 10, 1992;

(ii) 36 months for complete loan applications received from February 10, 1992 through February 10, 1993; or

(iii) 24 months for complete loan applications received after February 10, 1993.

(2) Policies for reimbursement of general funds and interim financing following certain mergers, consolidations, and transfers of systems substantially in their entirety are set forth in 7 CFR 1717.154.

(d) If the reimbursement of general funds and/or replacement of interim financing is for approved expenditures for equipment and facilities whose procurement and/or construction is completed during the current loan period, the time limits of paragraph (c) of this section do not apply.

§ 1710.110 Supplemental financing.

(a) Except in the case of financial hardship as determined by the Administrator, and following certain mergers, consolidations, and transfers of systems substantially in their entirety as set forth in 7 CFR 1717.154, applicants for a municipal rate loan will be required to obtain a portion of their loan funds from a supplemental source without an RUS guarantee, in the amounts set forth in paragraph (c) of this section. RUS will normally grant a lien accommodation to the supplemental lender. RUS does not require supplemental financing in conjunction with an RUS guaranteed loan. However, if a borrower elects to obtain supplemental financing in conjunction with a guaranteed loan, the granting of RUS’s loan guarantee may be conditioned on the borrower’s obtaining supplemental financing.

(b) The terms and conditions of supplemental financing and any security offered to the supplemental lender are subject to RUS approval. Generally, supplemental loans must have the same final maturity and be amortized in the same manner as RUS loans made concurrently. Borrowers may elect to repay the loans either in substantially equal periodic installments covering interest and principal, or in periodic installments that include interest and level amortization of principal.

(c) Supplemental financing required for municipal rate loans—(1) Distribution borrowers. (i) Distribution borrowers that had, as of December 31, 1980, an average consumer density of 2 or fewer consumers per mile or an average adjusted plant revenue ratio (APRR), as defined in §1710.2, of over 9.0 shall obtain supplemental financing equal to 10 percent of their loan request.

(ii) All other distribution borrowers must obtain supplemental financing according to their plant revenue ratio (PRR), as defined in §1710.2, based on the most recent year-end data available on the date of loan approval, as follows:

<table>
<thead>
<tr>
<th>PRR</th>
<th>Supplemental loan percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>9.00 and above</td>
<td>10</td>
</tr>
<tr>
<td>8.01–8.99</td>
<td>20</td>
</tr>
<tr>
<td>8.00 and below</td>
<td>30</td>
</tr>
</tbody>
</table>

(iii) If a distribution borrower enters into a merger, consolidation, or transfer of system substantially in its entirety, and the provisions of 7 CFR 1717.154(b) do not apply, required supplemental financing will be determined as follows for loans approved by RUS after December 19, 1996. If one of the merging parties met the criteria in paragraph (c)(1)(i) of this section prior to the effective date of the merger consolidation or transfer, the borrower will be required to obtain supplemental financing equal to 10 percent of any loan funds requested for facilities to serve consumers located in the territory formerly served by the “paragraph (c)(1)(i)” borrower. The required amount of supplemental financing for the rest of the loan will be determined according to the provisions of paragraph (c)(1)(ii) of this section.

(2) Power supply borrowers. The supplemental loan proportion required of a power supply borrower is based on the simple arithmetic mean of the supplemental loan proportions required of the borrower’s distribution members.

(3) Subsequent loans. (i) If more than 5 percent of an insured loan made prior to November 1, 1993, or of a municipal rate loan is terminated or rescinded, the amount of supplemental financing required in the borrower’s next loan after the rescission for which supplemental financing is required, pursuant to paragraph (a) of this section, will be adjusted to average the actual supplemental financing portion on the terminated or rescinded loan with the supplemental financing portion that would have been required on the new loan according to paragraphs (c)(1) and (2) of this section, in accordance with the formulas set forth in paragraphs (c)(3)(ii) and (iii) of this section.

(ii) If a borrower’s supplemental financing requirement as set forth in paragraphs (a), (c)(1), and (c)(2) of this section has not changed between the most recent loan and the loan being considered, then the amount of supplemental financing required for the new loan will be computed as follows:

Supplemental financing amount, new loan = [(A + B) × C – D]

where:
§ 1710.111 Refinancing.

(a) RUS makes loans or loan guarantees to refinance the outstanding indebtedness of borrowers in the following cases:

(1) Loans or loan guarantees to refinance long-term debt owed by borrowers to the Tennessee Valley Authority for credit extended under the terms of the Tennessee Valley Authority Act of 1933, as amended.

(2) Loan guarantees made in accordance with the provisions of section 306A of the RE Act to prepay a loan (or any loan advance thereunder) made by the Federal Financing Bank.

(b) In certain circumstances, RUS may make a loan to replace interim financing obtained for the construction of facilities (See §1710.109).

§ 1710.112 Loan feasibility.

(a) RUS will make a loan only if there is reasonable assurance that the loan, together with all outstanding loans and other obligations of the borrower, will be repaid in full as scheduled, in accordance with the mortgage, notes, and loan contracts. The borrower must provide evidence satisfactory to the Administrator that the loan will be repaid in full as scheduled, and that all other obligations of the borrower will be met.

(b) Based on evidence submitted by the borrower and other information, RUS will use the following criteria to evaluate loan feasibility:

(1) Projections of power requirements, rates, revenues, expenses, margins, and other factors for the present system and proposed additions are based on reasonable assumptions and adequate supporting data and analysis,
including analysis of a range of assumptions for the significant variables, when required by §1710.300(d)(5).

(2) Projected revenues from the rates proposed by the borrower are adequate to meet the required TIER and DSC ratios based on the borrower’s total costs, including the projected maximum debt service cost of the new loan.

(3) The economics of the borrower’s operations and service area are such that consumers can reasonably be expected to pay the proposed rates required to cover all expenses and meet RUS TIER and DSC requirements, and the borrower can reasonably compete with other utilities and other energy sources to prevent substantial load loss while providing satisfactory service to its consumers.

(4) Risks of possible loss of substantial loads from large consumers or from load concentrations in particular industries will not substantially impair loan feasibility.

(5) Risks of loss of portions of the borrower’s service territory from annexation or other causes will not substantially impair loan feasibility. If there appears to be a substantial risk, RUS may require additional information from the borrower, such as a summary and analysis of the risk by the borrower; state, county or local planning reports having information on projected growth or expansion plans of local communities; annexation plans of the municipalities in question; and any other relevant information.

(6) In states where rates or investment decisions are subject to approval by state regulatory authorities, there is reasonable expectation that such approvals will be forthcoming to enable repayment of the loan in full according to its terms.

(7) The experience and performance of the system’s management is acceptable.

(8) In the case of joint ventures, the borrower has sufficient management control or other contractual safeguards with respect to the construction and operation of the jointly owned facility to ensure that the borrower’s interests are protected and the credit risk is minimized.

(9) The borrower has implemented adequate financial and management controls and there are and have been no significant financial or other irregularities.

(10) The borrower’s projected capitalization, measured by its equity as a percentage of total assets, is adequate to enable the borrower to meet its financial needs and to provide service consistent with the RE Act. Among the factors to be considered in reviewing the borrower’s projected capitalization are the economic strength of the borrower’s service territory, the inherent cost of providing service to the territory, the disparity in rates between the borrower and neighboring utilities, the intensity of competition faced by the borrower from neighboring utilities and other power sources, and the relative amount of new capital investment required to serve existing or new loads.

§ 1710.113 Loan security.

(a) RUS makes loans only if, in the judgment of the Administrator, the security therefor is reasonably adequate and the loan will be repaid according to its terms within the time agreed.

(b) RUS generally requires that borrowers provide it with a first lien on all of the borrower’s real and personal property, including intangible personal property and any property acquired after the date of the loan. This lien shall be in the form of a mortgage by the borrower to the Government or a deed of trust between the borrower and a trustee satisfactory to the Administrator, together with such security documents as RUS may deem necessary in a particular case.

(c)(1) When a borrower is unable by reason of preexisting encumbrances, or otherwise, to furnish a first mortgage lien on its entire system the Administrator may accept other forms of security, if he or she determines such security is reasonably adequate and the form and nature thereof is otherwise acceptable.

(2) The Administrator, at his or her discretion, may approve the use of an indenture patterned after those indentures commonly used by utilities engaged in private market financing, in
§ 1710.114 TIER, DSC, OTIER and ODSC requirements.

(a) General. Requirements for coverage ratios are set forth in the borrower’s mortgage, loan contract, or other contractual agreements with RUS. The requirements set forth in this section apply to borrowers that receive a loan approved by RUS on or after February 10, 1992. Nothing in this section, however, shall reduce the coverage ratio requirements of a borrower that has contractually agreed with RUS to a higher requirement.

(b) Coverage ratios. (1) Distribution borrowers. The minimum coverage ratios required of distribution borrowers, whether applied on an annual or average basis, are a TIER of 1.50, DSC of 1.25, OTIER of 1.1, and ODSC of 1.1. OTIER and ODSC shall apply to distribution borrowers that receive a loan approved by RUS on or after January 29, 1996.

(2) The minimum coverage ratios required of power supply borrowers, whether applied on an annual or average basis, are a TIER of 1.05 and DSC of 1.00.

(3) When new loan contracts are executed, the Administrator may, case by case, increase the coverage ratios of distribution and power supply borrowers above the levels cited in paragraphs (b)(1) and (b)(2), respectively, of this section if the Administrator determines that the higher ratios are required to ensure reasonable security for and/or the repayment of loans made or guaranteed by RUS. Also, the Administrator may, case by case, reduce said coverage ratios if the Administrator determines that the lower ratios are required to ensure reasonable security for and/or the repayment of loans made or guaranteed by RUS. Policies for coverage ratios following certain mergers, consolidations, and transfers of systems substantially in their entirety are in 7 CFR 1717.155.

(4) If a distribution borrower has in service or under construction a substantial amount of generation and associated transmission plant financed at a cost of capital substantially higher than the cost of funds under section 305 of the RE Act, then the Administrator may establish, in his or her sole discretion, blended levels for TIER, DSC, OTIER, and ODSC based on the respective shares of total utility plant represented by said generation and associated transmission plant and by distribution and other transmission plant.

(c) Requirements for loan feasibility. To be eligible for a loan, borrowers must demonstrate to RUS that they will, on a pro forma basis, earn the coverage ratios required by paragraph (b) of this section.
section in each of the years included in the borrower’s long-range financial forecast prepared in support of its loan application, as set forth in subpart G of this part.

(d) Requirements for maintenance of coverage ratios—(1) Prospective requirement. Borrowers must design and implement rates for utility service to provide sufficient revenue (along with other revenue available to the borrower in the case of TiER and DSC) to pay all fixed and variable expenses, to provide and maintain reasonable working capital and to maintain on an annual basis the coverage ratios required by paragraph (b) of this section. Rates must be designed and implemented to produce at least enough revenue to meet the requirements of this paragraph under the assumption that average weather conditions in the borrower’s service territory will prevail in the future, including average system damage and outages due to weather and the related costs. Failure to design and implement rates pursuant to the requirements of this paragraph shall be an event of default upon notice provided in accordance with the terms of the borrower’s mortgage or loan contract.

(2) Retrospective requirement. The average coverage ratios achieved by a borrower in the 2 best years out of the 3 most recent calendar years must meet the levels required by paragraph (b) of this section. If a borrower fails to achieve these average levels, it must promptly notify RUS in writing. Within 30 days of such notification or of the borrower being notified in writing by RUS, whichever is earlier, the borrower, in consultation with RUS, must provide a written plan satisfactory to RUS setting forth the actions that will be taken to achieve the required coverage ratios on a timely basis. Failure to develop and implement a plan satisfactory to RUS shall be an event of default upon notice provided in accordance with the terms of the borrower’s mortgage or loan contract.

(3) Fixed and variable expenses, as used in this section, include but are not limited to: all taxes, depreciation, maintenance expenses, and the cost of electric power and energy and other operating expenses of the electric system, including all obligations under the wholesale power contract, all lease payments when due, and all principal and interest payments on outstanding indebtedness when due.

(e) Requirements for advance of funds.

(1) If a borrower applying for a loan has failed to achieve the coverage ratios required by paragraph (b) of this section during the latest 12 month period immediately preceding approval of the loan, or if any of the borrower’s average coverage ratios for the 2 best years out of the most recent 3 calendar years were below the levels required in paragraph (b) of this section, RUS may withhold the advance of loan funds until the borrower has adopted an annual financial plan and operating budget satisfactory to RUS and taken such other action as RUS may require to demonstrate that the required coverage ratios will be maintained in the future and that the loan will be repaid with interest within the time agreed. Such other action may include, for example, increasing system operating efficiency and reducing costs or adopting a rate design that will achieve the required coverage ratios, and either placing such rates into effect or taking action to obtain regulatory authority approval of such rates. If failure to achieve the coverage ratios is due to unusual events beyond the control of the borrower, such as unusual weather, system outage due to a storm or regulatory delay in approving rate increases, then the Administrator may waive the requirement that the borrower take the remedial actions set forth in this paragraph, provided that such waiver will not threaten loan feasibility.

(2) With respect to any outstanding loan approved by RUS on or after February 10, 1992, if, based on actual or projected financial performance of the borrower, RUS determines that the borrower may not achieve its required coverage ratios in the current or future years, RUS may withhold the advance of loan funds until the borrower has taken remedial action satisfactory to RUS.

§ 1710.115 Final maturity.

(a) RUS is authorized to make loans and loan guarantees with a final maturity of up to 35 years. The borrower may elect a repayment period for a loan not longer than the expected useful life of the facilities, not to exceed 35 years. Most of the electric facilities financed by RUS have a long useful life, often approximating 35 years. Some facilities, such as load management equipment and Supervisory Control and Data Acquisition equipment, have a much shorter useful life due, in part, to obsolescence. Operating loans to finance working capital required for the initial operation of a new system are a separate class of loans and usually have a final maturity of less than 10 years.

(b) Loans made or guaranteed by RUS for facilities owned by the borrower generally must be repaid with interest within a period, up to 35 years, that approximates the expected useful life of the facilities financed. The expected useful life shall be based on the weighted average of the useful lives that the borrower proposes for the facilities financed by the loan, provided that the proposed useful lives are deemed appropriate by RUS. RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers, submitted as part of the loan application must include, as a note, either a statement certifying that at least 90 percent of the loan funds are for facilities that have a useful life of 33 years or longer, or a schedule showing the costs and useful life of those facilities with a useful life of less than 33 years. The useful lives proposed by the borrower for the facilities financed must be consistent with the borrower’s proposed depreciation rates for these facilities. In states where the borrower must obtain state regulatory authority approval of depreciation rates for rate making purposes, the depreciation rates used for the purposes of this paragraph shall be the rates currently approved by the state authority or rates for which the borrower plans to seek state authority approval, provided that these rates are deemed appropriate by RUS. In other states, if the rates proposed by the borrower are not deemed appropriate by RUS, RUS will base expected useful life on the depreciation rates listed in Bulletin 183-1, or its successor, revising such rates as necessary to reflect current industry practice (for availability of bulletins, see §1710.5). Final maturities for loans for the implementation of programs for demand side management and energy resource conservation and on and off grid renewable energy sources not owned by the borrower will be determined by RUS. Due to the uncertainty of predictions over an extended period of time, RUS may add up to 2 years to the composite average useful life of the facilities in order to determine final maturity.

(c) [Reserved]

(d) The Administrator may approve a repayment period longer than the expected useful life of the facilities financed, up to 35 years, if a longer final maturity is required to ensure repayment of the loan and loan security is adequate.

(e) The final maturity of a loan established pursuant to the provisions of this section shall not be extended as a result of extending loan payments under section 12(a) of the RE Act.

[58 FR 66265, Dec. 20, 1993, as amended at 60 FR 3731, Jan. 19, 1995]

§ 1710.116 [Reserved]

§ 1710.117 Environmental considerations.

Borrowers are required to comply with 7 CFR part 1794, which sets forth applicable requirements of the National Environmental Policy Act (NEPA), as amended (42 U.S.C. 4321 et seq.); the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500-1508); and certain other statutes, regulations and orders. Borrowers must also comply with any other applicable Federal or state environmental laws and regulations.

§ 1710.118 [Reserved]

§ 1710.119 Loan processing priorities.

(a) Generally loans are processed in chronological order based on the date the complete application is received in the Regional office.
§ 1710.127 Drug free workplace.

Borrowers are required to comply with the Drug Free Workplace Act of 1988 (Pub. L. 100-690, title V, subtitle D) and the Act’s implementing regulations (7 CFR part 3017) when a borrower receives a Federal grant or enters into a procurement contract awarded pursuant to the provisions of the Federal Acquisition Regulation (title 48 CFR) to sell to a Federal agency property or services having a value of $25,000 or more.

§ 1710.126 Federal debt delinquency.

(a) Prior to approval of a loan or advance of funds, a borrower must report to RUS whether or not it is delinquent on any Federal debt, such as Federal income tax obligations or a loan or loan guarantee from another Federal agency. If delinquent, the reasons for the delinquency must be explained, and RUS will take such explanation into consideration in deciding whether to approve the loan or advance of funds.

(b) Applicants for a loan or loan guarantee must also certify that they have been informed of the collection options the Federal government may use to collect delinquent debt.

§ 1710.125 Restrictions on lobbying.

Borrowers are required to comply with certain requirements with respect to restrictions on lobbying activities. See 7 CFR part 3018.

§ 1710.124 Uniform Relocation Act.

Borrowers are required to comply with applicable provisions of 49 CFR part 24, which sets forth the requirements of the Uniform Relocation Assistance and Real Property Acquisition Policy Act of 1970 (Pub. L. 91-646; 84 Stat. 1894), as amended by the Uniform Relocation Act Amendments of 1987 (Pub. L. 100-17; 101 Stat. 246-256) and the Intermodal Surface Transportation Efficiency Act of 1991.

§ 1710.123 Debarment and suspension.

Borrowers are required to comply with certain requirements on debarment and suspension as set forth in 7 CFR part 3017.

§ 1710.122 Equal opportunity and nondiscrimination.

Borrowers are required to comply with certain regulations on nondiscrimination in program services and benefits and on equal employment opportunity as set forth in RUS Bulletins 20-15 and 20-19 or their successors; 7 CFR parts 15 and 15b; and 48 CFR part 90.

§ 1710.121 Insurance requirements.

Borrowers are required to comply with certain requirements with respect to insurance and fidelity coverage as set forth in 7 CFR part 1788.

§ 1710.120 Construction standards and contracting.

Borrowers shall follow all RUS requirements regarding construction work plans, construction standards, approved materials, construction and related contracts, inspection procedures, and bidding procedures.

[b]The Administrator may give priority to processing loans that are required to meet the following needs:

1. To restore electric service following a major storm or other catastrophe;
2. To bring existing electric facilities into compliance with any environmental requirements imposed by Federal or state law that were not in effect at the time the facilities were originally constructed;
3. To finance the capital needs of borrowers that are the result of a merger, consolidation, or transfer of a system substantially in its entirety, provided that the merger, consolidation, or transfer has either been approved by RUS or does not need RUS approval pursuant to the borrower’s loan documents (See 7 CFR 1717.154); or
4. To correct serious safety problems, other than those resulting from borrower mismanagement or negligence.

(c) The Administrator may also change the normal order of processing loan applications when it is necessary to ensure that all loan authority for the fiscal year is utilized.

§ 1710.127 Drug free workplace.

Borrowers are required to comply with the Drug Free Workplace Act of 1988 (Pub. L. 100-690, title V, subtitle D) and the Act’s implementing regulations (7 CFR part 3017) when a borrower receives a Federal grant or enters into a procurement contract awarded pursuant to the provisions of the Federal Acquisition Regulation (title 48 CFR) to sell to a Federal agency property or services having a value of $25,000 or more.
Subpart D—Basic Requirements for Loan Approval

§ 1710.150 General.

The RE Act and prudent lending practice require that the Administrator make certain findings before approving an electric loan or loan guarantee. The borrower shall provide the evidence determined by the Administrator to be necessary to make these findings.

§ 1710.151 Required findings for all loans.

(a) Area coverage. Adequate electric service will be made available to the widest practical number of rural users in the borrower’s service area during the life of the loan. See §1710.103.

(b) Feasibility. The loan is feasible and it will be repaid on time according to the terms of the mortgage, note, and loan contract. At any time after the original determination of feasibility, the Administrator may require the borrower to demonstrate that the loan remains feasible if there have been, or are anticipated to be, material changes in the borrower’s costs, loads, rates, rate disparity, revenues, or other relevant factors from the time that feasibility was originally determined. See §1710.112 and subpart G of this part.

(c) Security. RUS will have a first lien on the borrower’s total system or other adequate security, and adequate financial and managerial controls will be included in loan documents. See §1710.113.

(d) Interim financing. For loans that include funds to replace interim financing, there is satisfactory evidence that the interim financing was used for purposes approved by RUS and that the loan meets all applicable requirements of this part.

(e) Facilities for nonrural areas. Whenever a borrower proposes to use loan funds for the improvement, expansion, construction, or acquisition of electric facilities for non-RE Act beneficiaries, there is satisfactory evidence that such funds are necessary and incidental to furnishing or improving electric service for RE Act beneficiaries. See §1710.104.

(f) Facilities to be included in rate base. In states having jurisdiction, the borrower has provided satisfactory evidence based on the information available, such as an opinion of counsel, that the state regulatory authority will not exclude from the borrower’s rate base any of the facilities included in the loan request, or otherwise prevent the borrower from charging rates sufficient to repay with interest the debt incurred for the facilities. Such evidence may be based on, but not necessarily limited to, the provisions of applicable state laws; the rules and policies of the state authority; precedents in other similar cases; statements made by the state authority; any assurances given to the borrower by the state authority; and other relevant information and experience.

§ 1710.152 Primary support documents.

The following primary support documents and studies must be prepared by the borrower for approval by RUS in order to support a loan application:

(a) Power requirements study (PRS). This study provides the borrower and RUS with an understanding of the borrower’s system loads, the factors influencing those loads, and valid estimates of future loads. It provides a basis for projecting annual kWh sales and revenues, and for engineering estimates of plant additions required to accommodate the forecasted loads. The requirements for a PRS and the circumstances under which one must be submitted to RUS are set forth in subpart E of this part.

(b) Construction work plan (CWP). The CWP shall specify and document the capital investments required to serve a borrower’s planned new loads, improve service reliability and quality, and service the changing needs of existing loads. The requirements for a CWP are set forth in subpart F of this part.

(c) Long-range financial forecasts. RUS encourages borrowers to maintain, on a current basis a long-range financial forecast, which should be used by a borrower’s board of directors and manager to guide the system toward its financial goals. The forecast submitted in support of a loan application shall show the projected results of future actions planned by the board of directors.
The requirements for a long-range financial forecast are set forth in subpart G of this part.

(d) Borrower’s environmental report (BER). This document is used to determine what effect the construction of the facilities included in the construction work plan will have on the environment. In developing a BER a borrower shall follow the policy and procedural requirements set forth in 7 CFR part 1794. After reviewing the BER, RUS will determine whether additional environmental studies will be required.

§ 1710.153 Additional requirements and procedures.

Additional requirements and procedures for obtaining RUS financial assistance are set forth in 7 CFR part 1712 for loan guarantees, and in 7 CFR part 1714 for insured loans.

§§ 1710.154—1710.199 [Reserved]

Subpart E—Power Requirements Studies

§ 1710.200 Purpose.

This subpart sets forth the policies, procedures and criteria for the preparation, approval and use of power requirements studies (PRSs) and PRS work plans. A PRS is a thorough study of a borrower’s electric loads and the factors that affect those loads in order to determine, as accurately as practicable, the borrower’s future requirements for energy and capacity. The PRS of a power supply borrower includes and integrates the PRSs of its member systems.

§ 1710.201 Requirement to prepare a PRS—power supply borrowers.

(a) A power supply borrower having total assets of $300 million or more shall:

(1) Meet one of the following two requirements:

(i) Prepare and obtain RUS approval of a new PRS not less frequently than every 3 years, which shall include new or revised equations and models; and

(ii) Prepare and obtain RUS approval of a new PRS not less frequently than every 2 years, which shall include new or revised equations and models;

(2) Maintain a current PRS work plan approved by RUS which shall set forth the resources, methods, schedules and milestones required for the preparation and maintenance of the PRS; and

(3) Provide a current PRS approved by RUS in support of any request for RUS financial assistance or for RUS approval of long-term power contracts or other actions as appropriate.

(b) A power supply borrower with total assets of less than $300 million is not required to have a current, RUS-approved PRS on an ongoing basis but is required to provide a current, RUS-approved PRS in support of:

(1) An application for an RUS loan or loan guarantee if said loan or guarantee exceeds $25 million or 10 percent of the borrower’s total utility plant, whichever is smaller; and

(2) Requests for RUS approval of long-term power contracts or other actions, as may be required by RUS on a case by case basis.

(c) A power supply borrower that is a member of another power supply borrower that has total assets of $300 million or more is subject to the requirements of §1710.201(a), except that such member is not required to have a separate PRS work plan. The distribution members of such a power supply borrower are also subject to the requirements of §1710.201(a), except that such members are not required to have separate PRS work plans.

(d) At the borrower’s request, RUS may extend for up to 3 months the time frames set forth in §1710.201(a)(1) if RUS determines the borrower is in substantial compliance with its RUS-approved work plan and significant changes in existing PRS models and assumptions are not required.

(e) For purposes of paragraphs (a)(3) and (b) of this section, the determination of whether a borrower’s PRS is current will be made by RUS at the time financial assistance or other RUS action is requested. The borrower may be required to update the PRS to incorporate the most recently available operating data and other information.
§ 1710.202 Requirement to prepare a PRS—distribution borrowers.

(a) If a distribution borrower is a member of a power supply borrower that has total assets of $300 million or more, it must meet the requirements of §1710.201(a), except for the requirement to prepare a work plan, which is the responsibility of the power supply borrower. Certain other distribution borrowers, as set forth in §1710.201(c), are also subject to provisions of §1710.201(a).

(b) All other distribution borrowers, including unaffiliated distribution systems as well as members of power supply borrowers with total assets of less than $300 million, must either:

(1) Meet the requirements of §1710.201(a), if the distribution borrower owns generation and bulk transmission plant valued at $300 million or more, or

(2) Meet the requirements of §1710.201(b), except that the loan threshold set forth in paragraph (b)(1) in the case of these distribution borrowers shall be $3 million and 10 percent of total utility plant.

§ 1710.203 Basic policies and requirements for a PRS.

(a) A PRS or PRS update must be completed and submitted to RUS on a timely basis to enable prompt review by RUS.

(b) A PRS completed more than 12 months prior to submission will not be considered by RUS.

(c) Adequate coordination is required between power supply borrowers and their members in the preparation of their respective PRSs or PRS updates.

(d) To facilitate RUS review of the PRS work plan and the PRS, the borrower shall make available to RUS appropriate staff for consultation, and all essential documentation, data, and other relevant information, in formats acceptable to RUS, that support the PRS work plan and the PRS.

(e) Notwithstanding any other provisions of this subpart, any power supply or distribution borrower may be required to prepare a new or updated PRS, or to maintain a current PRS on an ongoing basis, if required for RUS to determine loan feasibility, to ensure loan security, or to consider requests submitted for approval under a borrower’s loan contract or mortgage.

(f) All PRSs shall include the following information, using a format approved by RUS, unless such information has already been provided to RUS in the PRS work plan or other submissions:

(1) A discussion of the scope of the PRS, including the proposed uses of the information developed for planning load management and energy efficiency programs, plant investments, and financial requirements;

(2) A discussion of the borrower personnel, consultants, data, and other resources used in the preparation of the PRS;

(3) A discussion of the procedures used to collect, validate, process, and update the data used in the study;

(4) Documentation of the analysis and modeling of the borrower’s electric system loads and other pertinent information used in the PRS. All relevant data, primary sensitivity analyses and other substantive procedures used to test significant assumptions and to generate the load estimates and related factors must be included in the PRS or otherwise made available to RUS, and clearly identified, sourced and dated;

(5) An analysis of the borrower’s past, existing, and future electric system loads of RE Act beneficiaries and others, including explanation and documentation of all substantive assumptions, primary sensitivity analyses and other substantive considerations used to prepare the estimates. Areas of analysis shall normally include, but are not limited to: developing land use patterns; potential losses of load due to annexation or other causes; prospective residential and commercial development; probable rate levels; the effects of rates and competition from neighboring utilities on loads; existing and anticipated patterns of energy usage and appliance saturation; and availability of alternative energy sources. Load management, conservation, and power marketing considerations must also be included;

(6) A discussion and analysis of alternative scenarios, which shall be required for all PRSs submitted to RUS for approval after January 1, 1993. Normally, unless waived by RUS under
§ 1710.204 PRS work plan requirements.

(a) All borrowers required to prepare and maintain a PRS on an ongoing basis are required to prepare and obtain RUS approval of a PRS work plan, except for those borrowers that are members of a power supply borrower that is required to prepare a PRS work plan. The PRS work plan shall establish the resources, methods, schedules, and milestones to be used in the preparation and maintenance of the PRS.

(b) A power supply borrower’s work plan shall include the member inputs and coordination mechanisms required for the preparation of its PRS as well as the PRSs of the system’s members. Member concurrences in the work plan are required before the plan is submitted to RUS for approval. The member systems, as well as the power supply borrower, are required to follow the work plan in preparing their respective PRS.

(c) A PRS work plan must be approved by the borrower’s board of directors.

(d) A borrower may amend its work plan subject to RUS approval. A new or revised work plan may be required by RUS if RUS concludes the existing plan will not result in a satisfactory PRS on a timely basis.

(e) In addition, a PRS work plan shall:

(1) Identify the borrower and, as applicable, member personnel that will serve as project leaders or liaisons with the authority to make decisions and commit resources within the scope of the work plan;

(2) Provide for residential consumer surveys at least every 3 years to obtain data on appliance and equipment saturation and electricity demand, when residential demand is 50 percent or more of total kWh sales. In the case of a power supply borrower, such surveys shall be coordinated with the borrower’s members. They may be based on the aggregation of member-based samples or on a system-wide sample, provided that the latter provides for relevant regional breakdowns as appropriate;

(g) A PRS and its essential supporting data and analysis shall be retained in the borrower’s records until the next new PRS is approved by RUS.

(h) Completed PRSs submitted to RUS for approval prior to the effective date of this part, as well as PRSs prepared under work plans approved by RUS prior to the effective date of this part, may meet the requirements of paragraph (f) of this section or corresponding requirements of RUS Bulletin 120-1, at the option of the borrower. All other PRSs must meet the requirements of paragraph (f) of this section.
§ 1710.205 Basic criteria for RUS approval of a PRS.

RUS will use the following basic criteria in deciding whether to approve a PRS:

(a) The borrower objectively analyzed all relevant factors that influence the consumption of electricity and the requirements for generation and transmission capacity;

(b) The borrower accurately analyzed power requirements stemming from RE Act beneficiaries and non-RE Act beneficiaries;

(c) The borrower developed adequate supporting data, used valid assumptions, analyzed a reasonable range of relevant alternative assumptions and scenarios, and used valid and verifiable analytical techniques and models;

(d) The borrower provided RUS with adequate documentation and assistance to allow for a thorough and independent review;

(e) In the case of a power supply borrower, the preparation of the work plan and PRS was adequately coordinated with its members; and

(f) The PRS was recommended for approval by the borrower’s general manager and has been approved by the borrower’s board of directors.

§ 1710.206 Waiver of borrower requirements.

For good cause shown by the borrower, the Administrator may waive any of the requirements applicable to borrowers in this subpart if the Administrator determines that waiving the requirement will not significantly affect accomplishment of the objectives of this subpart and if the requirement imposes a substantial burden on the borrower. The waiver must be requested in writing by the borrower’s general manager.

(Approved by the Office of Management and Budget under control number 0572-0032)

§§ 1710.207–1710.249 [Reserved]

§ 1710.250 General.

(a) An ongoing, integrated planning system is needed by borrowers to determine their short-term and long-term needs for plant additions, improvements, replacements, and retirements. The primary components of the system consist of long-range engineering plans, construction work plans (CWPs), CWP amendments, and special engineering and cost studies. Long range engineering plans identify plant investments required over a period of 10 years or more. CWPs specify and document plant requirements for the short-term, usually 2 to 3 years, and special engineering and cost studies are used to support CWPs and to identify and document requirements for specific items or purposes, such as load management equipment, System Control and Data Acquisition equipment, sectionalizing investments, and additions of generation capacity and associated transmission plant.

(b) Generally, all borrowers are required to maintain up-to-date long range engineering plans approved by their boards of directors. Current CWPs approved by the borrower’s board must also be developed and maintained for distribution and transmission facilities and for improvements and replacements of generation facilities. All such distribution, transmission or generation facilities must be included in the respective CWPs regardless of the source of financing.

(c) A long range engineering plan specifies and supports the major system additions, improvements, replacements, and retirements needed for an orderly transition from the existing system to the system required 10 or more years in the future. The planned future system should be based on the most technically and economically sound means of serving the borrower’s
§ 1710.251 Construction work plans—distribution borrowers.

(a) All distribution borrowers must maintain a current CWP approved by their board of directors covering all new construction, improvements, replacements, and retirements of distribution and transmission plant, and improvements replacements, and retirements of any generation plant. Construction of new generation capacity need not be included in a CWP but must be specified and supported by specific engineering and cost studies. (See § 1710.253.)
§ 1710.252 Construction work plans—power supply borrowers.

(a) All power supply borrowers must maintain a current CWP approved by the borrower's board of directors covering all new construction, improvements, replacements, and retirements of distribution and transmission plant, and improvements, replacements, and retirements of generation plant. Applications for RUS financial assistance for such facilities must be supported by a current, RUS-approved CWP. Construction of new generation capacity need not be included in a CWP but must be specified and supported by specific engineering and cost studies.

(b) Normally a power supply borrower's CWP shall cover a period of 3 to 4 years. While comprehensive CWP's are desired, if there are extenuating circumstances RUS may accept a single-purpose transmission or generation CWP in support of a loan application or budget reclassification. The construction period covered by a CWP in support of a loan application shall not be shorter than the loan period requested for financing of the facilities.

(c) Facilities, equipment, and other items included in a power supply borrower's CWP may include:

(1) Distribution and related facilities as set forth in §1710.251(c);
(2) Transmission facilities required to deliver the power needed to serve the existing and planned new loads of the borrower and its members, and to improve service reliability, including tie lines for improved reliability of service, line conversions, improvements and replacements, new substations and substation improvements and replacements, and Systems Control and Data Acquisition equipment, including communications, dispatching and sectionalizing equipment, and load management equipment;
(3) The borrower’s proportionate share of transmission facilities required to tie together the operating systems of supporting power pools and to connect with adjacent power suppliers;
(4) Improvements and replacements of generation facilities; and
(5) The cost of engineering, architectural, environmental and other studies and plans needed to support the construction of facilities, when such cost is capitalized as part of the cost of the facilities.

(d) A CWP for transmission facilities shall normally include studies of load flows, voltage regulation, and stability characteristics to demonstrate system performance and needs.

[57 FR 1053, Jan. 9, 1992, as amended at 60 FR 3732, Jan. 19, 1995; 60 FR 67405, Dec. 29, 1995]

§ 1710.253 Engineering and cost studies—addition of generation capacity.
(a) The construction or purchase of additional generation capacity and associated transmission facilities by a power supply or distribution borrower, including the replacement of existing capacity, shall be supported by comprehensive project-specific engineering and cost studies as specified by RUS. The studies shall cover a period from the beginning of the project to at least 10 years after the start of commercial operation of the facilities.
(b) The studies must include comprehensive economic present-value analyses of the costs and revenues of the available self-generation, load management, energy conservation, and purchased-power options, including assessments of service reliability and financing requirements and risks. Requirements for analyzing purchased-power options are set forth in § 1710.254.
(c) Generally, studies of self-generation, load management, and energy conservation options shall include, as appropriate, analyses of:
(1) Capital and operating costs;
(2) Financing requirements and risks;
(3) System reliability;
(4) Alternative unit sizes;
(5) Alternative types of generation;
(6) Fuel alternatives;
(7) System stability;
(8) Load flows; and
(9) System dispatching.
(d) At the request of a borrower, RUS, in its sole discretion, may waive specific requirements of this section if such requirements imposed a substantial burden on the borrower and if such waiver will not significantly affect the accomplishment of the objectives of this subpart.

§ 1710.254 Alternative sources of power.
(a) General. (1) RUS will make loans to finance the construction of generation facilities by distribution or power supply borrowers and transmission facilities by power supply borrowers only under the following conditions if said borrowers do not already own and operate such types of facilities:
(i) Where no adequate and dependable source of power is available to meet the consumers’ needs; or
(ii) Where the rates offered by other power sources would result in a higher cost of power to the consumers than the cost from facilities financed by RUS, and the amount of the power cost savings that would result from the RUS-financed facilities bears a significant relationship to the amount of the proposed loan.
(2) If a borrower already owns and operates the types of facilities included in a loan request, then a loan for the purposes set forth in paragraph (a)(1) of this section, as well as for the construction of transmission facilities by a distribution borrower, will be considered and evaluated by RUS in terms of whether the proposed facilities constitute the most effective and economical means of meeting the power requirements of the consumers.
(b) Loan requests for addition of generation capacity, including replacement of existing capacity, will be accepted by RUS only when the applicant has satisfactorily completed the investigations of possible alternative sources of power as set forth in this section. The investigations must be coordinated in advance with RUS. The capacity in question may be owned solely by the borrower or owned on an undivided ownership basis with other utilities.
(c) The applicant is required to search out and attempt to utilize capacity available from RUS borrowers and other organizations before developing plans for additional generation capacity. The applicant shall:

(1) Solicit power and energy purchase proposals from all reasonable potential sources of power, such as other electric cooperatives, investor-owned utilities, municipal utility organizations, and Federal and state power authorities.

(2) Except as herein exempted, solicit proposals from independent power producers, including co-generators, to determine the terms and conditions under which these producers can supply the additional power and energy needs of the applicant, without RUS financial assistance. Such solicitations shall be placed in at least three national newspapers or trade publications, and they shall meet all planning, coordination or other requirements imposed by state authorities, as well as RUS’s environmental requirements. The following projects are exempted from this requirement to solicit proposals:

(i) Additions to or replacements of generation capacity of less than 10 megawatts.

(ii) Modifications of existing generation units if any resulting increase in generation capacity does not exceed 10 percent of the capacity of the existing unit.

(d) The applicant will evaluate all alternative proposals on an economic, present-value basis, giving consideration to cost-effectiveness, reliability of service, the short- and long-term financial viability of the supplier, and the financial risk to the borrower and its creditors. The applicant will keep RUS fully informed on these evaluations and provide supporting information and analysis as requested by RUS.

(e) After evaluation of all proposals and having informed RUS of the results, the applicant will be expected to negotiate final proposals with the entities submitting the best acceptable offers, if any, keeping RUS fully informed. All contracts entered into shall either be approved in advance by the Administrator or contain language to the effect that the contract is not valid until approved in writing by the Administrator. The Administrator will approve such contracts in a timely manner provided that the borrower has met all applicable requirements, including RUS’s environmental requirements, and provided adequate evidence that the alternative selected is the most economical and effective alternative.

(f) RUS may make independent inquiries with potential power suppliers as to the availability of power to meet borrowers’ needs. Information developed by RUS will be shared with borrowers at their request.

(g) Further details of RUS requirements for financing of generation and bulk transmission facilities are set forth in 7 CFR part 1712.

(h) At the request of a borrower, RUS, in its sole discretion, may waive specific requirements of paragraphs (b) through (e) of this section if such waiver is required to prevent unreasonable delays in obtaining generation capacity that could result in system reliability problems.

(Approved by the Office of Management and Budget under control number 0572-0032)

§§ 1710.255—1710.299 [Reserved]

Subpart G—Long-Range Financial Forecasts

§ 1710.300 General.

(a) RUS encourages borrowers to maintain a current long-range financial forecast. The forecast should be used by the board of directors and the manager to guide the system towards its financial goals.

(b) A borrower must prepare, for RUS review and approval, a long-range financial forecast, approved by its board of directors, in support of its loan application. The forecast must demonstrate that the borrower’s system is economically viable and that the proposed loan is financially feasible. Loan feasibility will be assessed based on the criteria set forth in §1710.112.

(c) The financial forecast and related projections submitted in support of a loan application shall include:

(1) The projected results of future actions planned by the borrower’s board of directors;
(2) The financial goals established for margins, TIER, DSC, equity, and levels of general funds to be invested in plant;

(3) A pro forma balance sheet, statement of operations, and general funds summary projected for each year during the forecast period;

(4) A full explanation of the assumptions, supporting data, and analysis used in the forecast, including the methodology used to project loads, rates, revenue, power costs, operating expenses, plant additions, and other factors having a material effect on the balance sheet and on financial ratios such as equity, TIER, and DSC;

(5) Current and projected cash flows;

(6) Projections of future borrowings and the associated interest and principal expenses required to meet the projected investment requirements of the system;

(7) Current and projected kW and kWh energy sales;

(8) Current and projected unit prices of significant variables such as retail and wholesale power prices, average labor costs, and interest;

(9) Current and projected system operating costs, including, but not limited to, wholesale power costs, depreciation expenses, labor costs, and debt service costs;

(10) Current and projected revenues from sales of electric power and energy;

(11) Current and projected non-operating income and expense;

(12) A discussion of the historical experience of the borrower, and in the case of a power supply borrower its member systems as appropriate, with respect to the borrower’s market competitiveness as it relates to the rates charged for electricity, competition from other fuels, and other factors. Additional data and analysis may be required by RUS on a case by case basis to assess the probable future competitiveness of those borrowers that have a history of serious competitive problems; and

(13) An analysis of the effects of major factors, such as projected increases in rates charged for electricity, on the ability of the borrower, and in the case of a power supply borrower its member systems, to compete with neighboring utilities and other energy sources.

(d) The following plans, studies and assumptions shall be used in developing the financial forecast:

(1) The RUS-approved CWP;

(2) RUS-approved power requirements data;

(3) The current rate schedules or new rates already approved by the board of directors;

(4) Future plant additions and operating expenses projected at anticipated future cost levels rather than in constant dollars, with the annual rate of inflation for major items specified; and

(5) A reasonable range of assumptions for each of the major variables to test the sensitivity of the results to changes in assumptions, if the financial forecast is used in support of a loan or loan guarantee that exceeds the smaller of 10 percent of the borrower’s total utility plant or the following dollar amount: $25 million for power supply borrowers, or $3 million for distribution borrowers.

(e) The financial forecast shall use the accrual method, as approved by RUS, for analyzing costs and revenues, and, as applicable, compare the economic results of the various alternatives on a present value basis.

(f) RUS will obtain and review commercially available credit reports on applicants for a loan or loan guarantee to verify income, assets, and credit history, and to determine whether there are any outstanding delinquent Federal or other debts. Such reports will also be reviewed for parties that are or propose to be joint owners of a project with a borrower.

§ 1710.301 Financial forecasts—distribution borrowers.

(a) Financial forecasts prepared by distribution borrowers shall cover at least a ten-year period, unless a shorter period is authorized by other RUS regulations.

(b) In addition to the requirements set forth in §1710.300 of this part, financial forecasts prepared by distribution borrowers in support of a loan application shall:

(1) Include expenditures for any maintenance determined to be needed in the current system’s operation and
§ 1710.302 Financial forecasts—power supply borrowers.

(a) The requirements of this section apply only to financial forecasts submitted by power supply borrowers in support of a loan from RUS. The financial forecast prepared by power supply borrowers shall demonstrate the effects that the addition of generation, transmission and any distribution facilities will have on the power supply borrower’s sales, costs, and revenues, and on the cost of power to the member distribution systems.

(b) The financial forecast shall cover a period beginning with the present and extending at least 10 years beyond the projected in-service date of proposed generation and transmission facilities.

(c) Financial forecasts prepared in support of loan applications to finance additional generation capacity shall include a power cost study as set forth in §1710.303.

(d) In addition to the requirements set forth in §1710.300, financial forecasts prepared by power supply borrowers shall:

(1) Identify all plans for generation and transmission capital additions and system operating expenses on a year-by-year basis, beginning with the present and running for a minimum of 10 years after initial commercial operation of the facilities. RUS may request projections for a longer period of time if deemed necessary;

(2) Integrate projections of operation and maintenance expenses associated with existing plant with those of new proposed facilities to determine total costs of system operation as well as the costs of new generation and generation-related facilities;

(3) Provide an in-depth analysis of the regional markets for power if loan feasibility depends to any degree on a borrower’s ability to sell surplus power while its system loads grow to meet the planned capacity of a proposed plant;

(4) If not previously submitted, furnish RUS with all material information on operating agreements, ownership agreements, fuel contracts and any other special agreements that affect annual cost projections, as may be required by RUS on a case by case basis; and

(5) Include sensitivity analysis as required by §1710.300(d)(5). Examples of sensitivity analysis that might be used are:

(i) Effects of a 100 to 200 basis point increase in the financing interest rate;

(ii) Effects of a 50 percent reduction in the rate of projected RE Act beneficiary load growth;

(iii) Effects of a 10 to 20 percent increase in the projections for fuel costs;

(iv) Effects of a 20 percent or more increase in construction costs; and

(v) Effects of a 20 percent or more increase in maintenance, retrofit and de-commissioning costs of nuclear power plants.

(e) The projections shall be coordinated in advance with RUS so that agreement can be reached on major aspects of the economic studies. These include, but are not limited to, projections of future kW and kWh requirements, RE Act beneficiary loads, electricity prices, revenues from system and off-system power sales, the cost of prospective plant additions, interest and depreciation rates, fuel costs, cost escalation factors, the discount rate, and other factors.

(f) The projections, analysis, and supporting information must be included in a report that will provide RUS with the information needed to:

(1) Understand and compare various power supply plans;

(2) Determine that the facilities to be financed will perform satisfactorily; and

(3) Determine that the overall system is economically viable and the loan is financially feasible and secure.

§ 1710.303 Power cost studies—power supply borrowers.

(a) All applications for financing of additional generation capacity and the associated bulk transmission facilities...
shall be supported by a power cost study to demonstrate that the proposed generation and associated transmission facilities are the most economical and effective means of meeting the borrower's power requirements. This study usually is a separate study but it may be integrated with the financial forecast required by §1710.302.

(b) A power cost study shall include the following basic elements:

(1) A study of all reasonably available self-generation, purchased-power, load management, and energy conservation alternatives as set forth in §§1710.253 and 1710.254;

(2) A present-value analysis of the costs of the alternatives and their effects on total power costs, covering a period of at least 10 years beyond the projected in-service date of the facilities;

(3) A description of proposed new power-purchase contracts or revisions to existing contracts, and an analysis of the effects on power costs;

(4) Use of sensitivity analyses to determine the vulnerability of the alternatives to a reasonable range of assumptions about fuel costs, failure to achieve projected load growth, changes in operating and financing costs, and other major factors, if the financial forecast is used in support of a loan or loan guarantee that exceeds the smaller of $25 million or 10 percent of the borrower's total utility plant. Individual sensitivity analyses need not be duplicated if they have been included in other materials submitted to RUS; and

(5) Assessment of the financial risks of the various alternatives, especially as between capital-intensive and non-capital-intensive alternatives, under the range of assumptions set forth in paragraph (b)(4) of this section.

(c) Power cost studies must use current, RUS-approved power requirements data, and all major assumptions are subject to RUS approval. Alternative assumptions about projected power requirements may be used, however, in conjunction with the sensitivity analyses required by paragraph (b)(4) of this section.

(Approved by the Office of Management and Budget under control number 0572-0032)
§ 1710.354 DSM activities.

DSM activities that are projected to result in more efficient use of electric system resources and which are consistent with an RUS approved Integrated Resource Plan (IRP) and DSM plan may be eligible for financing. Examples of such DSM activities, which are not mutually exclusive, are as follows:

(a) General information and education;
(b) Purchase and installation of borrower owned or consumer owned equipment or materials, including:
(1) Heating, ventilation, air conditioning;
(2) Building envelope;
(3) Appliances;
(4) Load control;
(5) Lighting and lighting control;
(6) Thermal storage; and
(7) Efficient motors and drives;
(c) Rebates for DSM equipment and facilities;
(d) Fuel switching for dual fuel applications where one of the energy sources is electricity; and
(e) Pilot DSM projects.

§ 1710.355 DSM loan applications.

(a) Any loan application which includes funds for DSM must include all loan support documents required for a loan for electric facilities, and must demonstrate that requirements for need, loan feasibility and loan security are satisfied. In addition, the application must be supported by an RUS approved IRP, except as provided in § 1710.356(a)(1), and an RUS approved DSM plan.

(b) DSM loans will be made to provide financing for DSM activities planned to be implemented within a two year period.

§ 1710.356 Integrated resource plans.

(a)(1) An RUS approved IRP is required for all loans that include funds for DSM activities, unless the cumulative total of all previous DSM loans and the loan under consideration for that applicant is less than 1 percent of the applicant's total utility plant.

(2) An RUS approved IRP is required for all loans that include funds for on-grid renewable energy systems

(3) An RUS approved IRP is required for all loans that include funds for off-grid renewable energy systems unless the Administrator determines that an IRP is not needed to determine that the loan is both feasible and secure pursuant to §§1710.112 and 1710.113, respectively.

(b)(1) When an IRP is required, a distribution borrower that is a member of a power supply borrower must use the IRP prepared by the power supply borrower for its overall system. This IRP must have been coordinated with all of the member systems and it must have been approved by the board of directors of the power supply borrower. Because of the relationship between the power supply borrower and its members under which the loans incurred by the power supply borrower are primarily to construct, improve or acquire facilities that benefit all members directly or indirectly, the security of loans to all...
parties is interlinked. Consequently, DSM activities and renewable energy activities must be coordinated among all parties to insure that the activities of one member do not jeopardize the financial integrity or loan security of any other member or that of the power supply borrower.

(2) A distribution system that is not a member of an RUS financed power supply borrower shall prepare its own IRP. An IRP developed by a distribution borrower that is not a member of a power supply borrower need only address its own system, but shall include an analysis of the effects of its DSM activities on its wholesale power costs.

(c) The IRP shall identify supply side and demand side options and analyze their benefits and costs in order to provide adequate and reliable electric service to consumers at the lowest cost for the system as a whole.

(d) The IRP shall include necessary features for system operation, such as diversity, reliability, dispatchability, and other factors of risk; and it shall take into account the ability to verify energy and cost savings achieved through DSM, energy conservation, and renewable energy systems, and the projected durability of such savings measured over time.

(e) The following elements also included in a DSM plan, pursuant to §§1710.357 and 1710.358, shall be included except where RUS determines that they are not necessary:

1. Load shape objectives;
2. Wholesale power pricing policy and costs, and their relationship to the proposed DSM activities;
3. Ownership and costs of DSM related hardware;
4. Incentive and marketing costs;
5. Communication and control costs; and
6. Monitoring methods and costs.

(f) The IRP shall analyze the DSM effects set forth in §1710.359.

§ 1710.357 DSM plans.

(a) A DSM plan approved by the borrower’s board of directors is required in support of a loan that includes funds for DSM activities or for off-grid renewable energy systems. The DSM plan shall address the borrower’s existing and proposed activities for the same period covered by the Long-Range Financial Forecast submitted in support of the loan application.

(b)(1) A DSM plan prepared by a member of a power supply borrower must be consistent with the IRP prepared by the power supply borrower.

(2) A DSM plan prepared by a distribution borrower that is not a member of an RUS financed power supply borrower must be consistent with the borrower’s own IRP.

(c) The level of detail required in the DSM plan is dependent on several factors, for example:

1. Size and term of loan;
2. Financial impact of loan on the borrower;
3. Probability of realization of the estimated impacts;
4. Magnitude of the estimated effects; and
5. Potential effects, if any, on other distribution members of a power supply borrower.

(d) RUS will consider effects of proposed and existing DSM plans on government loan security, rates, revenue requirements, competitiveness, other distribution borrowers, power supply borrowers or other industry recognized tests as applicable.

§ 1710.358 Requirements for a DSM plan.

A DSM plan shall include:

(a) A list of the DSM activities to be financed by the loan including details on implementation such as beginning and completion dates and estimated draw downs of loan funds;

(b) An analysis of the borrower’s existing and proposed DSM activities, including sources of financing and projections of the effects of those activities as set forth in §1710.359;

(c) System specific load research and DSM pilot projects as required by §1710.353(f);

(d) A benefit/cost and net present value cash flow analysis of each DSM activity included in the plan. Benefits and costs must be expressed in the same units where possible. Short term and long term impacts must be addressed. Who benefits and who pays must be clearly identified. Objectives of a DSM plan shall be stated in terms
of load profile adjustments by customer rate class and/or market segment. The benefit/cost analysis shall include the following steps:

1. Identification of objectives, alternatives, and effects;
2. Simulation of impacts on the system and its consumers, and the probable costs and benefits, including sensitivity/probability and scenario analysis; and
3. Selection of DSM activities;
4. An outline of monitoring and reporting procedures to evaluate the performance of the implemented DSM plan;
5. A narrative discussing the following:
   a. Scope of the DSM plan;
   b. Resources used to develop the DSM plan;
   c. Internal and external data collection and analysis;
   d. Analysis method used to screen and evaluate the projected programs;
   e. Analysis of existing and projected plans; and
6. Coordination activities with power supplier.

§ 1710.359 DSM effects.

The IRP and the DSM plan shall consider and discuss the expected effects of the borrower's DSM activities. The expected effects to be considered and discussed includes, but are not limited to, the following:

a. Effects on the utility (supply side effects):
   1. Operations;
   2. Maintenance;
   3. Environmental compliance;
   4. Capacity planning, including deferment of capacity and reliability of capacity;
   5. DSM equipment including purchase, operation and maintenance considerations;
   6. Transmission and distribution effects;
   7. Administrative costs, including administrative and general costs, program costs, DSM planning costs, integration of supply and DSM planning, marketing costs, incentive costs, infrastructure support, monitoring and evaluation costs, bidding costs; and
   8. Revenues and rates;

b. Effects on consumers (demand side effects):
   1. Equipment purchases;
   2. Operation costs;
   3. Maintenance costs;
   4. Supply voltage quality;
   5. Availability of service and reliability (outages);
   6. Change in benefits received from appliances and housing;
   7. Convenience (availability of equipment, appliances and services);
   8. Change in comfort and air quality levels of buildings; and
   9. Rates, billing level and elasticity;
   c. Effects on competitiveness;
   d. Effects on other member distribution systems of the power supply borrower; and
   e. Effects on power supply borrower.

§ 1710.360 Submittal of alternate documentation.

a. The borrower may have performed analysis and prepared comparable documentation for other purposes, such as for a state regulatory commission. This information may be acceptable to RUS as an IRP or a DSM plan if the borrower demonstrates that the alternative information meets the goals and objectives of this subpart.

b. The borrower shall advise RUS of all material information provided to other lenders or other governmental authorities relating to their DSM plans. This information shall be provided to RUS as requested.

§ 1710.361 Type and term of loans.

a. The final maturity of loans for purposes under this subpart shall be determined by RUS based on the expected life of needed capital improvements, expected cost recovery periods, the expected life of program benefits, the certainty of these benefits, and matching costs and benefits.

b. RUS will normally consider final maturities for DSM loans of up to 5 years. Longer loan terms, not to exceed 10 years, for loans for these purposes will be considered if the borrower can satisfactorily demonstrate to the Administrator an acceptable basis for doing so and can demonstrate that the loan will be feasible and secure pursuant to §§1710.112 and 1710.113, respectively, for the longer period. As used in
this paragraph, renewable energy resource equipment and facilities are not considered a DSM purpose. Maturities for such loans will be limited to the expected useful life of the equipment and facilities.

§ 1710.362 Loan approval.
The amount and scope of loans approved by RUS under this subpart are subject to the discretion of RUS. Applications will be evaluated on the merits of the proposals as outlined in the plans specified in this subpart. RUS approval of a loan for purposes under this subpart and/or RUS approval of IRPs and DSM plans does not relieve a borrower of its responsibilities under this subpart or constitute a representation or warranty by RUS to the borrower or any person that its IRP or DSM plan will work as described therein.

§ 1710.363 Advance and documentation of use of loan funds.
(a) Loan funds for on-grid renewable energy systems will be advanced using the same procedure as loans for other electric system facilities.
(b) Loan funds for DSM activities.
(1) Funds for these purposes shall be advanced and used only for the specific projects and purposes detailed in the loan application and supporting documents. Generally funds shall be drawn down on a reimbursement basis. The borrower shall certify completion of work according to the DSM plan.
(2) The borrower shall maintain accounting and plant records sufficient to document the cost and location of DSM activities and to support loan fund advances and disbursements.
(3) All cost associated with DSM projects related to construction, operations or maintenance, shall be accumulated using the borrower's work order procedure. An individual work order or work orders shall be used to record and control the costs of each DSM project. Daily time and material reports referenced to the DSM activity shall be kept to record labor and materials used as the activity(ies) is completed.
(4) All other disbursements for DSM activities must be properly supported by invoices, contracts, or other forms of evidence required by RUS regulations. All such supporting material shall be available at the borrower's premises for review by the RUS Field Accountant, borrower's certified public accountant and other authorized parties as applicable. Costs of DSM activities related to operations and maintenance should be charged to expense in the month incurred. Departures from this prescribed accounting must be approved by RUS subject to the provisions of 7 CFR 1767.13.
(c) Requirements on advance of funds for all insured electric loans are in 7 CFR part 1721, subpart B.

§ 1710.364 Loan limits.
Cumulative loans DSM activities at the time of loan approval for, including energy conservation programs and off-grid renewable energy systems, shall not exceed the lesser of:
(a) Twenty percent of the borrower's equity at the time of the loan or any time during amortization of the loan; or
(b) An amount approved for such purposes in a final non-appealable order by the applicable regulatory body for inclusion in the borrower's rate base.

Subpart I—Application Requirements and Procedures for Insured and Guaranteed Loans

SOURCE: 60 FR 3731, Jan. 19, 1995, unless otherwise noted.

§ 1710.400 Initial contact.
(a) Loan applicants that do not have outstanding loans from RUS should write to the Rural Utilities Service Administration, United States Department of Agriculture, Washington, DC 20250-1500. A field or headquarters staff representative may be assigned by RUS to visit the applicant and discuss its financial needs and eligibility. Borrowers that have outstanding loans should contact their assigned RUS general field representative (GFR) or, in the case of a power supply borrower, the Director, Power Supply Division. Borrowers may consult with RUS field representatives and headquarters staff, as necessary.
(b) Before submitting an application for an insured loan the borrower shall
§ 1710.401 Loan application documents.

(a) All borrowers. All applications for electric loans shall include the documents listed in this paragraph. The first page of the application shall be a list of the documents included in the application. The borrower may use RUS Form 726, Checklist for Electric Loan Application, or a computer generated equivalent as this list.

(1) Transmittal letter. A letter signed by the borrower's manager indicating the actual corporate name and taxpayer identification number of the borrower and addressing the following items:

(i) The need for flood hazard insurance;

(ii) Breakdown of requested loan funds by state;

(iii) A listing of the counties served by the borrower;

(iv) A listing of threatened actions by third parties that could adversely affect the borrower's financial condition, including annexations or other actions affecting service territory, loads, or rates; and

(v) A listing of pending regulatory proceedings pertaining to the borrower.

(2) Board resolution. This document is the formal request by the borrower’s board of directors for a loan from RUS. The board resolution shall include:

(i) The requested loan amount, loan term, final maturity, and method of amortization (§1710.110(b));

(ii) The sources and amounts of any supplemental or other financing;

(iii) Authorization for RUS to release appropriate information to supplemental or other lender(s), and authorization for these lenders to release appropriate information to RUS; and

(iv) For an insured loan, a statement of whether the application is for a municipal rate loan, with or without the interest rate cap, or a hardship loan. If the application is for a municipal rate loan, the board resolution must indicate whether the borrower intends to elect the prepayment option. See 7 CFR 1714.4(c).

(3) RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers. This form together with its attachments lists the construction, equipment, facilities and other cost estimates from the construction work plan or engineering and cost studies, and the sources of financing for each component. The date on page 1 of the form is the beginning date of the loan period and shall be the same as the date on the Financial and Statistical Report submitted with the application (paragraph (a)(5) of this section). Form 740c also includes the following information, exhibits, and attachments:

(i) Description of funds and materials. This description details the availability of materials and equipment, any unadvanced funds from prior loans, and any general funds the borrower designates, to determine the amount of such materials and funds to be applied against the capital requirements estimated for the loan period.

(ii) Useful life of facilities financed by the loan. Form 740c must include, as a note, either a statement certifying that at least 90 percent of the loan funds are for facilities that have a useful life of 33 years or longer, or a schedule showing the costs and useful life of those facilities with a useful life of less than 33 years. This statement or schedule will be used to determine the final maturity of the loan. See §1710.115.

(iii) Reimbursement schedule. This schedule lists the date, amount, and identification number of each inventory of work orders and special equipment summary that form the basis for the borrower’s request for reimbursement. This schedule shall be submitted with the application. If the borrower is not requesting reimbursement, this schedule need not be submitted.

(iv) Location of consumers. If the application is for a municipal rate loan subject to the interest rate cap, or for a loan at the hardship rate, and the average number of consumers per mile of the total electric system exceeds 17,
Form 740c must include, as a note, a breakdown of funds included in the proposed loan to furnish or improve service to consumers located in an urban area. See 7 CFR 1714.7(c) and 1714.8(d). This breakdown must indicate the method used by the borrower for allocating loan funds between urban and non-urban consumers.

(4) RUS Form 740g, Application for Headquarters Facilities. This form lists the individual cost estimates from the construction work plan or other engineering study that support the need for RUS financing for any warehouse and service type facilities included, and funding requested for such facilities shown on RUS Form 740c. If no loan funds are requested for headquarters facilities, Form 740g need not be submitted.

(5) Financial and statistical report. Distribution borrowers shall submit these data on RUS Form 7; power supply borrowers shall use RUS Form 12. The form shall contain the most recent data available, which shall not be more than 60 days old when received by RUS.

(6) Pending litigation statement. A statement from the borrower’s counsel listing any pending litigation, including levels of related insurance coverage and the potential effect on the borrower. This statement and the statements from counsel required by paragraphs (a)(7) and (15) of this section may be combined into a single document.

(7) Mortgage information. A new mortgage will be required if this is a borrower’s first application for a loan under the RE Act. A restated mortgage, or a mortgage supplement will be required if there has been a material change to the real property owned by the borrower since the most recent RUS loan, loan guarantee, or lien accommodation, if the requested loan would cause the borrower to exceed its previously authorized debt limit, or if RUS otherwise determines it necessary. If there has been no material change to the real property owned by the borrower since the most recent RUS loan or loan guarantee, the borrower must submit an opinion of its counsel to that effect. If a new or restated mortgage or a mortgage supplement is required, the borrower must provide the following:

(i) Property schedule. For a new or restated mortgage or for a mortgage supplement, the following information shall be submitted in a form satisfactory to RUS:

(A) A listing of the counties where the borrower’s existing electric facilities and new facilities are or will be located;

(B) A listing and description of all real property owned by the borrower; and

(C) An opinion of the borrower’s counsel certifying that the property schedule is complete and adequate for inclusion in a security instrument to be executed by the borrower to secure an RUS loan.

(ii) Maximum debt limit. For a new mortgage, or if the proposed loan would result in the borrower’s existing mortgage debt limit being exceeded, a resolution of the borrower’s board of directors, and any other authorizations or certifications required by State law, certifying that a new debt limit has been legally established that is adequate to accommodate existing indebtedness and the proposed new financing, including any concurrent loans.

(8) Rate disparity and consumer income data. If the borrower is applying under the rate disparity and consumer income tests for either a municipal rate loan subject to the interest rate cap or a hardship rate loan, the application must provide a breakdown of residential consumers either by county or by census tract. In addition, if the borrower serves in 2 or more states, the application must include a breakdown of all ultimate consumers by state. This breakdown may be a copy of Form EIA 861 submitted by the Borrower to the Department of Energy or in a similar form. See 7 CFR 1714.7(b) and 1714.8(a). To expedite the processing of loan applications, RUS strongly encourages distribution borrowers to provide this information to the GFR prior to submitting the application.

(9) Standard Form 100—Equal Employment Opportunity Employer Report EEO—1. This form, required by the Department of Labor, sets forth employment data for borrowers with 100 or more employees. A copy of this
form, as submitted to the Department of Labor, is to be included in the application for an insured loan if the borrower has more than 100 employees. See §1710.122.

(10) Form AD–1047, Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions. This statement certifies that the borrower will comply with certain regulations on debarment and suspension required by Executive Order 12549, Debarment and Suspension (3 CFR, 1986 Comp., p. 189). See 7 CFR part 3017 and §1710.123.

(11) Uniform Relocation Act assurance statement. This assurance, which need not be resubmitted if previously submitted, provides that the borrower shall comply with 49 CFR part 24, which implements the Uniform Relocation Assistance and Real Property Acquisition Policy Act of 1970, as amended by the Uniform Relocation Act Amendments of 1987 and 1991. See §1710.124.

(12) Lobbying. The following information on lobbying is required pursuant to 7 CFR part 3018 and §1710.125. Borrowers applying for both insured and guaranteed financing should consult RUS before submitting this information.

(i) Certification regarding lobbying. This statement certifies that the borrower shall comply with certain requirements with respect to restrictions on lobbying activities.

(ii) Standard Form LLL—Disclosure of Lobbying Activities. This disclosure form is required from those borrowers engaged in lobbying activities.

(13) Federal debt delinquency requirements. See §1710.126. The following documents are required:

(i) Report on Federal debt delinquency. This report indicates whether or not a borrower is delinquent on any Federal debt.

(ii) Certification Regarding Federal Government Collection Options. This statement certifies that a borrower has been informed of the collection options the Federal Government may use to collect delinquent debt. The Federal Government is authorized by law to take any or all of the following actions in the event that a borrower’s loan payments become delinquent or the borrower defaults on its loans:

(A) Report the borrower’s delinquent account to a credit bureau;

(B) Assess additional interest and penalty charges for the period of time that payment is not made;

(C) Assess charges to cover additional administrative costs incurred by the Government to service the borrower’s account;

(D) Offset amounts owed directly or indirectly to the borrower under other Federal programs;

(E) Refer the borrower’s debt to the Internal Revenue Service for offset against any amount owed to the borrower as an income tax refund;

(F) Refer the borrower’s account to a private collection agency to collect the amount due; and

(G) Refer the borrower’s account to the Department of Justice for collection.

(14) Articles of incorporation and by-laws. The following are required if either document has been amended since the last loan application was submitted to RUS, or if this is a borrower’s first application for a loan under the RE Act.

(i) The borrower’s articles of incorporation currently in effect, as filed with the appropriate state office, setting forth the borrower’s corporate purpose; and

(ii) The bylaws currently in effect, as adopted by the borrower’s board of directors, setting forth the manner by which the borrower’s organization will be governed and regulated.

(15) State regulatory approvals. In states in which regulatory authorities have jurisdiction over the borrower’s rates, the borrower must provide satisfactory evidence, pursuant to §§1710.105 and 1710.151(f), based on the information available, such as an opinion of counsel or of another qualified source, that the state regulatory authority will not exclude from the borrower’s rate base any of the facilities included in the loan request, or otherwise prevent the borrower from charging rates sufficient to repay with interest the debt incurred for the facilities.

(16) Seismic safety certifications. This certification shall be included, if required under 7 CFR part 1792.
(17) Rates. (i) A distribution borrower shall explain any recent or planned changes in retail rates, the status of any pending rate cases before a state regulatory authority, or other pertinent rate information.

(ii) A power supply borrower shall submit a schedule of its wholesale rates currently in effect. Any changes in this schedule are subject to RUS approval.

(18) Additional supporting data. Additional supporting data may be required by RUS depending on the individual application or conditions. Examples of such additional supporting data include information about acquisitions, headquarters facilities, generation or transmission facilities, large power loads or special loads.

(b) Distribution borrowers. In addition to the items in paragraph (a) of this section, applications for loans submitted by distribution borrowers shall include the borrower’s area coverage and line extension policies. If there have been any amendments to area coverage or line extension policies since the last loan application submitted to RUS, or if this is a borrower’s first application for a loan under the RE Act, the borrower shall submit the board of directors’ approved policies on area coverage and line extensions. See §§1710.103 and 1710.151(a).

(c) Primary support documents. In addition to the loan application, consisting of the documents required by paragraphs (a) and (b) of this section, all borrowers must also provide RUS with the following primary support documents pursuant to §1710.152:

(1) Along with the loan application, the borrower shall submit to RUS a Long-Range Financial Forecast (LRFF), that meets the requirements of subpart G of this part. The forecast shall include any sensitivity analysis or analysis of alternative scenarios required by subpart G of this part, and shall be accompanied by a certified board resolution adopting, and indicating the board of directors’ approval of, the LRFF, and directing management to take whatever steps may be necessary, including the filing for rate increases, to achieve the TIER goals set forth in the LRFF.

(2) Prior to RUS’s acceptance of the loan application, the borrower shall submit to RUS and receive approval of:

(i) Power Requirements Study (PRS) that meets the requirements of subpart E of this part, and is accompanied by a certified board resolution adopting, and indicating the board of directors’ approval of, the PRS.

(ii) Construction Work Plan (CWP) and/or related engineering and cost studies that meets the requirements of subpart F of this part, and is accompanied by a certified board resolution adopting, and indicating the board of directors’ approval of, the CWP and/or engineering and cost studies.

(iii) Borrower’s Environmental Report (BER), or other environmental information as required by 7 CFR part 1794.

(iv) Demand Side Management Plan and/or Integrated Resource Plan, if required by subpart H of this part.

(d) Submission of documents. (1) Generally, all information required by paragraphs (a), (b), and (c)(1) of this section is submitted to RUS in a single application package. The information required by paragraph (c)(2) of this section is generally submitted to, and approved by RUS before the application is submitted.

(2) To facilitate loan review, RUS urges borrowers to ensure that their applications contain all of the information required by this section before submitting the application to RUS. Borrowers may consult with RUS field representatives and headquarters staff as necessary for assistance in preparing loan applications.

(3) RUS may, in its discretion, return an application to the borrower if the application is not materially complete to the satisfaction of RUS within 10 months of receipt of any of the items listed in paragraph (a) or (b) of this section. RUS will generally advise the borrower in writing at least 2 months prior to returning the application as to the elements of the application that are not complete.

(4) If an application is returned, an application for the same loan purposes will be accepted by RUS if satisfactory evidence is provided that all of the information required by this section will
be submitted to RUS within a reasonable time. An application for loan purposes included in an application previously returned to the borrower will be treated as an entirely new application.

(e) Complete applications. An application is complete when all information required by RUS to approve a loan is materially complete in form and substance satisfactory to RUS.

(f) Change in borrower circumstances. A borrower shall, after submitting a loan application, promptly notify RUS of any changes in its circumstances that materially affect the information contained in the loan application or in the primary support documents.

(g) Interest rate category. For pending loans, RUS will promptly notify the borrower if its eligibility for an interest rate category changes pursuant to new information from the Department of Energy or the Bureau of the Census. See 7 CFR part 1714.

§§ 1710.402—1710.403 [Reserved]

§ 1710.404 Additional requirements.

Additional requirements for insured electric loans are set forth in 7 CFR part 1714.

§ 1710.405 Supplemental financing documents.

(a) The borrower is responsible for ensuring that the loan documents required for supplemental financing pursuant to §1710.110 are executed in a timely fashion. These documents are subject to RUS approval.

(b) Security. Any security offered by the borrower to a supplemental lender is subject to RUS approval.

§ 1710.406 Loan approval.

(a) A loan is approved when the Administrator signs the administrative findings.

(b) If the loan is not approved, RUS will notify the borrower of the reason.

§ 1710.407 Loan documents.

Following approval of a loan, RUS will forward the loan documents to the borrower for execution, delivery, recording, and filing, as directed by RUS.
§ 1714.5 Determination of interest rates on municipal rate loans.

(a) RUS will publish a schedule of interest rates for municipal rate loans in the FEDERAL REGISTER at the beginning of each calendar quarter. The schedule will show the year of maturity and the applicable interest rates in effect for all advances on municipal rate loans during the calendar quarter and all interest rate terms beginning in the quarter. All interest rates will be adjusted to the nearest one eighth of one percent (0.125 percent).

(b) The rate for interest rate terms of 20 years or longer will be the average of the 20 year rates published in the Bond Buyer in the 4 weeks specified in paragraph (d) of this section for the “11-Bond GO Index” of Aa rated general obligation municipal bonds, or the successor to this index.

(c) The rate for terms of less than 20 years will be the average of the rates published in the Bond Buyer in the 4 weeks specified in paragraph (d) of this section in the table of “Municipal Market Data—General Obligation Yields” for Aa rated bonds, or the successor to this table, for obligations maturing in the same year as the interest rate term selected by the borrower.

(d) The interest rates on municipal rate loans shall not exceed the interest rate determined under section 307(a)(3)(A) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1927(a)(3)(A)) for Water and Waste Disposal loans. The method used to determine this rate is set forth in the regulations of the Farmers Home Administration (FmHA) at 7 CFR 1942.17(f) (1) and (4). Pursuant to the FmHA rule, the interest rates are set using as guidance the average of the Bond Buyer Index for the four weeks prior to the first Friday of the last month before the beginning of the quarter. Information about the Bond Buyer is available by writing Bond Buyer, One State Street Plaza, New York, NY 10004-1549, or by calling 1-800-962-0633.
§ 1714.6 Interest rate term.

(a) Municipal rate loans. Selection of interest rate terms shall be made by the borrower for each advance of funds. The minimum interest rate term shall be one year. RUS will send the borrower written confirmation of each rollover maturity date and the applicable interest rate.

(1) The initial interest rate term will begin on the date of the advance. All rollover interest rate terms will begin on the first day of a month, and except for the last interest rate term to final maturity, shall end on the last day of a month. All terms except for the initial interest rate term on an advance, and the last term to final maturity shall be in yearly increments.

(2) The following limits apply to the number of advances of funds that may be made to the borrower on any municipal rate loan:

(i) If the loan period is 2 years or less, not more than 6 advances;

(ii) If the loan period is more than 2 years, not more than 8 advances.

(3) For the initial interest rate term of an advance, a letter from an authorized official of the borrower indicating the selection of the term shall accompany the request for the advance.

(4) At the end of any interest rate term, the borrower shall pay all accrued interest and principal balance then due, and either prepay the remaining principal of the advance at face value, or roll over the remaining principal for a new term, provided that no interest rate term may end later than the date of the final maturity.

(i) If the borrower elects to prepay all or part of the remaining principal of the advance at face value, it must notify the Director of the appropriate Regional Division or the Power Supply Division in writing not later than 20 days before the rollover maturity date.

(ii) If the borrower wishes to elect a new interest rate term that is different from the term previously selected, it must notify RUS in writing of the new term not later than 20 days before the end of the current term. The election of the new term shall be addressed to the Director, Financial Operations Division, Rural Utilities Service, Washington, DC 20250-1500.

(iii) If the borrower fails to notify RUS within the timeframes set out in this paragraph of its intention to prepay or elect a different interest rate term, RUS will automatically roll over the remaining principal for the shorter of, and at the interest rate applicable to:

(A) A period equal in length to the term that is expiring; or

(B) The remaining period to final maturity.

(b) Hardship rate loans. Loans made at the 5 percent hardship rate are made for a single term that cannot exceed the final maturity as set forth in 7 CFR 1710.115. The hardship interest rate applies to the entire amount of the loan.

[58 FR 66260, Dec. 20, 1993, as amended at 60 FR 3734, Jan. 19, 1995]

§ 1714.7 Interest rate cap.

Except as provided in paragraph (c) of this section, the municipal interest rate may not exceed 7 percent on a loan advance to a borrower primarily engaged in providing retail electric service if the borrower meets, at the time of loan approval, either the consumer density test set forth in paragraph (a) of this section, or both the rate disparity test for the interest rate cap and the consumer income test set forth in paragraph (b) of this section.

(a) Low consumer density test. The borrower meets this test if the average number of consumers per mile of line of its total electric system, based on the most recent data available at the time of loan approval is less than 5.50.

(b)(1) Rate disparity test for the interest rate cap. The borrower meets this test if its average revenue per kWh sold is more than the average revenue per kWh sold by all electric utilities in the state in which the borrower provides service. To determine whether a borrower meets this test, RUS will compare the borrower's average total revenue with statewide data in the table of Average Revenue per Kilowatthour for Electric Utilities by Sector, Census Division and State, in the Electric Power Annual issued by the Energy Information Administration of the Department of Energy (DOE), or the successor to this table. The test will be based on the most recent calendar year for which full year DOE data are available at the
time of loan approval and borrower data for the same year.

(2) Consumer income test. The borrower meets this test if either the average per capita income of the residents receiving electric service from the borrower is less than the average per capita income of residents of the state in which the borrower provides service or the median household income of the households receiving electric service from the borrower is less than the median household income of the households in the state.

(i) To qualify under the consumer income test, the borrower must include in its loan application information about the location of its residential consumers. The borrower must provide to RUS, based on the most recent data available at the time of loan application, either the number of consumers in each county it serves or the number of consumers in each census tract it serves. Using the most recently published decennial census data on income from the Bureau of the Census, RUS will compare, on a weighted average basis, the average per capita and median household income of the counties or census tracts served by the borrower with state figures.

(ii) In cases where conditions have substantially changed so that the decennial census data no longer accurately describes the economic conditions of the borrower’s consumers, the borrower may provide RUS with more current income data from a reliable source such as a State agency. The Administrator has the sole discretion to determine whether such data submitted by the borrower is sufficient to determine whether the borrower qualifies under the consumer income test.

(3) Borrowers serving 2 or more states. If a borrower serves consumers in 2 or more states, the rate disparity test and the consumer income test will be determined on a weighted average basis, the percentage of the borrower’s total consumers that are served in each state.

(b) High density test. If the average number of consumers per mile of the borrower’s total electric system exceeds 17, the interest rate cap will not apply to funds used for the purpose of furnishing or improving electric service to consumers located in an area that is an urban area at the time of loan approval, notwithstanding that the area must have been deemed a rural area for the purpose of qualifying for a loan under this part. (See the definition of "rural area" in 7 CFR 1710.2.) If the average number of consumers per mile of line of the borrower’s total electric system exceeds 17, the borrower must include, as a note on RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers, submitted as part of the loan application for a loan subject to the interest rate cap, a breakdown of funds included in the proposed loan to furnish or improve service to consumers located in such urban areas. For such borrowers only funds for those facilities serving consumers located outside an urban area are eligible for the interest rate cap.

§ 1714.8 Hardship rate loans.

Except as provided in paragraph (d) of this section, the Administrator shall make an insured electric loan for eligible purposes at the 5 percent hardship rate to a borrower primarily engaged in providing retail electric service if the borrower meets, at the time of loan approval, both the rate disparity test for hardship and the consumer income test described in paragraph (a) of this section; or the extremely high rates test set forth in paragraph (b) of this section. A loan at the 5 percent hardship rate may also be made to any borrower pursuant to paragraph (c) of this section who, in the sole discretion of the Administrator, has experienced a severe hardship. The Administrator may not require a loan from a supplemental source in connection with a hardship rate loan.

(a)(1) Rate disparity test for hardship. The borrower meets this test if its average revenue per kWh sold is not less than 120 percent of the average revenue per kWh sold by all electric utilities in the state in which the borrower provides service, and its average residential revenue per kWh is not less than 120 percent of the average residential revenue per kWh sold by all electric utilities in the state in which the borrower provides service. To determine whether a borrower meets this test,
RUS will compare the borrower’s average total revenue and average residential revenue with statewide data in the table of Average Revenue per Kilowatthour for Electric Utilities by Sector, Census Division and State, in the Electric Power Annual issued by the Energy Information Administration of the Department of Energy (DOE), or the successor to this table. The test will be based on the most recent calendar year for which full year DOE data are available at the time of loan approval and borrower data for the same year.

(2) Consumer income test. The borrower meets this test if either the average per capita income of the residents receiving electric service from the borrower is less than the average per capita income of the residents of the state in which the borrower provides service or the median household income of the residents receiving electric service from the borrower is less than the median household income of the households in the state. RUS will determine whether the borrower qualifies under this test according to the procedure set forth in §1714.7(b)(2).

(3) Borrowers serving 2 or more states. If a borrower serves consumers in 2 or more states, the rate disparity test and the consumer income tests will be determined on a weighted average based on the percentage of the borrower’s total consumers that are served in each state.

(b) Extremely high rates test. Except as provided in this paragraph, the Administrator shall make an insured electric loan at the 5 percent hardship rate to any borrower whose residential revenue exceeds 15.0 cents per kWh sold. Residential revenue shall be calculated for the most recent full calendar year for which data are available and shall include sales to both seasonal and non-seasonal consumers. If, at the time of loan approval, the area to be served is an urbanized area (notwithstanding that the area must be deemed a rural area to qualify for a loan under this part (See the definition of “rural area” in 7 CFR 1710.2), then the borrower must include, as a note on RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers, submitted as part of the loan application for a loan at the 5 percent hardship rate, a breakdown of funds included in the proposed loan to furnish or improve service to consumers located outside an urbanized area. If the area to be served is outside an urbanized area, the loan shall not be subject to the conditions and limitations set forth in paragraphs (a) and (d) of this section.

(c) Administrator’s discretion. The Administrator may make a hardship rate loan if, in the sole discretion of the Administrator, the borrower has experienced a severe hardship. The Administrator shall consider, among other matters, whether factors beyond the control or substantial influence of the borrower have had a severe adverse effect on the borrower’s ability to provide service consistent with the purposes of the RE Act, and which prudent management could not reasonably anticipate and either prevent or insure against. Among the factors that may be considered are system damage due to unusual weather or other natural disasters or Acts of God, loss of substantial loads, extreme rate disparity compared to a contiguous utility, and other factors that cause severe financial hardship. The Administrator will also consider whether a hardship rate loan will provide significant relief to the borrower in dealing with the severe hardship.

(d) High density test. Except as provided in paragraph (b) of this section, if the average number of consumers per mile of the borrower’s total electric system exceeds 17, the 5 percent hardship rate will not apply to funds used for the purpose of furnishing or improving electric service to consumers located in an area that is an urban area at the time of loan approval, notwithstanding that the area must have been deemed a rural area for the purpose of qualifying for a loan under this part. (See the definition of “rural area” in 7 CFR 1710.2) If the average number of consumers per mile of line of the borrower’s total electric system exceeds 17, the borrower must include, as a note on RUS Form 740c, Cost Estimates and Loan Budget for Electric Borrowers, submitted as part of the loan application for a loan at the 5 percent hardship rate, a breakdown of funds included in the proposed loan to furnish or improve service to consumers located in urban areas. For such borrowers only funds for those facilities serving consumers located outside
an urban area are eligible for the 5 percent hardship rate.

(Approved by the Office of Management and Budget under control number 0572-1013.)

§ 1714.56 Fund advance period.

(a) For loans approved on or after February 21, 1995, the fund advance period begins on the date of the loan note and is one year longer than the loan period, but not less than 4 years. For example, the fund advance period for a loan with a 2-year loan period terminates automatically 4 years after the date of the loan note; a loan with a 4-year loan period terminates automatically 5 years after the date of the loan note. The Administrator may extend the fund advance period on any loan if the borrower meets the requirements of paragraph (c) of this section. As defined in 7 CFR 1710.2, the loan period begins on the date shown on page 1 of RUS Form 740c submitted with the loan application.

(b) For loans approved on or after June 1, 1984, and before February 21, 1995, the fund advance period begins on the date of the loan contract, or the most recent amendment thereto, and terminates automatically 4 years from the date of the loan contract, or the most recent amendment thereto, except as provided in paragraph (c) of this section.

(c) The Administrator may agree to an extension of the fund advance period for loans approved on or after June 1, 1984, if the borrower demonstrates to the satisfaction of the Administrator that the loan funds continue to be needed for approved loan purposes (i.e., facilities included in an RUS approved construction work plan). Policies for extension of the fund advance period following certain mergers, consolidations, and transfers of systems substantially in their entirety are set forth in 7 CFR 1717.156.

(1) To apply for an extension, the borrower must send to RUS, at least 120 days before the automatic termination date, the following:

(i) A certified copy of a board resolution requesting an extension of the Government's obligation to advance loan funds;
§ 1714.57 Sequence of advances.
(a) Except as set forth in paragraph (b) of this section, concurrent loan funds will be advanced in the following order:
(1) 50 percent of the RUS insured loan funds;
(2) 100 percent of the supplemental loan funds;
(3) The remaining amount of the RUS insured loan funds.
(b) At the borrower’s request and with RUS approval, all or part of the supplemental loan funds may be advanced before funds in paragraph (a)(1) of this section.

§ 1714.58 Amortization of principal.
(a) For insured loans approved on or after February 21, 1995:
(1) Amortization of funds advanced during the first 2 years after the date of the note shall begin no later than 2 years from the date of the note. Except as set forth in paragraph (a)(2) of this section, amortization of funds advanced 2 years or more after the date of the note shall begin with the scheduled loan payment billed in the month following the month of the advance.
(2) For advances made 2 years or more after the date of the note, the Administrator may authorize deferral of amortization of principal for a period of up to 2 years from the date of the advance if the Administrator determines that failure to authorize such deferral would adversely affect either the Government’s financial interest or the achievement of the purposes of the RE Act.
(b) For insured loans approved before February 21, 1995, amortization of principal shall begin 2 years after the date of the note for advances made during the first and second years of the loan, and 4 years after the date of the note for advances made during the third and fourth years.

§ 1714.59 Rescission of loans.
(a) A borrower may request rescission of a loan with respect to any funds unadvanced by submitting a certified copy of a resolution by the borrower’s board of directors.
(b) RUS may rescind loans pursuant to §1714.56.
(c) Borrowers who prepay RUS loans at a discounted present value pursuant to 7 CFR part 1786, subpart F, are required to rescind the unadvanced balance of all outstanding electric notes pursuant to 7 CFR 1786.158().

1717.855 Application contents: Advance approval—100 percent private financing of distribution, subtransmission and headquarters facilities, and certain other community infrastructure.
1717.856 Application contents: Normal review—100 percent private financing.
1717.857 Refinancing of existing secured debt—distribution and power supply borrowers.
1717.858 Lien subordination for rural development investments.
1717.859 Application process and timeframes.
§ 1717.150 General.

(a) This subpart establishes RUS policies and procedures for mergers of electric borrowers. These policies and procedures are intended to provide borrowers with the flexibility to negotiate and enter into mergers that offer advantages to the borrowers and to rural communities, and adequately protect the integrity and credit quality of RUS loans and loan guarantees.

(b) Consistent with prudent lending practices, the maintenance of adequate security for RUS loans and loan guarantees, and the objectives of the Rural Electrification Act of 1936, as amended, (7 U.S.C. 901 et seq.) (RE Act), RUS encourages electric borrowers to consider mergers when such action is likely to contribute, in the long-term, to greater operating efficiency and financial soundness. Borrowers are specifically encouraged to explore mergers that are likely to enhance the ability of the successor to provide reliable electric service at reasonable cost to RE Act beneficiaries.

(c) Pursuant to the loan documents and RUS regulations, certain mergers are subject to RUS approval. See § 1717.615.

(d) Since RUS must take action in order to advance funds and otherwise conduct business with a successor, RUS encourages borrowers to consult RUS early in the process regardless of whether RUS approval of the merger is required. RUS will provide technical assistance and guidance to borrowers to help expedite the processing of their requests and to help resolve potential problems early in the process.

§ 1717.151 Definitions.

The definitions set forth in 7 CFR 1710.2 are applicable to this subpart unless otherwise stated. In addition, for the purpose of this subpart, the following terms shall have the following meanings:

Active borrower means an electric borrower that has, on the effective date, an outstanding insured or guaranteed loan from RUS for rural electrification, and whose eligibility for future RUS financing is not restricted pursuant to 7 CFR part 1786.

Active distribution borrower means an electric distribution borrower that has,
on the effective date, an outstanding insured or guaranteed loan from RUS for rural electrification, and whose eligibility for future RUS financing is not restricted pursuant to 7 CFR part 1786.

Consolidation. See Merger.

Coverage ratios means collectively TIER, OTIER, DSC and ODSC, as these terms are defined in 7 CFR 1710.2.

Effective date means the date a merger is effective pursuant to applicable state law.

Former distribution borrower means any organization that
(1) Sells or intends to sell electric power and energy at retail;
(2) At one time had an outstanding loan made or guaranteed by RUS, or its predecessor the Rural Electrification Administration (REA) for rural electrification; and
(3) Either repaid such loans at face value or prepaid pursuant to 7 CFR part 1786.

Loan documents means the mortgage (or other security instrument acceptable to RUS), the loan contract, and the promissory note(s) entered into between the borrower and RUS.

Merger means: (1) A consolidation where two or more companies are extinguished and a new successor is created, acquiring the assets, liabilities, franchises and powers of those passing out of existence;
(2) A merger where one company is absorbed by another, the former ceasing to exist as a separate business entity, and the latter retaining its own identity and acquiring the assets, liabilities, franchises and powers of the former; or
(3) A transfer of mortgaged property by one company to another where the transferee acquires substantially as an entirety the assets, liabilities, franchises, and powers of the transferor.

New loan means a loan to a successor approved by RUS on or after the effective date.

Preexisting loan means a loan to a borrower approved by RUS prior to, and outstanding on the effective date.

Successor means the entity that continues as the surviving business entity as of the effective date, and acquires all the assets, liabilities, franchises, and powers of the entity or entities ceasing to exist as of the effective date.

Transitional assistance means financial relief provided to borrowers by RUS during a limited period of time following a merger.

§ 1717.152 Required documentation for all mergers.

In order for RUS to advance funds, send bills, and otherwise conduct business with a successor, the documents listed in this section must be submitted to RUS regardless of the need for RUS approval of the merger. Borrowers are responsible for ensuring that these documents are received by RUS in timely fashion. In cases of mergers that require RUS approval, or cases where borrowers must submit requests for transitional assistance, the documents listed in this section may be combined with the documents required by §§1717.157 and/or 1717.160 where appropriate.

(a) Prior to the effective date, borrowers must submit:
(1) A transmittal letter on corporate letterhead signed by the manager of each active borrower that is a party to the proposed merger indicating the borrower’s intention to merge and tentative timeframes, including the proposed effective date;
(2) An original certified board resolution from each party to the proposed merger affirming the board's support of the merger;
(3) All documents necessary to evidence the merger pursuant to applicable law. Examples include plan of merger, articles of merger, amended articles of incorporation, bylaws, and notices and filings required by law. These documents may be copies of documents filed elsewhere, unless otherwise specified by RUS; and
(4) A letter addressed to the Administrator from the counsel of at least one of the active borrowers briefly describing the merger and indicating the relevant statutes under which the merger will be consummated.

(b) On or after the effective date, borrowers must submit:
(1) An opinion of counsel from the successor addressing, among other things, any pending litigation, proper authorization and consummation of the merger, proper filing and perfection of RUS' security interest, and all.
approvals required by law. RUS will provide the form of the opinion of counsel to the successor;
(2) A letter signed by the manager of the successor advising RUS of the effective date of the merger; the corporate name, address, and phone number; the names of the officers of the successor; and the taxpayer identification number; and
(3) Evidence of proper filing and perfection of RUS’ security interest, as instructed by RUS, and an executed loan contract.

§ 1717.153 Transitional assistance.
RUS recognizes that short-term financial stresses can follow even the most beneficial mergers. To help stabilize electric rates, enhance the credit quality of outstanding loans made or guaranteed by the Government, and otherwise ease the transition period before the long-term efficiencies and economies of a merger can be realized, RUS may approve one or more types of transitional assistance to a successor under the conditions set forth in this part.

§ 1717.154 Transitional assistance in connection with new loans.
Requests for transitional assistance in connection with new loans may be submitted to RUS no later than the loan application.
(a) Loan processing priority. (1) RUS loans are generally processed in chronological order based on the date the complete application is received in the regional or division office. At the borrower’s request, RUS will offer loan processing priority for the first loan to a successor, provided that the loan is approved by RUS not later than 5 years after the effective date of the merger. For any subsequent loans approved during those 5 years, RUS may offer one or more types of transitional assistance to a successor under the conditions set forth in this part.
(b) Supplemental financing. (1) RUS generally requires that an applicant for a municipal rate loan obtain a portion of its debt financing from a supplemental source without an RUS guarantee. See 7 CFR 1710.110. RUS will, at the borrower’s request, waive the requirement to obtain supplemental financing for the first RUS loan approved after the effective date if that first loan is a municipal rate loan whose loan period does not exceed 2 years, and the loan is approved by RUS not later than 5 years after the effective date. For any subsequent loans approved during these 5 years, or if the borrower requests a loan period longer than 2 years, RUS may, subject to the availability of loan funds, waive or reduce the amount of supplemental financing required. In reviewing requests to reduce or waive supplemental financing on subsequent loans or on loans with a loan period longer than 2 years, RUS will consider the differences in interest rates between RUS and supplemental loans and the impacts of this difference on the borrower’s projected cash flows and its electric rates and rate disparity. If significant differences would result, the waiver will be granted.
(c) Reimbursement of general funds and interim financing. (1) Borrowers may request RUS loan funds to reimburse general funds and/or interim financing used to finance equipment and facilities included in a RUS approved construction work plan or amendment if the construction was completed immediately preceding the current loan period. This reimbursement period is generally limited to 24 months. See 7 CFR 1710.109. RUS may, in connection with the first RUS loan approved after the effective date, approve a reimbursement period of up to 48 months prior to
the current loan period if the loan is approved not later than 5 years after the effective date. In reviewing requests for this longer reimbursement period, RUS will consider the stresses that the transaction and other costs of entering into the merger places on the borrower’s rates and cash flows, and the mitigating effects of more generous reimbursement.

(2) A longer reimbursement period may be available if:
   (i) All parties to the merger are active distribution borrowers, or
   (ii) At least one of the merging parties is an active distribution borrower, all merging parties are either active distribution borrowers of former distribution borrowers, and the merger is effective after December 19, 1996.

§ 1717.155 Transitional assistance affecting new and preexisting loans.

Requests for transitional assistance affecting new and preexisting loans must be received by RUS no later than 2 years after the effective date.

(a) Section 12 deferments. (1) Section 12 of the RE Act (7 U.S.C. 912) allows RUS to extend the time of payment of interest or principal of RUS loans. Section 12 deferments do not extend the final maturity of the loan; lower payments during the deferment period result in higher payments later. Therefore, RUS may approve a Section 12 deferment of loan payments of up to 5 years only if such deferments will help to avoid substantial increases in retail electric rates during the transition period, without placing borrowers in financial stress after the deferment period.

   (2) Section 12 deferment may be available following any merger where at least one of the merging parties is an active borrower.

   (b) Coverage ratios. Required levels for coverage ratios are set forth in 7 CFR 1710.141 and in the loan documents. RUS may approve a plan, on a case by case basis, that provides for a phase-in period for these coverage ratios of up to 5 years from the effective date. Under such a plan the successor would be permitted to project and achieve lower levels for one or more of these coverage ratios during the phase-in period.

   (1) A phase-in plan for coverage ratios must provide a pro forma level for each ratio during each year of the phase-in period and be supported by a financial forecast covering a period of not less than 10 years from the effective date of the merger. The plan must demonstrate that a minimum TIER level of 1.00 will be achieved in each year, that trends will be generally favorable, that the borrower will achieve the levels required in its loan documents and RUS regulations by the end of the phase-in period, and that these levels will be maintained in subsequent years.

   (2) In reviewing phase-in plans for coverage ratios, RUS will review rates, rate disparity, and likely mitigating effects of the proposed phase-in plan.

   (3) The borrower is responsible for obtaining approvals of supplemental lenders.

   (4) Upon RUS approval of a phase-in plan, the levels in that plan will be substituted for the levels required in the borrower’s preexisting loan documents and will be incorporated in any new loan or security documents.

   (5) A phase in plan for coverage ratios may be available if:

      (i) All parties to the merger are active distribution borrowers, or
      (ii) At least one of the merging parties is an active distribution borrower, all merging parties are either active distribution borrowers or former distribution borrowers, and the merger is effective after December 19, 1996.

§ 1717.156 Transitional assistance affecting preexisting loans.

The fund advance period for an insured loan, which is the period during which RUS may advance loan funds to a borrower, terminates automatically after a specific period of time. See 7 CFR 1714.56. If, on the effective date the original fund advance period or the fund advance period as extended pursuant to 7 CFR 1714.56(c), on any preexisting RUS loan to any of the active borrowers involved in a merger has not terminated, such fund advance period shall be automatically lengthened by 2 years. On the borrower’s request RUS will prepare documents necessary for the advance of loan funds. RUS will prepare documents for the borrower’s
§ 1717.157 Requests for transitional assistance.

(a) If the merger requires RUS approval, the borrower should, where possible, indicate that it desires transitional assistance at the time it requests approval of the merger. The formal request for transitional assistance must be received by RUS as specified in §§1717.155 and 171.156. Documents listed in this section may be combined with the documents required by §§1717.152 and/or 1717.160 where appropriate. If the request for transitional assistance is submitted at the same time as a loan application, documents listed in this section may be combined with the loan application documents where appropriate. See 7 CFR part 1710, subpart I. A request for transitional assistance must include:

(1) Transmittal letter(s) formally listing the types of transitional assistance requested. If the request is submitted before the effective date, a transmittal letter must be signed by the manager of each party to the transaction. If the request is submitted on or after the effective date, a transmittal letter must be signed by the manager of the successor. Transmittal letter(s) must be signed originals on corporate letterhead stationery;

(2) Board resolution(s). If the request is submitted before the effective date, a separate board resolution must be submitted from each entity involved in the merger. If the request is submitted on or after the effective date, a board resolution from the successor must be submitted. Each board resolution must be a certified original;

(3) A merger plan, financial forecasts, and any available studies such as net present value analyses showing the anticipated costs and benefits of the merger and likely timeframes for the merger. The merger plan must clearly identify those benefits that cannot be achieved without a merger, and those benefits that can be achieved through other means;

(4) If the transitional assistance requires RUS approval, the type and extent of the mitigation that the transitional assistance is expected to provide; and

(5) Other information that may be relevant.

(b) Borrowers are responsible for ensuring that requests for transitional assistance are complete and sound in form and substance when they are submitted to RUS. After submitting a request, borrowers shall promptly notify RUS of any changes or events that materially affect the request or any information in the request.

(c) In considering whether to approve requests for transitional assistance, RUS will evaluate the costs and benefits of the merger; the type and extent of the likely transitional stress; whether the transitional assistance requested is likely to materially mitigate such stress; and the likely impacts on electric rates and on the security of RUS loans. Review factors applicable to each type of transitional assistance are set forth in §§1717.154-1717.156.

§ 1717.158 Mergers with borrowers who prepaid RUS loans.

In some cases, an active distribution borrower may merge with a borrower that has prepaid RUS debt at a discount pursuant to 7 CFR part 1786, and whose eligibility for future RUS financing is thereby restricted. During the period when the restrictions on future financing are in effect, the successor will be eligible for RUS loans to finance facilities to serve consumers located in the territory that was served by the active distribution borrower immediately prior to the effective date, provided that other requirements for loan eligibility are met.

§ 1717.159 Applications for RUS approvals of mergers.

If a proposed merger requires RUS approval according to RUS regulations and/or the loan documents executed by any of the active borrowers involved, the application must be submitted to RUS not later than 90 days prior to the effective date of the proposed borrower action. A distribution borrower should consult with its assigned RUS general field representative, and a power supply borrower with the Director, Power
§ 1717.160 Application contents.

An application for RUS approval of a merger must include the documents listed in this section. Documents listed in this section may be combined with the documents required by §§ 1717.152 and/or 1717.157 where appropriate.

(a) Transmittal letters signed by the managers of all borrowers and non-borrowers who are parties to the proposed merger. These letters must include the actual corporate name, address, and taxpayer identification number of all parties to the proposed merger. The transmittal letters must be signed original on corporate letterhead stationery.

(b) Resolutions from the boards of directors of all borrowers and non-borrowers who are parties to the proposed merger. This document is the formal request by each entity for RUS approval of the proposed merger. The board resolution must include a description of the proposed merger, including timeframes, and authorization for RUS to release appropriate information to supplemental or other lenders, and for these lenders to release appropriate information to RUS. Each board resolution must be a certified original.

(c) Evidence that the proposed merger will result in a viable entity, and that the security of outstanding RUS loans will not be adversely affected by the action. This evidence shall include financial forecasts, and any available studies such as net present value analyses covering a period of not less than 10 years from the effective date of the merger, as well as information about any threatened actions by other parties that could adversely affect the financial condition of any of the parties to the proposed merger, or of the successor. Such threatened actions may include annexations or other actions affecting service territory, loads, rates or other such matters.

(d) Regulatory information about pending federal or state proceedings pertaining to any of the parties that could have material effects on the successor.

(e) Rate information. Distribution and power supply borrowers shall submit schedules of proposed rates after the merger, including the effects of the proposed action on rates and the status of any pending rate cases before a state regulatory authority. The rates of power supply borrowers are subject to RUS approval. If rates are not projected to change after the merger, a statement to that effect will suffice.

(f) Area coverage and line extension policies. If any distribution systems are parties to the proposed merger, a statement of proposed area coverage and line extension policies for the successor.

§ 1717.161 Application process.

(a) Borrowers are responsible for ensuring that their applications for RUS approval of a merger are complete and sound in form and substance when they are submitted to RUS. After submitting an application, borrowers shall promptly notify RUS of any changes or events that materially affect the application or any information in the application.

(b) In reviewing borrower requests for approval of mergers, RUS will consider the likely effects of the action on the ability of the successor to provide reliable electric service at reasonable cost to RE Act beneficiaries and on the security of outstanding RUS loans. Among the factors RUS will consider are whether the proposed merger is likely to:

1. Contribute to greater operating efficiency and financial soundness;
2. Mitigate high electric rates and or rate disparity;
3. Help borrowers to diversify their loads or otherwise hedge risks;
4. Have beneficial effects on rural economic development in the community served by the borrower, such as diversifying the economic base or alleviating unemployment; and
5. Provide other benefits consistent with the purposes of the RE Act.

(c) RUS will not approve a merger if, in the sole judgment of the Administrator, such action is likely to have an adverse effect on the credit quality of outstanding loans made or guaranteed by the Government. RUS will thoroughly review each request for approval of such action, including review of the feasibility and security of outstanding Government loans according
to the standards in 7 CFR 1710.112 and 1710.113, respectively, and in other RUS regulations.

(d) RUS will keep the borrowers apprised of the progress of their applications.

Subparts E-F  [Reserved]

Subpart G—Federal Pre-emption in Rate Making in Connection With Power Supply Borrowers

§ 1717.300 Purpose.

This subpart contains regulations of the Rural Utilities Service (RUS) implementing provisions of Section 4 of the RE Act (7 U.S.C. 904) which authorize the Administrator to establish terms and conditions of loans and implementing provisions of the RUS wholesale power contracts and other RUS documents which provide for the establishment of rates to be charged by power supply borrowers for the sale of electric power and energy. This subpart contains the general regulations of RUS for the pre-emption, under certain circumstances, which are not exclusive, of the regulation of a power supply borrower's rates by a state regulatory authority under state law and for the exercise of exclusive jurisdiction over rates by RUS pursuant to the RUS documents.

§ 1717.301 Policy.

(a) RUS makes and guarantees loans to borrowers to bring electric service to persons in rural areas. RUS requires, as a condition to making or guaranteeing any loans to power supply borrowers, that the borrower enter into RUS wholesale power contracts with its several members and assign and pledge such contracts as security for the repayment of loans made or guaranteed by RUS and for other loans which, pursuant to the RE Act, RUS has permitted to be secured pursuant to the RUS mortgage. The RUS wholesale power contract requires, among other matters, that the rates charged for power and energy sold thereunder produce revenues sufficient to enable the power supply borrower to make payments on account of all indebtedness of the power supply borrower. The Administrator relies upon the RUS wholesale power contracts together with other RUS documents to find and certify, as required in section 4 of the RE Act (7 U.S.C. 904), that the security for the loan is reasonably adequate and the loan will be repaid within the time agreed.

(b) RUS requires power supply borrowers to take such actions as may be necessary to charge rates for the sale of electric power and energy which are sufficient to pay the principal and interest on loans made or guaranteed by RUS in a timely manner and to meet the requirements of the RUS wholesale power contract and other RUS documents.

(c) With respect to power supply borrowers which are not subject to rate regulation by a state regulatory authority, RUS requires that such borrowers establish rates and obtain RUS approval of such rates as required by the terms of the RUS wholesale power contract and other RUS documents.

(d) With respect to power supply borrowers which are subject to regulation by a state regulatory authority, RUS does not make or guarantee a loan for the construction, operation or enlargement of any generating plant or transmission facility unless the consent of the state regulatory authority having jurisdiction in the premises is first obtained.

(e) Pursuant to applicable provisions of state law state regulatory authorities regulate many aspects of a power supply borrowers business activities, including such matters as the setting of wholesale electric rates, the borrowing of money, and the mortgaging of property. A state regulatory authority's jurisdiction over the rates charged by a power supply borrower shall be pre-empted where the Administrator has determined that such jurisdiction has compromised Federal interests, including without limitation, the ability of the borrower to repay its secured loans in accordance with the terms of the RUS documents. Thereupon, RUS shall, pursuant to the RUS documents, exercise exclusive jurisdiction over the rates charged by a power supply borrower.

§ 1717.302 Definitions and rules of construction.

(a) Definitions. For the purpose of this subpart, the following terms shall have the following meanings:

Administrator means the Administrator of RUS.

Borrower means any organization which has an outstanding loan made or guaranteed by RUS for rural electrification. Unless otherwise stated in the text, “borrower” shall mean power supply borrower.

Loan contract means the agreement, as amended, supplemented, or restated from time to time, between a borrower and RUS providing for loans made or guaranteed pursuant to the RE Act.

Power supply borrower means any borrower engaged in the wholesale sale of electric power and energy to distribution members either directly or through other power supply borrowers pursuant to RUS wholesale power contracts.

RE Act means Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RUS documents means the loan contract, mortgage and RUS wholesale power contract of a power supply borrower.

RUS mortgage means the mortgage and security agreement, as from time to time supplemented, amended and restated, made by and among the borrower, RUS, and, if a party thereto, third party lenders, or any other form of mortgage or security instrument or indenture of mortgage and deed of trust, securing the payment of outstanding loans made or guaranteed by RUS and other lenders.

RUS wholesale power contract means the contract for the wholesale sale of electric power and energy between a power supply borrower and its member as approved by RUS.

Secured loans shall mean outstanding loans secured pursuant to the RUS mortgage.

State regulatory authority means any state board or local governing body having jurisdiction under state law to regulate, or in any way, approve the electric rates charged by a power supply borrower or electric distribution member of a power supply borrower.

(b) Rules of Construction. Unless the context shall otherwise indicate, the terms defined in §1717.302(a) hereof include the plural as well as the singular, and the singular as well as the plural. The words “herein,” and “hereunder”, and words of similar import, refer to this subpart as a whole. “Includes” and “including” are not limiting and “or” is not exclusive.

§ 1717.303 Requirements of RUS documents.

(a) Pursuant to the terms of the RUS documents each power supply borrower shall establish and adjust rates for the sale of electric power and energy in such a manner as to assure that the borrower will be able to make required payments on secured loans.

(b) Pursuant to the terms of the RUS wholesale power contract, the Board of Directors or Board of Trustees of the power supply borrower shall review rates not less frequently than once each calendar year and revise its rates as therein set forth. The RUS wholesale power contract further provides...
§ 1717.304 State regulatory authority rate jurisdiction.

(a) In the event that rate revisions required by the terms of the RUS wholesale power contract or other RUS documents may be subject to the approval of a state regulatory authority, the power supply borrower shall seek such required approval in a timely manner.

(b) RUS recognizes the need of state regulatory authorities for documents, information and records for use in connection with an application for rate approval and will consider any reasonable request by a borrower or a state regulatory authority for such documents, information and records. The failure of RUS to provide requested documents, information or records shall not limit any rights of RUS including the right with respect to pre-emption of the state regulatory authority as provided in this subpart.

(c) In the event that the state regulatory authority shall fail to act favorably upon the borrower’s application for rate increases required by terms of the RUS wholesale power contract or other RUS documents, the borrower shall pursue such legal and administrative appeals as may be available to it, unless RUS shall approve otherwise in writing.

§ 1717.305 Pre-emption.

(a) Inadequate rates. State regulatory authority jurisdiction over a power supply borrower’s rates shall be preempted by the RE Act if the Administrator shall have determined that the borrower’s rates approved by the state regulatory authority are, after taking into account the borrower’s costs and expenses, inadequate to produce revenues sufficient to permit the borrower to make required payments on its secured loans and the borrower has failed to make required payments on its secured loans.

(b) Public notice. The Administrator shall:

(1) Notify the borrower and the state regulatory authority in writing of the determination, indicating the jurisdiction of the state regulatory authority over the rates of the borrower has been preempted pursuant to this part and the borrower shall henceforth establish its rates in accordance with the term of the RUS documents.

(2) Publish a notice in the Federal Register informing the public of the action.

§ 1717.306 RUS required rates.

(a) Upon the publication in the Federal Register of the notice of pre-emption of state regulatory authority as provided in this subpart, RUS will exercise exclusive jurisdiction over the rates of the borrower pursuant to the terms of the RUS documents. The borrower shall immediately establish rates with the approval of RUS that are sufficient to satisfy the requirements of the RUS wholesale power contract and other RUS documents described in §1717.303 of this subpart. The borrower shall establish such rates notwithstanding provisions of state law, and rules, orders or other actions of state regulatory authorities, and notwithstanding any provision of the RUS documents referring to such laws, rules, orders or actions.
(b) So long as the state regulatory authority shall be pre-empted hereunder, RUS shall be considered the governmental regulatory body with jurisdiction over rates for the purposes of the RUS documents and for the purposes of section 1129(a)(6) of the Bankruptcy Code of 1978, as amended (11 U.S.C. 1129(a)(6)).

(c) If a borrower, which is subject to exclusive RUS rate jurisdiction, shall fail to establish rates in accordance with terms of the RUS wholesale power contract and other RUS documents in a timely fashion, RUS may proceed to exercise any and all rights and remedies available pursuant under the RUS documents or otherwise.

(d) The jurisdiction of the state regulatory authority over the rates of the borrower shall continue to be pre-empted hereunder until the Administrator shall in writing approve the resumption of jurisdiction by the state regulatory authority and publish in the Federal Register a notice to such effect. The Administrator shall approve resumption only after determining that such jurisdiction shall be exercised in a manner consistent with Federal interests.

§ 1717.307 Distribution members’ rates.

A state regulatory authority which has been pre-empted as provided in this subpart may continue to exercise jurisdiction, pursuant to applicable provisions of state law, over all other business affairs of the power supply borrower and over the rates of its distribution members: Provided, however, that the state regulatory authority shall treat any RUS approved rate for the power supply borrower as fair and reasonable and shall not in any manner, directly or indirectly, prevent or impede the distribution member from recovering the costs of paying the RUS approved rates to the power supply borrower.

§ 1717.308 RUS approval of non-conforming rates.

Borrowers may request and RUS may approve rates which do not conform with the requirements of the RUS wholesale power contract and other RUS documents if RUS determines, in its sole discretion, that such approval is in the interests of RUS. If RUS approval is granted prior to pre-emption hereunder, and if the state regulatory authority shall have approved such rates, then, so long as RUS’s approval of the nonconforming rates remains in effect, the jurisdiction of the state regulatory authority over the rates of the borrower shall not be pre-empted hereunder.

§ 1717.309 Additional statutory pre-emption.

This subpart addresses pre-emption of state law and state regulatory authority in only those specific circumstances herein described. Nothing in this subpart waives, limits, or otherwise affects the explicit pre-emption or pre-emption, which is implicit and shall occur pursuant to the RE Act as a matter of law, of state law or action of a state regulatory authority where such state law or such action compromises Federal interests, including the ability of any borrower, including power supply borrowers, to repay loans made or guaranteed by RUS.

§§ 1717.310—1717.349 [Reserved]
§ 1717.351 Policy.

(a) RUS makes and guarantees loans to borrowers to bring electric service to persons in rural areas. To accomplish this objective, RUS normally requires, as a condition to making or guaranteeing any loans to an electric borrower, that the borrower execute and deliver the RUS documents in the form prescribed by RUS. The RUS mortgage secures repayment of the loans made or guaranteed by RUS and other loans which, pursuant to the RE Act, RUS has permitted to be secured pursuant to the RUS mortgage. The Administrator relies upon the RUS mortgage together with other RUS documents to find and certify, as required by section 4 of the RE Act (7 U.S.C. 904), that the security for the loan is reasonably adequate and the loan will be repaid within the time agreed.

(b) RUS requires borrowers to take such actions as may be necessary to establish rates for electric service which are sufficient to pay the principal of and interest on the loans made or guaranteed by RUS in a timely manner and to meet the requirements of the RUS documents.

(c) With respect to borrowers whose rates are not regulated by a State Regulatory Authority, RUS requires that such borrowers establish rates and to obtain RUS approval of such rates as required by the RUS documents.

(d) To protect Federal interests, including without limitation the ability of the borrower to repay RUS loans, RUS's policy is to exercise, pursuant to the RUS documents, exclusive jurisdiction over the rates for electric service charged by a borrower by or against whom a case under the Bankruptcy Code of 1978, as amended, has commenced.

§ 1717.352 Definitions and rules of construction.

(a) Definitions. For the purpose of this subpart, the following terms shall have the following meanings:

Administrator means the Administrator of RUS.

Borrower means any organization which has an outstanding loan made or guaranteed by RUS for rural electrification.

REA means Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

REA means the Rural Electrification Administration formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RUS loan means a loan made or guaranteed by RUS.

RUS documents means the RUS loan contract, RUS mortgage and, if the Borrower is engaged in the wholesale sale of electric power and energy to members pursuant to RUS Wholesale Power Contracts, the RUS Wholesale Power Contract.

RUS mortgage means the mortgage and security agreement, as from time to time supplemented, amended, and restated, made by and among the borrower and RUS providing for loans made or guaranteed pursuant to the RE Act.

RUS loan contract means the agreement, as amended, supplemented, or restated from time to time, between a borrower and RUS providing for loans made or guaranteed pursuant to the RE Act.
Rural Utilities Service, USDA § 1717.600

(a) General. The loan contract and mortgage between the Rural Utilities Service (RUS) and electric borrowers imposes certain restrictions and controls on the borrowers and gives RUS (and other co-mortgagees in the case of the mortgage) the right to approve or

(b) So long as the State Regulatory Authority shall be pre-empted hereunder, RUS shall be considered the governmental regulatory body with jurisdiction over rates for all purposes, including for the purposes of the RUS documents and for the purposes of section 1129(a)(6) of the Bankruptcy Code of 1978, as amended (11 U.S.C. 1129(a)(6)).

(c) RUS shall, pursuant to the terms of the RUS documents, exercise exclusive jurisdiction over the rates of the borrower until the Administrator shall in writing approve the resumption of jurisdiction by the State Regulatory Authority. The Administrator shall approve resumption only after determining that such jurisdiction shall be exercised in a manner consistent with Federal interests.

§ 1717.356 Additional statutory pre-emption.

This subpart addresses pre-emption of State law and State Regulatory Authority upon the filing of a petition by or against the borrower commencing a case under the Bankruptcy Code of 1978, as amended. Nothing in this subpart waives, limits, or otherwise affects the explicit pre-emption or pre-emption, which is implicit and shall occur pursuant to the RE Act as a matter of law, of State law or action of a State Regulatory Authority where such State law or such action compromises Federal interests, including the ability of any borrower to repay loans made or guaranteed by RUS.

Subparts I-L [Reserved]

Subpart M—Operational Controls

Source: 60 FR 67405, Dec. 29, 1995, unless otherwise noted.

§ 1717.600 General.

(a) General. The loan contract and mortgage between the Rural Utilities Service (RUS) and electric borrowers imposes certain restrictions and controls on the borrowers and gives RUS (and other co-mortgagees in the case of the mortgage) the right to approve or
**§ 1717.601** Applicability.

(a) The approvals and exceptions to controls conveyed by this subpart apply only to controls and approval rights normally included in RUS loan documents dated prior to January 29, 1996. They do not apply to special controls and approval requirements included in loan documents or other agreements executed between a borrower and RUS that relate to individual problems or circumstances specific to an individual borrower.

(b) The approvals and exceptions to controls granted by RUS in this subpart shall not in any way affect the rights of other co-mortgagees under the mortgage or their loan contracts.

**§ 1717.602** Definitions.

Terms used in this subpart that are not defined in this section have the meanings set forth in 7 CFR part 1710. In addition, for the purposes of this subpart:

Default means an event of default as defined in the borrower's loan documents or other agreement with RUS, and furthermore includes any event that has occurred and is continuing which, with notice or lapse of time and notice, would become an event of default.

Equity means the borrower's total margins and equities computed pursuant to RUS accounting requirements but excluding any regulatory created assets.

Financed or funded by RUS means financed or funded wholly or in part by a loan made or guaranteed by RUS, including concurrent supplemental loans required by 7 CFR 1710.110, loans to reimburse funds already expended by the borrower, and loans to replace interim financing.

Interchange agreement means a contractual arrangement that can include a variety of services utilities provide each other to increase reliability and

---

168
efficiency, and to avoid duplicating expenses. Some examples are: transmission service (the use of transmission lines to move power and energy from one area to another); emergency service (an agreement by one utility to furnish another with power and energy to protect it in times of emergency, such as power plant outages); reserve sharing (contributions to a common pool of generating plant reserves so that each individual utility’s reserves can be reduced); and economic exchanges (swapping power and energy from different plants to avoid running the most expensive units).

Interconnection agreement means a contract governing the terms for establishing or using one or more electrical connections between two or more electric systems permitting a flow of power and energy among the systems.

Loan documents means the mortgage (or other security instrument acceptable to RUS), the loan contract, and the promissory note entered into between the borrower and RUS.

Net utility plant means the amount constituting the total utility plant of the borrower, less depreciation, computed in accordance with RUS accounting requirements.

Pooling agreement means a contract among two or more interconnected electric systems to operate on a coordinated basis to achieve economies and/or enhance reliability in supplying their respective loads.

Power supply contract means any contract entered into by a borrower for the sale or purchase, at wholesale, of electric energy.

Regulatory created assets means the sum of any amounts properly recordable as unrecovered plant and regulatory study costs or as other regulatory assets, computed pursuant to RUS accounting requirements.

RUS accounting requirements means the system of accounts prescribed for electric borrowers by RUS regulations as such RUS accounting requirements exist at the date of applicability thereof.

RUS regulations mean regulations of general applicability published by RUS from time to time as they exist at the date of applicability thereof, and shall also include any regulations of other federal entities which RUS is required by law to implement.

Total assets means an amount constituting the total assets of the borrower as computed pursuant to RUS accounting requirements, but excluding any regulatory created assets.

Wheeling agreement means a contract providing for the use of the electric transmission facilities of one electric utility to transmit power and energy of another electric utility or other entity to a third party. Such transmission may be accomplished directly or by displacement.

§ 1717.603 RUS approval of extensions and additions.

(a) Distribution borrowers. Prior written approval by RUS is required for a distribution borrower to extend or add to its electric system if the extension or addition will be financed by RUS. For extensions and additions that will not be financed by RUS, approval is hereby given to distribution borrowers to make such extensions and additions to their electric systems, including the use of (or commitment to use) general funds of the borrower, except for the following:

(1) Construction, procurement, or leasing of generating facilities if the combined capacity of the facilities to be built, procured, or leased, including any future facilities included in the planned project, will exceed the lesser of 5 megawatts or 30 percent of the borrower’s equity;

(2) Acquisition or leasing of existing electric facilities or systems in service whose purchase price, or capitalized value in the case of a lease, exceeds 10 percent of the borrower’s net utility plant; and

(3) Construction, procurement, or leasing of electric facilities to serve a customer whose annual kWh purchases or maximum annual kW demand in the foreseeable future is projected to exceed 25 percent of the borrower’s total kWh sales or maximum kW demand in the year immediately preceding the acquisition or start of construction.

(b) Power supply borrowers. Prior written approval by RUS is required for a power supply borrower to extend or add to its electric system if the extension or addition will be financed by RUS.
§ 1717.604 Requirements for RUS approval of extensions and additions that will not be financed by RUS are set forth in other RUS regulations.

(a) Additional details. Additional details relating to RUS approval of extensions and additions of a borrower’s electric system financed by RUS are set forth in other RUS regulations, e.g., in 7 CFR parts 1710 and 1726.

§ 1717.604 Long-range engineering plans and construction work plans.

(a) All borrowers are required to maintain up-to-date long-range engineering plans and construction work plans (CWPs) in form and substance as set forth in 7 CFR part 1710, subpart F.

(b) Applications for financing from RUS must be supported by a long-range engineering plan and CWP approved by RUS.

(c) RUS approval is not required for long-range engineering plans and CWPs if the borrower does not intend to seek RUS financing for any of the facilities, equipment or other purposes included in those plans. However, if requested by RUS, a borrower must provide an informational copy of such plans to RUS.

§ 1717.605 Design standards, plans and specifications, construction standards, and RUS accepted materials.

All borrowers, regardless of the source of funding, are required to comply with applicable RUS requirements with respect to system design, construction standards, and the use of RUS accepted materials. Borrowers must comply with applicable RUS requirements with respect to plans and specifications only if the construction or procurement will be financed by RUS. These requirements are set forth in other RUS regulations, especially in 7 CFR parts 1724 and 1728.

§ 1717.606 Standard forms of construction contracts, and engineering and architectural services contracts.

All borrowers are encouraged to use the standard forms of contracts promulgated by RUS for construction, materials, equipment, engineering services, and architectural services, regardless of the source of funding for such construction and services. Borrowers are required to use these standard forms of contracts only if the construction, procurement or services are financed by RUS, and only to the extent required by RUS regulations. RUS requirements with respect to such standard forms of contract are set forth in 7 CFR part 1724 for architectural and engineering services, and in 7 CFR part 1726 for construction, materials, and equipment.

§ 1717.607 Contract bidding requirements.

Borrowers must follow RUS requirements regarding bidding for contracts for construction, materials, and equipment only if financing of the construction or procurement will be provided by RUS. These requirements are set forth in 7 CFR part 1726.

§ 1717.608 RUS approval of contracts.

(a) Construction contracts and architectural and engineering contracts. RUS approval of contracts for construction and procurement and for architectural and engineering services is required only when such construction, procurement or services are financed by RUS. Detailed requirements regarding RUS approval of such contracts are set forth in 7 CFR part 1724 for architectural and engineering services, and in 7 CFR part 1726 for construction and procurement.

(b) Large retail power contracts. RUS approval of contracts to sell electric power to retail customers is required only if the contract is for longer than 2 years and the kWh sales or kW demand for any year covered by the contract exceeds 25 percent of the borrower’s total kWh sales or maximum kW demand for the year immediately preceding execution of the contract. This requirement applies regardless of the source of funding of any plant extensions, additions or improvements that may be involved in connection with the contract.

(c) Power supply arrangements. (1) Power supply contracts (including but not limited to economy energy sales and emergency power and energy sales), interconnection agreements, interchange agreements, wheeling agreements, pooling agreements, and any other similar power supply arrangements subject to approval by RUS are deemed approved if they have
a term of 2 years or less. Amendments to said power supply arrangements are also deemed approved provided that the amendment does not extend the term of the arrangement for more than 2 years beyond the date of the amendment.

(2) Any amendment to a schedule or exhibit contained in any power supply arrangement subject to RUS approval, which merely has the effect of either altering a list of interconnection or delivery points or changing the value of a variable term (but not the formula itself) contained in a formulary rate or charge is deemed approved.

(3) The provisions of this paragraph (c) apply regardless of whether the borrower is a seller or purchaser of the services furnished by the contracts or arrangements, and regardless of whether or not a Federal power marketing agency is a party to any of them.

(d) System management and maintenance contracts. RUS approval of contracts for the management and operation of a borrower's electric system or for the maintenance of the electric system is required only if such contracts cover all or substantially all of the electric system.

(e) Other contracts. [Reserved]

§ 1717.609 RUS approval of general manager.

(a) If a borrower's mortgage or loan contract grants RUS the unconditioned right to approve the employment and/or the employment contract of the general manager of the borrower's system, such approval is hereby granted provided that the borrower is in compliance with all provisions of its loan documents and any other agreements with RUS.

(b) If a borrower is in default with respect to any provision of its loan documents or any other agreement with RUS:

(1) Such borrower, if directed in writing by RUS, shall replace its general manager within 30 days after the date of such written notice; and

(2) Such borrower shall not hire a general manager without prior written approval by RUS.

§ 1717.610 RUS approval of compensation of the board of directors.

If a borrower's mortgage or loan contract requires the borrower to obtain approval from RUS for compensation provided to members of the borrower's board of directors, such requirement is hereby waived.

§ 1717.611 RUS approval of expenditures for legal, accounting, engineering, and supervisory services.

(a) If a borrower's mortgage or loan contract requires the borrower to obtain approval from RUS before incurring expenses for legal, accounting, supervisory (other than for the management and operation of the borrower's electric system, see §1717.608(d)), or other similar services, such approval is hereby granted. However, while expenditures for accounting do not require RUS approval, the selection of a certified public accountant by the borrower to prepare audited reports required by RUS remains subject to RUS approval.

(b) If a borrower's mortgage or loan contract requires the borrower to obtain approval from RUS before incurring expenses for engineering services, such approval is hereby granted if such services will not be financed by RUS. Approval requirements with respect to engineering services financed by RUS are set forth in other RUS regulations.

§ 1717.612 RUS approval of borrower's bank or other depository.

If a borrower's mortgage or loan contract gives RUS the authority to approve the bank or other depositories used by the borrower, such approval is hereby granted. However, without the prior written approval of RUS, a borrower shall not deposit funds from loans made or guaranteed by RUS into any bank or other depository that is not insured by the Federal Deposit Insurance Corporation or other Federal agency acceptable to RUS, or in any account not so insured.

§ 1717.613 RUS approval of data processing and system control equipment.

If a borrower's mortgage or loan contract requires the borrower to obtain approval from RUS before purchasing
§ 1717.614 Notification of rate changes.

If a distribution borrower is required by its loan documents to notify RUS in writing of proposed changes in electric rates more than 30 days prior to the effective date of such rates, the required notification period shall be 30 days. Moreover, such notification shall be required only upon the request of RUS.

§ 1717.615 Consolidations and mergers.

A distribution or power supply borrower may without the prior approval of RUS, consolidate or merge with any other corporation or convey or transfer the mortgaged property substantially as an entirety if the following conditions are met:

(a) Such consolidation, merger, conveyance or transfer shall be on such terms as shall fully preserve the lien and security of the RUS mortgage and the rights and powers of the mortgagees;

(b) The entity formed by such consolidation or with which the borrower is merged or the corporation which acquires by conveyance or transfer the mortgaged property substantially as an entirety shall execute and deliver to the mortgagees a mortgage supplemental in recordable form and containing an assumption by such successor entity of the due and punctual payment of the principal of and interest on all of the outstanding notes and the performance and observance of every covenant and condition of the mortgage;

(c) Immediately after giving effect to such transaction, no default under the mortgage shall have occurred and be continuing;

(d) The borrower shall have delivered to the mortgagees a certificate of its general manager or other officer, in form and substance satisfactory to each of the mortgagees, which shall state that such consolidation, merger, conveyance or transfer and such supplemental mortgage comply with this section and that all conditions precedent herein provided for relating to such transaction have been complied with;

(e) The borrower shall have delivered to the mortgagees an opinion of counsel in form and substance satisfactory to each of the mortgagees; and

(f) The entity formed by such consolidation or with which the borrower is merged or the corporation which acquires by conveyance or transfer the mortgaged property substantially as an entirety shall be an entity having:

(1) Equity equal to at least 27% of its total assets on a pro forma basis after giving effect to such transaction;

(2) A pro forma TIER of not less than 1.50 and a pro forma DSC of not less than 1.25 for each of the two preceding calendar years; and

(3) Net utility plant equal to or greater than 1.0 times its total long-term debt on a pro forma basis.

§ 1717.616 Sale, lease, or transfer of capital assets.

A distribution borrower may without the prior approval of RUS sell, lease, or transfer any capital asset if the following conditions are met:

(a) The borrower is not in default;

(b) In the most recent year for which data are available, the borrower achieved a TIER of at least 1.5, DSC of at least 1.25, OTIER of at least 1.1, and ODSC of at least 1.1, in each case based on the average or the best 2 out of the 3 most recent years;

(c) The sale, lease, or transfer of assets will not reduce the borrower’s existing or future requirements for energy or capacity being furnished to the borrower under any wholesale power contract which has been pledged as security to the government;

(d) Fair market value is obtained for the assets;

(e) The aggregate value of assets sold, leased, or transferred in any 12-month period is less than 10 percent of the borrower’s net utility plant prior to the transaction;

(f) The proceeds of such sale, lease, or transfer, less ordinary and reasonable expenses incident to such transaction, are immediately:

(1) Applied as a prepayment of all notes secured under the mortgage equally and ratably.
(2) In the case of dispositions of equipment, materials or scrap, applied to the purchase of other property useful in the borrower's utility business; or

(3) Applied to the acquisition of construction of utility plant.

§ 1717.617 Limitations on distributions.

If a distribution or power supply borrower is required by its loan documents to obtain prior approval from RUS before declaring or paying any dividends, paying or determining to pay any patronage refunds, or retiring any patronage capital, or making any other cash distributions, such approval is hereby given if the following conditions are met:

(a) After giving effect to the distribution, the borrower's equity will be greater than or equal to 30 percent of its total assets;
(b) The borrower is current on all payments due on all notes secured under the mortgage;
(c) The borrower is not otherwise in default under its loan documents; and
(d) After giving effect to the distribution, the borrower's current and accrued assets will be not less than its current and accrued liabilities.

Subpart N—Investments, Loans, and Guarantees by Electric Borrowers

Source: 60 FR 48877, Sept. 21, 1995, unless otherwise noted.

§ 1717.650 Purpose.

This subpart sets forth general regulations for implementing and interpreting provisions of the RUS mortgage and loan contract regarding investments, loans, and guarantees made by electric borrowers, as well as the provisions of the Rural Electrification Act of 1936, as amended, including section 312 (7 U.S.C. 901 et seq.) (RE Act), permitting, in certain circumstances, that electric borrowers under the RE Act may, without restriction or prior approval of the Administrator of the Rural Utilities Service (RUS), invest their own funds and make loans or guarantees.

§ 1717.651 General.

(a) Policy. RUS electric borrowers are encouraged to utilize their own funds to participate in the economic development of rural areas, provided that such activity does not in any way put government funds at risk or impair a borrower's ability to repay its indebtedness to RUS and other lenders. In considering whether to make loans, investments, or guarantees, borrowers are expected to act in accordance with prudent business practices and in conformity with the laws of the jurisdictions in which they serve. RUS assumes that borrowers will use the latitude afforded them by section 312 of the RE Act primarily to make needed investments in rural community infrastructure projects (such as water and waste systems, garbage collection services, etc.) and in job creation activities (such as providing technical, financial, and managerial assistance) and other activities to promote business development and economic diversification in rural communities. Nonetheless, RUS believes that borrowers should continue to give primary consideration to safety and liquidity in the management of their funds.

(b) Applicability of this subpart. This subpart applies to all distribution and power supply borrowers regardless of when their loan contract or mortgage was executed.

§ 1717.652 Definitions.

