AUTHORITY: 43 U.S.C. 1711–1712.

SOURCE: 48 FR 20368, May 5, 1983, unless otherwise noted.

Subpart 1601—Planning

§ 1601.0-1 Purpose.

The purpose of this subpart is to establish in regulations a process for the development, approval, maintenance, amendment and revision of resource management plans, and the use of existing plans for public lands administered by the Bureau of Land Management.

§ 1601.0-2 Objective.

The objective of resource management planning by the Bureau of Land Management is to maximize resource values for the public through a rational, consistently applied set of regulations and procedures which promote the concept of multiple use management and ensure participation by the public, state and local governments, Indian tribes and appropriate Federal agencies. Resource management plans are designed to guide and control future management actions and the development of subsequent, more detailed and limited scope plans for resources and uses.

§ 1601.0-3 Authority.

These regulations are issued under the authority of sections 201 and 202 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1711–1712); the Public Rangelands Improvement Act of 1978 (43 U.S.C. 1901); section 3 of the Federal Coal Leasing Amendments Act of 1976 (30 U.S.C. 201(a)); sections 522, 601, and 714 of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*); and the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*).

§ 1601.0-4 Responsibilities.

(a) National level policy and procedure guidance for planning shall be

§ 1601.0-5

43 CFR Ch. II (10-1-99 Edition)

provided by the Secretary and the Director.

(b) State Directors shall provide quality control and supervisory review, including plan approval, for plans and related environmental impact statements and shall provide additional guidance, as necessary, for use by District and Area managers. State Directors shall file draft and final environmental impact statements associated with resource management plans and amendments.

(c) Resource management plans, amendments, revisions and related environmental impact statements shall be prepared by District or Area Managers, and approved by State Directors. In general, Area Managers will be responsible for directly supervising the preparation of the plan, and the District Manager for providing general direction and guidance to the planning effort.

§ 1601.0-5 Definitions.

As used in this part, the term:

(a) *Areas of Critical Environmental Concern* or *ACEC* means areas within the public lands where special management attention is required (when such areas are developed or used or where no development is required) to protect and prevent irreparable damage to important historic, cultural, or scenic values, fish and wildlife resources, or other natural systems or processes, or to protect life and safety from natural hazards. The identification of a potential ACEC shall not, of itself, change or prevent change of the management or use of public lands.

(b) *Conformity or conformance* means that a resource management action shall be specifically provided for in the plan, or if not specifically mentioned, shall be clearly consistent with the terms, conditions, and decisions of the approved plan or plan amendment.

(c) *Consistent* means that the Bureau of Land Management plans will adhere to the terms, conditions, and decisions of officially approved and adopted resource related plans, or in their absence, with policies and programs, subject to the qualifications in §1615.2 of this title.

(d) *Guidance* means any type of written communication or instruction that

transmits objectives, goals, constraints, or any other direction that helps the District and Area Managers and staff know how to prepare a specific resource management plan.

(e) *Local government* means any political subdivision of the State and any general purpose unit of local government with resource planning, resource management, zoning, or land use regulation authority.

(f) *Multiple use* means the management of the public lands and their various resource values so that they are utilized in the combination that will best meet the present and future needs of the American people; making the most judicious use of the lands for some or all of these resources or related services over areas large enough to provide sufficient latitude for periodic adjustments in use to conform to changing needs and conditions; the use of some lands for less than all of the resources; a combination of balanced and diverse resource uses that takes into account the long term needs of future generations for renewable and non-renewable resources, including, but not limited to, recreation, range, timber, minerals, watershed, wildlife and fish, and natural scenic, scientific and historical values; and harmonious and coordinated management of the various resources without permanent impairment of the productivity of the lands and the quality of the environment with consideration being given to the relative values of the resources and not necessarily to the combination of uses that will give the greatest economic return or the greatest unit output.

(g) *Officially approved and adopted resource related plans* means plans, policies, programs and processes prepared and approved pursuant to and in accordance with authorization provided by Federal, State or local constitutions, legislation, or charters which have the force and effect of State law.

