PROHIBITION ON HANDLING

§ 993.48 Regulation.

No handler shall handle prunes except in accordance with the provisions of this part.

[30 FR 9799, Aug. 6, 1965]

GRADE AND SIZE REGULATIONS

§ 993.49 Incoming regulation.

(a) No handler shall receive prunes from producers or dehydrators, other than substandard prunes and undersized prunes, unless such prunes meet the minimum standards for natural condition prunes set forth in § 993.97 (Exhibit A), or as such standards may be modified, or the more restrictive grade regulation established pursuant to this section, and then in effect: *Provided*, That no handler shall receive any prunes (including substandard prunes and undersized prunes) from producers or dehydrators unless such prunes have been properly dried and cured in original natural condition, without the addition of water, and are free from active insect infestation, so that they are capable of being received, stored, and packed without material deterioration or spoilage. Any "high moisture content prunes," as described in the exception in § 993.5(b), in the possession of a handler, shall be held separate and apart from any prunes held by him. If such "high moisture content prunes" are dried or dehydrated to a point where they are capable of being stored, without material deterioration or spoilage, unrefrigerated or not otherwise artificially preserved, they shall be deemed, at that time, to have been received by such handler as prunes, and shall be subject to all of the conditions and restrictions of this subpart.