As used in this subpart:
Borrower means any organization that has an outstanding loan made or guaranteed by RUS for rural electrification.
Cash-construction fund-trustee account means the account described in the Uniform System of Accounts as one to which funds are deposited for financing the construction or purchase of electric facilities.
Distribution borrower means a Distribution Borrower as defined in 7 CFR 1710.2.
Electric system means all of the borrower's interests in all electric production, transmission, distribution, conservation, load management, general
plant and other related facilities, equipment or property and in any mine, well, pipeline, plant, structure or other facility for the development, production, manufacture, storage, fabrication or processing of fossil, nuclear, or other fuel or in any facility or rights with respect to the supply of water, in each case for use, in whole or in major part, in any of the borrower’s generating plants, including any interest or participation of the borrower in any such facilities or any rights to the output or capacity thereof, together with all lands, easements, rights-of-way, other works, property, structures, contract rights and other tangible and intangible assets of the borrower in each case used or useful in such electric system.

Equity means the Margins and Equities of the borrower as defined in the Uniform System of Accounts, less regulatory created assets.

Guarantee means to undertake collaterally to answer for the payment of another’s debt or the performance of another’s duty, liability, or obligation, including, without limitation, the obligations of subsidiaries. Some examples of such guarantees include guarantees of payment or collection on a note or other debt instrument (assuring returns on investments); issuing performance bonds or completion bonds; or co-signing leases or other obligations of third parties.

Invest means to commit money in order to earn a financial return on assets, including, without limitation, all investments properly recorded on the borrower’s books and records in investment accounts as those accounts are used in the Uniform System of Accounts for RUS Borrowers. Borrowers may submit any proposed transaction to RUS for an interpretation of whether the action is an investment for the purposes of this definition.

Make loans means to lend out money for temporary use on condition of repayment, usually with interest.

Mortgaged property means any asset of the borrower which is pledged in the RUS mortgage.

Natural gas distribution system means any system of community infrastructure that distributes natural gas and whose services are available by design to all or a substantial portion of the members of the community.

Operating DSC means Operating Debt Service Coverage (ODSC) of the borrower’s electric system calculated as:

$$ODSC = \frac{A + B + C}{D}$$

where:

All amounts are for the same year and are based on the RUS system of accounts;

A = Depreciation and Amortization Expense of the electric system;

B = Interest on Long-term Debt of the electric system, except that Interest on Long-term Debt shall be increased by 1/3 of the amount, if any, by which the rentals of Restricted Property of the electric system exceed 2 percent of Total Margins and Equities;

C = Patronage Capital & Operating Margins of the electric system (distribution borrowers) or Operating Margins of the electric system (power supply borrowers); and

D = Debt Service Billed (RUS + other) which equals all interest and principal billed or billable during the calendar year for long-term debt of the electric system plus 1/3 of the amount, if any, by which the rentals of Restricted Property of the electric system exceed 2 percent of Total Margins and Equities. Unless otherwise indicated, all terms used in defining ODSC and OTIER are as defined in RUS Bulletin 1717B-2 Instructions for the Preparation of the Financial and Statistical Report for Electric Distribution Borrowers, and RUS Bulletin 1717B-3 Instructions for the Preparation of the Operating Report for Power Supply Borrowers and for Distribution Borrowers with Generating Facilities, or the successors to these bulletins.

Operating TIER means Operating Times Interest Earned Ratio (OTIER) of the borrower’s electric system calculated as:

$$OTIER = \frac{A + B}{A}$$

where:

All amounts are for the same year and are based on the RUS system of accounts;

A = Interest on Long-term Debt of the electric system, except that Interest on Long-term Debt shall be increased by 1/3 of the amount, if any, by which the rentals of Restricted Property of the electric system exceed 2 percent of Total Margins and Equities; and

B = Patronage Capital & Operating Margins of the electric system.
Rural Utilities Service, USDA

§ 1717.654

the electric system (distribution borrowers) or Operating Margins of the electric system (power supply borrowers).

Own funds means money belonging to the borrower other than funds on deposit in the cash-construction fund-trustee account.

Power supply borrower means a Power Supply Borrower as defined in 7 CFR 1710.2.

Regulatory created assets means the sum of the amounts properly recordable in Account 182.2 Unrecovered Plant and Regulatory Study Costs, and Account 182.3 Other Regulatory Assets of the Uniform System of Accounts.

RUS loan contract means the loan contract between the borrower and RUS.

RUS mortgage means any and all instruments creating a lien on or security interest in the borrower’s assets in connection with loans or guarantees under the RE Act.

Solid waste disposal system means any system of community infrastructure that provides collection and/or disposal of solid waste and whose services are available by design to all or a substantial portion of the members of the community.

Subsidiary means a company which is controlled by the borrower through ownership of voting stock, and is further defined in 7 CFR 1767.10.

Supplemental lender means a lender that has provided a supplemental source of financing that is secured by the RUS mortgage.

Telecommunication and other electronic communication system means any community infrastructure that provides telecommunication or other electronic communication services and whose services are available by design to all or a substantial portion of the members of the community.

Total assets means the total assets of the borrower as calculated according to the Uniform System of Accounts, less regulatory created assets.

Total utility plant means the sum of the borrower’s Electric Plant Accounts and Construction Work in Progress—Electric Accounts, as such terms are used in the Uniform System of Accounts.

Uniform System of Accounts means the system of accounts prescribed for RUS borrowers in 7 CFR part 1767.

Water and waste disposal system means any system of community infrastructure that supplies water and/or collects and treats waste water and whose services are available by design to all or a substantial portion of the members of the community.

§ 1717.653

Borrowers in default.

Any borrower not in compliance with all provisions of its mortgage, loan contract, or any other agreements with RUS must, unless the borrower’s mortgage, loan contract, or other agreement with RUS specifically provides otherwise with respect to such a borrower:

(a) Obtain prior written approval from the Administrator to invest its own funds or to make loans or guarantees regardless of the aggregate amount of such investments, loans, or guarantees; and

(b) If requested by the Administrator, restructure or reduce the amount of its investments, loans, and guarantees to a level determined by the Administrator, in his or her sole discretion, to be in the financial interest of the government with respect to loan security and/or repayment. If the borrower does not so restructure or reduce its portfolio within a reasonable period of time determined by the Administrator, which shall not exceed 12 months from the date the borrower was notified of the required action, then, upon written notice from RUS, the borrower shall be in default of its RUS loan contract and mortgage.

§ 1717.654

Transactions below the 15 percent level.

(a) A borrower in compliance with all provisions of its RUS mortgage, RUS loan contract, and any other agreements with RUS may, without prior written approval of the Administrator,
§ 1717.655

invest its own funds or make loans or guarantees not in excess of 15 percent of its total utility plant without regard to any provision contained in any RUS mortgage or RUS loan contract to the effect that the borrower must obtain prior approval from RUS, provided, however, that the borrower may not, without the prior written approval of the Administrator, make such investments, loans, and guarantees to extend, add to, or modify its electric system. Moreover, funds necessary to make timely payments of principal and interest on loans secured by the RUS mortgage remain subject to RUS controls on borrower investments, loans and guarantees.

(b) RUS will not consider requests from borrowers to exclude investments, loans, or guarantees made below the 15 percent level. (Categorical exclusions are set forth in §1717.655.)

§ 1717.655 Exclusion of certain investments, loans, and guarantees.

(a) In calculating the amount of investments, loans and guarantees permitted under this subpart, there is excluded from the computation any investment, loan or guarantee of the type which by the terms of the borrower’s RUS mortgage or RUS loan contract the borrower may make in unlimited amounts without RUS approval.

(b) Furthermore, the borrower may make unlimited investments, without prior approval of the Administrator, in:

1. Securities or deposits issued, guaranteed or fully insured as to payment by the United States Government or any agency thereof;
2. Capital term certificates, bank stock, or other similar securities of the supplemental lender which have been purchased as a condition of membership in the supplemental lender, or as a condition of receiving financial assistance from such lender, as well as any other investment made in, or loans made to, the National Rural Utilities Cooperative Finance Corporation, the Saint Paul Bank for Cooperatives, and CoBank, ACB;
3. Patronage capital allocated from an electric distribution cooperative to a power supply borrower.
4. Patronage capital allocated from an electric power supply cooperative to a power supply borrower.

(c) Without prior approval of the Administrator, the borrower may also:

1. Invest or lend funds derived directly from:
   (i) Grants which the borrower is not obligated to repay, regardless of the source or purpose of the grant; and
   (ii) Loans received from or guaranteed by any Federal, State or local government program designed to promote rural economic development, provided that the borrower uses the loan proceeds for such purpose;
2. Make loans guaranteed by an agency of USDA, up to the amount of principal whose repayment, with interest, is fully guaranteed; and
3. (i) Make unlimited investments in and unlimited loans to finance the following community infrastructure that serves primarily consumers located in rural areas as defined in 7 CFR 1710.2, and guarantee debt issued for the construction or acquisition of such infrastructure, up to an aggregate amount of such guarantees not to exceed 20 percent of the borrower’s equity:
   A. Water and waste disposal systems;
   B. Solid waste disposal systems;
   C. Telecommunication and other electronic communication systems; and
   D. Natural gas distribution systems.
   (ii) In each of the four cases in paragraph (c)(3)(i) of this section, if the system is a component of a larger organization other than the borrower itself (e.g., if it is a component of a subsidiary of the borrower or a corporation independent of the borrower), to be eligible for the exemption the borrower must certify annually that a majority of the gross revenues of the larger organization during the most recent fiscal year came from customers of said system who were located in a rural area.

(d) Also excluded from the calculation of investments, loans and guarantees made by the borrower are:

1. Amounts properly recordable in Account 142 Customer Accounts Receivable, and Account 143 Other Accounts Receivable;
§ 1717.656 Exemption of certain borrowers from controls.

(a) Any distribution or power supply borrower that meets all of the following criteria is exempted from the provisions of the RUS mortgage and loan contract that require RUS approval of investments, loans, and guarantees, except investments, loans, and guarantees made to extend, add to, or modify the borrower's electric system:

(1) The borrower is in compliance with all provisions of its RUS mortgage, RUS loan contract, and any other agreements with RUS;

(2) Any investment, loan, or guarantee made by a borrower that is not excluded under this section or under §1717.657(d) shall be included in the aggregate amount of investments, loans, and guarantees made by the borrower, regardless of whether RUS has specifically approved the investment, loan or guarantee under §1717.657(c), or has approved a related transaction (e.g., a lien accommodation).

§ 1717.656 Exemption of certain borrowers from controls.

(a) Any distribution or power supply borrower that meets all of the following criteria is exempted from the provisions of the RUS mortgage and loan contract that require RUS approval of investments, loans, and guarantees, except investments, loans, and guarantees made to extend, add to, or modify the borrower's electric system:

(1) The borrower is in compliance with all provisions of its RUS mortgage, RUS loan contract, and any other agreements with RUS;

(2) The average revenue per kWh for residential service received by the borrower during the two most recent calendar years does not exceed 130 percent of the average revenue per kWh for residential service during the same period for all residential consumers located in the state or states served by the borrower. This criterion applies only to distribution borrowers and does not apply to power supply borrowers. If a borrower serves customers in more than one state, the state average revenue per kWh will be based on a weighted average using the kWh sales by the borrower in each state as the weight. The calculation will be based on the two most recent calendar years for which both borrower and state-wide data are available. If a borrower fails to qualify for an exemption based solely on its failure to meet this criterion on rate disparity, at the borrower's request the Administrator may, at his or her sole discretion, exempt the borrower if he or she finds that the borrower's strengths with respect to the other criteria are sufficient to offset any weakness due to rate disparity;

(3) In the most recent calendar year for which data are available, the borrower achieved an operating TIER of at least 1.0 and an operating DSC of at least 1.0, in each case based on the average of the two highest ratios achieved in the three most recent calendar years;

(4) The borrower's ratio of net utility plant to long-term debt is at least 1.1, based on year-end data for the most recent calendar year for which data are available; and

(5) The borrower's equity is equal to at least 27 percent of its total assets, based on year-end data for the most recent calendar year for which data are available.
§ 1717.657 Investments above the 15 percent level by certain borrowers not exempt under §1717.656(a).

(a) General. (1) This section applies only to borrowers that are in compliance with all provisions of their mortgage, loan contract, and any other agreements with RUS and that do not qualify for an exemption from RUS investment controls under §1717.656(a).

(2) Nothing in this section shall in any way affect the Administrator’s authority to exercise approval rights over investments, loans, and guarantees made by a borrower that is not in compliance with all provisions of its mortgage, loan contract and any other agreements with RUS.

(b) Distribution borrowers. Distribution borrowers not exempt from RUS investment controls under §1717.656(a) may not make investments, loans and guarantees in an aggregate amount in excess of 15 percent of total utility plant. Above the 15 percent level, such borrowers will be restricted to excluded investments, loans and guarantees as defined in §1717.655. (However, they are eligible to ask RUS to exclude a portion of their investments under the conditions set forth in paragraph (d) of this section.)

(c) Power supply borrowers. (1) Power supply borrowers not exempt from RUS investment controls under §1717.656(a) may request approval to exceed the 15 percent level if all of the following criteria are met:

(i) Satisfactory evidence has been provided that the borrower is in compliance with all provisions of its RUS mortgage, RUS loan contract, and any other agreements with RUS;

(b) While borrowers meeting the criteria in paragraph (a) of this section are exempt from RUS approval of investments, loans and guarantees, they are nevertheless subject to the record-keeping, reporting, and other requirements of §1717.658.

(c) Any borrower exempt under paragraph (a) of this section that ceases to meet the criteria for exemption shall, upon written notice from RUS, no longer be exempt and shall be subject to the provisions of this subpart applicable to non-exempt borrowers. A borrower may regain its exemption if it subsequently meets the criteria in paragraph (a) of this section, and is so notified in writing by RUS.

(d)(1) A borrower that loses its exemption and is not in compliance with all provisions of its mortgage, loan contract, or any other agreement with RUS may be required to restructure or reduce its portfolio of investments, loans and guarantees as provided in §1717.653(b). If the borrower’s portfolio exceeds the 15 percent level, the borrower will be required to restructure or reduce its portfolio to the 15 percent level or below. For example, if the borrower’s mortgage or loan contract has an approval threshold, the borrower may be required to reduce its portfolio to that level, which in many cases is 3 percent of total utility plant.

(2) A borrower that loses its exemption but is in compliance with all provisions of its mortgage, loan contract, and any other agreements with RUS will be required, if its investments, loans and guarantees exceed the 15 percent level, to restructure or reduce its portfolio to the 15 percent level, unless the Administrator, in his or her sole discretion, determines that such action would not be in the financial interest of the government with respect to loan security and/or repayment. (Such borrower is eligible to ask RUS to exclude a portion of its investments under the conditions set forth in paragraph (d) of this section.)

(3) If a borrower required to reduce or restructure its portfolio does not fully comply within a reasonable period of time determined by the Administrator, which shall not exceed 12 months from the date the borrower was notified of its loss of exemption, then, upon written notice from RUS, the borrower shall be in default of its RUS loan contract and/or RUS mortgage.

(e) By no later than July 1 of each year, RUS will provide written notice to any borrowers whose exemption status has changed as a result of more recent data being available for the qualification criteria set forth in paragraph (a) of this section, or as a result of other reasons, such as corrections in the available data. An explanation of the reasons for any changes in exemption status will also be provided to the borrowers affected.

§ 1717.657 Investments above the 15 percent level by certain borrowers not exempt under §1717.656(a).
(ii) The borrower is not in financial workout and has not had its government debt restructured;

(iii) The borrower has equity equal to at least 5 percent of its total assets; and

(iv) After approval of the investment, loan or guarantee, the aggregate of the borrower’s investments, loans and guarantees will not exceed 20 percent of the borrower’s total utility plant.

(2) Borrower requests for approval to exceed the 15 percent level will be considered on a case by case basis. The requests must be made in writing.

(3) In considering borrower requests, the Administrator will take the following factors into consideration:

(i) The repayment of all loans secured under the RUS mortgage will continue to be assured, and loan security must continue to be reasonably adequate, even if the entire investment or loan is lost or the borrower is required to perform for the entire amount of the guarantee. These risks will be considered along with all other risks facing the borrower, whether or not related to the investment, loan or guarantee;

(ii) In the case of investments, the investment must be made in an entity separate from the borrower, such as a subsidiary, whereby the borrower is protected from any liabilities incurred by the separate entity, unless the borrower demonstrates to the satisfaction of the Administrator that making the investment directly rather than through a separate entity will present no substantial risk to the borrower in addition to the possibility of losing all or part of the original investment;

(iii) The borrower must be economically and financially sound as indicated by its costs of operation, competitiveness, operating TIER and operating DSC, physical condition of the plant, ratio of equity to total assets, ratio of net utility plant to long-term debt, and other factors; and

(iv) Other factors affecting the security and repayment of government debt, as determined by the Administrator on a case by case basis.

(4) If the Administrator approves an investment, loan or guarantee, such investment, loan or guarantee will continue to be included when calculating the borrower’s ratio of aggregate investments, loans and guarantees to total utility plant.

(d) Distribution and power supply borrowers.

If the aggregate of the investments, loans and guarantees of a distribution or power supply borrower exceeds 15 percent of the borrower’s total utility plant as a result of the cumulative profits or margins, net of losses, earned on said transactions over the past 10 calendar years (i.e., the sum of all profits earned during the 10 years including interest earned on cash accounts, loans, and similar transactions—less the sum of all losses experienced on all transactions during the 10 years) then:

(1) The borrower will not be in default of the RUS loan contract or RUS mortgage with respect to required approval of investments, loans and guarantees, provided that the borrower had not made additional net investments, loans or guarantees without approval after reaching the 15 percent level; and

(2) At the request of the borrower, the Administrator in his or her sole discretion may decide to exclude up to the amount of net profits or margins earned on the borrower’s investments, loans and guarantees during the past 10 calendar years, if the Administrator determines that such exclusion will not increase loan security risks. The borrower must provide documentation satisfactory to the Administrator as to the current status of its investments, loans and guarantees and the net profits earned during the past 10 years. Any exclusion approved by the Administrator may or may not reduce the level of investments, loans and guarantees to or below the 15 percent level. If such exclusion does not reduce the level to or below the 15 percent level, RUS will notify the borrower in writing that it must reduce or restructure its investments, loans and guarantees to a level of not more than 15 percent of total utility plant. If the borrower does not come within the 15 percent level within a reasonable period of time determined by the Administrator, which shall not exceed 12 months from the date the borrower was notified of the required action, then, upon written notice from RUS, the borrower shall be in default of its RUS loan contract and mortgage.
§ 1717.658 Records, reports and audits.

(a) Every borrower shall maintain accurate records concerning all investments, loans and guarantees made by it. Such records shall be kept in a manner that will enable RUS to readily determine:

(1) The nature and source of all income, expenses and losses generated from the borrower’s loans, guarantees and investments;

(2) The location, identity and lien priority of any loan collateral resulting from activities permitted by this subpart; and

(3) The effects, if any, which such activities may have on the feasibility of loans made, guaranteed or lien accommodated by RUS.

(b) In determining the aggregate amount of investments, loans and guarantees made by a borrower, the borrower shall use the recorded value of each investment, loan or guarantee as reflected on its books and records for the next preceding end-of-month, except for the end-of-year report which shall be based on December 31 information. Every borrower shall also report annually to RUS, in the manner and on the form specified by the Administrator, the current status of each investment, outstanding loan and outstanding guarantee which it has made pursuant to this subpart.

(c) The records of borrowers shall be subject to the auditing procedures prescribed in part 1773 of this chapter. RUS reserves the right to review the financial records of any subsidiaries of the borrower to determine if the borrower is in compliance with this subpart, and to ascertain if the debts, guarantees (as defined in this subpart), or other obligations of the subsidiaries could adversely affect the ability of the borrower to repay its debts to the Government.

(d) RUS will monitor borrower compliance with this subpart based primarily on the annual financial and statistical report submitted by the borrower to RUS and the annual auditor’s report on the borrower’s operations. However, RUS may inspect the borrower’s records at any time during the year to determine borrower compliance. If a borrower’s most recent annual financial and statistical report shows the aggregate of the borrower’s investments, loans and guarantees to be below the 15 percent level, that in no way relieves the borrower of its obligation to comply with its RUS mortgage, RUS loan contract, and this subpart with respect to Administrator approval of any additional investment, loan or guarantee that would cause the aggregate to exceed the 15 percent level.

§ 1717.659 Effect of this subpart on RUS loan contract and mortgage.

(a) Nothing in this subpart shall affect any provision, covenant, or requirement in the RUS mortgage, RUS loan contract, or any other agreement between a borrower and RUS with respect to any matter other than the prior approval by RUS of investments, loans, and guarantees by the borrower, such matters including, without limitation, extensions, additions, and modifications of the borrower’s electric system. Also, nothing in this subpart shall affect any rights which supplemental lenders have under the RUS mortgage, or under their loan contracts or other agreements with their borrowers, to limit investments, loans and guarantees by their borrowers to levels below 15 percent of total utility plant.

(b) RUS will require that any electric loan made or guaranteed by RUS after October 23, 1995 shall be subject to a provision in the loan contract or mortgage restricting investments, loans and guarantees by the borrower substantially as follows: The borrower shall not make any loan or advance to, or make any investment in, or purchase or make any commitment to purchase any stock, bonds, notes or other securities of, or guaranty, assume or otherwise become obligated or liable with respect to the obligations of, any other person, firm or corporation, except as permitted by the RE Act and RUS regulations.

(c) RUS reserves the right to change the provisions of the RUS mortgage and loan contract relating to RUS approval of investments, loans and guarantees made by the borrower, on a case-by-case basis, in connection with
§ 1717.850 General.

(a) Scope and applicability. (1) This subpart R establishes policies and procedures for the accommodation, subordination or release of the Government's lien on borrower assets, including approvals of supporting documents and related loan security documents, in connection with 100 percent private sector financing of facilities and other purposes. Policies and procedures regarding lien accommodations for concurrent supplemental financing required in connection with an RUS insured loan are set forth in subpart S of this part.

(2) This subpart and subpart S of this part apply only to debt to be secured under the mortgage, the issuance of which is subject to the approval of the Rural Utilities Service (RUS) by the terms of the borrower's mortgage with respect to the issuance of additional debt or the refinancing or refunding of debt. If RUS approval is not required under such terms of the mortgage itself, a lien accommodation is not required. If the loan contract or other agreement between the borrower and RUS requires RUS approval with respect to the issuance of debt or making additions to or extensions of the borrower's system, such required approvals do not by themselves result in the need for a lien accommodation.

(b) Overall policy. (1) Consistent with prudent lending practices, the maintenance of adequate security for RUS's loans, and the objectives of the Rural Electrification Act (RE Act), it is the policy of RUS to provide effective and timely assistance to borrowers in obtaining financing from other lenders by sharing RUS's lien on a borrower's assets in order to finance electric facilities, equipment and systems, and certain other types of community infrastructure. In certain circumstances, RUS may facilitate the financing of such assets by subordinating its lien on specific assets financed by other lenders.

(2) It is also the policy of RUS to provide effective and timely assistance to borrowers in promoting rural development by subordinating RUS's lien for financially sound rural development investments under the conditions set forth in §1717.858.

(c) Decision factors. In determining whether to accommodate, subordinate, or release its lien on property pledged by the borrower under the RUS mortgage, RUS will consider the effects of such action on the achievement of the purposes of the RE Act, the repayment and security of RUS loans secured by the mortgage, and other factors set forth in this subpart. The following factors will be considered in assessing the effects on the repayment and security of RUS loans:

(1) The value of the added assets compared with the amount of new debt to be secured;

(2) The value of the assets already pledged under the mortgage, and any effects of the proposed transaction on the value of those assets;

(3) The ratio of the total outstanding debt secured under the mortgage to the value of all assets pledged as security under the mortgage;

(4) The borrower's ability to repay debt owed to the Government, as indicated by the following factors:

(i) Revenues, costs (including interest, lease payments and other debt service costs), margins, Times Interest Earned Ratio (TIER), Debt Service Coverage (DSC), and other case-specific economic and financial factors;

(ii) The variability and uncertainty of future revenues, costs, margins,
§ 1717.850

(1) Remit loan advances to a separate subaccount of the Cash-Construction Fund-Trustee Account;

(iii) Obtain a certification from a registered professional engineer, for each year during which funds from the separate subaccount are utilized by the borrower, that all materials and equipment purchased and facilities constructed during the year from said funds comply with RUS safety and performance standards, as required by paragraph (f) of this section, and are included in an CWP or CWP amendment approved by the borrower’s board of directors;

(i) Obtain an auditor’s certification from a Certified Public Accountant, for each year during which funds are advanced to or remitted from the separate subaccount, certifying:

(A) The amount of loan funds advanced to and remitted from the separate subaccount during the period of review;

(B) That based on the auditor’s review of construction work orders and other records, all moneys disbursed from the separate subaccount during the period of review were used for purposes contemplated in the loan agreement and the lien accommodation; and

(iv) Immediately notify RUS in writing if the lender is unable to obtain the certifications cited in paragraphs (g)(1)(ii) and (g)(1)(iii) of this section.

(2) The measures listed in paragraph (g)(1) of this section will normally be sufficient to meet the lender’s responsibility provided that additional measures are not reasonably required based on the particular circumstances of an individual case. Should a lender fail to carry out its responsibility in the manner described in this paragraph (g) or in another manner acceptable to RUS, RUS may disqualify such lender from participation in advance approval under §§1717.854 and 1717.857 and condition the lender’s receipt of a lien accommodation or subordination upon the lender providing satisfactory evidence that it will fulfill its responsibility under this paragraph (g).

(h) Contracting and procurement procedures. (1) Facilities financed with debt obtained entirely from non-RUS sources, without an RUS loan guarantee, are not subject to RUS post-loan...
requirements regarding contracting, procurement and bidding procedures; contract close-out procedures pertaining to project completion, final payment of contractor, and related matters; and standard forms of construction and procurement contracts listed in 7 CFR 1726.300.

(2) To the extent that provisions in a borrower’s loan contract or mortgage in favor of RUS may be inconsistent with paragraphs (g)(1) and (h)(1) of this section, paragraphs (g)(1) and (h)(1) of this section are intended to constitute an approval or waiver under the terms of such instruments, and in any regulations implementing such instruments, with respect to facilities financed with debt obtained entirely from non-RUS sources without an RUS guarantee.

(i) Access of handicapped to buildings and seismic safety. A borrower must meet the following requirements to be eligible for a lien accommodation or subordination for 100 percent private financing of the construction of buildings:

(1) The borrower must provide RUS with a certification by the project architect that the buildings will be designed and constructed in compliance with Section 504 of the Rehabilitation Act of 1973 as amended (29 U.S.C. 794), as applicable under that Act, and that the facilities will be readily accessible to and usable by persons with handicaps in accordance with the Uniform Federal Accessibility Standards (UFAS), (Appendix A to 41 CFR part 101.19, subpart 101-19.6). The certification must be included in the borrower’s application for a lien accommodation or subordination. In addition to these requirements, building construction may also be subject to requirements of The Americans with Disabilities Act (42 U.S.C. 12101 et seq.); and

(2) The borrower must comply with RUS’s seismic safety requirements set forth in 7 CFR part 1792, subpart C.

(k) Guaranteed loans. The provisions of this subpart do not apply to lien accommodations or subordinations sought for loans guaranteed by RUS. Such lien accommodations and subordinations are governed by RUS regulations on guaranteed loans.

(l) Release of lien. To avoid repetition, release of lien is not mentioned in every instance where it may be an acceptable alternative to subordination of RUS’s lien. Generally, lien subordination is favored over release of lien, and any decision to release RUS’s lien is at the sole discretion of RUS.

(m) Waiver authority. Consistent with the RE Act and other applicable laws, any requirement, condition, or restriction imposed by this subpart, or subpart S of this part, on a borrower, private lender, or application for a lien accommodation or subordination may be waived or reduced by the Administrator, if the Administrator determines that said action is in the Government’s financial interest with respect to ensuring repayment and reasonably adequate security for loans made or guaranteed by RUS.

(n) Liability. It is the intent of this subpart that any failure on the part of RUS to comply with any provisions hereof, including without limitation, those provisions setting forth specified timeframes for action by RUS on applications for lien accommodations or lien subordinations, shall not give rise to liability of any kind on the part of the Government or any employees of the Government including, without limitation, liability for damages, fees, expenses or costs incurred by or on behalf of a borrower, private lender or any other party.

[58 FR 53843, Oct. 19, 1993, as amended at 60 FR 67408, Dec. 29, 1995]

§ 1717.851 Definitions.

Terms used in this subpart have the meanings set forth in 7 CFR 1710.2. References to specific RUS forms and other RUS documents, and to specific sections or lines of such forms and documents, shall include the corresponding forms, documents, sections and lines in any subsequent revisions of
these forms and documents. In addition to the terms defined in 7 CFR 1710.2, the following terms have the following meanings for the purposes of this subpart:

- **Borrower's financial and statistical report** means RUS Form 7, Parts A through D, for distribution borrowers, and RUS Form 12a for power supply borrowers.

- **Calendar day** means any day of the year, except a Federal holiday that falls on a work day.

- **Capital investment.** For the purposes of §1717.860, capital investment means an original investment in an asset that is intended for long-term continued use or possession and, for accounting purposes, is normally depreciated or depleted as it is used. For example, such assets may include land, facilities, equipment, buildings, mineral deposits, patents, trademarks, and franchises. Original investments do not include refinancings or refundings.

- **Current refunding** means any refunding of debt where the proceeds of the new debt are applied to refund the old debt within 90 days of the issuance of the new debt.

- **Default** under the RUS mortgage, loan contract, restructuring agreement, or any other agreement between the borrower and RUS means any event of default or any event which, with the giving of notice or lapse of time or both, would become an event of default.

- **Equity, less deferred expenses,** means Line 33 of Part C of RUS Form 7 (distribution borrowers) or Section B, Line 5 of RUS Form 12a (power supply borrowers).

- **Front-end costs** means the reasonable cost of engineering, architectural, environmental and other studies and plans needed to support the construction of facilities and other investments eligible for a lien accommodation or subordination under this subpart.

- **Lien accommodation** means the sharing of the Government's (RUS's) lien on property, usually all property, covered by the lien of the RUS mortgage.

- **Lien subordination** means allowing another lender to take a first mortgage lien on certain property covered by the lien of the RUS mortgage, and the Government (RUS) taking a second lien on such property.

- **Natural gas distribution system** means any system of community infrastructure whose primary function is the distribution of natural gas and whose services are available by design to all or a substantial portion of the members of the community.

- **Net utility plant** means Part C, Line 5 of RUS Form 7 (distribution borrowers) or Section B, Line 5 of RUS Form 12a (power supply borrowers).

- **Power cost study** means the study defined in 7 CFR 1710.303.

- **Solid waste disposal system** means any system of community infrastructure whose primary function is the collection and/or disposal of solid waste and whose services are available by design to all or a substantial portion of the members of the community.

- **Telecommunication and other electronic communication system** means any system of community infrastructure whose primary function is the provision of telecommunication or other electronic communication services and whose services are available by design to all or a substantial portion of the members of the community.

- **Total assets, less deferred expenses** means Line 26 of Part C of RUS Form 7 (distribution borrowers) less assets properly recordable in Account 182.2, Unrecovered Plant and Regulatory Study Costs, and Account 182.3, Other Regulatory Assets.

- **Transaction costs** means the reasonable cost of legal advice, accounting fees, filing fees, recording fees, call premiums and prepayment penalties, financing costs (including, for example, underwriting commissions, letter of credit fees and bond insurance), and printing associated with borrower financing.

- **Water and waste disposal system** means any system of community infrastructure whose primary function is the supplying of water and/or the collection and treatment of waste water and whose services are available by design to all or a substantial portion of the members of the community.

- **Weighted average life of the loan** means the average life of the loan based on
the proportion of original loan principal paid during each year of the loan. It shall be determined by calculating the sum of all loan principal payments, expressed as a fraction of the original loan principal amount, times the number of years and fractions of years elapsed at the time of each payment since issuance of the loan. For example, given a $5 million loan, with a maturity of 5 years and equal principal payments of $1 million due on the anniversary date of the loan, the weighted average life would be: $(.2)(1\text{ year}) + (.2)(2\text{ years}) + (.2)(3\text{ years}) + (.2)(4\text{ years}) + (.2)(5\text{ years}) = .2\text{ years} + .4\text{ years} + .6\text{ years} + .8\text{ years} + 1.0\text{ years} = 3.0\text{ years}.

If instead the loan had a balloon payment of $5 million at the end of 5 years, the weighted average life would be: $(5\text{ million}/5\text{ million})(5\text{ years}) = 5\text{ years}.

§ 1717.852 Financing purposes.

(a) Purposes eligible. The following financing purposes, except as excluded in paragraph (b) of this section, are eligible for a lien accommodation from RUS, or in certain circumstances a subordination of RUS’s lien on specific assets, provided that all applicable provisions of this subpart are met:

(1) The acquisition, construction, improvement, modification, and replacement (less salvage value) of systems, equipment, and facilities, including real property, used to supply electric and/or steam power to:
   (i) RE Act beneficiaries; and/or
   (ii) End-user customers of the borrower who are not beneficiaries of the RE Act. Such systems, equipment, and facilities include those listed in 7 CFR 1710.251(c) and 1710.252(c), as well as others that are determined by RUS to be an integral component of the borrower’s system of supplying electric and/or steam power to consumers, such as, for example, coal mines, coal handling facilities, railroads and other transportation systems that supply fuel for generation, programs of demand side management and energy conservation, and on-grid and off-grid renewable energy systems;

(2) The purchase, rehabilitation and integration of existing distribution facilities, equipment and systems, and associated service territory;

(3) The following types of community infrastructure substantially located within the electric service territory of the borrower: water and waste disposal systems, solid waste disposal systems, telecommunication and other electronic communications systems, and natural gas distribution systems;

(4) Front-end costs, when and as the borrower has obtained a binding commitment from the non-RUS lender for the financing required to complete the procurement or construction of the facilities;

(5) Transaction costs included as part of the cost of financing assets or refinancing existing debt, provided, however, that the amount of transaction costs eligible for lien accommodation or subordination normally shall not exceed 5 percent of the principal amount of financing or refinancing provided, net of all transaction costs;

(6) The refinancing of existing debt secured under the mortgage;

(7) Interest during construction of generation and transmission facilities if approved by RUS, case by case, depending on the financial condition of the borrower, the terms of the financing, the nature of the construction, the treatment of these costs by regulatory authorities having jurisdiction, and such other factors deemed appropriate by RUS; and

(8) Lien subordinations for certain rural development investments, as provided in § 1717.858.

(b) Purposes ineligible. The following financing purposes are not eligible for a lien accommodation or subordination from RUS:

(1) Working capital, including operating funds, unless, in the judgment of RUS, it is required to ensure the repayment of RUS loans and/or other loans secured under the mortgage;

(2) Facilities, equipment, appliances, or wiring located inside the premises of the consumer, except:
   (i) Certain load-management equipment (see 7 CFR 1710.251(c));
   (ii) Renewable energy systems and RUS-approved programs of demand side management and energy conservation; and
§ 1717.853 Loan terms and conditions.

(a) Terms and conditions. A loan, bond or other financing instrument, for which a lien accommodation or subordination is requested from RUS, must comply with the following terms and conditions:

(1) The maturity of the loan or bond used to finance facilities or other capital assets must not exceed the weighted average of the expected remaining useful lives of the assets being financed;

(2) The loan or bond must have a maturity of not less than 5 years, except for loans or bonds used to refinance debt that has a remaining maturity of less than 5 years;

(3) The principal of the loan or bond must be amortized at a rate that will yield a weighted average life not greater than the weighted average life that would result from level payments of principal and interest; and

(4) The loan, or any portion of the loan, may bear either a variable (set annually or more frequently) or a fixed interest rate.

(b) RUS approval. Loan terms and conditions and the loan agreement between the borrower and the lender are subject to RUS approval. However, RUS will usually waive its right of approval for distribution borrowers that meet the conditions for advance approval of a lien accommodation or subordination set forth in §1717.854. RUS may also waive its right of approval in other cases. RUS’s decision to waive its right of approval will depend on the adequacy of security for RUS’s loans, the current and projected financial strength of the borrower and its ability to meet its financial obligations, RUS’s familiarity with the lender and its lending practices, whether the transaction is ordinary or unusual, and the uncertainty and credit risks involved in the transaction.

§ 1717.854 Advance approval—100 percent private financing of distribution, subtransmission and headquarters facilities, and certain other community infrastructure.

(a) Policy. Requests for a lien accommodation or subordination from distribution borrowers for 100 percent private financing of distribution, subtransmission and headquarters facilities, and for community infrastructure listed in §1717.852(a)(3), qualify for advance approval by RUS if they meet the conditions of this section and all other applicable provisions of this subpart. Advance approval means RUS will approve these requests once RUS is satisfied that the conditions of this section and all other applicable provisions of this subpart have been met.

(b) Eligible purposes. Lien accommodations or subordinations for the financing of distribution, subtransmission, and headquarters facilities and community infrastructure listed in §1717.852(a)(3) are eligible for advance approval, except those that involve the purchase of existing facilities and associated service territory.

(c) Qualification criteria. To qualify for advance approval, the following requirements, as well as all other applicable requirements of this subpart, must be met:

(1) The borrower has achieved a TIER of at least 1.5 and a DSC of at least 1.25 for each of 2 calendar years immediately preceding, or any 2 consecutive years.
§ 1717.855 Application contents: Advance approval—100 percent private financing of distribution, subtransmission and headquarters facilities, and certain other community infrastructure.

Applications for a lien accommodation or subordination that meet the requirements of §1717.854 must include the following information and documents:

(a) A certification by an authorized official of the borrower that the borrower and, as applicable, the loan are in compliance with all conditions set forth in §1717.854(c) and all applicable provisions of §§1717.852 and 1717.853;

(b) A resolution of the borrower’s board of directors requesting the lien accommodation or subordination and including the amount and maturity of the proposed loan, a general description of the facilities or other purposes to be financed, the name and address of the lender, and an attached term sheet summarizing the terms and conditions of the proposed loan;

(c) The borrower’s financial and statistical report, the data in which shall not be more than 60 days old when the complete application is received by RUS;

(d) Draft copy of any new mortgage or mortgage amendment (supplement) required by RUS or the lender, unless RUS has notified the borrower that it wishes to prepare these documents itself;

(e) A copy of the loan agreement, loan note, bond or other financing instrument, unless RUS has notified the
§ 1717.856 Application contents: Normal review—100 percent private financing.

Applications for a lien accommodation or subordination for 100 percent private financing for eligible purposes that do not meet the requirements of § 1717.854 must include the following information and documents:

(a) A certification by an authorized official of the borrower that:

(1) The borrower and, as applicable, the loan are in compliance with all applicable provisions of §§ 1717.852 and 1717.853; and

(2) There are no actions or proceedings against the borrower, pending or overtly threatened in writing before any court, governmental agency, or arbitrator that would materially adversely affect the borrower's operations and/or financial condition. If this certification cannot be made, the application must include:

(i) An opinion of borrower's counsel regarding any actions or proceedings against the borrower, as to the amount of any insurance coverage applicable to any loss that may result from the actions and proceedings addressed in the opinion of borrower's counsel;

(ii) A certification by an authorized official of the borrower as to the amount of any insurance coverage applicable to any loss that may result from the actions and proceedings addressed in the opinion of borrower's counsel;

(b) The information and documents set forth in § 1717.855 (b) through (n);

(c) A long-range financial forecast providing financial projections for at least 10 years, which demonstrates that the borrower's system is economically viable and that the proposed loan is financially feasible, and a resolution of the borrower's board of directors adopting the long-range financial forecast. The financial forecast must comply with the requirements of 7 CFR part 1710 subpart G. RUS may, in its sole discretion, waive the requirement of this paragraph that a long range financial forecast be provided, if:

(1) The borrower is current on all of its financial obligations and is in compliance with all requirements of its mortgage and loan agreement with RUS;
§ 1717.857 Refinancing of existing secured debt—distribution and power supply borrowers.

(a) Advance approval. All applications for a lien accommodation or subordination for the refinancing of existing secured debt that meet the qualification criteria of this paragraph, except applications from borrowers in default under their mortgage or loan contract with RUS, are eligible for advance approval. Such lien accommodations and subordinations are deemed to be in the Government’s interest, and RUS will approve them once RUS is satisfied that the requirements of this paragraph and paragraph (c) of this section have been met. The qualification criteria are as follows:

(1) The refinancing is a current refunding and does not involve interest rate swaps, forward delivery contracts, or similar features;

(2) The principal amount of the refinancing loan does not exceed the sum of the outstanding principal amount of the debt being refinanced plus the amount of transactions costs included in the refinancing loan that are eligible for lien accommodation or subordination under §1717.852(a)(4);

(3) The weighted average life of the refinancing loan is not greater than the weighted average remaining life of the loan being refinanced; and

(4) The present value of the cost of the refinancing loan, including all transaction costs and any required investments in the lender, is less than the present value of the cost of the loan being refinanced, as determined by a method acceptable to RUS. The discount rate used in the present value analysis shall be equal to either:

(i) The current rate on Treasury securities having a maturity equal to the weighted average life of the refunding loan, plus one-eighth percent, or

(ii) A rate approved by RUS based on documentation provided by the borrower as to its marginal long-term borrowing cost.

(b) Other applications. Applications for a lien accommodation or subordination for refinancing that do not meet the requirements of paragraph (a) of this section will be reviewed by RUS under normal review procedures for these applications. In the case of either advance approval or normal review, a lien subordination would be authorized only if the lien of the mortgage was subordinated with respect to the assets securing the loan being refinanced.

(c) Application contents—advance approval of refinancing. Applications for a lien accommodation or subordination for refinancing of existing secured debt that meet the qualification criteria for
advance approval set forth in paragraph (a) of this section, must include the following information and documents:

1. A certification by an authorized official of the borrower that the application meets the requirements of paragraph (a) of this section and all applicable provisions of §§1717.852 and 1717.853;

2. Documentation and analysis demonstrating that the application meets the qualification criteria set forth in paragraph (a) of this section;

3. A resolution of the borrower’s board of directors requesting the lien accommodation or subordination and including the amount and maturity of the proposed loan, a general description of the debt to be refinanced, the name and address of the lender, and an attached term sheet summarizing the terms and conditions of the proposed loan;

4. The borrower’s financial and statistical report, the data in which shall not be more than 60 days old when the complete application is received by RUS;

5. Draft copy of any new mortgage or mortgage amendment (supplement) required by RUS or the lender, unless RUS has notified the borrower that it wishes to prepare these documents itself;

6. A copy of the loan agreement, loan note, bond or other financing instrument, unless RUS has notified the borrower that these documents need not be submitted;

7. Form AD-1047, Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions, as required by 7 CFR part 3017;

8. A report by the borrower stating whether or not it is delinquent on any Federal debt, and if delinquent, the amount and age of the delinquency and the reasons therefor; and a certification, if not previously provided, that the borrower has been informed of the Government’s collection options; and

9. Other information, documents and opinions that RUS may require to determine whether all of the applicable provisions of this subpart have been met.

(d) Application contents—normal review of refinancing. Applications for a lien accommodation or subordination for refinancing of existing secured debt that do not meet the requirements for advance approval set forth in paragraph (a) of this section, must include the following information and documents:

1. The information and documents set forth in paragraphs (c)(3) through (9) of this section;

2. A complete description of the refinancing loan and the outstanding debt to be refinanced;

3. An analysis comparing the refinancing loan with the loan being refinanced as to the weighted average life and the net present value of the costs of the two loans; and

4. If the present value of the cost of the refinancing loan is greater than the present value of the cost of the debt being refinanced, financial forecasts for at least 5 years comparing the borrower’s debt service and other costs, revenues, margins, cash flows, TIER, and DSC, with and without the proposed refinancing.

(e) Application process and timeframes. The application process and timeframes for RUS review and action for refinancings are set forth in §1717.859(d).

(f) Prepayments of concurrent RUS insured loans. If the loan being refinanced was made concurrently as supplemental financing required by RUS in connection with an RUS insured loan, the refinancing will not be considered a prepayment under the RUS mortgage, and no proportional prepayment of the concurrent RUS insured loan will be required, provided that the principal amount of the refinancing loan is not less than the amount of loan principal being refinanced, and the weighted average life of the refinancing loan is materially equal to the weighted average remaining life of the loan being refinanced. The refinancing loan shall be considered a concurrent loan.

7 CFR Ch. XVII (1-1-98 Edition)

§ 1717.858 Lien subordination for rural development investments.

(a) Policy. RUS encourages borrowers to consider investing in financially
sound projects that are likely to have a positive effect on economic development and employment in rural areas. In addition to the guidance set forth in §1717.651, RUS recommends that such investments be made through a subsidiary of the borrower in order to clearly separate the financial risks and the revenues and costs of the rural development enterprise from those of the borrower’s electric utility business. This should reduce credit risks to the borrower’s primary business, and minimize the possibility of undisclosed cross subsidization of the rural development enterprise by electric rate payers.

(b) Lien subordination. RUS will consider subordinating or releasing its lien on the stock held by a borrower in a subsidiary whose primary business directly contributes to or supports economic development and employment in rural areas, as defined in section 13 of the RE Act, when requested by a lender to the subsidiary, other than the borrower. To be eligible for said lien subordination or release:

(1) The borrower must be current on all of its financial obligations and be in compliance with all provisions of its mortgage and loan agreement with RUS; and

(2) In the judgment of RUS, the borrower must be able to repay all of its outstanding debt, and the security for all outstanding loans made to the borrower by RUS, including loans guaranteed by RUS, must be adequate, after taking into account the proposed subordination or release of lien.

(c) Application contents. Applications for a lien subordination or release of lien for rural development investments must include the following information and documents:

(1) A resolution of the borrower’s board of directors requesting the lien subordination or release of lien;

(2) A certification by an authorized official of the borrower that the borrower is current on all of its financial obligations and is in compliance with all provisions of its mortgage and loan agreement with RUS;

(3) A description of the facilities or other purposes to be financed and the projected effects on economic development and employment in rural areas;

(4) The borrower’s financial and statistical report, the data in which shall not be more than 60 days old when the complete application is received by RUS;

(5) If requested by RUS, a long-range financial forecast providing financial projections for at least 10 years, in form and substance satisfactory to RUS, which demonstrates that the borrower’s system is economically viable and that the borrower will be able to repay all of its outstanding debt and meet all other financial obligations;

(6) A discussion of the borrower’s compliance with RUS requirements on accounting, financial reporting, record keeping, and irregularities (see §1717.854(c)(5)). RUS will review the case and determine the effect of any noncompliance on the feasibility and security of RUS’s loans, and whether the requested lien subordination or release of lien can be approved;

(7) If any buildings are to be constructed with the proceeds of the loan to be made to the subsidiary:

(i) A certification by the project architect that the buildings will be designed and constructed in compliance with Section 504 of the Rehabilitation Act of 1973 as amended (29 U.S.C. 794), as applicable under that Act, and that the facilities will be readily accessible to and usable by persons with handicaps in accordance with the Uniform Federal Accessibility Standards; and

(ii) A written acknowledgement from a registered engineer or architect regarding compliance with seismic provisions of applicable model codes, as required by 7 CFR 1792.104;

(8) A certification by an authorized official of the borrower that flood hazard insurance will be obtained for the full value of any buildings, or other facilities susceptible to damage if flooded, that will be located in a flood hazard area;

(9) Form AD-1047, Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions, as required by 7 CFR part 3017;

(10) A report by the borrower stating whether or not it is delinquent on any Federal debt, and if delinquent, the amount and age of the delinquency and
the reasons therefor; and a certification, if not previously provided, that the borrower has been informed of the Government’s collection options; and

(11) Other information that RUS may require to determine whether all of the applicable provisions of this subpart have been met.

§ 1717.859 Application process and timeframes.

(a) General. (1) Borrowers are responsible for ensuring that their applications for a lien accommodation or subordination are complete and sound as to substance and form before they are submitted to RUS. RUS will not accept any application that, on its face, is incomplete or inadequate as to the substantive information required by this subpart. RUS will notify borrowers in writing when their applications are complete and in form and substance satisfactory to RUS. A copy of all notifications of borrowers cited in this section will also be sent to the private lender.

(2) It is recommended that borrowers consult with RUS staff before submitting their applications to determine whether they will likely qualify for advance approval or normal review, and to obtain answers to any questions about the information and documents required for the application.

(3) A borrower shall, after submitting an application, promptly notify RUS of any changes that materially affect the information contained in its application.

(4) After submitting an application and having been notified by RUS of additional information and documents and other changes needed to complete the application, if the required information and documents are not supplied to RUS within 30 calendar days of the borrower’s receipt of the notice, RUS may return the application to the borrower. The borrower may resubmit the application when the required additional information and documents are available.

(5) Timeframes. The timeframes for review of applications set forth in this section are based on the following conditions:

(i) The types of lien accommodations or subordinations requested are of the “standard” types that RUS has approved previously, i.e., the so-called Type I, II and III lien accommodations. Future revisions of the RUS mortgage may result in other “standard” types of lien accommodations and lien subordinations acceptable to RUS. Requests for lien accommodations or subordinations that are substantially different than the “standard” types previously approved by RUS may require additional time for review and action;

(ii) The requested lien accommodation or subordination does not require the preparation of an environmental assessment or an Environmental Impact Statement. Preparation of these documents often will require additional time beyond the timeframes cited in this section; and

(iii) The timeframes set forth in this section, except for paragraph (b)(4) of this section, which deals only with approval of a new mortgage or mortgage amendment, include RUS review and/or approval of a loan contract, if required as part of the application, and required supporting documents, such as a CWP.

(b) Advance approval—100 percent private financing of distribution, subtransmission, and headquarters facilities. (1) Applications that qualify under §1717.854 for advance approval of a lien accommodation or subordination for 100 percent private financing of distribution, subtransmission, and headquarters facilities are submitted to the general field representative (GFR). The GFR will work with the borrower to ensure that all components of the application are assembled. Once the application is satisfactory to the GFR, it will be sent promptly to the Washington office for further review and action. If a new mortgage or mortgage amendment is required, a draft of these documents must be included in the application, unless the borrower has been notified that RUS wishes to prepare the documents itself.

(2) If no additional or amended information is needed for RUS to complete its review of the application once it is received in the Washington Office, RUS will, within 45 calendar days of receiving the application in the Washington Office, either:

(i) Approve the lien accommodation or subordination if the borrower has
demonstrated satisfactorily to RUS that all requirements of this subpart applicable to advance approval have been met, and send written notice to the borrower. RUS’s approval, in this case and all other cases, will be conditioned upon execution and delivery by the borrower of a satisfactory security instrument, if required, and such additional information, documents, and opinions of counsel as RUS may require;

(ii) If all requirements have not been met, so notify the borrower in writing. The application will be returned to the borrower unless the borrower requests that it be reconsidered under the requirements and procedures for normal review set forth in paragraph (c) of this section and in §1717.856; or

(iii) Send written notice to the borrower explaining why a decision cannot be made at that time and giving the estimated date when a decision is expected.

(3) If additional or amended information is needed after the application is received in the Washington Office, RUS will so notify the borrower in writing within 15 calendar days of receiving the application in the Washington Office. If RUS subsequently becomes aware of other deficiencies in the application, additional written notice will be sent to the borrower. Within 30 calendar days of receiving all of the information required by RUS to complete its review, RUS will act on the application as described in paragraphs (b)(2)(i) through (b)(2)(iii) of this section.

(4) If a new mortgage or mortgage amendment is required, within 30 days of receiving such documents satisfactory to RUS, including required execution counterparts, RUS will execute the documents and send them to the borrower, along with instructions pertaining to recording of the mortgage, an opinion of borrower’s counsel, and other matters. RUS will promptly notify the borrower upon receiving satisfactory evidence that the borrower has complied with said instructions.

(c) Normal review—100 percent private financing of distribution, transmission, and/or generation facilities—(1) Distribution borrowers. (i) Applications from distribution borrowers for a lien accommodation or subordination for 100 percent private financing of distribution, transmission, and/or generation facilities (including other eligible electric utility purposes) that do not meet the criteria for advance approval, are also submitted to the GFR. Procedures at this stage are the same as in paragraph (b)(1) of this section.

(ii) If no additional or amended information is needed for RUS to complete its review of the application once it is received in the Washington office, RUS will, within 90 calendar days of receiving the application in the Washington Office, send written notice to the borrower either approving the request, disapproving the request, or explaining why a decision cannot be made at that time and giving the estimated date when a decision is expected.

(iii) If additional or amended information is needed after the application is received in the Washington Office, RUS will so notify the borrower in writing within 15 calendar days of receiving the application in the Washington Office. If RUS subsequently becomes aware of other deficiencies in the application, additional written notice will be sent to the borrower. Within 90 calendar days of receiving all of the information required by RUS to complete its review, RUS will act on the application as described in paragraph (c)(1)(ii) of this section.

(iv) If a new mortgage or mortgage amendment is required, the procedures and timeframes of paragraph (b)(4) of this section will apply.

(2) Power supply borrowers. (i) Applications from power supply borrowers for a lien accommodation or subordination for 100 percent private financing of distribution, transmission, and/or generation facilities, and other eligible electric utility purposes, are submitted to the RUS Power Supply Division, or its successor, in Washington, DC.

(ii) Within 30 calendar days of receiving the borrower’s application containing the information and documents required by §1717.856, RUS will send written notice to the borrower of any deficiencies in its application as to completeness and acceptable form and substance. Additional written notices may be sent to the borrower if RUS subsequently becomes aware of other deficiencies in the borrower’s application.
(iii) Within 90 calendar days of receiving all of the information required by RUS to complete its review, RUS will act on the application as described in paragraph (c)(1)(ii) of this section.

(iv) If a new mortgage or mortgage amendment is required, these documents will be reviewed and executed pursuant to the procedures and timeframes of paragraph (b)(4) of this section.

(d) Refinancing of existing debt. All requests for a lien accommodation or subordination for refinancing are sent directly to the Washington office.

(1) Advance approval. (i) Within 15 calendar days of receiving the borrower’s application containing the information and documents required by §1717.857(c), RUS will send written notice to the borrower of any deficiencies in its application as to completeness and acceptable form and substance. Additional written notices may be sent to the borrower if RUS subsequently becomes aware of other deficiencies in the borrower’s application.

(ii) Within 15 calendar days of receiving all of the required information and documents, in form and substance satisfactory to RUS, RUS will either:

(A) Approve the lien accommodation or subordination if the borrower has demonstrated satisfactorily to RUS that all requirements of §1717.857(a) and (c) have been met, and send written notice to the borrower;

(B) If all requirements have not been met, so notify the borrower in writing. The application will be returned to the borrower unless the borrower requests, so notify the borrower in writing. The application will be returned to the borrower unless the borrower requests that it be reconsidered under the requirements and procedures for normal review set forth in paragraph (d)(2) of this section and in §1717.857, or

(C) Send written notice to the borrower explaining why a decision cannot be made at that time and giving the estimated date when a decision is expected.

(iii) If a new mortgage or mortgage amendment is required, these documents will be reviewed and executed pursuant to the procedures and timeframes of paragraph (b)(4) of this section.

(e) Rural development investments. (1) Applications for a lien subordination for rural development investments are submitted by distribution borrowers to the GFR and by power supply borrowers to the RUS Power Supply Division, or its successor, in Washington, DC.

(2) The GFR will work with the borrower to ensure that all components of the application are assembled. Once the application is satisfactory to the GFR, it will be sent promptly to the Washington Office for further review and action. After the application is received in the Washington Office, if additional or amended information is needed for RUS to complete its review, RUS will notify the borrower in writing within 15 calendar days of receiving the application.

(3) Applications from power supply borrowers containing the information and documents required by §1717.858(c) will be reviewed in the Washington office and the borrower given written notice within 30 calendar days of receiving the application of any deficiencies as to completeness and acceptable form.
and substance. Additional written notices may be sent to the borrower if RUS subsequently becomes aware of other deficiencies in the borrower’s application.

(4) Within 60 calendar days of receiving in the Washington office all of the required information and documents, in form and substance satisfactory to RUS, RUS will give written notice to the borrower either approving the request, disapproving the request, or explaining why a decision cannot be made at that time and giving the estimated date when a decision is expected.

(5) If a new mortgage or mortgage amendment is required, these documents will be reviewed and executed pursuant to the procedures and time-frames of paragraph (b)(4) of this section.

§ 1717.860 Lien accommodations and subordinations under section 306E of the RE Act.

(a) General. Under section 306E of the RE Act, when requested by a private lender providing financing for capital investments by a borrower whose net worth exceeds 110 percent of the outstanding principal balance of all loans made or guaranteed to the borrower by RUS, the Administrator will, without delay, offer to share the government’s lien on the borrower’s system or subordinate the government’s lien on the property financed by the private lender, provided that the security, including the assurance of repayment, for loans made or guaranteed by RUS will remain reasonably adequate. To qualify for a lien accommodation or subordination under this section, the investment must be an original capital investment, i.e., not a refinancing or refunding. (See §1717.851 for the definition of capital investment.)

(b) Determination of net worth to RUS debt ratio. (1) In the case of applications for a lien accommodation, a borrower’s net worth will be based on the borrower’s most recent financial and statistical report, the data in which shall not be more than 60 days old at the time the application is received by RUS, and the outstanding debt owed to or guaranteed by RUS will be based on latest RUS records available. The financial and statistical reports (Form 7 for distribution borrowers and Form 12a for power supply borrowers) are subject to RUS review and revision, and they must comply with RUS’s system of accounts and accounting principles set forth in 7 CFR part 1767. Since sinking fund depreciation is not approved under part 1767, net worth for borrowers using sinking fund depreciation will be calculated as if the borrower had been using straight line depreciation.

(2) Net worth shall be calculated by taking total margins and equities (Line 33 of Part C of RUS Form 7 for distribution borrowers, or Line 34 of Section B of RUS Form 12a for power supply borrowers) and subtracting assets properly recordable in account 182.2, Unrecovered Plant and Regulatory Study Costs, and account 182.3, Other Regulatory Assets, as defined in 7 CFR part 1767.

(c) Application requirements and process. (1) If a borrower’s net worth to RUS debt ratio exceeds 110 percent, as determined by RUS, and the borrower is in compliance with all requirements of its mortgage, loan agreement with RUS, and any other agreement with RUS that have not been exempted in writing by RUS, if requested RUS will expeditiously approve a lien accommodation or subordination for 100 percent private financing of capital investments, provided that the security, including the assurance of repayment, for loans made or guaranteed by RUS will remain reasonably adequate. RUS’s approval will be conditioned upon execution and delivery by the borrower of a security instrument satisfactory to RUS, if required, and such additional information, documents, and opinions of counsel as RUS may require.

(2) The application must include the following:

(i) A resolution of the borrower’s board of directors requesting the lien accommodation and including the amount and maturity of the proposed loan, a general description of the facilities or other purposes to be financed, the name and address of the lender, and an attached term sheet summarizing the terms and conditions of the proposed loan;
§ 1717.860

(ii) A certification by an authorized official of the borrower that the borrower is in compliance with all requirements of its mortgage, loan agreement with RUS, and any other agreement with RUS that have not been exempted in writing by RUS;

(iii) The borrower's financial and statistical report, the data in which shall not be more than 60 days old when the complete application is received by RUS;

(iv) Draft copy of any new mortgage or mortgage amendment (supplement) required by RUS or the lender, unless RUS has notified the borrower that it wishes to prepare these documents itself;

(v) A copy of the loan agreement, loan note, bond or other financing instrument, unless RUS has notified the borrower that these documents need not be submitted. These documents will not be subject to RUS approval, but may be reviewed to determine whether they contain any provisions that would result in the security, including assurance of repayment, for loans made or guaranteed by RUS no longer being reasonably adequate;

(vi) The following certifications and reports required by law:

(A) The certification by the project architect for any buildings to be constructed, as required by 7 CFR 1717.850(i);  
(B) A certification by an authorized official of the borrower that flood hazard insurance will be obtained for the full value of any buildings, or other facilities susceptible to damage if flooded, that will be located in a flood hazard area;

(C) Form AD–1047, Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions, as required by 7 CFR part 3017;

(D) A report by the borrower stating whether or not it is delinquent on any Federal debt, and if delinquent, the amount and age of the delinquency and the reasons therefor; and a certification, if not previously provided, that the borrower has been informed of the Government's collection options; and

(E) The written acknowledgement from a registered engineer or architect regarding compliance with seismic provisions of applicable model codes for any buildings to be constructed, as required by 7 CFR 1792.104. All other elements of an application listed in §1717.855, §1717.856, and §1717.858(c) not listed in this paragraph (c) are exempted.

(3) Applications from distribution borrowers are submitted to the general field representative (GFR), while applications from power supply borrowers are submitted to the RUS Power Supply Division, or its successor, in Washington, DC. When an application is satisfactory to the GFR, it will be sent promptly to the Washington office. If Washington office staff determine that an application is incomplete, the borrower will be promptly notified in writing about the deficiencies. When the application is complete, and if the security, including assurance of repayment, of loans made or guaranteed by RUS will remain reasonably adequate after granting the lien accommodation or subordination, the borrower and the lender will be promptly notified in writing that the lien accommodation or subordination has been approved, subject to the conditions cited in paragraph (c)(1) of this section.

(d) Rural development and other non-electric utility investments. Although RUS recommends the use of separate subsidiaries as set forth in §1717.858, if requested by a borrower that meets the 110 percent equity test and all other applicable requirements of this section, RUS will provide a lien subordination on the specific assets financed in the case of loans made directly to the borrower for rural development and other non-electric utility purposes, provided that the outstanding balance of all such loans lien subordinated under this paragraph (d), after taking into consideration the effect of the new loan, does not exceed 15 percent of the borrower's net worth and the security, including assurance of repayment, of loans made or guaranteed by RUS will remain reasonably adequate after granting the lien subordination. Investments lien subordinated under this paragraph shall be included among those investments subject to the 15 percent of total utility plant limitation set forth in 7 CFR 1717.654(b)(1), and granting of the lien subordination will not constitute
approval of the investment under 7 CFR part 1717, subpart N.

(e) Requirements and controls not exempted. All requirements and limitations imposed with respect to lien accommodations and subordinations by this subpart R that are not specifically exempted by this section are not exempted and shall continue to apply according to their terms.

§ 1717.901 Early approval.

(a) Conditions. If requested by a borrower in writing, RUS will review the application for a lien accommodation for required supplemental financing early in the process, before funding is available for the concurrent RUS insured loan, and approve the lien accommodation if the following conditions are met:

(1) The required supplemental loan meets the requirements for an insured loan, as set forth in 7 CFR part 1710, subparts A through G, and other RUS regulations pertaining to required supplemental loans;

(2) The borrower has demonstrated the ability to obtain the funds that would be needed to complete other portions of the project, if the portion to be constructed with private loan funds could not be used productively without completion of such other portions, in the event concurrent RUS insured loan funds are not forthcoming. Such evidence may include financial records demonstrating the availability of general funds, and/or a written commitment from the private lender to provide a loan for the remaining amount of financing required, with such commitment being conditioned upon the availability of a lien accommodation from RUS; and

(3) An authorized official of the borrower has requested early approval of the lien accommodation and explained the reasons therefor, and has certified that the funds are needed and will be drawn down before funds from the concurrent insured loan are expected to be available, assuming that the insured loan is approved.

(b) Timeframe for RUS action. (1) RUS will either approve or disapprove the lien accommodation within 90 days of receiving the borrower's request for early approval and the complete application for the concurrent RUS loan and required supplemental financing, in form and substance satisfactory to RUS, or notify the borrower in writing of the estimated date when a decision is expected. If an environmental assessment or an Environmental Impact Statement is required, additional time beyond the 90 days may be required to prepare these documents. RUS's approval of the lien accommodation will be conditioned upon execution and delivery by the borrower of a satisfactory security instrument, if required, and such additional information, documents, and opinions of counsel as RUS may require.

(2) If a mortgage or mortgage amendment is required, RUS will consult with the other mortgagees as to who will prepare the documents. Within 30 days of obtaining the documents satisfactory to RUS, including required execution counterparts, RUS will execute the documents and send them to the borrower, along with instructions pertaining to recording of the mortgage.
§ 1717.902 Other RUS requirements.

(a) General policy. If a borrower's net worth to RUS debt ratio exceeds 110 percent, as determined by RUS, and the borrower is in compliance with all requirements of its mortgage, loan agreement with RUS, and any other agreement with RUS that have not been exempted in writing by RUS, RUS will expeditiously approve a lien accommodation for a concurrent supplemental loan if requested in writing by the borrower, provided that the security, including assurance of repayment, of loans made or guaranteed by RUS will remain reasonably adequate. RUS's approval will be conditioned upon execution and delivery by the borrower of a security instrument satisfactory to RUS, if required, and such additional information, documents, and opinions of counsel as RUS may require.

(b) Determination of net worth to RUS debt ratio. A borrower's ratio of net worth to RUS debt will be determined as set forth in §1717.800(b).

(c) Requirements and controls exempted. The applicable requirements and controls exempted by 7 CFR 1710.7(c) are also exempted with respect to concurrent supplemental loans.

(d) Requirements and controls not exempted. All requirements and controls applicable to concurrent supplemental financing set forth in this subpart and other RUS regulations that are not specifically exempted by 7 CFR 1710.7(c) are not exempted and shall continue to apply according to their terms. These include, but are not limited to:

(1) The applicable requirements listed in 7 CFR 1710.7(d); and

(2) The requirements set forth in §1717.901(a) when a borrower requests early approval of a lien accommodation.

(e) Procedures. If a borrower meets the requirements of this section, upon receipt of a complete application RUS will promptly notify the borrower and lender in writing that the lien accommodation has been approved subject to the conditions set forth in paragraph (a) of this section.

[59 FR 3987, Jan. 28, 1994]
§ 1717.1200 Purpose and scope.

(a) Section 331(b) of the Consolidated Farm and Rural Development Act (Con Act), as amended on April 4, 1996 by Public Law 104-127, 110 Stat. 888 (7 U.S.C. 1921 et seq.), grants authority to the Secretary of Agriculture to compromise, adjust, reduce, or charge-off debts or claims arising from loans made or guaranteed under the Rural Electrification Act of 1936, as amended (RE Act). Section 331(b) of the Con Act also authorizes the Secretary of Agriculture to adjust, modify, subordinate, or release the terms of security instruments, leases, contracts, and agreements entered into or administered by the Rural Utilities Service (RUS). The Secretary, in 7 CFR 2.47, has delegated authority under section 331(b) of the Con Act to the Administrator of the RUS, with respect to loans made or guaranteed by RUS.

(b) This subpart sets forth the policy and standards of the Administrator of RUS with respect to the settlement of debts and claims arising from loans made or guaranteed to rural electric borrowers under the RE Act. Nothing in this subpart limits the Administrator’s authority under section 12 of the RE Act.

§ 1717.1201 Definitions.

Terms used in this subpart that are not defined in this section have the meanings set forth in 7 CFR part 1710. In addition, for the purposes of this subpart:

Application for debt settlement means a written application containing all of the information required by §1717.1204(b)(2), in form and substance satisfactory to RUS.

Attorney General means the Attorney General of the United States of America.

Claim means any claim of the government arising from loans made or guaranteed under the RE Act to a rural electric borrower.

Con Act means the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.).

Debt means outstanding debt of a rural electric borrower (including, but not necessarily limited to, principal, accrued interest, penalties, and the government’s costs of debt collection) arising from loans made or guaranteed under the RE Act.

Enforced collection procedures means any procedures available to the Administrator for the collection of debt that are authorized by law, in equity, or under the borrower’s loan documents or other agreements with RUS.

Loan documents means the mortgage (or other security instrument acceptable to RUS), the loan contract, and the promissory note entered into between the borrower and RUS.

Restructure means to settle a debt or claim.

Settle means to reamortize, adjust, compromise, reduce, or charge-off a debt or claim.

§ 1717.1202 General policy.

(a) It is the policy of the Administrator that, wherever possible, all debt owed to the government, including but not limited to principal and interest, shall be collected in full in accordance with the terms of the borrower’s loan documents.

(b) Nothing in this subpart by itself modifies, reduces, waives, or eliminates any obligation of a borrower
under its loan documents. Any such modifications regarding the debt owed by a borrower may be granted under the authority of the Administrator only by means of the explicit written approval of the Administrator in each case.

(c) The Administrator's authority to settle debts and claims will apply to cases where a borrower is unable to pay its debts and claims in accordance with their terms, as further defined in §1717.1204(b)(1), and where settlement will maximize, on a present value basis, the recovery of debts and claims owed to the government.

(d) In structuring settlements and determining the capability of the borrower to repay debt and the amount of debt recovery that is possible, the Administrator will consider, among other factors, the RE Act, the National Energy Policy Act of 1992 (Pub. L. 102-486, 106 Stat. 2776), the policies and regulations of the Federal Energy Regulatory Commission, state legislative and regulatory actions, and other market and nonmarket forces as to their effects on competition in the electric utility industry and on rural electric systems in particular. Other factors the Administrator will consider are set forth in more detail in §1717.1204.

§1717.1203 Relationship between RUS and Department of Justice.

(a) The Attorney General will be notified by the Administrator whenever the Administrator intends to use his or her authority under section 331(b) of the Con Act to settle a debt or claim.

(b) If an outstanding claim has been referred in writing to the Attorney General, the Administrator will not use his or her own authority to settle the claim without the approval of the Attorney General.

(c) If an application for additional debt relief is received from a borrower whose debt has been settled in the past under the authority of the Attorney General, the Administrator will promptly notify the Attorney General before proceeding to consider the application.

§1717.1204 Policies and conditions applicable to settlements.

(a) General. Settlement of debts and claims shall be subject to the policies, requirements, and conditions set forth in this section and in §1717.1202.

(b) Need for debt settlement. (1) The Administrator will not settle any debt or claim unless the Administrator has determined that the borrower is unable to meet its financial obligations under its loan documents according to the terms of those documents, or that the borrower will not be able to meet said obligations sometime within the period of 24 months following the month the borrower submits its application for debt settlement to RUS, and, in either case, such default is likely to continue indefinitely. The determination of a borrower's ability to meet its financial obligations will be based on analyses and documentation by RUS of the borrower's historical, current, and projected costs, revenues, cash flows, assets, opportunities to reduce costs and/or increase revenues, and other factors that may be relevant on a case by case basis.

(2) In its application to RUS for debt settlement, the borrower must provide, in form and substance satisfactory to RUS, an in-depth analysis supporting the borrower's contention that it is unable or will not be able to meet its financial obligations as described in paragraph (b)(1) of this section. The analysis must include:

(i) An explanation and analysis of the causes of the borrower's inability to meet its financial obligations;

(ii) A thorough review and analysis of the opportunities available or potentially available to the borrower to reduce administrative overhead and other costs, improve efficiency and effectiveness, and expand markets and revenues, including but not limited to opportunities for sharing services, merging, and/or consolidating, raising rates when appropriate, and renegotiating supplier and service contracts. In the case of a power supply borrower, the study shall include such opportunities among the members of the borrower, unless the Administrator waives this requirement.
(iii) Documentation of the actions taken, in progress, or planned by the borrower (and its member systems, if applicable) to take advantage of the opportunities cited in paragraph (b)(2)(iii) of this section; and
(iv) Other analyses and documentation prescribed by RUS on a case by case basis.

(3) RUS may require that an independent consultant provide an analysis of the efficiency and effectiveness of the borrower’s organization and operations, and those of its member systems in the case of a power supply borrower. The following conditions will apply:

(i) RUS will select the independent consultant taking into account, among other matters, the consultant’s experience and expertise in matters relating to electric utility operations, finance, and restructuring;

(ii) The contract with the consultant shall be to provide services to RUS on such terms and conditions as RUS deems appropriate. The consultant’s scope of work may include, but shall not be limited to, an analysis of the following:

(A) How to maximize the value of the government’s collateral, such as through mergers, consolidations, or sales of all or part of the collateral;

(B) The viability of the borrower’s system, taking into account such matters as system size, service territory and markets, asset base, physical condition of the plant, operating efficiency, competitive pressures, industry trends, and opportunities to expand markets and improve efficiency and effectiveness;

(C) The feasibility and the potential benefits and risks to the borrower and the government of corporate restructuring, including aggregation and disaggregation;

(D) In the case of a power supply borrower, the retail rate mark-up by member systems and the potential benefits to be achieved by member restructuring through mergers, consolidations, shared services, and other alliances;

(E) The quality of the borrower’s management, management advisors, consultants, and staff;

(F) Opportunities for reducing overhead and other costs, for expanding markets and revenues, and for improving the borrower’s existing and prospective contractual arrangements for the purchase and sale of power, procurement of supplies and services, and the operation of plant and facilities;

(G) Opportunities to achieve efficiency gains and increased revenues based on comparisons with benchmark electric utilities; and

(H) The accuracy and completeness of the borrower’s analysis provided under paragraph (b)(2) of this section;

(iii) RUS and, as appropriate, other creditors, will determine the extent to which the borrower and third parties (including the members of a power supply borrower) will be required to participate in funding the costs of the independent consultant;

(iv) The borrower will be required to make available to the consultant all corporate documents, files, and records, and to provide the consultant with access to key employees. The borrower will also normally be required to provide the consultant with office space convenient to the borrower’s operations and records; and

(v) All analyses, studies, opinions, memoranda, and other documents and information produced by the independent consultant shall be provided to RUS on a confidential basis for consideration in evaluating the borrower’s application for debt settlement. Such documents and information may be made available to the borrower and other appropriate parties if authorized in writing by RUS.

(4) The borrower may be required to employ a temporary or permanent manager acceptable to the Administrator, to manage the borrower’s operations to ensure that all actions are taken to avoid or minimize the need for debt settlement. The employment could be on a temporary basis to manage the system during the time the debt settlement is being considered, and possibly for some time after any debt settlement, or it could be on a permanent basis.

(5) The borrower must submit, at a time determined by RUS, a resolution of its board of directors requesting debt settlement and stating that the borrower is either currently unable to meet its financial obligations to the
government or will not be able to meet said obligations sometime within the next 24 months, and that, in either case, the default is likely to continue indefinitely.

(c) Debt settlement measures. (1) If the Administrator determines that debt settlement is appropriate, the debt settlement measures the Administrator will consider under this subpart with respect to direct, insured, or guaranteed loans include, but are not limited to, the following:

(i) Reamortization of debt;
(ii) Extension of debt maturity, provided that the maturity of the borrower's outstanding debt after settlement shall not extend more than 10 years beyond the latest maturity date prior to settlement;
(iii) Reduction of the interest rate charged on the borrower's debt, provided that the interest rate on any portion of the restructured debt shall not be reduced to less than 5 percent, unless the Administrator determines that reducing the rate below 5 percent would maximize debt recovery by the government;
(iv) Forgiveness of interest accrued, penalties, and costs incurred by the government to collect the debt; and
(v) With the concurrence of the Under Secretary for Rural Development, forgiveness of loan principal.

(2) In the event that RUS has, under section 306 of the RE Act, guaranteed loans made by the Federal Financing Bank or other third parties, the Administrator may restructure the borrower's obligations by: acquiring and restructuring the guaranteed loan; restructuring the loan guarantee obligation; restructuring the borrower's reimbursement obligations; or by such means as the Administrator deems appropriate, subject to such consents and approvals, if any, that may be required by the third party lender.

(d) Borrower's obligations to other creditors. The Administrator will not grant relief on debt owed to the government unless similar relief, on a pro rata basis, is granted with respect to other secured obligations of the borrower, or the other secured creditors provide other benefits or value to the debt restructuring. Unsecured creditors will also be expected to contribute to the restructuring. If it is not possible to obtain the expected contributions from other creditors, the Administrator may proceed to settle a borrower's debt if that will maximize recovery by the government and will not result in material benefits accruing to other creditors at the expense of the government.

(e) Competitive bids for system assets. If requested by RUS, the borrower or the independent consultant provided for in paragraph (b)(3) of this section shall solicit competitive bids from potential buyers of the borrower's system or parts thereof. The bidding process must be conducted in consultation with RUS and use standards and procedures acceptable to RUS. The Administrator may use the competitive bids received as a basis for requiring the sale of all or part of the borrower's system as a condition of settlement of the borrower's debt. The Administrator may also consider the bids in evaluating alternative settlement measures.

(f) Valuation of system. (1) The Administrator will consider the value of the borrower's system, including, in the case of a power supply borrower, the wholesale power contracts between the borrower and its member systems. The valuation of the wholesale power contracts shall take into account, among other matters, the rights of the government and/or third parties, to assume the rights and obligations of the borrower under such contracts, to charge reasonable rates for service provided under the contracts, and to otherwise enforce the contracts in accordance with their terms. In no case will the Administrator settle a debt or claim for less than the value (after considering the government's collection costs) of the borrower's system and other collateral securing the debt or claim.

(2) RUS may use such methods, analyses, and assessments as the Administrator deems appropriate to determine the value of the borrower's system.

(g) Rates. The Administrator will consider the rates charged for electric service by the borrower and, in the case of a power supply borrower, by its members, taking into account, among other factors, the practices of the Federal Energy Regulatory Commission (FERC), as adapted to the cooperative
structure of borrowers, and, where applicable, FERC treatment of any investments by co-owners in projects jointly owned by the borrower.

(h) Collection action. The Administrator will consider whether a settlement is favorable to the government in comparison with the amount that can be recovered by enforced collection procedures.

(i) Regulatory approvals. Before the Administrator will approve a settlement, the borrower must provide satisfactory evidence that it has obtained all approvals required of regulatory bodies that the Administrator determines are needed to implement rates or other provisions of the settlement, or that are needed in any other way for the borrower to fulfill its obligations under the settlement.

(j) Conditions regarding management and operations. As a condition of debt settlement, the borrower, and in the case of a power supply borrower, its members, will be required to implement those changes in structure, management, operations, and performance deemed necessary by the Administrator. Those changes may include, but are not limited to, the following:

(1) The borrower may be required to undertake a corporate restructuring and/or sell a portion of its plant, facilities, or other assets

(2) The borrower may be required to replace senior management and/or hire outside experts acceptable to the Administrator. Such changes may include a commitment by the borrower's board of directors to restructure and/or obtain new membership to improve board oversight and leadership;

(3) The borrower may be required to agree to:

   (i) Controls by RUS on the general funds of the borrower, as well as on any investments, loans or guarantees by the borrower, notwithstanding any limitations on RUS' control rights in the borrower's loan documents or RUS regulations; and

   (ii) Requirements deemed necessary by RUS to perfect and protect its lien on cash deposits, securities, equipment, vehicles, and other items of real or non-real property; and

(4) In the case of a power supply borrower, the borrower may be required to obtain credit support from its member systems, as well as pledges and action plans by the members to change their operations, management, and organizational structure (e.g., shared services, mergers, or consolidations) in order to reduce operating costs, improve efficiency, and/or expand markets and revenues.

(k) Conveyance of assets. As a condition of a settlement, a borrower may be required to convey some or all its assets to the government.

(l) Additional conditions. The borrower will be required to warrant and agree that no bonuses or similar extraordinary compensation has been or will be provided, for reasons related to the settlement of government debt, to any officer or employee of the borrower or to other persons or entities identified by RUS. The Administrator may impose such other terms and conditions of debt settlement as the Administrator determines to be in the government's interests.

(m) Certification of accuracy. Before the Administrator will approve a debt settlement, the manager or other appropriate official of the borrower must certify that all information provided to the government by the borrower or by any agent of the borrower, in connection with the debt settlement, is true, correct, and complete in all material respects.

§ 1717.1205 Waiver of existing conditions on borrowers.

Pursuant to section 331(b) of the Con Act, the Administrator, at his or her sole discretion, may waive or otherwise reduce conditions and requirements imposed on a borrower by its loan documents if the Administrator determines that such action will contribute to enhancement of the government's recovery of debt. Such waivers or reductions in conditions and requirements under this section shall not include the exercise of any of the debt settlement measures set forth in §1717.1204(c), which are subject to all of the requirements of said §1717.1204.

§ 1717.1206 Loans subsequent to settlement.

In considering any future loan requests from a borrower whose debt has
been settled in whole or in part (including the surviving entity of merged or consolidated borrowers, where at least one of said borrowers had its debts settled), it will be presumed that credit support for the full amount of the requested loan will be required. Such support may be in a number of forms, provided that they are acceptable to the Administrator on a case by case basis. They may include, but need not be limited to, equity infusions and guarantees of debt repayment, either from the applicant’s members (in the case of a power supply borrower), or from a third party.

§ 1717.1207 RUS obligations under loan guarantees.

Nothing in this subpart affects the obligations of RUS under loan guarantee commitments it has made to the Federal Financing Bank or other lenders.

§ 1717.1208 Government’s rights under loan documents.

Nothing in this subpart limits, modifies, or otherwise affects the rights of the government under loan documents executed with borrowers, or under law or equity.

APPENDIX A TO SUBPART C TO PART 1718— MODEL FORM OF LOAN CONTRACT FOR ELECTRIC DISTRIBUTION BORROWERS

Subpart A—General

§§ 1718.1—1718.49 [Reserved]

Subpart B—Mortgage for Distribution Borrowers

SOURCE: 60 FR 36888, July 18, 1995, unless otherwise noted.

§ 1718.50 Definitions.

Unless otherwise indicated, terms used in this subpart are defined as set forth in 7 CFR 1710.2.

§ 1718.51 Policy.

(a) Adequate loan security must be provided for loans made or guaranteed by RUS. The loans are required to be secured by a first mortgage lien on most of the borrower’s assets substantially in the form set forth in appendix A of this subpart. At the discretion of RUS, this model form of mortgage may be adapted to satisfy different legal requirements among the states and individual differences in lending circumstances, provided that such adaptations are consistent with the policies set forth in this subpart.

(b) Some borrowers, such as certain public power districts, may not be able to provide security in the form of a first mortgage lien on their assets. In these cases RUS will consider accepting other forms of security, such as resolutions and pledges of revenues.

(c) RUS may require supplemental and amending mortgages to protect its security, or in connection with additional loans.

(d) RUS may also require such other security instruments (such as loan contracts, security agreements, financing statements, guarantees, and pledges) as it deems appropriate.

(e) All distribution borrowers that receive a loan or loan guarantee from RUS on or after August 17, 1995 will be required to enter into a mortgage with RUS that meets the requirements of this subpart. The concurrence of any
other lenders secured under the borrower's existing mortgage may be required before the borrower can enter into a new mortgage.

§ 1718.52 Existing mortgages.

Nothing contained in this subpart amends, invalidates, terminates or rescinds any existing mortgage entered into between the borrower and RUS and any other mortgagees.

§ 1718.53 Rights of other mortgagees.

Nothing contained in this subpart is intended to alter or affect any other mortgagee's rights under an existing mortgage.

§ 1718.54 Availability of model mortgage.

Single copies of the model mortgage (RUS Informational Publication 1718 B) are available from the Administrative Services Division, Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250-1500. This document may be reproduced.

RESTATED MORTGAGE AND SECURITY 
AGREEMENT, dated as of 19___, (hereinafter sometimes called this "Mort- 
gage") is made by and between ____________ 
(hereinafter called the "Mortgagor"), a cor- 
poration existing under the laws of the State of ____________ , and the UNITED STATES OF 
AMERICA acting by and through the Admin- 
istrator of the Rural Utilities Service (here- 
inafter called the "Government"), ____________ 
(Supplemental Lender), (hereinafter called " ") a ____________ existing under the 
laws of ____________, and is intended to confer 
rights and benefits on both the Government and 
as well as any and all other lenders pursuant to Article II of this Mort- 
gage that enter into a supplemental mort- 
gage in accordance with Section [2.04] of Ar- 
ticle II hereof (the Government and any such 
other lenders being herein sometimes collect- 
vively referred to as the "Mortgagees").

RECITALS
WHEREAS, the Mortgagor, the Govern- 
ment and ____________ are parties to that cer- 
tain ____________ Mortgage and Security Agree- 
ment dated as of 19___, as supple- 
mented, amended or restated (the "Original 
Mortgage" identified in Schedule "A" of this 
Mortgage) originally entered into between 
the Mortgagor, the Government acting by 
and through the Administrator of the Rural 
Electrification Administration, the prede- 
cessor of RUS, and ____________; and
WHEREAS, the Mortgagor deems it nec- 
essary to borrow money for its corporate 
purposes hereinafter expressed [other lan- 
tuages may be required under various state 
purposes and to issue its promissory notes 
and other debt obligations therefor from 
time to time in one or more series, and to 
mortgage and pledge its property herein 
derescribed or mentioned to secure the pay-
ment of the same;
WHEREAS, the Mortgagor desires to enter 
into this Mortgage pursuant to which all se-
cured debt of the Mortgagor hereunder shall 
be secured on parity;
WHEREAS, this Mortgage restates and 
consolidates the Original Mortgage while 
preserving the priority of the Lien under the 
Original Mortgage securing the payment of 
Mortgagor's outstanding obligations secured 
under the Original Mortgage, which indebted-
ness is described more particularly by list-
ing the Original Notes in Schedule "A" here- 
to; and
WHEREAS, all acts necessary to make this 
Mortgage a valid and binding legal instru-
ment for the security of such notes and obli-
gations, subject to the terms of this Mort-
gage, have been in all respects duly author-
ized;
NOW, THEREFORE, THIS MORTGAGE 
WITNESSETH: That to secure the payment of the principal of (and premium, if any) and 
interest on the Original Notes and all Notes 
issued hereunder according to their tenor 
and effect, and the performance of all provi-
sions therein and herein contained, and in 
consideration of the covenants herein con-
tained and the purchase or guarantee of 
Notes by the guarantors or holders thereof, 
the Mortgagor has mortgaged, pledged and 
granted a continuing security interest in, 
and by these presents does hereby grant, bar-
gain, sell, alienate, remise, release, convey, 
assign, transfer, hypothecate, pledge, set 
over and confirm, pledge, and grant a con-
tinuing security interest and lien in for the 
purposes hereinafter expressed [other lan-
guage may be required under various state 
laws], unto the Mortgagees all property, 
rights, privileges and franchises of the Mort-
gagor of every kind and description, real, 
personal or mixed, tangible and intangible, 
of the kind or nature specifically mentioned 
herein OR ANY OTHER KIND OR NATURE,
except any Exempted Property, now owned or hereafter acquired by the Mortgagor (by purchase, consolidation, merger, donation, construction, erection or in any other way) wherever located, including (without limitation) all and singular the following:

GRANTING CLAUSE FIRST

A. all of those fee and leasehold interests in real property set forth in Schedule "B" hereto, subject in each case to those matters set forth in such Schedule;
B. all of the Mortgagor's interest in fixtures, easements, permits, licenses and rights-of-way comprising real property, and all other interests in real property, comprising any portion of the Utility System (as herein defined) located in the Counties listed in Schedule "B" hereto;
C. all right, title and interest of the Mortgagor in and to those contracts of the Mortgagor (i) relating to the ownership, operation or maintenance of any generation, transmission or distribution facility owned, whether solely or jointly, by the Mortgagor, (ii) for the purchase of electric power and energy by the Mortgagor and having an original term in excess of 3 years, and (iii) for the sale of electric power and energy by the Mortgagor and having an original term in excess of 3 years, and (iv) for the transmission of electric power and energy by or on behalf of the Mortgagor and having an original term in excess of 3 years, including in respect of any of the foregoing, any amendments, supplements and replacements thereto;
D. all the property, rights, privileges, allowances and franchises particularly described in the annexed Schedule "B" are hereby made a part of, and deemed to be described in, this Granting Clause as fully as if set forth in this Granting Clause at length; and
ALSO ALL OTHER PROPERTY, real estate, lands, easements, servitudes, licenses, permits, allowances, consents, franchises, privileges, rights of way and other rights in or relating to real estate or the occupancy of the same; all power sites, storage rights, water rights, water locations, water appropriations, ditches, flumes, reservoirs, reservoir sites, canals, raceways, waterways, dams, dam sites, aqueducts, and all other rights or means for appropriating, conveying, storing and supplying water; all rights of way and roads; all plants for the generation of electric and other forms of energy, whether now or hereafter developed; the right, title and interest of the Mortgagor in and to all other property of the Mortgagor (excluding any Excepted Property); and
D. all the property, rights, privileges, allowances and franchises particularly described in the annexed Schedule "B" are hereby made a part of, and deemed to be described in, this Granting Clause as fully as if set forth in this Granting Clause at length; and
ALSO ALL OTHER PROPERTY, real estate, lands, easements, servitudes, licenses, permits, allowances, consents, franchises, privileges, rights of way and other rights in or relating to real estate or the occupancy of the same; all power sites, storage rights, water rights, water locations, water appropriations, ditches, flumes, reservoirs, reservoir sites, canals, raceways, waterways, dams, dam sites, aqueducts, and all other rights or means for appropriating, conveying, storing and supplying water; all rights of way and roads; all plants for the generation of electric and other forms of energy, whether now known or hereafter developed; the right, title and interest of the Mortgagor in and to all other property of the Mortgagor (excluding any Excepted Property); and

GRANTING CLAUSE SECOND

All other property, real, personal or mixed, of whatever kind and description and wheresoever situated, including without limitation goods, accounts, money held in a trust account pursuant hereto or to a Loan Agreement, and general intangibles now owned or which may be hereafter acquired by the Mortgagor, but excluding Exempted Property, now owned or which may be hereafter acquired by the Mortgagor, it being the intention hereof that all property, rights, privileges, allowances and franchises now owned by the Mortgagor or acquired by the Mortgagor after the date hereof (other than Exempted Property) shall be as fully embraced within and subjected to the lien hereof as if such property were specifically described herein.

GRANTING CLAUSE THIRD

Also any Exempted Property that may, from time to time hereafter, by delivery or by writing of any kind, be subjected to the lien hereof by the Mortgagor or by anyone in its behalf; and any Mortgagor is hereby authorized to receive the same at any time as
additional security hereunder for the benefit of all the Mortgagors. Such subjecttion to the lien hereof of any Excepted Property as addi-itional security may be made subject to any reservations, limitations or conditions which shall be set forth in a written instrument ex-ecuted by the Mortgagor or the person so acting in its behalf or by such Mortgagee re-specting the use and disposition of such property or the proceeds thereof.

GRANTING CLAUSE FOURTH

Together with (subject to the rights of the Mortgagor set forth on Section (5.01)) all and singular the tenements, hereditaments and appurtenances belonging or in anywise appertaining to the aforesaid property or any part thereof, with the reversion and rever-sions, remainder and remainders and all the tolls, earnings, rents, issues, profits, reve nues and other income, products and pro-ceeds of the property subjected or required to be subjected to the lien of this Mortgage, and all other property of any nature apper-taining to any of the plants, systems, busi-ness or operations of the Mortgagor, whether or not affixed to the realty, used in the oper-ation of any of the premises or plants or the System, or otherwise, which are now owned or acquired by the Mortgagor, and all the es-tate, right, title and interest of every nature whatsoever, at law as well as in equity, of the Mortgagor in and to the same and every part thereof (other than Excepted Property with respect to any of the foregoing).

EXCEPTED PROPERTY

There is, however, expressly excepted and excluded from the lien and operation of this Mortgage the following described property of the Mortgagor, now owned or hereafter ac-quired (herein sometimes referred to as “Ex-cepted Property”):

A. all shares of stock, securities or other interests of the Mortgagor in the National Rural Utilities Cooperative Finance Corpora-tion, the National Bank for Cooperatives and the St. Paul Bank for Cooperatives other than any stock, securities or other interests that are specifically described in Subclause D of Granting Clause First as being sub-jected to the lien hereof;
B. all rolling stock (except mobile sub-stations), automobiles, buses, trucks, truck cranes, tractors, trailers and similar vehicles and movelable equipment, and all tools, accesso ries and supplies used in connection with any of the foregoing;
C. all vessels, boats, ships, barges and other marine equipment; all airplanes, air-plain engines and other flight equipment, and all tools, accessories and supplies used in connection with any of the foregoing;
D. all office furniture, equipment and sup-plies that is not data processing, accounting or other computer equipment or software;
E. all leasehold interests for office pur-poses;
F. all leasehold interests of the Mortgagor under leases for an original term (including any period for which the Mortgagor shall have a right of renewal) of less than five (5) years;
G. all timber and crops (both growing and harvested) and all coal, ore, gas, oil and other minerals (both in place or severed);
H. the last day of the term of each lease-hold estate (oral or written) and any agree-ment therefor, now or hereafter enjoyed by the Mortgagor and whether falling within a general or specific description of property herein: PROVIDED, HOWEVER, that the Mortgagor covenants and agrees that it will hold each such last day in trust for the use and benefit of all of the Mortgagors and Noteholders and that it will dispose of each such last day from time to time in accord ance with such written order as the Mortga-gee in its discretion may give;
I. all permits, licenses, franchises, con-tracts, agreements, contract rights and other rights not specifically subjected or required to be subjected to the lien hereof by the express provisions of this Mortgage, whether now owned or hereafter acquired by the Mortgagor, which by their terms or by reason of applicable law would become valid or voidable if mortgaged or pledged here-under by the Mortgagor, or which cannot be granted, conveyed, mortgaged, transferred or assigned by this Mortgage without the con sent of other parties whose consent has been withheld, or without subjecting any Mortga-gee to a liability not otherwise contemplated by the provisions of this Mortgage, or which otherwise may not be, hereby lawfully and effectivly granted, conveyed, mortgaged, transferred and assigned by the Mortgagor; and
J. the property identified in Schedule “C” hereto.

PROVIDED, HOWEVER, that (i) if, upon the occurrence of an Event of Default, any Mortgagor, or any receiver appointed pursu-ant to statutory provision or order of court, shall have entered into possession of all or substantially all of the Mortgaged Property, all the Excepted Property described or re ferred to in the foregoing Subdivisions A through H, inclusive, then owned or there after acquired by the Mortgagor shall imme diately, and, in the case of any Excepted Property described or referred to in Subdivi-sions I through J, inclusive, upon demand of any Mortgagee or such receiver, become sub-ject to the lien hereof to the extent per-mitted by law, and any Mortgagor or such receiver may, to the extent permitted by law, at the same time likewise take posses-sion thereof, and (ii) whenever all Events of Default shall have been cured and the posses-sion of all or substantially all of the Mort-gaged Property shall have been restored to
the Mortgagor, such Excepted Property shall again be excepted and excluded from the lien hereof to the extent and otherwise as hereinabove set forth.

However, pursuant to Granting Clause Third, the Mortgagor may subject to the lien of this Mortgage any Excepted Property, whereupon the same shall cease to be Excepted Property.

HABENDUM

TO HAVE AND TO HOLD all said property, rights, privileges and franchises of every kind and description, real, personal or mixed, hereby and hereafter (by supplemental mortgage or otherwise) granted, bartered, sold, aliened, remised, released, conveyed, assigned, transferred, mortgaged, encumbered, hypothecated, pledged, setover, confirmed, or subjected to a continuing security interest as lien as aforesaid, together with all the appurtenances thereto appertaining (said properties, rights, privileges and franchises, including any cash and securities hereafter deposited with any Mortgagor (other than any such cash, if any, which is specifically stated herein not to be deemed part of the Mortgaged Property)), being hereinafter collectively called the "Mortgaged Property") unto the Mortgagees and the respective assigns of the Mortgagees forever, to secure equally and ratably the payment of the principal of (and premium, if any) and interest thereon, and to pay the expenses of the Mortgagee, and divide the total sum to be so obtained by an amount equal to the sum of all payments of principal and interest required to be made on account of Total Long Term Debt during such calendar year increasing said sum by any addition to interest expense on account of Restricted Rentals as computed with respect to the Times Interest Earned Ratio hereinafter expressed and declared.

SUBJECT, HOWEVER, to Permitted Encumbrances as defined in Section 1.01.

ARTICLE I

DEFINITIONS, OTHER PROVISIONS OF GENERAL APPLICATION

Section 1.01 Definitions. In addition to the terms defined elsewhere in this Mortgage, the terms defined in this Article I shall have the meanings specified herein and under the UCC, unless the context clearly requires otherwise. The terms defined herein include the plural as well as the singular and the singular as well as the plural.

Accounting Requirements shall mean the requirements of any system of accounts prescribed by RUS so long as the Government is the holder, insurer or guarantor of any Notes, or, in the absence thereof, the requirements of generally accepted accounting principles applicable to businesses similar to that of the Mortgagor.

Additional Notes shall mean any Notes issued by the Mortgagor to the Government or any other lender pursuant to Article II of this Mortgage including any refunding, renewal, or substitute Notes which may from time to time be executed and delivered by the Mortgagor pursuant to the terms of Article II.

Board shall mean either the Board of Directors or the Board of Trustees, as the case may be, of the Mortgagor.

Business Day shall mean any day that the Government is open for business.

Debt Service Coverage Ratio ("DSC") shall mean the ratio determined as follows: for each calendar year add (i) Patronage Capital or Margins of the Mortgagor, (ii) Interest Expense on Total Long Term Debt of the Mortgagor (as computed in accordance with the principles set forth in the definition of Tier) and (iii) Depreciation and Amortization Expense of the Mortgagor, and divide the total so obtained by an amount equal to the sum of all payments of principal and interest required to be made on account of Total Long Term Debt during such calendar year increasing said sum by any addition to interest expense on account of Restricted Rentals as computed with respect to the Times Interest Earned Ratio herein.

Depreciation and Amortization Expense shall mean an amount constituting the depreciation and amortization of the Mortgagor as computed pursuant to Accounting Requirements.

Electric System shall mean, and shall be broadly construed to encompass and include, all of the Mortgagor's interests in all electric production, transmission, distribution, conservation, load management, general plant and other related facilities, equipment or property and in any mine, well, pipeline, plant, structure or other facility for the development, production, manufacture, storage, fabrication or processing of fossil, nuclear or other fuel of any kind or in any facility or rights with respect to the supply of water, in each case for use, in whole or in part.

For the purpose of this Mortgage, a calendar year shall be any 12-month period beginning on January 1st and ending on December 31st, whether or not the same is a Leap Year.

For the purposes hereof, the Government shall mean the Rural Utilities Service, USDA Pt. 1718, Subpt. B, App. A.
or useful in connection with or related to such Electric System, including without limitation a contract right or other contractual arrangement referred to in Granting Clause First, Subclause [[CI]] but excluding any excepted property.

Environmental Law and Environmental Laws shall mean all federal, state, and local laws, regulations, and requirements related to protection of human health or the environment, including but not limited to the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (42 U.S.C. 9601 et seq.), the Resource Conservation and Recovery Act (42 U.S.C. 6901 et seq.), the Clean Water Act (33 U.S.C. 1251 et seq.) and the Clean Air Act (42 U.S.C. 7401 et seq.), and any amendments and implementing regulations of such acts.

Equity shall mean the total margins and equities and margins computed pursuant to Accounting Requirements, but excluding any Regulatory Created Assets.

Event of Default shall have the meaning specified in Section [4.01] hereof.

Excepted Property shall have the meaning stated in the Granting Clauses.

Government shall mean the United States of America acting by and through the Administrator of RUS and shall include its successors and assigns.

Government Notes shall mean the Original Notes, and any Additional Notes, issued by the Mortgagor to the Government, or guaranteed or insured as to payment by the Government.

Independent shall mean when used with respect to any specified person or entity means such a person or entity who (1) is in fact independent; (2) does not have any direct financial interest or any material indirect financial interest in the Mortgagor or in any affiliate of the Mortgagor and (3) is not connected with the Mortgagor as an officer, employee, promoter, underwriter, trustee, partner, director or person performing similar functions.

Interest Expense shall mean an amount constituting the interest expense of the Mortgagor as computed pursuant to Accounting Requirements.

Lien shall mean any statutory or common law consensual or non-consensual mortgage, pledge, security interest, encumbrance, lien, right of set off, claim or charge of any kind, including, without limitation, any conditional sale or other title retention transaction, any lease transaction in the nature thereof and any secured transaction under the UCC.

Loan Agreement shall mean any agreement executed by and between the Mortgagor and the Government or any other lender in connection with the execution and delivery of any Notes secured hereby.

Long-Term Debt shall mean any amount included in Total Long-Term Debt pursuant to Accounting Requirements.

Long-Term Lease shall mean a lease having an unexpired term (taking into account terms of renewal at the option of the lessor, whether or not such lease has previously been renewed) of more than 12 months.

Margins shall mean the sum of amounts recorded as operating margins and non-operating margins as computed in accordance with Accounting Requirements.

Maximum Debt Limit, if any, shall mean the amount more particularly described in Schedule "A" hereof.

Mortgage shall mean this Restated Mortgage and Security Agreement, including any amendments or supplements thereto from time to time.

Mortgaged Property shall have the meaning specified as stated in the Habendum to the Granting Clauses.

MORTGAGOR or MORTGAGEES shall mean the Government, (the supplemental lender), the successors and assigns of the supplemental lender and assigns as well as any and all other lenders pursuant to Article II of this Mortgage that enter into a supplemental mortgage in accordance with Section [2.04] of Article II hereof, their successors and assigns.

Net Utility Plant shall mean the amount constituting the total utility plant of the Mortgagor less depreciation computed in accordance with Accounting Requirements.

Note or Notes shall mean one or more of the Government Notes, and any other Notes which may, from time to time, be secured under this Mortgage.

Noteholder or Noteholders shall mean one or more of the holders of Notes secured by this Mortgage; PROVIDED, however, that in the case of any Notes that have been guaranteed or insured as to payment by RUS, as to such Notes Noteholder or Noteholders shall mean RUS, exclusively, regardless of whether such notes are in the possession of RUS.

Original Mortgage means the instrument(s) identified as such in Schedule "A" hereof.

Original Notes shall mean the Notes listed on Schedule "A" hereto as such, such Notes being instruments evidencing outstanding indebtedness of the Mortgagor (i) to the Government (including indebtedness which has been issued by the Mortgagor to a third party and guaranteed or insured as to payment by the Government) and (ii) to each other Mortgagee on the date of this Mortgage.

Outstanding Notes shall mean as of the date of determination, (i) all Notes theretofore issued, executed and delivered to any Mortgagee and (ii) any Notes guaranteed or insured as to payment by the Government, except (a) Notes referred to in clause (i) or (ii) for which the principal and interest have been fully paid and which have been canceled.
Permitted Encumbrances shall mean:

(1) as to the property specifically described in Granting Clause First, the restrictions, exceptions, reservations, conditions, limitations, interests and other matters which are set forth or referred to in such descriptions and each of which fits one or more of the clauses of this definition, PROVIDED, such matters do not in the aggregate materially detract from the value of the Mortgaged Property taken as a whole and do not materially impair the use of such property for the purposes for which it is held by the Mortgagor;

(2) liens for taxes, assessments and other governmental charges which are not delinquent;

(3) liens for taxes, assessments and other governmental charges already delinquent which are currently being contested in good faith by appropriate proceedings; PROVIDED the Mortgagor shall have set aside on its books adequate reserves with respect thereto;

(4) mechanics’, workmen’s, repairmen’s, materialmen’s, warehousemen’s and carriers’ liens and other similar liens arising in the ordinary course of business for charges which are not delinquent, or which are being contested in good faith and have not proceeded to judgment; PROVIDED the Mortgagor shall have set aside on its books adequate reserves with respect thereto;

(5) liens in respect of judgments or awards with respect to which the Mortgagor shall in good faith currently be prosecuting an appeal or proceedings for review and with respect to which the Mortgagor shall have secured a stay of execution pending such appeal or proceedings for review; PROVIDED the Mortgagor shall have set aside on its books adequate reserves with respect thereto;

(6) easements and similar rights granted by the Mortgagor over or in respect of any Mortgaged Property, PROVIDED that in the opinion of the Board or a duly authorized officer of the Mortgagor such grant will not impair the usefulness of such property in the conduct of the Mortgagor’s business and will not be prejudicial to the interests of the Mortgagees, and similar rights granted by any predecessor in title of the Mortgagor;

(7) easements, leases, reservations or other rights of others in any property of the Mortgagor for streets, roads, bridges, pipes, pipeline, railroads, electric transmission and distribution lines, telephone lines, the removal of oil, gas, coal or other minerals and other similar purposes, flood rights, river control and development rights, sewage and drainage rights, restrictions against pollution and zoning laws and minor defects and irregularities in the record evidence of title, PROVIDED that such easements, leases, reservations, rights, restrictions, laws, defects and irregularities do not materially affect the marketability of title to such property and do not in the aggregate materially impair the use of the Mortgaged Property taken as a whole for the purposes for which it is held by the Mortgagor;

(8) liens upon lands over which easements or rights of way are acquired by the Mortgagor for any of the purposes specified in Clause [(7)] of this definition, securing indebtedness neither created, assumed nor guaranteed by the Mortgagor nor on account of which it customarily pays interest, which liens do not materially impair the use of such easements or rights of way for the purposes for which they are held by the Mortgagor;

(9) leases existing at the date of this instrument affecting property owned by the Mortgagor at said date which have been previously disclosed to the Mortgagees in writing and leases for a term of not more than two years (including any extensions or renewals) affecting property acquired by the Mortgagor after said date;

(10) terminable or short term leases or permits for occupancy, which leases or permits expressly grant to the Mortgagor the right to terminate them at any time on not more than six months’ notice and which occupancy does not interfere with the operation of the business of the Mortgagor;

(11) any lien or privilege vested in any lessor, licensor or permittee for rent to become due or for other obligations or acts to be performed, the payment of which rent or performance of which other obligations or acts is required under leases, subleases, licenses or permits, so long as the payment of such rent or the performance of such other obligations or acts is not delinquent;

(12) liens or privileges of any employees of the Mortgagor for salary or wages earned but not yet payable;

(13) the burdens of any law or governmental regulation or permit requiring the Mortgagor to maintain certain facilities or perform certain acts as a condition of its occupancy of or interference with any public lands or any river or stream or navigable waters;

(14) any irregularities in or deficiencies of title to any rights-of-way for pipe lines, telephone lines, telegraph lines, power lines or appurtenances thereto, or other improvements thereon, and to any real estate used or to be used primarily for right-of-way purposes, PROVIDED that in the opinion of counsel for the Mortgagor, the Mortgagor shall have obtained from the apparent owner of the lands or estates therein covered by any such right-of-way a sufficient right, by the terms of the instrument granting such
right-of-way, to the use thereof for the construction, operation or maintenance of the lines, appurtenances or improvements for which the same are used or are to be used, or for any franchise, license, contract or statute to purchase, or designate a purchaser of or order the sale of, any property of the Mortgagor upon payment of cash or reasonable compensation therefor or to terminate any franchise, license or other rights or to regulate the property and business of the Mortgagor; PROVIDED, HOWEVER, that nothing in this clause 17 is intended to waive any claim or rights that the Government may otherwise have under Federal laws;

(18) as to properties of other operating electric companies acquired after the date of this Mortgage by the Mortgagor as permitted by Section [3.10] hereof, reservations and other matters as to which such properties may be subject as more fully set forth in such Section;

(19) any lien required by law or governmental regulations as a condition to the transaction of any business or the exercise of any privilege or license, or to enable the Mortgagor to maintain self-insurance or to participate in any fund established to cover any insurance risks or in connection with workmen's compensation, unemployment insurance, old age pensions or other social security, or to share in the privileges or benefits required for companies participating in such arrangements; PROVIDED, HOWEVER, that nothing in this clause 19 is intended to waive any claim or rights that the Government may otherwise have under Federal laws;

(20) liens arising out of any defeased mortgage or indenture of the Mortgagor;

(21) the undivided interest of other owners, and liens on such undivided interests, in property owned jointly with the Mortgagor as well as the rights of such owners to such property pursuant to the ownership contracts;

(22) any lien or privilege vested in any lessor, licensor or permitter for rent to become due or for other obligations or acts to be performed, the payment of which rent or the performance of which other obligations or acts is required under leases, subleases, licenses or permits, so long as the payment of such rent or the performance of such other obligations or acts is not delinquent;

(23) purchase money mortgages permitted by Section [3.08]; and

(24) the Original Mortgage.

Property Additions shall mean Utility System property as to which the Mortgagor shall provide Title Evidence and which shall be (or, if retired, shall have been) subject to the lien of this Mortgage, which shall be properly chargeable to the Mortgagor's utility plant accounts under Accounting Requirements (including property constructed or acquired to replace retired property credited to such accounts) and which shall be:

(1) acquired (including acquisition by merger, consolidation, conveyance or transfer) or constructed by the Mortgagor after the date hereof, including property in the process of construction, insofar as not reflected on the books of the Mortgagor with respect to periods on or prior to the date hereof, and

(2) used or useful in the utility business of the Mortgagor conducted with the properties described in the Granting Clauses of this Mortgage, even though separate from and not physically connected with such properties.

“Property Additions” shall also include:

(3) easements and rights-of-way that are useful for the conduct of the utility business of the Mortgagor, and

(4) property located or constructed on, over or under public highways, rivers or other public property if the Mortgagor has the lawful right under permits, licenses or franchises granted by a governmental body having jurisdiction in the premises or by the law of the State in which such property is located to maintain and operate such property for an unlimited, indeterminate or indefinite period or for the period, if any, specified in such permit, license or franchise or law and to remove such property at the expiration of the period covered by such permit, license or franchise or law, or if the terms of such permit, license, franchise or law require any public authority having the right to take over such property to pay fair consideration therefor.

“Property Additions” shall NOT include:

(a) good will, going concern value, contracts, agreements, franchises, licenses or permits, whether acquired as such, separate and distinct from the property operated in connection therewith, or acquired as an incident thereto, or

(b) any shares of stock or indebtedness or certificates or evidences of interest therein or other securities, or
(c) any plant or system or other property in which the Mortgagor shall acquire only a leasehold interest, or any betterments, extensions, improvements or additions (other than real or personal property which the Mortgagor has the right to remove), of, upon or to any plant or system or other property in which the Mortgagor shall own an interest as lessor, the term of the leasehold interest in the property to which such betterment, extension, improvement or addition relates shall extend for at least 75% of the useful life of such betterment, extension, improvement or addition and (ii) the lessor shall have agreed to give the Mortgagor reasonable notice and opportunity to cure any default by the Mortgagor under such lease and not to disturb any Mortgagor’s possession of such leasehold estate in the event any Mortgagor succeeds to the Mortgagor’s interest in such lease upon any Mortgagor’s exercise of any remedies under this Mortgage so long as there is no default in the performance of the tenant’s covenants contained therein, or
(d) any property of the Mortgagor subject to the Permitted Encumbrance described in clause [(23)] of the definition thereof.

Prudent Utility Practice shall mean any of the practices, methods and acts which, in the exercise of reasonable judgment, in light of the facts, including, but not limited to, the practices, methods and acts engaged in or approved by a significant portion of the electric utility industry prior thereto, known at the time the decision was made, would have been expected to accomplish the desired result consistent with cost-effectiveness, reliability, safety and expediency. It is recognized that Prudent Utility Practice is not intended to be limited to optimum practice, method or act to the exclusion of all others, but rather is a spectrum of possible practices, methods or acts which could have been expected to accomplish the desired result at the lowest reasonable cost consistent with cost-effectiveness, reliability, safety and expediency.

REA shall mean the Rural Electrification Administration of the United States Department of Agriculture, the predecessor of RUS.

Regulatory Created Assets shall mean the sum of any amounts properly recordable as unrecovered plant and regulatory study costs or as other regulatory assets, pursuant to Accounting Requirements.

Restricted Rentals shall mean all rentals required to be paid under finance leases and charged to income, exclusive of any amounts paid under any such lease (whether or not designated therein as rental or additional rental) for maintenance or repairs, insurance, taxes, assessments, water rates or similar charges. For the purpose of this definition the term “finance lease” shall mean any lease having a rental term (including the term for which such lease may be renewed or extended at the option of the lessee) in excess of 3 years and covering property having an initial cost in excess of $250,000 other than aircraft, ships, barges, automobiles, trucks, trailers, rolling stock and vehicles; office, garage and warehouse space; office equipment and computers.

RUS shall mean the Rural Utilities Service, an agency of the United States Department of Agriculture, or if at any time after the execution of this Mortgage RUS is not existing and performing the duties of administering a program of rural electrification as currently assigned to it, then the entity performing such duties at such time.

Security Interest shall mean any assignment, transfer, mortgage, hypothecation or pledge.

Subordinated Indebtedness shall mean secured indebtedness of the Mortgagor, payment of which shall be subordinated to the prior payment of the Notes in accordance with the provisions of Section [3.08] hereof by subordination agreement in form and substance satisfactory to each Mortgagor which approval will not be unreasonably withheld.

Supplemental Mortgage shall mean an instrument of the type described in Section [2.04].

Times Interest Earned Ratio ("TIER") shall mean the ratio determined as follows: for each calendar year: add (i) patronage capital or margins of the Mortgagor and (ii) Interest Expense on Total Long-Term Debt of the Mortgagor and divide the total so obtained by Interest Expense on Total Long-Term Debt of the Mortgagor, provided, however, that in computing Interest Expense on Total Long-Term Debt, there shall be added, to the extent not otherwise included, an amount equal to 33-1/3% of the excess of Restricted Rentals paid by the Mortgagor over 2% of the Mortgagor’s Equity.

Title Evidence shall mean with respect to any real property: (i) an opinion of counsel to the effect that the Mortgagor has title, whether fairly deductible of record or based upon prescriptive rights (or, as to personal property, based on such evidence as counsel shall determine to be sufficient), as in the opinion of counsel is satisfactory for the use thereof in connection with the operations of the Mortgagor, and counsel in giving such opinion may disregard any irregularity or deficiency in the record evidence of title which, in the opinion of such counsel, can be cured by proceedings within the power of the Mortgagor or does not substantially impair the usefulness of such property for the purpose of the Mortgagor and may base such opinion upon counsel’s own investigation or upon affidavits, certificates, abstracts of title, statements or investigations made by persons in whom such counsel has confidence or upon examination of a certificate or guaranty of title.
or policy of title insurance in which counsel has confidence; or

(2) a mortgagor's policy of title insurance in the amount of the cost to the Mortgagor of the land included in Property Additions, as such cost is determined by the Mortgagor in accordance with the Accounting Requirements, issued in favor of the Mortgagors by an entity authorized to insure title in the states where the subject property is located, showing the Mortgagor as the owner of the subject property and insuring the lien of this Mortgage; and with respect to any personal property a certificate of the general manager or other duly authorized officer that the Mortgagor lawfully owns and is possessed of such property.

Total Assets shall mean an amount constituting total assets of the Mortgagor as computed pursuant to Accounting Requirements, but excluding any Regulatory Created Assets.

Total Long-Term Debt shall mean the total outstanding long-term debt of the Mortgagor as computed pursuant to Accounting Requirements.

Total Utility Plant shall mean the total of all property properly recorded in the utility plant accounts of the Mortgagor, pursuant to Accounting Requirements.

Uniform Commercial Code or UCC shall mean the UCC of the state referred to in Section [1.04], and if Mortgaged Property is located in a state other than that state, then as to such Mortgaged Property UCC refers to the UCC in effect in the state where such property is located.

Utility System shall mean the Electric System and all of the Mortgagor’s interest in community infrastructure located substantially within its electric service territory, namely water and waste systems, solid waste disposal facilities, telecommunications and other electronic communications systems, and natural gas distribution systems.

SECTION 1.02. General Rules of Construction:

a. Accounting terms not referred to above are used in this Mortgage in their ordinary sense and any computations relating to such terms shall be computed in accordance with the Accounting Requirements.

b. Any reference to “directors” or “board of directors” shall be deemed to mean “trustees” or “board of trustees,” as the case may be.

c. Art. 2.01, Section 1.03. Special Rules of Construction if RUS is a Mortgagor: During any period that RUS is a Mortgagor, the following additional provisions shall apply:

a. In the case of any Notes that have been guaranteed or insured as to payment by RUS, as to such Notes RUS shall be considered to be the Noteholder, exclusively, regardless of whether such Notes are in the possession of RUS.

b. In the case of any prior approval rights conferred upon RUS by Federal statutes, including (without limitation) Section 7 of the Rural Electrification Act of 1936, as amended, with respect to the sale or disposition of property, rights, or franchises of the Mortgagor, all such statutory rights are reserved except to the extent that they are expressly modified or waived in this Mortgage.

SECTION 1.04. Governing Law: This Mortgage shall be construed in and governed by Federal law to the extent applicable, and otherwise by the laws of the State of

SECTION 1.05. Notices: All demands, notices, reports, approvals, designations, or directions required or permitted to be given hereunder shall be in writing and shall be deemed to be properly given if sent by registered or certified mail, postage prepaid, or delivered by hand, or sent by facsimile transmission, receipt confirmed, addressed to the proper party or parties at the following address:

As to the Mortgagor:

As to the Mortgagee:

United States Department of Agriculture,
Rural Utilities Service,
Washington, DC 20250-1500

and as to any other person, firm, corporation or governmental body or agency having an interest herein by reason of being a Mortgagor, at the last address designated by such person, firm, corporation or governmental body or agency to the Mortgagor and the other Mortgagors. Any such party may from time to time designate to each other a new address to which demands, notices, reports, approvals, designations or directions may be addressed, and from and after any such designation the address designated shall be deemed to be the address of such party in lieu of the address given above.

ARTICLE II

ADDITIONAL NOTES

SECTION 2.01. Additional Notes: (a) Without the prior consent of any Mortgagor or any Noteholder, the Mortgagor may issue Additional Notes to the Government or to another lender or lenders for the purpose of acquiring, procuring or constructing new or replacement Eligible Property Additions which Notes will thereupon be secured equally and ratably with the Notes if each of the following requirements are satisfied:

(1) As evidenced by a certificate of an Independent certified public accountant sent to
each Mortgagee on or before the first advance of proceeds from such Additional Notes:

(i) The Mortgagor shall have achieved for each of the two calendar years immediately preceding the issuance of such Additional Notes, a TIER of not less than 1.5 and a DSC of not less than 1.25;

(ii) After taking into account the effect of such Additional Notes on the Total Long Term Debt of the Mortgagor, the ratio of the Mortgagor’s Net Utility Plant to its Total Long Term Debt shall be greater than or equal to 1.0 on a pro forma basis;

(iii) After taking into account the effect of such Additional Notes on the Total Assets of such Mortgagor, the Mortgagor shall have Equity greater than or equal to 27 percent of Total Assets on a pro forma basis; and

(iv) The sum of the aggregate principal amount of such Additional Notes (if any) that are not related to the Electric System if added to the aggregate outstanding principal amount of all the existing Notes (if any) that are not related to the Electric System will not exceed 30% of the Mortgagor’s Equity on a pro forma basis.

(2) No Event of Default has occurred and is continuing hereunder, or any event which with the giving of notice or lapse of time or both would become an Event of Default has occurred and is continuing.

(3) The Eligible Property Additions being constructed, acquired, procured or replaced are part of the Mortgagor’s Utility System.

(4) The Borrower’s general manager or other duly authorized officer shall send to each of the Mortgagees a certificate in substantially the form attached hereto as [Exhibit A] on or before the date of the first advance of proceeds from such Additional Notes.

(b) For purposes of this section:

(1) “Eligible Property Additions” shall mean Property Additions acquired or whose construction was completed not more than 5 years prior to the issuance of the Additional Notes and Property Additions acquired or whose construction is started and/or completed not more than 4 years after issuance of the Additional Notes, but shall exclude any Property Additions financed by any other debt secured under the Mortgage at the time additional Notes are issued,

(2) Notes are considered to be “issued” on, and the date of “issuance” shall be, the date on which they are executed by the Mortgagor; and

(3) For purposes of calculating the pro forma ratios in subparagraphs (a)(i)(ii) and (iii), the values for Total Long Term Debt and Total Assets before debt issuance and the values for Equity and Net Utility Plant shall be the most recently available end-of-month figures preceding the issuance of the Additional Notes, but in no case for a month ending more than 180 days preceding such issuance.

SECTION 2.02. Refunding or Refinancing Notes: The Mortgagor shall also have the right without the consent of any Mortgagee or any Noteholder to issue Additional Notes for the purpose of refunding or refinancing any Notes so long as the total amount of outstanding indebtedness evidenced by such Additional Note or Notes is not greater than 106% of the then outstanding principal balance of the Note or Notes being refunded or refinanced. PROVIDED, HOWEVER, that the Mortgagor may not exercise its rights under this Section if an Event of Default has occurred and is continuing, or any event which with the giving of notice or lapse of time or both would become an Event of Default has occurred and is continuing. On or before the first advance of proceeds from Notes issued under this section, the Mortgagor shall notify each Mortgagee of the refunding or refinancing. Additional Notes issued pursuant to this Section [2.02] will thereupon be secured equally and ratably with the Notes.

SECTION 2.03. Other Additional Notes: With the prior written consent of each Mortgagee, the Mortgagor may issue Additional Notes to the Government or any lender or lenders, which Notes will thereupon be secured equally and ratably with Notes without regard to whether any of the requirements of Sections [2.01] or [2.02] are satisfied.

SECTION 2.04. Additional Lenders Entitled to the Benefits of This Mortgage: Without the prior consent of any Mortgagee or any Noteholder, each new lender designated as a payee in any Additional Notes issued by the Mortgagor pursuant to Section [2.01] or [2.02] of this Mortgage shall become a Mortgagee hereunder upon the execution and delivery by the Mortgagor and such lender of a supplemental mortgage hereto designating such lender as a Mortgagee hereunder. Such new lender shall be entitled to the benefits of this Mortgage without further act or deed. Each Mortgagee and each person or entity that becomes a lender pursuant to Section [2.01] or [2.02] of this Mortgage shall, upon the request of the Mortgagor to do so, execute and deliver a supplemental mortgage herein designating such lender as an additional Mortgagee hereunder. Each new lender shall be entitled to the benefits of this Mortgage without further act or deed. Each Mortgagee and each person or entity that becomes a lender pursuant to Section [2.01] or [2.02] of this Mortgage shall, upon the request of the Mortgagor to do so, execute and deliver a supplemental mortgage hereinafter attached to the benefits of this Mortgage. The failure of any existing Mortgagee to enter into such supplemental mortgage hereinafter attached to the benefits of this Mortgage provided that such additional indebtedness otherwise conforms in all respects with the requirements for issuing Additional Notes under this Mortgage.

SECTION 2.05. Form of Supplemental Mortgage: (a) The form of supplemental mortgage referred to in Section [2.04] is attached to
this Mortgage as Exhibit B and hereby incorporated by reference as if set forth in full at this point.

(b) In the event that the Mortgagor subsequently issues Additional Notes pursuant to Sections [2.01] or [2.02] to any existing Mortgage and that Mortgagor desires further assurance that such Additional Notes will be secured by the lien of the Mortgage, an instrument substantially in the form of the supplemental mortgage attached as Exhibit B may be used.

(c) In the event that the Mortgagor issues Additional Notes pursuant to Section [2.03] to either an existing Mortgagee or a new lender, in either case with the prior written consent of each Mortgagee, then an instrument substantially in the form of the supplemental mortgage attached as Exhibit B may also be used.

ARTICLE III—PARTICULAR COVENANTS OF THE MORTGAGOR

SECTION 3.01. Payment of Debt Service on Notes: The Mortgagor will duly and punctually pay the principal, premium, if any, and interest on the Notes in accordance with the terms of the Notes, the Loan Contracts, this Mortgage and any Supplemental Mortgage authorizing such Notes.

SECTION 3.02. Warranty of Title: (a) At the time of the execution and delivery of this instrument, the Mortgagor has good and marketable title in fee simple to the real property specifically described in Granting Clause [First] as owned in fee and good and marketable title to the interests in real property specifically described in Granting Clause [First] as owned in fee simple, and has full power and lawful authority to grant, bargain, sell, alien, remise, release, convey, assign, transfer, encumber, mortgage, pledge, set over and confirm said real property and interests in real property in the manner and form aforesaid.

(b) At the time of the execution and delivery of this instrument, the Mortgagor lawfully owns and is possessed of the personal property specifically described in Granting Clauses [First and Second], subject to no mortgage, lien, charge or encumbrance except as stated therein, and has full power and lawful authority to mortgage, assign, transfer, deliver, pledge and grant a continuing security interest in said property and, including any proceeds thereof, in the manner and form aforesaid.

(c) The Mortgagor hereby does and will forever warrant and defend the title to the property specifically described in Granting Clause [First] against the claims and demands of all persons whomsoever, except Permitted Encumbrances.

SECTION 3.03. After-Acquired Property: Further Assurances; Recording: (a) All property of every kind, other than Exceptional Property, acquired by the Mortgagor after the date hereof, shall, immediately upon the acquisition thereof by the Mortgagor, and without any further mortgage, conveyance or assignment, become subject to the lien of this Mortgage; SUBJECT, HOWEVER, to Permitted Encumbrances and the exceptions, if any, to which all of the Mortgagees consent. Nevertheless, the Mortgagor will do, execute, acknowledge and deliver all and every such further acts, conveyances, mortgages, financing statements and assurances as any Mortgagee shall require for accomplishing the purposes of this Mortgage.

(b) The Mortgagor will cause this Mortgage and all Supplemental Mortgages and other instruments of further assurance, including all financing statements covering security interests in personal property, to be promptly recorded, registered and filed, and will execute and file such financing statements and cause to be issued and filed such continuation statements, all in such manner and in such places as may be required by law fully to preserve and protect the rights of all of the Mortgagees and Noteholders hereunder to all property comprising the Mortgaged Property. The Mortgagor will furnish to each Mortgagee:

(1) promptly after the execution and delivery of this instrument and of each Supplemental Mortgage or other instrument of further assurance, an Opinion of Counsel stating that, in the opinion of such Counsel, this instrument and all such Supplemental Mortgages and other instruments of further assurance have been properly recorded, registered and filed to the extent necessary to make effective the lien intended to be created by this Mortgage, and reciting the details of such action or referring to prior Opinions of Counsel in which such details are given, and stating that all financing statements and continuation statements have been executed and filed that are necessary fully to preserve and protect the rights of all of the Mortgagees and Noteholders hereunder, or stating that, in the opinion of such Counsel, no such action is necessary to make the lien effective.

(2) within 30 days after _________ in each year beginning with the year ________, an Opinion of Counsel, dated as of such date, either stating that, in the opinion of such Counsel, such action has been taken with respect to the recording, registering, filing, re-recording, re-registering and re-filing of this instrument and of all Supplemental Mortgages, financing statements, continuation statements or other instruments of further assurances as is necessary to maintain the lien of this Mortgage (including the lien on any property acquired by the Mortgagor after the execution and delivery of this instrument and owned by the Mortgagor at the time of the execution and delivery of this instrument and owned by the Mortgagor at the end of the preceding calendar year) and reciting the details of such action or referring to
prior Opinions of Counsel in which such details are given, and stating that all financing statements and continuation statements have been executed and filed that are necessary to preserve and protect the rights of all of the Mortgagors and Noteholders hereunder, or stating that, in the opinion of such Counsel, no such action is necessary.

SECTION 3.04. Environmental Requirements and Indemnity: (a) The Mortgagor shall, with respect to all facilities which may be part of the Mortgaged Property, comply with all Environmental Laws.

(b) The Mortgagor shall defend, indemnify, and hold harmless each Mortgagee, its successors and assigns, from and against any and all liabilities, losses, damages, costs, expenses (including but not limited to reasonable attorneys’ fees and expenses), causes of actions, administrative proceedings, suits, claims, demands, or judgments of any nature arising out of or in connection with any matter related to the Mortgage Property and any Environmental Law, including but not limited to:

(1) the past, present, or future presence of any hazardous substance, contaminant, pollutant, or hazardous waste on or related to the Mortgaged Property;

(2) any failure at any time by the undersigned to comply with the terms of any order related to the Mortgaged Property and issued by any federal, state, or municipal department or agency (other than RUS) exercising its authority to enforce any Environmental Law; and

(3) any lien or claim imposed under any Environmental Law related to clause (1).

(c) Within 10 (ten) business days after receiving knowledge of any liability, losses, damages, costs, expenses (including but not limited to reasonable attorneys’ fees and expenses), cause of action, administrative proceeding, suit, claim, demand, judgment, lien, reportable event including but not limited to the release of a hazardous substance, or potential or actual violation or non-compliance arising out of or in connection with the Mortgaged Property and any Environmental Law, the Mortgagor shall provide each Mortgagee with written notice of such matter. With respect to any matter upon which it has provided such notice, the Mortgagor shall immediately take any and all appropriate actions to remedy, cure, defend, or otherwise affirmatively respond to the matter.

SECTION 3.05. Payment of Taxes: The Mortgagor shall pay or cause to be paid as they become due and payable all taxes, assessments and other governmental charges lawfully levied or assessed or imposed upon the Mortgaged Property or any part thereof or upon any income therefrom, and also (to the extent that such payment will not be contrary to any applicable laws) all taxes, assessments and other governmental charges lawfully levied, assessed or imposed upon the lien or interest of the Noteholders or of the Mortgagors in the Mortgaged Property, so that (to the extent aforesaid) the lien of this Mortgage shall at all times be wholly preserved at the cost of the Mortgagor and without expense to the Mortgagors or the Noteholders; PROVIDED, HOWEVER, that the Mortgagor shall not be required to pay and discharge or cause to be paid and discharged any such tax, assessment or governmental charge to the extent that the amount, applicability or validity thereof shall currently be contested in good faith by appropriate proceedings and the Mortgagor shall have established and shall maintain adequate reserves on its books for the payment of the same.

SECTION 3.06. Authority to Execute and Deliver Notes, Loan Agreements and Mortgage; All Action Taken; Enforceable Obligations: The Mortgagor is authorized under its articles of incorporation and bylaws [or code of regulations] and all applicable laws and by corporate action to execute and deliver the Notes, any Additional Notes, the Loan Agreements and this Mortgage. The Notes, the Loan Agreements and this Mortgage are, and any Additional Notes and Loan Agreements when executed and delivered will be, the valid and enforceable obligations of the Mortgagor in accordance with their respective terms.

SECTION 3.07. Restrictions on Further Encumbrances on Property: Except to secure Additional Notes, the Mortgagor will not, without the prior written consent of each Mortgagee, create or incur or suffer or permit to be created or incurred or to exist any Lien, charge, assignment, pledge, mortgage on any of the Mortgaged Property inferior to, prior to, or on a parity with the Lien of this Mortgage except for the Permitted Encumbrances. Subject to the provisions of Section [3.08], or unless approved by each of the Mortgagors, the Mortgagor will purchase all materials, equipment and replacements to be incorporated in or used in connection with the Mortgaged Property outright and not subject to any conditional sales agreement, chattel mortgage, bailment, lease or other agreement reserving to the seller any right, title or Lien.

SECTION 3.08. Restrictions On Additional Permitted Debt: The Mortgagor shall not incur, assume, guarantee or otherwise become liable in respect of any debt for borrowed money and Restricted Rentals (including Subordinated Debt) other than the following: (“Permitted Debt”)

(1) Additional Notes issued in compliance with Article II hereof;

(2) Purchase money indebtedness in non-Utility System property, in an amount not exceeding 10% of Net Utility Plant;
The Mortgagor shall not, without the prior written approval of each Mortgagee, sell, lease or transfer any Mortgaged Property to any other person or entity (including any subsidiary or affiliate of the Mortgagor), unless (1) there exists no Event of Default or occurrence which with the passing of time and the giving of notice would be an Event of Default, (2) fair market value is obtained for such property, (3) the aggregate value of assets so sold, leased or transferred in any 12-month period is less than 10% of Net Utility Plant, and (4) the proceeds of such sale, lease or transfer, less ordinary and reasonable expenses incident to such transaction, are immediately (i) applied as a prepayment of all Notes equally and ratably, (ii) in the case of dispositions of equipment, materials or scrap, applied to the purchase of other property useful in the Mortgagor’s utility business, not necessarily of the same kind as the property disposed of, which shall forthwith become subject to the Lien of the Mortgage;
or (iii) applied to the acquisition or construction of utility plant.

SECTION 3.12. Maintenance of Mortgaged Property: (a) So long as the Mortgagor holds title to the Mortgaged Property, the Mortgagor will at all times maintain and preserve the Mortgaged Property which is used or useful in the Mortgagor's business and each and every part and parcel thereof in good repair, working order and condition, ordinary wear and tear and acts of God excepted, and in compliance with Prudent Utility Practice and in compliance with all applicable laws, regulations and orders, and will from time to time make all needed and proper repairs, renewals and replacements, and useful and proper alterations, additions, betterments and improvements, and will, subject to contingencies beyond its reasonable control, at all times use all reasonable diligence to furnish the consumers served by it through the Mortgaged Property, or any part thereof, with an adequate supply of electric power and energy. If any substantial part of the Mortgaged Property is leased by the Mortgagor to any other party, the lease agreement between the Mortgagor and the lessee shall obligate the lessee to comply with the provisions of subsections (a) and (b) of this Section in respect of the leased facilities and to permit the Mortgagor to operate the leased facilities in the event of any failure by the lessee to so comply.