(h) *Public* means affected or interested individuals, including consumer organizations, public land resource users, corporations and other business entities, environmental organizations and other special interest groups and officials of State, local, and Indian tribal governments.

Bureau of Land Management, Interior

§ 1610.1

(i) *Public lands* means any lands or interest in lands owned by the United States and administered by the Secretary of the Interior through the Bureau of Land Management, except lands located on the Outer Continental Shelf and lands held for the benefit of Indians, Aleuts and Eskimos.

(j) *Resource area* means a geographic portion of a Bureau of Land Management district. It is the administrative subdivision whose manager has primary responsibility for day-to-day resource management activities and resource use allocations and is, in most instances, the area for which resource management plans are prepared and maintained.

(k) *Resource management plan* means a land use plan as described by the Federal Land Policy and Management Act. The resource management plan generally establishes in a written document:

(1) Land areas for limited, restricted or exclusive use; designation, including ACEC designation; and transfer from Bureau of Land Management Administration;

(2) Allowable resource uses (either singly or in combination) and related levels of production or use to be maintained;

(3) Resource condition goals and objectives to be attained;

(4) Program constraints and general management practices needed to achieve the above items;

(5) Need for an area to be covered by more detailed and specific plans;

(6) Support action, including such measures as resource protection, access development, realty action, cadastral survey, etc., as necessary to achieve the above;

(7) General implementation sequences, where carrying out a planned action is dependent upon prior accomplishment of another planned action; and

(8) Intervals and standards for monitoring and evaluating the plan to determine the effectiveness of the plan and the need for amendment or revision.

It is not a final implementation decision on actions which require further specific plans, process steps, or deci-

sions under specific provisions of law and regulations.

§ 1601.0-6 Environmental impact statement policy.

Approval of a resource management plan is considered a major Federal action significantly affecting the quality of the human environment. The environmental analysis of alternatives and the proposed plan shall be accomplished as part of the resource management planning process and, wherever possible, the proposed plan and related environmental impact statement shall be published in a single document.

§ 1601.0-7 Scope.

(a) These regulations apply to all public lands.

(b) These regulations also govern the preparation of resource management plans when the only public land interest is the mineral estate.

§ 1601.0-8 Principles.

The development, approval, maintenance, amendment and revision of resource management plans will provide for public involvement and shall be consistent with the principles described in section 202 of the Federal Land Policy and Management Act of 1976. Additionally, the impact on local economies and uses of adjacent or nearby non-Federal lands and on non-public land surface over federally-owned mineral interests shall be considered.

Subpart 1610—Resource Management Planning

§ 1610.1 Resource management planning guidance.

(a) Guidance for preparation and amendment of resource management plans may be provided by the Director and State Director, as needed, to help the District and Area Manager and staff prepare a specific plan. Such guidance may include the following:

(1) National level policy which has been established through legislation, regulations, executive orders or other Presidential, Secretarial or Director approved documents. This policy may include appropriately developed resource management commitments, such as a right-of-way corridor crossing

§ 1610.2

several resource areas, which are not required to be reexamined as part of the planning process.

(2) Analysis requirements, planning procedures and other written information and instructions required to be considered in the planning process.

(3) Guidance developed at the State Director level, with necessary and appropriate governmental coordination as prescribed by §1610.3 of this title. Such guidance shall be reconsidered by the State Director at any time during the planning process that the State Director level guidance is found, through public involvement or other means, to be inappropriate when applied to a specific area being planned.

(b) A resource management plan shall be prepared and maintained on a resource area basis, unless the State Director authorizes a more appropriate area.

(c) An interdisciplinary approach shall be used in the preparation, amendment and revision of resource management plans as provided in 40 CFR 1502.6. The disciplines of the preparers shall be appropriate to the values involved and the issues identified during the issue identification and environmental impact statement scoping stage of the planning process. The District or Area Manager may use any necessary combination of Bureau of Land Management staff, consultants, contractors, other governmental personnel, and advisors to achieve an interdisciplinary approach.