(b) If in the sole judgement of any Mortgagor, the Mortgaged Property is not being maintained and repaired in accordance with paragraph (a) of this section, such Mortgagor may send to the Mortgagor a written report of needed improvements and the Mortgagor will upon receipt of such written report promptly undertake to accomplish such improvements.

(c) The Mortgagor further agrees that upon reasonable written request of any Mortgagor, which request together with the requests of any other Mortgagors shall be made no more frequently than once every three years, the Mortgagor will supply promptly to each Mortgagor a certification (hereinafter called the "Engineer's Certification"), in form satisfactory to the requestor, prepared by a professional engineer, who shall be satisfactory to the Mortgagors, as to the condition of the Mortgaged Property. If in the sole judgment of any Mortgagor the Engineer's Certification discloses the need for improvements to the condition of the Mortgaged Property or any other operations of the Mortgagor, such Mortgagor may send to the Mortgagor a written report of such improvements and the Mortgagor will upon receipt of such written report promptly undertake to accomplish such of these improvements as are required by such Mortgagor.

SECTION 3.13. Insurance; Restoration of Damaged Mortgaged Property: (a) The Mortgagor will take out, as the respective risks are incurred, and maintain the classes and amounts of insurance in conformance with generally accepted utility industry standards for such classes and amounts of coverages of utilities of the size and character of the Mortgagor and consistent with Prudent Utility Practice.

(b) The foregoing insurance coverage shall be obtained by means of bond and policy forms approved by regulatory authorities having jurisdiction, and, with respect to insurance upon any part of the Mortgaged Property, shall provide that the insurance shall be payable to the Mortgagors as their interests may appear by means of the standard mortgagor clause without contribution. Each policy or other contract for such insurance shall contain an agreement by the insurer that, notwithstanding any right of cancellation reserved to such insurer, such policy or contract shall continue in force for at least 30 days after written notice to each Mortgagor of cancellation.

(c) In the event of damage to or the destruction or loss of any portion of the Mortgaged Property which is used or useful in the Mortgagor's business and which shall be covered by insurance, unless each Mortgagor shall otherwise agree, the Mortgagor shall replace or restore such damaged, destroyed or lost portion so that such Mortgaged Property shall be in substantially the same condition as it was in prior to such damage, destruction or loss, and shall apply the proceeds of the insurance for that purpose. The Mortgagor shall replace the lost portion of such Mortgaged Property or shall commence such restoration promptly after such damage, destruction or loss shall have occurred and shall complete such replacement or restoration as expeditiously as practicable, and shall pay or cause to be paid out of the proceeds of such insurance all costs and expenses in connection therewith.

(d) Sums recovered under any policy or fidelity bond by the Mortgagor or any Noteholder for any loss under such policy or bond shall, unless applied as provided in the preceding paragraph, be used to finance construction of utility plant secured or to be secured by this Mortgage, or unless otherwise directed by the Mortgagors, be applied to the prepayment of the Notes pro rata according to the unpaid principal amounts thereof (such prepayments to be applied to such Notes at installments thereof as may be designated by the respective Mortgagor at the time of any such prepayment), or be used to construct or acquire utility plant which will become part of the Mortgaged Property.
and the Mortgagor hereby irrevocably appoints each Mortgagee as its agent to exercise such rights and remedies under such policy or bond as such Mortgagee may choose, and the Mortgagee shall pay all costs and reasonable expenses incurred by the Mortgagee in connection with such exercise.

SECTION 3.14. Mortgagee Right to Expel Mortgagor to Protect Mortgaged Property: The Mortgagor agrees that any Mortgagee from time to time hereunder may, in its sole discretion, after having given 5 Business days prior written notice to Mortgagor, but shall not be obligated to, advance funds on behalf of Mortgagor, in order to insure the Mortgagor’s compliance with any covenant, warranty, representation or agreement of the Mortgagor made in or pursuant to this Mortgage or any of the Loan Agreements, to preserve or protect any right or interest of the Mortgagees in the Mortgaged Property or under or pursuant to this Mortgage or any of the Loan Agreements, to preserve or protect any right or interest of any party who shall become obligated to the Mortgagee, or to the obtaining of such rights of way, easements or releases.

SECTION 3.15. Time Extensions for Payment of Notes: Any Mortgagee may, at any time or times in succession without notice to or the consent of the Mortgagor, or any other Mortgagee, and upon such terms as such Mortgagee may prescribe, grant to any person, firm or corporation who shall have become obligated to pay all or any part of the principal of (and premium, if any) or interest on any Note held by or indebtedness owed to such Mortgagee or who may be affected by the lien hereby created, an extension of the time for the payment of such principal, (and premium, if any) or interest, and after any such extension the Mortgagee will remain liable for the payment of such Note or indebtedness to the same extent as though it had at the time of such extension consented thereto in writing.

SECTION 3.16. Application of Proceeds from Condemnation: (a) In the event that the Mortgaged Property or any part thereof, shall be taken under the power of eminent domain, all proceeds and avails therefrom may be used to finance construction of utility plant secured or to be secured by this Mortgage. Any proceeds not so used shall forthwith be applied by the Mortgagor: first, to the ratable payment of any indebtedness secured by this Mortgage other than principal of or interest on the Notes; second, to the ratable payment of interest which shall have accrued on the Notes and be unpaid; third, to the ratable payment of or on account of the unpaid principal of the Notes, to such installments thereof as may be designated by the respective Mortgagees at the time of any such payment; and fourth, the balance shall be paid to whomsoever shall be entitled thereto.

(b) If any part of the Mortgaged Property shall be taken by eminent domain, each Mortgagee shall release the property so taken from the Mortgaged Property and shall be fully protected in so doing upon being furnished with:

(1) A certificate of a duly authorized officer of the Mortgagor requesting such release, describing the property to be released and stating that such property has been taken by eminent domain and that all conditions precedent herein provided or relating to such release have been complied with; and

(2) an opinion of counsel to the effect that such property has been lawfully taken by exercise of the right of eminent domain, that the award for such property so taken has become final and that all conditions precedent herein provided for relating to such release have been complied with.

SECTION 3.17. Compliance with Loan Agreements: Notice of Amendments to and Defaults under Loan Agreements: The Mortgagor will observe and perform all of the material covenants, agreements, terms and conditions contained in any Loan Agreement entered into in connection with the issuance of any of the Notes, as from time to time amended. The Mortgagor will send promptly to each Mortgagee notice of any default by the Mortgagor under any Loan Agreement and notice of any amendment to any Loan Agreement. Upon request of any Mortgagee, the Mortgagor shall furnish to such Mortgagee single copies of such Loan Agreements and amendments thereto as such Mortgagee may request.

SECTION 3.18. Rights of Way, etc., Necessary in Business: The Mortgagor will use its best efforts to obtain all such rights of way, easements from landowners and releases from lienors as shall be necessary or advisable in the conduct of its business, and, if requested by any Mortgagee, deliver to such Mortgagee evidence satisfactory to such Mortgagee of the obtaining of such rights of way, easements or releases.

SECTION 3.19. Limitations on Providing Free Electric Services: The Mortgagor will not furnish or supply or cause to be furnished or
supplied any electric power, energy, or capacity free of charge to any person, firm or corporation, public or private, and the Mortgagor will enforce the payment of any and all amounts owing to the Mortgagor by reason of the ownership and operation of the Utility System by discontinuing such use, output, capacity, or service, or by filing suit therefor within 90 days after any such accounts are due, or by both such discontinuance and by filing suit.

SECTION 3.2. Keeping Books; Inspection by Mortgagee: The Mortgagor will keep proper books, records and accounts, in which full and correct entries shall be made of all dealings or transactions of or in relation to the Notes and the Utility Systems, properties, business and affairs of the Mortgagor in accordance with the Accounting Requirements. The Mortgagor will at any and all times, upon the written request of any Mortgagee and at the expense of the Mortgagor, permit such Mortgagee by its representatives to inspect the Utility Systems and properties and properties, books of account, records, reports and other papers of the Mortgagor and to take copies and extracts therefrom, and will afford and procure a reasonable opportunity to make any such inspection, and the Mortgagor will furnish to each Mortgagee any and all such information as such Mortgagee may request, with respect to the performance by the Mortgagor of its covenants under this Mortgage, the Notes and the Loan Agreements.

ARTICLE IV
EVENTS OF DEFAULT AND REMEDIES

SECTION 4.01. Events of Default: Each of the following shall be an "Event of Default" under this Mortgage:

(a) default shall be made in the payment of any installment of or on account of interest or principal of (or premium, if any associated with) any Note or Notes for more than five (5) Business Days after the same shall be required to be made;
(b) default shall be made in the due observance or performance of any other of the covenants, conditions or agreements on the part of the Mortgagor, in any of the Notes, Loan Agreements or in this Mortgage, and such default shall continue for a period of thirty (30) days after written notice specifying such default and requiring the same to be remedied and stating that such notice is a "Notice of Default" hereunder shall have been given to the Mortgagor by any Mortgagee; PROVIDED, HOWEVER that in the case of a default on the terms of a Note or Loan Agreement of a particular Mortgagor, the "Notice of Default" required under this paragraph may only be given by that Mortgagor;
(c) the Mortgagor shall file a petition in bankruptcy or be adjudicated a bankrupt or insolvent, or shall make an assignment for the benefit of its creditors, or shall consent to the appointment of a receiver of itself or of its property, or shall institute proceedings for its reorganization or proceedings instituted by others for its reorganization shall not be dismissed within sixty (60) days after the institution thereof;
(d) a receiver or liquidator of the Mortgagor or of any substantial portion of its property shall be appointed and the order appointing such receiver or liquidator shall not be vacated within sixty (60) days after the entry thereof;
(e) the Mortgagor shall forfeit or otherwise be deprived of its corporate charter or franchises, permits, easements, or licenses required to carry on any material portion of its business;
(f) a final judgment for an amount of more than $ shall be entered against the Mortgagor and shall remain unsatisfied or without a stay in respect thereof for a period of sixty (60) days; or,
(g) any material representation or warranty made by the Mortgagor herein, in the Loan Agreements or in any certificate or financial statement delivered hereunder or thereunder shall prove to be false or misleading in any material respect at the time made.

SECTION 4.02. Acceleration of Maturity; Rescission and Annulment:

(a) If an Event of Default described in Section [4.01(a)] has occurred and is continuing, any Mortgagee upon which such default has occurred may declare the principal of all its Notes secured hereunder to be due and payable immediately by a notice in writing to the Mortgagor and to the other Mortgagees (failure to provide said notice to any other Mortgagee shall not affect the validity of any acceleration of the Note or Notes by such Mortgagee), and upon such declaration, all unpaid principal (and premium, if any) and accrued interest so declared shall become due and payable immediately, anything contained herein or in any Note or Notes to the contrary notwithstanding.
(b) If any other Event of Default shall have occurred and be continuing, any Mortgagee may declare the principal of all its Notes secured hereunder to be due and payable immediately by a notice in writing to the Mortgagor and to the other Mortgagees (failure to provide said notice to any other Mortgagee shall not affect the validity of any acceleration of the Note or Notes by such Mortgagee), and upon such declaration, all unpaid principal (and premium, if any) and accrued interest so declared shall become due and payable immediately, anything contained herein or in any Note or Notes to the contrary notwithstanding.
(c) Upon receipt of actual knowledge of or any notice of acceleration by any Mortgagee, any other Mortgagee may declare the principal of all of its Notes to be due and payable.
immediately by a notice in writing to the Mortgagor and upon such declaration, all unpaid principal (and premium, if any) and accrued interest so declared shall become due and payable, all payments in respect of principal and interest which shall have become due and payable by the terms of such Note or Notes (other than amounts due as a result of the acceleration of the Notes) shall be paid to the respective Mortgagees, and (i) all other defaults under the Loan Agreements, the Notes and this Mortgage shall have been made good or cured to the satisfaction of the Mortgagees representing at least 80% of the aggregate unpaid principal balance of all of the Notes then outstanding, (ii) proceedings to foreclose the lien of this Mortgage have not been commenced, and (iii) all reasonable expenses paid or incurred by the Mortgagees in connection with the acceleration shall have been paid to the respective Mortgagees, then in every such case such Mortgagees representing at least 80% of the aggregate unpaid principal balance of all of the Notes then outstanding may by written notice to the Mortgagor, for purposes of this Mortgage, annul such declaration and waive such default and the consequences thereof, but no such waiver shall extend to or affect any subsequent default or impair any right consequent thereon.

SECTION 4.03. Remedies of Mortgagees: If one or more of the Events of Default shall occur and be continuing, any Mortgagee personally or by attorney, in its or their discretion, may, in so far as not prohibited by law: (a) take immediate possession of the Mortgaged Property, collect and receive all credits, outstanding accounts and bills receivable of the Mortgagor and all rents, income, revenues, proceeds and profits pertaining to or arising from the Mortgaged Property, or any part thereof, whether then past due or accruing thereafter, and issue binding receipts thereof; and manage, control and operate the Mortgaged Property as fully as the Mortgagor might do if in possession thereof, in- cluding, without limitation, the making of all repairs or replacements deemed necessary or advisable by such Mortgagee in possession thereof, to collect the debts hereby secured or for the enforcement of such other or additional appropriate legal or equitable remedies as may be deemed necessary or advisable to protect and enforce the rights and remedies herein granted or conferred, and in the event of the institution of any such action or suit the Mortgagee instituting such action or suit shall have the right to have appointed a receiver of the Mortgaged Property and of all proceeds, rents, income, revenues and profits pertaining thereto or arising therefrom, whether then past due or accruing after the appointment of such receiver, derived, received or had from the time of the commencement of such suit or action, and such receiver shall have all the usual powers and duties of receivers in like and similar cases, to the fullest extent permitted by law, and if application shall be made for the appointment of a receiver the Mortgagee hereby expressly consents that the court to which such application shall be made may make said appointment; and (c) sell or cause to be sold all and singular the Mortgaged Property or any part thereof, and all right, title, interest, claim and demand of the Mortgagor therein or thereto, at public auction at such place in any county (or its equivalent locality) in which the property to be sold, or any part thereof, is located, at such time and upon such terms as may be specified in a notice of sale, which shall state the time when and the place where the sale is to be held, shall contain a brief general description of the property to be sold, and shall be given by mailing a copy thereof to the Mortgagor at least fifteen (15) days prior to the date fixed for such sale and by publishing the same once in each week for two successive calendar weeks prior to the date of such sale in a newspaper of general circulation published in said locality or, if no such newspaper is published in such locality, in a newspaper of general circulation in such locality, the first such publication to be published not less than fifteen (15) days nor more than thirty (30) days prior to the date fixed for such sale. Any sale to be made under this subparagraph (c) of this Section 4.03 may be adjourned from time to time by announcement at the time and place appointed for such sale or for such adjourned sale or sales, and without further notice or publication the sale may be had at the time and place to which the same shall be adjourned; provided, however, that in the event another or different notice of sale or another or different manner of conducting the same shall be required by law the notice of sale shall be given or the sale be conducted, as the case may be, in accordance with the applicable provisions of law. The expense incurred by any Mortgagee (including, but not limited to, receiver’s fees, counsel fees, cost of advertisement and agents’ compensation) in the exercise of any of the remedies provided
in this Mortgage shall be secured by this Mortgage.

(d) In the event that a Mortgagee proceeds to enforce remedies under this Section, any other Mortgagees may join in such proceedings. In the event that the Mortgagees are not in agreement with the method or manner of enforcement chosen by any other Mortgagee, the Mortgagees representing a majority of the aggregate unpaid principal balance on the then Outstanding Notes may direct the method and manner in which remedial action will proceed.

SECTION 4.04. Application of Proceeds from Remedial Actions: Any proceeds or funds arising from the exercise of any right or the enforcement of any remedies herein provided after the payment or provision for the payment of any and all costs and expenses in connection with the enforcement of such remedies or the enforcement of such remedies shall be applied first, to the ratable payment of indebtedness hereby secured other than the principal of or interest on the Notes; second, to the ratable payment of interest which shall have accrued on the Notes and which shall be unpaid; third, to the ratable payment of or on account of the unpaid principal of the Notes; and the balance, if any, shall be paid to whomsoever shall be entitled thereto.

SECTION 4.05. Remedies Cumulative: No Election: Every right or remedy herein conferred upon or reserved to the Mortgagees or to the Noteholders shall be cumulative and shall be in addition to every other right and remedy given hereunder or now or hereafter existing at law, or in equity, or by statute. The pursuit of any right or remedy shall not be construed as an election.

SECTION 4.06. Waiver of Appraisal Rights; Marshaling of Assets Not Required: The Mortgagee, for itself and all who may claim through or under it, covenants that it will not at any time insist upon or plead, in any manner whatever, any appraisement, valuation, stay, extension or redemption laws now or hereafter in force in any locality where any of the Mortgaged Property may be situated, in order to prevent, delay or hinder the enforcement or foreclosure of this Mortgage, or the absolute sale of the Mortgaged Property, or any part thereof, or the final and absolute putting into possession thereof, immediately after such sale, of the purchaser or purchasers thereat, and the Mortgagor, for itself and all who may claim through or under it, hereby waives the benefit of all such laws unless such waiver shall be forbidden by law. Under no circumstances shall there be any marshaling of assets upon any foreclosure or to other enforcement of this Mortgage.

SECTION 4.07. Notice of Default: The Mortgagor covenants that it will give immediate written notice to each Mortgagee of the occurrence of any Event of Default or in the event that any right or remedy described in Sections [4.02] and [4.03] hereof is exercised or enforced or any action is taken to exercise or enforce any such right or remedy.

ARTICLE V—POSSESSION UNTIL DEFAULT—DEFEASANCE CLAUSE

SECTION 5.01. Possession Until Default: Until some one or more of the Events of Default shall have happened, the Mortgagor shall be suffered and permitted to retain actual possession of the Mortgaged Property, and to manage, operate and use the same and any part thereof, with the rights and franchises appertaining thereto, and to collect, receive, take, use and enjoy the rents, revenues, issues, earnings, income, proceeds, products and profits thereof or therefrom, subject to the provisions of this Mortgage.

SECTION 5.02. Defeasance: If the Mortgagor shall pay or cause to be paid the whole amount of the principal of (and premium, if any) and interest on the Notes at the times and in the manner herein provided, and shall also pay or cause to be paid all other sums payable by the Mortgagor hereunder or under any Loan Agreement and shall keep and perform, all covenants herein required to be kept and performed by it, then and in that case, all property, rights and interest hereby conveyed or assigned or pledged shall revert to the Mortgagor and the estate, right, title and interest of the Mortgagees so paid shall thereupon cease, determine and become void and such Mortgage, in such case, on written demand of the Mortgagor but at the Mortgagor’s cost and expense, shall enter into satisfaction of the Mortgagee upon the record. In any event, each Mortgagee, upon payment in full to such Mortgagee by the Mortgagor of all principal of (and premium, if any) and interest on any Note held by such Mortgagee and the payment and discharge by the Mortgagor of all charges due to such Mortgagee hereunder or under any Loan Agreement, shall execute and deliver to the Mortgagor such instrument of satisfaction, discharge or release as shall be required by law in the circumstances.

SECTION 5.03. Special Defeasance: Other than any Notes excluded by the foregoing Sections 5.01 and 5.02 and Notes which have become due and payable, the Mortgagor may cause the Lien of this Mortgage to be defeased with respect to any Note for which it has deposited or caused to be deposited in trust solely for the purpose an amount sufficient to pay and discharge the entire indebtedness on such Note for principal (and premium, if any) and interest to the date of maturity thereof: PROVIDED, HOWEVER, that depository serving as trustee for such trust must first be accepted as such by the Mortgagee whose Notes are being defeased under this section. In such event, such a Note will
no longer be considered to be an Outstanding Note for purposes of this Mortgage and the Mortgagor shall execute and deliver to the Mortgagor such instrument of satisfaction, discharge, or release as shall be required by law in the circumstances.

ARTICLE VI
MISCELLANEOUS

SECTION 6.01. Property Deemed Real Property: It is hereby declared to be the intention of the Mortgagor that any electric generating plant or plants and facilities and all electric transmission and distribution lines, or other Electric System or Utility System facilities, embraced in the Mortgaged Property, including (without limitation) all rights of way and easements granted or given to the Mortgagor or obtained by it to use real property in connection with the construction, operation or maintenance of such plant, lines, facilities or systems, and all other property physically attached to any of the foregoing, shall be deemed to be real property.

SECTION 6.02. Mortgage to Bind and Benefit Successors and Assigns: All of the covenants, stipulations, promises, undertakings and agreements herein contained by or on behalf of the Mortgagor shall bind its successors and assigns, whether so specified or not, and all titles, rights and remedies hereby granted to or conferred upon the Mortgagors shall pass to and inure to the benefit of the successors and assigns of the Mortgagors and shall be deemed to be granted or conferred for the ratable benefit and security of all who shall from time to time be a Mortgagor. The Mortgagor hereby agrees to execute such consents, acknowledgements and other instruments as may be reasonably requested by any Mortgagee in connection with the assignment, transfer, mortgage, hypothecation or pledge of the rights or interests of such Mortgagee hereunder or under the Notes or in and to any of the Mortgaged Property.

SECTION 6.03. Headings: The descriptive headings of the various articles and sections of this Mortgage and also the table of contents were formulated and inserted for convenience only and shall not be deemed to affect the meaning or construction of any of the provisions hereof.

SECTION 6.04. Severability Clause: In case any provision of this Mortgage or in the Notes or in the Loan Agreements shall be invalid or unenforceable, the validity, legality and enforceability of the remaining provisions thereof shall not in any way be affected or impaired, nor shall any invalidity or unenforceability as to any Mortgagee hereunder affect or impair the rights hereunder of any other Mortgagee.

SECTION 6.05. Mortgage Deemed Security Agreement: To the extent that any of the property described or referred to in this Mortgage is governed by the provisions of the UCC this Mortgage is hereby deemed a "security agreement" under the UCC, and, if so elected by any Mortgagee, a "financing statement" under the UCC for said security agreement. The mailing addresses of the Mortgagor as debtor, and the Mortgagees as secured parties are as set forth in Section [1.05] hereof. If any Mortgagee so directs the Mortgagor to do so, the Mortgagor shall file as a financing statement under the UCC for said security agreement and for the benefit of all of the Mortgagees, an instrument other than this Mortgage. In such case, the instrument to be filed shall be in a form customarily accepted by the filing office as a financing statement. PROCEEDS OF COLLATERAL ARE COVERED HEREBY.

SECTION 6.06. Indemnification by Mortgagor of Mortgagees: The Mortgagor agrees to indemnify and save harmless each Mortgagee against any liability or damages which any of them may incur or sustain in the exercise and performance of their rightful powers and duties hereunder. For such reimbursement and indemnity, each Mortgagee shall be secured under this Mortgage in the same manner as the Notes and all such reimbursements for expense or damage shall be paid to the Mortgagee incurring or suffering the same with interest at the rate specified in Section [3.14] hereof. The Mortgagor's obligation to indemnify the Mortgagees under this section and under Section [3.04] shall survive the satisfaction of the Notes, the reconveyance or foreclosure of this Mortgage, the acceptance of a deed in lieu of foreclosure, or any transfer or abandonment of the Mortgaged Property.

IN WITNESS WHEREOF, as Mortgagor, has caused this Restated Mortgage and Security Agreement to be signed in its name and its corporate seal to be hereunto affixed and attested by its officers thereunto duly authorized, and United States of America, as Mortgagor, and as Mortgagee, has caused this Restated Mortgage and Security Agreement to be signed in its name by duly authorized persons, all as of the day and year first above written.

MANAGEMENT'S CERTIFICATE REQUIRED UNDER MORTGAGE SECTION 2.01 FOR ADDITIONAL NOTES

On behalf of ____________________, the "Borrower," I hereby certify as follows:

1. I am the Manager of the Borrower and have been duly authorized to deliver this certificate in connection with the Additional Note or Notes to be issued on or about ______, ______ (Date Note or Notes are to be Signed) pursuant to Section [2.01] of the Mortgage dated ______.

2. No Event of Default has occurred and is continuing under the Mortgage, or any event which with the giving of notice or lapse of time or both would become an Event of Default has occurred and is continuing.

3. The Additional Notes described in paragraph 1 are for the purpose of funding Property Additions being constructed, acquired, procured or replaced that are or will become part of the Borrower's Utility System.

225
4. The Property Additions referred to in paragraph 3 are Eligible Property Additions, i.e., Property Additions acquired or whose construction was completed not more than 5 years prior to the issuance of additional Notes and Property Additions acquired or whose construction is started and/or completed not more than 4 years after issuance of the additional Notes, but shall exclude any Property Additions financed by any other debt secured under the Mortgage at the time additional Notes are issued.

5. I have reviewed the certificate of the Independent certified public accountant also being delivered to each of the Mortgagors pursuant to Section [201] in connection with the aforesaid Additional Note or Notes and concur with the conclusions expressed therein.

6. Capitalized terms that are used in this certificate but are not defined herein have the meanings defined in the Mortgage.

Exhibit B—Form of Supplemental Mortgage

Supplemental Mortgage and Security Agreement, dated as of _______________ (hereinafter sometimes called this “Supplemental Mortgage”) is made by and between ___________ (hereinafter called the “Mortgagor”), a corporation existing under the laws of _______________, and the UNITED STATES OF AMERICA acting by and through the Administrator of the Rural Utilities Service (hereinafter called the “Government”), and ___________ (Supplemental Lender) (hereinafter called ___________), a corporation existing under the laws of _______________, and intended to confer rights and benefits on both the Government and ___________, in accordance with this Supplemental Mortgage and the Original Mortgage (hereinafter defined) (the Government and the Supplemental Lenders being herein sometimes collectively referred to as the “Mortgagees”).

RECITALS

Whereas, the Mortgagor, the Government and ___________ are parties to that certain Restated Mortgage and Security Agreement, as supplemented, amended or restated (the “Original Mortgage”) identified in Schedule “A” of this Mortgage) originally entered into between the Mortgagor, the Government acting by and through the Administrator of the Rural Utilities Service (hereinafter called “RUS”), and ___________; and

Whereas, the Mortgagor deems it necessary to borrow money for its corporate purposes and to issue its promissory notes and other debt obligations therefor, and to mortgage and pledge its property hereinafter described or mentioned to secure the payment of the same, and to enter into this Supplemental Mortgage pursuant to which all secured debt of the Mortgagor hereunder shall be secured on parity, and to add as a secured party hereunder and under the Original Mortgage (the Supplemental Mortgage and the Original Mortgage, as it may have been previously amended or supplemented, hereinafter may be called collectively the “RUS Mortgage”); and

Whereas, the RUS Mortgage, as supplemented hereby, preserves the priority of the Original Mortgage for the pro rata benefit of all the Mortgagees and secures the payment of all of the Mortgagor’s outstanding indebtedness as listed in the Instruments Recital of Schedule “A”; and

Whereas, all acts necessary to make this Supplemental Mortgage a valid and binding legal instrument for the security of such notes and obligations, subject to the terms of the RUS Mortgage, have been in all respects duly authorized.

Now, Therefore, This Supplemental Mortgage Witnesseth: That to secure the payment of the principal of (and premium, if any) and interest on all Notes issued hereunder according to their tenor and effect, and the performance of all provisions therein and herein contained, and in consideration of the covenants herein contained and the purchase and guarantee of Notes by the guarantors or holders thereof, the Mortgagor has mortgaged, pledged and granted a continuing security interest in, and by these presents does hereby grant, bargain, sell, alienate, remise, release, convey, assign, transfer, hypothecate, pledge, set over and confirm, pledge and grant a continuing security interest in for the purposes hereinafter expressed [other language may be required under various state laws], unto the Mortgagees all property, rights, privileges and franchises of the Mortgagor of every kind and description, real, personal or mixed, tangible and intangible, of the kind or nature specifically mentioned herein or any other kind or nature, except any Excepted Property set forth on Schedule “C” hereof owned or hereafter acquired by the Mortgagor (by purchase, consolidation, merger, donation, construction, erection or in any other way) wherever located, including (without limitation) all and singular the following:

A. All of those fee and leasehold interests in real property set forth in Schedule “B” hereof, subject in each case to those matters set forth in such Schedule; and

B. All of those fee and leasehold interests in real property set forth in Schedule “B” of
the Original Mortgage or in any restatement, amendment or supplement thereto, subject in each case to those matters set forth in such Schedule; and

C. All of the kinds, types or items of property, now owned or hereafter acquired, described as Mortgaged Property in the Original Mortgage or in any restatement, amendment to supplement thereto as Mortgaged Property.

It is Further Agreed and Covenanted That the Original Mortgage, as previously restated, amended or supplemented, and this Supplement shall constitute one agreement and the parties hereto shall be bound by all of the terms thereof and, without limiting the foregoing,

1. All capitalized terms not defined herein shall have the meaning given in Article I of the Original Mortgage.

2. This Supplemental Mortgage is one of the Supplemental Mortgages contemplated by Article II of the Original Mortgage.

In Witness Whereof, ______ as Mortgagor.

(Acknowledgements)

Supplemental Mortgage Schedule C—Excepted Property

[60 FR 38888, July 18, 1995, as amended at 60 FR 67410, Dec. 29, 1995]

Subpart C—Loan Contracts With Distribution Borrowers

Source: 60 FR 67410, Dec. 29, 1995, unless otherwise noted.

§ 1718.100 General.

(a) Purpose. The purpose of this subpart is to set forth the policies, requirements, and procedures governing loan contracts entered into between the Rural Utilities Service (RUS) and distribution borrowers or, in some cases, other electric borrowers.

(b) Flexibility for individual circumstances. The intent of this subpart is to provide the flexibility to address the different needs and different credit risks of individual borrowers, and other special circumstances of individual lending situations. The model loan contract contained in Appendix A of this subpart provides an example of what a loan contract with an “average” or “typical” distribution borrower may look like under “average” or “typical” circumstances. Depending on the credit risks and other circumstances of individual loans, RUS may execute loan contracts with provisions that are substantially different than those set forth in the model. RUS may develop alternative model loan contract provisions. If it does, such provisions will be made available to the public.

(c) Resolution of any differences in contractual provisions. If any provision of the loan contract appears to be in conflict with provisions of the mortgage, the loan contract shall have precedence with respect to the contractual relationship between the borrower and RUS with respect to such provision. If either document is silent on a matter addressed in the other document, the other document shall have precedence with respect to the contractual relationship between the borrower and RUS with respect to such matter.

(d) Certain loan contract provisions subject to subsequent rulemaking. If a loan contract provision imposes an obligation or limitation on the borrower whose interpretation or specification is subject to RUS regulations or the discretion of the Administrator or RUS, such interpretation or specification shall be subject to subsequent rulemaking. Such interpretation or specification of the borrower’s obligations or limitations may not exceed the authority granted to the Administrator or RUS in the loan contract provision.

§ 1718.101 Applicability.

(a) Distribution borrowers. The provisions of this subpart apply to all distribution borrowers that obtain a loan or loan guarantee from RUS approved
on or after January 29, 1996. Distribution borrowers that obtain a lien accommodation or any other form of financial assistance from RUS after January 29, 1996, may be required to execute a new loan contract and new mortgage. Moreover, any distribution borrower may submit a request to RUS that a new loan contract and new mortgage be executed. Within the constraints of time and staff resources, RUS will attempt to honor such requests. Borrowers must first obtain the concurrence of any other mortgagees on their existing mortgage before a new mortgage can be executed.

(b) Other borrowers. Borrowers other than distribution borrowers may also submit requests for execution of a new loan contract pursuant to this subpart and a new mortgage pursuant to subpart B of this part. RUS may approve such requests if it determines that such approval is in the government’s financial interest. If other mortgagees are on the borrower’s existing mortgage, their concurrence would be required before a new mortgage could be executed.

§ 1718.102 Definitions.

For the purposes of this subpart:

Borrower means any organization that has an outstanding loan made or guaranteed by the Rural Utilities Service (RUS) or its predecessor, the Rural Electrification Administration, for rural electrification, or that is seeking such financing.

Distribution borrower means a borrower that sells or intends to sell electric power and energy at retail in rural areas, the latter being defined in 7 CFR 1710.2.

Loan documents means the mortgage (or other security instrument acceptable to RUS), the loan contract, and the promissory note entered into between the borrower and RUS.

§ 1718.103 Loan contract provisions.

Loan contracts executed pursuant to this subpart shall contain such provisions as RUS determines are appropriate to further the purposes of the RE Act and to ensure that the security for the loan will be reasonably adequate and that the loan will be repaid according to the terms of the promissory note. Such loan contracts will contain provisions addressing, but not necessarily limited to, the following matters:

(a) Description of the purpose of the loan;

(b) Specification of the interest to be charged on the loan, including the method for determining the interest rate if it is not fixed for the entire term of the loan;

(c) Specification of the method for repaying the loan principal, including the final maturity of the loan;

(d) The conditions under which the loan may be prepaid before its maturity date, including but not limited to requirements regarding the prepayment of loans made concurrently by RUS and another secured lender;

(e) The method for making scheduled payments on the loan;

(f) Accounting principles and system of accounts, and RUS authority to approve the accountant used by the borrower;

(g) The method and time period for advancing loan funds and the conditions precedent to the advance of funds;

(h) Representations and warranties by the borrower as a condition of obtaining the loan, including but not limited to: the legal authority of the borrower to enter into the loan contract and operate its system; that the loan documents will be a legal, valid and binding obligation of the borrower enforceable according to their terms; compliance of the borrower in all material respects with all federal, state, and local laws, regulations, codes, and orders; existence of any pending or threatened legal actions that could have a material adverse effect on the borrower’s ability to perform its obligations under the loan documents; the accuracy and completeness of all information provided by the borrower in the loan application and with respect to the loan contract, and the existence of any material adverse change since the information was provided; and the existence of any material defaults under other agreements of the borrower;
(j) Reports and notices required to be submitted to RUS, including but not limited to: annual financial statements; notice of defaults; notice of litigation; notice of orders or other directives received by the borrower from regulatory authorities; notice of any matter that has resulted in or may result in a material adverse change in the condition or operations of the borrower; and such other information regarding the condition or operations of the borrower as RUS may reasonably require;

(k) Annual written certification that the borrower is in compliance with its loan contract, note, mortgage, and any other agreement with RUS, or if there has been a default in the fulfillment of any obligation under said agreements, specifying each such default and the nature and status thereof;

(l) Requirement that the borrower design and implement rates for utility services to meet certain minimum coverage of interest expense and/or debt service obligations;

(m) Requirement that the borrower maintain and preserve its mortgaged property in compliance with prudent utility practice and all applicable laws, which may include certain specific actions and certifications set forth in the borrower’s loan contract or mortgage;

(n) Requirement that the borrower plan, design and construct its electric system according to standards and other requirements established by RUS, and if directed by the Administrator, that the borrower follow RUS planning, design and construction standards and requirements for other utility systems constructed by the borrower;

(o) Limitations on extensions and additions to the borrower’s electric system without approval by RUS;

(p) Limitations on contracts and contract amendments that the borrower may enter into without approval by RUS;

(q) Limitations of the transfer of mortgaged property by the borrower;

(r) Limitations on dividends, patronage refunds, and cash distributions paid by the borrower;

(s) Limitations on investments, loans, and guarantees made by the borrower;

(t) Authority of RUS to approve a new general manager and to require that an existing general manager be replaced if the borrower is in default under its mortgage, loan contract, or any other agreements with RUS;

(u) Description of events of default under the loan contract and the remedies available to RUS;

(v) Applicability of state and federal laws;

(w) Severability of the individual provisions of the loan documents;

(x) Matters relating to the assignment of the loan contract;

(y) Requirements relating to federal laws and regulations, including but not limited to the following matters: area coverage for electric service; civil rights and equal employment opportunity; access to buildings and other matters relating to the handicapped; design and construction standards relating to earthquakes; the National Environmental Policy Act of 1969 and other environmental laws and regulations; flood hazard insurance; debarment and suspension from federal assistance programs; and delinquency on federal debt; and

(z) Special requirements applicable to individual loans, and such other provisions as RUS may require to ensure loan repayment and reasonably adequate loan security.

§1718.104 Availability of model loan contract.

Single copies of the model loan contract (RUS Informational Publication 1718 C) are available from the Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250-1533. This document may be reproduced.

LOAN CONTRACT
AGREEMENT, dated __________, 199__, between __________________ (“Borrower”), a corporation organized and existing under the laws of the State of __________ (the “State”) and the UNITED STATES OF AMERICA acting by and through the Administrator of the Rural Utilities Service (“RUS”).

RECITALS
The Borrower has applied to RUS for a loan for the purpose(s) set forth in Schedule 1 hereto.

RUS is willing to make such a loan to the Borrower pursuant to the Rural Electrification Act of 1936, as amended, on the terms and conditions stated herein.

THEREFORE, for and in consideration of the premises and the mutual covenants hereinafter contained, the parties hereto agree and bind themselves as follows:

ARTICLE I—DEFINITIONS
Capitalized terms that are not defined herein shall have the meanings as set forth

230
in the Mortgage. The terms defined herein include the plural as well as the singular and the singular as well as the plural.

"Act" shall mean the Rural Electrification Act of 1936, as amended.

"Advance" or "Advances" shall mean advances by RUS to Borrower pursuant to the terms and conditions of this Agreement.

"Agreement" shall mean this Loan Contract together with all schedules and exhibits and also any subsequent supplements or amendments.

"Business Day" shall mean any day that RUS is open for business.

"Contemporaneous Loan" shall mean any loan made to the Borrower, in any calendar year, plus 1/3 of the amount, if any, by which the Restricted Rentals of the Electric System exceed 2 percent of the Mortgagor's Equity; and

"Distributions" shall mean for the Borrower, in any calendar year, plus 1/3 of the amount, if any, by which the Restricted Rentals of the Electric System exceed 2 percent of the Mortgagor's Equity; and

"Event of Default" shall have the meaning as defined in Section [7.1].

"Equity" shall mean the Borrower's total margins and equities computed pursuant to RUS Accounting Requirements but excluding any Regulatory Created Assets.

"Electric System" shall have the meaning as defined in the Mortgage.

"Equity" shall mean the Borrower's total margins and equities computed pursuant to RUS Accounting Requirements but excluding any Regulatory Created Assets.

"Event of Default" shall have the meaning as defined in Section [7.1].

"Independent" when used with respect to any specified person or entity means such a person or entity who (1) is in fact independent, (2) does not have any direct financial interest or any material indirect financial interest in the Borrower or in any affiliate of the Borrower and (3) is not connected with the Borrower as an officer, employee, promoter, underwriter, trustee, partner, director or person performing similar functions.

"Interest Expense" shall mean the interest expense of the Borrower computed pursuant to RUS Accounting Requirements.

"Loan" shall mean the loan described in Article III which is being made pursuant to the RUS Commitment in furtherance of the objectives of the Act.

"Loan Documents" shall mean, collectively, this Agreement, the Mortgage and the Note.

"Long-Term Debt" shall mean the total of all amounts included in the long-term debt of the Borrower pursuant to RUS Accounting Requirements.

"Maturity Date" shall have the meaning as defined in the Note.

"Monthly Payment Date" shall have the meaning as defined in the Note.

"Mortgage" shall have the meaning as described in Schedule 1 hereto.

"Mortgaged Property" shall have the meaning as defined in the Mortgage.

"Net Utility Plant" shall mean the amount constituting the Net Utility Plant of the Borrower, less depreciation, computed in accordance with RUS Accounting Requirements.

"Note" shall mean a promissory note executed by the Borrower in the form of exhibit A hereto, and any note executed and delivered to RUS to refund, or in substitution for such a note.

"Operating DSC" or "ODSC" shall mean Operating Debt Service Coverage calculated as:

\[
ODSC = \frac{A + B + C}{D}
\]

Where:

All amounts are for the same calendar year and are computed pursuant to RUS Accounting Requirements and RUS form 7;

\( A \) = Depreciation and Amortization Expense of the Electric System;

\( B \) = Interest Expense on Total Long-Term Debt of the Electric System, except that such Interest Expense shall be increased by 1/2 of the amount, if any, by which the Restricted Rentals of the Electric System exceed 2 percent of the Mortgagor's Equity;

\( C \) = Patrons' capital & operating margins of the Electric System, (which equals operating revenue and patronage capital of Electric System operations, less total cost of electric service, including Interest Expense on Total Long-Term Debt of the Electric System) plus cash received from the retirement of patronage capital by suppliers of electric power and by lenders for credit extended for the Electric System; and

\( D \) = Debt service billed which equals the sum of all payments of principal and interest required to be made on account of Total Long-Term Debt of the Electric System during the calendar year, plus 1/3 of the amount, if any, by which Restricted Rentals of the
Pt. 1718, Subpt. C, App. A

Electric System exceed 2 percent of the Mortgagor’s Equity.

“Operating TIER” or “OTIER” shall mean Operating Times Interest Earned Ratio calculated as:

\[
\text{OTIER} = \frac{A + B}{A}
\]

Where:

A = Interest Expense on Total Long-Term Debt of the Electric System, except that such Interest Expense shall be increased by 1/3 of the amount, if any, by which Restricted Rentals of the Electric System exceed 2 percent of the Mortgagor’s Equity; and

B = Patronage capital & operating margins of the Electric System, (which equals operating revenue and patronage capital of Electric System operations, less total cost of electric service, including Interest Expense on Total Long-Term Debt of the Electric System) plus cash received from the retirement of patronage capital by suppliers of electric power and by lenders for credit extended for the Electric System.

“Payment Notice” shall mean a notice furnished by RUS to Borrower that indicates the precise amount of each payment of principal and interest and the total amount of each payment.

“Permitted Debt” shall have the meaning as defined in section [6.13].

“Prior Loan Contracts” shall have the meaning as defined in section 9.15.

“Regulatory Created Assets” shall mean the sum of any amounts properly recordable as unrecovered plant and regulatory study costs or as other regulatory assets, computed pursuant to RUS Accounting Requirements.

“RUS Accounting Requirements” shall mean any system of accounts prescribed by RUS Regulations as such RUS Accounting Requirements exist at the date of applicability thereof.

“RUS Commitment” shall have the meaning as defined in schedule 1 hereto.

“RUS Regulations” shall mean regulations of general applicability published by RUS from time to time as they exist at the date of applicability thereof, and shall also include any regulations of other Federal entities which RUS is required by law to implement.

“Special Construction Account” shall have the meaning as defined in section 5.21.

“Subsidiary” shall mean a corporation that is a subsidiary of the Borrower and subject to the Borrower’s control, as defined by RUS Accounting Requirements.

“Termination Date” shall have the meaning as defined in the Note.

“Times Interest Earned Ratio” (“TIER”) shall have the meaning provided in the Mortgage.

“Total Assets” shall mean an amount constituting the total assets of the Borrower as computed pursuant to RUS Accounting Requirements, but excluding any Regulatory Created Assets.

“Total Utility Plant” shall mean the amount constituting the total utility plant of the Borrower computed in accordance with RUS Accounting Requirements.

“Utility System” shall have the meaning as defined in the Mortgage.

ARTICLE II—REPRESENTATIONS AND WARRANTIES

Section 2.1. Representations and Warranties.

To induce RUS to make the Loan, and recognizing that RUS is relying hereon, the Borrower represents and warrants as follows:

(a) Organization; Power, Etc. The Borrower:

(i) is duly organized, validly existing, and in good standing under the laws of its state of incorporation; (ii) is duly qualified to do business and is in good standing in each jurisdiction in which the transaction of its business makes such qualification necessary; (iii) has all requisite corporate and legal power to own and operate its assets and to carry on its business and to enter into and perform the Loan Documents; (iv) has duly and lawfully obtained and maintained all licenses, certificates, permits, authorizations, approvals, and the like which are material to the conduct of its business or which may be otherwise required by law; and (v) is eligible to borrow from RUS.

(b) Authority. The execution, delivery and performance by the Borrower of this Agreement and the other Loan Documents and the performance of the transactions contemplated thereby have been duly authorized by all necessary corporate action and shall not violate any provision of law or of the Articles of Incorporation or By-Laws of the Borrower or result in a breach of, or constitute a default under, any agreement, indenture or other instrument to which the Borrower is a party or by which it may be bound.

(c) Consents. No consent, permission, authorization, order, or license of any governmental authority is necessary in connection with the execution, delivery, performance, or enforcement of the Loan Documents, except (i) such as have been obtained and are in full force and effect and (ii) such as have been disclosed on Schedule 1 hereto.

(d) Binding Agreement. Each of the Loan Documents is, or when executed and delivered shall be, the legal, valid, and binding obligation of the Borrower, enforceable in accordance with its terms, subject only to
limitations on enforceability imposed by applicable bankruptcy, insolvency, reorganization, moratorium, or similar laws affecting creditors’ rights generally.

(e) Compliance With Laws. The Borrower is in compliance in all material respects with all federal, state, and local laws, rules, regulations, ordinances, codes, and orders (collectively, “Laws”), the failure to comply with which could have a material adverse effect on the condition, financial or otherwise, operations, properties, or business of the Borrower, or on the ability of the Borrower to perform its obligations under the Loan Documents, except as the Borrower has disclosed on Schedule 1 attached hereto.

(f) Litigation. There are no pending legal, arbitration, or governmental actions or proceedings to which the Borrower is a party or to which any of its property is subject which, if adversely determined, could have a material adverse effect on the condition, financial or otherwise, operations, properties, profits or business of the Borrower, or on the ability of the Borrower to perform its obligations under the Loan Documents, and to the best of the Borrower’s knowledge, no such actions or proceedings are threatened or contemplated, except as the Borrower has disclosed to RUS in writing.

(g) Title to Property. As to property which is presently included in the description of Mortgaged Property, the Borrower holds good and marketable title to all of its real property and owns all of its personal property free and clear of any Lien except the Liens specifically identified on Schedule 2 attached hereto (the “Existing Liens”), and Permitted Encumbrances or Liens permitted under the Mortgage.

(h) Financial Statements; No Material Adverse Change; Etc. All financial statements submitted to RUS in connection with the application for the Loan or in connection with this Agreement fairly and fully present the financial condition of the Borrower and the results of the Borrower’s operations for the periods covered thereby and are prepared in accordance with RUS Accounting Requirements consistently applied. Since the dates thereof, there has been no material adverse change in the financial condition or operations of the Borrower. All budgets, projections, feasibility studies, and other documentation submitted by the Borrower to RUS are based upon assumptions that are reasonable and realistic, and as of the date hereof, no fact has come to light, and no event or transaction has occurred, which would cause any assumption made therein not to be reasonable or realistic.

(i) Principal Place of Business; Records. The principal place of business and chief executive office of the Borrower is at the address of the Borrower shown on Schedule 1 attached hereto.

(j) Location of Properties. All property owned by the Borrower is located in the counties identified in Schedule 1 hereto.

(k) Subsidiaries. The Borrower has no subsidiary, except as the Borrower has disclosed to RUS in writing.

(l) Defaults Under Other Agreements. The Borrower is not in default under any agreement or instrument to which it is a party or under which any of its properties are subject that is material to its financial condition, operations, properties, profits, or business.

(m) Survival. All representations and warranties made by the Borrower herein or made in any certificate delivered pursuant hereto shall survive the making of the Advances and the execution and delivery to RUS of the Note.

ARTICLE III—LOAN

Section 3.1. Advances

RUS agrees to make, and the Borrower agrees to request, on the terms and conditions of this Agreement, Advances from time to time in an aggregate principal amount not to exceed the RUS Commitment. On the Termination Date, RUS may stop advancing funds and limit the RUS Commitment to the amount advanced prior to such date. The obligation of the Borrower to repay the Advances shall be evidenced by the Note in the principal amount of the unpaid principal amount of the Advances from time to time outstanding. The Borrower shall give RUS written notice of the date on which each Advance is to be made.

Section 3.2. Interest Rate and Payment

The Note shall be payable and bear interest as follows:

(a) Payments and Amortization. Principal shall be amortized in accordance with the method stated in Schedule 1 hereto and more fully described in the form of Note attached hereto as Exhibit A.

(b) Application of Payments. All payments which the Borrower sends to RUS on any outstanding obligation owed to RUS shall be applied in the manner provided in the Borrower’s loan documents to which such payments relate and in a manner consistent with RUS policies, practices, and procedures for obligations that have been similarly classified by RUS.

(c) Electronic Funds Transfer. Except as otherwise prescribed by RUS, the Borrower shall make all payments on the Note utilizing electronic funds transfer procedures as specified by RUS.

(d) Fixed or Variable Rate. The Note shall bear interest at either a fixed or variable rate in accordance with the method stated in Schedule 1 hereto and as more particularly described in the form of Note attached hereto as Exhibit A.
Section 3.3. Prepayment

The Borrower has no right to prepay the Note in whole or in part except such rights, if any, as are expressly provided for in the Note. However, prepayment of the Note (and any penalties) shall be mandatory under Section [5.3] hereof if the Borrower has used a Contemporaneous Loan in order to qualify for the RUS Commitment, and later prepays the Contemporaneous Loan.

ARTICLE IV—CONDITIONS OF LENDING

Section 4.1. General Conditions

The obligation of RUS to make any Advance hereunder is subject to satisfaction of each of the following conditions precedent on or before the date of such Advance:

(a) Legal Matters. All legal matters incident to the consummation of the transactions hereby contemplated shall be satisfactory to counsel for RUS.

(b) Loan Documents. That RUS receive duly executed originals of this Agreement and the other Loan Documents.

(c) Authorization. That RUS receive evidence satisfactory to it that all corporate documents and proceedings of the Borrower necessary for duly authorizing the execution, delivery and performance of the Loan Documents have been obtained and are in full force and effect.

(d) Approvals. That RUS receive evidence satisfactory to it that all consents and approvals (including without limitation the consents referred to in Section [2.1(c)] of this Agreement) which are necessary for, or required as a condition of, the validity and enforceability of each of the Loan Documents have been obtained and are in full force and effect.

(e) Event of Default. That no Event of Default specified in Article VII and no event which, with the lapse of time or the notice and lapse of time specified in Article VII would become such an Event of Default, shall have occurred and be continuing, or shall have occurred after giving effect to the Advance on the books of the Borrower.

(f) Continuing Representations and Warranties. That the representations and warranties of the Borrower contained in this Agreement be true and correct on and as of the date of such Advance as though made on and as of such date.

(g) Opinion of Counsel. That RUS receive an opinion of counsel for the Borrower (who shall be acceptable to RUS) in form and content acceptable to RUS.

(h) Mortgage Filing. The Mortgage shall have been duly recorded as a mortgage on real property, including after-acquired real property, and duly filed, recorded or indexed as a security interest in personal property, including after acquired personal property, wherever RUS shall have requested, all in accordance with applicable law, and the Borrower shall have caused satisfactory evidence thereof to be furnished to RUS.

(i) Wholesale Power Contract. That the Borrower shall not be in default under the terms of, or contesting the validity of, any contract for sales for resale that has been pledged by any entity to RUS as security for the repayment of any loan made or guaranteed by RUS under the Act.

(j) Material Adverse Change. That there has occurred no material adverse change in the business or condition, financial or otherwise, of the Borrower and nothing has occurred which in the opinion of RUS materially and adversely affects the Borrower’s ability to meet its obligations hereunder.

(k) Requisitions. That the Borrower shall requisition all Advances by submitting its requisition to RUS in form and substance satisfactory to RUS. Requisitions shall be made only for the purpose(s) set forth herein. The Borrower agrees to apply the proceeds of the Advances in accordance with its loan application with such modifications as may be mutually agreed.

(l) Flood Insurance. That for any Advance used in whole or in part to finance the construction or acquisition of any building in any area identified by the Secretary of Housing and Urban Development pursuant to the Flood Disaster Protection Act of 1973 (the "Flood Insurance Act") or any rules, regulations or orders issued to implement the Flood Insurance Act ("Rules") as any area having special flood hazards, or to finance any facilities or materials to be located in any such building, or in any building owned or occupied by the Borrower and located in such a flood hazard area, the Borrower has submitted evidence, in form and substance satisfactory to RUS, or RUS has otherwise determined, that (i) the community in which such area is located is then participating in the national flood insurance program, as required by the Flood Insurance Act and any Rules, and (ii) the Borrower has obtained flood insurance coverage with respect to such building and contents as may then be required pursuant to the Flood Insurance Act and any Rules.

(m) Compliance With Loan Contract and Mortgage. That the Borrower is in material compliance with all provisions of this Agreement and the Mortgage.
ARTICLE V—AFFIRMATIVE COVENANTS

Section 5.1 Generally

Unless otherwise agreed to in writing by RUS, while this Agreement is in effect, whether or not any Advance is outstanding, the Borrower agrees to duly observe each of the affirmative covenants contained in this Article:

Section 5.2 Annual Certificates

(a) Performance Under Loan Documents. The Borrower shall duly observe and perform all of its obligations under each of the Loan Documents.

(b) Annual Certification. Within ninety (90) days after the close of each calendar year, commencing with the year following the year in which the initial Advance hereunder shall have been made, the Borrower shall deliver to RUS a written statement signed by its General Manager, stating that during such year the Borrower has fulfilled all of its obligations under the Loan Documents throughout such year in all material respects or, if there has been a default in the fulfillment of any such obligations, specifying each such default known to said person and the nature and status thereof.

Section 5.3 Simultaneous Prepayment of Contemporaneous Loans

If the Borrower shall at any time prepay in whole or in part the Contemporaneous Loan described on Schedule 1, the Borrower shall prepay the RUS Note correspondingly in order to maintain the ratio that the Contemporaneous Loan bears to the RUS Commitment. If the RUS Note calls for a prepayment penalty or premium, such amount shall be paid but shall not be used in computing the amount needed to be paid to RUS under this section to maintain such ratio. In the case of Contemporaneous Loans and RUS Notes existing prior to the date of this Agreement under previous agreements, prepayments shall be treated as if governed by this section. Provided, however, in all cases prepayments associated with refinancing or refunding a Contemporaneous Loan pursuant to Article II of the Mortgage are not considered to be prepayments for purposes of this Agreement if they satisfy each of the following requirements:

(a) Principal. The principal amount of such refinancing or refunding loan is not less than the amount of loan principal being refinanced; and

(b) Weighted Average Life. The weighted average life of the refinancing or refunding loan is materially equal to the weighted average remaining life of the loan being refinanced.

Section 5.4 Rates to Provide Revenue Sufficient to Meet Coverage Ratios Requirements

(a) Prospective Requirement. The Borrower shall design and implement rates for utility service furnished by it to provide sufficient revenue (along with other revenue available to the Borrower in the case of TIER and DSC) (i) to pay all fixed and variable expenses when and as due, (ii) to provide and maintain reasonable working capital, and (iii) to maintain, on an annual basis, the Coverage Ratios. In designing and implementing rates under this paragraph, such rates should be capable of producing at least enough revenue to meet the requirements of this paragraph under the assumption that average weather conditions in the Borrower’s service territory shall prevail in the future, including average Utility System damage and outages due to weather and the related costs.

(b) Retrospective Requirement. The average Coverage Ratios achieved by the Borrower in the 2 best years out of the 3 most recent calendar years must be not less than any of the following:

<table>
<thead>
<tr>
<th>Ratio</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>TIER</td>
<td>1.5</td>
</tr>
<tr>
<td>DSC</td>
<td>1.25</td>
</tr>
<tr>
<td>OTIER</td>
<td>1.1</td>
</tr>
<tr>
<td>ODSC</td>
<td>1.1</td>
</tr>
</tbody>
</table>

(c) Prospective Notice of Change in Rates. The Borrower shall give thirty (30) days prior written notice of any proposed change in its general rate structure to RUS if RUS has requested in writing that it be notified in advance of such changes.

(d) Routine Reporting of Coverage Ratios. Promptly following the end of each calendar year, the Borrower shall report, in writing, to RUS the TIER, Operating TIER, DSC and Operating DSC levels which were achieved during that calendar year.

(e) Reporting Non-achievement of Retrospective Requirement. If the Borrower fails to achieve the average levels required by paragraph (b) of this section, it must promptly notify RUS in writing to that effect.

(f) Corrective Plans. Within 30 days of sending a notice to RUS under paragraph (e) of this section, or of being notified by RUS, whichever is earlier, the Borrower in consultation with RUS, shall provide a written plan satisfactory to RUS setting forth the actions that shall be taken to achieve the required Coverage Ratios on a timely basis.

(g) Noncompliance. Failure to design and implement rates pursuant to paragraph (a) of this section and failure to develop and implement the plan called for in paragraph (f) of this section shall constitute an Event of Default under this Agreement in the event that RUS so notifies the Borrower to that effect under section (7.1(d)) of this Agreement.

235
Section 5.5. Depreciation Rates
The Borrower shall adopt as its depreciation rates only those which have been previously approved for the Borrower by RUS.

Section 5.6. Property Maintenance
The Borrower shall maintain and preserve its Utility System in compliance with the provisions of the Mortgage, RUS Regulations and all applicable laws.

Section 5.7. Financial Books
The Borrower shall at all times keep, and safely preserve, proper books, records and accounts in which full and true entries shall be made of all of the dealings, business and affairs of the Borrower and its Subsidiaries, in accordance with any applicable RUS Accounting Requirements.

Section 5.8. Rights of Inspection
The Borrower shall afford RUS, through its representatives, reasonable opportunity, at all times during business hours and upon prior notice, to have access to and the right to inspect the Utility System, any other property encumbered by the Mortgage, and any or all books, records, accounts, invoices, contracts, leases, payrolls, canceled checks, statements and other documents and papers of every kind belonging to or in the possession of the Borrower or in anyway pertaining to its property or business, including its Subsidiaries, if any, and to make copies or extracts therefrom.

Section 5.9. Area Coverage
(a) The Borrower shall make diligent effort to extend electric service to all unserved persons within the service area of the Borrower who (i) desire such service and (ii) meet all reasonable requirements established by the Borrower as a condition of such service.
(b) If economically feasible and reasonable considering the cost of providing such service and/or the effects on consumers' rates, such service shall be provided, to the maximum extent practicable, at the rates and minimum charges established in the Borrower's rate schedules, without the payment of such persons, other than seasonal or temporary consumers, of a contribution in aid of construction. A seasonal consumer is one that demands electric service only during certain seasons of the year. A temporary consumer is a seasonal or year-round consumer that demands electric service over a period of less than five years.
(c) The Borrower may assess contributions in aid of construction provided such assessments are consistent with this section.

Section 5.10. Real Property Acquisition
In acquiring real property, the Borrower shall comply with all material respects with the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (the "Uniform Act"), as amended by the Uniform Relocation Act Amendments of 1987, and 49 CFR part 24, referenced by 7 CFR part 21, to the extent the Uniform Act is applicable to such acquisition.

Section 5.11. "Buy American" Requirements
The Borrower shall use or cause to be used in connection with the expenditures of funds advanced on account of the Loan only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States or any eligible country, and only such manufactured articles, materials, and supplies as have been manufactured in the United States or any eligible country substantially all from articles, materials, and supplies mined, produced or manufactured, as the case may be, in the United States or any eligible country, except to the extent RUS shall determine that such use shall be impracticable or that the cost thereof shall be unreasonable. For purposes of this section, an "eligible country" is any country that applies with respect to the United States an agreement ensuring reciprocal access for United States products and services and United States suppliers to the markets of that country, as determined by the United States Trade Representative.

Section 5.12. Power Requirements Studies
The Borrower shall prepare and use power requirements studies of its electric loads and future energy and capacity requirements in conformance with RUS Regulations.

Section 5.13. Long Range Engineering Plans and Construction Work Plans
The Borrower shall develop, maintain and use up-to-date long-range engineering plans and construction work plans in conformance with RUS Regulations.

The Borrower shall use design standards, construction standards, and lists of acceptable materials in conformance with RUS Regulations.

Section 5.15. Plans and Specifications
The Borrower shall submit plans and specifications for construction to RUS for review and approval, in conformance with RUS Regulations, if the construction will be financed in whole or in part by a loan made or guaranteed by RUS.
Section 5.16. Standard Forms of Construction Contracts, and Engineering and Architectural Services Contracts

The Borrower shall use the standard forms of contracts promulgated by RUS for construction, procurement, engineering services and architectural services in conformance with RUS Regulations, if the construction, procurement, or services are being financed in whole or in part by a loan being made or guaranteed by RUS.

Section 5.17. Contract Bidding Requirements

The Borrower shall follow RUS contract bidding procedures in conformance with RUS Regulations when contracting for construction or procurement financed in whole or in part by a loan made or guaranteed by RUS.

Section 5.18. Nondiscrimination

(a) Equal Opportunity Provisions in Construction Contracts. The Borrower shall incorporate or cause to be incorporated into any construction contract, as defined in Executive Order 11246 of September 24, 1965 and implementing regulations, which is paid for in whole or in part with funds obtained from RUS or borrowed on the credit of the United States pursuant to a grant, contract, loan, insurance or guarantee, or undertaken pursuant to any RUS program involving such grant, contract, loan, insurance or guarantee, or undertaken pursuant to any RUS program involving such grant, contract, loan, insurance or guarantee, the equal opportunity provisions set forth in Exhibit B hereto entitled Equal Opportunity Contract Provisions.

(b) Equal Opportunity Contract Provisions Also Bind the Borrower. The Borrower further agrees that it shall be bound by such equal opportunity clause in any federally assisted construction work which it performs itself or through the permanent work force directly employed by an agency of government.

(c) Sanctions and Penalties. The Borrower agrees that it shall cooperate actively with RUS and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules, regulations and relevant orders of the Secretary of Labor, that it shall furnish RUS and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it shall otherwise assist the administering agency in the discharge of RUS's primary responsibility for securing compliance.

The Borrower further agrees that it shall refrain from entering into any contract or contract modification subject to Executive Order 11246 with a contractor debarred from, or who has not demonstrated eligibility for, Government contracts and federally assisted construction contracts pursuant to Part II, Subpart D of Executive Order 11246 and shall carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by RUS or the Secretary of Labor pursuant to Part II, Subpart D of Executive Order 11246. In addition, the Borrower agrees that if it fails or refuses to comply with these undertakings RUS may cancel, terminate or suspend in whole or in part this contract, may refrain from extending any further assistance under any of its programs subject to Executive Order 11246 until satisfactory assurance of future compliance has been received from such Borrower, or may refer the case to the Department of Justice for appropriate legal proceedings.

Section 5.19. Financial Reports

The Borrower shall cause to be prepared and furnished to RUS a full and complete annual report of its financial condition and of its operations in form and substance satisfactory to RUS, and shall furnish RUS a full and complete annual report of its financial condition and of its operations in form and substance satisfactory to RUS and accompanied by a report of such audit in form and substance satisfactory to RUS. The Borrower shall also furnish to RUS from time to time such other reports concerning the financial condition or operations of the Borrower, including its Subsidiaries, as RUS may reasonably request or RUS Regulations require.

Section 5.20. Miscellaneous Reports and Notices

The Borrower shall furnish to RUS:

(a) Notice of Default. Promptly after becoming aware thereof, notice of: (i) the occurrence of any default; and (ii) the receipt of any notice given pursuant to the Mortgage with respect to the occurrence of any event which with the giving of notice or the passage of time, or both, could become an “Event of Default” under the Mortgage.

(b) Notice of Non-Environmental Litigation. Promptly after the commencement thereof, notice of the commencement of all actions, suits or proceedings before any court, arbitrator, or governmental department, commission, board, bureau, agency, or instrumentality affecting the Borrower which, if adversely determined, could have a material adverse effect on the condition, financial or otherwise, operations, properties or business of the Borrower, or on the ability of the Borrower to perform its obligations under the Loan Documents.

(c) Notice of Environmental Litigation. Without limiting the provisions of Section 5.20(b) above, promptly after receipt thereof, notice of the receipt of all pleadings, orders, complaints, indictments, or other communications alleging a condition that may require the Borrower to undertake or to contribute to a cleanup or other response under laws relating to environmental protection, or which seek penalties, damages, injunctive

Rural Utilities Service, USDA
Pt. 1718, Subpt. C, App. A

237
relief, or criminal sanctions related to alleged violations of such laws, or which claim personal injury or property damage to any person as a result of environmental factors or conditions for which the Borrower is not fully covered by insurance, or which, if adversely determined, could have a material adverse effect on the condition, financial or otherwise, operations, properties or business of the Borrower, or on the ability of the Borrower to perform its obligations under the Loan Documents.

(d) Notice of Change of Place of Business. Promptly in writing, notice of any change in location of its principal place of business or the office where its records concerning accounts and contract rights are kept.

(e) Regulatory and Other Notices. Promptly after receipt thereof, copies of any notices or other communications received from any governmental authority with respect to any matter or proceeding which could have a material adverse effect on the condition, financial or otherwise, operations, properties, or business of the Borrower, or on the ability of the Borrower to perform its obligations under the Loan Documents.

(f) Material Adverse Change. Promptly, notice of any matter which has resulted or may result in a material adverse change in the condition, financial or otherwise, operations, properties, or business of the Borrower, or the ability of the Borrower to perform its obligations under the Loan Documents.

(g) Other Information. Such other information regarding the condition, financial or otherwise, operations of the Borrower as RUS may, from time to time, reasonably request.

Section 5.21. Special Construction Account

The Borrower shall hold all moneys advanced to it by RUS hereunder in trust for RUS and shall deposit such moneys promptly after the receipt thereof in a bank or banks which meet the requirements of Section 6.7 of this Agreement. Any account (hereinafter called “Special Construction Account”) in which any such moneys shall be deposited shall be insured by the Federal Deposit Insurance Corporation or other federal agency acceptable to RUS and shall be designated by the corporate name of the Borrower followed by the words “Trustee, Special Construction Account.” Moneys in any Special Construction Account shall be used solely for the construction and operation of the Utility System and may be withdrawn only upon checks, drafts, or orders signed on behalf of the Borrower and countersigned by an executive officer thereof.

Section 5.22. Additional Affirmative Covenants

The Borrower also agrees to comply with any additional affirmative covenant(s) identified in Schedule 1 hereto.
Event of Default, or any occurrence which with the passage of time or giving of notice would be an Event of Default, occurs and is continuing and RUS requests the Borrower to terminate the employment of any such manager or person exercising comparable authority, or RUS requests the Borrower to terminate any contract for operating the Utility System or the Electric System, the Borrower shall do so within thirty (30) days after the date of such notice. All contracts in respect of the employment of any such manager or person exercising comparable authority, or for the operation of the Utility System or the Electric System, shall contain provisions to permit compliance with the foregoing covenants.

Section 6.5. Limitations on Certain Types of Contracts

Without the prior approval of RUS in writing, the Borrower shall not enter into any of the following contracts:

(a) Construction Contracts. Any contract for construction or procurement or for architectural and engineering services in connection with its Electric System if the project is financed or will be financed, in whole or in part, by a RUS loan or loan guarantee;

(b) Large retail power contracts. Any contract to sell electric power and energy for periods exceeding two (2) years if the kWh sales or kW demand for any year covered by such contract shall exceed 25 percent of the Borrower's total kWh sales or maximum kW demand for the year immediately preceding the execution of such contract;

(c) Wholesale power contracts. Any contract to sell electric power or energy for resale and any contract to purchase electric power or energy that, in either case, has a term exceeding two (2) years;

(d) Power supply arrangements. Any interconnection agreement, interchange agreement, wheeling agreement, pooling agreement or similar power supply arrangement that has a term exceeding two (2) years;

(e) System management and maintenance contracts. Any contract for the management and operation of all or substantially all of its Electric System; or

(f) Other contracts. Any contracts of the type described on Schedule 3.

Section 6.6. Limitations on Mergers and Sale, Lease or Transfer of Capital Assets

(a) The Borrower shall not consolidate with, or merge, or sell all or substantially all of its business or assets, to another entity or person except to the extent it is permitted to do so under the Mortgage. The exception contained in this paragraph (a) is subject to the additional limitation set forth in paragraph (b) of this section.

(b) The Borrower shall not, without the written approval of the Administrator, voluntarily or involuntarily sell, convey or dispose of any portion of its business or assets (including, without limitation, any portion of its franchise or service territory) to another entity or person if such sale, conveyance or disposition could reasonably be expected to reduce the Borrower's existing or future requirements for energy or capacity being furnished to the Borrower under any wholesale power contract which has been pledged as security to RUS.

Section 6.7. Limitations on Using non-FDIC Insured Depositories

Without the prior written approval of RUS, the Borrower shall not place the proceeds of the Loan or any loan which has been made or guaranteed by RUS in the custody of any bank or other depository that is not insured by the Federal Deposit Insurance Corporation or other federal agency acceptable to RUS.

Section 6.8. Limitation on Distributions

Without the prior written approval of RUS, the Borrower shall not in any calendar year make any Distributions (exclusive of any Distributions to the estates of deceased natural patrons) to its members, stockholders or consumers except as follows:

(a) Equity above 30%. If, after giving effect to any such Distribution, the Equity of the Borrower shall be greater than or equal to 30% of its Total Assets; or

(b) Equity above 20%. If, after giving effect to any such Distribution, the aggregate of all Distributions made during the calendar year when added to such Distribution shall be less than or equal to 25% of the prior year's margins.

Provided however, that in no event shall the Borrower make any Distributions if there is unpaid when due any installment of principal of (premium, if any) or interest on its Notes, if the Borrower is otherwise in default hereunder or if, after giving effect to any such Distribution, the Borrower's current and accrued assets would be less than its current and accrued liabilities.

Section 6.9. Limitations on Loans, Investments and Other Obligations

The Borrower shall not make any loan or advance to, or make any investment in, or purchase or make any commitment to purchase any stock, bonds, notes or other securities of, or guaranty, assume or otherwise become obligated or liable with respect to the obligations of, any other person, firm or corporation, except as permitted by the Act and RUS Regulations.
The Borrower shall not file with or submit for approval of regulatory bodies any proposed depreciation rates which are inconsistent with RUS Regulations.

Section 6.11. Historic Preservation

The Borrower shall not, without approval in writing by RUS, use any Advance to construct any facilities which shall involve any district, site, building, structure or object which is included in, or eligible for inclusion in, the National Register of Historic Places maintained by the Secretary of the Interior pursuant to the Historic Sites Act of 1935 and the National Historic Preservation Act of 1966.

Section 6.12. Rate Reductions

Without the prior written approval of RUS, the Borrower shall not decrease its rates if it has failed to achieve all of the Coverage Ratios for the calendar year prior to such reduction.

Section 6.13. Limitations on Additional Indebtedness

Except as expressly permitted by Article II of the Mortgage and subject to the further limitations expressed in the next section, the Borrower shall not incur, assume, guarantee or otherwise become liable in respect of any debt for borrowed money and Restricted Rentals (including Subordinated Indebtedness) other than the following: ("Permitted Debt")

(a) Additional Notes issued in compliance with Article II of the Mortgage;
(b) Purchase money indebtedness in non-Utility System property, in an amount not exceeding 30% of Net Utility Plant;
(c) Restricted Rentals in an amount not to exceed 5% of Equity during any 12 consecutive calendar month period;
(d) Unsecured lease obligations incurred in the ordinary course of business except Restricted Rentals;
(e) Unsecured indebtedness for borrowed money, except when the aggregate amount of such indebtedness exceeds 15% of Net Utility Plant and after giving effect to such unsecured indebtedness the Borrower’s Equity is less than 30% of its Total Assets;
(f) Debt represented by dividends declared but not paid; and
(g) Subordinated Indebtedness approved by RUS.

Provided, however, that the Borrower may incur Permitted Debt without the consent of RUS only so long as there exists no Event of Default hereunder and there has been no continuing occurrence which with the passage of time and giving of notice could become an Event of Default hereunder.

Provided, Further, by executing this Agreement any consent of RUS that the Borrower would otherwise be required to obtain under this Section is hereby deemed to be given or waived by RUS by operation of law to the extent, but only to the extent, that to impose such a requirement of RUS consent would clearly violate federal laws or RUS Regulations.

Section 6.14. Limitations on Issuing Additional Indebtedness Secured Under the Mortgage

(a) The Borrower shall not issue any Additional Notes under the Mortgage to finance Eligible Property Additions without the prior written consent of RUS unless the following additional requirements are met in addition to the requirements set forth in the Mortgage for issuing Additional Notes:

1. The weighted average life of the loan evidenced by such Notes does not exceed the weighted average of the expected remaining useful lives of the assets being financed;

2. The principal of the loan evidenced by such Notes is amortized at a rate that shall yield a weighted average life that is greater than the weighted average life that would result from level payments of principal and interest; and

3. The principal of the loan being evidenced by such Notes has a maturity of not less than 5 years.

(b) The Borrower shall not issue any Additional Notes under the Mortgage to refund or refinance Notes without the prior written consent of RUS unless, in addition to the requirements set forth in the Mortgage for issuing Refunding or Refinancing Notes, the weighted average life of any such Refunding or Refinancing Notes is not greater than the weighted average remaining life of the Notes being refinanced.

(c) Any request for consent from RUS under this section, shall be accompanied by a certificate of the Borrower’s manager substantially in the form attached to this Agreement as Exhibit C-1 in the case of Notes being issued under Section [2.01] of the Mortgage and C-2 in the case of Notes being issued under Section [2.02] of the Mortgage.

Section 6.15. Impairment of Contracts Pledged to RUS

The Borrower shall not materially breach any obligation to be paid or performed by the Borrower on any contract, or take any action which is likely to materially impair the value of any contract, which has been pledged as security to RUS by the Borrower or any other entity.

Section 6.16. Additional Negative Covenants

The Borrower also agrees to comply with any additional negative covenant(s) identified in Schedule 1 hereto.
Rural Utilities Service, USDA

ARTICLE VII—DEFAULT

Section 7.1. Events of Default

The following shall be Events of Default under this Agreement:

(a) Representations and Warranties. Any representation or warranty made by the Borrower in Article II hereof or any certificate furnished to RUS hereunder or under the Mortgage shall prove to have been incorrect in any material respect at the time made and shall at the time in question be untrue or incorrect in any material respect and remain uncured;

(b) Payment. Default shall be made in the payment of or on account of interest on or principal of the Note when and as the same shall be due and payable, whether by acceleration or otherwise, which shall remain unsatisfied for five (5) Business Days;

(c) Borrowing Under the Mortgage in Violation of the Loan Contract. Default by the Borrower in the observance or performance of any covenant or agreement contained in Section 6.14 of this Agreement;

(d) Other Covenants. Default by the Borrower in the observance or performance of any other covenant or agreement contained in any of the Loan Documents, which shall remain unmended for 30 calendar days after written notice thereof shall have been given to the Borrower by RUS;

(e) Corporate Existence. The Borrower shall forfeit or otherwise be deprived of its corporate charter, franchises, permits, easements, consents or licenses required to carry on any material portion of its business;

(f) Other Obligations. Default by the Borrower in the payment of any obligation, whether direct or contingent, for borrowed money or in the performance or observance of the terms of any instrument pursuant to which such obligation was created or securing such obligation;

(g) Bankruptcy. A court having jurisdiction in the premises shall enter a decree or order for relief in respect of the Borrower in an involuntary case under any applicable bankruptcy, insolvency or other similar law now or hereafter in effect, or appointing a receiver, liquidator, assignee, custodian, trustee, sequestrator or similar official, or ordering the winding up or liquidation of its affairs, and such decree or order shall remain unstayed and in effect for a period of ninety (90) consecutive days or the Borrower shall commence a voluntary case under any applicable bankruptcy, insolvency or other similar law now or hereafter in effect, or under any such law, or consent to the appointment or taking possession by a receiver, liquidator, assignee, custodian or trustee, of a substantial part of its property, or make any general assignment for the benefit of creditors; and

(h) Dissolution or Liquidation. Other than as provided in the immediately preceding subsection, the dissolution or liquidation of the Borrower, or failure by the Borrower promptly to forestall or remove any execution, garnishment or attachment of such consequence as shall impair its ability to continue its business or fulfill its obligations and such execution, garnishment or attachment shall not be vacated within 30 days.

The term “dissolution or liquidation of the Borrower”, as used in this subsection, shall not be construed to include the cessation of the corporate existence of the Borrower resulting either from a merger or consolidation of the Borrower into or with another corporation following a transfer of all or substantially all its assets as an entirety, under the conditions permitting such actions.

ARTICLE VIII—REMEDIES

Section 8.1. Generally

Upon the occurrence of an Event of Default, then RUS may pursue all rights and remedies available to RUS that are contemplated by this Agreement or the Mortgage in the manner, upon the conditions, and with the effect provided in this Agreement or the Mortgage, including, but not limited to, a suit for specific performance, injunctive relief, or damages. Nothing herein shall limit the right of RUS to pursue all rights and remedies available to a creditor following the occurrence of an Event of Default listed in Article VII hereof. Each right, power and remedy of RUS shall be cumulative and concurrent, and recourse to one or more rights or remedies shall not constitute a waiver of any other right, power or remedy.

Section 8.2. Suspension of Advances

In addition to the rights, powers and remedies referred to in the immediately preceding section, RUS may, in its absolute discretion, suspend making Advances hereunder if (i) any Event of Default, or any occurrence which with the passage of time or giving of notice would be an Event of Default, occurs and is continuing; (ii) there has occurred a change in the business or condition, financial or otherwise, of the Borrower which in the opinion of RUS materially and adversely affects the Borrower’s ability to meet its obligations under the Loan Documents, or (iii) RUS is authorized to so do under RUS Regulations.

ARTICLE IX—MISCELLANEOUS

Section 9.1. Notices

All notices, requests and other communications provided for herein including, without limitation, any modifications of, or waivers, requests or consents under, this Agreement shall be given or made in writing (including, without limitation, by telecopy) and delivered to the intended recipient at
the “Address for Notices” specified below; or, as to any party, at such other address as shall be designated by such party in a notice to each other party. Except as otherwise provided in this Agreement, all such communications shall be deemed to have been duly given when transmitted by telecopier or personally delivered or, in the case of a mailed notice, upon receipt, in each case given or addressed as provided for herein. The Address for Notices of the respective parties are as follows:

Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250-1500
Fax: (202) xxx-xxxx
Attention: [Administrator]
The Borrower:
The address set forth in Schedule 1 hereto

Section 9.2. Expenses

To the extent allowed by law, the Borrower shall pay all costs and expenses of RUS, including reasonable fees of counsel, incurred in connection with the enforcement of the Loan Documents or with the preparation for such enforcement if RUS has reasonable grounds to believe that such enforcement may be necessary.

Section 9.3. Late Payments

If any payment to be made by the Borrower hereunder shall become due on a day which is not a Business Day, such payment shall be made on the next succeeding Business Day and such extension of time shall be included in computing any interest in respect of such payment.

Section 9.4. Filing Fees

To the extent permitted by law, the Borrower agrees to pay all expenses of RUS (including the fees and expenses of its counsel) in connection with the filing or recording of all financing statements and instruments as may be required by RUS in connection with this Agreement, including, without limitation, all documentary stamps, recording and transfer taxes and other costs and taxes incident to recording of any document or instrument in connection herewith. Borrower agrees to save harmless and indemnify RUS from and against any liability resulting from the failure to pay any required documentary stamps, recording and transfer taxes, recording costs, or any other expenses incurred by RUS in connection with this Agreement. The provisions of this subsection shall survive the execution and delivery of this Agreement and the payment of all other amounts due hereunder or on the Note.

Section 9.5. No Waiver

No failure on the part of RUS to exercise, and no delay in exercising, any right hereunder shall operative as a waiver thereof or shall any single or partial exercise by RUS of any right hereunder preclude any other or further exercise thereof or the exercise of any other right.

Section 9.6. Governing Law

EXCEPT TO THE EXTENT GOVERNED BY APPLICABLE FEDERAL LAW, THE LOAN DOCUMENTS SHALL BE DEEMED TO BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE IN WHICH THE BORROWER IS INCORPORATED.

Section 9.7. Holiday Payments

If any payment to be made by the Borrower hereunder shall become due on a day which is not a Business Day, such payment shall be made on the next succeeding Business Day and such extension of time shall be included in computing any interest in respect of such payment.

Section 9.8. Rescission

The Borrower may elect not to borrow the RUS Commitment in which event RUS shall release the Borrower from its obligations hereunder, provided the Borrower complies with such terms and conditions as RUS may impose for such release and provided also that if the Borrower has any remaining obligations to RUS for loans made or guaranteed by RUS under any Prior Loan Contracts, RUS may, under Section [9.15] of this Loan Contract, withhold such release until all such obligations have been satisfied and discharged.

Section 9.9. Successors and Assigns

This Agreement shall be binding upon and inure to the benefit of the Borrower and RUS and their respective successors and assigns, except that the Borrower may not assign or transfer its rights or obligations thereunder without the prior written consent of RUS.

Section 9.10. Complete Agreement; Amendments

Subject to RUS Regulations, this Agreement and the other Loan Documents are intended by the parties to be a complete and final expression of their agreement. However, RUS reserves the right to waive its
rights to compliance with any provision of this Agreement and the other Loan Documents. No amendment, modification, or waiver of any provision hereof or thereof, and no consent to any departure of the Borrower herefrom or therefrom, shall be effective unless approved in writing by RUS in the form of either a RUS Regulation or other writing signed by or on behalf of RUS, and then such waiver or consent shall be effective only in the specific instance and for the specific purpose for which given.

Section 9.11. Headings

The headings and sub-headings contained in the titling of this Agreement are intended to be used for convenience only and do not constitute part of this Agreement.

Section 9.12. Severability

If any term, provision or condition, or any part thereof, of this Agreement or the Mortgage shall for any reason be found or held invalid or unenforceable by any governmental agency or court of competent jurisdiction, such invalidity or unenforceability shall not affect the remainder of such term, provision or condition nor any other term, provision or condition, and this Agreement, the Note, and the Mortgage shall survive and be construed as if such invalid or unenforceable term, provision or condition had not been contained therein.

Section 9.13. Right of Setoff

Upon the occurrence and during the continuance of any Event of Default, RUS is hereby authorized at any time and from time to time, without prior notice to the Borrower, to exercise rights of setoff or recoupment and apply any and all amounts held or hereafter held, by RUS or owed to the Borrower or for the credit or account of the Borrower against any and all of the obligations of the Borrower now or hereafter existing hereunder or under the Note. RUS agrees to notify the Borrower promptly after any such setoff or recoupment and the application thereof, provided that the failure to give such notice shall not affect the validity of such setoff, recoupment or application. The rights of RUS under this section are in addition to any other rights and remedies (including other rights of setoff or recoupment) which RUS may have. Borrower waives all rights of setoff, deduction, recoupment or counterclaim.

Section 9.14. Schedules and Exhibits

Each Schedule and Exhibit attached hereto and referred to herein is each an integral part of this Agreement.

Section 9.15. Prior Loan Contracts

It is understood and agreed that with respect to all loan agreements previously entered into by and between RUS and the Borrower (hereinafter being referred to as “Prior Loan Contracts”) the Borrower shall be required, after the date hereof, to meet affirmative and negative covenants as set forth in this Agreement rather than those set forth in the Prior Loan Contracts. In addition, any remaining obligation of RUS to make additional advances on promissory notes of the Borrower that have been previously delivered to RUS under Prior Loan Contracts shall, after the date hereof, be subject to the conditions set forth in this Agreement. In the event of any conflict between any provision set forth in a Prior Loan Contract and any provision in this Agreement, the requirements as set forth in this Agreement shall apply. Nothing in this section shall, however, eliminate or modify any special condition, special affirmative covenant or special negative covenant, if any, unless specifically agreed to in writing by RUS.

Section 9.16. Authority of Representatives of RUS

In the case of any consent, approval or waiver from RUS that is required under this Agreement or any other Loan Document, such consent, approval or waiver must be in writing and signed by an authorized RUS representative to be effective. As used in this section, “authorized RUS representative” means the Administrator of RUS, and also means a person to whom the Administrator has officially delegated specific or general authority to take the action in question.

Section 9.17. Term

This Agreement shall remain in effect until one of the following two events has occurred:

(a) The Borrower and RUS replace this Agreement with another written agreement;

(b) All of the Borrower’s obligations under the prior loan contracts and this Agreement have been discharged and paid.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed as of the day and year first above written.

SCHEDULE 1
[citations subject to change]
1. The purpose of this loan is ___________ and such other purposes that RUS may agree to in writing in order to carry out the purposes of the Rural Electrification Act.

2. The Mortgage shall mean the Restated Mortgage and Security Agreement, dated as of ___________. between the Borrower and RUS, as it may have been or shall be supplemented, amended, consolidated, or restated from time to time.

3. The governmental authority referred to in Section [2.1(c)] is ___________.

4. The exception being taken to the representations in Section [2.1(e)] concerning material compliance with laws is as follows:

5. The litigation referred to in Section [2.1(f)] is described as follows:

6. The date of the Borrower’s financial information referred to in Section [2.1(h)] is ___________.

7. The principal place of business of the Borrower referred to in Section [2.1(i)] is ___________.

8. All of the property of the Borrower is located in the counties of ___________.

9. The subsidiary (or subsidiaries) referred to in Section [2.1(j)] is (are):

10. The Contemporaneous Loan referred to in Section [5.3] is described as follows:

Lender: ____________________________
Amount: ____________________________
Year of Final Maturity: _____________

11. The RUS Commitment referred to in the definitions means a loan in the principal amount of $ ___________, which is being made by RUS to the Borrower at the ___________. Harshship Rate (CHECK ONE) pursuant to the Rural Electrification Act and RUS Regulations.

12. Amortization of Advance shall be based upon the method indicated below:

   ___________ level principal
   ___________ level debt service
   ___________ other

13. The SPECIAL condition(s) referred to in Section [4.2] is (are):

14. The additional AFFIRMATIVE covenant(s) referred to in Section [5.22] is (are) as follows:

15. The additional NEGATIVE covenant(s) referred to in Section [6.16] is (are) as follows:

16. The address of the Borrower referred to in Section [9.1] is ___________.

**SCHEDULE 2—EXISTING LIENS**

The Existing Liens referred to in Section [2.1(g)] are as follows:

**SCHEDULE 3—ADDITIONAL CONTRACTS**

The additional contracts referred to in Section [6.5(f)] are described as follows:

**EXHIBIT A—FORM OF PROMISSORY NOTE**

**EXHIBIT B—EQUAL OPPORTUNITY CONTRACT PROVISIONS**

During the performance of this contract, the contractor agrees as follows:

(a) The contractor shall not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The contractor shall take affirmative action to ensure that applicants are employed and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion or transfer, recruitment or recruitment advertising, layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(b) The contractor shall, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants shall receive consideration for employment without regard to race, color, religion, sex or national origin.

(c) The contractor shall send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers’ representative of the contractor’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(d) The contractor shall comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations and relevant orders of the Secretary of Labor.

(e) The contractor shall furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by the rules, regulations and orders of the Secretary of Labor, or pursuant thereto, and shall permit access to his books, records and accounts by the administering agency and
the Secretary of Labor for purposes of investigation to ascertain compliances with such rules, regulations and orders. 

(i) In the event of the contractor's non-compliance with the non-discrimination clauses of this contract or with any of the said rules, regulations or orders, this contract may be cancelled, terminated or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in said Executive Order or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.

(g) The contractor shall include the provisions of paragraphs (a) through (g) in every subcontract or purchase order unless exempted by rules, regulations or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246, dated September 24, 1965, so that such provisions shall be binding upon each subcontractor or vend-
or. The contractor shall take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

Exhibit C-1—Manager's Certificate Required Under Loan Contract Section 6.14 for Additional Notes

On behalf of ______________________ [Name of Borrower] I hereby certify that the Additional Note or Notes to be issued under Section 2.02 of the Mortgage on or about __________________ [Date Note or Notes are to be Signed] meet all of the requirements of Section 6.14 of the Loan Contract, namely:

(a) The weighted average life of the loan evidenced by such Notes (______ years) does not exceed the weighted average of the expected remaining useful lives of the assets being financed (______ years) as evidenced by the attached calculation of said weighted average lives.

(b) The principal of the loan evidenced by such Notes shall either be [check one and provide evidence in the second case]:

(1) repaid based on level payments of principal and interest throughout the life of the loan, or

(2) amortized at a rate that shall yield a weighted average life that is not greater than the weighted average life that would result from level payments of principal and interest throughout the life of the loan as evidenced by the attached analysis of said weighted average lives.

(c) The principal of the loan evidenced by such Notes has a maturity of not less than 5 years.

[Name] ______________________________

[Title] ______________________________

[Name and Address of Borrower] ________

PART 1721—Post-Loan Policies and Procedures for Insured Electric Loans

Editorial Note: Nomenclature changes to part 1721 appear at 55 FR 39397, Sept. 27, 1990.

Subpart A—Advance of Funds

§ 1721.1 Advances.

(a) Purpose and amount. With the exception of minor construction, insured loan funds will be advanced only for projects which are included in an RUS approved Borrower's construction work plan or approved amendment and in an approved loan, as amended. Loan fund advances can be requested in an
amount representing actual costs incurred but not to exceed 130 percent of the project cost estimate on the approved RUS Form 740c, “Costs Estimates and Loan Budget for Electric Borrowers,” as amended. Minor construction is defined as a project costing $25,000 or less. Such projects qualify for advance of loan funds even though they may not have been included in an RUS-approved Borrower’s construction workplan, amendment to such workplan or approved loan. Total advances requested shall not exceed the total loan amount. All projects for which loan fund advances are requested must be constructed to achieve purposes permitted by terms of the loan contract between the Borrower and RUS.

(b) Certification. Pursuant to the applicable provisions of the RUS loan contract, Borrowers shall certify with each request for funds to be approved for advance that such funds are for projects in compliance with this section and shall also provide for those that cost in excess of $25,000 a contract or work order number as applicable and a workplan cross-reference identification.

For a minor project not included in an RUS approved Borrower’s construction workplan, the Borrower shall describe the project and do one of the following to satisfy RUS’s environmental requirements (see 7 CFR part 1794).

(1) If applicable, state that the project is a categorical exclusion of a type described in 7 CFR 1794.31(b) which normally does not require preparation of a Borrower’s Environmental Report (BER); or

(2) If applicable, state that the project is a categorical exclusion of a type that normally requires a BER and then:

(i) Submit the BER with the request for funds to be approved for advance,

(ii) If applicable, certify that it has analyzed the minor project with respect to a comprehensive service area environmental map and data base collected and used in preparing the BER for its RUS-approved Borrower’s construction workplan, and that on the basis of that information the minor project will not be located in an environmentally sensitive area or location.

(c) Noncompliance. Where insured loan funds are found to have been advanced in noncompliance with this rule, Borrowers will be required to return the appropriate amount of the over advance together with any accrued and unpaid interest to RUS. The Administrator will require Borrowers, in order to remedy such noncompliance, to pay an additional amount equal to the interest on the funds over advanced for the period such funds were outstanding, calculated at a rate equal to the difference between the RUS loan interest rate and the most recent rate at which RUS sold Certificates of Beneficial Ownership (CBO’s). While RUS will generally permit the amount of over advance returned to be requested subsequently by the Borrower for RUS approved projects, nothing herein contained shall be construed to preclude RUS from exercising any rights or remedies which RUS may have pursuant to the loan contract.

Subpart B—[Reserved]

PART 1724—ELECTRIC SYSTEM PLANNING AND DESIGN POLICIES AND PROCEDURES

Subpart A—General [Reserved]

Subpart B—Architectural Services [Reserved]

Subpart C—Engineering Services [Reserved]

Subpart D—Electric System Planning [Reserved]

Subpart E—Electric System Design

Sec. 1724.41 Compliance with National Electrical Safety Code.

1724.42—1724.44 [Reserved]

1724.45 Permitted deviations from RUS construction standards.

§ 1724.41 Compliance with National Electrical Safety Code.

(a) All borrowers' new lines and substations shall be constructed and operated in accordance with the requirements of the National Electrical Safety Code (NESC). The applicable edition of the NESC to be followed shall be the latest edition which is effective in accordance with the provisions of that edition. Where local regulations or other RUS requirements are more stringent, those requirements shall govern.

(b) The Administrator of RUS will consider specific requests to approve construction which is not in accordance with the NESC if the borrower provides evidence satisfactory to the Administrator that an exception is necessary or desirable and in the interests of the Government and the borrower.

(c) Overhead distribution circuits shall be constructed with not less than the Grade C strength requirements as described in section 26, Strength Requirements, of the NESC when subjected to the loads specified in NESC section 25, Loadings for Grades B, C, and D. Overhead transmission circuits shall be constructed with not less than the Grade B strength requirements as described in NESC section 26.

§ 1724.45 Permitted deviations from RUS construction standards.

(a) Structures for raptor protection. Standard distribution line structures may not have the extra measure of protection needed in areas frequented by eagles and other large birds (raptors) to protect such birds from electric shock due to physical contact with energized wires. Borrowers are allowed to deviate from RUS construction standards to provide for raptor protection in the design of overhead line structures in those cases where such protection is required by (1) RUS or (2) a Federal, state or local authority with permit or license authority over the proposed construction. Structures which are designed for raptor protection shall be in accordance with Suggested Practices for Raptor Protection on Powerlines—The State of the Art in 1981, published by the Raptor Research Foundation, Inc., provided, however, that such structures shall be in accordance with the National Electrical Safety Code unless a specific waiver has been granted by the RUS Administrator. Copies of this publication may be purchased from the Raptor Research Foundation, Inc., c/o Department of Veterinary Biology, University of Minnesota, St. Paul, Minnesota 55101. It is also available for inspection at the Office of the Federal Register Information Center, 800 North Capitol Street, NW., suite 700, Washington, DC. This incorporation by reference has been approved by the Director of the Office of the Federal Register. Any deviation from the RUS construction standards for the purpose of raptor protection, which is not in accordance with the above report, must be approved by RUS prior to construction.

(b) Transformer neutral connections. Where it is necessary to separate the primary and secondary neutrals to provide the required electric service to a consumer, the RUS standard transformer connections may be modified in
accordance with Rule 97D2 of the National Electrical Safety Code.

PART 1726—ELECTRIC SYSTEM CONSTRUCTION POLICIES AND PROCEDURES

Subpart A—General

Sec. 1726.1—1726.9 [Reserved]
1726.10 Introduction.
1726.11 Purpose.
1726.12 Applicability.
1726.13 Waivers.
1726.14 Definitions.
1726.15 “Buy American”.
1726.16 Debarment and suspension.
1726.17 Restrictions on lobbying.
1726.18 Preloan contracting.
1726.19 Use of competitive procurement.
1726.20 Standards and specifications.
1726.21 New materials.
1726.22 Methods of construction.
1726.23 Qualification of bidders.
1726.24 Written contracts.
1726.25 Subcontracts.
1726.26—1726.34 [Reserved]
1726.35 Submission of documents to RUS.
1726.36 Documents subject to RUS approval.
1726.37 OMB control number.
1726.38—1726.49 [Reserved]

Subpart B—Distribution Facilities

1726.50 Distribution line materials and equipment.
1726.51 Distribution line construction.
1726.52—1726.74 [Reserved]

Subpart C—Substation and Transmission Facilities

1726.75 General.
1726.76 Substation and transmission line materials and equipment.
1726.77 Substation and transmission line construction.
1726.78—1726.124 [Reserved]

Subpart D—Generation Facilities

1726.125 Generating plant facilities.
1726.126—1726.149 [Reserved]

Subpart E—Buildings

1726.150 Headquarters buildings.
1726.151—1726.174 [Reserved]

Subpart F—General Plant

1726.175 General plant materials.
1726.176 Communications and control facilities.
1726.177—1726.199 [Reserved]

Subpart G—Procurement Procedures

1726.200 General requirements.
1726.201 Formal competitive bidding.
1726.202 Informal competitive bidding.
1726.203 Multiparty negotiation.
1726.204 Multiparty unit price quotations.
1726.205 Multiparty lump sum quotations.
1726.206—1726.240 [Reserved]

Subpart H—Modifications to RUS Standard Contract Forms

1726.250 General.
1726.251 Prior approved contract modifications related to price escalation on transmission equipment, generation equipment, and generation construction contracts.
1726.252 Prior approved contract modifications related to liability for special and consequential damages.
1726.253 Prior approved contract modifications related to alternative bid provision for payment to contractor for bulk purchase of materials.
1726.254 Prior approved contract modifications related to RUS approval of contracts and amendments and modified bidding requirements.
1726.255 Prior approved contract modifications related to indemnification.
1726.256—1726.299 [Reserved]

Subpart I—RUS Standard Forms

1726.300 List of RUS standard contracting forms for electric systems.
1726.301 Use of printed forms.
1726.302 RUS approved forms of contract.
1726.303 Interest on overdue accounts.
1726.304—1726.309 [Reserved]
1726.310 Contractor's bond, RUS Form 168b.
1726.311 Contractor's bond, RUS Form 168c.
1726.312 Construction contract amendment, RUS Form 180.
1726.313 Certificate of completion, contract construction for buildings, RUS Form 181.
1726.314 Certificate of completion, contract construction, RUS Form 187.
1726.315 Equipment contract, RUS Form 198.
1726.316—1726.319 [Reserved]
1726.320 Construction contract, generating, RUS Form 200.
1726.321 Right-of-way clearing contract, RUS Form 201.
1726.322 Transmission system right-of-way clearing contract, RUS Form 203.
1726.323 Certificate (Buy America), RUS Form 213.
1726.324 Waiver and release of lien, RUS Form 224.
§ 1726.10 Introduction.

The policies, procedures and requirements included in this part are intended to implement provisions of the standard form of loan documents between the Rural Utilities Service (RUS) and its electric borrowers. Unless prior written approval is received from RUS, borrowers are required to comply with RUS policies and procedures as a condition to RUS providing loans, loan guarantees, or reimbursement of general funds for the construction and improvement of electric facilities. Requirements relating to RUS approval of plans and specifications, duties and responsibilities of the engineer and architect, and engineering and architectural services contracts, are contained in other RUS regulations. The terms “RUS form”, “RUS standard form”, “RUS specification”, “and RUS bulletin” have the same meanings as the terms “REA form”, “REA standard form”, “REA specification”, “and REA bulletin”, respectively, unless otherwise noted.

§ 1726.11 Purpose.

Each borrower is responsible for the planning, design, construction, operation and maintenance of its electric system. RUS, as a secured lender, has a legitimate interest in accomplishing RUS’s programmatic objectives, and in assuring that the costs of construction, materials, and equipment are reasonable and economical and that the property securing the loans is constructed adequately to serve the purposes for which it is intended.

§ 1726.12 Applicability.

The requirements of this part apply to the procurement of materials and equipment for use by electric borrowers in their electric systems and to the construction of their electric systems if such materials, equipment, and construction are financed, in whole or in part, with loans made or guaranteed by RUS, including reimbursable projects. In order for general fund expenditures for procurement or construction to be eligible for reimbursement from loan funds, the borrower must comply with the procedures required by this part. In the case of jointly owned projects, RUS will determine on a case by case basis the applicability of the requirements of this part.
§ 1726.13 Waivers.

The Administrator may waive, for good cause on a case by case basis, certain requirements and procedures of this part. RUS reserves the right, as a condition of providing loans, loan guarantees, or other assistance, to require any borrower to make any specification, contract, or contract amendment subject to the approval of the Administrator.

§ 1726.14 Definitions.

Terms used in this part have the meanings set forth in 7 CFR 1710.2. References to specific RUS forms and other RUS documents, and to specific sections or lines of such forms and documents, shall include the corresponding forms, documents, sections and lines in any subsequent revisions of these forms and documents. In addition to the terms defined in 7 CFR 1710.2, the following terms have the following meanings for the purposes of this part:

Approval of proposed construction means RUS approval of a construction work plan or other appropriate engineering study and RUS approval, for purposes of system financing, of the completion of all appropriate requirements of part 1794 of this chapter.

Architect means a registered or licensed person employed by the borrower to provide architectural services for a project and duly authorized assistants and representatives.

Bona fide bid means a bid which is submitted by a contractor on the borrower's list of qualified bidders for the specific contract, prior to bid opening.

"Buy American" certificate means a certification that the contractor has complied with the "Buy American" requirement (see §1726.15).

Competitive procurement means procurement of goods or services based on lowest evaluated bid for similar products or services when three or more bids are received.

Construction unit means a specifically defined portion of a construction project containing materials, labor, or both, for purposes of bidding and payment.

Contracting committee means the committee consisting of three to five members representing the borrower's management and board of directors and the engineer. The contracting committee represents the borrower during contract clarifying discussions or negotiations under informal competitive bidding or multiparty negotiation, respectively.

Encumbrance means the process of approval for advance of loans funds by RUS.

Engineer means a registered or licensed person, who may be a staff employee or an outside consultant, to provide engineering services and duly authorized assistants and representatives.

Equipment means a major component of an electric system, e.g., a substation transformer, heat exchanger or a transmission structure.

Force account construction means construction performed by the borrower's employees.

Formal competitive bidding means the competitive procurement procedure wherein bidders submit sealed proposals for furnishing the goods or services stipulated in the specification. Bids are publicly opened and read at a predetermined time and place. If a contract is awarded, it must be to the lowest evaluated responsive bidder (see §1726.201).

Goods or services means materials, equipment, or construction, or any combination thereof.

Informal competitive bidding means the competitive procurement procedure which provides for private opening of bids and allows clarifying discussions between the contracting committee and the bidders. During the clarifying discussions any exceptions to the bid documents must be eliminated, or the bid rejected, so that the contract is awarded to the lowest evaluated responsive bidder (see §1726.202).

Material means miscellaneous hardware which is combined with equipment to form an electric system, e.g., poles, insulators, or conductors.

Minor error or irregularity means a defect or variation in a bid that is a matter of form and not of substance. Errors or irregularities are "minor" if they can be corrected or waived without being prejudicial to other bidders and when they do not affect the price, quantity, quality, or timeliness of construction. A minor error or irregularity is not an exception for purposes of...
§ 1726.15 “Buy American”.

The borrower must ensure that all materials and equipment financed with loans made or guaranteed by RUS complies with the “Buy American” provisions of the Rural Electrification Act of 1938 (7 U.S.C. 903 note), as amended by the North American Free Trade Agreement Implementation Act (107 Stat 2129). When a “Buy American” certificate is required by this part, this must be on RUS Form 213.

§ 1726.16 Debarment and suspension.

Borrowers are required to comply with certain requirements on debarment and suspension in connection with procurement activities as set forth in part 3017 of this title, particularly with respect to lower tier transactions, e.g., procurement contracts for goods or services.

§ 1726.17 Restrictions on lobbying.

Borrowers are required to comply with certain restrictions and requirements in connection with procurement activities as set forth in part 3018 of this title.

§ 1726.18 Preloan contracting.

Borrowers must consult with RUS prior to entering into any contract for material, equipment, or construction if a construction work plan, general funds, loan or loan guarantee for the proposed work has not been approved. While the RUS staff will work with the borrower in such circumstances, nothing contained in this part is to be construed as authorizing borrowers to enter into any contract before the availability of funds has been ascertained by the borrower and all the requirements of part 1794 of this chapter, Environmental Policies and Procedures for Electric and Telephone Borrowers, have been fulfilled.

§ 1726.19 Use of competitive procurement.

RUS borrowers’ procurement is not subject to the provisions of the Federal Acquisition Regulation (48 CFR chapter 1); however, since borrowers receive the benefit of Federal financial assistance borrowers must use competitive procurement to the greatest extent
§ 1726.20 Standards and specifications.

All materials, equipment, and construction must meet the minimum requirements of all applicable RUS standards and specifications. (See Part 1728, Electric Standards and Specifications for Materials and Construction, of this chapter, which is applicable regardless of the source of funding.)

§ 1726.21 New materials.

The borrower shall purchase only new materials and equipment unless otherwise approved by RUS, on a case by case basis, prior to the purchase.

§ 1726.22 Methods of construction.

The borrower is generally responsible for determining whether construction will be by contract or force account. If construction is by contract, the borrower must determine whether materials will be supplied by the contractor or will be furnished by the borrower. RUS reserves the right to require contract construction in lieu of force account construction on a case by case basis.

§ 1726.23 Qualification of bidders.

(a) Qualified bidder list (QBL). The borrower shall (acting through its engineer, if applicable) review the qualifications of prospective bidders for contract construction and for material and equipment procurement, and select firms qualified for inclusion on the borrower’s list of qualified bidders for each contract. (See also §1726.16 and §1726.17.) A bid may not be solicited from a prospective bidder or opened by the borrower unless that bidder has been determined to be a qualified bidder for the contract. When preparing the QBL, in addition to the actual experience of the borrower, if any, in dealing with a prospective bidder, the borrower may solicit information from that bidder or from other parties with firsthand experience regarding the firm’s capabilities and experience. It is also important to consider the firm’s performance record, safety record, and similar factors in determining whether to include that firm on the QBL, since the borrower may not evaluate these factors when evaluating a bid from a qualified and invited bidder.

(b) Conflict of interest. If there is a relationship between the borrower or engineer and a prospective bidder which might cause the borrower or engineer to have or appear to have a conflict of interest, that prospective bidder shall not be included on the QBL unless the engineer discloses the nature of the relationship to the borrower. In the case of the borrower, if its employees or directors have a relationship with a prospective bidder, the prospective bidder shall not be included on the qualified bidders list unless the nature of the relationship is disclosed to the board of directors, and the board of directors specifically approves the inclusion of that bidder in light of the potential for a conflict of interest.

§ 1726.24 Written contracts.

(a) General. Procurement of goods or services must be by written contract or written purchase order. The borrower shall use a RUS Approved Form of Contract for such contracts where required by subparts B through F of this part.

(b) Amendments to contracts—(1) Contract forms. The borrower must use RUS Form 180, Construction Contract Amendment, for any change or addition in a distribution line construction contract. The borrower must use RUS Form 238, Construction or Equipment Contract Amendment, for any change or addition in any other contract for construction, or for materials or equipment.

(2) Special considerations. Each time an amendment to a construction contract is executed, the borrower must ensure that the contractor’s bond is adequate, that all necessary licenses and permits have been obtained, and that any environmental requirements associated with the proposed construction have been met.

(3) Amendment approval requirements. (i) If a RUS approved form of contract is required by this part, an amendment
§ 1726.25 Subcontracts.

The contractor or supplier may use RUS Form 282, Subcontract, for subcontracts on construction, material or equipment contracts. Subcontracts are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

§§ 1726.26—1726.34 [Reserved]

§ 1726.35 Submission of documents to RUS.

(a) Where to send documents. Documents required to be submitted to RUS under this part are to be sent to the office of the borrower’s respective RUS Regional Director, the Power Supply Division Director, or such other office of RUS as designated by RUS (see part 1700 of this chapter.)

(b) Borrower certification. When a borrower certification is required by this part, it must be made by the borrower’s manager unless the board of directors specifically authorizes another person to make the required certification. In such case, a certified copy of the specific authorizing resolution must accompany the document or be on file with RUS.

(c) Contracts requiring RUS approval. The borrower shall submit to RUS three copies of each contract that is subject to RUS approval under subparts B through F of this part. At least one copy of each contract must be an original signed in ink (i.e., no facsimile signature). Each contract submittal must be accompanied by:

(1) A bid tabulation and evaluation and, if applicable, a written recommendation of the architect or engineer.

(2) For awards made under the informal competitive bidding procedure or the multiparty negotiation procedure, a written recommendation of the contracting committee (See §§1726.202 and 1726.203).

(3) Three copies of an executed contractor’s bond on RUS approved bond forms as required in the contract form (at least one copy of which must be an original signed in ink) and one copy of the bid bond or facsimile of the certified check.

(4) A certification by the borrower or chairperson of the contracting committee, as applicable, that the appropriate bidding procedures were followed as required by this part.

(5) A certified copy of the board resolution awarding the contract.

(6) Evidence of clear title to the site for substations and headquarters construction contracts, if not previously submitted.

(7) Documentation that all reasonable measures were taken to assure competition if fewer than three bids were received.

(d) Contract amendments requiring RUS approval. The borrower must submit to RUS three copies of each contract amendment (at least one copy of which must be an original signed in ink) which is subject to RUS approval under §1726.24(b). Each contract amendment submittal to RUS must be accompanied by:

(1) A certified copy of the board resolution approving the amendment; and

(2) A bond extension, where necessary.

(e) Encumbrance of loan or loan guarantee funds. (1) For contracts subject to RUS approval, the submittals required under paragraph (c) of this section will initiate RUS action to encumber loan or loan guarantee funds for such contracts.

(2) For contracts not subject to RUS approval (except for generation projects), loan or loan guarantee funds will normally be encumbered using RUS Form 219, Inventory of Work Orders, after closeout of the contracts. In cases where the borrower can show
good cause for a need for immediate cash, the borrower may request encumbrance of loan or loan guarantee funds based on submittal of a copy of the executed contract, provided it meets all applicable RUS requirements.

(3) For generation project contracts not subject to RUS approval, the borrower must submit to RUS the following documentation:
   (i) A brief description of the scope of the contract, including contract identification (name, number, etc.);
   (ii) Contract date;
   (iii) Contractor’s name;
   (iv) Contract amount;
   (v) Bidding procedure used;
   (vi) Borrower certification that:
       (A) The board of directors approved the contract;
       (B) The bidding procedures and contract award for each contract were in conformance with the requirements of Part 1726, Electric System Construction Policies and Procedures;
       (C) If a RUS approved form of contract is required by this part, the terms and conditions of the RUS/approved form of contract have not been altered;
       (D) If RUS has approved plans and specifications for the contract, the contract was awarded on the basis of those plans and specifications; and
       (E) No restriction has been placed on the borrower’s right to assign the contract to RUS or its successors.

(4) Contract amendments.
   (i) For amendments subject to RUS approval, the submittals required under paragraph (c) of this section will initiate RUS action to encumber loan or loan guarantee funds for contract amendments requiring RUS approval.
   (ii) For amendments not subject to RUS approval (except generation projects), loan or loan guarantee funds will normally be encumbered using RUS Form 219, Inventory of Work Orders, after closeout of the contracts. In cases where the borrower can justify a need for immediate cash, the borrower may request encumbrance of loan or loan guarantee funds based on submittal of a copy of the executed amendment, providing it meets all applicable RUS requirements.
   (iii) For each generation project contract amendment not subject to RUS approval, the borrower must submit to RUS the following information and documentation:
       (A) The contract name and number;
       (B) The amendment number;
       (C) The amendment date;
       (D) The dollar amount of the increase or the decrease of the amendment;
       (E) Borrower certification that:
           (1) The amendment was approved in accordance with the policy of the board of directors (the borrower must ensure that RUS has a certified copy of the board resolution establishing such policy);
           (2) If a RUS approved form of contract is required by this part, the terms and conditions of the RUS-approved form of contract has not been altered; and
           (3) No restriction has been placed on the borrower’s right to assign the contract to RUS or its successors.

§ 1726.36 Documents subject to RUS approval.

Unless otherwise indicated, the borrower shall make all contracts and amendments that are subject to RUS approval effective only upon RUS approval.

§ 1726.37 OMB control number.

The collection of information requirements in this part have been approved by the Office of Management and Budget and assigned OMB control number 0572-0107.

§§ 1726.38—1726.49 [Reserved]

Subpart B—Distribution Facilities

§ 1726.50 Distribution line materials and equipment.

(a) Contract forms. (1) The borrower shall use RUS Form 198, Equipment Contract, for purchases of equipment where the total cost of the contract is $500,000 or more.
   (2) The borrower may, in its discretion, use RUS Form 173, Materials Contract, RUS Form 198, Equipment Contract, or a written purchase order for purchases of equipment of less than $500,000 and for all materials.
   (b) Standards and specifications. Distribution line materials and equipment must meet the minimum requirements
of RUS standards as determined in accordance with the provisions of part 1728 of this chapter, Electric Standards and Specifications for Materials and Construction. The borrower must obtain RUS approval prior to purchasing any unlisted distribution line material or equipment of the types listed in accordance with the provisions of part 1728 of this chapter.

(c) Procurement procedures. It is the responsibility of each borrower to determine the procurement method that best meets its needs for the purchase of material and equipment to be used in distribution line construction.

(d) Contract approval. Contracts for purchases of distribution line materials and equipment are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

§ 1726.51 Distribution line construction.

(a) Contract forms. The borrower must use RUS Form 201, 790, 792, or 830, as outlined in this paragraph (a), for distribution line construction, except for minor modifications or improvements.

(1) The borrower may use RUS Form 790, Distribution Line Extension Construction Contract (Labor and Materials), or RUS Form 792, Distribution Line Extension Construction Contract (Labor only) under the following circumstances:

(i) For contracts for which the borrower supplies all materials and equipment; or

(ii) For non-site specific construction contracts accounted for under the work order procedure; or

(iii) If neither paragraph (a)(1)(i) or (a)(1)(ii) of this section are applicable, the borrower may use RUS Form 790 or 792 for contracts, up to a cumulative total of $250,000 or one percent of NUP, whichever is greater, per calendar year of distribution line construction, exclusive of the cost of owner furnished materials and equipment

(2) The borrower must use RUS Form 830, Electric System Construction Contract (Labor and Materials), for all other distribution line construction. Where distribution lines are being constructed incidental to transmission line construction, the borrower must use RUS Form 831, Electric Transmission Construction Contract.

(3) The borrower must use RUS Form 201, Right-of-Way Clearing Contract, for new distribution line construction right-of-way clearing when done separately from work performed under RUS Form 830.

(b) Procurement procedures. (1) It is the responsibility of each borrower to determine the procurement method that best meets its needs to award contracts in amounts of up to a cumulative total of $250,000 or one percent of NUP, whichever is greater, per calendar year of distribution line construction (including minor modifications or improvements), exclusive of the cost of owner furnished materials and equipment.

(2) In addition to the cumulative total stipulated in paragraph (b)(1) of this section, a borrower may use Multiparty Unit Price Quotations to award contracts in amounts of up to a cumulative total of $350,000 or 1.5 percent of NUP, whichever is greater, per calendar year of distribution line construction (including minor modifications or improvements), exclusive of the cost of owner furnished materials and equipment.

(3) The borrower shall use formal competitive bidding for all other distribution line contract construction. The amount of contracts bid using the formal competitive bidding procedure do not apply to the cumulative total stipulated in paragraph (b)(1) of this section.

(4) An amendment which increases the scope of the contract by adding a project is not considered competitively bid, therefore, the amount of that amendment does apply to the cumulative total stipulated in paragraph (b)(1) of this section.

(c) Contract approval. Contracts for distribution line construction are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.
§§ 1726.52—1726.74

Subpart C—Substation and Transmission Facilities

§ 1726.75 General.
As used in this part, “substations” includes substations, switching stations, metering points, and similar facilities.

§ 1726.76 Substation and transmission line materials and equipment.
(a) Contract forms. (1) The borrower must use RUS Form 198, Equipment Contract, for purchases of equipment where the total cost of the contract is $500,000 or more.
(2) The borrower may, in its discretion, use RUS Form 173, Materials Contract, RUS Form 198, Equipment Contract, or a written purchase order for purchases of equipment of less than $500,000 and for all materials.
(b) Standards and specifications. Substation and transmission line materials and equipment must meet the minimum requirements of RUS standards as determined in accordance with the provisions of part 1728 of this chapter, Electric Standards and Specifications for Materials and Construction. The borrower must obtain RUS approval prior to purchasing of any unlisted substation or transmission line material or equipment of the types listed in accordance with the provisions of part 1728 of this chapter.
(c) Procurement procedures. It is the responsibility of each borrower to determine the procurement method that best meets its needs for purchase of material and equipment to be used in substation and transmission line construction.
(d) Contract approval. Contracts for purchases of substation and transmission line materials and equipment are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

§ 1726.77 Substation and transmission line construction.
(a) Contract forms. (1) The borrower must use RUS Form 764, Substation Erection Contract, for construction of substations, except for minor modifications or improvements. The borrower must use RUS Form 831, Electric Transmission Construction Contract for projects where substations are incidental to transmission line construction and are to be constructed under the same contract.
(2) The borrower must use RUS Form 831, Electric Transmission Construction Contract, for construction of transmission lines (except for minor modifications or improvements).
(3) The borrower must use RUS Form 203, Transmission System Right-of-Way Clearing Contract, for new transmission line construction right-of-way clearing when right-of-way clearing is performed separately from work performed under RUS Form 831.
(b) Procurement procedures. (1) It is the responsibility of each borrower to determine the procurement method that best meets its needs to award contracts not requiring RUS approval in amounts of up to a cumulative total of $250,000 or one percent of NUP (not to exceed $2,000,000, whichever is greater), per calendar year of substation and transmission line construction (including minor modifications or improvements), exclusive of the cost of owner furnished materials and equipment.
(2) The borrower shall use formal competitive bidding for all other contracts requiring RUS approval. The amount of contracts bid using the formal competitive bidding procedure do not apply to the cumulative total stipulated in paragraph (b)(1) of this section.
(3) An amendment which increases the scope of the contract by adding a project is not considered competitively bid, therefore, the amount of that amendment does apply to the cumulative total stipulated in paragraph (b)(1) of this section.
(c) Contract approval. Individual contracts in amounts of $250,000 or more or one percent of NUP (not to exceed $500,000 for distribution borrowers or $1,500,000 for power supply borrowers), whichever is greater, exclusive of the cost of owner furnished materials and equipment, are subject to RUS approval.
§ 1726.125 Generating plant facilities.

This section covers the construction of all portions of a generating plant, including plant buildings and the generator step-up transformer. Generally, the transmission switchyard will be covered under this section during initial construction of the plant. Subpart C of this part covers subsequent modifications to transmission switchyards. Warehouses and equipment service type buildings are covered under subpart E of this part.

(a) Contract forms. (1) The borrower must use RUS Form 198, Equipment Contract, for the purchase of generating plant equipment in the amount of $1,500,000 or more and for any generating plant equipment contract requiring RUS approval.

(2) The borrower must use RUS Form 200, Construction Contract—Generating, for generating project construction contracts in the amount of $1,500,000 or more and for any generating project construction contract requiring RUS approval.

(3) The borrower may, in its discretion, use other contract or written purchase order forms for those contracts in amounts of less than $1,500,000 and that do not require RUS approval.

(b) Plans and specifications. The borrower shall obtain RUS approval of the plans and specifications for generating plant equipment prior to issuing invitations to bid for any contract subject to RUS approval as determined under this subpart and for any contract for generating plant equipment or construction which will cost $1,500,000 or more. Plans and specifications for other equipment and construction contracts do not require RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

(c) Procurement procedures. (1) It is the responsibility of each borrower to determine the procurement method that best meets its needs to award contracts in amounts of less than $1,500,000 each.

(2) If the amount of the contract is $1,500,000 or more or if the contract requires RUS approval, the borrower must use formal or informal competitive bidding to award the contract.

(3) Where formal or informal competitive bidding is not applicable, or does not result in a responsive bid, multiparty negotiation may be used only after RUS approval is obtained.

(d) Contract approval. During the early stages of generating plant design or project design, RUS will, in consultation with the borrower and its consulting engineer, identify the specific contracts which require RUS approval based on information supplied in the plant design manual. The following are typical contracts for each type of generating project which will require RUS approval. Although engineering services are not covered by this part, they are listed in this paragraph (d) to emphasize that RUS approval is required for all major generating station engineering service contracts in accordance with applicable RUS rules. For types of projects not shown, such as nuclear and alternate energy projects, RUS will identify the specific contracts which will require RUS approval on a case by case basis.

(1) Fossil generating stations. Engineering services, steam generator, turbine generator, flue gas desulfurization system, particulate removal system, electric wiring and control systems, mechanical equipment installation (including turbine installation and plant piping), power plant building (foundation and superstructure), site preparation, coal unloading and handling facilities, main step-up substation, cooling towers, and dams or reservoirs.

(2) Diesel and combustion turbine plants. Engineering services, prime mover and generator, building (foundation and superstructure), and electrical control systems.

(3) Hydro installations. Engineering services, turbine/generator, civil works and powerhouse construction, electrical control system, and mechanical installation.
Subpart E—Buildings

§ 1726.150 Headquarters buildings.

This section includes headquarters buildings such as warehouses and equipment service type buildings. Generating plant buildings are covered under subpart D of this part.

(a) Contract forms. The borrower must use RUS Form 257, Contract to Construct Buildings, for all contracts for construction of new headquarters facilities, and additions to, or modifications of existing headquarters facilities (except for minor modifications or improvements).

(b) Procurement procedures. A borrower may use Multiparty Lump Sum Quotations to award contracts in amounts of up to a cumulative total of $250,000 or one percent of NUP (not to exceed $1,000,000), whichever is greater, per calendar year of headquarters construction (including minor modifications or improvements.) The borrower must use formal competitive bidding for all other headquarters contract construction.

(c) Contract approval. Contracts for headquarters construction are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

Subpart F—General Plant

§ 1726.175 General plant materials.

This section covers items such as office furniture and equipment; transportation equipment and accessories, including mobile radio systems, stores and shop equipment, laboratory equipment, tools and test equipment.

(a) Contract forms. The borrower may, in its discretion, use RUS Form 173, Material Contract, RUS Form 198, Equipment Contract, or a written purchase order.

(b) Procurement procedures. It is the responsibility of each borrower to determine the procurement method that best meets its needs for purchase of general plant material and equipment.

(c) Contract approval. Contracts for the purchase of general plant items are not subject to RUS approval and need not be submitted to RUS unless specifically requested by RUS on a case by case basis.

§ 1726.176 Communications and control facilities.

This section covers the purchase of microwave and power line carrier communications systems, load control, and supervisory control and data acquisition (SCADA) systems. Mobile radio systems are covered as general plant materials in § 1726.175.

(a) Power line carrier systems. Power line carrier equipment will frequently be purchased as part of a substation and will be included in the complete substation plans and specifications. When purchased in this manner, the requirements of subpart C of this part, Substation and Transmission Facilities, will apply. If obtained under a contract for only a power line carrier system, the requirements of paragraph (b) of this section apply.

(b) Load control systems, communications systems, and SCADA systems—(1) Contract forms. The borrower must use RUS Form 786, Electric System Communication and Control Equipment Contract. This form may be modified to be a “purchase only” contract form.

(ii) The borrower must use multiparty negotiation for all other communications and control facilities contract construction, including all contracts requiring RUS approval. The amount of contracts bid using the multiparty negotiation procedure do not apply to the cumulative total stipulated in paragraph (b)(2)(i) of this section.
(iii) An amendment which increases the scope by adding a project is not considered competitively bid, therefore, the amount of that amendment does apply to the cumulative total stipulated in paragraph (b)(2)(i) of this section.

(3) Contract approval. Individual contracts in amounts of $250,000 or more or one percent of NUP (not to exceed $500,000 for distribution borrowers or $1,500,000 for power supply borrowers), whichever is greater, exclusive of the cost of owner furnished materials and equipment, are subject to RUS approval.

§§ 1726.177—1726.199 [Reserved]

Subpart G—Procurement Procedures

§ 1726.200 General requirements.

The borrower must use the procedures described in this subpart where such procedures are required under subparts B through F of this part. The borrower must ensure that arrangements prior to announcement of the award of the contract are such that all bidders are treated fairly and no bidder is given an unfair advantage over other bidders.

§ 1726.201 Formal competitive bidding.

Formal competitive bidding is used for distribution, transmission, and headquarters facilities, and may be used for generation facilities. The borrower must use the following procedure for formal competitive bidding:

(a) Selection of qualified bidders. The borrower (acting through its engineer, if applicable) will compile a list of qualified bidders for each proposed contract. The borrower will send invitations to bid only to persons or organizations on its QBL for the specific project (see §1726.23).

(b) Invitations to bid. The borrower (acting through its engineer, if applicable) is responsible for sending out invitations to prospective bidders, informing them of scheduled bid openings and taking any other action necessary to procure full, free and competitive bidding. The borrower should send out a sufficient number of invitations in order to assure adequate competition and so that at least three bids will be received. Subject to the foregoing criteria, the determination of how many and which bidders will be permitted to bid will be the responsibility of the borrower.

(c) Evaluation basis. Any factors, other than lowest dollar amount of the bid, which are to be considered in evaluating the proposals of qualified bidders (e.g., power consumption, losses, etc.) must be stated in the “Notice and Instructions to Bidders.” The borrower will not evaluate a bidder’s performance record, safety record, and similar factors when evaluating a bid from a qualified and invited bidder. Such factors are to be considered when determining whether to include a particular bidder on the qualified bidders list.

(d) Handling of bids received. The borrower or the engineer, as applicable, will indicate, in writing, the date and time of receipt by the borrower or the engineer on the outside envelope of each bid and all letters and other transmittals amending or modifying the bids. Any bid received at the designated location after the time specified must be returned to the bidder unopened.

(e) Bid openings. Bid openings are generally conducted by the engineer in the presence of bidders and a representative of the borrower and the borrower’s attorney. Each bona fide bid must be opened publicly and reviewed for any irregularities, errors, or exceptions. It must be verified that any addendum or supplement to the specification has been acknowledged by the bidder. The adequacy of bid bonds or certified checks must be verified at this time.

(f) Conditions affecting acceptability of bids. The borrower must take the following specified action if any of the following exist:

(1) Fewer than three bona fide bids received. If fewer than three bona fide bids are received for the contract project, the borrower must determine that all reasonable measures have been taken to assure competition prior to awarding the contract. This determination must be documented and such documentation submitted to RUS where required by subpart A of this part. The borrower may, however, elect to reject
all bids, make changes in the specifica-
tion or the qualified bidders list or
both and invite new bids.

(2) Significant error or ambiguity in the
specification. If a significant error or
ambiguity in the specification is found
which could result in the bidders hav-
ing varying interpretations of the re-
quirements of the bid, the borrower
must either issue an addendum to each
prospective bidder correcting the error
or ambiguity before bids are received,
or reject all bids and correct the speci-
cification. If a significant error or ambi-
guity in the specification is discovered
after the bids are opened, the borrower
must reject all bids, correct the speci-
cification and invite new bids.

(3) Minor errors or omissions in the
specification. If minor errors or omis-
sions in the specification are found, the
borrower must issue an addendum to
each prospective bidder correcting the
error or omission prior to opening any
bids. After bid opening, the error or
omission must be corrected in the exe-
cuted contract.

(4) Minor errors or irregularities in bid.
The borrower may waive minor errors
or irregularities in any bid, if the bor-
rower determines that such minor er-
rors or irregularities were made through inadvertence. Any such minor
errors or irregularities so waived must
be corrected on the bid in which they
occur prior to the acceptance thereof
by the borrower.

(5) Non-minor error or irregularity in
bid. If a bid contains a non-minor error
or irregularity, the bid must be re-
jected and the bid price must not be
disclosed.

(6) Unbalanced bid. If a bid contains
disproportionate prices between labor
and materials or between various con-
struction units, the borrower may re-
ject the bid.

(7) No acceptable price quoted. If none
of the bidders quote an acceptable
price, the borrower may reject all bids.

(g) Evaluating bids. The borrower
(acting through the engineer, if appli-
cable) must conduct the evaluation of
bids on the basis of the criteria set out
in the “Notice and Instructions to Bid-
ders.” The contract, if awarded, must
be awarded to the bidder with the low-
est evaluated responsive bid.

(h) Announcement of bids. If possible,
the borrower will announce bids at the
bid opening. However, where extensive
evaluation is required, the borrower
may elect to adjourn and make formal
written announcement to all bidders at
a later time. Any discrepancy in a re-
jected bid must be indicated in the bid
announcement.

(i) Award of contract. Upon comple-
tion of the bid evaluations and based
upon the findings and recommenda-
tions of the borrower’s management
and engineer, the borrower’s board of
directors will either:

(1) Resolve to award the contract to
the lowest evaluated responsive bidder;
or

(2) Reject all bids.

(j) Certification by the borrower and its
engineer. The borrower shall certify and
the engineer shall certify as follows:
“The procedures for formal competi-
tive bidding, as described in 7 CFR
1726.201, were followed in awarding this
contract.” The certification executed
by and on behalf of the borrower and
its engineer shall be submitted to RUS
in writing where required by subpart A
of this part.

§ 1726.202 Informal competitive bid-
ing.

Informal competitive bidding may be
used for equipment purchases and gen-
eration construction. The borrower
must use the following procedure for
informal competitive bidding:

(a) Selection of qualified bidders. The
borrower (acting through its engineer,
if applicable) will compile a list of
qualified bidders for each proposed con-
tract. The borrower will send invita-
tions to bid only to persons or organi-
zations on its qualified bidder list for
the specific project (see § 1726.23).

(b) Invitations to bid. The borrower
(acting through its engineer, if applica-
able) is responsible for sending out invi-
tations to bid only to persons or organi-
zations on its qualified bidder list for
the specific project (see § 1726.23).

The contract, if awarded, must
be awarded to the lowest evaluated
responsive bidder.
bidders will be permitted to bid will be the responsibility of the borrower.

(c) Notice and instructions to bidders. The borrower must indicate in the "Notice and Instructions to Bidders" section of the bid documents that bids will be opened privately. The borrower may elect to conduct clarifying discussions with the bidders. If such clarifying discussions are held, at least the three apparent low evaluated bidders must be given an equal opportunity to resolve any questions related to the substance of the bidder's proposal and to arrive at a final price for a responsive bid.

(d) Evaluation basis. Any factors, other than lowest dollar amount of the bid, which are to be considered in evaluating the proposals of qualified bidders (e.g., power consumption, losses, etc.) must be stated in the "Notice and Instructions to Bidders." The borrower will not evaluate a bidder's performance record, safety record, and similar factors when evaluating a bid from a qualified and invited bidder. Such factors are to be considered when determining whether to include a particular bidder on the qualified bidders list.

(e) Handling of bids received. The borrower or the engineer, as applicable, will indicate, in writing, the date and time of receipt by the borrower or the engineer on the outside envelope of each bid and all letters and other transmittals amending or modifying the bids. Any bid received at the designated location after the time specified must be returned to the bidder unopened.

(f) Bid opening. The contracting committee will conduct the bid opening in private. The contracting committee will open each bona fide bid which has been received prior to the deadline, and review it for any irregularities, errors, or exceptions. It must be verified that any addendum to the specification has been acknowledged by each bidder. The adequacy of bid bonds or certified checks must also be verified.

(g) Conditions affecting acceptability of bids. The borrower must take the following specified action if any of the following exist:

(1) Fewer than three bona fide bids received. If fewer than three bona fide bids are received for the contract project, the borrower must determine that all reasonable measures have been taken to assure competition prior to awarding the contract. This determination must be documented and such documentation submitted to RUS where required by subpart A of this part. The borrower may, however, elect to reject all bids, make changes in the specification or the qualified bidders list or both and invite new bids.

(2) Significant error or ambiguity in the specification. If a significant error or ambiguity in the specification is found which could result in the bidders having varying interpretations of the requirements of the bid, the borrower must either issue an addendum to each prospective bidder correcting the error or ambiguity before bids are received, or reject all bids and correct the specification. If a significant error or ambiguity in the specification is discovered after the bids are opened, the borrower must reject all bids, correct the specification and invite new bids.

(h) Clarification of proposals. The contracting committee may elect not to hold any clarifying discussions and recommend awarding the contract to the low responsive bidder. Otherwise, the contracting committee must give at least each of the three apparent lowest evaluated bidders an equal opportunity to participate in discussions for the purpose of resolving questions regarding the specification and contract terms and to arrive at a final price. Neither prices of other bids nor relative ranking of any bidder are to be revealed under any circumstances. Such discussions may be held by telephone or similar means provided at least each of the three apparent lowest evaluated bidders have an equal opportunity to participate. Upon completion of the clarifying discussions, the contracting committee will determine the lowest evaluated responsive bid. If no bids are responsive after the contracting committee has completed clarifying discussions, no contract award can be made under the informal bidding procedure.

(i) Award of the contract. Upon completion of the bid evaluations, the contracting committee will promptly report all findings and recommendations.
§ 1726.203 Multiparty negotiation.

Multiparty negotiation may only be used where permitted under subpart F of this part or where prior RUS approval has been obtained. The borrower must use the following procedure for multiparty negotiation:

(a) Selection of qualified bidders. The borrower (acting through its engineer, if applicable) will compile a list of qualified bidders for each proposed contract. The borrower will send invitations to bid only to persons or organizations on its qualified bidder list for the specific project (see §1726.23).

(b) Invitations to bid. The borrower (acting through its engineer, if applicable) is responsible for sending out invitations to prospective bidders, informing them of scheduled bid openings and any other action necessary to procure full, free and competitive bidding. In any event, however, sufficient invitations need to be sent out to assure competition and so that at least three bids will be received. Subject to the criteria in the preceding sentence, the determination of how many and which bidders will be permitted to bid will be the responsibility of the borrower.

(c) Notice and instructions to bidders. The borrower must indicate in the “Notice and Instructions to Bidders” section of the bid documents that bids will be opened privately. The borrower may elect to conduct negotiations with the bidders. If such negotiations are held, at least the three apparent low evaluated bidders must be given an equal opportunity to resolve any questions related to the substance of the bidder’s proposal and to arrive at a final price.

(d) Evaluation basis. Any factors, other than lowest dollar amount of the bid, which are to be considered in evaluating the proposals of qualified bidders (e.g., power consumption, losses, etc.) must be stated in the “Notice and Instructions to Bidders.” The borrower will not evaluate a bidder’s performance record, safety record, and similar factors when evaluating a bid from a qualified and invited bidder. Such factors are to be considered only in determining whether to include a particular bidder on the qualified bidders list.

(e) Handling of bids received. The borrower or the engineer, as applicable, will indicate, in writing, the date and time of receipt by the borrower or the engineer on the outside envelope of each bid and all letters and other transmittals amending or modifying the bids. Any bid received at the designated location after the time specified must be returned to the bidder unopened.

(f) Bid opening. The contracting committee will conduct the bid opening in private. The contracting committee will open each bona fide bid which has been received prior to the deadline, and review it for any irregularities, errors, or exceptions. It must be verified that any addendum to the specification has been acknowledged by each bidder. The adequacy of bid bonds or certified checks must also be verified.

(g) Conditions affecting acceptability of bids. The borrower must take the following specified action if any of the following exist:

(1) Fewer than three bona fide bids received. If fewer than three bona fide bids are received for the contract project, the borrower must determine that all reasonable measures have been taken to assure competition prior to awarding the contract. This determination must be documented and such documentation submitted to RUS where required by subpart A of this part. The borrower may, however, elect to reject all bids, make changes in the specification or the qualified bidders list or both and invite new bids.

(2) Significant error or ambiguity in the specification. If a significant error or ambiguity in the specification is found
which could result in the bidders having varying interpretations of the requirements of the bid, the borrower must either issue an addendum to each prospective bidder correcting the error or ambiguity before bids are received, or reject all bids and correct the specification. If a significant error or ambiguity in the specification is discovered after the bids are opened, the borrower must reject all bids, correct the specification and invite new bids.

(h) Negotiations. The contracting committee may elect not to hold any negotiations and recommend award of the contract. Otherwise, the contracting committee must give at least each of the three apparent lowest evaluated bidders an equal opportunity to participate in negotiations for the purpose of resolving questions regarding the specification and contract terms and to arrive at a final price. Neither prices of other bids nor relative ranking of any bidder are to be revealed under any circumstances. Such discussions may be held by telephone or similar means provided at least each of the three apparent lowest evaluated bidders have an equal opportunity to participate. Upon completion of the negotiations, the contracting committee will determine the bid that is in the borrower's best interest.

(i) Award of the contract. Upon completion of the bid evaluations, the contracting committee will promptly report all findings and recommendations to the borrower's board of directors. The board will either:

(1) Resolve to award the contract to the selected bidder; or
(2) Reject all bids.

(j) Certifications by the contracting committee. The chairperson of the contracting committee shall certify as follows: ‘The procedures for multiparty negotiation as described in 7 CFR 1726.203 were followed in awarding this contract.” The certification executed by the chairperson of the contracting committee shall be submitted to RUS in writing where required by subpart A of this part.

§ 1726.204 Multiparty unit price quotations.

The borrower or its engineer must contact a sufficient number of suppliers or contractors to assure competition and so that at least three bids will be received. On the basis of written unit price quotations, the borrower will select the supplier or contractor based on the lowest evaluated cost.

§ 1726.205 Multiparty lump sum quotations.

The borrower or its engineer must contact a sufficient number of suppliers or contractors to assure competition and so that at least three bids will be received. On the basis of written lump sum quotations, the borrower will select the supplier or contractor based on the lowest evaluated cost.

§§ 1726.206–1726.249 [Reserved]

Subpart H—Modifications to RUS Standard Contract Forms

§ 1726.250 General.

RUS provides standard contract forms for procurement of materials, equipment, and construction, for contract amendments and subcontracts, and various related forms for use by RUS borrowers. See §1726.300 for a listing of these forms and how to obtain them. The standard contract forms shall be used by the borrowers in accordance with the provisions of this part. RUS will give prior approval to certain modifications to these forms without changing the applicable requirements for RUS approval. Such approved modifications are set forth in this subpart. These are the only modifications given prior RUS approval.

§ 1726.251 Prior approved contract modification related to price escalation on transmission equipment, generation equipment, and generation construction contracts.

(a) General. Where the borrower encounters reluctance among manufacturers, suppliers, and contractors to bid a firm price on transmission equipment, generation equipment, materials or construction, modifications may be made in the RUS standard form of contracts. These modifications, if applicable, may include, as an alternative to the standard form, provisions for adjusting a base price either upward or downward as determined by

Rural Utilities Service, USDA
changes in specified indexes between the time of the bid and the time the work is performed or materials are procured by the contractor for such work. A large number of labor and materials indexes are published monthly by the Bureau of Labor Statistics (BLS). The borrower, acting through its engineer, if applicable, will select the indexes for the particular item to be used in the price adjustment clause. Suppliers' corporate indexes may not be used. Labor and materials indexes are reported in the BLS's monthly publications entitled "Employment and Earnings" and "Producer Prices and Price Indexes." These publications may be obtained through the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or any of the BLS regional offices.

(b) Material and equipment contracts. The approved provisions needed to reflect the modifications to provide for price escalation in the material or equipment contract forms for generation facilities are as follows:

(1) Insert new paragraphs in the Notice and Instructions to Bidders as follows:

"Proposals are invited on the basis of firm prices (or prices with a stated maximum percentage escalation) or on the basis of nonfirm prices to be adjusted as provided for below or on both bases. The owner may award the contract on either basis.

Nonfirm prices. The prices are subject to adjustment upward or downward based on change in the Bureau of Labor Statistics labor and material indexes. A proportion of percent [the borrower will enter the appropriate percentage amount] of the contract price shall be deemed to represent labor cost and shall be adjusted based on changes in the Bureau of Labor Statistics, Average Hourly Earnings Rate [the borrower will enter the appropriate BLS index] for the period and in a manner similar to the labor cost adjustment."

(2) Insert the following in the contract documents under the "Proposal" section:

"Firm Price $_______
Nonfirm Price $_______"

(3) For equipment that uses a large quantity of insulating oil, the borrower may insert the following in the contract documents under the "Proposal" section:

"The price for insulating oil shall be adjusted upward or downward based on the change in the Bureau of Labor Statistics Refined Petroleum Rate (957) from the month in which the bids are opened to the month in which the oil is purchased by the equipment supplier. Contracts shall be evaluated based on an estimated cost of cents per gallon [the borrower will enter the appropriate cost] for oil. Such adjustment, if any, shall not change the contract amount for purpose of applying any other adjustments to the contract prices."

(c) Construction contracts. The approved provisions needed to reflect the modifications to provide for price escalation in the construction contract forms for generation facilities are as follows:

(1) Insert new paragraphs in the "Notice and Instructions" to Bidders as follows:

"Proposals are invited on the basis of firm prices (or prices with a stated maximum percentage escalation) or on the basis of nonfirm prices to be adjusted as provided for below or on both bases. The owner may award the contract on either basis.

Nonfirm Prices—The prices are subject to adjustment upward or downward based on changes in the Bureau of Labor Statistics labor and material indexes. A proportion of percent [the borrower will enter the appropriate percentage amount] of the contract price shall be deemed to represent labor costs and shall be adjusted based on changes in the Bureau of Labor Statistics, Average Hourly Earnings Rate [the borrower will enter the appropriate BLS index] for the period and in a manner similar to the labor cost adjustment."

A proportion of percent [the borrower will enter the appropriate percentage amount] of the contract price shall be deemed to represent material costs and shall be adjusted based on changes in the Bureau of Labor Statistics, material index [the borrower will enter the appropriate BLS index] for the period and in a manner similar to the labor cost adjustment."
§ 1726.254 Prior approved contract modification related to liability for special and consequential damages.

This section applies only to transmission equipment purchases and generation contracts. Where the borrower anticipates difficulty in obtaining responsive bids on RUS standard contract forms due to a lack of limitation with respect to special and consequential damages, and where the borrower believes that such a modification will encourage competition through the receipt of an alternative bid which limits the bidder’s liability for special and consequential damages, the borrower may make the following approved phrase modifications in the RUS standard contract form on which the borrower solicits bids:

(a) Insert new paragraphs in the “Notice and Instructions to Bidders” as follows:

“Proposals are invited on the basis of alternative Liability Clauses Numbers 1 and 2. The Owner will determine on which Liability Clause basis the award will be made. Any other liability clauses in the proposal or any other modifications will be considered not responsive and unacceptable. These Liability Clauses are defined as follows:

Liability Clause Number 1. This will include unmodified all of the standard terms and conditions of the form of contract furnished by the Owner and attached hereto.

Liability Clause Number 2. This will include the following paragraph, in addition to all of the standard terms and conditions, otherwise unmodified, of the form of contract furnished by the Owner and attached hereto:

‘Except for the Seller’s willful delay or refusal to perform the contract in accordance with its terms, the Seller’s liability to the Owner for special or consequential damages on account of breach of this contract shall not exceed in total an amount equal to ______ percent [the borrower will insert an appropriate percentage between 0 and 100 percent, inclusive] of the contract price.’”

(b) Insert the following in the contract documents under the “Proposal” section:

“Price $ (Based on Liability Clause 1)
Price $ (Based on Liability Clause 2)

(c) Insert the following in the acceptance section of the standard contract form:

“This contract is based on Liability Clause Number ______.”

(d) In RUS Form 200, the word “Bidder” would replace the word “Seller” in the Liability Clause in paragraph (a) of this section.

§ 1726.253 Prior approved contract modification related to alternative bid provision for payment to contractor for bulk purchase of materials.

When construction is to be performed over an extended period of time, but large quantities of materials are to be purchased by the contractor at the beginning of the project (e.g., cable for URD installations), the borrower may allow alternative bids providing for payment to the contractor of 90 percent of the cost of such materials within 30 days of delivery of those materials at the job site. The borrower will retain the right to award the contract with or without the alternative payment provision, however, the contract still must be awarded on the basis of the lowest evaluated responsive bid for the alternative accepted.

§ 1726.254 Prior approved contract modifications related to RUS approval of contracts and amendments and modified bidding requirements.

It will be necessary for borrowers to make certain modifications to various RUS contract forms to implement the provisions of this part. If a RUS approved form of contract is required to
be used by this part and private bid opening is permitted by this part, the “Notice and Instructions to Bidders” of the contract form may be modified accordingly. Other modifications are needed to indicate that certain provisions related to RUS approval are not applicable under specified circumstances. These modifications are as follows:

(a) RUS Form 173 Materials Contract. No modifications.
(b) RUS Form 180 Construction Contract Amendment. No modifications.
(c) RUS Form 198 Equipment Contract. For contracts NOT requiring approval of the Administrator (in accordance with subparts B through F of this part) the applicable modifications are as follows:
   (1) Change Section 5(e) of the “Equipment Contract” to read as follows:
   “(e) Each and all of the covenants and agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto provided, however, the Seller shall not assign this contract or any part hereof without approval in writing of the Purchaser, and further the Seller shall not enter into any contract with any person, firm or corporation for the performance of the Seller’s obligations hereunder, or any part thereof, without the approval in writing of the Purchaser.”
   (2) Delete Section 5(f) of the “Equipment Contract.”
(d) RUS Form 200 Construction Contract—Generating. For contracts NOT requiring approval of the Administrator (in accordance with subparts B through F of this part) the applicable modifications are as follows:
   (1) Contractor’s Proposal, Article II, Section 3(a), Sentence 2. Delete the words “and the Administrator.”
   (2) Contractor’s Proposal, Article II, Section 3(d), Sentence 2. Delete the words “and approved by the Administrator” and the associated footnote.
   (3) Contractor’s Proposal, Article VI, Section 7. Change to read as follows:
   “Nonassignment of Contract. Except as provided in Section 8 of this Article, the Bidder will not assign this Contract, or any interest in any funds that may become due hereunder, or enter into any contract with any person, firm or corporation, for the performance of the Bidder’s obligations hereunder, or any part hereof without the approval in writing of the Owner and the Surety or Sureties, if any.”
   (4) Contractor’s Proposal, Article VI. Delete Section 10.
   (5) Acceptance. Delete the words “Subject to the approval of the Administrator.”
   (e) RUS Form 201 Right-of-Way Clearing Contract. No modifications.
   (f) RUS Form 203 Transmission System Right-of-Way Clearing Contract. For contracts NOT requiring approval of the Administrator (in accordance with subparts B through F of this part) the applicable modifications are as follows.
   (1) Notice and Instructions to Bidders, Section 8. Delete the words “and such acceptance has been approved by the Administrator.”
   (2) Contractor’s Proposal, Article II, Section 1(a). Replace the word “Administrator” with the word “Owner” in two places in the referenced section.
   (3) Contractor’s Proposal, Article II, Section 3(d), Sentence 1. Delete the words “and with the approval of the Administrator” and the associated footnote.
   (4) Contractor’s Proposal, Article II, Section 3(d), Sentence 3. Delete the words “and approved by the Administrator” and the associated footnote.
   (5) Contractor’s Proposal, Article III, Section 1. Delete the words “and the Administrator” in five places in the referenced section.
   (6) Contractor’s Proposal, Article III, Section 1(b). Replace the word “Administrator” with the word “Owner.”
   (7) Contractor’s Proposal, Article III, Section 1(e). Replace the word “Administrator” with the word “Owner.”
   (8) Contractor’s Proposal, Article VI, Section 1(d). Delete the words “and the Administrator.”
   (9) Contractor’s Proposal, Article VI. Delete Section 10.
   (10) Acceptance. Delete the words “Subject to the approval of the Administrator.”
   (g) RUS Form 238 Construction or Equipment Contract Amendment. If the contract amendment does not require RUS approval, in accordance with §1726.24(b), the borrower may delete from RUS Form 238 the following sentence:
   “(The Administrator of RUS is hereby authorized to approve this amendment either
Rural Utilities Service, USDA

§ 1726.254

in whole or in part and to delete such items
as do not meet his approval.)’’

(h) RUS Form 257 Contract to Construct
Buildings. No modifications.
(i) RUS Form 282 Subcontracts. The applicable modifications are as follows:
(1) Section 6, line 3. Delete the words
‘‘and the Administrator of the Rural
Utilities Service (hereinafter called the
Administrator).’’
(2) Section 7, line 2. Change Section 7,
line 2 to read as follows:
‘‘approved in writing by the Owner and the
Surety, if any; provided, * * *’’

(3) Section 7, line 3. Delete the words
‘‘and the Administrator.’’
(j) RUS Form 764 Substation and
Switching Station Erection Contract. For
contracts NOT requiring approval of
the Administrator (in accordance with
subparts B through F of this part) the
applicable modifications are as follows:
(1) Notice and Instructions to Bidders,
Section 10. Delete the words ‘‘and such
acceptance has been approved by the
Administrator.’’
(2) Contractor’s Proposal, Article II,
Section 1.a. Replace the word ‘‘Administrator’’ with the word ‘‘Owner’’ in two
places in the referenced section.
(3) Contractor’s Proposal, Article II,
Section 1.d, Sentence 1. Delete the words
‘‘and with the approval of the Administrator 1’’ and the associated footnote.
(4) Contractor’s Proposal, Article II,
Section 1.d, Sentence 2. Delete the words
‘‘and approved by the Administrator 2’’
and the associated footnote.
(5) Contractor’s Proposal, Article III,
Section 1. Delete the words ‘‘and the
Administrator’’ in five places in the
referenced section.
(6) Contractor’s Proposal, Article III,
Section 1.b. Replace the word ‘‘Administrator’’ with the word ‘‘Owner.’’
(7) Contractor’s Proposal, Article III,
Section 1.e. Replace the word ‘‘Administrator’’ with the word ‘‘Owner.’’
(8) Contractor’s Proposal, Article VI,
Section 1.e. Delete the words ‘‘and the
Administrator.’’
(9) Contractor’s Proposal, Article VI.
Delete Section 10.
(10) Acceptance. Delete the words
‘‘Subject to the approval of the Administrator.’’
(k) RUS Form 786 Electric System Communications and Control Equipment Con-

tract (including installation). For contracts NOT requiring approval of the
Administrator (in accordance with subparts B through F of this part) the applicable modifications are as follows:
(1) Article I, Section 2. Delete the
words ‘‘subject to the approval of the
Administrator 1’’ and ‘‘and approved by
the Administrator 2’’ and the associated footnotes.
(2) Article II, Section 1, Sentence 2. Replace the word ‘‘Administrator’’ with
‘‘Purchaser.’’
(3) Article II, Section 5. Delete the
words ‘‘subject to the approval of the
Administrator 3’’ and ‘‘subject to the
approval of the Administrator 4’’ and
the associated footnotes.
(4) Article III, Section 2, Sentence 3. Replace the words ‘‘if the Administrator
shall so approve’’ with the words ‘‘if
the Purchaser shall so approve.’’
(5) Article VI. Delete Section 7.
(6) Acceptance. Delete the words
‘‘Subject to the approval of the Administrator.’’
(l) RUS Form 790 Distribution Line Extension Construction Contract (Labor and
Materials). No modifications.
(m) RUS Form 792 Distribution Line Extension Construction Contract (Labor
Only). No modifications.
(n) RUS Form 830 Electric System Construction Contract. No modifications.
(o) RUS Form 831 Electric Transmission
Construction Contract. For contracts
NOT requiring approval of the Administrator (in accordance with subparts B
through F of this part) the applicable
modifications are as follows:
(1) Notice and Instructions to Bidders,
Section 10. Delete the words ‘‘and such
acceptance has been approved by the
Administrator.’’
(2) Contractor’s Proposal, Article II,
Section 1.d. Delete the words ‘‘with the
approval of the Administrator 1’’ and
‘‘and approved by the Administrator 2’’
and the associated footnotes.
(3) Contractor’s Proposal, Article II,
Section 4.a. Delete the words ‘‘and approved by the Administrator 3’’ and the
associated footnote.
(4) Contractor’s Proposal, Article III,
Section 1.a. Sentence 4. Delete the words
‘‘and the Administrator.’’
(5) Contractor’s Proposal, Article III,
Section 1.b. Replace the word ‘‘Administrator’’ with the word ‘‘Owner.’’

267


(6) Contractor's Proposal, Article III, Section 1.c. Delete the words "and the Administrator" in four places in the referenced section.

(7) Contractor's Proposal, Article III, Section 1.e. Replace the word "Administrator" with the word "Owner."

(8) Contractor's Proposal, Article VI, Section 1.e. Delete the words "and the Administrator."

(9) Contractor's Proposal, Article VI. Delete Section 11.

(10) Accept: Delete the words "Subject to the approval of the Administrator."

§ 1726.255 Prior approved contract modifications related to indemnification.

(a) As an alternative to the indemnification provision required in RUS standard construction contract forms in those jurisdictions requiring specific language concerning the requirement that the indemnitor indemnify the indemnitee for the indemnitee's own negligence, the borrower may add the words "otherwise this provision shall apply to any alleged negligence or condition caused by the Owner" so that the first paragraph reads as follows:

"i. To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner, otherwise this provision shall apply to any negligence or condition caused by the Owner."

(b) As an alternative to the indemnification provision required in RUS standard construction contract forms in those jurisdictions that have a legal prohibition against one party indemnifying another for the other's negligence, the borrower may replace the words "defend, indemnify, and hold harmless" with the words "shall pay on behalf of" so that the first paragraph reads as follows:

"i. To the maximum extent permitted by law, Bidder shall pay on behalf of Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner, otherwise this provision shall apply to any negligence or condition caused by the Owner."

(c) If the alternative indemnification provision in paragraph (a) or (b) of this section is chosen by the borrower, the language of paragraph (a) or (b) of this section would be inserted in lieu of subsection (i) of the section indicated in the RUS standard construction contract forms as follows:

Subpart I—RUS Standard Forms

§ 1726.300 List of RUS standard contracting forms for electric systems.

The following is a list of the current RUS standard contracting forms that RUS has prepared for use by electric borrowers when purchasing materials and equipment and constructing facilities with a RUS loan or loan guarantee. Copies of the contract forms are available from the sources indicated in the listing. A notice of any change in these contract forms will be published in the Federal Register.

Notes:

1. A single copy of the form will be furnished by RUS upon request. Additional copies may be duplicated or reproduced. Requests for copies should be sent to: Director, Administrative Services Division, U.S. Department of Agriculture, Rural Utilities Service, Washington, DC 20250.

§ 1726.301 Use of printed forms.
If a RUS contract form is required by this part, the borrower shall use the form in the format available from RUS or GPO (photocopying or other exact reproduction is acceptable.) The contract forms are not to be retyped, changed, modified or altered in any manner not specifically authorized in this part or approved by RUS in writing. Any modifications approved by RUS must be clearly shown so to indicate that such are different from the standard form. Electronic reproduction is acceptable for RUS Forms 251 and 254 only.

§ 1726.302 RUS approved forms of contract.
If a specific RUS contract form is required by a particular section of this part, the borrower shall use that form without changes or modifications or alterations unless, prior to issuing the bid package to bidders, RUS has specifically approved any such changes to that form for that borrower, nor shall any change be made to the form by amendment of an executed contract without prior RUS approval. Any proposed changes shall not relieve the contractor or the borrower of the basic responsibilities required by the standard RUS contract form, and, shall not alter any terms and conditions required by law. Changes permitted or required by subpart H of this part or by part 1788, RUS Fidelity and Insurance Requirements for Electric and Telephone Borrowers, of this chapter are approved by RUS under the circumstances indicated.

§ 1726.303 Interest on overdue accounts.
Certain RUS contract forms contain a provision concerning payment of interest on overdue accounts. Prior to issuing the invitation to bidders, the borrower must insert an interest rate equal to the lowest “Prime Rate” listed in the “Money Rates” section of the Wall Street Journal on the date such invitation to bid is issued. If no prime rate is published on that date, the last such rate published prior to that date must be used. The rate must not, however, exceed the maximum rate allowed by any applicable state law.

§§ 1726.304—1726.309 [Reserved]

§ 1726.310 Contractor’s bond, RUS Form 168b.
The bond form in this section shall be used when a Contractor’s Bond is required by RUS Forms 200, 201, 203, 257, 764, 786, 790, 792, 830, or 831 unless the contractor’s surety has accepted a Small Business Administration guarantee and the contract is for one million dollars or less.

Contractor’s Bond
1. Know all men that we, ______, as Principal, and ______, as Surety, are held and firmly bound unto ______ (hereinafter called the “Owner”) and unto the United States of America (hereinafter called the “Government”) and unto all persons, firms and corporations who or which may furnish materials for or perform labor on a Rural Utilities Service Project known as Project ______, or ______ Project ______, as hereinafter set forth and for the payment of which sum well and truly to be made we bind ourselves, our executors, administrators, successors and assigns jointly and severally by these presents. Said Project is described in a certain construction contract (hereinafter called the “Construction Contract”) between the Owner and the Principal, dated ______, ______, ______, pursuant and subject to a certain loan contract (hereinafter called the “Loan Contract”) between the Owner and the Government, acting through the Administrator of the Rural Utilities Service (hereinafter called the “Administrator”).

2. The condition of this obligation is such that if the Principal shall well and truly perform and fulfill all the undertakings, covenants, terms, conditions and agreements of the Construction Contract and any amendments thereto, whether such amendments are for additions, decreases, or changes in materials, their quantity, kind or price, labor costs, mileage, routing or any other purpose whatsoever, and whether such amendments are made with or without notice to the Surety, and shall fully indemnify and save harmless the Owner and the Government from all costs and damages which they, or either of them, shall suffer or incur by reason of any failure so to do, and shall fully reimburse and repay the Owner and the Government for all outlay and expense which they, or either of them shall incur in making good any such failure of performance on the part of the Principal, and shall promptly make payment to all persons working on or supplying labor or materials for use in the construction of the Project contemplated in
the Construction Contract and any amendments thereto, in respect of such labor or materials furnished and used therein, to the full extent thereof, and in respect of such labor or materials furnished but not so used, to the extent of the quantities estimated in the Construction Contract and any amendments thereto to be required for the construction of the Project, and shall well and truly reimburse the Owner and the Government, as their respective interests may appear, for any excess in cost of construction of said Project over the cost of such construction as provided in the Construction Contract and any amendments thereto, occasioned by any default of the Principal under the Construction Contract and any amendments thereto, then this obligation shall be null and void, but otherwise shall remain in full force and effect.

3. It is expressly agreed that this bond shall be deemed amended automatically and immediately, without formal and separate amendments hereto, upon any amendment to the Construction Contract, so as to bind the Principal and the Surety to the full and faithful performance of the Construction Contract as so amended, provided only that the total amount of all increases in the cost of construction shall not exceed 20 percent of the amount of the maximum price set forth in the Construction Contract. The term “Amendment,” wherever used in this bond, and whether referring to this bond, the Construction Contract or the Loan Contract, shall include any alteration, addition, extension, modification, amendment, rescission, waiver, release or annulment, of any character whatsoever.

4. It is expressly agreed that any amendment which may be made by agreement or otherwise between the Principal and the Owner in the terms, provisions, covenants and conditions of the Construction Contract, or in the terms, provisions, covenants and conditions of the Loan Contract (including, without limitation, the granting by the Administrator to the Owner of any extension of time for the performance of the obligations of the Owner under the Loan Contract or the granting by the Administrator or the Owner to the Principal of any extension of time for the performance of the obligations of the Principal under the Construction Contract, or the failure or refusal of the Administrator or the Owner to take any action, proceeding or step to enforce any remedy or exercise any right under either the Construction Contract or the Loan Contract, or the taking of any action, proceeding or step by the Administrator or the Owner, acting in good faith upon the belief that the same is permitted by the provisions of the Construction Contract or the Loan Contract) shall not in any way release the Principal and the Surety, or either of them or their respective executors, administrators, successors or assigns, from liability hereunder. The Surety hereby acknowledges receipt of notice of any amendment, indulgence or forbearance, made, granted or permitted.

5. This bond is made for the benefit of all persons, firms and corporations who or which may furnish any materials or perform any labor for or on account of the construction to be performed under the Construction Contract and any amendments thereto, and they, and each of them, are hereby made obligees hereunder with the same force and effect as if their names were written herein as such, and they and each of them may sue hereon.

In witness whereof, the undersigned have caused this instrument to be executed and their respective corporate seals to be affixed and attested by their duly authorized representatives this day of .

Signatures: The Contractor's Bond must be signed with the full name of the Contractor. If the Contractor is a partnership the Contractor's Bond must be signed in the partnership name by a partner. If the Contractor is a corporation the Contractor's Bond must be signed by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the corporation. A typewritten copy of all such names and signatures shall be appended.

Power of Attorney: The Contractor's Bond must be accompanied by a power of attorney authorizing execution on behalf of the Surety and, in jurisdictions so requiring should be countersigned by a duly authorized resident agent of the Surety.

[End of clause]

§ 1726.311 Contractor's bond, RUS Form 168c.

The bond form in this section shall be used when a Contractor's Bond is required by RUS Form 200, 201, 203, 257, 764, 786, 790, 792, 830, or 831 and the contractor's surety has accepted a Small Business Administration guarantee and the contract is for one million dollars or less.

**Contractor's Bond**

(Use only when contract is less than $1 million and Surety has accepted an SBA (Small Business Administration) Guarantee)
§ 1726.311 7 CFR Ch. XVII (1-1-98 Edition)

1. Know all men that we, ______, as Principal, and ______, as Surety, are held and firmly bound unto ______ (hereinafter called the "Owner") and unto the United States of America, acting through the Administrator of the Rural Utilities Service Project known as Project ______ and corporations who or which may furnish materials or labor for or perform labor on a Rural Utilities Service Project (hereinafter called the "Government") and unto all persons, firms and corporations who or which may furnish materials or labor for or perform labor on a Rural Utilities Service Project as contemplated in the Construction Contract and any amendments thereto, then this obligation shall be null and void, but otherwise shall remain in full force and effect.

2. The condition of this obligation is such that if the Principal shall well and truly perform and fulfill all the undertakings, covenants, terms, conditions and agreements of the Construction Contract and any amendments thereto, whether such amendments are for additions, decreases, or changes in materials, their quantity, kind or price, labor costs, mileage, routing or any other purpose whatsoever, and whether such amendments are made with or without notice to the Surety, and shall fully indemnify and save harmless the Owner and the Government from all costs and damages which they, or either of them, shall suffer or incur by reason of any failure so to do, and shall fully reimburse and repay the Owner and the Government for any such failure of performance on the part of the Principal, and shall promptly make payment to all persons working on or supplying labor or materials for use in the construction of the Project contemplated in the Construction Contract and any amendments thereto, in respect of such labor or materials furnished and used therein, to the full extent thereof, and in respect of such labor or materials furnished but not so used, to the extent of the quantities estimated in the Construction Contract and any amendments thereto, for any excess in cost of construction as provided in the Construction Contract and any amendments thereto, upon any amendment to the Construction Contract, or the taking of any action, proceeding or step by the Administrator or the Owner to enforce any remedy or exercise any right under either the Construction Contract or the Loan Contract, or the failure or refusal of the Administrator or the Owner to take any action, proceeding or step to enforce any remedy or exercise any right under either the Construction Contract or the Loan Contract (including, without limitation, the granting by the Administrator to the Owner of any extension of time for the performance of the obligations of the Owner under the Loan Contract or the granting by the Administrator or the Owner to the Principal of any extension of time for the performance of the obligations of the Principal under the Construction Contract, or the failure or refusal of the Administrator or the Owner, acting in good faith upon the belief that the same is permitted by the provisions of the Construction Contract or the Loan Contract) shall not in any way release the Principal and the Surety, or either of them or their respective executors, administrators, successors or assigns, from liability hereunder. The Surety hereby acknowledges receipt of notice of any amendment, indulgence or forbearance, made, granted or permitted.

3. Provided, that the liability of the Principal and Surety hereunder to the Government shall be subject to the same limitations and defenses as may be available to them against a claim hereunder by the Owner, provided, however, that the Government may, at its option, perform any obligations of the Owner required by the contract.

4. It is expressly agreed that this bond shall be deemed amended automatically and immediately, without formal and separate amendments hereto, upon any amendment to the Construction Contract, so as to bind the Principal and the Surety to the full and faithful performance of the Construction Contract as so amended, provided only that the total amount of all increases in the cost of construction shall not exceed 20 percent of the amount of the maximum price set forth in the Construction Contract.

5. It is expressly agreed that any amendment which may be made by agreement or otherwise between the Principal and the Owner in the terms, provisions, covenants and conditions of the Construction Contract, or in the terms, provisions, covenants and conditions of the Loan Contract (including, without limitation, the granting by the Administrator or the Owner to the Principal of any extension of time for the performance of the obligations of the Owner under the Loan Contract or the granting by the Administrator of the Owner to the Principal of any extension of time for the performance of the obligations of the Principal under the Construction Contract, or the failure or refusal of the Administrator or the Owner to take any action, proceeding or step by the Administrator or the Owner), or step to enforce any remedy or exercise any right under either the Construction Contract or the Loan Contract, or the taking of any action, proceeding or step by the Administrator or the Owner, acting in good faith upon the belief that the same is permitted by the provisions of the Construction Contract or the Loan Contract) shall not in any way release the Principal and the Surety, or either of them or their respective executors, administrators, successors or assigns, from liability hereunder. The Surety hereby acknowledges receipt of notice of any amendment, indulgence or forbearance, made, granted or permitted.

6. This bond is made for the benefit of all persons, firms and corporations who or which may furnish any materials or perform any labor for or on account of the construction to be performed under the Construction Contract.
Contract and any amendments thereto. Provided, that beneficiaries or claimants hereunder shall be limited to the subcontractors, and persons, firms and corporations having a direct contract with the Principal or its subcontractors.

7. Provided, further, that no suit or action shall be commenced hereunder by any person, firm, or corporation who performed work or labor or who furnished materials for the project: (a) Unless such person, firm, or corporation, other one having a direct contract with the Principal (or with the Government in the event the Government is performing the obligation of the Owner), shall have given detailed written notice of claim to: The Principal, and the Owner, within ninety (90) days after such person, firm, or corporation did or performed the last of the work or labor, or furnished the last of the materials for which such claim is made. (b) After the expiration of one (1) year following the date on which Principal ceased work on said contract, it being understood, however, that if any limitation embodied in the Bond is prohibited by any law controlling the construction hereof, such limitation shall be deemed to be amended so as to equal to the minimum period of limitation permitted by such law.

In witness whereof, the undersigned have caused this instrument to be executed and their respective corporate seals to be affixed and attested by their duly authorized representatives this _ day of _, 19__.

Principal _____ (Seal)
By ________________
Attest: ______ Secretary
Surety _____ (Seal)
By ________________
Attest: ______ Secretary
Address of Surety's Home Office
By ______ Resident Agent of Surety

Signatures: The Contractor's Bond must be signed with the full name of the Contractor.

If the Contractor is a partnership the Contractor's Bond must be signed in the partnership name by a partner. If the Contractor is a corporation the Contractor's Bond must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the corporation. A typewritten copy of all such names and signatures shall be appended.

Power of Attorney: The Contractor's Bond must be accompanied by a power of attorney authorizing execution on behalf of the Surety and, in jurisdictions so requiring should be countersigned by a duly authorized resident agent of the Surety.

§ 1726.313 Certificate of completion, contract construction for buildings, RUS Form 181

The closeout form in this section shall be used when required by this part.

§ 1726.314 Certificate of completion, contract construction, RUS Form 187

The closeout form in this section shall be used when required by this part.

CERTIFICATE OF COMPLETION; CONTRACT CONSTRUCTION FOR BUILDINGS

I, the undersigned Architect of the above-designated Rural Utilities Service Project, hereby certify that:

1. The construction provided for pursuant to Construction Contract No. ______ dated ______, including all approved amendments, (hereinafter called the "Project") between ______ ("Owner") and ______ ("Contractor") has been completed as of ______, and is in all respects in strict compliance with the provisions of the Loan Contract and the Construction Contract, including the Plans and Specifications and all modifications thereto.

2. To the best of my knowledge, payment in full has been made to all persons who have furnished labor for the Project.

3. The Contractor has, to the best of my knowledge, obtained valid releases of lien from all Manufacturers, materialmen, and subcontractors that furnished materials or services or both which were employed by the Contractor in the performance of the Construction Contract, and that such releases have been delivered to the Owner.

4. All defects in workmanship and materials reported during the period of construction of the Project have been corrected.

5. The final Contract Price of the Project as completed is ______ dollars ($______).

CERTIFICATE OF COMPLETION; CONTRACT CONSTRUCTION

To: Administrator
Rural Utilities Service
U.S. Department of Agriculture Washington, D.C. 20250

I, the undersigned Engineer of the above-designated Rural Utilities Service Project do hereby certify that:

1. The construction provided for pursuant to Construction Contract No. ______ dated
§ 1726.315

19. including all approved amendments, (hereinafter called the "Project") between

Owner ("Owner") and

Contractor ("Contractor") has been completed as of the 19th day of July, 19__, and is in all respects in strict compliance with the provisions of the Loan Contract and the Construction Contract, including all Plans, specifications, maps, and drawings and all modifications thereto.

2. Payment in full has been made to all persons who have furnished labor for the Project.

3. The Contractor has obtained valid releases of lien from all persons, firms and/or corporations furnishing materials, supplies, and appliances which were employed by the Contractor in the performance of the Construction Contract, and that such releases have been delivered by the Contractor to the Owner.

4. If applicable, the Final Inventory attached hereto and made a part hereof is a complete and accurate summary of all units of construction in the Project and all work performed in accordance with the Construction Contract.

5. If applicable, the staking sheets and tabulation of staking sheets upon which the Final Inventory is based show the accurate location, number, and kind of all units of construction of the project and show all work performed in accordance with the Construction Contract.

6. All defects in workmanship and materials reported during the period of construction of the Project have been corrected.

7. The total cost of the Project as completed is $_________ dollars ($___.___.). The Project consists of facilities shown on the Statement of Construction which is true and correct and which is attached hereto and made a part hereof.

Dated this __________ day of __________, 19__. Name of Engineer

By __________ Date

Approved as to Items 1 and 6 above: RUS Field Engineer

We, the undersigned Owner and Contractor, do hereby certify that:

1. The Project has been completed in accordance with the provisions of the Construction Contract, dated the 19th day of __________, 19__, provided, however, that acceptance of the Project by the Owner shall not be deemed to relieve the Contractor of its obligations contained in the Construction Contract with respect to defective workmanship or, materials discovered within one year after the date of completion.

2. If applicable, the Final Inventory attached hereto and made a part hereof is a complete and accurate summary of all units of construction in the Project and of work performed in accordance with the Construction Contract.

§ 1726.315 Equipment contract, RUS Form 198.

The contract form in this section shall be used when required by this part.

EQUIPMENT CONTRACT

Notice and Instructions to Bidders

1. Sealed proposals for the furnishing and delivery f.o.b. of equipment for the (hereinafter called the "Owner") which is to be part of the project known as will be received by the Owner on or before o'clock, M., at which time and place the proposals will be publicly opened and read. Any proposal received subsequent to the time specified will be promptly returned to the Bidder unopened.

2. The Plans and Specifications, together with all necessary forms and other documents for bidders may be obtained from the Owner or from the Engineer, at the latter's office at _______. The Plans and Specifications may be examined at the office of the Owner or at the office of the Engineer. A copy of the loan contract (if the Project is to be financed in whole or in part, pursuant to a loan contract) between the Owner and the United States of America acting through the Administrator of the Rural Utilities Service (hereinafter called the "Administrator") and of the loan contract between the Owner and any other lender, may be examined at the office of the Owner.

3. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewriter. No alterations or interlinearizations will be permitted, unless made before submission and initialed and dated.

4. Prior to the submission of the Proposal, the Bidder shall make and shall be deemed to have made a careful examination of the Plans and Specifications and forms of Equipment Contract on file with the Secretary of the Owner and with the Engineer, and all

278
shall include the cost of delivery to the part hereof for the following prices: Item Specifications attached hereto and made a ``Equipment'' described in the Plans and the Bidder hereby proposes to furnish and deliver the equipment (hereinafter called the ``Bidder'') hereby proposes to furnish and deliver the equipment (hereinafter called the ``Owner'').

6. The Bidder agrees that, in the event this Proposal is accepted, it will execute a Contract in the form attached hereto.

7. The Bidder warrants that the Equipment will conform to the performance data and guarantees which are attached hereto and by this reference made a part hereof.

8. If, in submitting this Proposal, the Bidder has made any change in the form of Proposal or Contract furnished by the Owner, the Bidder understands that the Owner and the Administrator may evaluate the effect of such change as they see fit or they may exclude the Proposal from consideration in determining the award of the Contract.

9. The Bidder represents that:

   It has , does not have , 100 or more employees, and if it has, that it has , 100 or more employees, and if it has, that it has not furnished the Equal Employment Opportunity-Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246, and Title VII of the Civil Rights Act of 1964.

   The Bidder agrees that it will obtain, prior to the award of any subcontract for more than $10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

   The Bidder agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this contract will amount to more than $10,000, the Bidder will file such report, as required by law, and notify the Owner in writing of such filing prior to the Owner's acceptance of this Proposal.

   The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained.

   The Bidder agrees that a breach of this certification is a violation of the Equal Employment Opportunity Clause in this contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will
§ 1726.315

obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Equipment Contract

Agreement made __________, 19_________, between

_________ (hereinafter called the “Purchaser”) and __________ (hereinafter called the “Seller”), a corporation organized and existing under the laws of the State of __________.

Whereas, the Purchaser desires to purchase and the Seller desires to sell the equipment described herein for the project financed in part or whole by a loan to the Purchaser from the United States of America, acting through the Administrator of the Rural Utilities Service (hereinafter called the “Administrator”) which project is designated __________.

Now therefore, in consideration of the mutual undertakings herein contained, the parties hereto agree as follows:

Section 1—Acceptance of Proposal

(a) The Purchaser accepts the Proposal which is attached hereto and by this reference made a part hereof, and the parties hereto agree that the Seller shall sell and deliver to the Purchaser and the Purchaser shall purchase and receive from the Seller the equipment (hereinafter called the “Equipment”) described in the Proposal upon the terms and conditions herein stated.

(b) The prices set forth in the Proposal include the cost of delivery to __________.

(c) The prices set forth in the Proposal do not include any sums which are or may be payable by the Seller on account of taxes imposed by any taxing authority upon the sale, purchase or use of the Equipment. If any such tax is applicable to the sale, purchase or use of the Equipment hereunder, the amount thereof shall be added to the purchase price and paid by the Purchaser.

Section 2—Delivery

The Seller shall deliver the Equipment within __________ days after receipt of the written order or orders of the Purchaser. The time for delivery shall be extended for the period of any reasonable delay due exclusively to causes beyond the control and without the fault of the Seller, including, but not limited to, acts of God, fires, strikes, and floods.

Section 3—Payment

Upon the shipment of any Equipment hereunder, the Seller shall submit to the Purchaser a detailed statement of the Equipment shipped. The Purchaser shall, upon receipt of the Equipment, pay the Seller ninety percent (90%) of the contract price of the Equipment. When the Equipment has been installed, placed in satisfactory operation, tested and accepted by the Purchaser, the Purchaser shall make final payments therefor to the Seller; provided, however, such final payment shall be made not later than one-hundred eighty (180) days after delivery of the Equipment, unless such acceptance by the Purchaser shall be withheld because of the fault of the Seller.

Section 4—Defective Material and Workmanship

(a) All Equipment furnished hereunder shall be subject to the inspection, tests, and approval of the Purchaser and the Administrator and the Seller shall furnish all information required concerning the nature of source of any Equipment and provide adequate facilities for testing and inspecting the Equipment at the plant of the Seller.

(b) The Equipment furnished hereunder shall become the property of the Purchaser upon delivery, provided, however, that the Purchaser or the Administrator, within one year after delivery or within the period for which the Equipment is guaranteed, whichever is longer, may reject any Equipment which does not comply with the Specifications attached hereto and made a part hereof or with the guarantees, if any, of the Seller and the manufacturer. Upon any such rejection, the Seller shall repair or replace such defective Equipment within a reasonable time after notice in writing from the Purchaser and in the event of failure by the Seller so to do, the Purchaser may make such replacement and the cost and expense thereof shall be paid by and recoverable from the Seller.

Section 5—Miscellaneous

(a) All manufacturers’ guarantees of Equipment, if any, shall be transferred and assigned to the Purchaser upon delivery of any Equipment and before final payment is made for such Equipment. Such guarantees shall be in addition to those required of the Seller by other provisions of this Contract.

(b) The Seller shall hold harmless and indemnify the Purchaser from any and all claims, suits, and proceedings for infringement of any patent or patents covering Equipment purchased hereunder.

(c) In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada, and only such
manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938.

The Seller agrees to submit to the Purchaser such certificates with respect to compliance with the following provisions as the Administrator from time to time may require.

(d) During the performance of this contract, the Seller agrees as follows:

1. The Seller will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Seller will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to:
   - Employment, upgrading, demotion or transfer;
   - Recruitment or recruitment advertising;
   - Layoff or termination;
   - Rates of pay or other forms of compensation;
   - Selection for training, including apprenticeship.
   The Seller agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

2. The Seller will, in all solicitations or advertisements for employees placed by or on behalf of the Seller, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

3. The Seller will send to each labor union or representative of workers with which it is a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers’ representative of the Seller’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

4. The Seller will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and orders of the Secretary of Labor.

5. The Seller will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations and orders.

6. In the event of the Seller’s noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations or orders, this contract may be cancelled, terminated or suspended in whole or in part and the Seller may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in the said Executive Order or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.

7. The Seller will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Seller will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance. Provided, however, that in the event a Seller becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Seller may request the United States to enter into such litigation to protect the interest of the United States.

(e) Each and all of the covenants and agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto provided, however, that the Seller shall not assign this contract or any part hereof without approval in writing of the Purchaser and the Administrator, and further that the Seller shall not enter into any contract with any person, firm or corporation for the performance of the Seller’s obligations hereunder, or any part thereof, without the approval in writing of the Purchaser.

(f) This contract shall become effective only upon approval by the Administrator. Neither this contract nor any provision thereof shall be modified, amended, rescinded, waived, or terminated without the approval in writing of the Administrator. Amendments executed on RUS Form 238 are not subject to approval of the Administrator, except that when a contract amendment along with all previous amendments to this contract cause the total amended contract price to exceed 120 percent of the original contract price, as stated in the Seller’s proposal and accepted by the Owner, that amendment and all subsequent amendments

281
§§ 1726.316–1726.319

The contract form in this section shall be used when required by this part.

**Construction Contract—Generating, RUS Form 200.**

Notice and Instructions to Bidders

1. Sealed proposals for the furnishing, delivery and installation of equipment and materials for the electric generating plant of (hereinafter called the “Owner”) which is to be part of the system known as (hereinafter called the “Project”) will be received by the Owner on or before o’clock on , , at at which time and place the proposals will be publicly opened and read. Any proposal received subsequent to the time specified will be promptly returned to the Bidder unopened.

2. Obtaining Documents. The Plans and Specifications together with all necessary forms and other documents for bidders may be obtained from the Owner or from the Engineer, , at the latter’s office at .

3. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number, if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations of interlineations will be permitted, unless made before submission and initialed and dated.

4. Familiarity with Conditions. Prior to submission of the Proposal, the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Plans and Specifications, Construction Drawings and forms of Contractor’s Proposal and Acceptance, and Contractor’s Bond on file with the Owner and with the Engineer, and shall become informed as to the location and nature of the proposed construction, the ecological and environmental criteria to be followed, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of facilities required before and during the construction of the Project, general local conditions and all other matters that may affect the cost and the time of completion of the Project. Bidders will be required to comply with all applicable statutes, regulations, etc., including those pertaining to the licensing of contractors, and the so-called “Kick-Back” Statute (48 Stat. 948) and regulations issued pursuant thereto.

5. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

6. The Time for Completion of the Project shall be as specified by the Engineer in the Proposal.

7. Bid Bond. Each Proposal must be accompanied by a Bid Bond in the form attached or a certified check on a bank that is a member of the original purchasers.

8. Obtaining Documents. The Plans and Specifications may be examined at the office of the Owner or at the office of the Engineer. A copy of the Loan Contract (if the Project is to be financed, in whole or in part, pursuant to a loan contract) between the Owner and the United States of America acting through The Administrator of the Rural Utilities Service (hereinafter called the “Administrator”), and of the Loan Contract between the Owner and any other lender may be examined at the office of the Owner. Each set of documents will have a serial number, given by the Engineer, and the number of each set with the name of the purchaser will be recorded by the Engineers. Bids will be accepted only from the original purchasers.

9. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number, if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations of interlineations will be permitted, unless made before submission and initialed and dated.

10. Proposals will be submitted to the Owner only for those prequalified bidders invited to submit a Proposal.

11. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number, if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations of interlineations will be permitted, unless made before submission and initialed and dated.

12. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

13. The Time for Completion of the Project shall be as specified by the Engineer in the Proposal.

14. Bid Bond. Each Proposal must be accompanied by a Bid Bond in the form attached or a certified check on a bank that is a member of the original purchasers.

15. Proposals will be submitted to the Owner only for those prequalified bidders invited to submit a Proposal.

16. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number, if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations of interlineations will be permitted, unless made before submission and initialed and dated.

17. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

18. The Time for Completion of the Project shall be as specified by the Engineer in the Proposal.

19. Bid Bond. Each Proposal must be accompanied by a Bid Bond in the form attached or a certified check on a bank that is a member of the original purchasers.
Section 1. Offer to Furnish, Deliver and Install Equipment and Materials

By the (hereinafter called the “Owner”)
and install the materials, supplies and equipment (hereinafter called the "Project") described in the plans, specifications and drawings (hereinafter called the "Specifications") attached hereto and made a part hereof, financed in part or whole by a loan to the Owner by the United States of America, acting through the Administrator of the Rural Utilities Service (hereinafter called the "Administrator") and designated ______.

Section 2. Familiarity with Conditions.

The Bidder has made a careful examination of the site of the Project and of the Plans and Specifications, Construction Drawings, and form of Contractor's Bond attached hereto, and has become informed as to the location and nature of the proposed construction, the transportation facilities and the kind of facilities required before and during the construction of the Project, and has become acquainted with the labor conditions, the ecological and environmental criteria to be followed, state and local laws and regulations which would affect work on the proposed construction.

Section 3. License. The Bidder warrants that a Contractor's License is ______, is not ______, required, and if required, it possesses Contractor's License No. ______ of the State of ______, in which the Project is located and said license expires on ______.

Section 4. The Bidder warrants that this Proposal is made in good faith and without collusion or connection with any person or persons bidding for the same work.

Section 5. The Bidder warrants that it possesses adequate financial resources and agrees that in the event this Proposal is accepted and a Contractor's Bond is required, it will furnish a Contractor's Bond in the form attached hereto, in a penal sum not less than the maximum Contract Price, with a surety or sureties listed by the United States Treasury Department as Acceptable Sureties.

In the event that the surety or sureties on the performance bond delivered to the Owner contemporaneously with the execution of the Contract or on any bond or bonds delivered in substitution thereof or in addition thereto shall at any time become unsatisfactory to the Owner or the Administrator, the Bidder agrees to deliver to the Owner another or an additional bond.

The Bidder understands, that, if in submitting this Proposal, the Bidder has made any change in the form of Proposal furnished by the Owner, that the Owner and the Administrator may evaluate the effect of such change as they see fit or they may exclude the Proposal from consideration in determining the award of the contract.

Article II—Construction

Section 1. Bid Price. The Bidder will construct the Project for the following sum:

<table>
<thead>
<tr>
<th>Base Bid</th>
<th>Dollars ($)</th>
<th>Alternate No. 1</th>
<th>Dollars ($)</th>
<th>Alternate No. 2</th>
<th>Dollars ($)</th>
</tr>
</thead>
</table>

Section 2. Taxes. The price quoted herein includes all amounts which the Bidder estimates will be payable by the Bidder or the Owner on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies or equipment or services or labor of installation to be incorporated in the Project. The Bidder will pay all such taxes and will furnish to appropriate taxing authorities any required information and reports pertaining thereto.

Section 3. Time and Manner of Construction.

(a) The time of Completion of Construction of the Project is of the essence of this Contract. The Bidder will commence the work within ______ calendar days after the Owner shall have given the Bidder written notice to commence construction, will prosecute diligently and complete such construction to the satisfaction of the Owner and the Administrator within ______ calendar days after giving of such notice.

(b) The time of Completion of Construction shall be extended for the period of any reasonable delay due exclusively to causes beyond the control and without fault of the Bidder, including Acts of God, fires, strikes, floods, inability to obtain materials, changes in the Specifications as herein provided and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: Provided, however, that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefore in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

(c) In the sequence of construction, the Owner, acting through the Engineer, shall have the right to direct the Bidder to perform any part or parts of the work which is to be performed at the site of the Project before any other part or parts, of such work and the Bidder agrees to comply with all such directions. The Bidder shall comply with all other reasonable directions of the Owner.

(d) The Owner, acting through the Engineer, may from time to time during the progress of the construction of the Project make such changes, additions to or omissions from the Plans and Specifications and sequence of construction provided for in the previous paragraph which are part of the Contractor's Proposal as conditions may warrant: Provided, however, that if any
change in the construction to be done shall require an extension of time, a reasonable extension will be granted if the Bidder shall make a written request therefor to the Owner within ten (10) days after any such change is made. If the cost of the Project to the Bidder to make the change shall be increased or decreased, the contract price shall be amended by an amount equal to the reasonable cost thereof in accordance with a construction amendment signed by the Owner and the Bidder and approved by the Administrator, but no claim for additional compensation for any such change or addition will be considered unless the Bidder shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition. The reasonable cost of any increase or decrease in the contract price covered by contract amendment as outlined above, in the absence of other mutual agreement, shall be computed on the basis of the direct cost of materials, i.e., the site of the Project, plus the direct cost of labor necessary to incorporate such materials into the Project (including actual cost of payroll taxes and insurance), plus percent of the direct cost of materials and labor. Labor costs shall be limited to the direct costs for workmen and foremen. Costs for profit and overhead for subcontractors, if any, Bidder’s main office overhead, job office overhead and superintendent shall not be included.

Section 4. The Bidder agrees that in the event this Proposal is accepted it will make available for use in connection with the proposed construction all necessary tools and equipment and qualified superintendents and foremen.

Section 5. Supervision and Inspection.

a. The Bidder will give sufficient supervision to the work, using its best skill and attention. The Bidder will carefully study and compare all drawings, specifications and other instructions and will at once report to the Owner any error, inconsistency or omission which it may discover. The Bidder shall cause the construction work on the Project to receive constant supervision by a competent superintendent (hereinafter called the “Superintendent”) who shall be present at all times during working hours where construction is being carried on. The Bidder shall also employ, in connection with the construction of the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent shall be binding upon the Bidder.

b. The Owner reserves the right to require the removal from the Project of any employee of the Bidder if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner or the Supervisor, if any, shall have the right to require the Bidder to increase the number of its employees and to increase or change the amount or kinds of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner or Supervisor; but the failure of the Owner or Supervisor to give any such directions shall not relieve the Bidder of its obligations to complete the work within the time and in the manner specified in this Proposal.

c. The manner of construction of the Project, and all materials and equipment used therein, shall be subject to the inspection, tests and approval of the Owner and the Administrator, and the Bidder shall furnish all information required by the Owner or by the Administrator concerning the nature or source of any materials incorporated or to be incorporated in the Project. The Owner and the Administrator shall have the right to inspect all payrolls, invoices of materials, and other data and records of the Bidder and of any subcontractor, relevant to the construction of the Project. The Bidder shall provide all reasonable facilities necessary for such inspection and tests and shall maintain an office at the site of the Project, with telephone service where obtainable and at least one office employee to whom directions and instructions of the Owner may be delivered. Delivery of such directions or instructions in writing to the employee of the Bidder at such office shall constitute delivery to the Bidder. The Bidder shall have an authorized agent accompany the Engineer when final inspection is made and, if requested by the Owner, when any other inspection is made.

d. In the event that the Owner through its Engineer, or the Administrator, shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Bidder and the Bidder’s Surety or Sureties, if any, to have an inspection made by an engineer approved by the Owner and the Administrator for the purpose of determining the exact nature, extent and location of such defects.

e. The Engineer may recommend to the Owner that the Bidder suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions.

1 As long as the total price of this contract including all amendments is less than 120 percent of the original contract price as stated in the acceptance hereto, amendments executed on RUS Form 238 are not subject to the approval of the Administrator. Whenever an amendment to this contract causes the total amended contract to exceed 120 percent of the original contract price, that amendment and all subsequent amendments to this contract shall be made subject to the approval of the Administrator.
as are considered unfavorable for the satisfactory prosecution of the work or because of the failure of the Bidder to comply with any of the provisions of the Contract: Provided, however, that the Bidder shall not suspend work pursuant to this provision without written authority from the Owner to do so. The time of completion hereinabove set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Bidder to comply with any of the provisions of this Contract. In the event that work is suspended by the Bidder with the consent of the Owner, the Bidder before resuming work shall give the Owner at least twenty-four (24) hours notice thereof in writing.

Section 6. Defective Materials and Workmanship.

a. The acceptance of any materials, equipment or any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such materials, equipment, or workmanship shall be found to be defective after delivery or installation, and any such materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be, including the installation and removal thereof, by and at the expense of the Bidder. Any such condemned material or equipment shall be immediately removed from the site of the Project by the Bidder at the Bidder's expense. The Bidder shall not be entitled to any payment hereunder so long as any defective materials, equipment or workmanship in respect to the Project, of which the Bidder shall have had notice, shall not have been replaced or remedied, as the case may be.

b. Notwithstanding the acceptance of workmanship, materials, supplies or equipment, or the giving of any certificate with respect to the completion of the work, if during the construction or within one year after such completion, or within such longer period as the Project or any part thereof may be guaranteed by other provisions of the Contract or the Specifications, the workmanship, materials, supplies or equipment shall be found to be defective or not in conformity with the requirements of the Specifications, the Bidder shall replace such defective materials or equipment or remedy any such defective workmanship within thirty (30) days after notice of the existence thereof has been given to the Bidder by the Owner. In event of failure by the Bidder to do so, the Owner may replace such defective materials or equipment or remedy such defective workmanship, as the case may be, and in such event the Bidder shall pay to the Owner the cost and expense thereof.

Article III—Payments and Release of Liens

Section 1. Payments to Bidder

a. Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Bidder for construction accomplished during the preceding calendar month on the basis of estimates thereof certified to by the Bidder, and approved by the Engineer and by the Owner solely for the purpose of payment: Provided, however, that such approval shall not be deemed approval of the workmanship or materials; and provided further, that in estimating the amount of construction accomplished, consideration shall be given only to equipment and materials incorporated into the Project and equipment and materials delivered to the site in accordance with approved shipping schedule. Only ninety percent (90%) of each such estimate approved during the construction of the Project shall be paid by the Owner to the Bidder prior to Completion of the Project. Upon completion by the Bidder of the construction of the Project, the Engineer shall inspect the work performed hereunder and if he shall find the work acceptable and all provisions hereunder fully performed, he shall so certify to the Owner and shall certify the balance found to be due the Bidder.

The Certificate of Completion, Contract Construction, RUS Form 187, a copy of which is attached hereto, after it has been signed by the Engineer and certified to by the Owner and the Bidder shall thereupon be submitted to the Administrator for his approval and when such approval has been given, the Owner shall make payment to the Bidder of all unpaid amounts to which the Bidder shall be entitled hereunder unless withheld because of the fault of the Bidder.

b. Interest at the rate of ______ percent (____ %) per annum shall be paid by the Owner to the Bidder on all unpaid balances due the Bidder commencing fifteen (15) days after the due date. Provided that the delay in payment beyond the due date is not caused by any condition within the control of the Bidder. The due date for purposes of such monthly payment shall be the fifteenth day of each calendar month provided (1) the Bidder on or before the fifth day of such month shall have submitted its certification of construction completed during the preceding month, and (2) the Owner on or before the fifteenth day of such month shall have approved such certification. If, for any reasons not due to the Bidder's fault, such approval shall not have been given on or before the fifteenth day of such month, the due date for purposes of this subsection “b” shall be

The Owner shall insert a rate equal to the lowest “Prime Rate” listed in the “Money Rates” section of the Wall Street Journal on the date such invitation to bid is issued.
the fifteenth day of such month notwithstanding the absence of the approval of the certification.

(c) No payments shall be due while the Bidder is in default in respect of any of the provisions of this Proposal and the Owner may withhold from the Bidder the amount of any claim by a third party against either the Bidder or the Owner based upon an alleged failure of the Bidder to perform the work hereunder in accordance with the provisions of this Proposal.

Section 2. Release of Liens and Certificate of Contractor. (See Sample RUS Form 224, Waiver and Release of Lien, and sample RUS Form 231, Certificate of Contractor.) Upon the completion by the Bidder of the construction of the Project but prior to the payment to the Bidder of any amount in excess of ninety percent (90%) of the total cost of construction, the Bidder shall deliver to the Owner, in duplicate, releases of all liens and of rights to claim any lien, in the form attached hereto, from all manufacturers, materialmen, and subcontractors furnishing services or materials for the Project and a certificate in the form attached hereto to the effect that all labor used on or for the project has been paid and that all such releases have been submitted to the Owner for approval.

Section 3. Payments to Materialmen and Subcontractors. The Bidder shall pay each materialman, and each subcontractor, if any, within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Bidder for and on account of materials furnished or construction performed by each materialman or each subcontractor.

Article IV—Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property. The Bidder shall at all times exercise reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State and Municipal safety laws and building and construction codes. All machinery and equipment and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America, unless such instructions are incompatible with Federal, State or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

(a) The Bidder shall at all times keep the premises free from accumulations of waste materials or rubbish caused by his employees or work, and at the completion of the work he shall remove all rubbish from and about the Project and all his tools, scaffolding and surplus materials and shall leave his work "broom clean." The Bidder shall dispose of waste material by burning it on the work site or in a manner approved by local authorities, but shall not dispose of any waste materials or rubbish by open burning. The Bidder shall provide chemical sanitary facilities which may be required from time to time to maintain the health and safety of his employees and the employees of others and the Bidder shall comply with applicable local, State and Federal laws or regulations.

(b) The Bidder will perform the work in such a manner as to maximize preservation of aesthetics and conservation of natural resources, and minimize marring and scarring of the landscape, erosion of soils and oil spillage. There will be no depositing of trash in streams or waterways. Herbicides, other chemicals or their containers will not be deposited in or near streams or waterways.

(c) The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control, in whole or in part as hereinafter provided, shall be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection therewith and the materials, supplies and equipment to be used therein shall be borne by the Bidder, except risk of loss or of damage to materials or equipment furnished for or used in connection with the Project by the Owner, Bidder or any sub-contractor, caused by fire, lightning, wind damage, explosion, riot or civil commotion, aircraft and other vehicles, and smoke damage (against which perils the Owner will maintain insurance, hereinafter called "Builder's Risk Insurance"). The Bidder will make good and repair all injuries and damages to the Project, or any portion thereof under the control of the Bidder by reason of any act of God, or any other casualty or cause whether or not the same shall have occurred by reason of the Bidder's negligence, except damage covered by the Owner's Builder's Risk Insurance.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims.
§ 726.320

7 CFR Ch. XVII (1-1-98 Edition)

filed or asserted against Owner, its directors, officers, and employees, or Owner’s property or facilities, for services performed or materials or equipment furnished by Bidder, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Bidder shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Bidder does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Bidder.

(iii) Bidder shall provide to Owner’s satisfaction evidence of Bidder’s ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

(d) The Bidder shall submit to the Owner monthly reports in duplicate of all accidents giving such data as may be prescribed by the Engineer.

(e) Upon violation by the Bidder of any of the provisions of this section, after written notice of such violation given to the Bidder by the Engineer or the Owner, the Bidder shall immediately correct such violation. Upon failure of the Bidder so to do the Owner may correct such violation at the Bidder’s expense: Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder’s expense without such prior notice to the Bidder.

Section 2. Insurance. The Bidder shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers’ compensation and employers’ liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, or architect under the contract. If any employer or employee is not subject to the workers’ compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers’ compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single limit of $1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than $1 million per person and $1 million per occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsections “b” and “c” of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections “b” and “c” of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Assignment of Guarantees. All guarantees of materials and workmanship running in favor of the Bidder shall be transferred and assigned to the Owner prior to the time the Bidder receives final payment.

Section 4. Delivery of Possession and Control to Owner. Upon written request of the Owner, the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of any portion of the Project to the Owner, the risks and obligations of the Bidder as set forth in Article IV, Section 1c hereof with respect to such portion so delivered to the Owner shall be terminated. Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials and workmanship as contained in Article II, Section 6 hereof.

Article V—Remedies

Section 1. Completion on Bidder’s Default. If default shall be made by the Bidder or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the Surety or Sureties, if any, upon the Contractor’s Bond
Section 1. Definitions.

a. The term "Administrator" shall mean the Administrator of the Rural Utilities Service of the United States of America and his duly authorized representatives or any other person in whom or authority in which may be vested the duties and functions which the Administrator is now authorized by law to perform.

b. The term "Engineer" shall mean the engineer employed by the Owner, with the approval of the Administrator, to provide engineering services for the Project, and said Engineer's duly authorized assistants and representatives.

c. The term "Supervisor" shall mean the person, if any, appointed by the Administrator as the representative of the Government under the provisions of the Loan Contract providing for such appointment in special cases. The term is limited to such special representative of the Government, if any, who is responsible exclusively to the Administrator and does not refer to the Manager or any other person employed by the Owner and responsible to it.

d. The term "Completion of Construction" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof except the Bidder's obligations in respect of Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof. The term "Completion of the Project" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion, signed by the Engineer and approved in writing by the Owner and the Administrator, shall be the sole and conclusive evidence as to the date of Completion of Construction and as to the fact of Completion of the Project.

Section 2. Purchase of Materials. The Bidder shall purchase all materials, supplies, and equipment outright and not subject to any conditional sales agreements, bailment lease or other agreement reserving unto the seller any right, title or interest therein. All materials, supplies and equipment shall be new and shall become the property of the Owner when erected in place, or when the Owner shall have made any payment to the Bidder in respect of such materials; whichever shall occur first.

Section 3. Materials and Supplies. In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been manufactured in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Bidder agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.

Section 4. Patent Infringement. The Bidder shall save harmless and indemnify the Owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

Section 5. Compliance with Statutes and Regulations. The Bidder shall comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Bidder acknowledges that it is familiar with the...
§ 1726.320

Rural Electrification Act of 1936, as amended, the so-called “Kick-Back” Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. Section 287 and 1001, as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental Agencies having jurisdiction.

(a) Bidder’s Representations.

The Bidder represents that:

(1) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotions or transfer; recruitment or employment advertising; layoff or termination; rates of pay or other forms of compensation; and selection of training, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Bidder will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers’ representative of the Bidder’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and the rules, regulations and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Bidder’s noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be canceled, terminated, or suspended in whole or in part, and the Bidder may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

(7) The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Bidder will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance; Provided, however, that in the event Bidder becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.

(c) Certificate of Nonsegregated Facilities.

The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform...
§ 1726.321 Right-of-way clearing contract, RUS Form 201.

The contract form in this section shall be used when required by this part. This form refers to guide drawings, which do not contain requirements, and, hence, are not included in this part. The guide drawings are included in the printed form available from RUS (see § 1726.300).

**Right-of-Way Clearing Contract**

**Contractor’s Proposal**

(Proposal shall be submitted in ink or typewritten)

To: ___________ (Hereinafter called the “Owner”)

**Article I—General**

Section 1. Offer to Clear. The undersigned (hereinafter called the “Contractor”) hereby proposes to furnish all materials, equipment, machinery, tools, labor, transportation and other means required to clear rights-of-way for the rural electric system bearing the RUS Designation ___________.

Section 2. Specification for Clearing. The Contractor shall be responsible for and shall clear all rights-of-way within the Project described in the Project Area and for which the Contractor has been awarded the Contract.

Section 3. Secure Right-of-Way. The Contractor shall have the legal right to procure all easements, licenses, permits, and other rights-of-way required for the construction of the Project herein described. The Contractor shall secure all necessary permits, easements, and licenses, if any, from all public authorities and from all private owners of the Project Area.

Section 4. Acceptance. (Proposal shall be submitted in ink or typewritten)

By ___________ (President)

___________ (Title)

___________ (Address)

Attest: ___________ (Secretary)

Date ________

The Proposal must be signed with the full name of the Bidder. If the Bidder is a partnership, the Proposal must be signed in the partnership name by a partner. If the Bidder is a corporation, the Proposal must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

Section 5. Acceptance.

Subject to the approval of the Administrator, the Owner, ___________, hereby accepts the Proposal of the above-named Bidder for the construction of the Project therein described for the Base Bid of $_________ and Alternate No. 1 $_________, Alternate No. 2 $_________.

The total contract price is $_________.

By ___________ (President)

Attest: ___________ (Secretary)

Date of Contract ________

[F] (End of clause)
Section 2. Description of Project. The Project will consist of approximately miles of right-of-way clearing. The Project is located in _______ counties in the State of ________.

Section 3. Description of Contract. The Description of Units, Specifications, Drawings and Plans attached hereto and made a part hereof, together with the Proposal and Acceptance, constitute the Contract. The Plans consisting of maps and plan and profile sheets if transmission clearing is included, showing the number and types of right-of-way sections to be cleared, along with other special drawings are identified as follows:

Section 4. Familiarity with Conditions. The Contractor warrants that it has made careful examination of the site of the Project and of the Specifications, Drawings, and form of Contractors’ Bond attached hereto, and has become informed as to the location and nature of the proposed work, the transportation facilities, the kind and character of soil and terrain to be encountered, and the kind of facilities required for undertaking and completing the Project, and has become acquainted with the labor conditions, state and local laws and regulations which would affect the proposed work.

Section 5. License. The Contractor warrants that a Contractor’s License is _______ which is not _______ required, and if required, it possesses Contractor’s license number _______ in the State of _______ in which the Project is located and said license expires on _______.

Section 6. Contractor’s Bond. If the estimated cost of the clearing of a Section shall exceed $100,000, the Contractor agrees to furnish, prior to the commencement of work on such Section, a bond in the penal sum of not less than the estimated cost of the Section in the form attached hereto with a Surety or Sureties listed by the United States Treasury Department as acceptable sureties. If the Surety or Sureties on the performance bond delivered to the Owner shall at any time become unsatisfactory to the Owner, the Contractor agrees to deliver to the Owner another or an additional bond. Such bond shall be as determined by the Contractor subject to the approval of the Owner.

Section 7. Taxes. The unit prices for Right-of-Way Clearing Units in this Proposal include any sums which are or may be payable by the Contractor on account of taxes imposed by any taxing authority on payment for materials furnished or services performed by the Contractor under the terms of this Contract.

Article II—Construction

Section 1. Time and Manner of Work.
(a) The Contractor agrees to commence work on the Project on a date (hereinafter called the “Commencement Date”) which shall be determined by the Owner after its acceptance of this Proposal, but in no event will the Commencement Date be later than _______ calendar days after date of acceptance of this Proposal. The Contractor further agrees to prosecute diligently and to complete clearing in strict accordance with the Specifications and Drawings within _______ calendar days (excluding Sundays) after Commencement Date.

(b) The time for Completion of Clearing shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Contractor, including acts of God, fires, floods, inability to obtain materials and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: Provided, however, that no such extension of time for completion shall be granted the Contractor unless within ten (10) days after the happening of any event relied upon by the Contractor for such an extension of time the Contractor shall have made a request therefor in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

(c) The sequence of construction shall be as set forth below, the numbers or names being the designations of extensions or areas hereinafter called the “Sections”) corresponding to the numbers or names shown on the maps attached hereto, or if no Sections are set forth below, the sequence of construction shall be as determined by the Contractor subject to the approval of the Owner.

(d) The Owner may from time to time during the progress of the work on the Project make such changes in, additions to or subtractions from the Specifications, Drawings and sequence of work provided for in the previous paragraph which are part of the Contractor’s Proposal as conditions may warrant: Provided, however, that if any change in the work to be done shall require an extension of time, a reasonable extension will be granted if the Contractor shall make a written request therefor to the Owner within ten (10) days after any such change is made. And provided further, that if the cost of the Contractor of completion of the Project shall be materially increased by any such change or addition, the Owner shall pay the Contractor for the reasonable cost thereof in accordance with a Contract Amendment signed by the Owner and the Contractor, but no claim for additional compensation for any such change or addition will be considered unless the Contractor shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition.
(e) The Contractor will not perform any work hereunder on Sundays unless there is urgent need for such Sunday work and the Owner consents thereto in writing. The time for completion specified in subsection (a) of this Section 1 shall not be affected in any way by inclusion of this subsection by the Owner's consent or lack of consent to Sunday work hereunder.

Section 2. Environmental Protection. The Contractor shall perform work in such a manner as to maximize preservation of beauty, conservation of natural resources, and minimize marring and scarring of the landscape and siting of streams. The Contractor shall not deposit trash in streams or waterways, and shall not deposit herbicides or other chemicals or their containers in or near streams, waterways or pastures. The Contractor shall follow, under the general direction of the Engineer, the criteria relating to environmental protection as specified herein by the Engineer.

Section 3. Supervision and Inspection.

(a) The Contractor shall cause the work on the Project to receive constant supervision by a competent superintendent (hereinafter called the "Superintendent") who shall be present at all times during working hours where work is being carried on. The Contractor shall also employ in connection with the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent shall be binding upon the Contractor.

(b) The Owner reserves the right to require the removal from the Project of any employee of the Contractor if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner shall have the right to require the Contractor to increase the number of its employees and to increase or change the amount or kind of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner; but the failure of the Owner to give any such directions shall not relieve the Contractor of its obligations to complete the work within the time and in the manner specified in this Proposal.

(c) The manner of performance of the work, and all equipment used therein, shall be subject to the inspection and approval of the Owner. The Owner shall have the right to inspect all payrolls and other data and records of the Contractor relevant to the work. The Contractor will provide all reasonable facilities necessary for such inspection. The Contractor shall have an authorized agent accompany the inspector when final inspection is made and, if requested by the Owner, when any other inspection is made.

(d) In the event that the Owner shall determine that the work contains or may contain numerous defects, it shall be the duty of the Contractor and the Contractor's Surety or Sureties to have an inspection made by an engineer approved by the Owner for the purpose of determining the exact nature, extent and location of such defects. It shall be the duty of the Owner, when any other inspection is made and, if requested by the Owner, to accompany the inspector when final inspection is made and, if requested by the Owner, to request the Contractor to provide all reasonable facilities necessary for such inspection.

(e) The Owner may request to the Contractor to perform any work wholly or in part at such time as the Owner may deem necessary, to unsuitable weather or such other conditions as are considered unfavorable for the satisfactory prosecution of the work or because of the failure of the Contractor to comply with any of the provisions of the Contract. Provided, however, that the Contractor shall not suspend work pursuant to this provision without written authority from the Owner so to do. The time of completion hereinafter set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Contractor to comply with any of the provisions of this Contract. In the event that work is suspended by the Contractor with the consent of the Owner, the Contractor before resuming work shall give the Owner at least twenty-four (24) hours' notice thereof in writing.

Section 4. Unsuitable Workmanship. The acceptance of any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such workmanship shall be found to be unsuitable. Workmanship found unsuitable before final acceptance of the work shall be remedied, by and at the expense of the Contractor. The Contractor shall not be entitled to any payment hereunder so long as any unsuitable workmanship in respect to the Project, of which the Contractor shall have had notice, shall not have been remedied.

Article III—Payment

Section 1. Payments to Contractor

(a) Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Contractor for work accomplished during the preceding calendar month on the basis of a statement of completed clearing units furnished and certified to by the Contractor and approved by the Owner solely for the purposes of payment. Provided, however, that such approval by the Owner shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such statement approved during the clearing of a Section shall be paid by the Owner to the Contractor prior to completion of the Section. Upon completion by the Contractor of the clearing of a Section, the Contractor shall prepare a Final Inventory of the Section showing the total number and character of clearing units and shall deliver to the Owner a Certificate of Contractor and Indemnity Agreement in the form attached hereto, showing the total cost of the work performed and stating (1) that
all persons who have furnished labor in connection with the Project and subcontractors who have furnished services for the Project have been paid in full and (2) that the Contractor shall hold the Owner harmless against any liens arising out of the Contractor’s performance hereunder which may have been or may be filed against the Owner. Upon the approval of such certificate, the Owner shall make payment to the Contractor of all amounts to which the Contractor shall be entitled thereunder which shall not have been paid.

(b) The Contractor shall be paid on the basis of the number of clearing units actually completed at the direction of the Owner shown by the Final Inventory: Provided, however, that the total cost shall not exceed the total contract price for the Project as set forth in the Acceptance, unless such excess shall have been approved in writing by the Owner.

(c) No payment shall be due while the Contractor is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Contractor the amount of any claim by a third party against either the Contractor or the Owner based upon an alleged failure of the Contractor to perform the work hereunder in accordance with the provisions of the Contract.

(d) If no Sections are designated in Article II, Section 1 (c) the term “Section” shall mean for purposes of this subsection (a) and Article IV, Section 3 (b) only, a part of the Project as designated by the Owner which represents at least twenty-five percent (25%) of the total contract price as stated in the Acceptance.

(e) Interest at the rate of ______ percent1 per annum shall be paid by the Owner to the Contractor on all unpaid balances due on monthly statements, commencing fifteen (15) days after the due date; provided the delay in payment beyond the due date is not caused by any condition within the control of the Contractor. The due date for purposes of such monthly payment shall be the fifteenth day of each calendar month provided (1) the Contractor on or before the fifth day of such month shall have submitted its certification of right-of-way clearing units completed during the preceding month and (2) the Owner on or before the fifteenth day of such month shall have approved such certification. If for reasons not due to the Contractor’s fault, such approval shall not have been given on or before the fifteenth day of such month, the due date for purposes of this subsection (e) shall be the fifteenth day of such month notwithstanding the absence of the approval of the certification.

(f) Interest at the rate of ______ percent2 per annum shall be paid by the Owner to the Contractor on the final payment for the Project or any completed Section thereof, commencing fifteen (15) days after the due date. The due date for purposes of such final payment shall be the date of approval by the Owner of the Final Inventory and receipt of the Certificate of Contractor and Indemnity Agreement as conditions precedent to the making of final payment.

Section 2. Payments to Subcontractors. The Contractor shall pay each subcontractor, if any, within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Contractor for and on account of services performed by each subcontractor.

Article IV—Particular Undertakings of the Contractor

Section 1. Protection to Persons and Property. The Contractor shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, state, and municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the “Manual of Accident Prevention in Construction” of the Associated General Contractors of America unless such instructions are incompatible with Federal, state, or municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

(a) The Contractor shall so conduct work on the Project as to cause the least possible obstruction of public highways.

(b) The Contractor shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances, and regulations or by local conditions.

(c) The Contractor shall do all things necessary or expedient to properly protect any and all parallel, converging, and intersecting lines, joint line poles, highways, and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways, or other property are damaged in the course of work on the Project the Contractor shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

(d) Where the right-of-way of the Project traverses cultivated lands, the Contractor shall limit the movement of his crews and equipment so as to cause as little damage as possible to the crops on such lands.

1The Owner shall insert a rate equal to the lowest “Prime Rate” listed in the “Money Rates” section of the Wall Street Journal on the date such invitation to bid is issued.

2See Footnote 1.
possible to crops, orchards, or property and shall endeavor to avoid marring the lands. All fences which are necessarily opened or moved during work on the project shall be replaced or services performed by the Contractor, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of such lien or claim. Contractor shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly if Contractor does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Contractor. (iii) Contractor shall provide to Owner's satisfaction evidence of Contractor's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

(b) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Contractor, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of such lien or claim. Contractor shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly if Contractor does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Contractor. (iii) Contractor shall provide to Owner's satisfaction evidence of Contractor's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

(ii) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Contractor, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of such lien or claim. Contractor shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly if Contractor does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Contractor. (iii) Contractor shall provide to Owner's satisfaction evidence of Contractor's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

1. Insurance. The Contractor shall provide insurance in the amounts of insurance:

(a) Worker's compensation and employer's liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employee or employee is not subject to workers'
§ 1726.321  

compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employees were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single limit of $1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than $1 million per person and $1 million each occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Delivery of Possession and Control to the Owner.

(a) Upon written request of the Owner, the Contractor shall deliver to the Owner full possession and control of any portion of the Project provided the Contractor shall have been paid at least ninety percent (90%) of the cost of the work of such portion. Upon such delivery of possession and control to the Owner, the risks and obligations of the Contractor as set forth in Section 1(e) of this Article IV with respect to such portion so delivered to the Owner, shall be terminated: Provided, however, that nothing herein contained shall relieve the Contractor of any liability with respect to unsuitable workmanship as specified in Article II, Section 4.

(b) Where the construction of a Section as hereinbefore defined in Article II, Section 1(c) and Article III, Section 1(d) shall have been completed by the Contractor, the Owner agrees, after receipt of a written request from the Contractor, to accept delivery of possession and control of such Section upon having inspected the Section and having found the work acceptable. Upon such delivery of the possession and control of any such Section to the Owner, the risk and obligations of the Contractor as set forth in Article IV, Section 1(e) hereof with respect to such Section so delivered to the Owner shall be terminated: Provided, however, that nothing herein contained shall relieve the Contractor of any liability with respect to unsuitable workmanship as specified in Article II, Section 4 hereof.

Section 4. Assignment of Guarantees. All guarantees of materials and workmanship running in favor of the Contractor shall be transferred and assigned to the Owner prior to the time the Contractor receives final payment for any Section.

Article V—Remedies

Section 1. Completion on Contractor's Default. If default shall be made by the Contractor or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Contractor and the Surety, if any, a written notice requiring the Contractor to cause such default to be corrected forthwith.

Unless within twenty (20) days after the service of such notice upon the Contractor and the Surety, if any, such default shall be corrected or arrangements for the correction thereof satisfactory to the Owner shall be made, the Owner may take over the work on the Project and prosecute the same to completion by contract or otherwise for the account and at the expense of the Contractor, and the Contractor shall be liable to the Owner for any cost or expense in excess of the contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the Project, any materials, tools, supplies, equipment, appliance, and plant belonging to the Contractor or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims, or demands which the Contractor may have against third persons in connection with this Proposal and for such purpose the Contractor does hereby assign, transfer, and set over unto the Owner all such rights, claims, and demands.

Section 2. Liquidated Damages. The time of the Completion of Clearing is of the essence of the Contract. Should the Contractor neglect, refuse or fail to complete the clearing within the time herein agreed upon, after
Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Owner shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election: Provided, however, that the provision of Section 2 of this Article shall be the exclusive measure of damages for failure by the Contractor to complete the clearing within the time herein agreed upon.

Section VI—Miscellaneous

Section 1. Definitions.

(a) The term "Engineer" shall mean the engineer employed by the Owner to provide engineering services for the Project and said Engineer's duly authorized assistants and representatives. The term "Engineer" will mean "Owner" if no engineer is employed by the Owner to provide engineering services.

(b) The term "Completion of Clearing," shall mean full performance by the Contractor of the Contractor's obligations under the Contract and all amendments and revisions thereof except the Contractor's obligations in respect of furnishing (1) the "Certificate of Contractor and Indemnity Agreement" and (2) the Final Inventory both referred to in Article III, Section 1 hereof.

(c) The term "Completion" shall mean full performance by the Contractor of the Contractor's obligations under the Contract and all amendments and revisions thereof relating to any Section of the Project or to the Project.

Section 2. Patent Infringement. The Contractor shall save harmless and indemnify the Owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

Section 3. Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Contractor.

Section 4. Compliance with Statutes and Regulations. The Contractor will comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Contractor acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called "Kick-Back" Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. §§ 286, 287, 1001, as amended. The Contractor understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of governmental agencies having jurisdiction in the premises.

(a) Contractor's Representations. The Contractor represents that:

The Contractor agrees that it will obtain, prior to the award of any subcontract for more than $10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100. The Contractor agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this Contract will amount to more than $10,000, the Contractor will file such report, as required by law, and notify, the Owner in writing of such filing prior to the Owner's acceptance of this Proposal.

(b) Equal Opportunity Clause. During the performance of this Contract, the Contractor agrees as follows:

(1) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor will take affirmative action to ensure that applicants are employed and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to
§ 1726.321  

post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.  

(2) The Contractor will, in all notifications or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.  

(3) The Contractor will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or worker's representatives of the Contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.  

(4) The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations and relevant orders of the Secretary of Labor.  

(5) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations and orders.  

(6) In the event of the Contractor's noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations or orders, this Contract may be cancelled, terminated or suspended in whole or in part and the Contractor may be declared ineligible for further Government contracts or federally-assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in the said Executive Order or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.  

(7) The Contractor will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by rules, regulations or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, that in the event a Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Contractor may request the United States to enter into such litigation to protect the interests of the United States.  

(c) Certificate of Nonsegregated Facilities.  

The Contractor certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Contractor certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Contractor agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract.  

As used in this certification, the term “segregated facilities” means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Contractor agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.  

The Contractor will be under no obligation to obtain or assist in obtaining any franchises, authorizations, permits, or approvals required to be obtained by the Owner from Federal, state, county, municipal or other authority; any rights-of-way over private lands; or any agreements between the United States and third parties with respect to the construction and operation of the Project.  

Section 7. Nonassignment of Contract.  

The Contractor shall not assign the Contract effected by an acceptance of this Proposal or any part thereof or enter into any contract with any person, firm or corporation for the performance of the Contractor's obligations thereunder, or any part thereof, without the approval in writing of the Owner.  

Section & Extension to Successors and Assigns.  

Each and all of the covenants and agreements contained in the Contract effected by the acceptance of the Proposal shall extend to and be binding upon the successors and assigns of the parties thereto.
except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

**TM-12.** The unit is 1,000 feet in length and ____ (____) feet in width (to be measured ____ (____) feet on one side of pole line or centerline of structures) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed ____ in height, shall be clear from the ground up on one side of the line poles carrying conductors. (See Detail A, Drawing TM-12-2A). The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to the ground line (See Detail B, Drawing TM-12-2A). All trees and underbrush across the width of the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A). Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All length thus arrived at, added together and divided by 1,000 shall give the number of TM±12 units of clearing. The Contractor shall not remove or trim shade, fruit or ornamental trees unless so directed by the Engineer in writing. (See Detail D, Drawing TM-12-2A). The Engineer will select those trees of the right-of-way that he deems to be a hazard to the line and will designate them to the Contractor in writing as danger trees. When so designated, the Contractor shall remove or top such trees at his option except that the Contractor shall trim and not remove shade, fruit or ornamental trees unless otherwise directed by the Engineer in writing (See Drawings TM-12-2A and TM-13 for examples of danger trees).

The measurement of length of right-of-way to be cleared shall be considered as a straight line parallel to the horizontal line between poles or centerline of structures, such measurement of length to be based on maximum dimension of foliage (not trunk) projected to the ground line (See Details E, F, G, and H, Drawing TM-12-2A). Dead trees having no foliage shall be measured across the maximum dimension and multiplied by ___________.
two. (See Detail F, Drawing TM-12-2A). Each tree so removed shall be added together to determine the total length of clearing. All length thus arrived at, added together and divided by 1,000 shall give the number of TM-13 units (Example: Details E, F, G, and H, Drawing TM-12-2A, total 1 of a TM-13 unit).

TM-14. The unit is 1,000 feet in length and 1 foot in width (to be measured (____) feet on one side of right-of-way center line) of actual clearing of right-of-way. Trees and underbrush should be cleared from the ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide "undulating" boundaries. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the access road. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or center line of structures and across the maximum dimension of foliage cleared projected to the ground line (See Detail B, Drawing TM-12-2A). All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A). Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

TM-14 (1). This unit is identical with TM-14 except the full width of the right-of-way to be cleared shall be (____) feet wide (See Detail D, Drawing TM-12-2A).

TM-15. The unit is 1,000 feet in length and (____) feet in width (to be measured (____) feet on one side of the right-of-way center line) of actual clearing of the right-of-way. Trees and underbrush should be cleared from ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide a "feathered" appearance in the right-of-way. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the access road.

The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or center line of structures and across the maximum dimension of foliage cleared projected to ground line. (See Detail B, Drawing TM-12-2A). All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A). Spaces along the right-of-way, in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

TM-15 (1). This unit is identical to TM-15 except the full width of the right-of-way to be cleared shall be (____) feet wide (See Detail D, Drawing TM-12-2A).

Additional Requirements. (When specifying units denote type of disposal A or B).

A. Trees, brush, branches and refuse shall, without delay be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used).

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (Describe)

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Engineer but in no case shall it be required to be less than (____) feet. Brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used).

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (Describe)

Specifications

In preparing the right-of-way, trees shall be removed, underbrush cleared, and trees trimmed so that the right-of-way shall be clear from the ground up as specified. Trees fronting each side of the right-of-way shall be trimmed symmetrically unless otherwise directed by the Engineer. Dead trees beyond the right-of-way which would strike the line in falling shall be removed. Leaning trees beyond the right-of-way which would strike the line in falling and which would require topping if not removed may be removed or topped at the direction of the Engineer.

Where RC or TMC units are specified, the right-of-way shall be cleared in accordance with the instructions in the preceding paragraph and in addition, all stumps one-half inch in diameter and larger shall be sprayed as specified by the Engineer.

### TRANSMISSION CLEARING CONTRACT

**Notice and Instructions to Bidders**

1. Sealed proposals for the clearing of underbrush and trees from right-of-way, including the supply of necessary labor and equipment, of a rural electric system of designation will be received by the Owner on or before o'clock M., 19, at its office at , at which time and place the proposals will be publicly opened and read. Any proposal received subsequent to the time specified will be promptly returned to the Bidder unopened.

2. Description of Project. The Project will consist of approximately miles of right-of-way clearing. The Project is located in Counties in the State of .

3. Obtaining Documents. All necessary forms and other documents for bidders may be obtained from the Owner, or from the Engineer at the latter's office at . A copy of the Loan Contract (if the Project is to be financed in whole or in part, pursuant to a Loan Contract) between the Owner and the United States of America acting through the Administrator of the Rural Utilities Service (hereinafter called the Administrator), and any other lender's contract may be examined at the office of the Owner. Each set of documents will have a serial number, given by the Engineer, and the number of each set with the name of the recipient will be recorded by the Engineer. Bids will be accepted only from the original recipient.

4. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations or interlineations will be permitted, unless made before submission, and initialed and dated.

5. Familiarity with Conditions. Prior to the submission of the Proposal the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Specifications, Drawings, and forms of Contractor's Proposal and Contractor's Bond on file with the Secretary of the Owner and with the Engineer, and shall become informed as to the location and nature of the proposed work, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of facilities required before and during the construction of the Project. Bidders will be required to comply with all applicable statutes, regulations, etc., including those pertaining to the licensing of contractors, and the so-called "Kick-back Statute" (48 Stat. 948) and regulations issued pursuant thereto.

6. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

7. The time for Completion of the Project shall be as specified by the Engineer in the Proposal.

8. Bid Bond. Each Proposal must be accompanied by a bid bond in the form attached or a certified check on a bank that is a member of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum bid price. Each Bidder agrees, provided its Proposal is one of the three low Proposals, that, by filing its Proposal together with such bid bond or check in consideration of the Owner's receiving and considering such Proposals, said Proposal shall be firm and binding upon each such Bidder and such bond or check shall be held by the Owner until a Proposal is accepted and a satisfactory Contractor's Bond is furnished (where required) by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed sixty (60) days from the date hereinbefore set.

Total Distribution and Transmission

Acceptance

The Owner hereby accepts the foregoing Proposal of the Contractor, for the following:

Total Distribution Clearing: $

Total Transmission Clearing: $

The total contract price is $

By President
Secretary
Date of Contract

[End of clause]
for the opening of Proposals, whichever period shall be the shorter. If such Proposals is not one of the three low Proposals, the bid bond or check will be returned in each instance within a period of ten (10) days to the Bidder furnishing same.

9. Contractor's Bond. The successful Bidder will be required to execute two additional counterparts of the Proposal and, for a Contract in excess of $100,000, to furnish a Contractor's Bond in triplicate in the form attached hereto with sureties listed by the United States Treasury Department as Acceptable Sureties, in a penal sum not less than the contract price.

10. Failure to Furnish Contractor's Bond. Should the successful Bidder fail or refuse to execute such counterparts or to furnish a Contractor's Bond (where required) within ten (10) days after written notification of the acceptance of the Proposal by the Owner, the Bidder will be considered to have abandoned the Proposal. In such event, the Owner shall be entitled (a) to enforce the bid bond in accordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check, the difference (not exceeding the amount of the certified check) between the amount of the Proposal and such larger amount for which the Owner may in good faith contract with another party to construct the Project. The term “successful Bidder” shall be deemed to include any Bidder whose Proposal is accepted after another Bidder has previously refused or has been unable to execute the counterparts or to furnish a satisfactory Contractor's Bond (where required).

11. Contract is Entire Agreement. The Contract to be effected by the acceptance of the Proposal shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modification thereof resulting from any representation or promise made at any time by any officer, agent or employee of the Owner or by any other person.

12. Minor Irregularities. The Owner reserves the right to waive minor irregularities or minor errors in any Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence. Any such irregularities or errors so waived must be corrected on the Proposal in which they occur prior to the acceptance thereof by the Owner.

13. Bid Rejection. The Owner reserves the right to reject any or all Proposals.

14. Definition of Terms. The terms "Administrator," "Engineer," "Supervisor," "Project," "Completion of Construction" and "Completion of the Project" as used throughout this Contract shall be as defined in Article VI, Section 1, of the Contractor's Proposal.

The Owner represents:

a. All easements and rights-of-way, except as shown on maps included in the Specifications, have been obtained from the Owners of the properties across which the project is to be carried out (including tenants who may reasonably be expected to object to such clearing). The remaining easements and rights-of-way, if any, will be obtained as required to avoid delay in construction.

b. Prompt payment for the work to be done will be made with funds pursuant to the Loan Contract, or with funds otherwise available to the Owner.

If the Owner shall fail to comply with any of the undertakings contained in the foregoing representations or if any such representations shall be incorrect, the Bidder will be entitled to extension of time of completion for a period equal to the delay, if any, caused by the failure of the Owner to comply with such undertakings or by any such incorrect representation; provided the Bidder shall have promptly notified the Owner in writing of its desire to extend the time of completion in accordance with the foregoing.

By , 19

Contractor’s Proposal

(Proposal shall be submitted in ink or typewritten)

To: , 19 (Hereinafter called the "Owner")

Article I—General

Section 1. Offer to Clear. The undersigned (hereinafter called the 'Bidder') hereby proposes to furnish all materials, equipment, machinery, tools, labor, transportation and other means required to clear rights-of-way for rural electric system bearing the RUS Designation , in strict accordance with the Specifications and Drawings therefore, attached hereto and made a part hereof, for the prices hereinafter stated.

Section 2. Description of Contract. The Notice and Instructions to Bidders and Specifications attached hereto and made a part hereof, together with the Proposal and Acceptance constitute the contract. The Specifications consisting of maps, plan and profile sheets showing the number and types of right-of-way units that are to be cleared for each parcel, along with other special drawings are identified as follows:

Section 3. Familiarity with Conditions. The Bidder has made a careful examination of the site of the Project and of the Specifications, Drawings, and form of Contractor's Bond attached hereto, and has become informed as to the location and nature of the proposed work, the transportation facilities, the kind and character of soil and terrain to be encountered, and the kind of facilities required for undertaking and completing the Project, and has become acquainted with the
Section 4. License. The Bidder warrants that a Contractor's License is not required, and if required, it possesses Contractor's license number ______ for the State of ______ in which the Project is located and said license expires on ______. 19__.

Section 5. The Bidder warrants that this Proposal is made in good faith and without collusion or connection with any person or persons bidding for the same work.

Section 6. The Bidder warrants that in the event this Proposal is accepted and a Contractor's Bond is required, the Bidder agrees to deliver to the Owner an acceptable surety or sureties listed by the United States Treasury Department as Acceptable Sureties.

In the event that the surety or sureties on the performance bond delivered to the Owner contemporaneously with the execution of the Contract or on any bond or bonds delivered in substitution therefore or in addition thereto shall at any time become unsatisfactory to the Owner or the Administrator, the Bidder agrees to deliver to the Owner another or an additional bond.

Article II—Construction

Section 1. Time and Manner of Work. (a) Bidder agrees to commence work on the Project on a date (hereinafter called the "Commencement Date") which shall be determined by the Engineer after notice in writing of approval of the Contract by the Administrator, but in no event will the Commencement Date be later than ______ days after date of approval of the Contract by the Administrator. The Bidder further agrees to prosecute diligently and to complete construction in strict accordance with the Specifications, Drawings within ______ calendar days after date of approval of the Contract by the Administrator. The Bidder further agrees to prosecute diligently and to complete construction in strict accordance with the Specifications, Drawings within ______ calendar days (excluding Sundays) after Commencement Date.

(b) The time for Completion of Clearing shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Bidder, including Acts of God, fires, floods, inability to obtain materials and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible. Provided however, that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefore in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omission of the Owner, shall result in any liability on the part of the Owner.

(c) The sequence of construction shall be as set forth below, the numbers or names being the designations of extensions or areas (hereinafter called the "Sections") corresponding to the numbers or names shown on the maps attached hereto, or if no Sections are set forth below, the sequence of construction shall be as determined by the Bidder, subject to the approval of the Engineer.

(d) The Owner, acting through the Engineer and with the approval of the Administrator, may from time to time during the progress of the work on the Project make such changes in additions to or subtractions from the Specifications, Drawings, and sequence of construction provided for in the previous paragraph which are part of the Contractor's Proposal as conditions may warrant: Provided, however, that if any change in the construction to be done shall require an extension of time, a reasonable extension will be granted if the Bidder shall make a written request therefore to the Owner before the work is begun. And provided further, that if the cost to the Bidder of construction of the Project shall be materially increased by any such change or addition, the Owner shall pay the Bidder for the reasonable cost thereof in accordance with a Contract Amendment signed by the Owner and the Bidder and approved by the Administrator, but no claim for additional compensation for any such change or addition will be considered unless the Bidder shall have made a written request therefore to the Owner prior to the commencement of work in connection with such change or addition.

(e) The Bidder will not perform any work hereunder on Sundays unless there is urgent need for such Sunday work and the Owner consents thereto in writing. The time for completion specified in subsection (a) of this Section 1 shall not be affected in any way by inclusion of this subsection nor by the Owner's consent or lack of consent to Sunday work hereunder.

As long as the total price of this contract including all amendments is less than 120 percent of the original contract price as stated in the acceptance hereto, amendments executed on RUS Form 238 are not subject to the approval of the Administrator. Whenever an amendment to this contract causes the total amended contract to exceed 120 percent of the original contract price, that amendment and all subsequent amendments to this contract shall be made subject to the approval of the Administrator.

See Footnote 1.
§ 1726.322 7 CFR Ch. XVII (1-1-98 Edition)

Section 2. Environmental Protection. The Bidder shall perform work in such a manner as to maximize preservation of beauty, conservation of natural resources, and minimize marring and scarring of the landscape and silting of streams. There should be no deposition of trash in streams or waterways. Herbicides, other chemicals or their containers should not be deposited in or near streams, waterways or pastures. The Bidder will be required to follow, under the general direction of the engineer, the criteria relating to environmental protection as specified herein by the engineer.

Section 3. Supervision and Inspection.

(a) The Bidder shall cause the work on the Project to receive constant supervision by a competent superintendent (hereinafter called the “Supervisor”) who shall be present at all times during working hours where work is being carried on. The Bidder shall also employ in connection with the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent shall be binding upon the Bidder.

(b) The Owner reserves the right to require the removal from the Project of any employee of the Bidder if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner or the Supervisor, if any, shall have the right to require the Bidder to increase the number of its employees and to increase or change the amount or kind of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner or Supervisor; but the failure of the Owner or Supervisor to give any such directions shall not relieve the Bidder of its obligations to complete the work within the time and in the manner specified in this proposal.

(c) The manner of carrying out the Project, and all materials and equipment used there in, shall be subject to the inspection, tests and approval of the Owner and the Administrator, and the Bidder shall furnish all information required by the Owner or by the Administrator concerning the nature or source of any materials incorporated or to be incorporated in the Project. The Owner and the Administrator shall have the right to inspect all payrolls, invoices of materials, and other data and records of the Bidder and of any subcontractor, relevant to the Project. The Bidder shall provide all reasonable facilities necessary for such inspection and tests and shall maintain an office at the site of the Project, with telephone service where obtainable and at least one office employee to whom directions and instructions of the Owner may be delivered. Delivery of such directions or instructions in writing to the employee of the Bidder at such office shall constitute delivery to the Bidder. The Bidder shall have an authorized agent accompany the Engineer when final inspection is made and, if requested by the Owner, when any other inspection is made.

(d) In the event that the Owner, or the Administrator, shall determine that the work contains or may contain numerous defects, it shall be the duty of the Bidder and the Bidder’s Surety or Sureties, if any, to have an inspection made by an engineer approved by the Owner and the Administrator for the purpose of determining the exact nature, extent and location of such defects.

(e) The Engineer may recommend to the Owner that the Bidder suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions as are considered unfavorable for the satisfactory prosecution of the work or because of the failure of the Bidder to comply with any of the provisions of the Contract: Provided, however, that the Bidder shall not suspend work pursuant to this provision without written authority from the Owner to do so. The time of completion hereinabove set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Bidder to comply with any of the provisions of this Contract. In the event that work is suspended by the Bidder with the consent of the Owner, the Bidder before resuming work shall give the Owner at least twenty-four (24) hours notice thereof in writing.

Section 4. Unsuitable Workmanship. The acceptance of any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such workmanship shall be found to be unsuitable. Workmanship found unsuitable after final acceptance of the work shall be remedied, by the Owner, the Bidder before resuming work shall have an authorized agent accompany the Engineer when final inspection is made and, if requested by the Owner, when any other inspection is made.

Article III—Payments and Release of Liens

Section 1. Payments to Bidder.

(a) Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Bidder for work accomplished during the preceding calendar month on the basis of completed rights-of-way clearing units furnished and certified to by the Bidder, recommended by the Engineer and approved by the Owner solely for the purposes of payment: Provided, however, that such approval shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate shall be paid by the Owner to the Bidder prior to Completion of the Project: Provided, however, that at any time after work,
which, in the sole determination of the Engineer, amounts to fifty percent (50%) of the maximum contract price has been completed, the Owner may elect, in lieu of paying ninety percent (90%) of each such subsequent estimate, to pay each such subsequent estimate in full. Upon completion by the Bidder of the Project, the Engineer will prepare a Final Inventory of the Project showing the total number and character of rights-of-way clearing units and, after checking such inventory with the Bidder, will certify it to the Owner, together with a certificate of the total cost of the construction performed. Upon the approval of such certificates by the Owner and the Administrator, the Owner shall make payment to the Bidder of all amounts to which the Bidder shall be entitled thereunder which shall not have been paid: Provided, however, that such final payments shall be made not later than ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, unless withheld because of the fault of the Bidder.

(b) The Bidder shall be paid on the basis of the number of rights-of-way clearing units actually completed at the direction of the Owner shown by the inventory based on the staking sheets or structure lists; Provided, however, that the total cost shall not exceed the maximum contract price for the construction of the Project as set forth in the Acceptance, unless such excess shall have been approved in writing by the Administrator.

(c) Notwithstanding the provisions of Section 1 (a) above, the Bidder may, by giving written notice thereof to the Owner elect to receive payment in full for any Section of the Project upon:

(1) completion of such Section as certified by the Engineer and approved by the Owner and the Administrator;

(2) submission to the Owner and the Administrator of the releases of lien and the certificate referred to in Section 2 hereof;

(3) approval by the Owner and the Administrator of the inventory in respect of such Section; and

(4) submission to the Owner and the Administrator of the consent in writing by the Surety or Sureties, if any, on the Contractor's Bond to payment in full for such Section prior to Completion of Project.

If no Sections are designated in Article II, Section 1 (c), the term “Section” shall mean for purposes of this subsection (a) and Article IV, Section 3 (b) only, a part of the Project as designated by the Owner which represents at least twenty-five percent (25%) of the maximum Contract price as stated in Article III, Section 1.

(d) Interest at the rate of percent (___%) per annum shall be paid by the Owner to the Bidder on all unpaid balances due on monthly estimates, commencing fifteen (15) days after the due date; provided the delay in payment beyond the due date is not caused by any condition within the control of the Bidder. The due date for purposes of such monthly payment shall be the fifteenth day of each calendar month provided:

(1) the Bidder on or before the fifth day of such month shall have submitted its certification of rights-of-way clearing units completed during the preceding month and

(2) the Owner on or before the fifteenth day of such month shall have approved such certification. If, for reasons not due to the Bidder's fault, such approval shall not have been given on or before the fifteenth day of such month, the due date for purposes of this subsection (d) shall be the fifteenth day of such month notwithstanding the absence of the approval of the certification.

(e) Interest at the rate of percent (___%) per annum shall be paid by the Owner to the Bidder on the final payment for the Project or any completed Section thereof, commencing fifteen (15) days after the due date. The due date for purposes of such final payment shall be the date of approval by the Administrator of all of the documents required for such approval, as a condition precedent to the making of final payment, or ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, whichever is earlier.

(f) No payment shall be due while the Bidder is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Bidder the amount of any claim by a third party against either the Bidder or the Owner based upon an alleged failure of the Bidder to perform the work hereunder in accordance with the provisions of this Contract.

Section 2. Release of Liens and Certificate of Contractor. (See sample RUS Form 22A, Waiver and Release of Lien and sample RUS Form 22L, Certificate of Contractor.) Upon the Completion of Clearing by the Bidder (or any Section thereof if the Bidder shall elect to receive payment in full for any section when completed as provided above) but prior to final payment to the Bidder the Bidder shall deliver to the Owner, in duplicate, releases of all liens and of rights to claim any lien, in the form attached hereto from all manufacturers, materialmen, and subcontractors furnishing services or materials

\[1\text{The Owner shall insert a rate equal to the lowest "Prime Rate" listed in the "Money Rates" section of the Wall Street Journal on the date such invitation to bid is issued.}\]

\[2\text{See Footnote 3.}\]
§ 1726.322  7 CFR Ch. XVII (1-1-98 Edition)

for the Project or such Section and a certificate in the form attached hereto to the effect that all labor used on or for the Project or such Section has been paid and that all such releases have been submitted to the Owner for approval.

Section 3. Payments to Subcontractors. The Bidder shall pay each subcontractor, if any, within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Bidder for and on account of work performed by each subcontractor.

Article IV—Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property. The Bidder shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the “Manual of Accident Prevention in Construction” of the Associated General Contractors of America unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

(a) The Bidder shall at no time and under no circumstances cause or permit any employee of the Bidder to perform any work upon energized lines, or upon poles carrying energized lines, unless otherwise specified in the Notice and Instructions to Bidders.

(b) The Bidder shall so conduct the construction of the Project as to cause the least possible obstruction of Public highways.

(c) The Bidder shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances and regulations or by local conditions.

(d) The Bidder shall do all things necessary or expedient to properly protect any and all parallel, converging and intersecting lines, joint line poles, highways and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways or other property are damaged in the course of the construction of the Project, the Bidder shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

(e) The right-of-way of the Project traverses cultivated lands, the Bidder shall limit the movement of its crews and equipment so as to cause as little damage as possible to crops, orchards or property and shall endeavor to avoid marring the lands. All fences which are necessarily opened or moved during the construction of the Project shall be replaced in as good condition as they were found and precautions shall be taken to prevent the escape of livestock. The Bidder shall not be responsible for loss of or damage to crops, orchards or property (other than livestock) on the right-of-way incident to the construction of the Project and not caused by negligence or inefficient operation of the Bidder. The Bidder shall be responsible for all loss or damage to crops, orchards, or property, whether on or off the right-of-way, and for all loss of or damage to livestock caused by the construction of the Project. The right-of-way for purposes of this said section shall consist of area extending five feet on both sides of the center line of the poles along the route of the Project lines, plus such area reasonably required by the Bidder for access to the route of the Project lines from Public roads to carry on construction activities.

(f) The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided shall be under the charge and control in whole or in part as hereinafter provided shall be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Bidder. The Bidder shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Bidder by reason of any Act of God or other casualty or cause whether or not the same shall have occurred by reason of the Bidder’s negligence.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner’s directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney’s fees) for personal loss, injury, or death to persons (including but not limited to Bidder’s employees) and loss, damage to or destruction of Owner’s property or the property of any other person or entity (including but not limited to Bidder’s property) in any manner arising out of, or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner’s directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner’s property or facilities, for services performed or materials or equipment furnished by Bidder, its subcontractors and suppliers of any tier, and
from all losses, demands, and causes of action arising out of any such lien or claim. Bidder shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Bidder does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner may immediately correct such violation (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Bidder.

(iii) Bidder shall provide to Owner's satisfaction evidence of Bidder's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

(g) Any and all excess earth, rock, debris, underbrush and other useless material shall be removed by the Bidder from the site of the Project as rapidly as practicable as the work progresses. There shall be no disposition of trash in streams or waterways. Herbicides, other chemicals or their containers should not be deposited in or near streams, waterways or pastures.

(h) Upon violation by the Bidder of any of the provisions of this section, after written notice of such violation given to the Bidder by the Engineer or the Owner, the Bidder shall immediately correct such violation. Upon failure of the Bidder so to do the Owner may correct such violation at the Bidder's expense: Provided, however, that Bidder is able to correct such violation at the Bidder's expense without such prior notice to the Bidder.

(i) The Bidder shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

(j) The Bidder shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the Owner that proper authorization has been received from the owner of the property, and the Bidder shall promptly notify the Owner whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on its land in connection with the Project and shall obtain the consent in writing of the Owner before proceeding in any such case.

Section 2. Insurance. The Bidder shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employee or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single limit of $1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than $1 million per person and $1 million per occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section. The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Delivery of Possession and Control to Owner.

(a) Upon written request of the Owner the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of any portion of the Project to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1(f) hereof with respect to such portion of the Project so delivered to the Owner shall be terminated. Provided, however, that nothing herein contained shall
§ 1726.322

relieve the Bidder of any liability with respect to defective materials and workmanship as contained in Article II, Section 4 hereof.

(b) Where the construction of a Section as hereinbefore defined in Article II, Section 1 (c) and Article III, Section 1(c) shall have been completed by the Bidder, the Owner agrees, after receipt of a written request from the Bidder, to accept delivery of possession and control of such Section upon the issuance by the Engineer of a written statement that the Section has been inspected and found acceptable by the Engineer. Upon such delivery of the possession and control of any such Section to the Owner, the risk and obligation of such Section as set forth in Article IV, Section 1(f) hereof with respect to such Section so delivered to the Owner shall be terminated; Provided, however, that nothing hereof shall relieve the Bidder of any liability with respect to defective materials or workmanship as contained in Article II, Section 4 hereof. Section 4. Assignment of Guarantees. All guarantees of materials and workmanship running in favor of the Bidder shall be transferred and assigned to the Owner prior to the time the Bidder receives final payment.

Article V—Remedies

Section 1. Completion of Bidder's Default. If default shall be made by the Bidder or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the Surety or Sureties, if any, upon the Contractor's Bond or Bonds a written notice requiring the Bidder to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Bidder such default shall be corrected or arrangements for the correction thereof satisfactory to both the Owner and the Administrator shall be made by the Bidder or its Surety or Sureties if any, the Owner may take over the Project and prosecute the same to completion by contract or otherwise for the account and at the expense of the Bidder, and the Bidder and its Surety or Sureties if any, shall be liable to the Owner for any cost or expense in excess of the contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliances, and plant belonging to the Bidder or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims or demands which the Bidder may have against third persons in connection with this contract and for such purpose the Bidder does hereby assign, transfer and set over unto the Owner all such rights, claims and demands.

Section 2. Liquidated Damages. The time of the Completion of the Project is of the essence of the Contract. Should the Bidder neglect, refuse or fail to complete the Project within the time herein agreed upon, after giving effect to extensions of time, if any, herein provided, then, in that event and in view of the difficulty of estimating with exactness damages caused by such delay, the Owner shall have the right to deduct from and retain out of such moneys which may be then due, or which may become due and payable to the Bidder the sum of __________ dollars ($________) per day for each and every day that such construction is delayed in its completion beyond the specified time, as liquidated damages and not as a penalty; if the amount due and to become due from the Owner to the Bidder is insufficient to pay in full all such liquidated damages, the Bidder shall pay to the Owner the amount necessary to effect such payment in full; Provided, however, that the Owner shall promptly notify the Bidder in writing of the manner in which the amount retained, deducted or claimed as liquidated damages was computed.

Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Owner or the Government or the Administrator shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election: Provided, however, that the provision of Section 2 of this Article shall be the exclusive measure of damages for failure by the Bidder to complete the Project within the time herein agreed upon.

Article VI—Miscellaneous

Section 1. Definitions.

(a) The term "Administrator" shall mean the Administrator of the Rural Utilities Service of the United States of America and his duly authorized representatives or any other person in whom or authority in which may be vested the duties and functions which the Administrator is now authorized by law to perform.

(b) The term "Engineer" shall mean the engineer employed by the Owner with the approval of the Administrator, to provide engineering services for the Project and said Engineer's duly authorized assistants and representatives.

(c) The term "Supervisor" shall mean the person, if any, appointed by the Administrator as the representative of the Government under the provisions of the Loan Contract providing for such appointment in special cases. The term is limited to such special representative of the Government, if any, who is responsible exclusively to the
Rural Utilities Service, USDA § 1726.322

Administrative and does not refer to the Manager or any other person employed by the Owner and responsible to it.

(d) The term “Completion of Clearing” shall mean full performance by the Bidder of the Bidder’s obligations under the Contract and all amendments and revisions thereof except the Bidder’s obligations in respect of (1) the Certificate of Completion signed by the Engineer, (2) the inventory referred to in Article III, Section 1 hereof, and (3) other final documents. The term “Completion of the Project” shall mean full performance by the Bidder of the Bidder’s obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion signed by the Engineer and approved in writing by the Owner and the Administrator, shall be the sole and conclusive evidence as to the date of Completion of Clearing.

Section 2. Patent Infringement. The Bidder shall save harmless and indemnity the Owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

Section 3. Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Bidder.

Section 4. Compliance with Statutes and Regulations. The Bidder shall comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Bidder acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called “Kick-Back” Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. Sections 286, 287 and 1001 as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental Agencies leaving jurisdiction in the premises.

(a) Bidder’s Representations. The Bidder represents that:

(1) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to their race, color, religion, sex, or national origin.

(3) The Bidder will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or worker’s representatives of the Bidder’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Bidder’s noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be cancelled, terminated, or suspended in whole or in part, and the Bidder may be declared ineligible for further Government contracts of federally assisted construction contracts in accordance with procedures authorized in
§ 1726.322  7 CFR Ch. XVII (1-1-98 Edition)

Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

7 The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Bidder will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions including sanctions for noncompliance: Provided, however, that in the event a Bidder becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.

(c) Certificate of Nonsegregated Facilities. The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this contract. As used in this certification, the term “segregated facilities” means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 6. Franchises and Rights-of-Way. The Bidder shall be under no obligation to obtain or assist in obtaining: Any franchises, authorizations, permits or approvals required to be obtained by the Owner from Federal, State, County, Municipal or other authorities; any rights-of-way over private lands; or any agreements between the Owner and third parties with respect to the construction and operation of the Project.

Section 7. Nonassignment of Contract. The Bidder shall execute and without subcontracting not less than twenty-five per centum (25%) of the construction of the Project, to be calculated on the basis of the total contract price. The Bidder shall not assign the contract effected by an acceptance of this proposal or any interest in any funds that may be due or become due hereunder or enter into contract with any person, firm or corporation for the performance of the Bidder’s obligations hereunder or any part thereof, without the approval in writing of the Owner and of the Surety or Sureties, if any, on any bond furnished by the Bidder for the faithful performance of the Bidder’s obligations hereunder or any part thereof, without the approval in writing of the Owner and of the Surety or Sureties, if any, on the Contractor’s Bond or Bonds, shall enter into a subcontract with any subcontractor for the performance of any part of this contract, the Bidder shall be as fully responsible to the Owner and the Government for the acts and omissions of such subcontractor and of persons employed by such subcontractor as the Bidder would be for its own acts and omissions and those of persons directly employed by it.

Section 8. Extension to Successors and Assigns. Each and all of the covenants and Agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto.

Section 9. Contractor. Upon acceptance of this Proposal, the successful Bidder shall be the Contractor and all references in the Proposal to the Bidder shall apply to the Contractor.

Section 10. Approval by the Administrator. No acceptance of this Proposal shall become effective until approval in writing of the Administrator; Provided, however that no obligations shall arise hereunder unless such approval is given within sixty (60) days from the date of acceptance by the Owner.

By (Bidder)

Attest: (Secretary)

The Proposal must be signed with the full name of the Bidder. If the Bidder is a partnership, the Proposal must be signed in the partnership name by a partner. If the Bidder is a corporation, the Proposal must be signed in the Corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.
Rural Utilities Service, USDA

§ 1726.322

Description of Units

TM-12. The unit is 1,000 feet in length and _______ (______) feet in width (to be measured _______ (______) feet on one side of pole line or centerline of structures) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed _______ (______) feet in height, shall be clear from the ground up on one side of the pole line of poles carrying conductors (See Detail A, Drawing TM-12-2A.) The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to the ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush across the width of the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All lengths thus arrived at, added together and divided by 1,000 shall give the number of TM-12 units of clearing. The Bidder shall not remove or trim shade, fruit, or ornamental trees unless so directed by the Engineer in writing.

TM-12 (1). This unit is identical with TM-12, except the full width of the right-of-way to be cleared shall be _______ (______) feet wide (to be measured _______ (______) feet on each side of the pole line or centerline of structures) (See Detail D, Drawing TM-12-2A.)

TM-13. The unit, for purpose of quoting, is 1,000 feet in length of clearing off the right-of-way. The Engineer will select those trees off the right-of-way that he deems to be a hazard to the line and will designate them to the Bidder in writing as danger trees. When so designated, the Bidder shall remove or top such trees at his option except that the Bidder shall trim and not remove shade, fruit or ornamental trees unless otherwise directed by the Engineer in writing (See Drawings TM-12-2A and TM-13 for examples of danger trees.)

The measurement of length of right-of-way to be cleared shall be considered as a straight line parallel to the horizontal line between poles or centerline of structures, such measurement of length to be based on maximum dimension of foliage (not trunk) projected to the ground line (See Details E, F, G and H, Drawing TM-12-2A.) Dead trees having no foliage shall be measured across the maximum dimension and multiplied by two. (See Detail F, Drawing TM-12-2A.) Each tree so removed shall be added together to determine the total length of clearing. All lengths thus arrived at, added together and divided by 1,000 shall give the number of TM-13 units (Example: Details E, F, G and H, Drawing TM-12-2A, total 0.10 of a TM-13 unit.)

TMC-12, TMC-12 (1). These units are identical to the respective TM units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

TM-14. The unit is 1,000 feet in length and _______ (______) feet in width (to be measured _______ (______) feet on one side of right-of-way center line) of actual clearing of right-of-way. Trees and underbrush should be cleared from the ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to provide “undulating” boundaries. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the service road. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to the ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

TM-14 (1). This unit is identical with TM-14 except the full width of the right-of-way to be cleared shall be _______ (______) feet wide (See Detail D, Drawing TM-12-2A.)

TM-15. The unit is 1,000 feet in length and _______ (______) feet in width (to be measured _______ (______) feet on one side of the right-of-way center line) of actual clearing of the right-of-way. Trees and underbrush should be cleared from ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide a “feathered” appearance in the right-of-way. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the service road.

The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

Acceptance

Subject to the approval of the Administrator, the Owner hereby accepts the foregoing Proposal of the Bidder, _____ for the construction of the following:
The total contract price is $_______.

By _____
Name: Owner
Date: 19____

Specifications

In preparing the right-of-way, trees shall be removed, underbrush cleared, and trees trimmed so that the right-of-way shall be clear from the ground up as specified in the Proposal. Trees fronting each side of the right-of-way shall be trimmed symmetrically unless otherwise directed by the Engineer. Dead trees beyond the right-of-way which would strike the line in falling shall be removed. Leaning trees beyond the right-of-way which would strike the line in falling and which would require topping if not removed may be removed or topped at the direction of the Engineer.

Where TMC-12, TMC-12-(1) units are specified, the right-of-way shall be cleared in accordance with the instructions in the preceding paragraph and in addition, all stumps one-half inch in diameter and larger shall be sprayed as specified by the Engineer.

Instructions

(See RUS Bulletin 1767B-3, Preparation and Use of RUS Form 254, for additional instructions.)

The Engineer will prepare 5 copies of RUS Form 254 and 254a, also 5 copies of Forms 254b and 254c when applicable. Original and 1 copy to be forwarded to RUS, 1 copy to Contractor, 1 copy to Owner, and 1 copy to be retained by Engineer.

Calculation of amount payable to Contractor will employ data taken from Nos. 1 through 25, RUS Forms 254, 254a, 254b, 254c. The amounts to be inserted opposite Items A, B, C, D, and E on RUS Form 254 are indicated in the texts of those items.

Nos. 1 through 17, Forms 254a and 254b: (Form 254b is required only when "I" removal units are included in the Contract.)

No.—Source of Information
1 and 2—From tabulation of staking sheets.  
3 and 4—From Contract.
5—No. 3 plus No. 4.
6—No. 1 multiplied by No. 5.
7—No. 1 multiplied by No. 3 (for "I" units only).
8—From Table C of Contract.
9—No. 1 multiplied by No. 8 for "I" removal units only. (Table C relates solely to "I" units.)
10, 11, and 12—From Engineer’s and Owner’s records.
13—From Table D in Contract.
14—No. 12 multiplied by No. 13.
15—From Engineer’s records. (Quantities shall be listed opposite the appropriate material items described in No. 11.)
16—From individual stock record card for each material item listed.
17—No. 15 multiplied by No. 16.

Data shown on Form 254c to be presented under the following headings, as appropriate:

Part I Material Items Included in Lists Set Forth in Construction Contract

Part II Other Material Items Furnished by Owner

Nos. 18 through 25. (Form 254c is required only when there are owner-furnished materials.)

No.—Source of Information
18 and 19—From Contract and Material Receipts.
20—From charge-out and credit tickets covering materials issued to and returned by the Contractor.

21—From average unit costs on charge-out and credit tickets relating to this construction, such costs in turn being taken from the average unit costs reflected by the stock record cards for the applicable period.
22—No. 20 multiplied by No. 21.
23—For Part I, from the unit prices specified in the Contract in the "List of Owner’s Materials on Hand" or the "List of Materials Ordered by Owner But Not Delivered."

For Part II, from the actual unit costs to Owner—the same as used in No. 21.
24—No. 20 multiplied by No. 23.
25—No. 24 minus No. 22. (If a minus quantity, enter in parentheses.)

See 7 CFR 1726, Electric System Construction Policies and Procedures, for instructions regarding distribution of the completed form.

Reference should be made to RUS Bulletin 1767B-3, Preparation and Use of RUS Form 254, for instruction in accounting for all contract costs, including the retirement of units removed by the Contractor and the utilization by record units of costs of construction assemblies installed by the Contractor.

RUS Form 254a

Assembly Units

1. Quantity ______

DUE TO CONTRACTOR FOR UNITS INSTALLED, CONVERTED, AND REMOVED

3. Labor (Unit Price) ______
4. Material Unit Price (Except I Units) ______
5. Total Unit Price (No. 3 + No. 4) (Except I Units) ______
6. Cost of Construction (No. 1 x No. 5) (Except I Units) ______
7. Cost to Remove "I" Units (No. 1 x No. 3) ______

2The quantities shown in No. 20 should agree with Materials Receipts (RUS Form 251) prepared in connection with the contract. The types of items of material and the quantity of any item of material listed under Part I of the tabulation should be limited to the type of items and should not exceed the quantity of any item of material specified in the construction contract in the "List of Owner’s Materials on Hand" or the "List of Materials Ordered by Owner But Not Delivered." Any additional items of material or excess quantities over the items specified in such lists are to be shown under Part II of the tabulation.

1Standard units will be listed first, followed by new units and conversion units, in that order, with all "I" removal units being listed last.
§ 1726.329

The contract form in this section shall be used when required by this part.

**CONTRACT TO CONSTRUCT BUILDINGS**

**Notice and Instructions to Bidders**

1. Proposals: Sealed proposals for the construction, including the furnishing of all materials, machinery, labor and equipment, water, heat, utilities, transportation, and other means necessary for the construction of the building(s) listed below (hereinafter called the “Project”) to be financed not to be financed pursuant to a loan contract between ______ (hereinafter called the “Owner”) and the United States of America, by the Administrator of the Rural Utilities Service (hereinafter called the “Administrator”) and designated as Project ______ will be received by the Owner on or before ______ Time ______, 19____, at its office located at ______ at which time and place the proposals will be publicly opened and read. The Rural Telephone Bank may also be a party to the loan contract.

Name or Kind of Building ______ Location ______

2. Obtaining Documents: The Plans and Specifications together with all other necessary forms and documents for bidders may be secured from ______ at ______ Dollars ($______) which payment will be refunded to each bona fide bidder within ten (10) days after the bid opening. Additional sets of Plans and Specifications may be obtained upon payment of ______ Dollars ($______) which payment will not be subject to refund. The Plans and Specifications may be examined at the office of ______. A copy of the loan contract may also be examined at the office of the Owner.

3. Manner of Submitting Proposals: Proposals and all supporting documents required to be attached thereto must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope, addressed to the Owner. The name and address of the Bidder, its license number, if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the proposal is submitted. Proposals must be filled in in ink or type-written. No alterations or interlineations will be permitted, unless made before submission, and initialed and dated.

4. Familiarity with Conditions: Prior to the submission of the Proposal, the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Plans and Specifications, forms of Construction Proposal and Acceptance, and Contractor’s Bond on file with Secretary of the Owner and shall become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of the soil and terrain to be encountered, the kind of facilities required before and during the construction of the Project, general local conditions, and all other matters that may affect the cost and the time of completion of the Project. Bidders will be required to comply with all applicable statutes, regulations,
§ 1726.329

Rural Utilities Service, USDA

e.g., including those pertaining to the licensing of contractors and the so called “Kick-Back” Statute (48 Stat. 948) and regulations issued pursuant thereto.

5. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

6. Time of Completion of Construction: The time of completion of construction of the Project shall be as specified by the Architect in the Proposal.

7. Bid Bond: Each proposal must be accompanied by a bid bond in the form attached or a certified check on a bank that is a member of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum bid price. Each Bidder shall agree, provided its proposal is one of the three low proposals, that by filing its proposal together with its Bid bond or check in consideration of the Owner's receiving and considering such proposal, said proposal shall be firm and binding upon each such Bidder and such Bid bond or check shall be held by the Owner until a Proposal is accepted and a satisfactory Contractor's Bond (or Builder's Risk Policy) is furnished by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed sixty (60) days from the date hereinafter set for the opening of proposals, whichever period shall be the shorter. If such proposal is not one of the three low proposals, the bid bond or check will be returned in each instance within a period of ten (10) days to the respective Bidder.

8. Contractor's Bond or Builder's Risk Policy: The successful Bidder will be required to execute two additional counterparts of the Proposal and to furnish:

(a) For contracts in amounts in excess of $100,000, a Contractor's Bond in the form attached to the Proposal with sureties listed by the United States Treasury Department as Acceptable Sureties, in a penal sum not less than the contract price.

(b) For contracts in amounts of $100,000 or less, either a Contractor's Bond or a Builder's Risk Policy, whichever the Owner has specified below: (Check One)

1. Contractor's Bond
2. Builder's Risk Policy

9. Failure to Furnish Contractor's Bond or Builders Risk Policy: Should the successful Bidder fail or refuse to furnish a Contractor's Bond (or Builder's Risk Policy) satisfactory to the Owner within fifteen (15) days after written notification of the acceptance of the Proposal by the Owner, the Bidder will be considered to have abandoned the Proposal. In such event, the Owner shall be entitled: (a) To enforce the Bid Bond in accordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check the difference between the amount of the Proposal and such larger amounts for which the Owner may in good faith contract with another party to construct the Project. The term “successful Bidder” shall be deemed to include any Bidder whose proposal is accepted after another Bidder has previously refused or has failed to furnish a satisfactory Contractor's Bond (or Builder's Risk Policy).

10. Contract is Entire Agreement: The contract, effected by acceptance of the Proposal, shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modification thereof resulting from any representation or promise made at any time by any officer, agent or employee of the Owner or by any other person.

11. Minor Irregularities: The Owner reserves the right to waive minor irregularities or minor errors in the Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence.

Any such irregularities or errors so waived must be corrected on the Proposal prior to its acceptance by the Owner.

12. Rejection of Proposals: The Owner reserves the right to reject any or all proposals.

13. Discrepancies: Where a discrepancy appears between the sum of the Base Bids of each building and the Total Base Bid, the correct addition of the Base Bid price for each building shall control.

14. The Owner Represents:

(a) If by provisions of the Proposal, the Owner shall have undertaken to furnish any materials for the construction of the Project, such materials are on hand at locations which may be determined by the Owner's inquiry of the Architect, or if such materials are not on hand, they will be made available by the Owner to the successful Bidder before the time such materials are required for incorporation into the Project.

(b) Title to the property on which the Project is to be constructed has been obtained.

(c) All funds necessary for prompt payment of the construction of the Project will be available. If the owner should fail to comply with any of the undertakings contained in the foregoing representations or if any such representations shall be incorrect, the Bidder will be entitled to an extension of the time of completion of Construction for a period equal to the delay, if any, caused by the failure of the Owner to comply with such undertakings or by any such incorrect representations; provided the Bidder shall have promptly notified the Owner in writing of its desire to extend the time of completion in accordance with the foregoing, and provided further that such extension, if any, of the time of completion shall be the sole remedy.
§ 1726.329  

of the Bidder for the Owner's failure to comply with any of the foregoing representations.

By

Owner

Dated

Proposal

To:

(hereinafter called the "Owner"). The undesigned (hereinafter called the "Bidder") proposes to construct the buildings(s) listed in Section 1 of Article I (hereinafter called the "Project"), financed in whole or in part by a loan to the Owner by the United States of America, by the Administrator of the Rural Utilities Service (hereinafter called the "Administrator"), or by a loan to the Owner by the United States of America and by the Rural Telephone Bank, designated and to receive and install such materials and equipment as may hereinafter be specified to be furnished by the Owner, and to furnish all other materials, machinery, and equipment, water, heat, utilities, transportation and other means required to construct the Project in accordance with the plans and specifications (hereinafter called the "Plans and Specifications"), prepared by (hereinafter called the "Architect") and dated , and approved by the Rural Utilities Service on , and by this reference made a part hereof. The Bidder has made a careful examination of the site(s) on which the Project to be constructed, has become informed as to the kind of facilities required before and during the construction of the Project and has become acquainted with the labor conditions which would affect the work.

The Bidder agrees that if his bid is accepted, the following terms shall govern.

Article I—Amount of Proposal

Section 1. Bid Price: The Bidder will construct the Project for the following sum:  

Name or Kind and Location of Building

Base Bid

Total of Bid $  

Alternate Bid No. 1 (add) (deduct) $  

Alternate Bid No. 2 (add) (deduct) $  

Alternate Bid No. 3 (add) (deduct) $  

Alternate Bid No. 4 (add) (deduct) $  

Section 2. Taxes: The price quoted herein includes all amounts which the Bidder estimates will be payable by the Bidder or the Owner on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies or equipment or services or labor of installation to be incorporated in the Project.

The Bidder will pay all such taxes and will furnish to appropriate taxing authorities any required information and reports pertaining thereto.

Article II—Construction

Section 1. Time of Construction:  

(a) The Bidder, after notification in writing of approval of the Construction Contract by the Administrator, if approval of the Administrator is required, will commence construction of the Project within (______) calendar days after the Owner shall have given the Bidder written notice to commence construction which notice shall be given:

(1) Not later than (______) calendar days after approval of the Construction Contract by the Administrator, if approval of the Administrator is required.

(2) On a date to be determined by the Owner.

(b) The Bidder will prosecute diligently and complete construction of the Project in strict accordance with the Plans and Specifications and directions of the Architect within (______) calendar days after the expiration of the time specified to commence construction.

(c) The time for Completion of Construction herein set forth shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Bidder, including acts of God, fires, floods, direction by the Architect to cease construction during periods when in the judgment of the Architect it is impractical to perform any operation of construction and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible, provided, however, that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefor in writing to the Owner and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes or from any changes in construction which may be made pursuant to Subsection (d) of this Section shall result in any liability on the part of the Owner.