§ 1610.2 Public participation.

(a) The public shall be provided opportunities to meaningfully participate in and comment on the preparation of plans, amendments and related guidance and be given early notice of planning activities. Public involvement in the resource management planning process shall conform to the requirements of the National Environmental Policy Act and associated implementing regulations.

(b) The Director shall, early in each fiscal year, publish a planning schedule advising the public of the status of each plan in process of preparation or to be started during that fiscal year, the major action on each plan during that fiscal year and projected new

43 CFR Ch. II (10–1–99 Edition)

planning starts for the 3 succeeding fiscal years. The notice shall call for public comments on projected new planning starts so that such comments can be considered in refining priorities for those years.

(c) Upon starting the preparation, amendment or revision of resource management plans, public participation shall be initiated by a notice published in the FEDERAL REGISTER and appropriate media, including newspapers of general circulation in the State, adjoining States where the District Manager deems it appropriate, and the District. This notice may also constitute the scoping notice required by regulation for the National Environmental Policy Act (40 CFR 1501.7). This notice shall include the following:

(1) Description of the proposed planning action;

(2) Identification of the geographic area for which the plan is to be prepared;

(3) The general types of issues anticipated;

(4) The disciplines to be represented and used to prepare the plan;

(5) The kind and extent of public participation opportunities to be provided;

(6) The times, dates and locations scheduled or anticipated for any public meetings, hearings, conferences or other gatherings, as known at the time;

(7) The name, title, address and telephone number of the Bureau of Land Management official who may be contacted for further information; and

(8) The location and availability of documents relevant to the planning process.

(d) A list of individuals and groups known to be interested in or affected by a resource management plan shall be maintained by the District Manager and those on the list shall be notified of public participation activities. Individuals or groups may ask to be placed on this list. Public participation activities conducted by the Bureau of Land Management shall be documented by a record or summary of the principal issues discussed and comments made.

The documentation together with a list of attendees shall be available to the

Bureau of Land Management, Interior

§ 1610.3-1

public and open for 30 days to any participant who wishes to clarify the views he/she expressed.

(e) At least 15 days' public notice shall be given for public participation activities where the public is invited to attend. Any notice requesting written comments shall provide for at least 30 calendar days for response. Ninety days shall be provided for review of the draft plan and draft environmental impact statement. The 90-day period shall begin when the Environmental Protection Agency publishes a notice of the filing of the draft environmental impact statement in the FEDERAL REGISTER.

(f) Public notice and opportunity for participation in resource management plan preparation shall be appropriate to the areas and people involved and shall be provided at the following specific points in the planning process:

(1) General notice at the outset of the process inviting participation in the identification of issues (See §§ 1610.2(c) and 1610.4-1);

(2) Review of the proposed planning criteria (See § 1610.4-2);

(3) Publication of the draft resource management plan and draft environmental impact statement (See § 1610.4-7);

(4) Publication of the proposed resource management plan and final environmental impact statement which triggers the opportunity for protest (See §§ 1610.4-8 and 1610.5-1(b)); and

(5) Public notice and comment on any significant change made to the plan as a result of action on a protest (See § 1610.5-1(b)).

(g) Copies of an approved resource management plan and amendments shall be reasonably available for public review. This includes copies at the State Office for the District, the District Manager's Office, the Area Office for lands directly involved and additional locations determined by the District Manager. Plans, amendments and revisions shall be published and single copies shall be available to the public upon request during the public participation process. After approval, a fee may be charged for additional copies at a rate established by the Director.

(h) Supporting documents to a resource management plan shall be avail-

able for public review at the office where the plan was prepared.

(i) Fees for reproducing requested documents beyond those used as part of the public participation activities and other than single copies of the printed plan amendment or revision may be charged according to the Department of the Interior schedule for Freedom of Information Act requests in 43 CFR part 2.