(d) The Owner, acting through the Architect and with the approval of the Administrator, if approval of the Administrator is required, may from time to time during the progress of construction make revisions in the Project. If the revision is such as to require on extension in the time of construction, a reasonable extension shall be granted if the Bidder shall make a written request therefor to the Owner prior to the commencement of work in connection with such
revisions, if the cost of the Project to the Bidder to make revision shall be increased or decreased, the contract price shall be amended by an amount equivalent to the reasonable cost of such amendment, said amendment to be signed by the Owner and the Architect and approved by the Administrator, if approval of the Administrator is required; but no claim for additional compensation for any revision will be considered unless the Bidder shall have made a written request therefore to the Owner prior to the commencement of work in connection with such revision. The reasonable cost of any increase or decrease in the contract amendment as outline above, in the absence of any other mutual agreement, shall be computed on the basis of the direct cost of materials, F.O.B. the site of the Project, plus the direct cost of labor necessary to incorporate such materials into the Project (including actual cost of payroll taxes and insurance) plus twenty-five percent (25%) of the direct cost of materials and labor. Labor cost shall be limited to the direct costs for workmen and foremen. Costs for Bidder's main office overhead, job office overhead and superintendence shall not be included.

Section 2. Supervision: The Bidder will give sufficient supervision to the work, using his best skill and attention. He will carefully study and compare all drawings, specifications and other instructions, and report at once to the architect any error, inconsistency or omission which he may discover. The Bidder will make available during construction a competent superintendent and any necessary assistants, all satisfactory to the architect. The superintendent shall not be changed except with the consent of the Architect unless the superintendent proves to be unsatisfactory to the Bidder and ceases to be his employ. The superintendent shall represent the Bidder in his absence and all directions given to him shall be as binding as if given to the Bidder. When requested, such directions shall be confirmed in writing.

Section 3. Shop Drawings: The Bidder, after reviewing, will submit to the Architect, with such promptness as to cause no delay in the work, two copies of all shop or setting drawings and schedules required for the work of the various trades, and the Architect shall pass on them in reasonable promptness, requesting corrections required thereto to be made. The Bidder will make any corrections required and file with the Architect three corrected copies and furnish such other copies as may be necessary. The Architect's approval of such drawings or schedules shall not relieve the Bidder of responsibility for deviations from the Plans and Specifications. The Bidder will keep one copy of the contract documents on the site, in good order, available to the Architect. All drawings and specifications will be returned to the Architect upon completion of construction.

Section 4. Samples: The Bidder will furnish for approval, all samples as directed by the Architect, and will perform the work in accordance with such approved samples.

Section 5. Inspection and Tests: The manner of construction of the Project and all materials and equipment used therein shall be subject to the inspection, tests and approval of the Architect and the Administrator, and the Bidder will furnish all information required by the Architect or the Administrator concerning the nature or source of materials. The Owner and the Administrator shall have the right to inspect all records of the Bidder and of any subcontractor relevant to the work. The Bidder will make available at the site of the Project, telephone service where obtainable, the payroll, invoices of material and other data and records of the Bidder relevant to the work. The Bidder will provide all reasonable facilities necessary for such inspection and tests. If the specifications, the Architect's instructions, laws, ordinances or any public authorities require any work to be specially tested or approved, the Bidder will give the Architect timely notice of its readiness for observation by the Architect or inspection by an authority other than the Architect, and if the inspection is by such other authority, of the date fixed for such inspection, testing or approval. The Bidder will bear all costs of such inspections, tests and approvals unless otherwise provided, obtain required certificates and deliver them to the Architect. Observations by the Architect shall be promptly made, and where practicable at the source of supply. If any work should be covered without approval or consent of the Architect, it must, if required by the Architect, be uncovered for examination at the Bidder's expense.

Re-examination of questioned work may be ordered by the Architect and if so ordered the work must be uncovered by the Bidder. If such work be found not in accordance used the contract documents the Bidder will pay such cost.

Section 6. Employees: The Bidder will at all times enforce strict discipline and good order among his employees and shall not employ any unfit person or anyone not skilled in the task assigned him. The Architect and the Owner shall have the right to require the removal from the Project of any employee of the Bidder or subcontractor if in their judgment such removal shall be necessary to protect the interest of the Owner.

Section 7. Defective Workmanship and Materials: Notwithstanding the acceptance of workmanship, materials (except owner-furnished materials) or equipment or the giving
§ 1726.329

of any certificate with respect to the Completion of Construction, if during the construction or within one year after such completion, or within such longer period as the Project or any part thereof may be guaranteed by other provisions of this Proposal, the workmanship, materials or equipment shall be found to be defective or not in conformity with the requirements of the Plans and Specifications, the Bidder will remedy or replace such workmanship, materials or equipment within thirty (30) days after written notice of the failure of the Bidder to conform with the applicable provisions of the contract documents shall have been given to the Bidder by the Owner.

Article III—Payment and Releases of Liens

Section 1. Payments to Bidder:

(a) On or before the fifth (5th) day of each Calendar Month, the Bidder will make application for payment, and the Owner, on or before the fifteenth (15th) day of such month, shall make partial payment to the Bidder for construction accomplished during the preceding Calendar Month and partial payment for materials not incorporated in the Project. The payment shall be made on the basis of a schedule of values and receipts or other vouchers, submitted by the Bidder to, and approved by, the Architect, showing payments for labor and materials, payments to subcontractors, and other evidence of the Bidder’s right to payment for construction accomplished, and bills of sale or such other procedure as will establish the Owner’s title to materials not incorporated in the Project or any part thereof. If the materials shall have been delivered and suitably stored on the site or at any other location agreed upon by the Owner, approval by the Architect of the application for payment is solely for the purposes of payment and shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate of the cost for construction accomplished and approved and fifty percent (50%) of the cost of materials not incorporated in the Project shall be paid by the Owner to the Bidder prior to Completion of Construction. The Bidder will, before the first application, submit to the Architect, a schedule of values of the various parts of the work, including quantities, aggregating the total contract price, divided so as to assist in determining the accuracy of payments to subcontractors and of the applications for payment.

(b) Upon Completion of Construction, the Architect shall inspect the Project, and if he shall find the work acceptable and all provisions hereunder fully performed, he shall furnish the Owner two copies of a Certificate of Completion, on forms satisfactory to the Administrator, and shall certify thereon the final Contract Price. The Certificate of Completion shall show thereon the Acceptance of the Contractor. Upon acceptance of the Certificate of Completion by the Owner, the Owner shall make final payment to the Bidder of all unpaid amounts to which the Bidder shall be entitled hereunder, except that, for contracts requiring approval of the Administrator, the Owner shall submit one copy of the Certificate of Completion to the Administrator for approval. Upon notice of approval by the Administrator, the Owner shall make final payment to the Bidder.

(c) Interest at the rate of one percent (1%) per annum shall be paid by the Owner to the Bidder on all unpaid balances due on monthly estimates, commencing fifteen (15) days after the due date, provided the delay in payment beyond the due date is not caused by any condition within control of the Bidder. The due date for purposes of such monthly payment shall be the fifteenth (15th) day of each Calendar Month provided:

(1) The Bidder on or before the fifth (5th) day of such month shall have submitted its certified estimate of construction completed during the preceding month and

(2) The Architect on or before the fifteenth (15th) day of such month shall have approved such certification. If, for reasons not due to the Bidder’s fault, such approval of the Architect shall not have been given on or before the fifteenth (15th) day of such month, the due date for purposes of this Subsection shall be the fifteenth (15th) day of such month notwithstanding the absence of the Architect’s approval of the certification.

(d) Interest at the rate of one percent (1%) shall be paid by the Owner to the Bidder on the final payment commencing fifteen (15) days after the due date. The due date for the purposes of such final payment shall be sixty (60) days after the date of certification by the Architect in the Certificate of Completion or the date of approval by the Administrator of the Certificate of Completion when approval thereof is required by the Administrator.

(e) No payments shall be due while the Bidder is in default in respect of any of the provisions of this Proposal, and the Owner may withhold from the Bidder the amount of any claim by a third party against either the Bidder or the Owner based upon an alleged failure of the Bidder to perform the work hereunder in accordance with the provisions of this Proposal.

Section 2. Release of Liens: Upon Completion of Construction of the Project, but prior to the payment to the Bidder of any amount withheld in accordance with Section 1, (a) of Article III, the Bidder shall furnish the

†The Owner shall insert a rate equal to the lowest “Prime Rate” listed in the “Money Rates” section of the Wall Street Journal on the date such invitation to bid is issued.

‡See footnote 1.
Rural Utilities Service, USDA

§ 1726.329

Owner, on forms satisfactory to the Administrator releases of all liens, and of all rights to claim any lien from manufacturers, materialmen and subcontractors who have furnished materials or services for the construction of the Project, and a Certificate of Contractor on a form satisfactory to the Administrator, to the effect that all labor used on or for the Project has been paid and that all such releases have been submitted to the Owner.

Article IV—Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property: The Bidder will, at all times, take all reasonable precautions for the safety of employees on the Project, and of the public and all other persons who may be affected thereby, and will comply with all applicable provisions of Federal, State and Municipal safety laws and building and construction codes.

The Bidder will protect from loss or damage all materials and equipment to be incorporated in the Project, whether in storage on or off the site, and other property at the site or adjacent thereto, including trees, shrubs, lawns, walks, paved surfaces, structures and utilities not designated for removal, relocation, or replacement in the course of construction. The Bidder will provide and maintain guard lights, watchman or other protection for persons and property, and physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America, unless such instructions are incompatible with or less strict than those of any public authority having jurisdiction thereon, or instructions of the Architect.

The following provisions shall not limit the generality of the above requirements:

(a) The Bidder will at all times, keep the premises free from accumulation of waste material or rubbish caused by his employees or work, and at the completion of construction he will remove all rubbish from and about the Project, and all his tools, scaffolding and surplus materials and will leave his work "broom clean."

(b) The Project from its commencement to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided, will be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection therewith and the materials to be used therein will be borne by the Bidder. The Bidder will make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Bidder, by reason of any act of God or other casualty or cause, whether or not the same shall have occurred by reason of the Bidder's negligence.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.
Owner, immediately correct such violation. Upon failure of the Bidder so to do, the Owner may correct such violation at the Bidder’s expense; provided, however, that the Owner shall be liable only for expenses necessary or advisable, correct such violation at the Bidder’s expense without such prior notices to the Bidder.

(b) The Bidder will be responsible for all construction means, methods, sequences, and procedures and for coordinating all portions of the construction of the Project.

Section 2. Insurance. The Bidder shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers’ compensation and employers’ liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers’ compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers’ compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single limit of $1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than $1 million per person and $1 million per occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection “b” and “c” of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections “b” and “c” of this Section. The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Purchase of Materials: The Bidder will purchase all materials (except owner-furnished materials) and supplies outright and not subject to any conditional sales agreements, bailment lease or other agreement reserving unto the seller any right, title or interest therein. All materials and supplies shall become the property of the Owner when erected in place or at such earlier time as the parties may agree pursuant to Section 1(a) of Article III. Unless otherwise specified, all materials shall be new.

Section 4. Assignment of Guarantees: The Bidder will obtain from manufacturers, materialmen, and subcontractors and furnish to the Owner all guarantees and will transfer or assign to the Owner such guarantees as run in favor of the Bidder, prior to the time the Bidder receives final payment. The guarantees shall be in addition to and not limited by any other provisions of the contract documents, guarantee or remedy required by law.

Section 5. Royalties and Patent Infringement: The Bidder will pay all royalties and license fees, and will hold harmless and indemnify the Owner from any and all claims, suits, and proceedings for the infringement of any patent or patents covering any equipment, materials, supplies or construction methods used in the work.

Section 6. Compliance with Statutes and Regulations: The Bidder will comply with all applicable statutes, ordinances, rules and regulations pertaining to the work. The Bidder acknowledges that it is familiar with The Rural Electrification Act of 1936, as amended, the so-called “Kick-Back” Statute (48 Stat. 948), and all regulations issued pursuant thereto, and 18 U.S.C. §§ 287, 1001 as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental agencies having jurisdiction in the premises.

Section 7. Delivery of Possession and Control to Owner: Upon written request of the Owner, the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least 90 percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of such portion of the Project to the Owner, the risks and obligations of the Bidder as set forth in Section 1(b), Article IV hereof with respect to such portion so delivered to the Owner shall be terminated; provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective workmanship or materials as provided in Section 7, Article II.
Section 1. Definitions: (a) The term "Architect" shall mean the Architect of the Rural Utilities Service of the United States of America and his duly authorized representatives or any other person in whom authority in which may be vested in the States of America and his duly authorized representatives or any other person in whom duties and functions which the Administrator is now authorized by law to perform. (b) The term "Contractor" shall mean the person or organization employed by the Owner to provide architectural services for the Project, and the Architect's duly authorized assistants and representatives. If an Architect is not employed, the term shall apply to the duly authorized agent of the Owner.

c The term "Completion of Construction" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof except the Bidder's obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof, and (2) other final documents. The term "Completion of the Project" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof. The date of signature by the Architect of the Certificate of Completion shall be the sole and conclusive

Section 2. Completion on Bidder's Default: If default shall be made by the Bidder or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the surety or sureties upon the Contractor's Bond or Bonds a written notice requiring the Bidder to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Bidder, such default shall be corrected or arrangements for the correction thereof, satisfactory to both the Owner and the Administrator, shall be made by the Bidder or its Surety or Sureties, the Owner may take over the construction of the Project and prosecute the same to completion by contract or otherwise for the account and at the expense of the Bidder and the Bidder and its Surety or Sureties shall be liable to the Owner for any cost or expense in excess of the contract price occasioned thereby. Sureties shall be liable to the Owner for any cost or expense in excess of the contract price occasioned thereby.

Section 3. Cumulative Remedies: Every right or remedy herein conferred upon or reserved to the Owner or the Government or the Administrator shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election; provided, however, that the provisions of Section 1 of this Article V shall be the exclusive measure of damages for failure by the Bidder to complete the construction of the Project within the time herein agreed upon.

Article VI—Miscellaneous

Section 1. Definitions: (a) The term "Administrator" shall mean the Administrator of the Rural Utilities Service of the United States of America and his duly authorized representatives or any other person in whom authority in which may be vested in the duties and functions which the Administrator is now authorized by law to perform.

(b) The term "Architect" shall mean the person or organization employed by the Owner to provide architectural services for the Project, and the Architect's duly authorized assistants and representatives. If an Architect is not employed, the term shall apply to the duly authorized agent of the Owner.
§ 1726.329

7 CFR Ch. XVII (1-1-98 Edition)

evidence as to the date of Completion of Construction and as to the fact of Completion of the Project.

Section 2. Materials and Supplies. In the performance of this Contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Bidder agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.

Section 3. Bond or Builder's Risk Policy:
(a) The Bidder will furnish to the Owner, for a contract in an amount in excess of $10,000, a bond in a penal sum not less than the Total Contract Price and in the form attached hereto and with a Surety or Sureties listed by the United States Treasury Department as Acceptable Sureties.
(b) The Bidder will furnish to the Owner for a contract in an amount of $100,000 or less, a Builder's Risk Policy or a bond like that required in the preceding paragraph, whichever the Owner has specified under Paragraph 8 of the Notice and Instructions to Bidders. The Builder's Risk Policy shall be on a completed value form, effective from the date equipment or materials is first delivered to the building site, and shall name both the Owner and the Contractor as insureds. The policy shall insure against loss by fire or lightning and the named perils in the extended coverage endorsement. The amount of coverage shall not be less than the replacement value of the property constructed, including, and materials to be used in the construction and stored at the site or at any other location whether furnished by the Owner or the Contractor. When directed, the Bidder shall furnish evidence of compliance with these requirements. The evidence shall be in the form of a certificate of insurance by an insurance company and shall include a provision that no change in or cancellation of the policy shall be made without prior written notice to the Owner and the Administrator.

Section 4. Subcontracts and Nonassignment: (a) Within ten (10) days after acceptance of the Proposal by the Owner and before awarding any subcontracts, the Bidder will notify the Architect, Owner and Surety in writing, of the names of the subcontractors proposed for the principal parts of the work, and will not enter into any subcontract for such work if written objection thereto is received from the Architect, Owner, Surety or Sureties within fifteen (15) days after receipt of such notice. The Bidder will be as fully responsible to the Owner and the Administrator for the acts and omissions of each subcontractor and of persons employed by such subcontractor as the Bidder would be for its own acts and omissions and those of persons directly employed by it. The Bidder will not subcontract on aggregate amount in excess of sixty-five percent (65%) of its obligations, (to be calculated on the basis of the Total Contract Price) without approval of the Architect, Owner, and Surety or Sureties on any bond furnished by the Bidder for the faithful performance of the Bidder's obligations hereunder. Nothing contained in the Construction Contract shall create any contractual relation between any subcontractor and the Owner.
(b) The Bidder will not assign the contract effected by the acceptance of this Proposal or any part thereof without approval in writing of the Owner, Surety or Sureties, and the Administrator if the Construction Contract was approved by the Administrator.

Section 5. Equal Opportunity Provisions:
(a) Bidder's Representations.

The Bidder represents that:
It has , does not have , 100 or more employees, and if it has, that it has , has not , furnished the Equal Employment Opportunity-Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Bidder agrees that it will obtain, prior to the award of any subcontract for more than $10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

The Bidder agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that this Contract will amount to more than $10,000, the Bidder will file such report, as required by law, and notify the Owner in writing of such filing prior to the Owner's acceptance of this Proposal.

(b) Equal Opportunity Clause, During the performance of this Contract, the Bidder agrees as follows: (1) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such actions shall include, but not be
limited to, the following: Employment, upgrading, demotions or transfer; recruitment or recruitment advertising, layoff or termination; rates of pay or other forms of compensation, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The Bidder will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or worker’s representative of the Bidder’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Bidder’s noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be cancelled, terminated, or suspended in whole or in part, and the Bidder may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulations, or order of the Secretary of Labor, or as provided by law.

(7) The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontract or vendor. The Bidder will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance. Provided, however, that in the event Bidder becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.

(c) Certificate of Nonsegregated Facilities.

The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term ‘segregated facilities’ means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms, and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation facilities at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract.

Section 6. License: The Bidder warrants that a Contractor’s License is ___, is not required, and if required, it possesses Contractor’s License No. ___ for the State of ___, in which the Project is located, and said license expires on ___, 19__.

Section 7. Extension to Successors and Assigns: Each and all of the covenants and agreements contained in the contract effected by the Acceptance of this Proposal shall extend to and be binding upon the successors and assigns of the parties thereto.

Section 8. Description of Contract: The Notice and Instructions to Bidders, the Proposal, the Acceptance, the Contractor’s Bond or Builder’s Risk Policy, the Plans and Specifications and all amendments or revisions thereto constitute the Construction Contract.

Section 9. Contractor: Upon acceptance of this Proposal the successful Bidder shall be
§ 1726.330

the Contractor and all references in the Proposal to the Bidder shall apply to the Contractor.

Section 10. Approval by the Administrator: No acceptance of a Proposal for a contract upon which approval of the Administrator is required shall become effective until the contract has been approved by the Administrator; provided that no obligation shall arise hereunder unless such approval is given within sixty (60) days after the date set for the opening of the proposals. The acceptance of a Proposal for a contract upon which approval of the Administrator is not required shall become effective the date of acceptance by the Owner.

By ____________ Bidder
By ____________ President
Address ____________ Secretary
Date ____________

The Proposal must be signed with the full name of the Bidder. If the Bidder is a partnership, the Proposal must be signed in partnership name by a partner. If the Bidder is a corporation, the Proposal must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

Acceptance

Subject to the approval of the Administrator, if approval of the Administrator is required, the Owner hereby accepts the Proposal of ____________ for the construction of the Project therein described for the:

Base Bid of $__________ and alternate bids as follows (Show plus or minus):

The contract form in this section shall be used when required by this part.

**SUBSTATION AND SWITCHING STATION ERECTION CONTRACT**

Notice and instructions to Bidders

1. Sealed proposals for the construction, including the supply of necessary labor, materials and equipment, of a rural electric
4. Obtaining Documents. The Plans, Specifications for Construction and Construction Drawings together with all necessary forms and other documents for bidders may be obtained from the Owner, or from the Engineer at the latter's office at __________ M., at its office at __________ M., or electronically at __________ M., at its offices at __________ M., for a payment of $____, which payment will not be subject to refund. The Plans, Specifications for Construction and Construction Drawings may be examined at the office of the Owner or at the office of the Engineer. A copy of the Loan Contract (if the Project is to be financed in whole or in part, pursuant to a Loan Contract) between the Owner and the United States of America acting through the Administrator of the Rural Utilities Service (hereinafter called the “Administrator”) and of the loan contract between the Owner and any other lender may be examined at the office of the Owner. Each set of Plans, Specifications for Construction and Construction Drawings will have a serial number, given by the Engineer, and the number of each set with the name of the Purchaser will be recorded by the Engineer. Bids will be accepted only from the original purchasers.

5. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations or interlineations will be permitted, unless made before submission, and initial and dated.

6. Familiarity with Conditions. Prior to the submission of the Proposal the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Plans, Specifications for Construction, Construction Drawings, and forms of Contractor's Proposal and Contractor's Bond on file with the Secretary of the Owner and with the Engineer, and shall become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of facilities required before and during the construction of the Project, general local conditions and all other matters that may affect the cost and the time of completion of the Project. Bidders will be required to comply with all applicable statutes, regulations, etc., including those pertaining to the licensing of contractors, and the so-called "Kick-back Statute" (48 Stat. 948) and regulations issued pursuant thereto.

7. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

8. Alternate Designs. The Owner reserves the right to confine its consideration of the several bids to one type of design regardless of alternate types of design which may be specified in the Plans and Specifications for Construction and offered in the Proposals.

9. The time for Completion of Construction of the Project shall be as specified by the Engineer in the Proposal.

10. Bid Bond. Each Proposal must be accompanied by a Bid Bond in the form attached or a certified check on a bank that is a member of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum bid price. Each Bidder agrees, provided its Proposal is one of the three low Proposals, that, by filing its Proposal together with such Bid Bond or check in consideration of the Owner’s receiving and considering such Proposal, said Proposal shall be firm and binding upon each such Bidder and such Bid Bond or check shall be held by the Owner until a Proposal is accepted and a satisfactory Contractor’s Bond is furnished (where required) by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed sixty (60) days from the date hereinbefore set for the opening of Proposals, whichever period shall be the shorter. If such Proposal is not one of the three low Proposals, the Bid Bond or check will be returned in each instance within a period of ten (10) days to the Bidder furnishing same.

11. Contractor’s Bond. The successful Bidder will be required to execute two additional counterparts of the Proposal and, for
§ 1726.340

7 CFR Ch. XVII (1-1-98 Edition)

a Contract in excess of $100,000, to furnish a Contractor’s Bond in triplicate in the form attached hereto with sureties listed by the United States Treasury Department as Acceptable Sureties, in a penal sum not less than the contract price.

12. Failure to Furnish Contractor’s Bond. Should the successful Bidder fail or refuse to execute such counterparts or to furnish a Contractor’s Bond (where required) within ten (10) days after written notification of the acceptance of the Proposal by the Owner, the Bidder will be considered to have abandoned the Proposal. In such event, the Owner shall be entitled (a) to enforce the bid bond in accordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check the difference (not exceeding the amount of the certified check) between the amount of the Proposal and such larger amount for which the Owner may in good faith contract with another party to construct the Project. The term “successful Bidder” shall be deemed to include any Bidder whose Proposal is accepted after another Bidder has previously refused or has been unable to execute the counterparts or to furnish a satisfactory Contractor’s Bond (where required).

13. Contract is Entire Agreement. The Contract to be effected by the acceptance of the Proposal shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modification thereof resulting from any representation of owner or owner’s agent made at any time by any officer, agent or employee of the Owner or by any other person.

14. Minor Irregularities. The Owner reserves the right to waive minor irregularities or minor errors in any Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence. Any such irregularities or errors so waived must be corrected on the Proposal in which they occur prior to the acceptance thereof by the Owner.

15. Rejection of Bids. The Owner reserves the right to reject any or all Proposals. The attention of Bidders is specially called to the desirability of a proper balance between prices for labor and materials and between the total prices for the respective Construction Units. Lack of such balance may be considered as a reason for rejecting a Proposal.

16. Discrepancy in Unit Prices. Where the unit prices in the Contractor’s Proposal are separated into three columns designated as “Labor,” “Materials” and “Labor and Materials,” and where a discrepancy appears between the sum shown in the “Labor and Materials” column and the correct addition of the sums appearing in the “Labor” and the “Materials” column, the correct addition of the sums appearing in the “Labor” column and the “Materials” column shall control.

17. Bidding and Acceptance. If the Project includes more than one substation, bidders may bid on one or more substations. The Owner may award (1) a contract for all of the substations on the basis of the low total bid or, (2) separate contracts for one or more substations based on the low bids for the respective substations.

18. Definition of Terms. The terms “Administrator,” “Engineer,” “Supervisor,” “Project,” “Completion of Construction” and “Completion of the Project” as used throughout this Contract shall be as defined in Article VI, Section 1, of the Contractor’s Proposal.

19. The Owner represents:

a. If by provisions of the Contractor’s Proposal the Owner shall have undertaken to furnish any materials for the construction of the Project, such materials are on hand at locations specified or if such materials are not on hand they will be made available by the Owner to the successful Bidder at the locations specified before the time such materials are required for construction.

b. Title to the property on which the Project is to be constructed has been obtained.

c. All funds necessary for prompt payment for the construction of the Project will be available.

If the Owner shall fail to comply with any of the undertakings contained in the foregoing representations or if any of such representations shall be incorrect, the Bidder will be entitled to an extension of time of completion for a period equal to the delay, if any, caused by the failure of the Owner to comply with such undertakings or by any such incorrect representation; provided the Bidder shall have promptly notified the Owner in writing of its desire to extend the time of completion in accordance with the foregoing, and provided further that such extension, if any, of the time of completion shall be the sole remedy of the Bidder for the Owner’s failure, because of conditions beyond the control and without the fault of the Owner, to furnish materials in accordance with subparagraph a. hereof.

Owner

By: __________, 19

Contractor’s Proposal
(Proposal shall be submitted in ink or typewritten)

To: __________ (Hereinafter called the “Owner”)
materials and equipment as may hereinafter be specified to be furnished by the Owner, and to furnish all other materials and equipment, all machinery, tools, labor transportation and other means required to construct the rural electric project in strict accordance with the Plans, Specifications for Construction and Construction Drawings for the prices hereinafter stated.

Section 2. Materials and Equipment. The Bidder agrees to furnish and use in the construction of the Project under this Proposal, in the event the Proposal is accepted, only such materials and equipment as are included in the current “List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers,” including revisions adopted prior to the Bid Opening.

Section 3. Owner-Furnished Materials. The Bidder understands and agrees that, if this Proposal is accepted, the Owner will furnish to the Bidder the materials set forth in the attached “List of Owner’s Materials on Hand” (see page 10) and the Bidder will give a receipt (see page 12) therefore in writing to the Owner. The Bidder, further, will on behalf of the Owner accept delivery of such of the materials set forth in the attached “List of Materials Ordered by Owner but Not Delivered” (see page 11) as may be subsequently delivered and will promptly forward to the Owner for payment the supplier’s invoice, together with the Bidder’s receipt in writing for such materials. The materials referred to are on hand at, or will be delivered to, the locations specified in the Lists and the Bidder will use such materials in constructing the Project.

The value of the completed Construction Units certified by the Bidder each month pursuant to Article III, Section 1a of this Proposal shall be reduced by an amount equal to the value of the materials installed by the Bidder during the preceding month which have been furnished by the Owner or the delivery of which has been accepted by the Bidder on behalf of the Owner. Only ninety percent (90%) of the remainder shall be paid prior to the Completion of the Project. The value of such materials shall be computed on the basis of the unit prices stated in the Lists. Materials, if any, not required for the Project, which have been furnished to the Bidder by the Owner or delivery of which has been accepted by the Bidder on behalf of the Owner, shall be returned to the Owner by the Bidder upon Completion of Construction of the Project. The value of all materials not installed in the Project nor returned to the Owner shall be deducted from the final payment to the Bidder.

The Owner shall not be obligated to furnish materials in excess of the quantities, size, kind and type set forth in the attached Lists. If the Owner furnishes, and the Bidder accepts, materials in excess thereof, the value of such excess materials shall be their actual cost as stated by the Owner.

Information on the shipping schedules of materials on the “List of Materials Ordered by Owner But Not Delivered” to the Bidder as necessary during progress of the work.

Upon delivery the Bidder shall promptly receive, unload, transport and handle all materials and equipment on the “List of Materials Ordered by Owner But Not Delivered” at its expense and shall be responsible for demurrage, if any.

Section 4. Purchase of Materials Not Furnished by Owner. The Bidder will purchase all materials and equipment (other than owner-furnished materials) outright and not subject to any conditional sales agreements, bailment, lease or other agreement reserving unto the seller any right, title or interest therein. All such materials and equipment shall become the property of the Owner when erected in place.

Section 5. Proposal on Unit Basis. The Bidder understands and agrees that the various Construction Units on which bids are made are defined by symbols and descriptions in this Proposal, that all said bids are on a unit basis, and that the Owner may specify any number or combination of Construction Units that the Owner may deem necessary for the construction of the Project. Separate Construction Units are designated for each different arrangement which may be used in the construction of the Project. This Proposal is based on a consideration of each unit in place and includes only the materials listed on the corresponding Construction Drawings or description of unit where no drawing exists.

Section 6. Familiarity with Conditions. The Bidder has made a careful examination of the site of the Project to be constructed and of the Plans, Specifications for Construction, Construction Drawings, and form of Contractor’s Bond attached hereto, and has become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, and the kind of facilities required before and during the construction of the Project, and has become acquainted with the labor conditions, state and local laws and regulations which would affect work on the proposed construction.

Section 7. License. The Bidder warrants that a Contractor’s License is , is not required, and if required, it possesses Contractor’s License No. ______ for the State of ______ in which the Project is located and said license expires on ______, 19 ______.

Section 8. The Bidder warrants that this Proposal is made in good faith and without collusion or connection with any person or persons bidding for the same work.
§ 1726.340

Section 9. The Bidder warrants that it possesses adequate financial resources and agrees that in the event this Proposal is accepted and a Contractor’s Bond is required, it will furnish a Contractor’s Bond in the form attached hereto, in a penal sum not less than the maximum Contract price, with a surety or sureties listed by the United States Treasury Department as Acceptable Sureties. In the event that the surety or sureties on the performance bond delivered to the Owner contemporaneously with the execution of the Contractor on any bond or bonds delivered in substitution therefor or in addition thereto shall at any time become unsatisfactory to the Owner or the Administrator, the Bidder agrees to deliver to the Owner another or an additional bond.

Section 10. Taxes. The unit prices for Construction Units in this Proposal include provisions for the payment of all monies which will be payable by the Bidder or the Owner in connection with the construction of the Project on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies and equipment, or services or labor of installation thereof, to be incorporated in the Project as part of such Construction Units. The Bidder agrees to pay all such taxes, except taxes upon the sale, purchase or use of owner-furnished materials and it is understood that, as to owner-furnished materials, the values stated in the attached “List of Owner’s Materials on Hand” and “List of Materials Ordered by Owner But Not Delivered” include taxes upon the sale, purchase or use of owner-furnished materials, if applicable. The Bidder will furnish to the appropriate taxing authorities all required information and reports pertaining to the Project, except as to the owner-furnished materials.

Section 11. Changes in Quantities. The Bidder understands and agrees that the quantities called for in this Proposal are approximate, and that the total number of units upon which payment shall be made shall be as set forth in the inventory. If the Owner changes the quantity of any unit or units specified in this Proposal by more than 15%, and the materials cost to the Bidder is increased thereby to an extent which would not be adequately compensated by application of the unit prices in this Proposal to the revised quantity of such unit or units, such change, to the extent of the quantities of such units in excess of such 15%, shall be regarded as a change in the construction within the meaning of Article II, Section 1(d) of this Proposal.

Article II—Construction

Section 1. Time and Manner of Construction.

a. The Bidder agrees to commence construction of the Project on a date (hereinafter called the “Commencement Date”) which shall be determined by the Engineer after notice in writing of approval of the Contract by the Administrator and notice in writing from the Bidder that the Bidder has sufficient materials to warrant commencement and continuation of construction, but in no event will the Commencement Date be later than _____calendar days after date of approval of the Contract by the Administrator. The Bidder further agrees to prosecute diligently and to complete construction in strict accordance with the Plans, Specifications for Construction and Construction Drawings within _______ calendar days (excluding Sunday’s) after Commencement Date: Provided, however, that the Bidder will not be required to perform any construction on such days when in the judgment of the Engineer snow, rain, or
wind, or the results of snow, rain, or frost make it impracticable to perform any operation of construction and to the extent of the time lost due to the conditions described herein and approved in writing by the Engineer, the time of completion set out above will be extended if the Bidder makes a written request therefor to the Owner as provided in subsection b of this Section 1.

b. The time for Completion of Construction shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Bidder, including acts of God, fires, floods, inability to obtain materials and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: Provided, however, that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefore in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes, except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

c. The sequence of construction shall be as set forth below, the numbers or names being the designations of substations or other major facilities (hereinafter called the “Stations”) corresponding to the numbers or names shown on the maps attached hereto, or if no Stations are set forth below, the sequence of construction shall be as determined by the Bidder, subject to the approval of the Engineer.

d. The Owner, acting through the Engineer and with the approval of the Administrator, may from time to time during the progress of the construction of the Project make such changes, additions to or subtractions from the Plans, Specifications for Construction, Construction Drawings, List of Materials and sequence of construction provided for in the previous paragraph which are part of the Contractor’s Proposal as conditions may warrant: Provided, however, that if any change in the construction to be done shall require an extension of time, a reasonable extension will be granted if the Bidder shall make a written request therefor to the Owner within ten (10) days after any such change is made. And provided further, that if the cost to the Bidder of construction of the Project shall be materially increased by any such change or addition, the Owner shall pay the Bidder for the reasonable cost thereof in accordance with a Construction Contract Amendment signed by the Owner and the Bidder and approved by the Administrator, but no claim for additional compensation for any such change or addition will be considered unless the Bidder shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition.

e. The Bidder will not perform any work hereunder on Sundays unless there is urgent need for such Sunday work and the Owner consents thereto in writing. The time for completion specified in subsection a of this Section 1 shall not be affected in any way by inclusion of this subsection nor by the Owner’s consent or lack of consent to Sunday work hereunder.

Section 2. Environmental Protection. The Bidder shall perform work in such a manner as to maximize preservation beauty, conservation of natural resources and minimize marring and scarring of the landscape and siting of streams. The Bidder shall not deposit trash in streams or waterways, and shall not deposit herbicides or other chemicals or their containers in or near streams, waterways or pastures. The Bidder shall follow, under the general direction of the Engineer, the criteria relating to environmental protection as specified herein by the Engineer.

Section 3. The Bidder agrees that in the event this Proposal is accepted it will make available for use in connection with the proposed construction all necessary tools and equipment and qualified superintendents and foremen.

Section 4. Changes in Construction. The Bidder agrees to make changes in construction previously installed in the Project by the Bidder as required by the Owner. The compensation for such changes shall be as agreed upon in writing by the Bidder and the Owner prior to commencement of work in connection with such changes.

No payment shall be made to the Bidder for materials or labor involved in correcting errors or omissions on the part of the Bidder which result in construction in accordance with the Plans and Specifications for Construction.

Section 5. Construction Not in Proposal. The Bidder also agrees that when it is necessary to construct units not shown in the

---

As long as the total price of this contract including all amendments is less than 120 percent of the original contract price as stated in the acceptance hereto, amendments executed on RUS Form 238 are not subject to the approval of the Administrator. Whenever an amendment to this contract causes the total amended contract to exceed 120 percent of the original contract price, that amendment and all subsequent amendments to this contract shall be made subject to the approval of the Administrator.

---

See Footnote 1.

---

1 As long as the total price of this contract including all amendments is less than 120 percent of the original contract price as stated in the acceptance hereto, amendments executed on RUS Form 238 are not subject to the approval of the Administrator. Whenever an amendment to this contract causes the total amended contract to exceed 120 percent of the original contract price, that amendment and all subsequent amendments to this contract shall be made subject to the approval of the Administrator.

---
§ 1726.340 7 CFR Ch. XVII (1-1-98 Edition)

Proposal it will construct such units for a price arrived at as follows:

a. The cost of materials shall be determined by the invoices.
b. The cost of labor shall be the reasonable cost thereof, as agreed upon by the Owner and Bidder prior to the commencement of work.

c. The manner of construction of the Project, and all materials and equipment used therein, shall be subject to the inspection, tests and approval of the Owner and the Administrator, and the Bidder shall furnish all information required by the Owner or by the Administrator concerning the nature or source of any materials incorporated or to be incorporated in the Project. The Owner and the Administrator shall have the right to inspect all payrolls, invoices of materials, and other data and records of the Bidder and of any subcontractor, relevant to the construction of the Project. The Bidder shall provide all reasonable facilities necessary for such inspection and tests. The Bidder shall have an authorized agent accompany the Engineer when final inspection is made and, if requested by the owner, when any other inspection is made.

d. In the event that the Owner, or the Administrator, shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Bidder and the Bidder’s Surety or Sureties, if any, to have an inspection made by an engineer approved by the Owner and the Administrator for the purpose of determining the exact nature, extent and location of such defects.

e. The Engineer may recommend to the Owner that the Bidder suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions as are considered unfavorable for the satisfactory prosecution of the work or because of the failure of the Bidder to comply with any of the provisions of the Contract: Provided, however, that the Bidder shall not suspend work pursuant to this provision without written authority from the Owner so to do. The time of completion hereinabove set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Bidder to comply with any of the provisions of this Contract. In the event that work is suspended by the Bidder with the consent of the Owner, the Bidder before resuming work shall give the Owner at least twenty-four (24) hours notice thereof in writing.

Section 7. Defective Materials and Workmanship.

a. The acceptance of any materials, equipment (except owner-furnished materials) or any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such materials, equipment, or workmanship shall be found to be defective after delivery or installation, and any such materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be, by and at the expense of the Bidder. Any such condemned material or equipment shall be immediately removed from the site of the Project by the Bidder at the Bidder’s expense. The Bidder shall not be entitled to any payment hereunder so long as any defective materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be.

b. Notwithstanding any certificate which may have been given by the Owner or the Engineer, if any materials, equipment (except owner-furnished materials) or any workmanship which does not comply with the requirements of this Contract shall be discovered within one (1) year after Completion of Construction of the Project, the Bidder shall replace such defective materials or equipment or remedy any such defective workmanship within thirty (30) days after notice in writing of the existence thereof shall have been given by the Owner. If the Bidder shall be called upon to replace any defective materials or equipment or to remedy defective workmanship as herein provided, the Owner, if so requested by the Bidder shall deenergize that portion of the Project involved in such work. In the event of failure by the Bidder so to do, the Owner
may replace such defective materials or equipment or remedy such defective workmanship, as the case may be, and in such event the Bidder shall pay to the Owner the cost and expense thereof.

Article III—Payments and Release of Liens

Section 1. Payments to Bidder.

a. Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Bidder for construction accomplished during the preceding calendar month on the basis of completed Construction Units furnished and certified to by the Bidder, recommended by the Engineer, and approved by the Owner solely for the purposes of payment. Provided, however, that such approval shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate approved during the construction of the Project shall be paid by the Owner to the Bidder prior to Completion of the Project: Provided, however, that at any time after work, which, in the sole determination of the Engineer, amounts to fifty percent (50%) of the maximum Contract price has been completed, the Owner may elect, in lieu of paying ninety percent (90%) of each such subsequent estimate, to pay each such subsequent estimate in full. Upon completion by the Bidder of the construction of the Project, the Engineer will prepare an inventory of the Project showing the total number and character of Construction Units and, after checking such inventory with the Bidder, will certify it to the Owner together with a certificate of the total cost of the construction performed. Upon the approval of such certificates by the Owner and the Administrator, the Owner shall make a payment to the Bidder of all amounts to which the Bidder shall be entitled thereunder which shall have not been paid, provided, however, that such final payment shall be made not later than ninety (90) days after the date of Completion of Construction of the Project as specified in the Certificate of Completion, unless withheld because of the fault of the Bidder.

b. The Bidder shall be paid on the basis of the number of Construction Units actually installed at the direction of the Owner shown by the inventory. Provided, however, that the total cost shall not exceed the maximum Contract price for the construction of the Project as set forth in the Acceptance, unless such excess shall have been approved in writing by the Administrator.

c. Notwithstanding the provisions of Section 1a above, the Bidder may, by giving written notice thereof to the Owner, elect to receive payment in full for any Station of the Project upon:

1. completion of construction of such Station as certified by the Engineer and approved by the Owner and the Administrator;

2. submission to the Owner and the Administrator of the releases of lien and the certificate referred to in Section 2 hereof;

3. approval by the Owner and the Administrator of the inventory in respect of such Station; and

4. submission to the Owner and the Administrator of the consent in writing by the Surety or Sureties, if any, on the Contractor's Bond to payment in full for such Station prior to Completion of the Project.

d. Interest at the rate of ______ percent (%). ______% per annum shall be paid by the Owner to the Bidder on all unpaid balances due on monthly estimates, commencing fifteen (15) days after the due date; provided the delay in payment beyond the due date is not caused by any condition within the control of the Bidder. The due date for purposes of such monthly payment shall be the fifteenth day of each calendar month provided (1) the Bidder on or before the fifth day of such month shall have submitted its certification of Construction Units completed during the preceding month and (2) the Owner on or before the fifteenth day of such month shall have approved such certification. If, for reasons not due to the Bidder's fault, such approval shall not have been given on or before the fifteenth day of such month, the due date for purposes of this subsection d shall be the fifteenth day of such month notwithstanding the absence of the approval of the certification.

e. Interest at the rate of ______ percent (%). ______% per annum shall be paid by the Owner to the Bidder on the final payment for the Project or any completed Station thereof, commencing fifteen (15) days after the due date. The due date for purposes of such final payment shall be the date of approval by the Administrator of all of the documents requiring such approval, as a condition precedent to the making of final payment, or ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, whichever date is earlier.

f. No payment shall be due while the Bidder is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Bidder the amount of any claim by a third party against either the Bidder or the Owner based upon an alleged failure of the Bidder to perform the work hereunder in accordance with the provisions of this Contract.

Section 2. Release of Liens and Certificate of Contractor. (See sample RUS Form 224, Waiver and Release of Lien and sample RUS

1The Owner shall insert a rate equal to the lowest "Prime Rate" listed in the "Money Rates" section of the Wall Street Journal on the date such invitation to bid is issued.

2See Footnote 3
§ 1726.340

7 CFR Ch. XVII (1-1-98 Edition)

Form 231, Certificate of Contractor.) Upon the completion by the Bidder of the construction of the Project (or any Station thereof if the Bidder shall elect to receive payment in full for any Station when completed as provided above) but prior to final payment to the Bidder, the Bidder shall deliver to the Owner, in duplicate, releases of all liens and of rights to claim any lien, in the form attached hereto from all manufacturers, materialmen, and subcontractors furnishing services or materials for the Project or such Station and a certificate in the form attached hereto to the effect that all labor used on or for the Project or such Station has been paid and that all such releases have been submitted to the Owner for approval.

Section 3. Payments to Materialmen and Subcontractors. The Bidder shall pay each materialman and each subcontractor, if any, within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Bidder for and on account of materials furnished or construction performed by each materialman or each subcontractor.

Article IV—Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property. The Bidder shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

a. The Bidder shall at no time and under no circumstances cause or permit any employee of the Bidder to perform any work upon energized lines, or upon poles carrying energized lines, unless otherwise specified in the Notice and Instructions to Bidders.

b. The Bidder shall so conduct the construction of the Project as to cause the least possible obstruction of public highways.

c. The Bidder shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances and regulations or by local conditions.

d. Temporary water, light, power and other utility service shall be arranged for by the Bidder for construction purposes at its own expense.

e. The Bidder shall do all things necessary or expedient to properly protect any and all adjacent lines, highways and any and all property of others from damage, and in the event that any such lines, highways or other property are damaged in the course of construction of the Project, the Bidder shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

f. The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided shall be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Bidder. The Bidder shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Bidder by reason of any act of God or other casualty or cause whether or not the same shall have occurred by reason of the Bidder's negligence.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Bidder, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Bidder shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Bidder does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Bidder.

(iii) Bidder shall provide to Owner's satisfaction evidence of Bidder's ability to comply with the indemnification provisions of
Section 1. Completion on Bidder's Default. If default shall be made by the Bidder or by any subcontractor in the performance of any

property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Owner may correct such violation at the Bidder's expense: Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder's expense without such prior notice to the Bidder.

The Bidder shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

Section 2. Insurance. The Bidder shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employee or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single policy may include but may not be limited to policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than $1 million per person and $1 million per occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section. The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Owner may correct such violation at the Bidder's expense: Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder's expense without such prior notice to the Bidder.

The Bidder shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

Section 2. Insurance. The Bidder shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employee or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single policy may include but may not be limited to policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than $1 million per person and $1 million per occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Owner may correct such violation at the Bidder's expense: Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder's expense without such prior notice to the Bidder.

The Bidder shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

Section 2. Insurance. The Bidder shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employee or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single policy may include but may not be limited to policies of insurance, primary and excess including the umbrella or catastrophe form.

(c) Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than $1 million per person and $1 million per occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Owner may correct such violation at the Bidder's expense: Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder's expense without such prior notice to the Bidder.

The Bidder shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.
§ 1726.340

of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the Surety or Sureties, if any, upon the Contractor's Bond or Bonds a written notice requiring the Bidder to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Bidder such default shall be corrected or arrangements for the correction thereof satisfactory, to both the Owner and the Administrator shall be made by the Bidder or its Surety or Sureties, if any, the Owner may take over the completion of the Project and prosecute the same to completion by Contract or otherwise for the account and at the expense of the Bidder, and the Bidder and its Surety or Sureties, if any, shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliances, and plant belonging to the Bidder or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims or demands which the Bidder may have against third persons in connection with this Contract and for such purpose the Bidder does hereby assign, transfer and set over unto the Owner all such rights, claims and demands.

Section 2. Liquidated Damages. The time of the Completion of Construction of the Project is of the essence of the Contract. Should the bidder neglect, refuse or fail to complete the construction within the time herein agreed upon, after giving effect to extensions of time, if any, herein provided, then in that event and in view of the difficulty of estimating with exactness damages caused by such delay, the Owner shall have the right to deduct from and retain out of such moneys which may be then due, or which may become due and payable to the Bidder the sum of $____ per day for each and every day that such construction is delayed on its completion beyond the specified time, as liquidated damages and not as a penalty; if the amount due and to become due from the Owner to the Bidder is insufficient to pay in full any such liquidated damages, the Bidder, shall pay to the Owner the amount necessary to effect such payment in full. Provided, however, that the owner shall promptly notify the Bidder in writing of the manner in which the amount retained, deducted or claimed as liquidated damages was computed.

Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Owner or the Government or the Administrator shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election: Provided, however, that the provisions of Section 2 of this Article shall be the exclusive measure of damages for failure by the Bidder to complete the construction of the Project within the time herein agreed upon.

Article VI—Miscellaneous

Section 1. Definitions.

a. The term “Administrator” shall mean the Administrator of the Rural Utilities Service of the United States of America and his duly authorized representatives or any other person in whom or authority in which may be vested the duties and functions which the Administrator is now authorized by law to perform.

b. The term “Engineer” shall mean the engineer employed by the Owner, with the approval of the Administrator, to provide engineering services for the Project, and said Engineer’s duly authorized assistants and representatives.

c. The term “Supervisor” shall mean the person, if any, appointed by the Administrator as the representative of the Government under the provisions of the Loan Contract providing for such appointment in special cases. The term is limited to such special representative of the Government, if any, who is responsible exclusively to the Administrator and does not refer to the Manager or any other person employed by the Owner and responsible to it.

d. The term “Project” shall mean the stations or other major facilities described in the Plans, Specifications for Construction, and Construction Drawings.

e. The term “Completion of Construction” shall mean full performance by the Bidder of the Bidder’s obligations under the Contract and all amendments and revisions thereof except the Bidder’s obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof, (2) the inventory referred to in Article III, Section 1 hereof, and (3) other final documents. The term “Completion of the Project” shall mean full performance by the Bidder of the Bidder’s obligations under the Contract and all amendments and revisions thereof except the Bidder’s obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof, (2) the inventory referred to in Article III, Section 1 hereof, and (3) other final documents. The term “Completion of the Project” shall mean full performance by the Bidder of the Bidder’s obligations under the Contract and all amendments and revisions thereof except the Bidder’s obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof, (2) the inventory referred to in Article III, Section 1 hereof, and (3) other final documents.
Rural Utilities Service, USDA

§ 1726.340

substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1936, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Seller agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.

Section 3. Patent Infringement. The Bidder shall save harmless and indemnify the Owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

Section 4. Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Bidder.

Section 5. Compliance with Statutes and Regulations. The Bidder shall comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Bidder acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called “Kick-Back” Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. §§ 287, 1001, as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental Agencies having jurisdiction in the premises.

a. Bidder’s Representations.

The Bidder represents that:

(1) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotion or transfer; recruitment or advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Bidder will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers’ representatives of the Bidder’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations and orders of the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations and orders.

(6) In the event of the Bidder’s noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations or orders, this Contract may be cancelled, terminated or suspended in whole or in part, and the Bidder may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.

b. Equal Opportunity Clause. During the performance of this Contract, the Bidder agrees as follows:

(1) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotion or transfer; recruitment or advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Bidder will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers’ representatives of the Bidder’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations and orders of the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations and orders.

(6) In the event of the Bidder’s noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations or orders, this Contract may be cancelled, terminated or suspended in whole or in part, and the Bidder may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.
§ 1726.340

(7) The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Bidder will be responsible to the Owner for any noncompliance: Provided, however, That in the event a Bidder becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.

c. Certificate of Nonsegregated Facilities.

The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained.

The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term “segregated facilities” means any waiting room, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 7. Franchises. The Bidder shall be under no obligation to obtain or assist in obtaining: Any franchises, authorizations, permits or approvals required to be obtained by the Owner from Federal, State, County, Municipal or other authorities; or any agreements between the Owner and third parties with respect to any matters incident to the construction and operation of the Project.

Section 8. Nonassignment of Contract. The Bidder shall perform directly and without subcontracting not less than twenty-five per centum (25%) of the construction of the Project, to be calculated on the basis of the total Contract price. The Bidder shall not assign the Contract effected by an acceptance of this Proposal or any interest in any funds that may be due or become due hereunder or enter into any contract with any person, firm or corporation for the performance of the Bidder’s obligations hereunder or any part thereof, without the approval in writing of the Owner and of the Surety and Sureties, if any, on any bond furnished by the Bidder for the faithful performance of the Bidder’s obligations hereunder. If the Bidder, with the consent of the Owner and any Surety or Sureties on the Contractor’s Bond or Bonds, shall enter into a subcontract with any subcontractor for the performance of any part of this Contract, the Bidder shall be as fully responsible to the Owner and the Government for the acts and omissions of such subcontractor and of persons employed by such subcontractor as the Bidder would be for its own acts and omissions and those of persons directly employed by it.

Section 9. Extension to Successors and Assigns. Each and all of the covenants and agreements herein contained shall extend and be binding upon the successors and assigns of the parties hereto.

Section 10. Contractor. Upon acceptance of this Proposal, the successful Bidder shall be the Contractor and all references in the Proposal to the Bidder shall apply to the Contractor.

Section 11. Approval by the Administrator. No acceptance of this Proposal shall become effective until approved in writing by the Administrator: Provided, however, that no obligations shall arise hereunder unless such approval is given within forty-five (45) days from the date of acceptance by the Owner.

By (Bidder) (Address) (President)
Attest: (Secretary) Date

The Proposal must be signed with the full name of the Bidder. If the Bidder is a partnership, the Proposal must be signed in the partnership name by a partner. If the Bidder is a corporation, the Proposal must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

Specifications for Construction

Section 1. Scope of Work. The work covered by this Proposal embraces the complete construction of one or more substations or other major facilities as specified in the Acceptance, any omissions or discrepancies notwithstanding. All material furnished by
Section 2. Materials. It is the intent of these specifications that insofar as materials required are included in the Rural Utilities Service "List of Materials Acceptable for use on Systems of RUS Electrification Borrowers," such materials only shall be used. In the event that any materials are required beyond the scope of the "List of Materials Acceptable for use on Systems of RUS Electrification Borrowers," specifications for such materials will be included on the drawings or in a supplement to these specifications.

Section 3. Drawings. The Drawings and Specifications collectively, show the specifications of the material and equipment shown thereon, and include schedules of conduit, cable and other items not readily ascertained from the picture drawings. Such schedules show the quantities, sizes, types and other pertinent information; method of installation, and construction details are indicated clearly. The drawings and specifications in the attached List of Drawings are made a part of these contract Specifications.

Section 4. Description of Construction Units. Each Construction Unit consists of a complete installation of the designated portion of a substation or switching station as specified in the drawings, together with connections to associated equipment. Each Construction Unit represents all labor and material including necessary accessories completely installed and tested in satisfactory operation. Full identification of each Construction Unit and all necessary specifications of the installation shall be shown on the drawings. Each item of material in each Construction Unit shall be of the designated size, rating, type, voltage, or other specification in accordance with the drawings. The bill of material drawing for each station should contain adequate identification of the Construction Units under which the material is to be installed and should show what items of material may be partly or entirely found in the lists of owner-furnished materials. All items of equipment, unless otherwise specified, are mounted on a structure which shall be a Construction Unit of Group A.

Each Construction Unit shall be designated by the letter of the Group to which it belongs and an identifying number. The same item of equipment shall carry the same Construction Unit designation in all the stations. Items of equipment designated by the same Construction Unit in one station shall be of only one kind as to voltage, type and other specifications. The bid sheet for each station shall be prepared separately from other stations and shall contain all unit prices for Construction Units contained in the station. It is intended that in all cases the "Name and Description of Construction Unit" column of the Bid Sheets shall contain sufficient information to identify the Construction Unit.

Additional description to one or more of the Groups may be provided by the Engineer if deemed necessary to clarify the intent of these Specifications for Construction.

Group A. Structures. A Construction Unit consists of a structure, or structures, with bus supports including insulators and fittings, buses, conductors and overhead ground wires to adjacent structures within the station, grounding material to connect equipment with the ground bus, and associated material including mounting brackets, supports for equipment, clamps and connectors, all as specified in the drawings.

Group B. Three-Pole Group Operated Air Break Switches. A Construction Unit consists of one three-pole group operated air break switch with all accessories and operating mechanisms as specified in the drawings.

Group C. Lightning Arresters. A Construction Unit consists of one single-phase lightning arrester.

Group D. Single Pole Disconnecting Switches. A Construction Unit consists of one single pole disconnecting or by-pass switch as specified in the drawings. If a fuse disconnect switch is specified, the fuse is included with the switch.

Group E. Oil Circuit Breakers. A Construction Unit consists of one complete three-phase power circuit breaker complete with supporting frame and control cabinet, unless shown otherwise in the drawings, mounted as specified in the drawings.

Group F. Oil Circuit Reclosers. A Construction Unit consists of a complete single-phase or three-phase oil circuit recloser as specified in the drawings.

Group G. Meters, Relays and Instrument Transformers. A Construction Unit consists of one meter, relay, potential transformer or current transformer.

Group H. Transformers. A Construction Unit consists of one power transformer or one station service transformer either single-phase or three-phase as specified in the drawings.

Group I. Voltage Regulators. A Construction Unit consists of one single-phase or three-phase voltage regulator as specified in the drawings.

Group J. Communications and Supervisory Control Equipment. A Construction Unit
§ 1726.341 Electric system communications and control equipment contract, RUS Form 786.

The contract form in this section shall be used when required by this part.

Electric System Communications and Control Equipment Contract (Including Installation)

Proposal to Furnish, Deliver, and Install Equipment and Material

To: __________ (hereinafter called the “Purchaser”)  

The undersigned (hereinafter called the “Seller”) hereby proposes to furnish, deliver, install, align and test the equipment and materials, (hereinafter called the “Equipment”) described in the plans, specifications and drawings (hereinafter called the “Specifications”) attached hereto identified as __________ and made a part hereof, and other Attachments identified as __________ and made a part hereof, for the electric system designated __________, financed in whole or in part by a loan to the Purchaser by the United States of America, acting through the Administrator of the Rural Utilities Service (hereinafter called the “Administrator”).

The Seller has become informed as to the location and characteristics of the proposed Equipment and the facilities over which the Equipment is to perform, has become informed as to the kind of facilities required before and during the delivery and installation of the Equipment and has become acquainted with the labor conditions which would affect the work as well as the ecological and environmental criteria to be followed. The Seller agrees that if its Proposal is accepted the following terms and conditions shall govern.

If, in submitting this Proposal, the Seller has made any change in the form of Proposal furnished by the Purchaser, the Seller understands that the Purchaser and the Administrator may evaluate the effect of such change as they see fit or they may exclude the Proposal from consideration.

Article I

Section 1. Proposal Price. The Seller will furnish, deliver, install, align and test the Equipment described in the Specifications for the following sum:

Total Contract Price $ __________

Delivery time is __________ calendar days.

Completion time is __________ calendar days.

A detailed price breakdown by locations, showing equipment pricing and installation...
Section 1. Time of Completion. The time of delivery of the Equipment and of completion of the work is of the essence of this Contract. The Seller shall deliver the Equipment within the number of calendar days specified in Article I, Section 1, after the Administrator shall have approved this contract in writing and will prosecute diligently and will promptly perform all work in connection with such change or addition. The time for such delivery and completion shall be extended for the period of any reasonable delay due exclusively to causes beyond the control and without the fault of the Seller, including, but not limited to, acts of God, fires, strikes, floods, changes in the Specifications as herein provided, and acts or omissions of the Purchaser with respect to matters for which the Purchaser is solely responsible; provided, however, that, if any claim for extension of time shall be adjusted at the time any such delay occurs or any such change is made.

Section 2. Supervision and Inspection. The Seller shall furnish adequate supervision to the work. He will carefully study and compare all drawings, specifications, and other instructions and will at once report to the Purchaser any error, inconsistency or omission which he may discover. The Seller will keep on his work during its progress a competent superintendent and any necessary assistants, all satisfactory to the Purchaser. The Superintendent shall represent the Seller in his absence and all directions given to him shall be as binding as if given to the Seller. When requested, such directions shall be confirmed in writing.

Section 3. The Purchaser will make available during installation a competent representative to coordinate installation activities with the Seller.

Section 4. Alignment, Inspection and Tests. The Seller shall adjust and align the Equipment to perform in accordance with the Specifications and furnish in writing to the Purchaser data to show the state of adjustment of the Equipment. Immediately upon completion of the installation and alignment of the Equipment the Seller shall provide the necessary test equipment and perform the inspections and tests specified in the Specifications under the direct supervision of the Purchaser or its Engineer. A competent representative of the Purchaser or his Engineer will be available to supervise and witness these tests immediately upon completion of installation and alignment by the Seller and to determine for the Purchaser that the performance of the equipment meets the Specifications. Such determination, however, shall not preclude subsequent rejection pursuant to Section 7 of this Article. II. The Seller shall furnish in writing to the Purchaser the results of all tests. All Equipment furnished hereunder shall be subject to the inspection, tests, and approval of the Purchaser and the Administrator. The Purchaser and the Administrator shall have the right to inspect all records of the Seller and of any subcontractor relevant to the installation work. The Seller shall provide all reasonable facilities necessary for such inspection and tests.
§ 1726.341

7 CFR Ch. XVII (1-1-98 Edition)

Section 5. If as a result of the tests and measurements set forth in Section 4 above, the Performance Specifications of the Equipment cannot be met due to inaccuracies, or inadequacies in the system data provided in the Specifications, the Purchaser and Seller shall determine what corrective measures are necessary and whether these corrections shall be made by the Purchaser or the Seller.

If it is determined that the Seller shall make the corrections, the Purchaser will reimburse the Seller pursuant to a contract amendment, subject to the approval of the Administrator, for such reasonable additional expenses for the corrections, realignment and retesting the Seller is required to perform pursuant to this amendment.

Where it is determined that the Purchaser will make the corrections, the Purchaser will reimburse the Seller pursuant to a contract amendment, subject to the approval of the Administrator, for such reasonable additional expenses for realignment and retesting the Seller is required to perform pursuant to this amendment, including, if necessary, the added expense of returning to the project, where necessary, for reperforming alignment and testing.

Section 6. Employees. The Purchaser shall have the right to require the removal from the work of any employee of the Seller if in the judgment of the Purchaser such removal shall be necessary in order to protect the interest of the Purchaser.

Section 7. Defective Workmanship and Materials. Notwithstanding the acceptance of workmanship, materials or equipment or the giving of any certificate with respect to the Completion of the Work, if during performance hereunder or within one year after completion or within such longer period as the Equipment or any part thereof may be guaranteed by the Seller and Manufacturer, the workmanship, materials or equipment, except as may be otherwise provided in the Specifications, shall be found to be defective or not in conformity with the Specifications, the Seller shall remedy or replace at its expense such workmanship, materials or equipment within thirty (30) days after notice of the existence thereof shall have been given to the Seller by the Purchaser.

Article III—Payments and Releases of Liens

Section 1. Payment to Seller.
(a) The Purchaser shall pay the Seller upon the basis of estimates by the Seller recommended by the supervising engineer, if any, and approved by the Purchaser of the work completed, the following percentages of the price of the equipment for each location set forth in Article I, Section 1, as and if revised: 45% when 50% of the equipment for each location has been delivered at the site of the Project; 90% when all the equipment for each location has been delivered at the site of the Project.
(b) Upon completion of installation of the Equipment for each location, the Purchaser shall pay the Seller 90% of the Total price for such location.
(c) Upon Completion of the Installation of the Equipment, but prior to the payment to the Seller of any amount in excess of ninety percent (90%) of the Total Contract Price, the supervising engineer, if any, of the Purchaser or the Purchaser shall inspect the work performed hereunder and if the work shall be found acceptable and all provisions hereunder fully performed, the supervising engineer, if any, of the Purchaser shall certify as to that fact and as to the amount of the balance found to be due to the Seller.

Upon acceptance by the Purchaser, the Purchaser shall pay to the Seller all unpaid amounts to which the Seller shall be entitled hereunder; provided, however, such final payments shall be made not later than 120 days after completion of the work, unless such acceptance by the Purchaser shall be withheld because of the fault of the Seller.

Section 2. Release of Liens. Upon the Completion of the Installation of the Equipment by the Seller, but prior to the payment to the Seller of any amount in excess of ninety percent (90%) of the Total Contract Price, the Seller will deliver to the Purchaser, in duplicate, a certificate, in a form approved by the Administrator, that all labor has been paid and that all such materialmen and subcontractors who have furnished materials or services for the work and a certificate by the Seller in a form approved by the Administrator, to the effect that all labor has been paid and that all such releases have been submitted to the Purchaser for approval.

In lieu of releases of liens, and if the Administrator shall so approve, the Seller may deliver to the Purchaser, in duplicate, (1) a certificate, in a form approved by the Administrator, that all manufacturers, materialmen and subcontractors who have furnished materials or services for the Project have been paid in full, and (2) an agreement to hold the Purchaser harmless against any liens arising out of the Seller's performance hereunder which may have been or may be filed against the Purchaser.

Article IV—Particular Undertakings of the Seller

Section 1. Protection to Persons and Property. At all times when Equipment is being delivered and installed the Seller will exercise reasonable precautions for the safety of employees on the work and of the public, and will comply with all applicable provisions of Federal, State and Municipal safety laws and building and construction codes. All machine and equipment and other physical hazards

1See Footnote 1.
2See Footnote 1.
shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America, unless such instructions are incompatible with federal, state, or municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

(a) The Seller shall keep at all times, and the premises free from accumulations of waste material or rubbish caused by his employees or work, and at the completion of the work he will remove all rubbish and all his tools, scaffolding and surplus materials and will leave his work "broom clean."

(b) The Seller will perform work in such manner as to maximize preservation of aesthetics and conservation of natural resources, and minimize marring and scarring of the landscape and siting of streams. There will be no depositing of trash in streams or waterways. Herbicides, other chemicals or their containers will not be deposited in or near streams, waterways or pastures. The Seller will follow, under the general direction of the Purchaser, the criteria relating to environmental protection as specified herein by the Purchaser.

(c) The work, from its commencement to completion, or to such earlier date or dates when the Purchaser may take possession and control, shall be under the charge and control of the Seller and during such period of control by the Seller all risks in connection therewith and the materials to be used therein, whether owned by the Seller or Purchaser, shall be borne by the Seller. The Seller will make good and fully repair all injuries and damages to the work or any portion thereof under the control of the Seller by reasons of any act of God, or any other casualty or cause whether or not the same shall have occurred by reason of the Seller's negligence.

(i) To the maximum extent permitted by law, Seller shall defend, indemnify, and hold harmless Purchaser and Purchaser's directors, officers, and employees from all liens and claims filed or asserted against Purchaser, its directors, officers, and employees, or Purchaser's property or facilities, for services performed or materials or equipment furnished by Seller, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Seller shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Purchaser promptly when it has done so. If Seller does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Purchaser shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Seller.

(ii) Seller shall provide to Purchaser's satisfaction evidence of Seller's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

(d) Monthly reports of all accidents will be promptly submitted by the Seller, giving such data as may be prescribed by the Purchaser.

Section 2. Delivery of Possession and Control to Purchaser. Upon written request of the Purchaser, the Seller shall deliver to the Purchaser full possession and control of any completed location included in the work, provided the Seller shall have been paid at least 90% of such Total Location Price. Upon such delivery of the possession and control of any such location to the Purchaser, the risks and obligations of the Seller, as set forth in Article IV, Section 1(b) hereof, with respect to such location shall be terminated; provided however, that nothing herein contained shall relieve the Seller of any liability with respect to defective workmanship or materials as specified in Article II, Section 7, hereof.

Section 3. Insurance. The Seller shall take out and maintain throughout the contract period insurance of the following types and minimum amounts:

(a) Workers' compensation and employers' liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

(b) Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less
than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single limit, in excess of such limits for property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Purchaser shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection “b” and “c” of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Purchaser shall be named as Additional Insured on all policies of insurance required in subsections “b” and “c” of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Purchaser. The Seller shall furnish the Purchaser a certificate evidencing compliance with the foregoing requirements which shall provide not less than 30 days prior written notice to the Purchaser of any cancellation or material change in the insurance.

Section 4. Purchase of Materials. The Seller shall purchase all materials and supplies outright and not subject to any conditional sales agreements, bailment lease or other agreement reserving unto the Seller any right, title or interest therein. Materials and Supplies shall become the property of the Purchaser as the Purchaser makes payments therefor to the Seller in accordance with Article III, Section 1(a). Unless otherwise specified, all materials shall be new.

Section 5. Assignment of Guarantees. All guaranties of materials and workmanship running in favor of the Seller shall be transferred and assigned to the Purchaser on completion of the work and at such time as the Seller receives final payment.

Section 6. Patent Infringement. The Seller shall hold harmless and indemnify the Purchaser from any and all claims, suits, and proceedings for the infringement of any patent or patents covering any, equipment, materials, supplies, or installation methods used in the work. The Seller shall, at its own cost (and Purchaser agrees to permit Seller to do so) defend any suits which may be instituted by any, party against the Seller for alleged infringement of patents relating to the Seller’s performance hereunder.

Section 7. Compliance with Statutes and Regulations. The Seller shall comply with all applicable statutes, ordinances, rules and regulations pertaining to the work. The Seller acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called “Kick-Back” Statutes (48 Stat. 948), and all regulations issued pursuant thereto, and 18 U.S.C. §§ 287,1001 as amended and the Seller agrees to comply with the provisions of all of such statutes and regulations.

Article V—Remedies

Section 1. Completion on Seller’s Default. If default shall be made by the Seller or by any subcontractor in the performance of any of the work hereunder, the Purchaser, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Seller and the surety or sureties upon the Seller’s Bond or Bonds, if any, a written notice requiring the Seller to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Seller such default shall be corrected or arrangements for the correction thereof, satisfactory to both the Purchaser and the Administrator, shall be made by the Seller or its surety or sureties, the Purchaser may take over the performance of the Seller’s obligations hereunder and prosecute the same to completion by contract or otherwise for the account and at the expense of the Seller, and the Seller and its surety or sureties shall be liable to the Purchaser for any cost or expense in excess of the contract price occasioned thereby. In such event, the Purchaser may take possession of and utilize, in completing the work, any tools, supplies, equipment, appliances and plant belonging to the Seller which may be situated at the site of the installation work. The Purchaser, in such contingency, may exercise all rights, claims or demands which the Seller may have against third persons in connection herewith and for such purpose the Seller does hereby assign, transfer and set over unto the Purchaser all such rights, claims and demands.

Section 2. Enforcement of Remedies by Administrator. The Administrator may on behalf of the Purchaser exercise any right or enforce any remedy which the Purchaser may exercise or enforce hereunder.

Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Purchaser or the Administrator shall be cumulative and shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election.
Article VI—Miscellaneous

Section 1. Definitions. (a) The contract documents shall consist of the Proposal and Acceptance, the Contractor’s Bond and the Specifications.

(b) The term “Completion of Installation” shall mean full performance by the Seller of theSeller’s obligations under the Contract and all amendments and revisions thereof, except that it shall not include the final acceptance tests or performance of the Seller’s obligations in respect of (i) releases of liens and Certificate of Seller under Article III, Section 2 hereof, (ii) other final documents. The term “Completion of the Work” shall mean full performance by the Seller of the Seller’s obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion signed by the supervising engineer and approved by the Purchaser or signed by the Purchaser, if the Purchaser shall not employ an Engineer, and approved in writing by the Administrator within a reasonable time after completion shall be conclusive evidence as to the fact of completion and the date thereof.

Section 2. Materials and Supplies. In the performance of this contract, there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada; and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced, or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and to the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Seller agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.

The Seller represents that:

It has ___, does not have ___, 100 or more employees, and if it has, that it has ___, has not ___, furnished the Equal Employment Opportunity—Employers Information Report EEO-1, Standard Form 100, required of employers with 100 or more employees pursuant to Executive Order 11246 and Title VII of the Civil Rights Act of 1964.

The Seller agrees that it will obtain, prior to the award of any subcontract for more than $10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

The Seller agrees that if it has 100 or more employees and has not submitted a report on Standard Form 100 for the current reporting year and that if this Contract will amount to more than $10,000 the Seller will file such report, as required by law, and notify the Purchaser in writing prior to the commencement of the work.

(b) Equal Opportunity Clause. During the performance of this Contract, the Seller agrees as follows:

(1) The Seller will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Seller will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited, to the following: Employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Seller agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Seller will, in all solicitations or advertisements for employees placed by or on behalf of the Seller, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Seller will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers’ representative of the Seller’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Seller will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Seller will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Seller’s noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations or orders, this Contract may be cancelled, terminated or suspended in whole.
or in part, and the Seller may be declared ineligible for further Government contracts or federally-assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation or order of the Secretary of Labor, or as otherwise provided by law.

(7) The Seller will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Seller will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, That in the event a Seller becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Seller may request the United States to enter into such litigation to protect the interests of the United States.

(c) Certificate of Nonsegregated Facilities. The Seller certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Seller certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Seller agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term "segregated facilities" means any waiting room, work areas, restrooms and washrooms, restaurants and other eating areas, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Seller agrees that (except where it has obtained identical certificates from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 4. Bond. The Seller will furnish to the Purchaser, for a contract in excess of $100,000 a bond in a penal sum not less than the Proposal price and in the form attached hereto and with a Surety or Sureties listed by the United States Treasury Department as acceptable Sureties.

Section 5. License. The Seller shall comply with all applicable construction codes.

(a) The Seller warrants that he possesses contractor's license number issued to him by the State of ______________ in which the work is located, and said license expires on ______________, 19___.

(b) The Seller warrants that no license is required in the State in which the work is located.

(Cross out that subsection that does not apply.)

Section 6. Nonassignment of Contract. The Seller will not assign the Contract effected by acceptance of this Proposal, or any part thereof, or enter into any contract with any person, firm or corporation, for the performance of the Seller's obligations hereunder or any part hereof, without the approval of the Purchaser and the Surety or Sureties on the Contractor's Bond or Bonds, if any, shall enter into any subcontract with any subcontractor for the Performance of any part of the installation work to be performed at the installation site (as distinguished from furnishing and delivery of equipment and materials). If the Seller, with the consent of the Purchaser and the Surety or Sureties on the Contractor's Bond or Bonds, if any, shall enter into any subcontract with any subcontractor for the Performance of any part of the installation work to be performed at the installation site, the Seller shall be as fully responsible to the Purchaser and the United States for the acts and omissions of such subcontractor and of persons employed by such subcontractor as the Seller would be for its own acts and omissions and those of persons directly employed by it.

Section 7. Approval of the Administrator. The acceptance of this Proposal by the Purchaser shall not create a contract unless such acceptance shall be approved in writing by the Administrator within ninety (90) days after the date of the Proposal.

DISTRIBUTION LINE EXTENSION CONSTRUCTION CONTRACT (LABOR AND MATERIALS)

Proposal
To: ________ (hereinafter called the “Owner”).

Article I—General
Section 1—Offer to Construct. The undersigned (hereinafter called the “Contractor”) hereby proposes to furnish labor, materials, and equipment for, and construct for the prices hereinafter stated, the rural electric project ________ Line Extensions (hereinafter called “Project”) in strict accordance with the Plans, Specifications, and Construction Drawings hereinafter referred to. The Contractor acknowledges that it has made a careful examination of the site of the Project and of the Plans, Specifications and Construction Drawings; as applicable, which by this reference are incorporated herein, together with the Plans, Proposal and Acceptance constitute the Contract. The Plans, consisting of maps and special drawings, and approved modifications in standard specifications are attached hereto and identified as follows: ________.

Section 5—Familiarity with Conditions. The Contractor acknowledges that it has made a careful examination of the site of the Project and of the Plans, Specifications and Construction Drawings, and has become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of equipment, tools, and other facilities required before and during the construction of the Project and has become acquainted with the availability status of materials and with the labor conditions which would effect work on the Project.

Section 6—License. The Contractor warrants that a Contractor’s license is not required, and if required, it possesses Contractor’s License No. ________ for the

§ 1726.342
§ 1726.342

7 CFR Ch. XVII (1-1-98 Edition)

State of __________ in which the Project is located, and said license expires on __________.

Section 7—Contractor’s Resources. The Contractor warrants that it possesses adequate financial resources for the performance of the work covered by this Proposal and that it will provide necessary tools and equipment and a qualified superintendent and other employees.

Section 8—Changes in Construction. The Contractor agrees to make such changes in construction previously installed in the Project by the Contractor as required by the Owner on the following basis: The cost of labor shall be the reasonable cost thereof as agreed upon by the Contractor and the Owner but in no event shall it exceed two (2) times the labor price quoted in the Proposal for the installation of the unit to be changed. Such compensation shall be in lieu of any other payment for the installation and removal of the original unit but shall not include the cost of the installation, if any, of a new or replacing unit, payment for which shall be made at the unit price as quoted in the Proposal.

No payment shall be made to the contractor for correcting errors or omissions on the part of the Contractor which result in construction not in accordance with the Plans and Specifications.

Section 9—Materials and Equipment. The Contractor agrees to furnish and use in the construction of the Project under this Proposal, only such materials and equipment as are included on the current “List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers,” including revisions adopted prior to construction.

The Contractor further agrees to furnish and use guy wire with ASTM Class ___ (Owner to insert A or B) zinc coating. All leads on equipment such as transformers, reclosers, etc., shall be of #6 minimum copper conductivity using ___ (Owner to insert stranded soft drawn copper or aluminum alloy) conductor. All conductor ties on poles, crossarms, and other timber products, of which the physical characteristics, method of treatment, type of preservative, instructions on inspection and general procedure shall be in accordance with RUS standards and requirements.

Ground rods and butt-type grounding plates shall be ___ (Owner to insert galvanized steel or copper.)

Underground primary cables shall have coated copper neutral (Owner to insert round or flat.)

The Contractor further agrees to furnish poles, crossarms, and other timber products, of which the physical characteristics, method of treatment, type of preservative, instructions on inspection and general procedure shall be in accordance with RUS standards and requirements.

Crossarms shall be ___ (Owner to insert Douglas Fir or Southern Yellow Pine), treated with ___ (Owner to insert type of preservative.)

The Contractor agrees that the prices for poles, crossarms, and other timber products set forth herein shall include the cost of preservative treatment and inspection or insured warranty. The Contractor further agrees to obtain from the supplier inspection and treatment reports or insured warranties for checking against the delivery timber, and to submit such reports or warranties to the Owner as one of the prerequisites to monthly and final payments.

Section 10—Owner-Furnished Materials. a. The Contractor understands and agrees that the Owner may, with approval of the Contractor, furnish to the Contractor some of the materials and equipment required for construction of the Project. (hereinafter called “Owner-Furnished Materials”). The quantity, type, and value of Owner-Furnished Materials for each Section shall be as agreed upon by the Contractor and Owner prior to the start of construction of each Section of the Project. The Owner shall make such materials and equipment available to the Contractor as provided in Article II, Section 1, b, and the Contractor will give to the Owner a receipt in such form as the Owner shall approve.

b. The value of the completed Construction Units certified to by the Contractor each month pursuant to Article III, Section 1, a, of this Proposal shall be reduced by an amount equal to the value of the Owner-Furnished Materials installed by the Contractor during the preceding month. Only ninety percent (90%) of the remainder shall be paid prior to the Completion of the Section. Owner-Furnished Materials, if any, not required for the Section, shall be returned to the Owner by the Contractor upon Completion of Construction of the Section. The value of all Owner-Furnished Materials not installed in the Section of the Project or returned to the Owner shall be deducted from the final payment to the Contractor for the Section.

Section 11—References to Materials. The references in this Proposal to “Materials”, except in Article IV, Section 1 f, shall be understood to mean only materials to be furnished by the Contractor.

Section 12—Taxes. The unit prices for Construction Units in this Proposal include provisions for the payment of all monies which will be payable by the Contractor or the Owner in connection with construction of the Project on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies or equipment to be incorporated in the Project as part of such Construction Units. The Contractor agrees to pay all such taxes except on Owner-Furnished Materials and it is understood that, as to Owner-Furnished Materials, the values as agreed to by the Owner and
Contractor for such materials include such taxes, if applicable. The Contractor will furnish to the appropriate taxing authorities all required information and reports pertaining to materials used on construction of the Project except as to Owner-Furnished Materials.

Article II—Construction

Section 1—Time and Manner of Work. The Contractor agrees to be prepared to commence the construction of the Project within fifteen (15) calendar days after written notice by the Owner of the acceptance of the Proposal. The Contractor agrees to commence construction of a Section within ( ) days after receipt in writing from the Owner of the following:

a. Location and number of the various Construction Units required for construction of the Section (hereinafter called the “Staking Sheets”).
b. Itemized list including appropriate Unit prices, of the Owner-Furnished Materials to be used in the construction of the Section and an authorization by the Owner for the Contractor to obtain such materials from the Owner’s warehouse located at

c. A schedule showing the rate at which construction of the Section shall proceed and the total number of calendar days (excluding Sundays) to be allowed for completion; provided, however, that the required completion time for any Section shall not be less than ( ) days or ( ) days per mile of line, whichever is the greater, which days shall be calendar days (excluding Sundays).

The time of the completion of the Section is of the essence of the contract to be effected by acceptance of this Proposal.

d. A statement that all required easements and rights-of-way have been obtained from the owners of the properties across which the Section is to be constructed (including tenants who may reasonably be expected to object to such construction).

e. A statement that all necessary staking has been completed.

f. A statement that all necessary funds for prompt payment for the construction of the Section will be available.

g. Specific instruction as to location and extent of work to be performed on energized lines, if any. The Contractor will not be required to dig holes, set poles, install anchors, install underground conduit, perform any plowing for the installation of underground cable, or dig trenches if there are more than six (6) inches of frost in the ground nor to perform any construction on such days when in the judgment of the Owner snow, rain, or wind, or the results of snow, rain, or frost make it impracticable to perform any operation of construction; provided further that the Contractor will not perform any plowing for the installation of underground cable on public roads or highways if there are more than two (2) inches of frost in the ground. To the extent of the time lost due to the conditions described herein and approved in writing by the Owner, the time of completion set out above will be extended. The time for completion shall be extended for a period of any reasonable delay (other than a delay resulting from the failure of the Contractor to secure sufficient labor) which is due exclusively to causes beyond the control and without the fault of the Contractor including acts of God, fires, floods, inability to obtain materials, direction of the Owner to cease construction as herein provided, and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: Provided, however, that no such extension of time for completion shall be granted the Contractor unless within ten (10) days after the happening of any event relied upon by the Contractor for such an extension of time the Contractor shall have made a request therefor in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

Section 2—Changes in Plans, Specifications, and Drawings. The Owner may, from time to time during the progress of the construction of the Project, make such changes in, additions to, or subtractions from the Plans, Specifications, and Drawings as conditions may warrant: Provided, however, that if the cost to the Contractor shall be materially increased by any such change or addition, the Owner shall pay the Contractor for the reasonable cost thereof in accordance with a construction contract amendment signed by the Owner and the Contractor, but no claim for additional compensation for any such change or addition will be considered unless the Contractor shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition.

Section 3—Supervision and Inspection. a. The Contractor shall cause the construction work on the Project to receive constant supervision by a competent superintendent (hereinafter called the “Superintendent”) who shall be present at all times during working hours where construction is being carried on. The Contractor shall also employ, in connection with the construction of the Project, capable, experienced, and reliable foremen and such skilled workmen as may be required for any reasonable delay (other than a delay resulting from the failure of the Contractor to secure sufficient labor) which is due exclusively to causes beyond the control and without the fault of the Contractor including acts of God, fires, floods, inability to obtain materials, direction of the Owner to cease construction as herein provided, and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible: Provided, however, that no such extension of time for completion shall be granted the Contractor unless within ten (10) days after the happening of any event relied upon by the Contractor for such an extension of time the Contractor shall have made a request therefor in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner.
§ 1726.342 7 CFR Ch. XVII (1–1–98 Edition)

b. The Owner reserves the right to require the removal from the Project of any employee of the Contractor if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner shall have the right to require the Contractor to increase the number of his employees and to increase the amount or kinds of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner; but the failure of the Owner to give any such directions shall not relieve the Contractor of his obligations to complete the work within the time and in the manner specified in this Proposal.

c. The manner of construction of the Project and all materials and equipment used therein, shall be subject to the inspection, tests, and approval of the Owner. The Owner shall have the right to inspect all payrolls and other data and records of the Contractor relevant to the work. The Contractor will provide all reasonable facilities necessary for such inspection and tests. The Contractor shall have an authorized agent accompany the inspector when final inspection is made and, if requested by the Owner, when any other inspection is made.

d. In the event that the Owner shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Contractor, if requested by the Owner, to have an inspection made by an engineer approved by the Owner for the purpose of determining the exact nature, extent, and location of such defects.

Section 4—Defective Materials and Workmanship. a. The acceptance of any materials, equipment (except owner-furnished materials) or any workmanship by the Owner shall not preclude the subsequent rejection thereof if such materials, equipment, or workmanship shall be found to be defective after delivery or installation, and any such materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be, by and at the expense of the Contractor. Any such condemned material or equipment shall be immediately removed from the work of the Project by the Contractor at the Contractor's expense. The Contractor shall not be entitled to any payment hereunder so long as any defective materials, equipment or workmanship in respect to the Project, of which the Contractor shall have had notice, shall not have been replaced or remedied, as the case may be.

b. Notwithstanding any certificate which may have been given by the Owner, if any materials, equipment (except owner-furnished materials) or any workmanship which does not comply with the requirements of this Contract shall be discovered within one (1) year after Completion of Construction of the Project, the Contractor shall replace such defective materials or equipment or remedy any such defective workmanship within thirty (30) days after notice in writing of the existence thereof shall have been given by the Owner. If the Contractor shall be called upon to replace any defective materials or equipment or to remedy defective workmanship as herein provided, the Owner, if so requested by the Contractor shall deenergize that section of the Project involved in such work. In the event of failure by the Contractor to do so, the Owner may replace such defective materials or equipment or remedy such defective workmanship, as the case may be, and in such event the Contractor shall pay to the Owner the cost and expense thereof.

Section 5—Materials Removed. The Contractor will return to the Owner or reuse in the construction of other assembly units all materials removed from the lines under Section I—Removal Assembly Units and Section H—Conversion Assembly Units. Upon completion of each Section of the Project the Contractor will return to the Owner all materials, including usable materials as well as scrap, furnished by the Owner in excess of those required for the construction of the Section as determined from the Final Inventory approved by the Owner. The Contractor will reimburse the Owner at the current invoice cost to the Owner for loss and for breakage through Contractor's negligence of materials furnished by the Owner to the Contractor and for materials removed from the lines by the Contractor.

Section 6—Term of Contract. It is understood and agreed that, notwithstanding any other provisions of this Contract, the Contractor will not be required to commence any construction after the expiration of one year from the date following acceptance of this Proposal by the Owner.

Article III—Payment

Section 1—Payments to Contractor. a. Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Contractor for construction accomplished during the preceding calendar month on the basis of completed Construction Units furnished and certified to by the Contractor and approved by the Owner solely for the purpose of payment. Provided, however, that such approval by the Owner shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate approved during the construction of a Section shall be paid by the Owner to the Contractor prior to completion of the Section. Upon completion by the Contractor of the construction of a Section, the Contractor will prepare a Final Inventory of the Section showing the total number and character of Construction Units and, will certify it to the Owner together with a certificate of the total cost of the construction

350
performed. Upon the approval of such certificates, the Owner shall make payment to the Contractor of all amounts to which the Contractor shall be entitled thereunder which shall not have been paid.

b. The Contractor shall be paid on the basis of the number of Construction Units actually installed at the direction of the Owner, as shown by the Inventory based on the Staking Sheets: Provided, however, that the total cost shall not exceed the maximum Contract price for the construction of the Project, unless such excess shall have been approved in writing by the Owner. It is understood and agreed that this maximum Contract price is $ dollars ($ ). It is also agreed that the Contractor shall not be entitled to any claim for damages on account of any reasonable additions to or subtractions from the Project, or of any delay occasioned thereby, or of any changes in the routing of the lines.

c. No payment shall be due while the Contractor is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Contractor the amount of any claim by a third party against either the Contractor the Owner or any contractors who have furnished materials or services for the Project and all construction Units comprising the completed Project, unless such excess shall have been approved in writing by the Owner. It is understood and agreed that this maximum Contract price is $ dollars ($ ).

d. The Contractor shall so conduct the construction of the Project as to cause the least possible obstruction of public highways.

e. The Contractor shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances, and regulations or by local conditions.

d. The Contractor shall do all things necessary or expedient to protect properly any and all parallel, converging, and intersecting lines, joint line poles, highways, and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways, or other property are damaged in the course of the construction of the Project, the Contractor shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

f. The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided shall be under the charge and control of the Contractor and during such period of control by the Contractor all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Contractor.
The Contractor shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Contractor by reason of any Act of God or other cause whether or not the same shall have occurred by reason of the Contractor’s negligence.

(i) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner’s directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney’s fees) for personal loss, injury, or death to persons (including but not limited to Contractor’s employees) or property or the property of any other person or entity (including but not limited to Contractor’s property) in any manner arising out of or connected with the Contract, the materials or equipment supplied or services performed by Contractor, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Contractor liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner’s directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner’s property or facilities, for services performed or materials or equipment furnished by Contractor, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Contractor shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Contractor does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Contractor.

(iii) Contractor shall provide to Owner’s satisfaction evidence of Contractor’s ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

g. Any and all excess earth, rock, debris, underbrush, and other useless material shall be removed by the Contractor from the site of the Project as rapidly as practicable as the work progresses.

h. Upon violation by the Contractor of any provisions of this section, after written notice of such violation given to the Contractor by the Owner, the Contractor shall immediately correct such violation. Upon failure of the Contractor to do so the Owner may correct such violation at the Contractor’s expense.

i. The Contractor shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

j. The Contractor shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the Owner that proper authorization has been received from the owner of the property, and the Contractor shall promptly notify the Owner whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on his land in connection with the Project and shall obtain the consent in writing of the Owner before proceeding in any such case.

Section 2—Insurance. The Bidder shall take out and maintain throughout the period of this Agreement the following types and minimum amounts of insurance:

a. Workers’ compensation and employer’s liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employee or employee is not subject to workers’ compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers’ compensation laws.

b. Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single limit of $1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

c. Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than $1 million each occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy of policies of insurance, primary and excess including the umbrella or catastrophe form. The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection ‘b’ and ‘c’ of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.
The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section. The policies of insurance shall be in such form and issued by insurance companies as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements within twenty (20) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3—Permits for Explosives. All permits for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Contractor.

Article V—Remedies

Section 1—Completion on Contractor’s Default. If default shall be made by the Contractor or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Contractor and the Surety, if any, a written notice requiring the Contractor to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Contractor and the Surety, if any, such default shall be corrected or arrangements for the correction thereof satisfactory to the Owner shall be made, the Owner may take over the construction of the Project and prosecute the same to completion by contract or otherwise for the account and at the expense of the Contractor, and the Contractor shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliance, and plant belonging to the Contractor or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims, or demands which the Contractor may have against third persons in connection with this Proposal and for such purpose the Contractor does hereby assign, transfer, and set over unto the Owner all such rights, claims, and demands.

Section 2—Materials and Supplies. In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been manufactured or produced in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured, produced or manufactured, as the case may be, in the United States, Mexico, or Canada, provided that other articles, materials, or supplies may be used in the performance of this contract in accordance with the provisions of the Rural Electrification Act of 1938, being Title IV of Public Resolution No. 122, 75th Congress, approved June 21, 1938. The Contractor agrees to submit to the Purchaser such certificates with respect to compliance with the foregoing provision as the Administrator from time to time may require.
§ 1726.342

Section 4—Compliance with Statutes and Regulations. The Contractor will comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Contractor acknowledges that it is familiar with the Rural Electrification Act of 1966, as amended, the so-called “Kick-Back” Statute (48 Stat. 948), and regulations issued thereunder, and 18 U.S.C. §§ 297, 1001, as amended. The Contractor understands that the obligations of the parties hereunder are subject to the applicable regulations and rules of Governmental agencies having jurisdiction in the premises.

Section 5—Equal Opportunity Provisions.

a. Contractor’s Representations.

The Contractor represents that:

(1) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor represents that:

(2) The Contractor will, in all solicitations and orders of Government agencies hereunder are subject to the applicable regulations and orders of the Secretary of Labor.

b. Equal Opportunity Clause. During the performance of this Contract, the Contractor agrees as follows:

(1) The Contractor will post an Affirmative Action Plan to ensure that applicants are treated during employment without regard torace, color, religion, sex, or national origin. The Contractor agrees that it will obtain, prior to the award of any subcontract for more than $10,000 hereunder to a subcontractor with 100 or more employees, a statement, signed by the proposed subcontractor, that the proposed subcontractor has filed a current report on Standard Form 100.

(2) The Contractor will, in all solicitations and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(3) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor or pursuant thereto, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Contractor’s noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be cancelled, terminated, or suspended in whole or in part, and the Contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

(7) The Contractor will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontract or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: Provided, however, that in the event a Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

c. Certificate of Nonsegregated Facilities. The Contractor certifies that it does not maintain or provide for its employees any
segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Contractor certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Contractor agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term "segregated facilities" means any waiting rooms, work areas, restrooms, and washrooms, restaurants and other eating areas, time clocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Contractor agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of contracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 6—Franchises and Rights-of-way. The Contractor will be under no obligation to obtain or assist in obtaining any franchises, authorizations, permits, or approvals required to be obtained by the Owner from Federal, State, County, municipal or other authority; any rights-of-way over private lands or any agreements between the Owner and third parties with respect to the joint use of poles, crossings or any other matter incident to the construction and operation of the Project.

Section 7—Nonassignment of Contract. The Contractor will not assign the Contract affected by an acceptance of this Proposal or any part thereof or enter into any contract with any person, firm or corporation for the performance of the Contractor's obligations thereunder, or any part thereof, without the approval in writing of the Owner.

Section 8—Definitions. a. The term "Owner" shall also include an engineer employed by the Owner, or a firm or engineer retained by the Owner, and designated by the Owner to act in that capacity. The Contractor will be notified in writing by the Owner of those designated to act for the Owner at the time of acceptance of this Proposal.

b. The term "Completion of Construction" shall mean full performance by the Contractor of the Contractor's obligations under the contract and all amendments and revisions thereof relating to any Section of the Project or to the Project except the Contractor's obligations in respect of (i) Certificate of Completion of Line Extensions under Article III, Section 2 hereof and (ii) the Final Inventory referred to in Article III, Section 1a hereof.

c. The term "Completion" shall mean full performance by the Contractor of the Contractor's obligations under the Contract and all amendments and revisions thereof relating to any Section of the Project or to the Project.

Section 9—Extension to Successors and Assigns. Each and all of the covenants and agreements contained in the Contract effected by the acceptance of the Proposal shall extend to and be binding upon the successors and assigns of the parties thereto.

§ 1726.342

7 CFR Ch. XVII (1-1-98 Edition)

Section A—Single Phase Pole Top Assembly Units

A pole top assembly unit consists of the hardware, crossarms, and their appurtenances, insulators, etc., except tie wire, required to support the primary conductors. It does not include the pole. Crossarm pins include 2x2x1/8 inch washer, nut, and locknut.

Section B—V Phase Pole Top Assembly Units

A pole top assembly unit consists of the hardware, crossarms, and their appurtenances, insulators, etc., except tie wire, required to support the primary conductors. It does not include the pole. Crossarm pins include 2x2x1/8 inch washer, nut, and locknut.

Section C—Three Phase Pole Top Assembly Units

A pole top assembly unit consists of the hardware, crossarms, and their appurtenances, insulators, etc., except tie wire, required to support the primary conductors. It does not include the pole. Crossarm pins include 2x2x1/8 inch washer, nut, and locknut.

Section D—Conductor Assembly Units

A conductor assembly unit consists of 1,000 feet of conductor or cable for primaries, secondaries or services, and includes tie wires, sleeves for splicing, connectors, and armor rods with clips or armor wire where necessary. Tree trimming necessary for installing services and secondaries on poles not carrying primary line is included with the conductor assembly unit and shall be performed in accordance with the directions of the Owner. The service shall be connected to the secondary or transformer and 2 feet of conductor or cable shall be left for connecting to the consumer’s service entrance. In computing the compensation to the Contractor for conductor assembly units only the horizontal distance between conductor supports or pole stakes shall be used. The conductor or cable sizes and types listed are the manufacturer’s designation.

Section E—Guy Assembly Units

A guy assembly unit consists of the hardware and wire, and guy insulator where necessary. An overhead guy assembly consists of an overhead guy, a pole, and a down guy, each of which is listed separately. Guy guards are designated separately.

Section F—Anchor Assembly Units

An anchor assembly unit consists of the anchor with rod complete, ready for attaching the guy wire.

Section G—Transformer Assembly Units

A transformer assembly unit consists of the transformer, its protective equipment, and its hardware and leads with their connectors and supporting insulators and pins. This unit does not include the pole top, secondary, service, or grounding assemblies.

Section J—Secondary Assembly Units

A secondary assembly unit consists of the hardware, insulators, etc., to support the secondary conductors or cable. It does not include the secondary conductor or cable, or any hardware, insulators, etc., required to support service conductors or cable.

Section K—Service Assembly Units

A service assembly unit consists of the hardware, insulators, etc., required to support the service conductors or cable. It does not include the service conductor or cable, or...
Rural Utilities Service, USDA

§ 1726.342

any hardware, insulators, etc., required to support secondary conductors or cable.

Section M—Miscellaneous Assembly Units

A miscellaneous assembly unit consists of an additional unit needed in the project for new line construction but not otherwise listed in the Proposal. This section includes grounding assemblies consisting of the conductor, ground rod, grounding plate, connectors and clamps as shown on the respective drawings for the various types. It also includes fuse cutouts, reclosers, sectionalizers, switches, capacitors, regulators, metering and other assembly units.

Section R—Right-of-Way Clearing Units

R1-10. The unit is 1,000 feet in length and 10 feet in width (to be measured on one side of the pole line) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed ___ in height, shall be clear from the ground up on one side of the line of poles carrying primary conductors of the width specified. This unit does not include clearing or trimming associated with secondaries or services which is included with conductor units. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between stakes and across the maximum dimension of foliage cleared projected to the ground line. All trees and underbrush across the width of the right-of-way, as designated by the Owner, shall be considered to be grouped together as a single length in measuring the total length of clearing. Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All length thus arrived at, added together and divided by 1,000, shall give the number of 1,000-foot R1-10 units of clearing. This unit includes the removal or topping, at the option of the Contractor, of danger trees outside of the right-of-way when so designated by the Owner. (Danger trees are defined as dead or leaning trees which, in falling, will affect the operation of the line.)

The Contractor shall not remove or trim shade, fruit, or ornamental trees unless so directed by the Owner.

R1-20. This unit is identical with R1-10 except that width is 20 feet (to be measured 10 feet on each side of the pole line).

R1-30. This unit is identical with R1-10 except that width is 30 feet (to be measured 15 feet on each side of the pole line).

R1-40. This unit is identical with R1-10 except that width is 40 feet (to be measured 20 feet on each side of the pole line).

RC1-10, RC1-20, RC1-30, RC1-40. These units are identical to the respective R1 units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

Additional Requirements (When specifying R1 units denote type of disposal (A or B).)

A. Trees, brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Owner will direct (Owner to strike out methods not to be used):

1. Burned.
2. Piled on one side of right-of-way.
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) ___.

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Owner but in no case shall it be required to be less than ___ feet. Brush, branches, and refuse shall, without delay, be disposed of by such of the following methods as the Owner will direct (Owner to strike out methods not to be used):

1. Burned.
2. Piled on one side of right-of-way.
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) ___.

Section S—Substation Assembly Units

A substation assembly unit consists of the complete substation ready for connection of the line conductors, as shown on the substation drawings attached.

§ 1726.342

Section UD—Underground Cable Assembly Units

An underground cable assembly unit consists of 1,000 feet of cable for underground primaries, secondaries or services. It does not include the conduit, plowing, trenching and backfilling, or the termination of the primary cable which are provided for in other assembly units. It includes the terminations, connection and sealing of secondary and service cables and conductors as shown in the specifications and construction drawings, and all primary, secondary and service cable splices (buried cable may be spliced only when and where permitted, by the Owner). In computing the compensation to the Contractor for underground cable assembly units, only the distance between stakes, paralleling the cable shall be used. The number of units so computed will include all cable installed in place in all specified trenches, risers, conduits, crossings, manholes, transformers, terminal housings and meter boxes. The conductor or cables listed are the manufacturer’s designation of types, size, voltage rating and material. The Contractor and the Owner shall jointly perform cable acceptance tests on installed cable in accordance with the specifications using test equipment furnished by the (Owner to insert Owner or Contractor.)

Section UG—Underground Transformer Assembly Units

An underground transformer assembly unit consists of the transformer, its housing, warning sign, switches, over-current protective devices, grounding loop, and hardware and leads with their connectors and supporting insulators installed in place. This unit includes the cable terminations but does not include lightning arresters, fault indicators, ground rods or trenching. For submersible transformers, it includes the cable terminations, the enclosure and cover, drainable material (when specified), and the excavation when required. For pad-mount transformers, it does not include the pad, site preparation, drainable material, backfilling or compaction which are included in the pad assembly units.

Section UK—Underground Secondary and Service Assembly Units

An underground secondary and service assembly unit consists of secondary or service cable terminal housing mounted in place. It includes the power pedestal, stake (when required), mounting hardware, warning sign, directional marker, housing identification marking, and the cable identification tags. It does not include the cable terminations, ground rod, or pad, when required.

Section UM—Miscellaneous Underground Assembly Units

A miscellaneous underground assembly unit consists of an additional unit needed in the Project for new construction but not otherwise listed in the Proposal. This section includes the miscellaneous assembly units as shown on the respective underground construction drawings. Where miscellaneous units consist of or include a primary cable termination, the unit includes the preparation of the cable to accommodate the termination, the stress cone and the connection of the cable to the terminal equipment. Pad assembly units are in this section and include the site preparation, bedding, drainable material when specified, cable slot, backfilling, tamping and the pad in place.

Section UR—Underground Excavation Assembly Units

UR1-S (D) Plowing Assembly Unit, Soil—Consists of one (1) lineal foot of plowing in soil, measured parallel to the surface of the ground, to a specified depth (D), in inches, including the compacting, except as specifically provided for in other units. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermains, pipes, pipelines and contents.
underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged during the plowing of the cable, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the slot.

**NOTE:** Where in the judgment of the Owner greater than normal difficulty will be involved in plowing because of the presence of underground facilities of other utilities, this unit will be suffixed by the letter "T". This will be applicable only in those areas predesignated by the Owner on the detail maps herein. All plowing outside of the predesignated area on the map, regardless of the difficulty in placement actually experienced, will be inventoried as the regular UR1-S (D) units. If field conditions show the existence of rock to prevent the placing of the cable in soil to the required depth, the UR1-S unit designation should be modified by a suffix corresponding to the number of cables installed. For example, UR1-S (D)₃c for 3 cables plowed at one time.

**UR2-S (D&W)** Trenching Assembly Unit, Soil—Consists of one (1) lineal foot of trenching in soil, measure parallel to the surface of the ground, to a specified depth (D) and width (W), in inches, including the excavation, and backfilling and compacting. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermains, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the trench or cable bedding assembly units, when required.

**UR2-R (D&W)** Trenching Assembly Unit, Rock—Consists of one (1) lineal foot of trenching in rock, measured parallel to the surface of the ground, to specified depth (D) and width (W), in inches, including the excavation, and backfilling and compacting to place cable to the depth specified in the Specifications. This unit will be specified by the Owner only when field conditions at the site show the existence of rock at a depth preventing the placing of the cable in soil to the depths required in the Specifications. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermains, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the trench or cable bedding assembly units, when required.

**UR3 Cable Bedding Assembly Unit—Consists of one (1) lineal foot of a two-inch bed of clean sand or soil backfill over the cable to the width of the trench.**

**NOTE:** The exact location and number of units shall be determined by the Owner after the trenches are open in those areas where rock or other conditions make special bedding necessary.

**UR4a Pavement Assembly Unit, Asphalt—Consists of the labor and material necessary to remove and restore one (1) lineal foot of asphalt pavement, measured along the route of the cable, including any trenching necessary to place the cable at the required depth. All work shall be performed in accordance with the requirements of state or local authorities.**

**UR4c Pavement Assembly Unit, Concrete—Consists of the labor and material necessary to remove and restore one (1) lineal foot of concrete pavement, measured along the route of the cable, including any trenching necessary to place the cable at the required depth. All work shall be performed in accordance with the requirements of state or local authorities.**

**UR5 ( ) Underground Pipe Crossing Assembly Unit—Consists of one (1) lineal foot of steel pipe, of the inside diameter, in inches, specified in the last digit of the assembly unit designation, installed in place. This unit includes the pushing of pipe and any excavation, backfilling and tampering necessary for the installation of the pipe. The pipe will be installed at the depth specified by the Owner. Underground cable installed in the pipe is not included in this unit.**

**UR6 Underground Nonpipe Crossing Assembly Unit—Consists of the labor in providing a hole in soil one (1) foot in length of a diameter sufficient to accommodate the cable to be installed therein. The depth of the hole below the surface of the ground**
shall be specified by the Owner. This unit includes any excavation, backfilling and tamping necessary for the installation. This unit may be used where the permanent installation of a steel pipe under the UR-S unit is not required. Underground cable installed in the hole is not included in this unit.

### Construction Units—Line Changes

The general heading of Line Changes applies to the changing of existing lines or portions thereof from their existing phasing, wire size, and type and the removal of existing lines or portions thereof and replacing with new lines in close proximity thereto. In general line changes involve three types of assembly units as follows:

- **Section H**—Conversion assembly units;
- **Section I**—Removal assembly units;
- **Section N**—New construction assembly units on existing lines or in replacing lines.

The assembly units that are included in Sections H, I, and N are defined by symbols and descriptions which follow together with the applicable descriptions included under New Construction. Where the descriptions are not correct or sufficiently explicit, or when special units are not covered by Construction Drawings, descriptions have been provided by the Owner in the respective sections.

Work included in these sections shall be performed under a schedule of deenergization and operating procedures as set forth by the Owner at the time of release of any Section involving work on existing lines. The Contractor will so plan and perform its work that it will be possible to safely reenergize all lines involved at the expiration of the time limits set up in the schedule to resume service to all consumers being served prior to deenergization. Prior to commencement of work each day on lines to be deenergized, and upon completion of work each day on such lines, the Contractor will notify the Owner thereof in writing or in such other manner as the circumstances permit.

### Section H—Conversion Assembly Units

Conversion assembly units are pole-top assemblies and cover the furnishing of all labor and additional materials for changing an existing assembly unit to a new assembly unit, utilizing certain items of materials of the existing assembly unit on poles to be left in place. Any materials removed from the existing assembly units which are not required in the construction of the conversion assembly unit are to be reused by the Contractor in the construction of other assembly units, or returned to Owner's warehouse, as directed by the Owner.

Conversion assembly units are specified by the prefix H with the new construction assembly unit designation shown first and the existing assembly unit designation shown last. For example, an H B1-A1 signifies the conversion of an existing A1 assembly unit to a B1 assembly unit (as was defined in the description of construction assembly units). In this instance the Contractor utilizes the existing pin-type insulator, single upset bolt and neutral spool and furnishes the additional crossarm, crossarm pins, braces, machine bolt, carriage bolts, lag screw, and insulator required for the new unit. The Contractor transports the pole-top pin and two machine bolts to the warehouse or uses them on the Project as directed by the Owner.

The Conversion assembly units also include the furnishing of all labor and materials in the transferring, resagging and retying of conductors from one position on the pole to a different position on the pole where such transfers are required. Where replacement of conductor is required, the existing conductor will be removed under Section I and the new conductor installed under Section N.

Where replacement of a pole is required, the existing pole and pole-top assembly will be removed under Section I and the new pole and pole-top assembly will be installed according to Section N and no H units will be involved.

Conversion assemblies are listed in three subsections for converting pole-top assemblies from single to V phase, single to three phase, and V to three phase. The following descriptions apply to only those conversion units not sufficiently explicit:

#### Subsection H (B-A)—1 Phase to V Phase

</tr>
</thead>
<tbody>
<tr>
<td>H</td>
<td></td>
</tr>
</tbody>
</table>
Section I--Removal Assembly Units

Removal assembly units cover the furnishing of all labor for the removal of existing units of construction from existing lines, disassembling into material items, and all labor and transportation for the returning of all materials to the warehouse of the Owner in an orderly manner or transporting elsewhere to the site of the Project for reuse in the prosecution of this Contract as directed by the Owner. All materials removed remain the property of the Owner. The provisions for Owner-Furnished materials in the Proposal shall apply if such materials are reused for construction of the Project.

The unit removal prices shall include all materials and labor required to reinstall in accordance with specifications any conductors temporarily detached. The Contractor will reinstall at his own expense any other units removed by him for his own convenience.

The removal units are specified by the prefix I and followed by the assembly unit designation of existing assembly unit to be removed. For example, an I-A1 signifies the removal of an A1 assembly unit. The following special notes apply to specific removal units:

a. Poles. All poles of the same height, regardless of pole class, are designated by the same unit. Thus an I-30-foot pole signifies the removal of a 30-foot pole of any class. The Contractor is not required under this unit to remove from the pole any ground wire or pole numbering attached to the pole. This unit includes the refilling and tamping of holes in a workmanlike manner unless they are to be reused.

b. Pole-top Assemblies. The unit of removal of pole-top assemblies includes, in addition to the removal of the assembly itself, any necessary handling, reagaging, and retrying of conductors in those cases where an existing pole-top assembly will be removed and replaced by a new pole-top assembly and where any existing conductor is to be reused.

c. Conductor. The conductor removal unit covers the removal of 1,000 feet of conductor or cable and reeling or coiling it in a workmanlike manner in such a way that it can be reused by the Contractor or the Owner. The Owner will furnish to the Contractor reels if it is to be returned to the Owner’s warehouse on reels. The removal unit for each size of conductor or cable is shown by the prefix I followed by D and the conductor or cable type; thus an I-D-6ACWC signifies the removal unit for 1,000 feet of 6 A Copperweld-copper conductor.

d. Guys. All guys regardless of length, type of attachment, or size of guy strand are specified by the same unit; thus an I-E signifies the removal of any guy.

e. Anchors. Only anchor rods are to be removed by the Contractor in anchor removal units. The anchors will be left in the ground; thus an I-F signifies the removal of any anchor rod. If the rod cannot be unscrewed, the end of the rod shall either be cut off or bent down so that the rod will be at least 18 inches below ground.

f. Transformers. The unit for removal of transformer assembly units is divided into two sections, (1) Conventional Transformer Assembly, and (2) Self-protected Transformer Assembly. Only one unit is specified for each type, and all sizes of transformers from 1 to 15 kVA within each group will be covered by the same unit. "Self-protected" refers to transformers where all protective equipment is mounted on or within the transformer. "Conventional" refers to transformers where protective equipment is mounted separately from the transformer. The unit is designated by the prefix I followed by the description of the unit to be removed; thus I-G Conventional signifies the removal of a conventional transformer assembly for any size transformer from 1 to 15 kVA.

g. Secondary Units. The unit for removal of secondary assemblies includes, in addition to the removal of the transformer itself, all necessary handling such as untying, resagging, and retrying of secondary conductor or cables where existing secondary conductor or cable is to be reused. In addition, the unit for removal of the secondary assembly includes the handling or holding of any conductor at tap lines where such is involved, and the reinstalling of such tap conductor in accordance with the specifications.

h. Service Unit. The unit for removal of service assemblies includes, in addition to the removal of the assembly itself, all necessary handling such as untying, resagging, and retrying of service conductor or cable where existing service conductor or cable is to be reused.
§ 1726.343 Distribution line extension contract (labor only), RUS Form 792.

The contract form in this section shall be used when required by this part.}

### Section 1—Offer to Construct

The undersigned (hereinafter called the “Contractor”) hereby proposes to construct for the prices hereinafter stated, with materials furnished by the Owner, the rural electric project (hereinafter called “Project”) in strict accordance with the Plans, Specifications, and Construction Drawings hereinafter referred to. The Contractor understands and agrees that the Project will consist of line extensions and additions and line changes or similar work usually associated with overhead or underground distribution system improvement or extension work all located within the area served or ultimately to be served by the Owner and that the exact location and scope of individual sections of the Project (hereinafter called “Sections”) will be made known to the Contractor from time to time as provided in Article II, Section 1 hereof; and provided, however, that the Contractor shall not be obligated to start construction of any Section unless the cost of construction of the Section computed on the unit prices of this Proposal shall amount to at least [$._____] and provided further that the Owner shall be obligated to release to the Contractor for construction at least one Section pursuant to the provisions of this Proposal.

### Section 2—Additional Projects

From time to time the Owner and the Contractor may enter into negotiations for the performance of work at labor prices which may differ from those in the Proposal (such work being hereinafter called “Additional Projects”). Except as may otherwise be agreed upon in writing by the Owner and the Contractor at the time the supplemental contract for the Additional Project is negotiated, the provisions of the Contract for the Project shall apply.

### Section 3—Proposal on Unit Basis

The various Construction Units considered in this Proposal are defined by symbols and descriptions in this Proposal, that the Proposal is made on a unit basis, and that the Owner may specify, as provided in Article II, Section 1 hereof, any number or combination of Construction Units which the Owner, may deem necessary for the construction of the Project. If kinds of Construction Units for which prices are not established in this Proposal are necessary for the construction of the Project, the prices of such additional Units shall be as agreed upon in writing by the Owner and the Contractor prior to the time of installation. The unit prices herein set forth are applicable to work performed on unenergized lines. Such unit prices shall be increased by [_____] percent for

Acceptance

The undersigned hereinafter accepts the foregoing Proposal of [__._____] [__], 19 [__]** Line Extensions.

(Owner)

By [__._____] (President)

Secretary

Date of Contract

[End of clause]
Section 4—Description of Contract. The Specifications and Construction Drawings set forth in: RUS Form 804, Specifications and Drawings for 7.2/12.5 kV Line Construction; RUS Form 803, Specifications and Drawings for 14.4/24.9 kV Line Construction; RUS Form 806, Specifications and Drawings for Underground Electric Distribution; as applicable, which by this reference are incorporated herein, together with the Plans, Proposal and Acceptance constitute the Contract. The Plans, consisting of maps and special drawings, and approved modifications in standard specifications are attached hereto and identified as follows: __________.

Section 5—Familiarity with Conditions. The Contractor acknowledges that it has made a careful examination of the site of the Project and of the Plans, Specifications and Construction Drawings, and has become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of equipment, tools, and other facilities required before and during the construction of the Project and has become acquainted with the availability status of materials to be furnished by the Owner and with the labor conditions which would affect work on the Project.

Section 6—License. The Contractor warrants that a Contractor's license is __________ required, and if required, it possesses Contractor's License No. __________ for the State of __________ in which the Project is located, and said license expires on __________.

Section 7—Contractor's Resources. The Contractor warrants that it possesses adequate financial resources for the performance of the work covered by this Proposal and that it will provide necessary tools and equipment and a qualified superintendent and other employees.

Section 8—Changes in Construction. The Contractor agrees to make such changes in construction previously installed in the Project by the Contractor as required by the Owner on the following basis: The cost of labor shall be the reasonable cost thereof as agreed upon by the Contractor and the Owner but in no event shall it exceed two (2) times the labor price quoted in the Proposal for the installation of the unit to be changed. Such compensation shall be in lieu of any other payment for the installation and removal of the original unit but shall not include the cost of the installation, if any, of a new or replacing unit, payment for which shall be made at the unit price as quoted in the Proposal. No payment shall be made to the Contractor for correcting errors or omissions on the part of the Contractor which result in construction not in accordance with the Plans and Specifications.

Article II—Construction

Section 1—Time and Manner of Work. The Contractor agrees to be prepared to commence the construction of the Project within fifteen (15) calendar days after written notice by the Owner of acceptance of the Proposal. The Contractor agrees to commence construction of a Section within __________ (______) days after receipt in writing from the Owner of the following:

a. Location and number of the various Construction Units required for construction of the Section (hereinafter called the "Staking Sheets").

b. Itemized list of the materials required for the construction of the Section and an authorization by the Owner for the Contractor to obtain such materials from the Owner's warehouse located at __________.

c. A schedule showing the rate at which construction of the Section shall proceed and the total number of calendar days (excluding Sundays) to be allowed for completion; provided, however, that the required completion time for any Section shall not be less than __________(______) days or __________(______) days per mile of line, whichever is the greater, which days shall be calendar days (excluding Sundays). The time of the completion of the Section is of the essence of the contract to be effected by acceptance of this Proposal.

d. A statement that all required easements and rights-of-way have been obtained from the owners of the properties across which the Section is to be constructed (including tenants who may reasonably be expected to object to such construction).

e. A statement that all necessary staking has been completed.

f. A statement that all necessary funds for prompt payment for the construction of the Section will be available.

g. Specific instruction as to location and extent of work to be performed on energized lines, if any. The Contractor will not be required to dig holes, set poles, install anchors, install underground conduit, perform any plowing for the installation of underground cable, or dig trenches if there are more than six (6) inches of frost in the ground nor to perform any construction on such days when in the judgment of the Owner snow, rain, or wind or the results of snow, rain, or frost make it impracticable to perform any operations of construction; provided further that the contractor will not perform any plowing for the installation of underground cable on public roads or highways if there are more than two (2) inches of frost in the ground. To the extent of the time lost due to the conditions described herein and approved in writing by the Owner, the time of completion set out above will be extended. The time for
§ 1726.343

Completion shall be extended for a period of any reasonable delay (other than a delay resulting from the failure of the Contractor to secure sufficient labor) which is due exclusively to conditions beyond control and without the fault of the Contractor including acts of God, fires, floods, inability to obtain materials, direction of the Owner to cease construction as herein provided, and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible. Provided, however, that no such extension of time for completion shall be granted the Contractor unless within ten (10) days after the happening of any event relied upon by the Contractor for such an extension of time the Contractor shall have made a written request therefor in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes, except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

Section 2—Changes in Plans, Specifications and Drawings. The Owner may, from time to time during the progress of the construction of the Project, make such changes in, additions to, or subtractions from the Plans, Specifications, and Construction Drawings as conditions may warrant. Provided, however, that if the cost to the Contractor shall be materially increased by any such change or addition, the Owner shall pay the Contractor for the reasonable cost thereof in accordance with a construction contract amendment signed by the Owner and the Contractor, but no claim for additional compensation for any such change or addition will be considered unless the Contractor shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition.

Section 3—Supervision and Inspection. a. The Contractor shall cause the construction work on the Project to receive constant supervision by a competent superintendent (hereinafter called the “Superintendent”) who shall be present at all times during working hours where construction is being carried on. The Contractor shall also employ, in connection with the construction of the Project, capable, experienced, and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent by the Owner shall be binding upon the Contractor.

b. The Owner reserves the right to require the removal from the Project of any employee of the Contractor if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner shall have the right to require the Contractor to increase the number of his employees and to increase or change the amount or kind of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner; but the failure of the Owner to give any such directions shall not relieve the Contractor of his obligations to complete the work within the time and in the manner specified in this Proposal.

c. The manner of performance of the work, and all equipment used therein, shall be subject to the inspection, tests, and approval of the Owner. The Owner shall have the right to inspect all payrolls and other data and records of the Contractor relevant to the work. The Contractor will provide all reasonable facilities necessary for such inspection and tests. The Contractor shall have an authorized agent accompany the inspector when final inspection is made and, if requested by the Owner, when any other inspection is made.

d. In the event that the Owner shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Contractor, if requested by the Owner, to have an inspection made by an engineer approved by the Owner for the purpose of determining the exact nature, extent, and location of such defects.

Section 4—Defective Workmanship. The acceptance of any workmanship by the Owner shall not preclude the subsequent rejection thereof if such workmanship shall be found to be defective after installation, and any such workmanship found defective before final acceptance of the work or within one (1) year after completion shall be remedied or replaced, as the case may be, by and at the expense of the Contractor. In the event of failure by the Contractor so to do, the Owner may remedy such defective workmanship and in such event the Contractor shall pay to the Owner the cost and expense thereof. The Contractor shall not be entitled to any payment hereunder so long as any defective workmanship, in respect of the Project, of which the Contractor shall have notice, shall not have been remedied or replaced, as the case may be.

Section 5—Materials. At or prior to the commencement of construction of each Section, the Owner shall make available to the Contractor all materials for such Section which the Owner has on hand, and from time to time as such additional deliveries of materials, if any, are received by the Owner, the Owner shall make such materials available to the Contractor: Provided, however, that the Contractor or his authorized representative will give to the Owner a receipt in such form as the Owner shall approve for all materials furnished by the Owner to the Contractor. The Contractor will return to the Owner or reuse in the construction of other assembly units all materials removed from
the lines under Section H—Conversion Assembly Units and Section I—Removal Assembly Units. Upon completion of each Section of the Project the Contractor will return to the Owner all materials, including usable materials as well as scrap, furnished by the Owner in excess of those required for the construction of the Section as determined from the Final Inventory approved by the Owner. The Contractor will reimburse the Owner at the current invoice cost to the Owner for loss and for breakage through Contractor’s negligence of materials furnished by the Owner to the Contractor and for materials removed from the lines by the Contractor.

Section 6—Term of Contract. It is understood and agreed that, notwithstanding any other provisions of this Contract, the Contractor will not be required to commence any construction after the expiration of 1 year

Article III—Payment

Section 1—Payments to Contractor. a. Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Contractor for construction accomplished during the preceding calendar month on the basis of completed Construction Units furnished and certified to by the Contractor and approved by the Owner solely for the purpose of payment: Provided, however, that such approval by the Owner shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate approved during the construction of a Section shall be paid by the Owner to the Contractor prior to completion of the Section. Upon completion by the Contractor of the construction of a Section, the Contractor will prepare a Final Inventory of the Section showing the total number and character of Construction Units and, will certify to the Owner together with a certificate of the total cost of the construction performed. Upon the approval of such certificates, the Owner shall make payment to the Contractor of all amounts to which the Contractor shall be entitled thereunder which shall not have been paid.

b. The Contractor shall be paid on the basis of the number of Construction Units actually installed at the direction of the Owner, as shown by the Inventory based on the Staking Sheets: Provided, however, that the total cost shall not exceed the maximum Contract price for the construction of the Project, unless such excess shall have been approved in writing by the Owner. It is understood and agreed that this maximum Contract price is $ dollars ($ ). It is also agreed that the Contractor shall not be entitled to any claim for damages on account of any reasonable additions to or subtractions from the Project, or of any delay occasioned thereby, or of any changes in the routing of the lines.

c. No payment shall be due while the Contractor is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Contractor the amount of any claim by a third party against either the Contractor or the Owner based upon an alleged failure of the Contractor to perform the work hereunder in accordance with the provisions of this Contract.

Section 2—Certificate of Contractor and Indemnity Agreement—Line Extensions. Upon the Completion of Construction of any Section of the Project prior to payment to the Contractor of any amount in excess of ninety percent (90%) of the total cost of all Construction Units comprising the completed Section, the Contractor shall deliver to the Owner in the form attached hereto, (1) a certificate that all persons who have furnished labor in connection with the Project and subcontractors who have furnished services for the Project have been paid in full, and (2) an agreement to hold the Owner harmless against any claims arising out of the Contractor’s performance hereunder which may have been or may be filed against the Owner.

Article IV—Particular Undertakings of the Contractor

Section 1—Protection to Persons and Property. The Contractor shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the “Manual of Accident Prevention in Construction” of the Associated General Contractors of America unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

a. The Contractor shall at no time and under no circumstances cause or permit any employee of the Contractor to perform any work upon energized lines, or upon poles carrying energized lines, unless otherwise specified in accordance with Article II, Section 1, subsection g.

b. The Contractor shall so conduct the construction of the Project as to cause the least possible obstruction of public highways.

c. The Contractor shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances, and regulations or by local conditions.

d. The Contractor shall do all things necessary or expedient to protect properly any
§ 1726.343

7 CFR Ch. XVII (1-1-98 Edition)

and all parallel, converging, and intersecting lines, joint line poles, highways, and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways, or other property are damaged in the course of the construction of the Project the Contractor shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

f. The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part, as hereinafter provided shall be under the charge and control of the Contractor and during such period of control by the Contractor all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Contractor. The Contractor shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Contractor by reason of any act of God or other casualty or cause whether or not the same shall have occurred by reason of the Contractor's negligence.

(i) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Contractor's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Contractor's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Contractor, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Contractor liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Contractor shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Contractor, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Contractor shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Contractor does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Contractor.

(iii) Contractor shall provide to Owner's satisfaction evidence of Contractor's ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

g. Any and all excess earth, rock, debris, underbrush, and other useless material shall be removed by the Contractor from the site of the Project as rapidly as practicable as the work progresses.

h. Upon violation by the Contractor of any provisions of this section, after written notice of such violation given to the Contractor by the Owner, the Contractor shall immediately correct such violation. Upon failure of the Contractor so to do the Owner may correct such violation at the Contractor's expense.

i. The Contractor shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

j. The Contractor shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the Owner that proper authorization has been received from the owner of the property, and the Contractor shall promptly notify the Owner whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on his land in connection with the Project and shall obtain the consent in writing of the Owner before proceeding in any such case.

Section 2—Insurance. The Bidder shall take out and maintain throughout the period
of this Agreement the following types and minimum amounts of insurance:

a. Workers’ compensation and employer’s liability insurance, as required by law, covering all of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to workers’ compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers’ compensation laws.

b. Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single limit of $1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

c. Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than $1 million each occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form. The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsection “b” and “c” of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections “b” and “c” of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3—Bond. If the estimated cost of the construction of a Section shall exceed $100,000, the Contractor agrees to furnish prior to the commencement of such construction, a bond in the penal sum not less than the estimated cost of such Section in the form attached hereto with a Surety or Sureties listed by the United States Treasury Department as acceptable sureties. In the event that the Surety or Sureties on the performance bond delivered to the Owner shall at any time become unsatisfactory to the Owner, the Contractor agrees to deliver to the Owner another or an additional bond.

Section 4—Delivery of Possession and Control to the Owner. Upon written request of the Owner, the Contractor will deliver to the Owner full possession and control of any portion of the Project provided the Contractor shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of possession and control to the Owner, the risks and obligations of the Contractor as set forth in Section 1f of this Article IV with respect to such portion so delivered to the Owner, shall be terminated; Provided, however, that nothing herein contained shall relieve the Contractor of any liability with respect to defective workmanship as specified in Article II, Section 4.

Article V—Remedies

Section 1—Compliance on Contractor’s Default. If default shall be made by the Contractor or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Contractor and the Surety, if any, a written notice requiring the Contractor to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Contractor and the Surety, if any, such default shall be corrected or arrangements for the correction thereof satisfactory to the Owner shall be made, the Owner may take over the construction of the Project and prosecute the same to completion by contract or otherwise for the account and at the expense of the Contractor, and the Contractor shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliance, and plant belonging to the Contractor or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims, or demands which the Contractor may have against third persons in connection with this Proposal and for such purpose the Contractor does hereby assign, transfer, and set over unto the Owner all such rights, claims, and demands.

Article VI—Miscellaneous

Section 1—Patent Infringement. The Contractor will save harmless and indemnify the Owner from any and all claims, suits, and proceedings for the infringement of any patent or patents covering any equipment used in the work.
§ 1726.343 7 CFR Ch. XVII (1-1-98 Edition)

Section 2—Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Contractor.

Section 3—Compliance with Statutes and Regulations. The Contractor will comply with all applicable statutes, ordinances, rules, and regulations pertaining to the work. The Contractor acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called “Kick-Back” Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. §§ 287, 1001, as amended. The Contractor understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental agencies having jurisdiction in the premises.

Section 4—Equal Opportunity Provisions.

a. Contractor’s Representations. The Contractor represents that:

(1) The Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the Contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The Contractor will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers’ representatives of the Contractor’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The Contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Contractor’s noncompliance with this Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be cancelled, terminated, or suspended in whole or in part, and the Contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

(7) The Contractor will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance. Provided, however, that in the event a Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Contractor may request the United States to
The Contractor will be notified in writing by
the Owner at the time of acceptance of this Prop-
posal.

b. The term "Completion of Construction" shall mean full per-
formance by the Contractor of the Contractor's obli-
gations under the Contract and all amendments and revi-
sions thereof relating to any Section of the Project or to the Project except the Con-
tactor's obligations in respect of (i) Certificate of Contractor and Indemnity Agreement—
Line Extensions under Article III, Section 2 hereof and (ii) the Final Inventory referred to in Article III, Section 1a hereof.

c. The term "Completion" shall mean full performance by the Contractor of the Contractor's obligations under the Contract and all amendments and revisions thereof relating to any Section of the Project or to the Project.

Section 8—Extension to Successors and Assigns.
Each and all of the covenants and agreements contained in the Contract ef-
fected by the acceptance of the Proposal shall extend to and be binding upon the suc-
cessors and assigns of the parties thereto.

Construction Units—New Construction

Section 1—Pole Units
A pole unit consists of the installation of one pole. The first two digits indicate the length of the pole; the third digit shows the classification per A.S.A. (Example: 25-6 means a pole 25 feet long, class 6).

<table>

</tbody>
</table>

Pole Top Assembly Units
A pole top assembly unit consists of the in-
stallation of the hardware, crossarms and
their appurtenances, insulators, etc., except
the wire, required to support the primary con-
ductors.

Section D—Conductor

A conductor assembly unit consists of the installation of 1,000 feet of conductor or cable for primaries, secondaries or services. Tree trimming necessary for installing services and secondaries on poles not carrying primary line is included with the conductor assembly unit and shall be performed in accordance with the directions of the Owner. The service shall be connected to the secondary or transformer and 2 feet of conductor or cable shall be left for connecting to the consumer’s service entrance. In computing the compensation to the Contractor for conductor assembly units only the horizontal distance between conductor supports or pole staves shall be used. The conductor or cable sizes and types listed are the manufacturer’s designation.

<table>

</table>

Section R—Right-of-Way Clearing Units

R1-10. The unit is 1,000 feet in length and 10 feet in width (to be measured on one side of the pole line) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed in height, shall be clear from the ground up on one side of the line of poles carrying primary conductors.

This unit does not include clearing or trimming associated with secondaries or services which is included with conductor units. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between stakes and across the maximum dimension of foliage cleared projected to the ground line. All trees and underbrush across the width of the right-of-ways as designated by the Owner shall be...
considered to be grouped together as a single length in measuring the total length of clearing. Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All length thus arrived at, added together and divided by 1,000, shall give the number of 1,000-foot R1-10 units of clearing. This unit includes the removal or topping, at the option of the Contractor, of danger trees outside of the right-of-way when so designated by the Owner. (Danger trees are defined as dead or leaning trees which, in falling, will affect the operation of the line.)

The Contractor shall not remove or trim shade, fruit, or ornamental trees unless so directed by the Owner.

**R1-20.** This unit is identical with R1-10 except that width is 20 feet (to be measured 10 feet on each side of the pole line).

**R1-30.** This unit is identical with R1-10 except that width is 30 feet (to be measured 15 feet on each side of the pole line).

**R1-40.** This unit is identical with R1-10 except that width is 40 feet (to be measured 20 feet on each side of the pole line).

**RC1-10, RC1-20, RC1-30, RC1-40.** These units are identical to the respective R1 units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

**Additional Requirements (When specifying R1 units denote type of disposal (A or B).)**

**A.** Trees, brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Owner will direct (Owner to strike out methods not to be used):

1. Burned.
2. Piled on one side of right-of-way.
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe)___.

**B.** Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Owner but in no case shall it be required to be less than ____ (____) feet. Brush, branches, and refuse shall, without delay, be disposed of by such of the following methods as the Owner will direct (Owner to strike out methods not to be used):

1. Burned.
2. Piled on one side of right-of-way.
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) ____.

### Section S—Substation Assembly Units

A substation assembly unit consists of the complete substation ready for connection of the line conductors, as shown on the substation drawings attached.

### Section UD—Underground Cable Assembly Units

An underground cable assembly unit consists of the installation of 1,000 feet of cable for underground primaries, secondaries or services. It does not include the plowing, trenching and backfilling, or the termination of the primary cable which are provided for in other assembly units. It includes the labor for the termination, connection and sealing of secondary and service cables and conductors as shown in the specifications and construction drawings, and the labor for making all primary, secondary and service cable splices (buried cable may be spliced only when and where permitted by the Owner). In computing the compensation to the Contractor for underground cable assembly units, only the distance between stakes, paralleling the cable shall be used. The number of units so computed includes all installation of cable in all specified trenches, risers, conduits, crossings, manholes, transformers, terminal housings and meter boxes. The conductor or cables listed are the manufacturer’s designation of types, size, voltage rating and material. The Contractor and the Owner shall jointly perform cable acceptance tests on installed cable in accordance with the specifications using test equipment furnished by the Owner (Owner to insert Owner or Contractor).

### Section UG—Underground Transformer Assembly Units

An underground transformer assembly unit consists of the installation of the transformer, its housing, warning sign, switches, over-current protective devices, grounding loop, and its hardware and leads with their connectors and supporting insulators. This unit also includes the installation of primary transformers and their housing,warning sign, switches, over-current protective devices, grounding loop, and its hardware and leads with their connectors and supporting insulators. This unit also includes the installation of primary transformers and their housing,warning sign, switches, over-current protective devices, grounding loop, and its hardware and leads with their connectors and supporting insulators.

1. Owner check here if primary splices are permitted.
2. Owner check here if secondary and service splices are permitted.
3. Owner check here if 12 feet of service conductor is to be left as a coil 3 feet from the building with ends capped instead of connection to meter box.
§ 1726.343

7 CFR Ch. XVII (1-1-98 Edition)

cable terminations but not of lightning arresters, fault indicators or ground rods, nor does it include any trenching. For pad-mount transformers, it does not include installation of the pad, drainable material, backfilling, compaction, or site preparation which are included in the pad assembly units. For submersible transformers it includes the installation of cable terminations, of the enclosure and cover, of drainable material (when specified) and the excavation.

<table>

</table>

Section UK—Underground Secondary and Service Assembly Units

An underground secondary and service assembly unit consists of the installation of the secondary or service cable terminal housing. It includes the installation of the power pedestal, stake (when required), mounting hardware, warning sign, directional marker, housing identification marking, and the cable identification tags. It does not include the installation of the cable terminations, ground rod, or pad, when required.

</thead>
</table>

Section UM—Miscellaneous Underground Assembly Units

A miscellaneous underground assembly unit consists of the installation of an additional unit needed in the Project for new construction, but not otherwise listed in the Proposal. This section includes the installation of the miscellaneous assembly units as shown on the respective underground construction drawings. Where miscellaneous units consist of or include the installation of a primary cable termination, the unit includes the preparation of the cable to accommodate the termination, the installation of the stress cone, and the connection of the cable to the terminal equipment. Pad assembly units are in this section and include the installation of the bedding, drainable material (when specified), cable slot, and site preparation, backfilling and tamping.

<table>
<thead>
<tr>

</table>

Section UR—Underground Excavation Assembly Units

UR1-S (D) Plowing Assembly Unit, Soil—Consists of one (1) lineal foot of plowing in soil, measured parallel to the surface of the ground, to a specified depth (D), in inches, including the compaction, except as specifically provided for in other units. This unit includes all labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermains, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged during the plowing of the cable, except as specifically provided for in other units.

NOTE: Where in the judgment of the Owner greater than normal difficulty will be involved in plowing because of the presence of underground facilities of other utilities, this unit will be suffixed by the letter “T”. This will be applicable only in those areas predesignated by the Owner on the detail maps herein. All plowing outside of the predesignated area on the map, regardless of the difficulty in placement actually experienced, will be inventoried as the regular UR1-S (D) units. If field conditions show the existence of rock to prevent the placing of the cable in soil to the depth required in the specifications the Owner may specify UR2-R units. Where more than one cable is to be installed in the slot, the UR1-S unit designation should be modified by a suffix corresponding to the number of cables installed. For example, UR1-S (D) 3c for 3 cables plowed at one time.

UR2-S (D&W) Trenching Assembly Unit, Soil—Consists of one (1) lineal foot of trenching in soil, measured parallel to the surface of the ground, to a specified depth (D) and width (W), in inches, including the excavation, and backfilling and compacting. This unit includes all labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermains, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units.

NOTE: Where in the judgment of the Owner greater than normal difficulty will be involved in trenching because of the presence of underground facilities of other utilities, this unit will be suffixed by the letter “T”. This will be applicable only in those areas predesignated by the Owner on the detail maps herein. Where more than one cable is to be installed in the trench, the regular UR2-S unit designation should be modified by a suffix corresponding to the construction drawing for the type of cable placement desired.

UR2-R (D&W) Trenching Assembly Unit, Rock—Consists of one (1) lineal foot of trenching in rock, measured parallel to the surface of the ground, to specified depth (D)
and width (W), in inches, including the excavation, and backfilling and compacting to place cable to the depth specified in the Specifications. This unit will be specified by the Owner only when field conditions at the site show the existence of rock at a depth preventing the placing of the cable in soil to the depths required in the Specifications. This unit includes all labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermains, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the trench or cable bedding assembly units, when required.

**UR-3 Cable Bedding Assembly Unit**—Consists of the installation of one (1) lineal foot of a 2-inch bed of clean sand or soil placed in the trench under the cable and a 4-inch layer of clean sand or soil backfill over the cable to the width of the trench.

**NOTE:** The exact location and number of units shall be determined by the Owner after the trenches are open in those areas where rock or other conditions make special bedding necessary.

**UR-4a Pavement Assembly Unit,** Asphalt—Consists of the labor necessary to remove and restore one (1) lineal foot of asphalt pavement, measured along the route of the cable, including any trenching necessary to place the cable at the required depth. All work shall be performed in accordance with the requirements of State or local authorities.

**UR-4c Pavement Assembly Unit,** Concrete—Consists of the labor necessary to remove and restore one (1) lineal foot of concrete pavement, measured along the route of the cable, including any trenching necessary to place the cable at the required depth. All work shall be performed in accordance with the requirements of State or local authorities.

**UR-5 Underground Pipe Crossing Assembly Unit**—Consists of the installation of one (1) lineal foot of steel pipe, of the inside diameter, in inches, specified in the last digit of the assembly unit designation, installed in place. This unit includes the pushing of pipe and any excavation, backfilling and tamping necessary for the installation of the pipe. The pipe will be installed at the depth specified by the Owner. The installation of underground cable in the pipe is not included in this unit.

**UR-6 Underground Nonpipe Crossing Assembly Unit**—Consists of the labor in providing a hole in soil one (1) foot in length of a diameter sufficient to accommodate the cable to be installed therein. The depth of the hole below the surface of the ground shall be specified by the Owner. This unit includes any excavation, backfilling and tamping necessary for the installation. This unit may be used where the permanent installation of a steel pipe under the UR-5 unit is not required. The installation of underground cable in the pipe is not included in this unit.

**Construction Units—Line Changes**

The general heading of Line Changes applies to the changing of existing lines or portions thereof from their existing phasing, wire size, and type to new phasing, wire size, and type and the removal of existing lines or portions thereof and replacing with new lines in close proximity thereto. In general line changes involve three types of assembly units as follows:

- **Section H—Conversion assembly units**
- **Section I—Removal assembly units**
- **Section N—New construction assembly units on existing lines or in replacing lines**

The assembly units that are included in Sections H, I, and N are defined by symbols and descriptions which follow together with the applicable descriptions included under New Construction. Where the descriptions are not correct or sufficiently explicit, or when special units are not covered by Construction Drawings, descriptions have been provided by the Owner in the respective sections.

Work included in these sections shall be performed under a schedule of deenergization and operating procedures as set forth by the Owner at the time of release of any Section involving work on existing lines.

The Contractor will so plan and perform its work that it will be possible to safely reenergize all lines involved at the expiration of the time limits set up in the schedule to resume service to all consumers being served prior to deenergization. Prior to commencement of work each day on lines to be deenergized, and upon completion of work each day on such lines, the Contractor will notify the Owner thereof in writing or in such other manner as the circumstances permit.

**Section H—Conversion Assembly Units**

Conversion assembly units are pole-top assemblies and cover the furnishing of all labor for changing an existing assembly unit to a new assembly unit, utilizing certain items of materials of the existing assembly unit on poles to be left in place. Any materials removed from the existing assembly units which are not required in the construction of the conversion assembly unit are to be reused by the Contractor in the construction...
of other assembly units, or returned to owner's warehouse, as directed by the owner. Conversion assembly units are specified by the prefix H with the new construction assembly unit designation shown first and the existing assembly unit designation shown last. For example, an H B1-A1 signifies the conversion of an existing A1 assembly unit to a B1 assembly unit (as was defined in the description of construction assembly units). In this instance the contractor utilizes the existing pin-type insulator, single upset bolt and neutral spool and installs the additional crossarm, crossarm pins, braces, machine bolt, carriage bolts, lag screw, and insulator supplied by the owner required for the new unit. The contractor transports the pole-top pin and two machine bolts to the warehouse or uses them on the project as directed by the owner.

The conversion assembly units also include the furnishing of all labor in the transferring, resagging and retying of conductors from one position on the pole to a different position on the pole where such transfers are required. Where replacement of conductor is required, the existing conductor will be removed under section I and the new conductor installed under section N.

Where replacement of a pole is required, the existing pole and pole-top assembly will be removed under section I and the new pole and pole-top assembly will be installed according to section N and no H units will be involved.

Conversion assemblies are listed in three subsections for converting pole-top assemblies from single to V phase, single to three phase, and V to three phase. The following descriptions apply to only those conversion units not sufficiently explicit:

Section I—Removal Assembly Units

Removal assembly units cover the furnishing of all labor for the removal of existing units of construction from existing lines, disassembling into material items, and all labor and transportation for the returning of all materials to the warehouse of the owner in an orderly manner or transporting elsewhere to the site of the project for reuse in the prosecution of this contract as directed by the owner.

The unit removal prices shall include all labor required to reinstall in accordance with specifications any conductors temporarily detached. The contractor will reinstall at his own expense any other units removed by him for his own convenience.

The removal units are specified by the prefix I and followed by the assembly unit designation of existing assembly unit to be removed. For example, an I-A1 signifies the removal of an A1 assembly unit. The following special notes apply to specific removal units:

a. Poles. All poles of the same height, regardless of pole class, are designated by the same unit. Thus an I-30-foot pole signifies the removal of a 30-foot pole of any class. The contractor is not required under this unit to remove from the pole any ground wire or pole numbering attached to the pole. This unit includes the refilling and tamping of holes in a workmanlike manner unless they are to be reused.

b. Pole-Top Assemblies. The unit of removal of pole-top assemblies includes, in addition to the removal of the assembly itself, any necessary handling, resagging, and retying of conductors in those cases where an existing pole-top assembly will be removed and replaced by a new pole-top assembly and where any existing conductor is to be reused.

The unit of removal of pole-top assemblies also includes any holding or handling of mainline or tap conductors at tap lines, angles, and deadends where such is involved, and the reinstalling of such conductor in accordance with the Specifications; for example, an I-A5-4 will include the disconnection of the tap conductors, snubbing off the tap line at the nearest practical point and the reconnection and resagging of these tap conductors if necessary to the new tap assembly when installed. The new unit of construction, however, will be specified separately in section N.

c. Conductor. The conductor removal unit covers the removal of 1,000 feet of conductor or cable and reeling or coiling it in a workmanlike manner in such a way that it can be reused by the contractor or the owner. The owner will furnish to the contractor reels if it is to be returned to the owner's warehouse on reels. The removal unit for each size of conductor or cable is shown by the prefix I followed by D and the conductor or cable type; thus an I-D 6ACWC signifies the removal unit for 1,000 feet of 6 A Copperweld-copper conductor.
d. Guys. All guys regardless of length, type of attachment, or size of guy strand are specified by the same unit; thus an I-E signifies the removal of any guy.

e. Anchors. Only anchor rods are to be removed by the Contractor in anchor removal units. The anchors will be left in the ground; thus an I-F signifies the removal of any anchor rod. If the rod cannot be unscrewed, the end of the rod shall either be cut off or bent down so that the rod will be at least 18 inches below ground.

f. Transformers. The unit for removal of transformer assembly units is divided into two sections, (1) Conventional Transformer Assembly, and (2) Self-protected Transformer Assembly. Only one unit is specified for each type, and all sizes of transformers from 1 to 15 kVA within each group will be covered by the same unit. "Self-protected" refers to transformers where all protective equipment is mounted on or within the transformer. "Conventional" refers to transformers where protective equipment is mounted separately from the transformer. The unit is designated by the prefix I followed by the description of the unit to be removed; thus, I-G Conventional signifies the removal of a conventional transformer assembly for any size transformer from 1 to 15 kVA.

g. Secondary Units. The unit for removal of secondary assemblies includes, in addition to the removal of the assembly itself, all necessary handling such as untying, resagging, and retying of secondary conductor or cables where existing secondary conductor or cable is to be reused.

In addition, the unit for removal of the secondary assembly includes the handling or holding of any conductor at tap lines where such is involved, and the reinstalling of such tap conductor in accordance with the Specifications.

h. Service Unit. The unit for removal of service assemblies includes, in addition to the removal of the assembly itself, all necessary handling such as untying, resagging, and retying of service conductor or cable where existing service conductor or cable is to be reused.

The following descriptions apply only to those removal units not sufficiently explicit:

<table>

Section N—New Assembly Units

The purpose of this section is to list complete new units of construction where such units are to be added to existing lines or installed in replacing lines.
§ 1726.346

which furnished any materials or services, or both, for the said Section of the Project have been paid in full; that no lien has been filed against the Project and no person has any right to claim any lien against the Project.

Undersigned further says that if the Owner pays the Contractor the contract price for the said Section of the Project the Contractor will indemnify and hold harmless and does hereby undertake and agree to indemnity and hold harmless the Owner from any claim or lien arising out of the negligence or other fault of the Contractor in respect of the performance of the contract which may have been or may be filed against the Owner.

Signature of Contractor (President, Vice-President, Partner or Owner, or, if signed by other than one of foregoing, Power of Attorney signed by one of the foregoing should be attached. Indicate applicable designation.)

[End of clause]

§ 1726.346 Supplemental contract for additional project, RUS Form 792c.

The form in this section shall be used when required by RUS Form 201, 790, or 792.

SUPPLEMENTAL CONTRACT FOR ADDITIONAL PROJECT

Date ____________

To: ____________ Contractor

Pursuant to Article I, Section 2 of the Contractor's Proposal dated ____________, for the rural electric project ____________, we request that you construct Additional Project No. ____________, consisting of approximately the following system improvement and line extension work:

1. The Additional Project is to be constructed in accordance with all of the provisions of the Contractor's Proposal, except:
   1. The time for completion of the Additional Project shall be ____________.
   2. The prices for Construction Units for the Additional Project are attached.

Please indicate your acceptance of the foregoing by signing below, return two signed copies and retain one copy.

Sincerely,

By ____________ Vice President (strike out inapplicable designation.)

Acceptance:

By ____________ President, Vice President, Partner (strike out inapplicable designation.)

Date ____________

7 CFR Ch. XVII (1-1-98 Edition)

§ 1726.347—1726.350 [Reserved]

§ 1726.351 Electric system construction contract (labor and materials), RUS Form 830.

The contract form in this section shall be used when required by this part. This form refers to guide drawings, which do not contain requirements, and, hence, are not included in this part. The guide drawings are included in the printed form available from GPO (See §1726.300.).

ELECTRIC SYSTEM CONSTRUCTION CONTRACT (LABOR AND MATERIALS)

Notice And Instructions To Bidders

1. Sealed proposals for the construction, including the supply of necessary labor, materials and equipment, of a rural electric project of ____________ (hereinafter called the "Owner") to be known as ____________ Project will be received by the Owner on or before ____________ o'clock ____________ M., ___________, ____________, at its office at ____________, at which time and place the proposals will be publicly opened and read. Any proposals received subsequent to the time specified will be promptly returned to the Bidder unopened.

2. Description of Project: The Project will consist of approximately:

   Overhead Distribution Line Construction
   ____________ miles of ____________ kV Single Phase Lines
   ____________ miles of ____________ kV V-Phase Lines
   ____________ miles of ____________ kV Three-Phase Lines
   ____________ miles of secondary on secondary poles
   ____________ miles of services for ____________ consumers

   Underground Distribution Facilities
   ____________ miles of ____________ kV Single-Phase Construction
   ____________ miles of ____________ kV V-Phase Construction
   ____________ miles of ____________ kV Three-Phase Construction
   ____________ miles of ____________ Volt Secondary and Service Construction for ____________ Consumers.

   Distribution Line Changes, Conversion, and Removal
   ____________ miles of ____________ kV underbuild

   Transmission Line Construction
   ____________ miles ____________ kV; ____________ miles ____________ kV
   ____________ miles ____________ kV underbuild

   Substations and Other Major Facilities
   ____________ kVA ____________ Voltage ____________ Name
This Project is located in ____ Counties, in the State(s) of ____ all as more fully described in the Plans, Specifications, Construction Drawings, and Contractor's Proposal presented.

3. Work on Energized Lines. Unless stated below all construction work including attachments to existing poles and line changes, is to be done with the line deenergized. The hours during which existing lines will be deenergized are shown in the Contractor's Proposal. Approximately ____ lines are to be made with the lines energized and such lines are in the following locations or areas: ____ and are more fully described in the Plans, Specifications, and Contractor's Proposal. For work in these locations the Bidder must provide personnel capable of working on energized lines. All such work shall be performed to meet at least the safety rules and regulations prescribed by the Owner for its own employees including the use of rubber gloves, hot sticks and associated protective equipment, a copy of which rules and regulations may be examined at the office of the Owner.

4. Owner-Furnished Materials. The unit prices in the Contractor's Proposal should include provisions for Owner-Furnished Materials since as stated in Article I, Section 3 of the Contractor's Proposal, the value of the Owner-Furnished Materials, if any, will be deducted from payments to the Bidder for completed Construction Units.

5. Obtaining Documents. The Plans, Specifications and Construction Drawings, together with all necessary forms and other documents for bidders may be obtained from the Owner or from the Engineer at the latter's office at ___, upon the payment of $____, which payment will not be subject to refund. The Plans, Specifications, and Construction Drawings may be examined at the office of the Owner or at the office of the Engineer. A copy of the Loan Contract (if the Project is to be financed, in whole or in part, pursuant to a loan contract) between the Owner and the United States of America acting through the Administrator of the Rural Utilities Service and the loan contract between the Owner and any other lender may be examined at the office of the Owner. Each set of Plans, Specifications and Construction Drawings will have a serial number, given by the Engineer, and the number of each set with the name of the purchaser will be recorded by the Engineer. Bids will be accepted only on the original purchase from the Owner or from the Engineer.

6. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations or interlineations will be permitted, unless made before submission, and initialed and dated.

7. Familiarity with Conditions. Prior to the submission of the Proposal the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Plans, Specifications, Construction Drawings, and forms of Contractor's Proposal and Contractor's Bond on file with the Secretary of the Owner and with the Engineer, and shall become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of facilities required before and during the construction of the Project, general local conditions and all other matters that may affect the cost and time of completion of the Project. Bidders will be required to comply with all applicable statutes, regulations, etc., including those pertaining to the licensing of contractors, and the so-called "Kick-Back Statute" (48 State. 948) and regulations issued pursuant thereto.

8. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

9. Alternate Designs. The Owner reserves the right to confine its consideration of the several bids to one type of design regardless of alternate types of design which may be specified in the Plans and Specifications and offered in the Proposals.

10. Proposals for Distribution and Transmission Facilities. If the Project includes both distribution and transmission facilities, bidders shall bid on both of the facilities and the Owner will evaluate the Proposals on the basis of low total bid for both facilities.

11. The Time for Completion of Construction of the Project shall be as specified by the Engineer in the Proposal.

12. Bid Bond. Each Proposal must be accompanied by a Bid Bond in the form attached or a certified check on a bank that is a member of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum bid price. Each Bidder agrees, provided its Proposal is one of the three low Proposals, that, by filing its Proposal together with such Bid Bond or check in consideration of the Owner's receiving and considering such Proposals, said Proposal shall be firm and binding upon each such Bidder and such Bid Bond or check shall be held by the Owner until a Proposal is accepted and a satisfactory Contractor's Bond is furnished (where required) by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed sixty (60) days from the date hereinbefore set for the opening of Proposals, whichever period shall be the shorter. If such
Proposal is not one of the three low Proposals, the Bid Bond or check shall be returned in each instance within a period of ten (10) days to the Bidder furnishing same.

13. Contractor’s Bond. The successful Bidder will be required to execute two additional counterparts of the Proposal and, for a Contract in excess of $100,000, to furnish a Contractor’s Bond in triplicate in the form attached hereto with sureties listed by the United States Treasury Department as Acceptable Sureties, in a penal sum not less than the contract price.

14. Failure to Furnish Contractor’s Bond. Should the successful Bidder fail or refuse to execute such counterparts or to furnish a Contractor’s Bond (where required) within ten (10) days after written notification of the acceptance of the Proposal by the Owner, the Bidder will be considered to have abandoned the Proposal. In such event, the Owner shall be entitled (a) to enforce the Bid Bond in accordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check, the difference (not exceeding the amount of the certified check) between the amount of the Proposal and such larger amount for which the Owner may in good faith contract with another party to construct the Project. The term “Successful Bidder” shall be deemed to include any Bidder whose Proposal is accepted after another Bidder has previously refused or has been unable to execute the counterparts or to furnish a satisfactory Contractor’s Bond (where required).

15. Contract is Entire Agreement. The Contract to be effected by the acceptance of the Proposal shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modifications thereof resulting from any representation or promise made at any time by any officer, agent or employee of the Owner or by any other person.

16. Minor Irregularities. The Owner reserves the right to waive minor irregularities or minor errors in any Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence. Any such irregularities or errors so waived must be corrected on the Proposal in which they occur prior to the acceptance thereof by the Owner.

17. Balanced Bid. The Owner reserves the right to reject any or all Proposals. The attention of Bidders is specially called to the desirability of a proper balance between prices for labor and materials and between the total prices for the respective Construction Units. Lack of such balance may be considered as a reason for rejecting a Proposal.

18. Discrepancy in Unit Prices. Where the unit prices in the Contractor’s Proposal are separated into three columns designated as “Labor,” “Materials,” and “Labor and Materials,” and where a discrepancy appears between the sums appearing in the “Labor and Materials” column and the correct addition of the sums appearing in the “Labor” column and the “Materials” column, the “Labor” column and the “Materials” column shall control.

19. Definition of Terms. The terms “Administrator,” “Engineer,” “Supervisor,” “Project,” “Completion of Construction,” and “Completion of the Project” as used throughout this Contract shall be as defined in Article VI, Section 1, of the Contractor’s Proposal.

20. The Owner Represents: a. If by provisions of the Contractor’s Proposal the Owner shall have undertaken to furnish any materials for the construction of the Project, such materials are on hand at locations specified or if such materials are not on hand they will be made available by the Owner to the successful Bidder at the locations specified before the time such materials are required for construction.

b. All easements and rights-of-way, except as shown on maps included in the Plans and Specifications, have been obtained from the owners of the properties across which the Project is to be constructed (including tenants who may reasonably be expected to object to such construction). The remaining easements and rights-of-way, if any, will be obtained as required to avoid delay in construction.

c. All staking, except as shown on the maps included in the Plans and Specifications, has been completed and sufficient staking crews will be available to maintain stakes at all times in advance of construction.

d. Where underground distribution construction is required, permission has been obtained from state and local highway and road authorities to install underground distribution power facilities and set pedestals, if any, on the highway and road right-of-way in the Project area. Notwithstanding such permission granted to the Owner, each Bidder is responsible for ascertaining that the equipment, methods of construction, and repair proposed to be used on the Project will meet all requirements of public authorities having jurisdiction over highway and road right-of-way. The successful Bidder will be required to furnish proof satisfactory to the Owner of compliance with this requirement. If required by highway or road authorities, the successful Bidder will furnish to such authorities a bond or meet other guaranty requirements to assure the prompt repair of all damages to highways and roads and their associated rights-of-way caused by the Bidder during construction of the Project. This requirement is in addition to and independent of the Contractor’s Bond required under this Contract. The acceptance of a bid from any
Bidder is not to be construed as approval of the Bidder’s equipment or proposed construction methods by or on behalf of the highway and road authorities. Bidders may obtain information concerning the requirements of highway and road authorities by communicating with the following:

e. All funds necessary for prompt payment for the construction of the Project will be available. If the Owner shall fail to comply with any of the undertakings contained in the foregoing representation or if any of such representations shall be incorrect, the Bidder will be entitled to an extension of time of completion for a period equal to the delay, if any, caused by the failure of the Owner to comply with such undertakings or by any such incorrect representation; provided the Bidder shall have promptly notified the Owner in writing of its desire to extend the time of completion in accordance with the foregoing; provided, however, that such extension, if any, of the time of completion shall be the sole remedy of the Bidder for the Owner’s failure, because of conditions beyond the control and without the fault of the Owner, to furnish materials in accordance with subparagraph a. above.

Section 2. Materials and Equipment. The Bidder agrees to furnish and use in the construction of the Project under this Proposal, all machinery, tools, labor, transportation and other means required to construct the rural electric project in strict accordance with the Plans, Specifications and Construction Drawings for the prices herein stated.

The total length of the project lines shall be determined by taking the sum of all straight horizontal span distances between pole stakes or from center to center of poles, or centerline of structures, carrying conductors, plus the length of service drops, if any, measured horizontally from center of last pole to the point of attachment to the consumer’s building.

Section 3. Owner-Furnished Materials. The Bidder agrees to furnish and use in the construction of the Project under this Proposal, in the event the Proposal is accepted, only such “fully listed” and “conditionally listed” materials and equipment as are included in the current “List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers,” including revisions adopted prior to the Bid Opening. The use of “conditionally listed” materials and equipment requires prior consent by the Owner or Engineer. For distribution lines, the Bidder further agrees to furnish and use guy wire with ASTM Class (Engineer to insert A or B) zinc coating. All leads on equipment such as transformers, reclosers, etc., shall be of #6 minimum copper conductivity using (Engineer to insert standard soft drawn copper or aluminum alloy) conductor. All conductor ties on insulators shall be of the materials and methods shown in the following Tying Guide Drawings: (Engineer to insert appropriate drawing numbers).

Ground rods and butt-type pole grounding plates shall be (Engineer to insert galvanized steel or copper).

Underground primary cable shall have coated copper neutral (Engineer to insert round or flat).

For transmission lines, the Bidder further agrees to furnish and use guy wire, overhead ground wire, and pole ground wire with ASTM Class (Engineer to insert A, B, or C) zinc coating. Guy wire shall be the same size and grade as the overhead ground wire. Where overhead ground wire is not specified, the guy wire shall be __ size, __ grade.

The Bidder further agrees to furnish and use poles, crossarms, and other timber products, of which the physical characteristics, method of treatment, type of preservative, instructions on inspection and general procedure shall be in accordance with RUS standards and requirements.

Crossarms shall be (Engineer to insert Douglas fir or Southern Yellow Pine), treated with (Engineer to insert type of preservative).

The Bidder agrees that the prices for poles, crossarms, and other timber products set forth herein shall include the cost of preservative treatment and inspection, insured warranty, or quality assurance. The Bidder further agrees to obtain from the supplier inspection and treatment reports or insured warranties, for checking against the delivered timber, and to submit such reports or warranties to the Owner as one of the prerequisites to monthly and final payments.

Section 3 Owner-Furnished Materials. The Bidder understands and agrees that, if this Proposal is accepted, the Owner will furnish to the Bidder the materials set forth in the attached “List of Owner’s Materials on Hand” (see page ___) and the Bidder will give a receipt (see page ___) therefore in writing to the Owner. The Bidder, further, will on behalf of the Owner accept delivery of such of the materials set forth in the attached “List of Materials Ordered by Owner but Not Delivered” (see page ___) as may be subsequently delivered and will promptly...
§ 1726.351

Forward to the Owner for payment the supplier’s invoice, together with the Bidder’s receipt in writing for such materials. The materials referred to are on hand at, or will be delivered at, the locations specified in the List and the Bidder will use such materials in constructing the Project.

The value of the completed Construction Units certified by the Bidder each month pursuant to Article III, Section 1a of the Proposal shall be reduced by an amount equal to the value of the materials installed by the Bidder during the preceding month which have been furnished by the Owner or the delivery of which has been accepted by the Bidder on behalf of the Owner. Only ninety percent (90%) of the remainder shall be paid prior to the Completion of the Project. The value of such materials shall be computed on the basis of the unit prices stated in the Lists. Materials, if any, not required for the Project, which have been furnished to the Bidder by the Owner or delivery of which has been accepted by the Bidder on behalf of the Owner, shall be returned to the Owner by the Bidder upon completion of construction of the Project. The value of all materials not installed in the Project nor returned to the Owner shall be deducted from the final payment to the Bidder.

The Owner shall not be obligated to furnish materials in excess of the quantities, size, kind and type set forth in the attached Lists. If the Owner furnishes, and the Bidder accepts, materials in excess thereof, the values of such excess materials shall be their actual cost as stated by the Owner.

Information on the shipping schedules of materials on the “List of Materials Ordered by Owner But Not Delivered” will be furnished to the Bidder as necessary during progress of the work. Upon delivery the Bidder shall promptly receive, unload, transport and handle all materials and equipment on the “List of Materials Ordered by Owner But Not Delivered” at its expense and shall be responsible for demurrage, if any.

Section 4. Purchase of Materials Not Furnished by Owner. The Bidder will purchase all materials and equipment (other than Owner-furnished materials) outright and not subject to any conditional sales agreements, bailment, lease or other agreement reserving unto the seller any right, title or interest therein.

Section 5. Proposal on Unit Basis. The Bidder understands and agrees that the various Construction Units on which bids are made are defined by symbols and descriptions in this Proposal, that all said bids are on a unit basis, and that the Owner may specify any number or combination of Construction Units that the Owner may deem necessary for the construction of the Project. Separate Construction Units are designated for each different arrangement which may be used in the construction of the Project. This Proposal is based on a consideration of each unit in place and includes only the materials listed on the corresponding Construction Drawings or description of unit where no drawing exists.

Section 6. Description of Contract. The Notice and Instructions to Bidders and Plans attached hereto and made a part hereof, and the Specifications and Construction Drawings set forth in:

- RUS Bulletin 50-3, Specifications and Drawings for 12.5/7.2 kV Line Construction;
- RUS Form 803, Specifications and Drawings for 14.4/24.9 kV Line Construction;
- RUS Form 806, Specifications and Drawings for Underground Electric Distribution;
- RUS Bulletin 50-2, RUS Specifications T-805A, Electric Transmission Specifications and Drawings, 34.5 kV through 69 kV;
- RUS Bulletin 50-1, RUS Specification T-805B, Electric Transmission Specifications and Drawings for 115 kV through 230 kV; and
- applicable, which by this reference are incorporated herein, together with the Proposal and Acceptance constitute the Contract. The Plans, consisting of maps and special drawings, and approved modifications in standard specifications are attached hereto and identified as follows: ——.

Section 7. Familiarity with Conditions. The Bidder has made a careful examination of the site of the Project to be constructed and of the Plans, Specifications, Construction Drawings, and form of Contractor’s Bond attached hereto, and has become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, and the kind of facilities required before and during the construction of the Project, and has become acquainted with the labor conditions, state and local laws, and regulations which would affect work on the proposed construction.

Section 8. License. The Bidder warrants that a Contractor’s License is not required, and if required it posses Contractor’s License No. ______ for the State of ______ in which the Project is located and said license expires on ______, 19____.

Section 9. Warranty of Good Faith. The Bidder warrants that this Proposal is made in good faith and without collusion or connection with any person or persons bidding for the same work.

Section 10. Warranty of Financial Resources. The Bidder warrants that it possesses adequate financial resources and agrees that in the event this Proposal is accepted and a Contractor’s Bond is required, it will furnish a Contractor’s Bond in the form attached hereto, in a penal sum not less than the maximum Contract price, with a surety or sureties listed by the United States Department of Treasury as Acceptance Sureties.
In the event that the surety or sureties on the performance bond delivered to the Owner contemporaneously with the execution of the Contract or on any bond or bonds delivered in substitution thereof or in addition thereto shall at any time become unsatisfactory to the Owner or the Administrator, the Bidder agrees to deliver to the Owner another or an additional bond.

Section 11. Taxes. The unit prices for Construction Units in this Proposal include provisions for the payment of all monies which will be payable by the Bidder or the Owner in connection with the construction of the Project on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies and equipment, or services or labor of installation thereof, to be incorporated in the Project as part of such Construction Units. The Bidder agrees to pay all such taxes, except taxes upon the sale, purchase or use of owner-furnished materials and it is understood that, as to owner-furnished materials, the values stated in the attached “List of Owner’s Materials on Hand” and “List of Materials Ordered by Owner But Not Delivered” include taxes upon the sale, purchase or use of owner-furnished materials, if applicable. The Bidder will furnish to the appropriate taxing authorities all required information and reports pertaining to the Project, except as to the owner-furnished materials.

Section 12. Changes in Quantities. The Bidder understands and agrees that the quantities called for in this Proposal are approximate, and that the total number of units upon which payment shall be made shall be as set forth in the inventory. If the Owner changes the quantity of any unit or units specified in this Proposal by more than fifteen percent (15%) and the materials cost to the Bidder is increased thereby to an extent which would not be adequately compensated by application of the unit prices in this Proposal to the revised quantity of such unit or units, such change, to the extent of the quantities of such units in excess of such fifteen percent (15%) shall be regarded as a change in the construction within the meaning of Article II, Section 1(d) of this proposal.

**Article II—Construction**

**Section 1. Time and Manner of Construction.**

a. The Bidder agrees to commence construction of the Project on a date (hereinafter called the “Commencement Date”) which shall be determined by the Engineer after notice in writing from the Bidder that the Bidder has sufficient materials to warrant commencement and continuation of construction, but in no event will the Commencement Date be later than ( ) calendar days after date of approval of the Contract by the Administrator. The Bidder further agrees to prosecute diligently and to complete construction in strict accordance with the Plans, Specifications and Construction Drawings within ( ) calendar days (excluding Sundays) after Commencement Date: Provided, however, that the Bidder will not be required to dig holes, set poles, install anchors, install underground conduit, perform any plowing for the installation of underground cable, or dig trenches if there are more than six (6) inches of frost on the ground nor to perform any construction on such days when in the judgment of the Engineer snow, rain, or wind, or the results of snow, rain, or frost make it impracticable to perform any operation of
§ 1726.351  

construction; provided further that the Bidder will not be required to perform any plowing for the installation of underground cable on public roads or highways if there are more than two (2) inches of frost in the ground. To the extent of the time lost due to the conditions described herein and approved in writing by the Engineer, the time of completion set out above will be extended if the Bidder makes a written request therefore to the Owner as provided in subsection b of this Section 1.

b. The time for Completion of Construction shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Bidder, including Acts of God, fires, floods, inability to obtain materials and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible. Provided, however that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefore in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

c. The sequence of construction shall be as set forth below, the number or names being the designations of extensions or areas (hereinafter called the “Sections”) corresponding to the numbers or names shown on the maps attached hereto, or if no Sections are set forth below, the sequence of construction shall be as determined by the Bidder, subject to the approval of the Engineer.

d. The Owner, acting through the Engineer may from time to time during the progress of the construction of the Project make such changes, additions or subtractions from the Plans, Specifications, Construction Drawings, List of Materials and sequence of construction provided for in the previous paragraph which are part of the Contractor’s Proposal as conditions may warrant; provided, however, that if any change in the construction to be done shall require an extension of time, a reasonable extension will be granted if the Bidder shall make a written request therefore to the Owner within ten (10) days after any such change is made. And provided further, that if the cost to the Bidder of construction of the project shall be materially increased by any such change or addition, the Owner shall pay the Bidder for the reasonable cost thereof in accordance with a Construction Contract Amendment signed by the Owner and the Bidder, but no claim for additional compensation for any such change or addition will be considered unless the Bidder shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition.

e. The Bidder will not perform any work hereunder on Sundays unless there is urgent need for such Sunday work and the Owner consents thereto in writing. The time for completion specified in subsection a of this Section 1 shall not be affected in any way by inclusion of this subsection nor by the Owner’s consent or lack of consent to Sunday work hereunder.

Section 2. Environmental Protection. The Bidder shall perform work in such a manner as to maximize preservation of beauty, consideration of natural resources and minimize marring and scarring of the landscape and silting of streams. The Bidder shall not deposit trash in streams or waterways, and shall not deposit herbicides or other chemicals or their containers in or near streams, waterways or pastures. The Bidder shall follow the criteria relating to environmental protection as specified herein by the Engineer.

Section 3. Tools, Equipment, and Qualified Personnel. The Bidder agrees that in the event this Proposal is accepted it will make available for use in connection with the proposed construction all necessary tools and equipment and qualified superintendents and foremen.

Section 4. Changes in Construction. The Bidder agrees to make such changes in construction previously erected in the Project by the Bidder as required by the Owner for prices arrived at as follows:

a. For substations and other units where only a portion of the complete unit is affected by the change, the compensation for such change shall be as agreed upon in writing by the Bidder and the Owner prior to the commencement of work in connection with such change.

b. For all other units, the compensation for such change shall be the reasonable cost thereof as agreed upon by the Bidder and the Owner, but in no event shall it exceed two (2) times the labor price quoted in the Proposal for the installation of the unit to be changed. Such compensation shall be in lieu of any other payment for the installation and removal of the original unit. (If a new or replacing unit is installed, payment for such new or replacing unit shall be made as shown in the final inventory.)

No payment shall be made to the Bidder for materials or labor involved in correcting errors or omissions on the part of the Bidder which result in construction not in accordance with the Plans and Specifications.

Section 5. Construction Not in Proposal. The Bidder also agrees that when it is necessary to construct units not shown in the Proposal it will construct such units for a price arrived at as follows:
Section 6. Supervision and Inspection.

a. The Bidder shall cause the construction work on the Project to receive constant supervision by a competent superintendent (hereinafter called the “Superintendent”) who shall be present at all times during working hours where construction is being carried on. The Bidder shall also employ, in connection with the construction of the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent shall be binding upon the Bidder.

b. The Owner reserves the right to require the removal from the Project of any employee of the Bidder if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner or the Supervisor, if any, shall have the right to require the Bidder to increase the number of its employees and to increase or change the amount or kind of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner or Supervisor; but the failure of the Owner or Supervisor to give any such directions shall not relieve the Bidder of its obligations to complete the work within the time and in the manner specified in this Proposal.

c. The construction of the Project and all materials and equipment used therein, shall be subject to the inspection, tests, and acceptance by the Owner and the Administrator and the Bidder shall furnish all information required by the Owner or by the Administrator concerning the nature or source of any materials incorporated or to be incorporated in the Project. The Owner and the Administrator shall have the right to inspect all payrolls, invoices of materials, and other data and records of the Bidder and any subcontractor, relevant to the construction of the Project. The Bidder shall provide all reasonable facilities necessary for such inspection and tests and shall maintain an office at the site of the Project, with telephone service where obtainable and at least one office employee to whom directions and instructions of the Owner may be delivered. Delivery of such directions or instructions in writing to the employee of the Bidder at such office shall constitute delivery to the Bidder. The Bidder shall have an authorized agent accompany the Engineer when final inspection is made and, if requested by the Owner, when any other inspection is made.

d. In the event that the Owner, or the Administrator, shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Bidder and the Bidder’s Surety or Sureties, if any, to have an inspection made by an engineer approved by the Owner for the purpose of determining the exact nature, extent and location of such defects.

e. The Engineer may recommend to the Owner that the Bidder suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions as are considered unfavorable for satisfactory prosecution of the work or because of the failure of the Bidder to comply with any of the provisions of the Contract: Provided, however, that the Bidder shall not suspend work pursuant to this provision without written authority from the Owner so to do. The time of completion hereinabove set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Bidder to comply with any of the provisions of this Contract. In the event that work is suspended by the Bidder with the consent of the Owner, the Bidder before resuming work shall give the Owner at least twenty-four (24) hours notice thereof in writing.

Section 7. Defective Materials and Workmanship.

a. The acceptance of any materials, equipment (except Owner-furnished materials) or any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such materials, equipment, or workmanship shall be found to be defective after delivery or installation, and any such materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be, by and at the expense of the Bidder. Any such condemned material or equipment shall be immediately removed from the site of the Project by the Bidder at the Bidder’s expense. The Bidder shall not be entitled to any payment hereunder so long as any defective materials, equipment or workmanship in respect to the Project, of which the Bidder shall have had notice, shall not have been replaced or remedied, as the case may be.

b. Notwithstanding any certificate which may have been given by the Owner or the Engineer, if any materials, equipment (except Owner-furnished materials) or any workmanship which does not comply with the requirements of this Contract shall be
Article III—Payments and Release of Liens

Section 1. Payments to Bidder

a. Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Bidder for construction accomplished during the preceding calendar month on the basis of completed Construction Units furnished and certified by the Bidder, recommended by the Engineer and approved by the Owner solely for the purposes of payment: Provided, however, that such approval shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate approved during the construction of the Project shall be paid by the Owner to the Bidder prior to Completion of the Project: Provided, however, that at any time after work, which, in the sole determination of the Engineer, amounts to fifty percent (50%) of the maximum Contract price has been completed, the Owner may elect, in lieu of paying ninety percent (90%) of each such subsequent estimate, to pay each such subsequent estimate in full. Upon completion by the Bidder of the construction of the Project, the Engineer will prepare an inventory of the Project showing the total number and character of Construction Units and, after checking such inventory with the Bidder, will certify it to the Owner. Upon the approval by the Owner and the Administrator of a Certificate of Completion—Contract Construction, RUS Form 187, showing the total cost of the construction performed, the Owner shall make payment to the Bidder of all amounts to which the Bidder shall be entitled thereunder which shall not have been paid: Provided, however, that such final payment shall be made not later than ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, unless withheld because of the fault of the Bidder.

b. The Bidder shall be paid on the basis of the number of Construction Units actually installed at the direction of the Owner shown by the inventory based on the staking sheets or structure lists; Provided, however, that the total cost shall not exceed the maximum Contract price for the construction of the Project as set forth in the Acceptance plus the costs of any additional change orders, unless such excess shall have been approved in writing by the Owner.

c. Notwithstanding the provisions of Section 1a above, the Bidder may, by giving written notice thereof to the Owner, elect to receive payment in full for any Section of the Project upon:

(1) completion of such Section as certified by the Engineer and approved by the Owner;
(2) submission to the Owner of the releases of lien and the certificate referred to in Section 2 hereof;
(3) approval by the Owner of the inventory in respect of such Section; and
(4) submission to the Owner and the Administrator of the consent in writing by the Surety or Sureties, if any, on the Contractor's Bond to payment in full for such Section prior to Completion of the Project. If no Sections are designated in Article II, Section 1c, the term "Section" shall mean for purposes of this subsection c and Article IV, Section 3b only, a part of the Project as designated by the Owner which represents at least twenty-five percent (25%) of the maximum Contract price as stated in Article III, Section 1, and which is capable of being energized and operated by the Owner.

d. Interest at the rate of percent1 per annum shall be paid by the Owner to the Bidder on all unpaid balances due on monthly estimates, commencing fifteen (15) days after the due date; provided the delay in payment beyond the due date is not caused by any condition within the control of the Bidder. The due date for purposes of such monthly payment or interest on all unpaid balances shall be the fifteenth (15) day of each calendar month provided (1) the Bidder on or before the fifth (5) day of such month shall have submitted its certification of Construction Units completed during the preceding month and (2) the Owner on or before the fifteenth (15) day of such month shall have approved such certification. If, for reasons not due to the Bidder's fault, such approval shall not have been given on or before the fifteenth (15) day of such month, notwithstanding the absence of the approval of the certification.

1The Owner shall insert a rate equal to the lowest "Prime Rate" listed in the "Money Rates" section of the Wall Street Journal on the date such invitation to bid is issued.
Section 1. Protection to Persons and Property. The Bidder shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner. All machinery and equipment and other physical hazards shall be guarded in accordance with the "Manual of Accident Prevention in Construction" of the Associated General Contractors of America unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

a. The Bidder shall at no time and under no circumstances cause or permit any employee of the Bidder to perform any work upon energized lines, or upon poles carrying energized lines, unless otherwise specified in the Notice and Instructions to Bidders.

b. The Bidder shall so conduct the construction of the Project as to cause the least possible obstruction of public highways.

c. The Bidder shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances and regulations or by local conditions.

d. The Bidder shall do all things necessary or expedient to properly protect any and all parallel, converging and intersecting lines, joint line poles, highways and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways or other property are damaged in the course of the construction of the Project the Bidder shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

e. Where the right-of-way of the Project traverses cultivated lands, the Bidder shall limit the movement of its crews and equipment so as to cause as little damage as possible to crops, orchards or property and shall endeavor to avoid marring the lands. All fences which are necessarily opened or moved during the construction of the Project shall be replaced in as good condition as they were found and precautions shall be taken to prevent the escape of livestock. Except as otherwise provided in the descriptions of underground plowing and trenching assembly units, the Bidder shall not be responsible for loss of property to crops, orchards or property (other than livestock) on the right-of-way necessarily incident to the construction of the Project and not caused by negligence or inefficient operation of the Bidder. The Bidder shall be responsible for all other loss of or damage to crops, orchards or property, whether on or off the right-of-way, and for all loss of or damage to livestock caused by the construction of the Project. The right-of-way for purposes of this said section shall consist of an area extending feet on both sides of the center line of the poles along the route of the Project lines, plus such area reasonably required by the Bidder for access to the route of the Project lines from Public roads to carry on construction activities.

f. The Project, from the commencement of work to completion, or to such earlier date
or dates when the Owner may take possession and control in whole or in part as hereinafter provided shall be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Bidder. The Bidder shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Bidder by reason of any act of God or other casualty or cause whether or not the same shall have occurred by reason of the Bidder’s negligence.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner’s directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney’s fees) for personal loss, injury, or death to persons (including but not limited to Bidder’s employees) and loss, damage to or destruction of Owner’s property or the property of any other person or entity (including but not limited to Bidder’s property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. Nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner’s directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner’s property or facilities, for services performed or materials or equipment furnished by Bidder, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Bidder shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Bidder does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be obligated) to pay all sums necessary to obtain any such discharge or release and to deduct all amounts so paid from the amount due Bidder.

(iii) Bidder shall provide to Owner’s satisfaction evidence of Bidder’s ability to comply with the indemnification provisions of subparagraphs i and ii above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

g. Any and all excess earth, rock, debris, underbrush and other useless materials shall be removed by the Bidder from the site of the Project as rapidly as practicable as the work progresses.

h. Upon violation by the Bidder of any of the provisions of this section, after written notice of such violation given to the Bidder by the Engineer or the Owner, the Bidder shall immediately correct such violation. Upon failure of the Bidder so to do the Owner may correct such violation at the Bidder’s expense. Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder’s expense without such prior notice to the Bidder.

i. The Bidder shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

j. The Bidder shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the Owner that proper authorization has been received from the owner of the property, and the Bidder shall promptly notify the Owner whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on its land in connection with the Project and shall obtain the consent in writing of the Owner before proceeding in any such case.

k. The Bidder will furnish, prior to the commencement of underground distribution construction, proof, satisfactory to the Owner, of compliance with requirements of highway and road authorities having jurisdiction, including without limitation, the furnishing of a bond or other guaranty, and approval by such authorities of the equipment and methods of construction and repair to be used by the Bidder.

Section 2 Insurance. The Bidder shall take out and maintain throughout the period of this Agreement the following types and minimum amounts of insurance:

a. Workers’ compensation and employers’ liability insurance, as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers’ compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers’ compensation laws.

b. Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million each occurrence, and $1 million aggregate for accidents during the policy period. A single
Rural Utilities Service, USDA

§ 1726.351

limit of $1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

b. Where the construction of a Section as hereinbefore defined in Article II, Section 1c and Article III, Section 1c shall have been completed by the Bidder, the Owner agrees, after receipt of a written request from the Bidder, to accept delivery of possession and control of such Section upon the issuance by the Engineer of a written statement that the Section has been inspected and found acceptable by the Engineer. Upon such delivery of the possession and control of any such Section to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1f hereof with respect to such Section so delivered to the Owner shall be terminated:

Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials or workmanship as contained in Article II, Section 6 hereof.

4. Energizing the Project.

a. Prior to Completion of the Project the Owner, upon written notice to the Bidder, may test the construction thereof by temporarily energizing any portion or portions thereof. During the period of such test the portion or portions of the Project so energized shall be considered as within the possession and control of the Bidder unless the Owner shall elect to continue possession and control in the manner provided in Section 3 of this Article.

b. The Owner shall have the right to energize permanently any portion or portions of the Project delivered to its possession and control pursuant to the provisions of Section 3 of this Article.

5. Assignment of Guarantees. All guarantees of materials and workmanship as contained in Article II, Section 6 hereof.

a. Upon written request of the Owner the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of any portion of the Project to the Owner, the risk and obligations of the Bidder as set forth in subsection "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Delivery of Possession and Control to Owner.

a. Upon written request of the Owner the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of any portion of the Project to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1f hereof with respect to such portion of the Project so delivered to the Owner shall be terminated: Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials or workmanship as contained in Article II, Section 6 hereof.

b. Prior to Completion of the Project the Owner, upon written notice to the Bidder, may test the construction thereof by temporarily energizing any portion or portions thereof. During the period of such test the portion or portions of the Project so energized shall be considered as within the possession and control of the Bidder unless the Owner shall elect to continue possession and control in the manner provided in Section 3 of this Article.

Section 5. Assignment of Guarantees. All guarantees of materials and workmanship running in favor of the Bidder shall be transferred and assigned to the Owner prior to the time the Bidder receives final payment.

Article V—Remedies

Section 1. Completion on Bidder’s Default.

If default shall be made by the Bidder or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the Sureties, if any, upon the Contractor’s Bond or Bonds a written notice requiring the Bidder to cause such default to be corrected forthwith. Unless within twenty (20) days after the service of such notice upon the Bidder such default shall be corrected or arrangements for the correction thereof satisfactory to both the Owner and the Administrator shall be made by the Bidder or its Surety or Sureties, if any, the Owner may take over the construction of the Project and prosecute the same to completion by Contract or otherwise for the account and at the expense of the Bidder, and the Bidder and its Surety or Sureties, if any, shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliances, and...
§ 1726.351

plant belonging to the Bidder or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims or demands which the Bidder may have against third persons in connection with this Contract and for such purpose the Bidder does hereby assign, transfer and set over unto the Owner all such rights, claims and demands.

Section 2. Liquidated Damages. The time of the Completion of Construction of the Project is of the essence of the Contract. Should the Bidder neglect, refuse or fail to complete the construction within the time herein agreed upon, after giving effect to extensions of time if any, herein provided, then, in that event and in view of the difficulty of estimating with exactness damages caused by such delay, the Owner shall have the right to deduct from and retain out of such moneys which may be then due, or which may become due and payable to the Bidder the sum of ______ dollars (____ _) per day for each and every day that such construction is delayed in its completion beyond the specified time, as liquidated damages and not as a penalty; if the amount due and to become due from the Owner to the Bidder is insufficient to pay in full any such liquidated damages, the Bidder shall pay to the Owner the amount necessary to effect such payment in full: Provided, however, that the provisions of the foregoing provision as the Administrator and does not refer to the Manager and any other person employed by the Owner and responsible to it.

The term “Completion of Construction” shall mean full performance by the Bidder’s obligations under the Contract and all amendments and revisions thereof except the Bidder’s obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article III, Section 1 hereof, (2) the inventory referred to in Article III, Section 1 hereof, and (3) other final documents. The term “Completion of the Project” shall mean full performance by the Bidder of the Bidder’s obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion, signed by the Engineer and approved in writing by the Owner, shall be the sole and conclusive evidence as to the date of Completion of Construction and as to the fact of Completion of the Project.

Section 3. Patent Infringement. The Bidder, at its own expense and risk, agrees to defend, save harmless and indemnify the Owner and responsible to it.

c. The term “Supervisor” shall mean the person, if any, appointed by the Administrator as the representative of the Government under the provisions of the Loan Contract providing for such appointment in special cases. The term is limited to such special representative of the Government, if any, who is responsible exclusively to the Administrator and does not refer to the Manager or any other person employed by the Owner and responsible to it.

d. The term “Project” shall mean the rural electric system, or portion thereof, described in the Plans and Specifications, Construction Drawings.

e. The term “Completion of Construction” shall mean full performance by the Bidder’s obligations under the Contract and all amendments and revisions thereof except the Bidder’s obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof, (2) the inventory referred to in Article III, Section 1 hereof, and (3) other final documents. The term “Completion of the Project” shall mean full performance by the Bidder of the Bidder’s obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion, signed by the Engineer and approved in writing by the Owner, shall be the sole and conclusive evidence as to the date of Completion of Construction and as to the fact of Completion of the Project.

Section 4. Permit for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection
with the construction of the Project shall be obtained by and at the expense of the Bidder.

Section 5. Compliance with Statutes and Regulations. The Bidder shall comply with all statutes, ordinances, rules, and regulations pertaining to the work. The Bidder acknowledges that it is familiar with the Rural Electrification Act of 1936, as amended, the so-called “Kick-Back” Statute (48 Stat. 948), and regulations issued pursuant thereto, and 18 U.S.C. §§ 287, 1001, as amended. The Bidder understands that the obligations of the parties hereunder are subject to the applicable regulations and orders of Governmental Agencies having jurisdiction in the premises.

(a) Bidder’s Representations.

The Bidder represents that:

(1) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotions or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection of training, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Bidder will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers’ representative of the Bidder’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and the rules, regulations and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Bidder’s noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be canceled, terminated, or suspended in whole or in part, and the Bidder may be declared ineligible for future Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

(7) The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Bidder will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance; Provided, however, that in the event Bidder becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.
§ 1726.351

(c) Certificate of Nonsegregated Facilities. The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term “segregated facilities” means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 7. Franchises and Rights-of-Way. The Bidder shall be under no obligation to obtain or assist in obtaining: Any franchises, authorizations, permits or approvals required to be obtained by the Owner from Federal, State, County, Municipal or other authorities; any rights-of-way over private lands; or any agreements between the Owner and third parties with respect to the joint use of poles, crossings, or other matter incidental to the construction and operation of the Project.

Section 8. Nonassignment of Contract. The Bidder shall perform directly and without subcontracting not less than twenty-five percent (25%) of the construction of the Project, to be calculated on the basis of the total Contract price. The Bidder shall not assign the Contract effected by an acceptance of this Proposal or any interest in any funds that may be due or become due hereunder or enter into any contract with any person, firm or corporation for the performance of the Bidder’s obligations hereunder or any part thereof, without the approval in writing of the Owner and of the Surety or Sureties, if any, on any bond furnished by the Bidder for the faithful performance of the Bidder's obligations hereunder. If the Bidder, with the consent of the Owner and any Surety or Sureties on the Contractor’s Bond or Bonds, shall enter into a subcontract with any subcontractor for the performance of any part of this Contract, the Bidder shall be as fully responsible to the Owner and the Government for the acts and omissions of such subcontractor and of persons employed by such subcontractor as the Bidder would be for its own acts and omissions and those of persons directly employed by it.

Section 9. Extension to Successors and Assigns. Each and all of the covenants and agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto.

Section 10. Contractor. Upon acceptance of this Proposal, the successful Bidder shall be the Contractor and all references in the Proposal to the Bidder shall apply to the Contractor.

By (Bidder)

Attest: (Secretary)

Date

The Proposal must be signed with the full name of the Bidder. If the Bidder is a partnership, the Proposal must be signed in the partnership name by a partner. If the Bidder is a corporation, the Proposal must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

Distribution Construction Units—New Construction

SECTION I—POLE UNITS

A pole unit consists of one pole in place. It does not include pole-top assembly unit or other parts attached to the pole. The first two digits indicate the length of the pole; the third digit shows the classification per ANSI (Example: 35-5 means a pole 35 feet long, class 5.)

Species of Timber: ______

Kind of Preservative: (Check one)

Method of Treatment: (Check one)

1. Pressure ; 2. Thermal Process

Pole Plan Under Which the Poles are to be Furnished: (Check one)

1. Insured Warranted ; 2. Independently Inspected ; 3. Quality Assured ; 4. Either Insured Warranted, Independently Inspected, or Quality Assured

(Engineer to complete above)

- Total, Section 1—
- Section A—Single Phase Pole Top Assembly Units
- A pole top assembly unit consists of the hardware, crossarms, and their appurtenances, insulators, etc., except tie wire, required to support the primary conductors. It does not include the pole. Crossarm pins include washer, nut, and locknut.

- Total, Section A—
- Section B—V Phase Pole Top Assembly Units
- A pole top assembly units consists of the hardware, crossarms, and their appurtenances, insulators, etc., except tie wire, required to support the primary conductors. It does not include the pole. Crossarm pins include washer, nut, and locknut.

- Total, Section B—
- Section C—Three Phase Pole Top Assembly Units
- A pole top assembly unit consists of the hardware, crossarms, and their appurtenances, insulators, etc., except tie wire, required to support the primary conductors. It does not include the pole. Crossarm pins include washer, nut, and locknut.

- Total, Section C—
- Section D—Conductor Assembly Units
- A conductor assembly unit consists of 1,000 feet of conductor or cable for primaries, secondaries or services, and includes tie wires, sleeves for splicing, connectors, and armor rods with clips or armor wire where necessary. Tree trimming necessary for installing services and secondaries on poles not carrying primary line is included with the conductor assembly unit and shall be performed in accordance with the directions of the Engineer. The service shall be connected to the secondary or transformer and 2 feet of conductor or cable shall be left for connecting to the consumer’s service entrance. In computing the compensation to the Bidder for conductor assembly units only the horizontal distance between conductor supports or pole stakes shall be used. The conductor or cable sizes and types listed are the manufacturer’s designation.
### Section D—Guy Assembly Units

A guy assembly unit consists of the hardware and wire, and guy insulator where necessary. An overhead guy assembly consists of an overhead guy, a pole, and a down guy, each of which is listed separately. Guy markers are designated separately.

Section M—Miscellaneous Assembly Units

A miscellaneous assembly unit consists of an additional unit needed in the Project for new line construction but not otherwise listed in the Proposal. This section includes grounding assemblies consisting of the conductor, ground rod, grounding plate, connectors and clamps as shown on the respective drawings for the various types. It also includes fuse cutouts, reclosers, sectionalizers, switches, capacitors, regulators, metering and other assembly units.

Section R—Right-of-Way Clearing Units

**R1±10.** The unit is 1,000 feet in length and 10 feet in width (to be measured on one side of the pole line) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as is required so that the right-of-way, except for tree stumps which shall not exceed 3 feet in height, shall be clear from the ground up on one side of the line of poles carrying primary conductors of the width specified. This unit does not include clearing or trimming associated with secondaries or services which is included with conductor units. The segmental length of actual clearing shall be measured in a straight line parallel to the transmission centerline using the maximum dimension of foliage cleared and projected to the ground line. All trees and underbrush across this width of the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing. Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All length thus arrived at, added together and divided by 1,000, shall give the number of 1,000-foot R1±10 units of clearing. This unit includes the removal or topping, at the option of the Bidder, of danger trees outside of the right-of-way when so designated by the Engineer. (Danger trees are defined as dead or leaning trees which, in falling, will affect the operation of the line.) The Bidder shall not remove or trim shade, fruit, or ornamental trees unless so directed by the Engineer.

**R1±20, RC1±10.** This unit is identical with R1±10 except that the width is 20 feet (to be measured 10 feet on each side of the pole line).

**R1±30.** This unit is identical with R1±10 except that the width is 30 feet (to be measured 15 feet on each side of the pole line).

**R1±40.** This unit is identical with R1±10 except that width is 40 feet (to be measured 20 feet on each side of the pole line).

**RC1±10, RC1±20, RC1±30, RC1±40.** These units are identical to the respective R1 units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

Additional Requirements (When specifying R1 units denote type of disposal (A or B).)

A. Trees, brush, branches and refuse shall, without delay, be disposed of by one of the following methods as the Engineer will direct (Engineer to strike out methods not to be used):  
1. Burned  
2. Piled on one side of right-of-way  
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.  
4. Other (describe)

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Engineer but in no case shall it be required to be less than ______ (____) feet. Brush, branches, and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used):  
1. Burned  
2. Piled on one side of right-of-way  
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.  
4. Other (describe)
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.

4. Other (describe)

Section UD—Underground Cable Assembly Units

An underground cable assembly unit consists of 1,000 feet of cable for underground primaries, secondaries or services. It does not include the conduit, plowing, trenching and backfilling, or the termination of the primary cable which are provided for in other assembly units. It includes the termination, connection and sealing of secondary and service cables and conductors as shown in the specifications and construction drawings, and all primary, secondary and service cable splices (buried cable may be spliced only when and where permitted by the Owner). In computing the compensation to the Bidder for underground cable assembly units, only the distance between stakes, paralleling the cable shall be used. The number of units so computed will include all cable installed in place in all specified trenches, risers, conduits, crossings, manholes, transformers, terminal housings and meter boxes. The conductor or cables listed are the manufacturer’s designation of types, size, voltage rating and material. The Bidder and the Owner shall jointly perform cable acceptance tests on installed cable in accordance with the specifications using test equipment furnished by the Owner or Bidder.

Section UG—Underground Transformer Assembly Units

An underground transformer assembly unit consists of the transformer, its housing, warning sign, switches, over-current protective devices, grounding loop, and hardware and leads with their connectors and supporting insulators installed in place. This unit includes the cable terminations but does not include lightning arresters, fault indicators, ground rods or trenching. For submersible transformers, it includes the cable terminations, the enclosure and cover, drainable material (when specified), and the excavation when required. For pad-mount transformers, it does not include the pad, site preparation, drainable material, backfilling or compaction which are included in the pad assembly units.

3. Engineer check here if primary splices are permitted.
4. Engineer check here if secondary and service splices are permitted.
5. Engineer check here if 12 feet of service conductor is to be left as a coil 3 feet from the building with ends capped instead of connection to meter box.
6. Engineer check here if drainable material is specified.
Rural Utilities Service, USDA § 1726.351

Total, Section UG—__________

Section UK—Underground Secondary and Service Assembly Units

An underground secondary and service assembly unit consists of secondary or service cable terminal housing mounted in place. It includes the power pedestal, stake (when required), mounting hardware, warning sign, directional marker, housing identification marking and the cable identification tags. It does not include the cable terminations, ground rod, or pad, when required.

Section UM—Miscellaneous Underground Assembly Units

A miscellaneous underground assembly unit consists of an additional unit needed in the Project for new construction but not otherwise listed in the Proposal. This section includes the miscellaneous assembly units as shown on the respective underground construction drawings. Where miscellaneous units consist of or include a primary cable termination, the unit includes the preparation of the cable to accommodate the termination, the stress cone and the connection of the cable to the terminal equipment. Pad assembly units are in this section and include the site preparation, bedding, drainable material when specified, cable slot, backfilling, tampering and the pad in place.

Section UR—Underground Excavation Assembly Units

UR 1-S(D) Plowing Assembly Unit, Soil—Consists of one (1) lineal foot of plowing in soil, measured parallel to the surface of the ground, to a specified depth (D), in inches, including the compacting, except as specifically provided for in other units. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermains, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged during the plowing of the cable, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the slot.

NOTE: Where in the judgment of the Owner greater than normal difficulty will be involved in plowing because of the presence of underground facilities of other utilities, this unit will be suffixed by the letter “T”. This will be applicable only in those areas predesignated by the Owner on the detail maps herein. All plowing outside of the predesignated area on the map, regardless of the difficulty in placement actually experienced, will be inventoried as the regular UR 3-S(D) units. If field conditions show the existence of rock to prevent the placing of the cable in soil to the depth required in the specifications, the Owner may specify UR 2-R units. Where more than one cable is to be installed in the slot, the UR 1-S unit designation should be modified by a suffix corresponding to the number of cables installed. Example: UR 1-S(D) 3c for 3 cables plowed at one time.

UR 2-S(D&W) Trenching Assembly Unit, Soil—Consists of one (1) lineal foot of trenching in soil, measured parallel to the surface of the ground, to a specified depth (D) and width (W), in inches, including the excavation, and backfilling and compacting. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, watermains, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the trench or cable bedding assembly units, when required.

NOTE: Where in the judgment of the Owner greater than normal difficulty will be involved in trenching because of the presence
of underground facilities of other utilities, this unit will be suffixed by the letter ‘T’. This will be applicable only in those areas predesignated by the Owner on the detail maps herein. Where more than one cable is to be installed in the trench, the regular UR 2-5 unit designation should be modified by a suffix corresponding to the construction drawing for the type of cable placement desired.

UR 2-R (D&W) Trenching Assembly Unit, Rock—Consists of one (1) lineal foot of trenching in rock, measured parallel to the surface of the ground, to specified depth (D) and width(W), in inches, including the excavation, and backfilling and compacting to place cable to the depth specified in the Specifications. This unit will be specified by the Owner only when field conditions at the site show the existence of rock at a depth preventing the placing of the cable in soil to the depths required in the Specifications. This unit includes all material and labor required in the repair and/or replacement of streets, roads, drives, fences, lawns, shrubbery, water mains, pipes, pipelines and contents, underground power and telephone facilities, buried sewerage and drainage facilities, and any other property damaged by the trenching, except as specifically provided for in other units. This unit does not include underground cable facilities installed in the trench or cable bedding assembly units, when required.

UR-3 Cable Bedding Assembly Unit—Consists of one (1) lineal foot of a 2-inch bed of clean sand or soil placed in the trench under the cable and a 4-inch layer of clean sand or soil backfill over the cable to the width of the trench.

NOTE: The exact location and number of units shall be determined by the Owner after the trenches are open in those areas where rock or other conditions make special bedding necessary.

UR-4 Pavement Assembly Unit, Asphalt—Consists of the labor and material necessary to remove and restore one (1) lineal foot of asphalt pavement, measured along the route of the cable. All work shall be performed in accordance with the requirements of state or local authorities. Any trenching which may be necessary is included in this unit.

UR-4c Pavement Assembly Unit, Concrete—Consists of the labor and material necessary to remove and restore one (1) lineal foot of concrete pavement, measured along the route of the cable. All work shall be performed in accordance with the requirements of state or local authorities. Any trenching which may be necessary is included in this unit.

UR-5 Underground Pipe Crossing Assembly Unit—Consists of one (1) lineal foot of steel pipe, of the inside diameter, in inches, specified in the last digit of the assembly unit designation, installed in place. This unit includes the pushing of pipe and any excavation, backfilling and tamping necessary for the installation of the pipe. The pipe will be installed at the depth specified by the Owner. Underground cable installed in the pipe is not included in this unit.

UR-6 Underground Nonpipe Crossing Assembly Unit—Consists of the labor in providing a hole in soil one (1) foot in length of a diameter sufficient to accommodate the cable to be installed therein. The depth of the hole below the surface of the ground shall be specified by the Owner. This unit includes any excavation, backfilling and tamping necessary for the installation. This unit may be used where the permanent installation of a steel pipe under the UR-5 unit is not required. Underground cable installed in the hole is not included in this unit.

Total, Section UR—

Distribution Construction Units—Line Changes

The general heading of Line Changes applies to the changing of existing lines or portion thereof from their existing phasing, wire size, and type to new phasing, wire size, and type and the removal of existing lines or portion thereof and replacing with new lines in close proximity thereto. In general line changes involve three types of assembly units as follows:

Section H—Conversion assembly units;
Section I—Removal assembly units;
Section N—New construction assembly units on existing lines or in replacing lines.

The assembly units that are included in Section H, I, and N are defined by symbols and descriptions which follow together with the applicable descriptions included under New construction. Where the descriptions are not correct or sufficiently explicit, or when special units are not covered by Construction Drawings, descriptions have been provided by the Engineer in the respective sections.
Work included in these sections shall be performed under the schedule as set forth below:

**SCHEDULE OF DEENERGIZATION OF EXISTING DISTRIBUTION LINES UNDER WHICH WORK UNDER SECTIONS H, I, AND N SHALL BE PERFORMED**

<table>
<thead>
<tr>
<th>Line section (To be designated by point to point description on detail map)</th>
<th>Hours and days of week when lines will be deenergized to permit line changes</th>
</tr>
</thead>
</table>

The Bidder will so plan and perform its work on the above lines that it will be possible for the Owner to safely reenergize all lines involved at the expiration of the time limits set up in the above schedule to resume service to all consumers being served prior to deenergization. Prior to commencement of work on lines to be deenergized, the Bidder will notify the Owner in writing thereof, designating the lines to be deenergized and upon receipt of such notice, the Owner will deenergize such lines. Upon completion of work each day on such deenergized lines, the Bidder will notify the Owner thereof in writing or in such other manner as the circumstances permit designating the lines to be reenergized and stating that such lines may be safely reenergized and upon receipt of such notice, the Owner will reenergize such lines.

**Section H—Conversion Assembly Units**

Conversion assembly units are pole-top assemblies and cover the furnishing of all labor and additional materials for changing an existing assembly unit to a new assembly unit, utilizing certain items of materials of the existing assembly unit on poles to be left in place. The unit prices for materials should include only additional material that is required to complete the new unit, less suitable allowance for material removed. Any materials removed from the existing assembly units which are not required in the construction of the conversion assembly unit become the property of the Bidder and may, with the permission of the Engineer, be reused by the Bidder in the construction of other assembly units called for in the Construction Contract. Conversion assembly units are specified by the prefix H with the new construction assembly unit designation shown first and the existing assembly unit designation shown last. For example, a H B1-A1 signifies the conversion of an existing A1 assembly unit to a B1 assembly unit (as was defined in the description of construction assembly units). In this instance the Bidder utilizes the existing pin-type insulator, single upset bolt and neutral spool in the construction of the new assembly unit. The Bidder furnishes the additional crossarm, crossarm pins, braces, machine bolt, carriage bolts, lag screw, and insulator required for the new unit. The Bidder takes possession of the pole-top pin and two machine bolts and with the permission of the Engineer may reuse these elsewhere in the construction of the Project. The Bidder will not be held accountable to the Owner for the materials he so acquires.

The Conversion assembly units also include the furnishing of all labor and materials in the transferring, resagging and retying of conductors from one position on the pole to a different position on the pole where such transfers are required. Where replacement of conductor is required, the existing conductor will be removed under Section I and the new conductor installed under Section N.

Where replacement of a pole is required, the existing pole and pole-top assembly will be removed under Section I and the new pole and pole-top assembly will be installed according to Section N and no H units will be involved.

Conversion assemblies are listed in three subsections for converting pole-top assemblies from single to V phase, single to three phase, and V to three phase. The following descriptions apply to only those units not sufficiently explicit.

### Section I—Removal Assembly Units

Removal assembly units cover the furnishing of all labor for the removal of existing units of construction from existing lines, disassembling into material items, and all labor and transportation for the returning of all materials to the warehouse of the Owner in an orderly manner or transporting elsewhere to the site of the Project for reuse in the prosecution of this Contract as approved by the Engineer.

The Bidder will be charged by the Owner for the full value of all materials removed under this section at the value shown in Table C. Such charges will be placed against the Bidder as units are removed and the value will be deducted from the total value of installed assembly units for determination of the work accomplished for purposes of monthly progress payments to the Bidder.

Of the materials listed in Table C to be removed from existing lines, certain materials will be reused in the construction of the Project. Such materials to be reused are listed in Table C-1. Materials other than those listed in Table C-1 shall, if not damaged in handling, be returned to the Owner for full credit at the values shown in Table D. The Bidder will be allowed full credit for all material items, other than those listed in Table C-1, returned to the Owner which, in the opinion of the Engineer, were not damaged by the Bidder in removal and handling even though the materials may not be reusable for reasons of obsolescence or deterioration. Such credits shall be allowed the Bidder as materials are returned to the Owner’s warehouse and shall be added to the total value of installed assembly units for determination of the work accomplished for purposes of monthly progress payments to the Bidder.

The unit removal prices shall include all material and labor required to reinstall in accordance with specifications any conductors temporarily detached. The Bidder will reinstall at his own expense any other units removed by him for his own convenience.

The removal units are specified by the prefix I and followed by the assembly unit designation of existing assembly unit to be removed. For example, an I-A signifies the removal of an A1 assembly unit. The following special notes apply to specific removal units:

- **a. Poles.** All poles of the same height, regardless of pole class, are designated by the same unit. Thus an I-30-foot pole signifies the removal of a 30-foot pole of any class. The Bidder is not required under this unit to remove from the pole any ground wire or pole numbering attached to the pole. This unit includes the refilling and tamping of holes in a workmanlike manner unless they are to be reused.

- **b. Pole-Top Assemblies.** The unit of removal of pole-top assemblies includes, in addition to the removal of the assembly itself, any necessary handling, resagging, and retying of conductors in those cases where an existing pole-top assembly will be removed and replaced by a new pole-top assembly and where any existing conductor is to be reused.

The unit of removal of pole-top assemblies also includes any holding or handling of mainline or tap conductors at tap lines, angles, and deadends where such is involved, and reinstalling of such conductor in accordance with the specifications; for example, an I-A5-4 will include the disconnection of the tap conductors, snubbing off the tap line at the nearest practical point and the reconnection and resagging of these tap conductors if necessary to the new tap assembly when installed. The new unit of construction, however, will be specified separately in Section N.

Rural Utilities Service, USDA § 1726.351

c. Conductor. The conductor removal unit covers the removal of 1,000 feet of conductor or cable and reeling or coiling it in a workmanlike manner in such a way that it can be reused by the Bidder or the Owner. The Owner will furnish to the Bidder reels if it is to be returned to the Owner’s warehouse on reels. The Bidder will retain possession of all jumpers, tie wire, armor rods, connectors, and other conductor accessories removed. These items will not be returned to the Owner. The removal unit for each size of conductor or cable is shown by the prefix I followed by D and the conductor or cable type; thus an I-D-6ACWC signifies the removal unit for 1,000 feet of 6A Copperweld-copper conductor.

d. Guys. All guys regardless of length, type of attachment, or size of guy strand are specified by the same unit; thus an I-E signifies the removal of any guy.

e. Anchors. Only anchor rods are to be removed by the Bidder in anchor removal units. The anchor will be left in the ground; thus an I-F signifies the removal of any anchor rod. If the rod cannot be unscrewed, the end of the rod shall either be cut off or bent down so that the rod will be at least 18 inches below ground.

f. Transformers. The unit for removal of transformer assembly units is divided into two sections, (1) Conventional Transformer Assembly, and (2) Self-Protected Transformer Assembly. Only one unit is specified for each type, and all sizes of transformers from 1 to 25 kVA within each group will be covered by the same unit. “Self-protected” refers to transformers where all protective equipment is mounted on or within the transformer. “Conventional” refers to transformers where protective equipment is mounted separately from the transformer. The unit is designated by the prefix I followed by the description of the unit to be removed; thus I-G Conventional signifies the removal of a conventional transformer assembly for any size transformer from 1 to 25 kVA.

g. Secondary Units. The unit for removal of secondary assemblies includes, in addition to the removal of the assembly itself, all necessary handling such as untying, resagging, and retying of secondary conductor or cables where existing service conductor or cable is to be reused. The following descriptions apply only to those removal units not sufficiently explicit:

Section N—New Assembly Units

The purpose of this section is to list complete new units of construction where such units are to be added to existing lines or installed in replacing lines.

The units as covered by this section are the same as the units described in Distribution Construction Units—New Construction, except that these units are prefixed by the letter N.

For example, an N40-6 unit covers the furnishing of all material and labor for the installation of a 40-6 pole either in an existing distribution line being operated by the Owner or in a new line being constructed to replace an existing distribution line being operated by the Owner.

The following descriptions apply only to those new units not sufficiently explicit:

### Section 1—Conductor Assembly Units

A conductor assembly unit consists of 1,000 feet of a single conductor or overhead ground wire, and includes tie wire, sleeves for splicing, and armor rods with clips or armor wire where necessary. The length of conductor or overhead ground wire shall be determined by taking the sum of all straight horizontal span distances between pole stakes or from center to center of the poles carrying the conductors. The conductor sizes and types listed are the manufacturer’s designation.

### Section 3—

As provided for in the specifications, prior to beginning of work the Bidder will furnish the Engineer the following data on tension equipment:

- Diameter Bull Wheel _____ in.
- Diameter Groove _____ in.
- Conductor Bending Radius _____ in.
- Thickness of Neoprene at Bottom of Groove _____ in.
- Stringing Sheave Diameter; Tangent _____ in., Large Angle _____ in.

### Section 4—Guy Assembly Units (TG Units)

A guy assembly unit consists of the hardware and wire. Guy guards are designated separately.

Section 7–Right-of-Way Clearing Units

TM–12. The unit is 1,000 feet in length and ____ (____) feet in width (to be measured from one side of pole line or centerline of structures) of actual clearing of right-of-way. This includes clearing of underbrush, tree removal, and such tree trimming as required so that the right-of-way, except for tree stumps which shall not exceed ____ in height, shall be clear from the ground up on one side of the line of poles carrying conductors. (See Detail A, Drawing TM–12A.) The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to the ground line. (See Detail B, Drawing TM–12–2A.) All trees and underbrush across the width of the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing. (See Detail C, Drawing TM–12–2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement. All length thus arrived at, added together and divided by 1,000 shall give the number of 1,000-foot TM–12 units of clearing. The Bidder shall not remove or trim shade, fruit, or ornamental trees unless so directed by the Engineer in writing. TM–12 (1). This unit is identical with TM–12, except the full width of the right-of-way to be cleared shall be ____ (____) feet wide (to be measured ____ (____) feet on each side of pole line or centerline of structures). (See Detail D, Drawing TM–12–2A.) TMC–12, TMC–12 (1). These units are identical to the respective TM units except that chemical treatment of stumps is required in addition to the clearing of underbrush, tree removal and tree trimming.

TM–13. The unit, for purpose of quoting, is 1,000 feet in length of clearing off the right-of-way. The Engineer will select those trees off the right-of-way that he deems to be a hazard to the line and will designate them to the Bidder in writing as danger trees. When so designated, the Bidder shall remove or top such trees at his option except that the Bidder shall trim and not remove shade, fruit, or ornamental trees unless otherwise directed by the Engineer in writing. (See Drawings TM–12–2A and TM–13 for examples of danger trees.)

The measurement of the length of clearing off the right-of-way shall be considered as a straight line parallel to the horizontal line between poles or centerline of structures, such measurement of length to be based on maximum dimension of foliage (not trunk) projected to the ground line. (See Details E, F, G, and H, Drawing TM–12–2A.) Dead trees having no foliage shall be measured across the maximum dimension and multiplied by two. (See Detail F, Drawing TM–12–2A.) Each tree so removed shall be added together to determine the total length of clearing. All length thus arrived at, added together and divided by 1,000, shall give the number of TM–13 units. (Example: Details E, F, G, and H, Drawing TM–12–2A, total .1 of a TM–13 unit.)

TM–14. The unit is 1,000 feet in length and ____ (____) feet in width (to be measured ____ (____) feet on one side of right-of-way centerline) of actual clearing of right-of-way. Trees and underbrush should be cleared from the ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide "undulating" boundaries. Low growing trees and brush are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the access road. The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to the ground line. (See Detail B, Drawing TM–12–2A.) All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM–12–2A.) Spaces along the right-of-way in which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

TM–14 (1). This unit is identical with TM–14 except the full width of the right-of-way to be cleared shall be ____ (____) feet in width (to be measured ____ (____) feet on one side of right-of-way centerline) of actual clearing of right-of-way. Trees and underbrush should be cleared from the ground up within 10 feet of any structure location. The Engineer will mark the trees and brush to be cleared to provide a "feathered" appearance in the right-of-way. Low growing trees and brush are to be
left in the right-of-way to the extent it will not be hazardous to the line or will not interfere with the access road.

The length of actual clearing shall be measured in a straight line parallel to the horizontal line between poles or centerline of structures and across the maximum dimension of foliage cleared projected to ground line (See Detail B, Drawing TM-12-2A). All trees and underbrush cleared across the right-of-way shall be considered to be grouped together as a single length in measuring the total length of clearing (See Detail C, Drawing TM-12-2A). Spaces along the right-of-way which no trees are to be removed or trimmed or underbrush cleared shall be omitted from the total measurement.

TM-15 (I). This unit is identical to TM-15 except the full width of the right-of-way to be cleared shall be _____ (_____) feet wide (See Detail D, Drawing TM-12-2A).

Additional Requirements (When specifying TM units denote type of disposal (A or B).

A. Trees, brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used):

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) ______

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Engineer but in no case shall it be required to be less than _____ (_____) feet. Brush, branches, and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used):

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (describe) ______

Proposal Summary

Recapitulation of Sections:

Section—1 $____
Section—2 _____
Section—3 _____
Section—4 _____
Section—5 _____
Section—6 _____
Total Transmission Line Construction ______

Section—Substation Assembly Units

Description of Construction Units. Each Construction Unit consists of a complete installation of the designated portion of a substation as specified on the drawings, together with connections to associated equipment. Each Construction Unit represents all labor and material including necessary accessories completely installed and tested in satisfactory operation. Full identification of each Construction Unit and all necessary specifications of the installation is shown on the drawings.

Items of material in each Construction Unit shall be of the designated size, rating, type, voltage, or other specification in accordance with the drawings. The bill of material drawing for each substation shows the identification of the Construction Units under which the material is to be installed and shows which items of material may be partly or entirely found on the lists of Owner-furnished materials. All items of equipment, unless otherwise specified, are mounted on a structure which shall be a Construction Unit of Group A.

Each Construction Unit is designated by the letter of the Group to which it belongs and an identifying number. The same item of equipment carries the same Construction Unit designation in all the substations. Items of equipment designated by the same Construction Unit in one substation are of only one kind as to voltage, type and other specifications. The tabulation of Construction units for each substation is separate and contains all units necessary for construction of that substation.

Group A. Structures. A Construction Unit consists of a structure, or structures, with bus supports including insulators and fittings, buses, conductors and overhead ground wires to adjacent structures within the substation, grounding material to connect equipment with the ground bus, and associated material including mounting brackets, supports for equipment, clamps and connectors, all as specified in the drawings.
Group B. Three-Pole Group Operated Air Break Switches. A Construction Unit consists of one 3-pole group operated air break switch with all accessories and operating mechanisms as specified in the drawings.

Group C. Lightning Arresters. A Construction Unit consists of one single arrester.

Group D. Single Pole Disconnecting Switches. A Construction Unit consists of one single pole disconnecting or by-pass switch as specified in the drawings. If a fuse disconnect switch is specified, the fuse is included with the switch.

Group E. Oil Circuit Breakers. A Construction Unit consists of one complete three-phase power circuit breaker complete with supporting frame and control cabinet, unless shown otherwise in the drawings, mounted as specified in the drawings.

Group F. Oil Circuit Reclosers. A Construction Unit consists of a complete single-phase or three phase oil circuit recloser as specified in the drawings.

Group G. Meters, Relays and Instrument Transformers. A Construction Unit consists of one meter, relay potential transformer or current transformer.

Group H. Transformers. A Construction Unit consists of one power transformer or one station service transformer either single-phase or three-phase as specified in the drawings.

Group I. Voltage Regulators. A Construction Unit consists of one single-phase or three-phase voltage regulator as specified in the drawings.

Group J. Communications and Supervisory Control Equipment. A Construction Unit consists of carrier current equipment, microwave, or other types of communications and supervisory control equipment as specified in the drawings.

Group K. Conduit and Cable. A Construction Unit consists of the wire, cable, conduit and accessories necessary to complete the installation of equipment in accordance with the specifications and drawings, where such installation has not been included in other Groups.

Group L. Foundations. A Construction Unit consists of concrete footings and foundations except for the fence, as specified in the drawings.

Group M. Site Preparation. A Construction Unit consists of clearing, grading, drainage work, and surfacing, as specified in the drawings.

Group N. Fence. A Construction Unit consists of the complete installation of the fence, gates, etc., as specified in the drawings.

Group O. Station Grounding. A Construction Unit consists of the complete ground bus including ground rods, grounding mats or platforms, except as otherwise provided in other Groups, with connections to structures, equipment, and fence as specified in the drawings.

Group P. Building. A Construction Unit consists of a control building or cabinet, on a foundation of Group L and the facilities and equipment installed therein as specified in the drawings, except as otherwise provided in other Groups.

Other Groups. The Engineer shall specify such additional Groups as may be necessary for the completion of the Project. Description of these Groups shall be provided by an addition to this Section of the Specifications for Construction.

The Owner hereby accepts the foregoing Proposal of the Bidder, for the construction of the following:

Distribution Construction Units: Sections:

Substation and Switching Station Construction: Stations (name): ______

By ______ President

Secretary

Date of Contract

[End of clause]
part. This form refers to guide drawings, which do not contain requirements, and, hence, are not included in this part. The guide drawings are included in the printed form available from GPO (See §1726.300).

**Electric Transmission Construction Contract (Labor and Materials)**

Notice and Instructions to Bidders

1. Sealed proposals for the construction, including the supply of necessary labor, materials and equipment, of a rural electric project, of a rural electric project (hereinafter called the "Owner") to be known as Project will be received by the Owner on or before [date], 19 o'clock M., 19 at its office at [location], at which time and place the proposals will be publicly opened and read. Any proposal received subsequent to the time specified will be promptly returned to the Bidder unopened.

2. Description of Project: The Project will consist of approximately:

- Transmission Line Construction
  - miles kV;
  - miles kV underbuild

- Substations and Other Major Facilities
  - kVA Voltage Name

The Project is located in [counties] of [State], all as more fully described in the Plans, Specifications, Construction Drawings, and Contract's Proposal. The Owner therefore hereinafter referred to.

3. Owner Furnished Materials. The unit prices in the Contractor's Proposal shall include provisions for Owner Furnished Materials since as stated in Article 1, Section 3 of the Contractor's Proposal, the value of the Owner Furnished Materials, if any, will be deducted from payments to the Bidder for completed Construction Units.

4. Obtaining Documents. The Plans, Specifications, and Construction Drawings together with all necessary forms and other documents for bidders may be obtained from the Owner, or from the Engineer, at the latter's office at [date] upon the payment of a fee which payment will not be subject to refund. The Plans, Specifications, and Construction Drawings may be examined at the office of the Owner or at the office of the Engineer. A copy of the Loan Contract (if the Project is to be financed, in whole or in part, pursuant to a loan contract) between the Owner and the United States of America acting through the Administrator of the Rural Utilities Service (hereinafter called the Administrator) and of the loan contract between the Owner and any other lender may be examined at the office of the Owner. Each set of Plans, Specifications, and Construction Drawings will have a serial number, given by the Engineer, and the number of each set with the name of the Purchaser will be recorded by the Engineer. Bids will be accepted only from the original purchaser.

5. Manner of Submitting Proposals. Proposals and all supporting instruments must be submitted on the forms furnished by the Owner and must be delivered in a sealed envelope addressed to the Owner. The name and address of the Bidder, its license number if a license is required by the State, and the date and hour of the opening of bids must appear on the envelope in which the Proposal is submitted. Proposals must be filled in in ink or typewritten. No alterations or interlinearations will be permitted, unless made before submission, and initialed and dated.

6. Familiarity with Conditions. Prior to the submission of the Proposal the Bidder shall make and shall be deemed to have made a careful examination of the site of the Project and of the Plans, Specifications, Construction Drawings, and forms of Contractor's Proposal and Contractor's Bond on file with the Secretary of the Owner and with the Engineer, and shall become informed as to the location and nature of the proposed construction, the transportation facilities, the kind and character of soil and terrain to be encountered, the kind of facilities required before and during the construction of the Project, general local conditions and all other matters that may affect the cost and the time of completion of the Project. Bidders will be required to comply with all applicable statutes, regulations, etc., including those pertaining to the licensing of contractors, and the so-called "Kickback Statute" (48 Stat. 948) and regulations issued pursuant thereto.

7. Proposals will be accepted only from those prequalified bidders invited by the Owner to submit a proposal.

8. Alternate Designs. The Owner reserves the right to confine its consideration of the several bids to one type of design regardless of alternate types of design which may be specified in the Plans and Specifications and offered in the Proposals.

9. The Time for Completion of Construction of the Project shall be as specified by the Owner in the Proposal.

10. Bid Bond. Each Proposal must be accompanied by a Bid Bond in the form attached or a certified check on a bank that is a member of the Federal Deposit Insurance Corporation, payable to the order of the Owner, in an amount equal to ten percent (10%) of the maximum bid price. Each Bidder agrees, provided its Proposal is one of the three low Proposals, that, by filing its Proposal together with such Bid Bond or check in consideration of the owner's receiving and considering such Proposals, said Proposal shall be firm and binding upon each such
Bidder and such Bid Bond or check shall be held by the Owner until a Proposal is accepted and a satisfactory Contractor's Bond is furnished (where required) by the successful Bidder and such acceptance has been approved by the Administrator, or for a period not to exceed sixty (60) days from the date hereinafter set for the opening of Proposals, whichever shall be the shorter. If such Proposal is not one of the three low Proposals, the Bid Bond or check will be returned in each instance within a period of ten (10) days to the Bidder furnishing same.

11. Contractor's Bond. The successful Bidder will be required to execute two additional counterparts of the Proposal and, for a Contract in excess of $100,000, furnish a Contractor's Bond in triplicate in the form attached hereto with sureties listed by the United States Treasury Department as Acceptable Sureties, in a penal sum not less than the contract price.

12. Failure to Furnish Contractor's Bond. Should the successful Bidder fail or refuse to execute such counterparts or to furnish a Contractor's Bond (where required) within ten (10) days after written notification of the acceptance of the Proposal by the Owner, the Bidder shall be considered to have abandoned the Proposal. In such event, the Owner shall be entitled (a) To enforce the Bid Bond in accordance with its terms, or (b) if a certified check has been delivered with the Proposal, to retain from the proceeds of the certified check, the difference (not exceeding the amount of the certified check) between the amount of the Proposal and such larger amount for which the Owner may in good faith contract with another party to construct the Project. The term "Successful Bidder" shall be deemed to include any Bidder whose Proposal is accepted after another Bidder has previously refused or has been unable to execute the counterparts or to furnish a satisfactory Contractor's Bond (where required).

13. Contract is Entire Agreement. The Contract to be effected by the acceptance of the Proposal shall be deemed to include the entire agreement between the parties thereto, and the Bidder shall not claim any modification thereof resulting from any representation or promise made at any time by any officer, agent or employee of the Owner or by any other person.

14. Minor Irregularities. The Owner reserves the right to waive minor irregularities or minor errors in any Proposal, if it appears to the Owner that such irregularities or errors were made through inadvertence. Any such irregularities or errors so waived must be corrected on the Proposal in which they occur prior to the acceptance thereof by the Owner.

15. Balanced Bid. The Owner reserves the right to reject any or all Proposals. The attention of Bidders is specially called to the desirability of a proper balance between prices for labor and materials and between the total prices for the respective Construction Units. Lack of such balance may be considered as a reason for rejecting a Proposal.

16. Discrepancy in Unit Prices. Where the unit prices in the Contractor's Proposal are separated into three columns designated as "Labor," "Materials," and "Labor and Materials," and where a discrepancy appears between the sums shown in the "Labor and Materials" column and the correct addition of the sums appearing in the "Labor" column and the "Materials" column, the correct addition of the sums appearing in the Labor" column and the "Materials" column shall control.

17. Definition of Terms. The terms "Administrator," "Engineer," "Supervisor," "Project," "Completion of Construction," and "Completion of the Project" as used throughout this Contract shall be as defined in Article VI, Section 1, of the Contractor's Proposal.

18. The Owner Represents:

a. If by provisions of the Contractor's Proposal the Owner shall have undertaken to furnish any materials for the construction of the Project, such materials are on hand at locations specified or if such materials are not on hand they will be made available by the Owner to the successful Bidder at the locations specified before the time such materials are required for construction.

b. All easements and rights-of-way, except as shown on maps included in the Plans and Specifications, have been obtained from the owners of the properties across which the Project is to be constructed (including tenants who may reasonably be expected to object to such construction). The remaining easements and rights-of-way, if any, will be obtained as required to avoid delay in construction.

c. All staking, except as shown on the maps included in the Plans and Specifications, has been completed and sufficient staking crews will be available to maintain stakes at all times in advance of construction.

d. Prompt payment for the construction of the Project will be made with funds pursuant to the Loan Contract, or with funds otherwise available to the Owner.

If the Owner shall fail to comply with any of the undertakings contained in the foregoing representations or if any of such representations shall be incorrect, the Bidder will be entitled to an extension of time of completion for a period equal to the delay, if any, caused by the failure of the Owner to comply with such undertakings or by any such incorrect representation; provided the Bidder shall have promptly notified the Owner in writing of its desire to extend the time of completion in accordance with the

</table>

(Engineer to insert Type, Size and Galvaniz-

Class as appropriate)

The Bidder further agrees to furnish and use poles, crossarms, and other timber prod-

ucts, of which the physical characteristics,

method of treatment, type of preservative, instructions on inspection and general proce-

dure shall be in accordance with RUS stan-

ards and requirements.

Crossarms shall be (Engineer to in-

sert Douglas Fir or Southern Yellow Pine),

(Engineer to insert type of preservative.)
that a Contractor's License is required, and if required it possesses Contractor's License No. , for the State of which the Project is located and said license expires on __________. 

Section 9. The Bidder warrants that this Proposal is made in good faith and without collusion or connection with any person or persons bidding for the same work.

Section 10. The Bidder warrants that it possesses adequate financial resources and agrees that in the event this Proposal is accepted and a Contractor’s Bond is required, it will furnish a Contractor’s Bond in the form attached hereto, in a penal sum not less than the maximum Contractor price, with a surety or sureties listed by the United States Treasury Department as Acceptance Sureties.

In the event that the surety or sureties on the performance bond delivered to the Owner contemporaneously with the execution of the Contract or on any bond or bonds delivered in substitution therefor or in addition thereto at any time become unsatisfactory to the Owner or the Administrator, the Bidder agrees to deliver to the Owner another or an additional bond.

Section 11. Taxes. The unit prices for Construction Units in this Proposal include provisions for the payment of all monies which will be payable by the Bidder or the Owner in connection with the construction of the Project on account of taxes imposed by any taxing authority upon the sale, purchase or use of materials, supplies and equipment, or services or labor of installation thereof, to be incorporated in the Project as part of such Construction Units. The Bidder agrees to pay all such taxes, except taxes upon the sale, purchase or use of owner-furnished materials and it is understood that, as to owner-furnished materials, the values stated in the attached “List of Owner’s Materials for the State of Hand” and “List of Materials Ordered by Owner But Not Delivered” include taxes upon the sale, purchase or use of owner-furnished materials, if applicable. The Bidder will furnish to the appropriate taxing authorities all required information and reports pertaining to the Project, except as to the owner-furnished materials.

Section 12. Changes in Quantities. The Bidder understands and agrees that the quantities called for in this Proposal are approximate and that the total number of units upon which payment shall be made shall be set forth in the Invoices. If the Owner changes the quantity of any Assembly Unit or Assembly Units specified in this Proposal by more than 15%, and the materials cost to the Bidder is increased thereby to an extent which would not be adequately compensated by application of the unit prices in this Proposal to the revised quantity of such unit or units, such change, to the extent of the quantities of such units in excess of such 15%, shall be regarded as a change in the construction within the meaning of Article II, Section 1(d) of this proposal.

Section 13. Description of Contract. The Notice and Instructions to Bidders, Plans, Specifications for Construction and Construction Drawings, all attached hereto and made a part hereof together with the Proposal and Acceptance constitute the contract. The Plans and Construction Drawings are identified as follows: _______.

Article II—Construction

Section 1. Time and Manner of Construction

a. The Bidder agrees to commence construction of the Project on a date (hereinafter called the “Commencement Date”) which shall be determined by the Engineer after notice in writing of approval of the Contract by the Administrator and notice in writing from the Bidder that the Bidder has sufficient materials to warrant commencement and continuation of construction, but in no event will the Commencement Date be later than ________ calendar days after date of approval of the Contract by the Administrator. The Bidder further agrees to prosecute diligently and to complete construction in strict accordance with the Plans, Specifications, Construction Drawings within ________ (______) calendar days (excluding Sundays) after Commencement Date. Provided, however, that the Bidder will not be required to dig holes, set poles or install anchors if there are more than six (6) inches of frost in the ground nor to perform any construction on such days when in the judgment of the Engineer snow, rain, or wind, or the results of snow, rain, or frost make it impracticable to perform any operation of construction and to the extent of the time lost due to the conditions described herein and approved in writing by the Engineer, the time of completion set out above will be extended if the Bidder makes a written request therefor to the Owner as provided in subsection b of this Section 1.

b. The time for Completion of Construction shall be extended for the period of any reasonable delay which is due exclusively to causes beyond the control and without the fault of the Bidder, including Acts of God, fires, floods, inability to obtain materials and acts or omissions of the Owner with respect to matters for which the Owner is solely responsible. Provided, however, that no such extension of time for completion shall be granted the Bidder unless within ten (10) days after the happening of any event relied upon by the Bidder for such an extension of time the Bidder shall have made a request therefor in writing to the Owner, and provided further that no delay in such time of completion or in the progress of the work which results from any of the above causes except acts or omissions of the Owner, shall result in any liability on the part of the Owner.

c. The sequence of construction shall be as set forth below, the numbers or names being the designations of extensions or areas (hereinafter called the “Sections”) corresponding to the numbers or names shown on the maps attached hereto, or if no Sections are set forth below, the sequence of construction shall be as determined by the Bidder, subject to the approval of the Engineer.

d. The Owner, acting through the Engineer and with the approval of the Administrator, may from time to time during the progress of the construction of the Project make such changes in, additions to or subtractions from the Plans, Specifications, Construction Drawings, List of Materials and sequence of

1As long as the total price of this contract including all amendments is less than 120 percent of the original contract price as stated in the acceptance hereto, amendments executed on RUS Form 238 are not subject to the approval of the Administrator. Whenever an amendment to this contract causes the total amended contract to exceed 120 percent of the original contract price, that amendment and all subsequent amendments to this contract shall be made subject to the approval of the Administrator.
construction provided for in the previous paragraph which are part of the Contractor’s Proposal as conditions may warrant: Provided, however, that if any change in the construction to be done shall require an extension of time, a reasonable extension will be granted if the Bidder shall make a written request therefor to the Owner within ten (10) days after any such change is made. And provided further, that if the cost to the Bidder of construction of the Project shall be materially increased by any such change or addition, the Owner shall pay the Bidder for the reasonable cost thereof in accordance with a Construction Contract Amendment signed by the Owner and the Bidder and approved by the Administrator; but no claim for additional compensation for any such change or addition will be considered unless the Bidder shall have made a written request therefor to the Owner prior to the commencement of work in connection with such change or addition.

The Bidder will not perform any work hereunder on Sundays unless there is urgent need for such Sunday work and the Owner consents thereto in writing. The time for completion specified in subsection a of this Section 1 shall not be affected in any way by inclusion of this subsection nor by the Owner’s consent or lack of consent to Sunday work hereunder.

Section 2. Environmental Protection. The Bidder shall perform work in such a manner as to maximize preservation of beauty, conservation of natural resources and minimize marring and scarring of the landscape and silting of streams. The Bidder shall not deposit trash in streams or waterways, and shall not deposit herbicides or other chemicals or their containers in or near streams, waterways or pastures. The Bidder shall follow, under the general direction of the Engineer, the criteria relating to environmental protection as specified herein by the Engineer.

Section 3. The Bidder agrees that in the event this Proposal is accepted it will make available for use in connection with the proposed construction all necessary tools and equipment and qualified superintendents and foremen.

Section 4. Changes in Construction. The Bidder agrees to make such changes in construction previously installed in the Project by the Bidder as required by the Owner for prices arrived at as follows:

b. For all other units, the compensation for such change shall be the reasonable cost thereof as agreed upon by the Bidder and the Owner prior to the commencement of work in connection with such change, but in no event shall it exceed two (2) times the labor price quoted in the Proposal for the installation of the unit to be changed. Such compensation shall be in lieu of any other payment for the installation and removal of the original unit. (If a new or replacing unit is installed, payment for such new or replacing unit shall be made as shown in the final inventory.)

No payment shall be made to the Bidder for materials or labor involved in correcting errors or omissions on the part of the Bidder which result in construction not in accordance with the Plans and Specifications.

Section 5. Construction Not in Proposal. The Bidder also agrees that when it is necessary to construct units not shown in the Proposal it will construct such units for a price arrived at as follows:

a. The cost of materials shall be determined by the invoices.

b. The cost of labor shall be the reasonable cost thereof, but in no event shall it exceed an amount determined by calculating the ratio of the total labor costs to the total material costs in the section of the Proposal involved, and multiplying the cost of materials for the unit in question by this ratio.

Section 6. Supervision and Inspection.

a. The Bidder shall cause the construction work on the Project to receive constant supervision by a competent superintendent (hereinafter called the “Superintendent”) who shall be present at all times during working hours where construction is being carried on. The Bidder shall also employ, in connection with the construction of the Project, capable, experienced and reliable foremen and such skilled workmen as may be required for the various classes of work to be performed. Directions and instructions given to the Superintendent shall be binding upon the Bidder.

b. The Owner reserves the right to require the removal from the Project of any employee of the Bidder if in the judgment of the Owner such removal shall be necessary in order to protect the interest of the Owner. The Owner or the Supervisor, if any, shall have the right to require the Bidder to increase the number of its employees and to increase or change the amount or kind of tools and equipment if at any time the progress of the work shall be unsatisfactory to the Owner or Supervisor; but the failure of the Owner or Supervisor to give any such directions shall not relieve the Bidder of its obligations to complete the work within the time and in the manner specified in this Proposal.
c. The manner of construction of the Project, and all materials and equipment used therein, shall be subject to the inspection, tests and approval of the Owner and the Administrator. The Bidder shall furnish all information required by the Owner or by the Administrator concerning the nature or source of any materials incorporated or to be incorporated in the Project. The Owner and the Administrator shall have the right to inspect all payrolls, invoices of materials, and other data and records of the Bidder and of any subcontractor, relevant to the construction of the Project. The Bidder shall provide all reasonable facilities necessary for such inspection and tests and shall maintain an office at the site of the Project, with telephone service where obtainable and at least one office employee to whom directions and instructions of the Owner may be delivered. Delivery of such directions or instructions in writing to the employee of the Bidder at such office shall constitute delivery to the Owner. The Bidder shall have an authorized agent accompany the Engineer when final inspection is made and, if requested by the Owner, when any other inspection is made.

d. In the event that the Owner, or the Administrator, shall determine that the construction contains or may contain numerous defects, it shall be the duty of the Bidder and the Bidder’s Surety or Sureties, if any, to have an inspection made by an engineer approved by the Owner and the Administrator for the purpose of determining the exact nature, extent and location of such defects.

e. The Engineer may recommend to the Owner that the Bidder suspend the work wholly or in part for such period or periods as the Engineer may deem necessary due to unsuitable weather or such other conditions as are considered unfavorable for the satisfactory prosecution of the work or because of the failure of the Bidder to comply with any of the provisions of this Contract: Provided, however, that the Bidder shall not suspend work pursuant to this provision without written authority from the Owner so to do. The time of completion hereinafter set forth shall be increased by the number of days of any such suspension, except when such suspension is due to the failure of the Bidder to comply with any of the provisions of this Contract. In the event that work is suspended by the Bidder with the consent of the Owner, the Bidder before resuming work shall give the Owner at least twenty-four (24) hours notice thereof in writing.

Section 7. Defective Materials and Workmanship.

a. The acceptance of any materials, equipment (except owner-furnished materials) or any workmanship by the Owner or the Engineer shall not preclude the subsequent rejection thereof if such materials, equipment, or workmanship shall be found to be defective after delivery or installation, and any such materials, equipment or workmanship found defective before final acceptance of the construction shall be replaced or remedied, as the case may be, by and at the expense of the Bidder. Any such condemned material or equipment shall be immediately removed from the site of the Project by the Bidder at the Bidder’s expense. The Bidder shall not be entitled to any payment hereunder so long as any defective materials, equipment or workmanship in respect to the Project, of which the Bidder shall have had notice, shall not have been replaced or remedied, as the case may be.

b. Notwithstanding any certificate which may have been given by the Owner or the Engineer, if any materials, equipment (except owner-furnished materials) or any workmanship which does not comply with the requirements of this Contract shall be discovered within one (1) year after Completion of Construction of the Project, the Bidder shall replace such defective materials or equipment or remedy any such defective workmanship within thirty (30) days after notice in writing of the existence thereof shall have been given by the Owner. If the Bidder shall be called upon to replace any defective materials or equipment or to remedy defective workmanship as herein provided, the Owner, if so requested by the Bidder shall deenergize that section of the Project involved in such work. In the event of failure by the Bidder so to do, the Owner may replace such defective materials or equipment or remedy such defective workmanship, as the case may be, and in such event the Bidder shall pay to the Owner the cost and expense thereof.

Article III—Payments and Release of Liens

Section 1. Payments to Bidder.

a. Within the first fifteen (15) days of each calendar month, the Owner shall make partial payment to the Bidder for construction accomplished during the preceding calendar month on the basis of completed Assembly Units furnished and certified to by the Bidder, recommended by the Engineer and approved by the Owner solely for the purpose of payment: Provided, however, that such approval shall not be deemed approval of the workmanship or materials. Only ninety percent (90%) of each such estimate approved during the construction of the Project shall be paid by the Owner to the Bidder prior to Completion of the Project: Provided, however, that at any time after work, which, in the sole determination of the Engineer, amounts to fifty percent (50%) of the Maximum Contract Price has been completed, the Owner may elect, in lieu of paying ninety percent (90%) of each such subsequent estimate, to pay each such subsequent estimate in full. Upon completion by the Bidder of the construction of the Project, the Engineer

§ 1726.352
§ 1726.352

will prepare a Final Inventory of the Project showing the total number and character of Assembly Units and, after checking such Inventory with the Bidder, will certify it to the Owner, together with a certificate of the total cost of the construction performed. Upon the approval of such certificates by the Owner and the Administrator, the Owner shall make payment to the Bidder of all amounts to which the Bidder shall be entitled thereunder which shall not have been paid: Provided, however, that such final payment shall be made not later than ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, unless withheld because of the fault of the Bidder.

b. The Bidder shall be paid on the basis of the number of Construction Units actually installed at the direction of the Owner shown by the inventory based on the staking sheets or structure lists; Provided, however, that the total cost shall not exceed the maximum Contract price for the construction of the Project as set forth in the Acceptance, unless such excess shall have been approved in writing by the Administrator.

c. Notwithstanding the provisions of Section 1a above, the Bidder may, by giving written notice thereof to the Owner, elect to receive payment in full for any Section of the Project upon:

(1) completion of construction of such Section as certified by the Engineer and approved by the Owner and the Administrator; (2) submission to the Owner and the Administrator of the releases of lien and the certificate referred to in Section 2 hereof; (3) approval by the Owner and the Administrator of the inventory in respect of such Section; and (4) submission to the Owner and the Administrator of the consent in writing by the Surety or Sureties, if any, on the Contractor’s Bond to payment in full for such Section prior to Completion of the Project.

If no Sections are designated in Article II, Section 1c, the term “Section” shall mean for purposes of this subsection c and Article IV, Section 3b only, a part of the Project as designated by the Owner which represents at least twenty-five percent (25%) of the maximum Contract price as stated in Article III, Section 1, and which is capable of being energized and operated by the Owner.

d. Interest at the rate of ___ percent (___) per annum shall be paid by the Owner to the Bidder on all unpaid balances due on monthly estimates, commencing fifteen (15) days after the due date; provided the delay in payment beyond the due date is not caused by any condition within the control of the Bidder. The due date for purposes of such monthly payment shall be the fifteenth day of each calendar month provided (1) the Bidder on or before the fifth day of such month shall have submitted its certification of Construction Units completed during the preceding month and (2) the Owner on or before the fifteenth day of such month shall have approved such certification. If, for reasons not due to the Bidder’s fault, such approval shall not have been given on or before the fifteenth day of such month, the due date for purposes of this subsection d shall be the fifteenth day of such month notwithstanding the absence of the approval of the certification.

e. Interest at the rate of ___ percent (___) per annum shall be paid by the Owner to the Bidder on the final payment for the Project or any completed Section thereof, commencing fifteen (15) days after the due date. The due date for purposes of such final payment shall be the date of approval by the Administrator of all of the documents requiring such approval, as a condition precedent to the making of final payment, or ninety (90) days after the date of Completion of Construction of the Project, as specified in the Certificate of Completion, whichever date is earlier.

f. No payment shall be due while the Bidder is in default in respect of any of the provisions of this Contract and the Owner may withhold from the Bidder the amount of any claim by a third party against the Bidder or the Owner based upon an alleged failure of the Bidder to perform the work hereunder in accordance with the provisions of this Contract.

Section 2. Release of Liens and Certificate of Contractor. (See sample RUS Form 224, Waiver and Release of Lien and sample RUS Form 231, Certificate of Contractor.) Upon the completion by the Bidder of the Project (or any Section thereof if the Bidder shall elect to receive payment in full for any Section when completed as provided above) but prior to final payment to the Bidder, the Bidder shall deliver to the Owner, in duplicate, releases of all liens and of rights to claim any lien, in the form attached hereto from all manufacturers, materialmen, and subcontractors furnishing services or materials for the Project or such Section and a certificate in the form attached hereto to the effect that all labor used on or for the Project or such Section has been paid and that all such releases have been submitted to the Owner for approval.

Section 3. Payments to Materialmen and Subcontractors. The Bidder shall pay each materialman, and each subcontractor, if any,

4See Footnote 1.

5The Owner shall insert a rate equal to the lowest “Prime Rate” listed in the “Money Rates” section of the Wall Street Journal on the date such invitation to bid is issued.

6See Footnote 5.
within five (5) days after receipt of any payment from the Owner, the amount thereof allowed the Bidder for and on account of materials furnished or construction performed by each materialman or each subcontractor.

Article IV—Particular Undertakings of the Bidder

Section 1. Protection to Persons and Property. The Bidder shall at all times take all reasonable precautions for the safety of employees on the work and of the public, and shall comply with all applicable provisions of Federal, State, and Municipal safety laws and building and construction codes, as well as the safety rules and regulations of the Owner and/or the Association of General Contractors of America unless such instructions are incompatible with Federal, State, or Municipal laws or regulations.

The following provisions shall not limit the generality of the above requirements:

1. The Bidder shall at no time and under no circumstances cause or permit any employee of the Bidder to perform any work upon energized lines, or upon poles carrying energized lines, unless otherwise specified in the Notice and Instructions to Bidders.

2. The Bidder shall so conduct the construction of the Project as to cause the least possible obstruction of public highways.

3. The Bidder shall provide and maintain all such guard lights and other protection for the public as may be required by applicable statutes, ordinances and regulations or by local conditions.

4. The Bidder shall do all things necessary or expedient to properly protect any and all parallel, converging and intersecting lines, joint line poles, highways and any and all property of others from damage, and in the event that any such parallel, converging and intersecting lines, joint line poles, highways or other property are damaged in the course of the construction of the Project the Bidder shall at its own expense restore any or all of such damaged property immediately to as good a state as before such damage occurred.

5. Where the right-of-way of the Project traverses cultivated lands, the Bidder shall limit the movement of its crews and equipment so as to cause as little damage as possible to crops, orchards or property and shall endeavor to avoid marring the lands. All fences which are necessarily opened or moved during the construction of the Project shall be replaced in as good condition as they were found and precautions shall be taken to prevent the escape of livestock. The Bidder shall not be responsible for loss of or damage to crops, orchards or property (other than livestock) on the right-of-way necessarily incident to the construction of the Project and not caused by negligence or inefficient operation of the Bidder. The Bidder shall be responsible for all other loss of or damage to crops, orchards, or property, whether on or off the right-of-way, and for all loss of or damage to livestock caused by the construction of the Project. The right-of-way for purposes of this said section shall consist of an area extending 10 feet on both sides of the center line of the poles along the route of the Project lines, plus such area reasonably required by the Bidder for access to the route of the Project lines from Public roads to carry on construction activities.

6. The Project, from the commencement of work to completion, or to such earlier date or dates when the Owner may take possession and control in whole or in part as hereinafter provided shall be under the charge and control of the Bidder and during such period of control by the Bidder all risks in connection with the construction of the Project and the materials to be used therein shall be borne by the Bidder. The Bidder shall make good and fully repair all injuries and damages to the Project or any portion thereof under the control of the Bidder by reason of any Act of God or other casualty or cause whether or not the same shall have occurred by reason of the Bidder's negligence.

(i) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all claims, causes of action, losses, liabilities, and expenses (including reasonable attorney's fees) for personal loss, injury, or death to persons (including but not limited to Bidder's employees) and loss, damage to or destruction of Owner's property or the property of any other person or entity (including but not limited to Bidder's property) in any manner arising out of or connected with the Contract, or the materials or equipment supplied or services performed by Bidder, its subcontractors and suppliers of any tier. But nothing herein shall be construed as making Bidder liable for any injury, death, loss, damage, or destruction caused by the sole negligence of Owner.

(ii) To the maximum extent permitted by law, Bidder shall defend, indemnify, and hold harmless Owner and Owner's directors, officers, and employees from all liens and claims filed or asserted against Owner, its directors, officers, and employees, or Owner's property or facilities, for services performed or materials or equipment furnished by Bidder, its subcontractors and suppliers of any tier, and from all losses, demands, and causes of action arising out of any such lien or claim. Bidder shall promptly discharge or remove any such lien or claim by bonding, payment, or otherwise and shall notify Owner promptly when it has done so. If Bidder does not cause such lien or claim to be discharged or released by payment, bonding, or otherwise, Owner shall have the right (but shall not be
§ 1726.352 7 CFR Ch. XVII (1-1-98 Edition)

(b) The Bidder shall provide to Owner's satisfaction evidence of Bidder's ability to comply with the indemnification provisions of subsections "ii" and "iii" above, which evidence may include but may not be limited to a bond or liability insurance policy obtained for this purpose through a licensed surety or insurance company.

g. Any and all excess earth, rock, debris, underbrush and other useless material shall be removed by the Bidder from the site of the Project as rapidly as practicable as the work progresses.

h. Upon violation by the Bidder of any of the provisions of this Section, after written notice of such violation given to the Bidder by the Engineer or the Owner, the Bidder shall immediately correct such violation. Upon failure of the Bidder so to do the Owner may correct such violation at the Bidder's expense: Provided, however, that the Owner may, if it deems it necessary or advisable, correct such violation at the Bidder's expense without such prior notice to the Bidder.

i. The Bidder shall submit to the Owner monthly reports in duplicate of all accidents, giving such data as may be prescribed by the Owner.

j. The Bidder shall not proceed with the cutting of trees or clearing of right-of-way without written notification from the owner that proper authorization has been received from the owner of the property, and the Bidder shall promptly notify the Owner whenever any landowner objects to the trimming or felling of any trees or the performance of any other work on its land in connection with the Project and shall obtain the consent in writing of the Owner before proceeding in any such case.

Section 2. Insurance. The Bidder shall take out and maintain throughout the period of this Agreement the following types and minimum amounts of insurance:

a. Workers' compensation and employers' liability insurance as required by law, covering all their employees who perform any of the obligations of the contractor, engineer, and architect under the contract. If any employer or employee is not subject to the workers' compensation laws of the governing state, then insurance shall be obtained voluntarily to extend to the employer and employee coverage to the same extent as though the employer or employee were subject to the workers' compensation laws.

b. Public liability insurance covering all operations under the contract shall have limits for bodily injury or death of not less than $1 million each occurrence, limits for property damage of not less than $1 million for each occurrence, and $1 million aggregate for accidents during the policy period. A single limit of $1 million of bodily injury and property damage is acceptable. This required insurance may be in a policy or policies of insurance, primary and excess including umbrella or catastrophe form.

c. Automobile liability insurance on all motor vehicles used in connection with the contract, whether owned, nonowned, or hired, shall have limits for bodily injury or death of not less than $1 million per person and $1 million for each occurrence, and property damage limits of $1 million for each occurrence. This required insurance may be in a policy or policies of insurance, primary and excess including the umbrella or catastrophe form.

The Owner shall have the right at any time to require public liability insurance and property damage liability insurance greater than those required in subsections "b" and "c" of this Section. In any such event, the additional premium or premiums payable solely as the result of such additional insurance shall be added to the Contract price.

The Owner shall be named as Additional Insured on all policies of insurance required in subsections "b" and "c" of this Section.

The policies of insurance shall be in such form and issued by such insurer as shall be satisfactory to the Owner. The Bidder shall furnish the Owner a certificate evidencing compliance with the foregoing requirements which shall provide not less than (30) days prior written notice to the Owner of any cancellation or material change in the insurance.

Section 3. Delivery of Possession and Control to Owner.

a. Upon written request of the Owner the Bidder shall deliver to the Owner full possession and control of any portion of the Project provided the Bidder shall have been paid at least ninety percent (90%) of the cost of construction of such portion. Upon such delivery of the possession and control of any portion of the Project to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section 1f hereof with respect to such portion of the Project so delivered to the Owner shall be terminated: Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials and workmanship as contained in Article II, Section 6 hereof.

b. Where the construction of a Section as hereinbefore defined in Article II, Section 1c and Article III, Section 1c shall have been completed by the Bidder, the Owner agrees, after receipt of a written request from the Bidder, to accept delivery of possession and control of such Section upon the issuance by the Engineer of a written statement that the Section has been inspected and found acceptable by the Engineer. Upon such delivery of
the possession and control of any such Section to the Owner, the risk and obligations of the Bidder as set forth in Article IV, Section II hereof with respect to such Section so declared. Provided, however, that nothing herein contained shall relieve the Bidder of any liability with respect to defective materials or workmanship as contained in Article II, Section II hereof.

Section 4. Energizing the Project.

a. Prior to Completion of the Project the Owner, upon written notice to the Bidder, may test the construction thereof by temporarily energizing any portion or portions thereof. During the period of such test the portion or portions of the Project so energized shall be considered as within the possession and control of the Owner and governed by the provisions of Section 3 of this Article. Upon written notice to the Bidder by the Owner of the completion of such test and upon deenergizing the lines involved therein said portion, or portions of the Project shall be considered as returned to the possession and control of the Bidder unless the Owner shall elect to continue possession and control in the manner provided in Section 3 of this Article.

b. The Owner shall have the right to energize permanently any portion or portions of the Project delivered to its possession and control pursuant to the provisions of Section 3 of this Article.

Section 5. Assignment of Guarantees. All guarantees of materials and workmanship running in favor of the Bidder shall be transferred and assigned to the Owner prior to the time the Bidder receives final payment.

Article V—Remedies

Section 1. Completion on Bidder’s Default.

If default shall be made by the Bidder or by any subcontractor in the performance of any of the terms of this Proposal, the Owner, without in any manner limiting its legal and equitable remedies in the circumstances, may serve upon the Bidder and the Surety or Sureties, if any, upon the Contractor’s Bond or Bonds a written notice requiring the Bidder to cause such default to be corrected or arranged for the correction thereof satisfactory to both the Owner and the Administrator shall be made by the Bidder or its Surety or Sureties, if any, the Owner may take over the construction of the Project and prosecute the same to completion by Contract or otherwise for the account and at the expense of the Bidder, and the Bidder and its Surety or Sureties, if any, shall be liable to the Owner for any cost or expense in excess of the Contract price occasioned thereby. In such event the Owner may take possession of and utilize, in completing the construction of the Project, any materials, tools, supplies, equipment, appliances, and plant belonging to the Bidder or any of its subcontractors, which may be situated at the site of the Project. The Owner in such contingency may exercise any rights, claims or demands which the Bidder may have against third persons in connection with this Contract and for such purpose the Bidder does hereby assign, transfer and set over unto the Owner all such rights, claims and demands.

Section 2. Liquidated Damages. The time of the Completion of Construction of the Project is of the essence of the Contract. Should the Bidder neglect, refuse or fail to complete the construction within the time herein agreed upon, after giving effect to extensions of time, if any, herein provided, then, in that event and in view of the difficulty of estimating with exactness damages caused by such delay, the Owner shall have the right to deduct from and retain out of such moneys which may be then due, or which may become due and payable to the Bidder the sum of _____ dollars (____) per day for each and every day that such construction is delayed in its completion beyond the specified time, as liquidated damages and not as a penalty; if the amount due and to become due from the Owner to the Bidder is insufficient to pay in full any such liquidated damages, the Bidder shall pay to the Owner the amount necessary to effect such payment in full; Provided, however, that the Owner shall promptly notify the Bidder in writing of the manner in which the amount retained, deducted or claimed as liquidated damages was computed.

Section 3. Cumulative Remedies. Every right or remedy herein conferred upon or reserved to the Owner or the Government or the Administrator shall be cumulative, shall be in addition to every right and remedy now or hereafter existing at law or in equity or by statute and the pursuit of any right or remedy shall not be construed as an election: Provided, however, that the provisions of Section 2 of this Article shall be the exclusive measure of damages for failure by the Bidder to complete the construction of the Project within the time herein agreed upon.

Article VI—Miscellaneous

Section 1. Definitions.

a. The term “Administrator” shall mean the Administrator of the Rural Utilities Service of the United States of America and his duly authorized representatives or any other person in whom or authority in which may be vested the duties and functions which the Administrator is now authorized by law to perform.
b. The term "Engineer" shall mean the engineer employed by the Owner, with the approval of the Administrator, to provide engineering services for the Project and said Engineer's duly authorized assistants and representatives.

c. The term "Supervisor" shall mean the person, if any, appointed by the Administrator as the representative of the Government under the provisions of the Loan Contract providing for such appointment in special cases. The term is limited to such special representative of the Government, if any, who is responsible exclusively to the Administrator and does not refer to the Manager or any other person employed by the Owner and responsible to it.

d. The term "Project" shall mean the rural electric system, or portion thereof, described in the Plans and Specifications, Construction Drawings and maps attached hereto.

e. The term "Completion of Construction" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof except the Bidder's obligations in respect of (1) Releases of Liens and Certificate of Contractor under Article III, Section 2 hereof, (2) the inventory referred to in Article III, Section 1 hereof, and (3) other final documents. The term "Completion of the Project" shall mean full performance by the Bidder of the Bidder's obligations under the Contract and all amendments and revisions thereof. The Certificate of Completion, signed by the Engineer and approved in writing by the Owner and the Administrator, shall be the sole and conclusive evidence as to the date of Completion of Construction and as to the fact of Completion of the Project.

Section 2. Materials and Supplies. In the performance of this contract there shall be furnished only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, Mexico, or Canada, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, or supplies mined, produced or manufactured, as the case may be, in the United States, Mexico, or Canada; provided that other articles, materials, or supplies may be used in the event and at the extent that the Administrator shall expressly in writing authorize such use pursuant to the provisions of the Rural Electrification Act of 1936, as amended, the so-called "Kick-Back" Statute thereof, and 18 U.S.C. §§ 287, 1001, as amended. The Bidder acknowledges that it is familiar with the applicable regulations and orders of the Rural Electrification Act of 1936, as amended, the so-called "Kick-Back" Statute thereof, and 18 U.S.C. §§ 287, 1001, as amended. The Bidder represents that:

The Bidder represents that:

Section 3. Patent Infringement. The Bidder shall save harmless and indemnify the Owner from any and all claims, suits and proceedings for the infringement of any patent or patents covering any materials or equipment used in construction of the Project.

Section 4. Permits for Explosives. All permits necessary for the handling or use of dynamite or other explosives in connection with the construction of the Project shall be obtained by and at the expense of the Bidder.

Section 5. Compliance with Statutes and Regulations. The Bidder shall comply with all applicable statutes, ordinances, rules and regulations pertaining to the work. The Bidder recognizes that it is familiar with the Rural Electrification Act of 1938, as amended, and the so-called "Kick-Back" Statute thereof, and 18 U.S.C. §§ 287, 1001, as amended. The Bidder represents that:

The Bidder represents that:

a. Bidder's Representations.

The Bidder represents that:

b. Equal Opportunity Clause. During the performance of this Contract, the Bidder agrees as follows:

(3) The Bidder will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. The Bidder will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to, the following: Employment, upgrading, demotions or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection of training, including apprenticeship. The Bidder agrees to post in conspicuous places, available to employees and applicants for employment, notices.
to be provided setting forth the provisions of this Equal Opportunity Clause.

(2) The Bidder will, in all solicitations or advertisements for employees placed by or on behalf of the Bidder, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

(3) The Bidder will send to each labor union or representative of workers, with which it has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers’ representative of the Bidder’s commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The Bidder will comply with all provisions of Executive Order 11246 of September 24, 1965, and the rules, regulations and relevant orders of the Secretary of Labor.

(5) The Bidder will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to its books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the Bidder’s noncompliance with the Equal Opportunity Clause of this Contract or with any of the said rules, regulations, or orders, this Contract may be canceled, terminated, or suspended in whole or in part, and the Bidder may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as provided by law.

(7) The Bidder will include this Equal Opportunity Clause in every subcontract or purchase order unless exempted by the rules, regulations, or order of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The Bidder will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance; Provided, however, that in the event Bidder becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency, the Bidder may request the United States to enter into such litigation to protect the interests of the United States.

c. Certificate of Nonsegregated Facilities. The Bidder certifies that it does not maintain or provide for its employees any segregated facilities at any of its establishments, and that it does not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder certifies further that it will not maintain or provide for its employees any segregated facilities at any of its establishments, and that it will not permit its employees to perform their services at any location, under its control, where segregated facilities are maintained. The Bidder agrees that a breach of this certification is a violation of the Equal Opportunity Clause in this Contract. As used in this certification, the term “segregated facilities” means any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Bidder agrees that (except where it has obtained identical certifications from proposed subcontractors for specific time periods) it will obtain identical certifications from proposed subcontractors prior to the award of subcontracts exceeding $10,000 which are not exempt from the provisions of the Equal Opportunity Clause, and that it will retain such certifications in its files.

Section 7. Franchises and Rights-of-Way. The Bidder shall be under no obligation to obtain or assist in obtaining: Any franchises, authorizations, permits or approvals required to be obtained by the Owner from Federal, State, County, Municipal or other authorities; any rights-of-way over private lands; or any agreements between the Owner and third parties with respect to the joint use of poles, crossings, or other matter incident to the construction and operation of the Project.

Section 8. Nonassignment of Contract. The Bidder shall perform directly and without subcontracting not less than twenty-five per centum (25%) of the construction of the Project, to be calculated on the basis of the total Contract price. The Bidder shall not assign the Contract effected by an acceptance for the faithful performance of the Bidder’s obligations hereunder in any part thereof, without the approval in writing of the Owner and of the Surety or Sureties, if any, on any bond furnished by the Bidder for the faithful performance of the Bidder’s obligations hereunder. If the Bidder, with
§ 1726.352

The consent of the Owner and any Surety or Sureties on the Contractor's Bond or Bonds, shall enter into a subcontract with any subcontractor for the performance of any part of this Contract, the Bidder shall be as fully responsible to the Owner and the Government for the acts and omissions of such subcontractor and of persons employed by such subcontractor as the Bidder would be for its own acts and omissions and those of persons directly employed by it.

Section 9. Extension to Successors and Assigns. Each and all of the covenants and agreements herein contained shall extend to and be binding upon the successors and assigns of the parties hereto.

Section 10. Contractor. Upon acceptance of this Proposal, the successful Bidder shall be the Contractor and all references in the Proposal to the Bidder shall apply to the Contractor.

Section 11. Approval by the Administrator. No acceptance of this Proposal shall become effective until approval in writing of the Administrator: Provided, however, that no obligations shall arise hereunder unless such approval is given within forty-five (45) days from the date of acceptance by the Owner.

The Proposal must be signed with the full name of the Bidder. If the Bidder is a partnership, the Proposal must be signed in the partnership name by a partner. If the Bidder is a corporation, the Proposal must be signed in the corporate name by a duly authorized officer and the corporate seal affixed and attested by the Secretary of the Corporation.

Transmission Construction Units

Section 1—Pole Units

A pole unit consists of one pole in place. It does not include pole-top assembly unit or other parts attached to the pole. The first two digits indicate the length of the pole; the third digit shows the classification per A.S.A. (Example: 45-3 means a pole 45 feet long, class 3.)

Species of Timber:

Kind of Preservative: (Check one)

Method of Treatment: (Check one)

1. Pressure 2. Thermal process

Pole Plan Under Which the Poles are to be Furnished: (Check one)

(Engineer to complete above)

Total, Section 2—

Section 3—Conductor Assembly Units

A conductor assembly unit consists of 1,000 feet of a single conductor or overhead ground wire, and includes tie wire, sleeves for splicing, and armor rods with clips or armor wire where necessary. The length of conductor or overhead ground wire shall be determined by taking the sum of all straight horizontal
span distances between pole stakes or from center to center of the poles carrying the conductors. The conductor sizes and types listed are the manufacturer’s designation.

As provided for in the specifications, prior to beginning of work the Bidder will furnish the Engineer the following data on tension equipment:

- Diameter Bull Wheel _______ in.
- Diameter Groove _______ in.
- Conductor Bending Radius _______ in.
- Thickness of Neoprene at Bottom of Groove _______ in.
- Stringing Sheave Diameter; Tangent _______ in., Large Angle _______ in.

SECTION 4—Guy Assembly Units

A guy assembly unit consists of the hardware and wire. Guy guards are designated separately.

TOTAL, SECTION 6—

SECTION 7—Right-of-Way Clearing Units

TM-12. The unit is 1,000 feet in length and _______ (_______) feet in width (to be measured _______ (_______) feet on one side of
shall not exceed
right-of-way, except for tree stumps which
such tree trimming as is required so that the
clearing of underbrush, tree removal, and tree trimming. TM-14. The unit
be cleared shall be considered as a
straight line parallel to the horizontal line
to the ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush
across the width of the right-of-way shall
be grouped together as a single length in measuring the total length of
clearing (See Detail C, Drawing TM-12-2A.) Spaces along the right-of-way in which
no trees are to be removed or trimmed or underbrush cleared shall be omitted from the
total measurement. All lengths thus arrived
at, added together and divided by 1,000 shall
give the number of TM-12 units of clearing.
The Bidder shall not remove or trim shade,
fruit, or ornamental trees unless so directed
by the Engineer in writing.

TM-12 (1). This unit is identical with TM-12,
except the full width of the right-of-way
to be cleared shall be (____) feet
wide (to be measured (____) feet on each side of the pole line or centerline of
structures) (See Detail D, Drawing TM-12-2A.)

TM-13. The unit, for purpose of quoting, is
1,000 feet in length of clearing off the right-of-way. The Engineer will select those trees
off the right-of-way that he deems to be a
hazard to the line and will designate them to the Bidder in writing a "danger trees." When
so designated, the Bidder shall remove or top
such trees at his option except that the Bid-
der shall trim and not remove shade, fruit
or ornamental trees unless otherwise directed
by the Engineer in writing (See Drawings
TM-12-2A and TM-13 for examples of danger
trees.)

The measurement of length of right-of-way
to be cleared shall be considered as a
straight line parallel to the horizontal line
between poles or centerline of structures,
such measurement of length to be based on
maximum dimension of foliage cleared
(to be measured (____) feet on one side of
the right-of-way center line) of actual clearing
of the right-of-way. Trees and underbrush
should be cleared from ground up within 10
feet of any structure location. The Engineer
will mark the trees and brush to be cleared
to provide a "feathered" appearance in the
right-of-way. Low growing trees and brush
are to be left in the right-of-way to the extent it will not be hazardous to the line or will not interfere
with the service road. The length of actual
clearing shall be measured in a straight line
parallel to the horizontal line between poles
or center line of structures and across the
maximum dimension of foliage cleared pro-
jected to the ground line (See Details E, F, G and H, Drawing TM-12-2A.) Dead trees
having no foliage shall be measured across
the maximum dimension and multiplied by
two. (See Detail E, Drawing TM-12-2A.) Each
tree so removed shall be added together to
determine the total length of clearing. All
lengths thus arrived at, added together and
divided by 1,000 shall give the number of TM-13
to the ground line (See Detail B, Drawing TM-12-2A.) All trees and underbrush cleared across the
right-of-way shall be considered to be grouped together as a single length in measuring the total length of
clearing (See Detail C, Drawing TM-12-2A.)

TM-15. The unit is 1,000 feet in length and
feet in width (to be measured (____) feet

TM-14. This unit is identical with TM-14 except the full width of the right-of-way
to be cleared shall be (____) feet
wide (See Detail D, Drawing TM-12-2A.)

TM-15. This unit is identical to TM-15
except the full width of the right-of-way,
to be cleared shall be (____) feet
wide (See Detail D, Drawing TM-12-2A.)

420
**Rural Utilities Service, USDA**

§ 1726.352

Additional Requirements. (When specifying TM units denote type of disposal A or B).

A. Trees, brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used)

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (Describe)

B. Trees that are felled shall be cut to commercial wood lengths, stacked neatly, and left on the right-of-way for the landowner. Commercial wood length means the length designated by the Engineer but in no case shall it be required to be less than __________ (________) feet. Brush, branches and refuse shall, without delay, be disposed of by such of the following methods as the Engineer will direct (Engineer to strike out methods not to be used).