(j) When resource management plans involve areas of potential mining for coal by means other than underground mining, and the surface is privately owned, the Bureau of Land Management shall consult with all surface owners who meet the criteria in § 3400.0-5 of this title. Contact shall be made in accordance with subpart 3427 of this title and shall provide time to fully consider surface owner views. This contact may be made by mail or in person by the District or Area Manager or his/her appropriate representative. A period of at least 30 days from the time of contact shall be provided for surface owners to convey their preference to the Area or District Manager.

(k) If the plan involves potential for coal leasing, a public hearing shall be provided prior to the approval of the plan, if requested by any person having an interest which is, or may be, adversely affected by implementation of such plan. The hearing shall be conducted as prescribed in § 3420.1-5 of this title and may be combined with a regularly scheduled public meeting. The authorized officer conducting the hearing shall:

(1) Publish a notice of the hearing in a newspaper of general circulation in the affected geographical area at least once a week for 2 consecutive weeks;

(2) Provide an opportunity for testimony by anyone who so desires; and

(3) Prepare a record of the proceedings of the hearing.

§ 1610.3 Coordination with other Federal agencies, State and local governments, and Indian tribes.

§ 1610.3-1 Coordination of planning efforts.

(a) In addition to the public involvement prescribed by § 1610.2 of this title

§ 1610.3-1

43 CFR Ch. II (10-1-99 Edition)

the following coordination is to be accomplished with other Federal agencies, State and local governments, and Indian tribes. The objectives of the coordination are for the State Directors and District and Area Managers to keep apprised of non-Bureau of Land Management plans; assure that consideration is given to those plans that are germane in the development of resource management plans for public lands; assist in resolving, to the extent practicable, inconsistencies between Federal and non-Federal government plans; and provide for meaningful public involvement of other Federal agencies, State and local government officials, both elected and appointed, and Indian tribes in the development of resource management plans, including early public notice of proposed decisions which may have a significant impact on non-Federal lands.

(b) State Directors and District and Area Managers shall provide other Federal agencies, State and local governments, and Indian tribes opportunity for review, advice, and suggestion on issues and topics which may affect or influence other agency or other government programs. To facilitate coordination with State governments, State Directors should seek the policy advice of the Governor(s) on the timing, scope and coordination of plan components; definition of planning areas; scheduling of public involvement activities; and the multiple use opportunities and constraints on public lands. State Directors may seek written agreements with Governors or their designated representatives on processes and procedural topics such as exchanging information, providing advice and participation, and timeframes for receiving State government participation and review in a timely fashion. If an agreement is not reached, the State Director shall provide opportunity for Governor and State agency review, advice and suggestions on issues and topics that the State Director has reason to believe could affect or influence State government programs.

(c) In developing guidance to District Managers, in compliance with section 1611 of this title, the State Director shall:

(1) Ensure that it is as consistent as possible with existing officially adopted and approved resource related plans, policies or programs of other Federal agencies, State agencies, Indian tribes and local governments that may be affected, as prescribed by § 1610.3-2 of this title;

(2) Identify areas where the proposed guidance is inconsistent with such policies, plans or programs and provide reasons why the inconsistencies exist and cannot be remedied; and

(3) Notify the other Federal agencies, State agencies, Indian tribes or local governments with whom consistency is not achieved and indicate any appropriate methods, procedures, actions and/or programs which the State Director believes may lead to resolution of such inconsistencies.

(d) A notice of intent to prepare, amend, or revise a resource management plan shall be submitted, consistent with State procedures for coordination of Federal activities, for circulation among State agencies. This notice shall also be submitted to Federal agencies, the heads of county boards, other local government units and Tribal Chairmen or Alaska Native Leaders that have requested such notices or that the responsible line manager has reason to believe would be concerned with the plan or amendment. These notices shall be issued simultaneously with the public notices required under § 1610.2(b) of this title.

(e) Federal agencies, State and local governments and Indian tribes shall have the time period prescribed under § 1610.2 of this title for review and comment on resource management plan proposals. Should they notify the District or Area Manager, in writing, of what they believe to be specific inconsistencies between the Bureau of Land Management resource management plan and their officially approved and adopted resources related plans, the resource management plan documentation shall show how those inconsistencies were addressed and, if possible, resolved.

(f) When an Advisory Council has been formed under section 309 of the Federal Land Policy and Management Act for the district in which the resource area is located, that council

Bureau of Land Management, Interior

§ 1610.4-1

shall be informed and their views sought and considered throughout the resource management planning process.

§ 1610.3-2 Consistency requirements.

(a) Guidance and resource management plans and amendments to management framework plans shall be consistent with officially approved or adopted resource related plans, and the policies and programs contained therein, of other Federal agencies, State and local governments and Indian tribes, so long as the guidance and resource management plans are also consistent with the purposes, policies and programs of Federal laws and regulations applicable to public lands, including Federal and State pollution control laws as implemented by applicable Federal and State air, water, noise, and other pollution standards or implementation plans.

(b) In the absence of officially approved or adopted resource-related plans of other Federal agencies, State and local governments and Indian tribes, guidance and resource management plans shall, to the maximum extent practical, be consistent with officially approved and adopted resource related policies and programs of other Federal agencies, State and local governments and Indian tribes. Such consistency will be accomplished so long as the guidance and resource management plans are consistent with the policies, programs and provisions of Federal laws and regulations applicable to public lands, including, but not limited to, Federal and State pollution control laws as implemented by applicable Federal and State air, water, noise and other pollution standards or implementation plans.

(c) State Directors and District and Area Managers shall, to the extent practicable, keep apprised of State and local governmental and Indian tribal policies, plans, and programs, but they shall not be accountable for ensuring consistency if they have not been notified, in writing, by State and local governments or Indian tribes of an apparent inconsistency.

(d) Where State and local government policies, plans, and programs dif-

fer, those of the higher authority will normally be followed.

(e) Prior to the approval of a proposed resource management plan, or amendment to a management framework plan or resource management plan, the State Director shall submit to the Governor of the State(s) involved, the proposed plan or amendment and shall identify any known inconsistencies with State or local plans, policies or programs. The Governor(s) shall have 60 days in which to identify inconsistencies and provide recommendations in writing to the State Director. If the Governor(s) does not respond within the 60-day period, the plan or amendment shall be presumed to be consistent. If the written recommendation(s) of the Governor(s) recommend changes in the proposed plan or amendment which were not raised during the public participation process on that plan or amendment, the State Director shall provide the public with an opportunity to comment on the recommendation(s). If the State Director does not accept the recommendations of the Governor(s), The State Director shall notify the Governor(s) and the Governor(s) shall have 30 days in which to submit a written appeal to the Director of the Bureau of Land Management. The Director shall accept the recommendations of the Governor(s) if he/she determines that they provide for a reasonable balance between the national interest and the State's interest. The Director shall communicate to the Governor(s) in writing and publish in the FEDERAL REGISTER the reasons for his/her determination to accept or reject such Governor's recommendations.

§ 1610.4 Resource management planning process.

§ 1610.4-1 Identification of issues.

At the outset of the planning process, the public, other Federal agencies, State and local governments and Indian tribes shall be given an opportunity to suggest concerns, needs, and resource use, development and protection opportunities for consideration in the preparation of the resource management plan. The District and Area Manager shall analyze those suggestions, plus available district records of

§ 1610.4-2

43 CFR Ch. II (10-1-99 Edition)

resource conditions, trends, needs and problems, and select topics and determine the issues to be addressed during the planning process. Issues may be modified during the planning process to incorporate new information. The identification of issues shall also comply with the scoping process required by regulations implementing the National Environmental Policy Act (40 CFR 1501.7).

§ 1610.4-2 Development of planning criteria.

The District or Area Manager shall prepare criteria to guide development of the resource management plan or revision, to ensure that it is tailored to the issues previously identified and to ensure that unnecessary data collection and analyses are avoided. Planning criteria shall generally be based upon applicable law, Director and State Director guidance, the results of public participation and coordination with other Federal agencies, State and local governments and Indian tribes. Proposed planning criteria, including any significant changes, shall be made available for public comment prior to being approved by the District manager for use in the planning process. Planning criteria may be changed as planning proceeds, based on public suggestions and the findings of the various studies and assessments.