1. Burned
2. Piled on one side of right-of-way
3. Roller chopped and left on right-of-way in such a manner as not to obstruct roads, ditches, drains, etc.
4. Other (Describe)

Section 8—Substation Assembly Units

Description of Construction Units. Each Construction Unit consists of a complete installation of the designated portion of a substation as specified on the drawings, together with connections to associated equipment. Each Construction Unit represents all labor and material including necessary accessories completely installed and tested in satisfactory operation. Full identification of each Construction Unit and all necessary specifications of the installation is shown on the drawings.

Items of material in each Construction Unit shall be of the designated size, rating, type, voltage, or other specification in accordance with the drawings. The bill of material drawing for each substation shows the identification of the Construction Units under which the material is to be installed and shows which items of material may be partly or entirely found in the lists of owner-furnished materials. All items of equipment, unless otherwise specified, are mounted on a structure which shall be a Construction Unit of Group A.

Each Construction Unit is designated by the letter of the Group to which it belongs and an identifying number. The same item of equipment carries the same Construction Unit designation in all the substations. Items of equipment designated by the same Construction Unit in one substation are of only one kind as to voltage, type and other specifications. The tabulation of construction units for each substation is separate and contains all units necessary for construction of that substation.

Group A. Structures. A Construction Unit consists of a structure, or structures, with bus supports including insulators and fittings, buses, conductors and overhead ground wires to adjacent structures within the substation, grounding material to connect equipment with the ground bus, and associated material including mounting brackets, supports for equipment, clamps and connectors, all as specified in the drawings.

Group B. Three-Pole Group Operated Air Break Switches. A Construction Unit consists of one 3-pole group operated air break switch with all accessories and operating mechanisms as specified in the drawings.

Group C. Lightning Arresters. A Construction Unit consists of one single-phase lightning arrester.

Group D. Single Pole Disconnecting Switches. A Construction Unit consists of one single pole disconnecting or by-pass switch as specified in the drawings. If a fuse disconnect switch is specified, the fuse is included with the switch.

Group E. Oil Circuit Breakers. A Construction Unit consists of one complete three-phase power circuit breaker complete with supporting frame and control cabinet, unless shown otherwise in the drawings, mounted as specified in the drawings.

Group F. Oil Circuit Reclosers. A Construction Unit consists of a complete single-phase or three-phase oil circuit recloser as specified in the drawings.

Group G. Meters, Relays and Instrument Transformers. A Construction Unit consists of one meter, relay, potential transformer or current transformer.

Group H. Transformers. A Construction Unit consists of one power transformer or

Total $________

[End of clause]
§ 1726.402 Equipment contract closeout.

This section is applicable to contracts executed on RUS Form 196.

(a) Final inspection and testing of equipment. The borrower (acting through its engineer, if applicable) will perform the final inspection and testing of equipment as appropriate for the specific equipment. The borrower (acting through its engineer, if applicable) will schedule such inspection and testing at a time mutually agreeable to the borrower, engineer, and the supplier or manufacturer. Within thirty (30) days after completion of the inspection and testing, the borrower (acting through its engineer, if applicable) will prepare a report of the inspection and testing, obtain a copy of the report from the engineer, and submit a copy to the supplier or manufacturer. This report must include a detailed description of the methods of conducting the test(s), observed data, comparison of guaranteed and actual performance, and recommendations concerning acceptance. The borrower will obtain from the engineer a written certification stating that the equipment has been installed, placed in satisfactory operation and tested, and meets the contract requirements. Where more than one-hundred and eighty (180) days have elapsed since the delivery of the equipment and the equipment has not been installed or tested, the contract may be closed out upon certification by the engineer that the equipment has been inspected and appears to be in accordance with the contract requirements.

(b) Closeout documents. (1) The borrower (acting through its engineer, if applicable) will obtain the following executed documents:

(i) Certification by the project engineer in accordance with paragraph (a) of this section.
(ii) All guarantees or warranties.
(iii) A “Buy American” certificate, RUS Form 213, from the supplier or manufacturer.

(2) Closeout documents for materials contracts need not be submitted to RUS unless specifically requested by RUS.

§ 1726.403 Project construction contract closeout.

This section is applicable to contracts executed on RUS Forms 200, 203, 257, 764, 786, 830, and 831.

(a) Final test of equipment supplied under a construction contract. If equipment is supplied under a construction contract, the borrower (acting through its architect or engineer, if applicable) will perform the final inspection and testing of equipment as appropriate for the specific equipment. The borrower (acting through its architect or engineer, if applicable) will schedule such inspection and testing at a time mutually agreeable to the borrower, architect or engineer, and the contractor. Within thirty (30) days after completion of the inspection and testing, the borrower (acting through its architect or engineer, if applicable) will prepare a report of the inspection and testing, obtain a copy of the report from its architect or engineer, and submit a copy to the contractor. This report must include a detailed description of the methods of conducting the test(s), observed data, comparison of guaranteed and actual performance, and recommendations concerning acceptance. The borrower will obtain from its architect or engineer a written certification stating that the equipment has been installed, placed in satisfactory operation and tested, and meets the contract requirements. Where more than one-hundred and eighty (180) days have elapsed since the delivery of the equipment and the equipment has not been installed or tested, the contract may be closed out upon certification by its architect or engineer that the equipment has been inspected and appears to be in accordance with the contract requirements.

(b) Final inspection of construction. The borrower will require the contractor to notify the architect or engineer when construction is complete. The borrower (acting through the architect
or engineer, if applicable) will schedule such final inspection at a time mutually agreeable to the borrower, architect or engineer, contractor, and the respective RUS General Field Representative (GFR). If the GFR has notified the borrower or its architect or engineer of a desire to observe the final inspection. The borrower (acting through its architect or engineer, if applicable) will perform a final inspection of the construction and notify the contractor of any required changes or corrections.

(c) Closeout documents. (1) Upon satisfactory completion of construction (including all changes and corrections by the contractor), the borrower (acting through its architect or engineer, if applicable) will obtain executed copies of the following documents:

(i) RUS Form 181, Certificate of Completion, Contract Construction for Buildings (for contracts executed on RUS Form 257), or RUS Form 187, Certificate of Completion, Contract Construction (for contracts executed on all other forms under this section).

(ii) RUS Form 213, “Buy American” certificate.

(iii) RUS Form 224, Waiver and Release of Lien, from each manufacturer, supplier, and contractor which has furnished material or services or both in connection with the construction.

(iv) RUS Form 231, Certificate of Contractor.

(v) RUS Form 254, Construction Inventory, including all supporting documents, such as RUS Forms 254a-c and construction change orders, for contracts executed on RUS Forms 203, 764, or 831.

(vi) Certification by the project architect or engineer in accordance with §1726.403(a), if applicable.

(vii) Final design documents, as outlined in part 1724 of this chapter.

(2) Distribution of closeout documents. (i) The borrower will retain one copy of each of the documents identified in paragraph (c)(1) of this section in accordance with applicable RUS requirements regarding retention of records.

(ii) For contracts subject to RUS approval, the borrower will submit the following closeout documents for RUS approval (through the GFR except for generation projects):

(A) RUS Form 181, Certificate of Completion, Contract Construction for Buildings (for contracts executed on RUS Form 257), or RUS Form 187, Certificate of Completion, Contract Construction (for contracts executed on all other forms under this section).

(B) RUS Form 231, Certificate of Contractor.

(C) RUS Form 254, Construction Inventory, including all supporting documents, such as RUS Forms 254a-c and construction change orders, for contracts executed on RUS Forms 203, 764, or 831.

(iii) For contracts not subject to RUS approval, the closeout is not subject to RUS approval. The borrower will send one copy of RUS Form 181 or RUS Form 187 (as applicable) to RUS for information prior to or in conjunction with the applicable RUS Form 219, Inventory of Work Orders. The remaining closeout documents need not be sent to RUS unless specifically requested by RUS.

(d) Final payment. (1) The borrower will make final payment to the contractor upon completion of approval of all closeout documents by the parties to the contract, in accordance with the terms of the construction contract.

(2)(i) Upon receipt of final payment by the contractor, the borrower will obtain from the contractor a certification of receipt of final payment in the following form:

“The undersigned acknowledges receipt of the final contract payment of $___ as satisfaction in full of all claims of the undersigned under the construction contract between the undersigned and (borrower), dated as amended, and as complete performance by the latter of all obligations to be performed by it pursuant thereto. The total amount received under this contract is shown above.”

(ii) The certification in paragraph (d)(2)(i) of this section is to be executed for the contractor by the sole owner, a partner, or an officer of the corporation. Where this certification is executed for the corporation by a person other than the president, a certified copy of the authorization from the corporate board must be included with the certification. This certification is not a replacement for itemized invoices.
§ 1726.404 Non-site specific construction contract closeout.

This section is applicable to contracts executed on RUS Forms 201, 790, and 792.

(a) Final test of equipment supplied under a construction contract. If equipment is supplied under a construction contract, the borrower (acting through its engineer, if applicable) will perform the final inspection and testing of equipment as appropriate for the specific equipment. The borrower (acting through its engineer, if applicable) will schedule such inspection and testing at a time mutually agreeable to the borrower, its engineer, and the contractor. Within thirty (30) days after completion of the inspection and testing, the borrower (acting through its engineer, if applicable) will submit a copy of the report to the engineer, and submit a copy to the contractor. This report must include a detailed description of the methods of conducting the test(s), observed data, comparison of guaranteed and actual performance, and recommendations concerning acceptance. The borrower will obtain from the engineer a written certification stating that the equipment has been installed, placed in satisfactory operation and tested, and meets the contract requirements. Where more than one-hundred and eighty (180) days have elapsed since the delivery of the equipment and the equipment has not been installed or tested, the contract may be closed out upon certification by the engineer that the equipment has been inspected and appears to be in accordance with the contract requirements.

(b) Final inspection of construction. The borrower will require the contractor to notify its engineer when construction of a section of the project is complete. The borrower (acting through its engineer, if applicable) will schedule such final inspection at a time mutually agreeable to the borrower, its engineer, contractor, and the respective GFR, if the GFR has notified the borrower or its engineer of a desire to observe the final inspection. The borrower (acting through its engineer, if applicable) will perform a final inspection of the construction of that section of the project and notify the contractor of any required changes or corrections.

(c) Closeout documents. (1) Upon satisfactory completion of construction of a section of the project (including all changes and corrections by the contractor), the borrower (acting through its engineer, if applicable) will obtain executed copies of the following documents:

(i) RUS Form 792b, Certificate of Contractor and Indemnity Agreement.
(ii) RUS Form 213, “Buy American” certificate.
(iii) Certification by the project engineer in accordance with paragraph (a) of this section, if applicable.

(iv) Final design documents, as outlined in part 1724 of this chapter.

(2) Distribution of closeout documents.

(i) The borrower will retain one copy of each of the documents identified in paragraph (c)(1) of this section in accordance with applicable RUS requirements regarding retention of records.

(ii) For contracts not subject to RUS approval, the closeout is not subject to RUS approval and the closeout documents need not be sent to RUS unless specifically requested by RUS.

§ 1726.405 Inventory of work orders (RUS Form 219).

Upon completion of the contract closeout, the borrower shall complete RUS Form 219, Inventory of Work Orders, in accordance with part 1717, Post-Loan Policies and Procedures Common to Insured and Guaranteed Electric Loans, of this chapter.

PART 1728—ELECTRIC STANDARDS AND SPECIFICATIONS FOR MATERIALS AND CONSTRUCTION

Sec.
1728.10 General purpose and scope.
1728.20 Establishment of standards and specifications.
1728.30 Inclusion of an item for listing or technical acceptance.
1728.40 Procedure for submission of a proposal.
1728.50 Removal of an item from listing or technical acceptance.
1728.60 List of materials and equipment.
1728.70 Procurement of materials.
1728.97 Incorporation by reference of electric standards and specifications.
§ 1728.10

(a) The requirements of this part are based on contractual provisions between RUS and the organizations which receive financial assistance from RUS.

(b) RUS will establish certain specifications and standards for materials, equipment, and construction units that will be acceptable for RUS financial assistance for the electric program. Materials and equipment purchased by the electric borrowers or accepted as contractor-furnished material must conform to RUS standards and specifications where they have been established and, if included in RUS Bulletin 43-5, "List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers" (List of Materials), must be selected from that list or must have received technical acceptance from RUS. RUS, through its Technical Standards Committees, will evaluate certain materials, equipment, and construction units, and will determine acceptance.

§ 1728.20

(a) National and other standards. RUS will utilize standards of national standardizing groups, such as the American National Standards Institute (ANSI), American Wood Preservers’ Association (AWPA), the various national engineering societies and the National Electrical Safety Code (NESC), to the greatest extent practical. When there are no national standards or when RUS determines that the existing national standards are not adequate for rural electric systems, RUS will prepare standards for material and equipment to be used on systems of electric borrowers. RUS standards and specifications will be codified or listed in §1728.97, Incorporation by Reference of Electric Standards and Specifications. RUS will also prepare specifications for materials and equipment when it determines that such specifications will result in reduced costs, improved materials and equipment, or in the more effective use of engineering services.

(b) Deviations from Standards. No member of the RUS staff will be permitted to authorize deviations from the standard specifications, or to establish or change the technical standards, or to authorize the use of items that have not received acceptance by the Technical Standards Committees, except as provided for under §1728.70, or by authorization and/or delegation of authority by the Administrator of RUS.

(c) Category of Items. Items appearing in the List of Materials are listed by categories of generic items which are used in RUS construction standards incorporated by reference in §1728.97. RUS will establish and define these categories and will establish all criteria for acceptability within these categories.

§ 1728.30

(a) Scope. RUS, through its Technical Standards Committees “A” and “B” will determine the acceptability of certain standards, standard specifications, standard drawings, and items of materials and equipment to be used in transmission, distribution and general plant (excluding office equipment, tools, and work equipment, and consumer-owned electric wiring facilities).

(c) Review by Technical Standards Committee “A”. All proposals for listing a product in the List of Materials must be addressed to Technical Standards Committee “A.” This committee will consider all proposals made by sponsors of specifications, drawings, materials, or equipment in categories for which RUS has established criteria for acceptability. A sponsor may be a manufacturer, supplier, contractor or any other person or organization which has made an application for listing or has requested an action by the committee. Committee “A” will consider all relevant information presented in determining whether an item should be accepted by Technical Standards Committee “A.” Formal rules of evidence and procedure shall not apply to proceedings before this committee.

(d) Action by Technical Standards Committee “A”. (1) Committee “A” may take one of the following actions:
   (i) Accept an item for listing without conditions (domestic items only),
   (ii) Reject an item (domestic or nondomestic),
   (iii) Accept an item for listing with conditions (domestic items only),
   (iv) Table an item for a time period sufficient to allow the sponsor to be notified and furnish additional information (domestic or nondomestic),
   (v) Grant technical acceptance with or without conditions for a period of one year from the date of notification by RUS (nondomestic items only).

(2) All committee decisions regarding the actions listed above must be unanimous. If the vote is not unanimous, the item shall be referred to Technical Standards Committee “B.” Written notice of Technical Standards Committee “A’s” decision, stating the basis for the decision, will be provided to the sponsor.

(3) Items accepted without conditions by the Technical Standards Committees will be considered to be accepted on a general basis. No restrictions as to quantity or application will be placed on items which have received general acceptance. Items accepted subject to certain conditions, such as limited use to gain service experience, or limited use appropriate to certain areas and conditions, will be considered to be accepted on a conditional basis. The conditions will be cited as a part of the listing provided for in §1728.60, or as part of the technical acceptance for nondomestic items.

(e) Appeal to Technical Standards Committee “B”. A sponsor may request a review of an adverse decision by Technical Standards Committee “A” within ten (10) days of notification of such decision by submitting a letter requesting such review to Technical Standards Committee “B” (Electric).

(f) Action by Technical Standards Committee “B”. Committee “B” may take any of the actions listed for Committee “A” in §1728.30(d). However, for a Committee “B” action to be effective it must be by majority vote. Failure to obtain a majority on one of the proposed actions shall mean that the product will not be listed or accepted. Committee “B’s” determination shall be based on the record developed before Committee “A” and such additional information as Committee “B” may request. Formal rules of procedure and evidence shall not apply to proceedings before Committee “B.” Written notice of Committee “B’s” decision, stating the basis of the decision, will be provided to the sponsor.

(g) Appeal to the Administrator. In the event of an adverse decision by Committee “B,” the sponsor may, within ten (10) days of notification of such decision, request a review of this decision by submitting a letter to the Administrator requesting such a review.

(h) Change in Design. RUS acceptance of an item will be conditioned on the understanding that no design changes (material or dimensions) affecting the quality, strength, or electrical characteristics of the item shall be made without prior concurrence of Technical Standards Committee “A.”

§ 1728.40 Procedure for submission of a proposal.

(a) Written Request. Consideration of an item of material or equipment will be obtained by the sponsor through the submission of a written request in an

1Nondomestic items are items which do not qualify as domestic products pursuant to RUS “Buy American” requirement.
original and five copies addressed to the Chairman, Technical Standards Committee “A” (Electric). The letter must include the catalog number or other identifying number or code as well as a description of the item. In the event that an item being submitted is also intended for consideration by Technical Standards Committee “A” (Telephone), a separate request must be made to the telephone committee. (See part 1755 of this chapter).

(b) Technical and Performance Data. Six copies of the specification of manufacture, drawings and test data must be submitted to the committee. Six copies of the performance history shall also be submitted unless RUS determines that such performance history is not reasonably available.

(c) Sample. One sample of the item must be submitted to the Chairman, Technical Standards Committee “A,” unless RUS waives the requirements of the sample. In case of large, bulky or extremely heavy samples, the sponsor should contact the Chairman, Technical Standards Committee “A” (Electric), at the above address, before any sample is shipped.

(d) Action on Proposal. RUS will inform a sponsor of the action taken on the sponsor’s proposal.

§ 1728.50 Removal of an item from listing or technical acceptance.

(a) Removal Actions. An item of material or equipment may be removed from the listing or technical acceptance in accordance with the following procedures upon determination that the item is unsatisfactory or has been misrepresented to the owner or RUS.

(b) Notification by the Committee. The sponsor of an item of material or equipment will be notified in writing of a proposal to remove such item from the listing or technical acceptance.

(c) Supplemental Information. Within ten (10) days of receipt of such notification, the sponsor may submit to Committee “A” a letter expressing the sponsor’s intent to submit written supplemental technical information relevant to Committee “A”’s determination. The sponsor must submit such information within twenty (20) days from the submission of its letter to Committee “A.” Committee “A” will have the discretion of making a decision following the expiration of the time periods provided in this paragraph.

(d) Review by the Technical Standards Committee “A.” Committee “A” will consider all relevant information presented in determining whether an item should be removed from the listing or technical acceptance. Formal rules of evidence and procedure shall not apply to proceedings before Technical Standards Committee “A.”

(e) Action by the Technical Standards Committee “A.” Committee “A” may take one of the following actions:

(1) Order the immediate removal of the item from the listing, or technical acceptance,

(2) Condition the item’s continued listing, or technical acceptance,

(3) Recommend a basis of settlement which will adequately protect the interest of the Government, or

(4) Delay the effectiveness of its decision for a time period sufficient to allow the sponsor to appeal to Technical Standards Committee “B.”

All committee “A” decisions regarding the actions listed above must be by unanimous vote. If the vote is not unanimous, the item will be referred to Technical Standards Committee “B.”

Written notice of Technical Standards Committee “A”’s decision, stating the basis for the decision, will be provided to the sponsor.

(f) Additional Opportunity to Present Information. At the request of the sponsor, RUS may afford additional opportunity for consideration of relevant information. Such additional opportunity may include, without limitation, a meeting between RUS and the sponsor in such a forum that RUS may determine. In making this decision, RUS will consider, among other things, the best interests of RUS, its borrowers, and the sponsor, and the best manner to develop sufficient information relating to the proposed action.

(g) Appeal to the Technical Standards Committee “B.” Within ten (10) days of notification of Committee “A”’s decision, a sponsor may appeal in writing to Technical Standards Committee “B” to review Committee “A”’s decision.
specifying the reasons for such a request. Committee “B’s” determination, in response to such request, shall be based on the record developed before Committee “A” and such additional information as Committee “B” may request. Formal rules of procedure and evidence shall not apply to proceedings before Committee “B.”

(h) Action by Technical Standards Committee “B.” Committee “B,” by majority vote, may take one of the following actions:

(1) Order the immediate removal of the item from listing, or technical acceptance,

(2) Condition the item’s continued listing, or technical acceptance,

(3) Recommend a basis of settlement which adequately protects the interests of the Government, or

(4) Delay the effectiveness of its decision for a time period sufficient to allow the sponsor to appeal to the Administrator of RUS.

Failure to obtain a majority vote on any of the above actions shall mean that the product will continue to be listed or accepted.

Written notice of Committee “B’s” decision stating the basis of the decision will be provided to the sponsor.

(i) Appeal to the Administrator. Within ten (10) days of the receipt of Committee “B’s” decision, a sponsor may appeal to the Administrator to review Committee “B’s” decision. If an appeal is made, the sponsor shall submit a written request to the Administrator, Rural Utilities Service, Room 4053, South Building, U.S. Department of Agriculture, Washington, DC 20250-1500 specifying the reasons to request reconsideration. The Administrator will have the option to decline the request, in which case the decision of Committee “B” shall stand. If a review is granted, the determination by the Administrator or the Administrator’s designee shall be based on the record developed before Committee “A” and Committee “B” and such additional information as the Administrator may request. Formal rules of procedure and evidence shall not apply to the actions of the Administrator.

(j) Action by the Administrator. The Administrator may take one of the following actions:

(1) Order the immediate removal of the item from the listing, or technical acceptance,

(2) Condition its continued listing, or technical acceptance, or

(3) Recommend a basis of settlement which adequately protects the interests of the Government.

Written notice of the Administrator’s determination, stating the basis for the decision, will be provided to the sponsor.

The Administrator’s actions are final.

§ 1728.70 Procurement of materials.

(a) By Owner. When purchasing the type of materials included in the List of Materials, RUS borrowers shall purchase only materials listed in the List of Materials, or materials which have a current technical acceptance by RUS and meet the “Buy American” requirement.

(b) By Contractor. When performing work for an RUS borrower, contractors shall supply only items from the general acceptance pages of the List of Materials, or obtain the borrower’s concurrence prior to purchase and use of a technically nondomestic item or any item listed on a conditional basis.

(c) Procurement of Unlisted Items. (1) The borrower shall request prior approval from RUS for use of an item that does not fall in categories established by RUS in the List of Materials for which acceptability has been established by the Technical Standards Committees.

(2) RUS will also determine, on a case-by-case basis, whether to allow use of an unlisted item in emergency situations and for experimental use or to meet a specific need. For purposes of this part 1728, an emergency shall mean a situation wherein the supply of listed material and equipment from the industry is not readily available, or the standard designs are not applicable to the borrower’s specific problem under consideration.

(3) RUS will make arrangements for test or experimental use of newly developed items requiring limited trial use. RUS, working with the manufacturer, will establish test locations for the items to facilitate installation and observation.

[50 FR 47712, Nov. 20, 1985, Redesignated at 55 FR 39395, Sept. 27, 1990]

§ 1728.97 Incorporation by reference of electric standards and specifications.

(a) The following electric bulletins have been approved for incorporation by reference by the Director of the Office of the Federal Register. The bulletins containing specifications for materials and equipment (50-15 to 50-99) may be obtained from the Rural Utilities Service, Administrative Services Division, Room 0175-S, Washington, DC 20250. The terms “RUS form”, “RUS standard form”, “RUS specification”, and “RUS bulletin” have the same meanings as the terms “REA form”, “REA standard form”, “REA specification”, and “REA bulletin”, respectively unless otherwise indicated.

The bulletins are available for inspection at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. These materials are incorporated as they exist on the date of the approval and a notice of any change in these materials will be published in the Federal Register.

(b) List of Bulletins.

Bulletin 50-1 (T-805-B), Electric Transmission Specifications and Drawings for 115 kV to 230 kV (10-88)
Bulletin 50-2 (T-805-A), Electric Transmission Specifications and Drawings for 34.5 kV to 69 kV (2-73)
Bulletin 50-3 (D-804), Specifications and Drawings for 12.5/7.2 kV Line Construction (4-89)
Bulletin 50-4 (D-801), Specification and Drawings for 34.5/19.9 kV Distribution Line Construction (11-93)
Bulletin 50-5 (D-803), Specifications and Drawings for 14.4/24.9 kV Line Construction (9-69)
Bulletin 50-6 (D-806), Specifications and Drawings for Underground Electric Distribution (3-90)
Bulletin 50-15 (DT-3), RUS Specifications for Pole Top Pins with 1/4” Diameter Lead Thread (1-51)
Bulletin 50-16 (DT-4), RUS Specifications for Angle Suspension Brackets (3-52)
Bulletin 50-19 (DT-7), RUS Specifications for Clevis Bolts (8-53)
Bulletin 50-23 (DT-18), RUS Specifications for 60” Wood Crossarm Braces (2-71)
Bulletin 50-31 (D-3), RUS Specifications for Pole Top Pins with 1” Diameter Lead Threads (2-79)
Bulletin 50-32 (D-4), RUS Specifications for Steel Crossarm Mounted Pins with 1” Diameter Lead Threads (10-50)
Bulletin 50-33 (D-5), RUS Specifications for Single and Double Upset Spool Bolts (2-51)
Bulletin 50-34 (D-6), RUS Specifications for Secondary Swinging Clevises (12-70)
Bulletin 50-35 (D-7), RUS Specifications for Service Swinging Clevises (9-52)
Bulletin 50-36 (D-8), RUS Specifications for
§ 1728.201

Rural Utilities Service, USDA

Service Deadend Clevises (9-52)
Bulletin 50-40 (D-14), RUS Specifications for Pole Top Brackets for Channel Type Pins (9-52)
Bulletin 50-41 (D-15), RUS Specifications for Service Wireholders (11-51)
Bulletin 50-55 (T-2), RUS Specifications for Overhead Ground Wire Support Brackets (5-53)
Bulletin 50-56 (T-3), RUS Specifications for Steel Plate Anchors for Transmission Lines (12-53)
Bulletin 50-60 (T-9), RUS Specification—Single Pole Steel Structures, Complete with Arms (12-71)
Bulletin 50-70 (U-1), RUS Specification for 15 kV and 25 kV Primary Underground Power Cable (12-22-87)
Bulletin 50-73 (U-5), RUS Specifications for Pad-Mounted Transformers (Single and Three-Phase) (1-77)
Bulletin 50-74 (U-6), RUS Specification for Secondary Pedestals (600 Volts and Below) (10-79)
Bulletin 50-91 (S-3), RUS Specifications for Step-Down Distribution Substation Transformers (34.4-138 kV) (1-78)

(a) General provisions. (1) This section implements contractual provisions between RUS and borrowers receiving financial assistance from RUS. The contractual agreement between RUS and its borrowers requires the borrower’s system to be constructed in accordance with RUS accepted plans and specifications. Each RUS electric borrower must purchase only wood crossarms produced in accordance with the specifications in this section.

(2) Each RUS electric borrower shall require each contractor to agree in writing to furnish only materials produced in accordance with the specifications in this section.

(3) This specification describes the minimum acceptable quality of wood distribution crossarms and transmission crossarms (hereinafter called crossarms) that are purchased by or for RUS borrowers. Where there is conflict between this specification and any other specification referred to in this section, this specification shall govern.

(4) Various requirements relating to quality control and inspection are contained in §1728.202 of this part, RUS Specification for Quality Control and Inspection of Timber Products. Section 1728.201 of this part and the American National Standards Institute (ANSI) 05.2, 1983, American National Standard for Wood Products—Structural Glued Laminated Timber for Utility Structures, shall be followed exactly and shall not be interpreted or subjected to judgment by the quality control person or an independent inspector.

(5) The borrower shall purchase from producers only material that meets the requirements of this specification. Each purchaser shall use a written purchase order to purchase material for use in RUS financed systems in order to insure compliance with the standards and specifications of this part. The written purchase order shall contain a provision that specifically requires the producer to comply with the provisions of this part. The purchase order shall contain a provision that specifically requires the producer to make the treating plant, and storage areas available, during normal business hours, in order for representatives of either the purchaser or RUS to inspect such to determine compliance with the standards and specifications of this part.

(6) The borrower shall ensure that the producer provides the inspectors with full information (drawings, etc.) relating to the requirements contained in purchase order which is supplementary to this specification.

(7) The borrower shall ensure that the producer maintains, or has access to, adequate laboratory facilities at or very near the treating plant. All chemical tests, assays or analyses associated with the treatment shall be independently performed in this laboratory by both the quality control designee and the borrower’s inspector. If acceptable to RUS on a case-by-case basis,
§ 1728.201

the producer may use a central laboratory.

(8) Inspection and treatment of all timber products produced under this specification should be performed after receipt of the order from the purchaser, except as provided for reserve treated stock.

(9) The borrower shall insure that each inspection agency maintains its own central laboratory with qualified staff capable of completely analyzing the preservative and treatments. If acceptable to RUS, this central laboratory may be used for the independent inspector’s routine assays, with results made available the next working day.

(10) The testing and inspection of the lamination process shall be in accordance with American Institute of Timber Construction (AITC) 200-83, Inspection Manual.

(11) With the exception of reserve treated stock, all invoices for treated timber products shall be accompanied, in duplicate, by a copy of the producer’s Certificate of Compliance and a copy of either the Independent Inspection Report or a Quality Assurance Plan Certificate. The certificate shall be presented to the purchaser with the invoice. For reserve treated stock, inspection reports shall be available from the inspection agency. When shipped from reserve stock, the invoice shall bear an endorsement and a further certification by the producer that the material meets the requirements of this specification under which it was purchased.

(12) Crossarms shall be warranted to conform to this specification. If any crossarm is determined to be defective or does not conform to this specification within 1 year after shipment to the borrower, it shall be replaced as promptly as possible by the producer. In the event of failure to do so, the purchaser may make such replacement and the cost of the crossarm, at destination, recoverable from the producer.

(b) Definitions.

Arm refers to structural wood member used to support electrical conductors.

Certificate of compliance is a certification by an authorized employee of the producer that the material shipped meets the requirements of this specification and any supplementary requirements specified in a purchase order from a borrower or the borrower’s contractor.

Crossarm is a term used interchangeably with arm.

Independent inspection relates to examination of material by an independent inspector employed by a commercial inspection agency.

Inspection means an examination of material in sufficient detail to insure conformity to all phases of the specification under which it was purchased.

Lot is a quantity of crossarms of like size, conditioning, and fabrication, usually making up one treating charge.

Producer is used to describe the party who manufactures and treats crossarms.

Purchaser refers to either the RUS borrower or contractors acting as the borrower’s agent, except where a part of the specification specifically refers to only the RUS borrower or the contractor.

Quality control designee refers to an individual designated by the producer to be responsible for quality control.

Reserve treated stock consists of timber products treated in accordance with this specification, prior to and in anticipation of the receipt of specific orders, and held in storage ready for immediate shipment.

Supplier is a term used interchangeably with producer, or in some cases, may be the distributor selling crossarms to the borrower.

Treating plant is the organization that applies the preservative treatment to the crossarms.

(c) Related specifications and standards incorporated by reference. The following specifications and standards are incorporated by reference. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of each reference are available for inspection during normal business hours at RUS, room 1250-S, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.
Copies of these standards and specifications may be purchased from the addresses shown below.

(1) West Coast Lumber Inspection Bureau, Standard No. 17, Grading Rules for West Coast Lumber, September 1, 1991, available from West Coast Lumber Inspection Bureau, P.O. Box 23145, Portland, Oregon 97223, telephone (503) 639-0651, Fax (503) 684-8928.

(ii) [Reserved]

(i) A1-91, Standard Methods for Analysis of Creosote and Oil-Type Preservatives.

(v) A6-89, Method for the Determination of Oil-Type Preservatives and Water in Wood.

(vi) A7-75, Standard Wet Ashing Procedure for Preparing Wood for Chemical Analysis.

(vii) A9-90, Standard Method for Analysis of Treated Wood and Treating Solutions by X-Ray Spectroscopy.

(ix) C1-91, All Timber Products—Preservative Treatment by the Full-Length Thermal Process.

(x) C4-91, Poles—Preservative Treatment by Pressure Processes.

(xi) C8-91, Western Red Cedar and Alaska Yellow Cedar Poles—Preservative Treatment by the Full-Length Thermal Process.

(xiii) C12-90, Western Larch Poles—Full-Length Preservative Treatment by Thermal Process.

(xiv) M1-90, Standard for the Purchase of Treated Wood Products.

(xv) M2-91, Standard for Inspection of Treated Timber Products.

(xvi) M3-81, Standard Quality Control Procedures for Wood Preserving Plants.

(xvii) M4-91, Standard for the Care of Preservative-Treated Wood Products.

(xviii) P1/P13-91, Standard for Coal Tar Creosote for Land and Fresh Water and Marine (Coastal Water Use).

(xix) P5-91, Standards for Waterborne Preservatives.

(xx) P8-91, Standards for Oil-Borne Preservatives.

(d) Independent inspection plan. This plan or a Quality Assurance Plan, as described in paragraph (e) of this section, is acceptable for supplying crossarms. All crossarms produced under the independent inspection plan for use on an RUS financed system shall be inspected by a qualified independent inspector in accordance with §1728.202 of this part.
§ 1728.201

(1) The borrower has the prerogative to contract directly with the inspection agency for service. The borrower should, where practical, select the inspection agency so that continual employment is dependent only on performance acceptable to the borrower and in accordance with this specification. The selected inspection agency shall not subcontract the service to any other inspection agency without the prior written consent by the borrower.

(2) The producer shall not be a party to the selection of the inspection agency by the borrower and shall not interfere with the work of the inspector, except to provide notification of the readiness of material for inspection. To obtain the inspection services for reserve stock, the producer may deal directly with the inspection agency. Under the Independent Inspection Plan, the producer shall not treat material before it has been properly inspected in the white, as evidenced by the inspector's hammer mark.

(3) The methods of inspection described in this section and in §1728.202 of this part shall be used no matter which plan crossarms are produced under, i.e., Independent Inspection Plan, or Quality Assurance Plans, as described in this section. The number of crossarms actually inspected by monitors of quality control under a Quality Assurance Plan may vary from the number of crossarms inspected under the Independent Inspection Plan.

(e) Quality assurance plans. The producer shall furnish crossarms conforming to this specification as monitored by a Quality Assurance Plan acceptable to RUS. RUS borrower groups or agents for borrower groups endeavoring to operate Quality Assurance Plans shall submit their plan for assuring quality control to the Director, Electric Staff Division, Rural Utilities Service, Washington, DC 20250-1500, for specific approval prior to contracting with RUS borrowers under such plans.

(f) Material requirements—(1) Material and grade. All crossarms furnished under this specification shall be free of brashy wood, decay, and insect holes larger than 3/32 of an inch (0.24 cm), and shall meet additional requirements as shown on specific drawings. They shall be made of one of the following:

(i) Douglas-fir which conforms to the applicable crossarm provisions of paragraphs 170 and 170a, or the applicable transmission arm provisions of paragraphs 169 and 169a of the 1991 Standard Grading Rules for West Coast Lumber No. 17. All references to Douglas-fir shall be of coastal origin;

(ii) Southern Yellow Pine which conforms to the provisions of Dense Industrial Crossarm 65, as described in paragraph 31.2 in Southern Pine Inspection Bureau 1991 Special Product Rules for Southern Pine;

(iii) Laminated wood crossarms shall conform to ANSI 05.2-1983, and have at least the same load carrying capacity as the solid sawn arm it replaces. The load carrying capacity of the laminated arms shall be determined by one of the procedures outlined in ANSI 05.2.

(2) Borrowers may use alternative wood crossarms that are listed in RUS Bulletin 1728C-100, List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers.

(3) Knots. Sound, firm, and tight knots, if well spaced, are allowed.

(i) Slightly decayed knots are permitted, except on the top face, provided the decay extends no more than 3/4 of an inch (1.91 cm) into the knot and provided the cavities will drain water when the arm is installed. For knots to be considered well spaced, the sum of the sizes of all knots in any 6 inches (15.24 cm) of length of a piece shall not exceed twice the size of the largest knot permitted. More than one knot of maximum permissible size shall not be in the same 6 inches (15.24 cm) of length. Slightly decayed, firm, or sound “Pin knots” (3/8 of an inch (0.95 cm) or less) are not considered in size, spacing, or zone considerations.

(ii) Knots are subject to the following limits on size and location:

*No knot will be closer than its diameter to the pole mounting hole.

*For cross sections not shown, refer to grading rules.

#### Miscellaneous characteristics, features and requirements

(i) The top face of distribution crossarms shall not have more than four medium pitches and bark pockets in a 6 foot (2.4 m) arm.

(ii) Spike knots shall be prohibited in deadend arms. Any spike knot across the top face shall be limited to the equivalent displacement of a knot 3/8 of an inch (0.95 cm) deep on one face and the maximum round knot for its particular location on the worst face, with a maximum width of 1 inch (2.54 cm) measured at the midpoint of the spiked section. Elsewhere across the bottom or side faces, spike knots shall not exceed 1/2 the equivalent displacement of a round knot permitted at that location. The depth of the knot on the worst face shall not exceed the maximum round knot allowed at that location.

(v) Loose knots and knot holes shall drain water when the arm is normally installed. In the center section, upper half, they shall not be greater than 1/2 the dimensions of round knots. Elsewhere, they shall not be greater than the round knot dimension. They shall be prohibited in deadend arms.

(vi) All knots except those “spike” knots intersecting a corner shall be measured on the least diameter of the knot.

(vii) A knot shall be considered to occupy a specific zone or section if the center of the knot (i.e. pith of knot) is within the zone or on the zone’s boundary.

(viii) If a round or oval knot appears on two faces and is in two zones, each face shall be judged independently. When this does not occur, average the least dimension showing on both faces. Knots which occur on only one face of a free of heart center (FOHC) arm shall be permitted to be 25 percent larger than the stated size.

(ix) Knot spacing. Two or more knots opposite each other on any face shall be limited by a sum not to exceed the size of a maximum single knot permitted for the location. On all four faces, all knots shall be well spaced.

(x) Knots which have a maximum of 5/8 inch (1.59 cm) diameter may intersect pin holes in the center section. One inch (2.54 cm) diameter knots may intersect pin holes elsewhere.
§ 1728.201

not more than five pitch and bark pockets in 10 foot (3.0 m) arms. Elsewhere a maximum of six medium pockets in 8 foot (2.4 m) arms and eight in 10 foot (3.0 m) arms shall be permitted. Equivalent smaller pockets shall be permissible. An occasional large pocket is permissible.

(ii) Shakes shall be prohibited.

(iii) Checks. Prior to treatment on properly seasoned arms, single face checks shall not exceed an average penetration of 1/4 the depth from any face and shall be limited to 10 inches (25.40 cm) long on the top face, and 1/3 the arm length on the other faces. Checks shall not be repeated in the same line of grain in adjacent pin holes. The sum of the average depths of checks occurring in the same plane on opposite faces shall be limited to 1/4 the face depth.

(iv) Compression wood shall be prohibited on any face. It is permitted if wholly enclosed in the arm, more than six annual rings from the surface, and not over 3/8 of an inch (0.95 cm) in width.

(v) Insect holes larger than 3/32 of an inch (0.24 cm) shall be prohibited. Pin holes (i.e. holes not over 1/16 of an inch (0.16 cm) diameter) shall be allowed if scattered and not exceeding 10 percent of the arm girth.

(vi) Wane shall be allowed on one edge, limited to approximately 1 inch (2.54 cm), measured across the corner. Outside of the top center section, an aggregate length not to exceed 2 feet may have wane up to 1-1/2 inches (3.81 cm) on an occasional piece on one or both edges. Bark shall be removed.

(vii) Prior to preservative treatment, crook, bow, or twist shall not exceed 1/2 of an inch (1.27 cm) in 8 foot arms (2.4 m) and 5/8 of an inch (1.59 cm) in 10 foot (3.0 m) arms.

(g) Manufacture. (1) All dimensions and tolerances shall conform to those shown on the drawings in this section or drawings supplied with the purchase order. Drawings supplied shall meet or exceed minimum dimensions and tolerances shown on the drawings in this section. Cross-sectional dimensions shall be measured and judged at about 1/4 the arm length, except when the defects of “cusp dressing” or “machine bite or offset” are involved.

(2) Lamination techniques shall comply with ANSI 05.2-1983.

(3) Pin and bolt holes shall be smoothly bored without undue splintering where drill bits break through the surface. The center of any hole shall be within 1/8 of an inch (0.32 cm) of the center-line locations on the face in which it appears. The holes shall be perpendicular to the starting and finishing faces.

(4) Shape. The shape of the arms at any cross section, except for permissible wane, shall be as shown on the respective drawings in this section or supplied with the order. The two top edges may be either chamfered or rounded 3/8 of an inch (0.95 cm) radius. The two bottom edges may be slightly eased 1/8 of an inch (0.32 cm) radius for the entire length.

(5) Incising. The lengthwise surfaces of Douglas-fir crossarms shall be incised approximately 1/4 of an inch (0.64 cm) deep. The incision shall be reasonably clean cut with a spacing pattern that insures uniform penetration of preservative.

(6) Workmanship. All crossarms shall be first quality workmanship. Crossarms shall be dressed on four sides, although “hit and miss skips” may occur on two adjacent faces on occasional pieces. Five (5) percent of a lot or shipment may be 1/8 of an inch (0.32 cm) scant in thickness or width at the ends for a length not exceeding 6 inches (15.24 cm), or may have 1/8 of an inch (0.32 cm) machine bite on offset.

(h) Conditioning prior to treatment. (1) All solid sawn crossarms shall be made of lumber which has been kiln-dried. Douglas-fir arms shall have an average moisture content of 19 percent or less, with a maximum not to exceed 22 percent. Southern Yellow Pine arms shall have an average moisture content of 22 percent or less, with a maximum not to exceed 30 percent.

(2) Moisture content levels shall be measured at about 1/4 the length and at a depth of about 1/5 the crossarm’s thickness. Additionally, the moisture content gradient between the shell (i.e. 1/4 of an inch (0.64 cm) deep) and the core (i.e. about 1 inch (2.54 cm) deep) shall not exceed 5 percentage points.

(3) A minimum of at least 20 solid sawn crossarms per treating charge
shall be measured to verify moisture content and shall be duly recorded by the quality control designee or independent inspector.

(4) The moisture content of lumber used in laminating shall, at the time of gluing, be within the range of 8 to 12 percent, inclusive.

(i) Preservatives. (1) The preservatives shall be:

(i) Creosote which conforms to the requirements of AWPA Standard P1 when analyzed in accordance with the methods in AWPA Standard A1, sections 2, 3, 4, either 5 or 9, and 6;

(ii) Pentachlorophenol which contains not less than 95 percent chlorinated phenols and conforms to AWPA Standard P8 when analyzed in accordance with AWPA Standard A5 or A9. The hydrocarbon solvents for introducing the preservative into the wood shall meet the requirements of AWPA Standard P9 Type A; or

(iii) Waterborne preservatives, which may only be one of the following:

(A) Ammoniacal Copper Arsenates (ACA) and Ammoniacal Copper Zinc Arsenate (ACZA) which shall meet the requirements of AWPA Standard P5, when analyzed in accordance with methods in AWPA Standards A2, A9, or A11; and

(B) Chromated Copper Arsenates (CCA) which shall meet the requirements of one of the formulations given in AWPA Standard P5, sections 4, 5 or 6, and 10. Tests to establish conformity shall be made in accordance with AWPA Standards A2, A9, or A11.

(1) The pH of treating solutions of the waterborne preservatives shown in AWPA Standard P5, section 10, shall be determined in accordance with AWPA Standard A2, section 8.

(2) Waterborne preservatives are available either as oxides, which form non-ionizing chemical compounds in the wood, or as salts, which leave ionizing compounds as well as non-ionizing compounds in the wood. Salt formulations of a waterborne preservative are more corrosive to metal than the oxide formulation and may cause surface deposits. Unless otherwise specified in the purchase order, the oxide formulations of waterborne preservatives shall be supplied.

(3) Douglas-fir crossarms shall not be treated with CCA preservatives.

(4) Materials treated with waterborne preservatives shall be free of visible surface deposits.

(iv) Copper Naphthenate (CuN) concentrate used to prepare wood preserving solutions shall contain not less than 6 percent nor more than 8 percent copper in the form of Copper Naphthenate and shall conform to AWPA Standard P8 when analyzed in accordance with AWPA Standard A5. The hydrocarbon solvents for introducing the preservative into the wood shall meet the requirements of AWPA Standard P9 Type A.

(2) [Reserved]

(j) Preservative treatment. (1) All timber products treated under this specification shall be treated by either a pressure or a thermal (nonpressure) process.

(2) These materials may be further conditioned by steaming, or by heating in hot oil (Douglas-fir), within the following limits:

<table>
<thead>
<tr>
<th>Time</th>
<th>Temperature Deg. F</th>
</tr>
</thead>
<tbody>
<tr>
<td>Steam</td>
<td>3</td>
</tr>
<tr>
<td>Heating in Preservative</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>220 (104.4C)</td>
</tr>
<tr>
<td></td>
<td>210 (98.9C)</td>
</tr>
</tbody>
</table>

(3) A final steam or hot oil bath may be used only to meet cleanliness requirements of paragraph (k) of this section. Total duration of the final steam bath shall not exceed 2 hours and the temperature shall not exceed 240 degrees Fahrenheit (115.6C).

(k) Results of treatments. (1) The quality control designee shall test or supervise the testing of each treated charge for penetration and retention.

(2) Method of sampling. When testing penetration and retention, a borer core shall be taken from not less than 20 crossarms in each treating charge. The borings shall be taken from any face except the top face at a point as close to the end as possible, being at least 3 inches (7.62 cm) from the end of the arm and no closer than 3 inches (7.62 cm) from the edge of the holes. The bored holes shall be plugged with preservative-treated plugs driven into the arm. Borings from laminated arms
shall not be taken from the same laminate unless there is an end joint separation.

(3) Penetration by the preservative, as determined in accordance with AWPA Standard A3, shall be 100 percent of the sapwood in crossarms. In the heartwood of Douglas-fir crossarms, the penetration shall be not less than 3 inches (7.62 cm) longitudinally from the edge of holes and ends, and at least 3/16 inch (0.45 cm) from the surface of any face.

(4) Retention of preservative in the outer 6/10 of an inch (1.52 cm) for Douglas-fir and one inch (2.54 cm) for Southern Yellow Pine assay zones at the treating plant shall be not less than:

<table>

</tr>
</tbody>
</table>

*This retention is for the lime ignition method. The copper pyridine method, retention 0.36 pcf, is required when timbers may have been in contact with salt water, and for all species native to the Pacific coast region. It is not required when it specifically states on the rough sawn material invoice that this timber material has not been in contact with salt water or is shown by analysis to have no additional chlorides present in the wood before treating.

(5) Cleanliness of lengthwise surfaces of all crossarms shall be free from tarry, greasy, or sticky material, and from oil exudation and pentachlorophenol crystallization (blooming).

(6) Re-treatment of materials which do not meet the penetration and retention requirements of this specification may be done only twice. Initial treatment steaming time plus re-treatment steaming time, combined, shall not exceed time allowed in paragraph (i) of this section.

(1) Marks and brands. (1) All crossarms shall be branded (hot brand) or die-stamped legibly and to a depth of approximately 1/16 of an inch (0.16 cm) before treatment.

(2) The letters and figures shall be not less than 1/2 of an inch (1.27 cm) in height. The top of the brand shall be oriented to the top of the arm.

(3) The brand or stamp shall include:

(i) The manufacturer’s identification symbol;

(ii) Month and year of manufacture;

(iii) Species of timber such as DF for Douglas-fir and SP for Southern Yellow Pine; and

(iv) The preservative notated with a C for creosote, P for penta, S for salts, or N for Copper Naphthenate.

(4) An example is:

M-6-72 Manufacturer—Month—Year
DF-P Douglas-fir—penta treated

(5) The mark should be approximately the same location on each type of crossarm of each producer.

(7) Brands, inspection marks, or quality assurance marks shall be removed from arms that do not meet these specifications.

(m) Storage. (1) Producers may treat crossarms for reserve stock under any of the RUS approved plans. Prior to treating reserve stock, and annually thereafter, producers shall notify the Director of the Electric Staff Division of the intent to treat reserve stock. The letter of notification shall be addressed to the Director, Electric Staff Division, Rural Utilities Service, Washington, DC 20250-1500.

(2) RUS shall acknowledge, by letter, each notification of intent to treat material for reserve stock under the RUS specification.

(3) RUS’s letter acknowledging the plant’s advance notice of intent to treat material for reserve treated stock for the calendar year in question shall be evidence of compliance with the notification requirements.

(4) Producers shall notify RUS of:

(i) The locations of all storage or distribution yards where reserve treated stock will be maintained;

(ii) The designation of the RUS-approved plan;

(iii) The name of the selected inspection agency, where applicable; and

(iv) Any changes that occur during the year.

(5) Crossarms treated with oil-borne preservatives which have been held in storage for more than 1 year before shipment to the borrower, shall be re-assayed before shipment and shall be
re-treated if found nonconforming for retention on orders placed in accordance with this section.

(6) The crossarms shall meet the assay after re-treatment in accordance with paragraph (k) of this section.

(7) Crossarms which are held in storage after final acceptance shall be stacked in piles or on skids in such a manner as to assure good ventilation. The stacks shall be covered or stored indoors for protection from the sun and weather to reduce checking, bending, and loss of preservative.

(8) Borrowers or their contractors shall not purchase reserve treated stock from plants that fail to comply with the notification requirements.

(n) Drawings. (1) The drawings of Exhibit B of this section, Crossarm Drilling Guide, have a type number and show in detail the hole size, shape, and pattern desired for crossarms ordered under this specification.

(2) Purchase orders shall indicate the type required.

(3) Crossarms shall be furnished in accordance with the details of these drawings or in accordance with drawings attached to the purchase order.

(4) Technical drawings for transmission crossarms are published in RUS Bulletin 1728F-T805B (formerly 50-1), Electric Transmission Specifications and Drawings, 115kV through 230kV, and RUS Bulletin 1728F-T805A (formerly 50-2), Electric Transmission Specification and Drawings, 34.5kV through 69kV.

(5) Appropriate drawings for transmission arms are to be specified and included with purchase orders.

(o) Destination inspection. (1) When cross-sectional tolerances are measured at destination, average shrinkage allowance shall be considered using the arm’s current moisture content and actual size.

(2) Using the average shrinkage allowances for Douglas-fir and Southern Yellow Pine as 1 percent size change for each four point moisture content change below the fiber saturation point, calculations can be made to determine if the arm met the minimum size at time of manufacture, when the arm was to meet the average moisture content.
EXHIBIT A TO § 1728.201—DISTRIBUTION AND TRANSMISSION ARMS

**DISTRIBUTION ARMS**

*Figure 1*

No knot shall exceed 3/4" for close grain and 1" for dense material in this top section.

NOTES:

1. Holes are to be located within ±1/8".
2. Length of the crossarm is to be within ±1/4".
3. The tolerance of the cross section is ±3/32" and -0" at time of manufacture.
4. All holes are to be drilled on centimeters of crossarm faces.

[58 FR 41396, Aug. 3, 1993]

(a) Scope. This specification describes in more detail the responsibilities and procedures pertaining to quality control for crossarms, as specified in §1728.201 of this part, and poles, covered in RUS Bulletin 1728F-700, incorporated by reference in §1728.97 of this part and in §1755.97 of 7 CFR part 1755.

(b) Related specifications and standards incorporated by reference. The following specifications and standards referenced throughout this section are incorporated by reference. This incorporation by reference is approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of each are available for inspection during normal business hours at RUS, room 1250-S, U.S. Department of Agriculture, Washington, DC 20250 or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. Copies of these standards and specifications may be purchased from the addresses shown below:

   (i) A1-91, Standard for Coal Tar Creosote for Land and Fresh Water Use.
   (v) A6-89, Method for the Determination of Water and Oil-Type Preservatives in Wood.
   (vi) A7-75, Wetashing Procedure for Preparing Wood for Chemical Analysis.
   (viii) A11-83, Analysis of Treated Wood and Treating Solutions by Atomic Absorption Spectroscopy.

(c) General stipulations. (1) Each RUS electric borrower shall submit to the Director, Electric Staff Division, Rural Utilities Service, room 1250-S, 14th and Independence Avenue, S.W., Washington, DC 20250-1500, in January of each year a list of plants from which it obtained poles or crossarms during the preceding calendar year.

(2) Ultimate quality control is the responsibility of the producer's management; however, a member of the producer's staff shall be designated quality control designee and charged with the responsibility for the exercise of proper quality control procedures. The requirements in American Wood Preservers' Association (AWPA) Standard M3, covering records, adequate laboratory, plant gauges, and other plant facilities including proper storage, shall be followed.

(3) The methods of inspection described in this section shall be used no matter which plan timber products are purchased under, i.e., Insured Warranty Plan, Independent Inspection Plan, or Quality Assurance Plans as described in §1728.201 of this part or RUS Bulletin 1728F-700. The number of poles and crossarms actually inspected by monitors for quality control under a Quality Assurance Plan or the Insured Warranty Plan may vary from the number of poles and crossarms inspected under the Independent Inspection Plan.

(4) Under the Independent Inspection Plan, the RUS borrower should designate in the purchase order which inspection agency it has selected. Unless the RUS borrower contracts for inspection as a separate transaction, the treating company shall obtain the services of the RUS borrower's designated inspection agency. For reserve treated stock for purchase under the Independent Inspection Plan, the treating company shall obtain the services of an inspection agency. Selection of and changes in inspection agencies for reserve treated stock shall be promptly reported to the Director, Electric Staff Division, Rural Utilities Service, Washington, DC 20250-1500, in accordance with RUS Bulletin 1728F-700, and §1728.201.

(5) Individual inspectors in the employ of Independent Inspection Agencies shall be experienced and competent. The inspector shall perform all phases of the inspection personally and in the proper sequence. The primary responsibility of the inspector is to determine, for the borrower, by careful inspection and verification, that the timber products, preservative, and treatment meet the requirements of RUS Bulletin 1728F-700 and Bulletin 1728H-701 and that the methods, storage facilities, and production equipment conform to applicable RUS specifications. For details of the recommended inspector's qualifications see appendix A of this section.

(i) Laminated material shall be inspected by a qualified inspection and testing agency.

(ii) Quality control of material shall be performed to determine conformance with §1728.201 of this part and AITC 200-83, Inspection Manual.

(d) Quality control and inspection procedures for product acceptance. It is the responsibility of the plant quality control designee to perform the following procedures to insure that a particular lot of material conforms to the requirements of the applicable RUS specification prior to treatment. After the plant quality control designee has performed these procedures, a particular lot of material shall be released to the inspector for verification of conformance.

(1) Poles can be purchased under any of the three purchase plans. These plans are Insured Warranty Plan, Independent Inspection Plan, or a Quality Assurance Plan. Under the Independent Inspection Plan, all poles in a lot shall
§ 1728.202

be inspected. Under the Insured Warranty Plan and a Quality Assurance Plan, the number of poles in a lot actually inspected may be less than every pole, depending on the terms of the plans.

(i) Ample space and assistance shall be provided by the treating plant for handling and turning to insure that the surfaces of all items can be adequately inspected.

(ii) Under the Independent Inspection Plan, all poles shall be inspected for conformance to the requirements of RUS Bulletin 1728F-700. If a pole is rejected and the cause of rejection is corrected, the rejected pole may be offered again for inspection as new material.

(iii) Dimensions, length, and circumference shall be measured by a standard steel pole tape to determine that they are in agreement with the details for class and length in the brand and butt stamp. If it is obvious by visual comparison with a measured pole that the brand information is correct, individual poles need not be measured. Pole circumference dimensions made prior to treatment shall govern acceptance. Reduction in dimension due to treatment and shipping shall be not more than 2 percent below the minimum for the pole class.

(iv) If 15 percent of the poles in a lot offered for inspection are defective, the inspector shall terminate the inspection. Re-examination of an entire lot by plant quality control shall be required when the number of rejected poles equals or exceeds 15 percent of the lot inspected. All defective or nonconforming poles either shall be removed from the lot or marked out.

(v) Poles in a lot inspected for decay shall be of the same seasoning condition. If the independent inspector suspects that decay has occurred, he shall cut a slice from both ends for closer examination. If 5 percent of the inspected poles in a lot shows evidence of decay, the entire lot shall be unconditionally rejected without further sorting.

(vi) Moisture content, when limited by the purchaser, as stated on the borrower's purchase order, shall be measured by calibrated electric moisture meter. Calibration of the meter shall include not only the zero settings for the X and Y readings, but also two resistance standards for 12 and 22 percent moisture content.

(vii) Material failing to conform for moisture content may be retested upon request after a recalibration of the instrument. The results of the second test shall govern disposition of the lot.

(viii) Re-examination for any mechanical damage or deterioration and for original acceptance shall be conducted on timber products not treated within 10 days after original inspection.

(2) Crossarms can be purchased only under either of two purchase plans. These plans are the Independent Inspection Plan or Quality Assurance Plans. Under the Independent Inspection Plan, crossarms are to be inspected prior to manufacture, during manufacture, and after treatment. Under a Quality Assurance Plan, crossarms are monitored according to the terms of the quality assurance program acceptable to RUS.

(i) Inspection prior to treatment shall include:

(A) Surface inspection of all ends of all arms. This is usually done on the stacks of arms prior to manufacture. Particular attention shall be paid to defects commonly found in the ends, such as compression wood, red heart and other forms of decay, shakes, splits, through checks, scantiness, honeycomb, and low density, determined by rings per inch (centimeter) and percent of summerwood. Whenever the number of nonconforming arms is found to exceed 0.5 percent of the lot or one arm, whichever is greater, the entire lot shall be rejected for excess number of defective ends. After the producer has removed or marked out the defective material, the arms may be resubmitted for inspection.

(B) Surface inspection of the lengthwise sides performed on a random representative sample. The sample size shall equal 20 percent of a lot size or 200 arms, whichever is smaller. The inspector shall examine side surfaces as they are slowly rotated. When necessary, the rotation may be stopped for closer inspection. Whenever the number of nonconforming arms is found to exceed 2 percent of the sample size, the entire lot shall be rejected. After the producer has removed or marked out
the defective material, the arms may be resubmitted for inspection.

(C) Check of moisture content of the random sample by a calibrated moisture meter.

(D) Check of crossarm dimensions of the random sample measured after surfacing.

(ii) Inspection during manufacture shall consist of:

(A) Checking bolt and insulator pin holes for squareness and excessive splintering;

(B) Checking brands for completeness, location, and legibility; and

(C) Checking arms for conformance.

(iii) Under the Independent Inspection Plan, there shall be a final inspection during and after treatment for preservative retention and penetration and for damage.

(3) Structural glued laminated timber shall be tested and inspected in accordance with AITC 200-83, Inspection Manual. Grade of lumber shall be inspected by a qualified grader for specified quality, and so marked, in accordance with grading rules of the American Lumber Standards. Adhesives used for all structural arms shall meet requirements of ANSI 05.2-83, paragraph 5.2. Melamine urea adhesives shall not be used. End joint spacings and limitations shall be in accordance with ANSI 05.2-83.

(e) Preservatives. (1) Creosote shall conform to the requirements of AWPA Standard P1 when analyzed by AWPA Standard A1, sections 2, 3, 4, either 5 or 9, and 6.

(i) Each occasional charge, all material treated in a cylinder at one time, shall be analyzed.

(ii) The first charge and one of every five charges randomly selected in consecutive charges shall be analyzed.

(2) Solutions of waterborne preservatives shall be analyzed for components in accordance with AWPA Standards A2, A9, or A11 and shall meet the requirements of P5 for composition. AWPA A2 shall be used as a referee method.

(3) Pentachlorophenol shall contain not less than 95 percent chlorinated phenols and conform to AWPA Standard P8 in hydrocarbon solvent AWPA P9 Type A.

(4) Copper Naphthenate in hydrocarbon solvent (AWPA P9 Type A) shall contain not less than 6 percent nor more than 8 percent copper in the form of Copper Naphthenate and conform to AWPA Standard P8 when analyzed in accordance with AWPA Standard A5.

(f) Plant facilities and inspection during treatment. (1) Manufacturing and treating plant facilities shall conform to AWPA Standard M3, paragraph 3. Pressure plants shall be equipped with recording instruments to register time, pressure, temperature and vacuum during each cycle of treatment. They shall also be equipped with indicating thermometers and pressure and vacuum gauges to check the accuracy of the recorders. Work tanks shall be equipped with a thermometer. Thermal treating vats shall be equipped with a time and temperature recorder and with an indicating thermometer. Temperature recording devices are not mandatory for plants treating exclusively with waterborne preservatives.

(2) Under the Independent Inspection Plan, the inspector shall be present during the treatment procedure, except at times when it may be impractical, such as during late night or early morning treatments. At such times, temperature, pressure, and vacuum data shall be taken from the recording charts.

(3) Recording instruments shall be checked with indicating gauges and thermometers. Inaccuracies shall be referred to the treating company for prompt correction. In the event of an inaccuracy, indicating possible damage to the material, the inspector shall reject the charge.

(g) Results of treatment. (1) Poles shall be tested for retention and penetration by means of a calibrated increment borer 0.2 inches (0.51 cm) ± 0.02 inches (0.05 cm) in diameter in accordance with procedures in AWPA Standard M2, paragraph 5.22. Under the Independent Inspection Plan, all treating charges shall be tested for retention and penetration. Plant quality control and independent inspection shall do their analyses separately. Under the Insured Warranty Plan and Quality Assurance Plans, the frequency of testing retention and penetration may vary according to the plan.
(i) Western red and northern white cedars and western larch poles shall be bored at any point of the periphery approximately 6-12 inches (15.24-30.48 cm) above ground line and all other species approximately 1 foot (30.48 cm) above or below the brand.

(ii) Penetration shall be determined in accordance with AWPA Standard A.3. Chrome Azurol S and Penta-Check shall be used to determine penetration of copper containing preservatives and penta, respectively.

(iii) Retention sampling. (A) When there are 20 or more poles in the treating charge, the retention sample for creosote shall consist of 20 assay zones from southern pine and Douglas-fir poles. All poles in charges with fewer than 20 poles shall be bored once. Charges with less than 15 poles shall be bored once and bored again on a random basis to obtain a minimum of 15 assay zones.

(B) Retention samples shall be taken from 20 poles in charges of 20 or more poles.

(C) Retention samples for Alaska yellow, western red, and northern white cedars shall be comprised of a minimum of 30 assay zones for creosote and waterborne preservatives. For penta charges of fewer than 30 poles, the sample shall contain the assay zone from each pole in the lot.

(D) Retention samples shall be comprised of borings, representative of pole volumes for each class and length in the charge. Further selection and marking of poles of mixed seasoning, volume, and location on the tram shall be made as illustrated in the following table:

<table>
<thead>
<tr>
<th>Number of Poles</th>
<th>Class/Length</th>
<th>Vol. in cu. ft.</th>

*If a portion of these poles were green and some partially seasoned, then the number of borings should reflect the approximate percentage of each.

(iv) When material in a lot consists of fewer pieces than the designated minimum number of samples for assay, additional borings shall be taken so as to make up at least the minimum sample, and in such manner that the sample is representative of the lot of material with respect to any variations in size, seasoning condition, or other features that might affect the results of treatment.

(v) Analyses for preservative retention shall be performed.

(A) Creosote shall be analyzed by AWPA Standard A.

(B) Penta shall be analyzed by AWPA Standard A5 or A9. Copper pyridine method is required when timber may have been in contact with salt water and for all species native to the Pacific coast region, unless the raw material invoice specifically states that the material either has not been in contact with salt water or has been shown by analysis to have contained no additional chlorides before treating.

(C) Copper Naphthenate shall be analyzed by tests in accordance with AWPA Standards A5 or A9.

(D) Waterborne preservatives shall be analyzed by tests in accordance with AWPA Standards A2, A7, A9, or A11.

(E) Prior to unloading a tram, the inspectors may take their own samples and analyze them concurrently with the quality control designee, but each shall work independently, and quality control data shall be presented before acceptance of the charge.

(vi) Penetration sampling of poles. (A) Group A poles consist of poles with a circumference of 37.5 inches (95.25 cm) or less at 6 feet (1.8 m) from butt.

(1) Bore 20 Group A poles or 20 percent of the poles, whichever is greater. Accept if 100 percent of the sample conform; otherwise, bore all poles.

(2) Re-treat the charge if more than 15 percent of the borings are found to be nonconforming.

(3) Re-treat all nonconforming poles if 15 percent or fewer fail the requirement.

(B) Group B poles consist of poles with circumference greater than 37.5 inches (95.25 cm) at or less than 6 feet (1.8 m) from butt.

(1) For Group B poles 50 feet (15.2 m) and shorter, bore each pole and re-treat only those found to be nonconforming, unless more than 15 percent fail; in that case, re-treat the entire lot.
Rural Utilities Service, USDA

§ 1728.202

(2) For Group B poles longer than 50 feet (15.2 m), bore each pole twice at 90 degrees apart around the pole and accept only those poles conforming to the penetration requirement in both borings. All nonconforming poles may be re-treated only twice.

(vii) All holes (nominal 0.2 of an inch (0.05 cm) diam. bit) shall be promptly filled with treated, tight-fitting wood plugs.

(2) Under the Independent Inspection Plan, all treating charges of crossarms shall be tested for retention and penetration. Plant quality control inspectors and independent inspectors shall do their analyses independently. Under the Quality Assurance Plans, the frequency of testing retention and penetration may vary according to the plan.

(i) The penetration and retention sample shall consist of 20 (48 for creosote) outer 6/10 of an inch (1.52 cm) for Douglas-fir and 1 inch (2.54 cm) for Southern Yellow Pine zones from borings taken from any face except the top face at a location as close to the end as possible being at least 3 inches (7.62 cm) from the end of the arm and no closer than 3 inches from the edge of any holes. For laminated material, borings shall be taken from laminates on a random basis.

(ii) Penetration shall be tested by taking not less than 20 borings from 20 crossarms in each charge, determined in accordance with AWPA Standard A3. Chrome Azurol S and Penta-Check shall be used to determine penetration of copper containing preservatives and penta, respectively.

(3) Laminated material shall be checked for any evidence of delamination due to treatment and for the identifying quality stamp of AITC or American Plywood Association (APA).

(4) When x-ray fluorescence (XRF) instruments are used to analyze preservative retention, Periodic Instrument Checks (PIC) shall be made by the treating plant and any outside inspection agency using the treating plant's instrument or its own. Appendix B of this section outlines a recommended procedure.

(5) At a minimum, treating plants shall perform the PIC weekly and record the results in the instrument's log, which shall be stored with the instrument. Independent inspection agencies shall use their own samples to perform the PIC on treater's instrument once per visit, not to exceed one PIC per week. Inspection agencies shall record their results in the instrument's log and state the date of its latest PIC on all treating reports.

(6) XRF instruments shall be accurate and reliable, and they shall generate reproducible results. Instruments shall have thorough instructions which should include recommendations on drying techniques, equipment, and density calculations. These drying recommendations shall be followed when using these instruments.

(h) Product acceptance. Under the Independent Inspection Plan, the inspector shall signify acceptance by marking each piece of accepted material with a clear, legible hammer stamp in one end prior to treatment and in the other end after treatment. The inspector shall personally mark each piece, and shall not delegate this responsibility to another person.

(i) Charge inspection reports. (1) Inspection Reports shall cover the following:

(i) The total pieces in the lot, number of and causes for rejection;

(ii) The conditioning of the material prior to treatment;

(iii) The analyses of preservative identified by the analyst's signature or certification;

(iv) The details of treatment; and

(v) The results of treatment. These results shall include the following:

(A) The depth of penetration for retention sample and a summary of all poles rejected for insufficient penetration;

(B) Worksheets for retention analyses, each identified by quality control designee and independent inspector;

(C) The number of pieces offered and rejected, together with the cause(s) for rejection;

(D) The date of latest Periodic Instrument Check.

(2) On each inspection report the independent inspector and the plant quality control designee shall certify, in writing, that the material listed on the report has been inspected before,
§ 1728.202

during, and after treatment, and that the preservative used was analyzed in accordance with the requirements of this section.

(3) Each inspector or inspection agency shall retain for a period of 1 year a copy or transcript of each report of inspection, together with laboratory worksheets covering retention by assay and preservative analyses for the purchaser, and on request shall furnish a copy or transcript of any of these reports to the Director, Electric Staff Division, Rural Utilities Service, Washington, DC 20250–1500.

(i) Charge numbers on re-treat poles. The letter “R” shall be added to the original charge number in the butts of all poles that are re-treated for insufficient penetration or retention of preservative. All poles that fail to meet treatment requirements after two re-treatments shall be permanently rejected.

(k) Safety provisions. Poles intended for RUS borrowers shall not be inspected when, in the opinion of the inspector, unsafe conditions are present.

APPENDIX A TO § 1728.202—RECOMMENDED INSPECTORS’ QUALIFICATIONS

(a) Inspection agencies should see that inspectors assigned to the inspection of timber products and treatment for RUS borrowers are competent and experienced.

(b) Recommended experience. In general, any of the following examples are recommended as minimum qualifying experience before a new inspector may be permitted to inspect timber products for RUS borrowers:

(1) Three years’ experience as an inspector of timber and the preservative treatment of timber.

(2) Three years’ experience in timber treating plant quality control work.

(3) Under the direct supervision of an experienced, well-qualified inspector, who has performed the following:

(i) Inspected at least 2,500 poles and/or crossarms “in the white.”

(ii) Checked preservative penetration results on at least 500 poles and crossarms.

(iii) Made at least 35 wood assays for preservative retention.

(iv) Made at least 25 analyses of each type preservative used on material the person is assigned to inspect.

(v) In both (b)(1) and (b)(2) of this appendix A, the experience should be not less than that required in (b)(3)(i), (b)(3)(ii), (b)(3)(iii), and (b)(3)(iv).

(4) Inspectors experienced in the inspections of one product, such as poles, should not be qualified to inspect another product, such as crossarms, until the above experience is gained.

(5) The inspector should be especially well-informed in wood preservation and the operation of a timber treating plant, and be competent in preservative analysis and other laboratory work.

(6) In all cases, an inspector should be thoroughly instructed in the application of RUS specifications and the standards pertaining thereto before being permitted to independently inspect timber products and the treatments applied to them. Knowledge of these specifications and standards, as well as the inspector’s proficiency, may be checked routinely by members of the RUS staff.

APPENDIX B TO § 1728.202—PERIODIC INSTRUMENT CHECK X-RAY FLUORESCENCE

(a) General. The following sample calibration standards and procedures may be used in lieu of comparison with analysis by wet ash or lime ignition methods.

(b) Penta. Until such time as AWPA approves calibration standards for penta, the following method should be used to run a salt water solution to measure CI (chloride).

(1) Standard Solution. Dry approximately 15 grams of reagent grade NaCl at 105°C for 1 hour. Weigh 10.00 grams into a tared beaker. Add distilled water until the total weight is 100.00 grams. Stir until completely dissolved. This will give a 10 percent weight to weight solution of NaCl.

(2) Baseline Check. (i) Insure that the instrument is in good agreement with lime ignition.

(ii) Record any user correction factors.

(iii) Stabilize and standardize the instrument.

(iv) Run the salt solution five times using the PENTA-01 calibration mode.

(v) Record the average and standard deviation of the values for percent penta. The average value will now be considered the nominal value.

(3) Periodic Instrument Check. Run the salt solution two times and average the results. If the value is more than ±5 percent of the nominal value, the instrument needs further calibration, following manufacturer’s recommendation.

(c) Waterborne preservatives. Treaters and inspection agencies should purchase AWPA Committee P-5 Standard Reference Materials to analyze on their instruments. Reference materials should be in the retention range of the material being produced at the plants. If the value is more than ±5 percent of the nominal value, the instrument needs further calibration. AWPA Committee P-5 Standard Reference Materials may be purchased from:
Rural Utilities Service, USDA

American Wood Preservers’ Association, P.O. Box 286, Woodstock, Maryland 21163, Phone: (410) 456-3169.

PART 1730—ELECTRIC SYSTEM OPERATIONS AND MAINTENANCE [RESERVED]

PART 1735—GENERAL POLICIES, TYPES OF LOANS, LOAN REQUIREMENTS—TELECOMMUNICATIONS PROGRAM

Subpart A—General

§ 1735.1 General statement.

(a) Subparts A through E of this part set forth the general policies, types of loans and loan requirements under the Telephone loan program.

(b) The standard RUS security documents (see 7 CFR 1744 subpart D or

1735.1 Required findings.
1735.2 Findings required for particular loan purposes.
1735.53–1735.59 [Reserved]

Subpart F—Mortgage Controls on Acquisitions and Mergers

1735.60 Specific provisions.
1735.61 Approval criteria.
1735.62 Approval of acquisitions and mergers.
1735.63–1735.69 [Reserved]

Subpart G—Acquisitions Involving Loan Funds

1735.70 Use of loan funds.
1735.71 Nonrural areas.
1735.72 Acquisition agreements.
1735.73 Loan design.
1735.74 Submission of data.
1735.75 Interim financing.
1735.76 Acquisition of affiliates.
1735.77 Release of loan funds, requisitions, advances.
1735.78–1735.79 [Reserved]

Subpart H—Acquisitions or Mergers Not Involving Additional Loan Funds

1735.80 Submission of data.
1735.81–1735.89 [Reserved]

Subpart I—Requirements for All Acquisitions and Mergers

1735.90 Preliminary approvals.
1735.91 Location of facilities.
1735.92 Accounting considerations.
1735.93 Notes.
1735.94 Final approval and closing procedure.
1735.95 Unadvanced loan funds.
1735.96–1735.99 [Reserved]

Subpart J—Toll Line Acquisitions

1735.100 Use of loan funds.
1735.101 With nonloan funds.

Editorial Note: Nomenclature changes to part 1735 appear at 55 FR 39397, Sept. 27, 1990.

Subpart A—General

§ 1735.1 General statement.

(a) Subparts A through E of this part set forth the general policies, types of loans and loan requirements under the Telephone loan program.

(b) The standard RUS security documents (see 7 CFR 1744 subpart D or
§ 1735.2 Definitions.

As used in this part:

Access line means a transmission path between user terminal equipment and a switching center that is used for local exchange service. For multiparty service, the number of access lines equals the number of lines/paths terminating on the mainframe of the switching center.

Acquisition agreement means the agreement, including a sales agreement, between the seller and purchaser outlining the terms and conditions of the acquisition. Acquisition agreements also include any other agreements, such as options and subsidiary agreements relating to terms of the transaction.

Administrator means the Administrator of RUS.

Advance of funds means the transferring of funds by RUS to the borrower’s construction fund.

Appropriated means funds appropriated based on subsidy.

Affiliate means an organization that directly, or indirectly through one or more intermediaries, controls or is controlled by, or is under common control with, the borrower.

Borrower means any organization which has an outstanding loan made or guaranteed by RUS, or which is seeking such financing.

Cash distribution means investments, guarantees, extensions of credit, advances, loans, non-affiliated company joint ventures, affiliated company investments, and dividend and capital credit distributions. Not included in this definition are qualified investments (see 7 CFR part 1744, subpart D).

Composite economic life as applied to facilities financed by loan funds means the weighted (by dollar amount of each class of facility in the loan) average economic life of all classes of facilities in the loan.

Consolidation means the combination of two or more borrower or non-borrower organizations, pursuant to state law, into a new successor organization that takes over the assets and assumes the liabilities of those organizations.

Construction fund means the RUS Construction Account required by § 2.4 of the standard loan contract into which all RUS loan funds are advanced.

Depreciation means the loss not restored by current maintenance, incurred in connection with the consumption or prospective retirement of telecommunications plant in the course of service from causes which are known to be in current operation, against which the company is not protected by insurance, and the effect of which can be forecast to a reasonable approach to accuracy.

Economic life as applied to facilities financed by loan funds, means the number of years resulting from dividing 100 percent by the depreciation rate (expressed as a percent) approved by the regulatory body with jurisdiction over the telephone service provided by the borrower for the class of facility involved or, if no approved rate exists, by the median depreciation rate expressed as a percent as published by RUS in its Statistical Report, Rural Telephone Borrowers for all RUS and RTB borrowers for that class of facility.

Feasibility study means the pro forma financial analysis performed by RUS to determine the economic feasibility of a loan. See 7 CFR part 1737.

Forecast period means the time period beginning on the date (base date) of the borrower’s balance sheet used in preparing the feasibility study and ending...
on a date equal to the base date plus the number of years estimated in the feasibility study for completion of the project. Feasibility projections are usually for 5 years, see §1737.70(a) of this chapter. For example, the forecast period for a loan based on a December 31, 1990 balance sheet and having a 5-year estimated project completion time is the period from December 31, 1990 to December 31, 1995.

Funded reserve means a separate asset account, approved by RUS, consisting of any or all of the following:

1. Federal government securities purchased in the name of the borrower;
2. Other securities issued by an institution whose senior unsecured debt obligations are rated in any of the top three categories by a nationally recognized rating organization; or
3. Cash.

GFR means the RUS general field representative.

Guaranteed loan means a loan guaranteed by RUS under section 306 of the RE Act bearing interest at a rate agreed to by the borrower and the lender.

Hardship loan means a loan made by RUS under section 305(d)(1) of the RE Act bearing interest at a rate of 5 percent per year.

Interim financing means funding for a project which RUS has acknowledged could be included in a loan, should said loan be approved, but for which RUS funds have not yet been made available. See 7 CFR part 1737, subpart E.

Loan means any loan made or guaranteed by RUS.

Loan contract means the loan agreement between RUS and the borrower, including all amendments thereto.

Loan funds means funds provided by RUS through direct or guaranteed loans.

Majority noteholders means the holder or holders of a majority in principal amount of the notes outstanding at a particular time.

Merger means the combining, pursuant to state law, of one or more borrower or nonborrower organizations into an existing survivor organization that takes over the assets and assumes the liabilities of the merged organizations. While the terms merger and consolidation have different meanings, for the purpose of this part, "mergers" also include consolidations as defined above. Furthermore, "mergers" also include acquisitions where the acquired systems, lines, or facilities and the acquiring system are operated as one system.

Mortgage means the security agreement between RUS and the borrower, including any amendments and supplements thereto.

Net worth means the sum of the balances of the following accounts of the borrower:

<table>
<thead>
<tr>
<th>Account names</th>
<th>Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Capital stock</td>
<td>4510</td>

</tr>
</tbody>
</table>

Note: For nonprofit organizations, owners' equity is shown in subaccounts of 4540 and 4550. All references regarding account numbers are to the Uniform System of Accounts (47 CFR part 32).

RUS cost-of-money loan means a loan made under section 305(d)(2) of the RE Act bearing an interest rate as determined under §1735.31(c). RUS cost-of-money loans are made concurrently with RTB loans.

RTB loan means a loan made by the Rural Telephone Bank (RTB) under section 408 of the RE Act bearing an interest rate as determined under 7 CFR 1610.10. RTB loans are made concurrently with RUS cost-of-money loans.

Rural area means any area of the United States, its territories and insular possessions (including any area within the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau) not included within the boundaries of any incorporated or unincorporated city, village or borough having a population exceeding 5,000 inhabitants. The population figure is obtained from the most recent data available, such as from the Bureau of the Census and Rand McNally and Company. For purposes of the "rural area" definition, the character of an area is determined as of a time the initial loan for the system is made.

Subscriber means the same as access line.

Survivor means (1) the successor corporation formed by the consolidation
§ 1735.3 Availability of forms.

Single copies of RUS forms and publications cited in this part are available from Program Support Regulatory Analysis, Rural Utilities Service, STOP 1522, 1400 Independence Ave., SW., Washington, DC 20250-1522. These RUS forms and publications may be reproduced. The terms “RUS form”, “RUS standard form”, and “RUS specification” have the same meanings as the terms “REA form” “REA standard form”, and “REA specification”, respectively, unless otherwise indicated.

§§ 1735.4–1735.9 [Reserved]

Subpart B—Loan Purposes and Basic Policies

§ 1735.10 General.

(a) The Rural Utilities Service (RUS) makes loans to furnish and improve telephone service in rural areas. Loans made or guaranteed by the Administrator of RUS will be made in conformance with the Rural Electrification Act of 1936 (RE Act), as amended (7 U.S.C. 901 et seq.), and 7 CFR chapter XVII. RUS provides borrowers specialized and technical accounting, engineering, and other managerial assistance in the construction and operation of their facilities when necessary to aid the development of rural telephone service and to protect loan security.

(b) RUS will not make hardship loans, RUS cost-of-money loans, or RTB loans for any purposes that, in RUS’s opinion, are inconsistent with the borrower achieving the requirements stated in the State’s telecommunications modernization plan within the time frame stated in the plan (see 7 CFR part 1751, subpart B), unless RUS has determined that achieving the requirements as stated in such plan is not technically or economically feasible.

(c) RUS will not deny or reduce a loan or an advance of loan funds based on a borrower’s level of general funds.

(d) No fees or charges are assessed for any type of loan or guarantee provided by RUS or the Rural Telephone Bank (RTB).
§ 1735.13 Location of facilities and service for nonrural subscribers.

(a) When it is determined by the Administrator to be necessary in order to furnish or improve telephone service in rural areas, loans may be made for the improvement, expansion, construction, acquisition, and operation of telephone lines, facilities, or systems without regard to their geographical location.

(b) To the greatest extent practical, loans are limited to providing telephone facilities that serve subscribers in rural areas. In order to furnish and improve service to rural subscribers it may at times be necessary to provide loan funds to finance telephone facilities which (1) will also serve nonrural subscribers, or (2) are located in nonrural areas. Loans may be approved to finance such facilities if the Administrator determines, on a case-by-case basis, that (i) the primary purpose of the loan is to provide service to rural areas and (ii) the financing of facilities for nonrural subscribers is necessary and incidental to furnishing or improving telephone service in rural areas.

(c) Loan funds may be approved for facilities to serve nonrural subscribers only if (1) the principal purpose of the loan is to furnish and improve rural service and (2) the use of loan funds to serve nonrural subscribers is necessary and incidental to the principal purpose of the loan. The following are examples of purposes for which such loans may be made (such loans are not limited to these examples):

(1) In the case of construction of a new system, if the loan would not be economically feasible and self-liquidating unless the nonrural as well as the rural portions of the telephone service area are included in the proposed system, the loan may include funds for both portions.

(2) Where the acquisition of an existing system located in and serving a nonrural area is necessary to serve as the nucleus of an expanded system to furnish area coverage service in rural areas.

(3) Production of increased service to rural subscribers.

(4) Development of technology to meet needs of rural subscribers.

(5) Availability of connections with other exchanges and with the interexchange facilities of the Nation.

(6) Any other criteria the Administrator determines to be applicable to the particular case.

§ 1735.12 Nonduplication.

(a) In states having a state regulatory body with authority to regulate telephone service and to require certificates of convenience and necessity, the borrower must obtain such a certificate before RUS will make a loan. Facilities or services not specifically covered by such certificate will be subject to the provisions of §1735.12(b).

(b) In states where there is no such regulatory body, a loan will not be made unless the Administrator determines that no duplication of lines, facilities, or systems already providing reasonably adequate services shall result from such a loan.

(c) RUS shall consider the following criteria in determining whether service is reasonably adequate:

(1) Availability of telephone service to commercial establishments, professional offices, essential community services, and residences in the community.

(2) Reasonable audibility and clarity of sound transmission and reception.

(3) Absence of frequent interruptions.

(4) Adequacy of line circuits and central office facilities to permit reasonably frequent subscriber use without unreasonable delay.

(5) Availability of connections with other exchanges and with the interexchange facilities of the Nation.

(6) Any other criteria the Administrator determines to be applicable to the particular case.

§ 1735.11 Area coverage.

Borrowers must make adequate telephone service available to the widest practical number of rural subscribers during the life of the loan. Both the nature of the service area and the cost per subscriber must be fully considered. The borrower must seek to provide service to all interested potential subscribers in the service area. Borrowers are not required to extend service in situations where the costs would be exorbitant. The loan contract shall contain appropriate provisions to effect this requirement. See 7 CFR 1737.11(a), Preapplication Determinations: Area to be Served.
areas, the loan may include funds to finance the acquisition.

(3) When a system is being converted to modern service for rural subscribers, the loan may include funds for the conversion of the nonrural facilities, if the rural service will be improved as a result of such nonrural improvements and it is impractical to finance and serve the nonrural and rural areas separately.

(4) A loan may include funds to serve nonrural subscribers located in community centers frequently called by the rural subscribers if the construction to serve such nonrural subscribers will be incidental to, and contribute substantially to, the provision of adequate service for the rural subscribers.

(d) RUS may also approve financing for facilities to serve nonrural areas if, at the time financing was first approved by RUS:

(1) The nonrural area had a population of 1,500 or less when first financed by RUS and that financing was approved prior to November 1, 1993; or

(2) The nonrural area had a population of 5,000 or less when first financed by RUS and that financing was approved on or after November 1, 1993.

§ 1735.15 Civil rights.

Borrowers are required to comply with certain regulations on nondiscrimination and equal employment opportunity. See RUS Bulletin 320-19 and RUS Bulletin 320-15, respectively.

§ 1735.16 Minimum loan amount.

Recognizing plant costs, the borrower's cost of system design, and RUS's administrative costs, RUS will not consider applications for loans of less than $50,000.

§ 1735.17 Facilities financed.

(a) RUS makes hardship and guaranteed loans to finance the improvement, expansion, construction, acquisition, and operation of systems or facilities (including station apparatus owned by the borrower, headquarters facilities, and vehicles not used primarily in construction) to furnish and improve telephone service in rural areas, except as noted under paragraph (c) of this section.

(b) RUS makes concurrent RUS cost-of-money and RTB loans to finance the improvement, expansion, construction, and acquisition of systems or facilities (excluding station apparatus owned by the borrower, headquarters facilities, and vehicles not used primarily in construction) to furnish and improve telephone service in rural areas, except as noted under paragraph (c) of this section.

(c) RUS will not make any type of loan to finance the following items:

(1) Station apparatus (including PBX and key systems) not owned by the borrower and any associated inside wiring;

(2) Certain duplicative facilities, see §1735.12;

(3) Facilities to serve subscribers outside the local exchange service area of the borrower unless those facilities are necessary to furnishing or improving telecommunications service within the borrower's service areas;

(4) Facilities to provide service other than 1-party; and

(5) System designs or facilities to provide service that cannot withstand or are not designed to minimize damage caused by storms and other natural catastrophes, including, but not limited to hurricanes, floods, tornadoes,
mudslides, lightning, windstorms, hail, fire, and smoke, unless an alternate design or facility for modern telecommunications is more economically or technically feasible. Economic and technical feasibility will be determined using total long range economic costs and risk analysis.

(d) If an unadvanced loan, or portion thereof, is rescinded, a new loan shall not be made for the same purposes as in the rescinded loan, except as provided in §1735.47.

§1735.18 Additional equity.

If determined by the Administrator to be necessary for loan security, a borrower applying for an initial loan shall increase its net worth as a percentage of assets to the highest level recorded, not to exceed 40 percent, at the end of any calendar quarter in the period beginning 2 years prior to the receipt by RUS of the borrower's loan application form (RUS Form 490). This restoration to the higher level of net worth shall take place before RUS will determine the feasibility of the proposed loan.

§1735.19 Mergers and consolidations.

RUS does not make loans for the sole purpose of merging or consolidating telephone organizations. After a merger or consolidation, RUS will consider making loans to the telephone system to finance the improvement or extension of telephone service in rural areas. See RUS Bulletins 320-4, 321-2, 325-1, and 326-1.

§1735.20 Acquisitions.

(a) RUS finances the acquisition by a borrower of another system, lines, or facilities only when the acquisition is necessary and incidental to furnishing or improving rural telephone service. See 7 CFR 1735.13.

(b) RUS determines the amount it will lend for each acquisition. If the acquisition price exceeds this amount, the borrower shall provide the remainder.

(c) For additional policies on acquisitions, see subpart F through J of this part.

§1735.21 Refinancing loans.

(a) Hardship loans and guaranteed loans may include funds to refinance outstanding indebtedness of corporations furnishing telephone service when such refinancing is necessary and incidental to furnishing or improving telephone service in rural areas. Refinancing may not constitute more than 40 percent of the loan.

(b) Loans for refinancing are not made solely to enable borrowers to obtain a lower interest rate or a longer amortization period. RUS requires borrowers, to the greatest extent possible, to liquidate outstanding indebtedness through the use of nonloan funds.

(c) If deemed necessary by RUS to provide itself with adequate security, RUS will consider loans for refinancing outstanding indebtedness secured by a lien on property offered as security for the loan, if the property covered by the lien is integral to the operation of the system.

(d) RUS will consider loans for refinancing when the borrower would otherwise be unable to meet payments on both the outstanding indebtedness and the loan as they become due.

(e) RUS may consider loans for refinancing in other situations.

§1735.22 Loan security.

(a) RUS makes loans only if, in the judgment of the Administrator, the security therefor is reasonably adequate and the loan will be repaid within the time agreed. See 7 CFR 1735.18 and 7 CFR 1735.51.

(b) RUS generally requires that borrowers provide it with a first lien on all of the borrower's property. See 7 CFR 1735.46.

(c) In the case of loans that include the financing of telephone facilities that do not constitute self-contained operating systems or units (such as lines switched by other systems), the
borrower shall, in addition to the mortgage lien on all of the borrower's telephone facilities, furnish adequate assurance, in the form of contractual or other security arrangements, that continuous and efficient telephone service will be rendered.

(d) The borrower shall provide RUS with a satisfactory Area Coverage Survey. See 7 CFR 1737.30 and 1737.31.

(e) RUS makes loans only if the borrower's entire system, including the facilities to be constructed with the proceeds of the loan, is economically feasible, as determined by RUS.

(f) For purposes of determining compliance with TIER requirements, unless a borrower whose existing mortgage contains TIER maintenance requirements notifies RUS in writing differently, RUS will apply the requirements described in paragraph (g) of this section to the borrower regardless of the provisions of the borrower's existing mortgage.

(g) For loans approved after October 6, 1997 loan contracts and mortgages covering hardship loans, RUS cost-of-money loans, RTB loans, and guaranteed loans will contain a provision requiring the borrower to maintain a TIER of at least 1.0 during the Forecast Period. At the end of the Forecast Period, the borrower shall be required to maintain, at a minimum, a TIER at least equal to the projected TIER determined by the feasibility study prepared in connection with the loan, see 7 CFR part 1737, subpart H; and

(1) The average number of proposed subscribers per mile of line in the service area of the borrower is not more than 4;

(2) The borrower has a projected TIER (including the proposed loan or loans) of at least 1.0, but not greater than 3.0, as determined by the feasibility study prepared in connection with the loan, see 7 CFR part 1737, subpart H; and

(3) The Administrator has approved and the borrower is participating in a telecommunications modernization plan for the state, see 7 CFR part 1751, subpart B.

(h) Nothing in this section shall affect any rights of supplemental lenders under the RUS mortgage, or other creditors of the borrower, to limit a borrower's TIER requirements to a level below that established in paragraph (g) of this section.

(i) A borrower will not be required to raise its TIER as a condition for receiving a loan. Additional financial, investment, and managerial controls appear in the loan contract and mortgage required by RUS.

§§ 1735.23—1735.29 [Reserved]

Subpart C—Types of Loans

§ 1735.30 Hardship loans.

(a) RUS makes hardship loans under section 305(d)(1) of the RE Act. These loans bear interest at a rate of 5 percent per year. To qualify for a hardship loan on or after November 1, 1993, a borrower must meet each of the following requirements:

(1) The average number of proposed subscribers per mile of line in the service area of the borrower is not more than 4;

(2) The borrower has a projected TIER (including the proposed loan or loans) of at least 1.0, but not greater than 3.0, as determined by the feasibility study prepared in connection with the loan, see 7 CFR part 1737, subpart H; and

(3) The Administrator has approved and the borrower is participating in a telecommunications modernization plan for the state, see 7 CFR part 1751, subpart B.

(b)(1) Hardship loan funds shall not be used to finance facilities located in any exchange of the borrower that has:

(i) More than 1,000 existing subscribers; and

(ii) An average number of proposed subscribers per mile of line greater than 17.

(2) Those facilities may, however, be financed with concurrent RUS cost-of-money and RTB loans or a guaranteed loan if the borrower is eligible for such financing.

(c) The Administrator may waive the TIER requirement in paragraph (a)(2) of this section in any case in which the Administrator determines, and sets forth the reasons therefor in writing, that the requirement would prevent emergency restoration of the telephone system of the borrower or result in severe hardship to the borrower.

(d) In order to fairly and equitably approve hardship loans to ensure that borrowers most in need receive hardship financing first, RUS will prioritize for approval all applications qualifying for hardship loans. The criteria in this paragraph will be used by the Administrator to rank, from high to low, applications that have been determined to
qualify for hardship financing. Subject to the availability of funds, applications receiving the highest number of points will be selected for loan approval each fiscal year quarter (the application with the most points will be approved first, the second highest next, etc.). The following ranking methodology and loan approval conditions apply:

(1) Ranking criteria. Borrowers will receive points based on each of the following criteria applicable to the proposed loan:

(i) Forecasted Average Number of Subscribers Per Mile of Line (Density). The number of points assigned to a borrower will be the value 4 less the value of the borrower’s forecasted density as determined by the Feasibility Study prepared in connection with the loan (i.e., if a borrower’s forecasted system density is 2.75, the borrower would receive 4 less 2.75 points, or 1.25 points).

(ii) Forecasted TIER. The number of points assigned to a borrower will be the value 3 less the value of the borrower’s forecasted TIER as determined by the Feasibility Study prepared in connection with the loan (i.e., if a borrower’s forecasted TIER is 1.75, the borrower would receive 3 less 1.75 points, or 1.25 points).

(iii) Unserved Territories. Borrowers will receive points for loan funds included in the application to provide telephone service in areas previously unserved because it was considered cost prohibitive (for example, high costs resulting from the terrain, remoteness, or system design). In particular, borrowers will receive one tenth of a point, up to a maximum of 2 points, for each subscriber added (in connection with the loan) that currently resides in an unserved area.

(iv) Plant Modernization. Borrowers will receive 1 point for loan funds included in the application to provide one of the following basic plant modernizations or system improvements:

(A) Providing digital switching capabilities where those capabilities did not previously exist; and/or

(B) Upgrading to equal access; and/or

(C) Conversion of service to 1-party making an entire exchange all 1-party service.

(v) Distance Learning and Medical Link Facilities. Borrowers will receive 2 points for loan funds included in the application for the purpose of providing distance learning or medical link transmission facilities. If loan funds are included for both distance learning and medical link transmission facilities, borrowers will receive 3 points. (See 7 CFR part 1703 for definitions of distance learning and medical link.)

(vi) Time Factor. If a borrower’s application has been ranked but cannot be approved due to the lack of funds available for loans in that quarter, the borrower will receive .25 points for each quarter in which its loan is pending but not approved.

(2) Ranking and approval of loans. Eligible loan applications (satisfying the requirements of 7 CFR 1737.21) will be ranked during the quarter in which the application is received. If an application is received in which insufficient time remains in that quarter to process and rank the application, it will be ranked in the next quarter. At the beginning of the quarter and as soon as practical, RUS will approve all eligible hardship loans ranked in the previous quarter to the extent loan funds are available, beginning with the borrowers that received the highest number of points and working downwards. Any qualified application that is not approved due to the lack of funds will be carried forward to the next quarter and ranked with all other eligible hardship loan applications in that quarter. Upon completion of the ranking and approval of loans, all borrowers will be informed in writing of the status of their loan applications.

(e) Optimal use of funds. RUS retains the right to limit the size of hardship loans made to individual borrowers in order to more equitably distribute the amount of hardship funds appropriated among the greatest number of qualified borrowers. Generally, no more than 10 percent of the funds appropriated in any fiscal year may be loaned to a single borrower. In addition, RUS retains the right to approve loans to borrowers that are ranked lower in the priority system, or without regard to when the application was received and ranked, if it is necessary to:
§ 1735.31 RUS cost-of-money and RTB loans.

(a) RUS makes cost-of-money loans, under section 305(d)(2) of the RE Act, concurrently with RTB loans made under section 408 of the RE Act. To qualify for concurrent RUS cost-of-money and RTB loans on or after November 1, 1993, a borrower must meet each of the following requirements:

(1) The average number of proposed subscribers per mile of line in the service area of the borrower is not more than 15, or the borrower has a projected TIER (including the proposed loans) of at least 1.0, but not greater than 5.0, as determined by the feasibility study prepared in connection with the loans, see 7 CFR part 1737, subpart H; and

(2) The Administrator has approved and the borrower is participating in a telecommunications modernization plan for the state, see 7 CFR part 1751, subpart B.

(b) The loan amounts from each program (RUS cost-of-money and RTB, including amounts for class B stock) will be proportionate to the total amount of funds appropriated for the fiscal year for RUS cost-of-money loans and RTB loans. To determine the RUS cost-of-money portion, the total loan amount will be multiplied by the ratio of RUS cost-of-money funds appropriated for the fiscal year to the sum of RUS cost-of-money and RTB funds appropriated for the fiscal year in which the loan is approved. The same method would be used to calculate the RTB portion (see 7 CFR 1610.6(b)). If during the fiscal year the amount of funds appropriated changes, the ratio will be adjusted accordingly and applied only to those loans approved afterwards.

(c) The RUS cost-of-money loan shall bear interest as described in paragraphs (c)(1) and (c)(2) of this section (the actual rate of interest on the RTB loan shall be determined as provided in 7 CFR 1610.10):

(1) Each advance of funds included in RUS cost-of-money loans shall bear interest at a rate (the "Cost of Money Interest Rate") equal to the current cost of money to the Federal Government for loans of a similar maturity. The Cost of Money Rate is determined when the funds are advanced to the borrower but cannot exceed 7 percent per year.

(2) RUS shall use the Federal Treasury Statistical Release (the "Statistical Release") issued by the United States Treasury to determine the interest rate for each advance of RUS cost-of-money loan funds. Generally, the Statistical Release is issued each Monday to cover the preceding week. RUS shall determine the Cost of Money Interest Rate as follows:

(i) Each advance shall bear the interest rate stated in the applicable Statistical Release for Treasury constant maturities with a maturity similar to that of the advance.

(ii) RUS shall determine the interest rate for an advance bearing a maturity other than those stated in the applicable Statistical Release by straight-line interpolation between the next higher and next lower stated maturities.

(iii) The first Statistical Release published after the date of an advance shall apply to that advance.

(iv) If the interest rate determined under paragraph (c)(2)(i) or (c)(2)(ii) of this section is higher than 7 percent, then the advance shall bear interest at the rate of 7 percent per year.

(v) Advances with maturities greater than 30 years shall bear interest at the rate stated in the applicable Statistical Release for 30-year maturities.

(vi) RUS may use an alternative method to determine the Cost of Money Interest Rate if the Treasury ceases to issue the Statistical Release or changes its format or frequency of issue so that it is no longer appropriate for use in the manner described in paragraph (c)(2) of this section. In this
eventuality, RUS shall immediately notify all borrowers with unadvanced RUS cost-of-money loan funds. RUS may, with the borrower’s consent, determine the Cost of Money Interest Rate on a case-by-case basis for subsequent advances of RUS cost-of-money loan funds but may also decide, in its discretion, that it is unable to continue advancing funds until an alternative method is in effect.

(vii) Refer to §1735.43(a) for additional information on maturities of RUS loans.

(viii) RUS shall provide borrowers with prompt written confirmation of the Cost of Money Interest Rate borne by each advance of funds included in a RUS cost-of-money loan.

(d) Generally, no more than 10 percent of lending authority from appropriations in any fiscal year for RUS cost-of-money and RTB loans may be loaned to a single borrower. RUS will publish by notice in the FEDERAL REGISTER the dollar limit that may be loaned to a single borrower in that particular fiscal year based on approved RUS and RTB lending authority.

(e) On request of any borrower who is eligible for concurrent RUS cost-of-money and RTB loans for which funds are not available, the borrower shall be considered to have applied for a loan guarantee under section 306 of the RE Act.

(f) Concurrent RUS cost-of-money and RTB loans may be made simultaneously with hardship loans or guaranteed loans.

§ 1735.32 Guaranteed loans.

(a) General. Loan guarantees under this section will be considered for only those borrowers specifically requesting a guarantee. Borrowers may also specify that the loan to be guaranteed shall be made by the Federal Financing Bank (FFB). RUS provides loan guarantees pursuant to section 306 of the RE Act. Guaranteed loans may be made simultaneously with hardship loans or concurrent RUS cost-of-money and RTB loans. No fees or charges are assessed for any guarantee of a loan provided by RUS. In view of the Government’s guarantee, RUS generally obtains a first lien on all assets of the borrower (see §1735.46).

(b) Requirements. To qualify for a guaranteed loan, a borrower must have a projected TIER (including the proposed loan or loans) of at least 1.2 as determined by the feasibility study prepared in connection with the loan. In addition, a borrower must meet all requirements set forth in the regulations applicable to a loan made by RUS with the exception that it is not required to participate in a state telecommunications modernization plan and is not subject to a subscriber per mile eligibility requirement, as provided in §1735.31(a).

(c) Net worth requirements. RUS generally requires that borrowers seeking guaranteed loans have a net worth in excess of 20 percent of assets. RUS will, however, consider loan guarantees for borrowers with a net worth less than 20 percent.

(d) Full amount guaranteed. Loans are guaranteed in the full amount of principal and interest. Because of the Government’s full faith and credit 100 percent guarantee of these loans, only RUS obtains a mortgage on the borrower’s assets.

(e) Federal Register notice. After RUS has reviewed an application and determined that it shall consider guaranteeing a loan for the proposed project and if the borrower has not specified that the loan be made from the FFB, RUS shall publish a notice in the FEDERAL REGISTER. The Notice will include a description of the proposed project, the estimated total cost, the estimated amount of the guaranteed loan, a statement that the Federal Financing Bank (FFB) has a standing loan commitment agreement with RUS, and the name and address of the borrower to which financing proposals may be submitted.

(f) Qualified lenders. RUS considers loan guarantees on a case by case basis for loans made by the FFB and any other legally organized lending agency or by a combination of lenders that the Administrator determines to be qualified to make, hold and service the loan. “Legally organized lending agency” and “lender” include commercial banks, trust companies, mortgage banking firms, insurance companies,
and any other institutional investor authorized by law to loan money. The borrower is responsible for evaluating all proposals received from lenders other than FFB. The borrower furnishes RUS with a report on the evaluations and its choice of proposals. However, at the request of the borrower, the guaranteed loan shall be made by the FFB.

(g) Interest rate. Guaranteed loans shall bear interest at the rate agreed upon by the borrower and lender. Guaranteed FFB loans shall be at a rate of interest that is not more than the rate of interest applicable to other similar loans then being made or purchased by FFB.

(h) Condition of guarantee. RUS will not guarantee a loan if the income from the loan or the income from obligations issued by the holder of the loan, when the obligations are created by the loan, is excluded from gross income for the purpose of chapter I of the Internal Revenue Code of 1954.

(i) Contract of guarantee. If RUS is satisfied with the engineering and economic feasibility of the project and approves the borrower's choice of proposal, subject to the submission of satisfactory financing documents and to the satisfaction of other pertinent terms and conditions, RUS will prepare a contract of guarantee to be executed by the borrower, the lender, and RUS within a specified time. The lender, or its representative, shall have the right to examine the borrower's application and supporting data submitted to RUS in support of its request for financial assistance.

(j) Loan servicing. The contract of guarantee will require that arrangements satisfactory to RUS be made to service the loan. Required servicing by the lender will include:

(1) Determining that all prerequisites to each advance of loan funds by the lender under the terms of the contract of guarantee, all financing documents, and all related security instruments have been fulfilled. Such determinations may be met by obtaining RUS approval of each advance.

(2) Billing and collecting loan payments from the borrower.

(3) Notifying the Administrator promptly of any default in the payment of principal and interest on the loan and submitting a report, as soon as possible thereafter, setting forth its views as to the reasons for the default, how long it expects the borrower will be in default, and what corrective actions the borrower states it is taking to achieve a current debt service position.

(4) Notifying the Administrator of any known violations or defaults by the borrower under the lending agreement, contract of guarantee, or related security instruments, or conditions of which the lender is aware which might lead to nonpayment, violation, or other default.

(k) Payments under the contract of guarantee. Upon receipt of the notification required in §1735.32(j)(3) of this section, RUS will pay the lender the amount in default with interest to the date of payment. When RUS has made a payment under a contract of guarantee, it will establish in its accounts the amount of the payment as due and payable from the borrower, with interest at the rate of interest specified in the lending agreement. RUS will work with the borrower and the lender in an effort to eliminate the borrower's default as soon as possible. RUS may also proceed with other remedies available under its security instruments.

(l) Pledging of contract of guarantee. Subject to applicable law, RUS will consider, on a case by case basis, permitting pledging of the contract of guarantee in order to facilitate the obtaining of funds by the lending agency to make the guaranteed loan.

§ 1735.33 Variable interest rate loans.

After June 10, 1991, and prior to November 1, 1993, RUS made certain variable rate loans at interest rates less than 5 percent but not less than 2 percent. For those borrowers that received variable rate loans, this section describes the method by which interest rates are adjusted. The interest rate used in determining feasibility is the rate charged to the borrower until the end of the Forecast Period for that
§ 1735.43 Payments on loans.

(a) Except as described in this paragraph (a), RUS loans approved after October 6, 1997 must be repaid with interest within a period that, rounded to the nearest whole year, equals the expected composite economic life of the facilities to be financed, as calculated by RUS; expected composite economic life means the depreciated life plus three years. The expected composite economic life shall be based on the depreciation rates for the facilities financed by the loan. In states where the borrower must obtain state regulatory commission approval of depreciation rates, the depreciation rates used shall be the rates currently approved by the state commission or rates for which the borrower has received state commission approval. In cases where a state regulatory commission does not approve depreciation rates, the expected composite economic life shall be based on the most recent median depreciation rates published by RUS for all borrowers (see 7 CFR 1737.70). Borrowers may request a repayment period that is longer or shorter than the expected composite economic life of the facilities financed. If the Administrator determines that a repayment period based on the expected composite economic life of the facilities financed is likely to cause the borrower to experience hardship, the Administrator may agree to approve a period longer than requested. A shorter period may be approved as long as the Administrator determines that the loan remains feasible.

(b) Borrowers with RTB loans approved after October 6, 1997 with a maturity that exceeds the expected composite economic life of the facilities to be financed by the loan by a period of more than three years, release of funds included in the loan shall be conditioned upon the borrower establishing and maintaining, pursuant to a plan approved by RUS, a funded reserve in such an amount that the balance of the reserve plus the value of the facilities
§ 1735.44 Prepayment premiums.

The loan documents normally provide that RUS insured loans may be repaid in full at any time without prepayment premiums. Depending upon the lender, there may be prepayment premiums on loans guaranteed by RUS. See 7 CFR part 1610 for prepayment premiums on RTB loans. See RUS Bulletin 320-12 for additional information. This CFR part supersedes those portions of RUS Bulletin 320-12, “Loan Payments and Statements” with which it is in conflict.

§ 1735.45 Extension of payments.

RUS may extend the time of payment of principal or interest on a loan. Under section 12 of the Rural Electrification Act, as amended, this extension may be up to 5 years after such payment is due. Under section 236 of the Disaster Relief Act of 1970 (Pub. L. 91-606) payment may be deferred by the Secretary of Agriculture as long as necessary in disaster situations so long as the final maturity date is not later than 40 years after the date of the loan.
§ 1735.46 Loan security documents.

(a) Loans are to be repaid according to their terms. RUS generally obtains a first lien on all assets of the borrower. This lien shall be in the form of a mortgage by the borrower to the Government or a deed of trust made by and between the borrower and a trustee, satisfactory to the Administrator, together with such security agreements, financing statements, or other security documents as RUS may deem necessary in a particular case. Where a borrower is unable by reason of pre-existing encumbrances, or otherwise, to furnish a first mortgage lien on its entire system the Administrator may, if he determines such security to be reasonably adequate and the form and nature thereof otherwise appropriate, accept other forms of security. See RUS Bulletins 320-4, 320-22, 321-2, 322-2, 323-1, and 326-1 for details. See 7 CFR part 1744, subpart B for information on lien accommodations and subordinations.

(b) Loan security documents of borrowers with loans approved after October 6, 1997 will provide limits on allowable cash distributions in any calendar year as follows:

1. No more than 25 percent of the prior calendar year’s net earnings or margins if the borrower’s net worth is at least 1 percent of its total assets after the distribution is made;
2. No more than 50 percent of the prior calendar year’s net earnings or margins if the borrower’s net worth is at least 20 percent of its total assets after the distribution is made;
3. No more than 75 percent of the prior calendar year’s net earnings or margins if the borrower’s net worth is at least 30 percent of its total assets after the distribution is made;
4. No limit on distributions if the borrower’s net worth is at least 40 percent of its total assets after the distribution is made.

(c) Borrowers that have not received a loan after October 6, 1997 may request the Administrator to apply these requirements to them. Borrowers may request in writing that RUS substitute the new requirements described in paragraphs (b)(1) through (b)(4) of this section. Upon request by the borrower, the provisions of the borrower’s loan documents restricting cash distributions or investments shall not be enforced to the extent that such provisions are inconsistent with this section.

(d) Rural development investments meeting the criteria set forth in 7 CFR part 1744, subpart D, will not be counted against a borrower’s allowable cash distributions in any calendar year (7 U.S.C. 926).

(e) References to a borrower’s mortgage in this section include deeds of trust and any other loan document applying the same requirements to a borrower.

(f) This section does not limit the rights of any parties to the mortgage other than RUS or RTB.

§ 1735.47 Rescissions of loans.

(a) Rescission of a loan may be requested by a borrower at any time. To rescind a loan, the borrower must demonstrate to RUS that:

1. The purposes of the loan being rescinded have been completed;
2. Sufficient funds are available from sources other than RUS, RTB or FFB to complete the purposes of the loan being rescinded; or
3. The purposes of the loan are no longer required to extend or improve telephone service in rural areas.

(b) Borrowers submitting loan applications containing purposes previously covered by a loan that has been rescinded shall include in the application an explanation, satisfactory to RUS, of the change of conditions since the rescission that re-establishes the need for those purposes.

(c) RUS shall not initiate the rescission of a loan unless all of the purposes for which telephone loans have been made to the borrower under the Act have been accomplished with funds provided under the Act.

§§ 1735.48—1735.49  

§§ 1735.48—1735.49 [Reserved]  

Subpart E—Basic Requirements  
For Loan Approval  

§ 1735.50 Administrative findings.  

The RE Act requires that the Administrator make certain findings to approve a telephone loan or loan guarantee. The borrower shall provide the evidence determined by the Administrator to be necessary to make these findings. Details on the information required to support these findings are included in 7 CFR part 1737.  

§ 1735.51 Required findings.  

(a) Feasibility of and security for the Loan. The borrower shall provide RUS with satisfactory evidence to enable the Administrator to determine that the security for the loan is reasonably adequate and the loan will be repaid on time. This finding is based on the following factors:  

(1) Self-liquidation of the loan within the loan amortization period; this requires that there be sufficient revenues from the borrower’s system, in excess of operating expenditures (including maintenance and replacement), to repay the loan with interest.  

(2) Reasonable assurance of achieving the telephone market projections upon which the loan is based.  

(3) Economic feasibility (based on projected revenues, expenses, net income, maximum debt service, and rate of return on investment) for the proposed system using local service rate schedules appropriate for the area served.  

(4) Impact of the proposed loan and construction on the ratio of the borrower’s secured debt to assets.  

(5) Projected growth in the borrower’s equity.  

(6) Satisfactory experience and reputation of the system’s principal owners and manager.  

(7) A first lien on the borrower’s total system or other adequate security.  

(8) Fair market value of the borrower’s assets as represented in its financial reports to RUS.  

(9) Appropriate financial and managerial controls included in the loan documents.  

(10) Other factors determined to be relevant by RUS.  

(b) Area coverage. The borrower shall provide RUS with satisfactory evidence to enable the Administrator to determine that adequate telephone service will be made available to the widest practical number of rural users during the life of the loan.  

(c) Nonduplication or certificate requirement. The borrower shall provide RUS with satisfactory evidence to enable the Administrator to determine that no duplication of service shall result from a particular loan for those borrowers not required by the state regulatory commission to have a certificate of convenience and necessity (or its equivalent). For borrowers required to have a certificate of convenience and necessity, all portions of the existing and proposed system must be covered by the certificate.  

§ 1735.52 Findings required for particular loan purposes.  

(a) Refinancing. For loans that include funds to refinance outstanding indebtedness of the borrower, the borrower shall provide RUS with satisfactory evidence to enable the Administrator to determine that the inclusion in the loan of such funds shall be necessary and incidental to furnishing or improving telephone service in rural areas. See 7 CFR 1735.21.  

(b) Facilities for nonrural areas. Whenever a borrower proposes to use loan funds for the improvement, expansion, construction, or acquisition of telephone facilities within or for nonrural areas, the borrower shall provide RUS with satisfactory evidence to enable the Administrator to determine that such funds shall be necessary and incidental to furnishing or improving telephone service in rural areas.
§ 1735.60 Specific provisions.

(a) The standard form of RUS mortgage contains certain provisions concerning mergers and acquisitions:

(1) Article II, section 4(a) requires the borrower to obtain the written approval of the majority note holders before taking any action to reorganize, or to consolidate with or merge into any other corporation.

(2) Article II, section 4(b), if made applicable, provides certain exceptions to the requirements of section 4(a).

(b) Similar provisions are contained in other forms of documents executed by borrowers that have not entered into the standard form of mortgage.

(c) Mortgages and loan contracts may contain other provisions concerning mergers and acquisitions.

§ 1735.61 Approval criteria.

(a) If a borrower is required by the terms of its mortgage or loan contract to obtain RUS approval of a merger or acquisition, the borrower shall request RUS approval and shall provide RUS with such data as RUS may request.

(b) If loan funds are requested, the borrower shall comply with subpart G of this part. If no additional loan funds are involved, the borrower shall comply with subpart H of this part.

(c) In considering whether to approve the request, RUS will take into account, among other matters:

(1) Whether the operation, management, and the economic and loan-repayment feasibility characteristics of the proposed system are satisfactory;

(2) Whether the merger or acquisition may result in any relinquishment, impairment, or waiver of a right or power of the Government;

(3) Whether the proposed merger or acquisition is in the best interests of the Government as note holder; and

(4) Whether the proposed purchase price and terms of an acquisition are reasonable, regardless of the source of funds used to pay for the purchase. RUS will consider the purchase price unreasonable if, in RUS’s opinion, it will endanger financial feasibility.

§ 1735.62 Approval of acquisitions and mergers.

(a) If a proposal is unsatisfactory to RUS, then RUS shall inform the borrower in writing of those features it considers objectionable and, as appropriate, recommend corrective action.

(b) If a proposal is satisfactory to RUS, then RUS shall inform the borrower in writing of its approval and any conditions of such approval. Among the conditions of approval are the following:

(1) RUS shall require a compensating benefit in return for any relinquishment, impairment, or waiver of its rights or powers.

(2) If the survivor is an affiliate of another company, RUS shall require any investments in, advances to, accounts receivable from, and accounts payable to the affiliated company contrary to mortgage provisions shall be eliminated in a manner satisfactory to the Administrator.

(3) RUS requires that the borrower agree not to extend credit to, perform services for, or receive services from any affiliated company unless specifically authorized in writing by the Administrator or pursuant to contracts satisfactory in form and substance to the Administrator.

(4) RUS may require the borrower to execute additional mortgages, loan agreements, and associated documentation.

§§ 1735.63—1735.69 [Reserved]
§ 1735.70 Use of loan funds.
(a) See 7 CFR part 1735 and 1737 for RUS's general loan policies and requirements.
(b) RUS will finance an acquisition by a borrower only when the acquisition is necessary and incidental to furnishing or improving rural telephone service and the service area is eligible for RUS assistance.
(c) RUS does not make loans for the sole purpose of merging or consolidating telephone organizations. After a merger or consolidation, RUS will consider making loans to the telephone system to finance the improvement or extension of telephone service in rural areas.
(d) Generally, RUS will not make a loan for the acquisition of an existing borrower unless, in addition to all other requirements, such acquisition will improve the likelihood of repayment of an outstanding RUS loan and all outstanding balances of the previous RUS loans are paid in full.
(e) In determining the amount it will lend for each acquisition, RUS shall place a valuation on all telephone facilities that are to be acquired with loan funds. RUS may consider fair market value, the original cost less depreciation of the facilities, income generating potential, any improvement in the financial strength of the borrower as a result of the acquisition, and any other factors deemed relevant by RUS to determine the reasonableness of the acquisition price and the amount of loan funds RUS will provide for an acquisition. RUS shall not consider the acquisition price reasonable or approve a loan if, in the Administrator's opinion, the acquisition price will endanger financial feasibility. If the acquisition price exceeds the amount RUS will lend, the borrower provides the remainder.
(f) When a borrower intends to request RUS loan funds for an acquisition, it shall present a proposal in writing to the Area Office as soon as possible. The borrower must either obtain RUS approval prior to making any binding commitments with the seller or make the commitments subject to RUS's approval. Failure to comply with these requirements will disqualify the borrower from obtaining an RUS loan for the acquisition unless the Administrator determines there were extenuating circumstances.

§ 1735.71 Nonrural areas.
Loan funds may be approved for the acquisition and improvement of facilities to serve nonrural subscribers only if the principal purpose of the loan is to furnish and improve rural service and only if the use of loan funds to serve nonrural subscribers is necessary and incidental to the principal purpose of the loan. For example, when the acquisition of an existing system located in and serving a nonrural area is necessary to serve as the nucleus of an expanded system to furnish area coverage service in rural areas, the loan may include funds to finance the acquisition. Approval for the use of loan funds in these circumstances shall be made only on a case by case basis by the Administrator.

§ 1735.72 Acquisition agreements.
When borrowers are seeking RUS financing, acquisition agreements between the borrower and the seller must be in form and substance satisfactory to RUS and shall be expressly conditioned on approval of the agreement by RUS and on obtaining an RUS loan. Normally, the acquisition agreement will not be approved by RUS until the loan has been approved.

§ 1735.73 Loan design.
When loan funds are requested for an acquisition, details of the proposed acquisition shall be included in the Loan Design. See 7 CFR part 1737.

§ 1735.74 Submission of data.
(a) RUS will not approve any acquisition, other than of toll facilities (see subpart J of this part), financed in whole or in part with loan funds until the borrower submits the following data to the GFR:
(1) For any nonborrowers involved, their most recent balance sheets, operating statements, detail of plant accounts, reports to the state commission, and audits, if available.
(2) Completed RUS Form 507, “Report on Telephone Acquisition,” which provides system data, including the type
§ 1735.75 Interim financing.

(a) A borrower may submit a written request for RUS approval of interim financing if it is necessary to close an acquisition before the loan to finance the acquisition is approved. Loan funds
§ 1735.76 Acquisition of affiliates.

A borrower shall not use RUS loan funds to acquire any stock or any telephone plant of an affiliate.

§ 1735.77 Release of loan funds, requisitions, advances.

(a) RUS will not approve the advance of loan funds until the borrower has fulfilled all loan contract provisions to the extent deemed necessary by RUS.

(b) The first advance of loan funds pursuant to the loan contract normally shall provide funds needed for the acquisition. Unless the borrower has received approval of interim financing, it must submit the requisition in time for the advance to be made by the closing date.

(c) After the borrower has closed the acquisition, it shall furnish RUS all documents necessary to demonstrate to RUS’s satisfaction that the transaction has been closed.

(d) Advances for improvements or expansion of the acquired facilities will not be approved until RUS has determined that the transaction has been closed and the borrower has obtained satisfactory title to the acquired facilities.

(e) See 7 CFR part 1737 (or RUS Bulletin 320-4) for additional requirements for releases of loan funds and 7 CFR part 1744, subpart C for additional requirements for requisitions and advances.

§§ 1735.78–1735.79 [Reserved]

Subpart H—Acquisitions or Mergers Not Involving Additional Loan Funds

§ 1735.80 Submission of data.

When a borrower is not requesting loan funds for an acquisition or merger, the borrower shall first notify RUS and submit for review by RUS the documents and information listed in (a) through (l) of this section required by RUS.
Rural Utilities Service, USDA

§ 1735.91 Location of facilities.

Telephone facilities to be acquired must be located so that they can be efficiently operated by the borrower and

(a) For any nonborrowers involved, their most recent balance sheets, operating statements, detail of plant accounts, reports to the state commission, and audits, if available.

(b) Completed RUS Form 507, “Report on Telephone Acquisition.”

(c) A map (such as a road map) showing county lines, the boundaries of the proposed acquisition and the borrower’s existing service territory, and the names of other telephone companies serving adjoining areas.

(d) A brief statement of the plans for incorporating the acquired facilities into the borrower’s existing system.

(e) The number of subscribers currently receiving service in the areas involved in the acquisition or merger and the number of new subscribers that will be served over the next 5 years as a result of the acquisition or merger.

(f) Copies of deeds of real estate to be acquired, with an explanation of the proposed use of the land.

(g) Copies of security documents of any other lenders involved and any contracts or other rights of obligations to be assumed by the survivor.

(h) A list of all counties in which the proposed system will have facilities.

(i) If Article II, section 4(b) of the standard mortgage has not been made applicable, plans for operating the unified system.

(j) In the case of a merger, the proposed articles of merger that are to be used.

(k) In the case of an acquisition, the proposed purchase price, plus two copies of any options, bills of sale, or deeds, and two copies of any acquisition agreements. All of these documents are subject to RUS approval. If the acquisition agreement is approved by RUS, two copies of it shall be returned to the borrower.

(l) Any other data deemed necessary by the Administrator for an evaluation of the acquisition or merger.

(Approved by the Office of Management and Budget under control number 0572-0084)

§§ 1735.81—1735.89 [Reserved]

Subpart I—Requirements for All Acquisitions and Mergers

§ 1735.90 Preliminary approvals.

(a) In cases where the borrower’s schedule for completion of the proposed action leaves insufficient time for RUS to prepare and process the required documentation, including new mortgages and replacement notes, the borrower may request RUS to give preliminary approval to the acquisition or merger. However, the borrower may not obtain additional loan funds until the documentation is completed to RUS’s satisfaction.

(b) Consideration of preliminary approvals generally will not be practicable in cases in which compensating benefits are required.

(c) RUS will not give preliminary approval when the lien of the mortgage on after-acquired property may be affected.

(d) Before RUS will grant preliminary approval, the borrower shall submit:

(1) Merger or acquisition documents required by state law;

(2) Acquisition agreements covering the transaction;

(3) Any required franchises, licenses, and permits;

(4) All required regulatory body approvals;

(5) All required corporate actions;

(6) Leases, contracts, and evidence of titles to be assigned to the purchaser; and

(7) The latest audited financial statements for any nonborrowers involved.

(e) If the information in (d) of this section is acceptable to RUS, the borrower may proceed with the closing.

(Approved by the Office of Management and Budget under control number 0572-0084)

§ 1735.92 Accounting considerations.

(a) Proper accounting shall be applied to all acquisitions and mergers, as required by the regulatory commission having jurisdiction, or in the absence of such a commission, as required by RUS based on Generally Accepted Accounting Principles or other accounting conventions as deemed necessary by RUS.

(b) If RUS determines that the plant accounts are not properly depreciated, the borrower should adjust its depreciation rates. Depending upon the characteristics of the case, commission jurisdiction and requirements, and similar factors, one of the following actions shall be taken:

   (1) In states where commission approval of depreciation rates is required, a covenant shall be included in the loan contract that requires the borrower to:

      (i) Have the consulting engineer make an original cost less depreciation inventory and appraisal of retained plant as part of the final inventory, and

      (ii) Request commission approval of adjustments to its records on the basis of this inventory.

   (2) In states where commission approval is not required, informal discussions between RUS and the borrower may be undertaken to reach satisfactory voluntary adjustments. If this does not resolve the situation to RUS's satisfaction, a covenant similar to that in paragraph (b)(1)(i) of this section shall be included in the loan contract and the borrower shall agree to submit evidence satisfactory to the Administrator that it has adjusted its records on the basis of the inventory.

§ 1735.93 Notes.

Substitute notes may be required in the case of an acquisition or merger, regardless of the source of funds.

§ 1735.94 Final approval and closing procedure.

(a) Legal documents relating to the acquisition or merger, including copies of required franchises, commission orders, permits, licenses, leases, title evidence, corporate proceedings, and contracts to be assigned to the purchaser shall be forwarded to the Area Office prior to closing.

(b) The Administrator will not give final approval to any acquisition or merger until all RUS requirements relating to the transactions are satisfied.

(c) Following the Administrator's final approval of the proposal, the Area Office shall inform the borrower in writing of the necessary legal and other actions required for the advance of loan funds to finance the acquisition, including the submission, in form and substance satisfactory to the Administrator, of (1) all information and documents necessary to demonstrate that the transaction has been completed, and (2) all loan contracts, notes, mortgages, and related documents and materials required by RUS.

(d) Deeds reflecting the change in ownership, executed bills of sale, and opinions of counsel shall be forwarded to the Area Office following closing.

(e) RUS will not advance loan funds to furnish or improve service in the acquired or merged areas until the Administrator has given final approval and the transaction has been closed. RUS may, however, advance funds if it determines that loan security will not be jeopardized.

(f) At the discretion of RUS, a GFR may be present at the closing to assist the borrower and protect the interests of RUS. Under certain circumstances the closing may take place prior to RUS granting final approval for the transaction and the execution of amended loan security documents.

§ 1735.95 Unadvanced loan funds.

(a) The unadvanced loan funds of a borrower that will not be a survivor of an acquisition or merger shall be advanced only to the survivor and only under the following circumstances:

   (1) If the funds are to be used for purposes approved in prior loans, the funds shall be advanced after the effective date of the proposed action only when all loan contract prerequisites have been met and documents have been submitted in form and substance satisfactory to the Administrator.
(2) If the funds are to be used for new purposes, then in addition to the requirements in (a)(1) of this section, RUS must also approve the change in purpose.

(b) No loan or other money in the construction fund shall be used to finance facilities outside areas to be served by projects approved by RUS.

§ 1735.96—1735.99 [Reserved]

Subpart J—Toll Line Acquisitions

§ 1735.100 Use of loan funds.

An acquisition of toll line facilities financed with loan funds must be necessary and incidental, as determined by the Administrator, to furnishing or improving telephone service in rural areas. The borrower shall submit to RUS the acquisition agreement, the original cost less depreciation of the facilities, any concurrences with the connecting companies involved, and a detailed inventory of the facilities to be purchased. The borrower must submit to RUS evidence, satisfactory to the Administrator, of the borrower's ownership of the toll line facilities before loan funds for improvement of those facilities will be advanced.

§ 1735.101 With nonloan funds.

When an acquisition is limited to toll line facilities and loan funds are not involved, RUS approval of the acquisition is not required. The borrower, however, shall submit to RUS for its approval all concurrences with the connecting companies involved and any other proof of ownership of the toll facilities required by RUS.

§ 1737.1  Subpart K—Release of Funds Procedure

1737.100  Prerequisites to the release and advance of funds.
1737.101  Amounts spent for preloan activities.
1737.102–1737.109  [Reserved]

Subpart A—General

§ 1737.2 Definitions.

As used in this part:
Access line means a transmission path between user terminal equipment and a switching center that is used for local exchange service. For multiparty service, the number of access lines equals the number of lines/paths terminating on the mainframe of the switching center.

Acquisition means the purchase of another telephone system, lines, or facilities whether by acquiring telephone plant in service or majority stock interest of one or more organizations.
Administrator means the Administrator of RUS.
Area Coverage means the provision of adequate telephone service to the widest practical number of rural users during the life of the loan.
Advance of funds means the transferring of funds by RUS to the borrower's construction fund.
Borrower means any organization which has an outstanding loan made or guaranteed by RUS, on which is seeking such financing.
Characteristics letter means the letter informing the borrower of the characteristics of the proposed loan before the loan is recommended.
Feasibility study means the pro forma financial analysis performed by RUS to determine the economic feasibility of a loan.
Forecast period means the time period beginning on the date (base date) of the borrower's balance sheet used in preparing the feasibility study and ending on a date equal to the base date plus the number of years estimated in the feasibility study for the completion of the project. Feasibility projections are usually for 5 years, see §1737.70(a). For example, the forecast period for a loan based on a December 31, 1990 balance sheet and having a 5-year estimated project completion time is the period from December 31, 1990 to December 31, 1995.
Guaranteed loan means a loan guaranteed by RUS under section 306 of the RE Act bearing interest at a rate agreed to by the borrower and the lender.
Hardship loan means a loan made by RUS under section 305(d)(1) of the RE Act bearing interest at a rate of 5 percent per year.
Initial loan means the first loan made to a borrower.
Interim construction means the purchase of equipment or the conduct of construction under an RUS-approved plan of interim financing.
Interim financing means funding for a project which RUS has acknowledged will be included in a loan, should said...
loan be approved, but for which RUS loan funds have not yet been made available.

Loan means any loan made or guaranteed by RUS.

Project means the improvements and telephone facilities financed by a particular RUS loan.

RE Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.).

RUS cost-of-money loan means a loan made under section 305(d)(2) of the RE Act bearing an interest rate as determined under 7 CFR 1735.31(c). RUS cost-of-money loans are made concurrently with RTB loans.

Release of funds means determination by RUS that a borrower has complied with all of the conditions prerequisite to the advances as set forth in the loan contract to the extent deemed necessary by RUS for approval of the use of loan funds and any required equity or other nonloan funds.

Reserves means loan or nonloan funds that have not been encumbered. Funds are encumbered when they have been set aside for by RUS for a particular loan purpose.

RTB loan means a loan made by the Rural Telephone Bank (RTB) under section 408 of the RE Act bearing an interest rate as determined under 7 CFR 1610.10. RTB loans are made concurrently with RUS cost-of-money loans.

Rural area means any area of the United States, its territories and possessions (including any area within the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau) not included within the boundaries of any incorporated or unincorporated city, village or borough having a population exceeding 5,000 inhabitants. The population figure is obtained from the most recent data available, such as from the Bureau of the Census and Rand McNally and Company. For purposes of the "rural area" definition, the character of an area is determined as of a time the initial loan for the system is made.

Special project means facilities involving investment in excess of $100,000 for any single subscriber.

Subscriber means the same as access line.

Subsequent Loan means any loan to a borrower which has already received a loan.

Telephone service means any communication service for the transmission or reception of voice, data, sounds, signals, pictures, writing, or signs of all kinds by wire, fiber, radio, light, or other visual or electromagnetic means and includes all telephone lines, facilities and systems to render such service. It does not mean:

1. Message telegram service;
2. Community antenna television system services or facilities other than those intended exclusively for educational purposes; or
3. Radio broadcasting services or facilities within the meaning of section 3(o) of the Communications Act of 1934, as amended.

Times Interest Earned Ratio (TIER) means the ratio of a borrower’s net income (after taxes) plus interest expense, all divided by interest expense. For the purpose of this calculation, all amounts will be annual figures and interest expense will include only interest on debt with a maturity greater than one year.

\[§ 1737.10 \]

Availability of RUS forms.

Single copies of RUS forms and publications cited in this part are available from Administrative Services Division, Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250. These RUS forms and publications may be reproduced. The terms “RUS form”, “RUS standard form”, and “RUS specification” have the same meanings as the terms “REA form” “REA standard form”, and “REA specification”, respectively, unless otherwise indicated.

\[§ 1737.4—1737.9 \] [Reserved]

Subpart B—Preapplication Stage

\[§ 1737.10 \]

Initial contact.

Initial loan applicants seeking assistance should write the Rural Utilities
§ 1737.11 Preapplication determinations.