§ 1610.4-3 Inventory data and information collection.

(a) The District or Area Manager shall arrange for resource, environmental, social, economic and institutional data and information to be collected, or assembled if already available. New information and inventory data collection will emphasize significant issues and decisions with the greatest potential impact. Inventory data and information shall be collected in a manner that aids application in the planning process, including subsequent monitoring requirements.

§ 1610.4-4 Analysis of the management situation.

The District or Area Manager shall analyze the inventory data and other information available to determine the ability of the resource area to respond

to identified issues and opportunities. The analysis of the management situation shall provide, consistent with multiple use principles, the basis for formulating reasonable alternatives, including the types of resources for development or protection. Factors to be considered may include, but are not limited to:

(a) The types of resource use and protection authorized by the Federal Land Policy and Management Act and other relevant legislation;

(b) Opportunities to meet goals and objectives defined in national and State Director guidance;

(c) Resource demand forecasts and analyses relevant to the resource area;

(d) The estimated sustained levels of the various goods, services and uses that may be attained under existing biological and physical conditions and under differing management practices and degrees of management intensity which are economically viable under benefit cost or cost effectiveness standards prescribed in national or State Director guidance;

(e) Specific requirements and constraints to achieve consistency with policies, plans and programs of other Federal agencies, State and local government agencies and Indian tribes;

(f) Opportunities to resolve public issues and management concerns;

(g) Degree of local dependence on resources from public lands;

(h) The extent of coal lands which may be further considered under provisions of § 3420.2-3(a) of this title; and

(i) Critical threshold levels which should be considered in the formulation of planned alternatives.

§ 1610.4-5 Formulation of alternatives.

All reasonable resource management alternatives shall be considered and several complete alternatives developed for detailed study. The alternatives developed shall reflect the variety of issues and guidance applicable to the resource uses. In order to limit the total number of alternatives analyzed in detail to a manageable number for presentation and analysis, all reasonable variations shall be treated as sub-alternatives. One alternative shall be

Bureau of Land Management, Interior

§ 1610.5-1

for no action, which means continuation of present level or systems of resource use. The plan shall note any alternatives identified and eliminated from detailed study and shall briefly discuss the reasons for their elimination.

§ 1610.4-6 Estimation of effects of alternatives.

The District or Area Manager shall estimate and display the physical, biological, economic, and social effects of implementing each alternative considered in detail. The estimation of effects shall be guided by the planning criteria and procedures implementing the National Environmental Policy Act. The estimate may be stated in terms of probable ranges where effects cannot be precisely determined.

§ 1610.4-7 Selection of preferred alternative.

The District or Area Manager shall evaluate the alternatives and the estimation of their effects according to the planning criteria, and develop a preferred alternative which shall best meet Director and State Director guidance. The preferred alternative shall be incorporated into the draft resource management plan and draft environmental impact statement. The resulting draft resource management plan and draft environmental impact statement shall be forwarded to the State Director for approval, publication, and filing with the Environmental Protection Agency. This draft plan and environmental impact statement shall be provided for comment to the Governor of the State involved, and to officials of other Federal agencies, State and local governments and Indian tribes that the State Director has reason to believe would be concerned. This action shall constitute compliance with the requirements of § 3420.1-7 of this title.

§ 1610.4-8 Selection of resource management plan.

After publication of the draft resource management plan and draft environmental impact statement, the District Manager shall evaluate the comments received and select and recommend to the State Director, for su-

perisory review and publication, a proposed resource management plan and final environmental impact statement. After supervisory review of the proposed resource management plan, the State Director shall publish the plan and file the related environmental impact statement.

§ 1610.4-9 Monitoring and evaluation.

The proposed plan shall establish intervals and standards, as appropriate, for monitoring and evaluation of the plan. Such intervals and standards shall be based on the sensitivity of the resource to the decisions involved and shall provide for evaluation to determine whether mitigation measures are satisfactory, whether there has been significant change in the related plans of other Federal agencies, State or local governments, or Indian tribes, or whether there is new data of significance to the plan. The District Manager shall be responsible for monitoring and evaluating the plan in accordance with the established intervals and standards and at other times as appropriate to determine whether there is sufficient cause to warrant amendment or revision of the plan.

§ 1610.5 Resource management plan approval, use and modification.

§ 1610.5-1 Resource management plan approval and administrative review.

(a) The proposed resource management plan or revision shall be submitted by the District Manager to the State Director for supervisory review and approval. When the review is completed the State Director shall either publish the proposed plan and file the related environmental impact statement or return the plan to the District Manager with a written statement of the problems to be resolved before the proposed plan can be published.

(b) No earlier than 30 days after the Environmental Protection Agency publishes a notice of the filing of the final environmental impact statement in the FEDERAL REGISTER, and pending final action on any protest that may be filed, the State Director shall approve the plan. Approval shall be withheld on any portion of a plan or amendment being protested until final action has

§ 1610.5-2

been completed on such protest. Before such approval is given, there shall be public notice and opportunity for public comment on any significant change made to the proposed plan. The approval shall be documented in a concise public record of the decision, meeting the requirements of regulations for the National Environmental Policy Act of 1969 (40 CFR 1505.2).

§ 1610.5-2 Protest procedures.

(a) Any person who participated in the planning process and has an interest which is or may be adversely affected by the approval or amendment of a resource management plan may protest such approval or amendment. A protest may raise only those issues which were submitted for the record during the planning process.

(1) The protest shall be in writing and shall be filed with the Director. The protest shall be filed within 30 days of the date the Environmental Protection Agency published the notice of receipt of the final environmental impact statement containing the plan or amendment in the FEDERAL REGISTER. For an amendment not requiring the preparation of an environmental impact statement, the protest shall be filed within 30 days of the publication of the notice of its effective date.

(2) The protest shall contain:

(i) The name, mailing address, telephone number and interest of the person filing the protest;

(ii) A statement of the issue or issues being protested;

(iii) A statement of the part or parts of the plan or amendment being protested;

(iv) A copy of all documents addressing the issue or issues that were submitted during the planning process by the protesting party or an indication of the date the issue or issues were discussed for the record; and

(v) A concise statement explaining why the State Director's decision is believed to be wrong.

(3) The Director shall promptly render a decision on the protest. The decision shall be in writing and shall set forth the reasons for the decision. The decision shall be sent to the protesting party by certified mail, return receipt requested.

43 CFR Ch. II (10-1-99 Edition)

(b) The decision of the Director shall be the final decision of the Department of the Interior.

§ 1610.5-3 Conformity and implementation.

(a) All future resource management authorizations and actions, as well as budget or other action proposals to higher levels in the Bureau of Land Management and Department, and subsequent more detailed or specific planning, shall conform to the approved plan.

(b) After a plan is approved or amended, and if otherwise authorized by law, regulation, contract, permit, cooperative agreement or other instrument of occupancy and use, the District and Area Manager shall take appropriate measures, subject to valid existing rights, to make operations and activities under existing permits, contracts, cooperative agreements or other instruments for occupancy and use, conform to the approved plan or amendment within a reasonable period of time. Any person adversely affected by a specific action being proposed to implement some portion of a resource management plan or amendment may appeal such action pursuant to 43 CFR 4.400 at the time the action is proposed for implementation.

(c) If a proposed action is not in conformance, and warrants further consideration before a plan revision is scheduled, such consideration shall be through a plan amendment in accordance with the provisions of §1610.5-5 of this title.

(d) More detailed and site specific plans for coal, oil shale and tar sand resources shall be prepared in accordance with specific regulations for those resources: Group 3400 of this title for coal; Group 3900 of this title for oil shale; and part 3140 of this title for tar sand. These activity plans shall be in conformance with land use plans prepared and approved under the provisions of this part.

§ 1610.5-4 Maintenance.

Resource management plans and supporting components shall be maintained as necessary to reflect minor changes in data. Such maintenance is