Before submitting an application to RUS, the borrower should consider the following:

(a) Area to be served. The proposed service area should neither include subscribers already receiving adequate service from another telephone system nor leave out unserved pockets of potential subscribers who have indicated an interest in service and are located between the proposed system and neighboring systems. See 7 CFR 1735.11 on Area Coverage and 7 CFR 1735.12 on Nonduplication. In establishing service area boundaries, borrowers should consider the location of adjoining systems, natural boundaries such as rivers and mountains, and economic and cultural features such as trading and community centers.

(b) Number of subscribers. The borrower must estimate the number of subscribers that will request service from the proposed system.

(c) Acquisitions. A borrower considering an acquisition should refer to 7 CFR 1735.20 and RUS Bulletins 320-4, 321-2, 325-1, and 326-1.

(d) Mergers and consolidations. A borrower considering a merger or consolidation should refer to 7 CFR 1735.19.

(e) Refinancing. Restrictions on the use of loan funds for refinancing are contained in 7 CFR 1735.21.

(f) Service for nonrural subscribers. In some situations, RUS loan funds may be used to finance facilities to serve nonrural subscribers. See 7 CFR 1735.13.

(g) Loan amount. The initial loan request is based on the borrower's best estimate of financing needs. RUS requires detailed studies by the borrower to complete the application and the initial estimate is subject to revision.

(h) Loans for a portion of a system. If it is impractical to finance facilities to provide adequate service throughout the borrower's entire telephone service area, RUS will consider a loan application to finance improvements to a portion of a borrower's system.

(i) Telecommunications modernization plan. A borrower applying for hardship or concurrent RUS cost-of-money and RTB loans should refer to 7 CFR part 1751, subpart B.

§§ 1737.12–1737.19 [Reserved]

Subpart C — The Loan Application

§ 1737.20 [Reserved]

§ 1737.21 The completed loan application.

(a) The completed loan application consists of four parts:

(1) A completed RUS Form 490.

(2) A market survey called the Area Coverage Survey (ACS).

(3) The plan and associated costs for the proposed construction, called the Loan Design (LD).

(4) Various supplementary information specified in 7 CFR 1737.22.

(b) The RUS field representative assists the borrower in assembling this information. Certain information is required from initial loan applicants but usually not from borrowers seeking subsequent loans. Borrowers are to submit all information in paragraph (a) of this section to their RUS field representatives, who will review and then forward the packages to RUS headquarters.

(c) RUS will make a determination of completeness of the application package and will notify the borrower of this determination within 10 working days of receipt of the information at RUS headquarters. If the application package is not complete, RUS will notify the borrower of what information is needed in order to complete the application package. If the information required to complete the application package is not received by RUS within 90 working days from the date the borrower was notified of the information needed, RUS may return the application package to the borrower.
applications are without prejudice and borrowers may resubmit the completed application.

(Approved by the Office of Management and Budget under control number 0572-0079)

§ 1737.22 Supplementary information.

RUS requires additional information in support of the loan application form. The information listed in paragraphs (a), (b), and (c) of this section must be submitted as part of the loan application as specified in 7 CFR 1737.21.

(a) The following must be submitted by all initial loan applicants. Borrowers seeking subsequent loans must submit any changes in these items since they were last submitted.

(1) Name of attorney and manager, and certified copies of board resolutions selecting them.

(2) Certified copy of articles of incorporation showing evidence of filing with the Secretary of State and in county records.

(3) Certified copies of bylaws and board minutes showing their adoption.

(4) Certified sample stock certificates.

(5) Amounts of common and preferred stock issued and outstanding.

(6) Names, addresses, business affiliations, and stockholdings of the manager, officers, directors, and other principal stockholders (those owning at least 20 percent of borrower’s voting stock).

(7) Certified copies of real estate deeds showing all recording information.

(8) Service agreements, such as for management or system maintenance.

(9) Certified copies of existing leases, except those for vehicles, furniture and office equipment, and computer equipment.

(10) Certified copies of existing franchises.

(11) Information on any franchises required as a result of the proposed loan project.

(12) Federal Communications Commission (FCC) authorizations.

(13) Certified copy of a certificate of convenience and necessity (or its equivalent), or information demonstrating the nonduplication of reasonably adequate facilities, for all areas in the loan project.

(14) For toll, operator office, traffic, and EAS agreements, the names of all parties to the agreement, the type of agreement, and the effective and termination dates of the agreement and annexes, and the exchanges involved.

(15) Copies of rate schedules. (A copy of the tariff must be available for review by the RUS field representative.)

(16) Executed copy of RUS Form 251, “Certification of Nonsegregated Facilities”.

(17) A sketch or map showing the existing and proposed service areas.

(18) Executed assurance that the borrower will comply with the Uniform Relocation Assistance and Real Property Acquisitions Policies Act of 1970, as amended (see 49 CFR 24.4).

(19) A certification (which is included on RUS Form 490, “Application for Telephone Loan or Guarantee”) that the borrower has been informed of the collection options listed below that the Federal government may use to collect delinquent debt. RUS and other government agencies are authorized to take any or all of the following actions in the event that a borrower’s loan payments become delinquent or the borrower defaults (OMB Circular A-129 defines “delinquency” for direct or guaranteed loans as debt more than 31 days past due on a scheduled payment):

(i) Report the borrower’s delinquent account to a credit bureau.

(ii) Assess additional interest and penalty charges for the period of time that payment is not made.

(iii) Assess charges to cover additional administrative costs incurred by the Government to service the borrower’s account.

(iv) Offset amounts owed to the borrower under other Federal programs.

(v) Refer the borrower’s debt to the Internal Revenue Service for offset against any amount owed to the borrower as an income tax refund.

(vi) Refer the borrower’s account to a private collection agency to collect the amount due.

(vii) Refer the borrower’s account to the Department of Justice for litigation in the courts.
(20) A certification, signed by the president of the borrower, that the borrower is participating in the State's telecommunications modernization plan (for additional information concerning the plan, see 7 CFR part 1751, subpart B). This certification is not required if the borrower is seeking a guaranteed loan.

All of the actions in paragraph (a)(19) of this section can and will be used to recover any debts owed when it is determined to be in the interest of the Government to do so. The notification and the required form of certification in paragraph (a)(19) of this section are included on RUS Form 490, Application for Telephone Loan or Guarantee.

(b) The following must be submitted by all initial loan applicants and borrowers seeking subsequent loans:

(1) Certified financial statements for the last 3 years.

(2) Toll settlement statements and related data.

(3) Present exchange rates and any pending changes.

(4) Borrower's Environmental Report (BER)—See 7 CFR part 1794.

(6) Executed copy of Form AD-1047, "Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions" (see appendix A to 7 CFR part 3017).

(7) Borrower's determination of loan maturity, including information noted in §1735.43(a) of this chapter as required.

(8) Approved depreciation rates for items under regulatory authority jurisdiction.

(9) A statement that the borrower is or is not delinquent on any Federal debt, such as income tax obligations or a loan or loan guarantee from another Federal agency. If delinquent, the reasons for the delinquency must be explained and RUS will take such explanation into consideration in deciding whether to approve the loan. RUS Form 490, "Application for Telephone Loan or Guarantee," contains a section for providing the required statement and any appropriate explanation.

(10) Any other supporting data required by the Administrator.

(c) The following must be submitted for all borrowers requesting funds for refinancing:

(1) Copies of all bonds, notes, mortgages, and contracts covering outstanding indebtedness proposed to be refinanced.

(2) For each note or bond, the name of the creditor, original amount of debt and amount as of last year-end, purpose of debt, dates incurred and due, interest rates, and repayment terms.

(3) Justification for refinancing and evidence that the use of loan funds is necessary and incidental to furnishing or improving rural telephone service. See 7 CFR 1735.21.

(d) Borrowers requesting loan funds for acquisitions should refer to RUS bulletins 320-4, 321-2, 325-1, and 326-1 for requirements.

(Approved by the Office of Management and Budget under control number 0572-0079)

§§ 1737.23—1737.29 [Reserved]
§ 1737.31 Area Coverage Survey (ACS).

(a) The Area Coverage Survey (ACS) is a market forecast of service requirements of subscribers in a proposed service area.

(b) The objective of the ACS is to determine the location, number and telephone service requirements of subscribers in a service area. RUS will use the ACS to appraise the proposed plan for area coverage and to determine the largest practical number of rural subscribers which can be served on an economically feasible basis. Preparation of the ACS requires:

(1) A field survey of the service area to locate and identify on maps all business and residential establishments, whether currently served or not. The location and identification of future establishments are also recorded on the maps.

(2) A forecast of the number of telephone subscribers, in the entire service area, by exchange, grade and class of service, projected for the end of the 5-year study period.

(c) The results of the survey and forecast shall be:

(1) Shown on maps (maps for those service areas previously financed by RUS do not have to be included in the ACS provided that the borrower's records contain sufficient information as to subscriber development to enable cost estimates for the proposed facilities to be prepared);

(2) Tabulated on RUS Form 569 “Area Coverage Survey Report,” or its equivalent; and

(3) supported by a narrative (see §1737.32(f)(1)(ii)) containing information on the bases for the service requirement forecasts in each exchange.

(d) Guidelines on preparing an ACS are provided in RUS Telecommunications Engineering and Construction Manual section 205.

(e) The RUS field representative reviews and approves the borrower's ACS. The borrower should make sure this is done before proceeding with the Loan Design in order to prevent unnecessary expense should the ACS not be approved. The borrower's engineer must use the RUS-approved ACS in preparing the Loan Design.

(Approved by the Office of Management and Budget under control number 0572-0079)

§ 1737.32 Loan Design (LD).

(a) A loan application requires supporting data collectively called a "Loan Design." The LD contains a forecast of service requirements and a narrative with supporting exhibits. Most of the items included in the LD are similar for all loan applications. However, as noted below, there are certain additional requirements for initial loans and for any exchange areas not previously financed by RUS, and other additional requirements for subsequent loans for areas previously financed by RUS. The LD must conform to the borrower's state telecommunications modernization plan unless the borrower is seeking a guaranteed loan (for additional information concerning the plan, see 7 CFR part 1751, subpart B).

(b) Because of the importance and complexity of the engineering studies necessary for the LD, it should be prepared by a competent experienced telecommunications engineer. While the LD is subject to RUS approval, the borrower's selection of an engineer to perform preloan work is not. Note: The borrower's selection of an engineer to perform postloan work is subject to RUS approval. This should be considered when selecting a preloan engineer, if the same individual or company is to perform both services. See 7 CFR 1753.17.

(c) An LD for initial loans or for any exchange areas not previously financed by RUS requires an Outside Plant Design that provides:

(1) The most economical and practical design for a telephone system that meets immediate service demands; and

(2) The basis for orderly expansion of the system to serve the widest practical number of rural establishments.

(d) The LD for a subsequent loan (which only includes areas previously financed by RUS) does not require a detailed Outside Plant Design. The detailed Outside Plant Design for these subsequent loans may be completed for
RUS review and approval after loan approval, but before staking is started and plans and specifications are prepared. By scheduling preparation of the outside plant design closer to preparation for construction, the need for redesign resulting from changing conditions and its attendant costs are reduced.

(e) Guidelines on preparing an LD are provided in RUS Telecommunications Engineering and Construction Manual section 205.

(f) The LD shall include a narrative, several exhibits, and a certification, as explained below:

(1) Narrative. This section discusses the following topics, as appropriate.

(i) General. The purposes and amount of the proposed construction and both immediate and long range plans must be covered. The source and amount of any nonloan funds to be used for this construction must be discussed.

(ii) Subscriber data. The basis for the subscriber forecast, including any unusual factors expected to influence growth, must be discussed. Reasons for growth projections which vary from historic trends must be explained.

(iii) Proposed construction. All proposed construction must be described fully. Reference to the BER must be made here.

(iv) Service area. For subsequent loans only, proposed construction which is not within the boundaries of prior loan projects must be discussed. New areas to be served (even if from existing exchanges) must be shown on maps submitted with the proposal.

(v) Toll and EAS. Proposed new toll or extended area service (EAS) facilities, including any changes from the existing trunking arrangements, must be described fully. Minutes of meetings and correspondence with connecting companies, and connecting company concurrences, if any, must be included.

(vi) Radio telephone service. Proposed radio telephone service must be discussed. Results of studies demonstrating demand and/or need must be included as an exhibit.

(vii) Special projects. Facilities involving investment in excess of $100,000 for any single subscriber must be discussed fully. Contractual arrangements with the subscriber, including a termination agreement providing for (A) the full recovery by the borrower of its capital costs of the facilities no later than the maturity date of the note representing the loan, (B) the immediate repayment of all remaining capital costs, if terminated, and (C) repayment to RUS of the outstanding amount of the special note shall be submitted. Usually a separate short-term note is prepared for loans to finance Special Projects.

(viii) Investment in nonrural areas. (A) For initial loans, or loans for areas not previously financed by RUS, the borrower must fully discuss proposed improvements or expansions in an exchange serving a community over 5,000 population. The name of the community, the number of existing and projected new subscribers by grades of service within the community, detailed cost estimates of the facilities involved, and information sufficient to establish the necessity for the use of loan funds must be provided.

(B) For subsequent loans, the borrower must fully discuss as specified in paragraph (f)(1)(viii)(A) of this section proposed improvements or expansions in an exchange serving a community over 5,000 population which had a population of more than 5,000 at the time the facilities to serve the community were first financed by RUS. The population determination is based on the corporate limits or boundaries of unincorporated areas in existence at the time the facilities to serve the community were first financed by RUS.

(C) For subsequent loans, the borrower shall state whether the population of a community, which is currently more than 5,000, was considered rural at the time RUS first financed the facilities to serve the community. Detailed cost estimates are not required if the population was considered rural at the time RUS first financed facilities to serve the community, see 7 CFR 1735.13(d).

(ix) Prior loan project. For subsequent loans only, the reason for and amount of additional loan funds needed to complete construction in progress which was part of a prior loan project in central office areas not included in the current LD must be discussed fully.
(x) Route miles. Route miles of outside plant in central office areas not shown on RUS Form 495 must be provided.

(xi) Future plans. Where the loan application is to finance part of a system-wide upgrading plan, plans for those remaining exchanges not included in the current loan proposal must be discussed.

(2) Exhibits. (i) An RUS Form 569, “Area Coverage Survey Report,” or its equivalent shall be included for the total system and for each exchange in which system improvements or additions are proposed.

(ii) An RUS Form 495, “Construction Cost Estimates,” or its equivalent shall be prepared for each exchange in which system improvements or additions are proposed. An explanation of the method used in developing these cost estimates must be included.

(iii) RUS Form 494, “Loan Design Summary,” or its equivalent shall be prepared for each loan. This must show all expected 5-year construction costs, loan and nonloan.

(iv) A schematic trunking diagram shall be included showing the number and type, length, ownership and makeup of existing and proposed toll and EAS trunks, plus transmission and traffic data for each trunk group.

(v) Detailed outside plant design maps must be submitted for all central office areas of initial loan applicants and for areas not previously served by existing borrowers or financed by RUS. These design maps must be in sufficient detail to substantiate the construction cost estimates.

(vi) For subsequent loans only, if a change in system boundaries is proposed, a map must be furnished showing present and proposed boundaries, and existing establishments and subscribers in the new areas.

(vii) Any other special exhibits needed to support particular items in the loan proposal must be included.

(3) Certification. The following certification shall be signed by a principal of the engineering firm and the borrower:

We, the undersigned, certify that the data in this Loan Design are correct to the best of our knowledge and belief and reasonably reflect the cost to serve the subscribers as proposed on the Forms 569, “Area Coverage Survey Report,” which are integral parts hereof, and that this Loan Design adheres to RUS engineering and construction standards and practices.

(g) The RUS field representative shall review and make a recommendation on each LD.

(1) After completion of the LD, the borrower arranges a meeting with its engineer and RUS’s field representative to review:

(i) Design and cost estimates.

(ii) Reserves available from prior loans, if any, or internally generated funds which may be applied against the requirements of the current application.

(2) One copy of RUS Form 567, “Checklist for Review of Loan Design,” completed and signed by the borrower’s engineer must be attached to the LD submitted to the RUS field representative.

(3) The RUS field representative recommends acceptance of the LD as the basis for RUS financing.

(4) Three copies of the final LD with the RUS field representative’s recommendation are then sent to the relevant Area Office in RUS. A fourth copy is retained by the RUS field representative.

(5) A transmittal letter from the borrower must accompany the LDs, requesting that the application previously submitted be amended so as to be consistent with the approved LD.

(6) Final approval of the LD is given by the relevant Area Office in RUS. To be approved, the LD must be cost effective, include appropriate technology, and provide area coverage.

(7) Upon receipt of the LD and any other required information, RUS makes a preliminary analysis of the loan proposal. Before final consideration of the loan, RUS reviews the results of its preliminary analysis with the borrower.

(Approved by the Office of Management and Budget under control number 0572-0079)
§§ 1737.33—1737.39

Subpart E—Interim Financing of Construction of Telephone Facilities

§ 1737.40 General.

(a) Under special circumstances a borrower may request that RUS approve interim financing for interim construction. This subpart describes the circumstances in which RUS will consider approving interim financing of construction, the information to be submitted to RUS to support the borrower's request, RUS's requirements relating to interim construction, and related matters.

(b) For a borrower to preserve the option of obtaining loan funds for reimbursement of interim financing, it must obtain prior RUS approval of its interim financing plan and follow the procedures in 7 CFR 1737.41 and 7 CFR 1737.42.

(c) RUS will approve interim financing only for projects which must be performed immediately.

(d) RUS approval of interim financing is not a commitment that RUS will make loan funds available.

(e) Equal employment opportunity requirements apply to interim construction. See RUS Bulletin 320-15.

§ 1737.41 Procedure for obtaining approval.

(a) The borrower shall submit to the RUS Area Office a written request for approval of interim financing. This request shall include:

(1) A description of the construction proposed under interim financing.

(2) An explanation of the urgency of proceeding with the proposed construction.

(3) An estimate of the cost.

(4) The source of funds to be used for interim financing.

(b) RUS will not approve interim financing until it has reviewed and found acceptable:

(1) All of the information required under §1737.21; or

(2) The following documents:

(i) The Loan Design (LD), or the portion thereof that covers the proposed construction if the completed LD is not available. See 7 CFR 1737.32.

(ii) Evidence that the borrower has satisfied the requirements of 7 CFR part 1794 applying to the proposed interim construction.

(iii) A statement that the borrower is or is not delinquent on any Federal debt, such as income tax obligations or a loan guarantee from another Federal agency. If delinquent, the reasons for the delinquency must be explained and RUS will take such explanation into consideration in deciding whether to approve the interim financing, see 7 CFR 1737.22(b)(9).

(v) Executed copy of Form AD-1047, “Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions” (see appendix A to 7 CFR part 301).

(vi) Any other supporting data required by the Administrator.

(c) RUS will not approve a borrower's request for approval of interim financing if, in RUS's judgment:

(1) The proposed interim financing does not comply with the requirements of this subpart.

(2) The proposed interim construction will not qualify for RUS financing.

(3) The proposed interim financing presents unacceptable loan security risks to RUS, or otherwise is not in the best interests of RUS.

(4) The loan application (RUS Form 490) clearly marked “In support of interim financing request.”

§ 1737.42 Procedure for construction.

(a) If RUS approves the interim financing, interim construction shall be conducted in accordance with 7 CFR part 1753, 7 CFR 1768, RUS Bulletins 320-15, and RUS Bulletins 381-1, 381-2, 381-...
§ 1737.50 Review of completed loan application.

(a) The completed loan application consists of:

1. A completed RUS Form 490, "Application for Telephone Loan or Loan Guarantee;"

2. A completed certification Form AD-1047, "Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions," (see appendix A to 7 CFR part 3017);

3. A market survey called the Area Coverage Survey (ACS);

4. The plan and associated costs for the proposed construction, called the Loan Design (LD);

5. Evidence that the borrower is participating in a telecommunications modernization plan in the state where the proposed construction will occur, unless the borrower is seeking a guaranteed loan; and

(b) RUS shall review the completed loan application, particularly noting subscriber data, grades of service, extended area service (EAS), connecting company commitments, commercial facilities, system and exchange boundaries, and proposed acquisitions. RUS shall also check the List of Parties Excluded from Federal Procurement of Nonprocurement Programs, compiled, maintained and distributed by General Services Administration, to determine

§ 1737.51 Approval of loan design.

RUS shall notify the borrower when the preloan data concerning the system design and costs and subscriber projections have been approved. If found acceptable, RUS will approve the LD with any required changes. A copy of the approved LD, with any significant changes, as determined by RUS, will be returned to the borrower.

§§ 1737.52–1737.59 [Reserved]

Subpart G—Project Cost Estimation Procedures

§ 1737.60 Telephone loan budget.

(a) RUS shall prepare a “Telephone Loan Budget” (RUS Form 493) showing all costs for the proposed project and the amount of loan and nonloan funds to be used. The budget shall show, as applicable, amounts for central offices, outside plant and station equipment, right-of-way procurement, land, buildings, removal costs, special projects, engineering, vehicles and work equipment, office equipment, operating funds, refinancing with loan funds, debt retirement with nonloan funds, acquisitions, and contingencies. The amounts budgeted, exclusive of prior loan reserves, generally shall be rounded to the nearest $1,000.

(1) If the loan is to be made by the Rural Telephone Bank (RTB) or concurrently with RTB, the budget shall include the amount required for the purchase of RTB Class B stock. This is 5 percent of the amount to be borrowed from RTB for all purposes other than the purchase of RTB Class B stock. The borrower may elect to use nonloan funds for all or part of this requirement.

(2) The amount of funds included in any loan shall be limited for certain items:

(i) Operating funds for working capital or current operating deficiencies shall be included only in cases of financial hardship as determined by the Administrator.

(ii) Contingencies shall not exceed 3 percent of the total amount of loan funds to be used for construction, engineering, operating equipment and operating funds.

(b) RUS shall prepare the cost estimates based on the data in RUS Form 494, “Loan Design Summary,” and RUS Form 495, “Construction Cost Estimates,” or their equivalents, and other parts of the LD submitted by the borrower, and on other pertinent information. See subpart D of this part. The amounts included in the proposed budget shall be the estimated costs, less the value of materials and supplies on hand or acquired that can be used in the proposed construction. The cost estimates in the LD may be adjusted by RUS in consultation with the borrower. See §1737.50(c).

(c) Generally, the new loan shall be reduced by any required equity funds and funds available in reserves no longer needed for prior loan purposes to determine the proposed loan requirement.

(d) When amounts are available in reserves no longer needed for prior loan purposes, RUS may, at its option, deny further advances of these funds if they will be used to finance projects in the proposed loan.

(e) The budget shall also show, if applicable, the reserves for each budget item as of the date of the latest RUS Form 481, “Financial Requirement Statement,” submitted by the borrower. To ensure that sufficient funds are included in the budget to finance all proposed construction, RUS includes in the budget any funds deposited by the borrower for approved interim financing.

§ 1737.61 Cost allocation for rural and nonrural areas.

(a) Pursuant to the requirements in 7 CFR part 1735, if loan funds are proposed for facilities to serve subscribers in nonrural areas, RUS shall allocate
§ 1737.70 Description of feasibility study

(a) In connection with each loan RUS shall prepare a feasibility study that includes sections on consolidated loan estimates, operating statistics, projected telecommunications, plant, projected retirement computations, and projected revenue and expense estimates (including detailed estimates of depreciation and amortization expense, scheduled debt service payments, toll and access charge revenues, and local service revenues). Normally, projections will be for a 5-year period and used to determine the ability of the borrower to repay its loans in accordance with the terms thereof. RUS will not require borrowers to raise local service rates. Local service revenue projections will be based on the borrower's existing local service rates or regulatory body approved rates not yet in effect but to be implemented within the forecast period. In the latter case, if a borrower is not required to obtain regulatory body approval for the implementation of such rates, RUS will require a resolution of the board of directors indicating when those rates will be in effect.

(b) If RUS determines that costs cannot be adequately allocated using the procedures in paragraphs (a)(1) through (a)(3) of this section, RUS shall, on a case by case basis, allocate costs between the rural and nonrural subscribers using whatever methodology it deems reasonable. All allocations in paragraphs (a) and (b) of this section shall be documented.

§§ 1737.62–1737.69 [Reserved]  

Subpart H—Feasibility Determination Procedures

§ 1737.70 Description of feasibility study

(a) In connection with each loan RUS shall prepare a feasibility study that includes sections on consolidated loan estimates, operating statistics, projected telecommunications, plant, projected retirement computations, and projected revenue and expense estimates (including detailed estimates of depreciation and amortization expense, scheduled debt service payments, toll and access charge revenues, and local service revenues). Normally, projections will be for a 5-year period and used to determine the ability of the borrower to repay its loans in accordance with the terms thereof. RUS will not require borrowers to raise local service rates. Local service revenue projections will be based on the borrower's existing local service rates or regulatory body approved rates not yet in effect but to be implemented within the forecast period. In the latter case, if a borrower is not required to obtain regulatory body approval for the implementation of such rates, RUS will require a resolution of the board of directors indicating when those rates will be in effect.

(b) RUS makes loans only to rural telephone systems that are financially feasible. RUS shall consider the factors discussed in paragraphs (c) through (j) of this section in determining feasibility.

(c) The revenue and expense estimates for the feasibility study generally will be based on the borrower's operating experience provided that:

(1) Adjustments are made for any nonrecurring revenues and expenses that are not representative of the borrower's past operations and would thus make the borrower's experience data inappropriate for the forecast; and

(2) Adjustments are made for any special or new characteristics or other considerations deemed necessary by the Administrator.

(d) [Reserved]

(e) Depreciation expense will be determined using depreciation rates appropriate to the normal operation of the borrower, based on:

(1) The borrower's regulatory body approved depreciation rates; and

(2) Where such rates as described in paragraph (e)(1) of this section do not exist for items which the borrower is seeking financing, the most recent median depreciation rates published by RUS for all borrowers. RUS will publish such depreciation rates annually in RUS's "Statistical Report, Rural Telephone Borrowers."

(f) Projected scheduled debt service payments will generally be based on all
of the borrower’s outstanding and proposed loans from RUS and all other lenders as of the end of the feasibility forecast period (i.e., for a 5-year forecast period, the amount of debt outstanding in year 5).

(g) The financial and statistical data are derived from RUS Form 479, “Financial and Statistical Data for Telephone Borrowers,” or for initial loans, the data may be obtained from the borrower’s financial statements and other reports, and from other information supplied with the completed loan applications (see 7 CFR 1737.21 and 1737.22).

(h) When, in RUS’s opinion, the borrower’s operating experience is not adequate or the borrower’s current operations are not representative, the estimates in the feasibility study normally will be developed from state and regional standards based on the experience of RUS borrowers. These standards are included in the Borrower’s Statistical Profile (BSP), which is revised annually by RUS. If the borrower’s operating experience is not the basis for one or more per-subscriber estimates used in the feasibility study, the estimates generally may not vary from the standard by more than 20 percent to reflect the particular characteristics of the loan applicant. Any variation from the standard shall be documented.

(i) In cases where these per-subscriber standards do not represent a reasonable forecast of a particular borrower’s operations (for example, when a variation greater than 20 percent is necessary), estimates based upon a special analysis of the borrower’s projected operations shall be used. The special analysis will accompany the feasibility study.

(j) When it is reasonably expected that a subscriber, classified as a special project, may discontinue service, a second feasibility study will be prepared, for comparison purposes, omitting revenues and expenses from this subscriber.

(k) RUS may obtain and review commercially available credit reports on applicants for a loan or loan guarantee to verify income, assets, and credit history, and to determine whether there are any outstanding delinquent Federal or other debts. Such reports will also be reviewed for parties that are or propose to be joint owners of a project with a borrower.

(l) If it is determined that loan feasibility cannot be proven as described in this section, the loan application will be returned to the borrower with an explanation. A borrower whose application has been returned will have 90 working days, from the date the application was returned, to revise and re-submit its application. If a revised application is not received by RUS within the 90-day period described above, the application will be canceled and a new application will need to be submitted if the borrower wishes further consideration.

§ 1737.71 **Interest rate to be considered for the purpose of assessing feasibility for loans.**

(a) For purposes of determining the creditworthiness of a borrower for concurrent RUS cost-of-money and RTB loans, the Administrator shall assume that the loans, if made, would bear interest at the Treasury rate on the date of determination as described in paragraph (b) of this section. If the Treasury rate exceeds 7 percent, the interest rate used to determine eligibility for the RUS cost-of-money loan will be 7 percent.

(b) The 30-year Treasury rate will be used in all feasibility studies for loans with a final maturity of at least 30 years. A straight-line interpolation between other Treasury rates will be used to determine the rate used in feasibility studies for loans with final maturities of less than 30 years.

(c) The Treasury rate will be obtained each Tuesday, or as soon as possible thereafter, from the Federal Reserve. The rate for the current week, from the column labeled “This week” in the Federal Reserve statistical release, will be used from that Wednesday through the following Tuesday.

(d) As used in this section, the “date of determination” means the date of the feasibility study used in support of the loan recommendation.

§ 1737.80 Description of characteristics letter.

(a) After all of the studies and exhibits for the proposed loan have been prepared, but before the loan is recommended, RUS shall inform the borrower, in writing, of the characteristics of the proposed loan. The purpose of the characteristics letter is to inform the borrower and obtain its concurrence, before further consideration by RUS of the loan approval and the preparation of legal documents relating to the loan, in such matters as the amount of the proposed loan, its purposes, rate of interest, loan security requirements, and other prerequisites to the advance of loan funds. The letter, whether or not concurred in by the borrower, does not commit RUS to approve the loan on these or any other terms.

(b) The Forecast of Revenues and Expenses and a copy of RUS Form 493, "Telephone Loan Budget," shall be enclosed with the characteristics letter. This copy of the budget shall be subject to change by RUS with the borrower's agreement.

§§ 1737.81—1737.89 [Reserved]

Subpart J—Final Loan Approval Procedures

§ 1737.90 Loan approval requirements.

(a) In addition to requirements set forth in 7 CFR part 1735, 7 CFR part 1737 and other applicable parts of 7 CFR chapter XVII, the following are certain additional requirements that must be met before RUS will approve a loan:

(1) If the borrower had 100 or more employees as of the prior December 31, it must submit the current annual Employer Information Report EEO-1, Standard Form 100, as required by the Department of Labor; see 29 CFR 1602.7 through 1602.14.

(2) The borrower must be in compliance with regulations on non-discrimination. See 7 CFR part 1790 (or RUS Bulletin 320-19).

(3) For subsequent loans, RUS must determine whether the borrower's accounting records are adequate. If the records are not adequate, as determined by RUS based on Generally Accepted Accounting Principles or other accounting conventions as deemed necessary by RUS, a provision will be included in the loan contract requiring the borrower to improve its records to an adequate level.

(4) The borrower must not have any receivables, loans, guarantees, investments, or other obligations that are contrary to the mortgage provisions or any RUS regulations including, but not limited to, 7 CFR part 1758 (or RUS Bulletins 320-4, 320-22, 321-2, 322-2, 323-1, or 326-1). If the borrower has any of these items, the loan contract shall contain a provision requiring that they be eliminated prior to the release of funds. See 7 CFR part 1744 for conditions under which RUS will provide a shared first lien and/or a lien accommodation for non-RUS lenders.

(5) RUS must make a determination on flood insurance requirements. In accordance with the National Flood Insurance Act of 1968, as amended by the Flood Disaster Protection Act of 1973, as amended (the "Flood Insurance Act"), RUS shall not approve financial assistance for the acquisition, construction, repair or improvement of any building or any machinery, equipment, fixtures or furnishings contained or to be contained in any such building located in an area which has been identified by the Director of the Federal Emergency Management Agency (the "Director of FEMA") pursuant to the Flood Insurance Act as an area having special flood hazards unless:

(i) Flood insurance has been made available, pursuant to the Flood Insurance Act, in the area in which the acquisition, construction, repair or improvement is proposed to occur; and

(ii) The borrower has obtained flood insurance coverage with respect to such building, machinery, equipment, fixtures or furnishings as may be required pursuant to the Flood Insurance Act.
Accordingly, a finding shall be made on whether loan funds will be used to finance buildings, machinery, fixtures or furnishings located in an identified special flood hazard area. If loan funds are to be used in such a special flood hazard area, a provision will be included in the loan contract restricting the release of funds until all the requirements of the Flood Insurance Act have been satisfied.

(6) All environmental requirements must be met (see 7 CFR part 1794).

(b) [Reserved]

§ 1737.91 Approval.

(a) A loan is approved when the Administrator, or whoever is delegated authority, signs the administrative findings and the letter to the borrower announcing the loan.

(b) If the loan is not approved, RUS shall notify the borrower, in writing, of the reasons.

§ 1737.92 Loan documents.

Following approval of the loan, RUS shall forward the necessary loan documents to the borrower for execution, delivery, recording, and filing, as directed by RUS. See 7 CFR part 1758 for details (or RUS Bulletins 320-4, 320-22, 321-2, 322-2, 323-1, or 326-1).

§§ 1737.93—1737.99 [Reserved]

Subpart K—Release of Funds Procedure

§ 1737.100 Prerequisites to the release and advance of funds.

(a) Standard prerequisites to the advance of funds, generally applied to all loans, are set forth in Article II of the form of loan contract attached as appendix A to 7 CFR part 1758. Additional prerequisites may be added on a case by case basis to the loan contract.

(b) Before any loan funds can be advanced, RUS must approve a release of funds.

(c) RUS approves the release of funds only after it determines that all prerequisites to the advance of loan funds have been met or funds should be advanced even though certain loan contract prerequisites remain unsatisfied.

(d) Following release approval, loan funds and related nonloan funds may be advanced in accordance with 7 CFR part 1744.

(e) The borrower may be required to discharge indebtedness and/or to close acquisitions before advances are made for construction purposes. In such cases, the borrower shall submit evidence that these actions have been completed. If the evidence is satisfactory to RUS, RUS shall allow the remaining loan funds to be advanced in accordance with 7 CFR part 1744.

(Approved by the Office of Management and Budget under control number 0572-0085)
§ 1744.20 General.

Recent changes in the telephone industry, including deregulation and technological developments, have caused RUS borrowers and other organizations providing telephone services to consider undertaking projects to provide new telecommunication services. Although certain telecommunication services may not be eligible for financing under the RE Act, these services may nevertheless advance Act objectives where the borrower obtains financing from private lenders. The borrower’s financial strength and the assurance of repayment of outstanding Government debt may be improved as a result of providing new telecommunication services. To facilitate the financing of new telecommunication services, RUS is willing to consider accommodating the Government’s lien on telephone borrowers’ systems or subordinating the Government’s lien on after-acquired property of telephone borrowers. This part sets forth RUS policy with respect to such lien accommodations and subordinations. The policies of this part will also be utilized by the Governor of the Rural Telephone Bank in carrying out the Rural Telephone Bank’s loan program.

§ 1744.21 Definitions.

Accommodation means sharing the Government’s lien on a pari passu or pro rata basis with a private lender. Act means the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.). Administrator means the Administrator of RUS. See 7 CFR part 1735. Advance means transferring funds from RUS or FFB to the borrower’s construction fund. After-acquired property means property which is to be acquired by the borrower and which would be subject to the lien of the Government’s mortgage when acquired. Borrower means any organization that has an outstanding loan made or guaranteed by RUS, or that is seeking such financing. See 7 CFR part 1735. Construction Fund means the RUS Construction Fund Account required by section 2.4 of the Loan Contract into which all RUS loan funds are advanced.
Disbursement means the paying of money by the borrower out of the construction fund for approved loan purposes.

FFB means the Federal Financing Bank.

Hardship loan means a loan made by RUS under section 305(d)(1) of the RE Act bearing interest at a rate of 5 percent per year.

Interim Construction means the purchase of equipment or the conduct of construction under an RUS-approved plan of interim financing. See 7 CFR part 1737.

Interim Financing means funding for a project which RUS has acknowledged will be included in a loan, should said loan be approved, but for which RUS loan funds have not yet been made available.

Loan (RUS Loan) means any loan made or guaranteed by RUS. See 7 CFR part 1735.

Loan Documents means the loan contract, note and mortgage between the borrower and RUS and any associated document pertinent to a loan.

Loan Funds (RUS Loan Funds) means funds provided by RUS through direct or guaranteed loans.

Private lender means any lender other than the Rural Utilities Service, the Rural Telephone Bank or the Federal Financing Bank.

RUS cost-of-money loan means a loan made under section 305(d)(2) of the RE Act bearing an interest rate as determined under 7 CFR 1735.31(c). RUS cost-of-money loans are made concurrently with RTB loans.

RTB means the Rural Telephone Bank.

Subordination means granting a lien which a private lender has on specific property priority over the Government’s lien on such property.

Telecommunication services means any service for the transmission, emission, or reception of signals, sounds, images, or intelligence of any nature by optical waveguide, wire, radio, or other electromagnetic systems and shall include all facilities used in providing such service as well as the development, manufacture, sale, and distribution of such facilities.

§§ 1744.22–1744.29 [Reserved]

§ 1744.30 Act purposes.

(a) Borrowers are encouraged to submit requests for accommodation of the Government’s lien on the borrower’s system in order to facilitate obtaining financing from private lenders for purposes provided in the RE Act.

(b) The Administrator will consider requests for the subordination of the Government’s lien on after-acquired property which will enable borrowers to obtain financing from private lenders for purposes provided in the Act:

Provided, however, that property integral to the operation of projects financed with loans made or guaranteed by RUS shall be financed with funds obtained through lien accommodations instead of lien subordinations, unless the Administrator determines that it is in the Government’s interest to do otherwise.

§§ 1744.31–1744.39 [Reserved]

§ 1744.40 Non-Act purposes.

(a) The Administrator will consider requests for the accommodation of the Government’s lien on the borrower’s system or the subordination of the Government’s lien on after-acquired property which will enable the borrowers to obtain financing from private lenders for the purpose of providing new telecommunication services which may not be eligible for financing under the Act if the Administrator is satisfied that:

(1) The borrower will have the ability to repay its existing and proposed indebtedness;

(2) The security for outstanding Government loans and guarantees is reasonably adequate and will not be adversely affected by the accommodation or subordination; and

(3) Approval of the request is in the interests of the Government. Generally, it would not be in the Government’s interest if the accommodation
Rural Utilities Service, USDA § 1744.60

or subordination is being requested to enable the borrower to avoid complying with such RUS policies or procedures, as competitive bid procedures or purchasing equipment acceptable to RUS, under 7 CFR part 1753.

(b) In determining that the security for outstanding Government loans and guarantees is reasonably adequate and will not be adversely affected by the accommodation or subordination the Administrator will consider, among other matters, when applicable, the following:

1. Market forecasts for the project;
2. Projected revenues, expenses and net income of the borrower’s existing system and the project;
3. Maximum debt service on indebtedness of both the borrower’s system and the project;
4. Projected rate of return on the borrower’s investment in the project;
5. Fair market value of property acquired by the borrower as part of the project;
6. Impact of the project on the ratio of the borrower’s secured debt to assets;
7. Projected growth in borrower’s system and project equity; and
8. Amount of funds available for plant additions, replacements and other similar costs of the system and the project.

(c) In determining whether the accommodation or subordination is in the interests of the Government, the Administrator may consider, among other matters, whether the project will improve the borrower’s financial strength and the assurance of repayment of Government debt.

§§ 1744.41—1744.49 [Reserved]

§ 1744.50 Application procedures.

(a) Requests for information regarding applications for lien accommodations or subordination under this part should be addressed to the Assistant Administrator—Telephone Rural Utilities Service, Washington, DC 20250-1500.

(b) An application for a lien accommodation or subordination shall include the following supporting information:

1. A board Resolution from the applicant requesting the lien accommodation or subordination and stating the general purpose for which the funds from the private lender will be used, the proposed amount of the loan, and the proposed terms and conditions of the loan;
2. An opinion from counsel representing the applicant that the applicant has the authority under its articles of incorporation, bylaws, and under applicable state law to undertake the project;
3. Engineering and pertinent studies related to the projects or purposes to be financed, when applicable;
4. Feasibility studies with pro forma financial statements showing the ability to repay the loan and provide an appropriate margin or net income;
5. Such information regarding the environmental impacts of the project as may be required pursuant to 7 CFR part 1794; and
6. Any other information or documentation deemed pertinent by the borrower or the Administrator in support of the application.

(c) When the Administrator makes a determination that an application for an accommodation or subordination will not be approved the Administrator shall set forth the reasons therefor in writing and furnish such determination and reasons to the borrower within 30 days of the determination.

§§ 1744.51—1744.59 [Reserved]

Subpart C—Advance and Disbursement of Funds

§ 1744.60 General.

(a) The standard loan documents (as defined in 7 CFR part 1758) contain provisions regarding advances and disbursements of loan funds by telephone borrowers. This part implements certain of the provisions by setting forth
requirements and procedures to be followed by borrowers in obtaining advances and making disbursements of loan and nonloan funds.

(b) This part supersedes any sections of RUS Bulletins with which it is in conflict.

§ 1744.61 [Reserved]

§ 1744.62 Introduction.

RUS is under no obligation to make or approve advances of loan funds unless the borrower is in compliance with all terms and conditions of the loan documents. The borrower shall use funds in its construction fund only to make disbursements approved by RUS.

§ 1744.63 The telephone loan budget.

When the loan is made, RUS provides the borrower a Telephone Loan Budget, RUS Form 493. This budget divides the loan into budget accounts such as “Engineering.” When a contract or other document is approved by RUS, funds are encumbered from the appropriate budget account. See 7 CFR part 1753.

§ 1744.64 Budget adjustment.

(a) If more funds are required than are available in a budget account, the borrower may request RUS’s approval of a budget adjustment to use funds from another account. The request shall include an explanation of the change, the budget account to be used, and a description of how the adjustment will affect loan purposes. RUS will not approve a budget adjustment that affects other loan purposes unless the borrower satisfies RUS that the additional funds are available from another source, requests a deficiency loan, or scales back the project.

(b) RUS may make a budget adjustment without a formal request by the borrower when a budget account is insufficient to encumber funds for a contract that otherwise would be approved by RUS. See 7 CFR part 1753.

§ 1744.65 The construction fund.

(a) The construction fund is used by the borrower primarily to hold advances until disbursed.

(b) All advances shall be deposited in the construction fund.

7 CFR Ch. XVII (1-1-98 Edition)

(c) RUS may require that other funds be deposited in the construction fund. These may include equity or general fund contributions to construction, service termination payments, proceeds from the sale of property, amounts recovered from insurance for losses during the construction period, and interest received on loan funds in savings or interest bearing checking accounts, and similar receipts. Deposit slips for any deposit to the construction fund shall show the source and amount of funds deposited and be executed by an authorized representative of the bank.

(d) Funds shall be disbursed only up to the amount approved for advance on the FRS as described in §1744.66. No funds may be withdrawn from the fund except for loan purposes approved by RUS.

(e) The disbursement of nonloan funds requires the same RUS approvals as loan funds.

(f) Disbursements must be evidenced by canceled checks. The invoices and supporting documentation needed for construction contracts are specified in the contracts and in 7 CFR part 1753. Disbursements to reimburse the borrower’s general funds shall be documented by a reimbursement schedule, to be retained in the borrower’s files, that lists the construction fund check number, date, and an explanation of amounts reimbursed by budget account.

§ 1744.66 The financial requirement statement (FRS).

(a) To request advances, the borrower must submit to RUS an FRS, a description of the advances desired, and other information related to the transactions when required by RUS.

(b) The FRS is used by RUS and the borrower to record and control transactions in the construction fund. Approved contracts and other items are shown on the FRS under “Approved Purposes.” Except as noted below, the amount approved for advance is 100 percent of the amount encumbered for that item. Funds are approved for advance as follows:

1. Construction—(i) Construction contracts and force account proposals. Ninety percent of the encumbered amount
(95 percent for outside plant), with the final 10 percent (5 percent) approved when RUS approves the closeout documents. When a contract contains supplement “A” (See 7 CFR part 1753), 90 percent (95 percent) of the contract is approved less materials supplied by the borrower. For the Supplement “A” materials, which are a separate entry on the FRS, 100 percent of the material cost is approved.

(ii) Work orders. The portion of the work order summary (See 7 CFR part 1753) determined by RUS to be for approved loan purposes.

(iii) Work order fund. Based on a borrower’s request as described in 7 CFR part 1753.

(iv) Real estate. Upon request by the borrower after submission of evidence of a valid title.

(v) Right of way procurement. Based on the borrower’s itemized costs.

(vi) Joint use charges. Based on copies of invoices from the other utility.

(iii) Postloan engineering contracts. The amount shown on the engineering estimate, RUS Form 506, less the amount estimated for construction contract closeouts. The balance is approved when the engineering contract is closed.

(iii) Force account engineering. Ninety percent of the total amount of the RUS approved force account engineering proposal. The balance is approved when the force account engineering proposal is closed.

(3) Office equipment, vehicles and work equipment. Based on copies of invoices for the equipment.

(4) General—(i) Organization and loan expenditures. Based on an itemized list of requirements prepared by the borrower.

(ii) Construction overhead. Based on an itemized list of expenditures. If funds are required for employee salaries, the itemization shall include the employee’s position, the period covered, total compensation for the period, and the portion of compensation attributable to the itemized construction.

(iii) Legal fees. Based on itemized invoices from the attorney.

(iv) Bank stock. Based on the requirements for purchase of class B Rural Telephone Bank stock established in the loan. Funds for class B stock will be advanced in an amount equal to 5 percent of the amount, exclusive of the amount for class B stock, of each loan advance, at the time of such advance.

(5) Operating expenses—(i) Working capital—new system. Based on the borrower’s itemized estimate.

(ii) Current operating deficiencies. Based on a current and projected balance sheet submitted by the borrower.

(6) Debt retirement and refinancing. Upon release of the loan, based on the amount in the approved budget.

(7) Acquisitions. Based on final itemized costs, but cannot exceed the amount in the approved loan budget.

(c) Funds other than loan funds deposited in the construction fund, which shall include proceeds from the sale of property on which RUS has a lien, (lines 10 and 11 on the FRS) are reported as a credit under total disbursements. Disbursements of these funds are subject to the same RUS approvals as loan funds.

(d) The borrower shall request advances as needed to meet its obligations promptly. Generally, RUS does not approve an advance requested more than 60 days before the obligation is payable.

(e) Funds should be disbursed for the item for which they were advanced. If the borrower needs to pay an invoice for which funds have not been advanced, and disbursement of advanced funds for another item has been delayed, the latter funds may be disbursed to pay the invoice up to the amount approved for advance for that item on the FRS. The borrower shall make erasable entries on the next FRS showing the changes under “Total Advances to Date” and shall explain the changes in writing before RUS will process the next FRS.

(f) Advances will be rounded down to the nearest thousands of dollars except for final amounts.

(g) The certification on each of the three copies of the FRS sent to RUS shall be signed by a corporate officer of manager authorized by resolution of the board of directors to sign such
§ 1744.67 Temporary excess construction funds.

(a) When unanticipated events delay the borrower's disbursement of advanced funds, the funds may be used as follows:

(1) With RUS loan funds for loans approved prior to November 1, 1993, or hardship loan funds, the borrower may invest the funds in 5 percent Treasury Certificates of Indebtedness—RUS Series.

(2) With RUS cost-of-money, FFB or RTB loan funds, the following apply:

(i) The borrower may invest the funds in short term securities issued by the United States Treasury.

(ii) If permitted by state law, the borrower may deposit the funds in savings accounts, including certificates of deposit, of federally insured savings institutions.

(3) Funds advanced by a guaranteed lender other than the FFB may, if so permitted by such lender, be invested under the terms and conditions described above for FFB advances.

(4) Any security or investment made under this authorization shall identify the borrower by its corporate name followed by the words "Trustee, Rural Utilities Service."

(5) All temporary investments and all income derived from them shall be considered part of the construction fund and be subject to the same controls as cash in that account.

(6) Securities and other investments shall have maturity dates or liquidating provisions that ensure the availability of funds as required for the completion of projects and the payment of obligations.

(7) Any instrument evidencing a security or other investment herein authorized to be purchased or made, may not be sold, discounted, or pledged as collateral for a loan or as security for the performance of an obligation or for any other purpose.

(8) The Administrator may, at his sole discretion, require a borrower to pledge any security or other evidence of investment authorized hereby by forwarding to him all pertinent instruments and related documentation as he may reasonably require.

(b) All interest and income received from investments of temporary excess funds, as described in this section, shall be deposited in the Construction Fund.

(c) The borrower shall account for investment proceeds on the next FRS submitted to RUS. RUS will make the necessary adjustments on budgetary records.

(d) The Administrator reserves the right to suspend any borrower's authorization to invest temporary excess funds contained herein if the borrower does not comply with the requirements.

(e) For RUS loans approved prior to October 1, 1991, the borrower may return advanced funds to RUS as a refund of an advance. Interest stops accruing on the refunded advance upon receipt by RUS. A refunded advance may be re-advanced. A refund of an advance shall be sent to the Rural Utilities Service, United States Department of Agriculture, Collections and Custodial Section, Washington, DC, 20250. The borrower should clearly indicate that this is a refund of an advance, and not a loan payment or prepayment.

November 1, 1993, the borrower may use loan funds:
(1) Only for purposes for which that type of loan (i.e., Hardship, RUS cost-of-money, RTB, or FFB) may be made; and
(2) Only in exchanges that qualify for the type of loan from which the funds are drawn.

(b) The first or subsequent advances of loan funds may be conditioned on the satisfaction of certain requirements stated in the borrower's loan contract.

(c) Normally, only one payment is made by the Automatic Clearing House (ACH) for an advance of funds.

(d) Borrowers of RUS and RTB funds may request advances by wire service only for amounts greater than $500,000 or for advances to borrowers outside the Continental United States. FFB advances in any amount over $100,000 can be sent by wire service.

(e) The following information shall be included with the FRS:
(1) Name and address of borrower's bank.

(2) If borrower's bank is not a member of the Federal Reserve System, the name and address of its correspondent bank that is a member of the Federal Reserve System.

(3) American Bankers Association (ABA) nine digit identifier of the receiving banks (routing number and check digit).

(4) Borrower's bank account title and number.

(5) Any other necessary identifying information.

§ 1744.69 [Reserved]

Subpart D—[Reserved]

Subpart E—Borrower Investments

SOURCE: 58 FR 52642, Oct. 12, 1993, unless otherwise noted.

§ 1744.200 General statement.
(a) RUS telephone borrowers are encouraged to utilize their own funds to participate in the economic development of rural areas, provided that such activity does not impair a borrower's ability to provide modern telecommunications services at reasonable rates or to repay its indebtedness to RUS and other lenders. When considering loans, investments, or guarantees, borrowers are expected to act in accordance with prudent business practices and in conformity with the laws of the jurisdictions in which they serve.

(b) This subpart E applies to both RUS and RTB borrowers. For the purposes of RTB borrowers, as used in this subpart E, if a borrower has received a loan from the RTB, RUS means RTB, and Administrator means Governor unless the text indicates otherwise.

§ 1744.201 Definitions.
As used in this subpart:
Administrator means the Administrator of the Rural Utilities Service (RUS) and, as provided in §1744.200(b), the Governor of the Rural Telephone Bank (RTB).
Advance means any funds provided of which repayment is expected.
Affiliated company means any organization that directly, or indirectly through one or more intermediaries, controls or is controlled by, or is under common control with, the borrower.
Borrower means any organization which has an outstanding loan made by RUS or RTB, or guaranteed by RUS, or which is seeking such financing.
Extension of credit means to make loans or advances.
Guarantee means to undertake collaterally to answer for the payment of another's debt or the performance of another's duty, liability, or obligation, including, without limitation, the obligations of affiliated companies. Some examples of such guarantees would include:
(1) Guarantees of payment or collection on a note or other debt instrument;
(2) Issuing performance bonds or completion bonds; or
(3) Cosigning leases or other obligations of third parties.
Maximum investment ratio means that the aggregate of all qualified investments by the borrower including the proposed qualified investment shall not
§ 1744.202  Borrowers may make qualified investments without prior approval of the Administrator.

(a) A borrower that equals or exceeds the minimum total assets ratio may make a qualified investment, defined in paragraph (b) of this section without prior written approval of the Administrator.

(b) A qualified investment is a rural development investment, defined in paragraph (d) of this section meeting the following criteria:

(1) Unless the borrower's commitment is a guarantee, extension of credit, or advance, the borrower receives any financial return accruing to such investment, or the borrower's proportionate share of such return;

(2) Unless the borrower's commitment is a guarantee, extension of credit, or advance, the borrower retains title to any asset acquired with such investment.

7 CFR Ch. XVII (1-1-98 Edition)
investment, or the borrower’s proportionate share of such title; and

(3) The funds committed are the borrower’s own funds. As used in this subpart, the term own funds shall not include proceeds of loans made, guaranteed or lien accommodated by RUS; funds necessary to make timely payments of principal and interest on loans made, guaranteed or lien accommodated by RUS; and funds on deposit in the cash construction fund-trustee account, as defined in the borrower’s loan contract with RUS.

(c) A rural development investment will not be considered to be a qualified investment to the extent that the amount of such investments exceeds the borrower’s maximum investment ratio.

(d) A rural development investment is an investment, extension of credit, advance, or guarantee by a borrower for a period longer than one year and for one or more of the following purposes:

(1) Improve the economic well-being of rural residents and alleviate the problems of low income, elderly, minority, and otherwise disadvantaged rural residents;

(2) Improve the business and employment opportunities, occupational training and employment services, health care services, educational opportunities, energy utilization and availability, housing, transportation, community services, community facilities, water supplies, sewage and solid waste management systems, credit availability, and accessibility to and delivery of private and public financial resources in the maintenance and creation of jobs in rural areas;

(3) Improve state and local government management capabilities, institutions, and programs related to rural development and expand educational and training opportunities for state and local officials, particularly in small rural communities;

(4) Strengthen the family farm system; or

(5) Maintain and protect the environment and natural resources of rural areas.

(e) As used in paragraph (d) of this section, the term rural development investment shall include investments by a borrower in its own name, in affiliated companies, and in entities not affiliated with the borrower.

§ 1744.203 Establishing amount of rural development investment.

For purposes of determining whether a rural development investment is within the limits of the borrower’s maximum investment ratio or the minimum total assets ratio, the amount of the qualified investment shall be the total amount of funds committed to the rural development project as of the date of determination. The total amount of funds committed to the rural development project includes:

(a) The principal amount of loans and advances made by the borrower;

(b) Guarantees made by the borrower; and

(c) A reasonable estimate of the amount the borrower is committed to provide to the rural development project in future years.

§ 1744.204 Rural development investments that do not meet the ratio requirements.

(a) Each borrower is authorized to make investments other than qualified investments only in accordance with the provisions of the borrower’s mortgage with RUS. Without RUS’s approval, the portion of any investment of funds or commitment to invest funds for any rural development investment that will exceed the borrower’s maximum investment ratio or cause the borrower to fall below the minimum total assets ratio, must comply with the provisions of the RUS mortgage.

(b) RUS will consider, on a case-by-case basis, requests for approval of rural development investments not constituting qualified investments. RUS may condition such approval, if granted, on such requirements and restrictions as RUS may determine to be in the best interests of the Government, including, without limitation, the borrower’s agreement to limit dividends or distributions of capital by an amount specified by RUS. Requests for such approvals must be submitted in writing to the relevant RUS regional office and shall include:

(a) RUS will not include qualified investments, including qualified investments in affiliated companies, in calculating the amount of dividend or capital distributions a borrower may make under its RUS mortgage.

(b) A borrower’s investment in its net plant shall not be considered a rural development investment for purposes of calculating the maximum investment ratio or the minimum total assets ratio.

(c) The borrower’s net worth and total assets shall be determined using the balances of the respective accounts of the borrower as of December 31 of the last complete calendar year preceding the date on which the borrower’s maximum investment ratio and minimum total assets ratio are calculated.

(d) All determinations required to be made under 7 U.S.C. 926 or this subpart will be made in accordance with the Uniform System of Accounts (USoA) (47 CFR part 32). References to specific USoA accounts shall include revised or replacement accounts.

§ 1744.206 Effect of subsequent failure to maintain ratios.

If an expenditure constitutes a qualified investment under the terms of this subpart, it does not cease to be a qualified investment merely because subsequently the borrower fails to maintain the maximum investment ratio or the minimum total assets ratio.

§ 1744.207 Investment not to jeopardize loan security.

A borrower shall not make a qualified investment or a rural development investment which jeopardizes:

(a) The security of loans made or guaranteed by RUS; or

(b) The borrower’s ability to repay such loans under the terms and conditions as agreed.

§ 1744.208 Rural development investments before November 28, 1990.

All investments made by a borrower shall be subject to the provisions of this subpart, regardless of when the investment was made or whether it has been approved by RUS. Any restrictions required by RUS as a condition to approving a rural development investment before November 28, 1990, shall continue to be in effect to the extent that such investment exceeds the maximum investment ratio or causes the borrower to fall below the minimum total assets ratio.

§ 1744.209 Records.

(a) The records of borrowers, including records relating to qualified investments, shall be subject to the auditing procedures prescribed in part 1773 of this chapter. RUS reserves the right to review the records of the borrower relating to qualified investments to determine if the borrower is in compliance with this subpart.

(b) Borrowers shall report to RUS on the end-of-year operating report, RUS Form 479, the current status and principal amount of each qualified investment it has made or is committed to make pursuant to § 1744.202.

(Approved by the Office of Management and Budget under control number 0572-0098.)
§ 1744.210 Effect of this subpart on RUS loan contract and mortgage.

(a) Except as expressly provided in this subpart, the borrower shall comply with all provisions of its loan contract with RUS, its notes issued to RUS, and the RUS mortgage, including all provisions thereof relating to investments not covered by this subpart.

(b) Nothing in this subpart shall affect any rights of supplemental lenders under the RUS mortgage, or other creditors of the borrower, to limit a borrower’s investments, loans and guarantees to levels below those permitted in §1744.202.

(c) As used in paragraph (b) of this section, supplemental lender means a creditor of the borrower, other than RUS, whose loan to the borrower is secured by the RUS mortgage.

PART 1748—POST-LOAN POLICIES AND PROCEDURES FOR INSURED TELEPHONE LOANS [RESERVED]

PART 1751—TELECOMMUNICATIONS SYSTEM PLANNING AND DESIGN CRITERIA, AND PROCEDURES

Subpart A—[Reserved]

Sec. 1751.1—1751.99 [Reserved]

Subpart B—State Telecommunications Modernization Plan

1751.100 Definitions.
1751.101 General.
1751.102 Modernization Plan Developer; eligibility.
1751.103 Loan and loan advance requirements.
1751.104 Obtaining RUS approval of a proposed Modernization Plan.
1751.105 Amending a Modernization Plan.
1751.106 Modernization Plan; requirements.

Source: 60 FR 8174, Feb. 13, 1995, unless otherwise noted.
§ 1751.101

with such jurisdiction over rates, service areas or other aspects of the services and operation of providers of telecommunications services as vested in the commission or other body authority, to the extent provided by the State, to guide development of telecommunications services in the State. When this part refers to the PUC as the Plan Developer, this includes the State legislature.

REA. The Rural Electrification Administration, formerly an agency of the United States Department of Agriculture and predecessor agency to RUS with respect to administering certain electric and telephone loan programs.

RUS cost-of-money loan. A loan made under section 305(d)(2) of the RE Act bearing interest as determined under 7 CFR 1735.31(c). RUS cost-of-money loans are made concurrently with RTB loans.

RUS hardship loan. A loan made by RUS under section 305(d)(1) of the RE Act bearing interest at a rate of 5 percent per year.

RTB loan. A loan made by the Rural Telephone Bank (RTB) under section 408 of the RE Act bearing interest as determined under 7 CFR 1610.10. RTB loans are made concurrently with RUS cost-of-money loans.

State. Each of the 50 states of the United States, the District of Columbia, and the territories and insular possessions of the United States. This does not include countries in the Compact of Free Association.

Telecommunications. The transmission or reception of voice, data, sounds, signals, pictures, writings, or signs of all kinds, by wire, fiber, radio, light, or other visual or electromagnetic means. Telecommunications providers. RUS Borrowers and if the Plan Developer is a PUC, such other entities providing telecommunications services as the developer of the Modernization Plan (See §1751.101) may determine.

Wireline Service. Telecommunications service provided over telephone lines. It is characterized by a wire or wirelike connection carrying electricity or light between the subscriber and the rest of the telecommunications network. Wireline Service implies a physical connection. Although radio may form part of the circuit, it is not the major method of transmission as in radiotelephone.

§ 1751.101 General.

(a) It is the policy of RUS that every State have a Modernization Plan which provides for the improvement of the State’s telecommunications network.

(b) A proposed Modernization Plan must be submitted to RUS for approval. RUS will approve the proposed Modernization Plan if it conforms to the provisions of this subpart. Once obtained, RUS’s approval of a Modernization Plan cannot be rescinded.

(c) The Modernization Plan shall not interfere with RUS’s authority to issue such other telecommunications standards, specifications, requirements, and procurement rules as may be promulgated from time to time by RUS including, without limitation, those set forth in 7 CFR part 1755.

(d) The Modernization Plan must, at a minimum, apply to RUS Borrowers’ wireline service areas. If a Modernization Plan is developed by the PUC, RUS encourages, but does not require, that the Modernization Plan’s requirements apply to the rural service areas of all providers of telecommunications services in the State. A PUC’s decision not to include non-RUS Borrowers will not prejudice RUS approval of that PUC’s Modernization Plan. The PUC may also, at its option, extend coverage of the Modernization Plan to all service areas of all providers of telecommunications services in the State. In addition, while the requirements and goals contained in §1751.106 apply only to wireline services, the PUC, at
its discretion, may extend coverage of Modernization Plans to wireless or other communications services in the State as it deems appropriate. Borrower-developed Modernization Plans apply only to Borrowers.

§ 1751.102 Modernization Plan Developer; eligibility.

(a) Each PUC is eligible until February 13, 1996 to develop a proposed Modernization Plan and deliver it to RUS. RUS will review and consider for approval all PUC-developed Modernization Plans received by RUS within this one year period. The review and approval, if any, may occur after the one year period ends even though the PUC is no longer eligible to submit a proposed Modernization Plan.

(b) The PUC must notify all Telecommunications Providers in the State and other interested parties of its intent to develop a proposed Modernization Plan. The PUC is encouraged to consider all Telecommunications Providers' and interested parties' views and incorporate these views into the Modernization Plan. In the event that the PUC does not intend to develop a proposed Modernization Plan, RUS requests that the PUC inform RUS of this decision as soon as possible.

(c)(1) If the PUC is no longer eligible to develop a Modernization Plan or has informed RUS that it will not develop a Modernization Plan, as described in paragraphs (a) and (b) of this section, a majority of Borrowers within the State may develop the Modernization Plan. If a majority of Borrowers develops the Modernization Plan, the following apply:

(i) All Borrowers shall be given reasonable notice of and shall be encouraged to attend and contribute to all meetings and other proceedings relating to the development of the Modernization Plan; and

(ii) Borrowers developing a Modernization Plan are encouraged to solicit the views of other providers of telecommunications services and interested parties in the State.

(2) There is no time limit placed on Borrowers to develop a Modernization Plan. Borrowers should be aware that certain types of loans may be restricted until a Modernization Plan is approved. See §1751.103.

§ 1751.103 Loan and loan advance requirements.

(a) For information about loan eligibility requirements in relation to the Modernization Plan, see 7 CFR part 1725. In particular, beginning February 13, 1996, RUS will make RUS hardship loans, RUS cost-of-money loans, and RTB loans for facilities and other RE Act purposes in a State only if:

(1) The State has an RUS approved Modernization Plan; and

(2) The Borrower to whom the loan is to be made is participating in the Modernization Plan for the State. A Borrower is considered to be participating if, in RUS's opinion, the purposes of the loan requested by the Borrower are consistent with the Borrower achieving the requirements stated in the Modernization Plan within the timeframe stated in the Modernization Plan unless RUS has determined that achieving the requirements is not technically or economically feasible.

(b) With regard to the three types of loans discussed in paragraph (a), only loans approved after the date the State has an RUS approved Modernization Plan are subject to complying with the Modernization Plan.

(c) For loans subject to complying with the Modernization Plan, advances will not be made if, in RUS's opinion, the advances are not consistent with achieving the requirements of the Modernization Plan.

§ 1751.104 Obtaining RUS approval of a proposed Modernization Plan.

(a) To obtain RUS approval of a proposed Modernization Plan, the Plan Developer must submit the following to RUS:

(1) A certified copy of the statute or PUC order, if the PUC is the Plan Developer, or a written request for RUS approval of the proposed Modernization Plan signed by an authorized representative of the Plan Developer, if a majority of Borrowers is the Plan Developer; and

(2) Three copies of the proposed Modernization Plan.
§ 1751.105 Amending a Modernization Plan.

(a) RUS understands that changes in standards, technology, regulation, and the economy could indicate that an RUS-approved Modernization Plan should be amended.

(b) The Plan Developer of the Modernization Plan may amend the Modernization Plan if RUS finds the proposed changes continue to conform to the provisions of this subpart.

(c) The procedure for requesting approval of an amended Modernization Plan is identical to the procedure for a proposed Modernization Plan except that there are no time limits on the eligibility of the Plan Developer.

(d) The existing Modernization Plan remains in force until RUS has approved the proposed amended Modernization Plan.

(e) RUS may from time to time revise these regulations to incorporate newer technological and economic standards that RUS believes represent more desirable goals for the future course of telecommunications services. Such revisions will be made in accordance with the Administrative Procedure Act. These revisions shall not invalidate Modernization Plans approved by RUS but shall be used by RUS to determine whether to approve amendments to Modernization Plans presented for RUS approval after March 15, 1996.

§ 1751.106 Modernization Plan; requirements.

(a) The requirements for a Modernization Plan as stated in RELRA are:

(1) The plan must provide for the elimination of party line service.

(2) The plan must provide for the availability of telecommunications services for improved business, educational, and medical services.

(3) The plan must encourage and improve computer networks and information highways for subscribers in rural areas.

(4) The plan must provide for—

(i) Subscribers in rural areas to be able to receive through telephone lines—

(A) Conference calling;

(B) Video images; and

(C) Data at a rate of at least 1,000,000 bits of information per second; and

(ii) The proper routing of information to subscribers.

(5) The plan must provide for uniform deployment schedules to ensure that advanced services are deployed at the same time in rural and nonrural areas.

(6) The plan must provide for such additional requirements for service standards as may be required by the Administrator.

(b) To implement the requirements of the law described in paragraph (a) of this section, RUS has set minimum requirements as described in paragraphs (i) and (j) of this section. They are grouped into short-term and medium-term requirements. RUS has also included long-term goals which are not requirements. The Modernization Plan...
must meet all of the statutory requirements of RELRA and shall provide that short- and medium-term requirements be implemented as set forth in this section of the regulation except that the PUC, if it is the Plan Developer, or RUS, if a majority of Borrowers is the Plan Developer, may approve extensions of time if the required investment is not economically feasible or if the best available telecommunication technology lacks the capability to enable the Telecommunications Provider receiving the extension to comply with the Modernization Plan. Extensions shall be granted only on a case-by-case basis and generally shall not exceed a total of five years from the first such extension granted to the Telecommunications Provider.

(c) Each State's Modernization Plan shall be a strategic development proposal for modernizing the telecommunications network of the Telecommunications Providers covered by the Modernization Plan. In addition to implementing the requirements described in paragraphs (a), (i), and (j) of this section, the Modernization Plan shall include a short engineering description of the characteristics of a future telecommunications structure that would enable all Telecommunications Providers to achieve the requirements and goals of the Modernization Plan.

(d) Within the scope of §1751.101(d), if the Plan Developer is the PUC, the Modernization Plan shall name the Telecommunications Providers in the State, in addition to Borrowers, that are covered by the Modernization Plan.

(e) The Modernization Plan must require that the design of the network provided by Telecommunications Providers allow for the expeditious deployment and integration of such emerging technologies as may from time to time become commercially feasible.

(f) The Modernization Plan must provide guidelines to Telecommunications Providers for the development of affordable tariffs for medical links and distance learning services.

(g) With regard to the uniform deployment requirement of the law restated in paragraph (a)(5) of this section, if services cannot be deployed at the same time, only the minimum feasible interval of time shall separate availability of the services in rural and nonrural areas.

(h) The Modernization Plan must make provision for reliable powering of ordinary voice telephone service operating over those portions of the telecommunications network which are not network powered. In the event of electric utility power outages, an alternative source of power must be available to ensure reliable voice service.

(i) Short-term requirements. (1) The “short-term requirements start date” is the date one year after the date RUS approves the Modernization Plan for the State.

(2) All New Facilities providing Wireline Service after the short-term requirements start date, even if the construction began before such date, shall be constructed so that:

(i) Every subscriber can be provided 1-party service.

(ii) The New Facilities are suitable, as built or with additional equipment, to provide transmission and reception of data at a rate no lower than 1 Mb/sec.

(j) Medium-term requirements. (1) The “medium-term requirements start date” is the date six years after the date RUS approves the Modernization Plan for the State, or such earlier date as the Modernization Plan shall provide.

(2) All New Facilities providing Wireline Service after the medium-term requirements start date, even if the construction began before such date, shall be capable of:

(i) Providing custom calling features. At a minimum, custom calling features must include call waiting, call forwarding, abbreviated dialing, and three-way calling; and

(ii) Providing E911 service for areas served by the Telecommunications Provider when requested by the government responsible for this service.

(3) All switching equipment installed by a Telecommunications Provider after the short-term requirements start date shall be capable of:

(i) Providing custom calling features.

(4) Providing E911 service for areas served by the Telecommunications Provider when requested by the government responsible for this service.

(5) Providing E911 service for areas served by the Telecommunications Provider when requested by the government responsible for this service.

(6) Providing E911 service for areas served by the Telecommunications Provider when requested by the government responsible for this service.

(7) Providing E911 service for areas served by the Telecommunications Provider when requested by the government responsible for this service.
audio and video quality shall be determined by the Plan Developer.

(3) No later than the medium-term requirements start date, all switching equipment of Telecommunications Providers covered by the Modernization Plan must be capable of providing E911 service when requested by the government responsible for this service.

(4) No later than five years after the medium-term requirements start date, one-party service must be provided upon demand to any subscriber of a Telecommunications Provider covered by the Modernization Plan.

(k) Long-term goals. RUS suggests, but does not require, that the provisions of each Modernization Plan be consistent with the accomplishment of the following:

(1) The elimination of party line service.

(2) For subscribers that desire the service, universal availability of:
   (i) Digital voice and data service (56-164 kb/sec).
   (ii) Service that provides transmission and reception of high bit rate (no less than 1 Mb/sec) data.
   (iii) Service that provides reception of video as described in paragraph (j)(2) of this section.

---

**Subpart B—Engineering Services**

1753.15 General.
1753.16 Architectural services.
1753.17 Engineering services.
1753.18—1753.20 [Reserved]
APPENDIX A TO PART 1753—DOCUMENTS REQUIRED TO CLOSEOUT CONSTRUCTION OF BUILDINGS
APPENDIX B TO PART 1753—DOCUMENTS REQUIRED TO CLOSEOUT CENTRAL OFFICE EQUIPMENT CONTRACT
APPENDIX C TO PART 1753—DOCUMENTS REQUIRED TO CLOSEOUT TELEPHONE CONSTRUCTION CONTRACT RUS FORM 515
APPENDIX D TO PART 1753—STEP-BY-STEP PROCEDURE FOR CLOSING OUT TELEPHONE CONSTRUCTION CONTRACT—LABOR AND MATERIALS, RUS FORM 515
APPENDIX E TO PART 1753—DOCUMENTS REQUIRED TO CLOSEOUT FORCE ACCOUNT OUTSIDE PLANT CONSTRUCTION
APPENDIX F TO PART 1753—DOCUMENTS REQUIRED TO CLOSEOUT EQUIPMENT CONTRACTS

Subpart A—General

§ 1753.1 General.
(a) The standard RUS Telephone Loan Documents contain provisions regarding procurement of materials and equipment and construction of telecommunication facilities by telephone borrowers. This part 1753 implements certain of the provisions by setting forth the requirements and procedures to be followed by borrowers for purchasing materials and equipment and construction of telecommunication facilities by contract or force account.
(b) The typical procedure followed in constructing a project financed by an RUS loan begins with the prospective borrower obtaining the necessary preloan engineering and developing a complete loan application, including an LD (See 7 CFR part 1737). If a loan is approved and all prerequisites to advancement of funds are satisfied, the borrower may proceed with the purchase and installation of materials and equipment and the construction of telecommunication facilities pursuant to this part 1753. Subpart A describes
(1) RUS’s general requirements with respect to steps to be taken after the loan is approved and before construction begins (See § 1753.3),
(2) RUS requirements with respect to methods of construction (See §§ 1753.5 and 1753.6),
(3) RUS requirements regarding sealed competitive bidding and negotiated bidding of construction contracts (See §§ 1753.6 and 1753.9),
(4) RUS standards for materials, equipment, and construction financed with loan funds (See §§ 1753.7), and
(5) RUS requirements for subcontracts and contract amendments covering construction financed with loan funds (See §§ 1753.10 and 1753.12).
(c) Each borrower is responsible for the construction of its facilities and for the procurement of materials and equipment that are best suited to its needs.
(d) If contracts, P&S, or other methods of procurement are subject to RUS approval pursuant to the provisions of the loan contract, as implemented by this part, RUS will review the documents or proposals submitted and notify the borrower in writing of approval or disapproval. RUS may withhold approval if, in RUS’s judgment:
(1) The P&S or contract will not accomplish loan purposes.
(2) Provisions of the P&S or contract will add unnecessary expense to the project.
(3) The proposal, method of procurement, or P&S do not conform to RUS engineering criteria or construction standards, or if they present unacceptable loan security risks to RUS.
(4) The P&S or contract have been modified.
(e) The requirements and procedures covering procurement of architectural and engineering services are described in subpart B of this part.
(f) Single copies of RUS forms cited in this part are available from Administrative Services Division, Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250-1500. These RUS forms may be reproduced.

§ 1753.2 Definitions.
For the purpose of this part 1753:
Alternate— A solicitation for a bid adjustment for a specified deviation from the Plans and Specifications.
§ 1753.2 Architect—A person registered as an architect in the state where construction is performed, or a person on the borrower's staff, approved by RUS, authorized to perform architectural services.

Bid guarantee—A bid bond or certified check required of contractors bidding on construction work to ensure that the bidder, if successful, will furnish a satisfactory performance bond ensuring completion of work.

Central office building—The facility housing the central office equipment.

Closeout documents—The documents required to certify satisfactory completion of all obligations under a contract or force account proposal.

Construction—Purchase and installation of telecommunications facilities in a borrower's system using loan funds.

Contract—The agreement between the borrower and an independent contractor covering the purchase, construction, or both of telephone facilities to be included in the borrower's telephone system.

Contract construction—Construction and installations performed using an RUS contract form. See 7 CFR 1755.93.

Engineer—A person registered as an engineer in the state where construction is performed, or a person on the borrower's staff, approved by RUS, authorized to perform engineering services.

FAP (force account proposal)—The borrower's detailed plans submitted to RUS for force account construction.

Force account construction—Construction performed by the borrower's employees under an RUS approved FAP, with the borrower furnishing all materials, equipment, tools, and transportation.

FRS—RUS Form 481 (OMB control number 0572-0023), Financial Requirement Statement.

GFR—RUS General Field Representative.

Installation—The act of setting up or placing in position equipment for service or use in the borrower's system.

Interim construction—The purchase of equipment or the conduct of construction under an RUS-approved plan of interim financing. See 7 CFR part 1737.

Interim financing—Funding for a project which RUS has acknowledged may be included in a loan, should said loan be approved, but for which RUS loan funds have not yet been made available.

Labor and materials—All the labor and materials required for construction.

LD (loan design)—Supporting data for a loan application. See 7 CFR part 1737.

Loan—Any loan made or guaranteed by RUS. See 7 CFR part 1735.

Loan funds—Funds provided by RUS through direct or guaranteed loans. See 7 CFR part 1744 subpart C.

Major construction—A telephone plant project estimated to cost more than $100,000, including all labor and materials.

Minor construction—A telephone plant project estimated to cost $100,000 or less, including all labor and materials.

Minor errors or irregularities—A defect or variation in a seller's bid that is a matter of form and not of substance. Errors or irregularities are "minor" if they can be corrected or waived without being prejudicial to other bidders and when they do not affect the price, quantity, quality, or timeliness of construction. Unless otherwise noted, the borrower determines whether an error or irregularity is "minor."

Modernization plan. A plan, which has been approved by RUS, for improving the public switched network of a state. The modernization plan must conform to the provisions of 7 CFR part 1751, subpart B, and applies to all telecommunications providers in the state.

Negotiation—Any form of purchasing or contracting other than sealed competitive bidding. Any contract awarded without using the sealed competitive bidding procedure is a negotiated contract.

Outside plant—The facilities that conduct electrical or optical signals between the central office and the subscriber's network interface or between central offices.

Performance bond—A surety bond on a form satisfactory to RUS guaranteeing

504
the contractor’s faithful performance of a contract.

P&S (plans and specifications)—An RUS contract form, the appropriate specifications, and such additional information and documents needed to provide a clear, accurate, and complete understanding of the installations to be made or construction to be performed.

Project—The construction or installation described in the P&S.

Responsive bid—A bid that complies with the requirements of the plans and specifications.

Sealed competitive bidding—A method of contracting that employs sealed competitive bids, public opening of bids, and award of the contract to the bidder submitting the lowest responsive bid. See §1753.8.

Single source negotiation—Negotiating with a single source (contractor or seller).

Special equipment—Equipment used primarily for the transmission and enhancement of voice, data, carrier, radio and light signals, and other equipment and facilities, including incidental cable and other transmission equipment.

Subcontract—A secondary contract undertaking some of the obligations of a primary contract. Under all RUS forms of contract, the primary contractor bears full responsibility for the performance of the subcontractor.

Unbalanced bid—A bid which contains pricing for a task or material that is significantly higher or lower than pricing for similar tasks or materials.

Work order construction—Minor construction performed by the borrower’s employees, pursuant to its work order procedures, with the borrower furnishing all materials, equipment, tools, and transportation.

§ 1753.4 Major and minor construction.

RUS’s general requirements for construction are set forth in this subpart. Additional requirements and procedures for different types of major construction are presented in subparts D, E, F, G, and H (OMB control number 0572-0062). The requirements and procedures for minor construction are presented in subpart I. Borrowers may, at their option, follow the procedures in

§ 1753.3 Preconstruction review.

(a) Prior RUS approval must be obtained for any construction that does not conform to RUS standards and specifications or the approved LD, such as construction of extensions to serve subscribers in areas not included in the LD (See 7 CFR part 1737). For loans approved after RUS approval of the modernization plan in the borrower’s state, the proposed construction must conform to the modernization plan, as required by 7 CFR part 1751, subpart B. To obtain approval, the borrower shall submit a written proposal containing:

(1) A description of the work, indicating any deviations from the approved LD or RUS standards and specifications.

(2) An engineering study covering the deviations if there are changes in the design.

(3) A cost estimate for labor, engineering, materials, and overheads.

(4) If applicable, a brief analysis from the borrower demonstrating that the proposed changes conform to the modernization plan.

(b) Before any construction, including interim construction, is initiated, the GFR shall meet with the borrower to review the LD to determine if any significant changes have occurred since its approval by RUS. It is important that the design and construction of the proposed facilities be based on the latest information on subscriber needs.

(c) If the borrower and GFR agree that there have been no significant changes, the borrower may proceed.

(d) If the GFR finds that the LD is no longer satisfactory, the borrower shall prepare an amendment to the LD incorporating the necessary revisions (See 7 CFR part 1737). The borrower must obtain RUS approval of the LD amendment before proceeding with engineering activities on any project to be financed with loan funds.

§ 1753.5 Methods of major construction.

(a) All major construction projects financed by loan funds shall be performed pursuant to a contract approved by RUS and awarded through sealed competitive bidding unless

(1) A specific exception is granted in subparts D, E, F, G, or H, or

(2) Written RUS approval is obtained.

(b) Contract construction.

(1) Whether the contractor is selected through sealed competitive bidding or negotiation, as approved by RUS, award of the contract is subject to RUS approval.

(2) The requirements and procedures for sealed competitive bidding are presented in §1753.8(a). The requirements and procedures for negotiation are presented in §1753.8(b).

(c) Force account construction. To obtain RUS approval of the force account method for major construction the borrower must demonstrate its ability to perform major construction based on past force account construction which fully met RUS construction standards and was as cost-effective as contract construction in the area. If the borrower has no record of past performance to support its request, but has adequate equipment and experienced personnel to perform the proposed construction, RUS may approve a small trial project. The requirements and procedures for force account construction are presented in subparts D, E, G, and H.

§ 1753.6 Standards, specifications, and general requirements.

(a) Materials, equipment, and construction financed with loan funds must meet the standards and specifications established by RUS. 7 CFR part 1755 lists the RUS Bulletins containing the standards and specifications for telephone facilities. Materials and equipment meeting these standards are included on the List of Material Acceptable for Use on Telephone Systems of RUS Borrowers, RUS Bulletin 344-2. This bulletin may be obtained by subscription from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

(b) The borrower may use RUS loan funds to finance nonstandard construction materials or equipment only if approved by RUS in writing prior to purchase or commencement of construction.

(c) Only new materials and equipment may be financed with loan funds, unless otherwise approved by RUS.

(d) All materials and equipment financed with loan funds are subject to the "Buy American" provision (7 U.S.C. 901 et seq. as amended in 1938).

§ 1753.7 Plans and specifications (P&S).

(a) The P&S consist of an RUS contract form, the appropriate RUS specifications, and such additional information and documents needed to provide a clear, accurate, and complete understanding of what is included in the construction.

(b) 7 CFR 1755.93 provides a list of the RUS forms of telecommunications contracts for use in purchasing telephone materials and equipment and for constructing telephone facilities with loan funds. Also listed is the source where copies may be obtained.

(c) The appropriate standards and specifications listed in 7 CFR part 1755 shall be included in the P&S. When RUS has not prepared standards and specifications, the borrower shall use general engineering requirements and functional specifications prepared by the borrower's engineer and approved by RUS.

(d) The P&S shall be based on the LD approved by RUS. Section 1753.3 presents the requirements and procedures for obtaining RUS approval for construction that does not conform to the LD approved by RUS.

(e) RUS approval of the P&S is required for major construction but not for minor construction, except as noted in subpart D.

(f) RUS will approve only contracts that will provide for at least the following requirements.
§ 1753.8 Contract construction procedures.

(a) Sealed, competitive bidding—(1) Bid opening date: Upon approval of the P&S by RUS, the borrower shall schedule a bid opening date. In setting the date sufficient time should be allowed for bidders to examine the project site and prepare their bids. The borrower shall notify the GFR of the bid date selected and invite the GFR to attend.

(2) Invitations to bid: The borrower is responsible for sending invitations to prospective bidders and taking any action necessary to procure full, free, and competitive bidding. The borrower shall obtain from its engineer a list of prospective bidders and a recommendation indicating which bidders are considered qualified. The minimum number of contractors to be invited to bid on contracts for various types of facilities is set forth in subparts D, E, F, or H.

(3) Qualifying bidders: If the notice and instructions to bidders require that bidders show evidence of meeting certain requirements, the borrower shall qualify bidders before issuing P&S to them. Procedures for qualifying bidders are contained in subparts D, E, and F.

(4) Receipt of bids: The borrower shall write on the outside envelope of any bid or bid amendment, the date and time the bid was received. Any bid received from an unqualified bidder or after the time specified for opening shall be returned promptly to the bidder unopened.

(5) Procedure when fewer than three bids are received: If fewer than three valid bids are received, the borrower shall consult with RUS to determine whether the bids are to be opened or returned unopened. RUS requires that the project be rebid if fewer than three bids are received and RUS determines that one or more other bidders with an express interest in bidding is available and could meet the bid requirements, but was not invited to bid. RUS shall also require rebidding if it is found that qualified bidders were discouraged from bidding by unreasonable bid requirements (such as late notification to bidders) or if the borrower fails to follow the bid procedure.

(6) Conduct of bid openings: The borrower shall conduct bid openings open to the public. The borrower should be able to contact its attorney for immediate consultation.

(7) Review of bids: The borrower shall review all bids prior to reading any bid results to determine that:

(i) The bid guarantees are adequate.

(ii) All minor errors or irregularities made through inadvertence are corrected or waived. Failing this, the bid shall be rejected as nonresponsive.

(iii) In the event of non-minor errors or irregularities, the bid is rejected and the bid price not disclosed.

(8) Reading of bids: Bid prices shall not be read until the borrower has reviewed all bids to determine if there are any minor errors or irregularities that may affect the recommendation as to award. These shall be made public at
§ 1753.9 Subcontracts.

(a) RUS construction contract Forms 257, 397, 515, and 525 contain provisions for subcontracting. Reference should be made to the individual contracts for the amounts and conditions under which a contractor may subcontract work under the contract.

(b) RUS Form 282, Subcontract, shall be used for subcontracts under construction and installation contracts.

(1) Minor modifications or additions may be made to the subcontract form, as long as they do not change the intent of the primary contract. Any alterations to the subcontract shall be initialed and dated by the persons executing the subcontract.

(2) Subcontracts shall be prepared in quadruplicate and all copies executed by the contractor and subcontractor.
and consented to by the borrower and surety, if any.

(3) Four executed copies of the subcontract shall be forwarded to RUS for approval. Upon approval, one copy each will be sent to the borrower, contractor, and subcontractor.

(c) As stated in contract Forms 257, 397, 515, and 525, the contractor shall bear full responsibility for the acts and omissions of the subcontractor and is not relieved of any obligations to the borrower and to the Government under the contract.

(d) As stated in the contract, construction shall not be performed by the subcontractor before approval of the subcontract by RUS.

§ 1753.10 Preconstruction conference.
The borrower shall conduct a conference, attended by the borrower, contractor, and resident engineer prior to the beginning of construction to provide an opportunity to discuss and agree on responsibilities, procedures, practices, and methods before the work begins. The borrower shall provide each participant with a copy of the conference results. The GFR shall be invited to attend this conference.

§ 1753.11 Contract amendments.
(a) The borrower must obtain RUS approval before execution of any amendment to a contract if

(1) The amendment alters the terms and conditions of the contract or changes the scope of the project covered by the contract regardless of the amount of the contract before amendment,

(2) The amendment increases the amount to be paid under the contract by 20% or more, or

(3) After amendment, the amount of the contract will be $100,000 or more.

(b) Prior RUS approval to execute other contract amendments is not required. These amendments are to be submitted after execution to RUS for approval.

(c) For each amendment executed, the borrower shall make certain that:

(1) The contractor’s bond covers the additional work to be performed. If the amendment by itself (or together with preceding amendments) increases the original contract price by 20% or more, a bond extension will be required to bring the penal sum of the bond to the total amended contract price.

(2) If an amendment covers construction in a county or state not included in the original contract, the borrower and contractor are licensed to do business in that location.

(d) Amendments are to be submitted in triplicate to RUS for approval with a copy of the board resolution or a letter signed by an authorized corporate official.

§§ 1753.12—1753.14 [Reserved]

Subpart B—Engineering Services

§ 1753.15 General.
(a)(1) The standard RUS Loan Documents (See 7 CFR part 1758) contain provisions regarding engineering and architectural services performed by or for RUS telephone borrowers. This part implements certain of the provisions by setting forth the requirements and procedures to be followed by borrowers in selecting architects and engineers and obtaining architectural and engineering services by contract or by force account.

(2) Preloan architectural and engineering services may be provided by qualified personnel on the borrower’s staff or by consultants. Neither the selection of a preloan architect or engineer by a borrower, nor the contractual arrangements with them, requires RUS approval.

(3) Postloan architectural and engineering services shall be obtained by borrowers from registered architects and engineers licensed in the State in which the facilities will be located, except where RUS has approved the borrower to provide these services by the force account method. When the extent of the proposed major or minor construction is such that the postloan engineering involved is within the capabilities of employees on the borrower’s staff, the borrower may request RUS
approval to provide such services. This method of providing engineering services is referred to as force account engineering. Refer to §1753.17(c).

(4)(i) For major construction, services provided by architects and engineers not on the borrower’s staff must be provided under Form 165, Architectural Services Contract—Telephone, or Form 217, Postloan Engineering Service Contract—Telephone. These contracts require RUS approval.

(ii) For minor construction, borrowers may use the contracts in §1753.15(a)(4)(i) for postloan architectural or engineering services or any other form of contract, such as Form 245, Engineering Service Contract, Special Services—Telephone. RUS approval of contracts for postloan architectural or engineering services associated with minor construction, except for buildings covered in §1753.15(a)(5), is not required.

(5) For buildings to be constructed with RUS funds, postloan architectural or engineering services shall be obtained if (1) the construction cost exceeds $50,000 (prefab buildings using manufacturer’s specifications approved by RUS are exempt from this requirement) or (2) soil or seismic conditions require special design considerations.

(c) Single copies of RUS forms and publications cited in this part are available free from Administrative Services Division, Rural Utilities Service, United States Department of Agriculture, Washington, DC 20250-1500. These forms and publications may be reproduced.

(d)(1) All outside architects and engineers employed by RUS telephone borrowers shall have insurance coverage as required by 7 CFR part 1788.

(2) Borrowers shall ensure that their architects and engineers comply with the insurance requirements of their contracts. See 7 CFR 1788.94.

(3) If the fee schedule has to be modified in order for the borrower to obtain adequate architectural services, the

§ 1753.16 Architectural services.

(a) The borrower shall be responsible for selecting an architect to perform the architectural services required in the design and construction of buildings.

(b)(1) When contracting for architectural services for major construction, the borrower shall use Form 165, except for unattended central office buildings, in which case either Form 165 or Form 217 shall be used. Except for preloan studies (see 7 CFR part 1737), the borrower shall incur no obligation for architectural services until RUS has approved this agreement. A borrower shall not enter into the architectural services contract for major construction before RUS has approved the borrower’s LD.

(2) Reasonable modifications or additions to the terms and provisions in Form 165 may be made in order to obtain the specific services needed for a particular undertaking. Changes shall not be made that relieve the architect of any of the responsibilities set forth in the standard form. Borrowers should obtain assistance from their legal counsel to ensure that the contracts are properly prepared and executed.

(3) If the fee schedule has to be modified in order for the borrower to obtain adequate architectural services, the
§ 1753.17 Engineering services.

(a)(1) All engineering services required by a borrower to support its application for a loan shall be rendered by a qualified engineer selected by the borrower or by qualified employees on the borrower’s staff. The selection of the preloan engineer, the form of preloan engineering service contract, and the contract itself, are not subject to RUS approval. Borrowers, however, should discuss their proposed method of obtaining preloan engineering services with the GFR before proceeding with any arrangements.

(b) (1) Major construction. (i) Three copies of Form 217 executed by the borrower and the engineer shall be sent to the GFR to forward to RUS for approval. The engineer’s estimate of the engineering fees, on Form 506, shall be included.

(ii) RUS will review the contract terms and conditions. RUS will not approve the contract if, in RUS’s judgement:

(A) Unacceptable modifications have been made to the contract form.

(B) The contract will not accomplish loan purposes.

(C) The engineering service fees are unreasonable.

(D) The contract presents unacceptable loan security risk to RUS. (See 7 CFR part 1758).

(2) Minor construction. When a borrower contracts for an engineering firm to inspect and certify construction accounted for under the work order procedure or the Contract for Miscellaneous Construction Work and Maintenance Services, Form 773 (See 7 CFR part 1753 subpart I), the borrower shall require that the certification be signed by a licensed engineer.

(c)(1) Major construction. When the extent and complexity of the proposed construction is such that the engineering involved is within the capabilities of employees on the borrower’s staff, borrowers may request RUS approval to provide such services.

(i) The request shall include:

(A) A description of services to be performed.

(B) The name and qualifications of the employee to be in charge. RUS requires this employee to meet the State experience requirements for registered engineers. In the absence of specific State experience requirements, the employee must have at least eight years
experience in the design and construction of telecommunication facilities, with at least two years of the work experience at a supervisory level. RUS does not require professional registration of this employee, but this does not relieve the borrower from compliance with applicable State registration requirements which may require a licensed individual to perform such services.

(C) The names, qualifications, and responsibilities of other principal employees who will be associated with providing the engineering services. Form 179 may be used to submit the employee qualifications.

(D) A letter signed by an authorized representative of the borrower authorizing the engineering services to be performed by force account and certifying the information supporting the request.

(ii) RUS shall notify the borrower by letter of approval or disapproval to perform force account engineering. The letter shall set forth any conditions associated with an approval or the reasons for disapproval.

(iii) RUS's approval of force account engineering for major construction shall be only for the specific projects named in the notice of approval.

(2) Minor construction. (i) When the borrower proposes to perform the inspection and certification of minor construction, the following shall be submitted to the RUS:

(A) A copy of the employee's qualifications and experience record on Form 179, unless previously submitted. RUS requires a minimum of four years of construction and inspection experience. The employee cannot be engaged in the actual construction.

(B) A letter signed by an authorized representative of the borrower authorizing the performance of these services by the employee, subject to RUS approval, and certifying the supporting information.

(ii) RUS shall notify the borrower by letter of approval or disapproval of the borrower's staff employee to perform the inspection and certification of construction. The approval shall be limited to the employee's area of expertise.

(d)(1) Subject to the requirements of this part and other applicable regulations, RUS will make loan funds available for the architectural and engineering services up to the amounts included in the approved loan.

(2) Advance of funds shall be requested on an FRS as set forth in 7 CFR part 1744 subpart C.

(e) The borrower shall obtain status of contract and force account proposal reports from the engineer once each month. The report shall show for each contract or FAP the approved contract or FAP amount, the date of approval, the scheduled date construction was to begin and the actual date construction began, the scheduled completion date, the estimated or actual completion date, the estimated or actual date of submission of closeout documents, and an explanation of delays or other pertinent data relative to progress of the project. One copy of this report shall be submitted to the GFR.

(f)(1) Upon completion of all services required under the engineering service contract Form 217, the borrower shall obtain from the engineer four copies of the Final Statement of Engineering Fee, Form 506.

(2) If the statement is satisfactory, the borrower shall sign all copies and send three to the GFR.

(3) After RUS approval of Form 506, one copy shall be sent to the borrower and one copy sent to the engineer.

(4) The borrower shall promptly make final payment to the engineer.

§§ 1753.18—1753.20 [Reserved]

Subpart C—[Reserved]

Subpart D—Construction of Buildings

§ 1753.25 General.

(a) This subpart implements and explains the provisions of the Loan Documents setting forth the requirements and the procedures to be followed by
borrowers in constructing central office, warehouse, and garage buildings with loan funds.

(b) Terms used in this subpart are defined in §1753.2.

(c) All plans and specifications for buildings to be constructed with loan funds are subject to the approval of RUS. Refer to §1753.26 for further instructions.

(d) RUS Contract Form 257, Contract to Construct Buildings, shall be used for the construction of all central office, warehouse, and garage buildings with loan funds. Refer to §1753.26 (b) and (c) for further instructions.

(e) The borrower shall use the sealed competitive bid procedure for all building construction, except for:

(1) Minor construction using subpart I procedures.

(2) Major construction, where the borrower has received advanced approval to perform the construction by force account.

(f) The borrower shall prepare P&S for construction of all buildings. Each set of P&S shall include:

(1) RUS Contract Form 257, Contract to Construct Buildings, completed to the extent explained in §1753.26(b).

(2) Complete and detailed specifications covering materials and workmanship.

(3) A detailed building plan. Where the building is to house electronic apparatus, the detailed plan or specifications shall include the equipment environmental requirements and special equipment required.

(4) A site plan for each building showing the building location and giving the legal description of the site. Sufficient information must be provided for the site so that it can be identified as the same property on which all P&S shall include:

(1) RUS Contract Form 257, Contract to Construct Buildings, completed to the extent explained in §1753.26(b).

(2) Complete and detailed specifications covering materials and workmanship.

(3) A detailed building plan. Where the building is to house electronic apparatus, the detailed plan or specifications shall include the equipment environmental requirements and special equipment required.

(4) A site plan for each building showing the building location and giving the legal description of the site. Sufficient information must be provided for the site so that it can be identified as the same property on which all P&S shall include:

(1) RUS Contract Form 257, Contract to Construct Buildings, completed to the extent explained in §1753.26(b).

(2) Complete and detailed specifications covering materials and workmanship.

(3) A detailed building plan. Where the building is to house electronic apparatus, the detailed plan or specifications shall include the equipment environmental requirements and special equipment required.

(b) RUS Contract Form 257 shall be completed as follows:
§ 1753.27  Bidding procedure.

(1) List of names or kinds of buildings and locations—Site plan and specifications must be identified with the appropriate building.

(2) Alternates—The borrower shall keep the number of alternates to a minimum. Items for which alternates are to be taken shall be fully described on a separate sheet in the specifications and the details shown on the plans, when necessary, and identified by the alternate number. The Notice and Instructions to Bidders shall explain how bids will be evaluated with respect to alternates.

(3) Time for construction—A reasonable time for completion of construction, considering local conditions, shall be determined by the borrower and inserted in the space provided. Too short a construction period may discourage bidders or influence their bids. Completion of the building, where central office equipment is involved, shall be coordinated with delivery of the equipment. The time of completion shall allow adequate drying time before the central office equipment is stored or installed in the building.

(c) The plans and specifications shall show the identification and date of the model code used for seismic safety design considerations, and the seismic factor used. See 7 CFR part 1792, subpart C.

(d) Two sets of the building plans and specifications shall be prepared and submitted to the GFR.

§ 1753.28  Contract amendments.

(a) The general requirements for contract amendments are set forth in §1753.11.

(b) The borrower shall prepare construction contract amendments on RUS Contract Form 238, Construction or Equipment Contract Amendments. See 7 CFR 1755.93 to obtain copies of Form 238.

§ 1753.29  Force account procedures.

(a) The borrower must obtain RUS approval of the force account method of construction of buildings in advance in order to obtain RUS financing.

(b) The borrower shall prepare the P&S in accordance with §1753.26.

(c) Prior to any construction activity or the purchase of materials or equipment, the borrower shall submit the FAP in duplicate to RUS, accompanied by a resolution indicating approval of the board of directors of the borrower or a letter signed by an authorized corporate official. The proposal shall include:

(1) A copy of the P&S.

(2) An itemized list of all items of materials required for construction.

(3) A construction schedule showing the estimated construction period for each major construction item.

(4) An estimate of the material and labor and other costs for any construction item not provided for in the approved loan.

(d) Force Account construction to be financed with loan funds shall not be started until RUS approval has been received by the borrower.
§ 1753.30 Closeout procedures.

(a) This section outlines the procedure to be followed to close out RUS Contract Form 257 (Contract to Construct Buildings) and construction or rehabilitation performed by the force account method.

(b) RUS Form 257 contract. (1) Whenever changes were made in the plans and specifications which did not require an amendment under conditions set forth in §1753.11 a final contract amendment showing the changes shall be prepared and submitted to RUS with the closeout documents.

(2) Immediately after completion of contract construction, including clean-up, the borrower shall:

(i) Arrange with its architect or engineer, contractor, and the GFR for final inspection of the project.

(ii) Furnish the contractor a summary of corrections or additions required to complete the project in accordance with the plans and specifications and the contract, and any contract amendments required to cover the corrections or additions.

(iii) Arrange, upon completion of the corrections by the contractor, to have its engineer prepare or obtain the documents listed in appendix A which are required for closeout of contract construction.

(iv) Make distribution of the completed documents as indicated in appendix A.

(c) Upon completion of force account construction, the borrower shall:

(1) Arrange with its architect or engineer and the GFR for final inspection of the project.

(2) Complete, with the assistance of its architect or engineer, the documents listed in appendix A of this part that are required for the closeout of force account construction.

(3) Make distribution of the completed documents as indicated in appendix A.

(d) Final payment shall not be made until RUS has approved the closeout documents.

§§ 1753.31—1753.35 [Reserved]

Subpart E—Purchase and Installation of Central Office Equipment

§ 1753.36 General.

(a) This subpart implements and explains the provisions of the Loan Documents setting forth the requirements and the procedures to be followed by borrowers in purchasing and installing central office equipment financed with loan funds.

(b) Terms used in this subpart are defined in §1753.2 and RUS Contract Forms 525 and 545.

(c) Borrowers shall use RUS Contract Form 525, Central Office Equipment Contract (Including Installation), when the firm supplying the equipment will install it and RUS Contract Form 545, Central Office Equipment Contract (Not Including Installation) when the supplier of the equipment will not be installing it. In either case the appropriate specifications shall be included in the contract.

(d) Alternates, if any, specified in the P&S shall be kept to a minimum.

(e) The borrower shall take sealed competitive bids for all central office equipment to be purchased under RUS Contract Form 525 or 545 using the procedure set forth in §1753.38(a), unless RUS approval to negotiate is obtained.

(f) The borrower may request permission to negotiate with a single supplier for additional central offices to standardize equipment on a system basis. RUS approval to negotiate must be obtained before release of the plans and specifications to the supplier. Except for remote switching terminals associated with an existing central office, RUS will not approve negotiation with a non-domestic manufacturer for the purpose of standardization because such a purchase does not meet the RE Act “Buy American” provisions.

(g) Materials and equipment must meet the standards and general specifications approved by RUS. Materials
§ 1753.37 Plans and specifications (P&S).

(a) General. (1) Prior to the preparation of P&S, the borrower shall review with the GFR the current and future requirements for central office equipment.

(2) The P&S shall specify the delivery and completion time required for each exchange.

(3) The P&S shall provide for a complement of spare parts to be provided to the borrower. The quantity and type of spare parts shall be determined in accordance with the provisions in RUS Form 522 “General Specification for Digital, Stored Program Controlled Central Office Equipment.”

(4) P&S for equipment to be provided under a Form 545 contract shall require the supplier to provide specific installation information and a detailed bonding and grounding plan to be utilized by the engineer, borrower, and others responsible for the installation of the equipment.

(b) Preparation of P&S. (1) The P&S shall include RUS Contract Form 525 or 545, Notice and Instructions to Bidders, specifications for the required equipment for each exchange, provision for spare parts, and all other pertinent data needed by the bidder to complete its proposal.

(2) Guidelines for the preparation of the detailed equipment specifications are contained in the Telecommunications Engineering and Construction Manual (TE&CM), which is available from RUS.

(c) Submission of P&S. (1) Two sets of the P&S shall be submitted to the GFR for RUS review.

(2) RUS will review the P&S and notify the borrower of approval or disapproval.

(3) After approval of the P&S, one copy will be returned to the borrower.

§ 1753.38 Procurement procedures.

(a) Sealed competitive bidding. Sealed competitive bidding of central office equipment shall be in two steps: presentation and evaluation of suppliers’ technical proposals, and compliance with the sealed competitive bidding procedure set forth in §1753.8(a). The procedure is as follows:

(1) Solicitation of bids. (i) After RUS approval of the specifications and equipment requirements, the borrower shall send “Notice and Instructions to Bidders” to suppliers selected by the borrower with central office equipment included in the current “List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers.” This “Notice” may also be sent to suppliers of non-domestic equipment currently accepted by RUS as meeting RUS technical standards. With RUS written approval, the “Notice” may also be sent to suppliers of central office equipment accepted for field trial.

(ii) The “Notice” must set forth the method of evaluating bids and must require the submission of equipment lists and traffic calculations with the bids.

(iii) RUS Contract Forms 525 or 545 shall be used, except that the “Notice” shall state that prior to the bid opening a technical session will be conducted with each supplier to resolve any questions related to the technical proposal submitted by the supplier. The suppliers’ technical proposals should be requested for presentation 30 days in advance of the bid opening to enable sufficient time to make the technical evaluation.

(iv) The borrower shall solicit bids as set forth in §1753.8(a)(2). The “Notice” shall be sent to at least three prospective bidders. A copy of the “Notice” and a list of such bidders shall be sent to RUS.
Rural Utilities Service, USDA
§ 1753.38

(v) At the request of an invited supplier, the borrower shall provide two copies of the approved P&S.

(2) Technical Sessions. (i) The borrower shall schedule individual technical sessions by the suppliers, notify each supplier of its scheduled date and time, and request the following be available at the technical session:

(A) Lists of equipment, material and software.
(B) Proposed floor plan.
(C) Power and heat dissipation calculations.
(D) List of exceptions to plans and specifications.
(E) Protection and grounding requirements.
(F) Description of how office administration, maintenance and traffic collection are handled with step-by-step examples and printouts.
(G) Explanation of processor and/or memory expansion required to meet ultimate size. This shall include discussions of software, processor memory, and hardware additions needed for line additions and the introduction of various future services; the relative costs of installing the necessary hardware and software initially as compared with the anticipated cost if installed at the time when the future services are to be offered.
(H) Description of how special equipment such as loop tests, volunteer fire alarm circuit, line load control, etc., will function.
(I) Description of method for translating initial office administration information into machine language, and proposal as to whether it will be done by the borrower or by the supplier.
(J) A software license agreement (if required by the manufacturer) in the form indicated in §1753.39(c).
(K) Any other items pertinent to the technical proposal, such as information regarding changes that have been made in hardware and software of the equipment that is of like manufacture to that presently in operation in the borrower’s system. This shall include requirements for additional spare parts or training which have developed as a result of significant change in system device technology.

(ii) The borrower shall invite the GFR to attend the technical sessions.

(iii) Changes in the P&S resulting from the technical sessions shall be subject to RUS’s review and approval.

(iv) If the technical proposal is not responsive, the borrower shall notify the supplier, in writing, that its proposal will not be given further consideration and why.

(v) Changes in the P&S resulting from the technical sessions shall be subject to RUS’s review and approval.

(vi) When fewer than three bidders are qualified to bid, RUS approval must be obtained to proceed. Generally, RUS will grant this approval only if all suppliers currently listed in the “List of Materials Acceptable for Use on Telephone Systems of RUS Borrowers” were invited to submit technical proposals.

(vii) The borrower shall invite the GFR to attend the technical sessions.

(3) Bidding and award of contract: (i) All bids must be completed, dated, and signed prior to submission.

(ii) The bid opening and award of contract shall be conducted in accordance with the procedure set forth in §1753.8(a).

(iii) The spare parts bid shall always be priced separately and added to the base bid when determining the low bidder.

(b) Single source negotiated procurement. If RUS has approved the borrower’s request to procure central office equipment through single source negotiation in accordance with requirements contained in §1753.36(f), the borrower shall proceed in accordance with this subsection.

(1) After RUS approval of the P&S and equipment requirements, the borrower shall send two complete copies of the approved P&S to the supplier and request that a proposal be submitted.

(ii) The borrower shall schedule a time and date for a technical session by the supplier and request that the items listed in §1753.38(a)(2)(i) be available at the technical session. In addition to these items, the supplier shall
be requested to provide a description of the exact differences in hardware and software between the borrower's existing equipment and the proposed equipment so that the borrower can determine spare parts interchangeability, need for retraining, and the compatibility of administration of the old and new equipment.

(3) Changes in the P&S resulting from the technical session shall be subject to RUS's review and approval.

(4) The submitted proposal shall be based on the agreed-upon results of the technical evaluation and must be complete, dated, and signed.

(5) The borrower shall obtain an award recommendation from its engineer based upon the engineer's detailed review of the proposal.

(6) The following shall be sent to RUS for review and approval:
   (i) A copy of the engineer's recommendation to the borrower, and
   (ii) Evidence of acceptance of the proposal by the borrower, such as:
      (A) A certified copy of the board resolution, or
      (B) A letter to RUS signed by an authorized corporate official.

(7) RUS approval of the proposal will be conditioned upon the borrower obtaining prices that are consistent with current competitive prices. Upon RUS approval of the proposal, three copies of the contract shall be prepared with all specifications and proposal documents, and performance bonds, to be executed by the supplier and borrower.

(8) The three complete, executed contracts shall be sent to the RUS Area Engineering Branch Chief for approval.

(9) If RUS approves the contract, one copy will be returned to the borrower and one copy will be sent to the supplier.

(10) Installation of the central office equipment and materials provided under RUS Contract Form 545 may be made in accordance with subpart I, if applicable, or by an approved Force Account Proposal (FAP).

(c) Software license agreement (Addendum 2). The Addendum in this paragraph to RUS Form 525, General Specification for Digital, Stored Program Controlled Central Office Equipment Contract (Including Installation), and RUS Form 545, Central Office Equipment Contract (Not Including Installation), must be used with any central office equipment contract that requires a software license agreement and for which RUS financial assistance is to be provided.

Addendum 2—Software License Agreement

(1) Definitions. For the purpose of this Software License Agreement—

   Contract means the RUS Form 525 Central Office Equipment Contract (Including Installation) or RUS Form 545 Central Office Equipment Contract (Not Including Installation), dated , between

   (the Licensee) and (the Licensor).

   Days means calendar days.

   Licensed Software means the computer programs, furnished for the operation of the System(s) provided under the Contract, whether contained on a tape, disc, semiconductor device, or other memory device or system memory consisting of logic instructions and instruction sequences in machine-readable object code, which manipulate data in the central processor, control and perform input/output operations, perform error diagnostic and recovery routines, control call processing, and perform peripheral control, administrative and maintenance functions; as well as Licensor's standard customer documentation, excluding source code, used to describe, maintain and use the programs provided under the Contract.

   Licensee and Licensor, respectively, mean the parties signing the software license agreement as the licensee and licensor.

   Right-to-Use Fee is defined in section (2).

   Specifications means the RUS Form 522, General Specification for Digital, Stored Program Controlled Central Office Equipment, which is part of the Contract.

   System means the stored program controlled central office and associated remote switching terminal or terminals which use the Licensed Software covered by this License.

(2) Software License Provisions. The Licensor may charge a fee, herein referred to as a Right-to-Use Fee, for use of the Licensed Software. The Right-to-Use Fee shall be included in the Total Base Bid as defined in the Contract. In consideration of the Right-to-Use Fee, the Licensor hereby grants the Licensee the right to use all Licensed Software, solely in connection with the System provided under this Contract, so that the System performs in accordance with the Contract and the Specifications.

   (i) The Licensee's right to use the Licensed Software is non-exclusive and limited to use or operation in the United States of America, including its Territories, the Federated
§ 1753.38

States of Micronesia, the Marshall Islands, Palau and the Commonwealth of Puerto Rico, with the System for which the Licensed Software is provided by the Licensor. The rights of the Licensee to use the equipment and its accompanying Licensed Software at another location within the Licensor’s System without obtaining additional approvals from the Licensor notify the Licensor, within ten (10) days, of the change in location of the equipment and Licensed Software.

(ii) The Licensee and any successor to the Licensee’s title in the System may, without further consent of the Licensor, transfer the Licensed Software and all of the Licensee’s rights and interests under this Software License to any transferee who acquires legal title to the System, provided that such transferee first agrees in writing to the Licensor to abide by all of the terms and conditions of this License including, without limitation, the territorial limitation stated in section (2)(ii), and the restrictions on decompiling or reverse assembly stated in section (2)(iii). Licensee shall give Licensor written notice thirty (30) days prior to any transfer. The Licensor shall not place any additional conditions on the transferee’s use of the System or the Licensed Software. If the provisions of this section (2)(ii) are satisfied, thereafter the Licensee shall bear no responsibility for transferee’s failure to abide by the terms and conditions of this License.

(iii) The Licensee shall take reasonable steps to protect the confidentiality of the Licensed Software and shall not decompile or reverse assemble all or any part of the Licensed Software to generate source code. The Licensee shall not make the Licensed Software available to any person except on a need to know basis. The obligations of the Licensee hereunder shall not extend to any information or data relating to the Licensed Software which is now available to the general public or becomes available by reason of the acts of the Licensor or third parties.

(iv) The Licensee may reproduce or copy the Licensed Software and related materials solely for the purpose of archival backup, in-house training and operating, maintenance, and administering the System provided under this Contract. In such reproduction, the Licensee shall include, upon all such copies of the Licensed Software, all proprietary notices, including the copyright notice within the Licensed Software program and related documentation in the form in which it is received from the Licensor.

(v) The Licensee acknowledges that the Licensed Software program is the property of the Licensor, and shall not do, or cause to be done, anything to activate any of the subsisting nonactivated computer instruction steps therein unless authorized in writing by the Licensor. The Licensor shall have the exclusive right to activate, or authorize the activation of, the subsisting nonactivated program instruction steps in the Licensed Software. In this event Licensee shall pay any additional Right-To-Use Fee(s) agreed to by Licensee and Licensor.

(vi) In the event the Licensor develops significant improvements to the Licensed Software, the Licensor may market the improvements as a separate offering requiring payment of an additional Right-To-Use Fee.

(vii) The Licensee shall not modify or otherwise change the Licensed Software other than at the direction of the Licensor. This provision shall not apply to:

(A) Changes to the Licensed Software which are necessary to preserve or restore service. Licensee shall use all reasonable efforts to contact Licensor before making any such changes. If the Licensor is unable to make the necessary changes promptly to the Licensed Software to preserve or restore service, then the Licensee may make only such changes to the Licensed Software as are necessary to preserve or restore service. In such event, Licensee shall promptly notify Licensor of the changes made by Licensee.

(B) Changes made by the Licensee to its own database; and

(C) Changes made by the Licensee in connection with the exercise of its rights under section (2)(x).

(viii) Within thirty (30) days after written notice that a program or a release thereof has been discontinued and is no longer required for the operation of the System and the Licensor has furnished the Licensee with a new program that is fully satisfactory to the Licensee, the Licensee agrees to return the original and all copies of the discontinued program and specified related documents. If such return is impossible or impractical, the Licensee shall destroy said program and documents and provide the Licensor with a written notice of such destruction.

(ix) The Licensor warrants to the Licensee that any Software licensed under this Software License shall function for a period of five (5) years from the warranty start date defined in the Contract in accordance with the Specifications and any written or printed technical material provided by the Licensor to explain the operation of the Licensed Software and aid in its use. The Licensor shall correct all deficiencies within thirty (30) days from the date of receipt by the Licensor of written notice of such deficiencies from the Licensee. An extension of this thirty (30) day period may be allowed only if agreed upon by the Licensee and RUS. It shall be the Licensor’s obligation to insert and thoroughly test, at no charge to the Licensee, any software amendment or alteration provided to satisfy the obligations of this section (2)(ix). If a deficiency is detected or a correction made within the final ninety (90) days of the warranty, the warranty shall
be extended to a date ninety (90) days after the deficiency has been corrected.

(x) The Licensor shall hold harmless and indemnify the Licensee from any and all claims or actions for the infringement of any patent, copyright, trademark, or violation of trade secrets covering any Licensed Software used with the System except for infringement of the Licensor’s design or selection. If the Licensee’s use of the Licensed Software is enjoined, the Licensor shall promptly, at its own expense, place the Licensee in a position where it is able to use the System in accordance with the Specifications, whether by:

(A) Modifying the Licensed Software or portion thereof so that it no longer infringes but remains functionally equivalent,

(B) Replacing the Licensed Software with noninfringing equivalent software,

(C) Obtaining for the Licensee a license or other right to use, or

(D) Such other actions as may be required.

This shall be in addition to any other rights or claims which the Licensee may have. The Licensor shall, at its own expense, (and the Licensee agrees to permit the Licensor to do so) defend any suits which may be instituted by any party against the Licensee for alleged infringement of patents, copyright, trademark, or violation of trade secrets relative to the Licensor’s performance hereunder. Either party shall notify the other promptly of any such claims, and the Licensee shall give to the Licensor full authority and opportunity to settle such claims, and shall reasonably cooperate with the Licensor in obtaining information relative to such claims.

(xi) In the event the Licensor becomes unwilling or unable to furnish support required by the Contract for the Licensed Software, the Licensor shall, upon written request of the Licensee, provide with the greatest possible dispatch all Licensed Software back-up documentation including proprietary information other than agreed excluded documentation. In this event, (3) the Licensee shall be permitted full use of all Licensed Software and documentation as long as the System is operational and (2) the Licensee may modify, or have modified, the Licensed Software for feature enhancement or proper equipment operation and becomes the owner of such modifications for all purposes, including patenting, copywriting, sale, or license thereof. Agreed excluded documentation is Licensed Software back-up documentation described in the first sentence of this section (2)(xi) which (A) is proprietary information of a third party, (B) was specifically described at the pre-bid technical session and individually identified in an attachment to the Bid, and (C) RUS and the Licensee agree, before bids are opened, may be excluded from the requirements of this section (2)(xi). In the event the Licensor furnishes agreed excluded documentation and the Licensee exercises its rights under this section (2)(xii), the Licensor shall use its best efforts to provide such agreed excluded information to the Licensee, or obtain continuing support agreements for the requirements of this section (2)(xii), including legal rights to the excluded documentation. Licensor agrees that certain Licensed Software cannot be excluded from the requirements of this section (2)(xii) and, but not limited to, software, the absence or improper operation of which would significantly impair the operation of the System, would significantly impair the ability of the Licensee to generate revenue, or would pose a risk to RUS loan security.

(xii) A breach of this License by the Licensor is a breach of the Contract. Therefore, the remedies specified in the Contract shall apply.

(xiii) The Licensee shall have thirty (30) days after receipt of written notice from the Licensor to correct any breach of this License. Damages payable by the Licensee for its breach of this License shall not exceed the total Contract price. The Licensor shall not terminate this License unless:

(A) The Licensor has given RUS sixty (60) days notice before termination; and

(B) RUS agrees with the Licensor that termination is the only method available to prevent significant harm to the Licensor from additional Licensee defaults.

(xiv) The obligations of Licensee and Licensor and any successors in title under this Agreement shall survive the termination of this Agreement and continue after any termination of rights granted hereunder.

(xv) Licensee and Licensor agree that it will not, without the prior written permission of the other party, use in advertising, publicity, packaging, labeling, or otherwise, any trade name, trademark, trade device, service mark, symbol, or any other identification or any abbreviation, contraction, or simulation thereof owned by the other party or any of its affiliates or used by the other party or any of its affiliates to identify any of their products or services, unless otherwise agreed by the parties.

(xvi) This Software License Agreement shall prevail notwithstanding any conflicting terms or legends which may appear on or in the Licensed Software.

(xvii) If any Section or part thereof, in this Agreement shall be held to be invalid or unenforceable in any jurisdiction in which this Agreement is being performed, then the meaning of such section or part shall be construed so as to render it enforceable, to the extent feasible; and if no feasible interpretation would save such section or part, it shall be severed from this Agreement and the remainder shall remain in full force and effect. However, in the event such section or part is considered an essential element of this Agreement, the parties shall promptly negotiate a replacement therefor.
§ 1753.39 Closeout documents.

Closeout of RUS Contract Form 525, Central Office Equipment Contract (Including Installation), and RUS Contract Form 545, Central Office Equipment Contract (Not Including Installation), shall be conducted as follows:

(a) Contract amendments. The borrower shall prepare and arrange for the execution and submission to RUS of any required contract amendments so that any changes in either contract will have been approved prior to the time the closeout documents are prepared. RUS Contract Form 238, Construction or Equipment Contract Amendment, shall be used for this purpose.

(b) Taxes. Under the terms of RUS Contract Forms 525 and 545, the bid prices do not include any amounts which are or may be payable by the bidder or the borrower on account of taxes imposed upon the sale, purchase or use of equipment, material and software covered by the contracts. If any such tax is paid by the bidder, the contract requires that the amount is to be stated separately on all invoices and paid by the borrower.

(c) Acceptance tests. The borrower will perform acceptance tests as part of the partial closeout and final closeout of RUS Contract Form 525. Tests that will demonstrate compliance with the requirements of 7 CFR 1755.522 are contained in RUS Bulletin 1753E-201. Other tests demonstrating compliance will be acceptable. RUS Bulletin 1753E-201 is available from RUS, Program Support and Regulatory Analysis, STOP 1522, 1400 Independence Ave. SW., Washington, DC 20250-1522.

(d) Grounding system audit. A grounding system audit shall be performed and found acceptable for equipment provided under Form 525 and 545 Contracts, prior to placing a central office or remote switching terminal into full service operation. The audits are to be

(xviii) This Software License and any amendments thereto, or revisions thereof, are subject to RUS approval.

conducted in accordance with guidelines contained in the applicable sections of RUS Form 522 “General Specification for Digital, Stored Program Controlled Central Office Equipment.” The audits shall be performed by the contractor and borrower for Form 525 equipment and by the borrower for Form 545 equipment.

(e) Partial Closeout Procedure. Under conditions set forth in RUS Contract Form 525, a contractor may, when approved by the borrower, receive payment in full for central offices and their respective associated remote switching terminals upon completion of the installation without awaiting completion of the project where the contractor is to receive such payment, the procedure contained in the applicable sections of RUS Contract Form 525 shall be followed. In addition to complying with the appropriate partial closeout procedure contained in RUS Contract Form 525, the borrower shall:

(1) Assemble and distribute the closeout documents specified in appendix B.
(2) Submit one copy of Form 754 to RUS with the FRS, requesting the remaining funds due the contractor on the central offices and associated remote switching terminals involved.
(3) On receipt of the advance of loan funds, make prompt payment to the contractor.

(f) Final Contract Closeout Procedure. The documents required for the final closeout of the central office equipment contracts, RUS Contract Forms 525 and 545, are listed in appendix B, which also indicates the number of copies and their distribution. The procedure to be followed is outlined below:

(1) The borrower shall:
   (i) Immediately following completion of the last central office equipment installation, arrange with the contractor’s installer, connecting company (where necessary), and the GFR for performance of the acceptance tests of offices not previously tested. The date for testing should be established so that the installer will not be required to return to the site for the sole purpose of assisting in these tests. Acceptance tests shall be performed within 30 days of completion of the installation, unless otherwise requested in writing by the contractor and approved in writing by the borrower.
   (ii) When the acceptance tests have been satisfactorily completed and the contractor has corrected all the discrepancies:
      (A) Prepare and assemble the documents listed in appendix B, Documents Required to Close Out Central Office Equipment Contracts.
      (B) Notify the GFR that the project is ready for final RUS inspection.
   (iii) Make the documents listed in appendix B available for GFR review on the date of final inspection.
   (iv) Distribute the documents as indicated in appendix B, including submission to the GFR of all documents required by RUS.

(2) The documents required and the procedure to be used for equipment purchased and/or installations made using the method of minor construction are set forth in subpart I.

(g) Final payment shall be made according to the payment terms of the contract.

§§ 1753.40—1753.45 [Reserved]

Subpart F—Outside Plant Major Construction by Contract

§ 1753.46 General.

(a) This subpart implements and explains the provisions of the loan documents setting forth the requirements and procedures to be followed by borrowers when outside plant major construction by contract is financed by loan funds. Terms used in this subpart are defined in §1753.2 and RUS Contract Form 515.

(b) The contract method for major construction is described in §1753.5(b).

(c) The two contract forms which may be used for major outside plant construction are Form 515 and Form 773. Limitations on the applicability of these forms shall be as follows:
(1) Form 515 shall be used for major outside plant construction projects which will be competitively bid. The contract contains plans and specifications and has no dollar limitation. See §§1753.47, 1753.48 and 1753.49.

(2) A Form 515 contract which is for less than $200,000, may, at the borrower’s option, be negotiated. See §1753.48(b).

(3) Form 773 shall be used for major outside plant projects which may not be competitively bid, and which cannot be designed and staked at the time of contract execution. Projects of this nature include routine line extensions and placement of subscriber drops. The Form 773 contract is limited to a maximum of $200,000. In any twelve month period, RUS will not finance more than $400,000, or ten percent (10%) of the borrower’s previous year’s outside plant total construction, whichever is greater, in Form 773 contracts for a borrower. This limitation includes all major and minor outside plant construction performed under Form 773 contracts, and is determined by the date the Form 773 contract is executed. See 7 CFR §1753.50.

§ 1753.47 Plans and specifications (P&S).

(a) General. (1) Prior to the preparation of P&S for the construction project:

(i) A review shall be made of the outside plant requirements, and the Loan Design (LD) shall be revised to reflect any needed changes (See §1753.3).

(ii) Deviations from the approved LD (7 CFR part 1737) must be approved by RUS (See §1753.3).

(2) The standard RUS specifications required for construction of outside plant facilities are:

(i) RUS Form 515a (Bulletin 345-150)—Specifications and Drawings for Construction of Direct Buried Plant.

(ii) RUS Form 515c (Bulletin 345-151)—Specifications and Drawings for Conduit and Manhole Construction.

(iii) RUS Form 515d (Bulletin 345-150)—Specifications and Drawings for Underground Cable Installation.

(iv) RUS Form 515f (Bulletin 345-153)—Specifications and Drawings for Construction of Pole Lines and Aerial Cables.

(v) RUS Form 515g (Bulletin 345-154)—Specifications and Drawings for Service Entrance and Station Protector Installation.

(b) Preparation of plans and specifications. Each set of plans and specifications shall include:

(1) RUS Contract Form 515, “Telephone System Construction Contract (Labor and Materials).”

(2) The specifications described in paragraph (a)(2) of this section as specified by the borrower in the RUS Contract Form 515.

(3) Description of special assembly units and guide drawings, if any.

(4) Key, detail, and cable layout maps.

(5) RUS Contract Form 787, “Supplement A to Construction Contract, RUS Contract Form 515,” when the borrower proposes to provide any materials to the contractor. The borrower shall not order materials for a contractor without RUS approval. In such cases the borrower must attach Form 787 and a “List of Owner’s Materials on Hand” and/or a “List of Materials Ordered by Owner but Not Delivered” to contract Form 515 (See §1753.48(f) of this part). Any materials furnished under Supplement A shall be listed in RUS Bulletin 344-2 unless special RUS approval has been received by the borrower to use unlisted materials.

(c) Submission of plans and specifications to RUS. (1) Two sets of the plans and specifications and one copy of the “Check List for Review of Plans and Specifications,” RUS Form 553, OMB control number 0572-0062, signed by the borrower’s engineer, shall be furnished to the GFR.

(2) If RUS approves the P&S, RUS will return one set to the borrower.

§ 1753.48 Procurement procedures.

(a) Sealed competitive bidding—(1) Qualifying bidders. (i) The borrower is responsible for selecting qualified contractors to bid on the project.
§ 1753.48

7 CFR Ch. XVII (1-1-98 Edition)

§ 1753.8(a)(3). Questions relating to bidders' qualifications shall be resolved prior to the pre-bid conference.

(ii) RUS Form 274 or its equivalent, supplemented by RUS Form 276, shall be used for the submission of bidders' qualifications for all types of construction and for the required information on the bidder and subcontractors.

(2) Invitations to bid— The borrower shall solicit bids as set forth in §1753.8(a)(2). Invitations shall be sent to at least 6 prospective bidders.

(3) Pre-bid conference. (i) Representatives of the borrower and its engineer shall be present at the pre-bid conference at the time and place designated in the Notice to Bidders. The borrower shall invite the GFR to attend the pre-bid conference.

(ii) The purpose of the pre-bid conference is to acquaint the bidders with the scope and special considerations of the project and to clarify any concerns the bidders may have.

(iii) No proposals shall be considered from bidders that do not attend the pre-bid conference unless the bidder has been notified by the engineer that such bidder's attendance has been waived. Attendance can be waived if, in the judgment of the engineer, the bidder would gain no additional understanding of the construction project by attending the pre-bid conference.

(iv) The borrower shall obtain from the engineer the minutes of the pre-bid conference and shall distribute them to all potential bidders.

(v) When fewer than three bidders have been qualified to submit bids, RUS written approval must be obtained to proceed with requesting bids.

(4) Bid openings. (i) Bid openings and award of contract shall be conducted in accordance with §1753.8(a).

(ii) Two copies of the assembly unit sections of the apparent lowest responsive bid accepted by the borrower shall be sent to RUS.

(b) Negotiated bidding. (1) Competitive bids are not required for outside plant construction that is estimated to cost less than $200,000 labor and materials. The borrower shall obtain RUS approval of the plans and specifications before it selects the contractor for negotiated bidding.

(2) The procedures to be followed are contained in §1753.8(b) and paragraphs (3) and (4) of this section.

(3) Negotiation conference. (i) The borrower shall schedule a conference to be attended by representatives of the engineer, the borrower and the contractor selected for negotiations. The borrower shall invite the GFR to attend this conference.

(ii) The purpose of the negotiation conference is to acquaint the contractor with the scope and special considerations of the project and to answer any questions.

(iii) The borrower shall obtain from the engineer notes covering the negotiation conference and shall distribute them to all attendees.

(4) Two copies of the assembly unit sections of the negotiated contractor's proposal shall be sent to the GFR for approval.

(c) Contract amendments. The borrower shall prepare contract amendments in accordance with §1753.11 on RUS Contract Form 526, Construction Contract Amendment.

(d) Subcontracts. The RUS requirements for subcontracts and the procedures to be followed are set forth in §1753.9.

(e) Preconstruction conference. The borrower shall conduct a conference, attended by the borrower, contractor, subcontractors, resident engineer, and the GFR, prior to the beginning of cable placement, to resolve any questions pertaining to the construction. Results of the conference shall be provided to each conference participant (See §1753.10).

(f) Owner-furnished materials. When the borrower furnishes materials under RUS Contract Form 787, Supplement A to Construction Contract, these steps shall be followed:

(1) Materials on hand to be furnished by the borrower shall be released to the contractor at the start of construction. Materials on order but not received shall be provided to the contractor as they become available. The borrower shall obtain from the contractor a written receipt for all such materials delivered.

(2) Materials on hand, until released to the contractor, shall be covered by fire and either wind-storm or extended
§ 1753.50 Construction by Form 773 contract.

(a) The borrower shall prepare the contract form and provide such details of construction as may be available. Compensation may be based upon unit prices, hourly rates, or another mutually agreeable basis.

(b) Neither the selection of the contractor nor the contract requires RUS approval.

(c) Borrowers are urged to obtain quotations from several contractors before entering into a contract to be assured of obtaining the lowest cost.

(d) The borrower must ensure that the contractor selected meets all Federal and State requirements, and that the contractor maintains the insurance coverage required by the contract for the duration of the work. See 7 CFR part 1788.

(e) The borrower shall finance major construction under the Form 773 contract with general funds and obtain reimbursement with loan funds when construction is completed and an executed Form 771 has been submitted to RUS.

(f) If the contract exceeds $100,000, a contractor’s bond shall be required. See 7 CFR part 1788.
§ 1753.51—1753.55  
(g) When the construction is completed to the borrower’s satisfaction, the borrower shall obtain from the contractor a final invoice and an executed copy of RUS Form 743, Certificate of Contractor and Indemnity Agreement.

(h) The closeout document for the Form 773 contract is RUS Form 771. See §1753.81 for the requirements for completing Form 771.

(i) An original and two copies of Form 771 shall be sent to the GFR. The GFR may inspect the construction, and will initial and return the original and one copy to the borrower.

(j) The original Form 771 shall be submitted with an FRS to RUS only in conjunction with a request for an advance of loan funds for the work.

[59 FR 43717, Aug. 25, 1994]

§§ 1753.51—1753.55 [Reserved]

Subpart G—Outside Plant Major Construction by Force Account

§ 1753.56 General.

(a) This subpart implements and explains the provisions of the loan documents setting forth the requirements and the procedures to be followed by borrowers for outside plant major construction by the force account method with RUS loan funds. Terms used in this subpart are defined in §1753.2 and RUS Contract Form 515.

(b) A borrower shall not use the force account method for construction financed with loan funds unless prior RUS approval has been obtained.

(c) Generally, RUS will not approve the force account method for major outside plant construction for the initial loan to a borrower.

(d) The Force Account Proposals (FAPs) shall be subject to review and approval by RUS.

(e) The FAP is approved by RUS on the basis of estimated labor and material costs. The FAP is closed based on the borrower’s actual cost of performing the construction. RUS will provide loan funds only up to the amount determined by the completed assembly units priced at the unit prices in the approved FAP.

(Approved by the Office of Management and Budget under control number 0672-0062)

§ 1753.57 Procedures.

(a) The request. (1) The borrower shall submit to RUS a certified copy of the board resolution or a letter signed by an authorized corporate official requesting approval to use the force account method of construction. The request shall state the advantages of the force account method of construction and provide the following information:

(i) The scope of the construction to be undertaken, stating briefly the facilities and equipment to be installed and other pertinent data.
